double your comfort

Until Dunlop's invention of the pneumatic tyre, travel by road was apt to be a highly uncomfortable experience No wonder a bicycle in those days was nicknamed the 'bone-shaker' Today s Dunlop tyres—the last word in safe, pleasurable motoring—embody the accumulated experience of tyre making since the world's first pneumatic tyre

Another Dunlop invention, Dunlopillo latex foam cushioning now makes possible a great advance in travelling comfort The foam structure gives continuous ventilation, keeping the cushioning cool during use Sit relaxed on magic Dunlopillo—and watch the miles fly past

PHYSIOGRAPHY

GEOGRAPHICALLY the mass of land today called India consists of the territories contained in the Union of India the Portuguese possessions of Goa, Daman, Diu and the French possessions of Mahe, Karikal, Pondicherry and Yanam

The Union of India (also referred to as the Republic of India) consists of the following 29 States The names in brackets are of the capitals of the states

Andhra (Kurnool)* Assam (Shillong) Bihar (Patna) Bombay (Bombay) Madhya Pradesh formerly called CP and Berar (Nagpur) Madras (Madras) Orissa (Cuttack) Punjab (Chandigarh) Uttar Pradesh formerly called United Provinces (Lucknow) West Bengal (Calcutta) Hyderabad (Hyderabad) Jammu and Kashmir (Srinagar) Madhya Bharat (Gwalior) Mysore (Bangalore) Patiala and East Punjab States Union (Patiala) Rajasthan (Jaipur) Saurashtra (Rajkot) Travancore Cochin (Trivandrum) Madhya Pradesh (Rewa) Ajmer (Ajmer) Bilaspur (Simla) Bhopal (Bhopal) Coorg (Mercara) Delhi (Delhi) Himachal Pradesh (Simla) Kutch (Bhuj) Manipur (Imphal) Tripura (Agartala), Andaman and Nicobar Islands (Port Blair)

Some of these States have what is called a summer capital The names of the summer capitals are given in brackets

Bihar (Ranchi) Bombay (Poona) Madhya Pradesh (Pachmarhi) Madras (Ootacamund) Punjab (Simla) Uttar Pradesh (Naini Tal) West Bengal (Darjeeling) Jammu and Kashmir (Gulmarg) Madhya Bharat (Indore)

(It may be stated here that the movement to the summer capital is not always as complete as it used to be)

India is about 1 700 miles from east to west and about 2 000 miles from north to south Its land frontier is about 7 000 miles long and the sea frontier about 4 000 miles The total land area is 1 260 640 sq miles The total population is 356 879 041† which is a little less than one sixth of the population of the whole world

In shape India is like a triangle with its base resting on the Himalaya Mountains in the north and its apex running far into the ocean in the south At the southern extremity the triangle tapers with a pear shaped curve to a point called Cape Comorin

India lies entirely to the north of the equator From south to north including Kashmir it stretches from 8° north latitude to 37° north latitude with the Tropic of Cancer cutting it roughly into two halves West to east it stretches from about 66° 20' east longitude to 97° east longitude

Broadly speaking India is shut off from the mainland of Asia by the Himalaya Mountains the highest mountain range in the world Going from west to east along the country's land frontier are Pakistan Chinese Turkestan Tibet China, Burma and Pakistan In the south the country is surrounded on all sides by water—the Arabian Sea in the west the Indian Ocean in the south and the Bay of Bengal in the east

India is so vast and diversified that expressions like average rainfall average temperature have no meaning The average annual rainfall in the Thar desert is 4 inches while that in Cherrapunji is 425 Similarly places in Kashmir have a minimum temperature of 40° F while places in Rajasthan have recorded a maximum temperature of 120° F So one can only speak of local averages rather than of national averages

Compared with the size of the country the coast line is short as there are few bays or inlets Hence there are also very few harbours The fact is the west coast is rocky and the sea is deep near the coast, while in the east the sea is extremely shallow so that big ocean going ships have to weigh anchor at some distance from the shore The only so-called natural harbours are Bombay and Goa while Madras Vishakapatnam and Port Okha are examples of purely artificial harbours built by human enterprise

The principal ports in India are (going from west to east along the coast) Bedi Bunder Port Okha Porbandar Surat Bombay Marmagao Mangalore Kozhikode (Calicut) Cochin Alleppey Quilon Tuticorin Dhanushkodi Nagapattinam Karikal Cuddalore Pondicherry Madras Masulipatnam Kakinada Vishakapatnam and Calcutta Of these Karikal and Pondicherry belong to France Marmagao belongs to Portugal while the rest are in the Republic of India It may also be mentioned that the new harbour at Kandla in Kutch is now in use

MOUNTAIN WALL

India can be divided into three natural regions —1 the mountain wall 2 the Plain of Hindustan and 3 the Indian Plateau

Let us take the mountain wall first From the Pamir Knot in the far north two mountain ranges radiate one in the south east and easterly direction called the Himalayas and the other in a south western direction reaching almost down to the sea called the Sulaiman Range in the north and the Kirthar Range in the south In the east the mountain wall between India and Burma is called by different names in different places In the north for instance it is known as the Patkoi Hills further south as the Naga Hills In Assam it is called Jaintia Khasi and Garo Southward are the Lushai Hills then lastly there are the Arakan Yoma which finally reach the sea at Cape Negrais and continue in the Andaman and Nicobar Islands

Of the various ranges which constitute the mountain wall of India the Himalayas are the most noteworthy Extending like a scimitar for a distance of 1 500 miles along the northern frontiers of the country they form the loftiest mountain range in the whole world and contain many of the highest mountain peaks Mount Everest 29 002 ft Mount Godwin Austen 28 250 ft and Kanchenjunga 28 146 ft

There are no easy ways in and out through the mountain wall which but off India from the rest of Asia but there are a few difficult passes In the very north are the Zoji La and the Shipki La's which lead out of Kashmir and Punjab respectively Then from Shipki right down to Darjeeling there are no passes in the mountain wall Across the Burma frontier again there are a few routes but they are of little use for purposes of communication

The following is a more detailed description of the mountain region

In the east on the border of Burma the mountain wall is much lower Here it can more accurately be described as a range of hills rather than of mountains This region is wet, forested and very thinly populated The region round about Cherrapunji in Assam has the highest rainfall in the world

Then from Darjeeling to Kashmir are the Himalayas proper over 1 500 miles in length and 150 to 300 miles in breadth The Himalayas are thus not a mountain chain in the proper sense of the word They can be described as a series of parallel but converging ranges intersected by valleys and big plateaus On the whole the slopes of the mountains facing India are very steep while those facing north are much more gentle We say on the whole because though the eastern Himalayas (in West Bengal and Bihar) rise abruptly from the plains in the west (western Uttar Pradesh and the Punjab) the rise from the plains is a little more gradual Hence the Himalayas themselves can be further sub divided into three parallel zones the Great Himalayas with an average elevation of 20 000 ft always covered with snow, the Lesser Himalayas the middle range with an average elevation of 15 000 feet and finally the Outer Himalayas lying between the Lesser Himalayas and the plains with an average elevation of about 3 000 feet The last are a sort of foot hills to the Great Himalayas and are usually described as forming the sub Himalayan region, a region which extends from eastern Bihar to the Punjab all along the Plain of Hindustan

In the north the altitude of the range is much lower there are few peaks which exceed a height of 20 000 feet The Punjab Himalayas are comparatively dry and the snow line is much higher than elsewhere The northern slopes are bare while the southern slopes are forested

Two of the longitudinal valleys which separate the mountain ranges are worth a note They are the Vale of Kashmir and the valley of Khatmandu in Nepal Both the valleys are fertile extensive and from a tourist's point of view a dream of beauty

Thus it is clear the whole region possesses great variety in climate and a range of vegetation stretching from the tropics to the poles

The north mountain wall has a tremendous influence on the physiography of the country On the one hand it keeps out the bitterly cold winds which blow from Central Asia and Tibet during the winter and on the other it intercepts the moisture laden winds which blow from the sea in the south so that the northern plains of the country have rain during the monsoon Second the melting snow and rain falling on the mountains go to form the chief source for the water of the rivers which flow from the Himalayas Hence the rivers of Hindustan never go completely dry in the summer

PLAIN OF HINDUSTAN

Geologically the Ganges plain can be considered as the fore deep of the mountains to the north of it This fore deep extends thousands of feet below the sea level though since its formation it has been filled in by deposit In the east this deposit consists of alluvial material from the mountains in the west it consists of material blown by the wind All through the deposit is fine grained made up chiefly of muds and sands

The Plain of Hindustan extends from the Bay of Bengal in the east to the Pakistan frontier in the west that is to say it is about 1 900 miles long and from 150 to 500 miles broad Throughout this vast tract of land not a hill can be seen The slope from the mountains to the sea is so gradual that about 100 miles from the mouth of the River Ganges the surface is no more than 300 feet above sea level

The Plain of Hindustan is probably the most important part of the country For one thing, it contains some of the richest soil in the world Second it is on the Plain of Hindustan that the whole drama of race conflict and race assimilation was played out a drama which finally shaped the political and cultural destiny of both India and its neighbour Pakistan

Going into more detail the Plain of Hindustan is formed by the basins of three distinct river systems In the far west are the Beas and Sutlej tributaries of the Indus draining into the Arabian Sea Further east is the River Ganges with its tributaries the Jamuna Ogra Rapti and Gandak which flows south eastwards into the Bay of Bengal The capital of the Indian Republic Delhi stands on the water shed between the Indus and the Ganges river basins The third of the three river systems the Brahmaputra rises beyond the Himalayas turns east and enters India at its eastern extremity and joins the Ganges before reaching the Bay of Bengal The Brahmaputra has no important tributaries

On the Himalayas these rivers are rushing roaring torrents cutting their way through steep and rocky gorges But when they reach

* Provisional

† Excluding Kashmir, the population of which is estimated at 4 41 millions

the vast plains they broaden out and wander slowly till they get to the sea The land is so flat that the rivers sometimes leave their old beds and cut out new channels flooding the surrounding area

The rivers of Hindustan are notable in three respects 1 They give a constant supply of water, 2 The land through which they flow is broad, flat and fertile and eminently suitable for irrigation, 3 Because water flows perennially they are navigable through the greater part of the year

As we go from west to east in the plain rainfall increases and so do the fertility of the soil and the density of population

The whole plain can be sub divided according to climate into a number of natural regions There are first the plains of the north west, comprising Punjab State, a dry area depending on the irrigation canals of the rivers Beas and Sutlej for its water Second, there is the valley of the Upper Ganges covering the major part of Uttar Pradesh a comparatively dry region which depends for its cultivation on the irrigation canals of the Ganges and the Jamuna Third we have the valley of the middle Ganges embracing the State of Bihar, which is an intermediate zone, with both wet and dry cultivation As we go further east we have the lower valley of the Ganges, which includes the whole of West Bengal, a wet region with considerable rainfall growing rice and jute

INDIAN PLATEAU

The third of the natural regions into which the country is divided is called the Indian Plateau because it comprises a three sided table land covering the whole of the country in the south except for two narrow coastal strips in the east and the west The Indian Plateau is marked off from the Plain of Hindustan by a confused mass of hill ranges running with a general direction of east to west Three of these ranges have been distinguished by the names of Vindhyas Satpuras and Ajantas respectively They stand from 1 500 feet to over 4 000 feet high and though pierced by road and railway at the present time were not easy to cross in the old days and thus formed a barrier of hill and jungle between the northern and the southern portions of the country

The Indian Plateau is higher in the west and the south than in the east and north Along the western and eastern edge of the plateau run the Western and Eastern Ghats They start southward, from the extremities of the Vindhya mountain system and run along the western and eastern coasts of the country and unite to form a sort of upheaved angle towards their southern extremity The Western Ghats run through the State of Bombay and ascend to an average height of about 3,000 feet while some of the peaks are anything between 5,000 feet and 9,000 feet high The Eastern Ghats stretch down the State of Madras and have an average elevation of 1 500 feet The inner triangular plateau which the Western and Eastern Ghats form far in the south is seamed with little ranges of hills exceeding 4,000 feet in height the best known among which are the Nilgiris It is on the Nilgiris that Ootacamund the famous summer capital of Madras State stands

Drainage Systems —There are three systems of drainage in the Indian Plateau—one towards the north, the second towards the west and the third towards the east The drainage from the northern or Vindhya edge of the plateau falls into the Ganges Two rivers Narmada and Tapti carry the rainfall of the southern slopes of the Vindhya and Satpura mountains respectively in almost parallel lines into the Arabian Sea Further south, as we have already stated the plateau is much higher in the west than the east So the drainage has to make its way across the whole breadth of the plateau eastwards until it falls into the Bay of Bengal The most important rivers are the Mahanadi the Godavari, the Krishna and the Cavery These rivers differ from the rivers of the Plain of Hindustan in three ways 1 They are fed only by the monsoon rains and therefore do not yield a constant supply of water, 2 Their valleys are less suitable for irrigation, 3 And finally, they are not navigable for certain seasons in the year when parts of the river dry up

From a geological point of view the Indian Plateau consists mainly of very old crystalline rocks—much older than the Himalayan fold mountains On some of the edges of the plateau in the north east for instance, are areas of sedimentary rocks from which the country obtains most of its coal About nine tenths of the coal resources of India lie in Jharia in Bihar and Raniganj in West Bengal, though coal bearing beds are also found in the valley of the Godavari and the northern slopes of the Vindhyas The north west of the plateau is covered by vast stretches of lava called the Deccan lavas This region is one of the largest areas of lava in the world, covering as it does an area of 250,000 square miles with a total thickness of several thousand feet In spite of the great extent of the lavas there are few or no signs of volcano In the rest of the Plateau valuable minerals occur here and there among old crystalline rocks Gold is obtained in Kolar, manganese in Vishakapatnam, Mysore and Madhya Pradesh, copper and iron in Bihar and Orissa, mica in Andhra and the south east The point about diamonds is of some interest They occur in sand stones or conglomerate in Panna in Vindhya Pradesh or Kurnool in Andhra though no diamond bearing igneous rocks are found

Natural Regions —From the point of view of climate and vegetation the Indian Plateau can be divided into ten natural regions There are first of all the coastal regions round the plateau In the north covering part of the State of Bombay is the Gujarat region moderately dry and hilly in places Further south is the west coast region covering part of Bombay and part of Madras, narrow and wet In the east is the Carnatic or Tamil region comprising part of Madras, moderately wet but wider than in the west In the north is what is called the Northern Circars region covering part of Andhra and part of Orissa, also moderately wet Then there are the dry regions lying to the north of the Vindhya mountains sloping downwards to the plains of the Ganges There are the Thar or Great Indian Desert the Rajasthan uplands dry and hilly and the Central Indian Plateau comprising part of Madhya Pradesh Finally there is a third group of regions which can be distinguished, all lying in the Indian Peninsula proper *These are first the southern part of the plateau* covering the whole of Mysore and parts of Madras and Bombay, dry, somewhat barren and thinly populated, second the Deccan lavas region in the north west, containing parts of Bombay, *Hyderabad and Madhya Pradesh* dry but with fertile black soil suitable for cotton and moderately thickly populated and lastly the north eastern Plateau covering parts of Bihar, Madhya Pradesh and Orissa This last mentioned region has moderate rainfall, is thinly populated, but thickly forested The inhabitants are mainly concentrated in two river valleys

Ceylon is the only important island lying off the coast of India to which it is joined by a line of sand flats collectively called Adam's Bridge But Ceylon is politically *separate from the sub continent* Two groups of very small islands in the Bay of Bengal, the Andamans and the Nicobars, and one group in the Arabian Sea the Laccadives are part of the Republic of India So is the quasi-island of Kutch off the Kathiawar Peninsula in western India Kutch is a dry, rocky, treeless country

VEGETATION

India is thickly populated and so over a greater part of the country the natural vegetation has been removed The country has no distinctive botanical features peculiar to itself Where the rain-fall is more than 80 inches a year there are ever green forests on the hills The wood from these forests is hard but the forests have not yet been commercially exploited These evergreen forests are chiefly found on the slopes of the Western Ghats, the wetter eastern parts of the Himalayas up to a level of 5,000 feet, and in Assam

Where the rain fall is less than 80 inches but more than 40 we have what are called the monsoon forests so called because the trees in these forests lose their leaves in the dry season The monsoon forests are very valuable, because they contain two of the most useful kinds of tree, the teak and the sal The teak is found chiefly in the western parts of the country while the sal is obtained in the lower slopes of the Himalayas and the north east of the Plateau Where the rainfall is less than 40 inches, in the drier parts of the country we find small thorny trees, sometimes so small that they are more like bushes than like trees In the driest parts where the land is desert or semi-desert even bushes cannot grow There we find plants with thick fleshy stems and long roots As we go up the mountains too the vegetation changes In the higher reaches of the mountains above 5,000 feet in the south, and 3 000 feet in the north the forests are similar to those found in temperate lands Some of the trees have broad leaves and are like the oak while others are tall and have needle shaped leaves like the pine

On the highest parts of the mountains it is too cold and too dry for trees to grow and so we find only small bushes and short grass

Along the sea coasts and in the great river deltas where the land is flat and muddy grows a kind of tree called mangrove These trees are most frequent in the deltas of the River Ganges where they are called Sundarbans

There is not much grass land in India though in the hills in the monsoon grass patches can be seen

The main cultivated plants include rice, wheat, pulses and grains Among the important seeds grown are castor, sesamum and ground nut The chief fruit trees include mango, coconut, areca nut and certain citrus fruit Apples peaches, pears apricots and walnuts are confined chiefly to the Himalaya valleys There are tea plantations over large areas on the mountains in the north east and south, while coffee, cardamom, pepper and rubber are extensively grown in the south In some of the damper regions the cinchona is successfully cultivated

ANIMALS

Just as natural vegetation has disappeared over the greater part of the land so have a great many wild animals The lion, for instance, was not uncommon within historical times in the north Today it is confined wholly, to the Gir forest in Junagadh in Saurashtra

The most famous among the wild animals which survive are the tiger and the elephant The leopard or panther is more common than the tiger and equally destructive of life and property The cheetah or the hunting leopard is found only in the Deccan and is generally trained for hunting the antelope Other wild Indian animals of the cat family are the marbled cat and the jungle cat

In the open country side wolves are plentiful and usually prey on sheep The Indian fox is comparatively scarce but the jackal is very common The wild dog is found in the denser jungles and generally hunts in packs Among other dogs are the pariah common in the south, and the greyhound used for hunting

The black bear is common wherever rocky hills and forests occur It lives on ants, honey and fruit and may often prove dangerous The Himalayan bear which is found only in the north, stays in the mountains during the summer but comes lower down during the winter

The rhinoceros found in the country are of three different types, two have a single horn and one has double The rhinoceros are commonest in the Brahmaputra valley and in the Sundarbans With the rhinoceros might be mentioned the crocodile which can be very dangerous specially in the rivers of the north The wild hog is also well-known in certain parts of the country and is very destructive of crops

In the remote parts of the deserts of Kutch is found the wild ass but its contacts with man are few Many wild varieties of sheep and goat are met with in the mountain ranges of the north

The antelope proper is more widely distributed On the coasts of Gujarat and Orissa, for instance, a herd of does accompanied by a single buck is a common sight The nilgai can also be found almost everywhere The sambar is confined to hill forests, while the spotted deer is considered to be the most beautiful animal of the Indian jungle

In the Western Ghats, and in the hill jungles of Assam and Madhya Pradesh is found the bison It is a fierce animal and almost as dangerous to hunt as the tiger Akin to the bison is the wild buffalo very common in Assam

The rat and the mouse are a perpetual nuisance The bandicoots some of which can be as long as 2 feet burrow under stores and godowns and are often deadly to plants, fruit or grain

The reptiles abound in garden and jungle and even intrude into dwelling places specially during the rains Thousands of people die every year in the country side of snake bite The most dreaded of the reptiles is the cobra There is another variety called Russel's viper whose bite is equally fatal Generally speaking the salt water snakes are dangerous while the fresh water ones are harmless The bigger variety scorpion which abounds in parts of Madras is a domestic terror

Of all the wild animals in the country the elephant is the most interesting as well as the most useful It generally lives in the wilder parts of the monsoon forests and being an intelligent animal can be trained to do heavy work such as dragging great logs of wood, or arranging them in neat piles The elephant is also excellent as a transport animal as it can push its way through the thickest jungle where roads cannot be built

Domestic Animals—So much for the wild animals Among the domestic animals the most useful are the oxen It is estimated that there are about 145 million cattle in India Milk is not a staple article of food and the oxen are chiefly used for ploughing or drawing carts The bullocks are more valuable than the cows though in certain parts like Uttar Pradesh dairy farming is an important industry One handicap is that in most areas fodder has to be specially grown for the cattle

There are 50 million buffaloes in the country The buffalo is stronger than the bullock and is chiefly used for ploughing The she buffalo is the typical dairy animal

There are 38 million sheep in the country But they are a very poor specimen and do not give good wool or meat Sheep are most numerous in Madras and live chiefly on waste land which is not good enough for cattle Goats (50 million) are found everywhere because it does not take much to keep them alive They can feed on the poorest grass or shrub and so find enough to eat even in the driest parts of the country

There are 3 236 million horses, ponies and donkeys, most of which are used as draught animals Mules, donkeys and camels are also used for purposes of transport mules and donkeys on the hilly parts and camels in the sandy desert The total number of live stock in the country is 264 429 millions

The birds of India though not as gorgeous as those of some other tropical lands deserve mention The parrot is easily the most beautiful of the Indian birds The peacock is another beautiful bird, while the maina like the parrot lives happily in a cage and talks well Of the vulture there are four varieties which include the common scavenger There are many types of eagle too and some of the falcons can be trained for hawking A bird much sought after for its plumage is the kingfisher and among the birds which are hunted for their flesh are pigeons, ducks, partridges, plover quail and snipe The jungle fowl, however, is not considered good for eating

There are many beautiful butterflies in India, while among the more useful insects are the bee the silk worm, the *coccus laca*, that is, the insect which gives lac Certain varieties of Indian moth and ant are very destructive Locust invasions are not frequent but when they appear they leave complete destruction behind them Mosquitoes abound everywhere

In India fish is eaten fresh as methods of fish preservation are either primitive or not practised Among the edible Indian fishes are the carp family and the cat fishes But the most delicious is the hilsa which is also a rich food A fish which is found in all hill streams is the mahseer

BASIC FACTS ABOUT INDIA*

Some basic facts may be shown more prominently as follows For more details see under individual sections

Land area 1 269 640 sq miles population (without Jammu and Kashmir and Part B Tribal Areas of Assam) 356 879 394 birth rate death rate infant mortality rate for 1950 24 8 16, 127 1, Literacy (1951) 16 6

National income (1948 49) Rs 8 710 crores average per capita income for agriculture Rs 500 average per capita income for mining, manufacturing hand trades Rs 800, for commerce, transport and communications Rs 1,600, for other services Rs 1 100

Area of India (1949 50) 811 million acres total cropped area 302 million acres, total irrigated area 49 million acres

Production of rice (in million tons for 1951 52) 20 77, of jawar 5 51, of bajra 2 15, of maize 1 96, of ragi 1 17, of small millets 1 81, of wheat 5 77, of barley 2 14, of gram 3 16, of sugar cane (in terms of raw sugar) 5 90, of potato 1 60

Production of tobacco (in lakh tons for 1951 52) 2 25 of seasum 4 41, of ground nut 30 37, of rape and mustard 9 00, of linseed 3 09, of castor seed 1 04, of jute 46 78, of cotton 31 34

No of oxen and buffaloes (in millions for 1950 51) 195, of sheep and goats 88 59, of horses, ponies, mules, donkeys, camels, pigs 7 89, of poultry 70

Amount of milk produced (1950 51) 21 42 million tons, amount of fish produced (1948) 180 20 million maunds

Amount of cotton yarn produced (1952) 1,448 40 million pounds, of cloth (1952) 4,603 2 million yards of steel (1952) 1 103 million tons of coal (1952) 36 millions tons, of cement 3 54 million tons

Government of India's estimated revenue for 1953 54 Rs 439 26 crores expenditure Rs 448 81 crores defence expenditure Rs 199 84 crores (45 per cent)

No of universities (1953) 30 no of colleges for general education (1950 51) 504 of colleges for special education 99, of professional colleges 213 of secondary schools 20 981 of primary schools 210 112 of pre primary schools 305 of vocational and technical schools 2 162 of special education schools 47 542, of research institutions 20, of unrecognized institutions 8 485

No of students at arts and science colleges 3,04 324, at professional colleges 54,716, at secondary schools 5 225,454, at primary schools 18,352 383, at pre primary schools 25 144 at vocational and technical schools 164 904 at unrecognized schools 406,338

Total no of students at all institutions (1950 51) 25,826,365

Total no of workers (1950 51) about 65 00 000 of workers employed in factories under the Factories Act of 1948 24 68 280 no of trade unions on register (1950 51) 4 277, membership of unions submitting returns (1950 51) 20 22,434

Labour force was roughly divided as follows factories 29 50,000, railways 14,00,000, plantations 12,00,000 Mines 5,00,000, Central Public Works 2,00 000 Posts and Telegraphs 2,00,000, major ports 50 000

Total mileage of all railways (Oct 1952) 34 331, Kutcha roads (1950 51) 1 60 000 miles, surfaced roads 90,200, total no of motor vehicles 310,145, of bullock carts 9,630,975, navigable water ways (1951 52) 5 200 miles no of major ports 5, no of aerodromes (1951 52) 75, no of air routes 50, air route mileage 25,000, no of post offices (1950) 29,671, no of telegraph offices 7,772 no of telephone exchanges (1951) 582, no of telephones 1,40,793

Total electric power production (Jan 1952) 5 842 million kwt

No of broadcasting stations (Oct 1952) 21, no of radio sets 6,77,403, total no of community sets 5 000, in industrial areas 250

No of dailies (April 1952) 596 weeklies 2 226 other periodicals 3,940, total circulation of dailies 20 00,000

Total foreign trade (1952 53) Rs 1,233,78 lakhs imports Rs 658,11 lakhs, exports Rs 575 62 lakhs

Total no of displaced persons 74 80 lakhs, total expenditure on rehabilitation since 1947 Rs 145 28 crores

NATIONAL FLAG AND ANTHEM

The National Flag is a horizontal tri colour of deep saffron, white, and dark green all of equal breadth and in that order from top to bottom There is a wheel on both sides in the centre of navy blue colour with twenty four spokes The wheel is the same size as the centre strip It is an exact reproduction of the wheel on the capital of the Asoka pillar at Sarnath near Banares The saffron is said to stand for courage, white for truth and peace, green for faith and chivalry (All India Congress Committee, 1931), the wheel is the symbol of India's ancient culture (Mr Jawaharlal Nehru) The flag was adopted by a resolution of the Constituent Assembly on July 22, 1947

The National Anthem is *Janaganamana*, *Vande Mataram* also enjoys an equal status It was adopted by the Constituent Assembly on Jan 24, 1950 *Janaganamana* was composed by Rabindranath Tagore and published in his paper *Tattvabodhini Patrika* of which Tagore himself was the editor in January, 1912 The poet rendered it into English in 1919 under the title *The Morning Song of India* It was first sung at a Congress session on December 27, 1911

* It is possible more up-to-date figures are given under Miscellaneous at the end of the book

Vande Mataram occurs in the novel *Ananda Math* by Bankim Chandra Chatterjee published in 1882 It was set to music by Rabindranath Tagore and was first sung at the Congress session of 1896

Janaganamana was preferred because *Vande Mataram* did not lend itself to harmonization

There are rules and regulations about the use of the national flag

No other flag or emblem should be placed above the national flag or to its right It should not be dipped to any person or any thing It should not be carried flat or horizontally but always aloft and free In a procession it should be carried in front of the procession

Normally it should be flown on important government buildings

The use of the flag is unrestricted on certain special occasions specified as such *e g* Independence Day Mahatma Gandhi's birthday, Republic Day and during the national week

WARRANT OF PRECEDENCE

(December 1952)

1 President of India

2 Prime Minister of India

3 Governors Maharajpramukh of Rajasthan and Rajpramukhs within their respective charges

3A Vice President of India

4 Ex President and ex Governors General of India

4A Lieut Governors within their respective charges

5 Rulers of Indian States with a salute of 17 guns and above within their States

6 Ambassadors accredited to India
High Commissioners of Commonwealth, Government in India

7 Chief Justice of India
Speaker of Parliament

8 Governors Maharajpramukh of Rajasthan and Rajpramukhs outside their respective charges

9 Cabinet Ministers of the Union of India

9A Lieut Governors outside their respective charges

10 Rulers of Indian States with a salute of 17 guns or over outside their States

11 Chief Ministers of Part A and Part B States in their respective States

12 Rulers of Indian States with a salute of 15 guns or 13 guns

13 Ministers Plenipotentiary and Envoys Extraordinary

14 Ministers of State for the Union of India
Members of the Planning Commission

14A Chief Commissioners of Part C States having Councils of Ministers within their respective charges

14B Chief Ministers of Part C States within their respective States

14C Judges of the Supreme Court of India

15 Ambassadors of India and visiting Ambassadors of India
Foreign Ambassadors visiting India
Visiting High Commissioners for India and High Commissioners of other Commonwealth countries visiting India

16 Charge d Affaires and acting High Commissioners *a pied* and *ad interim*

17 Chiefs of Staff and Commanders in Chief, provided they hold the rank of a full General or an equivalent rank

18 Chief Ministers of Part A States outside their States
Chief Ministers of Part B States outside their charges
Deputy Ministers of the Union of India
Attorney General of India
Comptroller and Auditor General of India

19 Chief Justices of high courts
Chairmen of legislative councils in Parts A and B States
Speakers of legislative assemblies in Parts A and B States

20 Chiefs of Staff and Commander in Chief provided they hold the rank of a Lieut-General or an equivalent rank

21 Rulers of Indian States with a salute of 11 or 9 guns

22 Ministers of Parts A and B States

23 Chairman of the Union Public Service Commission
Chief Election Commissioner

24 Puisne judges of high courts

25 Deputy Ministers in Part A States

26 Members of Parliament

27 Officers of the rank of a full General or an equivalent rank
Solicitor General of India
Secretary to the President
Secretaries to the Government of India and Principal Private Secretary to the Prime Minister
Commissioner for Scheduled Castes and Scheduled Tribes
Rehabilitation Adviser
Officiating Chief of Staff and Commanders in Chief holding the rank of a Major General or an equivalent rank
Chief Commissioners of Part C States having Councils of Ministers outside their respective charges
Visiting Ministers Plenipotentiary of India and foreign Ministers Plenipotentiary visiting India
Chairman of the Railway Board
Financial Commissioner for the Railways

27A Chief Ministers of Part C States outside their respective States

27B Speakers of Part C States within and outside their States

27C Ministers of Part C States within and outside their States

28 Members of the Railway Board
Ministers of foreign and Commonwealth missions other than Ministers Plenipotentiary
Officers of the rank of a Lieut General or an equivalent rank

29 Chief Commissioners of Andaman and Nicobar Islands Kutch Tripura and Manipur within their respective charges
Additional Secretaries to the Government of India
President of the Indian Tariff Board
Chairman of the Central Electricity Commission
Chairman of the Central Water power, Irrigation and Navigation Commission
Vice Chairman of the Indian Council of Agricultural Research
Financial Adviser to the Ministry of Finance (Defence)
Chairman of the Central Board of Revenue
P S Os of Armed Forces of the rank of a Major General or an equivalent rank *

30 Chairman of the Public Service Commission of a State
Chief Secretaries to the Governments of Part A States
Financial Commissioners
Members of the Union Public Service Commission
Rear Admiral Commanding of the Indian Naval Squadron
Members of a Board of Revenue

31 Director General of Health Services
Director General of Posts and Telegraphs
Director of the Intelligence Bureau
General Managers of Railways
Establishment Officer to the Government of India
Joint Secretaries to the Government of India (including the Joint Secretary to the Cabinet)
Officers of the rank of a Major General or an equivalent rank
Surveyor General of India
Members of the Indian Tariff Board
Director General of Civil Aviation in India
Surgeons General
Director General of Supplies and Disposals
Director General of Ordnance Factories
Indian Navy Commodores in charge of Naval Ports or Areas
Commander(s) of an I A F Command(s) of the rank of an Air Commodore
P S Os of the Naval and Air Headquarters of Commodore and Air Commodore ranks *
Chief Commissioners of Andaman and Nicobar Islands Kutch Tripura and Manipur outside their respective charges
Director General of All India Radio
Military Secretary to the President (so long as he also holds the post of Director General of the Government Hospitality Organization)
Counsellors of Foreign and Commonwealth Missions in India
Inspectors General of Police in Part A States
Commissioners of Divisions

Note 1 The order in the Warrant of Precedence is meant for state and ceremonial occasions and may not be strictly followed on more informal occasions

Note 2 This Warrant will not affect the precedence enjoyed by rulers etc within Indian States and Part B States by virtue of local usage and custom nor will it affect the local precedence *inter se* of rulers as in force immediately before August 15, 1947

Note 3 Officers in the table of precedence will take rank in order of the number of entries, those included in one number shall take precedence *inter se* according to the date of entry into that number

Note 4 When Members of Parliament are invited *en bloc* to major State functions the enclosure reserved for them should be next to the Ambassadors, the Chief Justice of India, Speaker of Parliament and Governors, etc

Note 5 The Director of Intelligence Bureau will take precedence over Inspectors General of Police irrespective of the date of his entry into Article 31

Note 6 Major Generals irrespective of their date of entry into Article 33 will rank above Indian Navy Commodores in Charge and Indian Air Force Commodores

Note 7 Chief Secretaries to Governments of Part A States will take precedence over Members of a Board of Revenue irrespective of the date of their entry into Article 30

Note 8 For the purposes of the Warrant of Precedence, New Delhi and the Red Fort should be deemed to be outside the State of Delhi

HOLIDAYS FOR 1954

The following is the list of Government of India holidays during 1954 which will be observed by Central Government offices in Delhi

January 1—Bank holiday January 26—Republic Day, March 3—Shivratri March 19 and 20—Holi, April 11—Ram Naumi, April 13—Baisakhi, April 16—Good Friday, May 17—Buddha Purnima, June 3—Id ul Fitr, August 10—Id ul Zuha, August 15—Independence Day, August 21—Janam Ashtami, September 9—Muharram, October 2—Mahatma Gandhi's Birthday, October 5, 6 and 7—Dasara, October 26 and 27—Divali, November 9—Id e Milad, November 10—Guru Nanak's Birthday and December 25—Christmas Day

* Should a P S O hold the rank of a Lieut General, his seniority in the Warrant of Precedence will continue to remain the same as laid down for the officers of the rank of Lieut-General or an equivalent rank ' in Article 29 of the Warrant of Precedence

POPULATION*

THE more important figures are as follows Total population (excluding Jammu and the Part B tribal areas of Assam) 356,879,394, Males 183,333,874, Females 173,545,520

Population of Jammu and Kashmir 4 41 millions (estimate for March 1, 1951), Population of Part B Tribal Areas of Assam 0 56 millions (unverified local estimate)

Indians overseas 4 229,096

Increase over 1941 42,113 014 or a mean decennial growth rate of 12 5 or percentage increase of 13 4 per cent

Highest population Uttar Pradesh (63 215 742) Lowest population (30 971) Average density 312 per square mile Highest density Delhi (over 3 000), Lowest density Andaman and Nicobar (10)

Only two States registered a decline in the mean decennial rate Punjab, (0 5), Andaman and Nicobar Islands (8 6)

The lowest rate of increase was for PEPSU (2 6)

The highest rates of increase were Delhi (62 1), Coorg (30 5)

In the following States the rate of increase was below 10 Bihar Orissa Madhya Pradesh Bhopal Vindhya Pradesh, Himachal Pradesh and PLPSU

Registered birth rate (1941 50) 27 2 Probable birth rate (1941 50) 40 Registered death rate (1941 50) 19 4 Probable death rate (1941 50) 27 Natural increase rate (1941 50) 13 Infant mortality rate (1941 50) 127 1 Life expectancy 32 years and 5 months Life expectancy at the age 10 years 39

Literacy for India for 1951 16 6 Punjab 16 5 Bihar 12 2 Hyderabad 9 Orissa 15 8 M P, 13 5 M B 10 8, PLPSU 12, Rajasthan 8 4 U P 10 8

Number of females to every 1 000 males 947

The number of females exceeds the number of males in the following States Kutch (1 079) Madras (1,006) Manipur (1,036), Orissa (1,022) Travancore Cochin (1 008)

In the following States the number of females is less than 900 for every 1 000 males Assam Coorg PEPSU Punjab West Bengal

In the following States they are the smallest Andaman and Nicobars (625) Delhi (768)

Largest State Madhya Pradesh (130 272 square miles) Smallest State Bilaspur (to be merged with Himachal Pradesh) (458 square miles) Smallest but one Delhi (578 square miles)

Total urban population 62 millions (17 3 per cent) Total rural 295 millions (82 7 per cent) Increase in urban population over 1941 3 5 per cent Highest urbanization Delhi (83 per cent)

Number of cities with a population of one lakh and over 75

Percentage of population dependent on agriculture 70

States in which non agricultural population exceeds agricultural Ajmer Andaman and Nicobars, Delhi, Kutch, Saurashtra

If the population is divided into classes according to livelihood the percentage of each class would be as follows —

Peasant proprietors, 47, Tenants, 9, Land less labourers 13, Landlord or rentier one, Industry or other non agricultural production, 10 Commerce 6, Transport, 2, Services and miscellaneous professions, 12

CENSUS OPERATIONS

The last census were taken at the beginning of 1951 (Feb 9 to Mar 1, 1951)

For the first time the census embraced the whole of India including the former Indian States but excluding Jammu and Kashmir and the tribal areas of Assam Jammu and Kashmir was omitted because of special conditions and the tribal areas of Assam because they had never been enumerated before

One vital difference between the 1951 census and all previous census is that caste and community distinctions do not figure as before except to the extent necessary for the purpose of Article 338 of the Constitution which provides safguards to Scheduled Castes, Scheduled Tribes and Anglo Indians, and of Article 340 which provides for the appointment of a Backward Classes Commission The emphasis is laid on the economic aspects of the situation, such as the principal and subsidiary means of livelihood of the person, whether employer, employee or independent worker and so on

The census questionnaire covered such items as (1) Total population (2) Sex (3) Age, (4) Marital Status (5) Place of Birth, (6) Citizenship or Nationality (7) Mother tongue (8) Educational characteristics (9) Fertility data (10) Economic characteristics (11) Urban and Rural population and (12) Households (including relationship to Household Head)

In addition to the International list of 12 topics the questionnaire asked three questions of which the most important related to displaced persons

Two main and two subsidiary questions in the census questionnaire related to economic status and means of livelihood These questions were Are you a self supporting person or a non earning dependent or an earning dependent? If you are a self supporting person, are you an employer or an employee or an independent worker or none of these? What is the occupation or source of income which forms your principal means of livelihood? Have you a secondary means of livelihood? If so what is it?

The manner of recording agricultural livelihood, was different from that of non agricultural livelihood Instructions were given to classify agriculturists under four heads viz, (1) persons who cultivated land owned by themselves, (2) persons who cultivated land owned by another, (3) persons who were employed as labourers by another person who cultivated land and (4) persons who received rent in cash or kind in respect of land cultivated by another person

These are general questions which were asked all over the country There were also questions confined to particular States For instance questions about unemployment were asked in the following twelve States —U P, Bombay, Punjab, Saurashtra, PLPSU, Mysore, Hyderabad, Delhi, Bilaspur, Himachal Pradesh, Kutch, and Vindhya Pradesh Questions about previous occupation were asked in the 2 States of Madhya Bharat and Bhopal, about area of land owned and cultivated by each household in Orissa, about cultivation of land for which rent is paid in West Bengal, about land owned and rented by indigenous persons in the 3 States of Assam, Tripura and Manipur about infirmities (incidence of diseases) in the 4 States of Madras, Coorg Rajasthan and Ajmer about fertility in the 2 States of Bihar and Madhya Pradesh And about the duration of marriage and size of family in the State of Travancore Cochin

All useful data collected during the census operations will be recorded in a national register Relevant parts of this register will be kept in every tahsil or sub division or ward as a permanent and confidential record of the inhabitants It is also proposed to bring out a census handbook for every district which the State Governments have been requested to publish The State Governments have also been requested to include abstracts from these in school textbooks so that students could learn more about their region than they do at present

GROWTH OF POPULATION

Year	Population (in millions)	Increase (in millions)	Percentage Increase
1951	356 88	42 11	+ 13 4
1941	314 77	39 25	+ 14 3
1931	275 52	27 34	+ 11 0
1921	248 18	—0 87	— 0 3
1911	249 05	13 55	+ 5 8
1901	235 50		

During the twenty years (1931 51) the number added to the population was three times as many as during the ten years (1921 31) and twice as many as during the thirty years (1901 31)

POPULATION BY NATURAL REGIONS

Natural Region	Total Population	Males	Females	1941	Females per 1 000 males (1951)	Mean Decennial Growth Rate (1941-51)
INDIA	356 879,394	183,333,874	173 545,520	314 766 380	947	+ 12 5
1 Himalayan Region	17 042 697	8 982 675	8 060 022	14 827 606	897	+ 13 9
2 Northern Plains Region	139,398,043	73 022 392	66 375 651	125 072,878	909	+10 8
3 Peninsular Hills and Plateau Region	108,598 645	55 111 536	53,487 109	96,220 094	971	+12 1
4 Western Ghats and Coastal Region	39 926 793	20,371 388	19,555 405	32 518 913	960	+ 20 5
5 Eastern Ghats and Coastal Region	51,832 336	25 798 608	26 033 728	46 093 121	1 009	+ 11 7
Andaman and Nicobar Islands	30 971	19 055	11 916	33 768	625	— 8 6

* At the time of preparing the article the census reports were coming out in piecemeal fashion It is possible therefore, that additional information or later figures than those given here may be found in the section entitled Miscellaneous at the end of the volume

Throughout Madras includes Andhra When the census were taken Madras State was not divided

POPULATION BY ZONES AND STATES

Zone and State	Land area in square miles	Total Population	Males	Females	1941	Females per 1 000 males (1951)	Mean Decennial Growth Rate (1941-51) *	Density per square mile

* The mean decennial rate is based on the mean population of the two censuses and not like the percentage variation on the population according to the earlier census

† Add Chandernagore Total 40 909, Males 28 220 Females 21 689

†† Figures for Part B Tribal areas are not included

For populations of districts see under each State

FUTURE GROWTH

Some calculations have been made about this from 1951 to 1981

The estimate based on the assumption that the mean decennial rate of growth will be the same as that of the average of 1921-50 will be the lower limit and the estimate based on the assumption that the mean decennial rate of growth will be the same as during the last decade will be the upper limit

The figures given below are in millions

	lower limit	upper limit
1951	61 3	61 3
1961	407 7	411 9
1971	458 5	469 7
1981	527 6	552 5

Making allowance for mortality and maternity rates the trends may be estimated as follows The figures are in crores 1951-56 1961-41 1971-46 1981-52

* It should be pointed out here that whether an area is urban or rural depends on a number of factors of which population is only one. Also these factors vary from State to State.

The population of villages and towns respectively grew as follows from 1921 to 1951 (figures in lakhs)

Year	Villages	Towns	Rate of Growth: Villages	Rate of Growth: Towns
1921	2,199	282	—	—
1931	2 420	334	+10 1	+18 4
1941	2 710	438	+12 0	+31 1
1951	2 960	619	+9 2	+41 3

The population of the 10 largest cities has grown as follows (figures in lakhs)

City	1951	Additions to Population: 1941–50	1931–40	1901–30
Calcutta	45 8	—	—	6 0
Bombay	28 4	11 4	7 0	4 6
Madras	14 2	6 4	1 3	1 1
Delhi	13 8	7 2	2 2	2 3

TOWNS AND VILLAGES WITH POPULATIONS 500 TO 100,000

Size	Number	Males	Females
Less than 500	380 020	39 956 302	38 391,385
500 – 1 000	104 268	37 162 941	35 757 819
1 000 – 2 000	51 769	36 194 476	34 962,006
2 000 – 5 000	20 508	30 023 792	29 085 181
5 000 – 10 000	3 101	10 540 836	10,212 900
10 000—20,000	856	6 016 525	5 664 243
20 000– 50 000	401	6 240 152	5 563,895
50,000—100 000	111	4 020 609	3,534,715

There can be a four fold classification of towns cities (population of one lakh and over) major towns (population 20 000 to one lakh) minor towns (population 5 000 to 20,000), townships (under 5 000)

The average number of villagers per village is 529

The percentage of rural population living in small villages (under 500) is 26 ; in medium sized villages (500-2,000) is 48 8 in large villages (2 000-5 000) is 19 4 in very large villages (over 5,000) is 5 3

A house is a building in which people live A household is a group of people who live together and take their food from a common kitchen

There are 112 households in every 100 houses of a typical Indian village and 124 households in every 100 houses of a typical Indian town

In every 100 households in a village there are 491 persons in every hundred households in the town the number is 471

In every 100 houses in a village 560 people live in every 100 houses of a town 584

Out of 491 people in every 100 rural households 252 are males and 239 are females Out of 471 people in every 100 urban households 248 are males and 223 are females

We can have a four fold classification of households—small household (3 persons or less) medium (4 5 or 6), large (7 8 or 9), very large (10 or more)

The number of different types in 100 households in a typical village and a typical town will be as follows

	Village	Town
Small	33	38
Medium	44	41
Large	17	16
Very large	6	5

The pattern of household relationship in a 100 households with 487 persons in them will be as follows

	Number
Heads of households	100
Wives of heads	71
Sons of heads	108
Daughters of heads	81
Male relatives other than sons	48
Female relatives other than daughters	72
Persons unrelated to heads	7
Total	487

* Chandernagore with a population of 49 909 is not included in this classification

LIVELIHOOD PATTERNS*

Out of a total population of 3 566 lakhs 1 044 lakhs (29 3 per cent) are self supporting 2 143 lakhs (60 1 per cent) are non earning dependents, and 379 (10 6 per cent) earning dependents

Out of a total agricultural population of 2 490 lakhs 710 lakhs are self supporting 1 470 lakhs are non earning dependents, and 310 lakhs earning dependents

Out of a total non agricultural population of 1,076 lakhs 334 lakhs are self supporting 673 lakhs are non earning dependents, and 69 lakhs earning dependents

The following table gives a comprehensive picture of self supporting and dependent people and the percentage

Under Agriculture Class I is owner cultivator, Class II tenant cultivator Class III cultivating owner Class IV agricultural rentier

Class V are persons engaged in non agricultural production Class VI persons in commerce Class VII transport Class VIII miscellaneous income recipients (non agricultural rentiers pensioners etc)

The second column shows self supporting persons the third non earning dependents the fourth earning dependents the fifth total dependents the sixth percentage to general population including dependents

The figures are in lakhs

Category	2	3	4	5	6
Class I	457	1 001	+215	1 673	46 9
Class II	88	189	+ 39	316	8 8
Class III	149	247	+ 52	448	12 6
Class IV	16	33	+ 4	53	1 5
Total Agricultural classes	710	1 470	+310	2 490	69 8
Class V	122	223	+ 32	377	10 5
Class VI	59	149	9	213	6 0
Class VII	17	37	+ 2	56	1 6
Class VIII	136	268	+ 26	430	12 1
Total non agricultural classes	334	673	+ 69	1 076	30 2
General Population	1,044	2 143	+379	~ 566	100 0

The following figures show the number of dependents supported by 100 persons in each of the eight categories The first figure in brackets shows the number of non earning dependents and the second figure the number of earning dependents

Class I—266 (219 47) Class II—259 (215 44) Class III—201 (166 35) Class IV —231 (206,25), All Agricultural classes—251 (207,44)

Class V—211 (185 26) Class VI—261 (246,15), Class VII - 230 (218,12) Class VIII—216 (197,19), All non agricultural classes—222 (201,21)

General Population—242 (205,37)

BROAD CONCLUSIONS

The broad conclusion of this survey is that the average self supporting person uses his income to support himself and at least two others

Roughly one among three self supporting persons also provides, in addition, partial support for one earning dependent

During the twenty years following 1931 population grew faster than cultivation But the relative weight of dependence on agriculture for gainful employment has not declined in the country as a whole It is probable that it has increased slightly Such increase is observable in Uttar Pradesh Bihar Orissa Assam Madras Hyderabad Rajasthan Punjab It has probably diminished in Bombay West Bengal and Mysore In Madhya Pradesh dependence on agriculture has not changed

Thus on the whole there has been a general increase of non earning dependency The increase in absolute numbers of non earning dependents has exceeded the entire increase of rural population in India as well as in each of the five zones out of six

The percentage of non earning dependents to the general population has also increased in every State except Bombay, West Bengal and the Punjab

The increases in the percentages are not accompanied by any material change in sex ratio or age structure They must therefore be regarded as a rough index of the growth of unemployment in different parts of the country

There has been a general increase throughout the country in the number of cultivators and cultivating labourers working on the same area (say 100 acres) of uncultivated land

The increases are relatively small in the following States

Assam (46 to 48), Bihar (50 to 52), U P (49 to 51), Madras (34 to 36), Orissa (29 to 32)

Larger increases are observable in the following States

Punjab (23 to 26), Bombay (17 to 23), Madhya Pradesh (26 to 33), Travancore Cochin (41 to 57)

Among the major States for which figures are available Mysore alone shows a fall (32 to 26)

Material changes have occurred in the percentage of cultivating labourers to all workers in land (i e cultivating labourers and cultivators including their unpaid family helpers)

There is only one major State where this percentage has increased—Travancore Cochin (34 to 47) The percentage has remained practically unchanged in Bihar (27 26), Mysore (13 14), Hyderabad (31) and Punjab (11-12)

* For detailed tables see pages 18 to 20

In other States the percentage has fallen U P (18 to 9) Orissa (30 to 19) West Bengal (40 to 28) Madras (38 to 35) Bombay (43 to 18), Madhya Pradesh (43 to 32), Rajasthan (11 to 4)

The fall is the natural result of increase in the number of cultivators and members of their families occupying the same area of cultivated land The cultivators need for employing labourers diminishes, as also their capacity to pay for their services

Other reasons for the fall may be that labourers were unwilling to acknowledge as labourers to guard against the accrual of occupancy rights in land

There were also many people who partook of the characteristics of both cultivator and cultivating labourer and whose classification was *open to doubt*

It is also possible that because of legislation and the general social climate a conversion has taken place of many persons from the status of cultivating labourer to that of cultivator Such conversions probably account for an important part of the fall observed in Bombay, Madhya Pradesh Uttar Pradesh Rajasthan and possibly elsewhere

Among cultivators the relative proportion of cultivator owners has increased to some extent

Agricultural renters formed only a small proportion of the people in 1931 and this proportion has become still smaller in 1951

SELF-SUPPORTING PERSONS

There are 1 044 lakhs of self supporting persons in the country or 29 3 per cent of the population

The table in the next column shows the rural urban and sex wise break up

Rural Urban	Number (in lakhs)	Percentage
Rural males	706	47 1
Urban males	166	43 8
Rural females	151	10 4
Urban females	21	7 4
Total	1 044	29 3

Out of 1 044 lakhs of self supporting persons 710 lakhs or 68 1 per cent are agriculturists, and 334 lakhs or 31 9 per cent are non agri culturists

The rural urban and the sex wise break up of agricultural and non agricultural self supporting classes is as follows (the number is in lakhs)

Rural Urban break up	Agriculturists		Non agriculturists	
	Number	Percentage	Number	Percentage
Rural males	566	80 2	140	19 8
Urban males	19	11 4	147	88 6
Rural females	121	80 2	30	19 8
Urban females	4	19 7	17	80 3
Total	710	68 1	334	31 9

The self supporting agriculturists can be divided into four classes The number in the second column in the table below is in lakhs *The number in the third* column is the percentage of all agriculturists the number in the last is percentage of all self supporting persons

Category	Number	Percentage of agriculturists	Percentage of all self supporting persons
Cultivators of land wholly or mainly owned	457	64 4	43 8
Cultivators of land wholly or mainly un owned	88	12 3	8 4
Cultivating labourers	149	21 0	14 3
Non cultivating owners of land and other rent receivers	16	2 3	1 6
Total	710	100 0	68 1

Another way of describing Classes I and II is as owner cultivators and tenant cultivators Thus the number of owner cultivators is 457 lakhs and the number of tenant cultivators is 88 lakhs

The total number of cultivators can thus be put down as 545 lakhs

The 334 lakhs *self supporting* non agriculturists can also be divided into four sections The number in the second column is in lakhs the number in the third shows the percentage of all self supporting non agriculturists the fourth the percentage of all self supporting persons

Categories	Number	Percentage of self supporting non agriculturists	Percentage of all self supporting persons
Employers	11	3 3	1 1
Self employed other than employers	165	49 4	15 7
Employees	148	44 3	14 2
Non agricultural miscellaneous income receivers	10	3 0	0 9
Total	334	100 0	31 9

The employees are a clear minority Self employed persons are more numerous than employers and employees combined

If we deduct renters from both agriculturists and non agriculturists we get the following classification of income earners The number in the following table is in lakhs

Nature of income	Cultivation	Industries and Services	Total
Net profits	545	176	721
Wages and salaries	149	148	297
Total	694	324	1,018

Earners of profits are much more than twice as numerous as earners of wages and salaries

PERSONS IN INDUSTRY

The 324 lakhs self supporting persons engaged in industries and services other than cultivation may be divided as follows

Categories	Number (in lakhs)	Percentage
Primary industries other than mining and quarrying (0)	24 0	7 4
Mining and quarrying (1)	5 7	1 8
Processing and manufacture (food stuffs, textiles, leather) (2)	55 1	17 0
Processing and manufacture (metals chemicals) (3)	12 4	3 8
Processing and manufacture not elsewhere specified (4)	24 3	7 5
Construction and utilities (5)	15 9	4 9
Commerce (6)	59 0	18 2
Transport storage and communications (7)	19 0	5 9
Health education and public administration (8)	22 9	10 2
Services not elsewhere specified (9)	75 4	23 3

The number engaged in some of the sub divisions of the above main divisions are as follows (the figure is in lakhs)

Plantations 10 6 Stock raising—6 3 Fishing—4 2 Forestry (wood cutting collection of forest produce not elsewhere specified)—2 5 Rearing of small animals and insects—27 (in thousands)

Figures for men engaged in mining are given in thousands except for coal mining and mining of stone clay and sand which are in lakhs

Coal mining—3 1, Mining of stone, clay, sand—1 2

Iron ore—9 metals other than iron—57, petroleum—3 mica—33 salt salt petre—2 non metallic minerals—11 Total for this group—135

The figures for persons engaged in various industries given below are in lakhs

Divisions 2, 3, 4

Milling of cereals pulses hand pounding of rice dehusking, grinding of food grains—4 0 Vegetable oil and dairy products—2 7, Sugar—1 4 Beverages (breweries, distilleries toddy drawers, aerated waters)—1 6 Tobacco (preparation of raw leaf makers of bidis cigarettes, etc, snuff)—0 6 Other food industries—1 8 All food industries (except cultivators, house wives hotel workers)—15

Cotton textiles—26 wearing apparel (except footwear)—6 5 Other textiles (jute wool, silk, hemp, flax rayon, rope, twine, etc)—7 1 Leather (leather products, footwear)—0 8

Manufacture of transport equipment—2 2 Machinery (other than electrical) including engineering workshops—1 2 Basic manufacture of iron and steel—1 1 Manufacture of metal products otherwise unclassified—6 2

Manufacture of wood and wood products (carpenters turners etc) 10 4 Manufacture of non metallic mineral products (potters makers of earthenware porcelain crockery glass bangles, etc) 1 7

Division 5

Total for construction and utilities (15 9)

Division 6

The total number engaged in commerce is 59 lakhs

They fall into three groups Retail trade (51 1), Wholesale trade (4 0) Money lending, banking insurance, real estate (3 3)

Among men in retail trade Selling food stuffs (22 9) Selling fuel (1 9), Selling textiles and leather goods (5 6)

Division 7

Total for Transport Storage and Communications (19 0) Transport by road (8 9) By railway (5 7), By water (2 2), By air (13 thousand)

Division 8

Total for Health Education and Public Administration (22 9), Medical and health services (5 8)

Total for educational services and research (7 4) of these stationed in towns (3 7) in villages (3 7)

These were divided as follows* Professors lecturers, teachers, research workers, employed in universities, colleges, research institutions (99,256), other professors, lecturers, teachers (349 44)

Total for public administration (21 6) These may be divided as follows (see next column)

Employees of Central Government (5 03), Total employees of State Governments (14 26)

These may be sub divided as General administration (8 09) Police (other than village watchmen) (3 80) Village establishments including village watchmen (2 37), Employees of local bodies (2 24)

Division 9

Services not elsewhere specified (75 4) Of these nothing is known of 37 3 except that they are self supporting

The following para gives the details about the rest of the 38 1 lakh persons (the number is in thousands)

Domestic service (1 424) Laundries and laundry services (566) Barbers and beauty shops (514) Religious charitable and welfare services (369) Legal and business services (250) Recreation services (214) Hotels restaurants and eating houses (158) Arts letters and journalism (59)

DEPENDENTS

Out of 3 566 lakhs 2 143 or 60 1 per cent have been classified as non earning dependents

The table below shows the rural urban and the sex wise break up of non earning dependents

Rural Urban	Number (in lakhs)	Percentage
Rural males	674	31 0
Urban males	152	7 1 6
Rural females	1 065	73 5
Urban females	252	88 1
	2,143	60 1

There are 379 lakhs or 10 6 per cent earning dependents in the country They are dependents in the sense that left to themselves they cannot support themselves

The table below shows the rural urban and sex wise break up of earning dependents

Rural Urban	Number (in lakhs)	Percentage
Rural males	119	7 9
Urban males	15	4 6
Rural females	232	16 0
Urban females	13	4 5
	379	10 6

VITAL STATISTICS

The following table shows the number of births and deaths registered in each of the three decades The figures in the first two columns are in lakhs The figures in the last two columns give the mean decennial registered rates

Year	Registered births	Registered deaths	Birth rate	Death rate
1921–30	669	502	33 7	25 3
1931–40	753	512	33 8	23 0
1941–50	680	486	27 2	19 4

Many births and deaths go unregistered Making allowance for this it is calculated that the birth rate should be around 40, and the death rate around 27

This would give a natural increase rate of 13 per thousand per annum during the last decade

On the same basis the birth rates for the various zones will be as follows

Central India (44) West India (42) north west India (41 or 42) north India (38 or 39) east India (38 or 39), south India (36 or 37)

The death rates would be as follows

Central India (34) north India (27 or 28) east India (26 27 or 28) west India (26) north west India (24 25 or 26) south India (21 or 22)

The following table shows the birth and mortality rates for the sub continent from 1921 to 1946 and for India alone for 1947 1948, 1949 and 1950

Year	Birth rate	Death-rate	Infant mortality
1921	32	31	198
1922	32	24	175
1923	34	25	176
1924	33	28	189
1925	32	24	174
1926	33	25	189
1927	33	23	167
1928	34	24	173

Year	Birth rate	Death rate	Infant mortality
1929	33	24	178
1930	33	25	180
1931	35	25	179
1932	34	22	169
1933	36	23	171
1934	34	25	187
1935	35	24	164
1936	36	23	162
1937	35	22	162
1938	34	24	167
1939	34	22	156
1940	33	22	160
1941	32 1	21 9	158
1942	29 5	21 4	163
1943	26 1	23 9	165
1944	25 8	24 5	169
1945	28 0	22 1	151
1946	28 9	18 7	136
1947	26 6	19 7	145 6
1948	25 4	17 1	130 9
1949	26 7	15 8	122 8
1950	24 8	16	127 1

The overwhelming majority of deaths are caused by such typical tropical diseases as small pox typhoid, dysenteries cholera and malaria Tuberculosis is also a big killer Malnutrition and nutritional diseases are very common This is no surprise considering the general poverty of the people

The figures below are for the larger cities like Calcutta, Bombay or Madras because they are generally more accurate than figures for the smaller towns or rural areas Here is a table which shows the specific death rates per thousand for Calcutta, Bombay and Madras for 1949

—	Calcutta	Bombay	Madras
Tuberculosis	120	113	69
Dysentery and Diarrhœa	156	79	301
Typhoid	58	53	10
Cholera	84	0 0	19

There has been some reduction in the general rate of mortality due to specific diseases over the last three decades

Year	Cholera	Small pox	Plague
1920	0 6	0 4	0 4
1925	0 5	0 3	0 5
1930	1 3	0 3	0 3
1931	0 9	0 1	0 2
1932	0 3	0 2	0 2
1933	0 3	0 4	0 2
1934	0 8	0 3	0 3
1935	0 8	0 3	0 1
1936	0 6	0 4	0 04
1937	0 4	0 2	0 1
1938	0 9	0 1	0 06
1939	0 4	0 2	0 1
1940	0 3	0 3	0 7
1941	0 8	0 2	0 04
1942	0 7	0 09	0 04
1943	1 5	0 2	0 05
1944	1 0	0 7	0 07
1945	0 9	0 4	0 09
1946	0 5	0 2	0 1
1947*	0 4	0 1	0 3

* After partition

Turning to infant mortality figures in the larger towns we find that there has been on the whole some improvement as the following table shows

City	1935	1936	1937	1938	1939	1940	1941	1942	1943	1944	1945	1946	1947

Ahmedabad	280	303 4	280 2	283 0	267 4	310 2	133 2	293 1	263 5	277 5	186 5	235 9	239 5

SEX RATIO

In India as whole the total number of males is 183 millions, and of females 173 millions

The sex ratio has varied as follows 1921–1936, 1931—951, 1941– 946, 1951—947

It may be mentioned here that in the world as a whole the sex ratio is probably 992

In the country as a whole the sex ratio as mentioned above is female to male 947 to 1 000 The lowest is 883 in the north west the highest is 999 in south India where practical equality of the sexes exists

In general the sex ratio is smaller in towns than in villages For the country as a whole the sex ratio in villages is 966, while that in towns is 860

The sex ratio in villages is lowest in north west India (895) In the villages of south India females outnumber males (1,004)

The urban sex ratio is lowest in east India (719) It is highest in south India (977)

The difference between the rural sex ratio and the urban sex ratio is very large in east India (258) It is smallest in south India (27)

In the country as a whole there are 235 lakhs of people living in cities Of these 132 lakhs are males and 103 are females

The sex ratio for all cities is 787 It is lowest for east India (641) and highest for the south (940)

The sex ratio for the ten largest cities is as follows

Greater Calcutta 602 Greater Bombay, 596 Madras 921 Delhi 750 Hyderabad, 989 Ahmedabad, 764 Bangalore, 883, Kanpur, 699, Poona, 833, Lucknow, 783

Males and females are not born in equal numbers They do not die in equal numbers Hence the difference in the numbers of males and females

For example the average sex ratio at birth during the decade 1941 50 was as follows in the following States

Madras 948, M P 939 Bombay 935, U P, 807

The sex ratio of infants who died within one year of birth during 1941 50 was as follows

Madras, 870 M P, 844, Bombay 866 U P, 790

The sex ratio among infants at the 1951 census was as follows

Madras, 1006, M P, 946, Bombay, 980, U P, 941

AGE GROUPS

Age Groups	Total		Unmarried		Married		Widowed or divorced	
	Males	Females	Males	Females	Males	Females	Males	Females
0	5 820 763	5,668,197						
1— 4	17 939 286	17,907,518						
5—14	44 702 897	41,988,861	41,804,306	35,736,625	2,832 553	6,118,408	66,038	133,828
15—24	30 671 972	30 052,335	16 627,537	5 184 447	13,659,997	24,041,306	384,438	826,582
25—34	27 874,703	26 632,987	3,700,903	772,578	23,121,613	23,730,973	1 052,187	2,129,436
35—44	22 031,938	19 528,364	1,149 578	303 586	19,323,284	15,345,469	1,559,076	3,879,309
45—54	15 718,686	13,898 327	604,012	173,048	13,076 712	8,313,457	2,037,962	5,411,822
55—64	9 064 548	8 624 304	298 623	88,943	6,776,934	3,334,253	1,988,991	5,201,108
65—74	3 867 562	3 975 667	104 353	37,125	2,533,458	1,092 051	1,229,751	2,846 491
75 and over	1,629,982	1,756,145	46,438	18,468	882,924	370,440	700,620	1,367,237
Age not stated	111 503	116 979	51 497	60 138	45,611	41,640	14,395	15,201

The percentage of different age groups in the villages and the towns is as follows

	Villages	Towns
Infants and young people	13 7	12 9
Boys and girls	25 1	23 2
Young men and women	32 3	36 5
Middle aged men and women	20 4	20 1
Elderly persons	8 5	7 3

MARITAL STATUS*

	Total			Unmarried		Married		Widowed or divorced	
	Persons	Males	Females	Males	Females	Males	Females	Males	Females
Total	349 589 524	179 433 840	170,149 684	88 147,296	65,950 673	82 253 086	82 387 997	9,033 458	21,811 014

* Excluding displaced persons

MATERNITY PATTERN

Out of every 10 000 persons in India 5,133 are males and 4 867 are females

Among them 2 521 males (49 1 per cent) and 1,886 females (38 8 per cent) are unmarried Together the unmarried people are about 44 1 per cent of the population

To put it the other way round, among men 45 8 per cent are married and 5 0 per cent are widowers, and among women 48 4 per cent are married and 12 8 per cent widows

The number of divorced persons in India is 144,786 or 0 4 per cent

The proportion of unmarried persons is highest in south India (48 2 per cent) and lowest in central India (41 1 per cent)

The 1951 census counted 28,33,000 married males and 61 18 000 married females 66 000 widowers 134,000 widows all between the ages of 5 and 14

The approximate number of marriages contracted in contravention of the law would be 91,50,000

But there is evidence that the child marriage rate is diminishing The percentage of married females under 15 was 9 6 This dropped to 7 4 in 1951

The percentage of unmarried women above 15 is 6 4

Facts concerning marital status in villages and towns separately is as follows

In the villages, out of 10,000 persons 2,338 are married males and 2,407 are married females

In the towns the corresponding figures are 2,429 and 2,105

There is a fall in the proportion of widowers and also of widows The former fell from 5 6 per cent in 1931 to 5 0 per cent in 1951 The latter fell from 16 1 per cent in 1931 to 12 8 per cent in 1951

For maternity only married women in the age group 15 to 44 are to be taken into account

We have to base our findings on investigations carried out in Travancore Cochin State during the 1951 census

On an average a mother in Travancore Cochin who lives to complete her child bearing period gives birth to more than 6 children but not more than 7

Out of this the number actually alive on census day was 4 6 Among the children born alive 2 had died predeceasing their mothers

Thus in Travancore Cochin the child birth index is 6 6, child survival index 4 6, child loss index 2 0

These indices vary as follows

Age group	Child birth index	Child survival index	Child loss index
Under 20	1 2	1 0	0 2
20—24	1 8	1 4	0 4
25—29	2 9	2 3	0 6
30—34	4 2	3 2	1 0
35—39	5 3	4 0	1 3
40—45	6 2	4 6	1 6
Over 45	6 6	4 6	2 0
Average	4 3	3 2	1 1

The child birth indices of mothers divided into groups was as follows

Agricultural landholders' and tenants families	4 5
Agricultural labourers families	4 1
Non agricultural families	4 2
Rural	4 3
Urban	4 2

Mothers can be divided into two groups those who commenced child bearing during the ages 15 to 19 (Maternity Type A), and those who commenced child bearing during the ages 20 to 24 (Type B)

Their child birth indices are as follows

	Type A	Type B
Under 20	1 2	—
20—24	2 0	1 3
25—29	3 6	2 3
30—34	4 8	3 7
35—39	6 0	4 9
40—44	6 8	5 8
Over 45	7 3	6 4

Investigations of a different sort have given the following results

The total number of births which occur in the course of one year among about 1,000 persons is 40 Among these 40 births, 8 births are first births, 16 births are either first births or second births, 23 births are either first, second or third births, and 17 out of 40 are either fourth births or births of a higher order

We may speak of births occurring to mothers who have already given birth to three or more children as 'improvident maternity'—except in the exceptional circumstance where all previously born children are dead We may refer to the percentage of such maternities to all births as the Incidence of Improvident Maternity.

The following figures show the incidence for a number of countries In most countries this incidence is falling, while in India there is no evidence of any decrease

India—42 8, U S A —19 2, U K —14 3, France—19 7, Japan—33 9

INDIANS OVERSEAS

THE total Indian (includes Pakistani before 1948) population overseas, according to the latest available estimates, is as follows —

Commonwealth	3,207,969
Foreign Countries	1,822,688
Total	5,030,657

Name of country	Indian population	Date of estimates
Commonwealth		
Aden	9 456	1946
Australia	2,480

EMIGRATION LAWS

Emigration out of India is governed by the Indian Emigration Act (VII of 1922) and the Rules made thereunder, as amended in 1938 and 1940

"Emigration" means departure by sea out of India of a person under an agreement to work for hire Emigration is not lawful except from Ports which have been notified as 'Emigration" Ports Emigration for unskilled work is not lawful to any country at present and the very departure for engaging in unskilled work to Ceylon, Burma, Malava and Singapore is prohibited, unless exemption is granted by general or special orders of the Central Government

Emigration for skilled work is permissible on compliance with prescribed formalities

The functions under the Act are performed by the Central Government through the Controller-General of Emigration and Joint Secretary to the Government of India in the Ministry of External Affairs New Delhi, with the assistance of the Protectors of Emigrants at the Emigration Ports and the Controller of Emigration, Madras, who supervises the activities of the Protectors of Emigrants in the Madras State

Following Ports are at present Emigration Ports under the Act Each Port has a Protector of Emigrants

1 Bombay (Protector of Emigrants Exchange Building, Sprott Road, Ballard Estate, Bombay)
2 Okha (Port Officer)
3 Porbander (Port Officer)
4 Bedi (Port Officer)
5 Madras (Protector of Emigrants Kilpauk, Madras 10)
6 Nagapattinam (Protector of Emigrants)
7 Dhanushkodi (Protector of Emigrants), (Mandapam Camp)
8 Tuticorin (Protector of Emigrants)
9 Gopalpur (The District Officer)
10 Calcutta (Protector of Emigrants 7, Hare Street, Calcutta)

ENTRY ON QUOTA

The following countries admit Indians on quota basis Canada, U S A , Thailand and Indonesia

Canada. Under an Agreement entered in 1951 between the Government of India and the Government of Canada the latter agreed to receive 150 Indian nationals every year for permanent residence Selection is entirely by the Government of Canada The main criteria is that the immigrant should be likely to assimilate in the local population Educational qualifications, property qualifications, etc are considered Priority is also given according to the nearness of relationship between the intending immigrant and his sponsors in Canada, also the capacity of the sponsors to support him financially Chronological order of applications is also taken into consideration

U.S.A United States of America has fixed an annual quota of 100 Indian immigrants 25 per cent of this quota is reserved for Indians born or residing outside India The selection of immigrants is made by the U S Government The main considerations on which selection is made are (*a*) the immigrant must be a genuine East Indian, (*b*) must be free from contagious diseases or moral turpitude, (*c*) must not subscribe to anarchist or subversive theories, (*d*) must not be a practising polygamist, (*e*) must be literate in some modern language, and (*f*) must be in possession of sufficient funds to avoid likelihood of becoming public liability

Thailand The quota fixed by Thailand is 200 per annum The selection is made by the Thai Government

Indonesia Indonesia fixed a quota of 1 000 immigrants in 1952 to a group of four countries *viz*, India Pakistan Ceylon and Burma It is however entirely at the discretion of the Indonesian Government to permit Indians to settle in Indonesia

FREER MIGRATION

In some of the countries though Indians are not admitted for the specific purpose of settlement they can enter and reside on completion of formalities and conditions prescribed under the respective immigration and other laws of those countries Mauritius British East African *territories of Kenya Uganda Tanganyika Zanzibar Northern Rhodesia Nyasaland Belgian Congo Ruanda Urundi Nigeria Ethiopia* Aden Bahrein Iraq Muscat Kuwait Saudi Arabia Seychelles Malaya Fiji Japan the United Kingdom British West Indies British Guiana and British North Borneo are among such countries

The main requirements of some of the countries are indicated below

Mauritius An intending immigrant should be able to deposit Rs 1 000 on entry into the Colony

British East Africa A person intending to engage on his own account in trade business agriculture mining and manufacture in these territories must have at his disposition prescribed capital and must obtain a certificate from the prescribed authority in the territory concerned permitting him or her to engage in a particular profession trade or calling in that territory Professionals like doctors dentists lawyers are not required to have any prescribed capital but should possess sufficient capital or assured income to enable them to give effect to their intention

Northern Rhodesia The main requirement is a knowledge of the English language Persons intending to enter for business and trade must also have sufficient capital There is scope for Indians wishing to settle there as doctors lawyers technicians etc

Malaya Before the New Immigration Ordinance which was to come into force on August 1, 1953 Indians were free to enter provided they were not likely to become destitute Under the new immigration laws entry permits for permanent residence will not normally be granted to fresh immigrants wishing to enter Malaya for employment or for pursuing a profession unless the applicant is a skilled artisan or his entry is considered to be in the economic interest of Malaya or Singapore or he holds a contract of employment with a well established business concern on terms and conditions of service of a prescribed standard or unless he holds special qualifications to be able to pursue his profession without prejudice to the interests of persons already resident in Malaya

British West Indies Indians are admitted in exceptional cases, where they possess special skills that are in short supply there or who may bring capital for investment

Belgian Congo Entry Permits may be granted to those who can deposit a certain sum and satisfy the authorities regarding good conduct etc

Ethiopia There is no particular restrictions for immigration into Ethiopia but the Ethiopian Government's permission is required in every case

United Kingdom Indians are free to settle in the United Kingdom

Switzerland Indian nationals can go to and reside in Switzerland subject to the laws and rules in force in that country

BAN ON ENTRY

Fresh Indian immigration is either banned or is not permitted as a matter of policy into the following countries —South Africa Southern Rhodesia Australia, New Zealand Ceylon Philippines most of the European and South American countries and Burma

South Africa Immigration of Indians into the Union of South Africa is banned

Southern Rhodesia Southern Rhodesia treats Indians as prohibited immigrants but admits wives and dependant children of the persons already there

New Zealand There is a ban on the entry of fresh Indians but as a special case the New Zealand Government permits the entry of the children of permanent residents into New Zealand for permanent residence subject to certain conditions

Australia Asians including Indians are not allowed to immigrate into Australia for permanent settlement Indians are however permitted to start wholesale export import business provided the minimum annual turn over is £A500 but without any citizenship or other rights Indians already settled there can however take their wives and minor children subject to certain conditions

BURMA

Burma was a province of India till 1937 April when it was given a separate constitution In 1931 the Indian population was reported to be over one million Consequent upon the Japanese occupation of Burma in 1942 about 4 lakhs of Indians left Burma for India After the liberation of Burma many did not return to that country in view of the changed conditions in Burma and the difficulty of obtaining employment there The present population of Indians in Burma is estimated to be about 7 lakhs

Indians are mainly agricultural dock and casual labourers and small scale business men Some Indians are engaged in wholesale import ing business and as rice merchants

With the introduction of the Burmanisation policy no foreigner is now allowed to buy any property nor can any property be transferred to any foreigner Non nationals in Government service are being replaced by nationals

A large number of Indian land owners in Burma will be adversely affected by the Land Nationalization Scheme

Under the Union of Burma Citizenship Act 1948 an alien can become a Burma citizen by naturalisation if he had resided continuously in the Union for not less than five years before the application and also fulfils other prescribed conditions

As foreigners in the country Indians as such have no franchise Those Indians who have become Burmese citizens are entitled to all privileges including franchise that other Burmese are entitled to

Rupees forty a month can be remitted to dependants in India by Money Order Large sums for maintenance of families and other specific purposes can be remitted on the strength of certificates from the District Magistrate concerned in India On leaving Burma for good, all assets can be transferred to India

MALAYA

Malaya is divided into two administrative units the Federation of Malaya and the Colony of Singapore

Of the total Indian population of about 7 lakhs about 70 per cent are labourers in rubber and tin estates, and the rest are either clerks or employed in business trade and other professions like law and medicine

Indians do not suffer from any special disabilities

Indians are eligible for citizenship of the Federation of Malaya if they fulfil the prescribed conditions Under the new citizenship code for the Federation which came into force on September 15 1952 Federal citizenship is automatic for citizens of the U K and Colonies Most of the Indians in Malaya are qualified or entitled to become citizens of the U K and Colonies under the British Nationality Act 1948

In Singapore there is no citizenship law and the British Nationality Act applies

The Federation of Malaya's Legislature is nominated and there are no elections to it In a Legislative Council of 75 seats Indians have 5 seats In the Federal Executive Council of 20 there is one Indian member

The Colony of Singapore is under a Governor Strength of Executive Council 12 Indian Members 1 Strength of Legislative Council 25, Indians 3

There are no restrictions on Indians in the matter of remittances to India

CANADA

Indian residents of Canada are largely comprised of labourers employed in lumbering and trucking There are a few lumber mill owners and some are working as clerks in various establishments The Indian community is mostly concentrated in British Columbia where there are 1 937 Indians out of a total of 2 148 Indians in the whole of Canada The Indian community is called the East Indian Community

There are no disabilities on Indians in the matter of owning property engaging in trade or profession entering Government service or residence in any locality The period for qualification for citizenship is 5 years In 1952 one Indian was elected to a Municipal Council

Indians can remit to India any amount earned in Canada

BRITISH GUIANA, WEST INDIES

Indians form the bulk of sugar plantation labour in British Guiana and Trinidad A good number of them work also on cocoa plantations They are the backbone of the countries agriculture and grow rice and vegetables There are also a number of prominent Indian merchants doctors and teachers

In British Guiana Indians constitute the largest single racial group (46 per cent of the total population) In Trinidad Indians are about 36 per cent of the total population

Very few Indians have been employed in Government service A vast majority of Indians are illiterate In Jamaica a large number of dairies are owned by Indians

There is no discrimination against Indians in British Guiana or Trinidad and they enjoy the same citizenship rights as other nationals of these territories

In Trinidad the Executive Council has 5 elected members and the Legislative Council 18 elected members There is one Indian in the Executive Council and 6 Indians in the Legislative Council

In the Executive Council of British Guiana there are 6 elected members of whom 3 are Indians The Legislative Council consists of 24 elected members, 8 of whom are Indians

In Jamaica where Indians form only 1 7 per cent of the total population there is one Indian member in the Lower House comprising 32 elected members

Money can be freely sent to India from the British West Indies

MAURITIUS

Indians in Mauritius form about 65 per cent of the total population of the Colony The Indian population is mainly composed of descendants of indentured labourers from Madras, U P and Bihar, but there is a sprinkling of traders from Bombay Indians have settled

there for generations and are now termed Indo Mauritians A large proportion of them are farm labourers on sugar plantations The rest are engaged in commerce and trade or are doctors lawyers, government servants

Indians are mostly illiterate and on the whole their economic and social conditions are not as satisfactory as in some other Colonies

There is no colour bar against Indians nor do they suffer from any political disability

There are 3 Indians on the Executive Council which consists of 10 members including the President (the Governor) and 3 ex officio members In a Legislative Council of 35 consisting of the President (the Governor) 3 ex officio 12 nominated and 19 elected members 13 are Indians Fresh elections to the Legislative Council were due in August September 1953

There are no restrictions on remittances to India

EAST AFRICA

British East Africa consists of the four territories of Kenya, Uganda Tanganyika and Zanzibar

The majority of the Indians in these territories are engaged in commercial undertakings Artisans technicians Government servants doctors lawyers make up most of the balance

Indians in East Africa —numbering about 2 lakhs are mostly concentrated in urban centres In Kenya and Tanganyika they constitute about 29 per cent of the total non native population of each territory in Uganda they form the single largest community among the non Africans being about 82 per cent of the non African population Their general economic condition is on the whole very satisfactory Many of them are quite well to do

In Uganda some Indians have big factories *e g* sugar, sisal and ginning About 90 per cent of the total trade of Uganda passes through Indian hands

Indians (and also other non Europeans) are not allowed to own or lease land in the Kenya Highlands for agricultural and industrial purposes Anti Asiatic regulations prevent the purchase or occupation of certain residential sites in Nairobi and Mombasa (in Kenya) by Indians

Indians are in practice discriminated against in the matter of appointments under the Government they are generally excluded from appointments to higher posts and are denied military training An Indian (or other non European) gets less pay than a European for the same work

In Kenya grants for social services *e g* education are more favourable to Europeans than to Indians Indians are also known to be subject to social disability such as exclusion from European hotels restaurants etc

Indian residents in these territories are entitled to acquire the citizenship of the U K and Colonies under the British Nationality Act Normally one year's continuous stay or birth in the territory is necessary

In Tanganyika Uganda and Zanzibar there is no elective system for filling up seats in the Legislative Councils In Kenya the population is divided into race electorates for the election of members to the Legislative Council the Indian electoral roll is further subdivided as between Indian Muslims and other Indians Out of six seats two are for Indian Muslims and four for other Indians

Indians also enjoy municipal franchise in these territories

The representation of Indians on the Legislative and Executive Councils is shown below

Country	Executive Council		Legislative Council	
	Total	Indians	Total	Indians
Kenya	14	1	54 (28 non officials)	8 (6 elected unofficials – 2 Muslims and 4 other Indians – and 2 nominated officials)
Uganda	14	2	32 (16 non officials)	4 (nominated non officials)
Tanganyika	13	1	29 (14 non officials)	3 (nominated non officials)
Zanzibar	9	–	17 (8 non officials)	2 (nominated non officials)

Since 1st January 1948 Kenya Uganda and Tanganyika have been included in a sort of loose union designated East African High Commission with a common legislature and a common administrative service for certain specific purposes The legislature of the East African High Commission consists of 7 ex officio members, 3 nominated official members (1 from each territory) and 13 non official members The 13 non official members consist of one elected by the non official members of the Legislative Council of each territory one European one Indian and one African member appointed by the Governor of each territory (in Kenya the European and Indian members are elected by the European and Indian members respectively of the Kenya Legislative Council) and one Arab member (appointed by the High Commission)

There are no restrictions on remittances to India

SOUTH AFRICA

Persons of Indian origin in South Africa are mostly labourers traders small farmers factory workers and in small numbers professionals (doctors, lawyers)

Racial discrimination against Indians exists in South Africa in every walk of life and in the worst possible form Persons of Indian origin are practically excluded from parliamentary provincial and municipal franchise as well as from public services except in menial and subordinate posts

Apartheid or racial segregation is the declared policy of the South African Government In accordance with this policy Indians are subject to a number of restrictions as regards immigration, inter provincial migration residence, trade, industry, professional and other occupations Racial segregation is also enforced in schools, post offices railways public transport hotels and public utility undertakings

The outstanding piece of anti Asiatic legislation is the Group Areas Act 1950 By this Act the entire population of the Union has been divided into three main groups White, Native and Coloured Persons of Indian origin are included in the Coloured group The Government will establish by proclamation group areas for exclusive occupation or ownership or both, of any of the groups The various racial communities will have to live and occupy premises for trade and professions only in areas allotted to them Indians and other non Europeans will thus not be able to continue to hold properties in an area declared for the European group The Union Government has already started taking active steps for the proclamation of group areas in a number of important cities in the Union When the Act is fully implemented persons of Indian origin will have to move into the areas exclusively reserved for them and this will disrupt their trade and business and involve immense losses running to millions of pounds

Asians have been declared prohibited immigrants since 1913 but the right of entry into the Union of wives and children of Indians domiciled in South Africa was provided for in the Reciprocity Resolution passed at the Imperial Conference of 1918 and later in the Cape Town Agreement of 1927 The Union Government have now announced their decision to ban the entry into South Africa of the wives and children of persons of Indian origin domiciled in the Union

The aim of the present South African Government in regard to Indians is their ultimate repatriation to India

Practically all Indians domiciled in South Africa are South African citizens by law, but they are denied some of the most important rights of citizenship

No Indian who is not already a South African citizen is allowed to acquire South African citizenship

Indians have no franchise right in the Provinces of Natal and Transvaal In the Cape Province they enjoy limited franchise rights as for Cape Coloureds

Indians are not eligible to a place in the Executive Council or Legislature whether provincial or central

There is no special limit to remittances by Indians to India

The question of the treatment of the people of Indian origin in South Africa was placed before the General Assembly of the United Nations in 1946 In that year the U N General Assembly passed a resolution expressing the opinion that the treatment of Indians should be in conformity with the international obligations under the agreements concluded between the two governments and the relevant provisions of the Charter Resolutions have been passed in subsequent sessions of the U N General Assembly in this respect but the Union Government have paid little attention to these resolutions In the Resolutions adopted in 1950 and afterwards the Union Government was also called upon to suspend the implementation of the Group Areas Act pending the conclusion of negotiations between the Governments of India Pakistan and South Africa But the Government of South Africa has proceeded with the implementation of this Act despite these Resolutions

The General Assembly by its latest Resolution set up a Good Offices Commission to assist the three Government concerned in their negotiations on this question But the South African Government refused to recognise the Commission

SOUTHERN RHODESIA

Indians in Southern Rhodesia are mostly traders Immigration of Indians into Southern Rhodesia has been prohibited since 1929 and only wives and children under 16 of domiciled Indian residents are admitted

Although there are no discriminatory laws as such against Indians in practice and in the interpretation of laws discrimination against them exists, particularly in the social sphere Indians are not eligible for appointments to the Fixed Establishment of the Civil Services and are not admitted into the Armed Forces Indians are required to obtain special permits in order to purchase possess or sell arms and ammunition whereas Europeans can do so on ordinary permits

There is a common roll for all races with common qualifications Of about 50 000 voters in the territory between 400 and 500 are Indians

Southern Rhodesia is a quasi Dominion and has a cabinet of seven Ministers headed by a Prime Minister There are no Indians in the Cabinet The country has an elected Legislative Council consisting of 30 members, all of whom are Europeans Because of the small number of Indian voters, no Indian has been elected to the Legislative Council so far

There is no limit to remittances to sterling area countries

CEYLON

Out of a total of 957 839 persons of Indian origin in Ceylon, about 781 000 (labourers subordinate staff etc) are in the tea rubber and coconut estates The balance of 176 839 is made up of merchants, shop assistants, land proprietors and professional men such as doctors accountants lawyers and their families

There is no restriction on Indians acquiring property in Ceylon but non Ceylonese are not allotted Crown Land Trade in certain commodities and with certain countries like Japan and Germany is exclusively reserved for Ceylonese enterprise Certain rights like fishing rights and the ownership of industries like public transport (omnibuses) are restricted to Ceylonese Government service is restricted to Ceylonese except that foreigners are appointed on a contract basis when no qualified or suitable Ceylonese is available Consequently Indians who have not acquired Ceylon citizenship have severe handicaps Indians are also denied certain privileges such as National Insurance and unemployment relief

The rights of Indians to citizenship are governed by two Acts enacted in 1948 after a discussion between the Indian and Ceylonese Prime Ministers* These Acts are the Ceylon Citizenship Act and the Indian and Pakistani Residents (Citizenship) Act which provide that the Indian residents in Ceylon would be entitled to obtain the citizenship of Ceylon by registration subject to the following conditions (*a*) an applicant must be resident in Ceylon when the Laws came into force and must have been residing in Ceylon since January 1 1936 if a bachelor and since January 1 1939 if a married man (*b*) he must have adequate means of livelihood (*c*) he should be in a position to comply with the laws and customs of Ceylon and (*d*) the application for registration was filed and submitted to the Controller of Registration before August 5 1951

Consequent on an adverse Privy Council judgement an amendment to the Indian and Pakistani Residents (Citizenship) Act was made by the Government in November, 1952 providing that the wife and each minor child of an applicant for citizenship should have been continuously resident in Ceylon from January 1, 1939 or the first anniversary of the marriage, or birth as the case may be whichever was later subject to certain exemptions This has proved a hardship to many persons

Great difficulty has also been encountered by applicants in proving ordinary residence in Ceylon during 1936 47 mainly due to lapse of time lack of documents and the illiteracy of the majority of applicants and consequent inability to provide legal proof of the required residential qualifications

Franchise to the legislation is limited to Ceylonese citizens Indians, even those who were voters till 1949, were disfranchised after the enactment of the Ceylon Parliamentary Election (Amendment) Act of 1949, if they had not acquired Ceylon citizenship

Indians at present enjoy franchise for local bodies but a bill has been introduced in Parliament restricting such franchise only to Ceylon citizens

The Parliament of Ceylon consists of the House of Representatives (Lower House) and the Senate (Upper House) The strength of the House of Representatives is 101 95 elected and 6 nominated members None of the elected representatives could be a non Ceylonese and consequently there is no Indian member in Parliament There is no Indian appointed by the Governor General for either House of Parliament but one person a Ceylonese by citizenship has been nominated to the House of Representatives to represent Indian interests

Remittances from Ceylon are governed by the Exchange Control Regulations in force which are altered from time to time in accordance with the financial situation in Ceylon Under the existing Exchange Control Regulations remittances upto a maximum of one third of proved income in Ceylon may be sent to India All non Ceylonese holding valid residence permits can obtain Exchange Control Cards from the Post Offices for a monthly remittance of Rs 30 for purposes of maintenance

FIJI

Indians have played an important part in the development of the economic resources of the Fiji Islands Indian residents are the descendants of the indentured immigrants from India who started coming into the Colony in 1879 The Indian population is about 47 per cent of the whole population of the Island The majority of the Indians are independent farmers agricultural labourers, skilled and semi skilled workers the rest being teachers, clerks, storekeepers, doctors lawyers Sugar cane production and road transport are Indian monopolies

There is no colour bar in Fiji and Indians suffer from no political disabilities There is also no racial discrimination against Indians with regard to appointment to the civil services. However, under the present Government regulations Indians cannot own land which is marked as Native Land Reserve' or Crown Land without the approval of Government but there are no restrictions on their acquiring freehold land

Indians in Fiji have franchise both in respect of Legislature and Local Town Council but the franchise is on a communal basis

The Legislative Council consists of 31 members —16 officials and 15 non officials In the non-official group Europeans Indians and Fijians have equal representation with 5 members for each group Of the 5 Indian members 3 are elected on a communal franchise and 2 are nominated The Executive Council consists of 4 officials (excluding the Governor) and 3 non-official members One of the non official members is an Indian elected from among the Indian members on the Legislative Council

There are no restrictions on the remittance of money outside Fiji

AUSTRALIA, NEW ZEALAND

The majority of persons of Indian origin settled in Australia are engaged in retail trade or agricultural operations

Indians domiciled in Australia do not suffer from any disability and have all citizenship rights In accordance with the White Australia Policy fresh Indians are however not admitted for permanent settlement

The Commonwealth franchise was granted to Indians domiciled in Australia in 1949

The great bulk of Indians in New Zealand are engaged in the sale of fruits and groceries Domiciled Indians are not generally subject to any disability or discrimination

Indians have always enjoyed the right to vote both in Municipal and Parliamentary elections

Indians can remit a limited amount to India for maintenance of wives and children Upto April 1952 the limit was £55 for wife and £5 for each child (subject to maximum of 4 children) per quarter but since then a 50 per cent cut has been imposed

* An agreement between India and Ceylon on the status of Indian residents in Ceylon was expected to be signed in February.

A TOURIST'S GUIDE*

THE following hints meant for foreign tourists may be useful

1 Every foreign tourist entering India should be in possession of a valid passport issued by his Government

He should also obtain before leaving his country a visa from the Indian representative abroad (or the British representative in countries where there are no Indian representatives) Commonwealth citizens are exempt from the visa requirement, provided their passports are valid for travel to India Persons of non Indian origin domiciled in South Africa are, however, required to obtain entry permits

Transit visas are required even when a person holds a through ticket unless he does not wish to leave the airport or the ship He can however leave the airport or ship by obtaining a landing permit

The maximum period of stay on a tourist visa is 3 months, and on a transit visa 15 days

For short visits not exceeding 2 weeks to Pakistan Ceylon or Nepal return visas can be obtained from the Government

Visas for India are unless otherwise specified, valid for a single journey only

2 All non Commonwealth tourists arriving in India are required to get themselves registered at the port of arrival and obtain certificates of registration They will be registered as "tourists" and will not be required to report their movements to the police or registration authorities during their stay in India

3 The Government of India have placed no health restrictions on persons entering India by sea or air except in regard to yellow fever

However all persons are advised, in their own interest, to be protected against small pox and cholera according to International requirements

4 All baggage is open to customs examination The duty payable on most articles varies from 25 per cent to 75 per cent according to the article

Personal effects are allowed to enter free Also alcoholic liquor up to one quart, provided the tourist can procure a permit on arrival by producing his Tourist Introduction Card

5 Tourists are allowed to bring into India any amount of Indian or foreign currency notes or coins except in the cases specified below

Bank of England notes up to £10 per head Straits dollar notes up to $45 per head Australian notes up to A£4 per head, Egyptian notes £20 Indian notes from Burma Rs 100 Indian coins from Pakistan Rs 5 in value, Indian coins from Afghanistan Re 1 in value There is no limit on the amount of Travellers Cheques

The official rates of exchange are as follows £1 equal to Rs 13 33 U S $1 equal to Rs 4 76 The actual buying and selling rates, however, differ slightly from these rates

Foreign currency notes declared to the customs can be exchanged at any authorized dealer or money changer

6 Tourists are advised to arrange for clearing their baggage by one of the recognized travel agencies

Ranchi : *hill station* and summer capital of Bihar, noted for its picturesque scenery and fine roads *Pop 100,849 (1951)*

Ranikhet : is a hill station in U P on the Kumaon Hills Most mountaineering parties establish their bases at Ranikhet

Sanchi : small village in Bhopal State, *famous for the Buddhist stupa which is the largest and the best preserved in India The stupa is built with sand stone and is about 103 feet in diameter and 42 feet high The sculpture is remarkable in that there is no anthropomorphic figure* of Buddha The most striking features of the Stupa are the four gates which are profusely carved with scenes from the Jataka stories Sanchi is on the main Central Rly line between Bombay and Delhi There is a State owned dak bungalow at the place where lodging and boarding are available by previous arrangement

Santiniketan : in West Bengal, is the home of the famous Viswa Bharati, the international university founded by Tagore *Places worth a visit are* Rabindra Bhavan (the poet's residence) where his personal belongings, manuscripts, etc are on display and the poet's mud hut where he wrote many of his famous books

The place is 91 miles from Calcutta on the Eastern Railway and 2 miles from Bolpur Station

Sasaram in Bihar is famous for the magnificent tomb of Sher Shah, Emperor of Delhi Pop 29 265 (1951)

Seringapatam : or Srirangapatna in Mysore State 9 miles by road from Mysore city is the ancient capital of Tippu Sultan It has the Sultan's fort mosque and palaces

Sevagram : in Madhya Pradesh is the village where Mahatma Gandhi founded his ashram

Shatrunjaya Hills.—Shatrunjaya, near Palitana in Saurashtra, is also known to the Jains as Siddhagiri or Siddhachala or the Hill of the Perfected Ones It is the most sacred place (*tirtha*) of Shvetambara Jains There are a great number of temples in groups on *tonks* or summits The most important one is the *tonk* of Adishvara Bhagavan The ancient image consecrated by the prophet's son, Batubal, has been replaced This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills At this place a large number of saints are said to have attained *Nirvana* A number of inscriptions have been found here, which have been utilised towards writing the history of Western India and the history of the different schools of Jainism

Shillong is the headquarters of the Assam Government Thirty six miles from here is Cherrapunji the wettest place in the world Pop 53 736 (1951)

Shivpuri also known as Sipri is in Madhya Bharat, 72 miles from Gwalior It is an interesting tourist resort with good hunting and boating possibilities *Pop 21 887 (1951)*

Simla : the former summer capital of the Government of India and the Government of the Punjab, it is situated on a spur of the Himalayas at a height of 7,200 feet Among the recreations of the place are hiking, riding and shooting The roads are excellent *Places worth a visit* 1 President's House 2 Race Course 3 Jakko Hill, 4 Observatory Hill, 5 Prospect Hill, and 6 Mashobra Mahasu, seven miles away There is a very good road into the interior and hikers to Narkanda Kotgarh Rampur and Bushahr can lodge in rest houses that line the road There is also a motor bus service on this road and holiday makers who leave in the morning can be back in Simla by evening The trek route to Kulu commences at Narkanda Simla is also well provided with a number of excellent schools The chief means of conveyance are rickshaws and horses

Simla is reached from Delhi *via* Kalka on the Delhi Ambala line From Kalka there is a mountain railway upto Simla At Kalka motor cars are available for those who prefer to travel by road the journey taking 3½ hours For cheaper travel there are buses which regularly run between Kalka and Simla All through the scenery is superb, with mountain peaks of luxuriant foliage Pop 46 150 (1951)

Somnath : see under Prabhas Patan

Sravanabelgola : in Mysore State, is noted for its Jain temples and the colossal statue of Gomatesvara which is 60 ft high the tallest known monolithic statue in the world erected in 983 A D

Srirangam : an island on the Cavery, two miles north of Tiruchirapalli (Trichinopoly), contains the largest temple in South India The temple is consecrated to Ranganath (Vishnu) and contains a hall of 1,000 columns Changes were made from the 9th to the 16th centuries and inscriptions of Chola, Pandya, Hoysasala and Vijayanagar are all found on it The north *gopuram* is 152 feet high Pop 36,702 (1951)

Tanjore : in the delta of the Cavery river in Madras State is noted for its temples and palaces It was the capital of the Cholas under whom it grew in name and fame as a great centre of culture *Places worth a visit* 1 the temple of Brihadishvara built by Raja Raja the great, 2 Naik's Court 3 Mahratha Court (the two together are often called the Palace in Tanjore), 4 Nandi, the Bull The chief means of conveyance are jutkas and taxis There are also good dak bungalows Tanjore is reached from Madras by the Southern Railway Pop 100 680

Tiruchirapalli (Trichinopoly) the third largest city in Madras State is situated on the Cavery It is a very ancient city and was the strategic capital of the Chola and Naik kings Tiruchirapalli is also known as the Kashi of South It is now a great educational centre *Places worth a visit* 1 the Rock and the temple on the Rock, 2 the two huge masses of granite known as the Golden Rock and Rakir Rock, 3 the Jambukeshwar Temple two miles north of Trichinopoly dedicated to Appulinga or Siva Pop 218 921 (1951)

Travancore (constituent part of Travancore Cochin Union) the most beautiful and fertile region in all southern India has many charms to offer the traveller within its domains It has scenery ranging from a countryside of lakes,

creeks and canals to low hills undulating land, rice fields and forests of cocoanut and areca palms, with a heavy undergrowth of pepper vines and tapioca

It has also a wonderful highland zone with mountains touching heights of from 5 000 feet to over 8 000 feet and hills covered with the densest of virgin forest the home of great herds of wild elephants and bison, tiger bear, black panther and wild boar and where lies the lovely Periyar Lake over which one may cruise in comfort and see wild life in its natural habitat

Trivandrum the capital is accessible by well kept roads and railway and is also now connected by air with Bombay, Madras and Colombo Pop 186 931 (1951)

Place worth a visit 1 the Palaces 2 Museum 3 Picture Gallery 4 Zoo 5 Aquarium

About seven miles south of Trivandrum is Kovalam a pleasant seaside resort with good facilities for bathing

Cape Comorin (Kanya Kumari) the Lands End of India, is the southern most point of Travancore where the sunrise and sunset are magnificent sights It is a sacred spot to Hindus and a place of pilgrimage as the reputed abode of Kanyakumari the virgin Goddess to whom the temple there is dedicated

North of Trivandrum is the ancient town of Quilon and to the north of this again a pleasant trip by boat along delightful backwaters or by car along a good motor road is the busy seaport of Alleppey

Trivandrum See under Travancore

Udaipur in Rajasthan, is a city of lakes with island palaces Seventy miles from Udaipur is Chittorgarh the abandoned capital of Mewar famous for its Tower of Victory Pop 89 621 (1951)

Ujjain : in Madhya Bharat is one of the seven cities sacred to the Hindus Pop 129 817 (1951)

Monolithic Temple (10th century A D) Kalugumalai

Padmanabha Temple (5th century A D) Trivandrum

*

GOVERNMENT OF INDIA

INDIA, that is Bharat, is a sovereign democratic Republic It is a union of 29 states, which are divided into four classes called Part A States, Part B States, Part C Sates and Part D States

The Part A Sates are Andhra, Assam, Bihar, Bombay, Madhya Pradesh, Madras, Orissa, Punjab, Uttar Pradesh, West Bengal

The Part B States are Hyderabad, Jammu and Kashmir, Madhya Bharat, Mysore, Patiala and East Punjab States Union Rajasthan, Saurashtra, Travancore Cochin

The Part C States are Ajmer, Bhopal, Bilaspur*, Coorg, Delhi Himachal Pradesh, Kutch, Manipur, Tripura and Vindhya Pradesh

There is only one Part D State Andaman and Nicobar Islands

The constitution of India is federal in nature

The distribution of power between the Centre and the local administrations follows the accepted principle that subjects which for convenience and efficiency ought to be administered on an all India basis are vested in the Union Government, while others (of the nation building sort) which can be conveniently administered on a local basis are vested in the State Governments

Thus, defence, foreign affairs transport and communications, currency and coinage banking, customs and export duties, and the administration of justice at the higher level are all Central subjects, while State powers include those over police, public health, education, agriculture, forests and so on

There is a third group of subjects that fall betwixt and between such as economic and social planning, social security and insurance, labour welfare, price control and vital statistics On these subjects both the Centre and the State can freely legislate, it being understood that whenever there is conflict between Union and State legislation the Union laws prevail

Three detailed lists of subjects are drawn up, the Union List, the State List and the Concurrent List, and the residuary power rests with the Union That is to say, if at any time, a subject which does not figure in any of the three lists comes up for consideration the power of dealing with it lies with the Union Government

Thus the constitution of India is a quasi federation in which the Centre is the dominating partner The Union Government controls the State governments in certain matters The Union has also the power to confer additional powers on the States

Provision is made for removing differences between the various States by empowering the President to establish an Inter State Council

It may be pointed out here that while the relations between the Centre and each of the States are substantially the same the Centre has a higher responsibility for the affairs of some States than in others Thus while in regard to a State like Bombay the Centre can intervene only in case of grave emergency, in regard to a State like Madhya Bharat the Centre has the right to issue directives on day to day administration for a period of ten years

FUNDAMENTAL RIGHTS

In the Indian Union the rights of Indian citizenship are given to 1 One who is born in India, 2 Either of whose parents were born in India, and 3 Who has been a resident of India for five years Provision is also made for persons who are affected by the partition of the sub-continent

Certain fundamental rights are guaranteed to every citizen for the first time All citizens are equal before the law and no discrimination is made on grounds of religion, sex, caste, etc All citizens have equal opportunities

Freedom of speech and expression is guaranteed, and the right to hold meetings (without arms), to form unions and associations, to move freely in India and to reside in any part, to acquire property and to practise any profession are also assured under the Constitution

Life and personal liberty are protected under the law, and there will not be punishment for the same offence more than once Preventive detention is also forbidden except in certain cases

Children under the age of 14 will not be allowed to be employed in factories and forced labour like *begar* is prohibited

India is a secular State and as such there is freedom of conscience Citizens are allowed to profess practise and propagate any religion, and the State will not ordinarily interfere in religious questions The *minorities* are assured of cultural and educational rights

The State can acquire compulsorily property for public purposes but compensation must be paid to the owner of the property concerned But property may also be acquired without compensation in certain cases

All titles, except military or academic, are also abolished

Untouchability is abolished

These fundamental rights can be enforced by the Supreme Court which has the authority to issue prerogative writs such as *habeas corpus, certiorari, prohibition*, etc

In respect to the Defence Forces, however, Parliament has power to legislate on these fundamental rights

It must also be pointed out that some of these fundamental rights can be suspended in case of emergency, and the remedies available for their enforcement may also be suspended by an order of the President

There are also certain Directive Principles in accordance with which the State has to direct its policy These principles are of a recommendatory character and cannot be enforced in a court of law However the State is expected to look upon them as a kind of touch stone for its policy and action

These principles include organization of village panchayats, provision for just and humane conditions of work, maternity relief, a uniform civil code for the citizens provision for compulsory and free education of children and separation of judiciary from executive

UNION EXECUTIVE

The executive head of the Indian Union is the President He is elected by the elected members of the Houses of Parliament and the Legislative Assemblies of all the States His term of office is five years, and he is eligible for re election Only a person who is a citizen of India and has completed the age of thirty-five years is qualified to contest the election

He is the Supreme Commander of the Armed Forces

He has the power to grant pardons or remission of punishment

The President is entitled to the use of an official residence without payment of rent, and a salary of Rs 10,000 per month and allowances Provision has also been made by an Act of Parliament for a pension of Rs 15,000 per annum

The President has the power of summoning proroguing and dissolving Parliament At the commencement of each session he addresses both Houses of Parliament assembled together He has the right of sending messages to Parliament and sending back a Bill presented to him for his consent This power however can be used by him only once

The President has legislative powers under certain circumstances When neither of the Houses of Parliament is in session and the President is satisfied that circumstances exist which make immediate action necessary he may promulgate an ordinance Such ordinance must be put before both the Houses of Parliament and will cease to operate at the expiration of six weeks from the reassembly of Parliament The President can also declare emergency if he is satisfied that the security of India or any part thereof is threatened either *by war or internal* disturbances when the legislature is in session Such a proclamation would give additional powers to the Union executive and the Legislature

The judges of the Supreme Court and the High Courts the Attorney General of India and the Comptroller and Auditor General of India are all appointed by the President The heads of the various States, *i e*, Governors and Rajpramukhs are also appointed by the President He has the power of appointing ambassadors abroad and receiving diplomatic representatives of foreign States

The President places a number of annual reports before Parliament the Annual Financial Statement, the report of the Auditor-General of India relating to the accounts of the Government of India the recommendations of the Finance Commission, the annual report of the Union Public Services Commission and the report of the Special Officer for Minorities

All executive action of the Government of India is taken in the name of the President and it is the duty of the Prime Minister to communicate to the President all decisions of the Council of Ministers

Provision is made for the impeachment of the *President*, by Parliament, for violation of the Constitution If such a resolution is passed by a majority of not less than two-thirds of the total membership, such a resolution has the effect of removing the President from office

In the exercise of his functions, the President has the aid and advice of a Council of Ministers, with the Prime Minister at the head of it The President appoints the Prime Minister and other Ministers are appointed on the advice of the Prime Minister

The Council of Ministers is collectively responsible to the House of the People Every Minister must be a member of either House of Parliament and he is required to take an oath of office and secrecy

The salaries and allowances of Ministers are determined by Parliament

There is a Vice President of India, who is ex officio Chairman of the Council of States The Vice President acts as President during a casual vacancy in the office of the President He is elected by the members of both Houses of Parliament and his term of office is five years

UNION PARLIAMENT

The Parliament consists of the President and two Houses to be known as the Council of States and the House of the People It must meet at least twice a year The maximum strength of the two Houses is to be 250 and 500 respectively

The Council of States is elected by the members of the Legislative Assemblies of the States while the House of the People is elected directly by the voters in the country

The elections to the House of the People are based on adult suffrage and joint electorates There is no reservation of seats for any group except Scheduled Castes and Scheduled Tribes

* A proposal to merge Bilaspur into Himachal Pradesh is under consideration

The Council of States is a permanent body with one third of its members retiring every second year The Chairman of the Council of States is the Vice President of the Union

The House of the People has a duration of five years ordinarily There is a Speaker and a Deputy Speaker of the House both of whom are elected by its members

All these posts carry a salary and allowances

Under certain circumstances, the members can be disqualified and their seats declared vacant

Money Bills can be introduced only in the House of the People The Council of States can only return a bill with its recommendations to the House of the People within a period of fourteen days of its receipt Bills passed by Parliament are submitted to the President for his assent Only on such assent being given does the Bill become law

The language used in Parliament is either Hindi or English

The distribution of seats in the Council of States is as follows —Andhra 12 Assam 6, Bihar, 21 Bombay, 17 Madhya Pradesh 12, Madras 18 Orissa, 9, Punjab, 8 Uttar Pradesh, 31 West Bengal 14 Hyderabad 11 Jammu and Kashmir, 4, Madhya Bharat 6 Mysore 6 Patiala and East Punjab States Union 5 Rajasthan, 9, Saurashtra 4 Travancore Cochin 6, Ajmer and Coorg 1, Bhopal, 1, Bilaspur and Himachal Pradesh 1 Delhi 1 Kutch, 1 Manipur and Tripura, 1, Vindhya Pradesh, 4

Twelve members are nominated by the President, from among persons who are known for their eminence in literature science or art, or for their record of social service

The allocation of seats in the House of the People is as follows —

Andhra, 28, Assam, 12, Bihar 55 Bombay, 45, Madhya Pradesh 29, Madras 46 Orissa 20, Punjab 15 Uttar Pradesh 86 West Bengal, 34, Hyderabad, 25, Jammu and Kashmir, 6 Madhya Bharat 11, Mysore 12, Patiala and East Punjab States Union 5 Rajasthan, 20, Saurashtra, 20, Travancore Cochin 12 Ajmer 2 Bhopal, 2, Bilaspur, 1 Coorg, 1, Delhi, 4, Himachal Pradesh 3, Kutch, 2 Manipur, 2 Tripura, 2 Vindhya Pradesh, 6, Andaman and Nicobar Islands 1

The Supreme Court of India consists of a Chief Justice of India and not more than seven other Judges The appointments are made by the President The salary of the Chief Justice is Rs 5,000 per month and of the other Judges Rs 4,000 per month

For purposes of constitutional law the Supreme Court has exclusive original jurisdiction in any dispute (*a*) between the Government of India and one or more States, (*b*) between the Government of India and one or more States on one side and one or more other States on the other, (*c*) between two or more States only in so far as the dispute involves any question on which the existence of a legal right depends

The Supreme Court has also jurisdiction both appellate and original in matters which involve a substantial question of law as to the interpretation of the constitution

An Attorney General for legal advice and a Comptroller and Auditor General of India for audit and accounts are appointed by the President The Attorney General has the right to appear in all courts in India

STATES

There are three types of States from a constitutional point of view (1) Ten States, that have a Governor as the executive head They are Andhra, Assam, Bihar, Bombay, Madhya Pradesh, Madras Orissa, Punjab, Uttar Pradesh and West Bengal (2) Seven, which have a Rajpramukh at the head They are Hyderabad, Madhya Bharat Mysore, Patiala and East Punjab States Union, Rajasthan, Saurashtra and Travancore Cochin (3) Ten States, which have a Chief Commissioner or a Lieutenant Governor at the head and controlled by the Union Government They are Ajmer, Bhopal Bilaspur Coorg Delhi Himachal Pradesh Kutch Manipur, Tripura and Vindhya Pradesh

Of the third type of State those which have a Lieutenant Governor are Himachal Pradesh and Vindhya Pradesh

Bilaspur is, in fact administered by the Lieutenant Governor of Himachal Pradesh

Andamans and Nicobar Islands are administered by the President through a Chief Commissioner

Kashmir is technically a Part B State but is in fact in a class by itself It is internally autonomous and has even extra territorial jurisdiction It is a part of India only in the matter of the three subjects for which it has acceded—defence foreign affairs and communications Hereditary monarchy has also ceased The head of the State is really a President he is called Sadar i Riyasat

The Governor of a State is appointed by the President And a Rajpramukh is appointed or recognized by the President Executive power is vested in the Governor who is appointed for a term of five years, ordinarily Only a citizen of India and one who has completed 35 years of age, is eligible for such an appointment

The Governor like the President has power to grant pardon, etc He will have a Council of Ministers to aid and advise him The Governor also appoints an Advocate General for the State

Seven States (Bihar, Bombay Madras Mysore Punjab, Uttar Pradesh, West Bengal) have two Houses of Legislature the others, only one The two Houses are called the Legislative Assembly and the Legislative Council The former has a duration of five years, while the latter is a permanent body with one third of the members retiring every second year The minimum strength of the Council is 40 and the maximum one fourth of the State Assembly

It may be added here that three Part C States have only electoral colleges and not Legislatures They are Kutch Manipur and Tripura

The Legislature must meet at least twice a year While the Assembly consists of members who are directly elected from territorial constituencies, the Council consists of members nominated by the Governor elected by the Assembly and of representatives of local bodies and special interests

The total number of seats in the Legislative Assemblies and the Legislative Councils are as follows —

Name of State	Total number of Seats in the Assembly	Total number of Seats in the Council
Andhra	140	—
Assam	108	—
Bihar	330	72
Bombay	315	72
Madhya Pradesh	232	—
Madras	230	45
Orissa	140	—
Punjab	128	40
Uttar Pradesh	430	72
West Bengal	238	51
Hyderabad	175	—
Madhya Bharat	99	—
Mysore	104	40
Patiala & East Punjab States Union	60	—
Rajasthan	160	—
Saurashtra	60	—
Travancore-Cochin	108	—
Ajmer	30	—
Bhopal	30	—
Coorg	24	—
Delhi	48	—
Himachal Pradesh	36	—
Vindhya Pradesh	60	—

Jammu and Kashmir has only a Constituent Assembly yet

The right of summoning, proroguing and dissolving the Legislature is vested in the Governor, who addresses the legislature at the commencement of each session

Like the Parliament there is a Speaker, a Deputy Speaker a Chairman and a Deputy Chairman for the Legislative Assembly and the Legislative Council respectively These officers of the legislatures are entitled to salary and allowances

The language in the legislature can be either Hindi or English or any other language allowed by the Speaker

The State Legislatures cannot discuss the conduct of any judge of the Supreme Court or of a High Court in the discharge of his duties

As the Governor is a part of the legislature, he has certain legislative powers He can promulgate ordinances during the recess of the legislature such ordinances must be placed before the legislature and cease to operate at the expiration of six weeks from the reassembly of the legislature

The salary of the Governor is Rs 5 500 per month and he is also entitled to certain allowances

If the Government of the State cannot be carried on in accordance with the provisions of the Constitution, and the Governor or the Rajpramukh makes a report to that effect to the President the President may by proclamation assume to himself all or any of the functions of the Government of the State He may also declare that the powers of the State legislatures shall be exercised by Parliament, and may suspend any provision of the constitution relating to the State

However, he cannot assume to himself or suspend any of the provisions of the Constitution relating to High Courts

There is a High Court for each State

The administration of the States in group two *e g* Hyderabad is carried on in accordance with the provisions laid down with reference to the States in group one Instead of a Governor, these States have a Rajpramukh Also for a period of ten years from the commencement of the constitution these States will be under the general supervision of the Government of India

The constitution of Part C States is governed by the Government of Part C States Act (Act XLIX of 1951) By this Act all States except Bilaspur, Kutch, Manipur and Tripura have a legislature called the Legislative Assembly Provisions as regards duration, sessions and officers, etc of the Assemblies, are similar to those laid down for Part A States The extent of the legislative power is specifically mentioned in Section 21

There will be a Council of Ministers in each State to aid and advise the Chief Commissioner In case the Chief Commissioner disagrees with the Council, he may refer the matter to the President and act according to his directions The Chief Commissioner and the Council of Ministers will be under the general control of and comply with such particular directions, as may from time to time be given by the President

Special provision is made for the State of Delhi

Provision is also made to meet any situation created by the failure of the constitutional machinery in the Part C States

For the States of Kutch, Manipur and Tripura there are Councils of Advisers set up by the President to assist the Chief Commissioners

For Vindhya Pradesh and Himachal Pradesh there are Lieutenant Governors, whose salaries are fixed at Rs 3,000 per month

As regards Andaman and Nicobar Islands, the President makes rules and regulations for the peace and good government of the State, and appoints a Chief Commissioner for administration The President has the power of making regulations which have the effect of amending or repealing an Act of Parliament

FINANCE

The financial relations between the Union and the States are as follows —There is a Consolidated Fund of India and a Consolidated Fund of each State and all money received is credited to the public account of India or the public account of the State as the case may be Provision is also made for the establishment of a Contingency Fund of India and a Contingency Fund of the State

Certain duties and taxes are levied and collected by the Government of India such as duties in respect of succession to property terminal taxes taxes on railway fares and freights etc But the net proceeds are assigned to the States in accordance with such principles of distribution as formulated by Parliament Certain other taxes like income tax are levied and collected by the Government of India but are distributed between the Union and the States

These matters are now fixed in accordance with the recommendations of the Finance Commission

No moneys can be appropriated out of the Consolidated Fund of India or of a State except in accordance with an Appropriation Act by the appropriate legislature

The property of the Union is exempt from the taxes imposed by a State, and the property and income of State are exempt from Union taxation

The privy purse sums of the Rulers are a charge on the Consolidated Fund of India and these sums are to be exempt from taxes on income

There is a Public Service Commission for the Union and also for most of the States Two or more States may agree to have only one Commission for the group Appointment of members of the Commission are made by the President or the Governor or Rajpramukh as the case may be The Commission conducts examinations for appointments to the services of the Union or the State The Union Commission submits an annual report to the President

ELECTIONS

All elections are directed and controlled by an Election Commission Elections to the House of the People and the Legislative Assemblies of the States are on the basis of adult suffrage Seats are reserved in the House of the People for the Scheduled Castes and the Scheduled Tribes

The President may nominate not more than two members of the Anglo Indian community to the House of the People if he thinks that the community is not adequately represented Similar power is given to the Governor or the Rajpramukh of a State

The claims of the Schedule Castes and the Scheduled Tribes are to be considered in making appointments to services, and for two years after the commencement of the Constitution the Anglo Indians were to have the same proportion in the services as they had immediately before 15th August 1947 This reservation is to be progressively reduced by 10 per cent every two years in such a way that it is to cease completely ten years after the commencement of the Constitution

In fact all reservation including reservation of seats for Scheduled and Tribal classes are to cease ten years after the commencement of the Constitution

A special officer for the Scheduled Castes and the Schedule Tribes has been appointed

OFFICIAL LANGUAGE

Hindi in the Devanagari script is the official language of the Union and the form of numerals is the international form of the Indian numerals

The English language, however, will continue to be the official language for a period of not more than fifteen years from the commencement of the Constitution

The official language of the Union, i.e, English will be used for communication between the Union and a State or between one State and another However, if two States agree Hindi may be used instead of English between them

All proceedings in the Supreme Court and High Courts the texts of Bills and Acts passed by the legislatures and ordinances promulgated by the appropriate authorities are to be in the English language, until Parliament by law provides otherwise

By previous consent of the President proceedings in a High Court may be conducted in Hindi or any recognised State language but judgments decrees or orders passed by the court must be in English

It is the duty of the Union Government to promote and spread the Hindi language The vocabulary for the development of the language is to be drawn primarily from Sanskrit

The States have been given the liberty of adopting any one or more languages used in their territory or Hindi as the official language of the State

The following languages are recognised by the Constitution (1) Assamese, (2) Bengali, (3) Gujarati (4) Hindi (5) Kannada (6) Kashmiri (7) Malayalam (8) Marathi (9) Oriya, (10) Punjabi, (11) Sanskrit (12) Tamil (13) Telugu, (14) Urdu

A commission is to be appointed by the President at the expiration of five years from the commencement of the Constitution to make recommendations to him as regards the progressive use of the Hindi language for official purposes of the Union, and other allied matters

EMERGENCY PROVISIONS

If the President is satisfied that a grave emergency exists and the security of India or any part thereof is threatened either by war or internal disturbance he may make a declaration to that effect Such proclamation must be approved by both the Houses of Parliament, before the expiration of two months otherwise it ceases to operate at the end of that period As a result of this proclamation the Parliament will be authorised to legislate on items included in the State list and the President to issue directions either to the Governor or the Rajpramukh as the case may be Parliament can validate such a proclamation for a period of three years which is the maximum

A request for a declaration of emergency may also come from a State authority

This however would not be applicable to the functions of the High Courts Somewhat similar provision is also made for financial emergency

AMENDMENT OF THE CONSTITUTION

For purposes of amendment the items are divided into three classes with a different procedure for each class

For amendment of the provision with respect to the Supreme Court and the High Courts, the distribution of legislative powers between the Centre and the States, the representation of the States in Parliament, etc the amendment must be passed by both the Houses of Parliament by a majority of the total membership of the House and by a majority of two thirds of the members present and voting, and must further be ratified by the legislatures of not less than one half of the States

In other cases no reference to the State legislatures is necessary Parliament by itself can amend the Constitution in the manner mentioned above In some cases amendments can be effected even by a bare majority such as is required for the passing of any ordinary law The amendments contemplated in Articles 4 169 and 240 fall within this class

RE-ALLOCATION OF SEATS

The Census of 1952 made changes in the composition of the legislatures inevitable Accordingly a Delimitation Commission was set up and certain orders made The composition of the legislatures as laid down in these orders is given below They will come into force at the next general election

The distribution of seats in the House of the People will be as follows The second column gives the number reserved for the Scheduled Castes and the third column the number reserved for the Scheduled Tribes

PART A STATES				
1	Andhra	28	4	1

2 Police, including railway and village police

3 Administration of justice, constitution and organisation of all courts, except the Supreme Court and the High Court officers and servants of the High Court, procedure in rent and revenue courts, fees taken in all courts except the Supreme Court

4 Prisons, reformatories, Borstal institutions and other institutions of a like nature, and persons detained therein, arrangements with other States for the use of prisons and other institutions

5 Local government, that is to say the constitution and powers of municipal corporations, improvement trusts, district boards, mining settlement authorities and other local authorities for the purpose of local self government or village administration

6 Public health and sanitation, hospitals and dispensaries

7 Pilgrimages other than pilgrimages to places outside India

8 Intoxicating liquors, that is to say, the production, manufacture, possession, transport, purchase and sale of intoxicating liquors

9 Relief of the disabled and unemployable

10 Burials and burial grounds, cremations and cremation grounds

11 Education including universities, subject to the provisions of entries 63, 64, 65 and 66 of List I and entry 25 of List III

12 Libraries, museums and other similar institutions controlled or financed by the State, ancient and historical monuments and records other than those declared by Parliament by law to be of national importance

13 Communications, that is to say, roads, bridges, ferries, and other means of communication not specified in List I, municipal tramways, ropeways inland waterways and traffic thereon subject to the provisions of List I and List III with regard to such waterways, vehicles other than mechanically propelled vehicles

14 Agriculture, including agricultural education and research, protection against pests and prevention of plant diseases

15 Preservation, protection and improvement of stock and prevention of animal diseases, veterinary training and practice

16 Pounds and the prevention of cattle trespass

17 Water, that is to say, water supplies, irrigation and canals, drainage and embankments, water storage and water power subject to the provisions of entry 56 of List I

*18 Land, that is to say, rights in or over land, land tenures including the relation of landlord and tenant, and the collection of rents, transfer and alienation of agricultural land, land improvement and agricultural loans, colonization

19 Forests

20 Protection of wild animals and birds

21 Fisheries

22 Courts of wards subject to the provisions of entry 34 of List I, encumbered and attached estates.

23 Regulation of mines and mineral development subject to the provisions of List I with respect to regulation and development under the control of the Union

24 Industries subject to the provisions of entry 52 of List I

25 Gas and gas-works

26 Trade and commerce within the State subject to the provisions of entry 33 of List III

27 Production, supply and distribution of goods subject to the provisions of entry 33 of List III

28 Markets and fairs

29 Weights and measures except establishment of standards

*30 Money lending and money lenders, relief of agricultural indebtedness

31 Inns and inn keepers

32 Incorporation, regulation and winding up of corporations, other than those specified in List I, and universities, unincorporated trading, literary, scientific, religious and other societies and associations, co-operative societies

33 Theatres and dramatic performances cinemas subject to the provisions of entry 60 of List I, sports, entertainments and amusements

34 Betting and gambling

35 Works, lands and buildings vested in or in the possession of the State

36 Acquisition or requisitioning of property, except for the purposes of the Union, subject to the provisions of entry 42 of List III

37 Elections to the Legislature of the State subject to the provisions of any law made by Parliament

38 Salaries and allowances of members of the Legislature of the State, of the Speaker and Deputy Speaker of the Legislative Assembly and if there is a Legislative Council, of the Chairman and Deputy Chairman thereof

39 Powers privileges and immunites of the Legislative Assembly and of the members and the committees thereof, and if there is a Legislative Council, of that Council and of the members and the committees thereof, enforcement of attendance of persons for giving evidence or producing documents before committees of the Legislature of the State

40 Salaries and allowances of Ministers for the State

41 State public services, State Public Service Commission

42 State pensions, that is to say, pensions payable by the State or out of the Consolidated Fund of the State

43 Public debt of the State

44 Treasure trove

45 Land revenue, including the assessment and collection of revenue, the maintenance of land records, survey for revenue purposes and records of rights, and alienation of revenues

46 Taxes on agricultural income

47 Duties in respect of succession to agricultural land

48 Estate duty in respect of agricultural land

49 Taxes on lands and buildings

50 Taxes on mineral rights subject to any limitations imposed by Parliament by law relating to mineral development

*A resolution empowering the Centre to legislate on certain items in the State List with a view to separating the admixture of non evacuee interest in evacuee property has been passed by Parliament

These rights relate to Entries 18 and 30 in the State List and comprise rights in or over land, transfer and alienation of agricultural land, money lending, and money-lenders and relief of agricultural indebtedness

Such separation of non evacuee interest in evacuee property, would allow more accurate definition of the "dimensions" of evacuee property Admixture existed in cases where evacuee property was mortgaged to a non evacuee and *vice versa* and where only a part share of a number of co sharers was declared evacuee property

Since evacuee property was scattered all over the country, individual investments by States under Entries 18 and 30 would result in a lack of uniformity

51 Duties of excise on the following goods manufactured or produced in the State and countervailing duties at the same or lower rates on similar goods manufactured or produced elsewhere in India —

(*a*) alcoholic liquors for human consumption

(*b*) opium Indian hemp and other narcotic drugs and narcotics

but not including medicinal and toilet preparations containing alcohol or any substance included in sub paragraph (*b*) of this entry

52 Taxes on the entry of goods into a local area for consumption use or sale therein

53 Taxes on the consumption or sale of electricity

54 Taxes on the sale or purchase of goods other than newspapers

55 Taxes on advertisements other than advertisements published in the newspapers

56 Taxes on goods and passengers carried by road or on inland waterways

57 Taxes on vehicles whether mechanically propelled or not suitable for use on roads including tramcars subject to the provisions of entry 35 of List III

58 Taxes on animals and boats

59 Tolls

60 Taxes on professions, trades callings and employments

61 Capitation taxes

62 Taxes on luxuries including taxes on entertainments, amusements, betting and gambling

63 Rates of stamp duty in respect of documents other than those specified in the provisions of List I with regard to rates of stamp duty

64 Offences against laws with respect to any of the matters in this List

65 Jurisdiction and powers of all courts except the Supreme Court with respect to any of the matters in this List

66 Fees in respect of any of the matters in this List, but not including fees taken in any court

LIST III—CONCURRENT LIST

1 Criminal law including all matters included in the Indian Penal Code at the commencement of this Constitution but excluding offences against laws with respect to any of the matters specified in List I or List II and excluding the use of naval military or air forces or any other armed forces of the Union in aid of the civil power

2 Criminal procedure, including all matters included in the Code of Criminal Procedure at the commencement of this Constitution

3 Preventive detention for reasons connected with the security of a State, the maintenance of public order, or the maintenance of supplies and services essential to the community, persons subjected to such detention

4 Removal from one State to another State of prisoners accused persons and persons subjected to preventive detention for reasons specified in entry 3 of this List

5 Marriage and divorce, infants and minors, adoption, wills, intestacy and succession, joint family and partition, all matters in respect of which parties in judicial proceedings were immediately before the commencement of this Constitution subject to their personal law

6 Transfer of property other than agricultural land, registration of deeds and documents

7 Contracts, including partnership, agency, contracts of carriage and other special forms of contracts, but not including contracts relating to agricultural land

8 Actionable wrongs

9 Bankruptcy and Insolvency

10 Trust and Trustees

11 Administrators general and official trustees

12 Evidence and oaths recognition of laws, public acts and records, and judicial proceedings

13 Civil procedure including all matters included in the Code of Civil Procedure at the commencement of this Constitution, limitation and arbitration

14 Contempt of court, but not including contempt of the Supreme Court

15 Vagrancy, nomadic and migratory tribes

16 Lunacy and mental deficiency, including places for the reception or treatment of lunatics and mental deficients

17 Prevention of cruelty to animals

18 Adulteration of foodstuffs and other goods

19 Drugs and poisons subject to the provisions of entry 59 of List I with respect to opium

20 Economic and social planning

21 Commercial and industrial monopolies combines and trusts

22 Trade Unions, industrial and labour disputes

23 Social security and social insurance, employment and unemployment

24 Welfare of labour including conditions of work, provident funds, employers liability, workmens compensation, invalidity and old age pensions and maternity benefits

25 Vocational and technical training of labour

26 Legal, medical and other professions

27 Relief and rehabilitation of persons displaced from their original place of residence by reason of the setting up of the Dominions of India and Pakistan

28 Charities and charitable institutions, charitable and religious endowments and religious institutions

29 Prevention of the extension from one State to another of infectious or contagious diseases or pests affecting men, animals or plants

30 Vital statistics including registration of births and deaths

31 Ports other than those declared by or under law made by Parliament or existing law to be major ports

32 Shipping and navigation on inland water ways as regards mechanically propelled vessels, and the rule of the road on such waterways, and the carriage of passengers and goods on inland waterways subject to the provisions of List I with respect to national waterways

33 Trade and commerce in and the production, supply and distribution of the products of industries where the control of such industries by the Union is declared by Parliament by law to be expedient in the public interest

34 Price control

35 Mechanically propelled vehicles including the principles on which taxes on such vehicles are to be levied

36 Factories

37 Boilers

38 Electricity

39 Newspapers, books and printing presses

40 Archeological sites and remains other than those declared by Parliament by law to be of national importance

41 Custody, management and disposal of property (including agricultural land) declared by law to be evacuee property

42 Principles on which compensation for property acquired or requisitioned for the purposes of the Union or of a State or for any other public purpose is to be determined and the form and the manner in which such compensation is to be given

43 Recovery in a State of claims in respect of taxes and other public demands including arrears of land revenue and sums recoverable as such arrears, arising outside that State

44 Stamp duties other than duties or fees collected by means of judicial stamps, but not including rates of stamp duty

45 Inquiries and statistics for the purposes of any of the matters specified in List II or List III

46 Jurisdiction and powers of all courts, except the Supreme Court, with respect to any of the matters in this List

47 Fees in respect of any of the matters in this List, but not including fees taken in any court

FUNDAMENTAL RIGHTS

The following is the full text of the Fundamental Rights and the Directive Principle Articles of the Constitution showing the numbers of the Articles

GENERAL

12 In this Part, unless the context otherwise requires, the State includes the Government and Parliament of India and the Government and the Legislature of each of the States and all local or other authorities within the territory of India or under the control of the Government of India

13 (1) All laws in force in the territory of India immediately before the commencement of this Constitution, in so far as they are inconsistent with the provisions of this Part, shall, to the extent of such inconsistency, be void

(2) The State shall not make any law which takes away or abridges the rights conferred by this Part and any law made in contravention of this clause shall, to the extent of the contravention, be void

(3) In this article, unless the context otherwise requires—

(*a*) "law" includes any Ordinance, order bye law, rule, regulation, notification, custom or usage having in the territory of India the force of law,

(*b*) "laws in force" includes laws passed or made by a Legislature or other competent authority in the territory of India before the commencement of this Constitution and not previously repealed, notwithstanding that any such law or any part thereof may not be then in operation either at all or in particular areas

RIGHT TO EQUALITY

14 The State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India

15 (1) The State shall not discriminate against any citizen on grounds only of religion, race, caste, sex, place of birth or any of them

(2) No citizen shall, on grounds only of religion, race, caste, sex, place of birth or any of them, be subject to any disability, liability, restriction or condition with regard to—

(*a*) access to shops, public restaurants, hotels and places of public entertainment, or

(*b*) the use of wells, tanks, bathing ghats, roads and places of public resort maintained wholly or partly out of State funds or dedicated to the use of the general public

(3) Nothing in this article shall prevent the State from making any special provision for women and children

(4) Nothing in this article or in clause (2) of article 29 shall prevent the State from making any special provision for the advancement of any socially and educationally backward classes of citizens or for the Scheduled Castes and the Scheduled Tribes

16 (1) There shall be equality of opportunity for all citizens in matters relating to employment or appointment to any office under the State

(2) No citizen shall, on grounds only of religion race, caste sex, descent, place of birth, residence or any of them, be ineligible for or discriminated against in respect of, any employment or office under the State

(3) Nothing in this article shall prevent Parliament from making any law prescribing in regard to a class or classes of employment or appointment to an office under any State specified in the First Schedule or any local or other authority within its territory, any requirement as to residence within that State prior to such employment or appointment

(4) Nothing in this article shall prevent the State from making any provision for the reservation of appointments or posts in favour of any backward class of citizens which, in the opinion of the State is not adequately represented in the services under the State

(5) Nothing in this article shall affect the operation of any law which provides that the incumbent of an office in connection with the affairs of any religious or denominational institution or any member of the governing body thereof shall be a person professing a particular religion or belonging to a particular denomination

17 Untouchability is abolished and its practice in any form is forbidden The enforcement of any disability arising out of Untouchability shall be an offence punishable in accordance with law

18 (1) No title, not being a military or academic distinction, shall be conferred by the State

(2) No citizen of India shall accept any title from any foreign State

(3) No person who is not a citizen of India shall while he holds any office of profit or trust under the State accept without the consent of the President any title from any foreign State

(4) No person holding any office of profit or trust under the State shall without the consent of the President, accept any present, emolument, or office of any kind from or under any foreign State

RIGHT TO FREEDOM

19 (1) All citizens shall have the right—

(*a*) to freedom of speech and expression,
(*b*) to assemble peaceably and without arms,
(*c*) to form associations or unions,
(*d*) to move freely throughout the territory of India,
(*e*) to reside and settle in any part of the territory of India,
(*f*) to acquire, hold and dispose of property, and
(*g*) to practise any profession, or to carry on any occupation, trade or business

(2) Nothing in sub clause (*a*) of clause (1) shall affect the operation of any existing law or prevent the State from making any law in so far as such law imposes reasonable restrictions on the exercise of the right conferred by the said sub clause in the interest of the security of the State, friendly relations with foreign States, public order, decency or morality, in cluding in particular, any existing or other law relating to contempt of court, defamation or incitement to an offence

(3) Nothing in sub-clause (*b*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, in the interests of public order, reasonable restrictions on the exercise of the right conferred by the said sub clause

(4) Nothing in sub clause (*c*) of the said clause shall affect the operation of any existing law in so far as it imposes, or prevent the State from making any law imposing, in the interests of public order or morality, reasonable restrictions on the exercise of the right conferred by the said sub clause

(5) Nothing in sub clauses (*d*) (*e*) and (*f*) of the said clause shall affect the operation of any existing law in so far as it imposes or prevent the State from making any law imposing, reasonable restrictions on the exercise of any of the rights conferred by the said sub clauses either in the interests of the general public or for the protection of the interests of any Scheduled Tribe

(6) Nothing in sub clause (*g*) of the said clause shall affect the operation of any existing law in so far as it imposes or prevent the State from making any law imposing in the interests of the general public reasonable restrictions on the exercise of the right conferred by the said sub clause and in particular nothing in the said sub clause shall affect the operation of any existing law in so far as it relates to or prevents the State from making any law relating to—

(*i*) the professional or technical qualifications necessary for practising any profession or carrying on any occupation, trade or business or

(*ii*) the carrying on by the State or by a corporation owned or controlled by the State, of any trade business industry or service whether to the exclusion complete or partial, of citizens or otherwise

No law in force in the territory of India immediately before the commencement of the constitution which is consistent with the provisions of article 19 as amended shall be deemed to be void, or ever to have become void on the ground that being a law which takes away or abridges the right conferred by sub clause (*a*) of clause (1) of the said article its operation was not saved by sub clause (2) of that article as originally enacted

Explanation—In this clause the expression law in force has the same meaning as in clause (1) of article 13 of the constitution

20 (1) No person shall be convicted of any offence except for violation of a law in force at the time of the commission of the act charged as an offence, nor be subjected to a penalty greater than that which might have been inflicted under the law in force at the time of the commission of the offence

(2) No person shall be prosecuted and punished for the same offence more than once

(3) No person accused of any offence shall be compelled to be a witness against himself

21 No person shall be deprived of his life or personal liberty except according to procedure established by law

22 (1) No person who is arrested shall be detained in custody without being informed, as soon as may be of the grounds for such arrest nor shall he be denied the right to consult and to be defended by, a legal practitioner of his choice

(2) Every person who is arrested and detained in custody shall be produced before the nearest magistrate within a period of twenty four hours of such arrest excluding the time necessary for the journey from the place of arrest to the court of the magistrate and no such person shall be detained in custody beyond the said period without the authority of a magistrate

(3) Nothing in clauses (1) and (2) shall apply—

(*a*) to any person who for the time being is an enemy alien, or
(*b*) to any person who is arrested or detained under any law providing for preventive detention

(4) No law providing for preventive detention shall authorise the detention of a person for a longer period than three months unless—

(*a*) an Advisory Board consisting of persons who are or have been or are qualified to be appointed as, Judges of a High Court has reported before the expiration of the said period of three months that there is in its opinion sufficient cause for such detention

Provided that nothing in this sub clause shall authorise the detention of any person beyond the maximum period prescribed by any law made by Parliament under sub clause (*b*) of clause (7), or

(*b*) such person is detained in accordance with the provisions of any law made by Parliament under sub clauses (*a*) and (*b*) of clause (7)

(5) When any person is detained in pursuance of an order made under any law providing for preventive detention the authority making the order shall, as soon as may be communicate to such person the grounds on which the order has been made and shall afford him the earliest opportunity of making a representation against the order

(6) Nothing in clause (5) shall require the authority making any such order as is referred to in that clause to disclose facts which such authority considers to be against the public interest to disclose

(7) Parliament may by law prescribe—

(*a*) the circumstances under which, and the class or classes of cases in which a person may be detained for a period longer than three months under any law providing for preventive detention without obtaining the opinion of an Advisory Board in accordance with the provisions of sub clause (*a*) of clause (4),
(*b*) the maximum period for which any person may in any class or classes of cases be detained under any law providing for preventive detention and
(*c*) the procedure to be followed by an Advisory Board in an inquiry under sub clause (*a*) of clause (4)

RIGHT AGAINST EXPLOITATION

23 (1) Traffic in human beings and *begar* and other similar forms of forced labour are prohibited and any contravention of this provision shall be an offence punishable in accordance with law

(2) Nothing in this article shall prevent the State from imposing compulsory service for public purposes, and in imposing such service the State shall not make any discrimination on grounds only of religion race, caste or class or any of them

24. No child below the age of fourteen years shall be employed to work in any factory or mine or engaged in any other hazardous employment

RIGHT TO FREEDOM OF RELIGION

25 (1) Subject to public order, morality and health and to the other provisions of this Part, all persons are equally entitled to freedom of conscience and the right freely to profess, practise and propagate religion

(2) Nothing in this article shall affect the operation of any existing law or prevent the State from making any law—

(*a*) regulating or restricting any economic, financial, political or other secular activity which may be associated with religious practice,

(*b*) providing for social welfare and reform or the throwing open of Hindu religious institutions of a public character to all classes and sections of Hindus

Explanation I—The wearing and carrying of *kirpans* shall be deemed to be included in the profession of the Sikh religion

Explanation II—In sub clause (*b*) of clause (2), the reference to Hindus shall be construed as including a reference to persons professing the Sikh Jaina or Buddhist religion, and the reference to Hindu religious institutions shall be construed accordingly

26 Subject to public order, morality and health, every religious denomination or any section thereof shall have the right—

(*a*) to establish and maintain institutions for religious and charitable purposes,

(*b*) to manage its own affairs in matters of religion

(*c*) to own and acquire movable and immovable property, and

(*d*) to administer such property in accordance with law

27 No person shall be compelled to pay any taxes, the proceeds of which are specifically appropriated in payment of expenses for the promotion or maintenance of any particular religion or religious denomination

28 (1) No religious instruction shall be provided in any educational institution wholly maintained out of State funds

(2) Nothing in clause (1) shall apply to an educational institution which is administered by the State but has been established under any endowment or trust which requires that religious instruction shall be imparted in such institution

(3) No person attending any educational institution recognised by the State or receiving aid out of State funds shall be required to take part in any religious instruction that may be imparted in such institution or to attend any religious worship that may be conducted in such institution or in any premises attached thereto unless such person or if such person is a minor his guardian has given his consent thereto

CULTURAL AND EDUCATIONAL RIGHTS

29 (1) Any section of the citizens residing in the territory of India or any part thereof having a distinct language, script or culture of its own shall have the right to conserve the same

(2) No citizen shall be denied admission into any educational institution maintained by the State or receiving aid out of State funds on grounds only of religion race caste, language or any of them

30 (1) All minorities, whether based on religion or language, shall have the right to establish and administer educational institutions of their choice

(2) The State shall not in granting aid to educational institutions discriminate against any educational institution on the ground that it is under the management of a minority, whether based on religion or language

RIGHT TO PROPERTY

31 (1) No person shall be deprived of his property save by authority of law

(2) No property, movable or immovable, including any interest in, or in any company owning, any commercial or industrial undertaking, shall be taken possession of or acquired for public purposes under any law authorising the taking of such possession or such acquisition, unless the law provides for compensation for the property taken possession of or acquired and either fixes the amount of the compensation, or specifies the principles on which, and the manner in which, the compensation is to be determined and given

(3) No such law as is referred to in clause (2) made by the Legislature of a State shall have effect unless such law, having been reserved for the consideration of the President, has received his assent

(4) If any Bill pending at the commencement of this Constitution in the Legislature of a State has, after it has been passed by such Legislature, been reserved for the consideration of the President and has received his assent, then, notwithstanding anything in this Constitution, the law so assented to shall not be called in question in any court on the ground that it contravenes the provisions of clause (2)

(5) Nothing in clause (2) shall affect—

(*a*) the provision of any existing law other than a law to which the provisions of clause (6) apply, or

(*b*) the provisions of any law which the State may hereafter make—

(*i*) for the purpose of imposing or levying any tax or penalty, or

(*ii*) for the promotion of public health or the prevention of danger to life or property, or

(*iii*) in pursuance of any agreement entered into between the Government of the Dominion of India or the Government of India and the Government of any other country, or otherwise with respect to property declared by law to be evacuee property

(6) Any law of the State enacted not more than eighteen months before the commencement of this Constitution may within three months from such commencement be submitted to the President for his certification, and thereupon, if the President by public notification so certifies, it shall not be called in question in any court on the ground that it contravenes the provisions of clause (2) of this article or has contravened the provisions of sub section (2) of section 299 of the Government of India Act 1935

31 A. (1) Notwithstanding anything in the foregoing provisions of this Part no law providing for the acquisition by the State of any estate or of any rights therein or for the extinguishment or modification of any such rights shall be deemed to be void on the ground that it is inconsistent with or takes away or abridges any of the rights conferred by, any provisions of this Part

Provided that where such law is a law made by the legislature of a State, the provisions of this article shall not apply thereto unless such law, having been reserved for the consideration of the President, has received his assent

(2) In this article—

(*a*) The expression 'estate' shall, in relation to any local area, have the same meaning as that expression or its local equivalent has in the existing law relating to land tenures in force in that area, and shall also include any jagir, inam or muafi or other similar grant,

(*b*) the expression 'rights' in relation to an estate, shall include any rights vesting in proprietor, sub proprietor, under proprietor, tenure holder or other intermediary and any rights or privileges in respect of land revenue

31B. Without prejudice to the generality of the provisions contained in article 31A, none of the Acts and Regulations specified in the Ninth Schedule nor any of the provisions thereof shall be deemed to be void, or ever to have become void, on the ground that such Act, Regulation or provision is inconsistent with, or takes away or abridges any of the rights conferred by any provisions of this Part, and notwithstanding any judgement, decree or order of any court or tribunal to the contrary, each of the said Acts and Regulations shall, subject to the power of any competent Legislature to repeal or amend it continue in force

RIGHT TO CONSTITUTIONAL REMEDIES

32. (1) The right to move the Supreme Court by appropriate proceedings for the enforcement of the rights conferred by this Part is guaranteed

(2) The Supreme Court shall have power to issue directions or orders or writs, including writs in the nature of *habeas corpus, mandamus,* prohibition, *quo warranto* and *certiorari*, whichever may be appropriate, for the enforcement of any of the rights conferred by this Part

(3) Without prejudice to the powers conferred on the Supreme Court by clauses (1) and (2), Parliament may by law empower any other court to exercise within the local limits of its jurisdiction all or any of the powers exercisable by the Supreme Court under clause (2)

(4) The right guaranteed by this article shall not be suspended except as otherwise provided for by this Constitution

33 Parliament may by law determine to what extent any of the rights conferred by this Part shall, in their application to the members of the Armed Forces or the Forces charged with the maintenance of public order, be restricted or abrogated so as to ensure the proper discharge of their duties and the maintenance of discipline among them

34 Notwithstanding anything in the foregoing provisions of this Part, Parliament may by law indemnify any person in the service of the Union or of a State or any other person in respect of any act done by him in connection with the maintenance or restoration of order in any area within the territory of India where martial law was in force or validate any sentence passed, punishment inflicted, forfeiture ordered or other act done under martial law in such area

35 Notwithstanding anything in this Constitution—

(*a*) Parliament shall have, and the Legislature of a State shall not have, power to make laws—

(*i*) with respect to any of the matters which under clause (3) of article 16, clause (3) of article 32, article 33 and article 34 may be provided for by law made by Parliament, and

(*ii*) for prescribing punishment for those acts which are declared to be offences under this Part,

and Parliament shall as soon as may be after the commencement of this Constitution, make laws for prescribing punishment for the acts referred to in sub clause (*ii*),

(*b*) any law in force immediately before the commencement of this Constitution in the territory of India with respect to any of the matters referred to in sub clause (*i*) of clause (*a*) or providing for punishment for any act referred to in sub-clause (*ii*) of that clause shall, subject to the terms thereof and to any adaptations and modifications that may be made therein under article 372, continue in force until altered or repealed or amended by Parliament

Explanation—In this article, the expression 'law in force" has the same meaning as in article 372

DIRECTIVE PRINCIPLES OF STATE POLICY

36 In this Part, unless the context otherwise requires, "the State" has the same meaning as in Part III

37 The provisions contained in this Part shall not be enforceable by any court, but the principles therein laid down are nevertheless fundamental in the governance of the country and it shall be the duty of the State to apply these principles in making laws

38. The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may a social order in which justice, social, economic and political, shall inform all the institutions of the national life.

39 The State shall, in particular, direct its policy towards securing—

(*a*) that the citizens, men and women equally, have the right to an adequate means of livelihood,

(*b*) that the ownership and control of the material resources of the community are so distributed as best to subserve the common good,

(*c*) that the operation of the economic system does not result in the concentration of wealth and means of production to the common detriment,

(*d*) that there is equal pay for equal work for both men and women,

(*e*) that the health and strength of workers, men and women, and the tender age of children are not abused and that citizens are not forced by economic necessity to enter avocations unsuited to their age or strength,

(*f*) that childhood and youth are protected against exploitation and against moral and material abandonment

40 The State shall take steps to organise village panchayats and endow them with such powers and authority as may be necessary to enable them to function as units of self government

41 The State shall, within the limits of its economic capacity and development, make effective provision for securing the right to work, to education and to public assistance in cases of unemployment old age, sickness and disablement, and in other cases of undeserved want

42 The State shall make provision for securing just and humane conditions of work and for maternity relief

43 The State shall endeavour to secure, by suitable legislation or economic organisation or in any other way, to all workers, agricultural, industrial or otherwise, work, a living wage conditions of work ensuring a decent standard of life and full enjoyment of leisure and social and cultural opportunities and in particular, the State shall endeavour to promote cottage industries on an individual or co operative basis in rural areas

44 The State shall endeavour to secure for the citizens a uniform civil code throughout the territory of India

45 The State shall endeavour to provide, within a period of ten years from the commencement of this Constitution, for free and compulsory education for all children until they complete the age of fourteen years

46 The State shall promote with special care the educational and economic interests of the weaker sections of the people, and, in particular, of the Scheduled Castes and the Scheduled Tribes, and shall protect them from social injustice and all forms of exploitation

47 The State shall regard the raising of the level of nutrition and the standard of living of its people and the improvement of public health as among its primary duties and, in particular, the State shall endeavour to bring about prohibition of the consumption except for medicinal purposes of intoxicating drinks and of drugs which are injurious to health

48. The State shall endeavour to organise agriculture and animal husbandry on modern and scientific lines and shall, in particular take steps for preserving and improving the breeds, and prohibiting the slaughter, of cows and calves and other milch and draught cattle

49 It shall be the obligation of the State to protect every monument or place or object of artistic or historic interest, declared by Parliament by law to be of national importance, from spoliation, disfigurement, destruction, removal, disposal or export, as the case may be

50 The State shall take steps to separate the judiciary from the executive in the public services of the State

51 The State shall endeavour to—

(*a*) promote international peace and security,

(*b*) maintain just and honourable relations between nations,

(*c*) foster respect for international law and treaty obligations in the dealings of organised peoples with one another, and

(*d*) encourage settlement of international disputes by arbitration

MISCELLANEOUS

SALARIES

The following salaries are statutorily fixed by the Constitution

President—Rs 10 000 p m, Governor—Rs 5,500 p m Chief Justice of the Supreme Court—Rs 5000 p m Other judges of the Supreme Court—Rs 4,000 p m, Chief Justice of Part A State—Rs 4,000 p m Other judges of High Courts of Part A States—Rs 3 500 p m, Comptroller and Auditor General of India—Rs 4,000 p m

LANGUAGES

The following are the 14 languages recognized for State purposes under Articles 344(1) and 351

Assamese, Bengali, Gujarati Hindi Kannada, Kashmiri Malayalam Marathi Oriya, Punjabi, Sanskrit, Tamil, Telugu, Urdu

ACTS, REGULATIONS

The following Acts and Regulations are listed in the Ninth Schedule to the Constitution According to Art 31B they cannot be declared null and void on the ground that they are inconsistent with the fundamental rights guaranteed by the Constitution

1 The Bihar Land Reforms Act, 1950 (Bihar Act XXX of 1950)

2 The Bombay Tenancy and Agricultural Lands Act, 1948 (Bombay Act LXVII of 1948)

3 The Bombay Maleki Tenure Abolition Act 1949 (Bombay Act LXI of 1949)

4 The Bombay Taluqdari Tenure Abolition Act, 1949 (Bombay Act LXII of 1949)

5 The Panch Mahals Mehwassi Tenure Abolition Act, 1949 (Bombay Act LXIII of 1949)

6 The Bombay Khoti Abolition Act, 1950 (Bombay Act VI of 1950)

7 The Bombay Paragana and Kulkarni Watan Abolition Act, 1950 (Bombay Act LX of 1950)

8 The Madhya Pradesh Abolition of Proprietory Rights (Estates Mahals Alienated Lands) Act, 1950 (Madhya Pradesh Act I of 1951)

9 The Madras Estates (Abolition and Conversion into Ryotwari) Act, 1948 (Madras Act XXVI of 1948)

10 The Madras Estates (Abolition and Conversion into Ryotwari) Amendment Act, 1950 (Madras Act I of 1950)

11 The Uttar Pradesh Zamindari Abolition and Land Reforms Act, 1950 (Uttar Pradesh Act I of 1951)

12 The Hyderabad (Abolition of Jagirs) Regulation 1358 F (No LXIX of 1358, Fasli)

13 The Hyderabad Jagirs (Commutation) Regulation, 1359 F (No XXV of 1359, Fasli)

*

PUBLIC SERVICES

THE Constitution provides for the setting up of a Public Service Commission for the Union and for each State Two or three States may join together to have a Common Public Service Commission

The chairman and members of the Union Public Services Commission and of joint Commissions are appointed by the President of the Union while the chairman and members of a State Commission are appointed by the Governor or Rajpramukh as the case may be

A member of the Union Commission holds office for six years or till he is 65 years A member of a State Commission also holds office for six years but retires earlier on attaining the age of 60 Broadly speaking a member of a Commission is eligible for appointment only on the same Commission or some other Commission subject to certain conditions He is not eligible for appointment to any other Government post The Chairman of the Union Public Service Commission is not eligible for any Government appointment whatever A member of a Commission can be removed only by the President on the advice of the Supreme Court

The Union and State Commissions conduct examinations for recruitment to Government service The Commissions also advise the Governments on the service conditions of the employees There is a moral obligation for a Government to consult the Commission on such questions, and if there are any rules which specifically exempt Government from such consultation these rules should be approved by the legislature

An annual report of the Commission which also includes a list of cases in which Government did not accept the advice of the Commission has to be placed before the appropriate legislature

ALL INDIA SERVICES

The following All India services now exist

Indian Administrative Service Indian Foreign Service, Indian Police Service, Indian Audit and Accounts Service, Military Accounts Service, Indian Railways Accounts Service, Indian Customs and Excise Service, Income tax Officers (Class I) Grade II Service, Transportation and Commercial Departments of the Superior Revenue Establishments of State Railways Establishment Department of State Railways Indian Postal Service Survey of India, Indian Forest Service Central Engineering Service, Indian Railway Service of Engineers, Superior Telegraph Engineering and Wireless Branches of Posts and Telegraphs

There is also a Central Secretariat Service which includes all posts in the Central Secretariat from an Assistant upto an Under Secretary There are four grades Starting from the bottom they are Assistant Assistant Superintendent, Superintendent, Under Secretary The last two are selection posts filled by promotion, and the first two partly by promotion from the lower rank and partly by direct recruitment on the basis of a competitive examination held by the Union Public Services Commission

There are some services to which recruitment is made by selection These services include

Zoological Survey (Class I), Archeological Survey (Class I), Apprentices for Training in Ordnance Factories Cantonment Executive Officers Service, District Medical Officers for State Railways

The pay scales of some of the more important All India services are given below

Indian Administrative Service

Junior Scale 350 400 450 450 500 30 600-E B 30 870 40 950 (19 years)

Senior Scale 800 (8th year or under)-50-1,000 60 1,300 50 1,800 (25 years)

Indian Foreign Service

350 400 450 450 500 Scales for subsequent years is fixed later

Indian Police Service

Junior Scale 350 350 380 380 590 E B 30 770 40 850 (19 years)

Senior Scale 600 (6th year or under) 40 1,000 1,000 1 050 1 100 1 100 1,150 (22nd year)

Selection grade 1,250

Indian Audit and Accounts Service, Postal Service, Income tax Service (Class I)

Junior Scale 350 350 380 380 30 590 E B 30 770 40 850

Senior Scale 600 40 1,000 1,000 1,050 1 050 1 100 1 100 1,150

PUBLIC SERVICE COMMISSIONS

The following is a list of Public Service Commissions in India

1 Assam Public Service Commission (Shillong)

2 Bihar Public Service Commission (15, Bayley Road Patna)

3 Bombay Public Service Commission (Bank of India Building Mahatma Gandhi Road, Bombay)

4 Hyderabad Public Service Commission (Hyderabad, Deccan)

5 Public Service Commission (Madras)

6 Madhya Pradesh Public Service Commission (Nagpur)

7 Mysore Public Service Commission (Ballabroole, Palace Road, High Grounds Bangalore)

8 Orissa Public Service Commission (Cuttack)

9 Punjab Public Service Commission (Simla)

10 Public Service Commission, PEPSU (Patiala)

11 Public Service Commission Saurashtra (Rajkot)

12 Travancore Cochin Public Service Commission (Trivandrum)

13 Uttar Pradesh Public Service Commission (Allahabad)

14 Public Service Commission, Madhya Bharat (Gwalior)

15 Public Service Commission Rajasthan (43, Station Road, Jaipur)

16 West Bengal Public Service Commission (Anderson House, Alipore, Calcutta)

The Union Public Service Commission also operates for Part C States

APPLEBY REPORT

Mr Paul H Appleby consultant in public administration to the Ford Foundation was invited by the Government of India to study the Indian administrative system and make recommendations for their improvement He made a five month study His report was presented to Parliament on May 12, 1953

His main conclusion is that the administrative system is cumbersome in manner, requiring too many inter hierarchical conferences and utilizing paper in an unnecessarily burdensome way

Mr Appleby recommends the establishment of an institute of public administration for India to provide a national informal focussing of attention on public administration as a profession of many facets and elements

An institute of public administration will provide for stimulation through association, through the medium of professional journal, and through the making of studies and the development of a literature recording and expanding administrative learning

In association with the institute, the Government should develop academic graduate programmes in public administration and establish special avenues for annual entry into public service of some young persons so trained

Other recommendations made by Mr Appleby are

(1) The establishment directly under an appropriate Minister with strong Government backing, an organization and management office or public administration office

(2) The making of further and more specialized studies by a team of outside experts, as sequels to this report and as desirable that a new organization and management office would be equipped for them

(3) Consolidating administrative responsibility for the carrying on of the Community Projects, elevating it in status, and providing for more flexibility and discretion in its management

(4) In general in all developmental and social action fields consolidating responsibility by simplifying and reducing inter Ministerial involvements and reviews

(5) Filling in the administrative hierarchy by making hierarchies have a more truly pyramidal form with more executives at most levels, and by increasing the number of levels and narrowing the present excessively wide gaps between all but the low levels

(6) Eliminating fixed cadre limitations and making recruitment depend wholly upon frequent and flexible determinations of needs

(7) The establishment of extensive and sustained personal development programmes designed to maximize the potentialities of all persons working for the Government

(8) Authorization for revenue staff recruitment as rapidly as suitable persons can be secured and trained without numerical limitation until tax collection is wholly current and the gap between assessments and collections is nominal

(9) Concerted activity with the States to bring land assessment and tax rates up to a sound current standard, to impose an agricultural income tax and limitations on land rents and to improve administration of tax collection in the States so as to bring the gap between tax intentions and tax actualities to nominal proportions

(10) The establishment as a sequel to heightened responsibility, of agencies charged with action of adequate methods of checking on action during and after the fact

Fiscal Practice

Administration in considerable part determines what a tax law means, and all fiscal policy is enormously dependent on the views and capacities of the administrative personnel concerned

Administrative delay in assessing income taxes consistently results in very substantial losses of revenue It seems possible that 15 per cent of some important kinds of taxes that should be paid under existing law, fail to reach the State and Centre treasuries

Parliamentary and legislative unwillingness to appropriate for enough personnel is one factor in this, but some of the aspects of the problem are within reach of administrators

Budgetary practice is on the whole well developed, although staffs available for the process are inadequate The organization of budget information which is technically known as "budgetary classification" could be improved by simultaneous uses of some additional classification schemes

Attention will have to be given to the fact that much of what the Government spends' is not spent in the conventional sense in these instances the Government is performing functions of credit and capital formation that in most other economies are more largely carried on privately

One should like to see the thinking behind the ' expenditures met from capital disbursement of loans and advances' carried further and given more extensive organization

A total balance sheet of assets and liabilities for the Government, in successive years suitably organized, would be an interesting and enlightening document

Financial control of expenditures seems to be too specific and detailed and too slow Certainly it is not subject to any valid criticism for not providing close scrutiny before the fact or the limited scrutiny possible in general auditing after the fact

Personnel

Mr Appleby says that in both the Centre and the States, prevailing structures, except in a few fields, such as defence, revenue collection, internal order and external affairs, provide chiefly for co ordination rather than for administration

Within the Centre and within the States there is an enormous amount of co ordination before the fact of action, a consequent lack of discretion and specific responsibility on the part of those presumed to act, and a general inclination not to make decisions

Personnel administration has too much feudalistic heritage, too much academic and intellectuality orientation too little administrative action and human relations orientation and is too defensive of the rights of existing personnel These characteristics are reflected in greater or less degree in recruitment policies and methods in assignment methods in the attention and lack of attention given to developing the potentialities of personnel, and in the arrangements in which personnel administration is considered and personnel themselves are classified '

The criteria by which personnel are selected by the Public Service Commissions are not up to date, and the examining and appraising techniques are far from modern

Mr Appleby suggests the removal of the Community Projects from the direction of the Planning Commission His reasons are that a commission is never a good form for large scale and rapid action administration that administrative responsibility reduces the objectivity and disinterest essential to broad planning giving the planners a vested interest in one type of operations and so reducing their dynamic character, and finally that persons denominated as planners recruited and associated as planners tend in the first instance to lack and in the second instance to lose the special qualities essential to large and rapid action administration

He recommends that the administration of the projects should be headed by a single person of strength stature and special zeal for this kind of programme Within his organization the administration should have its own financial control and evaluation units

On the whole the Government of India should be among the dozen or so most advanced Governments in the world

It was also one of the dozen or so Governments in which honesty has been carried to its highest levels

*

ADMINISTRATION OF JUSTICE

THE writs which for generations ran over the length and breadth of the country in the name of the British Sovereign, now run in the name of the President of the Republic of India Nevertheless, all the existing laws continue to operate in India as before subject to adaptation and modification made therein Article 372 of the Constitution provides *inter alia* that subject to the other provisions of the Constitution, all the laws in force in the territory of India immediately before the commencement of the Constitution shall continue in force therein until altered repealed or amended by a competent Legislature or other competent authority

For the purpose of bringing the provisions of any law in force in the territory of India into accord with the provisions of the Constitution, it is further provided that the President may by order make such adaptations and modifications of such law as may be necessary or expedient

Article 13 of the Constitution provides that all laws in force in the territory of India immediately before the commencement of the Constitution, in so far as they are inconsistent with the provisions of the Constitution relating to Fundamental Rights (Part III) shall to the extent of such inconsistency be void

The State is also debarred from making any law which takes away or abridges the Fundamental Rights conferred by this Part and any law made in contravention shall be void to the extent of such contravention (Art 13 (2))

Article 14 ensures to all persons equality before the law by providing that the State shall not deny to any person equality before the law or the equal protection of the laws within the territory of India

The continuity of the existing laws and legal procedure is further ensured by Article 375 under which all courts of civil, criminal and revenue jurisdiction and all authorities and officers continue to exercise their respective functions subject to the provisions of the Constitution

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Muslim Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom The rules of the Shastras and the Koran have however been in some cases altered and relaxed Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the Caste Disabilities Removal Act of 1850, the Hindu Widows Remarriage Act, 1856, and some other Acts and Codes

During recent years indeed there has been a determined demand on the part of social reformers, and various women's organisations in India for an amendment of the Hindu Law so as to bring it into line with progressive social opinion, in consonance with the spirit of the times

The Draft Hindu Code that was before the Indian Parliament aimed at abolishing the archaic principles of the ancient system of law, the removal of sex and caste disabilities, and generally simplifying, secularising, and modernising the law governing all Hindus, including Lingayats Buddhists Jains and Sikhs But the Code has lapsed on account of the dissolution of the provisional Parliament

In the meanwhile, an opposite tendency has been observable among the Muslims, who by recent legislation have sought to revert to the law of the Shariat, discountenancing the application of Hindu Law and custom to the sections of the Muslim community who as converts from Hindusim had retained Hindu Law in matters of inheritance and succession

Apart from this, the entire legal system which has hitherto prevailed in the country is in course of time bound to undergo a profound transformation by reason of the withdrawal of British rule and the partition of India A demand for a uniform civil code for all Indians is made by some people

A demand is also made for the simplification of the procedure and law for the administration of justice and the Government of India are thinking of introducing a legislative measure to achieve this end

The Indian Penal Code has from time to time been amended The rules of Civil Procedure have been embodied in the Code of Civil Procedure The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898 These Codes as amended from time to time are now in force

The years between 1870 and 1885 saw a great deal of legislative activity in British India, and important branches of the law, like Evidence, Contract, Transfer of Property, Trusts, Negotiable Instruments, etc, were codified in the form of Acts of the Indian Legislature applicable to the whole of British India These, amended from time to time and supplemented by rules derived from English decisions constitute the bulk of the law administered in India today

SUPREME COURT

Art 124 of the Constitution provides for the establishment of a Supreme Court of India consisting of a Chief Justice of India, and, until Parliament by law prescribes a larger number, of not more than seven judges Every judge of the Supreme Court shall be appointed by the President and shall hold office until he attains the age of sixty five years In the course of appointment of a Judge the Chief Justice shall always be consulted Only a citizen of India who has been for at least 5 years a judge of a High Court, or for 10 years an advocate of a High Court, or in the opinion of the President a distinguished jurist, is qualified to be appointed judge of the Supreme Court

A judge of the Supreme Court is not liable to be removed from his office except by an order of the President passed after an address by each House of Parliament, supported by a majority of the total membership of that House, and by a majority of not less than two thirds of the members of that House present and voting, has been presented to the President in the same session for such removal, on the ground of proved misbehaviour or incapacity No person who has held office as a judge of the Supreme Court shall plead or act in any court or before any authority within the territory of India

The Supreme Court is a court of record with all the powers of such a court including the power to punish for contempt The seat of the Court is to be in Delhi or such other place as the Chief Justice with the approval of the President may from time to time appoint

The Supreme Court has exclusive original jurisdiction in any dispute (*a*) between the Government of India and one or more States, (*b*) between Government of India and one or more States on the one side and one or more other States, on the other, (*c*) between two or more States, if and in so far as the dispute involves any question (whether of law or fact) on which the existence or extent of a legal right depends (Article 131)

The Appellate jurisdiction of the Supreme Court extends over all appeals from any judgment, decree or final order of a High Court, in civil, criminal or other proceedings, if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Constitution If the High Court refuses such a certificate the Supreme Court may grant special leave to appeal in a proper case (Art 132) An appeal shall also lie to the Supreme Court from a High Court in civil matters, when the amount or value of the subject matter in dispute is not less than Rs 20,000 or the High Court certifies the case to be a fit one for appeal to the Supreme Court (Art 133)

In criminal matters under Art 134 an appeal lies to the Supreme Court from any judgment, final order or sentence of a High Court, if the High Court has (*a*) on appeal reversed an order of acquittal of an accused person and sentenced him to death, or (*b*) has withdrawn for trial before itself any case from a subordinate court and has in such trial convicted the accused person and sentenced him to death, or (*c*) the High Court has certified that the case is a fit one for appeal

For purposes of appeals to the Supreme Court, the Judicial Commissioners Courts are to be considered as High Courts

Under Art 136 discretion is given to the Supreme Court to grant special leave to appeal from any judgment decree, sentence or order in any matter passed by any Court or Tribunal in the territory of India

The jurisdiction and powers of the Federal Court under the existing law are also exercisable by the Supreme Court (Art 135) including the advisory power to give its opinion on questions of law or fact referred to it by the President (Art 143)

The law declared by the Supreme Court shall be binding on all courts in the territory of India

Parliament has the power to legislate on the constitution organisation, jurisdiction and powers of the Supreme Court

Article 32 of the Constitution guarantees the right to move the Supreme Court by appropriate proceedings for the enforcement of Fundamental Rights, and for the enforcement of such rights the Supreme Court has power to issue directions or orders or writs, including writs in the nature of Habeas Corpus, mandamus, prohibition, *quo warranto* and *Certiorari* whichever may be appropriate

Power is given to Parliament to enlarge the jurisdiction of the Supreme Court by appropriate legislation (Art 138)

The jurisdiction of the Judicial Committee of His Britannic Majesty's Privy Council over appeals from India in all matters is now abolished

The royal prerogative to grant pardons, reprieves, respites or remissions of punishments now resides in the President (Art 72)

Under Art 348, all proceedings in the Supreme Court and in every High Court in India and the authoritative text of all Bills and Acts of Parliament and the State Legislatures and of all Ordinances promulgated by the President or Governors or Rajpramukhs of States, and of all orders, rules and regulations issued under the Constitution or any law shall be in the English language If this language is to be replaced by any other language, Parliament must legislate to that effect

HIGH COURTS

Every High Court is a court of record and has all powers of such court including the power to commit for contempt of itself

Every judge of a High Court is appointed by the President after consultation with the Chief Justice of India, the Governor of the State and the Chief Justice of the particular High Court, and he holds office until he attains the age of sixty years

A person is not qualified to be appointed a judge of a High Court unless he is a citizen of India and has either held judicial office or practised as an advocate for 10 years in any of the States

A High Court judge is not liable to be removed from his office except in the manner provided in Art 124 (4) for the removal of a judge of the Supreme Court of India

No person who has held office of a Judge of a High Court can plead or act in any court or before any authority in the territory of India

The Chief Justice of a High Court may with the previous consent of the President, request a retired High Court Judge to sit and act as the Judge of the High Court of that State

Power is given to the President in consultation with the Chief Justice of India to transfer a judge from one High Court to any other High Court in India (Art 222)

Article 225 preserves the jurisdiction and powers of the High Courts as they existed immediately before the commencement of the Constitution Restrictions on the exercise of the original jurisdiction in revenue matters are removed

Art 226 gives to every High Court in India power throughout its jurisdiction to issue to any person or authority including Government directions, orders, writs including writs in the nature of Habeas Corpus mandamus prohibition, *quo warranto* and *Certiorari* for the embracement of Fundamental Rights and for any other purpose (Art 226)

The High Courts have powers of superintendence over all subordinate Courts within their respective jurisdiction

Legislation affecting constitution and organisation of the High Courts can be passed by Parliament alone

LOWER COURTS

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates

Every State, outside the towns of Madras, Bombay and Calcutta is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions judge, with assistants if need be These stationary sessions courts are like the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the State

Magistrates' courts are of three classes with descending powers Provision is made and largely utilised in the towns, for the appointment of honorary magistrates In the towns of Madras, Bombay and Calcutta Presidency Magistrates deal with magisterial cases and benches of Justices of the Peace or Honorary Magistrates dispose of the less important cases

In Bombay Honorary Magistrates or Justices of the Peace do not try cases

Article 50 of the Constitution lays down that the States shall take steps to separate the judiciary from the executive in the public service of the States

The State of Bombay is the first state that has introduced the separation of the judiciary from the executive in public services, by a statute The Act came into force on July 1, 1953

In three other states *i e* Hyderabad, Madras and Bihar there is partial separation It is not effected by any statute but by rules made by the Government in that behalf

The constitution and jurisdiction of the inferior civil courts varies Broadly speaking one district and sessions judge is appointed for each district. As District Judge he presides in its principal civil court of original jurisdiction His functions as Sessions Judge have already been described.

For these posts members of the Indian Civil Service were mainly selected though some appointments were made from the Provincial Service

Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of the country

There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs 500 In the towns of Madras, Bombay and Calcutta where the Chartered High Courts have original jurisdiction, Small Causes Courts dispose of money suits up to Rs 2,000

In Bombay and Madras there are also City Civil Courts The City Civil Court in Bombay has a pecuniary jurisdiction of Rs 25,000

As Insolvency Courts the Chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns In the mofussil similar powers were conferred on the District Courts by the Provincial Insolvency Act of 1920

There are Coroners only for the Presidency Towns of Calcutta and Bombay Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors

SPECIAL COURTS

Labour Courts are established in the State of Bombay under the Bombay Industrial Relations Act, 1946

A labour Court consist of a single judge

There are at present Labour Courts in Bombay Ahmedabad, Dulgaon and Sholapur They decide upon disputes regarding (*a*) propriety or legality of an order passed by an employer (*b*) the application and interpretation of standing orders (*c*) They also decide disputes referred to them by Government for arbitration Legality or otherwise of strikes or lock outs or closure etc is also decided by them

An appeal against the judgment of the Labour Courts lies to the Industrial Court This court has also original jurisdiction regarding matters referred to it by the Government or by representative Unions It decides upon questions of law referred to it by Wage Boards and references regarding interpretation of the Act and the Rules It has power of superintendence over Labour Courts

The Bombay Industrial Relations Act 1946 applies at present to the following industries Textile Cotton, Woollen Silk Textile Processing Hosiery, Transport by tram and omnibus in Greater Bombay, Electricity, Sugar and Banking (in the case of banks having branches in Bombay State only)

Labour Courts and Industrial Courts now exist in most States

The Industrial Disputes Act was passed by the Central Legislature in 1947 for the investigation and settlement of industrial disputes

Industrial Tribunals were established under this Act If the conciliation bodies set up under this Act fail to bring about a settlement, the matter is referred to the Industrial Tribunals

Neither party to a dispute is entitled to be represented by a legal practitioner except with the consent of the other party and by leave of the Tribunal

Industrial Tribunals are not permanent Courts Whenever a matter is referred to the Government regarding an industrial dispute the Government appoints one or more persons as Industrial Tribunal to adjudicate upon the dispute

In the the State of Bombay the members and the President of the Industrial Court are the ones chosen for appointment as Industrial Tribunals

The Industrial Disputes (Appellate Tribunal) Act was passed in 1950 It has constituted a new Court, the Labour Appellate Tribunal of India It is an appellate Court over the Industrial Tribunals and Industrial Courts The judgments given by the Appellate Tribunal have helped to establish uniformity in labour matters

Juvenile offenders are tried by the Juvenile Courts In places where there are no juvenile courts the offenders are tried either by the High Court, or the Court of Session or a salaried Presidency Magistrate or a salaried Magistrate of the First Class

Legal practitioners are not entitled to appear in any case or proceeding before a Juvenile Court However the Court may grant permission in exceptional cases

Probation officers are appointed by the State Government for helping the Court in the discharge of its functions The powers and duties of such officers are laid down in the rules Their main duty is to investigate the history of the juvenile offender and offer help to the Court An appeal against the judgment of a Juvenile Court lies to the Chief Presidency Magistrate in Greater Bombay and in other places to the Court of Session If a case is decided by a Presidency Magistrate or a Court of Session the appeal lies to the High Court

Panchayat Courts (called Nyaya Panchayat) are in existence in many States In Bombay for instance each Court consists of five members The members of the Panchayat Court are elected by the Village Panchayat Sections 30 44 of the Act lay down rules about the suits that may be tried and the suits that may not be tried by the Court A Nyaya Panchayat cannot alter or revise its decision An appeal against a decision of the Nyaya Panchayat lies to the District Judge

LEGAL OFFICIALS

The Government of India have their own law colleague in the Law Minister of the Union Cabinet All Government measures are drafted in his department after their substance is decided upon by the administrative departments concerned

Outside the Cabinet the principal law officers of the Government of India are the Attorney General and Solicitor General appointed by the President At Bombay and Calcutta the Government of India have their own solicitors

Each of the State Governments has its own Advocate General

Article 76 of the Constitution of India says that for the post of Attorney Generalship the President shall appoint a person qualified to be appointed a Judge of the Supreme Court It shall be the duty of the Attorney General to give advice to the Govt of India upon such legal matters and to perform such other duties of a legal character as may be referred or assigned to him by the President, and to discharge the functions conferred upon him by the Constitution In the performance of his duties the Attorney-General shall have right of audience in all Courts in the territory of India The Attorney-General has a right to take part in the proceedings of Parliament and address it

Under Article 165 the Governor of each State is authorised to appoint a person qualified to be appointed a Judge of a High Court to be Advocate-General for the State

The Advocate General is appointed by the Governor He has to give advice to the Government of the State upon such legal matters and to perform such other duties of a legal character as may be referred to or assigned to him He holds office during the pleasure of the Governor He appears in the Court on behalf of the Government He is the leader of the Bar and the President of the Bar Council He is also authorised to take part in the proceedings of the State legislature, if his advice is sought

In addition to the Advocate General there is also a Government Pleader in many States He usually belongs to the Appellate Side of the High Court while the Advocate General belongs to the Original Side The Government Pleader is assisted by an Assistant Government Pleader and they look after criminal work

The State Governments have their own law officers, in addition to the Advocate General and the Government Pleader The law officer

is designated Remembrancer of Legal Affairs He also works as Secretary to the Legal Department He is never a practising lawyer, but a Government servant Usually one of the District Judges is appointed Remembrancer of Legal Affairs

The Legal Remembrancer drafts Government Bills and gives advice to Government Departments on all legal matters

Sheriffs are attached to the High Courts of Bombay, Calcutta and Madras

They are entrusted with the work of preparing jury lists serving summons and other legal processes The Sheriff in Bombay is the ex officio Chairman of the Bombay State Permanent Famine Relief Committee He can also convene public meetings on behalf of the citizens

The detailed work of the office is entrusted to the Deputy Sheriff who is an officer of the High Court

These are Official Assignees in three States—Bombay W Bengal and Madras The appointment is made by the Chief Justice of the High Court concerned

The duties of the Official Assignee are two fold, *viz* realisation and distribution of the insolvents estate and the control of the property of the insolvent and his conduct generally

A party aggrieved by the decision of the official Assignee may appeal to the Insolvency Judge of the High Court

In addition to the Official Assignee, a Deputy Official Assignee may also be appointed Another officer of the court is the Insolvency Registrar who may be vested with the powers mentioned in section 6 of the Presidency Towns Insolvency Act

There are two classes of legal practitioners, practising in the Supreme Court They are Senior Advocates and other Advocates (popularly known as Junior Advocates) No person can appear as an Advocate in any case unless he is instructed by an Agent

All Advocates of the Supreme Court are entitled to practise in High Courts In Bombay and Calcutta an Advocate can appear on the original side only when instructed by an Attorney An Advocate of a High Court is entitled to practise in the High Court concerned and in all the courts subordinate to it An Attorney at Law if enrolled as an Advocate can also practise in the High Court except on the original side He however, can plead in insolvency and chamber matters

Pleaders are entitled to practise in the District for which they hold sanands

In addition to these classes there are Mukhtars in the States of Assam, Bihar Orissa Uttar Pradesh, West Bengal, Madhya Bharat and Rajasthan In Assam there is one more class of legal practitioners known as Revenue Agents

The Government of India appointed a Committee called The All India Bar Committee under the chairmanship of Justice S R Das, Judge, Supreme Court *India* It recommended the unification of Indian Bar To achieve this it proposed that there should be no further recruitment of non graduate pleaders or Mukhtars or Revenue Agents

As regards the dual system in Bombay and Calcutta the Committee favoured its retention It however recommended the abolition of the dual system in the Supreme Court of India

Formerly official Law Reports were published only in six series—Bombay, Allahabad Calcutta, Madras and Nagpur Three more series, Cuttack, Mysore and Rajasthan, have been added recently

These reports contain cases decided by the High Courts and the Supreme Court of India

In addition to these series a Supreme Court Reporter is also published It contains important decisions of the Supreme Court of India

Besides these official reports there are a number of private agencies that also bring out reports of the decisions of the Supreme Court and the High Courts Reports are also published of important cases determined by Labour Courts, Industrial Courts and Labour Appellate Tribunals

DEFENCE FORCES

THE present day Army of India traces its origin to the guards enrolled for the protection of the East India Company

The partition of India in 1947 was an important landmark in the history of the Armed Forces of India The Armed forces were divided between the two countries on a communal cum optional basis which worked out to an approximate proportion of one third to Pakistan and two thirds to the Union of India

British troops including the Royal Air Force were completely withdrawn from India on February 28 1948

The nationalisation of the Defence Forces started soon after the partition General K M Cariappa became the first Indian Commander in Chief on January 15 1949 In the Indian Air Force today only about a dozen British officers and some technicians are employed on a contract basis

In the Navy the progress towards nationalisation has been slower since the requisite number of Indian officers with experience did not exist The policy in regard to the Navy is also the same and only such British officers as those whose services are absolutely essential are retained

The order of precedence of India's Defence Services has been rearranged as Army Navy and Air Force With the inauguration of the new Constitution on January 26 1950 the use of the prefix Royal wherever it occurred in the designation of Service regiment corps or unit of the Armed Forces was discontinued Similarly the expression His Majesty's Indian Ship was also dropped

DEFENCE ORGANISATION

At the top is the Defence Committee of the Cabinet which is for all practical purposes the Government so far as the Defence Services are concerned This Committee consists of the Prime Minister as chairman and the Ministers for Defence Finance and Transport Matters of policy are decided by this Committee

Then there is the Defence Minister's Committee consisting of the Defence Minister the three Chiefs of Staff the Financial Adviser and the Defence Secretary It deals with the more important inter Services problems The decisions of this Committee are final and binding on all

A Defence Science Organisation was set up in August 1948 under Dr D S Kothari Scientific Adviser to the Ministry of Defence This Organisation consists of a (1) Defence Science Policy Board (2) Defence Science Advisory Committee and (3) Personnel Research Panel

A Defence Science Service has been instituted which includes all civilian scientists engaged in research, development or teaching in any of the three Services or in the Ministry of Defence

There is an Institute of Armament Studies at Kirkee to train technical staff officers and to undertake a comprehensive scientific study of the principles of armament and performance of weapons and equipment

The Defence Science Organisation has a laboratory situated in the National Physical Laboratory (Delhi) where research in Defence Science is carried on by a number of scientists A well equipped technical library is attached to it

For conducting research in problems connected with the Navy suitable laboratories have been opened in Bombay and Cochin

A Psychological Research Wing was formed in July 1949 under Dr Sohan Lal Chief Psychologist the main function of which is to conduct research in the assessment of human personality so that the right type of officers may be selected for the Defence Forces

TRAINING INSTITUTIONS

The important training institutions common to the three Services are given below

National Defence Academy: The permanent location of the Academy will be at Khadakvasla near Poona where it will start functioning in January 1955 The establishment at Khadakvasla will consist of the Joint Services Wing (the National Defence Academy proper) and the Military Wing At present the Defence Academy is located in the Indian Military Academy at Dehra Dun where training at the Joint Services Wing started on January 4 1949 At the J S W Army Navy and Air Force cadets receive two years basic training whereas Naval Cadets (Supply and Executive Branches) receive three years training After the transfer to Khadakvasla the cadets of all the three Services will undergo a three year course of which the first two years will be devoted to a common basic training and the third to specialized training in the three respective services Thereafter the Naval and Air Force cadets will proceed to their Services Establishments for advanced training while the Army cadets will join the Military Wing for a further one year course

Commandant, National Defence Academy Maj Gen L Habibullah

Defence Services Staff College This is located at Wellington, in the Nilgiri Hills in south India One hundred officers drawn from all the three Services including six officers from the U S A and Commonwealth countries are trained every year The object of the training is to prepare officers to hold second grade or equivalent staff appointments or higher staff or command appointments

School of Foreign Languages This is located in New Delhi and was started on February 1 1949 The object is to impart instruction in certain foreign languages to officers of the Armed Forces Other Ministries also take advantage of this school and a large number of civilian officers and non gazetted staff attend courses

College of Military Engineering This is located at Kirkee near Poona Officers of the Corps of Engineers, the Corps of Signals and the Corps of Electrical and Mechanical Engineers are trained to a degree standard in Civil Telecommunication and Electrical and Mechanical Engineering respectively The status of the institution is that of a college

Armed Forces Medical College: This is located in Poona and trains junior and senior medical officers Other ranks also receive training to qualify as laboratory assistants radiographers sanitary assistants blood transfusion orderlies and dispensers The institution provides the Armed Forces with all the biological and chemical reagents for the diagnosis of diseases and also with blood transfusion material and equipment There is a thousand bed hospital and the following departments among others Virus Research Unit Department of Antibiotics Department of Chemistry and Entomology Selected civilian doctors are offered facilities at the institution for advanced training in various branches of the medical science

SENIOR DEFENCE FORCES OFFICERS

Chief of Army Staff and Commander-in Chief, Indian Army General Maharaj Shri Rajendrasinhji, D S O

Chief of the General Staff, Indian Army, Maj Gen J N Chaudhury

Adjutant General Indian Army, Maj Gen Thakur Singh Bal

Quartermaster General Indian Army Maj Gen Tara Singh Bal

Engineer in Chief, Indian Army Maj Gen H Williams

Master General of Ordnance, Indian Army, Maj Gen S D Verma

Military Secretary Indian Army Maj Gen Y S Paranjpe

General Officer Commanding in Chief, Western Command Lt Gen K S Thimayya

General Officer Commanding in Chief Eastern Command, Lt Gen Sant Singh

General Officer Commanding in Chief Southern Command, Lt Gen S M Shrinagesh

Director General Medical Services, Maj Gen D N Chakravarthy

Director of Supplies and Transport Maj Gen H M Mohite

Director Movements and Quartering Directorate, Brig Pritam Singh Chowdhury

Provost Marshal (Mil Police) Col Shekh Mohiuddin

Indian Navy

Chief of Naval Staff & Commander in Chief, Indian Navy Vice Admiral Sir Mark Pizey

Deputy Commander in Chief and Chief of Staff, Commodore G A French

Flag Officer (Flotillas) Indian Fleet, Rear Admiral F A Balance

Chief of Administration, Naval H Qrs, Captain M K Hebli

Chief of Personnel, Naval H Qrs, Captain B A Samson

Chief of Material, Capt A H I Newnham

Chief of Naval Aviation, Capt J E Smallwood

Naval Secretary Capt Aniceto Loedra

Commodore in Charge, Bombay Commodore R M P Taylor

Commodore in Charge Cochin Commodore A D M Law

Naval Officer in Charge, Vizagapatam Captain B S Soman

Director Naval Education Instr Capt F I Byng

Indian Air Force

Chief of the Air Staff and Commander-in-Chief, I A F Air Marshal G F Gibbs*

Deputy Chief of Air Staff, Air Vice Marshal S Mukerjee†

Air Officer Commanding, Operational Command, Air Commodore D A R Nanda

Dy Air Commander in Chief Air Vice Marshal A M Engineer

Air Officer Commanding Training Command, Air Commodore S N Goyal

Air Officer in Charge, Technical and Equipment Services (Air H Q), Air Commodore R H D Singh

Air Officer in Charge, Personnel and Organisation (Air H Q) Air Commodore Arjan Singh

* Is expected to retire on April 1, 1954 when Air Vice Marshal S Mukerjee will take over † Is expected to become Chief on April 1, 1954

INDIAN ARMY

The Army Headquarters is divided into the following main branches which are again further sub divided into directorates —

General Staff Branch
Adjutant General s Branch,
Quartermaster General s Branch,
Master General of Ordnance Branch,
Engineer in Chief s Branch,
Military Secretary s Branch

Under the Army Headquarters the Army is organised into Commands, each Command under a General Officer Commanding in Chief of the rank of Lieutenant General The Commands are divided into Areas, each under the command of a G O C of the rank of Major General, and the Areas in their turn are sub divided into Sub Areas under the command of a Brigadier These are static formations

The Commands are three in number—the Eastern Command, the Southern Command and the Western Command

The Army is divided into a number of arms They are Armoured Corps, Regiment of Artillery Corps of Engineers and Ordnance Army Ordnance Corps, Corps of Electrical and Mechanical Engineers Infantry, Army Service Corps, Army Educational Corps, Army Corps of Clerks (Army Service Corps), Staff Duties and Remounts Veterinary and Farms Corps

COMMANDS

Southern Command	Lt Gen S M Shrinagesh
Eastern Command	Lt Gen Sant Singh
Western Command	Lt Gen K S Thimayya, DSO
Areas	*GOC*
Madras Area	Maj Gen J C Katoch
Bombay Area	Maj Gen K P Dharkal kar
Uttar Pradesh Area	Maj Gen S B S Chimni
Delhi Area	Maj Gen D S Brar
East Punjab Area	Maj Gen Daulet Singh
Sub Areas	*Commander*
Jabalpur Independent Sub Area	Brig E A Rodrigues
Bangalore Sub Area*	
Bombay Sub Area	Brig K K Varma
Poona Sub Area	Brig M K Sheriff
Lucknow Sub Area	Brig N V Bal
Meerut Sub Area	Brig Gurbachan Singh
Jullundur Sub Area	Brig Ram Singh
Ambala Sub Area	Brig K S Moghe

ARMY ORGANISATION

The numerical composition of the types of unit in the Army are given below —

(*a*) *Light Armoured Regiment*	650
(*i*) Squadron	120
(*b*) *Field Regiment*	700
(*i*) Battery	200
(*ii*) Troop	70
(*iii*) Section	20
(*c*) *Infantry Battalion*	900
(*i*) Rifle Company	140
(*ii*) Platoon	40
(*iii*) Section	10

TERRITORIAL ARMY

The T A Act 1948 was passed by Parliament in September 1948 and the Army was inaugurated in October 1949 when recruitment was thrown open

The Territorial Army consists of all arms of service, *i e*, the Armoured Corps, the Corps of Artillery including Anti aircraft and Coastal Defence units the Corps of Engineers including Port and Railway units, the Corps of Signals Infantry the Army Service Corps the Army Medical Corps and the Corps of Electrical and Mechanical Engineers The units raised are of two types *i e*, Provincial units recruited from rural areas who undergo annual training of two to three months duration at a stretch, and Urban units recruited from large towns where Territorial Army units have been raised They undergo training on the weekly drill system, *i e* in the evenings, Sundays and holidays with a small camp of not less than four consecutive days

All able bodied persons from the unskilled labourer to highly qualified technicians provided they are citizens of India, are eligible for recruitment The age limits are 18 and 30 years relaxable in case of ex service (Army Navy and Air Force) personnel and civilians possessing technical qualifications

The country has been divided into eight zones for purposes of recruitment which is done on a zonal basis, *i e*, only residents of the zone are recruited in the units which are raised from that zone

The role of the Territorial Army is as follows —

(*i*) To relieve Regular Army of static duties and support the civil power if required

(*ii*) To provide coast defence and Anti aircraft units

(*iii*) To provide field formations and units for the Regular Army if and when required

When embodied, called out or under training, the Territorial Army personnel receive the same pay and allowances as are admissible to the corresponding ranks of the Regular Army

In order to provide an incentive to the Junior Commissioned Officers and men for hard and meritorious work, 2½ per cent of the actual vacancies available at the Military Wing of the National Defence Academy will in future be reserved for the personnel of the Territorial Army On successful completion of the course at the N D A they will be granted Regular commissions in the Army

No officer or enrolled person is required to perform military service beyond the limits of India save under a general or special order of the Central Government

NATIONAL CADET CORPS

The Corps came into being in 1948 The aim of the Corps is (1) to develop character, comradeship, the ideal of service and capacity for leadership in young men and women, (2) to stimulate interest in the defence of the country, and (3) to build up a reserve of potential officers to enable the Armed Forces to expand rapidly in a national emergency The Organisation is thus mainly of an educational, and *nation building* character Officers and cadets have no liability whatsoever for active military service In this way it is different from The Territorial Army which is designed to serve as a second line of defence However, a close link is maintained between the Territorial Army and the NCC since the latter may be called upon to provide man power for the former in an emergency

The NCC consists of three divisions (1) Junior Division, (2) Senior Division, and (3) Girls Division

The strength of the Corps at present is as follows —

	Officers	Cadets	Total
Junior Division	1,572	51 810	52,382
Senior Division	816	25,508	26,324
Girls Division	14	420	434

The expenditure on the Corps is shared between the Central and State Governments The Central Government meets the cost of the Directorate controlling the staff and the permanent regular staff of the units and also provides the arms ammunition and equipment for the NCC units The State Governments meet the rest of the expenditure for the raising and maintenance of units including the provision of clothing

Student cadets of all the three divisions are given 60 to 80 periods of training in Service subjects every year with 10 to 15 days in camps under the supervision of regular Service personnel The training year corresponds to the academic year of Universities and schools

Social service work forms an important part of the curriculum of the cadets Each unit of a Senior Division of the NCC is affiliated to a regular Army, Navy, and Air Force unit which provides the required personnel and helps to train the NCC personnel by organising training cadres

The strength of each Army, Navy and Air Wing Units (Senior and Junior Division and Girls Division) is as follows —

	NCC Officers	NCC Cadets
(*a*) *Senior Division Army Units (Infantry)*		
(*i*) 4 Coy Bn NCC	15	625
(*ii*) 3 Coy Bn NCC	12	470
(*iii*) 2 Coy Bn NCC	8	315
(*iv*) Independent Coy NCC	3	154
(*b*) *Senior Division Technical Unit* (all arms except Armed Corps unit)	2	60
(*c*) *Senior Division Armoured Corps Unit*	3	60
(*d*) *Senior Division Naval Wing Unit*	2	60
(*e*) *Senior Division Air Wing Unit*	2	80
(*f*) *Junior Division Troop (Army Navy, Air Wing)*	1	33
,, *Public School*	1	30
(*g*) *Girls' Division Troop*	3	90
,, (*one Sub Troop*)	1	30

INDIAN NAVY

On 15th August 1947, when India attained Independence, the following ships were allocated to India Sloops SUTLEJ, JUMNA, KISTNA, CAUVERY Frigates TIR, KUKRI Minesweepers ORISSA, DECCAN, BIHAR, KUMAON, KHYBER, ROHILKHAND, CARNATIC, RAJPUTANA, KONKAN, BOMBAY, BENGAL, MADRAS Corvette ASSAM Survey Vessel INVESTIGATOR Trawlers NASIK, CALCUTTA, COCHIN, AMRITSAR In addition, India got four harbour defence motor launches and all existing landing craft

Today the Indian Navy consists of

Cruiser (flagship) DELHI

* No one was appointed at the time of writing

11th Destroyer Squadron RAJPUT (Capt D11), RANJIT, GODAVARI, GOMATI and GANGA

12th Frigate Squadron JUMNA (Capt F12), CAUVERY, KISTNA

Boys Training Ship TIR

31st Minesweeping Squadron BOMBAY (M/S 31), KONKAN, MADRAS, RAJPUTANA, BENGAL

Survey ships INVESTIGATOR, ROHIL KHAND

Landing Ship Tank MAGAR

Ocean going Tug HATHI

There are also some seaward defence motor-launches and landing craft

On 15th January 1949 Naval Headquarters was reorganised into five main branches each under a Principal Staff Officer styled as follows —

Deputy Commander in Chief and Chief of Staff, Chief of Personnel, Chief of Administration, Chief of Material, Chief of Naval Aviation

In August 1950 it was decided to set up a Secretariat in Naval Headquarters modelled on the Secretariat of the British Admiralty The Head of the Secretariat is the Naval Secretary

On 4th April 1949 a new appointment designated Commodore Indian Naval Squadron (Short title COMINS) was created COMINS was responsible for the operations, administration and training of Indian Naval ships in commission This appointment was subsequently raised to the status of Rear Admiral Commanding Indian Naval Squadron (short title RACINS)

FORMATION OF FLEET

Some important events in the formation of the fleet are as follows INS DELHI (7,000 cruiser of the Leander class) was acquired from the U K on September 15, 1948, RAJPUT, RANJIT, RANA (three destroyers from the U K) were acquired in March 1949, 11th Destroyer Squadron formed under the command of a Captain of Destroyers, 12th Frigate Squadron formed under Captain of Frigates, the Navy dropped the word Royal and became Indian Navy, and the White Ensign was replaced by the Indian Naval Ensign on January 26 1950, Supreme Commander in Chief presented President's Colour to the Navy, May 1951, three 'Hunt' class destroyers acquired from the U K and re named GODAVARI, GOMATI and GANGA, early 1953 the Navy's first air station INS GARUDA commissioned at Cochin, May 1953

Since the Fleet was formed, IN ships visited Burma, Malaya, Siam, Indonesia, Australia and New Zealand in the east, Iran, Iraq, Arabia, East Africa and other countries in the Middle East and the Mediterranean DELHI, RANJIT and TIR participated in the Coronation Naval Review in June 1953 Routine combined training exercises were also carried out by IN ships with those of the Royal Navy and the Commonwealth Navies and the Indian and Royal Air Forces

TRAINING

The training of ratings in the Indian Navy is now carried out in shore establishments at Cochin, Vishakapatnam, Jamnagar and Lonavla under the overall supervision of the Commodore in Charge, Cochin who, in addition to his other duties, carries out the function of the Commodore Superintendent Training Establishments

Cadets for the Indian Navy now receive their general education along with the cadets for the Army and the Air Force in the Joint Services Wing of the National Defence Academy at Dehra Dun and on completion of this initial training proceed to United Kingdom for higher naval training In future, however, the entire naval training is expected to be done in India

There is now a naval staff course at the Defence Services Staff College at Wellington (Nilgiris) under a Chief Naval Instructor This course was inaugurated in August 1950

ESTABLISHMENTS

INS VENDURUTHY (Cochin) contains schools of Seamanship, Gunnery, Signals, Torpedo and Anti submarine, Supply and Secretariat, Cookery, Now Lntry Training

INS CIRCARS (Vishakapatnam) contains Boys Training Lstablishment

INS ANGRL, the base establishment at Bombay controls Naval Dockyard, I N Pay Office Radar Training I stablishment, Regulating School Shipwright Training School, IN School of Physical Training and Naval Barracks

INS SHIVAJI (at Lonavla) contains the Mechanical Training Establishment

INS VALSURA (at Jamnagar) contains the Electrical School

INS HAMLA is the combined operations establishment near Bombay

With the setting up of a shore based Fleet Requirement Unit of INS GARUDA (Cochin) all training for I N personnel will now be imparted at that place

INS ASVINI at Bombay is the first Naval Hospital

The Naval Dockyard at Bombay is to be expanded Work on this began early in 1953

It is decided to set up a hydrographic office in India The purpose of this is the production and printing of charts for marine survey Also one of the I N minesweepers has been temporarily converted for carrying out marine survey duties on the Indian coast

INDIAN AIR FORCE

The IAF is in the main divided into two major formations namely Operational Command and Training Command under the control of Air Headquarters in New Delhi

The Operational Command controls all flying units—fighter, bomber reconnaissance and air transport squadrons The Training Command has under its control ground training schools for both officers and airmen There are also certain units which come directly under the administrative and functional control of Air HQ such as Record office, Air Force Academies, Central Accounts office

The two Commands exercise their control through their Wings and Stations located in various parts of the country Under each Wing and Station come various squadrons and units

Air HQ is divided into three main Branches—Air Branch which deals with operations training, policy and plans, signals and intelligence, Personnel and Organisation Branch, and Technical and Equipment Services Branch Each is under a Branch P S O who in turn has several Directorates under him

The types of aircraft used by the IAF are as follows —

Training Aircraft Tiger Moth, Percival Prentice, HT 2, Harvard, Spitfire

Fighter Aircraft Spitfire, Tempest, Vampire

Transport Aircraft Dakota, Devon

Bomber Liberator

Reconnaissance Spitfire, Auster, Harvard

The following are the major training institutions —

No 1 Air Force Academy, at Begumpet (Hyderabad) trains pilots

No 2 Air Force Academy, Jodhpur, is the nursery of pilots, navigators and air signallers of the IAF

No 3 Air Force Academy at Coimbatore trains officers of ground duty branches

Technical Training College, Jalahalli (near Bangalore) imparts training to the Engineering Officers of the Service

Flying Instructors School Ambala

No 1 Ground Training School, Jalahalli, for non technical airmen trainees

No 2 Ground Training School, Tambaram (Madras) for technical tradesmen (airmen)

No 3 Ground Training School Jalahalli for airmen trainees of higher signals trades

JETS

India has ordered 71 jet fighters of the Ouragan class from France By the end of 1953 thirty nine of these had been delivered and the rest were to be delivered shortly afterwards

The Ouragan class jet fighter is a single seater monoplane capable of attaining a speed of 600 miles an hour at sea level and reaching a height of 8 000 feet a minute

The jet fighter has been described as a well designed military aircraft for defence and air strikes and for ground attack cum interceptor because of its innumerable operational characteristics

Some of the features of the monoplane are manouvreability fast rate of ascent fire power endurance, operating ceiling and speed

Equipped with cannon and carrying rockets and bombs under its wings, the Ouragan has a pressurised cabin permitting the pilot to operate at high altitudes

Its bullet proof fixed screen and the armour force and aft provide additional protection to the pilot when engaged in air battle The aircraft has ejector seats and a sliding jettisonable canopy which form the life saving devices in emergency

GALLANTRY AWARDS

Three new gallantry awards were instituted by the President of the Indian Republic after independence for gallantry in combat with the enemy They are designated the Param Vir Chakra, the Maha Vir Chakra and the Vir Chakra They came into force with effect on August 15, 1947

The Param Vir Chakra is awarded for most conspicuous bravery, or some daring or pre eminent act of valour, or self sacrifice, in the presence of the enemy, whether on land, at sea, or in the air It ranks first among all awards

The Maha Vir Chakra is awarded for acts of gallantry in the presence of the enemy whether on land, at sea, or in the air

The Vir Chakra is awarded for acts of gallantry in the presence of the enemy, whether on land, at sea, or in the air

All members of the Armed Forces including members of the Nursing Services and civilians working with the Armed Forces are eligible for the above three gallantry awards

A fourth gallantry decoration named the Ashoka Chakra in three grades Class one, Class two and Class three was instituted for acts of gallantry other than in face of the enemy This also came into force with effect on August 15, 1947

Class I of the Chakra is awarded for most conspicuous bravery or some daring or pre eminent valour or self sacrifice Class II of the Chakra is awarded for conspicuous gallantry and Class III, for gallantry

Members of Armed Forces and civilians alike are eligible for this award

If any recipient of a Chakra again performs such an act of bravery as would have made him or her eligible to receive the Chakra, such further act of bravery is recorded by a Bar attached to the riband by which the Chakra is suspended and for every such additional act of bravery, an additional Bar is added and any such Bar or Bars is also awarded posthumously For every Bar awarded a replica of the Indra's Vajra in miniature is added to the riband when worn alone

Every recipient of any of these decorations who is junior in rank to a Sub Lieutenant in the Navy, a Second Lieutenant in the Army or a Pilot Officer in the Air Force, is entitled from the date of the act by which the decoration has been gained to a special pension, and each additional Bar conferred carries with it additional pension, for life

A system of Mention in Despatches was also instituted on August 15, 1947 to recognise distinguished and meritorious service in operational areas and acts of gallantry which are not of a sufficiently high order to warrant the grant of *gallantry* awards The terms of eligibility for Mention in Despatches are the same as for gallantry awards Names may be included posthumously and there is no objection to a person's name being mentioned in more than one despatch

The *inter se* order of priority of the new gallantry decorations will be Param Vir Chakra Ashoka Chakra Class I, Maha Vir Chakra Ashoka Chakra Class II Vir Chakra, Ashoka Chakra Class III followed by Campaign Medals, *e g* General service Medal 1947, and Commemorative Medals *e g* Independence Medal State Medals and Commonwealth awards come last

The rates of monetary allowance admissible are as *below* —

(*a*) (*i*) Param Vir Chakra —Rs 50 p m (Rs 70 p m in the case of J C Os who have previously been awarded an award of the second Order of gallantry such as the I O M)

(*ii*) Each Bar to P V C —Rs 20 p m

(*b*) (*i*) Maha Vir Chakra —Rs 20 p m (Rs 50 p m in the case of J C Os who have been previously awarded a gallantry award of the 3rd order such as the M C)

(*ii*) Each Bar to M V C —Rs 10 p m

(*c*) (*i*) Vir Chakra —Rs 20 p m

(*ii*) Each Bar to Vr C —Rs 8 p m

On the death of such a recipient of the hakra the pension is continued to his widow ntil her death or remarriage

The following are the details of Republican India's awards won by members of the Armed Forces —

INDIAN ARMY

Param Vir Chakra—5 (3 posthumous)

Ashoka Chakra Cl I —2 (1 posthumous)

Maha Vir Chakra—49 (19 posthumous)

Ashoka Chakra Cl III—8 (1 posthumous)

Vir Chakra —286 (57 posthumous)

Ashoka Chakra Cl III —18

Mention in Despatches —1 127(35 posthumous)

INDIAN NAVY

Ashoka Chakra Class III—1

INDIAN AIR FORCE

Ashoka Chakra Cl I—1

Maha Vir Chakra —4

Ashoka Chakra Cl II—4

Vir Chakra— 30 (2 posthumous)

RANKING

The various ranks in the Army starting from the lowest are as follows

Sepoy Lance Naik Naik Havildar, Havildar Major Jemdadar Subedar/Risaldar Subedar Major/Risaldar Major, 2nd Lieutenant Lieutenant, Captain Major Lieut Colonel, Colonel Brigadier, Major General, Lieut General, General

Jemadars Subedars Risaldars Subedar Majors and Risaldar Majors are Junior Commissioned officers, while those with the ranks of 2nd Lieutenant and above are officers

The various ranks in the Navy from the top downwards are as follows

Admiral Vice Admiral Rear Admiral Commodore Captain, Commander Lieut Commander, Lieutenant, Acting Sub Lieutenant, Branch List Officer Midshipman Chief Petty Officer, Petty Officer, Leading Rate, Able Rate Ordinary Rate

The ranking in the IAF is as follows

Air Chief Marshal Air Marshal Air Vice Marshal, Air Commodore Group Captain Wing Commander Squadron Leader Flight Lieutenant Flying Officer Pilot Officer These are officers

The men are ranked as follows

Master Warrant Officer, Warrant Officer, Flight Sergeant Sergeant Corporal, Leading Aircraftman, Aircraftman Class I, Aircraftman Class II

INDIAN SOLDIERS', SAILORS' AND AIRMEN'S BOARDS

These Boards are probably the most important and valuable non official institutions connected with the Armed Forces The nucleus of their funds was the residue of the Imperial Indian War Relief Fund which was handed in at the end of 1922 The face value of the securities constituting the fund amounted on 31st March 1953 to Rs 11 97 700, bearing an annual interest of Rs 35,931

The Board has its seat at New Delhi and co ordinates the activities of State Boards which exist in each State Under the control of these State Boards there exists throughout the country a network of District Boards reinforced in some cases by Tehsil or Taluka Committee and other kindred bodies These Boards are established in all districts from which recruits have been obtained in sufficient numbers The President of the Board is the Collector or the Deputy Commissioner Each Board has a paid Secretary usually an ex I C O or ex J C O At present there are 176 District Boards

The following are the objects and duties of the District Soldiers, Sailors and Airmen's Boards —

(*a*) Constantly to endeavour to promote and maintain a feeling of good will between the civilian and military classes,

(*b*) To give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the ex Serviceman or his family,

(*c*) To demonstrate the benefit of and so promote the desire for mutual co-operation between ex Servicemen and civilian officials,

(*d*) To represent and explain to the civil authorities all matters of particular *moment to* ex Servicemen that require the attention of the local *administration*,

(*e*) Generally to watch over the welfare of the ex servicemen and their families and the interests of serving personnel absent from home, with their units

The Indian Soldiers, Sailors and Airmen's Board Fund is now used primarily for payment of special pensions to blinded ex Servicemen, and to meet the expenditure on miscellaneous items such as bank charges audit fees etc in connection with the administration of the fund The surplus interest on investments is being utilised towards the maintenance of the District Soldiers, Sailors and Airmen's Boards

There are other Central funds which are not under the control of the Indian Soldiers Sailors' and Airmen's Boards They are

Armed Forces Benevolent Fund, Flag Day Fund (1952 53 Rs 7 lakhs), Armed Forces *Reconstruction* Fund, the Army Central Welfare Fund the Indian Navy Benevolent Association Fund the Indian Navy Amenities Fund, the Indian Air Force Benevolent Association Fund, the Indian Air Force Central Welfare Fund, St Dunstan's India Fund

*

LAWS OF 1952-53

THE following is a list of the Acts passed between February and August 1952. The dates within the brackets are the dates when the bill got the assent of the President and became an Act —

1 The Part B States Marriages Validating Act, 1952 (February 15, 1952)

2 The Prevention of Corruption (Amendment) Act 1952 (February 15 1952)

3 The Indian Explosives (Amendment) Act, 1952 (February 22, 1952)

4 The Madras Port Trust (Amendment) Act 1952 (February 23 1952)

5 The Delhi University (Amendment) Act 1952 (February 23, 1952)

6 The Capital Issues (Continuance of Control) Amendment Act 1952 (February 23, 1952)

7 The Abducted Persons (Recovery and Restoration) Amendment Act 1952 (February 23 1952)

8 The Foreign Exchange Regulation (Amendment) Act 1952 (February 23 1952)

9 The Indian Independence Pakistan Courts (Pending Proceedings) Act, 1952 (February 23, 1952)

10 The Uttar Pradesh Cantonments (Control of Rent and Eviction) Act 1952 (February 27 1952)

11 The Bombay Port Trust (Amendment) Act 1952 (February 29 1952)

12 The Coal Mines (Conservation and Safety) Act 1952 (March 4 1952)

13 The Appropriation Act, 1952 (March 4 1952)

14 The Punjab Appropriation Act, 1952 (March 4 1952)

15 The Appropriation (Railways) Act 1952 (March 4 1952)

16 The Punjab Appropriation (Vote on Account) Act 1952 (March 4 1952)

17 The Control of Shipping (Amendment) Act 1952 (March 4 1952)

18 The Industrial Disputes (Amendment) Act, 1952 (March 4 1952)

19 The Employees Provident Funds Act 1952 (March 4 1952)

20 The Inflammable Substances Act, 1952 (March 6 1952)

21 The Appropriation (Railway) Vote on Account Act 1952 (March 6 1952)

22 The Bombay Coasting Vessels (Amendment) Act 1952 (March 6 1952)

23 The Code of Criminal Procedure (Amendment) Act 1952 (March 6 1952)

24 The Criminal Tribes Laws (Repeal) Act, 1952 (March 6 1952)

25 The Indian Boilers Amendment Act 1952 (March 6, 1952)

26 The Delhi Special Police Establishment (Amendment) Act 1952 (March 6 1952)

27 The Indian Tariff (Amendment) Act, 1952 (March 7 1952)

28 The Appropriation (Vote on Account) Act, 1952 (March 7 1952)

29 The Finance Act, 1952 (March 7, 1952)

30 The Requisitioning and Acquisition of Immovable Property Act 1952 (March 14, 1952)

31 The Presidential and Vice Presidential Elections Act 1952 (March 14, 1952)

32 The Contempt of Courts Act, 1952 (March 14, 1952)

S 7 The Commission shall have powers of a Civil Court with respect to certain matters

S 8 provides for the manner of making readjustment and delimitation In making the readjustment the Commission shall have regard to provisions of Article 81 and Article 330 of the Constitution The Commission shall not make readjustment as regards the State of Jammu and Kashmir

S 9 The final orders of the Commission shall be published in the *Gazette of India* and such publication will give the orders the force of law Every published order shall be laid before the House of the People

*

EDUCATION

SINCE August 15, Education at the Centre has been constituted into a separate Ministry of Education, the present Minister for Education being Maulana Abul Kalam Azad The State Governments are fully autonomous in regard to educational matters except in respect of educational development programme for which they receive grants in aid from the Central Government Such programme has to be approved by the Central Government who have to examine whether it is in accord with the All India approved educational policy

The Ministry has offices in London, Washington Nairobi and Bonn

In the States the Secretary Department of Education, is the permanent head of the Department and the Director of Public Instruction (in some States he is called the Director of Education) acts as an expert Adviser to the Minister in charge of Education The Director controls the inspecting staff and the teaching staff of the Government Institutions In some States (Coorg Kutch Bilaspur) the functions of Director are discharged by the Educational Officer in others (Bhopal, Manipur, Tripura) by the Education Secretary

The authority of Government in controlling the system of public instruction is in part shared with and in part delegated to Universities and Boards of Secondary and Intermediate Education as regards secondary education and to local bodies as regards elementary education in some States

Certain forms of Technical Education are under the technical departments concerned and come within the purview of the Minister in Charge of those Departments

Institutions under private management are controlled by Government and by local bodies by recognition and by the payment of grants in aid, with the assistance of the inspecting staffs employed by Government and by local bodies

The following States have Boards of Intermediate Education and Secondary Education Ajmer Vindhya Pradesh Bhopal (same Board for all three), Uttar Pradesh Madhya Bharat

The following States have Boards of Secondary Education Bihar Bombay Madhya Pradesh Madras Uttar Pradesh West Bengal Hyderabad, Madhya Bharat Delhi Ajmer Vindhya Pradesh, Bhopal (same Board for last four)

UNIVERSITIES

The Central Universities are four Aligarh, Banaras Visva Bharati and Delhi

There were in all 30 universities in India in 1953 December The names of the universities with the names of the Vice Chancellors are given below —

1 *Agra University* —I t Col C V Mahajan M A
2 *Aligarh University* —Dr Zakir Husain Khan M A Ph D
3 *Allahabad University* —Dr A C Banerjee, M A M Sc I E S
4 *Andhra University* —Dr V S Krishna, B A (Oxon) Ph D (Vienna)
5 *Annamalai University* —C P Ramaswamy Iyer B A B I
6 *Banaras University* —Acharya Narendra Deva, M A D Litt LL B
7 *Baroda University* —Mrs Hansa Ben Mehta
8 *Bihar University* —Lt Col Shyamnandan Sahay B A M P
9 *Bombay University* —N J Wadia, B A (Bom) B A (Cantab)
10 *Calcutta University* —S N Banerjee, M Sc, I I B Bar at Law
11 *Delhi University* —Dr G S Mahajani M A, Ph D
12 *Gauhati University* —K K Handiqui M A (Calcutta & Oxon)
13 *Gujarat University* —H V Divatia
14 *Jammu & Kashmir University* —Janki Nath Wazir B A I I B, Bar at Law
15 *Karnatak University* —C C Hulkoti, B A, I I B
16 *Lucknow University* —Acharya Jugal Kishore
17 *Madras University* —Lt Col Diwan Bahadur Sir A Lakshmanaswami Mudaliar M D, I L D, D Sc, F R C O G
18 *Mysore University* —Dr B L Manjunath, B A M Sc (Lond), D Phil (Oxon)
19 *Nagpur University* —Lt Col Pandit K L Dubey B A LL B, M L A
20 *Osmania University* —Dr S Bhagwantam, M Sc (Hons) D Sc, F I A Sc
21 *Patna University* —Basudeva Narayana M Sc, M D (Cal), Ph D (Edin), F R S (Edin)
22 *Poona University* —Dr M R Jaykar, P C, M A D C I, L I D
23 *Punjab University* —Dewan Anand Kumar, M Sc, M A (Cantab) Bar at-Law
24 *Rajputana University* —G C Chatterjee, M A (Punjab) B A (Cantab)
25 *Roorkee University* —Vacant
26 *Sagar University* —Dr R P Tripathi, M A, D Sc (Lond)
27 *S N D T Indian Women's University* — K M Jhaveri M A, I I B J P
28 *Travancore University* —Sir A Ramaswamy Mudaliar, B A B L
29 *Utkal University* —Lt Col Dr P Misra, M Sc Ph D (Leeds)
30 *Visva Bharati University* —Rathinder Nath Tagore, B Sc (Illinois)

BASIC FACTS

The basic facts may be summarized as follows The latest year for which figures are available is 1950 51 (For details see tables)

Total no of institutions, 2 90,458 no of universities 30 research institutions 20 Boards of Secondary Education, 7 arts and science colleges 504 professional colleges, 213, special education colleges 99 secondary schools 20 981, primary schools, 210 112 pre primary schools 305 vocational and technical schools 2 162 special education schools 47,542, unrecognized institutions 8 485

Total enrollment 25 826 365 in universities 29 520 in research institutions 776, in arts and science colleges 304 324 in professional colleges 54 716 in special education colleges 7 598 in secondary schools 5,225 454 in primary schools 18 352 383 in pre primary schools 25 144 in vocational and technical schools 164 904, in special education schools, 1 255 208 in unrecognized institutions, 406 338

Total expenditure Rs in crores 113 43, direct expenditure 90 71, indirect expenditure 22 72

General policy may be summarized as follows

Provision of universal compulsory education for all children aged 6 11 within a period of 10 years the estimated expenditure during the first half of the period is Rs 220 crores

The system of education is what is called the Basic Education system centred on the teaching of a craft

Secondary education was the subject of an enquiry by a Commission and the report was published in August 1953

The key reports and resolutions on which primary and secondary education systems are planned are

Resolution of the Central Advisory Board of Education, 1935, Dec Wood Abbot Report Zakir Hussain Committee Report (Wardha Scheme or Basic Education Scheme) Reports of the Central Advisory Board (14) (1) Kher Committee Reports on Basic Education (2) Adult Education (3) The Physical Welfare of School children (4) School Buildings (5) Social Service (6) The Recruitment, Training and Conditions of Service of Teachers in Primary Middle and High Schools, (7) The Recruitment of Education Officers (8) Technical (including Commercial and Art) Education, (9) Text books, (10) Examinations (11) Educational Administration (12) Agricultural Education (13) Religious Education (14) Selection of Pupils for Higher Education and lastly Report on Post war Educational Development in India (Sargent Report)

University education has had a report published on it (see University Commission Report, 1949) There is now a University Grants Commission

Literacy campaign is now called Social Education In 1950 51, about 540,000 adults were made literate

In technical education the latest development is the setting up of an Indian Institute of Technology at Kharagpur

For 1952 53 India received 409 foreign scholarships or fellowships

FIVE-YEAR PLAN

The Planning Commission has made the following allotments for education

	Rs
Total for the five year period	155 66 crores
Administration	75 7 lakhs
Primary Education	8702 8 ,,
Secondary Education	830 4 ,,
University Education	1172 1 ,,
Technical and Vocational	2145 4 ,,
Social Education	1510 0 ,,
Other Schemes	684 1 ,,
Total expenditure by Central Ministry for five year period	39 02 crores
Expenditure, 1953 56	33 30 ,,
Total for university education	2 92 ,,
Total for scientific and technical	11 10 ,,
Total for Social Welfare	4 ,,
Total for Youth Camps and Labour Service	1 ,,
Total for pre university education	20 00 ,,
Total expenditure for five year period for States	116 65 ,,

The schemes envisaged in the Central Government programme are as follows —

1 Complete units of Basic Education (pre Basic to post Graduate Basic Training College) at least one unit in each State 2 Janata colleges for social education at least one in each State At least one school cum community centre in each State 3 At least one multilateral secondary school in each State Occupational schools for young people between the ages 14 18 Research Bureaux for study of problems of secondary education Merit scholarships to poor students for public schools 4 Production of audio visual aids to be encouraged by establishment of unit at Central Institute for Education and by assistance to firms and publishers 5 Production of model literature for children, Basic Education Social Education 6 Development of Indian and Federal languages Production of original work and translation Production of reference books dictionaries, and encyclopaedias 7 Pilot centres for juvenile delinquents and defectives 8 Provision of vocational guidance and organizing selective tests 9 Development of the Indian Institute of Science, Bangalore and of 14 engineering institutions facilities for study of special subjects (printing technology, silk technology, wool technology, architecture, town planning) 10 Help for libraries in universities (Rs 20 lakhs), and research training scholarship scheme (Rs 45 lakhs)

Schemes envisaged in the States programmes are as follows

1 Primary Education opening of new primary schools improvement of existing ones, conversion of primary into basic schools, opening of new basic schools 2 Secondary Education opening new secondary schools, improving existing ones, new subjects in the curriculum (physical education, military training gardening and agriculture, music, crafts), maintenance of model schools 3 University Education new universities and colleges, improvement of present ones 4 Social Education libraries, physical education, youth activities, audiovisual education, literacy and adult education centres 5 Technical and vocational Education New craft Schools, converting craft schools into junior Technical High Schools, Junior Polytechnics conversion of secondary schools into Technical High Schools, diploma courses, industrial schools, agricultural bias schools, upgrading of commercial and technical schools into colleges, stipends for studies abroad 6 Further education of ex-service personnel, development of regional languages and literature, education of handicapped, National Cadet Corps in colleges, improvement of special fields, such as oriental education, statistics

The targets to be reached at the end of the Five Year Plan are given by the following table

Year	Primary (ordinary)					Junior Basic					Secondary				
	No of institutions	Pupils		Teachers		No of institutions	Pupils		Teachers		No of institutions	Pupils		Teachers	
		Total number	% of girls	Total number	% of trained teachers		Total number	% of girls	Total number	% of trained teachers		Total number	% of girls	Total number	% of trained teachers
	(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)
1950-51	172 779	15 110,316	30	386 169	63	35 002	2 900 322	8	77 013	55 0	16 387	4 387 657	19	163,575	56
1955-56	202 141	18 788,750	32	460 324	66	42,533	5,276,278	13	111 983	70 3	19 262	5 779,395	16	206,856	62
Percentage of increase in 1955-56 over 1950-51	17	25	2		3	22	81	5	45	15	18	32	3	26	6

Year	Technical and Vocational (excl industrial schools)		Industrial Schools		Training of Teachers		
	No of institutions	No of trained during the year	No of institutions	No of trained during the year	No of Primary trained	No of Secondary trained	No of Basic trained
	(16)	(17)	(18)	(19)	(20)	(21)	(22)
1950 51	260	26 702	360	14 750	27 927	9 516	5,370
1955-56	407	43,603	456	21,797	32,212	14 666	14,045
Percentage of increase in 1955-56 over 1950 51	57	63	25	48	15	54	162

Note —Figures for Hyderabad, Kashmir Rajasthan, Ajmer and Vindhya Pradesh are not included unless otherwise specifically stated in any of the figures Other States excluded are mentioned under various heads

(1) Figures for U P are not included
(2) Figures for U P are not included
(3) Figures for Madhya Pradesh, Uttar Pradesh and Mysore are not included
(4) Figures for Madhya Pradesh, Uttar Pradesh and West Bengal are not included
(5) Figures for Madhya Pradesh Uttar Pradesh and West Bengal are not included
(6) Figures for Madhya Pradesh Travancore Cochin and Coorg are not included and those for Rajasthan are included
(7) Figures for Madhya Pradesh and Coorg are not included
(8) Figures for Madhya Pradesh, Madras, Madhya Bharat, Mysore, Saurashtra, Travancore Cochin Bhopal Coorg Himachal Pradesh, Kutch and Tripura are not included
(9) Figures for Madhya Pradesh and Coorg are not included
(10) Figures for Madhya Pradesh and Coorg are not included
(11) Figures for Rajasthan included
(12) Figures for Madhya Pradesh Mysore and Manipur are not included
(13) Figures for Madhya Pradesh are not included
(14) Figures for Madhya Pradesh are not included
(15) Figures for Orissa PEPSU Himachal Pradesh Coorg Manipur and Tripura are not included Figures for Hyderabad are included
(16) Figures for Orissa PEPSU Coorg Manipur and Tripura are not included Those for Hyderabad are included
(17) Figures for Bihar, Saurashtra and Part C States are not included Those for Rajasthan and Hyderabad are included
(18) Figures for Bihar, Saurashtra and Part C States are not included Those for Hyderabad are included
(19) Figures for Travancore Cochin, Bilaspur Coorg and Tripura are not included
(20) Figures for Coorg Delhi, Kutch and Tripura are not included
(21) Figures for Uttar Pradesh, Travancore Cochin, Coorg, Kutch, Manipur and Tripura are not included

1953 54 ALLOTMENTS

For Five Year Plan– Rs 2 crores

Scholarships for Scheduled Castes Tribes and Backward classes – Rs 30 lakhs

All India Council for Technical Education—Rs 1 05 000

Post Institutional Practical Training—Rs 9 lakhs

Research training scholarships—Rs 8 lakhs

Grants to Universities for development of scientific and technical education—Rs 88 lakhs

Strengthening Engineering and Technological Institutions—Rs 44 20 lakhs

Indian Institute of Science—Rs 31 35 lakhs

Cultural Relations with foreign countries—Rs 2 lakhs

Cultural Relations at instance of External Affairs Department—Rs 4 96 lakhs

Basic and Social Education—Rs 2 crores

Secondary Education Commission– Rs 40 000

Experimental Education and Cultural Activities Rs 2 5 lakhs

Grant in Aid to Public Schools – Rs 2 lakhs

Constituent Colleges of Delhi University—Rs 13 lakhs

Physical Education and Youth Welfare—Rs 5 lakhs

Sangeet Natak Akadami –Rs 2 5 lakhs

Sahitya Akadami—Rs 1 5 lakhs

Academy of Arts –Rs 1 lakh

National Art Gallery—Rs 1 25 lakhs

Academy of Hindustani Music Rs 50 000

Academy of Karnatak Music– Rs 40 000

Training Centre for the Adult Blind Dehra Dun —Rs 2 65 lakhs

Benares Hindu University –Rs 23 20 lakhs

Aligarh Muslim University Rs 12 50 lakhs

Delhi University –Rs 11 60 lakhs

Visva Bharati University Rs 4 5 lakhs

Special Development Grants to Central Universities—Rs 20 03 lakhs

Five Year Development Plan of Universities—Rs 25 lakhs

University Grants Commission—Rs 1 lakh

Akra University Silver Jubilee—Rs 2 lakhs

Indian Women's University Rs 75 000

Jamia Millia Islamia– Rs 2 08 lakhs

Propagation of Hindi—Rs 2 5 lakhs

Overseas Scholarships Scheme—Rs 2 60 525

Indo German Industrial Co operative Scheme—Rs 3,31,300

Scholarships to Scheduled Castes Tribes, etc for post matric education Rs 40 lakhs

Scholarships to students from Asia—Rs 1 5 lakhs (100 scholarships)

U N Fellowships and Scholarships Programme—Rs 1 5 lakhs

Indian Council of Cultural Co operation—Rs 3 lakhs

UNESCO—Rs 17 lakhs

Model School for Blind Children, Dehra Dun—Rs 1 lakh

Buildings for Indian Institute of Technology—Rs 49 84 lakhs

INDIAN NATIONAL COMMISSION

For implementing UNESCO programmes in India It has three sub Commissions Education and Social Sciences Sub Commission Science Sub Commission Culture and Mass Communication Sub Commission

INDIAN COUNCIL OF CULTURAL RELATIONS

For promoting cultural relations with foreign countries

ALL INDIA COUNCIL OF TECHNICAL EDUCATION

Of the following bodies only the first was formally set up at the time of writing (Oct 1953)

SANGEET NATAKA AKADAMI

9, Queensway Line, New Delhi

Secretary Nirmala Joshi

AKADAMI

ACADEMY OF ARTS

ACADEMY OF HINDUSTANI MUSIC

ACADEMY OF KARNATAK MUSIC

The following institutions are conducted under the direct auspices of the Ministry of Education

Central Secretariat Library Central Educational Library Indian Museum (Calcutta), National Museum (New Delhi) Film Library Central Institute of Education Delhi Polytechnic Indian Institute of Technology (Kharagpur) National Library (Calcutta) Training Centre for the Adult Blind (Dehra Dun) Central Braille Printing Press (Dehra Dun)

Some publications of the Ministry *The Educational Quarterly* (periodical) *The Central Bureau of Education Teachers Handbook of Social Education Writing Books for Adults Education of Girls and Women in India A Review of Education in India 1951 52*

VARSITY GRANTS COMMISSION

A six man interim Commission has been set up

Dr S S Bhatnagar (*Chairman*) Dr A Lakshmanaswamy Mudaliar Mr N I Wadia Acharya Narendra Deva A representative of Finance Ministry (K R K Menon) A representative of Education Ministry (K G Saiyidain)

UNIVERSITY COMMISSION REPORT

The Indian University Education Commission was appointed by a resolution of the Government of India dated 4th November 1948 It started on its work in December 1948 and presented its report in August 1949

The following were the members of the Commission Dr S Radhakrishnan (Chairman), Dr Tara Chand Sir James Duff (Vice Chancellor Durham University) Dr Zakir Hussain Dr Arthur E Morgan (Former President Antioch College U S A) Dr A Lakshmanaswami Mudaliar Dr Meghnad Saha Dr K Narayan Bahl Dr John J Tigert (formerly Commissioner of Education U S A) Nirmal Kumar Sidhanta (*Secretary*)

The report is signed by all the members In general the Commission is opposed to the multiplication of Universities on a regional basis It favours the establishment of rural universities It recommends the setting up of a University Grants Commission It emphasizes the importance of religious instruction and recommends the use of the regional language as the medium of instruction at the University stage except at the Central Universities like Benares and Delhi where the medium of instruction should be the Federal language

The following are among the more important recommendations in detail

There should be four classes of teachers Professors Readers, Lecturers and Instructors The scales of salaries for University teachers should be —

Professors	Rs 900 50 1,350
Readers	,, 600 30 900
Lecturers	,, 300 25 600
Instructors or Fellows	,, 250
Research Fellows	,, 250 25 500

The scales of salaries for affiliated colleges with no Post graduate classes should be —

Lecturers	Rs 200 15 320 20 400
Senior posts	,, 400 25 600 (two in each college)
Principals	,, 600 40 800

For colleges which have Post graduate classes, the grades should be —

Lecturers	Rs 200 15 320 20 400 25 500
Senior posts	,, 500 25 800 (two in each college)
Principals	,, 800 40 1,000

The standard of admission to the university courses should correspond to that of the present intermediate examination *i e* after the completion of 12 years of study at a school and an intermediate college

In each State a large number of well equipped and well staffed intermediate colleges (with classes IX to XII or VI to XII) should be established

To avoid overcrowding at universities and colleges the maximum number in the Arts and Science faculties of a teaching university should be fixed at 3,000 and in an affiliated college at 1,500

The number of working days should be substantially increased to ensure a minimum of 180 in the year exclusive of examination days with three terms each of about 11 weeks duration

All educational institutions should start work with a few minutes for silent meditation

In the first year of the Degree course lives of the great religious leaders like Gautama the Buddha Confucius Zoroaster Socrates Jesus, Sankara Ramanuja Madhwa Mohammad Kabir Nanak Gandhi should be taught In the second year some selections of a universalist character from the scriptures of the world should be studied In the third year the central problems of the philosophy of religion should be considered

MEDIUM OF INSTRUCTION

International technical and scientific terminology should be adopted the borrowed words properly assimilated their pronunciation adapted to the phonetic system of the Indian language and their spelling fixed in accordance with the sound symbols of Indian scripts

Pupils at the Higher Secondary and University stages should be made conversant with three languages the Regional language, the Federal language and English (the last one in order to acquire the ability to read books in English)

Higher education should be imparted through the instrumentality of the regional language with the option to use the Federal language

For the Federal language one script Devanagari should be employed and some of its defects removed A Board consisting of scientists and linguists should be appointed to prepare a scientific vocabulary of words which will be common to all Indian languages and also to arrange for the preparation of books in different sciences to be rendered into all Indian languages

Provincial Governments should be required to take steps to introduce the teaching of the Federal language in all classes of Higher Secondary Schools, in Degree Colleges and in Universities

English should be studied in High Schools and in the Universities in order that Indians may keep in touch with the living stream of evergrowing knowledge

EXAMINATIONS

A battery of psychological and achievement tests should be developed for use with higher secondary school students for the final test at the end of twelve years of schooling This will together with other relevant information serve the purpose of an admission examination to the first degree course at the university The American Council on Education Co operative Psychological and General Achievement Tests would serve as a model from which to build a satisfactory basis of selection of Indian students

A set of objective progress tests for guidance and for evaluating class room progress should also be developed immediately

For purposes of admission to college and university the tests should be accompanied with much additional information and interviews with students when conditions make this possible

A university degree should not be required for Government administrative services Special state examinations for recruitment to the various services should be organised and should be open to whosoever cares to take them

Credit should be given for classwork It will be conducive to efficiency both in teaching and learning

One third of the marks allotted to each subject should be reserved for work done during the course of instruction and that this should be adopted forthwith at the teaching universities for the B A and B Sc M A and M Sc examinations The affiliating universities should also take immediate steps to evolve a method of more or less uniform marking for this internal award at the affiliated colleges

A candidate should get 70 per cent or more marks to secure a first class 55 to 69 per cent for a second and at least 40 per cent for a third The students should be arranged in alphabetical order in each of the three classes

Viva Voce examinations should be employed only for post graduate and professional degrees

PHYSICAL EDUCATION

All students both men and women should be required to take at no cost to themselves a thorough physical examination at admission and periodically thereafter at least once a year

All universities with or without medical colleges must have hospitals and dispensaries for student service

A nutritious meal should be furnished at noon at reasonable cost

All students should be required to be vaccinated against smallpox and inoculated against cholera, typhoid and plague

A post graduate degree course leading to a doctorate should be set up at one university in each State where Directors of Physical Education may be trained

Each university and college remote from a university centre should have a Director of Physical Education with the status pay and training comparable to heads of other departments

Two years of physical education should be required for all students men and women except those who are physically unfit or who are in the *National Cadet Corps*

The Centre should take over from the States the responsibility for the administration of the National Cadet Corps

There should be manœuvres in the summer in which Army and Air Units work together Naval Units should take cruises in the summer

CONSTITUTION

University education should be placed on the concurrent list

The concern of the Central Government with the universities should be with regard to finance and the co ordination of facilities in special subjects

For allocating grants to universities a Central Grants Commission should be established There should be no university of the purely affiliating type Government colleges should be gradually transformed into constituent colleges of the university

The number of colleges affiliated to a university should be limited

The aim of an affiliated college should be to develop into a unitary university and later into a federative one

The Vice Chancellor should be a whole time officer

A Grants Allocation Committee should be constituted for States with universities of the teaching and affiliating type

The State should recognise its responsibility for the financing of higher education

The aid to private colleges should be for buildings and equipment as also for the recurring expenditure the latter to be on a uniform basis say half of the present teachers salaries and a third of other approved expenditure

The Government should contribute an additional annual amount of about ten crores for the development of university education during the next quinquennium

The All India character of the Banares and Delhi Universities should be maintained in all Colleges

As a Central University Delhi should offer facilities for work to students from all over India

The medium of instruction in the Banares and Delhi Universities should be the Federal language and that during the six years which will elapse before students from other areas can master the Federal language instruction should be given both in the Federal language and in English

In regard to co education, the Commission s recommendation is that in the secondary stages there should be separation and in the basic and collegiate stages co education

The Commission has also recommended that where the mother tongue is not the same as the Federal language the Federal language is to be studied from the first form If the mother tongue and the federal language are identical, students would be required to take any other Indian classical or modern language If Hindi happens to be the mother tongue of a student, the student would be required to study some other Indian language

There must be no attempt at hasty displacement of English as a medium of instruction for academic standards Indian languages have to grow and must become proper media for communication To displace English by a State or the Federal language may result in deterioration of standards Therefore, while State Governments should make their languages more potent as early as possible no time-limit should be prescribed Languages will have to grow and there cannot be a time limit During the transition English will remain

The Commission is of the opinion that English should be taught from the third form (three years before matric) for those who desire to enter the University

In the inter State border areas where the regional language may be different from that of the mother tongue of a student the medium of instruction must be the mother tongue up to a particular stage and students would be asked to study the Federal language as well

SECONDARY EDUCATION COMMISSION

This Commission was appointed by a Government of India resolution dated Sept 23, 1952 and started its work on Oct 6 1952 It presented the report on Aug 29 1953

The Commission consisted of the following Dr A Lakshmanaswami Mudaliar (Chairman) Principal John Christie (of Jesus College, Oxford), Dr Kenneth Rast Williams (Associate Director, Southern Regional Education Board, Atlanta, U S A), Mrs Hansa Mehta (Vice Chancellor, Baroda University) J A Taraporevala (Director of Technical Education Government of Bombay), Dr K L Shrimali (Principal, Vidya Bhavan Teachers Training College, Udaipur), M T Vyas (Principal New Era School Bombay), K G Saiyidain (Jt Secy to the Government of India, Ministry of Education), Principal A N Basu (Central Institute of Education, Delhi, member secretary)

In individual States the Government selected a person who was co opted as a member during the Commission s work in that State

RECOMMENDATIONS

The secondary stage should comprise a period of seven years The second half should be a higher secondary stage of four years duration with the first year of the Intermediate included in it

Multi purpose schools should be established wherever possible There should be special facilities for agricultural education in rural schools Technical schools should be started in large numbers near enough to industries

Public schools should continue to exist and after the next five years should be self supporting There should be some free studentships given by Government in these schools

The mother tongue or the regional language should generally be the medium of instruction throughout the secondary stage subject to the provision that for linguistic minorities special facilities should be made available

During the middle school stage every child should be taught at least two languages English and Hindi should be introduced at the end of the junior basic stage subject to the principle that no two languages should be introduced in the same year At the higher secondary stage at least two languages should be studied, one of these being the mother tongue or the regional language

At the middle school the curriculum should include languages social studies, general science, mathematics, art and music, craft, physical education

At the higher secondary stage there should be diversified courses but with a common core languages, general science, social studies, craft The diversified courses should include humanities, sciences, technical subjects, commercial subjects, agricultural subjects, fine arts and home sciences The diversified curriculum should begin in the second year of the higher stage

An independent Text Book Committee should be constituted This Committee should lay down criteria for the type of paper, illustration, printing and format of the book

Single text books should not be prescribed for any subject but a reasonable number leaving the choice to the schools In the case of languages, however definite text books should be prescribed Frequent changes in text-books should be discouraged

The Activity Method and Project Method should be assimilated in school practice

All public libraries should have a special section for children and adolescents

To promote discipline there should be personal contact between teachers and pupil self government in the form of house system and student councils which will draw up a code of conduct and enforce it should be introduced in all schools

Religious instruction may be given only on a voluntary basis outside the regular school hours It should be confined to the children of the particular faith and given with the consent of the parents and the management

Every teacher should devote some time to extra curricular activities

The N C C should be brought under the Central Government Training in First Aid St John s Ambulance and Junior Red Cross work should be encouraged

The services of Guidance Officers and Career Masters should be made available

A properly organized school medical service should be built up

The school should assist in the maintenance of the sanitation of the area

All teachers below the age of 40 should participate in the physical activities of the students

The number of external examinations should be reduced and the element of subjectivity in the essay type tests should be minimized by introducing objective tests and by changing the type of question

In the final assessment of the pupils due credit should be given to the internal tests and the school records of the pupils

The system of symbolic rather than numerical marking should be adopted

There should be only one public examination at the completion of the secondary school course

The certificate should contain besides the result of the public examination, the results of the school tests in subjects not included in the public examination as well as the gist of the school records

The system of compartmental examinations should be introduced at the final public examination

ORGANIZATION

There should be Selection Committees for recruiting staff The probation for a trained teacher should be one year Teachers in high schools should be graduates with a degree in education

The system of triple benefit schemes pension cum provident fund cum insurance should be introduced for teachers Arbitration Boards or Committees should be established to consider the grievances or of matters relating to suspension, dismissal, etc The age of retirement may extend to 60 with the approval of the Director of Education

The children of teachers should have free education The teachers should be given free medical attention and treatment The practice of private tuition by teachers should be abolished

There should be only two types of training institutions, for holders of S S C (two years) and for graduates (one year to start with, later for two years) The first type should be under the control of a Board and the second attached to a university

At these institutions teachers should be trained in at least one extra curricular activity The training college should conduct research in various aspects of pedagogy

No fees should be charged in training schools The student teachers should be given a stipend The teachers already in service should get the same salary as they were getting

To meet the shortage of women teachers special part time training course should be provided

There should be a Board of Secondary Education in every State with the Director as Chairman to lay down general policies A Sub Committee of the Board should deal with the conduct of examinations There should be State Advisory Bodies on the model of the Central Advisory Board to advise the Department of Education

Special Inspectors should be appointed to inspect the teaching of special subjects like Domestic Science, Art, Music

In order to evaluate the academic side of the activities of a school there should be a panel of experts with the Inspector to go round

The Managing Boards of schools should be registered The head master should be an ex officio member Every management should draw up definite rules of service for teachers

For proper running every management should be required to provide an endowment and the income accruing from this should be shown among the receipts The scales of fees fixed should be approved by the Department of Education All accounts of the school should be subject to audit by the Department

The number of sections in each class should be limited, and before any increase in the number is made the prior approval of the Department should be obtained

There should be rules to prevent undue competition among schools

Managements should obtain the prior approval of the Department before opening a school

In designing buildings there should be allowed an area of not less than 10 sq ft per student in the class rooms The optimum number of boys in a class should be 30, and the number should not in any case exceed 40 The optimum number in the whole school should be 500, while the maximum should not exceed 750

Co operative stores should be established in all schools so that books, stationery, etc may be made available to students at cost price

As a rule the total number of working days should not be less than 200, the working hours per week should be at least 35 periods of about 45 minutes each The school should work regularly for six days in the week, one of the days being a half day on which students and teachers meet informally and work on various extra curricular and social projects

School holidays need not be identical with public holidays Normally during the year there should be a summer vacation of two months, and two breaks of ten to fifteen days at suitable periods during the year

A Board of Vocational Education should be constituted at the Centre

A cess called industrial education cess should be levied to promote vocational education A certain proportion of the net revenue of certain nationalized industries (railways, *e g*) should be set aside for the same purpose Surplus funds from religious and charitable endowments should be diverted to educational purposes

The Centre should assume a certain amount of direct responsibility for the contemplated reorganization and give financial aid

ALL-INDIA COUNCIL FOR TECHNICAL EDUCATION

THE All India Council for Technical Education was constituted in 1946 with representatives of the various interests connected with technical education and training, to advise the Government on the development of technical education above the high school stage with the late Nalini Ranjan Sarker as the Chairman

The Council does not, however, have any executive, administrative or controlling power

By sending out questionnaires to various institutions, Universities and State Governments, the Council first made an exhaustive survey of technical education facilities in the country

The result of this survey was published in the form of a hand book, which is now under revision

While the post war plans formulated by the various State Governments specially devoted themselves to the development of Government institutions, the Council took up the question of improving and strengthening non Government institutions as well Thus the Co ordinating Committee of the Council at its very first meeting appointed Visiting Committees to visit 15 selected institutions throughout the country and report on the lines along which improvement and development were necessary

The scheme, known as the All India Council for Technical Education Scheme for strengthening and improvement of existing non Government institutions, has resulted in the raising of standards in those institutions apart from providing additional equipment and facilities for an increased number of students

The Scheme was approved by the Government and put into operation in 1947 48

The following aggregate expenditure were approved for this purpose

1	Non recurring grants for construction of buildings	Rs 54 96 Lakhs
2	Non recurring grants for purchase of equipment	Rs 107 26 Lakhs
	Total	Rs 162 22 Lakhs
3	Ultimate recurring grants	Rs 25 45 Lakhs
4	Interest free loan grants	Rs 37 67 Lakhs
	Grand Total	Rs 225 34 Lakhs

The building programme under the Scheme is almost complete, and a substantial part of the equipment programme has also been gone through

The Planning Commission has made a provision of Rs 3 55 crores for carrying out an all round development of technical education and research in the country in the following courses

1 Post graduate courses Advanced work and research

2 Under graduate courses (Degree and Diploma) full time

(*a*) Basic engineering and technological subjects

(*b*) Special subjects—Printing technology, Silk technology, Woollen Textile technology, etc

(*c*) Architecture and Town Planning

3 Part time courses

4 Teachers Training

5 Loans for construction of Hostels

The Sarker Committee appointed to consider the development of higher technical institutions in India suggested the establishment of four Higher Technical Institutions on Regional Basis The All India Council for Technical Education recommended that two of these should be set up during the quinquennium 1946 51, but there was some delay in implementation

However the first institution, *viz* the Eastern Higher Technical Institute designated the Indian Institute of Technology, Kharagpur was formally declared open by the Central Minister for Education in August 1950 The foundation stone of the main college building was laid in March 1952 by the Prime Minister

The Council appointed a Technical Man power Committee in 1951 under the Chairmanship of Mr G L Mehta to assess the country s requirements for technical man power over the next five years

The Council has also given a lead on the question of salary scales for teachers of various grades in the technological institutions

At the first meeting of the Council it was decided to set up four Regional Committees, one for each region—the Eastern, the Western, the Southern and the Northern

Government has already set up two offices, one in Calcutta and the other in Bombay with Regional Officers to do the preliminary work in regard to the setting up of Committees in the Eastern and the Western Regions

The Regional Committees have been formed and are charged with the function of examining the question of improvement of the existing under graduate institutions in consultation with the State Governments and preparing a plan about how the required development could be brought about

The Regional Committees are also to foster close liaison between technical institutions and the industry to their mutual advantage

The Council hopes to secure paid, well supervised practical training facilities for a majority of graduates and diplomates in engineering and technology

As regards the laying down of standards, the Council at its first meeting held in 1946 constituted six Boards of Studies in Engineering and Metallurgy, Chemical Engineering and Chemical Technology, Textile Technology, Architecture, Applied Arts, Commerce and Business Administration

To these Boards were assigned the task of examining the existing regulations and syllabuses for technical training and to draw up all India schemes for the award of diplomas and certificates by the Council Directives were also given to the Board by the Council regarding the standards for the national diploma and the national certificate courses and also generally with regard to the nature of the courses

At the instance of the Council, a Joint Committee of the Inter University Board and the Council has been set up to review the standards of education in the Universities and this Committee, after taking into account the courses drawn up by the Boards of Studies of the Council as also by the various Universities, has formulated a scheme of training in engineering and technology

According to the scheme formulated by the Co ordinating Committee the All India Council has a number of responsibilities such as the co ordination and ensuring of standards in various technical institutions recognition of technical institutions conducting or recognising examinations for the purpose of conferment of awards making arrangements for teaching of technical and allied subjects and for research in these subjects

MEMBERS

Chairman, Maulana Abul Kalam Azad, Minister for Education

Secretary G K Chandramani, Dy Educational Adviser

Representatives of Govt of India

Dr S S Bhatnagar (Ministry of Education), Brigadier Reeve (Ministry of Defence) L U Damodaran (Ministry of Labour) Dr H J Bhabha (Ministry of Natural Resources and Scientific Research), V T Krishnamachari (Planning Commission), S Boothalingam (Ministry of Commerce and Industry) Representative of the Ministry of Finance

SCALES OF PAY

Here are tables of scales of pay sanctioned in Government Schools by the Central Government

PRIMARY SCHOOLS

Post	Prescribed Scale	Minimum Qualifications.	Remarks
Headmaster	Grade pay plus S P Rs 15	Matric Trained *	Minimum from 1st April 1950
Teachers	68-4-120-E B 5-170	Matric Trained	
	68-4 120-E B -5-170	Middle S V & V T C if in Ajmer	Temporary relaxation for existing employees
	55 3-85 E B -4 125 5 130	Untrained Matric Middle J Vs	
	50 2 60-3 90	Lower than Middle J Vs	
	35 1 40-2 60	Non Matric Untrained	Minimum from 1st April 1950

MIDDLE SCHOOLS

Post	Proposed Scale	Minimum Qualifications	Remarks
1	2	3	4
Non Language teachers and English teachers	100-5 150-E B 8-190-10-250	Trained (J A V, S.A V, or B T) graduate teachers	Minimum from 1st April 1950.
		Untrained graduate teachers with 5 years' experience	
		Intermediate plus S A V	
	80-5 120-E B -8-200-10/2 220	Untrained graduate teachers with less than 5 years' experience	Temporary relaxation for existing employees
	68 4 120-E B -5-170	Matric plus S V or J A V or V T C of Ajmer	
	68-4-120-E B 5 170	Middle S V (or V T C in Ajmer)	
Headmaster	Grade pay plus S P Rs 40/- for classes 1-8 Grade pay plus S P Rs 25/- for classes 6—8	Trained graduate	Minimum from 1st April 1950

*Non-Matric J V H Ms who held their posts as Headmasters substantively on the date of election of the revised scales will also as a special grade be given the scale of pay of Rs 68-4 120 E B -5-170 as personal to them.

PUBLIC HEALTH

PUBLIC health is a State subject

The Central Ministry of Public Health administers quarantine in ports, controls quality of imported drugs, and promotes research It also gives advice, collects information and acts as a co ordinating and liaison agency The department which deals with public health under the Central Government is called Directorate General of Health Services

The main facts (based on Government reports) are given below

About 3,80,000 persons are engaged in medical and health services in the country as a whole Out of this 2,30,000 live in towns and 1,50,000 live in villages These may be divided as follows*

Registered medical practitioners (91,930), Vaids, hakims and those not registered (96,147), Compounders (38 407), Nurses (31,517), Mid wives (23 938), Vaccinators (5,928), Dentists (3,283), Others engaged in hospitals and private establishments rendering medical or health services but not including scavengers or sanitary staff (72,970)

Number of hospitals, 8,601 (1951), no of beds, 1,13,557 (1951), no of nursing homes, 500 (1952), no of medical colleges (including 3 dental colleges, 3 nursing, one pharmacy), 34 (1952), no of colleges for indigenous systems, 50 (1952), no of special institutions (*e g*, radiological) conducted by private agencies, 195, no of maternity and child welfare centres (urban) 684 (rural) 418 (1947), no of trained visitors (urban) 231, (rural) 136 (1947), no of trained midwives (urban) 922, (rural) 255 (1947), no of trained *dais* (urban) 1,264, (rural) 1,387 (1947)

The position in relation to health services (1947) in urban areas is as follows —

Number of medical health officers, whole-time, 164, part time, 23, no of medical licentiates, whole time, 137, part time, 6, no of sanitary and health inspectors, 1,194, no of vaccinators (male) 809, female 55, no of inspectors of vaccination, 60, no of school medical officers, 60, other health staff, 1,294

The position in relation to health services in 1947 in rural areas was as follows

Number of medical health officers, whole time, 132, part-time, 4, no of medical licentiates, whole-time, 194, part-time, 2, epidemic staff 832, no of sanitary and health inspectors, 1,367, no of vaccinators, male 4,081, female, 73 no of school medical officers, 29, other health staff, 1,466

VITAL STATISTICS

The registered birth rates, death rates and infant mortality rates are given below

—	Birth rate	Death rate	Infant Mortality rate
1921	32	31	198
1930	33	25	189
1940	33	22	160
1947	26 6	19 7	146
1948	25 4	17 1	130 9
1949	26 7	16 0	123
1950	24 8	16 0	127

The infant mortality rates in some of the Indian cities are given below They are much higher than the rate for the country

Name of the city	1948	1949	1950
Ahmedabad	203 3	244 5	189 8
Bombay	165 8	174 2	143 5
Calcutta	258 7	165 7	Not available
Delhi	115 5	107 7	103 4
Lucknow	155 4	143 3	160 0
Madras	156 7	158 6	187 7
Nagpur	305 9	216 1	226 9

The following paragraph gives the maternal death rate (deaths per 1,000 of live and still-births) for 1947 in some major towns in India

Ahmedabad, 5 3, Bombay, 2 0 Calcutta, 4 7, Delhi Cantonment, 2 8, Delhi City 4 6, Lucknow, 4 6, Madras, 3 8, Nagpur, 10 6

TROPICAL DISEASES

The following table gives the death rate (number of deaths for every 1,000 of the population) for a number of States The year for which the figures are given is 1947

State	Cholera	Small pox	Plague	Fever.	Dysentery and Diarrhœa	Respiratory Diseases	All other causes	Total
Assam	0 2	0 06		5 2	0 5	0 4	2 0	8 4
Bihar	1 2	0 2	0 06	10 4	0 08	0 06	1 7	13 8
Bombay	0 2	0 1	0 06	7 9	0 8	4 3	8 5	21 9
M P	0 6	0 2	0 2	17 6	1 4	2 0	7 6	29 5
Madras	0 5	0 06	0 02	4 4	1 1	1 8	10 5	18 3
Orissa	0 8	0 2		13 7	1 6	0 6	6 5	23 5
Punjab	0 1	0 1	0 01	10 0	0 3	1 5	2 1	14 2
U P	0 9	0 2	0 2	10 5	0 3	0 5	1 4	14 0
West Bengal	0 6	0 4		8 6	1 1	1 6	4 9	17 1
Ajmer	0 1	0 3		13 4	0 5	1 2	1 9	17 4
Coorg		0 03		9 0	0 2	0 3	2 8	12 3
Delhi	0 0	0 07		2 3	1 1	2 6	5 7	11 7

In 1947 as many as 1,066,269 persons died of malaria (996,176 in rural areas) About 20 lakh persons suffer from tuberculosis and about *5 lakhs die annually* During 1947 as many as 371,045 died of respiratory diseases and 47,639 of pulmonary tuberculosis in Part A States and the Part C States of Ajmeri Coorg and Delhi

Plague —States which may be said to have a serious plague problem are U P, Bihar and Madhya Pradesh The number of deaths from plague in some States are as follows —

State	1946	1947	1948	1949	1950
U P	18,206	51,455	13,722	Not available	Not available
Bihar	8,689	13,204	Not available	,, ,,	,, ,,
M P		2,902	2,860	3,475	5,568
Madras				150	Not available
Punjab		1,905	211	241	,, ,,

Cholera —The total number of deaths from cholera are as follows 1940—86,133, 1941—228,141, 1942—218,489, 1943—459,829, 1944—294,191, 1945—278,309, 1948—162,870, 1949—74,326

Leprosy.—States in which leprosy is most prevalent are Assam, Bihar, Hyderabad, Madhya Pradesh, Madras, Orissa, West Bengal, Travancore-Cochin It is estimated that there are about 12 lakh lepers in the country, about three fourths of the cases being of the mild type and non-infective

Malaria.—It is estimated that there are at least 100 million people suffering from malaria at any time in the country, and that out of 8 million deaths in a year at least 2 million are caused directly or indirectly by malaria The number of deaths for 1947 was 1,066,269 Out of these 996,176 were in the rural areas

The number of persons, treated in hospitals and dispensaries and (in brackets) of those who died in hospital are given below The year for which the figures are quoted is 1948

Animal parasites—287,926 (49), Beri beri—34,689 (41), Cholera—47,659 (6,172), Digestive diseases—3,270,402 (1,338), Diarrhœa—1,574,088 (2,914), Dysentery—1,220,814 (2,639), Dyspepsia—165,998 (20), Ear diseases—2,802,372 (47), Eye diseases—4,105,411 (84), Gonorrhœa—248,222 (42), Injuries—2 614 952 (6,773), Labour (abnormal)—40,531 (1 808), Labour (normal)—210,652 (604), Liver abscess —17,470 (274), Liver diseases (other than abscess)—221,208 (1,184), Malaria—8 065,038 (1,823), Nervous diseases—1,090,822 (1 855), Respiratory diseases (except pneumonia and lung tuberculosis)—3,812,759 (1,741), Rheumatic fever and rheumatism—299 027 (50), Skin diseases—2,659,882 (221), Small pox—5 638 (388), Syphilis—282,315 (301), Tuberculosis of the lung—200,960 (4,048) Tuberculosis, other than of lung—79,917 (1,020), Ulcers—3,113,410 (678)

INSTITUTIONS

A Central Council of Health has been constituted with the Union Health Minister as chairman and State Health Ministers as members The Deputy Director General of Health Services is the Secretary

The All India Council of Post graduate Medical Education prescribes standards for post graduate medical education

The body in charge of research is the Indian Council of Medical Research The following institutes and laboratories may be mentioned

Malaria Institute of India (New Delhi), All-India Institute of Hygiene and Public Health (Calcutta), Cancer Research Centre (Tata

* Exclusive of five districts in Bihar (Monghyr, Bhagalpur, Saharsa, Purnea, Santhal Parganas) Also see under "Population"

Memorial Hospital (Bombay), Tuberculosis Institute (Delhi University), Central Drugs Research Institute (Lucknow) Virus Research Centre (Poona), Rabies Research Centre (Kasauli), Central Institute for Research in Indigenous Medicine (Jamnagar)

The chest Institute of Delhi University may also be mentioned here

The laboratories are B C G Vaccine Laboratory ((Guindy Madras), Central Drugs Laboratory (Calcutta), Serologist Laboratory (Calcutta), Central Research Institute (Kasauli)

There are four main medical depots—one each at Bombay, Calcutta Kamal and Madras The depots at Bombay and Madras have factories attached to them

Among important Acts in force are Vaccination Act, Drugs Act of 1940, Drugs Rules of 1945 Then there are the Indian Medical Council Act, the Nursing Act of 1947, the Dentist Act the Pharmacy Act

The following medical bodies are in existence The Indian Medical Council, the Nursing Council, the Dental Council the Pharmacy Council

CONTROL OF DISEASES

Steps are being taken to control a number of diseases that are rampant

For malaria, there are four control schemes in Terai (U P), Jaipur Hill Tracts (Orissa) Malnad (Mysore), Tirnad (Madras) The cost of each scheme is shared by the Central Government the State Government, the WHO and the UNICEF The *Malaria* Institute is also engaged in malaria control work with the assistance of the Indo American Fund (Point Four Programme) The Technical Assistance Authority has offered DDT, vehicles and spraying equipment

A number of bodies are fighting to control leprosy—Mission to Lepers Hind Kushta Nivaran Sangh (formerly Indian Council of the British Empire Leprosy Relief Association) Gandhi Memorial Leprosy Foundation Kasturba Gandhi Trust, Maharogi Sewa Mandal

The Mission runs 50 leper homes with about 10,000 inmates and gets a grant from State Governments

The Sangh has as its president the President of the Indian Republic It carries on research work at the School of Tropical Medicine at Calcutta, conducts courses in post graduate training in leprosy, undertakes surveys

The mainstay in the treatment of leprosy has been injections of chaulmoogra (hydnocarpus) oil or its preparations Recently encouraging results have been reported by the use of certain sulphone drugs such as Promine and Diasone

The Sir Profulla Chandra Research Laboratory and the connected Bengal Chemical and Pharmaceutical Works Ltd Calcutta have commenced production of an anti leprosy drug called Novotrone Both the mother sulphone (Diamino Diphenyl Sulphone) called Novophone and a soluble derivative called 'Novotrone', which is of the same composition of the well known compound Sulphetrone prepared by Burroughs Welcome & Co, London are being manufactured

The only sure method of preventing contact with infective cases is the isolation of cases in leprosy hospitals, sanatoria or colonies There are in all about 129 colonies homes asylums and hospitals for the treatment of leprosy patients and the number of beds provided is estimated at 17,000

Treatment in out patient leprosy clinics is also available in various parts of India The number of such clinics is approximately 1,000 and the total number of cases taking treatment therein is roughly 60,000 per year

As for tuberculosis, about 100 anti T B teams are working in the country By the end of July 1953 about 16 million persons were tested and five and a half million persons were vaccinated with B C G The serum is now manufactured at Guindy in Madras There are three centres at Delhi Patna and Trivandrum for studying the incidence and spread of the disease, while at Delhi University there is a T B Institute

The maternal and child mortality as already indicated is high—the maternity death rate is about 20 and infant mortality about 130

In all States welfare activities are in progress There are posts of maternity and child welfare officers in Madras West Bengal, Orissa, Assam Delhi, U P, Punjab Madhya Pradesh and Hyderabad The Government of India has an officer in the Directorate-General of Health Services who gives special attention to maternity and child welfare problems In Bihar work is done by the Bihar Maternity and Child Welfare Society and in Bombay the Bombay Mothers and Children's Welfare Society There is a model demonstration centre at Najafgarh near Delhi

Non official bodies engaged in welfare work are the Association of Medical Aid to Women by Women and the Indian Red Cross which has a special bureau The Bureau administers the funds of the Victoria Memorial Scholarships which amount to six and a half lakhs The income is expended as grants in aids to training schemes for rural midwives

DEFECTIVES

The last census of handicapped persons (blind deaf crippled mentally retarded etc) took place in 1931 These put the number of blind at about 600 000 and the number of deaf and hard of hearing at 700 000

It is estimated that today the total number of blind is about 1,800 000 and the deaf about 600 000

There is a Training Centre for the Adult Blind at Dehra Dun to impart vocational training There is also a common Braille code for Indian languages known as Bharati Braille A central Braille Printing Press has been established at Dehra Dun It has already published several Braille books in Hindi

There is a journal called *Deepanjali* devoted to the welfare of the blind Its opposite number for the deaf is called *The Deaf in India* For training deaf and dumb children the Lady Noyce School for the Deaf and Dumb in New Delhi has been provincialized The Children's Aid Society Home at New Delhi which has also been provincialized takes care of neglected and destitute children

The number of mental cases is about one million mental defectives one and a half million of psycho neurotics about three million

At present there are 32 mental hospitals with accommodation for about 10 500 patients One of these in Madras is reserved for criminal lunatics only

The Mysore Government Mental Hospital at Bangalore and the Hospital for Mental Diseases at Ranchi are the ones which are best equipped

The following is a list of mental hospitals in India

Mental Hospital Tezpur, Inter Provincial Mental Hospital Kanke, Ranchi Indian Mental Hospital Kanke, Ranchi, N M Mental Hospital Thana (Bombay), Mental Hospital Ratnagiri (Bombay), Central Mental Hospital Yeravda Mental Hospital Ahmedabad, Mental Hospital Dharwar, Mental Hospital Baroda Mental Hospital, Nagpur, Government Mental Hospital Madras Government Mental Hospital Waltair Government Mental Hospital Kozhikode Punjab Mental Hospital, Amritsar Mental Hospital Agra Mental Hospital Bareilly, Mental Hospital Banaras Mental Hospital Mankunda Calcutta, Lumbini Park Mental Hospital P O Ishapi, 24 Parganas Bangi Manmad Ashram, 29 A Vivekananda Road, Dum Dum Mental Observation Ward, Bhawanipur, Calcutta, Mental Hospital, Lahia, Mental Hospital Srinagar, Mental Hospital Lashkar Mental Hospital Bonganga, Indore, Mental Hospital Bangalore, Mental Hospital, Jaipur, Mental Hospital Jodhpur, Mental Hospital Udaipur Mental Hospital Bhavnagar Mental Hospital, Trivandrum, Mental Hospital, Trichur

BHORE COMMITTEE'S PLAN

The key report for public health is the one submitted by the Health Survey and Development Committee appointed by the Government of India in October, 1943 under the chairmanship of Sir Joseph Bhore The Committee was to make a survey of existing health conditions in the sub continent and to formulate plans for future health development

In putting forward its recommendations the Committee kept in view a scheme, which when fully developed should provide each individual in the country with adequate medical curative and preventive, irrespective of his ability to pay for such services

The scheme visualized by the Committee is as follows

The district health organisation will have as its smallest unit of administration a primary unit which will normally serve a population of 10 000 to 20 000 About 10 to 20 such primary units will together constitute a secondary unit and a varying number of the latter (3 to 5) will form the district health unit the designation suggested by the Committee for the district health organisation

At each of the headquarters of the district, secondary and primary health units will be established a Health Centre from which will radiate the different forms of health activity into the territory covered by each type of unit The provision made for medical relief and preventive health work at each of these Health Centres will increase in scope and efficiency from the primary unit to the district health unit

The District Health Centre will possess general and special hospitals with a total bed strength of about 200 and all the consultant and laboratory services required for the diagnosis and treatment of disease on up to date lines The Secondary Health Centre will have a hospital with 600 beds and the primary unit headquarters a 75 bed hospital

A system of ambulances and telephone connections between these three types of hospitals will help to promote the fullest utilization of the higher types of service available at the larger institutions by the people living in the remoter parts of the district

These hospitals will also take an active part in the preventive health campaign They will be linked with the field health organisations in respect of such services as those for tuberculosis, for mothers and children or for venereal diseases

The Committee made it plain that no health development plan could produce adequate results unless sufficient measures were taken for the provision of a healthy environment for community life, such as safe water supply, hygienic houses, a satisfactory system of conservancy and proper supervision over the production, distribution and sale of food intended for public consumption Specific recommendations were put forward in respect of these

In order to secure the active support of the people, the establishment of a Health Committee in every village was recommended

FIVE-YEAR PLAN

Total allotment—Rs 99 5 crores

It is proposed that the country should have one doctor for every 2,000 persons, one nurse for 500 one midwife for 4,000

The schemes envisaged provision of water supply and drainage, control of malaria, care of health of the rural population through health and mobile units, health services for women and children, training of more doctors and nurses, research in indigenous systems of medicine, setting up of one factory for the manufacture of anti biotics, and two for the manufacture of D D T

Allotment for 125 malaria control teams —Rs 15 crores

Research in indigenous medicine—Rs 37 5 lakhs

SOCIAL WORK IN INDIA

THE period under foreign rule witnessed a destruction of the older social structure in India In the newer structure that emerged a number of reforms and institutions were introduced by bodies like the Brambo Samaj the Prarthana Samaj, the Ramkrishna Mission and the Arya Samaj Though these organisations were in the nature of religious orders they took it as a part of their faith to serve the needy and the suffering The Arya Samaj and the Ramkrishna Mission sponsored social reforms established orphanages widows homes free dispensaries and relief centres in periods of emergency

During this period pioneering work in many neglected fields of service *e g* founding homes, leper asylums and institutions for the maimed and the handicapped, was undertaken by Christian missionaries in the country

By 1920 Mahatma Gandhi's contribution began to gain recognition throughout the country He provided for a number of constructive social welfare programmes through organisations like the Harijan Sewak Sangh All India Village Industries Association Charkha Sangh the Hindustani Talimi Sangh Goseva Sangh and the Kasturba Gandhi National Memorial Trust, etc

The late 30s saw the formation of the first popular Ministries in eleven provinces in India During the same period professional social work began to be recognised with the starting of the Sir Dorabji Tata Graduate School of Social Work in the year 1936

The new profession generally covers the following fields of social work Community Welfare Services Family, Child and Youth Welfare Service Public Welfare Administration, Social Security Services Services for the mal adjusted and handicapped groups, Social Defence and Correctional Administration Services for Emergency Relief and Rehabilitation Social Legislation and Social Action, Social Research Training in Social Work

The attitude of the Indian Government towards State responsibility for social welfare is reflected in Part IV of the Constitution which lays down the Directive Principles of State Policy , as follows –

The State shall strive to promote the welfare of the people by securing and protecting as effectively as it may, a social order in which justice, social, economic, and political, shall inform all the institutions of the national life

SOCIAL LEGISLATION

Social legislation on an all India scale dates back to 1843 when the first law abolishing slavery was passed The earlier laws sought to reform the evil social practices existing at the time, practices such as *Sati* infanticide, and child marriage Later, social legislation began to assume a more positive and constructive role Laws for better working conditions in factories, laws providing maternity benefits for the abolition of traffic in women and children and laws for the protection and care of destitute and delinquent children have all received attention in the first half of this century

The post-independence years have seen an unprecedented increase in social legislation Among the laws framed by the Government have been the Industrial Disputes Act, 1947, the Factories Act (revised), the Coal Mines Provident Fund and Bonus Scheme Act, the Minimum Wages Act, the Employees State Insurance Act of 1948 , the Plantation Labour Act, 1951 the Mines Act and the Provident Fund Act, 1952 The Hindu Code Bill seeks to deal with the questions of marriage divorce, inheritance by women etc

In India, the Central Government does not have a special Ministry or department for social welfare The Ministries of Health, Education, Labour and Agriculture undertake several important social services

A Planning Commission was set up in March 1950 by the Government of India and was entrusted with the overall assessment of resources and planning for economic and social welfare Chapter XXXVI of the Planning Commission's Report outlines an approach to matters of social welfare in India

There is no system of giving cash relief in India that corresponds to the programmes of Public Assistance of various countries

The Employees State Insurance Act when fully implemented will benefit three million industrial workers in the country in the matter of injury, ill health, etc

The Employees Provident Fund Bill was passed early in 1952 This measure covers 1 6 million industrial workers

Matters regarding health services have been covered in detail by the Bhore Committee Report those concerning Labour are dealt with under a separate section in this book

The question of traffic in women and children has received the attention of the Government but in the absence of adequate legislation and rehabilitation services an abolitionist policy has not been enforced on a country wide basis Some of the larger cities have programmes dealing with prostitution to private agencies Those co operating with the Government in this work are given government grants in aid The work of the Vigilance Association of Madras and Bombay is an example of the co operative effort of Government and voluntary agencies

Minimum standards for conditions in prisons are not laid down for the country as a whole However in 1952 an All Indian Conference of the Inspectors General of Prisons was convened in Bombay under the Chairmanship of Dr W C Reckless a U N Expert on Criminology and Correctional Administration The Conference has made several important recommendations in regard to the revision of the Jail Manuals In this connection, certain important recommendations have also been made by the Planning Commission

The Ministry of Education of the Central Government has recently sought to formulate a co ordinated programme to tackle juvenile delinquency The plan is to include Juvenile Courts, Remand Homes, Schools and a probation and parole system A Children's Act to be applied to centrally administered part C States is on the anvil

An All India Society for the Prevention and Treatment of Crime was established in 1950 with Lucknow as its headquarters

The average annual expenditure visualised in the First Five Year Plan under social education is of the order of Rs 3 02 crores The All India Adult Education Association is the Central Co ordinating agency in this field

Anti beggary acts have been passed in Madras, Uttar Pradesh Hyderabad Travancore Cochin West Bengal, Mysore, Madhya Pradesh, and the Punjab Institutional care for beggars is provided in a few of the States to a very meagre extent

The Government of India are keenly aware of the special difficulties and problems of the 19 million tribal people in India In accordance with the Constitution, a Special Officer for Scheduled Castes and Tribes has been appointed by the President For an interim period of ten years special reservations in the legislature and the services have been made for members of Scheduled Castes and Tribes An expert committee of the Indian Conference of Social Work published a memorandum in 1952 making several recommendations on Tribal Welfare The Backward Class Commission appointed in 1953 is to prepare the schedule and a sum of Rs 28 9 crores has been provided in the Plan for the amelioration of the Scheduled Castes and Tribes

Rural reconstruction work has been entrusted to the State governments Notable among these projects is the U P Government rural development programme in Etawah and another in Sholapur in Bombay State A rural Firka Development project is under way in Madras The Governments of Assam and Bombay have also implemented rural reconstruction schemes

The Central Government Ministry of Education opened a Rural Janata College near Delhi, this is an experiment in acquainting rural workers with newer techniques and methods of work in consonance with the particular local setting The Kasturba Gandhi National Memorial Trust has a country wide network of women and child welfare centres in the rural areas which comprised over 18 training centres, 57 medical centres and 200 rural welfare centres

The Social Welfare section of the Planning Commission and the Central Social Welfare Board proposed under the Plan are expected to meet the need for research and furnish information to some extent A provision of Rs 50 lakhs has been made in the Plan for research and investigations relating to social economic and administrative problems of national development amongst the voluntary organisations The Indian Conference of Social Work seeks to fulfil this need

The following tables quoted from "An Essay on National Income and Expenditure in India by Dr B Natarajan of Madras illustrates the budgetary provisions in Part A States in regard to social services

State	1938-39			1949-50			Increase in No of times	
	Amount (000)	Per cent to total	Per Capita	Amount (000)	Per cent to total	Per Capita	Amount	Per Capita

VOLUNTARY SOCIAL WORK

The groups of voluntary social work in India largely fall under the following heads State Administrators and officials, Trained or Professional social workers, Missionaries, The Gandhian social workers, and Voluntary social workers belonging to the various private agencies

Of these the religious believe in the traditional form of charity, the Missionaries in institutionalised social work, the Gandhian in the 14-point constructive programme, and the other voluntary workers in secular service on humanitarian grounds

The group of professionally trained social workers is small though more compact This group consists of some 500 alumni and teachers of the four post graduate schools of social work in India, viz, The Tata Institute of Social Sciences in Bombay, Delhi University School of Social Work, the Faculty of Social Work of the M S University of Baroda and the section on Social Sciences in Shri Kashi Vidyapeeth, Banaras In the last mentioned institute the medium of instruction is Hindi

The establishment of the Indian Conference of Social Work at a meeting of over 450 social workers assembled in Bombay in November 1947 marks a significant development in the field of social work in India The Conference undertakes and promotes the study of social problems and endeavours to foster co operation, collaboration and co-ordination amongst social service agencies in India and abroad

Other All India social service bodies working are mentioned below —

Child Welfare

Balkan ji Bari (Gulistan ', Khar, Bombay 21) Society for the Protection of Children in India (2 B, Camac Street, Calcutta), Indian Council for Child Welfare, 5, Sikhandra Road, New Delhi

Social Defence

All India Crime Prevention Society (Behari Niwas, Kanpur, U P), Association for Moral and Social Hygiene in India (Room No 212, ' P Block, Raisina Road, New Delhi)

The national organization for the co ordination of welfare services is the Indian Conference of Social Work located at 6/A, Cooperage, Bombay 1

There is also a South-East Asia Regional Office of the International Conference of Social Work which has been established in conjunction with the Indian Conference of Social Work in Bombay

The Government of India have given evidence of their interest in social work by setting up in the Planning Commission a special section for social services In 1950 the Ministry of Education, Government of India, appointed an All India Social Welfare Advisory Board to give advice on important matters pertaining to *social welfare work in the country*

In March 1953 an All India Conference for the improvement of the conditions of the former Criminal Tribes was held in New Delhi, the Central Government announced a grant of Rs 30 lakhs for this work

Towards the work of Child Welfare the *UNICEF* voted a grant of 1,370 000 dollars to India The total allocation to India amounts to 8½ million dollars

The Ford Foundation have established 34 training centres for the multi purpose village level workers

In the field of training in social work, the Government of India set up a committee for standardisation of courses in social work at the post-graduate level This was followed up by the Indian Conference of Social Work which appointed a Committee representative of the four post-graduate schools of social work and a few prominent voluntary workers to recommend courses in social work to suit the needs of the country at different levels and different settings

The following institutions already afford training at the post-graduate level —

1 The Tata Institute of Social Sciences (105 9, Ghodbunder Road, Andheri, Bombay)
2 The Delhi School of Social Work (8, University Road, Delhi 8)
3 The Faculty of Social Work (The M S. University of Baroda, Baroda)
4 The Institute of Social Sciences (Shri Kashi Vidyapeeth, Banaras Cantt, U P)

GOVERNMENT GRANTS

Grants totalling Rs 8,60 000 have been approved by the Central Social Welfare Board to 239 institutions all over India as the first instalment of assistance which the Board proposes to provide to voluntary welfare organisations in the country

Grants have been made for different types of social welfare work, including welfare of women and children, of deliquents and the physically and mentally handicapped and for general welfare activities

Out of the Rs 8 60,000 approved by the Board, Rs 2 08,000 has gone to 60 institutions for the welfare of handicapped and delinquent children, Rs two lakhs to 57 institutions for the welfare of women, Rs 58 000 to 47 institutions for the welfare of children and the balance of Rs 2 94,000 to 75 institutions carrying on general welfare activities

In making the grants, the Board has emphasised that the assistance is mainly intended for the improvement and expansion of welfare activities They are being made for programmes extending over a period of one year

For future years, grants will depend upon applications received on satisfactory reports from institutions which have already received aid

In considering applications for assistance the Board has been guided by certain general principles, namely

A Direct assistance to programmes of welfare should receive maximum attention,

B Care should be taken to see that all parts of the country are properly served and underdeveloped areas are brought to a level, as far as possible, with the rest of the country,

C Grants should normally be made on a matching basis, that is, on condition that the grant sanctioned by the Board will not be available unless the applicant organisation manages to raise a certain percentage from other sources, and

D In sanctioning grants, the Board should pay due regard to the nature and scope of the programmes, the problems to be tackled, the nature and extent of participants to and beneficieries of the programme, the extent and sources of existing income and the development potential of the organisation and its programme

*

WOMEN'S MOVEMENT

ALL-INDIA CONFERENCE FOR WOMEN

Address No 6, South Avenue, *Delhi*

Office Bearers (1953 1955)

President Renuka Ray

Vice Presidents Luxmi Menon, Indirabai Holkar, Raksha Saran, K Kuppuswamy, Kitty Shiva Rao, Mithan Lam

Hon Gen Secretary Indira Maydeo (759/31, Deccan Gymkhana, Gopikashram, Poona 4)

Hon Treasurer Mrs M S H Jhabwala

There are branches in

Ajmere, Andhra, Assam, Baroda, Bengal Central, Bengal West, Berar, Bhavnagar, Bhopal, Bihar, Bombay, Calcutta, M P North, M P South, Cochin, Delhi, Gujarat, Gwalior, Hyderabad, Indore, Jath, Junagadh, Karnatak, Kolhapur Konkan Madras, Maharashtra, Malabar, Mysore, Orissa, Phaltan, East Punjab, Rajasthan, Sangli, Tamilnad, U P Agra, U P Oudh

SIR RATAN TATA INDUSTRIAL INSTITUTE

Address Hughes Road, Bombay 7

Office bearers

President Lady Nawajbai Ratan Tata

Vice President Lady Jerbai S Billimoria

Hon Gen Secy Mrs Dinbai S Patak

Hon Treasurer Miss Manijeh S Captain

The Sir Ratan Tata Industrial Institute, founded in 1928 by the Trustees of Sir Ratan Tata, is a unique centre raised to the memory of an illustrious member of the famous House of Tata

For 25 years, this Institute has helped to partially solve the problem of poverty and distress among Parsi families from the lower income groups by encouraging girls and women to earn a living through suitable industries

The average number of women employed during 1953 was 197, the wages paid Rs 1,03,857

The amenities provided were towards meals, Rs 27,741, towards conveyance, Rs 3,117, bonus, Rs 14,889, prizes, Rs 910

The departments run by the Institute are Catering, confectionery, laundry, dyeing, hand embroidery, machine embroidery, dress making and sewing

HINDU LAW REFORM

A short note on Hindu Law reform is in order as it concerns the welfare of the women of this country

As a result of increasing consciousness on the part of Indian women of their social and political status, there has in recent years been a move to revise and codify the somewhat vague and contradictory law governing the Hindu home, especially as it affects marriage, divorce, succession to property, etc

In 1937 the Indian Legislature enacted the Hindu Women's Rights to Property Act This Act, for the first time, gave to Hindu widows a right to claim a share in the husband's property and demand partition

Four years later the Government of India set up a Committee to overhaul and codify the Hindu Law This Committee which is known as the Rau Committee, drafted two bills dealing with Hindu intestate succession and Hindu marriage

When the measures came up for consideration by the two Houses of the Central Legislature, a joint committee of the Houses recommended the revival of the Rau Committee with a view to the codification of the entire Hindu Law Consequently the Rau Committee was revived early in 1944 During 1944-45, the Committee made a tour of the country and elicited public opinion on the proposals embodied in the two measures and on the codification of the Hindu Law as a whole They gathered evidence from leading lawyers and representative organisations of various shades of Hindu opinion on a draft Hindu Code prepared by them

During the last five years, the Central and the Provincial Legislatures passed various Acts which aimed at improving the condition of Hindu women

The Hindu Marriage Disabilities Removal Act of 1946 legalises marriages between Hindus belonging to the same Gotra or Pravara

The Hindu Married Women's Right to separate residence and maintenance Act of 1946 enables a married Hindu woman to claim from her husband separate residence and maintenance on certain grounds

The Hindu Marriage Validating Act, 1949 removes the caste barriers from the sphere of marriages and validates even the Pratiloma marriages

The Child Marriage Restraint (Amendment) Act of 1949 raises the marriage age of girls from 14 to 15 years

In the State of Bombay, monogamy is made a rule by the Prevention of Hindu Bigamous Marriage Act of 1946 and dissolution of marriages by divorce is allowed under certain conditions by the Bombay Hindu Divorce Act of 1947

The Madras Legislature passed the Madras Devadasis (Prevention of Dedication) Act in 1947 This Act puts an end to the unhealthy practice of dedicating Hindu women as devadasis to Hindu deities

Bombay Hindu Women's Right to Property Act (Extension to Agricultural Land) extends the application of the Hindu Women's Right to Property Act, 1938 to agricultural land also A similar law has been passed in Madras

Though the Hindu Code Bill has been dropped, the Government of India have introduced in Parliament Bills affecting Hindu Law

The special Marriage Bill of 1951 seeks to replace the Special Marriage Act of 1872, with a view to removing certain defects in the Act

The Hindu Marriage and Divorce Bill of 1952 aims at laying down a uniform law regarding marriage and divorce for all Hindus

The Hindu Minority and Guardianship Bill of 1953 seeks to regularise the law regarding guardianship

A private member of Parliament has introduced in the House a bill aiming at the abolition of the dowry system

The Government of Bombay have introduced a Bill in the Legislative Assembly, providing for registration of marriages

In the state of Madras, there is an Act preventing bigamous marriages and providing for divorce The Act is called The Madras Hindu (Bigamy Prevention and Divorce) Act

A bill has also been introduced in the Legislative Assembly of Madhya Pradesh, aiming at preventing bigamous marriages

THE CO-OPERATIVE MOVEMENT

THERE were 181,189 societies of all types at the end of 1950 51 as against 173,094 societies at the end of 1949 50 In the same period, the membership of primary societies rose from 12 6 million to 13 7 million covering 19 1 per cent of the population The total working capital of all types of societies showed a sizable increase from Rs 233 10 crores to Rs 275 85 crores

There has been a marked increase in the loans advanced by Primary societies, from Rs 60 88 crores to Rs 72 08 crores in Part 'A' States and from Rs 10 49 crores to Rs 11 78 crores in Part 'B States mainly because of the large funds made available by the Reserve Bank Overdues showed a downward trend from 12 6 per cent at the close of 1948 49 and 12 5 per cent at the end of 1949 50 to 11 7 per cent at the close of 1950 51 Still overdues were heavy in Bhopal (99 5%), Manipur (61%), Vindhya Pradesh (54 7%) and Jammu and Kashmir (45%)

At the apex level the increased demand for funds was met out of increased borrowings from the Reserve Bank, Governments and commercial banks which in all amounted to Rs 8 34 crores as against Rs 5 32 crores in the previous year

The year also saw the establishment of an apex bank in Vindhya Pradesh

Individual support to co operative institutions was perceptible in the case of central banks which derived 67 per cent of their deposit from individuals and other sources excluding co operatives

A feature of primary agricultural credit societies was the fall in their number and the rise in their membership

Overdues also showed a rise but were heavier in Bhopal (99 6%), Vindhya Pradesh (58%) West Bengal (57 2%), Jammu and Kashmir (54 5%), and Assam (46 5%)

Out of their total advances of Rs 29 13 crores, Rs 16 84 crores were accounted for by societies in Madras and Bombay

The composition of working capital revealed a high degree of dependence of primaries on central financing agencies, owned funds and deposits representing 42 per cent and 11 per cent of the working capital

In some cases the rates of interest are as high as 15 per cent (as in Uttar Pradesh and Bihar)

Co operative Societies in the long term credit sector are most unevenly distributed among different States More than one half of the States, including many Part B and C States have no land mortgage banks at all And out of a total of 286 primary land mortgage banks for the whole country as many as 129 are in Madras alone Again out of Rs 133 lakhs lent in 1950 51 by central land mortgage banks, 62 per cent was attributable to the Madras Central Land Mortgage Bank alone

Agricultural non credit co operatives had a fairly successful record at the primary level The composition of the working capital of non agricultural credit societies which amounted to Rs 56 78 crores showed a large element of deposits (61 8%) Owned funds were the next largest (30 8%) and loans were only 7 4 per cent

During 1950 51, 3,187 societies were brought under liquidation, while liquidation proceedings came to a close in respect of 4,215 societies

On June 30, 1951 as many as 8,819 societies were under liquidation With liabilities amounting to Rs 217 68 lakhs and assets amounting to Rs 211 7 lakhs The year, however, witnessed an increase in profits of as much as 72 per cent over the previous year

Commenting on the position, the Reserve Bank of India observes "The Co operative movement is not evenly spread nor is it of the same texture and quality everywhere In some States, there is no State Co operative Bank at all, in others considerable re organisation of the apex bank is necessary before it can function efficiently, or again the central or district banks happen to be weak links in the chain In almost all cases of undeveloped areas the primary credit structure is not satisfactory

There are provincial Co operative Institutes in many States These are affiliated to the Indian Co operative Union which in its turn is affiliated to the International Co operative Alliance

The Bombay Institute maintains a Co operative Training College in Poona and regional co operative schools and arranges training classes To the Training College are admitted students from all over India under a training scheme of the Reserve Bank

The movement in each State is administered by the Registrar, who looks to audit and supervision There is however a tendency now to delegate powers of audit to federal organizations Part of supervision is done by Taluka unions

MAIN FACTS

The main position as at the end of 1951 is as follows

Total number of Co operative societies, 181,189 the total number of agricultural societies, 149 568, non agricultural societies, 28,328

If we take the average size of an Indian family as 5 this means that about 68 5 million people were served by co operative society The percentage of the population served works out at 19 1

Total membership, 13 715 020, membership of agricultural societies, 8 734 213 membership of non agricultural societies, 4,980 807

Total number of Central Societies, 520, of supervisory unions, 537 of provincial and central non credit societies, 2,236

Total membership of Central societies, 228 006, membership of supervising unions, 57,082, membership of provincial and central non credit societies, 1 473 203

Total number of Agr Credit Societies 115 462 number of non agr credit societies, 7,810, number of agr non credit societies, 33 815, number of non agr non credit societies, 20,518

Total membership of agr credit societies 51 53 907 membership of non agr credit societies, 21 77 551 membership of agr non credit societies, 33,65,243 membership of non agricultural non credit societies, 28,03,256

Note *All the figures below are in lakhs of rupees*

Working capital (1951 June), 27585 23, Paid up share capital 4345 67 Loans to and deposits from members, 2204 81, Loans to and deposits from societies 1696 73, From Provincial or Central Banks, 4879 From Government, 1169 77, From non members and other sources, 8330 75, Borrowings of land mortgage banks and societies 1304 26, Reserve Fund, 3654 24

Loans to individuals, 8657 Loans repaid by individuals, 7266, Loans outstanding against individuals, 8386, Loans overdue from individuals, 978

LAND MORTGAGE BANKS

The position about central land mortgage banks is as follows (Rs in lakhs)

No of banks, 5, no of individual members, 9,450, no of bank members, 398, share capital, 31 34, funds, 23 35, working capital, 772, loans due at end of year, 597 8

The position about primary land mortgage banks is as follows no of banks, 286, no of members, 2 15,063, share capital 52 51, funds, 16 20, working capital, 665 7, loans due at end of year, 626 4

CENTRAL FINANCING AGENCIES

The Central financing agencies are of two types, the central bank at the headquarters of a district and the provincial bank at the headquarters of the State

The position about provincial banks is as follows (Rs in lakhs) No of provincial banks, 15, no of offices, 127, no of individual members, 8266, no of banks and societies which are members, 12,666, share capital 157 98 reserve fund, 110 5, bad debt reserves, 51 4 other funds, 59 88, working capital, 3442 07 loans to individuals, 772 90 loans to societies, 3,440 4, investments, 1143

The rate of interest on borrowings and lendings varies from State to State

The position about central banks (Rs in lakhs) No of banks 505, no of offices, 759, share capital, 403 9 reserve fund, 242 2, bad debts reserve, 96 0, other funds 141 1, working capital, 5637, no of individual members, 99 592, no of banks and societies which are members, 1 07 482, loans advanced to individuals, 760, loans to societies and banks, 7524 1, investments, 1413

The rate of interest on borrowings and lendings varies from State to State

NON-AGRICULTURAL CREDIT SOCIETIES

The position about the non agricultural credit societies is as follows (Rs in lakhs)

No of societies 7810, number of members 2177 6 lakhs share capital, 1212 3, funds 541 1, working capital 5678, loans due at end of year, 4051, value of goods marketed, 710

NON-CREDIT MOVEMENT

The position about the provincial non credit societies (marketing unions) is as follows (Rs in lakhs)

No of societies, 12, no of individual members, 1247, no of societies which are members, 2 210, share capital, 13 94, funds 68 29, working capital, 617 61, goods sold, 941 48

The position about other provincial non credit societies (whole-sale stores and supply unions) is as follows

No of societies, 4, no of individual members, 225, no of societies which are members, 501, share capital, Rs 24 888, funds, Rs 1,141, working capital, Rs 0 63 lakhs, goods sold Rs 10 59 lakhs

The position about yet other provincial non-credit societies (industrial unions) is as follows (Rs lakhs)

No of societies, 9, no of individual members, 2420, no of societies which are members, 1,063, share capital 15 91, funds, 6 35, working capital, 142 68, goods sold, 478 85

The position about the rest of the provincial non credit societies is as follows (Rs in lakhs)

No of societies, 10, no of individual members, 5,815, no of societies which are members, 6587, share capital, 6 55, funds, 49 02, working capital, 113 72, goods sold, 701 12

CENTRAL NON-CREDIT SOCIETIES

The position is as follows (Rs lakhs)

Total no 2201, no of marketing unions or federations, 1905, whole sale stores and supply unions, 74, Industrial unions, 91, milk unions, 49, other types, 82, no of individual members, 14,06,907, no of societies which are members, 46,228, paid up capital, 206 08 funds, 329 94, working capital, 12,44 67, goods sold, 8607 01

AGRICULTURAL NON-CREDIT SOCIETIES

Total no of societies, 33,815, purchase and sale societies, 10,717, production and sale societies, 5,938, production societies, 11,956,

social services societies, 5142, housing 62, no of members 3365 2 lakhs, share capital Rs 4563 3 lakhs, funds Rs 3431 2 lakhs, working capital, Rs 1654 lakhs, loans made during year Rs 1062 lakhs, value of goods sold, Rs 55,00 lakhs

NON-AGRICULTURAL NON-CREDIT SOCIETIES

Total no of societies, 20,518, purchase and sale societies, 8417, production and sale societies, 6423 production societies, 836, social services societies, 3,206, housing societies, 1613, insurance 23 no of members, 2 8 lakhs, share capital Rs 949 lakhs, funds, Rs 679 lakhs, working capital Rs 3522 lakhs, value of goods sold, Rs 652 lakhs

INSURANCE SOCIETIES

The position of life insurance societies is as follows (Rs lakhs)

No of societies 16 no of members 153,319 no of policies, 132 002, sum assured, 1625, premium income 82 16, life fund, 342 06, assets, 376 30, cost of management, 14 27

SUPERVISING UNIONS

The position about supervising unions is as follows

No of unions 518, societies affiliated 27 881, individual members of societies affiliated, 22 20 lakhs, working capital of affiliated societies, Rs 2958 lakhs

The position about provincial unions and institutes is as follows

No, 19, primary affiliated societies, 27,319, central affiliated societies, 648, individual members, 1228, expenditure in 1950 51, Rs 9 46 lakhs

FIVE-YEAR PLAN

Total allotment—Rs 7 11 crores

It is estimated that by 1956 short-term agricultural credit by the Reserve Bank and the Central Government would amount to Rs 100 crores per annum

For training and experiments in co-operative farming Rs 50 lakhs by Centre

To supplement long term resources of the co operative movement Rs 5 crores by Centre

For starting colleges for training in co operation Rs 10 lakhs

Two recommendations are

In urban areas subsidy should be paid to State Governments to build workers quarters The subsidy may be upto 50 per cent of the total cost

Loans to co operative housing societies for industrial workers upto 37½ per cent of the net cost

FINANCIAL STRUCTURE

The total working capital in the movement on June 30, 1951 was Rs 275 85 crores, composed of owned funds 29 per cent, deposits 40 8 per cent, debentures 2 5 per cent, and loans 25 4 per cent (co operative institutions 15 8 per cent Government 4 2 per cent and other sources 4 3 per cent)

This working capital was spread among different types of institutions as under —

Institutions	No	Working Capital (Rs in lakhs)
Provincial Banks	15	34,42
Central Banks and Banking unions	505	56,37
Primary Agricultural Credit Societies	1,15,462	40,96
Primary Non Agricultural Credit Societies	7,810	56,78
Credit—Total	1,23,792	188 53
Provincial non credit Societies	35	8,75
Central non credit Societies	2,201	12,45
Primary Agricultural non credit Societies	33,815	16,54
Primary non agricultural non credit Societies	20,518	35,22
Non credit—Total	56,569	72 96
Central Land Mortgage Banks	5	7 72
Primary Land Mortgage Banks	286	6 66
Land Mortgage —Total	291	14,38
GRAND TOTAL	180,652*	275,87†

* 537 Societies are supervisory or educational Societies

† Rs 2 lakhs excess due to rounding up of figures to the nearest lakh

LABOUR

THE general position in 1950-51 was as follows —

Total working population* about 6,500,000

No employed in factories coming under the Factories Act of 1948 2 468,280

No of trade unions on register 4 277

No of trade unions which submitted returns of membership 2 346

No of members of trade unions submitting returns 2,022,434

According to lists submitted by four leading trade union organizations the number of unions affiliated and of membership for 1950 and 1951 were as follows —

	No of Unions		Membership	
	1950	1951	1950	1951
Indian National Trade Union Congress	1 043	1 220	1 431,878	1,568 668
All India Trade Union Congress	722	736	730 636	758 314
Hind Mazdoor Sabha	460	517	698 720	774 263
United Trade Union Congress	306	332	366,401	384,962

During the year under review 1952 53 one significant development was a change in Government policy in regard to industrial relations The new Labour Minister of the Government of India is due to introduce a fresh bill wherein the emphasis will be more on negotiation and agreement between the employers and labour than on awards or decisions by Tribunals

Allotment under the Five Year Plan Rs 6 9 crores

The inauguration of the Employees State Insurance Scheme in Kanpur and Delhi and the Employees Provident Funds Scheme in selected industries has ushered in a new era for the industrial workers

Although employment opportunities in the jute and cotton textiles increased during the year there was a recession in the plantations resulting in large scale retrenchment and closures, particularly in Assam and Bengal

The Planning Commission devoted considerable thought to policies and programmes for industrial development Health, education housing and social welfare for the masses find prominent place in the First Five-Year Plan The Government of India finalised their scheme of subsidised industrial housing and made generous provision in their budget for the purpose The most welcome feature of the period under review was the marked improvement in the labour situation and an all round increase in industrial production

The Central co ordinating authority in India for questions connected with labour legislation is the Ministry of Labour of the Government of India with the Labour Minister in charge The administration of matters connected with the English and Indian Merchant Shipping Acts, the Mercantile Marine Department and Indian Seamen is with the Ministry of Transport In respect of all the Railways, the Labour Minister is responsible for the administration of the Payment of Wages Act, 1936, trade disputes, hours of work for employees not covered by the Factories Act and regulation of employment of children He is also responsible for regulation of labour and safety in respect of mines and oilfields, trade disputes in industries, businesses or undertakings carried on by the Central Government, and inter State migration

Among the more important Acts that govern labour conditions and relations in India are the following 1 Indian Factories Act, 1948, 2 Indian Mines Act, 3 Payment of Wages Act, 4 Minimum Wages Act, 5 Workmen s Compensation Act, 6 Maternity Benefit Acts (States) 7 Indian Trades Union Act, 8 Industrial Disputes Act Industrial Disputes (Appellate Tribunal) Act 9 Tea Districts Emigrant Labour Act 10 Shop Assistants Acts (States), 11 Employees State Insurance Act and 12 Industrial Statistics Act

FACTORIES ACT, 1948

The Act covers all industrial establishments employing 10 or more workers and using power and establishments employing 20 or more workers and not using power The State Governments have been empowered to apply the provisions of the Act to any premises, irrespective of the number of persons employed where a manufacturing process is carried on with or without the aid of power, except where the work is done by the worker solely with the aid of his family

The Act prescribes that every factory should be kept clean and free from effluvia arising from drains privies etc , and lays down stipulations regarding sweeping cleaning, disinfecting, white washing, ventilation, temperature, drinking water latrines, etc

In existing factories 350 cubic feet of space should be provided for every workman In new factories to be built the space for each workman shall be 500 cubic feet

Elaborate provision regarding safety such as fencing of machinery, etc , has been laid down Women and children are prohibited from employment on certain types of machinery

Washing facilities for the workers, appliances for first aid, rest shelters, creches canteens etc , are prescribed under the Act In every factory where 500 or more workers are employed the occupier shall employ Welfare Officers

Weekly hours of work have been fixed at 48 and daily hours at 9 The maximum spread over allowed is 10½ hours No worker shall work for more than 5 hours before he has had an interval for rest of at least half an hour Payment for overtime has been prescribed at double ordinary rate of wages No woman shall be employed in any factory except between the hours of 6 a m and 7 p m A weekly day of rest has also been prescribed

No child who has not completed his fourteenth year shall be required or allowed to work in any factory A child who has completed his fourteenth year or an adolescent (a person who has not completed his eighteenth year) shall not be allowed to work in a factory unless a certificate of fitness by a certifying surgeon is in the custody of the manager of the factory and he carries while at work a token giving reference to such certificate No child shall be employed or permitted to work in any factory for more than 4½ hours in a day or between the hours of 7 p m and 6 a m

Every adult worker who has completed a period of 12 months continuous service in a factory shall be allowed during the subsequent period of 12 months leave with wages including dearness allowance for a period calculated at the rate of one day for every 20 days of work performed by him during the previous 12 months subject to a minimum of 10 days In the case of children the leave should be at the **rate of one day for every 15 days of work subject to a minimum of 14 days**

Where any worker in a factory contracts any disease specified in the schedule appended to the Act the manager of the factory shall send notice thereof to such authorities and in such form and within such time, as may be prescribed

The administration of the Act is left to the State Governments The Central Government have set up an advisory organisation, namely the Office of the Chief Adviser Factories

A Factories Act (Amendment) Bill was introduced in the Council of States by the Labour Minister on September 3 1953

According to this Bill the meaning of 12 months continuous service for eligibility for leave with pay would be 240 days service during a calendar year Proportionate leave will be granted to those whose service starts after the beginning of the calendar year

The annual leave with wages will be exclusive of holidays during or immediately before or after the period of leave

The leave can be carried forward from one calendar year to another provided the maximum does not exceed 30 days in the case of an adult and 40 days in the case of a child

No prior notice will be necessary when a worker requires leave to cover a period of illness

The Bill permits six hours work at a stretch without any interval when the total number of hours to be worked on any day in a shift does not exceed six

The Bill also permits newspaper printing presses to work their entire night shift of six hours at a stretch

It allows a worker a maximum of 50 overtime hours in a quarter year which is deemed to have begun on the first day of January, April, July or October

It enables continuous employment of workers in case some of the subsequent shift workers do not turn up in time

For the purpose of computing the rate of wages of a person who takes advantage of the concessional sale of foodgrains and other articles the basis will be the maximum ration admissible to a standard family of a specific number of consumption units

Women and children will be prohibited from working in factories at night

Women and children will also be prohibited from cleaning, lubricating or adjusting any prime mover of transmission machinery while it is in motion if such work exposes them to risk of injury

Certain presses including Government presses will come within the purview of the Factories Act

* For sub divisions see under Population '

FACTORY STATISTICS

Under the provisions of the Factories Act, 1948, registered factories submit annual and half yearly returns on employment to the Chief Inspectors of Factories in the various States All India figures are compiled by the Labour Bureau and are published in the *Indian Labour Gazette*

The number of factories on registers during 1950 and 1951, was 31,859 and 35 343 respectively

The following table sets out the statistics of the average daily numbers of persons employed in factories during the year 1950

WORKERS EMPLOYED 1950*

(Section 2m(i) and 2m(ii) factories only)

Industry	Average Number of Workers Employed Daily
Processes allied to agriculture (Ginning and Pressing)	83 701
Food except beverages	319,410
Beverages	5 579
Tobacco	108 301
Textiles	1,020 239
Footwear, other wearing apparels and made up textile goods	8,429
Wood and Cork except furniture	21 954
Furniture and fixture	6 794
Paper and paper products	19 999
Printing publishing and allied industries	69,290
Leather and leather products (except footwear)	13 473
Rubber and rubber products	29 829
Chemical and Chemical products	63 670
Products of petroleum and coal	12 790
Non metallic mineral products (except products of petroleum and coal)	10 978
Basic metal industries	93 738
Manufacture of metal products (except machinery and transport equipment)	53 495
Manufacture of machinery (except electric machinery)	94 374
Electrical machinery apparatus appliances and supplies	26 066
Transport equipment	181 294
Miscellaneous industries	107 633
Electricity gas and steam	21 989
Water and sanitary services	3 852
Recreation services (Cinema Studio)	4 150
Personal services (Job dyeing dry cleaning etc)	1 253
Total	2 405 280

* Industry wise classification for 3 049 factories employing 36 119 workers under Section 85 of the Factories Act is not available

MINES ACT

With a view to amending and consolidating the law relating to the regulation of labour and safety in mines the Mines Act 1952 was passed and brought into force from July 1952 The Act extends to the whole of India except Jammu and Kashmir The Act restricts the hours of work for adults to 9 per day and 48 per week above ground and 8 per day and 48 per week below ground Overtime work below ground should be paid for at twice the ordinary rate and above ground at 1½ times the ordinary rate The Act prohibits the employment of children below 15 years of age It also prohibits the employment of women in any part of a mine which is below the ground level Women can be employed above ground only between the hours of 6 a m and 7 p m Adolescents who have not completed 18 years of age are not allowed to work underground unless they are certified fit to work as adults Adolescents not certified fit to work as adults should not be allowed to work for more than 4½ hours a day Annual leave with wages for a period of 14 days in a year in the case of monthly paid employees and 7 days in the case of weekly paid employees and piece workers is granted to the workers Provisions relating to health and safety are laid down in the Act, besides which the Central Government may direct that the Health and safety provisions under the Factories Act, 1948 shall apply to all mines and the precincts thereof

MINING STATISTICS

Figures are published in a Monthly Bulletin which is being issued by the Chief Inspector of Mines We set out the available figures in the following table —

EMPLOYMENT IN MINES

(Figures for the Indian Union)

State	1939	1948	1949	1950
Bihar	170 384	238 727	232,673	239,994
West Bengal	60,965	89,141	90,231	92,074
Madhya Pradesh	41,666	42,259	53,277	69,330
Madras	14,549	15,612	17,502	15,961
Others	11,086	10,126	27 476	58,397
Total	298,650	395 865	421,159	471,761

PAYMENT OF WAGES ACT

The Act applies only to wages and salaries which average below Rs 200 per month

For purposes of the Act wages means all remuneration capable of being expressed in terms of money and includes any bonus or additional remuneration but does not include travelling allowances employers contribution to provident funds gratuities payable on discharge or the value of housing or other services rendered to the worker

No wage period is to exceed one month and wages are to be paid within a prescribed time not exceeding 10 days from the end of the wage period All wages are to be paid in coin and or currency notes Fines are not to exceed half anna in the rupee Permissible deductions from wages have also been specified

The administration of the Act, as far as factories are concerned has been entrusted to the Inspectors of Factories in the States In regard to persons employed in mines and in railways the responsibility of administering the Act rests upon the Chief Labour Commissioner (Central)

MINIMUM WAGES ACT, 1948

The Act covers the following industries or types of establishments Woollen carpet making or shawl weaving rice flour or dal mills tobacco manufactories (including bidi making) plantations oil mills, employment under any local authority road construction or building operations, stone breaking or stone crushing fire manufactories mica works, public motor transport, tanneries and leather manufactories and agriculture * The appropriate Governments can extend the application of the Act to any industry wherein, in their opinion, minimum wages should statutorily be fixed

The Act requires the Central or State Governments, as the case may be, to fix minimum rates of wages payable to persons employed in the industries mentioned above

The Act provides for the fixation of minimum time rates, minimum piece rates, guaranteed time rates and overtime rates appropriate to different occupations, or localities and for adults, adolescents, children and apprentices The minimum rate may consist of a basic rate and a cost of living allowance and/or cash value of concessions or it may be an all inclusive rate

The Act authorises the appropriate Governments to appoint Committees and Sub Committees to hold inquiries and advise them to fix minimum rates of wages in respect of any scheduled employment or for the revision of these rates They may also appoint an Advisory Board for co ordinating the work of various Committees and also to advise Government generally in the matter of fixing or revising minimum rates of wages The Central Government is to set up a Central Advisory Board for advising the Central and State Governments and for co ordinating the work of State Advisory Boards The Committees and Sub-Committees as well as the Central and State Advisory Boards are to consist of equal number of representatives of employers and employees, and of independent persons not exceeding a third of the total number of members

The Central or the State Governments, as the case may be, can fix the number of hours of work per day provide for a weekly holiday, etc, in regard to any employment in which minimum wages have been fixed under the Act

* The Act lays down that this should come into force before 1954 Upto December 1, 1953 eight States had not yet fixed minimum wages for agricultural labour These States are Bihar (except in Patna District), Uttar Pradesh, Madhya Pradesh, Hyderabad, Mysore, West Bengal Pombay, Madhya Bharat

Minimum wages have been fixed under the Act in several States. The two Statements showing the wages fixed in respect of various industries in each State are given below —

Minimum Wages Fixed Per Day.

WORKMEN'S COMPENSATION ACT

Under the Act payment of compensation has been made obligatory on all employers whose employees come within its scope, and injured workmen or the dependents of those killed can obtain compensation in all cases where personal injury has been caused by accident *arising out of and in the course of employment* and where, except in the case of injury resulting in death, the accident is not directly attributable to the workman having been at the time of the accident under the influence of drink or drugs or to wilful disobedience of rules or orders or wilful disregard of safety devices

Besides bodily injuries the contracting of certain occupational diseases such as anthrax and mercury lead and phosphorus poisoning were deemed and treated for the purposes of compensation, as injuries caused by accident, provided however that the worker concerned was in the service of the same employer for more than six months

The main provisions of the Workmen's Compensation Act as it stands today are as follows

In all cases persons employed in an administrative or clerical capacity and those whose monthly earnings exceed Rs 400 (except Railway Servants) are excluded

As far as seamen are concerned those employed on ships registered in India are covered But if accidents take place within the three mile limit of the territorial waters the Act applies even to those employed on ships not registered in India

Not only workmen employed within the precincts of a factory or a mine but also men engaged in any kind of work incidental to or connected with a factory or any mining operation are entitled to the benefits of the Act

Any person who is covered by the Employees State Insurance Act 1948, and who is entitled to receive disablement or dependent's benefit from the Employees State Insurance Corporation is not entitled to claim any compensation from the employer under this Act

The amount of compensation payable depends in the case of death on the average monthly wages of the deceased workman and in the case of an injured workman both on the average monthly wages and the extent of disablement The term wages includes overtime pay and the value of any concessions or benefits in the form of food, clothing, free quarters, etc

The amounts of compensation payable in the case of an injured workman whose monthly wages are not more than Rs 10 are Rs 500 for death, Rs 700 for permanent total and half the monthly wages for temporary disablement For a workman whose monthly wages are between Rs 50 and Rs 60 the corresponding figures are Rs 1,800 Rs 2,520 and Rs 15 respectively The maxima for persons earning over Rs 300 per month are Rs 4 500, Rs 6,300 and Rs 30 per month respectively In the case of minors the amounts of compensation for death and for permanent total disablement are at a uniform rate of Rs 200 and Rs 1,200 respectively, and half the monthly wage for temporary disablement

The interests of dependents in cases of fatal accidents have been safeguarded by ensuring that (1) all cases of fatal accidents should be brought to the notice of the Commissioner, (2) in all cases where an employer admits liability the amount of compensation payable is to be promptly deposited with the Commissioner and (3) in cases where the employer disclaims liability and there are good grounds for believing compensation to be payable, the dependents get the information necessary to enable them to judge if they should make a claim or not

An employer is permitted to make to any dependent advances on account of compensation not exceeding an aggregate of one hundred rupees

The Act is administered by Commissioners appointed by State Governments

STATISTICS

An annual note on the working of the Act is published regularly in the *Indian Labour Gazette*

The latest available statistics on the subject will be found in the following table —

Year	Total number of cases	Total compensation paid
		Rs

¶ Excluding figures for Punjab

Facilities for *accident insurance* are now being provided by a number of leading insurance companies in the country and the most important of these are the Claims Bureau in Calcutta and Madras

The Millowners Mutual Insurance Association, Ltd, Bombay, is an organisation of employers one of whose objects is the mutual insurance of members against liability to pay compensation or damages to workmen employed by them

MATERNITY BENEFIT ACT

The first Maternity Benefit Act in India was passed by the Government of Bombay in 1929 Since then, Maternity Benefit Acts have also been passed in the States of Madras, old undivided Bengal, Assam old undivided Punjab, Bihar Madhya Pradesh and Uttar Pradesh The Bombay Act was with certain modifications extended to Ajmer and Delhi In the year 1948 the West Bengal Legislature passed a separate Act for women employed in tea plantations under the title of the Bengal Maternity Benefit (Tea Estates) Act 1948 Except for the Assam Maternity Benefit Act which covers women employed in both factories and on plantations and the Bengal Act, all the other Maternity Benefit Acts are applicable to women employed in factories only

The Mines Maternity Benefit Act was passed in 1941

The main principles in all Maternity Benefit Legislation are the same provision for the payment of a cash benefit to women for specified periods before and after childbirth, a compulsory period of rest after delivery and also before delivery if notice is given, but, in the latter case, the period for which an employer has to pay cash benefit is strictly limited All Acts specify a qualifying period for the earning of the benefit this varies from six months to a year Women are prohibited, under penalty from accepting employment under another employer during periods for which they are in receipt of cash benefit from the employer with whom this liability rests

In the Central Act for women employed in Mines and in the U P Act additional bonuses of Rs 3 and Rs 5 respectively are provided for if the services of a qualified midwife are availed of, but if such assistance is provided for by or in an institution of an employer, this bonus is not to be paid

In U P and Bihar the Acts lay down that factories employing a certain number of women should maintain creches and appoint health visitors for looking after the welfare of the women workers

The Assam Act has certain provisions which are not met with in the other State Acts and the Central Government's Mines Maternity Benefit Act One such provision is that no employer shall knowingly employ a woman in any job during the four weeks immediately preceding the day of her delivery save upon such suitable light work as may be recommended by a medical practitioner

The Act provides for the payment of maternity benefit at weekly rates unlike the daily rates found in the other Act It provides for payment— (*a*) on plantations at the rate of Re 0 11 6 per day in addition to the usual food concessions for a period of 8 weeks and (*b*) in employments other than plantations Rs 2 per week or the average weekly wage or salary subject to a minimum of Rs 2 per week

The Indian Tea Association has however recommended payment of maternity benefit at the rate of Rs 5 4 0 a week for eight weeks Although maternity benefit legislation does not apply to plantations in South India, the employers associations have recommended payment of benefit on a voluntary basis at the rate of 12 annas per day for a period of eight weeks

The qualifying period in the Central and in the U P Acts is six months and in the Ajmer Act twelve months In all the remaining Acts it is nine months The maximum period for which maternity benefits can be paid is six weeks under the Ajmer Act seven weeks under the Madras Act sixty days under the Punjab Act and eight weeks under all the other Acts The rate of benefit used to be eight annas per day or the average daily wage whichever was less in most Acts but many Acts are now adopting a uniform eight annas a day The Punjab Act gives average daily earnings or twelve annas per day whichever is greater

TRADE UNIONS ACT, 1926

This Act was brought into operation with effect from 1st June 1927 and was slightly amended in 1928

Apart from the necessary provisions for administration and penalties, the Indian Trade Unions Act 1926, makes provision for three matters (1) conditions governing the registration of trade unions (2) the obligations to which a trade union is subject after registration, and (3) the rights and privileges accorded to registered unions Trade Union has been defined in such a way as to cover both combinations of workers and of employers but not of workers and employers Persons under the age of 15 are debarred from membership of any registered union

The administration of the Act is entirely on a State basis and each State Government is required to appoint a Registrar of Trade Unions Any seven or more members of a union can apply for registration but no union can be registered unless at least fifty per cent of the executive consist of members actually engaged in the unit or group of units which the union proposes to cover

Any union aggrieved by the refusal of a Registrar to register it or by the cancellation of its registration may prefer an appeal to a judge appointed by the State Government for the purpose and in the event of the dismissal of such an appeal, the aggrieved party has the right of a further appeal to the High Court

The general funds of registered trade unions cannot be spent on objects other than those specified in Section 15 of the Act nor on political objects but the Act makes provision for the creation of a separate political fund, subscription to which may be collected from such members as voluntarily desire to contribute to it All registered unions are required to submit annually to the Registrar duly audited statements of accounts in prescribed forms together with changes in officers and the executive and a copy of the rules corrected up to date

A registered trade union is immune from prosecution for criminal conspiracy in respect of an agreement unless it is one to commit an offence made between its members for the furtherance of a trade dispute or for restraint of trade and from any legal difficulties arising therefrom

INDUSTRIAL DISPUTES ACT

The Act provides for setting up of two types of organisations namely, (1) Works Committees and (2) Industrial Tribunals for the prevention or settlement of disputes It makes conciliation compulsory in all disputes in public utility services and optional in other cases

Section 22 of the Act declares any strike or lock out in a public utility service to be illegal if it is commenced or declared (i) without giving to the employer or employees, as the case may be, a notice of strike or lock out in a prescribed manner, within six weeks before striking or declaring a lock-out, or (ii) within 14 days of giving such notice, or (iii) before the expiry of the date of strike specified in any such notice, or (iv) during the pendency of any conciliation proceedings before a conciliation officer and 7 days after the conclusion of such proceedings, etc The Act also prohibits certain other strikes and lock outs and declares them illegal if commenced or declared during the pendency of (i) conciliation proceedings before a Board and 7 days after the conclusion of such proceedings, (ii) proceedings before a Tribunal and 2 months after the conclusion of such proceedings, or (iii) during any period in which a settlement or award is in operation, in respect of any of the matters covered by the settlement or award

The Industrial Disputes (Amendment) Bill of 1953 passed by both the Houses of Parliament provides for payment of compensation to workmen in the event of their lay off or retrenchment

According to this Bill a workman who has been in continuous employment for not less than one year under an employer should not be retrenched till he has been given one month s notice in writing or one month s wages in lieu of such notice and also a gratuity calculated at 15 days' average pay for every completed year of service or any part thereof in excess of six months

Regarding compensation for workmen laid off whenever a workman whose name appears on the muster rolls and who has completed not less than one year of continuous service under an employer is laid off he should be paid by his employer for all the days during which he is laid off (except for such weekly holidays as may intervene) compensation which should be equal to 50 per cent of the total of basic wages and dearness allowance

The compensation so paid during a period of 12 months should in no case be more than 45 days

A laid off worker who is not re employed after the stipulated 45 day period will be entitled to further compensation But the employer has the option to retrench such a worker the lay off benefits being taken into account in determining the amount of the retrenchment compensation payable

A laid off worker may accept a part time job without losing his title to compensation, provided he presents himself for work before his original employer for not less than two hours per day

Any money due from an employer by way of wages and (or) compensation is liable to be recovered in the same manner as arrears of land revenue

STATISTICS

The following table sets out the number of disputes in some of the years since 1945, the number of persons affected by these disputes and the total time lost in man days

Year	Number of disputes	Number of workpeople involved	Number of man days lost
1945	820	747,530	4,054,499

Statistics presented in this section relate to industrial disputes which have resulted in work stoppages involving 10 or more workers.

All the monthly figures are provisional

APPELLATE TRIBUNAL ACT, 1950.

The divergent and sometimes conflicting decisions given by the various Tribunals set up in different States under the Industrial Disputes Act, 1947 created serious anomalies leading to discontent and bitterness among parties to industrial disputes To meet this situation the Government of India enacted the Industrial Disputes (Appellate Tribunal) Act, 1950 to enable them to set up a Labour Appellate Tribunal which would hear appeals from awards or decisions of Industrial Tribunals, Industrial Courts, Wage Boards, and other statutory bodies set up by the Central or State Governments to adjudicate on industrial disputes

The Appellate Tribunal consists of a Chairman and such number of other members as the Government may from time to time, think fit to appoint The Chairman is authorised to constitute as many benches of the Appellate Tribunal as he may consider necessary Each bench is to consist of not less than two members, one of whom is to be appointed as the President The Appellate Tribunal is empowered to hear appeals from any award or decision of an adjudicating authority if (i) the appeal involves any substantial question of law, or (ii) the award or decision relates to wages, bonus or travelling allowance employers contribution to any pension or provident fund, gratuity payable on discharge, classification by grades, retrenchment and any other matter which may be prescribed by rules made under the Act No appeal, however, can be preferred by any party (i) from any award made by the Industrial Tribunal appointed by the Government of India in June 1949 to decide industrial disputes in banking companies, (ii) from any award or decision of a Tribunal made with the consent of parties, (iii) from any settlement arrived at between the parties in the course of conciliation proceedings or (iv) from any decision of an arbitrator appointed under any law with the consent of parties to settle the dispute

The Act provides that all appeals should be preferred within 30 days from the date of publication of the award or decision or, where no provision for the publication of the award has been made, within 30 days from the date of making the award The decision of the Appellate Tribunal becomes binding on the expiry of 30 days from the date of their pronouncement The appropriate Government can however, reject or modify any decision before the expiry of the period of 30 days, if they feel that it would be inexpedient on public grounds to give effect to the whole or any part of the decision In all such cases the Government concerned should place the decision together with their reason for rejecting or modifying it before the Legislature concerned

During the period of 30 days allowed for filing the appeal or during the pendency of an appeal no employer shall alter the conditions of service to the prejudice of the workmen concerned nor shall he discharge or punish any such workman without obtaining the written permission of the Appellate Tribunal

TEA DISTRICTS EMIGRANT LABOUR ACT

The Tea Districts Emigrant Labour Act, 1932, was brought into effect from the 1st October 1933

State Governments are empowered, subject to the control of the Government of India to impose control over the forwarding of assisted emigrants (chapter III) or over both their recruitment and their forwarding as occasion may dictate (chapters III and IV)

The forwarding of recruits to Assam must be made through the prescribed routes where arrangements for feeding, rest and medical treatment have been made and by authorised forwarding agents It is made unlawful to assist persons under 16 to migrate unless they are accompanied by their parents or guardians A married woman who is living with her husband may only be assisted to emigrate with the consent of the husband

Repatriation.—It is provided that where an employer fails to make all the necessary arrangements for the repatriation of a worker within fifteen days from the date on which a right of repatriation arises to an emigrant labourer, the Controller may direct the employer to despatch such labourer and his family or to pay him such compensation as may be prescribed within such period as the Controller may fix (sections 13 and 15)

Section 3 of the Act makes provision for the appointment of a Controller of Emigrant Labour with some staff and possibly one or more Deputy Controllers for supervising the general administration of the system which the Act seeks to establish The charges for this establishment are to be met from an annual cess called the Emigrants Labour Cess which is to be levied at such rate not exceeding Rs 9 per emigrant as the Central Government may determine for each year of levy

The cess is collected by the Controller by the sale of certificates of emigration Every assisted emigrant has to be provided by the employing interest on whose behalf he was recruited with such a certificate All particulars about the emigrant together with a running record of the details of his employment in Assam are given on it Failure to provide a certificate is punishable with a fine which may extend to Rs 500 For the year 1949 50 the rate of the cess was fixed at Rs 3 and the same rate was continued for 1950 51

The following details taken from the latest available Administration Report of the Controller of Emigrant Labour would be of interest —

During the year 1950 51, the number of assisted emigrants was 38,100 There were also 8 639 non-assisted emigrants The *per capita* cost of recruitment was Rs 124 14 6 as compared with Rs 142 3 5 during the previous year

The number of adults and children living on tea estates in Assam was 506,373 and 512,124 respectively making the total of 1,018,497

SHOPS AND COMMERCIAL ESTABLISHMENTS ACTS

Subject to certain exceptions the Acts apply to shops, commercial establishments, restaurants and places of amusement in certain selected urban centres Some employees such as those employed in a confidential capacity and those whose work is of an intermittent character are excluded from the scope of the Acts

The Bombay, Madhya Pradesh and Assam Acts have fixed daily hours of work at nine In U P and Madras the daily hours are eight while in West Bengal and the Punjab a ten-hour day has been prescribed Rest intervals, of half an hour are prescribed in the West Bengal, U P and the Punjab Acts while an hour s interval has been granted in the Assam, Bombay, U P and Madras Acts Opening and closing hours have also been fixed by the Acts The Assam and West Bengal Acts, however, prescribe only closing hours Most of the Acts also fix the maximum overtime work that can be taken from the employees In some cases slightly different hours of work have been fixed for employees of commercial establishments, restaurants and places of amusement

Provision has been made in all the Acts for weekly closure of shops and establishments although in some Acts, for example in Bombay and Assam, theatres, hotels, etc are exempted from this provision In addition to the weekly holiday, provision for privilege leave of 12 to 15 days in a year has been made in all the Acts The Assam, West Bengal Madras and U P Acts make further provision for casual leave and sick leave of 10 to 12 days and 12 to 30 days respectively

All the Acts except the Bengal Act, have made provision for the regulation of employment of children and young persons The minimum age for the employment of children in Assam, and Madhya Pradesh is 12 while in Madras and U P , it is 14 The hours of work for children and young persons are 7 per day in the Punjab, Madras and Madhya Pradesh and 6 in Bombay and U P Children are not allowed to work after 7 p m in Bombay, Madras and the Punjab and after 9 p m in Madhya Pradesh

The Bombay Act empowers the Government to apply the provisions of the Payment of Wages Act to establishments covered by the Shops and Commercial Establishments Act In Madras and U P the wage period should not exceed one month and in the Punjab it should not exceed a fortnight The Assam Act fixes the wage period at one month After they become due wages should be paid within 10 days in Assam and West Bengal 7 days in U P and 5 days in Madras In the Punjab wages should be paid on demand at the expiry of the wage period Overtime wages are payable at twice the ordinary rates in Madras, U P and the Punjab at one and a half times in Bombay and Madhya Pradesh and at one and a quarter times the ordinary rate in Bengal Hotels restaurants and other eating places in Bombay are however required to pay overtime wages at twice the ordinary rate Fines and deductions are regulated under the Madras and U P Acts

One month s previous notice or one month s wages in lieu of notice before discharge is stipulated in the Acts of U P , Punjab, Madras and Madhya Pradesh The Bombay Act provides for only 14 days notice or pay in lieu thereof The Madras and Bombay Acts make provisions relating to cleanliness, ventilation, lighting and precautions against fire in establishments covered by the Acts

The Weekly Holidays Act 1942 provides for a weekly closure of shops and for the grant of a weekly holiday to employees The Act has been enforced in Bihar, Ajmer, Coorg and Orissa

INDUSTRIAL STATISTICS ACT

The Act permits the collection of statistics with regard to any of the following matters (1) prices of commodities , (2) attendance , (3) living conditions including housing, water-supply and sanitation , (4) indebtedness , (5) rents , (6) wages and earnings , (7) provident and other funds provided for labour (8) benefits and amenities provided for labour , (9) hours of work (10) employment and unemployment, and (11) industrial and labour disputes Penalties are provided for persons refusing to supply information or failing to furnish the required returns State Governments are empowered to appoint an officer to be the Statistics Authority for the purposes of the collection of any statistics under the Act and that Authority, when once appointed, has the power to call upon employers to furnish the information required Penalties are also provided for in the Act for improper disclosure of information or returns by persons engaged in the collection of the information or the tabulation of the data

The Act deals with collection of statistics relating to factories such as production, etc , and matters dealing with labour welfare The former provisions have already been implemented by the various States and the Director of Industrial Statistics has undertaken censuses of production Reports on the censuses for the years 1946 1947 and 1948 have now been published

WAGES

No serial statistics of wages and earnings are available in India except for those compiled under the Payment of Wages Act The returns under the Act, however, relate only to persons in receipt of wages and salaries of Rs 200 per month

AVERAGE ANNUAL EARNINGS OF FACTORY EMPLOYEES

DEARNESS ALLOWANCE

The scale of the allowance varies not only from centre to centre and industry to industry but also except where these matters are adjudicated upon from unit to unit in the same industry at the same centre

In coal mines dearness allowance is paid on the basis of a percentage of basic wages In Bihar and Bengal the dearness allowance is 100 per cent of basic wages for those earning up to Rs 70 per month

In the engineering industry in West Bengal dearness allowance is graded according to income and ranges from Rs 25 per month in the case of those getting basic wages up to Rs 50 per month to Rs 50 for those getting more than Rs 200 In Bombay some concerns pay at a flat rate and others on a graded scale Several Adjudicators have granted dearness allowance either at the Bombay Millowners Association scale which was Rs 98 11 0 in December 1951 or at a percentage varying from 66⅔ per cent to 85 per cent of that scale In Madras the rate varies from 8 annas to Re 1 9 6 per day and in a number of concerns it is paid at a flat rate of Rs 25 per month In the tanneries and leather goods industry dearness allowance paid is around Rs 25 per month in West Bengal and Madras, about Rs 30 in Bombay and between Rs 40 and 60 in Kanpur

The Committee on Fair Wages appointed by the Government of India examined the question of dearness allowance and came to the conclusion that for the lowest categories of employees the target should obviously be compensation to the extent of 100 per cent of the increase in the cost of living but that in the case of higher categories a lower rate of compensation should apply and that the amount of compensation should be based on salary scales or slabs

BONUS

As in the case of dearness allowance the practice in regard to the quantum of profit bonus varies from centre to centre and industry to industry In Bombay City and Ahmedabad the cotton mill workers received for the year 1951 a bonus equivalent to 25 per cent of basic wages earned In Madura cotton mills the workers received 3 months basic wages

No bonus has so far been paid in the jute mill industry in West Bengal The Industrial Tribunal considered the question but deferred its recommendations in the matter pending the results of an investigation by experts and the Government of India

The dockyards in West Bengal generally pay an annual bonus amounting to 2 months wages Some of the dockyards in Bombay pay two months wages as bonus

The Tata Iron and Steel Co at Jamshedpur pay a good attendance bonus amounting to 10 to 12 per cent of basic wages and a performance bonus of 10 to 50 per cent of basic wages is also given to workers To the latter, however, only skilled and semi skilled workers are entitled Under the Company s revised Profit Sharing Scheme, the employees are entitled to a share of 27½ per cent of the annual net profit of the company and such share is credited to and/or distributed among the employees of the company in proportion to the basic salaries and wages earned or deemed to be earned by such employees respectively during the year in which such net profits were earned by the Company

The Board of Conciliation appointed for the coal mining industry recommended the grant of an annual bonus equal to four months basic wages, split into two parts An attendance bonus of two months basic wages to those fulfilling specified minimum attendance requirements and a production bonus related to output and basic earnings and subject to their qualifying for it on the basis of a minimum attendance of 66 days per quarter in the case of surface workers and 54 days per quarter in the case of underground workers in the case of collieries in Bihar and West Bengal Bonus on the above basis is also to be paid, according to the Fact-finding Committee s recommendations subject to a minimum attendance of 60 and 65 days in a quarter in the case of underground and surface workers respectively in Madhya Pradesh, Hyderabad and Orissa collieries In Assam, the existing rate of bonus has been raised by fifty per cent so as to raise the amount of bonus earned to a sum equal to four months wages per year

From the latest information available it would appear that during the quarter ending March 1952 about 32 per cent of the workers in West Bengal about 51 9 per cent in Bihar about 88 2 per cent in Orissa and 52 7 per cent in Vindhya Pradesh qualified for the bonus The amount disbursed by way of bonus by collieries submitting returns was Rs 3 5 lakhs Rs 11 22 and Rs 9 65 lakhs respectively in West Bengal Bihar and Madhya Pradesh

During 1949 a bonus of 8¼ per cent of their earnings was given to the workers in tea plantations in South India and 6¼ per cent of earnings to the workers in coffee and rubber plantations

Allowing for minor differences in this respect and considering the major industries and the important centres it can be stated that in the jute industry in West Bengal and in the plantations the wages are generally paid weekly The system of wage payment in the cotton textile industry in Bombay City and Sholapur is monthly A peculiarity of Ahmedabad is that the wages are paid per *hapta* which varies from 14 to 16 days The month is the accepted wage period for the railways In some concerns wages are paid daily to certain types of workers, weekly to others, fortnightly to yet others and monthly generally to the clerical and supervisory staff

Mining labour is mostly paid on a weekly basis

HOURS OF WORK

The most important happening in regard to hours of work in factories was the reduction of the weekly hours of work for adults to 48

Actually, in many industries in this country the hours of work were not in excess of 8 per day In the coal mines in Bihar and West Bengal the workers seldom work for more than five to six hours in the day or for more than four to five days in the week According to a recent investigation the average weekly attendance of a coal miner was 4 56 days The cotton textile industry in almost all centres normally works a uniform 8-hour day A recent development in the cotton textile industry is to work shifts on the basis of what is known as the Relay System By this system a unit does not stop work during the noon recess and continues working throughout a whole shift, different batches of workers being given rest intervals by turns and the remainder being asked to do double substitute work for the time being

In all cases where continuous production is necessary such as in electricity generating plants and certain water pumping stations, cement factories etc work is arranged on a system of three shifts—the different shifts changing over every week or fortnight The change over is so arranged that every workman gets a rest period of at least twenty four continuous hours *once in one week*

As far as railways are concerned, hours of work in railway workshops are regulated by the Indian Factories Act Most of the larger running sheds have also recently been classified as factories and work in these large sheds is arranged on the basis of three shifts of 8 hours each In the smaller sheds where work is of a fairly intermittent character systems of two shifts of 12 hours each obtain but the work of the individual is so arranged as not to work each operative for more than 8 hours

The question of hours of work of railway servants was one of the points submitted for adjudication to Mr Justice Rajadhyaksha of the Bombay High Court who made the following *recommendations*

The employment of railway servants under the Hours of Employment Regulations should be classified under anyone of the following heads

(i) Intensive

(ii) Continuous

(iii) Essentially Intermittent

(iv) Excluded

(i) The statutory limit of weekly hours for persons whose employment is classified as intensive should be fixed at 75 hours a week on the average in a month,

(ii) The statutory maximum limit for the employment of continuous workers should be fixed at 54 hours a week on the average in a month

(iii) The statutory maximum for staff classified as essentially intermittent should be 75 hours a week and

(iv) For excluded workers no statutory minimum limit can be prescribed but this should not absolve the Administrations of their responsibility on humanitarian grounds, of seeing that unreasonable conditions are not imposed The Government of India accepted these recommendations and by an Order dated 15th June 1948 declared them binding for a period of three years

In the major municipalities the hours of work vary from department to department but are generally 8 to 10 per day Speaking generally, municipal workers get a weekly holiday Although those in the conservancy department get only half a day off per week there is a certain amount of discontent among the conservancy staff for not getting a weekly holiday but since they are engaged on essential work most of the municipalities find it difficult to grant such a holiday

COST OF LIVING

Bombay was the first State in India to compile and publish a price series intended for measuring changes in the cost of living

Other States in India which compile cost of living index series for working classes are Madras Madhya Pradesh Uttar Pradesh Bihar Punjab Orissa Mysore, Travancore Cochin and Hyderabad The Mysore Government compiles figures for Bangalore, Kolar Goldfields and Mysore

The Government of Madras compiles nine series in all Madras City Vishakapatnam* Guntur* Bellary**, Cuddalore, Coimbatore Madura, Tiruchirapalli and Kozhikode with the average prices for the twelve months from July 1935 to June 1936 as base

In Uttar Pradesh the series are for low paid Government employees at Lucknow, Banaras Bareilly, Meerut and Gorakhpur

The Government of Orissa compiles a cost of living series for its headquarters town of Cuttack and another for Berhampur

INDEX FIGURES

Owing to the variations in the method of compilation of these indices, they are not strictly comparable, but the table below shows the movement of cost of living index numbers in selected centres for the twelve months of the year 1952 —

1952	BOMBAY				U P	MADHYA PRADESH	MADRAS	TRAVANCORE COCHIN		MYSORE			HYDERABAD

* Now in Andhra

** Now in Mysore

The Government of India, in consultation with the State Governments, launched upon an All India Scheme for the preparation and maintenance of working class cost of living index numbers for selected centres in the country. This scheme was started in the year 1942 and was completed in 1946. Over 27,000 family budgets were collected in some 28 selected centres.

The main object of these investigations was to obtain weights for compiling and maintaining cost of living index numbers on uniform lines. Accordingly, the Labour Bureau of the Government of India started publishing regularly in the Indian Labour Gazette on base 1944=100 cost of living index numbers for some 17 centres in India and the latest available figures for these centres on base 1944 are given below —

1952	Delhi	Ajmer	Jamshedpur	Jharia	Dehri on Sone	Monghyr and Jamalpur	Cuttack	Berhampur	Gauhati	Silchar	Tinsukia	Ludhiana	Akola	Jabalpur	Kharagpur	Mercara	Madras Plantations

STANDARD OF LIVING

The Bombay Labour Office carried out two family budget enquiries for working classes in Bombay City, one in 1921-22 and the other in 1932-33 and the results were published in the years 1923 and 1935 respectively. Similar enquiries were also conducted in Ahmedabad and Sholapur cities and the results of both these enquiries were published in the year 1938. In Madras, the Director of Industries published in 1938 the results of an inquiry into the family budgets of industrial workers in organized and unorganized industries in Madras City conducted under the direction of the Commissioner of Labour. A number of family budgets were also collected at Kanpur in Uttar Pradesh and at Nagpur and Jabalpur in Madhya Pradesh with the object of compiling cost of living indices.

The statement below contains in a tabular form the main results of these surveys.

COMPOSITION OF THE FAMILY, THE AVERAGE MONTHLY INCOME AND EXPENDITURE AND THE ACTUAL AND PERCENTAGE DISTRIBUTION OF EXPENDITURE ON DIFFERENT IMPORTANT GROUPS

Studies of living conditions of plantation workers were conducted in the year 1947 by the Government of India and the results of these surveys have been incorporated in two separate reports. The tabular statement on next page contains details regarding the main findings of these enquiries in the plantations in north east and south India.

RECRUITMENT

Many of the larger and more progressive concerns have Labour Officers who are directly responsible for all new recruitment

The evils in connection with recruitment were most marked in the case of casual or substitute labour The Millowners Association, Bombay, have dealt with the problem by establishing what is known as the 'Badli Control System' Daily casual vacancies are filled only from card holders and whenever there is a permanent vacancy it is filled from these card holders The evil influence of the jobber is thus eliminated A recent development in this matter is the decasualization' scheme of the Government of Bombay which has been introduced in some of the textile centres

In the jute mill industry during recent years, many of the mills have established what are known as Labour Bureaux one of whose functions is to recruit labour

In this connection mention might also be made of the Employment Exchange started by the Northern India Employers Association in Kanpur Some progressive cotton mills in the south have also opened special Labour offices through which only recruitment is made

The Millowners Association, Bombay conducts special classes for the training of Mill Labour Officers and actively supervises and controls the work done by all such Officers where they have been appointed through the Association Following the example of the Millowners Association, Bombay, the University of Calcutta, in co-operation with the Indian Jute Mills Association has recently inaugurated a special course of social work for giving suitable training to Labour Welfare Officers engaged in jute mills Among other institutions imparting training for Labour Officers mention may be made of the Tata Institute of Social Sciences, Bombay, Institute of Social Sciences, Banaras Xavier Labour Relations Institute, Jamshedpur Department of Labour and Social Welfare Patna University J K Institute of Sociology and Human Relations, Lucknow University and the training course conducted by the Madhya Bharat Millowners Association, Indore

The Directorate General of Resettlement and Employment set up by the Government of India organises technical training

There were 268 training centres in December 1952 and the number of persons undergoing training in these centres was as follows —

Technical training	8,296
Vocational training	1,790
Apprenticeship training	695
Vocational training	426
TOTAL	11,207

ABSENTEEISM

One of the commoner complaints of Indian industrialists has been the high percentage of absenteeism and the large labour turnover in Indian factories mines, etc the percentage of absenteeism amounts to about 10 to 15 per cent in factories and to about 25 to 30 per cent in mines and plantations It is noteworthy that in factories in which the conditions of work and wages are satisfactory and also where there is a system of granting leave with pay apart from the statutory holidays with pay, the incidence of absenteeism is not so high as is otherwise the case The available statistical data on absenteeism in certain types of concerns for the years 1948 1949 1950 1951 and the twelve months of 1952 are given in the tabular statement below —

ABSENTEEISM IN MANUFACTURING INDUSTRIES IN INDIA

EMPLOYEES' STATE INSURANCE CORPORATION*

A bill incorporating a health insurance scheme was introduced in November 1947 in the Indian Parliament and was passed as the Employees State Insurance Act on 19th April 1948 The following are its main provisions

The Act applies to all factories including factories belonging to Government other than seasonal factories and covers employees in receipt of wages or salaries up to Rs 400 per month The administration of the Act is entrusted to an autonomous body called the Employees State Insurance Corporation A Standing Committee is to act as the executive of the Corporation There is also to be a Medical Benefit Council to advise the Corporation on matters relating to administration of medical benefit certifica

* See under Miscellaneous for fuller note

tion, etc All these bodies are tripartite in character

The scheme is contributory but the Central Government is to make an annual grant to the Corporation during the first five years of a sum equivalent to ⅓rds of the administrative expenses of the Corporation The rates of contribution payable in respect of an employee have been fixed as follows —

	Group of employees	Employees contribution (recoverable from employees)			Employers contribution			Total contribution (employees and employers' contribution)		
		Rs	As	Ps	Rs	As	Ps	Rs	As	Ps
1	Employees whose average daily wages are below Re 1	*Nil*			0	7	0	0	7	0
2	Employees whose average daily wages are Re 1 and above but below Rs 1 8 0	0	2	0	0	7	0	0	9	0
3	Employees whose average daily wages are Rs 1 8 0 and above but below Rs 2 0 0	0	4	0	0	8	0	0	12	0
4	Employees whose average daily wages are Rs 2 0 0 and above but below Rs 3 0 0	0	6	0	0	12	0	1	2	0
5	Employees whose average daily wages are Rs 3 0 0 and above but below Rs 4 0 0	0	8	0	1	0	0	1	8	0
6	Employees whose average daily wages are Rs 4 0 0 and above but below Rs 6 0 0	0	11	0	1	6	0	2	1	0
7	Employees whose average daily wages are Rs 6 0 0 and above but below Rs 8 0 0	0	15	0	1	14	0	2	13	0
8	Employees whose average daily wages are Rs 8 0 0 and above	1	4	0	2	8	0	3	12	0

The insured persons are entitled to the following benefits
(*i*) sickness benefit, (*ii*) maternity benefit (*iii*) disablement benefit, (*iv*) dependents benefit and (*v*) medical benefit

The implementation of the scheme throughout the country simultaneously being attended with practical difficulties a plan of phased application of the scheme in different places was drawn up Under this plan it was proposed to introduce the scheme in Kanpur and Delhi in July 1950 The proposal had to be postponed at the last moment owing to objections received from employers in Kanpur that the introduction of the scheme in selected places without its simultaneous application elsewhere would place industries in those areas at a competitive disadvantage To overcome these objections and to remove a few other lacunæ the Employees State Insurance Act 1948 was amended in 1951 Under the amended Act the employers contribution will be levied from employers throughout the country in a manner which will make the extra cost on all employers as equitable as possible

The scheme was inaugurated in Kanpur and Delhi on 24th February 1952

At the end of 1953 it was in operation in 20 States covered 1 36 million workers in 1,643 factories and the contribution to the fund was Rs 4 47 crores The number of defaulting employers against whom prosecutions were launched was 17

ACCIDENTS

The Millowners Association, Bombay, has done a considerable amount of good work of a pioneering character in connection with Safety first measures Working in conjunction with the Safety first Association of India the Association drew up a Safety Code for the Cotton Textile Industry and this Code was published and put into operation from August 1940 It is of interest to note that most cotton mills in Ahmedabad had also established safety first committees by the end of the year 1939

The Indian Factories Act requires the manager to report all accidents which cause death or bodily injury whereby the person injured is prevented from returning to his work in the factory during the 48 hours next after the occurrence of the accident

It is the duty of the Inspector of Factories to make an investigation as soon as possible into the causes of and the responsibility for a fatal or serious accident, and to take steps for the prosecution of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act

Provision has been made for the training of miners in first aid There are also in the mining areas two rescue training centres where training has been given for fighting fires, etc in coal mines

The Office of the Chief Adviser Factories now issues from time to time valuable literature on the subject of industrial safety

The table below shows the number of accidents in Indian factories and mines in the years 1939 to 1951 —

Year	FACTORIES				MINES			
	Fatal	Serious	Minor	Total	Fatal	Serious	Minor	Total

WELFARE ACTIVITIES

The Reports of the Labour Investigation Committee on labour conditions in 36 industries as also their Main Report as well as the issues of the Indian Labour Year Book published by the Labour Bureau of the Government of India contain detailed and comprehensive information regarding labour welfare undertaken in various States and industries

Until recently the Government of India had not undertaken any activities to promote the welfare of industrial labour employed in Central concerns Recently, however they have done a great deal in this respect Welfare Funds have been instituted in coal and mica mines The Central Government have issued directives to all employing departments to constitute Labour Welfare Funds in all Government undertakings The fund is to be utilised for providing indoor and outdoor recreation reading rooms etc to workmen employed in the undertakings The Fund will be financed partly by Government grants

Welfare work is now directly undertaken by the Governments of Bombay U P Bihar Hyderabad Madhya Bharat Mysore Saurashtra and Travancore Cochin

HOUSING

In the past the policy of Government as well as of industrial employers was to leave the matter of housing more or less in the hands of private enterprise The rapid growth in industrial employment made the housing problem serious and the influx of large numbers of workers to urban centres during the war further aggravated the situation

In April 1948 the Government of India announced as part of their *industrial policy* a scheme for the construction of a million workers houses to be completed within a period of ten years but on account of financial stringency much headway could not be made in the furtherance of the scheme

The Government of India have recently finalised their Subsidised Industrial Housing Scheme Under the Scheme houses are to be constructed for industrial workers through the agency of State Governments Statutory Housing Boards employers and registered co operative housing societies of industrial workers The Central Government would assist financially these agencies both in the form of subsidies and loans For housing schemes undertaken by State Governments or Housing Boards the subsidy will be to the extent of 50 per cent of the cost of construction and the loan also to the extent of 50 per cent In the case of other housing schemes the subsidy and loan will be to the extent of 25 per cent and 37½ per cent respectively The Government of India also allotted during 1952 53 a sum of Rs 716 625 lakhs for the *industrial housing scheme*

The Planning Commission has also proposed a programme of industrial housing, the main feature of which is the construction of about 25 000 housing units every year in the principal industrial centres It has also proposed the creation of National Housing Fund

The subject of industrial housing has also been engaging the attention of several State Governments in recent years The Governments of Bihar, Bombay Madhya Pradesh Punjab, U P Madhya Bharat Mysore, Travancore-Cochin, have in hand schemes of industrial housing and some of the States, as for instance Bombay, have made substantial progress in regard to the construction of new houses

As regards housing accommodation provided by employers the standards vary widely In *the cotton mill* industry only a small proportion of the workers are provided with houses The jute mills in and around Calcutta have provided housing for about a third of their workers but the standards of housing provided leave much to be desired In the engineering industry only the larger units generally provide housing for their employees The Tata Iron and Steel Co

for instance, have provided 11,900 houses at Jamshedpur The cement industry in India is much ahead of other factory industries in regard to the proportion of workers housed as well as the standards of housing provided

In the coal mines up to 80 per cent of the workers are housed in dhowrahs free of rent Under the housing scheme of the Coal Mines Labour Welfare Fund constituted by the Government of India for coal miners over 1 500 houses have been completed The mining companies in the Kolar Goldfields in Mysore have provided over 12 000 houses for their employees

In the plantations nearly all the settled labour force have been provided with housing but the scale and standard of houses provided are far from adequate However in recent years the industry has become keenly alive to the urgency of the problem and at a Tripartite Conference held in November 1950 the planting interests have agreed to replace the existing sub-standard houses by stages spread over 12 years The number of houses provided for plantation labour up to September 1951 was as follows Assam and Bengal 323 865, Bihar 1 531, Madras 22 864 Orissa 40, U P 108, Mysore 2,171 Travancore Cochin 18 216 Coorg 1 877

The Government Railways have provided more than 2 00 000 units of residential quarters for their employees Over 9 000 new quarters were built by the railways during 1949 50

Several co operative housing societies have recently been formed in Ahmedabad through the efforts of the Ahmedabad Textile Labour Association

Out of the 24 0 0 tenements sanctioned under the Central Government's subsidized industrial housing scheme 4 570 had been constructed *upto the end of* Nov 1953 and 6,888 were under construction

Under the industrial housing scheme of 1949 2 8 6 tenements had been constructed and 940 were under construction

Under the Bihar State industrial scheme financed by the Centre 763 tenements had been *constructed and 316 were under construction*

SHELTERS, CANTEENS

Section 47 of the Factories Act, 1948 makes it obligatory for all factories employing more than 150 workers to provide adequate shelters and a suitable lunch room for the use of workers during periods of rest Almost all large industrial establishments had provided tiffin rooms and rest shelters for their workmen Most concerns had also permitted the establishment of tea *stalls on the premises but* apart from this, little effort had been made to run co operative canteens on the lines of those which are associated with most of the large factories in the West

About the middle of the year 1943 the Government of India recommended to all employers through the Employers Federation of India and the All India Organisation of Industrial Employers, the opening up of more canteens for workers

The Act of 1948 provides for the setting up of creches in factories that employ more than *50 women*

Except for the Ahmedabad Textile Labour Association the Railwaymen's Unions, and the Mazdoor Sabha of Kanpur Labour unions have not done much by way of labour welfare This has been due largely to lack of funds Some of the Railwaymen's Unions have organised co operative societies and various kinds of funds for the provision of specific benefits such as legal defence death and retirement benefits, unemployment and sickness benefits and life insurance etc

In 1939 *the Bombay* Government first organised model welfare centres From 1939 to 1952 the complexion of the Labour Welfare Department has undergone considerable *change* In all there are now 54 centres classified under four classes—'A 'B ' C and D At *Bombay* there are 3 'A' class, 13 'C' class and 2 'D' class centres, located in various parts of the city at Ahmedabad, 1 A class and 8 C class centres, at Sholapur there are 1 'A' class and 8 'C' class centres, at Jalgaon, Hubli and Dhulia there is 1 'B' class and 1 'C' class centre *each* There is one *B* class centre each at Poona, Baroda Gadag Barsi Viramgaum Broach, Surat and Nadiad 'A' class centres have a full time nursery school for children, a women's section providing literacy, sewing and embroidery classes and suitable games, outdoor games and gymnasium with all facilities for men, and separate arrangements for water taps and shower baths for both men and women Static as well as circulating libraries are attached to these centres, radio sets are provided, monthly cinema shows are arranged, and well equipped dispensaries are attached 'B' class centres are intended to be a replica of 'A' class centres but on a very much smaller scale C' class centres provide indoor recreation and educational facilities, static and circulating libraries and dispensaries 'D' class centres provide only outdoor recreation, such as games and sports

Welfare centres have also been opened in Bihar (2) in U P (33) in West Bengal (18) Mysore (2), Saurashtra (15) and Travancore Cochin (3)

MEDICAL FACILITIES

Medical facilities provided by employers range from first aid posts and dispensaries to first-class hospitals There are some examples in which first rate medical facilities are provided The Tata Iron and Steel Co maintain a large well equipped hospital with 400 beds and also 8 outdoor dispensaries The Delhi Cloth Mills maintain a hospital which is fully equipped with X-ray apparatus and other modern appliances, and which gives free medical aid to both mill workers and their families and free food to indoor patients The hospital at the Kolar Goldfields is a model of its kind The Buckingham and Carnatic Mills of Madras and the three important groups of employers of the Assam Oil Co at Digboi have also provided adequate medical facilities In all railways in India there are medical departments under the control of chief medical and health officers with divisional medical officers seconded by a number of assistants

Although the Factories Act requires that provision should be made for washing especially in factories where workers come into contact with injurious or obnoxious substances, very little effective provision exists in this regard because most factories only provide water for washing but not soap soda, towels etc As for bathing facilities, extremely few employers provide this amenity Section 42 of the Factories Act 1948 provides for the maintenance of such facilities in every factory

Other types of welfare work done by factories relate to the *provision of recreational facilities*, amenities for the education of workers and their children the provision of cost price grain shops, the establishment of co operative societies etc

On railways there are educational facilities for the children of the employees mostly free of charge Staff Benefit Funds have also been created which give monetary help to the children and widows of the deceased employees

COAL MINES WELFARE FUND

This Fund was constituted under the Coal Mines Labour Welfare Fund Act of 1947 The principal objects for which this fund is to be utilised are defined in the Act These are (1) the improvement of standards of living including housing and nutrition, the amelioration of social conditions and the provision of recreational facilities for the benefit of the labour employed in the coal mining industry, (2) the provision of transport to and from work, (3) the improvement of educational facilities, (4) the provision of improvement of supplies of water, and (5) the improvement of public health and sanitation, the prevention of disease, the provision of medical facilities and the improvement of existing medical facilities The Act makes provision for the appointment of an Advisory Committee consisting of Government Officers and an equal number of members representing colliery owners and workers employed in the coal mining industry of whom one has to be a woman

Both the cost of administration of the fund and the salaries and allowances of the officers appointed in connection therewith are to be defrayed from the fund itself

At present a cess of six annas per ton of coal or coke has been levied for being credited to the welfare fund The principal activities of the fund which are financed out of this cess may be considered under the following heads —

(i) Housing
(ii) Hospitals
(iii) Prevention of disease
(iv) Water supply
(v) Pit head baths and creches and others

The cess is now being apportioned between the Housing Account and the General Welfare Account of the fund in the ratio 2 1 A Coal Mines Labour Housing Board consisting of eight members has been set up For the coalfields in Madhya Bharat a separate Housing Sub-Committee has also been appointed Certain difficulties have been experienced in rapidly carrying out the programme and the progress made so far has, therefore, been somewhat slow To speed it up a new scheme has been drawn up by Government Under this scheme a subsidy of up to 50 per cent of the cost of construction of houses built by colliery owners in accordance with the specifications prescribed by the Coal Mines Labour Welfare Fund will be paid by the Fund

The fund gives certain grants and subsidies to various other funds such as the Leper Fund

The regional hospitals and maternity child welfare centres at Katras and Tisra in the Jharia coalfield and Chora and Searosole in the Raniganj coalfield were opened The central hospital for Jharia coalfield has been opened and the construction of a central hospital for the Raniganj coalfield has started

For the prevention of disease, grants are being made to the Mines Boards of Health and a scheme for the treatment of tuberculosis has been drawn up Anti-malaria work is also in full progress

The construction of pit-head baths and of creches has now been made compulsory

Mica Mines Labour Welfare Fund —The Mica Mines Labour Welfare Fund Act, 1946, which was designed to constitute a similar fund for the benefit of mica workers, provides for the levy of an *ad valorem* duty not exceeding 6¼ per cent on all mica exported from India The Act provides also for the constitution of two Advisory Committees, one for Madras and one for Bihar In Madras three dispensaries have been started for use by mica miners and five radio sets have been installed in selected mica mining centres

PENSIONS, GRATUITIES

All monthly and time rated workmen *in the industrial establishments of* Government are entitled to pensions on retirement provided that a minimum of ten years' service has been put in Outside Government concerns, pensions on retirement are almost non-existent although some concerns give small pensions to old employees who have put in long periods of trusted and faithful service but these are mostly *ex gratia* and cannot be *claimed as of right*

All railway employees and the employees of local and public bodies and a few of the larger public companies receive gratuities on retirement Gratuities are also paid to non pensionable workers who have put in not less than thirty years' service in Government concerns

In all cases specified periods of qualifying service have to be put in before gratuities can be earned The rules of individual administrations vary widely but the most generally accepted principle is half a month's pay for each year of service limited to fifteen months' pay in all Permanent Government servants who have put in less than ten years active service are entitled to gratuity if they are compelled to retire on medical certificate

A few large industrial establishments in India have started Retirement Benefit schemes where an account is opened for every individual worker to which a fortnight s or 13 days' pay is credited every year Interest is allowed and the amount standing to a worker s credit is paid to him on retirement

The Provident Fund Rules of different State Governments in India are by no means uniform The Government of Bombay, by a notification dated 20th March 1941, made it compulsory for all Government servants in receipt of a monthly income of Rs 50 per month who joined Government service before that date or of Rs 25 per month who joined after that date to subscribe to the Government Provident Fund Pensionable Government servants can only join the non contributory section of the Fund

Compulsory Schemes —Compulsory contributory schemes are provided for all permanent workmen in the factories owned by certain public bodies such as the Bombay Port Trust , whilst both compulsory and optional non contributory and contributory schemes obtain for permanent workmen in the factories owned by most municipalities Most of the larger public utility companies and corporations such as the Tata electricity generating and distributing plants, the Bombay Electric Supply and Tramways Company, Ltd , and the Burmah Shell Corporation, to mention only a few of many, provide contributory schemes for the benefit of the majority of their workmen Several others have schemes for their supervisory and clerical establishments but not for their workmen

The most usual amount of deduction from pay is one-twelfth of the monthly pay but the amount contributed by employers varies from 50 per cent to 100 per cent of the amount put in by the employee

As a result of the recommendations of the Board of Conciliation appointed by the Government of India, workers in coal mines are now entitled to a contributory provident fund

On 15th November 1951 an Ordinance to provide for compulsory provident funds for employees in Cement, Cigarettes, Engineering Iron and Steel, Paper and Textile industries was promulgated Later, the Ordinance was replaced by an Act of Parliament A provident funds scheme under the Act was prepared and brought into force from October, 1952

Profit sharing in this country has mostly taken the form of payment of bonuses according to the profit making ability of a concern The question of bonus has already been dealt with elsewhere

Under the Factories Act, 1948, the factory employees are entitled to a minimum of 10 days holidays with pay in the year However the recent tendency for many units particularly in south India, has been to allow holidays with pay in excess of this limit In many of the recent awards of Adjudicators, leave with pay up to 14 days has been awarded

LABOUR ADMINISTRATION

Apart from dealing with labour legislation and labour conditions and attempting and bringing about uniformity of standards in the different States the Ministry of Labour of the Government of India has recently undertaken additional responsibilities for the placement of civil and military demobilized personnel, refugees, etc It has continued active co operation with organized employers and labour organizations through the Tripartite Labour Conference and Standing Labour Committee

Apart from the main Secretariat of the Ministry of Labour it has several attached and subordinate officers The activities of some of these have been described in the relevant sections, such as Employment Exchanges and Resettlement, Miners' Welfare Fund, etc , and notes on some others are briefly given below

Labour Bureau —To meet the ever growing needs of Government, industry and labour for accurate and reliable information relating to labour conditions, labour legislation, etc , the Central Government established on 1st October 1946, a Labour Bureau

Among other things the Bureau edits the *Indian Labour Gazette* and the *Year Book*

Chief Labour Commissioner —The Central Government, in the Ministry of Labour have also appointed a Chief Labour Commissioner This officer is in charge of industrial relations and conciliation, labour welfare, operation of labour laws, and maintenance of information regarding wage rates and conditions of work in Central undertakings There are a number of deputies working under him known as Regional Commissioners

Chief Adviser of Factories —In order to ensure uniformity in the administration of the Indian Factories Act and to improve conditions generally in Indian factories, the Government of India have appointed an officer designated the Chief Adviser of Factories The Chief Adviser has a number of deputies including deputies who attend to matters relating to the health of the workers and the sanitation and cleanliness of factories

INDIA AND THE I L O

India joined this organisation at the very start and since 1922 has been one of the eight leading industrial countries in the world and as such has been allotted a permanent seat on the Governing Body of the Organisation India also contributes liberally towards the finances of the Organisation In 1953 India s contribution amounts to U S $267,173 which is about 4 13 per cent of the total contribution of all member States India s share in the appointments of the office is, however, somewhat inadequate The number of Indian nationals employed in the Geneva office is 11 The Indian Branch at New Delhi employs a director and three officers with other necessary staff

India has so far ratified 19 out of the 100 Conventions adopted by the International Labour Organisation but has in addition incorporated into its national legislation the essential features of many other Conventions

The following is a list of Conventions ratified by India —

1. Hours of Work (Industry) 1919
2. Night Work (Women), 1919
3. Night Work (Young Persons) 1919
4. Right of Association (Agriculture), 1921
5. Weekly Rest (Industry), 1921
6. Minimum Age, 1921
7. Medical examination of Young Persons (Sea), 1921
8. Workmen's Compensation (Occupational Diseases), 1925
9. Equality of Treatment 1925
10. Inspection of Emigrants, 1926
11. Seamen s Articles of Agreement, 1926
12. Marking of Weight, 1929
13. Night Work (Women) (Revised), 1934
14. Underground Work (Women), 1935
15. Protection Against Accidents (Dockers) Convention 1929, Revised in 1932
16. Final Articles Revision Convention, 1946
17. Labour Inspection 1947
18. Night Work (Women) (Revised) 1948
19. Night Work of Young Persons (Industry) (Revised), 1948

A Plenary Conference of the representatives of workers, employers and Governments met on August 7, 1942 at New Delhi and decided that a collaborative machinery composed of the representatives of Governments, employers and workers in India should be established forthwith for the consideration of all questions relating to the condition of labour

Since then tripartite labour machinery has developed in India both in the States and the Centre The Central Tripartite machinery consists of the Indian Labour Conference, the Standing Labour Committee, the Central Advisory Council and industrial committees for plantations cotton cement leather and coal industries The Labour Ministers Conference is closely associated with this machinery Matters regarding general labour policy labour legislation etc are discussed at the Indian Labour Conference and the Labour Ministers Conference Most of the State Governments have set up State Labour Advisory Boards which are also tripartite in character

*

FORESTS

STATE Forests 1 82 539 sq miles, Forests owned by corporate bodies 1 369 sq miles Private Forests 58 196 sq miles.

Total Forests 2 42 104 sq miles Percentage of Forests to Land 19 190

Allotment under Five Year Plan Rs 11 69 crores

There are seven different types of forest in India tropical forests southern sub tropical and temperate forests northern sub tropical forests northern temperate forests, Alpine forests special forest types and bamboos

The general policy of the Government in relation to forests was definitely laid down in 1894 by the classification of the areas under the control of the Department into four broad classes, namely —

(a) Forests the preservation of which is essential on climatic or physical grounds These are usually situated in hilly country where the retention of forest growth is of vital importance on account of its influence on the storage of the rain fall and on the prevention of erosion and sudden floods

(b) Forests which afford a supply of valuable timbers for commercial purposes such, for example, as the teak forests of the centre and the south the sal forests of the north the centre and the north east and the deodar and pine forests of the north-western Himalayas

(c) Minor Forests, containing somewhat inferior kinds of timber and managed for the production of wood fodder, grazing and other produce for local consumption, these forests are of great importance in agricultural districts

(d) Pasture lands —These are not forests' in the generally understood sense of the term but grazing grounds managed by the Forest Department merely as a matter of convenience

The forest business of the Government of India is carried on in their Departments of Agriculture

The Inspector General of Forests is the technical adviser to the Government in forest matters

Forests are however, a provincial subject

For purposes of administration the States are divided into one or more Forest Circles, each in charge of a Conservator of Forests, usually States containing three or more circles also have a Chief Conservator who is the head of the Department for his State Circles are divided into a number of Forest Divisions, in charge of members of the superior Forest Service Each Division contains a number of Ranges in charge of Forest Rangers or Deputy Rangers, heavy Divisions are also sometimes divided into Subdivisions The Ranges are further subdivided into a number of rounds and beats

The forest staff is trained at the following institutions

Indian Forest College Dehra Dun
Indian Forest Rangers College Dehra Dun
Madras Forest College Coimbatore

Bombay and Mysore have their own institutions to train rangers

Forest education is under the charge of a Director who is himself under the President Forest Research Institute Dehra Dun where all research work is conducted This Institute was opened in 1929 November

Silviculture which deals with all the production side of forestry, is under the direction of a Silviculturist Much of the actual research work is however, decentralised and done by local State silviculturists in the States but the Central Silviculturist co ordinates their work does all the statistical computing and acts as an information bureau on silvicultural matters for the whole of India

FOREST PRODUCE

Forest produce is divided into two main heads—(1) Major produce, *i e*, timber and firewood, and (2) Minor produce, comprising all other products such as bamboos, canes, leaves, fruits, fibres, grasses, gums, resins, essential oils, medicinal and poisonous plants, fatty oils and fats, dyes tans and animal and mineral products All aspects of research on the minor forest produce such as survey, methods of exploitation and cultivation are dealt with by the Minor Forest Products Branch and their chemistry and processing into articles of trade and industrial use by the Chemistry of Forest Products Branch

The annual outturn of timber and fuel from all sources averages about 306 million cubic feet

In the Andamans notable developments have taken place In the past, extraction of timber was done by elephant dragging with the result that only a fringe of the forests could be touched Attempts were made in employing American methods of mechanical logging, for which machinery was bought and an American expert employed to take charge of the work The costs of extraction, however, by these means proved too high Recently the problem has been solved by means of light tramways the trains of trucks being drawn by elephants which have been superannuated from ordinary work, and it has been found possible in this way to work large, hitherto inaccessible areas of forest very cheaply

If accurate estimates were available for the country they would show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood cutters, sawyers carters, carriers craftsmen and others working in and near them employment on an enormous scale is provided to persons engaged in working up the raw products The census shows nearly a million people and their dependents so employed in the country and nearly a further half million in the States but these are probably below the actuals as much forest labour is not whole time labour devoting seven or eight months in the year to forest work and the rest to agriculture

The general practice of the Forest Departments in the Government of India and the various States is to conduct their own sales direct with timber dealers or large consumers though there are notable exceptions Indian timber marketing in England (especially Andaman timbers) is now done under the direction of a Timber Adviser who is attached to the Office of the High Commissioner for India Sales of Indian timbers and especially timbers from the Andamans are steadily increasing

A large number of bulletins and other publications are issued by the Forest Research Institute Of these a list can be obtained from the Publicity and Liaison Officer Forest Research Institute New Forest Dehra Dun who maintains close liaison with trade and industry

(*a*) Excludes 254 sq miles not under Forest Department
(*b*) Includes 169 sq miles under private individuals and 5 sq miles under corporate bodies, but excludes 2,157 sq miles controlled by Revenue Authorities
(*c*) Includes 2,046 sq miles of Panchayat forests class III transferred to the control of the Forest Department and excludes 1,314 sq miles under Panchayat management and 7 sq miles under the management of other departments
(*d*) Excludes 1,322 sq miles of forest area under section 38IFA (229 sq miles), Chispet (1900) (764 sq miles), Civil Management (2 sq miles) and leased forests (327 miles)
(*e*) Excludes 8,034 sq miles of forest area not under Forest Department
(*f*) Includes areas in Poonch and Chinam Jagirs under Enemy occupation
(*g*) This forest area is owned by villagers individually or collectively
(*h*) These Forests are not under the control of the Forest Department
(*i*) These Forests are controlled and managed by S D O s Forest Department Realises only the surcharge and royalty
(*j*) Includes 12 782 sq miles for which details are not available
(*k*) Includes 500 sq miles owned by corporate bodies

AGRICULTURE

SOME major figures about Indian agriculture Area of India 811 mil acres, area available for land utilization 614 mil acres (rest is mostly unsuitable for cultivation), uncultivated area 247 mil acres (forest 93 mil acres, area not available for cultivation 96 mil acres fallow 58 mil acres), area actually sown 266 mil acres, total cropped area taking into account area sown more than once 320 mil acres, area sown with food crops 235 mil acres, area sown with non food crops 31 mil acres, total area irrigated 49 mil acres

Average rainfall 45", deficiency of 25 per cent is classed dry, deficiency of 40 per cent severe *drought*, usually one year in five is a dry year, one in ten, a year of severe drought

The following table* will show the area under principal crops and the yield

(In thousand acres) *(In thousand tons)*

Crops	Average Area			Average Production		
	1949-50	1950-51	1951-52 (a)	1949-50	1950-51	1951-52

(a) Final estimate
(b) Figures for production expressed in terms of raw sugar (*gur*)
(c) Second estimate
(d) The production is in terms of nuts in shell
(e) Figures for the production of jute and cotton are in thousand bales of 400 lb and 392 lb each respectively
(f) Revised estimate

The figures for cereals and gram include estimates for the non reporting areas while for other crops the figures relate to reporting areas only

The agricultural season is divided into two main sub divisions the Kharif season of the monsoon and the Rabi season of the cold weather Each of these seasons has its own distinctive crops

The ground is generally prepared for cultivation in April and May for kharif crops, and by the end of October or early November for rabi crops, *i e*, after the kharif crops have been harvested Kharif crops are sown in the monsoon, generally after the first shower The usual time for sowing of rabi crops is the middle of November

The chief Kharif crops are rice jawar, bajra, maize, cotton, sugarcane, sesamum and groundnut The chief Rabi crops are wheat, barley, gram, linseed rape and mustard.

The harvest comes on the market as follows Kharif crop (Nov 1), Rabi crop (May 1), Rice (Nov 1), Wheat (May 1) Sugarcane (Nov 1), Cotton (Sept 1), Jute (July 1), Kharif oil seeds (Nov 1), Rabi oil-seeds (April 1), Tea (Jan. 1), Coffee (July 1), Sugar (Jan 1)

SOILS

Four main soil groups can be recognised in the sub-continent *viz*, (1) the red soil derived from rocks of the Archæan system which characterizes Madras Mysore and the south east of Bombay and extend through the east of Hyderabad and Madhya Pradesh to Orissa, Chota Nagpur and the south of W Bengal (2) the black cotton or *regur* soils which overlie the Deccan tract and cover the greater part of Bombay, Berar and the western parts of Madhya Pradesh and Hyderabad with extensions into central India and Bundelkand, *regur* soils also occur in Madras though not so typical as proper *regurs*, (3) the great alluvial plains agriculturally the most important tract in the country as well as the most extensively cultivated includes mainly the Indo-Gangetic plain embracing northern Rajasthan, most of the Punjab area, the plains of Uttar Pradesh most of Bihar and the West Bengal area and half of Assam and (4) the laterite and lateritic soils which are found in the east a belt round the Peninsula and extend through West Bengal into Assam and Burma Besides these soils there are muck soils in Travancore and forest soils in the northern part of India

In addition to the four main groups of Indian soils mentioned above, the desert soils of the sub continent occupy a large tract in Rajasthan and the south Punjab area of which the Thar—Rajasthan desert—alone occupies an area of 40 000 square miles Saline and Alkali soils also form an important group of Indian soils which are known as *reh* or *usar* in Uttar Pradesh *rakkar* and *thur* in the Punjab and *chopan* or *karl* in Bombay State Such soils are characterized by a high degree of impermeability and "stickiness" together with high alkalinity and frequent presence of large excess of free salts They are usually poor in nitrogen and humus and unsuitable for crop growing without previous reclamation A considerable amount of working the reclamation of these soils has already been done in the Punjab area and Bombay which shows the possibility of bringing these unproductive lands back to cultivation Forest soils occupy a large part of the sub-continent. Investigations on the nature of soil profiles of the Chaubatia Hill in U P and of the Kulu Forest in the Punjab area indicate that these soils belong to the brown earth and podsol groups

The important question of soil conservation and development is receiving greater attention A sample soil conservation survey conducted over 80 000 acres of the scarcity tract of Bombay State reveals that over 71 per cent of the land surface has been denuded either partially or severely out of which about 32 per cent is unfit for crop growing

A basic soil region map of India has been prepared at the Indian Agricultural Research Institute This will enable each soil region to be used according to its capabilities and treated in accordance with its needs

Run off and soil loss studies on black soils of the Deccan derived from basalt have been carried out at the dry farming research station at Sholapur and Bijapur (Bombay) and at Hagari (Madras) The average percentage run off of total annual rainfall is 18, 22 and 20, and the average soil loss in tons per acre per year, is 44, 8 and 6 at Sholapur Bijapur and Hagari, respectively on 1 25 per cent slope Similar studies are also in progress on the red and laterite soils derived from granite at Nanjanad (Madras), and from old alluvium at Shantiniketan (Visva Bharati Soil Conservation Research Station West Bengal) At Nanjanad, in one season the soils loss on 20 per cent slope was 1 ton per acre under sod and six tons per acre in cultivated fallow At Shantiniketan, the soil loss is as much as 23 tons in a year in a bare plot on 1 7 per cent slope

Under the Technical Co operation Administration Programme a research project on soil fertility and fertilizer use has come into operation at the Indian Agricultural Research Institute Under this project the twenty major soil regions of India have been grouped into six zones (Poona, Delhi, Kanpur Nagpur, Coimbatore and Sabour) for purposes of soil survey and collection of soil data

Out of the total cultivated area in the Indian Union of 266 372 million acres about 48 652 million acres are irrigated annually Of this area 19 8 million acres are irrigated by canals, 12 88 million acres by wells, 8 174 million acres by tanks and 7 78 million acres from other sources The percentage of irrigated area to total cultivated area is however, small, being only 18 27 per cent Protective irrigation works have made agriculture stable instead of precarious in many districts

About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet

Tank irrigation is common in central and southern India Large quantities of rain water are stored in lakes (or tanks) during the rainy seasons and distributed during the drier seasons of the year Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Construction of temporary Bandharas across streams and small rivers after heavy monsoon period is over is also common in parts of Bombay and Madras States for irrigation during the drier Rabi period

The great bulk of agricultural land in India is deficient in organic matter In the other agricultural countries of the world, this want is usually met by the return of farmyard manure to the land or by the use of compost made from crop residues and similar waste organic materials In India, however, cattle dung is largely utilised as village fuel and only about 40 per cent of it is used for manurial purposes

RICE

Rice crop occupies the largest area in the Indian Union, 75.6 million acres giving an average yield of 632 lb of rice per acre The annual consumption of rice in the country is more than the production and there is always a deficit to

* For estimates of production for 1952 53 and for production by State see under "Food".

the extent of 8 to 10 per cent of the total production In the past, this deficit was usually met by imports from south east Asian countries especially Burma which alone used to supply about 1 7 million tons of clean rice annually

Rice is a predominantly tropical crop requiring warm temperature and high humidity It requires 70°-100°F temperature throughout its growing period and in India, its distribution follows the rainfall line Where the annual rainfall exceeds 80" rice is predominant, with 30" 80" it is still an important crop while under 30" it is grown mostly with irrigation The principal rice growing areas are located in southern and north eastern India On area basis Madras, Bihar, Bengal, Orissa, Madhya Pradesh, Uttar Pradesh, Assam and Bombay are the main rice growing States and they together claim about 9o per cent of the total rice area in India

The bulk of the rice is winter crop, *i e*, sown in June July and harvested in November December, but there are rices grown in different seasons the harvest coming in summer, autumn or winter

The wide range of conditions under which rice is grown in India has given rise to a large number of varieties differing greatly in quality and maturity period There are about 4,000 distinct types of rice in India

As already stated, the average rice yield in India is low being only about 723 lb of cleaned rice per acre as compared to 2,350 lb in Japan The low yields of India are due to the following causes —1 Lack of assured and timely irrigation water in all rice areas 2 The low level of soil fertility and the general absence of fertilizing practices 3 Use of indifferent seeds and inefficient methods of cultivation and 4 Losses due to the incidence of diseases and pests

As regards the improved varieties, a large number of high yielding improved varieties totalling about 300 have already been evolved by the various State Agricultural Departments However the systematic multiplication and distribution of these varieties still remain to be done on a wider scale

The manuring of rice is even more important for increasing the acre yields The results of a large number of manurial experiments indicate that by the application of moderate doses of nitrogenous fertilizers, specially ammonium sulphate and organic manures like compost oil cake and green manuring the yields can be raised by about 25 to 30 per cent

In view of the importance of the crop in India s agricultural economy, the Indian Council of Agricultural Research has been subsidising since 1932 a chain of research stations all over India and has through them organised a co ordinated scheme of rice research covering the entire rice growing regions of the country

Considering the importance of rice crop to Indian Agriculture, the Union Government had set up a Central Rice Research Institute at Cuttack in Orissa in 1946 For stepping up the rice yield in the country a scheme of hybridisation between *Japonica* and *Indica* rices is being worked at this Institute The *Japonica* varieties are high yielding, give a better per cent of rice to paddy, have short, non lodging straw and respond to intensive manuring while the *Indica* group germinates quicker, has better tillering capacity and is resistant to drought and diseases

Japanese Method

The Japanese method of cultivation was first tried at Kosbad Agricultural School and Agricultural Research Station, Karjat By this method, the yield of paddy could be stepped up more than 2 3 times the yield obtained at present under local practice This method as more emphasis is laid on higher doses of fertilisers, is only recommended where adequate moisture supply is assured The main important items of the Japanese method of paddy cultivation are — Growing seedling on raised seed bed with the help of organic bulky manure and inorganic fertilisers, instead of *rabbing* (burning seed bed) which is the local practice in Bombay Using less seed per unit area to get healthy and vigorous seedlings instead of high seedrate used locally, Grading of seeds and treating with perenox as a precaution against blast disease Green manuring wherever possible with San (Crotolaria Juncea) in fields at higher levels and *Dhaincha* (Sesbania aculeata) in low lying fields, Application of bulky organic manures like compost or F Y M up to 10 cart loads per acre *i e* 10 000 lbs , To plant the seedlings straight while transplanting and planting them in lines to facilitate after cultivation To use only 3 4 seedlings per bunch as they are healthy and vigorous, Application of heavy dose of fertilisers at proper time in instalments as recommended for the region, Weeding the field two times and interculturing 3 4 times by a hand hoe as and when required, Proper precautions against diseases and pests as well as treatment with fungicides and pesticides, as and when required, To tie strings as support to the standing crop to prevent damage by lodging at the advanced stage of crop growth, To take a crop of legume, if possible in rabi season after harvesting paddy This enriches the soil and gives some returns

WHEAT

Wheat is grown widely throughout the north as a winter crop, Uttar Pradesh and the Punjab supplying about two thirds of the total area, and nearly three-quarters of the total outturn in the country This crop occupies on an average, about 10 per cent of the total cultivated area The majority of the varieties grown belong to the species *Triticum vulgare* Bombay mostly grows durum wheats in which a number of improved strains are evolved and are spreading rapidly A new improved wheat, called Nipbad 4, having the blood of durum, unglare and dicoceum wheat species has been recently evolved with exceedingly good baking quality Indian wheats are generally white red and amber coloured and are mostly classed as soft from a commercial point of view But there are some well known Maccaroni wheats among these

The crop is generally grown after a summer fallow and except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon On irrigated land 2 to 4 waterings are generally given The crop is generally harvested in February to April and the threshing and winnowing go on up till the end of May

The total area under wheat is 23 2 million acres and the total area under improved varieties of wheat 8 million acres

Unfortunately wheat is subject to a violent fungus disease called rust , which is a potent factor limiting wheat production in India The magnitude of the loss to the wheat crop during a season in which rust occurs in epidemic form is very great indeed For instance during 1946-47, as a result of severe rust attack, the Madhya Pradesh and certain other parts of India lost nearly 2 million tons of wheat worth 60 crores of rupees

The average yield of maize in India is very poor—only 548 lb (less than 7 mds) per acre

MILLETS

Millets are grown mostly in rain fed areas, supplying food for the poorer classes and fodder for the cattle The varieties vary greatly in quality height and suitability to various climatic and soil conditions Perhaps the two best known varieties are jowar (*Sorghum Vulagre*) the great millet, and bajra the bullrush millet (*Pennisetum typhoideum*) which between them occupy about 50 million acres in the sub continent

Besides the major millets called Jowar (*Sorghum vulagare*), bajra or *Cumbu* (*Pennisetum typhoides*) and ragi (*Elusine coracana*), there are what are known as the lesser or minor millets, such as, Sawan (*Panicum crusgalli*), Same (*a Panicum miliare*), Varagu (*Panicum miliaceum*) Kodon or Kodra (*Paspalum scrobiculatum*), Oodalu (*Echinochloa frumentcea*) and the like forming almost one sixth of the total acreage under millets

Generally speaking, the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil Both the crops are generally sown in the beginning of the monsoon and so they require to be thoroughly weeded They are grown mixed with the several pulses especially *arhar* (Cajanus Cajon pigeon pea) and other crops and are commonly rotated with cotton The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards In some States like Bombay *rabi* juar is also an important crop

PULSES

Pulses play a vital role in the Indian diet as they form the primary source of protein for the vegetarian population of the country Some of them form a source of nutritious fodder, while others make excellent green manure crops Being leguminous plants they enrich the soil and rightly form an inevitable component in mixed cropping as well as the linch pin in most crop rotation India is very rich in the varieties of pulses comprising Red gram (*Cajanus cajan*), Bengal gram (*Cicer aurietinum*), Black gram (*Phaseolus mungo*) Green gram (*P rediatum*), Matki (*P aconotifolius*), Horse gram (*Dolichos biflorus*), Mothbean (*Cyampsis psoraloides*) Khessari (*Lathyrus saticus*), various species of the pisum and such like

The total area under different pulses in the Indian Union during the years 1949 50 and 1950 51 was 49,833 000 and 45 835 000 acres and the production was 8,129,000 and 7 624,000 tons respectively Out of this Bengal gram accounts for more than ½ of the production, Red gram following it with about ¼ of production indicating thereby that gram and 'Arhar are the two major pulse crops of the country

Types combining resistance to wilt with high yield are available in *arhar kesari* and *gram* A type resistant to virus is also available in *wal* (field beam) and *kulthi* (horse gram)

COTTON

Cotton is one of the most important commercial crops in the Indian Union. In 1951 52 owing to Grow More Food campaign and favourable weather conditions in certain areas the estimated area and yield increased to 16 2 million acres and 3 1 million bales, respectively, the average yield being 76 lb

There is no Indian cotton belt , the States of Bombay, the Punjab, Madhya Pradesh, Madras, Uttar Pradesh Madhya Bharat, Rajasthan, Saurashtra, PEPSU and Hyderabad, all have important cotton tracts producing distinct types Sowing and harvesting seasons are equally

The seasonal rice crop has different names in different States

State	Autumn	Winter	Spring
Assam	Ahu, Aus	Sali, Bao	Boro
Bihar	Bhadoi	Aghani	
Bombay	Early	Middle	Late
Madhya Pradesh	Early	Late	
Madras	First crop	Second crop	
Orissa	Bhadoi	Winter	
Uttar Pradesh	Early	Late	
West Bengal	Bhadoi, Aus	Aman	Boro

diverse the former extending from May to December in different parts of the country and the latter from October to May and June Yields vary greatly in the best irrigated tracts the normal yield is about 200 lb of ginned cotton per acre and yields much above this have been recorded while in the poorest unirrigated tracts 60 lb per acre is a good crop

SUGARCANE AND SUGAR

The Indian Union after the partition owned as much as 85 90 per cent of the total cane acreage and sugarcane yield and over 95 per cent of the total white sugar production of the undivided sub continent

During 1951 52 crushing season, the peak production of 1 48 million tons of white sugar was obtained the area under sugarcane was nearly 4 73 million acres and the yield of cane (in terms of *gur*) was 5 9 million tons Only about 25 per cent of the total cane produced in the country is crushed in 139 factories which annually function for the manufacture of white sugar while *gur* manufacture utilises about 65 per cent of cane and rest of the cane is consumed for seed *khandsari*, chewing etc

Over 20 million people are engaged in sugar cane cultivation or are otherwise employed in sugar factories, States and Central Governments Sugarcane Research Stations and in the Development schemes U P and Bihar continue to be major sugarcane and sugar producing States in the Union

The Indian Central Sugarcane Committee is a central organisation for co ordinating sugarcane research and development work It has budget provisions for 1953 54 for Rs 8 8 lakhs for sugar cane research and Rs 33 00 lakhs for sugar cane development schemes Another provision of Rs 4 lakhs has been made for the Sugarcane *Research Division* of the Central Institute of Sugar Technology and Sugarcane Research at Bhadruk, Lucknow

OILSEEDS

India is one of the principal oilseeds producing countries of the world Oilseeds crops also find a prominent place in India the major oilseeds (groundnut rape and mustard linseed, sesamum and castor) occupying about 28 million acres during 1950 51 In addition to this, about 16 million acres are under the cotton crop which yields about one million tons of cotton seed

The following are the major oilseeds grown in India —

Groundnut :—India has the largest area under groundnuts in the world She accounted for 40 6 per cent of the groundnut production in the world during 1951 In this country, groundnuts accounted for about 42 5 per cent and 63 8 per cent of the total area and production respectively, under oilseeds crops during 1951 52 Madras ranks first, claiming 35 2 per cent and 49 9 per cent of the acreage and production, respectively under groundnut in India and is followed by Bombay and Hyderabad The area under this crop in India in 1951 52 was 11 755 000 acres and the production was 3,037,000 tons

Rape & Mustard :—Rape and mustard form an important group of crops in the northern parts of the country The chief producing areas are Uttar Pradesh, Bihar, Punjab and Assam The area and production of rape and mustard seeds in India during 1951 52 was 5,707 000 acres and 900,000 tons, respectively

Linseed —The crop grows well under a variety of soil conditions and is raised extensively in India except in the south of the peninsula Madhya Pradesh, Uttar Pradesh, Bihar and Hyderabad are the chief seed producing areas, accounting for about 80 per cent of the total area in India The area and production of linseed in India during 1951 52 were 3,298,000 acres and 309 000 tons, respectively

Sesamum :—Sesamum (Gingelly) or *til* is grown extensively, almost throughout India The crop is however, intensively cultivated in Peninsular India in more than one season in the year The area and production of sesamum in India during 1951 52 were 5,731,000 acres and 441,000 tons, respectively

Castor —The castor plant grows well under varied conditions of soil and climate It is seen to grow almost throughout the length and breadth of India and up to an elevation of 8 000 ft Both perennial and annual types are recognised India comes next to Brazil only in world production and trade of castor seed The area and production of castor seed in India during 1951 52 were 1 423,000 acres and 104 000 tons, respectively The statistics of area and production of this crop are, however, considered as under estimates as no regular reporting is done for the areas sown under mixed crops

India also produces considerable quantities of coconut cottonseed, niger, safflower and *mohwa seed* besides a variety of other vegetable oils both essential and non essential, which are produced in quantities, but for which she holds almost a world monopoly

JUTE

Jute is one of the most important cash crops The fibre is obtained from the bark of two cultivated species of annual plants called *Corchorus capsularis* and *Corchorus olitorius*

Jute is grown in the alluvial soils of West Bengal Bihar Assam Orissa, Tripura and U P It is a Kharif crop and is sown broadcast during February to May on well prepared seed beds

The outturn of dry fibre of jute generally varies from 8 to 25 mds with an average of 11 mds per acre depending upon soil fertility and other factors

The table below gives the acreage and yield of the Indian Union since 1948 after the partition —

Year (Jute year July to June)	Acreage	Jute yield in bales
1948	831 000	2 056,000
1949	1,163 000	3 089,000
1950	1 454 000	3,301,000
1951	1 951 000	4 678 000
1952	1 834,079	4,694,954

Efforts are also directed to improve the quality of Indian jute and various researches are in progress in the Jute Agriculture Research Institute of the Indian Central Jute Committee

TOBACCO

The tobacco acreage in India is not uniformly distributed but is concentrated in certain areas which form distinct tobacco growing centres of considerable commercial importance There are 5 zones of concentrated production *viz* — (1) *North Bihar and Bengal Area* where tobacco is mostly grown for use in hookah (water pipe), (2) *The Charotar (Gujarat) Area* (3) *Nipani Area* (Belgaum, Satara, Kolhapur Sangli and Miraj in Bombay State) where bidi tobacco is extensively grown (4) *Guntur Area* which is the most important Cigarette Leaf (Virginia Tobacco) producing area which runs along the eastern coast, (5) *Southern Madras Area* comprises mainly of Madura and Coimbatore districts of Madras State where cigar, filler and binder tobacco as well as chewing tobaccos are mostly grown

The total area under tobacco in the Indian Union in 1950 51 and 1951 52 were 902,000 and 764,000 acres producing 589 and 504 million lb of dry leaf, respectively

This excludes the quantity retained for personal consumption by the growers

MARKETING AND INSPECTION

There is a Central marketing organization called the Directorate of Marketing and Inspection and a number of State marketing organizations, *e g*, in Bombay, Bihar, Hyderabad, Madras, Mysore, Punjab and West Bengal.

The official in charge of the Central Directorate is designated Agricultural Marketing Adviser The Directorate conducts marketing surveys for a number of commodities and issues reports About 70 reports have so far been published and among the commodities covered are rice wheat, potatoes gram, barley grape bananas citrus fruit, linseed ground nuts cashewnuts, lac, sugar, coconuts tobacco, milk fish, cattle hides, skins, wool and hair sheep and goats eggs, coffee castor seed ghee and milk products, arecanuts rapeseed and mustard, sann hemp and cardamom

The Agricultural Produce (Grading and Marketing) Act, 1937 aims to provide the consumers with a standardized produce of specified purity and quality under a mark of guarantee The process of grading and marking is done commercially on a voluntary basis by packers holding a Certificate of Authorization issued by the Agricultural Marketing Adviser There are now about 550 packers under the various grading schemes

There are grade specifications for several varieties of rice fruit, cotton castor oil coconut oil sann hemp, tobacco, ghee eggs butter, sugarcane gur

In 1951 the latest year for which figures are available commodities worth Rs 20 71 crores were graded

The marketing of certain commodities is also regulated by law in some States For instance, in Madhya Pradesh cotton is regulated in Amraoti in Madras cotton is regulated in Tirupur and Tirunelveli ground nuts in South Arcot and Coimbatore tobacco in Guntur, West Godavari and Coimbatore arecanuts coconuts, ground nuts tobacco turmeric and potatoes elsewhere, in Bombay there are over 50 regulated markets in Hyderabad about 70 in PEPSU about 40 in the Punjab about 60, in Madhya Bharat Gwalior district has 36 in Mysore coconut copra oilseeds and jaggery are regulated at Tiptur, there is also a regulated market at Davangere There are also regulated markets in Ajmer

The principle of compulsory grading of agriculture produce for export has been recognized by the Planning Commission They recommended that grading should be completed over a period of five years beginning with 1951 52

RESEARCH

The Indian Council of Agricultural Research was created in 1929 The Council is divided into a Governing Body composed of State Ministers of Agriculture, certain members of Parliament and representatives of commercial interests, and an Advisory Board consisting of experts The Governing Body is in charge of general affairs and of the funds, while the Advisory Board examines scientific projects submitted to the Governing Body

To afford relief to the Governing Body in the discharge of its executive functions there is a Standing Committee The Governing Body is also assisted by a Board of Research and a Board of Extension The latter is concerned with pilot schemes

The Minister for Food and Agriculture of the Government of India is the president of the Council

In general the Council co ordinates research work, suggests programmes of research, gives financial assistance for approved schemes, and undertakes other schemes of its own

There is now an extension service to make known the results of research work to the cultivator

The annual grants made to I C A R fall under two main heads —(*a*) An annual Government grant for running the administration This varies from year to year according to requirements, and is estimated to be Rs 9,97,800 for 1953 54 (*b*) Payment of the net proceeds of the cess on agriculture produce The income from this source is estimated to be Rs 34,00,000 during 1953-54

Besides these specific grants are made to I C A R for undertaking certain schemes from time to time A sum of Rs 25,14,000 has been provided for this purpose in the 1953 54 budget Most of this amount will be spent on schemes included in the First Five Year Plan

The cess is a customs duty of one half of one per cent *ad valorem* on the following bones, bristles, butter, cereals other than rice and wheat, drugs, fibre for brushes, fish, fruit, ghee hides (raw), manures oil cakes, pulses, seeds, skins (raw), spices tobacco (unmanufactured) vegetables, wheat, wheat flour, wool (raw) This applies to the whole of India except Jammu and Kashmir

A number of Central Committees have been set up to promote the production and marketing of agricultural commodities

Indian Central Cotton Committee, Bombay

Indian Central Jute Committee, Calcutta

Indian Central Tobacco Committee, Madras

Indian Central Oil seeds Committee, New Delhi

Indian Central Coconut Committee, Ernakulam (S India)

Indian Central Sugar cane Committee, New Delhi

Indian Central Arecanut Committee, Calicut (S India)

Indian Central Lac Cess Committee, Ranchi (Bihar)

All India Cattle Show Committee, Karnal (Punjab)

These Committees are financed by the proceeds of a cess levied on the particular commodity For instance, for the Cotton Committee there is a cess of As 4 per bale of 400 lb of cotton for the Coconut Committee there is a cess of As 4 per cwt on copra consumed in Indian mills for the Lac Committee the cess is As 14 per md of export of lac and As 10 for refuse lac exported, for the Oil seeds Committee the cess is 1 anna per md of oil extracted in mills, and annas 2 per md of oil seeds

The Ministry of Food and Agriculture maintains a number of research laboratories

1 Indian Agricultural Research Institute, Pusa, New Delhi
2 Central Potato Research Institute, Patna Laboratory, at Potato Multiplication Sub division, Bhowali (U P) Laboratory, at Potato Breeding Sub-Station Simla
3 Central Rice Research Institute Cuttack
4 Research Laboratory, Central Palm Gur Training School, Cuddalore (Madras State)
5 Forest Research Institute and College, P O New Forest, Dehra Dun
6 Sugar Cane Breeding Institute, Coimbatore
7 Indian Veterinary Research Institute, Izatnagar Mukteswar (U P)
8 Indian Dairy Research Institute, Bangalore
9 Central Vegetable Breeding Station Kulu, P O Naggar, District Kangra (Punjab)
10 Central Marine Fisheries Research Station, Mandapam, P O, Southern Railway
11 Central Inland Fisheries Research Station, Manirampur, Pulta P O, Barrackpur, 24 Parganas
12 Deep Sea Fishing Station, Bombay

A number of research institutes, stations and farms are also maintained by the Central Commodity Committees

The Indian Central Cotton Committee has

1 Technological Laboratory, Matunga
2 Institute of Plant Industry, Indore

The Jute Committee has

1 Jute Agricultural Research Institute, Barrackpore (West Bengal)
2 Technological Research Laboratories, Tollygunge, Calcutta
3 Economic Research Section, Indian Central Jute Committee, Calcutta

The Tobacco Committee has

1 Central Tobacco Research Institute, Rajahmundry
2 Cigar and Cheroot Tobacco Research Station Vedasandur
3 Hookah and Chewing Tobacco Research Station, Pusa, Bihar
4 Cigarette Tobacco Research Sub station, Guntur
5 Wrapper Tobacco Research Station, Dinhatta (West Bengal) (Was to be started in 1953 54)

The Coconut Committee has

1 Central Coconut Research Station, Kasaragod
2 Central Coconut Research Station, Kayangulam

The Sugar Committee has

Sugar cane Sub Station, Karnal (Punjab)

LAND POLICY

In general agricultural policy is made up of the following

Grow More Food Campaign research, land reform, land army (in contemplation)

There are three main systems of land tenure the *ryotwari* or peasant proprietary tenure, where the individual owners are responsible for the payment of land revenue, the *zamindari* or landlord tenure where one or more persons jointly own a large estate and are responsible for the payment of land revenue, the *mahalwari* or joint village tenure where village communities jointly hold an estate and are jointly and severally responsible for the payment of land revenue

The *ryotwari* system prevails largely in Bombay and Madras, the *zamindari* in West Bengal Bihar, parts of Assam Orissa, Madras and Uttar Pradesh, the *Mahalwari* in Madhya Pradesh, the Punjab and parts of U P

The system of intermediaries (zamindars talugdars, jagirdars inamdars, malguzars, and similar special tenure holders) has been abolished in all States wherever they existed

In Bombay, Saurashtra, Madras, Hyderabad, Himachal Pradesh, Delhi, Punjab, PEPSU, Madhya Pradesh, Uttar Pradesh there is also legislation which confers security of tenure fixes rent, puts a limit on the acquisition of land in the future, bans lease of land, vests proprietary rights in occupancy tenants and so on

In Jammu and Kashmir land reform has been more drastic A certain ceiling was fixed to the amount of land a man could hold, and the excess over that was distributed without compensation

The land revenue is assessed differently in different States In the following States it is a fixed share of the net produce Madras 50 per cent, Punjab 25 per cent, Uttar Pradesh 40 per cent In these States it varies from time to time Bombay, Hyderabad, Mysore, parts of Madhya Pradesh

Wherever there was permanent settlement (West Bengal, Bihar, parts of Madras Assam, Orissa and U P) it will automatically end with the abolition of *zamindari*

One of the problems of Indian agriculture is the small size of the average holding and of fragmentation The average size of a holding for the whole of India is 5 acres, but this varies from State to State Hyderabad 12 acres, Bombay 11 7 acres, Punjab 10, U P 6, West Bengal 4 5, Madras 4 4 The majority of the holdings will be less than 5 acres, a great majority indeed less than 2

The movement towards consolidation of holdings is partly voluntary and partly compulsory Legislation towards this end has been enacted in the following States Bombay, Delhi, Jammu and Kashmir, PEPSU, Punjab, U P

There is, in fact, a general movement towards fixing a maximum and minimum on land holdings Co operative farming is also being *organized*

Out of about 250 million agricultural population 2 per cent is non working land lords, 67 per cent peasant proprietors 13 per cent tenants and 18 per cent landless labourers There is tenancy legislation in many States while minimum wages for agricultural workers are fixed in Ajmer, Bilaspur Delhi Himachal Pradesh, Kutch Patna District of Bihar, Punjab

It may be mentioned here that upto Oct 5, 1953 the donations of land to the Bhoodan movement totalled 2 127 217 acres Out of this 5 481 acres were redistributed among 5,076 families

LAND USE

The topographical factors are as follows (the figures which are in lakh acres are inclusive of Jammu and Kashmir)

Total land area 8 126, mountains, 873 hills, 1 506 plateau 2 248, plains 3 498 unusable area, 3 082 topographically usable area, 5 044

Land area per capita—2 25 acres

The high density sub regions are as follows

Sub-regions	Population (lakhs)	Density per sq mile	Land area (lakhs acres)
Lower Gangetic Plains	700	832	538
Upper Gangetic Plains	389	681	366
Malabar Konkan	238	638	239
South Madras	307	554	355
North Madras and Orissa Coastal	211	461	293
Total 5 sub regions	1,845	660	1,791

The medium density sub regions are as follows

Sub regions	Population (lakhs)	Density per sq mile	Land area (lakh acres)
Trans Gangetic Plains	209	332	499
South Deccan	315	247	817
North Deccan	239	246	621
Gujarat Kathiawar	181	226	456
Total	974	1,051	2,393

The low density sub regions are as follows

Sub regions	Population (lakhs)	Density per sq mile	Land area (lakh acres)
The Desert	46	61	482
Western Himalayas	90	68	852
Eastern Himalayas	124	118	674
North West Hills	104	163	409
North Central Hills and Plateau	138	164	537
North East Plateau	290	192	967
Total	792	129	3,921

The following table shows the indices of land use in the high density, medium density and low density sub regions

Indices	High	Medium	Low	India
Percentage of net area sown to total land area	50	50	19	35
Percentage of net area sown to topographically usable area	62	70	40	56
Double crop percentage	23	6	12	13
Irrigation percentage	25	11	10	16
Fallow percentage	18	26	22	22
Percentage of forests	11	11	22	15
Percentage unavailable	17	15	16	16
Percentage unused	12	8	27	17

It has been found by sample study of Districts in different parts of the country (with a population of 12 crores) that the area of cultivated land per capita has fallen from 1891 to 1951 in some such proportion as the following (the area is given in cents)

1891—109 1901—103 1911—109 1921—111, 1931—104, 1941—94, 1951—84

The same study revealed that double crop area per capita has also fallen from 1891 to 1951

1891—12 1921—13 1951—10

The irrigated area per capita has fallen

1891—16, 1921—18 1951—14

FIVE-YEAR PLAN

The Plan seeks to overcome or reduce the existing shortages of food and raw material and transform the village environment and outlook of the rural population

The outlay is as follows (Rs in crores)

Agriculture	184 22
Veterinary, dairying	22 28
Forests	11 69
Co operation	7 11
Fisheries	4 64
Rural development	10 47
Community Projects	90 00
Local Works	15 00
Programme for scarcity affected areas	15 00
Total	360 41

The targets to be attained are additional production of 7 6 million tons of foodgrains, 1 26 million bales of cotton 2 09 million bales of jute, 0 7 million tons of sugar, 0 4 million tons of oilseeds

The major and minor irrigation works will irrigate 16 7 million acres

Under the reclamation programme 7 4 million acres are to be brought under the plough by the Central and State Governments at a cost of Rs 36 crores About 1 4 million acres will be reclaimed by the Central Tractor Organization, 1 2 million acres by similar organizations in the States The remaining 4 8 million acres are expected to be developed by the farmer with the assistance of the State

Improved seeds and fertilizers will be supplied and the use of improved implements encouraged

Besides schemes drawn up in consultation with the Central Government there are supplementary schemes proposed by the Commission

The allotments for the latter are as follows (rupees in crores)

Additional provision for minor irrigation works	30
Construction of tube wells	6
National extension organization	3
Grow More Food (1952 53)	10
Community Project	90

Under the Plan finance will be made available to the cultivator through the Reserve Bank, as well as by the States through co operative credit societies

It is hoped that by the end of the Plan period Rs 100 crores Rs 25 crores and Rs 5 crores will be made available as short term medium term, and long term loans respectively

About land policy the Commission thinks that there should be an upper limit to the amount of land held by one person This will apply to resumption of land for personal cultivation and future acquisition

Tenants who hold land should be enabled to acquire ownership on payment of compensation Where such land is cultivated by the owners themselves the test should be efficiency Farms which are badly managed should be taken over by the State and cultivated through the co operatives of landless or displaced workers

Owners of middle sized and small farms should be encouraged to develop their production on a co operative basis If they do not resume land for personal cultivation within a reasonable period the tenants should be allowed to become the owners

A tenancy should last at least for five years and should be renewable

Rents should vary between one fourth and one fifth of the produce

There should be co operative village management under which land and other resources are pooled and utilized in the interests of the community as a whole

For the same type of work everyone should receive the same remuneration

Increased facilities for training and experiments in co operative farming are to be provided at a cost of Rs 50 lakhs

A sum of Rs 2 crores has been provided for settling landless agricultural workers on reclaimed land

The State should also provide them with house sites give preference to co operatives of landless workers in the allotment of reclaimed land entrust co operatives of agricultural workers with construction work on behalf of the Public Works and Forest Departments

AGRICULTURAL TABLES*

AREA CULTIVATED AND UNCULTIVATED IN EACH STATE

(Thousand Acres)

State	AREA (According to village papers)	
	1948-49	1949-50

Total	582 888 (f)	614 610 (g)

* In the tables that follow there is some discrepancy in the estimates made in Delhi (in table on p 98) and those made in Bombay as shown in the following tables

(a) Includes 835 thousand acres for which details are not available

(b) Includes 1,603 thousand acres in respect of Banaskantha district of Bombay for which details are not available

(c) Difference is due to different method of survey

(d) Includes 151 thousand acres for which details of classification are not available.

(e) Includes 62 thousand acres for which details of classification are not available

(f) Includes 986 thousand acres for which details of classification are not available

(g) Includes 2,500 thousand acres for which details of classification are not available

** Excludes 'enemy held portion of the State.

CLASSIFICATION OF AREA IN EACH STATE

(Thousand acres)

State	Forests		Area not available for cultivation		Other uncultivated land excluding current fallows		Fallow lands		Net area sown	
	1948–49	1949–50	1948–49	1949–50	1948–49	1949–50	1948–49	1949–50	1948–49	1949–50

N A —Not available

N B —The yields per acre given in the statement have been obtained by dividing total production by corresponding total acreage of each crop In case of plantation crops (tea, coffee and rubber) they relate to plucked or tapped areas

LIVESTOCK

It is estimated that there were about 291 5 million livestock in 1950-51 Of these the cattle formed about 150 million, the buffaloes about 45 million, sheep and goats about 88 6 million and horses, ponies, mules, donkeys, camels and pigs about 7 9 million Besides these, there were 70 million poultry

In the same year Rs 7 17 crores worth of livestock was imported and Rs 12 16 crores worth of livestock was exported

For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and damper parts of the country For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk

The best known breeds are the Murrah, Nili and Ravi buffaloes of the Punjab, the Jafferbadi buffaloes of Saurashtra, Mehsana of Gujarat, Nagpuri of central India and the Surti and Pandharpuri, a type of Nagpuri buffaloes of Bombay State The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small, ill fed and inefficient

Draught cattle —Hissar (Punjab), Kherigarh and Powar (U P), Nagore (Rajputana) Malwi (M B), Goalao (M P), Khillar, Krishna Valley, Dangi (Bom), Ongole and Kangayam (Madras), Hallikar and Amritmahal (Mysore), Nimar (M B, M P and Bom)

Milch cattle —Sindhi and Sahiwal (both of West Pakistan, but small herds of which exist in the country)

Dual-purpose cattle —Hariana (Punjab), Kankrej (Bom), Gir (Saurashtra and Bom), Tharparkar (Kutch)

It has been estimated that the number of sheep in the country is about 39 million and that the total quantity of wool produced is 55 million lb annually The yield of wool per sheep varies greatly in different parts of the country In Punjab, Uttar Pradesh, Rajasthan and Saurashtra, the annual production per sheep is estimated at between 3 1 lb and 4 lb, while in the rest of the States it does not exceed 1 lb The average for the whole of the country is in the neighbourhood of 2 lb per sheep per year

Poultry-keeping is an important subsidiary industry of the poorer classes Indigenous poultry of low grade produce on an average 50 small sized eggs per year Steps are being taken to improve them by grading up with foreign breeds like Rhode Island Red, White Leghorn and Minorca

DAIRYING

Intensive steps are being taken by most States to improve the cattle, both from the view point of draught and milk production and many important schemes have been put in operation

Despite the large vegetarian population and large number of cattle, the dairy industry is still unorganised Of 195 million cattle and buffaloes, 70 million or 36 per cent are milch animals (females over 3 years) Milk yield is, however, low Cow 413 lb per year, buffalo 1,101 lb Though buffaloes form only 30 per cent of milch animals, due to their comparatively high yield, they account for 54 per cent of the total milk produced Buffalo milk has butter fat content 6 5 to 7 per cent as against 4 to 5 per cent of cow

Gross production of milk is 21 42 million tons of which 14 5 million tons are marketed the rest being used for home consumption or fed to calves *Per capita* daily consumption of milk and milk products varies from 16 89 oz in the Punjab to 2 64 oz in Orissa, average 5 5 oz

Most of the States have appointed Dairy Development Officers to organize dairying both on co operative lines as well as through private enterprise

The Government of Bombay has established a very large milk colony at Aarey near Bombay where about 15,000 animals are housed under the most modern conditions and milk supplied to Bombay City after pasteurization Milk supply schemes are operating in various States

Research in dairying is done at the Indian Dairy Research Institute at Bangalore This Institute also runs courses in Animal Husbandry and Dairying

ANIMAL DISEASES

There are nine Veterinary Colleges in India, one each at Gauhati, Patna, Calcutta, Bombay, Mathura, Hyderabad, Madras, Hissar and Jabalpur

The chief research centre is the Indian Veterinary Research Institute at Mukteswar in Uttar Pradesh and its branch at Izatnagar, near Bareilly This institute is maintained by the Government of India

The Indian Veterinary Research Institute also manufactures large quantities of sera and vaccines for the use of the State Department Serum institutes have also been opened in various States such as Bombay, Madras, Hyderabad and Uttar Pradesh

The chief diseases that the Animal Husbandry and Veterinary Departments have to deal with are glanders and surra in equines, and rinderpest, foot and mouth disease, hæmorrhagic septicæmia, black quarter and anthrax in ruminants while tuberculosis, Johne's disease and contagious abortion are assuming greater importance than in the past Glanders and surra are both scheduled diseases under the Glanders and Farcy Act Glanders is incurable but surra can now be successfully treated with Naganol or Antrypol This disease (surra) also affects camels, cattle and dogs and in recent years its importance as a bovine disease has been more widely recognised

Of the diseases of ruminants mentioned, all, with the exception of foot and mouth disease, can now be controlled either by means of sera or by vaccines

Indian poultry are also subject to several contagious diseases The dreaded Ranikhet disease is fairly wide-spread and its ravages have seriously hampered the poultry industry A chick passaged vaccine has now been developed at the Indian Veterinary Research Institute and trials conducted in the field have been very encouraging Fowl pox and fowl cholera vaccines are available for the protection of poultry against those diseases

FIVE-YEAR PLAN

Total allotment—Rs 22 28 crores

Useless cattle should be removed to gosadans. One hundred and sixty of these are to be opened in areas with grazing facilities at a cost of Rs one crore

To improve stock 600 centres are to be started under the key village scheme Breeding will be confined to three or four superior bulls of known pedigree, and inferior bulls will be removed or castrated Each centre will comprise three or four villages having about 500 cows of over three years of age

The number of veterinary hospitals will be increased from 2,000 in 1951 to 2 600 in 1956 Steps will also be taken to increase fodder supply

FOOD

TOTAL foodgrains available in the country (production plus imports) were as follows (figures in million tons)

1948—46 54, 1949—47 01, 1950—48 12, 1951—46 42, 1952- 46 26

The total population under rationing in 1952 was 31 25 millions

The total quantity of foodgrains distributed by Governments in 1952 was 6 69 million tons

It may be pointed out here that the Nutrition Advisory Committee has recommended 14 oz of cereals per consumption unit as the requirement for a balanced diet

The year 1953 opened with a stock of 1 9 million tons with the Central and State Governments

The provisional target of imports was set at 2 9 million tons

The estimated production for 1953 is 47 58 million tons

The total loss to the Central Government on account of subsidies during 1952 53 was Rs 21 11 crores including a special subsidy of Rs 3 crores granted to Travancore Cochin

The main planks of food policy was bulk imports of food grains, internal procurement and controlled distribution to the more vulnerable sections of the population

From June 1952 there was a certain degree of relaxation in controls The main features of this change were the substitution of statutory rationing by fair price shops, modification in the procurement system, greater freedom in inter-State movement of food grains, liberalization of food austerity regulations

Coarse grains were completely decontrolled in 1954 January, and foreign wheat in February

It was expected that wheat would be completely decontrolled in 1954 But control on rice would remain

But there was no change in the basic policy of maintaining strategic controls

Population under statutory rationing 1951—46 million, 1952—31 2 million

Population covered by other types of rationing including Fair Price Shops 1951—68 2 million, 1952 (Dec)—97 1 million

Total imports (till end of 1952) 3 9 million tons

Cost of imported grains Rs 210 crores

Storage capacity was for 8 lakh tons

The balance sheet of food grains distributed by Governments during 1952 was as follows

(In 000 tons)

—	1952	1951
Opening stocks with States	1,307	729
Procurement	3,416	3,766
Supplies to States from imports	3,474	4 679
Total availability	8,197	9,174
Offtake in States	6,696	7,867
Closing stocks with States	1,501	1,307
Central reserve	410	—
	1,911	1,307

The following States are generally surplus in wheat Punjab PEPSU, Vindhya Pradesh

The following States are generally surplus in rice Orissa, Madhya Pradesh, Uttar Pradesh, Punjab, Coorg

The following State is generally surplus in millets Hyderabad

From the point of view of food generally the position is roughly as follows

Surplus States Madhya Pradesh, Punjab, PEPSU, Orissa, Assam

Self sufficient States U P, Madhya Bharat

Deficit States Bombay, Madras, Mysore, Travancore Cochin, Saurashtra, Hyderabad, Rajasthan, Himachal Pradesh, Bihar, West Bengal

GROW MORE FOOD (1952-53)

Total allotment Rs 17 crores

Subsidies ,, 6 60 ,,

Loans ,, 8 37 ,,

Short-term loans ,, 2 00 ,,

The number of minor works planned was as follows

New wells and repairs to old wells	46,000
Irrigation tube wells	2 000
Dams channels and tanks	4,800
Persian Wheels and Rahats	8,800
Pumping installations	6,300

The area covered by land improvement schemes (acres)

Contour bunding and soil conservation	104,000
Clearance and reclamations	149,000
Mechanical cultivation	65,000

The quantity of supplies (tons)

Fertilizers	282,000
Urban compost	1,800 000
Oil cake and bonemeal	56,000
Green manure seed	2,000
Improved seeds	95,000

The addition in food production over 1951-52 12 3 lakh tons

The addition in cotton over 1950-51 1 63 ,, bales

,, ,, ,, jute over 1950 51 13 80 ,, ,,

,, ,, ,, sugar over 1950 51 3 80 ,, tons

The number of tube-wells drilled upto 31st December, 1952 in U P Bihar and Punjab was 470, the number drilled in North Gujarat 26

Under the Indo U S Technical Co-operation Agreement 2,000 tube wells were to be drilled during 1952 53 These were to be drilled partly departmentally and partly through private agencies

The Central Tractor Organization had 250 tractors in operation during 1952 53

It ploughed 2 35 lakh acres of kans infested land in U P M P, M B and Bhopal during Jan June 1952 Also 18 000 acres of jungle land in Naini Tal-Tarai were reclaimed

POSITION IN 1950-52

The total food production in the country for the years 1950 to 1952 was as follows

(In 000 tons)

—	1949-50	1950 51	1951 52
Rice	23 170	20,251	20 703
Wheat	6 290	6,360	5,768
Millets	8,067	7,962	7,666
Total of all food grains	46 018	41,744	41 211

The production by State and the Central grant to States or the contribution from the State to the Central pool is given by the following table

(In 000 tons)

State	1950		1951		1952	
	Production	Central grant Net Imports (+) or Exports (—)	Production	Central grant Net Imports (+) or Exports (—)	Production	Central grant Net Imports (+) or Exports (—)

PRODUCTION BY STATE

Production of individual foodgrains by State is as follows

(in 000 tons for 1951 52)

State	Wheat	Rice	Jawar	Bajra
Assam	1	14,73	nil	nil
Bihar	2,30	27,12	1	1
Bombay	2,31	7,71	13,38	4 59
Madhya Pradesh	4,68	24 22	12 41	17
Madras	2	40 25	9,37	4,18
Orissa	4	23,93	1	1
Punjab	11,26	1 20	39	74
Uttar Pradesh	25,33	15 29	6,92	7 85
West Bengal	41	34,79	3	less than 500

IMPORTS (1950-52)

The imports for the years were as follows (figures in million tons)

1950—2 1, 1951—4 7, 1952 (provisional) - 3 9

The cost of import of food grains was as follows (figures in crores of rupees)

1950—80 6 crores, 1951—216 4 crores, 1952—209 7 crores

The imports of individual grains were as follows (figures in million tons)

	1950	1951	1952
Rice	0 35	75	0 72
Wheat (including flour)	1 41	3 02	2 51
Others	0 36	0 95	0 63

Figures with costs for 1952 were as follows

	in 000 tons	in Rs lakhs
Rice	24,59	12,844
Wheat	7,22	5,011
Millets	6,31	2,812

Countries from which imports were obtained from 1950 to 1952 with quantity (in million tons) and C & F value (in lakhs of rupees) were as follows The figures for 1952 are provisional

Country	1950		1951		1952	
	Quantity	Value	Quantity	Value	Quantity	Value
U S A	39	10,02	2 40		2 30	
Australia	88	32,45	25		22	
Argentina	48	17,66	51		—	
Canada	003	13	33		53	
Russia			10		—	
Pakistan	001	3	16		01	
Burma	18	10,09	30		38	
Siam	11	6,19	22		18	
Other countries	06	3,27	46		24	
TOTAL	2 10	79,84	4 73	2,16,35	3 86	2,09,73

The countries from which the imports of individual grains were made in 1952 were as follows

(In 000 tons)

	Wheat	Rice	Millets
Canada	5,25	—	—
U S A	17,63	—	5,40
Australia	1 71	—	—
Burma	—	3,76	—
Thailand	—	1,84	—
Pakistan	--	14	—
China	—	1,48	91

RATIONED POPULATION

The statutory rationed population on the last day of the year (except for 1952) is given below The figure is in thousand persons

State	1950	1951	May 31, 1952
Assam	420	474	472
Bihar	250	256	235
Bombay	10 609	10 482	9 827
Madhya Pradesh	—	—	—
Madras	5 905	6 159	6 143
Punjab	1 738	1 706	1 698

TOTAL	45,723	46 815	46,025

PROCUREMENT SYSTEMS

At the time of writing (Nov 1953) the following systems of procurement were in operation

ASSAM The State has been divided into a number of zones for purposes of procurement In each zone purchases are made by agents appointed by the Government, and the individual producers and landlords are required to sell to Government all stocks exceeding 200 maunds

BIHAR Monopoly procurement rice and paddy in the three districts of Ranchi Manbhum Sadar and Santhal Parganas (excluding Gonda and Sahibganj Division)

BOMBAY Monopoly procurement of rice throughout the State In Thana and Kolaba purchases are also made by contracts with rice mills In a few taluks of these two districts, informal levy has been introduced recently Wheat, millets and other coarse grains are purchased on a voluntary sale basis

MADHYA PRADESH Levy on trade

MADRAS A small quantity of rice is procured by means of levy on the cultivators from the main harvest in some surplus districts

ORISSA Monopoly procurement of rice through trade agents

PUNJAB Rice mills can dispose of rice only under orders of Government Monopoly procurement of wheat was suspended on April 27, 1953

UTTAR PRADESH Only rice is procured from licensed traders for export

WEST BENGAL On Oct 14, 1953 the policy of procurement of rice was abandoned As a measure of price support, the Government will purchase paddy or rice in areas where the market price goes below a certain level and becomes uneconomic to growers

HYDERABAD Procurement of rice and paddy is in operation under the Central Government s Foodgrains (licensing and procurement) Order, 1952 in the predominantly rice growing areas A limited quantity of jowar is procured from the surplus areas by a scheme of tenders from the trade

KASHMIR Levy on cultivators

MADHYA BHARAT Monopoly procurement of wheat System of jowar procurement is the same as in Hyderabad

MYSORE Levy on cultivators confined to rice only

PEPSU Purchases through a syndicate of foodgrain dealers on behalf of Government from approved mundies

RAJASTHAN Levy on quantities moved from one district to another No procurement of Kharif crops

SAURASHTRA Procurement has been abandoned

TRAVANCORE-COCHIN Levy on cultivators on a slab basis and related to the productivity of the land

AJMER No procurement

BHOPAL Graded levy on cultivators through agents appointed by the Government

BILASPUR No Procurement

COORG Monopoly Purchases are made through agents appointed by the Government

DELHI No Procurement

HIMACHAL PRADESH Monopoly of purchase of wheat in Mandi and Sirmur districts only

KUTCH Monopoly In addition every landholder will have to sell to Government a quantity of foodgrains equal in value to the amount of land revenue and taccavi instalments payable for the year

MANIPUR Procurement for export through approved traders from the open market

TRIPURA Purchases from the open market as also direct from the cultivators

VINDHYA PRADESH The traders are liable to sell to Government upto 80 per cent of their purchases

CENTRAL SUBSIDY (1951-52)

The Central subsidy to the States in lakhs of rupees was as follows Assam, nil, Bihar, 11, Bombay, 390, M P, 16 Madras, 123, Orissa, nil, U P, 435, West Bengal, 174, Hyderabad, 25 Kashmir, nil, M B, nil, Mysore, 7 5, PEPSU nil Rajasthan, nil, Saurashtra, nil, Travancore Cochin, 307, Ajmer, nil, Andamans, nil Bhopal, nil, Coorg, nil Delhi 221, H P, Kutch, Manipur, Tripura, V P, nil

The total expenditure on food subsidy was Rs 4 609 lakhs

ESTIMATES FOR 1952-53

It was estimated that the production of food grains for all India would be 47 58 million tons The quantity proposed to be imported was 2 lakh tons

It was estimated that the total production of food grains for individual States (in 000 tons) would be Assam 1 561 Bihar, 4 831, Bombay 3 364 M P 4 608 Madras 6 790, Orissa, 3,185 Punjab 2 337, U P, 8 930 West Bengal, 4,064 Hyderabad 1 666 Kashmir, 392, M B, 781, Mysore, 456 PEPSU, 724, Rajasthan, 1,048 Saurashtra 309, Travancore Cochin, 405, Ajmer, 53, Andamans, 2 Bhopal 137, Coorg, 42, Delhi, 28 H P 134 Kutch, 51, Manipur, 71, Tripura 137, V P, 567

FOOD SHORTAGE

'Food controls is really a misleading term for what is in reality a gigantic State trading system set up by the Central Government and all State Governments working in co-operation with one another

The operation of this system during 1949, 1950 and 1951 may be summed up as follows

On an average 43 0 lakh tons were purchased every year in different States within the country —mostly from farmers directly, in some places from traders Another 34 8 lakh tons were purchased every year from various foreign countries These stocks were designed to meet the daily needs of crores of people The average annual issues made from these stocks to grain shops, ration shops, etc amounted to 77 1 lakh tons

The total number of persons who received supplies (on March 31, 1951) numbered 12 66 crores

The time when undivided India changed over from being a net exporter of foodgrains into a net importer was about 1921

About 1880 the ordinary outturn of food in British India was 50 million tons and the surplus available for storage, export, etc was more than five million tons

The average imports in lakh tons for 1947-52 was 32 7

The composition of the imports had changed greatly Before World War II India was importing rice heavily but exporting wheat After World War II there was very little rice and a great deal of wheat and coarse grains

The sources from which the imports were coming in had also changed The average imports from Burma, for instance, were 12 1 lakh tons during 1948 50, which was less than two fifths of the level reached just before World War II

The decline in imports cannot be due to a shift in cultivation from food to cash crops, for this shift is hardly significant From sample survey we find that the proportion of land sown with food crops to the total sown area changed as follows from 1891 to 1951

1891—80 7 per cent, 1921—77 8 per cent, 1951—77 2 per cent

Figures for certain specific districts show the shift was more significant before 1921 than after, it was more significant in south and west India than elsewhere, shifts in other directions also occurred being significant in north and central India

A graph of the food prices from 1800 to 1950 will go something like this

For the first fifty years there will be a more or less level course For the next fifty years it is no longer level, each decade a little higher than the preceding one the fluctuations tend to be sharper Then for the last fifty years one big peak marking World War I, then a valley marking the depression, then finally the tallest of all peaks on which we stand today

The index of food prices (Aug 1939=100) was somewhat as follows

1948—374, 1947—389, 1950—410 1951—410, 1952 Jan—393 1952 Dec—345 (the lowest level reached by food prices after the war ended)

The prices of certain kharif foodgrains in 1952 Dec were as follows

Rice Gaya Rs 19, Bilaspur, Rs 13 as 4 Contai, Rs 14, Ilkamgarh Rs 14 as 8, Gorakhpur, Rs 19, Russelkonda, Rs 10

Jowar Akola Rs 10, Chandausi, Rs 11 as 4, Bharatpur Rs 10 as 8

Maize Chapra Rs 14, Nanpara, Rs 11 as 8

CONSUMPTION

There are no reliable statistics and production and consumption figures are subject to a wide margin

The National Sample Survey yielded the following results

The average rural household produced 19 9 maunds of foodgrains every year and ate 26 4 maunds during the year

The Sample accepted the figure for consumption but rejected as wide of the mark the figure for production

Though figures for food production are throughout unreliable the following generalizations should be regarded as among the least inaccurate

The average yield on one acre sown is 6 0 maunds for the country as a whole The rates in maunds for the respective zones are south India (8 2), east India (7 3) north India (6 6), north west India (6 2), central India (4 5) and west India (3 6)

The average rate of consumption per head per annum is 4 5 maunds The rates in maunds for the respective zones are north west India (5 0), central India (4 8), north India (4 6), east India (4 6), west India (4 0)

These rates include the grain fed to cattle and grain wasted between field and kitchen

India s shortage round about 1951 was 34 lakhs—being the difference between 590 lakh tons of consumption and 556 lakh tons of harvested yield

The shortage is equivalent to foodgrains needed for consumption for 21 days

Among the zones the shortage is negligible in central India and relatively small in north India and north west India The shortage in the other three zones expressed in the number of days of consumption requirement is west India (67 days), south India (34 days), east India (17 days)

The average shortage (21 days' consumption) is small But the fact is important because free trade cannot function in a market which is genuinely short of foodgrains—however small the shortage

What needs explanation is why the imports are not larger The correct level of imports should be 100 lakh tons and not 34 lakh tons Per capita production has declined by one-fifth from what it was thirty years ago Assuming that per capita consumption was the same then (4 5 maunds) as now then the shortage should be 0 9 maunds per capita Actually the 34 lakh maunds imported allows for 0 3 maunds per capita Hence the correct level of imports should be three times 34 lakh tons—100 lakh tons

On balance it seems likely that the average level of food consumption, though it is higher than in the thirties has on the whole tended to fall

HISTORICAL NOTE

About 1880 the ordinary outturn of food in British India was 50 million tons, and the surplus available for shortage, export, etc was more than five million tons

The net exports out of undivided India and Burma, the net exports out of undivided India and the net exports out of Burma are given in the following table in lakh tons

—	Out of undivided India and Burma	Out of undivided India	Out of Burma
1890-94	25 5	12 4	13 0
1895 99	21 4	6 2	15 2
1900–04	31 6	10 4	21 2
1905–09	28 4	5 2	23 2

Figures in lakh tons for undivided India without Burma for 1915 1919 are

Exports 15 9, imports 11 9, net exports 4 0

During the next five year period these figures (in lakh tons) undergo a significant change

—	Imports	Exports	Net imports
1920–24	11 4	9 8	1 6
1925 29	15 9	8 3	7 6
1930 34	18 4	5 7	12 7
1935-39	20 7	6 9	13 8

The average level of net exports out of Burma in lakh tons was as follows

1905–09	23 2
1935–39	30 6

The subsequent figures for net imports in lakh tons are as follows

1940—9 6, 1941—4 3, 1942 (net exports) —2 9 1943—3 0, 1944—7 3 1945—9 3 1946 —25 8, 1947—26 6, 1948—30 5, 1949 —28 6, 1950—27 2

*

FISHERIES

THE fisheries of India potentially rich as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe North America or Japan The fishing industry particularly the marine section has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish cured as well as fresh from the growing population of the great cities within reach of the seaboard

The caste system however exerts a blighting influence on progress Fishing and fish trade are universally relegated to low caste men who alike from their want of education, the isolation caused by their work and caste and their extreme conservatism are among the most ignorant suspicious and prejudiced of the population extremely averse to changing the methods of their forefathers and almost universally without the financial resources necessary for the adoption of new methods even when convinced of their value 'Higher' caste capitalists have hitherto fought shy of associating with the 'low' caste fishermen and except in large operations on new lines, the capitalists cannot be counted upon to assist in the development of Indian fisheries As in Japan it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the uplift and education of the fishing community and in the introduction and testing of new and improved apparatus and methods

Allotment under the Five Year Plan Rs 4 64 crores

BOMBAY

Important varieties of sea fish caught along the coastline Surangi (White Pomfret) Halwa (Black Pomfret) Chol (Jew fish) Dara (Giant Threadfin) Ravas (Indian Salmon) Kuppa (Futa) Surmai (Seer fish) Boi (Mullet) Bombil (Bombay duck) Bangda (Mackerel), Mushi (Sharks) Wam (Eels)

Estimated production about 1 50 000 tons

Price per ton of fish at present Rs 292 The total value of fish caught in this State Rs 4 38 00 000

The number and names of the more important fishing villages and of the fishing grounds

Greater Bombay Lower Colaba, Worli, Danda, Versova, *Thana District* Bassein, Arnala, Dativre Satpati Navapur *Surat District* Umarsadi, Kolak *Broach District* Bulsar Kosamba Broach *Amreli District* Madhwar, Kotda Velan Okha *Kolaba District* Kiranja, Versoli Theronda, Revdanda Murud, Bharadkhol *Ratnagiri District* Burondi Dabhol Jaigad Ratnagiri Vijaydurg Jaitapur Malvan Deolbag, Vengurla *Kanara District* Majali, Karwar Bingi Chendia Harwada Kemi

Surveys carried out by several private and Government vessels in the north of Bombay have revealed extensive fishing areas off Saurashtra and Okha

The estimated fishing population 168 368

The facilities available for curing storage and refrigeration, co operative marketing are

Several ice factories in the city and also at important fishing centres along the coast

Annually, some addition to the available cold storage space is being made by extension to the existing plants and establishment of new plants

A seven ton ice plant and 30 ton cold storage were erected by Government at a cost of Rs 1,31 000 and handed over to the Satpati Fishermen's Sarvodaya Co operative Society for operation It now owns 40 out of the 130 mechanised craft in the State, all of which carry ice aboard their vessels to preserve fish right from the time it is caught

The use of insulated road vans for transport of ice fish will shortly be demonstrated to fishermen when a motor truck estimated to cost about Rs 40 000 arrives from America under the Technical Co operation Aid Programme With a mobile refrigerated transport system a further step will have been taken in the direction of preservation of fish

Marketing facilities A new structure was put up in 1951 by the Bombay Municipality to cater for the City's fish trade Lifts are being installed for the convenience of shoppers

A new market was opened during the year at Grant Road adjoining the original and congested market there at a cost of Rs 16 lakhs In the fish section space is provided for 250 squatters Sufficient space is now available to traders to display their products

Marketing facilities have also been provided at Majali Karwar Ankola Kumta, Honavar Gokarn and Bhatkal in the Kanara district and Kankaoli, and Malvan in the Ratnagiri district

About ten times the quantity of fish at present caught in the entire State will be necessary to meet the consumers demand

The quantity available for sale to the public has shown a steady increase which is approximately as follows —

Year	*Tons*
1948 49	29,000
1949 50	31,627
1950 51	31,674
1951 52	35 849

Companies that explore the possibilities of deep sea fishing Tuyo Fishing Co Ltd, has been permitted by the Government of India to conduct trawling off Bombay and Saurashtra waters The firm employs trawl nets for deep sea fishing The total quantity of fish landed by the trawler since its operation to date is about 1,800 tons

West Coast Fisheries (Travancore) Ltd commenced deep sea fishing operations in Bombay waters in February 1953 It employs trawl nets for deep sea fishing and landed about 94 tons of fish during four voyages The trawler is now conducting fishing operations off Travancore waters

GOVERNMENT HELP

Government effort in up to date fishing technique, money spent, trawlers gear used quantity of fish caught The State Government built the vessel Tapase , now renamed the Mysis in 1947, at Rs 60,000 for catching fish

Number of power propelled vessels owned by fishermen 130

Two improved type of fishing craft at a total cost of Rs 34 000 were also built during the same year and allotted to two fishermen's co operative societies in the State on half subsidy and half loan basis for capture of fish

So far Government advanced as subsidy Rs 1 93,127 and as loans for mechanisation of fishing craft Rs 4 11 076 Loans to individual fishermen during the past seven years for purchase of boats, nets, and other fishing gear Rs 16 00 000 Fishermen now possess more boats and nets with which they are able to catch more fish

100 marine diesel engines valued approximately at Rs 11,00,000 were to arrive in Bombay towards the end of 1953 and be made available to groups of fishermen at half cost, the balance being treated as subsidy These engines are allotted by the American Government under I C A Programme

Government efforts in educating fishermen —

10 fisheries schools have been established in important fishing centres, imparting special training in net making, boat repairing, fish preserving, etc Ratnagiri District 4, Kanara District 3, Thana District 1 and Surat District 2

Annual expenditure on these schools Rs one lakh

The Department of Fisheries has also a scheme to train fisher youths in the operation of power vessels and as navigators So far 70 apprentices have been trained and 16 are under training

Two graduates of the fishing community were also sent to U S A by the State Government for two years to receive training in canning refrigeration and other specialised branches of fisheries

Several candidates from fishermen's community have also received training aboard the Japanese trawler Tuyo Maru at Government expense

Public Museums aquaria The State Government maintains the Taraporevala Aquarium along the Marine Drive The exhibits include both fresh water and marine forms, found along the coast of the State The aquarium has facilities for marine biological research

A fish farm is being established at Khopoli, District Kolaba at an estimated cost of Rs 1 03 000 A fisheries technological laboratory has been established at Sassoon Dock for conducting research on problems relating to ancillary industries like shark liver oil gelatine, glue, fish meal etc

ANCILLARY PRODUCTS

To ensure quick and clean extraction of oil a Sharples super centrifuge a fish liver boiler and a steam boiler have been installed One piece of work the laboratory does is to test samples of shark liver oil from the public for vitamin A' content the number of samples so tested average over 500 a year A Beckmans spectrophotometer has been imported from the U S A for this purpose

In 1952 53 the output of neat shark liver oil was 5 070 gallons with an average vitamin A' content of 10 000 I U s/Gm The oil when processed was capable of yielding 4 68 000 lb of Oleum vitaminatum of B P standard Besides this there is the oil disposed of by the fishermen direct which will be about 2 000 gallons

The processed products marketed by the department comprise Sharkovit with vitamin A and D 1 000 and 100 I Us per gramme respectively, Hasmin Liquid a shark liver oil concentrate with vitamins A and D' 20,000 and 2 000 I Us/Gm respectively

An encapsulating unit ordered out from the U S has been installed at the laboratory for the manufacture of capsules locally

Another important by product of fisheries is fish meal The departmental laboratory is also well equipped for the manufacture of edible gelatin and fish glue both for adhesive as well as photo processing work

The following schemes have been included in the State Government's Five-Year Plan Study of marine biology and establishment of an aquarium in Bombay, Establishment of a marine biological station at Ratnagiri Establishment of ice and cold storage plants along the coast Development of inland fisheries at Khopoli, Stocking of inland waters with carp fry, Provision for merged states for inland pisciculture, Higher technical training for fisher-youths abroad, Establishment of fisheries schools along the coast, Provision for merged States for training schemes

Receipts of the department during the financial year 1951 52, are shown below —

	Rs
Fish curing yards	1,84,360
Fisheries Tech Laboratory	2,35,885
Other receipts	17,995
Taraporevala Aquarium	79,914
Total	5,18,154

The State Government's share under the U S operational Agreement No 5 amounts to Rs 30 lakhs, to be utilised to procure up to-date equipment to increase existing supplies of fish and to improve the socio economic condition of fishermen The equipment to be ordered

out is as follows 100 marine diesel engines, one dredger, one 11-ton ice plant and 30 ton cold storage for fish, one quick-freezing plant and equipment to enlarge the present ice production capacity of the plant at Satpati, and one insulated road van The State will also receive for distribution among fishermen, nylon, fish hooks and hemp twine

The total budget allotment for the department for the year 1953 54 is Rs 11,43,000

The designation of the department is Office of the Director of Fisheries, Bombay

MADRAS*

Statistics of landings of the important shoaling fishes of the west and east coasts of the State for the year 1951 52

Name of fish	Wt in Mds	Value in Rs
A WEST COAST.		
Oil Sardine	290,649	19,72,295

Miscellaneous	476,404	1,23,508
	6,954,426	22,12,189

The names of Sea Fish and price per maund — Salmon Rs 75, Sardine Rs. 70, Prawns Rs. 63; Pomfrets Rs 50, Mackerels Rs 88, Seer Rs 63, Hilsa Rs. 63; Perch Rs 75; Bekti Rs. 75, Flying Fish Rs 37-12, Jew Fish Rs 62-8, Shark Rs. 100; Silver Bellies Rs. 50, Caranix Rs 112, Hamiramphus Rs 56-4, Ribbon Fish Rs 62 8; Lutjanes sp. Rs. 100, Polynemes Rs 50; Soles Rs 50, Freshwater Fish Carps (Iced) Rs. 38; Cat Fish Rs 63

On the west coast there are six fishing villages in South Kanara and 17 fishing villages in Malabar. On the east coast there are 82 fishing villages

Census of Inland Fisherfolk for 1949

	Men	Women	Children
WHOLE TIME	35,867	38,067	56,296
PART TIME	8,076	7,477	9,983
Total	43,943	45,544	66,279

Fish curing yards were started by Government where good salt is supplied and the process of curing is supervised and controlled by officers of the Fisheries Department Salt is being issued for fish curing at subsidised rates in the fish curing yards

Two Ice cum cold storage plants are being erected one at Mangalore and another at Calicut When these are completed the fishermen will be able to save from spoilage at least 25 per cent of their catches and keep them in a fresh condition till they are taken to the market

Fishermen's co-operative societies formed in many villages buy the fish from the members and market it

The department have tried deep sea fishing with trawlers A secondhand admiralty trawler "TR 8" was purchased and reconditioned in England at a cost of £5,699 and named "Lady Goschen"

A survey of the fishing banks was made in 1927 Only a few tried trawls off Madras were possible during this period The trawling ground explored is the extensive submarine plateau within the 100 fathoms line which is around of Cape Comorin The fish landed belonged to some 20 species nearly all of which were bottom feeders The prime table fish caught sea brem (letherinus nebulous) Snappers (Lelilianus dedecacanthus) and L reivulatus Rock cod (Epinephelus spp) and Spade fish (Ephippus orbis) Arranged according to the quantity and value the species mostly caught are Lethrinus nebulosus over 1/6th of total catch Epinephelus spp less than 1/7th, Lutijanus doecacunitus 1/9th and (Diageammu punctutum) 1/20th

The aim of the survey was exploration and no attempt was made to capture large quantities of fish. The fish that were captured during the experiments amounted to 26 061 lb

Schools have been opened for fisherchildren Natural Science and Fisheries Science play a large part in their curriculum The children are taught handicrafts like coir rope making, mat weaving, net making, etc Books, pencils and stationery articles are given free to these children They are given all sorts of encouragement. Students are taken out on excursions to places of fishery interest

Offices of the department and teachers of Fisheries schools have done a great deal to improve the standard of life of the children

There are a museum and an aquarium belonging to the department In the Museum, preserved specimens of all important marine and fresh water fishes, various kinds of sharks, aquatic curios like sepia, labyo, sea horse etc are all exhibited The Aquarium has eight large aquaria in which Tropical Aquarium Fishes like Gold Fish, Blak Mollies, Sword Tails, Guppies, Blu Gouramy and Food fishes like Catla, Labeo, Cirrhina, Gourmi, etc are kept Most important experimental fish farms are Sunkesula Fish Farm, Praema Fish Farm, Ippur Fish Farm, Mopad Fish Farm, Mettur Fish Farm, Poondi Fish Farm, Thanthipandal Fish Farm, Chetput Fish Farm, Vellore Fort Moat Farm and Chingleput Fort Moat Farm The ponds in the farms and other ponds belonging to the department are intensively stocked with quick growing fishes every year and the catches are marketed to the Public

In addition to being an important source of food supply rich in proteins and albumenoidos, food fishes play an important part in the manufacture of several bye-products in use in the everyday life They are fish-oil (body oil and liver oil), shagrien, isinglass, fish glue, fish meal (guano), fin soup, pearl essence, fish manure, etc

The Government Shark Liver Oil Factory was opened at Kozhikode, which supplies shark liver oil for use in hospitals and for sale to the public

Schemes under the Five Year Plan Intensive seed collection and distribution for development of inland waters, Improvement of indigenous craft and tackles, Mechanisation of inshore craft was undertaken at Adirampatnam in 1948 In the indigenous crafts there is not sufficient room for effective use of the gears for holding the catches and much time and manual labour is being wasted in rowing to and from fishing grounds Other items are Provision of quick transport facilities—installation of cold storage and ice plants The transport vans are at present working at the following routes —

Sriparu and Ellore, Mettur to other places in Salem District and Bangalore, Panjore to other markets in the District, Tuticorin to other centres in the District, Mangalore to other centres, Kelambakkam to Madras, Ennore to Madras, Tiruvallavayil to Madras and Tiruvallaivanam to Madras

Revenue from Fisheries Rs 23,32,638 6-11.

Latest Budget Allotment for the Department for 1953 54 Rs 44,34,400

Government of Fisheries Department, Madras. Designation of the department

MYSORE

Mysore State has only freshwater fisheries

Kinds of freshwater fish caught Murrels, Cat fishes, Carps and Eels

Price level of fresh fish 10 as, 9 as and 6 as per lb of Murrels, Cat fishes and Carps respectively during April 1952 to March 1953

Number and names of the more important fishing villages and of the fishing grounds Scattered throughout the courses of all the river drainages of the Cauvery, the Tungabhadra, the Kabbini and the Vedavathi Many important fishing villages centre round Krishnarajasagar, Hesserghatta, Bethamangala, Ramasagara, Anjanapur, Bannur, Gubbi and Sulekere which are the more important reservoirs and irrigation tanks

The fishing population is divided into five communities Thigalas, Uppaligas, Besthas, Killekyathars and Burude besthars

No facilities for curing, storage, refrigeration or co-operative marketing are provided by Government

60 lakhs, *i e* 82 per cent of the population eat fish Annual requirement 4,000 tons

Present production meets only 2 per cent of the demand

There is only one Company called the Mysore Fisheries Company engaged in fishing Capital investment Rs 5,000 Quantity of freshwater fish caught annually 100,000 lb Methods used They employ row boats and operate the waters with the aid of gill nets, drag nets and cast nets for fishing

Only a small experimental fishing unit is operating at Hesserghatta Government has invested Rs 3,000 in large-scale gill net operations using a power driven boat. Production per annum 12,000 lb

Fishermen are being encouraged to renew their profession and are gradually extricated from the middlemen Over 3,000 fishermen were thus rehabilitated.

Experimental fish farms 3 in each of the areas of Markandeya, Markonahally and Hesserghatta reservoirs Museums One at Bangalore and the other at Krishnarajasagar No aquarium at present The Mysore Aquarists' Association has begun to agitate for an aquarium in the State.

* Includes Andhra

There are no ancillary industries like liver oil, gelatin glue or fish meal

The present fishery development scheme is included in the Five Year Plan and is being operated at an annual cost of Rs 44 000 Revenue from fisheries for 1952 53 Rs 56,000

Budget allotment for the department for 1953 54 About Rs 48,000

Designation of the department in the State Fisheries Section Department of Animal Husbandry Services in Mysore, Bangalore

ORISSA

Kinds of sea fish caught Pomfrets, Mackerel, Sardine and White Bait Kinds of river fish caught Labio Rohita Catla Catla, Cirhina Mrigala, Labio kalbasu and other Carps and Cat fishes

Latest figures of fish cured (Year 1947 48) Quantity 32 142 maunds 15 seers

Average price per maund of sea fish in pre-war years Between Rs 5 and Rs 10 Present price per maund of lower varieties Between Rs 10 and Rs 20 Wholesale price per maund of good fish like Pomfrets Between Rs 30 and Rs 50 Wholesale price per maund of higher varieties of river fish Between Rs 65 and Rs 100 Price of smaller fish Between Rs 30 and Rs 50

Important marine fishing villages Patisona pur Markandi Gopalpur Paavagi Sonapur Surla, Arvapalli Kandarapalli, Gajapatinagar, Purnuabandha Damodarpur, Rambha, Chanmuhani and Arkhakuda

Important assembly centres in the Chilka lake Kaluparaghat Rambha Balugaon, Gangadharpur, Kuhuri, Chhatrapur and Khallikota

Important inland fishing centres Ansupa lake Russelkonda reservoir and Kausalya ganga

Number of fish curing yards run by the fishermen s own co-operative stores 6 Number of ice factories which cater to preservation of fish for transport to Calcutta and elsewhere 6 Co operative marketing has developed in the Chilkha area The annual volume of trade ranges between Rs 25 to Rs 40 lakhs

There is considerable demand for fish in the urban markets unlike the interior where it is very much less on account of lack of purchasing power

The demand is approximately 100 times more than the supply

There are no deep-sea fishing companies in the State

The State has not taken up deep sea fishing There are no fishermen s schools

There is a small experimental aquarium attached to the Fisheries Department in Cuttack

Major experimental farms in the State Cuttack fish farm, Puri fish farm, Chondwar fish farm, Sonepur, Sambalpur, Balasore, Kausalyaganga, Angul, Bandh

Shark liver oil industry has developed recently Annual production 1951 52—2,575 lb crude oil, 1952 53—2,240 lb crude oil

Research is going on in the manufacture of agar agar and hydrolysed protein

Schemes under the Five Year Plan Re-organisation of the Fishery Department, Development of Inland Fishery, Biological and Technological Investigation of the Chilkha Lake Fisheries, Development of Mahanadi Estuary Development of Marine Fishery, Co operative Marketing of Chilkha Fish

Income from Fisheries Department ranges between Rs 1 5 and 2 2 lakhs per annum which does not include rent for water areas

Budget allotment 1952 53—Rs 6,00,000, 1953 54—Rs 5,83,549

The department is designated as Department of Fisheries, Orissa, which is under the administrative control of the Director of Industries who is the ex officio Director of Fisheries

THE PUNJAB

Kinds of fish caught Goonch (Bagarius), Bochwa (Chupisoma Garua), Silund (Silonia silondia) Mullee (Wallagonia attu) Nalakhi (Heteropneustes fossilis) Singhari (Mystus aor), Khaga (Rita rita) Kalbans (Labeo calbasu), Rahu (Labeo Rohita), Gid (Labeo displostomus), Bhangan (Labeo microphthalmus) Mori (Cirrhina mirgala), Sunni (Cirrhina iaba), Theila (Catla Catla) Kharni (Barbus sarana), Mahseer (Barbus putitora), Chilwa (Barilius modestus), Pari (Notopterus chitala) Saul (Ophicephalus Marulius), Daula (Ophicephalus punctatus)

Total quantity of fish caught in 1952 5,901 maunds 38 seers 11 chh

Total value of fish caught in 1952 Rs 99,440

Price level Prices vary from market to market In some markets prices are fairly high On the whole prices ranged for Wholesale at as 12 per seer, Retail at Re 1 per seer

Approximate strength of fishing population 15 000

There are no facilities available for canning storage and refrigeration but the catches of fishermen are collectively marketed under the supervision of the Departmental staff in the shops of Fish Commission Agents appointed by Government

The demand for fish in the local market is very low, the population being mostly vegetarian

After meeting the local demand the fish is exported to Delhi and U P where it finds ready market

There are no sea fisheries There are no companies engaged in exploring and exploiting the fisheries of the State

All fish is caught directly under the supervision of the departmental staff No trawlers are used, only primitive methods of fishing by nets are used

There is no school in this State for educating the fishermen and their children for improved and up-to date methods of fishing

Public museums and experimental farms in the State Government Fish Farm, Batala (District Gurdaspur)

There are no industries for fish products in this State

No scheme relating to Fisheries in this State has been included in the Five Year Plan

Revenue from Fisheries (1952 53) Approximately, Rs 1,20,000

Budget allotment for the department (1953-54) Rs 1,22,050

Fisheries Department in the Punjab is attached to the Civil Veterinary Department under the control of the Head of the Department who is designated as Director Veterinary Services and Warden of Fisheries, Punjab

UTTAR PRADESH

Kinds of freshwater fish caught

In plains (*i*) Major carps like Labeo Rohita Labeo Calbasu, Cirrhina, Mrigala, Catla Catla Labeo Genius, (*ii*) Small carps (*iii*) Munlows (*iv*) Cat fishes, (*v*) Mullets, (*vi*) Spiny eels, (*vii*) Feather backs, (*viii*) Glass fishes

In hills (*i*) Kumaon Mahaseer (*ii*) Hill Trout, (*iii*) Asela, (*iv*) Khurant (*v*) Discognathus, (*vi*) Orelnus

The State also imported three exotic varieties of fishes, *viz* Mirror Carp and Darjeeling Mahaseer for culture in Uttar Pradesh hills and Gourami for culture in the plains

Total quantity of freshwater fish caught (1944) 241,304 mds

Total value of freshwater fish caught in 1952 The Department only auctions the waters stocked and maintains such records *The value realised from such sale during 1952 53* is Rs 1,46,080

Price level of the fish during April 1952 to March 1953

Varieties	Wholesale price per maund		Retail price per seer	
	Average maximum	Average minimum	Average maximum	Average minimum
	Rs	Rs	Rs	Rs
Rohu	57	44	1 14	1 6
Nain	55	41	1 12	1 2
Bhakur	56	44	1 10	1 4
Calbose	55	40	1 11	1 4
Parhin	39	31	1 4	0 14
Turgan	40	29	1 6	0 14

Approximate strength of the fishing population Latest figures available are for 1944 about 10 695 families

Facilities available for curing, storage and refrigeration, co-operative marketing Generally fresh fish arrive in the markets and curing is rarely resorted to Gorakhpur, Basti, Kanpur, Lucknow and Dehra Dun are some of the fish markets where there are some arrivals of dried and salted fish

Active steps are being taken to encourage fishermen to form co-operative societies and to help them as far as possible in the procurement of their requirements The first society of its kind for co ordinating all Roak fishermen residing in the stretch of Ganges in Allahabad district is under formation at Allahabad

Potential demand for fish in the local markets There is great demand in the local market A major portion of the fish production in the State is exported by the fish traders to more lucrative markets outside the State such as Calcutta, Delhi, etc To supplement this the Tank Stocking and Development Scheme as part of Government of India s 'Grow More Food Campaign' was launched in the State in 1944-45

It has been decided by the Government to restrict the departmental activities to large sheets of waters with no risk of drlage and overflooding and easily accessible to the markets and to set aside the small village ponds for private enterprisers

1,806 acres were stocked and 477 acres were restocked during 1952 Besides, the stocking of 3 big reservoirs, *viz* Pahuj (1,372 acres), Barwar (2 485 acres) in Jhansi, Kitham (640 acres) in Agra and one Kondar Tal (375 acres) in Gonda was also undertaken With all this effort the production, it is felt, is insufficient to meet the demand

Government effort in up to date fishing technique, money spent trawlers, gears used, quantity of fish caught Gill net of size 2,500 ft (approximately) by 20 ft has been prepared out of parachute silk at a total cost of Rs 2,275 Trial netting in one of the lakes on the hills, *viz* Naukuchia Tal has commenced and the netting so far is successful Special types of oxygen carrier for transport of fry and fingerlings by rail and air have also been constructed

Government effort in educating fishermen Such training is imparted in the State at Banaras

Public museums aquariums, experimental farms in the State A small museum exists in the Central Fisheries Research Laboratory, Badshahbagh, Lucknow where all possible fish species available in the State have been displayed An aquarium room in the Laboratory is also being fitted up

There are two Government experimental farms in the State—one at Bhowali, District Nainital where two exotic fishes, *viz* Mirror Carp and Darjeeling Mahaseer are kept for breeding and the other is at Mirzapur where problems which confront the growth of fishes in land locked waters are studied

Schemes under Five Year Plan *i*) Research Fish Farm Mirzapur *ii*) Revival or permanent posts of Fish Marketing Officer and Fisheries Inspectors of Lucknow Circle, *iii*) Replacement of vehicles for Fisheries Section, *iv*) Rentals for fry and fingerlings collection, *v*) Construction of special transportation tanks for road and air transport of fry and fingerlings to reduce mortality, *vi*) Development of Fisheries in Canal Reservoirs

Revenue from Fisheries during 1952 53 Rs 1 46,580

Latest budget allotment for the Department (1953 54)

		Rs
(*a*)	Direction	46,000
(*b*)	Research	1,17,500
(*c*)	Development and Stocking—	
	(*i*) Scheme qualifying for Central subsidy	1,97,500
	(*ii*) Scheme not qualifying for Central subsidy	2,55 200
	Total	6,16 200

The designation of the Fisheries Department Department of Animal Husbandry and Fisheries, Uttar Pradesh, Lucknow

WEST BENGAL

Kinds of sea fish caught Pomphret, Bhetki Mackrol, Prawn Lapsi, Hilsa Chanda, Bhola, Bombay Duck Ribbon, Shark, Rayr, Skate, Eel, Cat fish Phisa, etc

Total quantity of sea fish caught in 1952 11,321 mds

Total value of the sea fish caught in 1952 Rs 1,97,600

Price per ton of different kinds of fish in March 1952

Varieties	Maximum	Minimum	Average
	Rs	Rs	Rs
Carps	130	40	84 4
Hilsa	92	30	63 4
Bhetki	95	60	90 2
Mullets	90	60	65 2
Butter	90	15	49 8
Prawn	140	65	92 13
Shrimp	60	10	33 10

Approximate strength of the fishing population 96,400

Potential demand for fish in the local market In West Bengal (27,647 mds) In Calcutta (5,561 mds)

Extent to which production meets this demand Seven per cent

Money spent by Government in connection with fishing (upto 1952 53)

Non recurring	Rs 8 95,861
Recurring	,, 11 36 065
	Rs 20,31 926

Gears used Haddock trawl, Prawn trawl, Herring trawl etc, all made of cotton twines

Quantity of fish caught 22,347 mds

There is one experimental fish farm maintained by the State Government

Ancillary industries like liver oil, gelatin, glue, fish meal and their production One Scheme for production of shark liver oil, fish-meal processed fish and utilisation of other fish by products is operated at Contai coast

Production upto 1952 53 —

Shark liver oil—21,529 lb Fish meal—131 070 lb Processed fish—18 711 lb Trash fish—158,688 lb

Schemes under Five Year Plan

(*i*) Pilot Scheme for the development of Inland Fisheries in West Bengal

(*ii*) Distribution of capital goods to the needy fishermen at subsidized rates

(*iii*) Development of tank fisheries by setting up of nursery units in rural areas of the State

(*iv*) Unionwari Tank Fishery Development Scheme

(*v*) Improvement of tank fisheries in the dry districts of West Bengal

(*vi*) Production of shark liver oil fish meal, processed fish and utilisation of other fish by products

(*vii*) Maintenance of a central pool of pumps and mudhogs for dewatering and desilting of water areas for fish farming (since discontinued)

(*viii*) Conservation of freshwater fish seedlings (carps) by controlling the mortality of spawn at different stages

(*ix*) Sea fishing scheme

Approximate Revenue from fisheries during 1952 53 Rs 2 ,,000

Budget allotment for the Department for 1953 54

Expenditure head	Rs 18 00,000
Loan head	,, 11,40,000
Total	Rs 29,00,000

The designation of the Fisheries Department Directorate of Fisheries West Bengal under the administrative control of Forests & Fisheries Department and Development Department, the latter controlling the sea fishing scheme only

*

IRRIGATION

THE area under irrigation in India is about 49 million acres and is the largest irrigated area in any country of the world

The total capacity of India s canals is over 220,000 cusecs, and the canals are over 60,000 miles in length

The total capital outlay on irrigation works is over rupees 125 crores

The total amount of annual flow of water in the Indian Union is 1,356 million acre feet Of this only 76 million acre feet or 5 6 per cent are at present being used for irrigation purposes

Allotment under the Plan—Rs 245 crores

At present eight multi purpose schemes, one major irrigation scheme, three power schemes each costing over Rs 10 crores, and 24 schemes each costing between Rs two crores and ten crores and 99 schemes each costing less than Rs 2 crores, are under actual construction

The total estimated cost of the 12 major schemes is Rs 438 crores

In addition to generation of power the completion of these projects will progressively increase the area under irrigation and improve the food supply as under —

Year	Irrigation (1,000 acres)	Additional food million tons (based on present standard of agriculture)
1951-52	647	0 2
1952-53	1,114	0 4
1953 54	1,997	0 7
1954-55	4,315	1 4
1955-56	5,499	1 8
1956 57	6,685	2 2
1957-58	7,502	2 5
1958-59	8,527	2 8
1959-60	9,190	3 1
Ultimately	12,949	4 3

The total estimated cost of the projects under construction and of those which have not yet been started is about Rs 2,000 crores, spread over a number of years All these works, if and when completed, will add over 45 million acres to India s existing 49 million acres irrigated area

The following are the new projects under construction Bhakra-Nangal Project (Punjab) Damodar Valley Project (Bihar and West Bengal), Hirakud Dam Project (Orissa), Tungabhadra Project (Hyderabad, Andhra, Mysore), Gangapur Storage Project (Bombay), Kakrapar Project (Bombay), Godavary Project (Hyderabad), Lower Bhavani Project (Madras), Mayurakshi Reservoir Project (West Bengal) and the Ghatprabha Valley Project (Bombay)

The following schemes have been sanctioned but work on them has not yet started Kosi Project (Bihar), Gandak Valley Project (Bihar), Koyna Hydro-electric Project (Bombay), Broach Irrigation Project (Bombay), Krishna Pennar Project (Andhra) Ramapadasagar Project (Andhra), and Pipri Dam and Power Station Project (Uttar Pradesh)

The following are the different measures, which are envisaged and the extent to which, on the first estimates which have been framed, additional production may be secured from each of them

	Area (Acres)	Additional Production (Tons)
Major Irrigation Projects	8,712,000	2,272,000
Minor Irrigation Schemes	7,621,000	1,932,000
Land Improvement & Reclamation Scheme	7,405,000	1,524,000
Manure and Fertilizer Schemes, Seed Distribution Schemes, other Sources		1,474,000

Upto end of March 1953 the sums spent are as follows Bhakra, Rs 55 crores ; Damodar, Rs 46 crores , Hirakud, Rs. 24 crores

Classing a year in which the deficiency is 25 per cent as a dry year and one in which it is 40 per cent as a year of severe drought the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought It is largely in order to remove the menace of these years that the great irrigation systems in parts of the country have been constructed

In the arid tracts where the annual rainfall is less than 15 inches, no cultivation is normally possible without irrigation

In India today we have a vast net work of canals in Uttar Pradesh, the Punjab, the deltaic area of Madras and some parts of Bihar There are about 118 high dams distributed mainly in Bombay, Madhya Bharat and southern India It is interesting to note that the number of all storage works mainly earthen works, big or small, exceeds, 35,000 in Madras and 25,000 in Mysore State

IRRIGATION STATISTICS

Area Cultivated and Irrigated

State	Gross area	Culturable area	Sown area	Area irrigated In 1949 50						Total Irrigated Area
				By Govt Canals	By Govt Tanks	Total Govt works	By Private

FINANCES

Irrigation works are divided into three classes, *viz*, productive, unproductive and minor works

Productive—A productive work is one, the net revenue of which within ten years from the date of its completion is sufficient to cover its working expenses and the interest charges on its capital cost

The rate of interest on the capital outlay of works constructed during the different periods have varied For works sanctioned before 1st April 1919, the rate is 4 per cent, for works sanctioned between the 1st April 1919 and 1st August 1921 it is 5 per cent, and for works sanctioned between 1st August 1921 and 31st March 1937 it is 6 per cent For works sanctioned after 1st April 1937, *vis* after the introduction of the Government of India Act, 1935, different percentages have been adopted in different parts of India

In most of the States, the rate is now 4 per cent

The Government of India have recently fixed 3½ per cent as the rate of the return on capital for determining whether a capital work should be classed as productive This rate which took effect from April 1, 1949 applies to all projects financed by the Central Government and also for determining the productivity of State works for which loans may be sought from the Centre

Irrigation works constructed in recent years and those under construction or contemplation are more expensive To satisfy the productivity test, the Planning Commission has stressed the need for raising the revenue structure by linking the water rate with the nature and quantum of crops grown and by levying betterment charges

Unproductive works are those which yield a net revenue which is less than the percentage fixed for productive works

They are constructed primarily with a view to protecting the precarious tracts and to guard against the necessity for periodical expenditure on relief of the population in times of famine They are financed from the current revenues generally from the annual grants for famine relief and insurance

Minor—These are small works for which, detailed capital or revenue accounts are not maintained Such works may be productive or unproductive

The following table shows the financial results of productive and unproductive works upto the end of the year 1946-47 in some States

Name of State	Productive Works			Unproductive Works			Total Productive and Unproductive Works		
	Capital Outlay (direct and indirect)	Net revenue	Percentage on Capital Outlay	Capital Outlay (direct and indirect)	Net revenue	Percentage on Capital Outlay	Capital Outlay (direct and indirect)	Net revenue	Percentage on Capital Outlay

* 1945-46 figures.

In addition capital outlay in the former Indian States exceeds Rupees 30 crores for which details are not available

CHARGES FOR WATER

Charges for water supplied for irrigation from Government canals etc, are levied at different rates and in different ways in the various administrations In most areas water rate is paid separately from land rent according to the area actually irrigated and matured, the rate varying with the crop sown In some areas notably in Hyderabad, on minor works in Bombay and wet lands in Madras and southern Orissa, assessment for irrigated crops includes both land rent and water rate

A different system of assessment is in force in parts of West Bengal, Madhya Pradesh and for long leases and Kharif season leases in Bihar, where a cultivator pays a small rent for a term of years whether he takes water or not

Perennial block system is in force on major irrigation works in the Deccan

Water rates are assessed on a seasonal basis for various types of crops

By far over the greater part of the country water is paid for separately, the area actually irrigated is measured and a rate is charged per acre according to the crop grown

Water rates on some important crops as assessed in some States are as given under —

Name of State	Name of Crop					
	Sugarcane	Rice	Cotton	Wheat	Maize	Pulses and Millets
Punjab	Rs a p 9 0 0 to 11 1 6	Rs a p 6 8 0 to 6 8 10	Rs a p 3 8 0 to 5 4 0	Rs a p 4 4 0 to 4 4 7	Rs a p 3 12 6 to 4 4 0	Rs a p 2 8 0 to 3 4 5
Madras	7 8 0 to 12 0 0	6 4 0 to 10 0 0	3 2 0 to 10 0 0		3 2 0 to 10 0 0	3 2 0 to 10 0 0
Uttar Pradesh	5 0 0 to 12 0 0	4 0 0 to 7 8 0	2 8 0 to 5 8 0	3 0 0 to 5 0 0	3 0 0 to 5 0 0	2 8 0 to 3 4 0
Hyderabad	27 0 0 to 33 0 0	One crop 11 0 0 to 13 0 0 Two crops 17 0 0 to 18 0 0				

Taken as a whole irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures from the water he receives

There are at present (including Ceylon) nine research organisations which carry out research and model experiments on problems confronting engineers in the field of irrigation canal and river engineering

The Central Waterpower Irrigation and Navigation Research Station at Khadakvasla is being expanded and will comprise nine sections viz (1) River and Canal Hydraulics (2) Navigation (3) Soils and Soil Mechanics (4) Concrete and Materials of Construction (5) Mathematics (6) Statistics (7) Physics (8) Chemistry and (9) Hydraulic Machine Testing

Among the important large scale model experiments in progress at the Station are Hooghly Port Madras and Cochin Harbours Hirakud Spillway Mahanadi River and Kakrapara Weir

The Bombay Government however continues to maintain a separate research station where *inter alia* the problem of the disposal of untreated sewage of Poona by irrigation in thirsty lands continues to be examined and developed

MULTI-PURPOSE PROJECTS

During the period of the Five Year Plan 110 projects will be completed and a start made on five more new projects All these under construction investigation and consideration will require Rs 2 000 crores and would eventually add about 45 million acres of canal fed land and generate an additional 7 million kW of power

The projects taken up during the period of the Plan will irrigate an additional 8 5 million acres and produce 1 08 million kW extra power The increase in foodgrains will be about 2 1 million tons annually On their complete development the irrigated area will increase by 16 9 million acres and power by 1 4 million kW

The 110 projects are mostly being executed by the State Governments In addition, there are multi purpose projects which provide for irrigation, hydro electric power, flood control, navigation and fish culture

The most important of the 5 under actual construction include —

Bhakra-Nangal Project (Punjab) — The principal feature of the project is the construction of a dam about 680 feet high on the river Sutlej near the village of Bhakra about 50 miles upstream of Rupar Town in the Ambala District The total storage capacity of the reservoir is estimated to be 7 40 million acre feet, of which 5 6 million acre feet will be available for use The reservoir will extend to about 90 miles above the dam

The dam will be of the straight gravity type in concrete The length at the top will be about 1 600 feet

During the construction of the dam the waters of the Sutlej will be diverted through two 50 feet diameter tunnels, one on each side The length of the two tunnels will be about one mile Pilot headings of these tunnels have since been completed and their enlargement to a full diameter of 50 feet is in progress

About eight miles downstream of Bhakra Dam site, Nangal Dam on the river Sutlej has been completed except for the installation of gates

This dam will serve firstly to divert the requisite supplies from the river for the Nangal Hydel Canal, secondly to provide storage to smoothen the fluctuations in supplies due to load variations in Bhakra Power Plant The Nangal Canal will take off from the left bank of the river Sutlej at Nangal Headworks It will be a lined canal about 40 miles long with a maximum capacity of about 10,000 cusecs

The Bhakra Main Line will take off from the tail of this channel at Rupar

There will be three power houses on the Nangal Canal The first two power houses, each utilising a head of 98 feet, are under construction and are situated 12 and 18 6 miles downstream of the Nangal Dam and the third is to be located at Rupar with a fall of about 60 feet into the Sirhind Canal

The firm power potential of the project works out to 100 000 kW at 100 per cent load factor This power will be utilised in the States of the Punjab PEPSU, Himachal Pradesh, Delhi and Rajasthan

The Project is expected to be completed in 1960 A sum of Rs 55 crores has been spent up to March 31, 1953

Work is proceeding satisfactorily at the Bhakra dam site Partial irrigation has already started On completion it will irrigate 3 6 million acres in Punjab, Rajasthan and PEPSU

The increases in foodgrains will be about 1 3 million tons a year cotton 0 8 million tons sugarcane 0 5 million tons and pulses and oil seeds 0 1 million tons

Damodar Valley Project (Bihar and West Bengal) — The Damodar Valley Project which is one of the most important multi purpose schemes and is to benefit the States of Bihar and West Bengal has as its main features the construction of (*a*) Multi purpose storage dams with hydro electric plants (*b*) two additional hydro-electric plants at Konar No II and Bermo respectively, (*c*) the steam power plant of 20 000 kW capacity, (*d*) an irrigation project with a net work of irrigation canals and distribution measuring 1 553 miles, (*e*) a 90 miles long navigation canal, and (*f*) a power transmission grid

The ultimate benefits that will accrue from this scheme include (*a*) effective flood control of the Damodar River, (*b*) perennial irrigation of 967,000 acres including 195,000 acres now irrigated in the kharif season resulting in an additional yield of rice and rabi crop amounting to Rs 18 65 crores a year, (*c*) the generating of 240,000 kW of electric power, which will promote the growth of industry, lead to the electrification of railways, etc, and (*d*) cheap transport facilities through the navigation canal

The estimated cost of the scheme was Rs 67 90 crores The latest estimate is Rs 83 crores The construction of some of the dams was started in 1948 and 1949 and the entire project is programmed to be completed by 1954-55

The first phase of the project as included in the plan comprises (1) the Bokharo thermal station of 150 000 kW capacity (2) Tilaiya dam with a power station, (3) the Konar dam, (4) the Maithon dam, (5) the Panchet Hill dam (6) Durgapur barrage and canals, and (7) transmission line system

The Tilaiya project has been completed and the hydro-power station with two generating sets of 2 000 kW each has also been commissioned An area of 5,000 acres was irrigated from this dam in 1952 The Konar dam was expected to ready by July 1953

The Maithon Dam on the Barakar river one of the large tributaries of Damodar is one of the two key dams on which flood control and irrigation in the lower Damodar Valley will largely depend The entire work is scheduled to be completed by June 1954 and the hydro electric station by March 1955 The development of the Damodar Valley is planned on TVA lines and the Damodar Valley Corporation, set up by the Central Government by an Act, is in charge of the Project

Gangapur Storage Project (Bombay) —This Project comprises a 12 500 foot earthen dam with a reservoir of 126,000 acre feet capacity on the river Godavari at Gangapur in Nasik District This will supplement the existing supplies to the Godavari Canals and also provide water supply to Nasik City

It is also proposed to harness falls below the dam, if possible for generation of power The work on the project is in hand and is expected to be completed by 1955 6 The additional area to be brought under irrigation is 57 500 acres and the increase in food production will be 7 500 tons The estimated cost of the project is Rs 334 lakhs

Ghatprabha Valley Project (Bombay) —This project comprises the construction of two storage dams one on the Ghatprabha river and the second on the Hiranyakeshi a tributary of the Ghatprabha river The whole scheme is expected to cost Rs 30 crores

It will provide seasonal irrigation to about 100 000 acres of land It has already started irrigation over the first 15 miles and is expected to be completed by 1955 56

Godavari Project (Hyderabad) —This is a multipurpose scheme and envisages the construction of four dams two on the main river Godavari and two on the tributaries the Kaddam and the Manair The canals will take off from the lower dam on the Godavari on both the north and south banks

The total capacity of the reservoirs formed by the dams will be about 3 0 million acre feet The total area irrigated will be two million acres In addition hydro-power to the extent of 175 000 kW will be generated at the dam and the drops on the canals The total cost of the scheme including power development and transmission lines is estimated at Rs 75 crores

As a first step in the implementation of this scheme a part consisting of the dam on the Kaddam tributary and the canal from it, 90 miles long, has been taken up at a cost of Rs 8 4 crores This partial scheme will bring under irrigation 227,000 acres The work is programmed to be completed by 1955

Harike Barrage —At the confluence of the rivers Sutlej and Beas has been completed the Harike Barrage except for the installation of gates Work on the Ferozepore feeder and the Bakhu canals is in progress

Hirakud Dam Project (Orissa) —The dam will be nearly three miles in length across the main channel of the river Mahanadi with 17 miles of low dykes on the two sides The maximum height of the dam will be about 195 feet The reservoir will have a gross storage capacity of 6 75 million acre feet

Nearly 1 9 million acres of land will be irrigated and nearly 200,000 kW of firm power will be generated The ultimate power expected from this project at main dam is 123,000 kW This will be augmented to 199,500 kW if it is subsequently decided to construct a subsidiary dam and power channel

With the construction of the Hirakud Dam it will be possible to afford substantial and adequate measures of flood protection to the delta area at relatively small cost The regulated releases of water from the Hirakud reservoir will permit appreciable improvement in the navigability of the Mahanadi

The cost of the Hirakud Dam project including the main transmission lines and grid substations was originally estimated at Rs 48 crores But according to the revised estimate of the Advisory Committee the whole project is estimated to cost Rs 92 crores

Work on the dams is well under way Both irrigation and power are expected to be available from the Project in 1955

Kakrapar Weir and Canals Project (Bombay) —This Project has been taken up by the CWINC on behalf of the Government of Bombay and was inaugurated on November 1, 1949

The project is proposed to be developed in two stages The weir about 2 175 feet long and 45 feet high above the deepest river bed was completed in the middle of 1953 Canals which will aggregate 850 miles are intended to irrigate 6 lakh acres of land in the Surat District Increasing food production by 1 6 lakh tons and cotton by 16 000 tons

The project will cost about Rs 6½ crores

It is also proposed to construct a storage dam at Ukai, 16 miles upstream of Kakrapar

In stage II the height of the dam will be raised for increasing the gross storage capacity to 3 55 million acre feet

There will be two power houses one at the dam site and the other at the end of a 16 mile power canal with a total installed capacity of 200 000 kW The firm power available at 60 per cent load factor will be 133 000 kW There will be in addition high level canals commanding a gross area of 100,000 acres

Stage II will cost Rs 31 crores and is expected to be completed by 1956 57 The scheme will ensure partial flood control of the river

Lower Bhavani Project (Madras) —This comprises the construction of a dam 160 feet high and 1,520 feet long with earthen flanks across the river Bhavani a tributary of the Cavery The site is about 20 miles from the Mettupalayam railway station A canal on the right side 121 miles long will irrigate about 207 000 acres of cotton cholam and rice crops in Coimbatore District and it is intended to develop seasonal power of 10,000 kW

The cost of the scheme is Rs 9 61 crores A start on the construction was made in 1948 and it is scheduled to be completed by 1954, but irrigation began in 1953

Mayurakshi Reservoir Project (West Bengal) —This project comprises the construction of a low masonry dam 117 feet high to store 0 9 million acre feet of water, a weir at Tilpara and a canal system extending over 1,240 square miles on both sides of the river Mayurakshi

The scheme will bring under irrigation an area of 595 000 acres for kharif and 1 000,000 for rabi crops In addition 4,000 kW hydro power will also be generated The estimated cost of the scheme is Rs 15 5 crores The project is under construction and is programmed to be completed by 1954

Tungabhadra Project (Hyderabad, Andhra, Mysore) —The Tungabhadra Project work on which was taken up jointly by Madras and Hyderabad, has as its main feature a masonry dam about 160 feet high and 7 912 feet long across the river Tungabhadra, a tributary of the Krishna near Mallapuram in Bellary District The effective capacity of the reservoir will be 2 68 million acre feet

The construction of the dam was started in 1945 It has cost Rs 50 crores The first waters from it were released for irrigation on June 30, 1953 About 250 000 acres in Andhra and 4 50 000 acres in Hyderabad are irrigated by the two canals one 225 miles long covering Bellary and Kurnool districts and the other 127 miles long on the Hyderabad side

The dam will help in raising food production by 140,000 tons The Hydro-electric supply from this project will be 60 000 kW on the Andhra side and 110 000 kW on the Hyderabad side

NEW WORKS

Broach Irrigation Project (Bombay) —This consists of a dam 166 feet high approximately 18 miles north east of Broach on the Narbada river The canal systems on both bank will command an area of 1 8 millions acres

The scheme is estimated to cost Rs 10 crores and will take seven years for completion

Chambal —For the development of the Chambal river basin, shared by Madhya Bharat, Rajasthan and Uttar Pradesh, three dams—one in Madhya Bharat and two in Rajasthan—and a barrage below Kotah in Rajasthan will have to be built

Extra development of the basin is expected to cost about Rs 48 crores and will irrigate 1 2 million acres and generate 100,000 kW

In the initial stage the Kotah dam and part of the transmission system have been dropped and the cost reduced to Rs 36 crores

Gandak Valley Project (Bihar) —This project envisages the construction of a barrage across the Gandak river at Tribeni Ghat just below the offtake of the existing Tribeni canal and two new canals one on either bank of the river The area to be brought under irrigation is 2 5 million acres in Bihar 0 75 million acres in Uttar Pradesh and 0 1 million acres in Nepal The scheme is estimated to cost Rs 20 crores

Kosi Project (Bihar) The Kosi project envisages the construction of a dam of an unprecedented height of about 785 feet above rock foundations on the Kosi River a mile upstream of Barahkshetra temple in Nepal for flood control, power irrigation navigation, soil conservation, silt control fish culture and recreation etc

The barrage will be constructed across the Kosi at Chatra in Nepal and the canals one on either bank will take off to irrigate 3 845 million acres out of which 0 62 million acres will be in Nepal and 3 325 million acres in Bihar The power station to be installed in the body of the dam will have an installed capacity of 1 8 million kW

The project has been planned for construction in seven stages The total scheme is to cost Rs 177 crores In the first stage it is proposed to moderate the intensity of floods and irrigate 27 lakh acres in Nepal and Bihar at a cost of Rs 66 crores

Koyna Hydro-electric Project (Bombay) —The Koyna Project contemplates the construction of a dam across the Koyna River at Jalkwadi The scheme is ultimately capable of generating 580,000 kW of firm power at about 75 per cent load factor The scheme is estimated to cost Rs 65 crores

In the first stage four units of 60 000 kW will be erected at a cost of Rs 36 crores

Krishna-Pennar Project (Andhra)—This project is by far the most important scheme in the State of Andhra It consists of the construction of two reservoirs, one in Kurnool district on the Krishna River near Siddeswaram and the other on the Pennar by a large canal cut about 100 feet deep through the ridge separating the two rivers

Between the Krishna and the Pennar, large areas would be brought under irrigation in Kurnool and Cuddapah districts The total area to be irrigated will be 3 2 million acres Large blocks of firm and seasonal plower will also be developed

The estimated cost of the project is Rs 120 crores excluding the cost of works required for power generation

Pipri Dam and Power Station Project (Uttar Pradesh)—This Project is proposed to impound nine million acre feet of water by a 280 feet high dam across the river Rihand, a tributary of the Sone, near village Pipri The power house will have an installed capacity of 240,000 kW and it will also bring under irrigation about four million acres of land

The estimated cost of the scheme including transmission and transformation, is about Rs 31 2 crores

Preliminary investigations have been completed and contract drawings specifications prepared However, due to financial stringency, work on this scheme has been considerably slowed down

Ramapadasagar Project (Andhra)—Like the Krishna Pennar is a super project costing about Rs 129 crores It envisages the construction of a concrete dam, 430 feet high with the lowest foundation level 190 feet below the river bed

The project will irrigate 2 7 million acres of 1st and 2nd crop and will improve the existing supply of another 2 11 million acres of land It will develop 150,000 kW of firm power and provide in addition, navigation facilities from the port of Vishakapatnam to the hinterland of the lake

The annual food production is expected to be 1 1 million tons The project will take 10 years for completion

Ukai—A tie up with the Koyna is the Ukai dam proposed across the river Tapti in Gujarat it has an irrigation potential of 529,000 acres in addition to an installed capacity of 300,000 kW.

FIVE-YEAR PLAN

The allotments are as follows

Irrigation—Rs 168 crores

Multi purpose irrigation and power—Rs 266

Minor irrigation works—Rs 77 crores

by 1956 the projects will irrigate 8 5 million additional acres The minor irrigation works will irrigate another 11 million acres

The total irrigated area will increase from 49 million acres to about 68 million acres by 1956

The addition year by year will be as follows 1952-53 1,890,000 1953 54—3 553,000 1954 55—5 749 000, 1955 56—8,533,000, Ultimate —16 942,000

The targets for additional production are Foodgrains—7 6 million tons, cotton—1 26 million bales jute—2 09 million bales, sugar —0 7 million tons, oilseeds 0 4 million tons

Major irrigation works will yield 2 01 million tons of foodgrains, minor works 1 78 million tons

PATENTS AND DESIGNS

THE Law relating to Patents and Designs in India is contained in the Indian Patents and Designs Act 1911 (II of 1911) as amended uptodate and the Rules issued thereunder

This Law is expected to be revised thoroughly on the basis of the recommendations of the Patent Enquiry Committee A Bill embodying these recommendations has been prepared by Government and will be placed before Parliament shortly

This Law at present extends to the whole of India except the State of Jammu and Kashmir With the extension of the Law to the whole of the Indian Union, the pre existing patent laws, if any, in the "Indian States' have been repealed The Law does not extend to Pakistan, United Kingdom or any British possession

The Patent Office at Calcutta which was established under the Indian Patents and Designs Act, 1911, is the only Office for the whole of India (except the State of Jammu and Kashmir The Office is in the charge of the Controller of Patents and Designs It has no branches or agencies elsewhere

India is not a party to the International Convention for the Protection of Industrial Property But, arrangements for giving 'Priority" patents and registered designs exist between India on the one side and each of the following countries on the other viz Australia Canada New Zealand Eire, the United Kingdom, the Union of South Africa and Pakistan In the case of Ceylon priority arrangements exist in respect of patents only and not in respect of designs

PATENTS

The main provisions of the Indian Patents and Designs Act which regulate the granting of patents and patent rights are briefly as follows —

Varieties of Patent—The Act provides for the granting of four kinds of patents, namely —

(i) a patent which is dated as of the official date of the application for the patent,

(ii) a patent of addition, for improvement or modification of an invention for which invention a patent has already been applied for or granted,

(iii) a secret patent for an invention relating to instruments or munitions of war,

(iv) a patent claiming "Priority," which is dated as of the official date of the corresponding application for patent first made in a country outside India which has established reciprocal arrangements with India for mutual protection of inventions

What may be Patented—The subject-matter of a patent should be a "manner of new manufacture," which may be any process or apparatus for producing, preparing, or making an article, or any article of manufacture It is essential that the process, apparatus or article of manufacture should suggest an act to be done or an operation to be performed, and that the result must be a vendible product

Illustrations of patentable inventions are new textile machines, power plants, agricultural implements, domestic appliances, drying and moistening apparatus and processes, and sanitary appliances New compositions of matter may also be patented if their properties would not be deducible from known properties of their constituent substances In the field of chemical industry, new processes and apparatuses for manufacturing synthetic products, food stuffs, dyes, soda ash, caustic soda, bleaching powder, toilet preparations and processes for the treatment of oil seeds, by-products and waste materials, would be patentable inventions.

The discovery of a hitherto unknown natural law is not patentable Similarly, a method of calculation or a new notation for writing music, a new method of curing diseases, natural substances suitable for food, cannot be classed as 'manufactures,' and are, therefore, not patentable

What are commonly called "patent medicines are medicines prepared by secret formulas and are not usually protected by the grant of patents The proprietors of such medicines may in most cases possess trade mark rights in the names by which the medicines are known "Patent or proprietary medicines' may be registered under the Drugs Act, 1940, which contains provisions for the prohibition of the import, manufacture and sale of mis-branded drugs Applications for registration of patent or proprietary medicines should be made to the Central Drugs Laboratory, 110, Chittaranjan Avenue, Calcutta

Who may obtain Patent.—Any person in possession of an invention may obtain a patent, irrespective of his nationality The term "person' includes a company, a firm or a partnership An application for an ordinary patent (i e, a patent which would be dated as of the official date of the application) may be made by any person either alone or jointly with others An application for a patent of addition may be made only by the applicant for the original patent to which it is an addition as long as the application for the original patent is pending, or by the registered proprietor of the original patent if it has been granted An application for a secret patent should be made by the inventor himself An application for a patent which claims a "Priority date' may be made by the person who has made the application on which the claim to priority is based, or by his legal representative, or assignee, either alone or jointly with others

Government Servants—Subject to any special conditions of service or to any special orders applicable to the persons employed in any particular department, all government servants are at liberty to apply for a patent direct to the Patent Office Government servants employed in the Defence Services, in the Indian Navy and in the Indian Air Force should not apply for patents except in the manner laid down in the Special Regulations applicable to them Government servants employed on scientific or technical research should not apply or cause or permit any other person to apply for a patent for an invention made by them, save with the permission of the Government and in accordance with such conditions as the Government may impose Railway servants are also subject to similar restrictions

PROCEDURE FOR OBTAINING PATENTS

An application for a patent should be drawn up on the prescribed form and forwarded to the Controller of Patents and Designs, the Patent Office, No 214, Lower Circular Road, Calcutta 17 As a rule, the inventor, or his legal representative or his assignee should be a party to the application The application should be accompanied by a specification in duplicate, prepared on the appropriate prescribed form, and also the prescribed fee

Specifications—The specification which should accompany an application may be either a Provisional Specification or a Complete Specification A Provisional Specification should describe the nature of the invention A Complete Specification must particularly describe and ascertain the nature of the invention and the manner of performing it in practice A Provisional Specification cannot be filed in respect of an application claiming "Priority date" A Complete Specification should, therefore, accompany every such application.

If a Provisional Specification accompanies an application it will be necessary to file the Complete Specification within 9 months from the date of the application This period of nine months may be extended by one month by paying an additional fee of Rs 10

Drawings—If the invention is capable of illustration by means of drawings, suitable drawings should also be filed in duplicate

Fees—The fees payable in respect of the filing of an application accompanied by a Provisional Specification is Rs 10, and in respect of the filing of an application accompanied by a Complete Specification is Rs 30 The fee payable in respect of filing a Complete Specification following a Provisional Specification is Rs 20

The fees may be paid in cash at the Patent Office, or may be sent by Postal Order, Money Order or Cheque, made payable to the Controller at Calcutta

Examination.—An application properly filed in the Patent Office is accorded a serial number and date Every application in respect of which a Complete Specification has been filed is, before it is accepted, examined with a view to ascertaining mainly whether the invention is *prima facie* a manner of new manufacture or improvement, whether the nature of the invention or the manner of performing it is particularly described, and also whether the statement of claim sufficiently defines the invention

Acceptance—On the acceptance of an application (other than an application for a secret patent), the specification and drawings in respect of it become open to public inspection The acceptance is advertised by the Patent Office in the *Gazette of India* The specification and drawings are also printed and a limited number of printed specifications are made available for sale Printed specifications are identified by their serial numbers and are sold by the Manager of Publications, Civil Lines, Delhi, at Re 1 a copy

Opposition—The grant of a patent on any application (other than an application for a secret patent) may be opposed by any person within 4 months of the date of advertisement of its acceptance

Some of the grounds on which the grant of a patent may be opposed are—that the invention sought to be patented has been publicly used or made publicly known in any part of India that the nature of the invention or the manner of performing it is not sufficiently or fairly described in the specification, or that the applicant for patent is not the true inventor but the applicant obtained the invention from the opponent or from a person through whom he claims

Sealing the Patent—In the absence of any opposition, or in the event of an opposition if the application passes the opposition successfully, the Patent Office would send the applicant a sealing fee demand notice, and on receipt from him of his request for sealing the patent accompanied by a sealing fee of Rs 30, a patent is sealed on the application and the sealing is notified in the Register of Patents

TERM AND CONTINUANCE

The normal term of a patent other than a patent of addition is 16 years from its date, but in special circumstances the term may be extended for a further period not exceeding 10 years A patent of addition remains in force as long as the main patent is in force

The continuance of a patent other than a patent of addition and a secret patent is subject to the payment of certain renewal fees No renewal fees are payable for the continuance of patents of addition and secret patents

Effect of Grant —The grant of a patent under the Act confers upon the patentee the exclusive privilege of making, selling and using the invention throughout India and of authorising others to do so

After a patent is obtained, the patentee may sell the patent outright, or may grant licences for its exploitation, or may work the patent himself

Infringement of Patents —If, during the continuance of a patent, any person makes, sells or uses the invention protected by the patent without obtaining a licence from the patentee or counterfeits or imitates it, the patentee may institute a suit for infringement against such person The defendant in an infringement suit may counter claim the revocation of the patent

A suit for infringement may be instituted in a District Court having jurisdiction to try the suit, but when a counter claim has been made for the revocation of the patent, the suit along with the counter-claim is decided by a High Court

Compulsory Licence —As a safeguard against abuse of monopoly rights, provisions have been made in the Act, so as to enable any interested member of the public to apply to the Controller for a compulsory licence The grounds on which a compulsory licence may be applied for the relief available, procedure for disposal of the application appeals, and procedure for disposal of appeals are respectively laid down in sections 22, 23 23D, 23E and 23G of the Act

Compulsory Licence for Food or Medicine, etc —If the subject of a patented invention is in respect of food or medicine or is used in the production of food or medicine, or capable of being used as or as part of a surgical or curative device and also if the subject is a process for producing food or medicine it is open to the Controller to grant licences without following the circuitous procedure prescribed for granting compulsory licences generally

Licences of Right As a supplementary provision the Act has also conferred on the Central Government the right to apply to the Controller for endorsement of patents with the words Licence of Right The effect of such endorsement is given in section 23B of the Act Procedure for disposal appeals and procedure for disposal of appeals are the same as those for a compulsory licence

DESIGNS

The main provisions of the Act relating to the registration of designs and registered designs are briefly as follows —

A Design means only the features of shape, configuration, pattern or ornament, applied to an article by any industrial process or means To be registrable under Part II of the Act, a design must be new or original, and must be applicable to an article A model or principle of construction of an article, or anything which in substance is a mere mechanical device cannot be registered as a design Trade Marks and trade names are not designs for the purpose of the Act Literary or artistic creations such as books, pictures and music which fall under the Indian Copyright Act III of 1914, do not also come within the scope of the Indian Patents and Designs Act

The novelty or the originality of a design is judged solely by the eye with reference to the external appearance of the finished article to which the design is applied Neither the constructional details of the article which would not be visible in the finished article, nor the utility of the article, would be relevant for deciding the registrability of the design The novelty and the originality of a design will be destroyed by the publication of the design

For purposes of registration of designs, goods to which the designs are to be applied have been grouped into fourteen classes according to the substances composing the article If an article is composed of more than one substance, it is classified according to the predominant substance

WHO MAY APPLY AND HOW

Any person claiming to be the proprietor of a new or original design not previously published in India may apply for the registration of the design

An application for the registration of a design should be drawn up on the prescribed form and should be forwarded to the Controller of Patents and Designs The prescribed fee and four copies of the design should accompany the application The fee payable for filing an application for registration of a design in any one of the classes Nos 1 12 is Rs 3, and for registration in class No 13 or 14 is annas eight only

The copies of the design which should accompany an application may be drawings, photographs tracings or specimens The representation of the design should be such as would enable a person looking at it to form a mental picture of the shape, configuration pattern or ornament of the finished article to which the design is to be applied Representations illustrating merely the method or principle of construction or the operation of the article, are not suitable

It is possible to register a design in more than one class if the article to which it is to be applied is composed of substances included in different classes

Copyright on Registration —The registration of a design confers upon the registered proprietor, for a limited period, the exclusive right to sell or to make for sale any article to which the registered design has been applied

The period of copyright obtainable on registration of a design is initially five years, but this initial period can be extended to two further periods of five years each, on payment of a fee of Rs 10 for each period of extension

Infringement —During the existence of copyright in a registered design, the unauthorised application of the design to the article in question for purpose of sale is prohibited The penalty for each infringement is a sum not exceeding five hundred rupees recoverable as a contract debt the proprietor may, in the alternative, elect to bring a suit for the recovery of damages and for an injunction against the repetition of the infringement, in which case the infringer is liable to pay such damages as may be awarded By an amendment made in Section 18 of the Indian Sea Customs Act (No VIII of 1878), it has been rendered possible to stop the importation into India of goods bearing a pirated design

Cancellation —The registration of a design may be cancelled on the ground that the design has been previously registered in India, or the design has been published in India prior to the date of registration or the design is not new or original An application for cancellation may be made by any interested person at any time to a High Court, or to the Controller within one year from the date of registration on the ground of prior registration or prior publication mentioned above

Registers —The Patent Office maintains a Register of Patents and a Register of Designs Particulars of name, addresses nationalities of the grantees of patents the titles of inventions, dates of patents, renewal of patents and transactions affecting the proprietorship or validity of patents are notified in the Register of Patents Similar particulars in respect of designs accepted for registration are notified in the Register of Designs The Registers are open to inspection by the public on payment of a fee of Re 1 in respect of each patent or design

Certificates —Certified copies sealed with the seal of the Patent Office, of any entry in the Register of Patents and the Register of Designs may be obtained by any person on application to the Controller, accompanied by the prescribed fee

A technical library is attached to the office The library is open to the public, free of charge.

TRADE MARKS

THE Trade Marks Act, 1940 (Act V of 1940) was passed by the Indian Legislature in March 1940 to provide for the registration and more effective protection of trade marks Sections 1 and 85 of the Act came into force at once and under the latter section intending applicants for registration were enabled to deposit their trade marks About 158 000 trade marks were so deposited, which have since been classified and indexed

Before the other provisions of the Act could be brought into force the Act was amended in 1941 (Act XXVII of 1941) to establish a separate Trade Marks Registry in Bombay under a Bombay Registrar with jurisdiction over textile marks only The Amended Act came into force on the 1st June 1942 but had again to be amended by the Trade Marks Amendment Act 1943 The Act was further amended in April 1946 (Act XII of 1946) with a view to avoiding conflict of registration in the Princely States which had either passed Trade Marks Act of their own or proposed to do so in the near future, and also to make trade marks registered in any territory effective in all territories in which trade marks legislation has been enacted

On the Federal Financial Integration of States in April 1950 the administration of trade marks in the States was taken over by the Centre and centralised at the Trade Marks Registry Bombay With the extension of the Central Laws to Part B and Part C States the Trade Marks Act, 1940, now extends to the whole of India except Jammu and Kashmir

The main office of the Trade Marks Registry is at Bombay and the Register is also kept at Bombay Mr K S Shivaksha B A (Oxon), Bar at Law, is at present the Registrar of Trade Marks

There are at present two branches of the Trade Marks Registry One is established in Calcutta at which copies of the Register and the Refused Textile Marks List are kept The Branch Registry is in charge of the Deputy Registrar who is empowered under section 4 (2A) of the Act to discharge under the superintendence and direction of the Registrar, any function which under the Act may be discharged by the Registrar Any reference in the Act to the Registrar includes a reference to the Deputy Registrar when so discharging any such function Where the Registrar directs the Deputy Registrar to deal with a particular matter, he has in disposing of such matter the same powers as the Registrar At present, the Deputy Registrar of Trade Marks is Mr B C Ojha, B A Bar at Law B com The other branch is at Bangalore under the charge of an Examiner of Trade Marks, Mr V R Keshavaraj, B A, who is Ex officio Dy Registrar of Trade Marks and has the same powers as the Deputy Registrar at Calcutta in respect of matters directed by the Registrar to be dealt with by him

The following is a summary of the important provisions of the Trade Marks Act 1940

A 'mark' includes a device, brand, heading, label, ticket, name signature word, letter or numeral or any combination thereof a trade mark means a mark used or proposed to be used in relation to goods for the purpose of indicating or so as to indicate a connection in the course of trade between the goods and some person having the right to use the mark A trade mark may be registered only in respect of particular goods or classes of goods Any person who is desirous of registering a mark should apply to the Registrar in the prescribed manner The application may be made either at the Registry at Bombay or at the branch office at Calcutta, or Bangalore

Under section 6 (1), distinctiveness is the prime requisite of a trade mark for registration A registrable trade mark must consist of or contain at least one of the following essential particulars (1) name of a company or individual represented in a special or particular manner, (2) signature of the applicant or some predecessor in business, (3) one or more invented words, (4) word or words, having no direct reference to the character or quality of the goods and not being according to its ordinary meaning a geographical name or surname or the name of a sect, caste or tribe in India and (5) any other distinctive mark A mark consisting of a name, signature, or any word other than such as fall within the above description is not registrable except upon evidence of distinctiveness In determining whether a trade mark is distinctive the extent of the inherent distinctiveness of the mark, as well as its acquired distinctiveness by use or otherwise, will be considered The commonly accepted name of any single chemical element or chemical compound is not registrable in respect of a chemical substance or preparation Trade marks which are contrary to law or morality, or disentitled to protection in a Court of Law by being likely to deceive or cause confusion or which are likely to hurt religious susceptibilities, are not registrable The Act contains also special provisions for the registration of certification trade marks, and for defensive registration

When an application for registration has been accepted subject to such conditions if any as the Registrar might think fit to impose the Registrar shall cause the application to be advertised accordingly Under section 15 (2) any person may in the prescribed manner oppose an application so advertised within 4 months and after hearing the parties the Registrar will decide whether registration is to be permitted The date of registration of a mark, if and when registered, shall be the date of filing of the application therefor at the Registry

The registration of a mark will be in force for 7 years in the first instance after which it may be renewed for a period of 14 years In all legal proceedings relating to a registered trade mark, the fact of registration shall be *prima facie* evidence of validity of the registration and of all subsequent assignments and transmissions Further after seven years from the date of registration, the validity of the original registration cannot be questioned except on grounds of fraud or deception or unless the mark offends against section 8

The registered proprietor of a trade mark is entitled to an action for infringement under the Act This valuable right is extended to owners of old marks, who had applied for registration of their trade marks within five years from the commencement of the Act and registration of which has been refused by the Registrar The rights of action to passing off are not affected by registration, and are expressly preserved under the Act Registration gives to the registered proprietor the exclusive right to the use of the trade mark in relation to the goods for which the mark is registered Where a mark is already registered by one person the same or nearly similar mark cannot be registered by another person, except in case of honest concurrent use or of other special circumstances under section 10 (2)

The proprietor of a registered trade mark has power to assign the mark and may assign it whether in connection with the goodwill of the business or not A registered proprietor may also assign an unregistered trade mark without the goodwill of the business along with a registered trade mark under certain circumstances Any assignment made without the goodwill by the business must be advertised as directed by the Registrar

A person other than the proprietor of a mark may be registered as a registered user on application being made both by the proprietor and such person to the Registrar in the prescribed manner, accompanied by particulars relating to their relationship, the control of the one over the other, and other facts relevant to the permitted use The registered user may under certain circumstances file an action for infringement in his own name as if he were the proprietor, but cannot assign or transmit the mark

Any person aggrieved by the presence of a mark or entry on the Register may apply in the prescribed manner to the Registrar or to a High Court for rectification of the Register The registered proprietor may apply to the Registrar for correction or cancellation of any entry in the Register relating to his trade mark He may also apply for alteration of the registered mark in any manner not substantially affecting its identity

With effect from the 1st January 1947, it has been an offence to describe a trade mark as registered when it is not so registered This does not however apply to a trade mark for the registration of which an application was filed at the Trade Marks Registry before 1st January 1947 and which has not been disposed of by the Registrar The use of the word Registered" however, is permissible if it is clearly indicated that the reference is to registration of the mark under the law of a country outside India or if the word is used solely in relation to goods to be exported to a foreign country where the mark is registered Declaration of ownership of a trade mark under the Indian Registration Act of 1908 is not equivalent to registration under the Trade Marks Act, 1940 and the use of the word registered' to signify registration of declaration of ownership would therefore be an offence with effect from the aforesaid date The use of Royal Arms, Heraldic devices and State emblems without due authority may be restrained by injunction from the Registrar or at the suit of any other person who is duly authorised to use such Arms etc but the rights to their use acquired before the coming into force of the Act are not affected

All appeals from the decisions of the Registrar lie to the High Court

There are also special provisions for registration of textile trade marks and for the constitution of an Advisory Committee to advise the Registrar with respect to usages of the textile trade

The criminal law relating to trade marks is contained in the Merchandise Marks Act (IV of 1889) Section 3 of this Act enacts Sections 478—489 of Chapter XVIII of the Indian Penal Code

During the transitional period, *i e* from the 15th August 1947 to the 31st March 1948, the Trade Marks Registry, Bombay, had been registering trade marks for both India and Pakistan in accordance with the special provisions made in the Indian Independence (Miscellaneous Transitional Provisions) Order 1947 These arrangements, however, terminated on the 31st March 1948

*

COPYRIGHT

COPYRIGHT in every original literary, dramatic, musical and artistic work means the sole right to produce or reproduce the work or any substantial part thereof in any material form whatsoever, to perform or in case of a lecture to deliver the work or any substantial part thereof in public, if the work is unpublished, to publish the work or any substantial part thereof Amongst other things it includes the sole right to produce, reproduce, perform or publish any translation of the work, in the case of a dramatic work, to convert it into a novel or other non dramatic work and in the case of a novel or other non-dramatic work or of an artistic work, to convert it into a dramatic work by way of performance in public or otherwise, and in the case of a literary dramatic or musical work, to make any record, perforated roll cinematograph film or other contrivance by means of which the work may be mechanically performed or delivered Copyright also includes the right to authorise any such acts as aforesaid

Publication in relation to any work means the issue of copies of the work to the public but does not include the performance in public of a dramatic or musical work, the delivery in public of a lecture, the exhibition in public of an artistic work or the construction of an architectural work of art, but the issue of photographs and engravings of works of sculpture and architectural works of art shall not be deemed to be publication of such works

COPYRIGHT ACT

Copyright in India is governed by the Indian Copyright Act III of 1914 which made the Imperial Copyright Act of 1911 applicable to India with such modifications as appeared to be desirable for adapting its provisions to the circumstances of India The portions of the Imperial Act made applicable to India form the First Schedule to the Indian Copyright Act III of 1914

Copyright subsists throughout the parts of the Commonwealth to which the Imperial Act extends Registration is no longer necessary but the publisher of every book has to supply a copy thereof as provided in the Copyright Act and in the Press and Registration of Books Act XXV of 1867 The author of a work is the first owner of the copyright therein and may assign the right either wholly or partially (copyright being a bundle of different rights) and either generally or subject to limitations, or may grant any interest in the right by license to another person but no such assignment or grant is valid unless it is in writing signed by the owner of the right in respect of which the assignment or grant is made or by his duly authorised agent

DURATION OF COPYRIGHT

Generally the term for which copyright subsists is the life of the author and a period of 50 years after his death but at any time after the expiration of 25 years or in the case of a work in which copyright subsisted at the time of the passing of the Imperial Act of 1911, 30 years from the death of the author of a published work, copyright in the work is not deemed to be infringed by the reproduction of the work for sale if the person reproducing the work proves that he has given the notice in writing prescribed by the Government of India of his intention to reproduce the work and that he has paid in the prescribed manner to or for the benefit of the owner of the copyright royalties in respect of all copies of the work sold by him calculated at the rate of 10 per cent on the price at which he publishes the work

If, at any time after the death of the author of a literary, dramatic or musical work, which has been published or performed in public, a complaint is made to the Supreme Court of India that the owner of the copyright in the work has refused to re publish or allow the re publication of the work or has refused to allow the performance in public of the work and that by reason of such refusal the work is withheld from the public, the owner of the copyright may be ordered to grant a licence to reproduce the work or perform the work in public as the case may be on such terms and subject to such conditions as the Supreme Court may think fit

DURATION OF SOLE OWNERSHIP

In the case of works first published in India copyright is subject to this limitation that the sole right to produce, reproduce perform or publish a translation of the work subsists only for a period of 10 years from the date of the first publication of the work but if within the said period the author or any person to whom he has granted permission so to do publishes a translation of any such work in any language copyright in such work as regards the sole right to produce, reproduce, perform or publish such translation in that language is not subject to the limitation above prescribed

The term for which copyright subsists in photographs is 50 years from the making of the original negative from which the photograph was directly or indirectly derived and the person who was owner of such negative at the time when such negative was made is deemed to be the author of the work.

MUSICAL INSTRUMENTS

The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions "The majority of Indian melodies," it was explained in Council, have not been published, *i e*, written in staff notation, except through the medium of the phonograph It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune To meet these conditions S 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, which has been reduced to writing

The Copyright Act does not apply to designs capable of being registered under the Patents and Designs Act II of 1911 except designs which though capable of being so registered are not used or intended to be used as models or patterns to be multiplied by any industrial process

INFRINGEMENT OF COPYRIGHT

Copyright in a work is considered to be infringed by any person who without the consent of the owner of the copyright does anything, the sole right to do which is conferred by the Copyright Act on the owner of the copyright Where copyright in any work has been infringed, the owner is entitled to all remedies by way of injunction, damages and accounts Every suit or other civil proceeding regarding infringement of copyright must be instituted and tried in the High Court or the Court of the District Judge An action in respect of infringement of copyright cannot be commenced after the expiration of 3 years next after the infringement No Court inferior to that of a Presidency Magistrate or a Magistrate of the First Class can try any offence against the Copyright Act It is not an infringement of copyright to publish a report in a newspaper of an address of a political nature delivered at a public meeting

In the case of a work of joint authorship (which means a work produced by the collaboration of two or more authors in which the contribution of one author is not distinct from the contribution of the other author or authors), copyright subsists during the life of the author who first dies and for a term of fifty years after his death, or during the life of the author who dies last, whichever period is the longer

Where a married woman and her husband are joint authors of a work the interest of such married woman therein shall be her separate property

*

PROVING OF WILLS

IN India if a person has been appointed executor of the Will of a deceased person, it is always advisable to prove the Will as early as possible If the Will is in an Indian language it has to be officially translated into English A petition is then prepared praying for the grant of probate of the Will All the property left by the deceased has to be disclosed in a schedule to be annexed to the petition Values must be shown as at the date of the Petition and Probate Fees will be calculated on such value The Values of immoveable properties are usually assessed at 16⅔ years' purchase on the nett Municipal assessment, in the absence of a report from a competent architect Unless otherwise prayed for, grant of probate is limited to the State in which it is granted In all cases in which it is sought to obtain a grant of probate to have effect throughout India, such grant must be expressly asked for

Probate Duty in Bombay—Up to Rs 1,000—Nil

For the next Rs 9,000 (*i e* upto Rs 10,000), 2 per cent, for the next Rs 40 000 (*i e* upto Rs 50,000) 3 per cent, for the next Rs 50,000 (*i e* upto Rs 1,00,000) 4 per cent, for the next Rs 1,00,000 (*i e* upto Rs 2,00,000) 4½ per cent, for the next Rs 50,000 (*i e* upto Rs 2,50 000) 5 per cent, for the next Rs 50,000 (*i e* upto Rs 3,00,000) 5½ per cent, for the next Rs 1,00,000 (*i e* upto Rs 4,00,000) 6 per cent, for the next Rs 1,00,000 (*i e* upto Rs 5 00 000) 6½ per cent, for amounts exceeding Rs 5 00,000 (on the portion over Rs 5,00,000) 7 per cent In addition to this Probate Duty there is, at present, a surcharge of 25 per cent introduced by the Bombay Increase of Court Fees Act No XV of 1943

Exemptions from Probate Duty.—In determining the amount of the value of the estate for the purposes of probate duty the following items are allowed to be deducted

1 Debts left by the deceased including mortgage encumbrances

2 The amount of funeral expenses

3 Property held by the deceased in trust and not beneficially or with general power to confer a beneficial interest

In addition, there is general exemption for service personnel killed in action or dying on service in certain circumstances

No probate duty is payable in India on the value of the estate left by the deceased outside India

Procedure—The particulars of the property of the deceased and the particulars of all items allowed by law to be deducted have to be shown in separate schedules It is the practice of the High Court to send a copy of these schedules to the Revenue Authorities and if the properties, particularly immoveable properties, have not been properly valued, the High Court issues a notice to the petitioner requiring him to amend the schedule of property accordingly In certain cases the Court requires citations to be published and served on such persons as the Court thinks are interested in the question of the grant of probate If no objection is lodged by any person so interested within the time mentioned in the citation to the effect that nothing should be done in the matter of the petition for probate without notice to the person 'objecting' or to use technical language the 'caveator', and if the Will is shown to have been properly executed, probate is ordered to be granted If an objection or caveat is filed, the petition for probate is converted into a suit in which the petitioner is plaintiff and the caveator is the defendant

As probate, however, cannot be granted merely because the parties consent, the Will has to be proved It is against public policy to enter into an agreement or compromise as to the genuineness or execution of the Will if the effect of such an agreement or compromise is to exclude evidence in proof of the Will

EFFECT OF PROBATE

Probate has effect over all the property and estate moveable or immoveable of the deceased *throughout the State in which the same is* granted and is conclusive as to the representative title of the person to whom the probate is granted against all debtors of the deceased and all persons holding property which belongs to the deceased and will afford full indemnity to all debtors paying their debts and all persons delivering up such property to the person to whom such probate is granted Probate can only be granted to an executor appointed by the Will and the appointment may be express or by necessary implication Probate cannot be granted to any person who is a minor or is of unsound mind nor to any association of individuals, unless it is a company, which satisfies the conditions prescribed by rules made by the President in Council in that behalf Where several executors are appointed probate may be granted to them simultaneously or at different times If a codicil is discovered after the grant of probate a separate probate of that codicil may be granted to the executor if it in no way repeals the appointment of executors made by the Will If different executors are appointed by the codicil, probate of the Will will be revoked and a new probate granted of the Will and codicil together When probate has been granted to several executors and one of them dies, the entire representation of the testator accrues to the surviving executor or executors Probate of a Will when granted establishes the Will from the death of the testator and renders valid all intermediate acts of the executor as such When a person appointed an executor has not renounced the executorship, letters of administration will not be granted to any other person until a citation has been issued calling upon the executor to accept or renounce the executorship, but when one or more of several executors have proved the Will, the Court may, on the death of the survivor of those who have proved, grant letters of administration without citing those who have not proved The renunciation may be made orally in the presence of the Judge or by a writing signed by the person renouncing and when made will preclude him from ever thereafter applying for probate of the Will appointing him executor If an executor renounces or fails to accept an executorship within the time limited for the acceptance or refusal thereof, the Will may be proved and letters of administration with a copy of the Will annexed may be granted to the person who would be entitled to administration in case of intestacy No person, who renounces probate of a Will, can, without the leave of the judge take out representation to the deceased in another character

Probate is necessary in case of Wills of Europeans, East Indians, Armenians, Jews, Parsis and Indian Christians and also in case of Wills of Hindus, Buddhists, Sikhs or Jains, made on or after 1st September 1870 within the territories which at the said date were subject to the undivided Provincial Government of Bengal, or within the local limits of the ordinary original civil jurisdiction of the High Courts of Judicature at Madras and Bombay, or to all such Wills made outside the above specified territories or limits so far as they relate to immoveable property situate within those territories or limits

Probate is not necessary, in case of Wills of Hindus, Buddhists, Sikhs or Jains not falling in classes specified above or of Wills of Muslim and Khojas

Articles of Association of most of the joint stock companies contain an article to the effect that the Executor or Administrator of a deceased member who has obtained Probate or Letters of Administration as the case may be or the holder of the Succession Certificate shall be the only person recognised by the Company as having any title to his share In such cases, the Company validly insists on the production of such legal representation before transfer of the shares of a deceased member whether he is a European, Hindu, Muslim, Parsi or otherwise

Residuary Legatee.—When no executor has been appointed by a deceased in his Will or when the deceased has appointed an executor who is legally incapable or refuses to act or who has died before the testator or before he has proved the Will or when an executor dies after having proved the Will but before he has administered all the estate of the deceased, a universal or a residuary legatee may be admitted to prove the Will and Letters of Administration with the Will annexed may be granted to him of the whole estate or so much of it as may be unadministered

After any grant of Probate or Letters of Administration with Will annexed, no other than the person to whom the same may have been granted has the power to sue or prosecute any suit or otherwise act as representative of the deceased until such Probate or Letters of Administration has or have been recalled or revoked

Small Estates—In cases where the value of the estate is Rs 2,000 or less, an Administrator General's Certificate can be obtained The procedure for obtaining this Certificate is simpler and less expensive A fee of 3 per cent on the value of the estate is payable The value of the estate has, however, to be taken as at the date of the death of the deceased These Certificates are equivalent to Letters of Administration

PROBATE OF FOREIGN WILLS

When a Will has been proved and deposited in a court of competent jurisdiction situated beyond the limits of the State, whether within or beyond the limits of India, and a properly authenticated copy of the Will is produced, letters of administration may be granted with a copy of such Will annexed, upon a proper application for the purpose being made to the appropriate court within whose jurisdiction such property is situate It is not the function of the court in India to require evidence of the validity of the Will, if it is recognised as valid by the court of domicile of the testator

*

WEIGHTS AND MEASURES

THE maund is the denomination of weight common all over India, but we may find that in a given city there are nearly as many maunds as there are articles to weigh The maund varies even from district to district. Thus in Uttar Pradesh a maund of sugar weighs 48½ seers in Kanpur 40 in Muthura, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad 43½ in Saharanpur, 50 in Bareilly, 46 in Fyzabad, 48½ in Shahjahanpur, 51 in Goshangunge

Thus the maund varies throughout India from the Bengal or railway maund of 82 2/7 lb to the Factory maund of 74 lb 10 oz 11 drs, and the Madras maund, which some authorities estimate at 25 lb and others at 24 lb

As there are variations in the weights and measures from one place to another there is much confusion and sometimes heavy individual loss And Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform The Union and State Governments have made various attempts during the past to solve the problem of common units of weights and measures Commercial and trade interests have also agitated about the question for a long time

The Indian Railways and Government departments adopted a standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful lead which would gradually be followed by the whole trade throughout the country, but the expectation has not been realised

In the Government of India Act of 1935, though 'standards of weights' is a central subject, weights and measures' is in the Provincial List Accordingly the Government of India had to request the Provincial Governments to undertake legislations for enforcement, following the lead given in the Act IX of 1939

In the present constitution this ambiguity has been set right by including '*establishment of standards of weights and measures*' in the Union List of subjects and '*weights and measures except establishment of Standards* in the States List

STANDARDS OF WEIGHTS ACT, 1939

By 1939 opinion in favour of legislation by the Government of India for the standardisation of weights crystallised to the extent that the Indian Legislature passed the Standards of Weight Act (Act No IX of 1939) applicable to the whole of the area known as British India The Act received the assent of the Governor General of India and was published in Part IV of the *Gazette of India* of the 1st April, 1939

The Act laid down the following standard weights —

(*a*) the standard tola, being a weight of 180 standard grains,

(*b*) the standard seer, being a weight of 80 standard tolas or 14,400 standard grains,

(*c*) the standard maund, being a weight of 40 standard seers,

(*d*) the standard pound, being a weight of 7,000 standard grains,

(*e*) the standard ounce, being one-sixteenth part of the weight of a standard pound,

(*f*) the standard hundred weight, being a weight of 112 standard pounds,

(*g*) the standard ton, being a weight of 2,240 standard pounds

Under sub Section (2) of Section 4 of the Act, the Union Government undertook to supply to each State Government a complete set of duly authenticated standard weights

The position of the provincial legislation, as it stands now is as follows

ASSAM	No Act on weights and measures
BIHAR	Weights Act, 1947 (Act XVII of 1947)
BOMBAY	Weights and Measures Act, 1932 (Act XV of 1932)
M P	Weights and Measures Act, 1928 (Act II of 1928)
MADRAS	Weights and Measures Act, 1948 (Act XXII of 1948)
ORISSA	Weights and Measures Act, 1943 (Act VII of 1943)
PUNJAB	Weights and Measures Act, 1941 (Act XII of 1941)
U P	Weights and Measures Act, 1947 (Act XXIII of 1947)
WEST BENGAL	No Act on weights and measures.

The various provincial legislations generally conform to the Central Legislation with a few exceptions The unit for the measure of length is *usually the yard, defined as the length of the standard yard maintained by the Mint Master at Bombay* For longer measures, the furlong *(220 yards) and the mile (1,760 yards)* are provided for measures of area and volume, square and cube of the standards of length, acre (4,840 sq yd) being additionally allowed for area Local units for dry and wet measures of capacity, which vary from province to province, are also allowed in the provincial Acts, but they are usually made integral multiples or submultiples of the basic units

METRIC SYSTEM

By the time the Government of India passed the Act of 1939, unofficial opinion in the country grew more inclined to the adoption of the metric system on an all India basis In 1940 the Manufacturing Sub committee of the National Planning Committee, in their interim report, made the following recommendation

'Standardisation of weights and measures on All India basis should be carried out at an early date so that a uniform system of weights and measures is applicable to the whole country If other conditions permit, the metric system should be adopted for this purpose"

The Indian Science Congress Association at its Bangalore session in 1946 passed a resolution strongly advocating the decimalization of currency and weights and measures, simultaneously if possible The matter was further considered at a meeting of the Executive Committee of the Indian Science Congress Association held in March, 1946 and presided over by Mr Jawaharlal Nehru, and the following resolution was passed unanimously

"Resolved that the Science Congress notes with satisfaction that a Bill for the decimalization of Indian Currency has been introduced in the Legislative Assembly The Science Congress is, however, of opinion that decimalization of currency alone is not enough, and considers the decimalization of weights and measures on the basis of the metric system to be equally urgent"

By a resolution of February 1947, the Government of India requested the provincial Governments to take up the question of adopting the metric system of weights and measures

Meanwhile in 1946 the Government of India by a resolution dated 3rd September, had decided to establish the Indian Standards Institution, with the stated object, *inter alia*,

"to consider and recommend to Government of India, national standards for the measurement of length, weight, volume and energy'

The Indian Standards Institution, inaugurated in February 1947, immediately undertook to make a study of the weights and measures, and a special Committee was soon appointed

This special committee found a solution in the adoption of the metric system

Based on a country wide concensus of opinion of scientists, technologists, industrialists and Government departments, the Committee's recommendation for the adoption of the metric system envisages a change-over in three stages extended over a period of about 15 years

A preparatory stage of three to five years for intensive dissemination of information on the new system, would be followed by a change over stage of about the same period and a final stage for over all transition

After that period, the only system accorded legal recognition would be the metric system

For the implementation of the Committee's recommendation, the report stresses the need for early Central legislation for the recognition of the metric system and the creation of an agency to co ordinate all related measures for the change over

The introduction of decimalised currency is also recommended in the early stage of the change over

In regard to the nomenclature of the new system, the report records the view that the international nomenclature should be used, unless Parliament decides to have an Indianised system In the latter contingency, however, it has been advised to avoid the use of the existing names, such as seer and guz for kilogramme and metre

(Copies of this Report could be had from the Secretary (Administration), Indian Standards Institution, 19, University Road, Civil Lines, Delhi)

PRESENT SYSTEM

The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units The scales used generally throughout northern India, less commonly in Madras and standardized in Bombay under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund = 40 seers, one seer = 80 tolas

The actual weight of a seer varies greatly from district to district and even from village to village except in Bombay State In the standard system the tola is of 180 grains, and the seer thus weighs 2 057 lb and the maund 82 28 lb This standard is also used in official reports.

For calculating retail prices, the universal custom is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money.

In other words, prices in India are quantity prices, not money prices When the figure of quantity goes up, this of course means that the price has gone down.

The name of the unit for square measurement in India generally is the *bigha*, which varies greatly in different parts of the country So the areas are expressed either in square miles or in acres.

PRESENT POSITION

The position at present is as follows

One tola = 180 grains
, seer = 80 tolas
,, maund = 40 seers

Another system of weights is as follows

16 drams = one ounce (oz)
16 ounces = ,, pound (lb)
14 pounds = ,, stone (st)
28 pounds = ,, quarter (qr)
4 quarters = ,, hundred weight (cwt)
20 cwt = ,, ton

The ones shown above are used in Government and other big transactions

Elsewhere the weights vary from place to place The maund is of two kinds the bazaar maund and the factory maund The relation between the two is 100 bazaar maunds = 110 factory maunds

The tola is the unit and all other weights are derived from it

4 sikis or quarter = one tola
5 tolas = ,, chhatak
2 chhataks = ,, atapaw
2 atapaws = ,, paw
2 paws = ,, adaseer
2 adseers = ,, seer
5 seers = ,, panseri
40 seers = ,, maund

The weights for gold and silver are as follows

4 grains = one pennyweight (dwt)
20 dwt = ,, ounce (oz)

The following are the weights used by the jeweller

4 dhans = one rati
4 ratis = ,, anna
8 ratis = ,, masha
12 mashas = ,, tola

The following are the apothecaries' weights

20 grains = one scruple (scr)
3 scruples = ,, drachm (dr)
8 drachms = ,, ounce (oz)

The following are the lineal measures

12 inches = one foot (ft)
3 feet = , yard (yd)
2 yards = ,, fathom (f)
5½ yards = ,, pole
220 yards = ,, furlong (fur)
8 furlongs = ,, mile

The following are the heaped measures

8 gallons = one bushel
3 bushels = ,, sack
12 sacks = ,, chaldron

The following are the imperial dry measures

2 glasses = one noggin
4 noggins = ,, pint
2 pints = one quart
4 quarts = ,, gallon
2 gallons = ,, peck
4 pecks = ,, bushel
8 bushels = ,, quarter

The following are the house hold table measures

One dessert spoonful = 2 teaspoonfuls
, table spoonful = 2 dessert spoonfuls
,, wine glassful = 2 teaspoonfuls

The following are the Bombay bazaar measures

36 tanks = one tipari
2 tiparis = ,, seer
4 seers = ,, payli
16 paylis = ,, phara
8 pharas = ,, khandi
25 pharas = ,, muda

The following are the Bombay cloth measures

2 angulis = one tasu
24 tasus = ,, gaz

The following are the Bombay measures of land surface

39¼ sq cubits = one kathi
30 kathis = ,, pand
20 pands = bigha
6 bighas = ,, rukeh
20 rukehs = ,, chahur

*

THE CURRENCY SYSTEM

The two tables give the details of the course of money supply with the public and the factors contributing to it

(Rs in crores)

	Year ended March 31		
	1950-51	1951-52	1952-53
Currency with the Public (a)			
1 Note Circulation (b)	1,204 24	1 097 94	1,089 95
2 Circulation of rupee coin (c)	138 45	125 45	119 71
3 Notes and coin with Treasuries (d)	4 42	3 70	2 92
4 Cash on hand of scheduled non scheduled (e) and co operative (f) banks	39 13	37 45	37 51
5 Currency with the public (excluding small coin) (1 + 2 − 3 − 4)	1,299 14	1,182 24	1,169 23
6 Variation in currency with the public (g)	+ 83 60	— 110 80	— 11 33
Deposit Money			
7 Demand liabilities (excluding inter bank demand deposit (e) of scheduled non-scheduled (e) and co operative (f) banks	614 06	560 11	549 79
8 Deposits with the Reserve Bank (h) excluding those of Central Government and banks	52 41	44 66	36 36
9 Deposit money with the public (7+8)	666 97	604 77	586 15
10 Variation in Deposit money	+ 17 25	— 61 98	— 25 62
11 MONEY SUPPLY WITH THE PUBLIC (excluding small coin) (5+9)	1,966 11	1,787 01	1,755 38
12 Variation in money Supply with the public (g) (6+10)	+ 100 85	— 172 78	— 36 95

The average for 1953 is as follows (Rs in crores)

Notes in circulation 1 122 , Bank deposits 853 , Cheque clearances from Jan to Nov are 552, 523, 615, 586, 543, 535, 572, 485, 526, 449, 477

(a) Money supply with the public-figures does not take account of the inward or outward movement of currency and excludes small coin (b) Figures from March 1950 are net of the return of about Rs 43 crores from Pakistan awaiting adjustment (c) Figures from March 1950 relate to the Indian Union (d) Figures on the last day of the year (e) From April 1952 figures of non scheduled banks incorporated in and confining to Part B States included (f) Cover reporting co-operative banks only (g) Figures from October 1951 are net of adjustments of India notes returned from Aden (h) Excluding balance held on I M F Account No I (i) Including inter-bank demand deposits of scheduled and co-operative banks upto March 1948 and those of non-scheduled banks upto March 1951

SEASONAL VARIATION IN MONEY SUPPLY WITH THE PUBLIC

(Rs in crores)

	Currency with the public	Deposit money with the public	Money supply with the public
October 29, 1949 to May 12, 1950	+ 130 03	— 29 98	+ 100 05
May 13, 1950 to September 29, 1950	— 102 32	+ 16 78	— 85 54
September 30, 1950 to May 11, 1951	+ 207 09	+ 28 68	+ 235 77
May 12, 1951 to October 26, 1951	— 181 03	— 30 76	— 211 79
October 27, 1951 to April 11, 1952	+ 45 39	— 36 99	+ 8 40
April 12, 1952 to October 24, 1952	— 97 95	— 13 41	— 111 36
October 25, 1952 to May 8, 1953 (Provisional)	+ 108 89	— 21 72	+ 87 17

CURRENCY CIRCULATION

During 1952-53 the total circulation of all forms of legal tender currency (notes, rupee coin and small coin) recorded a moderate fall of Rs 18 crores, after the sharp fall of Rs 116 crores in 1951 52 The total net contraction in currency circulation in the Indian Union during 1948 49 to 1952 53 amounted to Rs 66 crores

The following table shows the circulation of currency —

(Rs in lakhs)

	At the end of		
	1950-51*	1951-52	1952-53
Circulation—			
Notes	1,204,24	1,097,94	1,089,95

(Contd on next page first two columns)

* Figures of notes in circulation have been revised from March 1950 are net of the return of about Rs 43 crores from circulation in Pakistan awaiting adjustment

U.K.-INDIA AGREEMENT

In 1951 an understanding was reached between the two Governments over the broad outlines of a new long term arrangement This was confirmed in February 1952 Under the agreement, the U K Government have agreed to release during the six years ending June 1957 a sum of £35 million a year from these balances They have also agreed to transfer £310 million from Account No 2 to Account No 1, to be held by the Reserve Bank of India as part of the Currency Reserve to be drawn upon only in an emergency Provision has been made for the carry over of undrawn amounts from one year to another and for consultations between the two Governments in case it is found necessary in any year to make a call on a subsequent year's allocation in excess of £5 million At the end of the period it is expected that the balances would have reached the amount normally required as a currency reserve, but if any excess is left, it will be transferred to No 1 Account

The above agreement was modified in July 1953 The more important provisions in the revised agreement are given below —

(1) Any sterling received by the Reserve Bank in respect of current transactions and transferred from the No 2 Account shall be credited to the No 1 Account

(2) The No 2 Account shall be credited with (a) the proceeds at maturity or on realisation of any investment purchased in accordance with established custom with funds standing to the credit of the No 2 Account, (b) transfers from the No 1 Account in respect of matters outstanding under the Defence expenditure plan and any other accounts connected with the war and such other items as may be agreed between the two Governments The No 2 Account shall be debited with appropriate transfers which have not already taken place

(3) The U K Government shall not restrict the availability of sterling standing to the credit of the No 1 Account for payments for current transactions in any currency area or for payments to residents of the scheduled territories On the other hand, the Government of India shall not restrict the acceptance by residents in India in settlement of payments for current transactions, of sterling at the disposal of other scheduled territories and, in accordance with current practice, of sterling at the disposal of residents outside the scheduled territories and the supply of Indian rupees arising from permitted current transactions and accruing to residents of the scheduled territories for any payments inside India or for the purchase of sterling

(4) The Government of India agrees not to draw upon £310 million transferred from the No 2 Account and held by the Reserve Bank as a currency reserve without previous consultation with the Government of the United Kingdom

(5) Beginning on July 1, 1951 the balance to the credit of No 2 Account shall be transferred to the No 1 Account in instalments not exceeding £35 million every year Transfers will be for maintaining a minimum balance on the No 1 Account of £30 million in addition to the amount held as a currency reserve, but any part not transferred during a particular year shall be added to the sums available for transfer in the later periods Without further consultation, the Government of India may anticipate further transfers to the extent of £5 million, but if anticipation to a greater extent is necessary, the two Governments shall consult each other

(6) If the transfers from No 2 Account to No 1 Account appear to be taking place at a significantly higher rate, either Government can ask for fresh discussions between the two Governments.

(Contd on next page third column.)

(*Contd from first two columns of previous page*)

Circulation of Notes—During 1952-53 the decline in note circulation amounted to Rs 8 crores as against the record contraction of Rs 100 crores in 1951-52. The 1952-53 busy season from end October 1952 to May 8, 1953 witnessed a substantial expansion of Rs 107 crores. The highest monthly expansion of Rs 38 crores was witnessed in December 1952 in keeping with the usual seasonal pattern. The changes in the denominational pattern are indicated in the following statement:

CIRCULATION OF INDIA NOTES BY DENOMINATIONS

(Rupees in lakhs)

	Year ended December		
	1950	1951	1952
Rs 2	2,515	2,243	2,343
% of total	2·2	2·2	2·1
Rs 5	166 03	157 41	141 20
% of total	14·1	13·6	12·7
Rs 10	483 87	477 42	461 64
% of total	41·1	41·1	41·4
Rs 100	500 98	500 90	487 49
% of total	42·6	43·1	43·8
Notes in Circulation	1,176 03	1,161 16	1,113 76

Rupee Coin—Since November 1, 1943 when the standard silver rupee coin of eleven-twelfths fineness ceased to be legal tender the rupee coin in circulation in India has comprised (1) the Government of India one rupee notes issued from July 1940, (2) the quaternary silver rupees (of one-half fineness) issued between December 1940 and June 1946, and (3) the nickel rupees issued from June 1947.

During 1952-53 rupee coin in circulation declined by Rs 5·7 crores to Rs 120 crores. On April 10, 1952 the Reserve Bank received from the Government of India one rupee notes and coin of the value of Rs 5·5 crores in terms of Section 36 (2) of the Reserve Bank of India Act, against payment of legal tender value.

Small Coin—Since 1949-50 small coin has been continuously returning from circulation. The following are the details of the return:

MOVEMENTS IN CIRCULATION OF SMALL COIN DENOMINATION WISE

ABSORPTION (−) OR RETURN (+)

(Rupees in 000)

	1950-51	1951-52	1952-53

* Since the inauguration of the Reserve Bank in 1935 silver half rupees have been included in statistics relating to small coin, including pure nickel half rupees introduced in May 1946.
** Including pure nickel four anna pieces introduced in May 1946. † Including nickel two anna pieces introduced in 1917-18. †† Nickel half anna pieces introduced in January 1942. § Including single pie pieces with a circular hole issued from February 1943.

STERLING TRANSACTIONS OF THE RESERVE BANKS

The sterling exchange market remained steady throughout the year. The particulars of sterling transactions are given below:—

Year	Purchases		Sales		Net Purchases (+) Sales (−)	
	£ Thousands	Rs Lakhs	£ Thousands	Rs Lakhs	£ Thousands	Rs Lakhs
1950-51	218 049	2 90,73	88,822	1,18,56	+ 129 227	+ 1 72,17
1951-52	263 387	3,51,18	224 386	2,99,45	+ 39 001	+ 51,73
1952-53	141 300	1,88,41	67,318	89 84	+ 73 982	+ 98 57

(*Contd on next page first two columns*)

Note—Figures exclude Government transactions but include deliveries against forward contracts.

(*Contd from third column of previous page*)

(7) Any balance remaining on the No. 2 Account on June 30, 1951 shall be transferred to the No. 1 Account.

(8) The net capital movement from India to other scheduled territories will be determined at agreed intervals and the amount will be transferred from No. 2 Account to No. 1 Account if it is an outgo from India or *vice versa* if it is an inflow.

(9) The two Governments shall not restrict transfers of capital from India to the U.K. representing remittances of savings of persons of the U.K. origin leaving India permanently for the U.K. and the voluntary repatriation of investments by residents in the U.K. for purposes of the U.K. exchange control.

Hyderabad.—With the accession of the Hyderabad State to the Indian Union India notes and coin were made legal tender in the Hyderabad State as from January 26, 1950 and arrangements were made for the conversion of the Hali Sicca into India notes and coin at the rate of Hyderabad Rs 116-10-8 for Indian Rs 100. The Indian Coinage Act 1906 was applied to the State with effect from April 1, 1951 but the legal tender character of the Hyderabad coins was extended until March 31, 1953. In March 1953 the Union Parliament passed the Hyderabad Coinage and Paper Currency Act 1953 which allowed Hyderabad State notes to continue as legal tender for a period not exceeding two years.

EXCHANGE CONTROL

The pattern of exchange control in 1952-53 remained practically the same as in the previous year. In order to stimulate investment of foreign capital in desirable channels further relaxations were made in the exchange restrictions on the repatriation of capital invested from non-sterling area countries after January 1, 1950.

The trends in the balance of payments position for 1951 and 1952 are summarised in the following table:—

	(Crores of Rupees)	
	1951	1952
Imports c.i.f. Values	86·4	746·7*
Exports f.o.b. Values	749·5	612·8
Trade Balance	— 112·9	— 133·9*
Invisibles (Net)	+ 55·5	+ 96·6*
CURRENT ACCOUNT (NET)	— 57·4	— 37·3
Errors & Omissions	— 31·1	— 0·1
CAPITAL ACCOUNT (NET)	— 88·5	— 37·4
NET TERMS OF TRADE	123	94

* These figures include Rs 4·4 crores of the U.S. foreign aid.

The table on next page shows the extent of compensatory official financing required to cover not only the current account deficit but also movements of private capital, special official financing, etc.

INDIA'S FOREIGN LIABILITIES & ASSETS*

The Reserve Bank of India framed, after a comprehensive inquiry, a kind of international balance sheet of the foreign liabilities and assets of India as on June 30, 1948 The main features are given below —

India appeared to be a creditor by over Rs 1,300 crores, but the net adjusted surplus is Rs 664 crores taking into account the inter-governmental debt owed by Pakistan (Rs 300 crores) and Burma (Rs 53 crores) In assessing the significance of this figure, the need for maintaining a certain minimum amount of sterling assets as currency reserve must be taken into account There are further considerations that the income account indicates a debtor position and that there has been a substantial reduction in the foreign assets since the date of the census

India's foreign liabilities in the official sector amounted to Rs 648 crores of which Rs 426 crores were long term, *i e*, maturing beyond June 1949 and Rs 222 crores short term The liabilities of the non-official sector were composed of Rs 144 crores by way of portfolio obligations and Rs 254 crores as direct obligations The total number of companies, shares of which were owned abroad and for which information was made available was about 2,300 There were 210 companies with a total invested capital of Rs 44 crores the value of the shares of the controlling interests amounting to about Rs 28 crores and forming 68 per cent of the total Out of this the United Kingdom accounted for Rs 21 87 crores The next group consisted of 150 companies with total capital resources of Rs 47 crores of which about 90 per cent was owned by foreign organisations Here again, the United Kingdom accounted for 69 7 per cent 334 companies claimed direct investments; but the managing agents owned Rs 13 crores or 14 6 per cent of the total capital

Thus of the total value of ordinary shares of all the Indian joint stock companies amounting to Rs 156 crores, the value of the foreign-held portion of the capital conferring control worked out to Rs 85 crores or 54 per cent composed of manufacturing groups (Rs 22 96 crores), trading (Rs 19 39 crores) and miscellaneous (Rs 17 47 crores) and financial Rs 13 86 crores

Of the total foreign business investments in India amounting to Rs 320 42 crores, Britain's share was Rs 230 crores or 72 per cent Tea plantations Rs 52 crores or 80 per cent direct foreign resources in companies trading in mineral oils and engaged in the distribution of electricity stood at Rs 22 57 crores and Rs 19 35 crores respectively In jute and cotton manufacturing companies, there was a total foreign investment of Rs 15 74 crores and Rs 11 70 crores respectively

The broad picture of India's investments abroad is —

	Rs	
Deposits abroad owned by residents in India	65 98	crores
Unexpired letters of credit	15 16	,,
Inter branch and inter-company balances	22 47	,,
Loans due from outside	15 79	,,
Insurance claims abroad	2 48	,,
Land and estate abroad	48 12	,,
Buildings	17 64	,,
Factories and Mines	12 39	,,
Residual Items	618 24	,,
Foreign Government securities (includes sterling balances)	1,570 45	,,
Proprietary interest	3 69	,,
Shares and Debentures	26 17	,,
Total	2,418 58	,,

The main events in the field of international finance during 1952 53 were (1) a cut of $1 3 billion in the U S foreign aid, the allocation for this year being $6 0 billion, (2) increased lending by the Export Import Bank and the World Bank and (3) a further extension of activities under the Colombo Plan in spite of a lower scale of financial assistance

WORLD BANK

The International Bank for Reconstruction and Development was set up in 1944 by 44 nations in order to encourage capital investment on a world scale At present 54 countries are members

Besides $497 million of reconstruction loans made in 1947 to France, the Netherlands, Denmark and Luxembourg the loans made by the Bank by the end of 1952 totalled $1 000 million The general reconstruction loans made in 1947 carried interest at 4½ per cent The rate on long term loans in 1948 was 4⅛ per cent The most recent long term loans have been at 4¼ per cent

The following are the details of the Bank's loans to India —

Purpose	Maturity	Interest	Sanctioned Amount	Actually Borrowed	Effective Balance on June 30 1953
Railway rehabilitation	1950–64	4%	$ 34 m	$ 32 8 m	$ 24 1 m
Agricultural Development	1952–56	3⅛%	$ 10 m	$ 5 3 m	$ 3 3 m
Power Development	1955–70	4%	$ 18 5 m	$ 13 7 m	$ 18 5 m
,, , etc	1956 77	4¼%	$ 19 5 m		
Iron and Steel Development (Indian Iron)	1959–67	4½%	$ 31 5 m		

COINAGE

The following table gives a description of the coins in circulation at the end of March 1953

	1952 53	Nil

DECIMALISATION

With a view to simplifying accounting and facilitating calculations the Government of India had under consideration the introduction of a decimal system of coinage in India The occasion calling for a huge recoinage programme necessitated by the unpopularity of the nickel brass coin introduced in 1942 as a wartime measure was considered to be most opportune for the proposed reform The proposals under this system were that the rupee would remain unaltered and the half rupee and the quarter rupee while retaining their present shape, size and weight would be issued as 50 cents and 25 cents coins The existing lower denominations of small coin would, however, be discarded and, instead cupro-nickel coins of 10 cents, 5 cents and 2 cents and bronze coins of 1 cent and if necessary ½ cent would be issued A bill incorporating the above changes was introduced in the Central Legislative Assembly on the 18th February 1946 and circularised to elicit public opinion The matter was however, allowed to rest due to the great changes which followed in August 1947

*

BANKING

MODERN banking in India owes its origin to the British agency houses operating in Bombay and Calcutta in the eighteenth century. Then followed the Presidency banks in the latter half of the nineteenth century as a result of their amalgamation the Imperial Bank of India was brought into being in 1921 by a special Act. The next stage was marked by the establishment of the Reserve Bank of India on April 1 1935. Fourteen years later on January 1 1949 the Reserve Bank was nationalised and its functions are being broadened gradually from the role of a lender in the last resort it has assumed the responsibility of being the purveyor of credit and is charged with the responsibility of developing the banking system on sound lines.

At the base of the banking system is the Reserve Bank with Imperial Bank as its agent. The edifice is made up of Indian joint stock banks other than the Imperial Bank foreign banks and co-operative banks.

The Banking Companies Act was enacted in 1949 with the object of improving the efficiency and the tone of the banking system. The main provisions relate to licensing of branches, requirements of minimum capital and reserves and maintenance of cash reserves. The Act authorises the Reserve Bank to make periodical inspections of banks. During 1952 the Banking Companies Rules were extended to more States and now apply to the entire country.

RESERVE BANK

In pursuance of federal financial integration the Reserve Bank entered in 1952 into agreements with three Part B States Madhya Bharat Travancore Cochin and Mysore whereby it became their sole banker.

The Bank advanced to scheduled banks a gross amount of Rs 246 crores in 1952 as against Rs 77 crores in 1951 and Rs 15 crores in 1950. 1 043 loans for general banking purposes totalling Rs 164 23 crores were made at the Bank rate against Government securities while 100 loans amounting to Rs 81 46 crores were made at ½ per cent below the Bank rate under the Bill market scheme.

The following table gives the position of the Reserve Bank over a period of years —

EXCHANGE BANKS

The banks carrying on exchange business in India are merely branch agencies of banks having their head offices in London on the Continent, in the Far East or the U S A Originally their business was confined almost exclusively to the financing of the external trade of India, but in recent years, most of them, while continuing to play their main role, have also taken an active part in the financing of internal trade Following the increase in the British bank rate to four per cent in March 1952 exchange banks found it more profitable to tap Indian deposits than to get funds from London and over the year, showed an increase of Rs 4 crores in their deposits compared to a fall of Rs 10 *crores* in the *total* deposits of major Indian scheduled banks and of Rs one crore in those of other Indian schedule banks

The *earlier progress of Exchange Banks* has been tabulated in the previous editions The more recent trends are summed up below —

Liabilities and Assets of Foreign Banks in India

(In lakhs of rupees)

* Bank rate raised to 3½ per cent on November 15 1951 This is the standard rate at which the Reserve Bank is prepared to buy or rediscount bills of exchange or other commercial paper eligible for purchase under the Reserve Bank of India Act

** The rate at which the Imperial Bank discounts first class three months commercial bills

† Rates at which bills of small traders are discounted by shroffs The quotations are unofficial

†† Average flat yield on 3 per cent Conversion Loan of 1946

Clearing Houses—The Principal Clearing Houses in India are those of Calcutta Bombay and Madras and of these the first two are by far the most important In 1946 47 Clearing Houses were opened at Alleppey Rajkot and Gaya and are being managed by the Imperial Bank of India This brings the total number of Clearing Houses under the management of the Imperial Bank to 19 In Bombay a Metropolitan Clearing Association was formed and registered in October 1946 to arrange for clearing for non scheduled banks as the Bombay Bankers Clearing House decided to restrict its membership and sub membership only to scheduled banks

Cheque clearances in the Indian Union declined to Rs 6 198 crores in 1949 50 from Rs 6 687 crores in the previous year which was incidentally a record year for cheque clearances In 1950 51 there was however a sharp recovery owing to the broadening of business activity and the rise in prices following the outbreak of the Korean War and the rearmament drive and the total cheque clearances amounted to Rs 3,577½ crores Of the increase amounting to Rs 379½ crores Bombay alone accounted for Rs 277¾ crores at Rs 2 877½ crores The year 1951 52, however, broke all previous records

The figures for 1951 and 1952 along with others are shown in the table given below

CLEARING HOUSE STATISTICS

STOCK EXCHANGE*

THE earliest reference to stock broking in India dates back to the end of the 18th century when transactions in Government securities and the shares of the East India Company used to take place in Calcutta under a *neem* tree Similar references are also available about business in shares in Bombay before 1840 The boom following the American Civil war gave a great impetus to this business

The Native Share and Stock Brokers' Association of Bombay was formally constituted by an indenture dated December 3 1887 and was recognised by the Government of Bombay for forward trading in shares under the Bombay Securities Contracts Control Act, 1925 Since then several attempts were made to start rival stock markets in Bombay the latest one being the Indian Stock Exchange started in 1938

Calcutta Association—The Calcutta Stock Exchange Association was founded at No 2, New China Bazar Road (now known as 2, Royal Exchange Place) Calcutta, with 150 founder members in 1908 Fifteen years later, it was registered as a limited liability concern The Association is controlled and managed by a Committee and has a membership of 232 brokers

The only registered institution in south India of brokers dealing in shares and securities is the Madras Stock Exchange Association, Ltd registered in 1937

During the boom period several stock markets were started at other industrial centres These include Delhi and Kanpur

The Ahmedabad Stock Exchange is also a registered body and recognised by the Government of Bombay under the Bombay Securities Contract Control Act

Among the Part B States Hyderabad has an organised stock market of its own, but trading in shares is conducted in several other States particularly Madhya Bharat in which Indore is an important centre

CAPITAL MARKET

Until the beginning of the Second World War the capital market had made a slow but steady progress, but its pace quickly accelerated during the War period when the monetary inflation and the rising trend of industrial profits served as a first class stimulant to its growth which was spectacular The post war period has however, served mainly towards consolidating the early gains A broad idea of the expansion of the market can be had from the fact that between 1938 39 and 1946-47, the interest-bearing obligations of the Government of India increased by Rs 1,176 crores, while consent for the issue of capital was granted to the tune of Rs 640½ crores from May 17, 1943 to March 31, 1947

INDUSTRIAL FINANCE CORPORATION

Under the Industrial Finance Corporation Act, a Corporation was established on July 1 1948 to provide medium and long term finance to public limited companies and co operative societies registered in India, including the acceding States, and engaged in the manufacture or processing of goods or in mining or in the generation or distribution of electricity or any other form of power Individuals, partnership firms or private limited companies are thus excluded from the purview of the Corporation s operations The authorised share capital is Rs 10 crores, divided into 20,000 shares of Rs 5,000 each, the paid up capital being Rs 5 crores in respect of 10,000 shares issued To this issue, the Central Government and the Reserve Bank of India subscribed Rupees one crore each, the scheduled banks and financial institutions like insurance companies and investment trusts, Rs 1¼ crores each, and co operative banks Rs ¼ crore The paid up value of the share capital and dividends on it at the minimum rate of 2½ per cent per annum are guaranteed by the Government The Board of Directors consists of twelve members, of whom four are nominated by the Central Government and two by the Reserve Bank of India, and six are representatives of scheduled banks, insurance companies, investment trusts and other financial institutions

The Corporation is authorised to borrow up to five times the amount of its paid-up capital and reserve fund When the Reserv Fund equals the authorised capital of Rs 10 crores the borrowing capacity of the Corporation will be Rs 100 crores The Corporation may also accept deposits for periods of not less than five years but the total deposits accepted may not exceed Rs 10 crores It is empowered to provide financial assistance in the following ways

(i) grant loans or subscribe to debentures of industrial concerns repayable within a period of 25 years secured by sufficient pledge, hypothecation or mortgage of tangible assets (ii) underwrite the issue of stocks shares and debentures and (iii) guarantee loans floated in the market repayable within a period not exceeding 25 years

The Corporation is prohibited from subscribing directly to the shares or stocks of companies and is primarily a lender and not a partner in industry Its policy is to finance the acquisition of fixed assets and thereby supplement rather than compete with the activities of commercial banks

In September 1948 the Corporation started functioning with Mr Shri Ram as Chairman and Mr Ram Nath as Managing Director In August 1949 the Corporation decided to augment its resources by issuing 3½ per cent bonds repayable in 1964 The Act was amended with effect from December 29 1952 in order to enable the Central Government to guarantee loans in foreign currencies and in certain other respects e g shipping companies are now eligible for loan from the Corporation

The nature of assistance that the Industrial Finance Corporation can render to the Industries is governed by the Act which permits help to be given only to public limited companies or co operatives registered in India and engaged in the manufacture of goods, processing of goods mining and generation or distribution of electricity or any other form of power

Up to the end of January 1953 the Corporation sanctioned Rs 15 23 crores by way of loans

The break up of the loans sanctioned by the Corporation from June 30, 1949 to June 30, 1952 is as follows (Rs in lakhs)

Textile machinery 64 Mechanical engineering 118 Electrical engineering 115 Cotton textiles 204 Woollen and rayon 85, Chemicals 186 Cement 90, Ceramics and glass 119, Non ferrous metals 85 Sugar 115 Paper 74 Automobiles and tractors 50 Other Industries 98, Total 1,403, Total asked for 3,187

With the passing of the Part B States (Laws) Act 1950, which came into force on April 1 1951, the Industrial Finance Corporation Act, 1948, now extends to the whole of India except Jammu and Kashmir On account of the conditions prevailing in the money market and the stock exchange, the Corporation did not consider it advisable to undertake underwriting commitments

STATE FINANCIAL CORPORATION

An Act to provide for the establishment of State Financial Corporations was passed in October 1951 The Act enables the State Government to establish a Financial Corporation for the State under a name to be specified by notification and the State Government concerned the Reserve Bank scheduled banks insurance companies investment trusts co operative banks and other financial institutions will be entitled to subscribe to the share capital Parties other than these can also be shareholders but their aggregate holding will not exceed one fourth of the total capital The shares allocated will not be transferable except to the State Government the Reserve Bank or any other recognised financial institution

The shares of the Corporation will be a trustee security under the Indian Trusts Act and an approved security under the Insurance and Banking Acts The shares shall be guaranteed by the State Government in regard to the repayment of principal and the payment of annual dividend at such minimum rate as the State Government may with the approval of the Central Government fix by notification The Corporation may issue bonds and debentures for increasing its working capital and accept deposits of not less than five years maturity

The management of the Corporation will vest in a Board of Directors composed of three nominated by the State Government one by the Central Board of the Reserve Bank one by the Industrial Finance Corporation of India one each by scheduled banks co operative banks and other financial institutions and one to represent other shareholders The Managing Director will be an ex officio member of the Board The first Board will be constituted by nominating the representatives of the various interests by the State Government

The Corporation may transact the following business—(a) the guaranteeing of loans raised by industrial concerns in the public market for not more than 20 years (b) the underwriting of the issue of stocks shares bonds or debentures by industrial concerns (c) the granting of loans or subscribing to debentures of industrial concerns repayable within 20 years and (d) other business arising or ancillary to the above The limit of accommodation to any industrial concern will be up to a maximum of one tenth of the Corporation s share capital subject to a maximum of Rs 10 lakhs

Upto December 1953 four States had established State Finance Corporations—Punjab, Saurashtra, Bombay, Travancore-Cochin

At present there is no legislation for the regulation and control of stock exchanges except in the State of Bombay The Bombay Securities Contracts Control Act of 1925 has also not proved particularly effective mainly because transactions outside a recognised stock exchange are under the Act merely void and not illegal The Act does not also make a clear distinction between ready and forward business To improve upon the Contracts Control Act the Bombay Government enacted in 1947 the Bombay Forward Contracts Control Act but this Act has not been applied to securities presumably because central legislation on this subject has been in contemplation

On the basis of the recommendations of an expert committee the Government of India have formulated proposals for enacting legislation for regulating stock markets Comments received from the State Governments and public bodies are under scrutiny

COMPANY LAW

In 1951 the Government of India appointed an expert committee with Mr C H Bhabha as Chairman, to suggest an overhaul of the Company law But trafficking in managing rights and cornering of shares in the open market with a view to acquiring control over the management of well established and reputable

* For investors' guide see end of book

companies for anti social purposes had reached such proportions that Government decided to promulgate an Ordinance on July 21 1951 On September 14, the Indian Companies Act was amended The main features of the changes are given below —

(1) Any Amendment in the articles or agreement relating to the appointment of a Managing Director and the increase in the remuneration will be void unless approved by the Central Government

(2) The Central Government, after an enquiry into the complaint made by the Managing Agent, Managing Director or any other director of a company that the change in the board of directors would prejudice the affairs of the company direct that the resolution will be effective only after it is confirmed by Government

(3) Any change in the term of a Managing Agent after July 21 1951 shall be void unless approved by the Central Government

(4) A Managing Agent can transfer his office only with the approval of Government

(5) A change in the Constitution of the Managing Agent will require prior approval of Government

(6) When the affairs of a Company are managed in a manner prejudicial to the interests of the company or oppressive to some part of the members a member can apply to the court for an order to wind up the Company Government can also apply for a similar order

(7) The Central Government may constitute an advisory commission to advise them on company affairs

Steps to introduce legislation for comprehensive revision of the Indian companies Act are well under way The administration of the Act will also be brought within the purview of the Central Government

Section 91 B of the Indian Companies Act was amended in 1952 in order to empower the Central Government to exempt any company from the prohibitions contained in sub section (1) of that Section An Advisory Commission was also set up to advise Government on applications under the various provisions of the law

During 1952 326 applications for the issue of capital amounting to Rs 152 3 crores were disposed of by the Ministry of Finance Out of these 102 applications from industrial companies for the issue of capital aggregating Rs 32 7 crores were sanctioned and 23 applications for Rs 53 3 crores were refused 152 applications from non industrial companies involving a total issue of Rs 7 10 crores were sanctioned and 49 applications for Rs 55 05 crores were refused 76 applications were decided involving investment of foreign capital in companies in India to the extent of about Rs 6 crores Out of these, 63 applications were sanctioned involving a capital of over Rs 5½ crores, and 13 involving a capital of about Rs ½ crore were refused

MARKET TRENDS

Throughout the war period, the stock market was fed on a veritable boom caused by cheap money and inflation The index of Government securities moved up from 107 6 in August 1939 to 120 4 in 1946 47 and that of fixed yield industrial securities from 137 7 to 197 8 on the basis of 1927 28 quotations equal to 100 In the same period the index of variable yield industrial securities advanced from 98 5 to 268 6 In the following four years the economic uncertainty, post partition riots and the general thinning of investment demand had an adverse effect on the stock markets and the capital values registered a marked depreciation Thereafter a feeble recovery was noticeable but the volume of business continued to be at a low ebb and even the Korean War broken in mid 1951 did not stimulate speculative excesses in industrial shares

The table below based on the data collected by the Reserve Bank broadly indicates the trend in regard to paid up capital of variable yield industrial shares quoted on the stock exchanges of Bombay Calcutta and Madras and their market value —

(Rupees in lakhs)

—	October 1948	31 3 1949	31 3 1950	31 3 1951
No of Companies	779	833	829	827
Paid up Capital	Rs 20 596	Rs 22 714	Rs 23 015	Rs 23,808
Market Value	Rs 40 563	Rs 37 933	Rs 35 400	Rs 43 367

During 1951 52 the Stock Exchange turned downward following the evaporation of inflationary pressures and the debacle reached its nadir in March 1952 when the crash on the market preceded by a heavy slump in commodities, resulted in the temporary closing down of the market

The behaviour of the stock market during the financial year 1952 53 fitted the customary pattern of disinflation With the general rise in interest rates ideas of equity yields were revised in an upward direction and buyers turned more exacting in their demands for safety and liquidity of capital This tendency was reinforced by the recession in prices and incomes and flagging profits and directly led to the withdrawal of support from variable yield securities Nevertheless the fall in their index from 109 8 in April 1952 to 103 7 in January 1953 was followed by a recovery to 107 in March On a percentage basis, the variation over the year was 5 per cent in Bombay, 7 per cent in Calcutta and 10 per cent in Madras

Since December 1946, the Reserve Bank of India has started constructing indices of security prices covering 398 scrips taking the year 1938 as the base These indices (all-India) reveal the following trend —

1938=100

Average of Weeks	Government & Semi Government Securities	Industrial Securities		Banks	Insurance	Investment Trusts	Electricity Tramways	Shipping and other Transport	Railways	Plantations	Cotton, Woollen and Silk Mills	Jute Mills	Coal	Mining and Oil	Iron and Steel	General Engineering	Sugar	Breweries	Chemicals	Paper	Cement

BULLION

PRECIOUS metals have always held a great place in the Indian economy Even though gold and silver standard currencies are no more in the world both the metals determine Government's policies The price policies in respect of these two metals are governed by American attitude because the U S A is the most important consumer The U S official price of gold at $ 35 per five ounces has been accepted as the official price by all member countries of the International Monetary Fund

SILVER

The following table gives details about the trend of silver production from 1949 to 1952 —

(In millions of ounces)

	1949	1950	1951	1952 (Esti)
United States	34 6	42 1	40 0	40 5
Mexico	49 5	49 1	43 8	45 0
Canada	17 6	23 2	24 2	25 0
Peru	10 6	13 4	14 9	17 0
Bolivia	6 6	6 6	7 2	6 0
Other South and Central American Countries	6 7	6 9	6 8	7 5
Total (Western Hemisphere)	125 6	141 3	136 9	141 0
Outside the Western Hemisphere (Partial)	23 0	26 0	30 0	31 0
World Production (Partial)	148 6	167 3	166 9	172 0
India	0 011	0 116	0 015	0 021

Following the expiry of the Green Act on December 31, 1945, a Silver Bill was enacted on July 31, 1946 authorising the Treasury to sell or lease for manufacturing use any silver not pledged as monetary backing for silver certificates, at not less than 90½ cents per fine ounce and also to purchase all domestic silver mined after that day, if offered within one year after being mined, at a net price of 90½ cents The tax of 50 per cent on profits derived from transactions in silver originally designed to prevent speculation at the expense of the Treasury also continues to be in force in spite of considerable agitation

The recent trend of silver consumption (partial data) is given in the following table —

(In millions of ounces)

ARTS AND INDUSTRIES	1950	1951	1952
United States	120 0	110 0	95 0
Germany	9 6	11 5	11 3

Other Countries	1 5	0 4	1 5
Total	33 7	84 0	104 1
Total Consumption	183 2	232 1	231 3

The trend of silver price in New York during 1952 was downward, but there were only six changes in the published price and the opening quotation of 88 cents per troy ounce proved to be the peak of the year and the low of 82¼ cents was reached on May 28

The following table gives the average silver quotations in New York and London from 1948 to 1952

	New York Official	London Spot
	Cents	Pence
1948	74 361	45 004
1949	71 930	49 243
1950	74 169	64 796
1951	89 368	77 856
1952	84 941	74 360

GOLD

Gold has played a key role in shaping the life and history of the world Between 1493 and 1600, world s production of gold was placed at 24 2 million ounces It steadily rose to 38 million ounces during the 50 years ended 1850 Since then, however, the production has risen rather spectacularly The annual average output mounted from 3 5 million ounces in 1850 to 19 6 million ounces in 1929 and then to 35 2 million ounces in 1936, reaching the peak figure of 41 million ounces in 1940 The greatest part of this enormous increase came since the U S Administration raised its price of gold from $ 20 67 per ounce to $ 35 an ounce which made the U S A a sort of magnet strongly attracting the world s entire gold production The following table gives the figures for world gold production in thousands of fine ounces

World Gold Production

(In thousands of fine ounces)

	1948	1949	1950	1951	1952

International Gold Policy

The pressure for raising the official price of gold continued in the post war period Subsequent to the I M F statement on premium gold in 1951 several gold producing countries permitted external transactions at premium prices under certain specified conditions During 1952 53 the premium price in the world free markets fluctuated between $ 36 40 and $ 37 50 about 30 per cent of the new gold production during the year went to augment the official gold stocks It is estimated that in 1952 some 12 million ounces of gold were absorbed by the free gold markets as compared with about 9 5 million during the previous year

Production, Imports and Exports

The upward tendency in India's gold production noticed since 1950 continued during 1952 the estimated output rising further from 226 364 ounces in 1951 to 252 911 ounces in the following year Its value is calculated on the basis of the prices at which it was sold in the open market was however lower at Rs 6 crores as against Rs 6 8 crores in 1951 The improvement in the physical output was due to higher production in the Mysore State which accounted for as much as 243 629 ounces On the other hand the output of the mines in Hyderabad State fell slightly from 9 476 ounces to 9 282 ounces The Indian output during 1952 was still about 20 per cent below the pre war (1939) figure of 317 000 ounces though her share in the world output rose from 0 87 per cent in 1951 to 0 96 per cent in the following year

Imports and exports of gold continued to be negligible In view of the continuance of the restrictions under the Foreign Exchange Regulation Act 1947 and Imports and Exports (Control) Act 1947 The inflow of smuggled gold also contracted owing to the narrowing down of the price disparity between the Indian and world price level In January 1953 the Government of French India decided not to allow any foreign exchange for the import of gold into Pondicherry

Assaying and Refining of Gold and Silver

Some relevant statistical data are given below —

(Thousands of tolas)

Year	Melting and Assaying		Refining	
	Gold	Silver	Gold	Silver
1948-49	1 06	3 69	27 35	1 89,94
1949-50	1 27	20 86	19 91	8 74 33

INDIAN MARKET

During 1952 53 forward trading in gold and silver under the auspices of the Bombay Bullion Association the only recognised body under the Bombay Forward Contracts Control Act 1947 was sought to be further regulated The new bye laws promulgated in May 1952 sought to prevent over trading and ensure speedy payment of differences when fluctuations were rather excessive The volume of transactions showed a considerable decline amounting to 118 million tolas in gold and 4 2 million bars in silver as against 245 million tolas in gold and 9 5 million bars in silver during 1951 52

The following statement gives the highest and lowest spot prices of gold and silver in Bombay with import duties from 1947 to 1952 —

Year	Gold (per fine tola)				Silver (per 100 tolas gross)			
	Highest	Lowest	Average	Import Duty	Highest	Lowest	Average	Import Duty
	Rs a p	Rs a p	Rs a p	Rs a p	Rs a p	Rs a p	Rs a p	Rs a p

* Unofficial

NATIONAL INCOME

ACCORDING to the report of the National Income Committee agriculture, animal husbandry and ancillary activities contributed roughly 48 per cent of the national income in 1948-49. Commerce, transport and communications amounted to 19·5 per cent. Commodity production taken roughly as the total value contributed by agriculture, mining, manufacturing, and hand trades amounted to Rs. 56·0 abja (milliard) or nearly two thirds of the total national income.

The estimated national income for 1948-49 was Rs. 87·1 abja.

The population in 1948 was taken as 341 million and consequently the per capita national income worked out at Rs. 255.

The following two tables give a broad picture of the distribution of national income though the Committee suggests that too much should not be read in the second table.

NATIONAL INCOME BY INDUSTRIAL ORIGIN : 1948-49

Item	Net Output (Rs. Abja)	Per centage
Agriculture		
Agriculture, animal husbandry and ancillary activities	40·7	46·7
Forestry	0·6	0·7
Fishery	0·2	0·2
Total of Agriculture	41·5	47·6
Mining, Manufacturing and Hand trades		
Mining	0·6	0·7

Communications	0·3	0·3
Railways	2·0	2·3
Organised banking and insurance	0·5	0·6
Other commerce and transport	14·2	16·3
Total of Commerce, etc.	17·0	19·5
Other Services		
Professions and liberal arts	3·2	3·7
Government Services (Administration)	4·6	5·3
Domestic Service	1·5	1·7
House Property	4·5	5·2
Total of other Services	13·8	15·9
Net domestic product at factory cost	87·3	100·2
Net earned income from abroad	—0·2	—0·2
Net National Output at factory cost = NATIONAL INCOME	87·1	100·0

ESTIMATE OF NET OUTPUT PER ENGAGED PERSON 1948-49

	Net Output (Rs. Abja)	No. of Persons Engaged (Lakhs)	Net Output per Engaged Person (Rs. in 000)
Agriculture	41·5	816	6·5
Mining and Factory Establishments	6·4	34	1·9
Small Enterprises	8·6	134	0·6
Total of Mining, Manufacturing and Hand trades	15·0	168	0·9
Railways and Communications	2·3	11	2·1
Banking, Insurance and other Commerce and Transport	14·7	89	1·6
Total of Commerce, Transport and Communications	17·0	100	1·7
Professions and Liberal Arts	3·2	47	0·7
Government Services (Administration)	4·6	35	1·3
Domestic Service	1·5	35	0·4
House Property	4·5		
Total of other Services	13·8	117	1·2
NET DOMESTIC PRODUCT AT FACTORY COST	87·3	1,20	0·73

The net national expenditure at market price totalled Rs. 91·7 abja out of which government administration government administrative capital expenditure and government enterprises capital expenditure were Rs. 6·3 abja, Rs. 0·8 abja and Rs. 1·2 abja *i.e.*, 6·9 per cent, 0·9 per cent and 1·3 per cent respectively.

It will be noted that government draft on private income amounting to Rs. 87·3 abja was to the extent of Rs. 6·9 abja composed of Rs. 2 abja as direct taxes, Rs. 4·2 abja as indirect taxes and Rs. 0·7 abja as miscellaneous fees, etc.

Dealing with the consumer expenditure, the report pointed out that only fragmentary and dimensional indications were available in isolated cases.

For example out of a total national product of Rs. 87 abja in 1948-49 the consumer expenditure on food probably amounted to about Rs. 46 abja or nearly 58 per cent of the national income. The high proportion of consumer expenditure on food shows in a general way the underdeveloped character of our economy.

*

TARIFF POLICY

THE Government of India set up the First Tariff Board in July 1923 for a period of one year and its life was extended from time to time though its personnel was revised every now and then The Board was guided by three principles namely (1) the industry must have natural advantages (2) the industry is such that without protection it is not likely to develop at all or so rapidly as is desirable in the interest of the country and (3) the industry must be one which will eventually be able to face world competition without protection

On November 3 1945 an Interim Tariff Board was constituted with the late Mr R K Shanmukham Chetty as Chairman This marked the second stage in the evolution of tariff policy The Board was expected to keep in view the fundamental objectives of Government's industrial policy which was 'to encourage and promote rapid industrialisation of the country to the fullest extent possible' Before recommending protective measures, it was expected to satisfy itself that (1) the industry was conducted on sound business lines, (2) it was likely within a reasonable time to develop sufficiently to be able to carry on successfully without protection or State assistance or it was an industry which it was desirable in the national interest to grant protection or assistance and the probable cost of protection or assistance to the community was not excessive and (3) due weight was given to the interest of the consumer in the light of the prevailing conditions

The third stage began with the reconstitution of the Board in November 1947 with Mr G L Mehta as President, and Dr H J Dey and Dr B V Narayanswamy Naidu as members Apart from re assigning the functions hitherto exercised by the Interim Tariff Board the reconstituted Board was entrusted with two additional functions namely (1) to report to Government as and when required factors that lead to increase in the cost of production of Indian manufactured goods as against imported articles and (2) to advise Government as and when required on measures whereby internal production may be secured on the most economical cost basis

The next development took place on August 6, 1948 when Government broadened the functions of the Board in the matter of inquiries into complaints against dumping, combines, etc and maintenance of watch over progress of protected industries

The question of evolving a new tariff policy for the Indian Republic was entrusted to the Fiscal Commission in April 1949 which recommended the establishment of a permanent Tariff Commission with enlarged powers and functions It came to the conclusion that protection should continue to be granted on the following basis (1) Defence and other strategic industries irrespective of cost on national considerations (2) Basic and key industries on the recommendations of the Tariff Authority, (3) Other industries having regard to the economic advantages consistent with the cost of protection

The Tariff Commission Act passed by Parliament received the assent of the President on September 12, 1951 and became immediately effective Among its main provisions are the following

The Central Government will establish a Tariff Commission consisting of not less than three but not exceeding five whole time members and one of them will be nominated by the Central Government as its Chairman

For the purpose of conducting any inquiry under the Act the Commission will have all the powers of a civil court while trying a suit under the Code of Civil Procedure and to require any person to furnish information on the subject matter of any inquiry

Upon receipt of a report made to it by the Commission the Central Government may take such action as it considers fit in respect of any of the matters dealt with in the report A copy of every final report made to the Central Government, together with a report of the action taken thereon by the Central Government will be laid on the table of Parliament within three months of the submission of the report If Parliament is then sitting and, if Parliament is not then sitting within seven days of its re assembly When the report cannot be so laid a statement explaining the reasons therefor will also be laid on the table of Parliament

The first Tariff Commission (Jan 7, 1952) was composed of Mr G L Mehta as Chairman and Dr B V Narayanaswamy Naidu and Mr B N Adarkar as members

The Commission is now composed of Mr M D Bhat (Chairman), Mr B N Adarkar, Mr B N Das Gupta and Mr C Ramasubban

The industries which were granted protection for the first time in 1952 were hydroquinine, iron and steel machine screws electric brass lamp holders and zip fasteners Protection to the ball bearings industry was granted till the end of 1954 and to batteries for motor vehicles was continued till December 1955 Starch, alloy, tool and special steels, certain categories of grinding wheels and segments and photographic chemicals were granted continued protection till the end of 1954 In the case of 27 industries including preserved fruits, glucose, soda ash, pencils plywood, sericulture artificial silk, non-ferrous metals aluminium cotton textile machinery and bicycles protection was extended up to the end of 1953 (See below for fuller list)

Apart from cases relating to protection, the Commission submitted reports on the fair retention prices of steel produced at Bhadravati and the Steel Corporation of Bengal continuance of protection to the motor vehicles battery industry, woollen hosiery industry, ball bearings and steel balls industry, revision of fair prices of super phosphate for 1952 review of retention prices of tin plate produced by the Tinplate Co of India Ltd revision of raw rubber prices fair ratio between the ordinary shares of the Steel Corporation and the Indian iron, power and distribution transformers industry, revision of the fair retention prices of steel produced by Tata Iron and reduction of import duty on metinophenol At the time of writing Government had issued orders on the first nine reports

The Commission was to undertake inquiries into the claims of 44 industries for continuing protection in 1953

ARTICLES TAXED

The general rate of import duty is 25 per cent On luxury goods the duty varies between 75 and 100 per cent

The following articles among others are subject to a protective duty Heavy chemicals, iron and steel, metals (other than iron and steel), sewing machines and parts, cycles (other than motor bicycles) and parts

The following articles among others are subject to revenue duties Machinery, iron and steel, metals (other than iron and steel), motor cars cycles, scooters omnibuses, lorries, vans, and parts of these, pneumatic rubber tyres and tubes motor spirit kerosene oil, oils (fuel and lubricating) gold bullion coins, sheets and plates, tin electric lighting bulbs, wireless apparatus Portland cement (excluding white), raw cotton, coal tar products including dyes, artificial silk, yarn textile fabrics, wood, pulp, paper, stationery, cinematograph films toys, games and sports goods, spices wines spirits and liquors, ale, beer, porter cider and fermented liquors, tobacco, betel nuts

The following articles among others are subject to export duties Raw jute, manufactured jute raw cotton, cotton waste cotton cloth and yarn, raw wool, oil and oil seeds, tea, black pepper, other agriculture produce, manganese

The following articles among others are subject to excise duties levied by the Central Government Kerosene sugar matches coffee, tea vegetable products tobacco cotton cloth, steel ingots motor spirit, tyres coal

Customs is among the most important sources of revenue of the Central Government Before the war it accounted for between 55 and 60 per cent of the revenue Though the percentage today is not as high as it used to be it is still second only to income tax as a source of revenue

Among the items that earn most revenue are motor spirits (about Rs 25 crores) the group that includes motor cars (about Rs 11 crores) machinery kerosene oil raw cotton artificial silk yarn are also very high (about Rs 6 crores each)

About export duty, raw and manufactured jute bring in most revenue (about Rs 60 crores) Tea is next with about Rs 10 crores

Before the war excise duties did not form a material part of the revenues of the Central Government Today they are very important the estimate for 1953 54 are Rs 94 crores The most important single item is tobacco with over Rs 35 crores

PERIOD OF PROTECTION

On the following industries, protection was due to expire on December 31, 1953 The date in brackets shows when the duty was imposed

Artificial silk fabrics (May 1 1934) cotton and artificial silk mixed fabrics (May 1 1934) sericulture (May 1, 1938) cocoa and chocolate (April 18 1947) Calcium chloride (April 18 1947) bichromates (April 18, 1947) coated abrasives (April 18, 1947), iron or steel wood screws (April 18 1947) antimony (April 18 1947) hurricane lanterns (April 18 1947) bicycles (April 18 1947) sewing machines (April 18 1947), aluminium (May 15, 1947) preserved fruit (Jan 12, 1948) glucose (Sept 24, 1948) oleic and stearic acids (Sept 24, 1948) plywoods and battens for chests (Sept 24, 1948), cotton (Sept 24 1948) hair belting (Sept 24, 1948) iron or steel baling hoops (Sept 24, 1948), ferro silicon (Sept 24, 1948), non ferrous metals (Sept 24, 1948) electric motors (Sept 24 1948), pickers for textile industry (March 29, 1949), soda ash (April 24, 1950), sheet glass (April 24, 1950), plastic electrical accessories (April 24 1950), phenol formaldehyde moulding powder (April 24, 1950), cotton textile machinery (April 24 1950), sago globules and tapioca pearls (March 29, 1951), pencils (March 29, 1951) calcium lactate (March 29, 1951), fountain pen ink (March 29, 1951) buttons, studs and cuff links (March 29, 1951) hydroquinone (March 7, 1952), electric brass lamp holders (March 7, 1952), oil pressure lamps (March 29, 1952)

On the following industries protection is due to expire on December 31, 1954

Photographic chemicals (Dec 21, 1946), some categories of grinding wheels and segments (Jan 12, 1948), alloy, tool and special steels (Aug 30, 1948) sago flour and farina (Sept 24, 1948), iron or steel machine screws (March 7, 1952) zip fasteners with metal teeth (June 15, 1952), ball bearings (Jan 10, 1953)

On the following industries protection is due to expire on December 31, 1955

Batteries for motor vehicles (March 29, 1949), power and distribution transformers (May 30, 1953)

*

FINANCE

THE following table shows the budgeting position of the Government of India for 1948 49 1951 52 1952 53 and 1953 54 The figures for 1953 54 are budget estimates Throughout the figures are in Rs crores

	1948–49	1951–52	1952–53	1953–54
REVENUE	372	515	419	439

† As it stood at the end of the year

REVENUE AND EXPENDITURE

The principal sources of Central revenue are customs duties, excise duties levied by the Central Government corporation tax, income tax (excluding taxes on agricultural income), estate and succession duty, the earnings from the mints terminal taxes on goods or passengers carried by railway, sea or air, taxes on railway fares and freights taxes (other than stamp duty) on transactions in stock exchange and future markets, stamp duty on bills of exchange, cheques, bills of lading, letters of credit, insurance policies, transfer of shares etc , taxes on sale and purchase of newspapers and on advertisements in newspapers

The railways and the posts and telegraphs contribute to the Central revenues There are also the profits on the Government industrial undertakings

About as much as 90 per cent of the revenue is derived from the customs, excise duties, corporation and income taxes

The principal sources of revenue for the individual States are State taxes (on agricultural income, lands and buildings, minerals rights, consumption or sale of electricity, sale or purchase of goods other than newspapers, advertisements other than in newspapers, goods and passengers carried by road or on inland water ways vehicles animals boats, tolls, professions, trades luxuries amusements), capitation taxes, stamp duties excise duties on alcoholic liquors, opium and other narcotics

A point about the Sales Tax is worth mentioning here The Union has the power of declaring any commodity as essential for the life of the community and thereby vetoing any sales tax levied on it by a State Government This power comes from the Essential Goods Act of 1952

The Act however does not apply to taxes levied before it came into force

Then there are the subventions from the Central Government Part of the proceeds of the income tax are distributed among the States The jute growing States get part of the proceeds from the export duty on jute There are also special grants which are made to certain States (For details see report of the Finance Commission)

Collection and appropriation of taxes are not always vested in the same authority Some taxes are levied by the Central Government but collected and appropriated by the States (stamp duties, excise duties, duties on medicines and toilet preparations) Some are levied and collected by the Union but assigned to the States (succession and estate duties on property other than agricultural, terminal taxes on passengers, railway fares freights stock exchange, future markets newspapers or advertisement Corporation tax is collected and retained by the Union but taxes on other incomes are levied and collected by the Union and distributed between the Union and States

The two biggest items of expenditure of the Central Government are outlay on development programmes (capital account) and defence These programmes were undertaken to help the country recover from the effects of war and partition and to increase the total wealth Some of the projects are financed by loans and others by assistance from foreign Governments Current releases from sterling balances are also used to finance development

Three important heads of expenditure of the States under the revenue account are irrigation, security and social services

Then there is public debt now almost wholly internal—the rupee debt This may be divided into three classes long term loans and money market liabilities the unfunded debt which includes provident funds postal deposits saving certificates and last the deposits

In 1952 53 the total public debt of the Government of India amounted to Rs 2 082 crores Of this the debt in England amounted to Rs 27 crores, the dollar debt to Rs 113 crores

The entire revenues of the Union form a single fund called the Consolidated Fund of India

Towards the beginning of the financial year, that is in April the estimates of receipts and expenditure are laid by the Central and State Governments before their respective legislatures

No expenditure can be incurred without a specific grant being made for the purpose

Certain routine items which cannot await legislative sanction are non votable These items are charged to the consolidated funds of the Central and State Governments

A difficult problem for the income tax department has been the evasion of tax specially during the war and since

A commission was appointed in 1947 to investigate such evasion By September 1952 the Commission had discovered concealed income to the value of Rs 38 crores the evaded taxes on which amounted to Rs 21 crores

This was not very satisfactory and in 1952 June the Finance Ministry launched a special drive, inviting the public to make voluntary disclosures of hidden income within a specified time Assessees were offered special treatment such as exemption from prosecution dropping of penalties and payment by instalment The arrears in income tax were estimated at Rs 150 crores

By Sept 1952 the total income voluntarily disclosed amounted to Rs 74 43 crores, on which the tax was Rs 10 crores

1953-54 BUDGET

The 1953 54 Budget estimates tax revenue at 85 per cent of the total as against 89 per cent in 1951 52 and 1952-53 (revised) The budget proposals have the net effect of reducing the tax revenue by Rs 0 40 crore and raising non tax revenue by Rs 1 9 crores as compared to yields on the basis of the rates in 1952 53 The budget also provides, in addition to transfers in accordance with the recommendations of the Fiscal Commission, Rs 17 crores for special grants As against this, there is no provision for food subsidies which amounted to Rs 21 crores in 1952-53 revised

These estimates leave a deficit of Rs 1 05 crores which is sought to be converted into a small surplus of Rs 0 45 crore The estimated net addition of Rs 1 50 crores to revenue as a result of budget proposals is accounted for as follows —

	Crores of rupees
Loss in revenue due to reduction in export duty on sacking from Rs 175 per ton to Rs 80	— 3 5
Loss in revenue due to raising the exemption limit on personal income tax (Central share) from Rs 3,600 for individuals and Rs 7,200 for Hindu undivided families to Rs 4,200 and Rs 8,400 respectively	— 0 4
Increase in revenue due to changes in import duties including an additional duty of as 2 per lb on betelnuts	+ 3 5
Adjustments in Union excise duties including change from *ad valorem* duty to specific duties on cloth	Nil
Changes in postal rates	+ 1 9

(For certain changes in the Income Tax Act, *see* Income Tax' in this chapter)

DEVELOPMENT EXPENDITURE

Out of a total of Rs 726 crores, which the Centre is expected to raise over the five-year period from its revenue and capital accounts about Rs 262 crores have been found in the first two years and it was expected that another Rs 120 crores would be provided in 1953-54 The States, however, have been able to find only about Rs 101 crores in the first two years as against Rs 532 crores expected to be raised in 1951 56

A good part of the development expenditure was financed through grants and loans received from abroad in 1951 52 and 1952 53 Foreign grants and loans extended to India in this two year period totalled Rs 189 crores The break down is as follows

	(Crores of Rupees)
International Bank—	
Balance of loans extended in the pre-Plan period	9 0
Steel Project Loan (December 1952)	15 2
Loan for Damodar Valley Project (January 1953)	9 5

DEBT POSITION

Under the Indian Independence (Rights, Property and Liabilities) Order 1947, all liabilities in respect of loans, guarantees and other financial obligations of the Governor General in Council outstanding immediately before the date of Partition have been placed on the Republic of India subject to the recovery of an appropriate contribution from Pakistan In regard to the outstandings in respect of Post Office Savings Bank and Post Office Cash, Defence and National Savings Certificates it was agreed that each country should take over liability for the deposits and certificates outstanding in its respective area subject to adjustment of transfers from one country to the other till March 31, 1948 A moratorium of four years has been given to Pakistan for the repayment of the Partition Debt The first instalment fell due on August 15, 1952

The outstanding public debt of the Government of India was expected to amount to Rs 2,082 crores at the end of March 1953 and Rs 2,173 crores at the end of 1953-54 The broad analysis of the debt compared with that at the end of 1938-39 is given below —

(In lakhs of rupees)

	Total	Rupee Loans	Sterling Loans	Dollar Loans
31-3-1939 Account	9,49,77	4,84,82	4,64,95	
31-3-1953	20,82,05	19,41,00	27,31	1,13,74
31-3-1954	21,73,06	20,34,15	26,15	1,12,76

The liability for the British War Loan remains suspended while against the outstanding Railway annuities an equivalent deposit has been made with the U K Government who have undertaken to provide the necessary sterling as the payments fall due Omitting these items, the total outstanding debt would be Rs 2,056 crores at the end of the current year and Rs 2,148 crores at the end of 1953-54, representing at the end of the budget year an increase of Rs 1,266 crores over the corresponding figure at the end of 1938-39

In addition, Government are liable to repay the balances in the various Provident Funds, the Post Office Savings Bank, the Post Office Cash and National Savings Certificates the Depreciation and Reserve Funds of the Railways Posts and Telegraphs etc and certain other deposits, mainly relating to excess profits tax and income-tax These balances were estimated to amount to Rs 780 crores at the end of the current year and Rs 819 crores at the end of 1953-54 after making a very rough allowance for Pakistan's probable share in them

Taking the regular debt and these liabilities together the debt position of the Government of India would stand at Rs 28,35,92 lakhs on 31-3-1953 and Rs 29,67,00 lakhs on 31-3-1954 as against Rs 11,38 crores at the end of 1938-39 The uncovered debt would amount to Rs 368 crores at the end of 1953-54 as against the pre-war figure of Rs 188 crores

The statement below analyses the interest bearing obligations of the Government and the interest yielding assets held by them —

STATE FINANCE

Details of revenue and expenditure of Part A and B States in the first three years of independence were summed up in the previous edition The story is carried forward in the table below The post war trend of increasing revenue and expenditures continued, but during 1952 53 additional taxes could not be levied to the extent proposed and acute scarcity conditions made large inroads into revenues Transfer of additional resources from the Centre to the States and large withdrawals from Revenue Reserves however helped to keep the deficits at a low level The budgets for 1953 54 imposed fresh taxation of Rs 467 lakhs in Part A States and Rs 20 6 lakhs in Part B States The U P Government alone expected to realise Rs 330 lakhs by raising irrigation rates

Despite a substantial increase in development expenditure, the capital account of Part A States shows no serious deterioration from year to year This is due mainly to increased loans from the Centre and net receipts from State trading schemes in 1952 53 and 1953 54 (BE) In the case of Part B States the first factor contributed mainly to a position of relative comfort It is expected that with the assumption by the Reserve Bank of India of their banking and debt management operations and with the growth in their financial requirements, borrowings from the market will in future play a more important role in financing the capital requirements of Part B States

LAND REVENUE

The principle underlying the land revenue system in the country has been from time immemorial on the basis that government is the supreme landlord and the revenue derived from land is by way of rent The official term for the method of collection is Settlement These were of three types The permanent *Zamindari* System was mainly found in the Bengal area Bihar, the U P and parts of Madras and covered roughly an area of 120 million acres equivalent to 19 per cent of the total agricultural area of the sub continent In the second group were the temporarily settled Zamindars such as *Malguzari Maharwari, Khoti Narvadari, Bhagdari Inami* and *Talugdari* These were found mostly in Madhya Pradesh, the Punjab, parts of U P the Bengal area and Bombay covering about 30 per cent of the area of the country The remaining 51 per cent or approximately 285 million acres were under the *ryotwari* system covering parts of Bombay and most parts of Madras, Berar, Assam and the Punjab area

Most Governments have abolished the *Zamindari* system To Madras goes the credit of being the first State to put a measure of this kind on the statute book The Madras Bill received the assent of the Governor General early in April, 1949 The validity of the Zamindari Abolition Acts was contested in the various State High Courts and the Supreme Court so much so that the Constitution Act itself was amended to make such bills valid (See under Government of India)

Land revenue was the mainstay of provincial finance till 1938 39 and still continues to be an important source of revenue

Following the Planning Commission s recommendations several State Governments introduced better charges in 1951 on land for which new facilities by way of irrigation were made available

EXCISE

The excise revenue in the country can be classified into two divisions one derived from the Central Excise Duties and belonging to the Central Government s finance and the other derived from the manufacture and sale of intoxicating liquors, hemp drugs toddy and opium The latter is a provincial revenue The budget for 1953 54 estimated the revenue at Rs 54 crores These duties are at present levied on motor spirit kerosene, sugar, matches, steel ingots, tyres, tobacco, vegetable product, betel nut coffee, tea cotton cloth and coal cess In accordance with the recommendations of the Finance Commission, the States are given a share in the excise duty on matches, tobacco and vanaspati

The Budget of the Government of India for 1944 45 brought in force important changes in the field of Central Excises It raised the rates of duty on unmanufactured tobacco and on cigars and cheroots and included in the Central Excise Tariff betel-nuts coffee and tea

A further change in respect of tobacco was proposed in the following year Accordingly, the highest class of flue cured tobacco in the excise tariff was sub divided into three and subjected to a duty of Rs 7 8, Rs 5 or Rs 3 8 per lb according as it was intended for use in manufacturing cigarettes containing more than 60 per cent, more than 40 but not more than 60 per cent or more than 20 but not more than 40 per cent by weight of imported tobacco In order to avoid double incidence, some of the provincial Governments reached an agreement with the Centre by which they withdrew the provincial excise duty on tobacco in lieu of a share in the proceeds from the Centre s tobacco excise Tobacco excise has been responsible for nearly half the receipts under Central Excise Duties

The budget proposals for 1951 52 provided for a stiff increase in tobacco duties, but the Act, as finally enacted slashed the proposals to the tune of Rs 5 crores The excise duty on cloth was first introduced in January 1949

The 1951-52 Budget also provided for an increase of 5 per cent in the excise duties on motor spirit and kerosene so as to equalise the duties of customs and excise and for certain changes in the excise duty on tobacco

The 1953 54 budget imposed a cess on mill cloth to help the hand loom industry and changed the basis of excise duty from *ad valorem* to specific duty at annas 3¼ a yard on superfine cloth and annas 1¼ on fine cloth

The provincial excise revenue in the country is derived from the manufacture and sale of intoxicating liquors hemp drugs toddy and opium The excise revenue has been pushed into the background by the prohibition policy of the State Governments

The following table shows the proceeds from State excise in Part A States —

	1952 53	1953 54 Budget
	(In lakhs of Rs)	
Madras	41	3 32
Bombay	92	2,95
U P	6,32	8,71

Total	85 78	80 00	94,00

CUSTOMS

Import duties have varied from time to time according to the financial conditions of the country Since the First World War, a greater tendency towards reliance on Customs duties has been in evidence The policy of discriminating protection and Imperial Preference was also a factor in the inter war period During the Second World War export duties were used as a curb to higher exports and inflation but following the devaluation of the Indian rupee in September 1949 export duties served to narrow the margin between the world prices and Indian prices of the country s more important exports

The customs schedule was recast in the budget of 1916 17 and the tariffs were raised in 1921 22 to reduce the budgetary deficit The next major change was effected on January 1, 1933 in order to give effect to the Ottawa Agreement During 1938-39 when the world trade was small the revenue from customs duties amounted to Rs 40 51 crores The war time decline in trade reduced the revenue to Rs 25 12 crores in 1942 43 The peak was recorded in 1951 52 at Rs 231 69 crores

The import tariff is cast in the form of a commodity schedule with broad distinctions indicating the treatment to be accorded to various classes of articles The general rate of import duty (now 25 per cent plus a temporary surcharge of ⅓th) applies to all articles other than those specially listed, certain luxury items which carry a higher rate of tax, certain items subjected to protective duties and certain other items which are declared duty free or are subjected to a low rate of duty in the interest of the indigenous industry or the economy of the country Luxury items which are subjected to the heaviest rates of duty ranging from 75 to 100 per cent mainly consist of tobacco manufactures, wines and spirits, artificial silk goods, gold plated articles, fabrics containing gold or silver thread, gold and silver thread manufactures silver thread and wires, games and sports requisites, clocks and watches, etc In the case of protected items of which the more important are some chemicals, matches silk and art silk fabrics, certain manufactures of iron and steel, sewing machines cycles and certain items of machinery and parts batteries for motor vehicles the rates of duty are fixed at such amounts and for such periods as are found necessary having regard to the recommendations of the Tariff Commission Grains and pulses and a number of raw materials for industry are on the free list while specially low but varying rates of tax cover a large number of essential items like fuel oils, batching oils, lubricants, raw films textile machinery, etc

Export duties cover a number of items of which jute and tea are normally the most important In recent years however, export duties have been used to counter inflation and to obtain for the exchequer the benefit of any large disparities between the internal and external prices of the country s main exports The Government continue to keep under constant review the effect of such duties on the country s export trade and recently in certain cases, duties have either been abolished or reduced to improve the competitive position of the commodities concerned in world markets At present export duties cover jute, cotton, cotton waste, cotton cloth manganese ore tea, black pepper, iron and steel and certain manufactures thereof, some oils and oilseeds and mercury

The trend of revenue from customs is given below —

Year	(Rs in lakhs)
1948 49	126,16
1949 50	124 71
1950 51	157,15
1951 52	231,69
1952 53 (Budget)	165 00
1952 53 (Revised)	177 00
1953 54 (Budget)	170,00

INCOME-TAX

Income tax is levied now not only on income as ordinarily understood but also on certain capital receipts which have been included in a special definition of 'income Tax at the rate fixed for the year of assessment is charged on the income of the "previous year ' Both income tax and super tax are levied according to the slab system

The more recent trend of collections is given below —

1949–50 Accounts	Rs	161 11 crores
1950–51 Accounts	,,	173 22 ,,
1951–52 Accounts	,,	146 19 ,,
1952–53 Revised	,,	130 17 ,,
1953–54 Budget	,,	123 38 ,,

While the Corporation tax accrues in its entirety to the Centre, the net proceeds of income tax, except the tax attributable to Central emoluments and Centrally administered areas and any Central surcharge, are divisible between the Centre and the Parts A and B States The percentage to be assigned to the States has to be prescribed by the President by order after considering the recommendations

of the Finance Commission The Finance Commission recommended the States share to be 55 per cent as against 50 per cent hitherto Accordingly, the percentage shares of individual States in this 55 per cent is as follows —

Assam 2 25, Bihar 9 75, Bombay 17 50, Hyderabad 4 50, Madhya Bharat 1 75, Madhya Pradesh 5 25, Madras 15 25, Mysore 2 25, Orissa 3 50, PEPSU 0 75, Punjab 3 25, Rajasthan 3 50, Saurashtra 1 00, Travancore Cochin 2 50, Uttar Pradesh 15 75 and West Bengal 11 25

The Amendment Act of 1953 exempts foreign profits brought into India grants further relief in the matter of double taxation allows higher depreciation and further concessions to new undertakings and buildings, confers right to carry forward unadjusted loss, prescribes six new exemptions relating to miscellaneous items, and exempts accumulated income from charities Persons leaving India are, under the law, required to obtain a tax clearance, or tax exemption certificate In order to reduce the disparity between a foreign company operating through a wholly Indian subsidiary and a foreign company working through its branches in India, the Finance Act of 1953 reduced the super tax rebate to a foreign company in respect of income other than dividends received from a wholly subsidiary Indian company from one anna to six pies per rupee and the rate of super tax rebate in respect of dividends received from such subsidiaries was increased to one anna six pies per rupee

The Income Tax Investigation Commission submitted its report on the existing law of income tax towards the end of 1948 and the same was published towards the end of 1949 A summary of the principal recommendations were given in a previous edition

The total references about tax evasion to the Commission numbered 1,540 up to the end of 1951 Of these 661 were disposed of The Commission, in its report for 1951, complains that many cases which really deserved reference had been omitted for one reason or another while many had been referred which are comparatively insignificant It says that the machinery of investigation has gathered momentum The total amount of concealment reported in cases disposed of is Rs 29 16 crores while the settlement basis is Rs 2 41 crores In its opinion "the scope for making concealed profits has not in any manner lessened after 1947 It therefore urges Government to organise an inquiry branch to locate cases of tax dodging

GUIDE TO TAXES ON INCOME (1953-54)

Part I

RATES OF INCOME-TAX

A In the case of every individual, Hindu undivided family unregistered firm and other association of persons, not being a case to which paragraph B or C of this Part applies—

		Rate	Surcharge
1	On the first Rs 1,500 of total income	*Nil*	*Nil*
2	On the next Rs 3,500 of total income	Nine pies in the rupee	1/20th of the rate specified in the preceding column
3	On the next Rs 5 000 of total income	One anna and nine pies in the rupee	— Do —
4	On the next Rs 5 000 of total income	Three annas in the rupee	— Do —
5	On the balance of total income	Four annas in the rupee	Do —

Provided that—

(*i*) no income tax shall be payable on a total income which, before deduction of the allowance, if any, for earned income, does not exceed the limit specified below,

(*ii*) the income tax payable shall in no case exceed half the amount by which the total income (before deduction of the said allowance, if any, for earned income) exceeds the said limit

(*iii*) the income tax payable on the total income as reduced by the allowance for earned income shall not exceed either —

(*a*) a sum bearing to half the amount by which the total income (before deduction of the allowance for earned income) exceeds the said limit the same proportion as such reduced total income bears to the unreduced total income, or

(*b*) the income tax payable on the income so reduced at the rates herein specified,—whichever is less

The limit referred to in the above proviso shall be—

(1) Rs 8,100 in the case of every Hindu undivided family which satisfies as at the end of the previous year either of the following conditions, namely —

(*a*) that it has at least two members entitled to a share on partition who are not less than 18 years of age, or

(*b*) that it has at least two members entitled to a share on partition neither of whom is a lineal descendant of the other and both of whom are not lineally descended from any other living member of the family, and

(2) Rs 4,200 in every other case

B In the case of every company, not being a company to which paragraph C of this Part applies—

—	Rate	Surcharge
On the whole of total income	Four annas in the rupee	1/20th of the rate specified in the preceding column

Provided that in the case of a company which in respect of its profits liable to tax under the Income-Tax Act for the year ending on March 31, 1954, has made the prescribed arrangements for the declaration and payment within the territory of India excluding the State of Jammu and Kashmir, of the dividends payable out of such profits, and has deducted super tax from the dividends in accordance with the provisions of sub section (3D) or (3E) of section 18 of that Act—

(*i*) where the total income, as reduced by seven annas in the rupee and by the amount, if any, exempt from income-tax exceeds the amount of any dividends (including dividends payable at a fixed rate) declared in respect of the whole or part of the previous year for the assessment for the year ending on March 31 1954, and no order has been made under sub section (1) of section 23A of the Income-Tax Act, a rebate shall be allowed at the rate of one anna per rupee or the amount of such excess

(*ii*) where the amount of dividends referred to in clause (*i*) above exceeds the total income as reduced by seven annas in the rupee and by the amount, if any, exempt from income-tax, there shall be charged on the total income an additional income tax equal to the sum, if any, by which the aggregate amount of income tax actually borne by such excess (hereinafter referred to as the excess dividend) falls short of the amount calculated at the rate of five annas per rupee on the excess dividend

For the purposes of the above proviso, the expression 'dividend" shall have the meaning assigned to it in clause (6A) of section 2 of the Income-tax Act, but any distribution included in that expression, made during the year ending on the 31st day of March, 1954, shall be deemed to be a dividend declared in respect of the whole or part of the previous year

For the purposes of clause (*ii*) of the above proviso, the aggregate amount of income tax actually borne by the excess dividend shall be determined as follows —

(*i*) the excess dividend shall be deemed to be out of the whole or such portion of the undistributed profits of one or more years immediately preceding the previous year as would be just sufficient to cover the amount of the excess dividend and as have not likewise been taken into account to cover an excess dividend of a preceding year,

(*ii*) such portion of the excess dividend as is deemed to be out of the undistributed profits of each of the said years shall be deemed to have borne tax,—

(*a*) if an order has been made under sub section (1) of section 234 of the Income tax Act in respect of the undistributed profits of that year, at the rate of five annas in the rupee, and

(*b*) in respect of any other year, at the rate applicable to the total income of the company, for that year reduced by the rate at which rebate, if any, was allowed on the undistributed profits

C In the case of every local authority and in every case in which, under the provisions of the Income tax Act, income tax is to be charged at the maximum rate—

—	Rate	Surcharge
On the whole of total income	Four annas in the rupee	1/20th of the rate specified in the preceding column

Part II

RATES OF SUPER-TAX

A In the case of every individual Hindu undivided family, unregistered firm and other association of persons not being a case to which any other paragraph of this Part applies—

	Rate	Surcharge
1 On the first Rs 25,000 of total income	*Nil*	*Nil*
2 On the next Rs 15,000 of total income	Three annas in the rupee	1 20th of the rate specified in the preceding column
3 On the next Rs 15,000 of total income	Four annas in the rupee	—Do—
4 On the next Rs 15,000 of total income	Six annas in the rupee	—Do—
5 On the next Rs 15,000 of total income	Seven annas in the rupee	—Do—
6 On the next Rs 15,000 of total income	Seven and a half annas in the rupee	—Do—
7 On the next Rs 50,000 of total income	Eight annas in the rupee	—Do—
8 On the balance of total income	Eight and a half annas in the rupee	—Do—

B In the case of every local authority —

	Rate	Surcharge
On the whole of total income	Two and a half annas in the rupee	Three pies in the rupee

C In the case of an association of persons being a co-operative society (other than the Samkatta Sillowners Society in the State of Bombay) for the time being registered under the Co-operative Societies Act of 1912 or under any law of a State governing the registration of co-operative societies —

	Rate	Surcharge
1 On the first Rs 25,000 of total income	*Nil*	*Nil*
2 On the balance of total income	Two and a half annas in the rupee	Three pies in the rupee

D In the case of every company —

	Rate
On the whole of total income	Four and three quarter annas in the rupee

Provided that—

(*i*) a rebate at the rate of three annas per rupee of the total income shall be allowed in the case of any company which—

(*a*) in respect of its profits liable to tax under the Income tax Act for the year ending on the 31st day of March 1954 has made the prescribed arrangements for the declaration and payment in the territory of India excluding the State of Jammu and Kashmir of the dividend payable out of such profits and for the deduction of super tax from dividends in accordance with the provisions of sub section (3D) or (3E) of section 18 of that Act and

(*b*) is a public company with total income not exceeding Rs 25 000

(*ii*) a rebate at the rate of two annas per rupee of the total income shall be allowed in the case of any company which satisfies condition (*a*), but not condition (*b*), of the preceding clause, and

(*iii*) a rebate at the rate of one anna six pies per rupee on so much of the total income as consists of dividends from a subsidiary Indian company and a rebate at the rate of six pies per rupee on any other income included in the total income shall be allowed in the case of any company which not being entitled to a rebate under the preceding clauses is—

(*a*) a public company the shares of which were offered for sale in a recognised stock exchange at any time during the previous year, or

(*b*) a company all of whose shares were held at the end of the previous year by one or more such public companies as aforesaid

Provided further that the super tax payable by a company the total income of which exceeds Rs 25,000 shall not exceed the aggregate of—

(*a*) the super tax which would have been payable by the company if its total income had been Rs 25,000, and

(*b*) half the amount by which its total income exceeds Rs 25,000

Explanation —For the purposes of this paragraph of this Part, a company shall be deemed to be a public company only if it is neither a private company within the meaning of the Indian Companies Act, 1913 nor a company in which shares carrying more than fifty per cent of the total voting power were, at any time during the previous year, held or controlled by less than six persons

ESTATE DUTY

The question of levying an estate duty had been before the Government of India since 1946 when a bill was first introduced This as well as the one introduced in 1948 lapsed In August 1952, a third bill was introduced* with the object of imposing an estate duty on property passing or deemed to pass on the death of a person The underlying idea is to rectify to a large extent unequal distribution of wealth and to assist the States towards financing their development schemes The Bill was passed in Parliament in September 1953

The main features of the Bill are that the levy of duty depends on the domicile of the deceased the power to assess duty is vested in the Controller of Estate Duty and the scale of duties is stipulated in the law itself In Bombay Madhya Pradesh, Orissa, Uttar Pradesh Hyderabad, Rajasthan Punjab, Madhya Bharat and Saurashtra and all Part C States the duty is leviable on agricultural land as well Like the Income tax law this legislation also provides for exemption limits and defines what items are eligible for exemption and to what extent

The minimum exemption limit provided in the Bill is Rs 50,000 in respect of property which consists of an interest in the joint family property of a Hindu family governed by the Mitakshara Marumakkattayam or Aliyasantana law and Rs 100 000 in respect of all other property The rates of duty are given below —

Principal Value of Estate	Rate of Duty
In the case of Joint Hindu family property governed by Mitakshara etc law	
On the first Rs 50 000	*Nil*
On the next Rs 50 000	5%
On the next Rs 50 000	7½%
On the next Rs 50 000	10%
On the next Rs 1 lakh	12½%
On the next Rs 2 lakhs	15%
On the next Rs 5 lakhs	20%
On the next Rs 10 lakhs	25%
On the next Rs 10 lakhs	30%
On the next Rs 20 lakhs	35%
On the balance	40%
In the case of property of any other kind	
On the first Rs 1 lakh	*Nil*
On the next Rs 50,000	7½%
On the next Rs 50,000	10%
On the next Rs 1 lakh	12½%
On the next Rs 2 lakhs	15%
On the next Rs 5 lakhs	20%
On the next Rs 10 lakhs	25%
On the next Rs 10 lakhs	30%
On the next Rs 20 lakhs	35%
On the balance	40%
In the case of shares held by a deceased member in any such company referred to in sub section (1) of Section 84	
If the principal value of the shares does not exceed Rs 5 000	*Nil*
If the principal value of the shares exceeds Rs 5 000	7½%

SALES TAX

Sales tax is an alternative source of revenue consequent on the introduction of prohibition in the States It is an important feature of the provincial revenues throughout the country In West Bengal and Bihar the single point sales tax has been favoured Bombay switched over to the multi-point sales tax in 1953 54 but contemplates to have two point sales tax A broad idea of the receipts from sales tax can be had from the following table —

	Receipts in lakhs of Rs	
	1951 52 (Accounts)	1953 54 (Budget)
Madras	15 59	14,00
Bombay	11,88	14,00
Madhya Pradesh	2,32	2,12
Uttar Pradesh	4,80	5,24
Bihar	4,09	2 70
Assam	76	71
Orissa	1,11	1,00
Punjab	1 68	1,78
West Bengal	5,62	5,58

* The Estate Duty Act, 1953 came into force on Oct 15, 1953

POST-WAR REVIEW

The war meant a change to Indian finance To understand the implications of the change it may be noted, that (*a*) the aggregate war expenditure in undivided India, including recoverable war expenditure during the period 1939 40 to 1945 46 came to Rs 3,484 crores, India s share being Rs 1,744 crores or about 50 per cent and (*b*) that the overall Government al India s public revenue, expenditure and debt outlay (war and civil expenditure) amounted to Rs 3 996 crores of which Rs 1 462 crores or 37 per cent was met out of revenue the balance being partly reflected in the accumulation of sterling balances and partly in the addition to India s public debt which increased by Rs 1 077 crores

Following the end of the war, the budget for 1946 47 was designed to face the impact of a steep fall in defence expenditure The revenue was placed at Rs 311 60 crores and expenditure at Rs 355 71 crores On the other hand, the budget for the following year was aimed at social objectives Immediately after the partition, the emphasis was again shifted to incentives The keynote of the budget for 1949 50 was to check inflation and to allay the fears of business men and investors

POST-INDEPENDENCE FINANCE

The Constitution of India declaring India s Sovereign Republic was made effective from January 26 1950 It provides that the annual financial statement to be submitted to Parliament will show separately (1) expenditure charged upon the Consolidated Fund of India and (2) other expenditure proposed to be made from the same Fund and will distinguish expenditure on revenue account from other expenditure All revenues received by the Government of India and all loans raised by that Government and all moneys received in payment of loans will constitute the Consolidated Fund of India All other public moneys received shall be credited to the public account Parliament may establish a Contingency Fund which will be at the disposal of the President for making advances for meeting unforeseen expenditure pending its authorisation by Parliament

The financial provisions in the Constitution divide the field of taxation between the Union and States* The Union List covers (1) taxes on income other than agricultural income, (2) customs duties, (3) duties of excise on tobacco and other goods produced in India except alcoholic liquors opium, Indian hemp and other narcotic drugs and narcotics but including medicinal and toilet preparations containing alcohol (4) corporation tax, (5) taxes on the capital value of the assets exclusive of agricultural land, of individuals and companies and on the capital of companies (6) estate duty on property other than agricultural land (7) duties in respect of succession to property other than agricultural land (8) terminal taxes (9) taxes other than stamp duties on transactions on stock exchanges and futures markets (10) rates of stamp duty on bills of exchange, cheques, promotes bills of lading letters of credit insurance policies transfer of shares, debentures proxies and receipts, and (11) taxes on the sale or purchase of newspapers and on advertisements published therein

The financial provisions of the Constitution of India closely follow the Government of India Act, 1935 It enumerates in three separate lists the Union, State and Concurrent subjects of legislation Residuary powers of legislation vest in the Union Parliament The items in the respective lists are broadly the same as under the Government of India Act 1935 There are some changes in the division of tax resources between the Union and the States Article 286 of the Constitution restricts the powers of the States in regard to sales tax with a view to ensuring uniformity in the principles governing the tax which however, will be levied and administered by the States A State Government cannot impose a tax on the sale or purchase of goods outside the State or if it concerns India s foreign trade or inter State trade or if the goods in question are declared by Parliament to be essential to the life of the community Taxation on the sale or purchase of newspapers and of advertisements published in them is included among taxes levied and collected by the Union but the proceeds will be assigned to the States No changes are made in the sharing of income tax proceeds A prescribed percentage of the net proceeds from taxes on income other than agricultural income (exclusive of the corporation tax, taxes payable in respect of Union emoluments and proceeds attributable to Part C States) shall be assigned to the States in which they are levied The limit of the total amount of the tax on professions trades callings and employments payable by any one person to a State or to a local authority is raised from Rs 50 to Rs 250 per annum The provision that, if Parliament by law so provides the whole or any part of the net proceeds of an excise duty levied and collected by the Union may be paid over to the States is retained The Union retains the power to levy surcharges on certain taxes for purposes of the Union

The jute growing States are no longer entitled to a specified share of the net proceeds of the export duty on jute or jute products Under Article 273 of the Constitution, the jute duty is assigned wholly to the Centre the States of West Bengal, Assam Bihar and Orissa will receive however grants in aid so long as the jute export duty is levied or for a period of 10 years which ever is earlier As under Section 142 of the Government of India Act 1935 Article 275 of the Constitution of India provides for general grants in aid to such States as Parliament may determine to be in need of assistance the amount of the aid may vary as between States and from year to year The Article provides for grants in aid to states in respect of approved schemes of development for promoting the welfare of Scheduled Tribes or for raising the level of administration of the Scheduled Areas and for grants in aid to Assam of sums equivalent to (1) the average excess of expenditure over revenues during the two years immediately preceding the commencement of the Constitution in respect of the administration of (specified) tribal areas and (2) the costs of such schemes of development as may be undertaken by that State with the approval of the Government of India for raising the level of administration of the said areas to that of the administration of the rest of the area s of the State

The provisions relating to borrowing remain unaltered The executive power of the Union extends to borrowing upon the security of the Consolidated Fund of India within such limits if any, as may be fixed by Parliament and the giving of guarantees within such limits as may be fixed A State can borrow within the territory of India on the security of the Consolidated Fund of the State The Government of India may make loans to any State or give guarantees in respect of loans raised by a State Prior consent of the Government of India is necessary for a State to raise a loan if there is still outstanding any part of a loan made to it by the Government of India or in respect of which a guarantee has been given by the Government of India In giving such consent, the Government of India may impose any conditions they may deem necessary

INDIAN STATES' FINANCE

The Government of India appointed on October 22, 1948 a Committee of experts to inquire into the finances of Indian States and Unions of States with a view to facilitating their financial integration The Committee was composed of Sir V T Krishnamachari, Chairman Mr S K Patil and Mr N Dandekar The summary of its recommendations, which were accepted by Government is given in the previous edition

As a result of the Government of Part C States Act, 1951, Coorg Himachal Pradesh, Vindhya Pradesh, Delhi Bhopal and Ajmer have had their own legislatures from April 1952 Each of the States consequently has a Consolidated Fund of its own into which the revenues and receipts received in that State and belonging to it are paid and from which the expenditure of the State is met In respect of Delhi State however, the Act makes a reservation in respect of police public order and lands and buildings in Delhi and New Delhi the receipts in respect of which as well as expenditure will still be included in the Central budget

These States however have not been placed in the same autonomous position in regard to their finances as Part A or Part B States, their balances have not been separated from those of the Central Government and their capital requirements and the debt deposit and remittance transactions are still included in the Central budget A grant in aid is given where necessary to these States for balancing their budgets and keeping an adequate working balance in their Consolidated Funds As the provisions of Part XII of the Constitution do not apply to Part C States they do not receive any share of the net proceeds of income tax or other divisible heads of the Central revenue like the Part A and the Part B States

In April 1953 the Government of India appointed a Taxation Inquiry Commission with Dr John Matthai as Chairman The terms of reference settled in consultation with the state Governments are (1) to examine the incidence of Centra , State and Local taxation on various classes of people and in different states (2) to examine the suitability of the present system of taxation Central State and Local—with reference to (*a*) the development programme of the country and the resources required for it and (*b*) the objective of reducing inequalities of income and wealth (3) to examine the effects of the structure and level of taxation of income on capital formation and maintenance and development of productive enterprise (4) to examine the use of taxation as a fiscal instrument in dealing with inflationary or deflationary situations (5) to consider other relevant matters and (6) to make recommendation in particular with regard to (*a*) modifications required in the present system of taxation and (*b*) fresh avenues of taxation

* See also the report of the Finance Commission

REPORT OF THE FINANCE COMMISSION*

THE Finance Commission consisting of Mr K C Neogy (Chairman) Mr V P Menon, Mr Justice R Kaushalendra Rao, Dr B K Madan, and Mr M V Rangachary (member-secretary) was set up by the President by an order dated 22nd Nov 1951 The report was presented to the House of the People on 13th Feb 1953

The Chairman assumed office on 30th Nov 1951 Mr V P Menon resigned his office on 18th Feb 1952 and the President appointed Mr V L Mehta in his place

Pending final recommendations the Commission proposed on 16th Dec 1951 that (1) in regard to the states share of income tax or of grants the position existing in 1951 52 should be maintained (2) the decisions taken on the final recommendations should have effect from the year 1952 53 and (3) grants made to Part A States into which former Indian States territory is merged under sub clause (1)(*b*) of Article 278 of the Constitution might also be continued during 1952 53 but treated as provisional and readjusted in the light of final recommendations

The final recommendations are effective for a period of five years ending 31st March 1957 They are summarized as follows

1 The *percentage of net proceeds of income* tax to be allocated to States should be raised from 50 per cent to 55 per cent

2 The proceeds of the income tax assigned to the States should be distributed as follows in percentage Assam 2 25, Bihar 9 75 Bombay 17 50 Hyderabad 4 50 Madhya Bharat 1 75 Madhya Pradesh 5 25 Madras 15 25 Mysore 2 25 Orissa 3 50 PEPSU 0 75 Punjab 3 25 Rajasthan 3 50 Saurashtra 1 00 Travancore Cochin 2 50 Uttar Pradesh 15 75 West Bengal 11 25

3 The share of the proceeds of the income-tax of Part C States should be raised from one per cent to two and three quarters per cent

4 Forty per cent of the net proceeds of the duties on tobacco (including cigarettes cigars etc) matches and vegetable products should be allocated to the States (in proportion to the population) and distributed as follows in percentage Assam 2 61 Bihar 11 60 Bombay 10 37, Hyderabad 5 39, Madhya Bharat 2 29, Madhya Pradesh 6 13 Madras 16 44, Mysore 2 62 Orissa 4 22 PEPSU 1 00 Punjab 3 66, Rajasthan 4 41 Saurashtra 1 19, Travancore-Cochin 2 68, Uttar Pradesh 18 23, West Bengal 7 16

5 The grants in aid payable to the jute-growing States with effect from 1952 53 are as follows West Bengal Rs 150 lakhs, Bihar Rs 75 lakhs, Assam Rs 75 lakhs, Orissa Rs 15 lakhs

6 As regards grants in aid to States which may be in need of assistance on any account

(*a*) The following States do not need any assistance Madras, Uttar Pradesh Bihar, Madhya Pradesh Hyderabad, Rajasthan, Madhya Bharat and PEPSU

(*b*) Bombay, West Bengal Orissa and Saurashtra are marginal cases Bombay has a well developed economy, a large budget and resilient resources There is also no restriction now in taxing tobacco and the State is free to raise additional revenue from this source No grant in aid is therefore necessary

West Bengal A grant in aid of Rs 80 lakhs a year because of the result of partition and the problem of refugees

Orissa Rs 75 lakhs, because of the merged areas, the existence of Scheduled Tribes, backward classes

Saurashtra Rs 40 lakhs, because of the size of the State, and its budget

(*c*) Punjab Rs 125 lakhs because of the law and order problem arising from partition

(*d*) Assam Rupees One crore because of special difficulties arising from partition

In the case of West Bengal Assam and Punjab it is assumed that the expenditure on displaced persons will continue to be borne mainly by the Centre

(*e*) Mysore Rs 40 lakhs because of limited resources

(*f*) Travancore Cochin Rs 45 lakhs because of limited resources

7 In respect of grants in aid for primary education the following sums should be distributed among eight States in proportion to the number of children of school going age not attending school at present

(In lakhs of rupees)

	1953–54	1954–55	1955–56	1956–57
Bihar	41	55	69	83
Madhya Pradesh	25	33	42	50
Hyderabad	20	27	33	40
Rajasthan	20	26	33	40
Orissa	16	22	27	32
Punjab	14	19	23	28
Madhya Bharat	9	12	15	18
PEPSU	5	6	8	9
TOTAL	150	200	250	300

* For recommendations of the Gadgil Committee report on assistance to Part B States see end of article

8 The grants now being paid to the States of Bombay Madhya Pradesh and Madras for refraining from the taxation of tobacco should be discontinued with effect from the 1st April 1953

9 The *revenue gap grants* now being paid to the States of Bihar, Bombay Madhya Pradesh and West Bengal in respect of the 'merged areas' should be discontinued with effect from the 1st April 1952

10 The Commission made two further recommendations one relating to the setting up of a small organisation to study State finances and the other for improving the available statistics in regard to income tax This organisation the Commission suggests, should preferably be a part of the Secretariat of the President and make a continuous study of the finances of the State Governments so that whenever future Finance Commissions are constituted they will have sufficient material available to them at the very commencement of their inquiry This organisation should work in close liaison with the Finance Ministry

The tables below compare what each State might on an average expect to receive under the Commission's recommendations (second table), with the corresponding sums Part A States received during the three years ending 1951 52 and Part B States during the two years ending 1951 52 (first table)

AVERAGE *FOR THE PERIOD* 1949 50 *TO* 1951 52

(In lakhs of rupees)

	Share of income tax	Grants in-aid under Article 273	Grants in aid under substantive portion of Article 275 (1)	"Revenue Gap Grants"	Total
Assam	1,45	46	30		2,21
Bihar	6,14	39		2	6,55
Bombay	10,18			1,42	11,60
Hyderabad				1,25	1,25
Madhya Bharat	6				6
Madhya Pradesh	2 91			44	3,35
Madras	8,56				8,56
Mysore				3,45	3,45
Orissa	1,44	6	40	11	2,01
PEPSU	16				16
Punjab	2,59		84†		3,43
Rajasthan	10				10
Saurashtra				2,75	2,75
Travancore Cochin				3 22	3,22
Uttar Pradesh	8,88				8,88
West Bengal	6,32	1,14		8	7,54
TOTAL	48,79	2,05	1,54	12,74	65,12

† Discontinued from 1951-52 The grants in aid to Punjab were *ad hoc*

UNDER THE COMMISSION'S SCHEME

(In lakhs of rupees)

	Share of income tax and Union Excise	Grants in-aid under Article 273	General Grants in aid under substantive portion of Article 275 (1)	Revenue Gap Grants'	Total	Primary Education Grants	Grand Total
Assam	1 70	75	1,00		3 45		3 45
Bihar	7 30	75			8,05	50	8 55
Bombay	11 25				11 25		11 25
Hyderabad	3,35				3 35	24	3,59
Madhya Bharat	1 35				1 35	11	1,46
Madhya Pradesh	3,90				3 90	30	4 20
Madras	11 10				11 10		11 10
Mysore	1 70		40	1 58*	3,68		3 68
Orissa	2 65	15	75		3,55	19	3 74
PEPSU	60				60	5	65
Punjab	2 40		1 25		3 65	17	3 82
Rajasthan	2,65				2 65	24	2,89
Saurashtra	75		40	1 87*	3 02		3,02
Travancore Cochin	1,80		45	98*	3,23		3 23
Uttar Pradesh	11,70				11,70		11 70
West Bengal	7 30	1,50	80		9 60		9 60
TOTAL	71,50	3 15	5 05	4,43	84,13	1,80	85,93

* As the share of the divisible taxes of these States is expected to be less than the Guaranteed Revenue Gap Grants the States will receive the latter The balance of these grants after allowing for the share of these divisible taxes is shown in this column

Note 1 Assam and the other States with Scheduled Areas and Scheduled Tribes will in addition receive grants under the two provisos to Article 275(1) of the Constitution Assam will also receive Rs 40 lakhs under sub clause (*a*) of the Second proviso to Article 275(1)

ote 2 In addition to the share of revenues under the Commission s scheme the States will also receive the outstanding arrears of their share of income tax in respect of the period before the 1st April 1952 The budget for 1952 53 assumes that these arrears will be Rs 5 crores and if the actual amount is of this order Madras will receive Rs 87 lakhs Bombay Rs 105 lakhs, West Bengal Rs 68 lakhs Uttar Pradesh Rs 90 lakhs Punjab Rs 27 lakhs Bihar Rs 63 lakhs Madhya Pradesh Rs 30 lakhs, Assam Rs 15 lakhs and Orissa Rs 15 lakhs

The Commission kept three main considerations in view, first the additional transfer of resources from the Centre must be such as the Centre could bear without undue strain on its resources taking into account its responsibility for such vital matters as the defence of the country and the stability of its economy, second, the principles for the distribution of grants-in aid must be uniformly applied to all the States, and last the scheme of distribution should attempt to lessen inequalities between States

The main considerations in determining the distribution of income tax were (*a*) general population and (*b*) contribution

GADGIL COMMITTEE

A Committee of Inquiry consisting of Mr N V Gadgil (Chairman) Mr S V Ramamurthy and Mr B C Ghose was appointed by a resolution of the Government of India dated April 28 1953 to enquire into any special assistance that Part B States might need

The findings of this Committee were made public on December 24 1953

The recommendations are as follows

Assistance should take the form of an out right grant of Rs 4 crores out of the Central assistance envisaged in the Five Year Plan of these States, in addition to whatever grants it has already been decided to give and an *ad hoc* grant of Rs 4 crores to be allotted during the next two years

The *ad hoc* grant is to be spent on administrative buildings and for providing link roads and public health services in the rural areas

In order to strengthen the administrative machinery of these State Governments the Committee has suggested that each of them may be provided with two senior officers one specially competent to deal with general administration and the other with development so that their services may be utilised as Chief Secretary and Development Commissioner respectively

It is also suggested that in the initial stages of planning and development in each of these States a Planning and Development Board may be entrusted with the planning and implementation of the State plans

The outright grant of Rs 4 crores recommended by the Committee is to be distributed as follows

Rajasthan Rs 1 50 00 000 Saurashtra and Madhya Bharat Rs 1 00 00,000 each and PEPSU, Rs 50 00,000

The additional sum of Rs 4 crores recommended as an *ad hoc* grant is to be distributed in the following proportion

Rajasthan Rs 1 50 00 000 Madhya Bharat Rs 1 00 00 000 Saurashtra, Rs 90 00 000 and PEPSU Rs 60 00 000

The Government of India has decided to accept the financial recommendations of the Committee on the condition that the State Governments on their part accept and implement the recommendations on administrative matters

The following table shows the financial assistance given by the Central Government during the years 1950 to 1952 The total figure (Rs in lakhs) includes grant in aid loan share of income tax or revenue gap grant whichever is greater

	1950	1951	1952
Rajasthan	127	218	383
Madhya Bharat	69	86	317
Saurashtra	128	110	200
PEPSU	141	147	196

INDUSTRIAL STRUCTURE

INDUSTRIAL production in India has been maintaining an upward trend in many directions since independence in August 1947

The interim index of industrial production with 1946 as the base advanced from 97 2 in 1947 to 108 4 in 1948, slightly receded to 106 1 in the following year and further to 105 0 in 1950 mainly because of the heavy fall in the output of cotton textiles but it advanced sharply to 117 2 in 1951 In 1952 it stood at 128 7

An elaborate census of Indian manufactures covering 29 groups of industries has been in progress since 1949 The industries covered by the census are wheat flour rice milling biscuit making fruit and vegetable processing sugar distilleries and breweries, starch vegetable oils paints and varnishes soap tanning cement glassware ceramics plywood paper and paper-board matches cotton textiles, woollen textiles, jute textiles chemicals drugs and pharmaceuticals non ferrous metals iron and steel bicycles, sewing machines producer gas plants, electric pumps electric fans and general and electrical engineering

The latest report covers these industries for 1950 The following picture has emerged —

	1949	1950
No of Factories	6 700	6 323
Fixed Capital (Rs Crores)	228	229
No of employees (million)	1 7	1 627
Wages and Salaries (Rs Crores)	178	162
Materials Consumed (Rs Crores)	704	719 6
Value of Products (Rs Crores)	964	983 7
Value added by manufacture (Rs Crores)	260	270

Industries have been further divided into durable and non durable ones The following industries belong to the former class iron and steel sewing machines electric lamps, electric fans general and electrical engineering bicycles non ferrous metals ply wood and tea chests cement glass and glassware and ceramics The structure of the two types of industrial units was as follows in 1950 —

	Durable	Non Durable
Number of factories	2,711	4 01
Fixed capital (Rs crore)	72	165 8
No of employees (lakhs)	3 15	12 12
Wages salaries etc (Rs crores)	39 3	12 0
Value of materials consumed	102 9	616 6
Value of products	167 8	822 2
Value added to manufacture	64 9	205 3

INDUSTRIAL POLICY

On April 6 1948 the Government of India outlined their industrial policy in a resolution which *inter alia* stated

(1) The manufacture of arms and ammunition the production and control of atomic energy and the ownership and management of railway transport should be the exclusive monopoly of the Central Government

(2) The State will be responsible for the establishment of new undertakings in the field of coal, iron and steel aircraft manufacture, ship building manufacture of telephone, telegraph and wireless apparatus excluding radio receiving sets and mineral oils Existing undertakings will be allowed to develop for a period of ten years and Government will give all assistance for such development At the end of the period their position will be reviewed

(3) Control by the State over the generation and distribution of electric power will continue

(4) Rest of the industries will normally be open to private enterprise with varying degrees of control over location

(5) The Central Government would investigate the extent to and the manner in which cottage and small scale industries could be co ordinated and integrated with large scale industries

Towards the end of 1951 Parliament passed the Industries (Development and Regulation) Bill The Act is now in force The Act applies to 37 industries listed in the First Schedule to the Act

The most important provision is the establishment of Development Councils which will deal with the problem of productivity and service to the community On the top will be the Central Advisory Council for Industries which will advise Government on rules directions to industrial undertakings and taking over the management of industrial concerns

The Act provides for the registration of existing industrial undertakings and licensing of new ones

It also empowers Government to investigate into the causes of any possible fall in the production of any concern or any deterioration in the quality of the product, and to take action

The Act contains provisions for direct control by the Central Government in certain cases

In the middle of 1952 a Central Advisory Council of Industries was established consisting of 27 representatives of industry labour consumers and primary producers pertaining to the scheduled industries

Upto November 1 1952 which was the last date prescribed for registration under the Act, 3 562 undertakings had applied for registration Of these 2 209 were found to be eligible for registration

A Licensing Committee has also been set up consisting of representatives of the Ministries of Commerce and Industry Finance Railways Production and of the Planning Commission to examine application for licences Out of 125 applications for licences received in 1952, 81 had to be considered by the Committee

There was only one case up to 1953 Aug in which Government ordered an investigation into the circumstances of an undertaking

The scope of the Act was enlarged in 1953

REGULATED INDUSTRIES

The Industries (Development and Regulation) Bill which received the assent of the President on Oct 31, 1951 and came into force on May 8 1952 applies to the following 37 industries

Aircraft arms and ammunition automobiles including tractors, agricultural implements, batteries, dry cells and storage bicycles coal, coke and their derivatives cement electric lamps and fans, electric motors, glass and ceramics heavy chemicals including fertilizers heavy machinery including ball and roller bearing gear wheels steam generator equipment hurricane lanterns iron and steel internal combustion engines locomotives and rolling stock leather and leather goods mathematical and scientific instruments motor and aviation fuel kerosene crude oils and synthetic oils machine tools machinery and equipment for the generation transmission and distribution of electric energy non ferrous metals including alloys paper including newsprint and paper board pharmaceuticals and drugs power and industrial alcohol power driven pumps rubber goods radio receivers ships and other vessels propelled by mechanical power sugar sewing and knitting machines small tools and hand tools telephones telegraph apparatus and wireless communication apparatus textiles made wholly or partly by cotton and jute textiles made of wool vanaspati and vegetable oils

FIVE-YEAR PLAN

The Five Year Plan provides for completion of the various industrial projects already under implementation by the Central Government or by the State Governments

In addition the Central Government has a special responsibility for establishing certain defence industries

Over the five year period the total expenditure on the projects in the public sector amounts to Rs 94 crores exclusive of the lump sum provision of Rs 50 crores for basic industries and transport

The bulk of it —Rs 8 crores —is in respect of projects directly under the Centre

The major project is the one for iron and steel with an estimated capacity of 500 000 tons of pig iron and 250 000 tons of steel

Others are ship building machine tool manufacture fertilizers at Sindri locomotives railway coaches, penicillin national instruments manufacture telephone industries cable salt works rare earth factory, D D I and housing factory

The State Governments projects cover (1) Mysore Iron and Steel Works (2) a Cement factory in Uttar Pradesh (3) Neila Mills in Madhya Pradesh (4) Sunlik Ltd in Hyderabad for spinning art silk yarn (5) Sirpur Paper mills in Hyderabad (6) Precision instruments factory in Uttar Pradesh and (7) Superphosphates factory in Bihar

In the private sector the total capital investment considered necessary for the purpose is estimated at Rs 246 crores Four fifths of this would be in respect of capital goods and producer goods industries

Roughly out of the total investment on industries in both the sectors 26 per cent is to go into the metallurgical industries one fifth into petroleum refining 16 per cent into engineering industries and 8 per cent into the manufacture of heavy chemicals fertilisers and pharmaceuticals Among the rest mention may be made of textile industries (6%) cement (5%), and paperboard and news print (4%)

*

PRODUCTION AND PRICES

IN 1952 there was a recession in world prices of almost all agricultural commodities In India there was an appreciable increase in the production of many industrial and agricultural commodities

Besides the normal G M F schemes, an accelerated programme of minor irrigation works estimated to cost Rs 10 crores per year was taken up The programmes for the development of cotton and jute made satisfactory progress The production of sugarcane recorded a sizable increase from 4 9 million tons in 1948 49 to 5 9 million tons in 1951 52 in terms of gur

The following was the trend of production of primary commodities from 1949 —

(000)

Commodity	1949 50	1950 51	1951 52	1952 53
Cereals (Tons)	46,018	41 786	41,264	45 000
Sugar, Raw (Tons)	4 938	5,616	5 895	5,035(a)
Oilseeds (Tons)	5,142	5,103	4,791	N A
(a) Sesamum (Tons)	431	453	441	451
(b) Groundnut (Tons)	3,379	3 437	3,037	2 894
(c) Rape and Mustard(Tons)	793	748	900	N A
(d) Linseed (Tons)	411	361	309	N A
(e) Castorseed (Tons)	128	104	104	107
Cotton (Bales of 392 lb)	2 628	2 971	3 134	2 905
Jute (Bales of 400 lb)	3,089	3 301	4,678	4 695
Tea (lb)	585 030	607 309	624 750	620 000
Coffee (Tons)	22	2	N A	N A
Rubber (Tons)	16	16	17	N A
Lac (md)	1 161	1,003	1,197	N A
Silk Raw (lb)	2 104	2,127	—	N A
Mica (cwt)	271	326	491	N A
Iron Ore (Tons)	2 809	2 965	3 657	N A
Manganese Ore (Tons)	646	883	1 284	N A

(a) Second I orecast corresponding figure for 1951 52 being 5 288 tons

N A —Final production figures are not available

INDUSTRIAL PRODUCTION, 1952

Partly in sympathy with world trends and partly due to the working of internal forces, something like a recession set in within the country in the second quarter of 1952 To prevent the fall in industrial production controls were relaxed in several directions The restriction on imports was so planned as to give the maximum scope to the indigenous producer Efforts to achieve an equitable distribution of scarce raw materials, indigenous or imported were continued

As a result, in spite of the setback experienced by particular industries the general index of industrial production at 128 7 in 1952 was higher than in any other year since the war and showed a substantial increase over the indices for 1951 (117 2) and 1950 (105 0) A particularly favourable feature of this rise was that the highest monthly index (137 8) was recorded at the end of 1952 in December showing a rising tendency and even the minimum (121 5) in June was higher than the average of the previous year

The indices for the first three months of 1953 were 131 2 for January, 136 0 for February and 129 9 for March

The position of particular industries is discussed in the relevant chapters It may however be noted that the most significant increase in production was in the cotton textile industry The output in 1952 was a record one providing a 25 per cent increase in the *per capita* supply of cloth over 1951 The production of steel and cement was higher than in the previous year Significant increases were also noted under sugar, bicycles sewing machines electric lamps plywood jute goods and chemicals the increases in percentage over 1951 being 34 71 1, 12 5, 33 9, 24 9, 8 8 and 48 3 respectively

RAW MATERIALS, 1952

During the year ended June 1950 efforts were continued to increase food production and about one million acres of land were reclaimed under mechanical cultivation The total of wells and tanks newly constructed or repaired came respectively to 97 000 and 4 000, while the minor irrigation projects completed and water lifting appliances installed numbered 14 000 and 17 000 respectively The additional production is estimated at 7 9 lakh tons in 1948 49 and 9 5 lakh tons in 1949 50 The target for additional food output for 1950 51 was fixed at 1 7 million tons and Rs 23 34 crores were provided for the purpose but the actuals fell short of the target and Government appointed a committee early in 1952 to go into the question of the grow more food campaign

Foodgrains production in 1949 50 season increased by 1 29 million tons to 45 55 million tons in spite of the damage caused to the kharif and rabi crops by adverse season and natural calamities The production of raw sugar rose to 4 94 million tons and of coffee to 17 238 tons During 1950 51 season the outturn of the crops once again suffered and the loss of foodgrains was to the tune of 5 5 million tons

Following the partition India's cotton and jute industries continued to experience difficulties in obtaining adequate supplies of raw cotton and raw jute and efforts to reduce the country's dependence on outside supplies were initiated in 1949 50 and continued in the following years In order to provide additional incentive to the cotton growers, the ceiling prices for cotton were raised with *farilla* stepped up from Rs 620 to Rs 770 and further to Rs 820 As a result an additional output of four lakh bales of cotton was secured bringing the total production in 1950 51 to 33 lakh bales A three year programme was initiated for raw jute with the result that the production was stepped up from 30 89 lakh bales in 1949 50 to 32 92 lakh bales in the following year and to 46 lakh bales in 1951 52 Production of five major oil seeds rose from 4 5 million tons in 1948 49 to 5 1 million tons in 1949 50 mainly because of the price incentive

The broad picture* of industrial production is given below —

Industry	Unit	1948	1949	1950	1951	1952
Finished Steel	(000 Tons)	857	930	1,004	1 076	1 103
Cotton Yarn	(Million lb)	1,447	1,360	1,175	1 304	1 460
Cotton Piece goods	(Million yd)	4,319	3,905	3,665	4,076	4 595

A REVIEW 1950-52

The rising trend in industrial production since 1948 was on the whole well maintained in 1950 with most of the industries recording appreciable increases The cotton and jute textiles and sugar industries were, however, notable exceptions, the first due to shortage of raw materials and since these had a large weightage in the computation of the general index of industrial production, the official index of industrial production for 1950 stood at 105 2 as compared with 106 3 in the preceding year and 108 9 in 1948 The increase was particularly marked in the output of cement, steel, salt, diesel engines and electrical goods industries

The year 1951 was a record thanks to the improvement in the supplies of raw materials and a more realistic price basis Special efforts were made by Government to procure raw materials supplies through the International Materials Conference The most outstanding development was the abolition of the control over raw jute and jute goods prices The general index of industrial production, with 1946 as the basis, touched the spectacularly high level of 117 2 Coal output touched a new high under the stimulus of export inquiry , cotton manufactures rose by 10 per cent , paper, sugar, and chemicals showed an all round rise and for the first time self-sufficiency was not only achieved in respect of salt but it was revealed that India could start exporting it in small quantities The only snag was that in several newly started industries, the output still lagged considerably behind the installed capacity Among the new lines of manufactures may be mentioned linoleum, automatic looms, carding engines and aluminium powder

CENSUS OF MANUFACTURES

The following census of some selected manufactures for 1950 may be found useful

The second column shows the number of factories reporting, the third the fixed capital in Rs lakhs the fourth the value of the products in Rs lakhs the fifth the value added by manufacture in Rs lakhs

	Factories	Fixed Capital	Value of products	Value added by manufacture
Cotton textiles	517	60,20	503 82	95 17
Jute textiles	107	29,81	150,85	44 65

PRICES IN 1952-53

Food articles declined by 10 per cent semi manufactures by 8 per cent, manufactures by 6 per cent and miscellaneous by 15 per cent

The average for cereals fell by 7 per cent to 444 over the year but wheat moved up almost without interruption Jowar after rising from 216 in April to 225 in July, fell to 177 in October and closed the year at 207 Pulses after a decline from 436 in April to 412 in May, advanced steadily reaching the highest level of 611 in February and closing at 507

Other food articles declined by 19 per cent to 223 mainly as a result of lower prices of tea, sugar and gur Coffee was, however, dearer

The average for fibres fell by 32 per cent to 423 during the year Cotton, which steeply declined to 367 in March 1952, recovered steadily to 466 in September and wound up the year at 446 Raw jute witnessed almost a continuous decline touching the bottom at 364 at the close of the year Raw silk and wool opened at 364 and 307 and closed at 500 and 595 respectively

Minerals advanced by 4 per cent owing to higher export prices of manganese and iron ores but other items registered a heavy fall of 31 per cent to 333 as a result of a further fall in raw hides and lac Rubber was placed higher under Government orders with effect from October 27

Among semi manufactures leather improved to 437 at the close of the year after touching the lowest level of 257 in April The average for the year was however 9 per cent lower at 367 than the preceding year s average The price of mineral oils rose but vegetable oils averaging 446 showed a fall of 20 per cent over 1951-52 Cotton yarn moved down from 498 to 446 and the yearly average was 9 per cent below the preceding year s average Metals rose by 8 per cent because of the rise in the prices of pig iron and semis Copper was firm but zinc ruled weak Timber moved down rather sharply from 234 at the beginning of the year to 179 at the close

A fall of 10 per cent was noted under textiles Jute manufactures moved down from 548 in April 1952 to 419 in August and after a tempo rary rise in the following two months, closed at 376 Cotton manufactures were down by 2 per cent over 1951 52 at 400 Ravon and silk ruled firm in the first quarter but the subsequent trend was downward The average for woollen manu factures was lower at 323 as compared with 394 in 1951 52 The average for metal products, on the other hand, appreciated by 13 per cent to 330 mainly on account of higher steel prices

The miscellaneous group showed a fall of 15 per cent to 614 Vanaspati prices were reduced and eventually decontrolled in June 1952 Pepper black advanced from 2,077 in April 1952 to 3,284 in October but had a set back in the following two months after which prices again moved up Chillies turmeric and cummin were placed lower After the March slump, cashewnuts more than regained the ground but from October they displayed weakness, the index standing at 554 at the close as compared with 562 in March 1952 Tobacco leaf stood at 818 at the close against 902 at the beginning of April 1952

During 1952 53 Government adapted their price control policy to the changing conditions of demand and supply Price controls were either relaxed or removed on a number of consumer goods On the other hand, price increases were permitted in respect of pig iron, steel and rubber. The floor prices of cotton were also raised by Rs 55

On September 25 1952 the Government removed the price and distribution controls over sugar of the 1952 53 season and also reduced the minimum price of sugarcane With effect from May 1, 1952 the price of imported milo was reduced by Rs 2 to Rs 13 per maund and that of imported wheat by a rupee to Rs 17 8 per maund as from March 1, 1953

The following table gives the price trend

(Year ended August 1939=100)

Average of Weeks	Food Articles	Industrial Raw Materials	Semi manufactured Articles	Manufactured Articles	Miscellaneous Articles	General Index
1947-48	306 1	377 5	261 6	286 4	456 2	308 2
1948-49	382 9	444 8	327 3	346 1	525 2	376 2

June 53	398 7	481 0	363 5	370 1	674 5	405 4

REVIEW OF PRICES FROM 1939

The outbreak of the Second World War in September 1939 introduced a new chapter in the history of Indian commodity prices After an initial rise the prices received a sharp setback following the loss of export markets, but the entry of Japan into the war made heavy calls on India s resources from the Allies and the resultant rise in note circulation aggravated inflationary pressures and the pace of the rise The index number of wholesale prices, with the week ended August 19, 1939 equal to 100, rose to 125 6 in 1939 40 but receded in the following year by 10 8 to 114 8 Since then it advanced by 19 per cent to 137 0 in 1941-42, further by 25 per cent to 171 0 in 1942 43 and recorded the highest rise of 38 per cent in any one year during 1943 44 when it touched 236 4 During 1944 45 the price index advanced by only 7 8 to 244 2 and reached 244 9 in the following year It was during 1946 47 that the policy of decontrol sent up the general price index by about 11 per cent to 270 4 and further to 307 0 in 1947 48

Price trends during 1948 49 fell into two distinct phases—a continued rise from April to July and a comparative stability during the rest of the year, with signs of a downward trend in the last quarter of the year The latter phase was associated with the reimposition of controls, and a net contraction of Rs 18 crores in money supply during the last eight months of the year The general index num ber, with the year ended August 1939 as the base, shot up from 347 9 to 389 6 by July and then tap ered off to 370 2, the average for the year being 376 2 revealing a rise of 22 per cent over the year

With the opening of the financial year of 1949, the prices began to advance upward till the Economic Adviser's general index, which stood at 370 2 in March 1949, touched 389 8 in September 1949 which exceeded the post-decontrol peak level reached in July 1948 and climbed to 393 3 in October 1949 The jump resulted in part from a sharp rise in the prices of certain export goods, in particular, tea, black pepper, oils and oil seeds Following the devaluation of the rupee the Government of India adopted an eight-point anti-inflationary programme including a voluntary cut in the prices of manufactured goods and brought down the price index from 393 3 in October to 381 3 in December 1949 These efforts, however, proved temporary and practically the whole of the improvement of the preceding two months was lost by the close of March 1950, the general index moving up to 392 4 in March The average for the year worked out at 385 4 as against 376 2 in 1948 49

The uptrend in the general price level noticed during the closing quarter of 1949-50 gathered further momentum in the following year, particularly in the latter half The continuation of the gradual rise in prices since devaluation was accelerated with the outbreak of the Korean war and prices reached a peak at 438 6 in March 1951 recording a rise of 11 8 per cent over the year as against a rise of 6 0 per cent in 1949 50 The rise was, however, less marked than that in the U K and the U S where the increase was as much as 27 4 per cent and 20 3 per cent respectively

To meet the situation, the Finance Minister enunciated in August 1950 an eight point programme outlining the major objectives of Government s economic and financial policy, which envisaged measures to hold the price line and to ensure, through increased production, economies and larger supplies, that the inflationary pressures did not get out of hand Steps were taken to relax import controls and prevent hoarding of foodgrains through the amendment of the Essential Supplies (Temporary Powers) Act, 1946 The Centre also assumed powers to legislate for one year from August 15 1950 in respect of trade and commerce and production supply and distribution of goods and these were extended later by another year This was followed by the promulgation of the Supply and Price of Goods Ordinance As an anti inflation measure and in view of the wide disparity between the internal and external prices fresh export duties on certain commodities were levied or the rates of existing duties were raised as in the case of hessian, sacking, raw cotton, cotton waste and raw wool

These measures had in part a steadying effect on the general trend of prices the months of October and November registering a decline Thereafter the prices resumed an upward trend which became pronounced following the Chinese intervention in the Korean war and touched a high level at 438 6 in March 1951 The prolongation of the Korean war, rising import prices, heavy export commitments and higher prices granted by Government in a number of controlled commodities like sugar, sugarcane, gur, food grains, cotton textiles and rubber, contributed to the uptrend in prices, it also embodied the result of the decontrol of prices of raw jute and jute manufactures on March 9, 1951 In December 1950 Government increased the prices of sugarcane and sugar from Rs 1 10 and Rs 28 8 per maund respectively fixed earlier in October at the preceding season s level to Rs 1 12 and Rs 29 12 Gur prices were raised further and the pool price of imported food was raised in January because of a rise in overseas prices and freight charges The rise in import prices of raw cotton and the grant of an increase of Rs 150 per candy for indigenous cotton for the 1950 51 cotton season was announced on June 16, 1950 but its effect by way of higher prices for cotton manufactures was noted only in the closing stages of the year under review

During the first quarter of 1951, the prices of coarse medium, fine and superfine cloth were raised by anything between 6 per cent in the case of superfine and 17½ per cent in the case of coarse varieties The voluntary cut of four per cent in yarn prices was restored on March 5 An interim increase in the price of raw rubber from Rs 90 8 to Rs 122-8 per 100 lb was granted with effect from March 7, 1951

The fight against inflation in the financial year 1951 52 was greatly assisted by three factors The first was the budget which aimed at a substantial revenue surplus and sought to finance the railway development by raising passenger fares Since then, the surplus estimated at Rs 26 1 crores in the budget has been revised upward to Rs 92 61 crores This substantial transfer of purchasing power from the hands of the public to the exchequer helped to hold inflation in check Secondly, the sale proceeds of the wheat obtained from the American loan have also had the same effect of reducing the money supply in the hands of the public

Another important step was taken in the middle of November 1951 by the raising of the Bank Rate from three per cent at which it stood from November 1935 to 3½ per cent The third factor was of an international character following the economic difficulties caused by the burden of the re armament drive, country after country led by the United Kingdom imposed import restrictions, while the United States had to prune defence expenditure because of the danger of inflation

As a result of the above factors, the general price index steadily sagged from 457 5, the all time peak level touched in April 1951 to 433 1 in the last month of 1951 Though overseas food prices ruled remarkably firm, the Indian food prices dropped by 2½ per cent and those of industrial raw materials dropped by more than 12 per cent By the time the new year opened, exports proved difficult owing to buyers resistance, while the monetary squeeze had rendered hoarding difficult despite credit expansion Conditions deteriorated in February when the crop movement was in full swing and the general price index fell further to 415 9 thereby wiping out the advance of the past 13 months

IMPORT AND EXPORT TRADE

Total foreign trade (1952 53)	Rs	1,293,73 lakhs
Imports (total)	Rs	658,11 ,,
Exports (total)	Rs	575,62 ,,
Re exports	Rs	5,74 ,,
Imports across land frontier only	Rs	25,16 ,,
Exports across land frontier only	Rs	18,84 ,,

India is essentially an agricultural country with farming regarded by the people as a tradition rather than as business During the past 30 years the tendency is, however towards rapid industrialisation This change has been noticeable in the course of foreign trade especially in the post partition period In 1920 21 finished goods represented 84 per cent of imports while exports of raw materials accounted for 45 per cent of the total shipments In the quinquennium ended 1929 30 imports of raw materials hardly represented 9 3 per cent of the total while exports of raw materials were as high as 49 5 per cent of the shipments By 1950 51 the share of raw materials under imports rose to 35 1 per cent while that under imports dropped to 20 8 per cent The emphasis on higher industrial production during the intervening period was responsible for reducing the import of manufactured goods from 72 6 per cent of the total imports in the five years ended 1929 30 to 45 7 per cent in 1950 51, while the share of finished goods in the export trade rose from 26 6 per cent to 55 per cent

India's foreign trade (sea-borne air borne and land borne) amounted to Rs 1 293 73 crores in 1952 53, as compared with Rs 1 675 85 crores in 1951 52 and Rs 1 224 71 crores in 1950 51

Imports in 1951 52 included about Rs 100 crores worth of foodgrains from the U S A by way of loan and did not raise any payments problem and there was consequently no need to draw on sterling balances for the period July 1951–June 1952 In 1952 53 also the releases made from sterling balances were not drawn upon

DIRECTION OF SEA-BORNE TRADE

Country wise the United Kingdom enjoyed a key position till the First Great War when three fifths of the imports and one third of the exports originated from that country By the time the world depression set in, her share in imports was reduced to 38 per cent but that under exports remained almost unchanged In the five years preceding the outbreak of the second World War Britain's overall share in India's foreign trade dropped to 32 per cent and this trend gained a fresh momentum in the post war period during which the United Kingdom was pre occupied with problems of rehabilitation In 1950 51 Britain supplied only one fifth of India's total imports

The broad pattern of the direction of trade in 1952 53 remained more or less the same as in the previous year with the U S and the U K as the principal customers as well as sources of supply While the U K 's share in imports rose from 16 8 per cent in 1951 52 to 21 1 per cent the U S maintained its dominating position by accounting for 27 6 per cent of imports On the export side, the U K was the best customer despite the decline in her share from 25 8 per cent in 1951 52 to 21 3 per cent in the following year but that of the U S rose from 17 8 per cent to 19 5 per cent The following are the details —

(Rupees in lakhs)

IMPORT AND EXPORT CONTROL

Import trade control was first instituted in May 1940 for conserving the limited tonnage and the hard currency In the post war period, currency difficulties, the prospects of release of sterling balances and the Government s view on inflation were the guiding principles In July 1950 following the recommendations of the Import Control Inquiry Committee, the Government decided that from the beginning of 1951 (*i*) commercial imports should be annually around Rs 400 crores (*ii*) the O G L should cover basic raw materials in short supply and exclude commodities sufficiently available in the country at a reasonable price (*iii*) the actual licensing should be decentralised and the period should be half year, and that (*iv*) the order of priorities for imports should be (*a*) raw materials and spares for industries essential for the life of the community, (*b*) other raw materials and capital goods, (*c*) other essential goods and (*d*) non essential goods

The more recent changes in the policy are detailed below —

Broad features of the import policy for July-December 1952 were unchanged but 50 items were transferred from the Dollar O G L to soft currency O G L and import quotas for the dollar area were cut On September 5, 1952 certain imports from Pakistan were placed on O G L up to March 1953 The policy for the first half of 1953 remained unchanged for 70 per cent of the items Efforts were also made to bring all the essential items under one O G L Imports of a few items such as ball bearings and textile stores were placed on a quota basis Where stocks were higher import quotas were cut Small quotas were given for biscuits, confectionary, playing cards, metal buttons, etc to provide healthy competition Where indigenous production was higher, quotas were cut This applied to iron and steel structures, bolts, nuts and rivets, leather belting, tea chests, linings and umbrella fittings among others. Procedure remained substantially unchanged, but the list of items licensable to actual users was enlarged and a greater scope was given to newcomers

On March 16, 1953 a few changes were made and certain items including non-ferrous metal manufactures and semi manufactures were removed from the then existing O G Ls Imports from Persian Gulf Sheikhdoms and Portuguese possessions in India were extended upto September 30, 1953 During June 1953, the import policy was announced for the second half of 1953 The salient features were (1) liberalisation of imports of machinery not indigenously manufactured, industrial raw materials such as art silk yarn and cotton yarn above 80s, and consumer goods like spices, fruits, breakfast foods, etc and (2) simplification of the licensing procedure Other measures included the introduction of free licensing for cotton stapling 1 1/16" and above from the soft currency countries and the extension to 1953 end of the validity of import licences already issued for U S cotton Import of sugar was also arranged and import quotas of sewing machines, machine screws, etc were slightly lowered owing to improved domestic supply

The emphasis of the policy shifted from reduced quotas to higher tariff values with a view to regulating imports to meet the more important needs In pursuance of this objective, import duties were reduced on sugar from Rs 14-14 to Rs 7 per cwt, on copra from non preferred sources from 25 per cent to 15 per cent *ad valorem* and from other sources from 15 per cent to 5 per cent *ad valorem*

EXPORT CONTROL

In pre-war years the Government's policy was to encourage exports Immediately after the war, export control was relaxed, but the aggravation of inflationary pressures rendered its tightening in 1949 Following the devaluation of the rupee, export duties were put up on commodities for which India was at an advantage Simultaneously, quality control was gradually introduced and a network of Trade Commissioners offices was set up Following the end of the Korean war boom and the fall in demand, the Government was obliged to reduce the export duties gradually The process started early in 1952 and continued till the end of 1953

The export duty on hessian was lowered from Rs 750 per ton to Rs 275 on May 7 1952, and that on sacking was progressively reduced from Rs 350 per ton to Rs 175 and then to Rs 80 on February 27, 1953 The export levy of 25 per cent on coarse and medium cotton textiles was reduced to 10 per cent on January 4 1953 In the case of raw cotton, the duty was lowered from Rs 200 per bale to Rs 125 on November 19, 1953 and was totally abolished in the case of Assam/Comilla In October 1953 export of mercury was permitted subject to a duty of Rs 300 per flask of 75 lb

The major export liberalisation measures during 1952 53 are summarised below —

Free licensing of superfine and fine cloth from April 1, 1952 and of coarse and medium cloth from May 17, 1952 Export of 250,000 tons of sugar, 10,000 tons of khandsari and 50,000 tons of jaggery, but banned since January 30, 1953 Export quotas for raw cotton fixed in instalments Free licensing of niger seed, kardi seed and their oils till June 30, 1953 Relaxation of control on yarn exports Free licensing of raw wool shipments till December 1953 Free export of mustard oil till June 30, 1953 Overall quota of 3,000 tons for vanaspati for 1953 Free licensing to all permissible soft currency countries and O G L to dollar area for black pepper

TRADE AGREEMENTS

Italy —For 1952 Chemicals and chemical products paper, raw silk, moulding powders, electric transformers, generators, machine tools, etc to be imported Oils and oilseeds, spices, tea coffee, manganese, mica, coal, etc to be exported

Sweden —For 1952 Newsprint, aluminium covered steel cables, etc to be imported Kyanite ore, manganese ore, jute goods, castor oil, cotton waste, etc to be exported.

Egypt —Upto February 28, 1953 Raw cotton, cotton yarn of 80s and above, rock phosphates, gypsum anhydrite, etc to be imported against tea, vegetable oils, cotton piecegoods, shellac, iron and steel manufactures, etc

Pakistan —Effective up to June 30, 1953. Imports of hides and skins, fish, bamboo, spices, etc in exchange for iron and steel and machinery, railway materials, wood and timber, beedis, beedi leaves and tobacco The Agreement was extended up to September 30, 1953.

Austria —Upto June 1954 Building and engineering materials, woollen goods, cotton

thread, newsprint, aluminium circles, sheets, plates, tungsten and molybdenum products, machine tools on the import side and tea, tobacco, handloom products, coir and coir products, spices, cotton and cotton waste, vegetable oils, iron ore, manganese ore, hides and skins tanned, shellac, raw wool, etc on the export side

Finland —Agreement expired on December 31, 1951, extended by two years Schedules will be renewed for 1953 by negotiations Newsprint, wood-pulp, paper and paper products, steel files, farming machinery, etc to be imported and tobacco, cashewnuts, spices, jute goods, tea, coffee shellac, vegetable oils, chemical products, textile and hosiery etc to be exported

Norway —Newsprint mechanical pulp, welding equipment machine tools, certain types of machinery, iron and steel soil pipes, etc Jute goods, tobacco, spices, oils and oilseeds, cottage industry products, iron ore, coir and coir products, manganese ore, etc to be exported

Western Germany —Upto October 1953 Chemicals and related products, machinery, metal products, etc Tobacco, cotton, ores, coffee, tea, raw wool, mica, seeds, shellac, essential oils, grey cotton goods, jute goods, woollen carpets, etc to be provided with quotas of specified value

Hungary —Upto January 1954 Imports of machine tools, agricultural machinery, X-ray and electro medical apparatus locomotive engines, optical goods, etc Exports of jute goods, tobacco, handloom products, cotton and woollen piecegoods, cement, soap, chemicals, etc

Indonesia —Upto December 1953 Copra, coconut oil, palm oil, spices betelnuts, timber, tin, rubber, etc Shipments of jute goods, tobacco handloom products, cotton and woollen piecegoods, cement, soap, chemicals, etc

Barter Agreements —In 1952 With Pakistan for exchanging 37,600 tons of Sind rice against 39,700 tons of U S wheat With Argentina for wheat of the value of 40,000 tons of jute goods

Treaty of Friendship —With Syria Talks in progress with the U S

Iraq (1954-end)—Imports of animals, long staple cotton, dates, food grains and hides and skins against exports of tea, textile fibres and bristles, rubber goods soap and iron and steel and their products Trade subject to trade regulations Mutual facilities for ships

Bulgaria (1954 end)—Imports of canned vegetables, electrometers, textiles and sanitary ceramics against exports of tea, spices, lac, castor oil, raw wool, raw cotton and coir yarn No territorial discrimination without the currency groups

Sweden (1954-end)—Imports of newsprint paper, staple fibre, machinery and mill work metals and ores, wood pulp and chemicals against export of spices, manganese ore, jute goods, coir manufactures, vegetable oils, lac, mica, tobacco and hides and skins

Burma (Talks concluded on July 3, 1953)—Certain changes in the Agreement of 1951 and additions to the list of commodities for export from India In the next six months increased supplies of several commodities including iron and steel and understanding about future purchase of rice

Indo-Soviet Trade Agreement

A five year trade agreement between India and the Soviet Union was signed on Dec 2 1953, providing for the exchange of a large number of items and specifying the procedure for trade, shipping and settlement of accounts between the two countries

With the signing of the agreement, letters were exchanged on the establishment and status of Soviet trade representatives in India and on the extension of technical assistance by the Soviet Union to India both for the installation and operation of Soviet equipment as well as for the planning and execution of various projects in India

The agreement may be extended or renewed by negotiations to be commenced within three months of its expiry

Among the 20 items agreed for export from India to the U S S R during the first year of the agreement are

Jute manufactures, tea, coffee, tobacco, shellac, black pepper and other spices, wool, hides and skins, vegetable and essential oils, coir yarn and rope, chemicals, live animals exposed cinema films, books and periodicals and cottage industry products

The list of goods agreed for import from the U S S R covers 39 items These include

Food grains (wheat barley) crude petroleum and petroleum products, timber and paper, iron and steel manufactures, chemicals, dyestuffs medicaments, optical goods, cinematograph films, printed matters and other goods as well as a wide range of industrial equipment including boring, mining and road building equipment, excavators, compressors, electrical equipment, equipment for textile, shoes, food and polygraphical industries, tractors and agricultural machinery and various machine tools and instruments

To promote economic relations between the Soviet Union and India, it was agreed that the Soviet Embassy might establish a special trade representation wing in New Delhi with branches in Calcutta and Bombay

It will be the duty of Soviet trade representatives to enter into or guarantee commercial transactions Such transactions will be subject to the jurisdiction of Indian courts unless otherwise provided Soviet trade representatives are not to be responsible for any transactions concluded by other Soviet organisations direct with out its guarantee

The inclusion of hydrogenated oils, cashew nuts, dyeing and tanning substances, footwear and sports goods in the list of commodities exportable by India to the U S S R was to be considered separately as early as possible between the Government of India and the Soviet Embassy

India's imports from Russia were valued at Rs 23 lakhs in 1950 51, Rs 1 38 crores in 1951 52, Rs 24 lakhs in 1952 53 and exports at Rs 1 34 crores in 1950 51, Rs 6 67 crores in 1951 52 and Rs 85 lakhs in 1952 53

LIST OF IMPORTED COMMODITIES

Below we give a list of commodities imported into India with the exact quantity and value for 1952-53. In general commodities the value of whose imports is less than Rs one lakh are omitted. This is a more detailed list than the one before.

	Quantity	Value
		Rs
Animals		
Horses	427 nos	21,381
Other kinds of animals	1,294	1,11,708
Apparel		
Hats caps bonnets and hatters ware	—	3,34,771
Waterproofed clothing	—	212
Arms Ammunition, Military Stores —		
Shotgun cartridges, filled	13,290,237 nos	30,31,722
Rifle and other cartridges, filled	2,67,339 ,,	2,92,919
Cartridge cases, empty	526,326	80,971
Explosives		1,93,37,756
Firearms	35,700 ,,	62,82,166
Firearm parts	—	8,22,758
Gunpowder	198,511 lb	3,04,315
Total arms and ammunition	—	3,20,81,537
Art Works of (other than pictures)	—	47,148
Asbestos, raw	171,386 cwt	1,13,69,891
Asbestos manufacture (packing sheets cement)	—	2,81,226
Baskets and basketware	—	1,483
Belting for machinery (cotton hair, leather, etc.)	—	1,60,77,792
Bobbins	—	33,49,589
Books, maps charts	35,727 cwt	99,92,887
Boots and shoes	5,812 pairs	23,212
Bristles and fibre	130 cwt	32,863
Brushes and brooms	70,404 doz	8,61,131
Building Material		
Asphalt	183,350 tons	5,28,01,946
Fire bricks	1,99,348 nos	30,71,971
Cement, Portland	1,394 tons	3,71,226
Cement (other kinds)	2,154	8,40,125
Tiles	908,291 nos	2,99,640
Total of building material	—	5,94,87,803
Buttons	68,080 gross	3,18,310
Canes and rattans	12,638 cwt	8,72,342

Chemicals (excluding Manures, Medicines)

Acetic acid	17,647 cwt	17,82,208
Carbolic acid	3,659 ,,	4,05,548
Citric acid	1,933 ,,	2,86,312
Formic acid	1,115 ,,	1,13,300
Tartaric acid	2,611 ,,	3,74,836
Total for all acids	30,340 ,,	40,68,454
Ammonia anhydrous	1,960 ,,	1,44,242
Ammonia carbonates	1,881 ,,	1,06,350
Ammonia Muriate	47,539 ,,	20,17,063
Arsenic and its oxides	1,990 ,,	1,77,834
Bleaching materials	54,978 ,,	14,02,249
Calcium carbide	104,212 ,,	35,86,011
Copper sulphate	16,640 ,,	12,17,150
Disinfectants	41,467 ,,	38,66,042
Magnesium compounds (other than chloride and sulphate)	9,619 ,,	5,86,032
Phosphorus	2,590 ,,	6,94,886
Potassium chlorate	18,294 ,,	12,47,374
Potassium compounds (other than bichromate, chlorate cyanide)	12,700 ,,	12,89,526
Sodium carbonate	1,631,769 ,,	2,54,20,441
Sodium cyanide	9,069 ,,	7,02,983
Caustic soda	5,11,049 ,,	1,45,71,171
Sodium hydrosulphite	42,936 ,,	46,89,179
Sodium sulphide	12,668 ,,	4,42,108
Sulphur	1,478,818 ,,	2,50,70,924
Zinc chloride	4,935 ,,	3,61,932
Other sorts of chemicals	—	3,18,81,676
Total of chemicals	—	12,68,30,446
China clay	216,698 ,,	17,92,609

	Quantity	Value
Clocks and watches		Rs
Clocks and time-pieces	226,188 nos	21,70,497
Watches	213,960	52,66,393
Parts of clocks and watches	—	1,84,040
Total of clocks and watches	—	83,20,930
Cordage and rope	1,028 cwt	1,64,839
Cork manufactures	13,013	2,67,613
Cutlery		
Safety razors	70,670 doz	1,79,263
Razor blades	1,036,679 gross	34,10,398
Other kinds of razors	13,954 doz	3,44,586
Cutlery (other than what is mentioned and pruning knives)	—	19,44,666
Total of cutlery	—	83,18,272

Drugs and Medicines

Asafoetida	7,689 cwt	13,65,780
Camphor	495,913 ,,	11,22,890
Liver extracts	—	8,92,497
Paludrine	—	13,69,787
Penicillin and its products	—	1,64,58,176
Proprietary and patent medicines	—	23,35,113
Quinine salts	72,410 lb	19,25,286
Saccharine	—	8,76,006
Streptomycin and other antibiotics	—	2,45,17,306
Sulpha drugs	—	95,64,280
Total of drugs and medicines	—	11,31,99,962

Dyeing and Tanning Substances

Tanning barks	43,070 cwt	10,93,223
Dyeing and tanning (Cutch and and gambier)	36,444 ,,	43,44,177
Congo, red	393,210 ,,	10,23,350
Naphthols (dyes)	968,750 lb	90,42,187
Rapid fast colours	254,324 ,,	40,09,258
Bases	660,340 ,,	5,76,960
Indigo	346,706 ,,	18,39,299
Paste (vats)	79,080 ,,	10,00,425
Powder (vats)	670,639 ,,	3,03,59,038
Sulphur, black	1,147,096 ,,	24,00,135
Metanil yellow	118,461 ,,	1,14,094
Saffron	15,103 ,,	15,86,552
Wattle extracts	130,527 cwt	67,79,190
Other sorts (including lac dye)	33,758 ,,	16,68,778
Total of dyes and tanning substances	—	9,06,41,779
Earthenware and porcelain		
Sanitary ware	—	25,42,292
Other kinds	—	12,73,096
Porcelain	—	5,09,020
Total of earthenware and porcelain	—	43,24,408
Fish		
Fish dry unsalted	48,909 cwt	7,44,703
Fish salted	8,990 ,,	3,17,974
Fish, wet salted	12,392 ,,	5,55,368
Other sorts of fish	1,825 ,,	2,06,310
Total of fish	73,270 ,,	18,82,692
Fodder bran and pollards	31,427 ,,	6,47,672

Fruits and Vegetables

—	Quantity	Value
		Rs
Coconuts	1,553,153 nos	3 84,85¹
Other fresh fruit	—	24,59 388
Total of fresh fruit and vegetables	—	28,50 028
Almonds	3,773 tons	1 23,70,092
Cashewnuts	51,682 ,,	4,65,83,818
Currants and raisins	3 045	40 89 27o
Dates	62,847 ,,	2,37 26 45o
Other sorts of dried preserved fruit	2 001 ,,	34 63,191
Total of fruits and vegetables dried, etc	123 348 ,,	9,02 32,831
Total of all fruits and vegetables	—	9,30,82 8 59
Furniture and Cabinetware		15 50 953

Glass and Glassware

Beads and false pearls	2 416 cwt	12 03 930
Bottles and phials	92,088 gross	12 00,078
Funnels globes glass parts of lamps	—	3 80 091
Scientific glassware	—	4 86 646
Sheet and plate	197,355 sq ft	57 25,456
Tableware	—	1 36 692
Other glassware		36,72,348
Total of glass and glassware	—	1 28 05 201
Glue	5,470 cwt	5 68 419

Grain, Pulse, Flour

Barley	—	2 54 541
Jawar and bajra	—	1 37 845
Milo and sorghum	—	22 3 17,720
Pulses		
Dry beans	—	16 23,000
Gram and gram products	—	80,77 969
Other sorts	—	1,52,24,132
Total of pulses	—	2 49,25 101
Rice not in husk	—	43 03,08,700
Semolina	—	12,19 676
Wheat	—	81 82 41,390
Wheat flour		3 05 11 510
Other sorts	—	19 15,096
Total of grain, pulse and flour	—	1 53 10 31 579
Graphite crucibles	1,520 cwt	1,56,490
Gums and resins		
Arabic	64 233 ,,	39,43 860
Benjamin	3,295 ,,	9 45 698
Dammer (resins)	32 799 ,,	13 32,237
Olibanum or frankincense	2 111 ,,	1,07 910
Rosin	2,273 ,,	1,14 171
Other sorts	19,167 ,,	19,60 838
Total of gums and seeds	123,878 ,,	84,04,714
Hair and manufactures	—	2,33,450

Hardware (excluding Cutlery, Electroplated Ware)

Agricultural implements	—	1,46,888
Builders hardware (locks, door bolts etc)	—	15,70,080
Domestic hardware (other than enamelled hardware)	—	6,73 600
Enamelled ironware	—	2 64,786
Hinges	231 077 gross	42,48,412

Hardware (excluding Cutlery, Electroplated Ware)—(*Contd*)

—	Quantity	Value
		Rs
Grub hose (mamooties or powrahs)	9,033 doz	3,01,041
Grub hose (other than mamooties or powrahs)	—	1,14,93,678
Lamps, oil pressure metal	37 893 nos	1 3,86 837
Lamps, metal, other kinds	—	4,22 627
Lamps, Parts of, other than glass	—	5,04 106
Hand pumps	11 750 nos	1,62,757
Stoves	46,779 ,,	7,48,141
Stoves Parts of	—	5,21,709
Other sorts (of hardware)	—	1 77 34,617
Total of hardware (excluding cutlery and electroplated ware)	—	4 04 47 566
Hides and skins, raw	871 tons	83 33,352
Hops	367 cwt	1 44,274

Instruments, Apparatus, Appliances

Electrical fans and parts	—	4 16,371
Electric wires and cables (rubber insulated)	—	78 04 373
Electric wires and cables (insulations other than rubber)	—	6 07,60 957
Telegraph and telephone wires and cables	—	10,16 925
Bare copper wire (electrolytic), other than telegraph and telephone wires	5 355 cwt	11 57 727
Total of electric wires and cables	—	7 07,59,982

Surgical instruments	—	35,74,052

Instruments, Apparatus, Appliances—(*Contd.*)

	Quantity	Value
		Rs
Wireless apparatus	19,286	36,09,299
Wireless valves	67,825	16,31,236
Parts of wireless receivers other than valves	-	80,70,785
Total of wireless apparatus		1,49,90,589
Apparatus other than enumerated	--	2,10,94,274
Total of instruments apparatus		22,21,43,830
Ivory, unmanufactured	26,118 lb	29,69,999
Ivory, manufactured	-	2,542
Total of ivory	--	28,72,541
Jewellery		40,415
Plate of gold and silver	—	6,38,100
Fur	1,995 cwt	1,11,114
Leather, unwrought		6,91,670
Leather cloth	—	3,22,207
Leather pickers	203 ,,	2,11,418
Leather picking bands and straps	303 ,,	2,47,207
Leather roller skins	125 ,,	3,20,123
Total of leather	—	18,70,776

Liquors

Ale and beer in bottle	1,030,277 gls	53,53,825
Total of ale and beer	1,030,539 ,,	53,55,178
Stout and porter	28,648 ,,	2,03,744
Brandy	27,484 ,,	12,16,309
Gin	21,911 ,,	4,87,360
Liqueurs	10,804 ,,	4,26,366
Whisky	183,207 ,,	56,49,015
Drugs, medicines, etc containing spirits	190,240 ,,	86,63,349
Total of spirits	458,768 ,,	1,74,87,381
Wines	58,879 ,,	17,97,829
Total of liquors	1,591,751 ,,	2,46,67,400

Machinery and Millwork

Prime Movers (other than electrical)		
Locomotive oil engines (including for railways)	109 nos	42,98,877
Locomotive oil engines (including for railways) parts	—	9,10,468
Locomotive steam engines (including for railways)	31 nos	28,60,799
Parts of above	—	64,25,192
Railway locomotive engines and tenders and parts	—	4,73,106
Parts of gas engines	—	1,46,908
Oil engines (other than locomotives) for marine purposes	85 nos	7,22,888
Total of oil engines other than locomotives	17,699 nos	4,04,25,324
Parts of oil engines	—	1,96,81,535
Steam engines (other than locomotives)	10 nos	4,06,736
Parts of steam engines (other than locomotives)	—	10,07,010
Total of prime movers	—	8,95,92,697
Electrical machinery		
Control and switchgear	—	5,48,35,568
Generators, alternators, dynamos	—	2,46,30,075
Motors	-	1,22,90,168
Transformers	—	1,44,24,891
Turbo generating sets		1,29,83,785
Others		5,23,20,326
Total of electrical machinery		17,14,84,773
Machinery (other than prime movers or electrical)		
Aerated water-making machinery	—	2,44,758
Agricultural tractors and parts	--	3,36,54,738
Ploughs and parts	—	37,34,350

Machinery and Millwork—(*Contd.*)

	Quantity	Value
		Rs
Air compressors	—	87,80,533
Boilers	-	4,18,96,081
Boot and shoe manufacturing machinery		11,73,718
Earthmoving and shifting machinery	—	1,35,29,416
Excavating machinery	—	18,21,044
Leather tanning and curing machinery	—	3,33,117
Metal working machinery		
Machine tools (drilling, grinding, milling planing shaping, lathes)	—	1,93,67,485
Other machine tools	—	1,17,21,810
Total of metal working machinery	—	3,10,89,295
Mining Machinery		
Coal mining	—	37,58,190
Mining (other than coal)	-	1,19,13,914
Total of mining machinery	-	1,56,72,104
Oil crushing and refining machinery	—	6,70,171
Paper mill machinery	-	1,44,46,633
Pumping machinery		
Pumping machinery (reciprocating)	—	6,51,693
Centrifugal machinery (including turbine pumps)	—	80,62,889
Total of pumping machinery	—	2,44,34,501
Refrigerators (domestic)	4,020 nos	33,83,743
Refrigerators (other than domestic)	—	50,25,094
Total of Refrigerators	-	84,08,837
Rice and flour milling machinery

ALCOHOL INDUSTRY

ALCOHOL has three uses It can be used as a drink That is the use for which it is best known Second, it can be used for industrial purposes, for instance in the manufacture of a number of chemicals Third it can be used as a motor fuel, for the production of mechanical power when we call it power alcohol

Potable Alcohol Three types of potable alcohol are produced in the country beer toddy arrack and certain varieties of foreign liquors A great number of old pot and coffey stills have always been in use but the major part of potable liquor is made in proper distilleries of which there are about 70 in India There are also 25 big distilleries producing mainly industrial alcohol which have a capacity for distilling about 2 million gallons of potable alcohol

INDUSTRIAL ALCOHOL

Industrial alcohol is a very valuable material in the manufacture of chemicals like acetone, acetic acid ether chloroform, ethyl acetate, etc It is also necessary as a solvent in the manufacture of fine chemicals, medical preparations toilets etc Since the last war its importance if at all has increased It is now essential in the manufacture of ammunition and of artificial rubber

In 1946 there were as many as 33 plants capable of producing 12 million gallons of industrial alcohol The trend of production has been as follows

Year	Rectified spirit (000 gals)	Denatured spirit (000 gals)
1946	2 147	1 023
1947	1,775	1 085
1948	2 389	1,401
1949	1 950	1 095
1950	3 435	1 477
1951	5 010	1 967
1952	4,668	2 178

The undivided Government of India s Panel on Fine Chemicals, Drugs and Pharmaceuticals estimated that the medical requirements of the sub continent were a million gallons annually and industrial requirements 10 millions a target which they said ought to be reached in 15 years time

To make this possible it is argued, the first essential is to abolish the present excise duty on industrial alcohol and the second is to have a uniform policy for the country as a whole Industrial alcohol should not cost more than a few annas a gallon As it is it costs the distiller about eight annas to make it When the producers and middleman s profit is added the price will increase to a point where it becomes uneconomic to use it

POWER ALCOHOL

The importance of the power alcohol industry lies in its supplying a product which can replace an equivalent quantity of imported petrol The rapid development of the sugar industry since 1931 has rendered large quantities of molasses available for its production

At the beginning of 1951 there were 19 power alcohol distilleries with an annual rated capacity of 12 838 million gallons of power alcohol and 2 948 million gallons of commercial spirit

Actual production in the post war period is given below —

Year	Production (000 bulk gallons)
1946	2,397
1947	2,736
1948	3,776
1949	4,230
1950	4,498
1951	5,809
1952	7,742

The gap between the installed capacity and actual production of power alcohol has been mainly due to the shortage of molasses, difficulties of transport and the policy of prohibition in general The Kolhapur and Nasik distilleries in Bombay State, for instance, could not come into regular production because the use of power alcohol has not been introduced so far in that State The industry has been developed by private enterprise except in Mysore and Hyderabad State and at Nasik in Bombay State

The total investment is about Rs 158 lakhs

The principal raw material required is molasses Out of a total production of 550 000 tons of molasses in 1951 52 Uttar Pradesh accounted for 300,000 tons and Bihar for 87 000 tons Other raw materials required in small quantities are sulphuric acid ammonium sulphate and entertaining agents

According to the Planning Commission about 39 6 million gallons of power alcohol can be absorbed by the country Among the handicaps are the high cost of production because of high fuel consumption and the low grade of molasses, heavy transit and handling losses and the high charges paid to oil companies for mixing power alcohol with petrol The extensions to existing units and new units contemplated should enable the country to hit the target of 21 12 million gallons by 1955 56 compared to 12 87 million gallons in 1950 51 so that the actual production of power alcohol will be stepped up from 4 72 million gallons to 18 million gallons

CEMENT INDUSTRY

THE first venture in the manufacture of Portland Cement in India took place in 1904 in a small factory just outside Madras, but it quickly went out of business

A few years later three new companies came into existence and laid the foundation of the industry as it exists today

In 1925, following the result of an enquiry by the Tariff Board the necessity for co operation among the manufacturing units was clearly emphasised and as a result an Association known as the Indian Cement Manufacturers Association was formed

Inspired with a certain measure of confidence they took yet another step which was the formation of the Cement Marketing Company of India, Ltd

The next step was the fusion of all the Indian cement manufacturing companies then in operation (with the exception of the Sone Valley Cement Co Ltd) into one unit known as the Associated Cement Companies Ltd, in 1936 whose Managing Agents are Cement Agencies Ltd

By March 1952 there were 23 cement factories with an annual rated capacity of about 3 88 million ton

In addition to the two combines—the Associated Cement Companies owning 12 factories with a capacity of 2 5 million tons and the Dalmia Group owning four factories with a capacity of about 825 000 tons—there are 6 independent manufacturers with an aggregate capacity of 6 00 000 ton and a factory of 86 000 ton capacity owned and operated by the Government of Mysore

The production in million tons is as follows 1948 1 55 1949 2 102 1950 2 613, 1951 2 196 1952 3 8

A sum of about Rs 20 crore had been invested in the industry up to 1950 51 of which the ACC accounted for Rs 13 crores and the Dalmia Group Rs 7 crore Some 30 000 persons were employed by the industry in 1950 51

IMPORTS & EXPORTS

Imports of cement before the outbreak of the Second World War were small and generally the cement was of special quality During the post war period imports by sea totalled about 150 000 tons in 1948 49 and 500 000 tons in 1949 50 In addition about 25 000 tons and 100,000 tons were imported from Pakistan by land routes in the two respective years Since 1950 imports were restricted to quantities included in trade agreements as well as to those in respect of which prior commitments had been made and were only about 17 000 tons in 1950 51 The quantity imported in the following two years was negligible

There have been no exports except of very limited quantities to Pakistan under the trade agreements and to the Middle East Ceylon and East Africa With the contemplated increase in productive capacity the industry should be in a position to export 200 000 tons to 300,000 tons per annum by 1955 56

DEVELOPMENT PLAN

The annual consumption of cement was 2 million tons per annum during the war years and rose to about 2 6 million tons during the post war years, 1949 50 and 1950 51 In 1951 about 3 17 million tons of cement were delivered, while 1 714 million tons were supplied in the first half of 1952 The future demand for cement, exclusive of the needs of the multi purpose projects should be around 3 8 million tons by 1955 56 Including the demand of the projects and roads the total should reach 4 5 million tons by the end of the Plan period

At present eight of the existing units having an annual capacity of less than 100 000 tons each are considered uneconomic Two of them are however expected to raise their production during the period of the Plan

The State-wise distribution of the industry during 1950 51 and towards the end of the period of the Plan is indicated below —

State	1950–51		1955–56	
	No of Units	Rated Capacity (000 tons)	No of Units	Rated Capacity (000 tons)
Bihar	5	921	6	1,160
Orissa			1	165
Uttar Pradesh			1	200
Madhya Pradesh	1	350	1	350
Madhya Bharat	1	60	1	60
Rajasthan	1	225	2	525
PEPSU	2	242	2	382
Saurashtra	3	337	3	562
Bombay			2	300
Madras	5	769	5	882
Mysore	1	86	1	90
Travancore Cochin	1	50	1	50
Hyderabad	1	240	1	280
Total	21	3,280	27	5,006

CHEMICAL INDUSTRY

FOR purposes of industrial production, chemicals fall easily into one of two major groups (*a*) Heavy Chemicals, and (*b*) Fine Chemicals

The term 'Heavy Chemicals' is applied usually to substances such as the common acids, alkalies fertilizer, etc, which are the foundation of the entire chemical industry

Fine chemicals, on the other hand, are manufactured generally in relatively small amounts since purity is important, their production requires great skill and care in each operation under accurately controlled conditions In this category are included photographic materials, drugs and pharmaceutical products, paints, varnishes and pigments, dyestuffs, etc

According to the latest data, there are over 200 factories with a capital investment of nearly Rs 30 crores and providing employment for about 35 000 workers

The industry expanded further in 1952 For the first time calcium carbide used for making acetylene was produced in a factory having an annual capacity of 825 tons and a second unit with a capacity of 3 300 tons was expected to go into production in 1953 54 The production of benzene hexachloride, an important insecticide also started during the year as well as of rayon grade caustic soda

SULPHURIC ACID

The capacity of the industry and its regional distribution in June 1952 were as follows —

—	No of units	Rated capacity in tons
Assam	1	6 600
West Bengal	13	56 560
Bombay	12	35 013
Punjab and Delhi	9	14 955
Uttar Pradesh	4	5,775
Madhya Pradesh	1	825
Madras	2	13,530
Former States and States Unions	5	56,183
Total	47	189,441

The trend of production in tons is as follows

1948, 80 004 1949 99 456, 1950, 102 480, 1951, 106,932 1952, 96 072

Built up in the private sector about Rs 2 crores have been invested in this industry The consumption of sulphur for producing sulphuric acid was 37,000 tons in 1951

The annual consumption of sulphuric acid in different industries in 1951 was estimated at 106 935 tons and is estimated to rise to 200 000 tons by 1955 56 The following picture would emerge at the end of 1955 56 —

	1950 51	1955 56
Number of units	43	51
Annual rated capacity (tons of 100 per cent acid)	150,410	220,791
Actual production (tons of 100 per cent acid)	99,153	200,000

ALKALI INDUSTRY

The alkali industry comprises the manufacture of soda ash and caustic soda, sodium bicarbonate, bleaching powder, benzene hexachloride, liquid chlorine and zinc chloride

As against the rated capacity of 54 000 tons per annum the production of soda ash in tons was as under —

1948, 29 148, 1949, 17 916, 1950, 43,788, 1951, 47,532 1952, 44 328

On the basis of the Tariff Board's report in 1951 the estimated consumption of soda ash is placed at 115,000 tons This is expected to rise to 155,000 tons by 1955 56

The table below summarise the programme of development of the soda ash industry —

	1950 51	1955 56
Number of units	2	2
Annual rated capacity (tons)	54 000	86 000
Actual production (tons)	44,650	77,800

Caustic Soda—The six electrolytic soda plants are located at Rishra (West Bengal), Mettur(Madras) Ahmedabad(Bombay) Mithapur (Saurashtra) Dehri on Sone (Bihar) and Delhi The capital invested in the caustic chlorine plants in 1951 was Rs 19 lakhs The installed capacity of caustic soda has progressively risen to 54 944 tons in 1952 that of chlorine liquid to 13 512 tons and that of bleaching powder to 7 800 tons

Actual indigenous production of caustic soda and the associated chemicals in the post war period was as under —

Year	Caustic soda in Tons	Liquid chlorine in Tons	Bleaching powder in Tons
1948	5 862	1 749	3 443
1949	7,315	2 547	2 328
1950	10 846	3 970	3 309
1951	14,722	5,268	3 583
1952	17 064	5,652	792

Imports of caustic soda varied from 90 616 tons in 1948 49 to 12 989 tons in 1949 50 in the post war period, while those of bleaching powder dropped from 11,520 tons to 5 513 tons in the same period

The plan provides that the number of factories will rise from 7 in 1950 51 to 9 in 1955 56 the annual rated capacity will double from 18 725 tons to 37 125 tons and the actual production treble from 11 37 tons to 33 000 tons

MISCELLANEOUS CHEMICALS

The present position of some of the important products is as follows —

—	No of units	Annual rated capacity in tons	Actual production in tons		
			1949	1950	1951
Alum	18	9 490	4,279	5,349	5 460
Aluminium sulphates	19	30 000	15,408	18 923	19 350
Ferrous sulphate	12	2 238	670	599	612
Copper sulphate	9	1 720	450	437	505
Sodium thiosulphate	4	1,725	499	479	
Sodium sulphite	2	420	74	163	204
Sodium bisulphite	3	735	117	270	271
Sodium sulphide	13	7 936	533	790	1 133
Bichromates	9	5 916	1,720	1 974	3 271
Sodium bicarbonate	2	3,440			1 630
Potassium chlorate	2	2 200	2 200	2 200	1 533
Zinc chloride	2	690	166	426	532
Calcium chloride	2	2 440	175	1 545	960
Magnesium chloride	5	18 200	10 373	4 011	3 639

Quantitative imports of some of the more important miscellaneous chemicals in recent years were as under —

(Quantity in tons)

—	1949 50	1950 51	1951 52
Alum	2	14	
Aluminium Sulphate	379	2 666	106 8
Ferrous Sulphate	1	3	
Copper Sulphate	1,111	1 303	2 111
Sodium Thiosulphate	275	16 2	1 2
Sodium Sulphide	1,032	1 012	2 239 6
Bichromates	2	0 2	1 8
Sodium Bicarbonate	4,026	1 798	9 674
Potassium Chlorate	265	674	1 412
Zinc Chloride	552	442	246
Calcium Chloride	285	44 6	1 5 5
Magnesium Chloride	0 9		
Sodium Hydrosulphite*	1,229	3 406	2 78 6
Sodium Cyanide*	126	233	276 6
Potassium Cyanide*	11	14	33 0
Anhydrous Ammonia	102	93	131 0
Ammonium Chloride	4,246	1 374	2 21 3
Ammonium Carbonate and Bicarbonate	574	516	2 373
Calcium Carbide*	10 274	4 553	9 849
Borax	1 769	1,552	7 349 7

* Not produced in the country Exports of chemicals have been essentially confined to magnesium chloride and sodium bichromate to the extent of 2 000 tons and 500 tons respectively

FERTILISERS

So far in India the inorganic nitrogenous fertiliser almost universally employed has been ammonium sulphate There are at present four units in West Bengal and Bihar (excluding Sindri) with a rated capacity of about 36 000 tons of ammonium sulphate per annum The Sindri factory went into production in October 1951 and with its coming into full production the rated capacity for inorganic nitrogenous fertilisers has reached 4 8 670 tons of ammonium sulphate

The output of ammonium sulphate has progressively risen from 45 39 tons in 1949 to 220 808 tons in 1952

Assuming country wide application of nitrogenous fertilisers the annual needs would be about 12 million tons of ammonium sulphate As a result of the implementation of the development plans, the installed capacity for nitrogenous fertilisers in terms of ammonium sulphate is expected to rise to 481 270 tons by 1955 56 Even then a gap of 150 000 tons is foreshadowed

The annual rated capacity for the production of superphosphates was 173,855 tons by the middle of 1952 The factories are small and have survived because of import restrictions The production of superphosphates has steadily risen to 61 018 tons in 1951

Although the scope for phosphatic fertilisers in India is still almost unlimited, consumption in 1952 53 was no more than 100 000 tons and is not likely to exceed 200 000 tons by 1955 56 The projects submitted by manufacturers for the planned period expect that the rated capacity will rise from 176,355 tons in 1952 53 to 209,355 tons in 1955 56

The estimated annual needs of potassic fertilizers is roughly 37,500 tons out of which it may be possible to recover about 52,700 tons from all the salt works in the country

FINE CHEMICALS

The term "fine chemicals" is applied usually to substances such as photographic materials, drugs and pharmaceutical products paints, pigments and varnishes and dyestuffs All the figures are in tons per annum except where otherwise stated

Chemical	Production		Target estimated for the next five years	Main uses
	1946 47	1951		
Acetic acid	300	300	17 000	Rayon white lead, lead acetate, dyeing, rubber
Acetone	1,000	900	13,000	Solvent, explosives
Formaldehyde	60	60	1,000	Textiles, disinfectant, preservative
Methanol	60	60	1 200	Solvent, denaturant
Glycerine	2 100	2,500	5,000	Pharmacy, explosives
Benzene (gals)	1,200 000	2,400,000		Solvent
Creosote oil (gals)	5 000	8 000		Insecticide
Naphthalene	600	1 800		Disinfectant, etc
Phenol	25	25	1,000	Disinfectants, plastics

The Tariff Board's inquiry in 1950 into the claim for protection of fine chemicals industry was confined to calcium lactate, iron ammonium citrate potassium citrate and sodium citrate

The average annual demand has been estimated at 60 tons for calcium lactate 50 tons for iron ammonium citrate 200 tons for potassium citrate and 50 tons for sodium citrate Government have on the Board's recommendation converted the 6 per cent standard and 26 per cent preferential revenue duty on calcium lactate into a protective duty

Production of bromine and bromides at one of the alkali works has been attempted and an annual output of 75 tons bromine 36 tons potassium bromide and 14 tons sodium bromide has been recorded

Coal tar and wood distillation products are not sufficiently exploited to manufacture fine chemicals and even the war time production of methanol and formaldehyde has been recently curtailed Synthetic fine chemicals are yet to be turned out in India on a commercial scale

Photographic Materials —The basic chemicals required for the photographic industry are (*a*) gelatin silver halides and sensitizers in the coating of film plate and paper base, and (*b*) hypo sodium sulphite metol hydroquinone and chrome alum in the processing stages

Borax boric acid acetic acid and metol and photographic grade sodium sulphite are still imported The present capacity of sodium sulphite is 800 tons and output 500 tons which meets the full demand Production capacity of 30 tons for potash chrome alum has been established Hydroquinone is being manufactured in India since 1950 and the annual output is 25 tons X ray developing and fixing salts have been placed on the market since 1949

The existing import duties on Sodium Hyposulphate, Sodium Sulphite and Sodium Bisulphite have been extended up to the end of 1954, but the industry is free to seek protection if the import control is liberalised and foreign competition intensified

Pre war imports of raw film base into India were enormous the film industry alone consuming some 80 million ft per annum The Celluloid Industries Panel has recommended the installation of a factory for manufacturing 50 million sq ft of all types of raw film and this should synchronize with the manufacture of gelatin silver halides sensitizers and other photographic materials in adequate quantities

DRUGS AND PHARMACEUTICALS

There are at present more than 60 comparatively important units engaged in manufacturing various types of drugs and medicinal preparations They are mostly concentrated in Bombay and Calcutta About 40 of the factories produce tinctures extracts and galenicals Most of the crude drugs are obtained indigenously and the rated capacity exceeds 1 2 million gallons The total capacity for producing tablets and injectable drugs from materials imported in bulk is estimated at nearly 88 million tablets and 9 million ampoules but this can be expanded in case of greater demand and without difficulty

The Government have also established factories for manufacturing a variety of alkaloids There are two Government factories, one at Madras and the other in West Bengal producing quinine from cinchona bark Their total capacity is 90 000 lb of quinine per annum Two factories in the private sector have a capacity for producing about 20 000 lb of caffeine from tea waste The manufacture of opium alkaloids is the monopoly of the Government of India Ephedrine is produced by a private firm from raw materials imported from Pakistan Another firm has a capacity for producing 15 000 lb of strychnine

Considerable quantities of glandular extracts are prepared in the country from animals slaughtered in the big cities Twenty one firms are engaged in producing liver extracts and have a capacity of about 2 3 8 million cc of injectible liver extract and 1 4 million lb of oral liver extract The annual capacity for producing liquor adrenaline hydrochloride liquor adrenaline tartrate and extract pituitary are 40 million cc 44 million cc and 55 million cc respectively There are four factories manufacturing these products Five units producing shark liver oil have a capacity of 50 000 gallons of oil equivalent to potency of 6 000 international units/gram

In the sphere of vaccines anti toxins and sera the capacity of the private firms is nearly 5 million cc per month and that of Government institutes nearly 6 million cc per month The country is self sufficient in regard to many sera and vaccines A number of patent medicines are also produced in the country

During 1952 the production of three important anti bacterial drugs *viz* sulphathiazol sulphapyridine and sulphadiazine was started The production of standard quality nikethamide was also undertaken Also processes for the synthesis of the latest anti tubercular drug, hydrazide of isonicotinic acid, were successfully worked out

Despite the increase in indigenous production during the past few years imports were rising from Rs 8 crores in 1949 50 to Rs 10 crores in 1950 51 and to Rs 15 crores in 1951 52 and were valued at Rs 11 32 crores in 1952 53 Penicillin sulpha drugs vitamins, streptomycin, quinine salts and patent medicines account for the major portion of these imports

Exports are confined to crude drugs and a few raw materials of drugs and amounted to Rs 211 lakhs in 1951 52 and to Rs 186 lakhs in 1952 53 Besides, exports by land averaged Rs 90 lakhs a year

The tariff duty for drugs and chemicals is 26 per cent *ad valorem* from the U K and the British Colonies and 36 per cent *ad valorem* from the U S This applies to raw materials and finished products and the duty on the latter is partly responsible for the high cost of indigenous production

Development Programme —The short supply of solvents crude drugs and intermediate chemicals and the State excise barriers are the main handicaps The Government of India in agreement with UNICEF and WHO are setting up a penicillin factory at Pimpri near Poona in Bombay State at a cost of Rs 211 lakhs with an ultimate target of 750,000 mega units A scheme for manufacturing chloromycetin has been

launched by Park Davis, while Atul Products propose to manufacture auromycin Alkali Chemical Corporation are putting up a plant at Rishra near Calcutta for producing 500 tons annually of benzene hexachloride

Atul Products Ltd in collaboration with the American Cyanamid Co of New York have started a modern factory for pharmaceuticals and dyestuffs The manufacturing programme envisages the production of 250 000 lb of sulpha drugs, sulphathiazol and sulphadiazine and 100 000 lb of dyes May & Baker have also erected a sulpha drugs plant

Besides substituted quinolines arsenicals and antimonial drugs, the manufacture of sulphone drugs, thiosemicarbozone and para amino salicylic for the treatment of leprosy and tuberculosis has been undertaken Production of nicotinic acid and nikethamide has started and that of paludrine planned

A proposal to erect a factory for manufacturing D D T has been approved by WHO The Madras Government has plans for increasing quinine production A Calcutta firm contemplates the manufacture of para amino salicylic acid a specific for tuberculosis Saribhai Chemicals have under consideration a project for manufacturing insulin

There are at least 150 factories manufacturing paints and varnishes but nearly 100 of them are very small in size The bigger ones are concentrated in Bombay and Calcutta Eighteen units with a capacity of 36 360 tons are in Calcutta and 17 with an annual capacity of 19,860 tons are in Bombay Taking only the important firms in 1952 the output totalled 32 172 tons The capital investment is over Rs 3 crores and 6 000 workers have found employment

The demand for paints is roughly 35 000 tons to 40 000 tons and may reach 60,000 tons by 1955 56

FIVE-YEAR PLAN

The following table summarises the programme of development of the industry during the period of the Plan —

	Unit	1950 51		1955 56	
		Annual rated capacity	Actual Production	Annual rated capacity	Actual Production
Titanium dioxide	Tons			1 800	1 800
Nitrocellulose lacquers	Gals			350,000	300,000
Ready mixed paints, enamels	Tons	65,000	28 975	70,000	60 000
Aluminium paste and powder	,,			750	750

COFFEE INDUSTRY

COFFEE cultivation is mainly confined to the hilly tracts of south India, from one thousand to six thousand feet above the mean sea level, and is centred in the Malnad area of Mysore, Coorg, Madras, and the United State of Travancore Cochin In the lower elevations, which have a higher rainfall, the more delicate but better quality Arabica coffee has given place to the harder but coarser Robusta coffee

The capital investment in the industry is estimated to be over Rs 15 crores and the average annual value of the crop is about Rs 8 crores Nearly 200,000 people drawn chiefly from Malabar South Canara and Mysore are employed in the industry Many of the coffee estates are inter planted with orange trees cardamom and pepper vines There are about 50 species and sub species of coffee plants in the country the one most expensively cultivated is Coffee Arabica, the best in quality, with Robusta coming next in importance

The area and production, of the two varieties of coffee from 1948 to 1953 are as under

AREA IN THOUSAND ACRES

Year	Arabica	Robusta	Total
1948 49	167	54	221
1949 50	164	61	225
1950 51	167	62	229
1951-52	168	67	235
1952 53 (September)	N A	N A	N A

PRODUCTION IN TONS

Year	Arabica	Robusta	Total
1948 49	18,836	3,470	22,306
1949-50	12,724	7,796	20,520
1950 51	15,266	3,329	18,595
1951-52	14,276	6,765	21,041
1952 53 September)	12,440	10,645	23,085

STATEMENT SHOWING COFFEE CURED IN MAJOR YARDS

Year	Qty in Tons
1948 49	19,828¾
1949 50	18,721¾
1950 51	16,958

STATEMENT SHOWING AVERAGE INDEX OF WHOLESALE PRICES OF COFFEE

(Price for week ended August 19, 1939 = 100)

Year	Index
1948	546
1949	487
1950	476
1951	567
1952, August 16	758
1953, August 15	614

MARKETING

Under the existing scheme of Coffee Control, all coffee estates in the country big or small, are required to get themselves registered and to deliver the entire production, except quantities allowed for domestic consumption and seed purpose, to a Common Pool administered by The Indian Coffee Board Growers are paid in proportion to the value of coffee delivered to the Pool after deducting the cost The average price of plantation of coffee in the auctions in 1951 was Rs 218 11 per cwt against Rs 187-1 in 1950 The total turnover of the Pool was Rs 649 lakhs and the growers received Rs 180 13 4 per cwt as against Rs 182 8 0 per cwt in 1949 50 The total number of registered estates on June 30, 1952 was 28,967 while those unregistered totalled 5,306

The following table gives the trend of exports -

Year	Exports in Tons
1948 49	31
1949 50	3,331
1950 51	2,677
1951 52	803
1952 53	2 191

The average Pool auction prices per cwt for the past four years were as follows —

Year	Plantation A	Arabica cherry Flats	Robusta cherry Flats
	Rs a	Rs a	Rs a
1948	203 0	173 12	140 9
1949	184 10	162 6	135 9
1950	187 1	160 11	147 10
1951	218 11	197 14	196 6
1952	251 11	220 5	200 11
1953 (7 months)	212 5	184 1	150 9

INDIAN COFFEE BOARD

To stimulate internal consumption and to regulate exports a statutory body, now known as the Indian Coffee Board was set up under the coffee market Expansion Board One of the serious problems the Board had to contend with in 1952 was the growing rise in the prices of coffee which advanced from Rs 207 per cwt of plantation type in April 1952 to a record level of Rs 316 per cwt in the following September The Board effected increased sales of Coffee and banned exports In December 1952 a Bill was introduced in Parliament to amend the Act of 1942 for the purpose of ensuring better co ordination between the Board and the Central Government and of providing adequate representation of consumer interests on the Board

COIR INDUSTRY

COIR is the trade name given to the fibre obtained from the husk of the coconut fruit India and Ceylon have a virtual monopoly in the production of this by-product of the coconut industry

In India the coir industry is practically confined to Kerala Travancore Cochin State and the Malabar district of Madras account for over one million acres of the coconut growing areas out of a total of 1 526 million acres in India The distribution of the area under cultivation and production of coconuts in respect of India is as follows —

	Area in acres	Production Percentage
Madras	605 765	41 3
Travancore	584 736	37 8
Cochin	67,058	4 3
Mysore	170,180	11 3
W Bengal	31 300	1 4
Orissa	30,021	1 8
Bombay	29 197	1 8
Other States	7 592	0 3
	1 526,759	100 0

The coir industry is organised partly on cottage basis and partly in factories The production of coir fibre, yarn and ropes is essentially a cottage industry, while coir mats, mattings, rugs, carpets, bags etc are manufactured in factories About 300,000 people earn their living from this industry in Travancore alone and 50,000 in Cochin and about one lakh in Malabar

There are two principal types of coir fibre— mat fibre and curled fibre The bulk of the output consists of mat fibre The yarn spun by hand is soft and even twist, while that spun on wheels is hard twist and not so even as hand spun Spinning is mainly done by women, boys and girls Over 100,000 families are employed in this trade in Travancore alone

The yarn produced in the spinning districts is marketed chiefly in Alleppey where there are a large number of factories for the manufacture of mats, mattings rugs and carpets and also exporters of yarn

In 1948 there were about 525 factories of which 474 were small ones with less than 20 looms and the rest large factories with more than 50 looms, having in all about 16,000 looms on mats and mattings

About 15,000 workers were engaged by these factories

Following are the estimates of coir manufactured and unmanufactured —

State	Production (Tons)
Madras	25,038
Travancore Cochin	97,000
Mysore	Not available
W Bengal	22
Bombay	63
Total	132,326

EXPORTS

Export of coir yarn, mats and mattings, ropes and other sorts of coir are detailed below — (Tons)

Year	Coir yarn	Coir mats and mattings	Coir ropes	other sorts
1949 50	46,660	26 758	3 263	6,580
1950 51	55,145	18,834	3 907	
1951 52	45 269	11 510	5 869*	4,790
1952 53	48 318	12 390	4 122*	4,087

* Includes export to Pakistan by land

The price of a candy of 6 cwt of superior Anjengo declined from Rs 325 in January 1948 to Rs 188 in August 1949 rose thereafter to Rs 383 in March 1951 and fell steeply thereafter to Rs 275 by May 1952

The appointments of a statutory board to deal with the various aspects of the industry is now contemplated India's trade representatives have been asked to study the prospects for coir and coir products since exports fell in 1952 from 13 49 lakh cwt valued at Rs 11 6 crores in 1951 to 12 20 lakh cwt valued at Rs 7 4 crores but it was not possible to get a reduction in import duties on coir mats and mattings under the GATT from the European countries The main reason given was the need to protect domestic interests

COTTAGE INDUSTRIES

TOTAL allotment for small scale and cottage industries under the Five year Plan Rs 7 04 crores

It is customary to refer to industries which are not required to be registered under the Factory Act as cottage and small scale industries There is no accepted line of distinction between cottage and small scale industries but the use of electric power is one of the popular tests

The data about their strength is extremely meagre The National Sample Survey carried out recently a large scale sample survey , but its results are not available

It is, however very roughly estimated that at least 20 million persons are gainfully employed in these industries classified as under —

Name of Industry	Persons Employed in Lakhs
Textiles	50
Leather	24
Wood	20
Metals	10
Pottery, Ceramics, Tiles Bricks, etc	20
Vegetable Oils Chemical Products, etc	10
Food including Hand pounding	20
Dress and Toilet	11
Miscellaneous including jewellery and toy making	6
TOTAL	201

In order to encourage more effectively the development of cottage and small scale industries, the All India Cottage Industries Board, constituted in 1948, was replaced by two Boards, viz The All India Handicrafts Board and The All India Khadi and Village Industries Board The former was constituted in November 1952, and the latter in February, 1953

Towards the end of 1952 the Government also constituted the All India Handloom Board to deal specifically with problems affecting the handloom industry A cess of three pies per yard has been levied on all mill made cloth consumed within the country and is expected to yield every year about Rs 5 crores Schemes for the development of khadi and handlooms are to be financed out of this resource

The Cottage Industries Directorate has been merged as a part of the Development Wing and is responsible, generally, for all small scale industries

The primary objective of the policy laid down under the Five Year Plan is to provide a field within which each cottage industry may be able to organise itself Wherever a large scale industry competes with a cottage industry, a common production programme should be evolved

The programme may cover (*a*) reservation of spheres of production, (*b*) non expansion of the capacity of a large scale industry, (*c*) imposition of a cess on products of a large scale industry, (*d*) arrangements for the supply of raw materials and (*e*) co ordination for research, training, etc

To carry out research, the establishment of an institute for village technology has been recommended by the Planning Commission

Finance for the development of village industries has to be viewed as a problem inseparable from finance for agriculture The formation of industrial co operatives is, therefore, considered essential Meantime, the responsibility for revitalising village industries has devolved on the Government

In the States the Five Year Plan provides Rs 12 crores for cottage and small scale industries

The responsibility for organising industrial co operatives lies on the State Governments The number of industrial co operatives rose from 3,758 in 1949 to 5,305 in 1950 and the plan expects to raise the total to about 8,000 by 1955

The question of training the artisans has received considerable emphasis in the Five Year Plan The training centres maintained by the Central Government under the Directorate-General of Resettlement and Re employment have trained during the past few years 144,000 persons

The Ministry of Rehabilitation has arranged for the technical training of 52,000 persons from West Pakistan

The plans of the State Governments provide for the following training programmes —

	1950 51	1955 56
No of Industrial Schools	365	456
No of pupils trained	14,750	21,797
No of technical and vocational institutions	260	407
No of persons trained	26,708	42,997

TEXTILES

In the main, these are composed of two units—handlooms and khadi

The details about the handloom industry have been given in the article on the cotton textile industry Suffice it to say that there were in 1951 three million handlooms, accounting for a production of 810 million yards in 1950 51 This is proposed to be stepped up to 1,700 million yards by 1955 56

To clear the unsold stocks, the Handloom Board has decided to subsidise sales

The All India Spinners Association has at present in its fold over 2¼ lakhs of persons engaged in khadi production It is now proposed to subsidise the sales of khadi at the rate of three annas in the rupee which would work out at Rs 3 3 crores on an annual output of 100 million yards The balance of Rs 4 crores will be spent on organisation, training, research and subsidy for equipment

The main emphasis of khadi is to minimise the pressure of the problem of under employment It is hoped that about a million persons willing to devote four hours every day can have a supplementary income of Rs 75 per month

Calico printing is an old industry in Farukhabad and Ahmedabad and is now extended to most of the other cities Over 25,000 people practise this art In Farukhabad alone there are over 2 000 printers The industry s products have a wide export market During 1952 the cotton mills printed about 30 million yards The question of reducing mechanised printing is under examination

The Government of Bombay sanctioned during 1951 52 a grant of Rs 5 90 lakhs for various schemes connected with khadi self sufficiency Self spinners registered under the Katai mandals were granted a subsidy of half a rupee per square yard of khadi woven upto 20 square yards

The scheme for opening 100 khadi self sufficiency centres was continued in 1951-52 and a grant of Rs 3,19,450 was sanctioned In Bombay State there were 89 centres with 5,025 self spinners who produced 57,477 square yards

The khadi scheme of the Madras Government is run in two parts The intensive schemes operating in eight centres aims at self sufficiency The extensive scheme prepares the ground During 1951 52 khadi production in the State totalled 12 60 lakh yards In Mysore the Government khadi organisation has been functioning for over 25 years

In Hyderabad private organisations are functioning, and over 5,000 workers are engaged by them

Silk weavers are found in nearly every State Assam and W Bengal are, however, the largest producers of silk accounting for two lakh looms and 15,000 looms respectively

India is the only country where tussar, endi and munga silk is produced The industry produces about 2 million lb of silk and employs about a lakh of people The industry is now heavily protected and a Silk Board has been constituted to promote its growth

Spinning and weaving of wool are easier than that of cotton At present the cottage industry has confined its activities to the production of carpets and kamblies Under the Plan, it is proposed to have four wool spinning and weaving centres for developing hand spinning and hand weaving for the production of woollen blankets required by the defence services Carding and finishing will however, be done by machinery operated by power

OTHER INDUSTRIES

Coir-Making —The aggregate production of the coir industry is approximately 1 3 lakh tons and supports about eight lakh persons A coir Board is proposed to be set up to tackle the difficulties of the industry which is an important contributor to export earnings The industry is mainly concentrated in Travancore Cochin and the States plan lays down an elaborate programme for its development

Village Oil Industry —The plan for this industry covers a common production programme for village oil presses and oil mills The production of ghanis is proposed to be raised from 10 lakhs tons to 13 8 lakhs tons of seed pressing by 1955 56 The object is to organise 12,000 village oil centres, each serving a group of 40 to 50 villages and about 50 village oil presses A development expenditure of Rs 233 10 lakhs over four years is expected and this will provide employment for 100,000 persons

The Indian Central Oilseeds Committee has decided to start demonstration centres of improved ghanis in each of the Community Project areas and has recommended to the Government of India to levy an additional cess of one anna per maund for the first five years, and two annas per maund thereafter for financing the development of the village oil crushing industry

Under the Essential Supplies Act, the Government of India has delegated powers to State Governments to check the indiscriminate growth of oil mills Under the Industries (Development and Regulation) Act the Union Government is competent to prevent further growth of the large scale industry

The All India Khadi and Village Industries Board has recommended that the crushing of sesamum oilseeds should be completely reserved for the ghanis It has also suggested the allocation of quantities of different oilseeds to mills and to ghanis

During the Plan period, the mill oil production is expected to rise from 22 12 lakh tons to 23 4 lakh tons of which 14 lakh tons will be edible, while the ghani oil production will be stepped up from 11 56 lakh tons to 17 53 lakh tons out of which only 0 45 lakh tons will be non edible Four lakh ghanis will consequently be fully engaged

Paddy Husking —Hand pounding of rice is an important village industry It processes about 65 per cent of the paddy The Five Year Plan aims at improving the hand process for increased recovery of rice and production of bran in a pure form by introducing paddy husking stone chakkis in place of the pounding method

Over a period of four years the distribution of about 50 000 chakkis in rice pounding areas is expected to be subsidised

About Rs 10 lakhs will be spent by the Government during the Plan period and 40,000 persons will be able to find employment as hand pounders

The Food Ministry has declared that the huller type mills are a destructive type of equipment for milling, particularly raw rice Under the Essential Supplies Act, the Union Government is competent to prohibit the establishment of rice mills At present there are 15,000 huller mills in the country The All India Khadi and Village Industries Board has urged the Central Government that there should be no further increase in the number and capacity of the sheller mills and that the use of the huller type for pounding rice should be banned

Bee-Keeping —Bee-keeping is a cottage industry which has not to compete with any machine The industry is not, however, well developed The total yield of honey in the country does not exceed 12 million lb a year and hardly a third gets into commercial channels Consequently there have been heavy imports of honey

The Five Year Plan contemplates an intensive development of bee keeping in selected areas in which the industry has already made some progress For instance Madras Bombay Uttar Pradesh, Punjab, Mysore, Travancore Cochin and Coorg offer scope for intensive development In each selected area there will be a sub station serving a group of 20 to 30 villages The scheme provides for training of staff and bee keepers and for supply at subsidised rates of beehives and other appliances Co operatives of bee keepers are envisaged for collecting and marketing of the honey

The Plan provides for an outlay of Rs 16 29 lakhs

Paper Making —The All India Village Industries Association has a separate department for hand made paper which mainly imparts training and carries on research in paper industry The Association has encouraged the paper industry throughout the country The methods of production are fairly satisfactory and the processes and implements are being improved year after year Cotton rags, jute waste, paddy straw and grass of any kind that grows to a height of two feet, plantain stalks, sugarcane waste and waste paper are the chief raw materials Hand made paper is generally used for documentary purposes

The five year programme therefore, suggests the production of high grade hand made paper at all existing centres These centres will receive assistance in respect of equipment, training and research Pulp making is proposed to be done by power operated machines while other processes will be done by hand It hopes to support 1,000 paper makers and turn out annually 1,400 tons of high grade paper

Soap Making —In the village industry programme has been included a small scheme the main object of which is to utilise material now going waste The scheme aims at establishing production cum demonstration centres in different States where neem oil will be produced and utilised in soap manufacture It provides for 11 neem units, each one consisting of one soapery and 7 neem pressing centres producing a total of 1,260 maunds of neem oil and utilising it for the production of about 78 tons of soap every year

Neem oil is at present produced in small quantities in Madras Uttar Pradesh and Bombay Neem trees are however, in abundance all over the country and a survey recently conducted in Madras has shown that about 72,000 tons can be collected annually in that State alone Actually however 20 000 tons of seed are crushed to yield 1,650 tons of neem oil The neem oilcake is also a valuable manure

Washing soap can be manufactured very easily on cottage scale provided caustic soda, oils, tallow, etc can be made available at reasonable prices

The question of encouraging this industry in rural areas by levying a cess on large scale production and reserving a portion of the market is under investigation

Palm-Gur —According to a recent estimate India has 50 million palm and corresponding varieties of trees At present some four million trees are tapped and yield 55,000 tons of palm gur It is estimated that about 3 3 lakh persons are engaged in this industry The Plan envisages an increase in production to 80 000 tons of gur By spending about a crore of rupees, 60,000 agriculturists tappers can be trained

Gur and Khandsari —Gur and khandsari are well established in areas where there is not enough cane to start a sugar factory Because the operations are near the field, the industry is carried on even in factory areas The object of the programme is to extend the

use of improved types of cane crushers to obtain a higher percentage of extraction It is proposed that over a period of four years about 100 000 cane crushers should be introduced and the introduction of small centrifugals for the manufacturing of Khandsari popularised As a result about 600 000 cane growers in 30 000 villages supported by 1 200 whole time workers 6 000 part time workers and 4 000 honorary workers will find employment for part of the year and contribute Rs 20 crores more to the national product

Leather — According to a livestock census in 1945 there are 18 07 crores big animals and 5 10 crores sheep and goats About one tenth of them die every year and if the dead bodies are properly disposed of commercial products worth Rs 50 per big animal can be recovered The gross income from this source will be about Rs 40 crores per annum

The object of the scheme is to minimise waste due to the incomplete utilisation of dead animals The programme provides for recovery work tanning leather craft and organisation of co operatives of village leather workers The Plan has provided for an outlay of Rs 160 57 lakhs over four years so that about 5 lakh chamars in 72 000 villages and 900 tanners can make a better living

Matches - Eighty per cent of the production of matches is at present controlled by one international combine and several Indian factories are now lying idle In addition it is estimated that about 0 6 million gross is the output of the cottage industry

The Plan seeks to treble it in four years by providing for training certain concessions and financial assistance to the cottage industry The All India Village Industries Board has recommended to the Union Government that a cess be levied on large scale production and the proceeds be used for subsidising the manufacture by cottage industry and other small scale manufactures

Pottery and Earthenware — The village potter has been gradually eliminated by new tastes and requirements On the other hand the demand for bricks tiles earthen pipes and crockery has been fast rising

The Bengal Ceramic Institute established in 1941 has been engaged in solving the problems of the cottage workers in the pottery trades and also functions as a training centre It has successfully introduced the production of Rockingham pottery The problem of standardising cheap durable and easily cleanable cooking earthenware has been taken up

The Government Ceramic Factory at Gudur in Andhra State has been running an artisan course since 1947 for training students in improved methods of pottery making

In Bombay State experiments on production of low temperature vitrious ware of glass pots for bangle making and of single fired red clay glazed articles — all from local materials are being made at the Government demonstration centre in Belgaum district

STATE WISE SURVEY

The more important of the industries have been discussed above There are, however a good many industries in which one or the other State has specialised

The State wise survey in respect of which the latest data is available is summarised below —

The hand loom industry is the most important and by far the best organised cottage industry in Bombay State A small spinning machine of 10 spindles to be run by power and capable of producing 2 lbs of yarn of average 20s per 8 hour shift is now being tried Besides there are 16 000 power looms One unit at Surat is of the co operative sort

The manufacture of woollen textiles on a cottage basis has not developed but good progress has been made in art silk weaving and hosiery manufacture Out of 35 hosiery factories only 5 employ more than 50 workers and the rest are smaller units

A new industry which has sprung up lately produces personal requisites such as purses wallets spectacle cases and brief cases out of plastic sheets In Bombay City there are six mechanised units Nearly 50 small establishments are engaged in the manufacture of light chemicals Their capital outlay is about Rs 60 lakhs and production about Rs 1½ crores About 1 200 persons depend on this industry

Out of 24 paints and varnishes manufacturing industries 20 employ 50 or less persons

Soap and toilet industry has 14 units

The gold and silver thread industry consists of a large number of small factories and cottage units using electric power About 1 000 factories having a capital investment of Rs 52 lakhs engage 1 400 persons to produce goods worth Rs 4 crores There are 900 units with a capital investment of Rs 20 000 to Rs 50 000 each and of an aggregate total of Rs 80 lakhs and employing 1 000 workers producing goods worth Rs 4½ crores Only six units have a capital outlay of more than Rs 50 000 each These employ 150 persons and production totals Rs 6 lakhs against a capital investment of Rs 9½ lakhs The industry has a good export market

The paper and board industry received a stimulus from the Second World War

The bulk of leather is vegetable tanned but 15 tanneries are well organised on a cottage scale In manufacturing leather goods machinery is being slowly introduced

Gur and jaggery manufacture ranks next to power loom industry and out of 420 units over 400 employ 50 or less seasonal workers Most of the manufacturers, unlike their counterparts in Uttar Pradesh grow their own cane

The engineering industry has made considerable headway in the State Out of 866 organised engineering workshops as many as 130 have capital of less than Rs 60 000 and employ less than 50 The aggregate capital invested by them is Rs 42 lakhs, production totals Rs one crore and about 2 850 persons are employed in these small works There are 50 associations with 764 factories employing 3 400 persons as members Fifty one industrial co operatives account for a membership of 2 234 Iron foundries alone number 278 Of these 120 were established in the post war period Over 20 are engaged in the manufacture of electrical goods Production ranges from consumer goods and steel wire products to machinery spares and automobile parts

Madras — Industrial Co operatives have been accepted as the basis for promoting cottage industries in Madras The State itself has got a well knit organisation to look after cottage industries The Gandhinilayam Co operative Village Industries Ltd Kallupatti, meets for instance the important needs of the surrounding villages and is looked upon as a model for re organising village industries

In Vellore basket making and metal industry have been built on a co operative basis

Pope making at Madura, pottery production in Tirunelveli district, fabrication of goods in Madurai district bee colonies in Madras metal works in Salem district production of toys by women in Madras have also to be mentioned

The research institute is concentrating mainly on the development of 15 more important cottage industries Prior to the war there was no pottery factory in the State but Khurja potters are today producing a variety of products

Uttar Pradesh — Gur manufacture is the biggest cottage industry in Uttar Pradesh The State has initiated a scheme for raising the out put by introducing superior types of kolhus The scheme covers 1 000 villages

The manufacture of essential oils and scents is a traditional cottage enterprise in the State Experimental plantation of palma rosa, peppermint and camphor bearing, ocimum and lemon grass plants as well as coriander dill and anise seed has been started and an improved type of still has been designed

About 10,000 workers are engaged in chemical gold thread manufacture at Benares which has invested Rs 3 crores in the industry It costs only two annas per tola to colour the silver thread by the process evolved by the Technological Institute, Kanpur

The glass bead industry has also made considerable headway

Following the partition 52 concerns have been set up by refugees for manufacturing sports goods Their annual output is approximately Rs 45 lakhs and about 2 000 workers have been gainfully employed

The State has 657 weavers co operatives with a membership of 87 095 weavers

West Bengal — For tackling the unemployment problem the West Bengal Government has placed much emphasis on cottage industries 13 reelers co operatives 5 waste silk spinners units and 5 silk weavers co operatives have been already formed

A model apiary for bee keeping has been set up in Kalimpong area For the promotion of the khadi industry 19 656 villagers have been trained since 1948 at 26 centres covering 926 villages

Twenty one co operatives have been registered for palm gur production and steps have been taken to organise the manufacture of handmade paper

Madhya Pradesh — The handloom industry is the principal cottage industry in Madhya Pradesh There are 81 cottage industrial co-operatives other than handloom weavers societies with a membership of 3 128

The details of the more important ones are given below

Industry	No	member ship
Brass Metal Workers Societies	26	291
Iron and Steel Fabrication	9	52
Leather Goods	3	76
Home industries for Women	4	440

The plentiful supply of raw materials in the former Chhattisgarh States prompted the Government to develop cottage industries through Lokshalas

Labour saving contrivance for cottage industries have been installed in the Cottage Industries Laboratory, Nagpur, where practical training is given to the public

Units for automatic rope making and fibre extraction have been set up and a machine capable of producing cheap cordage out of paddy straw has been introduced

Punjab — Industrial co operatives have been well developed in the Punjab There are 294 societies with a membership of 9 543 and a working capital of Rs 21 lakhs Of these 10 are central institutions accounting for one tenth of the membership and half the capital They are mainly concerned with the purchase of raw materials on behalf of primaries and provision of credit

Recently the Government work centres at Nilokheri were converted into seven industrial co operatives

The primaries are classified as under —

Textile 136, Leather 44, metal 32 oil 16, Hosiery 7, Wood makers 9 Mat makers and Soap makers 2 each and Sports, Glue, Plastic, Calico printing, Saltpetre and Brick makers one each

Punjab has been traditionally noted for several types of artware products The total investment in this industry is roughly Rs 1½ lakhs and though only about 100 persons are at present engaged in it the scope for expansion is considered to be great

Carpet making has been carried on in the State since early Moghul period Practically all the carpets intended for export are made in factories or in cottages controlled by factory owners

Orissa.—Filigree and horn industries, two of the cottage industries of the State having a large export potential date from ancient times The industries languished after the Moghul period but are now being revived At present there are 150 filigree workers confined only to three different centres of Cuttack—Maningh patna specialising in decorative and furniture works, Muhammadia Bazar famous for flowery work and Dagarpara specialising in filigree ornaments

During the war as many as 1,500 persons were engaged in producing articles from horn, but now hardly 200 are able to find any work The industry is generally run individually but co-operative effort is once again being made

Typical of the organisation in the State is the "Orissa Poor Industries Cottage" a private institute, started in 1926 It carries out experiments on processes of producing articles, utilisation of materials available in villages without much cost and on tools and demonstrates the production of useful articles of handicrafts practically out of waste

Bihar—This is the only State which produces shell buttons from the mother-of pearl Started in 1908 there are now 45 factories in Mehsi almost the whole population of which is engaged in this industry

Assam—The Cottage Industries Department has confined its activities to cottage industries like soap manufacture, bee keeping handmade paper and shellac The Government Paper Training Institute, Shillong, produces large quantities of file boards, envelopes, and a variety of hand made paper Industrial loans are granted at 5 per cent, interest Production of mulberry silk has doubled since 1947, while that of eri and muga is about 5½ lakh lb The provision in the budget for cottage industries has been doubled from Rs 4 32 lakhs in 1948-49 The traditional crafts of the State are bushai rugs dyed in different colours dinner mats, Manipuri articles and shoulder bags

Manipur—Cottage industries such as handloom cotton and silk weaving, gold smithy, carpentry, pottery and tailoring collectively constitute the basis of the economic life of the people The Government has drawn up a scheme of development for most of the industries Out of a total population of six lakhs, 1½ lakhs are weavers

Hyderabad.—The State s five-year plan has set the target of bringing 25,000 craftsmen into productive activity and of adding Rs 5 crores to the national income

The whole State has been divided into zones and each of them will have a warehouse, a workshop and a training centre The industries to be covered are handloom weaving, leather goods manufacture, oil and perfumery, pottery and earthenware, woodwork and bamboo, chemicals, dyes and fertilisers, stone and slate cutting, food and dairy products, forest industry, and kambal, carpet and woollen goods manufacture

Almost all of them are in existence but the methods are crude, equipment poor and organisation absent

In the new set-up there will be primary industrial Co operatives of which the Federation of Industrial Co-operatives will be the apex body for procuring raw materials and equipment and providing finance

Two renowned cottage industries of the State are the filigree and Himroo industries About 120 goldsmiths in Karimnagar are experts in filigree The Himroo fabric of Aurangabad is a richly ornamented production with diversified colour schemes At one time 200 looms were working in 40 factories, but today only three factories exist The earnings of a Himroo weaver are about Rs 45 to Rs 60 per month, while the draw boy gets about eight annas per day Efforts are being made to revive this industry

Madhya Bharat.—Cottage industries occupy a key position in the economy of Madhya Bharat and provide means of livelihood for 10 per cent of the population

No survey of these industries has been taken but the following figures of employment have been officially published —

Textiles	26,914
Leather manufacture	24,052
Clay	20,609
Wood Working	16,927
Metal Industries	16,083
Oilseed pressing	12,546
Bamboo and Baskets	5,418
Miscellaneous	31,443
TOTAL	153,992

Among the new industries now being started mention may be made of sericulture near Indore, palm gur making in the Adivasi areas of Jhabua and Dhar, leather toy making, bee keeping and lac cultivation

The State s Five-year Plan provides for an expenditure of Rs 50 lakhs on development of cottage industries, and embraces a programme for (*a*) establishment of a provincial handloom weavers society, (*2*) installation of a milling and finishing plant at Mandsaur, (3) creation of a pottery centre at Mandsaur for utilising waste shale from the quarries, (4) establishment of wood working institutes at Indore and Bhilsa, and (5) formation of 12 peripatetic demonstration parties

Mysore—Wood carving is an ancient industry in the State In villages hand-driven lathes are used About 400 families are engaged in this industry in Mysore and Shimoga districts, where teak, rose wood, sandal wood and ivory are in plenty In Sri Chamarajendra Technical Institute a five-year course has been introduced About 200 students have so far been trained and most of them have started small workshops

Inlaying work is an art practised in Mysore since the 17th century In Mysore and Bangalore cities, about 100 workmen grouped in 20 centres are engaged in this industry

The drugget industry is about 200 years old and provides employment for over 800 persons To develop it, the Centre has set up an all-India Drugget Board

Rajasthan.—Calico printing is done all over the State but tie and dye printing requiring high dexterity and skill is a speciality In handloom weaving yarn of even 120s is used Khadi industry gives work to thousands of people Coir and rope making is practised in almost every village Niwar manufacture is another allied industry Jaipur and Khandela are famous for *Gota Kinari*

Rajasthan is the biggest wool producing State in India And spinning of wool gives employment to a large number Weaving is done on ordinary looms and products are coarse Jodhpur and Jaipur are famous for the manufacture of embroidered shoes

Jaipur produces the best type of brass work in the whole of India Enamelling on metals with the help of shellac soluble colours is done at Jaipur and Nathdwara

Hand made paper is produced at Sanganer, Gosunda and Kotah

Other lines include marble idols, lac, bangles, stone polishing and carving bamboo baskets, chicks, lacquered toys and scents The cutting of synthetic stones and precious stones alone supports 3,000 families in Jaipur

Saurashtra—The State Cottage Industries Board is concerned with the task of putting the cottage industries in the State on a sound footing

Handloom industry is, next to agriculture, the major industry It is poposed to open a handloom centre where weavers will be called to work and learn on a wage basis

Leather tanning has been organised and supply of implements and tanning materials is subsidised Efforts are being made to popularise palmgur and the Board is running six centres in which 62 students were trained in 1951 52

Bee-keeping is still in an experimental stage

There are about 14,000 handlooms supporting 36,000 families

The rest of the industries are scattered These include wooden toys, ornaments, wood-working, button manufacture, clay and plaster modelling, carpet weaving, stoneware articles and basket making

An Industrial Co-operative Association has been fostered by the State Government with substantial capital for organising artisans on co-operative basis and to supply them with raw materials at controlled prices

Travancore-Cochin—Besides the coir industry, the State specialises in palm gur, handloom weaving, pottery, wood carving and bee-keeping A Cottage Industries Board has been set up to ensure an orderly development of industries The establishment of an industrial museum and sales emporia for cottage industries has been decided on.

Himachal Pradesh.—The main cottage industries are wool spinning and weaving, manufacture of leather goods, paints and varnishes, phenyle and sealing wax. There are 2,607 handloom and 26 industrial co-operatives Expansion of sericulture, textiles, wood working, sports, basket ware, pottery and matches is contemplated A sum of Rs 7½ lakhs was budgeted for this purpose in 1953 54

The sericulture industry exists in all districts There are two training institutes A spinning mill for woollen yarn is being established at Jogindernagar Schemes are under way for starting hand-weaving

Clays in Mandi district are suitable for manufacturing stoneware, small containers and cheap crockery

The plan provides for the manufacture of Mangalore tiles at Paonta and of slates in Mandi and Chamba

Ajmer—The Ajmer State is one of the biggest wool exporting centres Low quality woollen goods are produced in the State Handloom weaving is an important industry accounting for nearly 2,000 weavers, 2,300 handlooms and 26 Weavers' Societies Tobacco and sup making industries give employment to over 4,000 persons. Button manufacture is a new industry The two factories at Beawar use domunts as raw material

Coorg—Coorg is a good honey producing area Co-operatives have been well developed and have marketing organisations all over the State

FILM INDUSTRY

At the end of 1952 there were nearly 2 400 cinemas in buildings and about 850 in tents or other similar structures The average capacity of a permanent theatre in India is about 600 ranging between 400 and 1 200 The annual attendance was computed at 60 crores The cost of a large theatre in major cities might exceed Rs 8 lakhs but smaller theatres predominate in numbers and the average cost of such a theatre would be about one lakh of rupees The over all capital outlay in the exhibition section would amount to nearly Rs 26 crores

The annual production of films was about 275 in 1949 and 1950 and the average cost of a picture was about Rs 3½ lakhs There were nearly 60 studios with their equipment costing about Rs 4 crores and 38 processing laboratories with a capital investment of Rs 2 crores Some 70 000 workers were engaged in the industry According to the Patil Committee, the net revenue was about Rs 20 crores Nevertheless the enterprise was profitable to a comparatively small proportion of producers

FILM PRODUCTION

India occupies a second place in the world industry from the point of production The progress of film production from 1948 is given below —

Year	Number of films passed by Censors
1948	264
1949	289
1950	241
1951	221
1952	233

The production activity is virtually confined to Bombay, West Bengal and Madras Bombay concentrates on films in Hindi, Marathi and Gujarati Bengal's production is chiefly in Bengali and a lesser extent in Hindi, and Madras produces films in regional languages of south India, namely, Tamil, Telugu, Kannada and Malayalam In 1939, 94 producers produced 167 films and the highest production by any single producer was nine In 1948, 211 producers produced 264 films, the highest number of films produced by any single producer being only six The number of "newcomer independents", having neither their own studios nor any previous connection with the industry, is large and "infant mortality" among them is also heavy In 1947, out of 214 producers newcomers were 156, but in the following year only 54 out of 214 survived though the number of newcomers reached 157 Only 25 producers could claim to be in the industry for three consecutive years from 1940 to 1948

The details regarding the more recent production trends are given below —

	Total		Bombay		W Bengal		South	
	Hindi	Regional Language	Hindi	Regional Language	Hindi	Regional Language	Hindi	Regional Language
1950	115	126	106	38	7	44	2	44
1951	100	121	91	27	5	40	4	54
1952	102	131	91	21	6	42	5	68

Since 1947 production, particularly of Hindi films has been steadily on the decline and that of films in regional languages has been steadily rising Western India continues to be the major producing centre, but Bombay's share has fallen from 75 per cent in 1946 to less than 50 per cent in 1952 Another significant development is the production of pictures in colour one picture in colour was released in 1952 and another early in 1953 The release position has considerably improved since 1951 and there is no longer a back log of unreleased pictures The terms of exhibition have also partially come down and the production costs have declined

SHORT FILMS

Short Films include documentaries newsreels cartoons and comic strips The industry has hardly evinced any interest in this line The Information Films of India set up by the Government of India in February 1948 produced documentaries in five languages namely English, Hindi Bengali, Tamil and Telugu The themes were selected by the Department of Information and Broadcasting and 101 shorts were produced until the Division was closed in May 1946 During the war Government activity was extended to the production of newsreels and cartoons also

The Films Division as a branch of the Ministry of Information and Broadcasting was set up in Bombay early in 1948 Till 1950 it produced 70 documentaries Besides the stipulation that all exhibitors shall show approved films at each show, the rental is charged by the Films Division

The annual report of the Ministry of Information and Broadcasting for 1952 53 says that the Films Division produced and released 39 documentaries (including 7 obtained from outside producers) as against 36 last year An important feature of the year was the production of two colour shorts' The scheme for producing documentaries for State Governments on payment by them of half the cost did not receive adequate response Films Division shorts are now being screened in several countries It also organised an International Film Festival in 1952 Two units will be set up for producing films in 35 mm and 16 mm dealing with Community Projects and three units will be started for producing 18 educational films every year

16 MM. FILMS

The 16 mm film has not received the attention it deserves Its potentialities have not yet been adequately explored

Economy of cost and storage are two main factors in favour of the 16 mm film (1 000 ft of 35 mm = 400 ft of 16 mm) Colour is also easily available and the film can be processed and copies made in India itself

About 50 full length Indian features, mainly in Hindi, Marathi and Gujarati, are available in 16 mm The layout for the 16 mm film theatre is small and the whole equipment is portable (about the size of two portable typewriters in all) There is therefore a vast scope for the development of the 16 mm theatre on commercial lines The general practice in this matter is, however, very strange Whenever features are reduced to 16 mm, the new versions are released only after the exploitation of the standard size is complete

There are 16 mm libraries of films suitable for non theatrical audiences maintained by the British Information Services and the U S Information Services through their regional offices These offices also maintain trucks equipped with projecting machinery, and shows are arranged free of cost wherever wanted Many industrial houses have also made good films, some in colour, of great value for education or information and they are easily available for showing through schools and institutions

In the Defence Forces, 16 mm films have been extensively used for training and entertainment There are Inspectors of Visual Education under Directors of Public Instruction in the States who do valuable service by using 16 mm projectors in educational institutions They are, however, mainly dependent on imported films The biggest single 16 mm library of films in India is maintained by the Inspector of Visual Education in Bombay who makes the films available regularly to schools under him The Ministry of Education in Delhi has recently started building up a library of 16 mm educational films The work done through the Social Education Scheme of the Madhya Pradesh Government is also worthy of note, particularly because of the exhibition arrangements through 26 well equipped motor vans

FILM DISTRIBUTION

Distribution as a distinct unit is a relatively recent development In 1938 there were 11 film distributing agencies all dealing in foreign films In 1938 their number rose to 214 and ten years later to 887 On the other hand, disbributors of foreign films dropped from 27 in 1938 to 10 in 1948 The table relating to distributors is given below —

	1938	1948
Eastern Circuit (Bengal, Bihar and Assam)	25	134
Central Circuit (Madhya Pradesh, Madhya Bharat, Rajasthan and Bhopal)	5	49
Northern Circuit (Uttar Pradesh Punjab and Delhi)	34	168
Western Circuit (Bombay and Saurashtra)	32	153
Southern Circuit (Madras Mysore and Hyderabad)	118	383
Distributors of Foreign Films	27	10
Distributors of 16 mm Features	—	27
Total	241	924

The main export market for Indian films is Pakistan but Indian exporters are now being put to considerable difficulties Other markets are countries where there are large groups of Indians such as Malaya, Indo China, Burma, Ceylon and Africa Imports of exposed cinematograph films have been fairly heavy Until 1936-37 imports remained below 10 8 million feet, touched the peak at 26 million feet in 1938 39 and dropped to 6 9 million feet in 1942 43 owing to wartime conditions In the post war period imports recovered to 16 2 million in 1945-46 and thereafter fluctuated between 15 million feet and 12 million feet Under the import control regulations, import of foreign films are subjected to a monetary ceiling and distributors are authorised to remit up to 70 per cent of the gross revenue

The years 1952 and 1953 marked a period of acute depression for distributors and exhibitors In Sholapur (Bombay State) the competition became so intense that five cinemas reduced the rates of admission to a flat rate of one anna for all classes The Government of Bombay imposed additional restrictions on touring cinemas precluding them from visiting an area declared as the Sarvodaya area or a place with a population of less than 2,000 No touring cinema can visit a place in Bombay State within a year from the date another one was operating in that State nor can it return to the same place for a period of three years The Films Division also raised the rental on "approved" films

Recommendations of the Film Enquiry Committee —The following is a summary of the more important recommendations of the Film Enquiry Committee —

(1) A Film Council of India as the central authority should be set up to regulate the industry and to advise the State and Central Governments on matters connected with production

distribution, and exhibition of films The Council should have statutory powers in regard to licensing of studios and supervise training institutions

(2) There should be Production Code Administration on the lines of the one in the U S A with four regional branches in Delhi, Calcutta, Bombay and Madras and a Central Office Its main task should be to avoid wastage At the same time, the restriction on footage should be withdrawn

(3) A Film Finance Corporation should be established to provide finance to the industry on the condition that the producer raises at least one fourth of the capital

(4) The entertainment tax should be on an *ad valorem* basis at the level of 20 per cent of the gross takings Half the proceeds should be earmarked for the Film Council and 5 per cent of the proceeds should be earmarked for the initial capital of the Film Finance Corporation The fee charged from the producers for certification should be nominal Films should be exempted from the operation of octroi and terminal taxes Internal customs duties and police charges should have no place The licence fees for storage of films should cover the actual overhead charges The show tax imposed by Municipalities is unjustified

(5) Imports of raw film should be on the O G L and the Film Council should put the ceiling on consumption at 240 million feet

(6) The exhibition of 'approved' films of an informative or instructive nature as an essential part of each programme has proved quite successful and should be continued Such compulsion should not however exceed one tenth of the total screen time for each show

None of the above recommendations has been implemented by the Government

CINEMATOGRAPH ACT

The regulations of films for exhibition and of the cinemas is carried under the Indian Cinematograph Act The power of certifying films was until the amendment of the Act in 1949 vested in the State Governments Since production was concentrated in the three States of Bombay, Bengal and Madras and imports also mainly took place through the three ports in those States, the first examination of films for certification was done mainly by the Boards at these three cities The Act as amended in 1949 made a distinction between films considered suitable for exhibition to adults only and those suitable for general exhibition

The Act was amended in 1952 and a Bill was introduced in Parliament in November 1952 to amend the Act with a view to removing certain defects noticed in the course of actual administration Under the law the responsibility for deciding whether a film is or is not suitable for public exhibition is entrusted to the Central Board of Film Censors, but powers are vested in the Central Government to declare that any film already certified as uncertified and notice has to be given to the person who has been granted certificate to show cause why the film should not be uncertified This delay is sought to be avoided by the amendment Provision has also been made in the Bill making it obligatory on persons delivering a certified film to a distributor or exhibitor to transmit information and documents relating to the certificate which would enable punishment of the exhibitor if he shows the film with portions cut out by the Board before certification The difficulties encountered in proceedings against persons for interpolation and exhibition of unauthorised scenes in certified films are sought to be encountered by the Bill Enhancement of the penalty has also been suggested The Bill was passed in April 1953

The censorship rules amended in January 1953 provide that no certificate will be issued until a copy of the film as certified in 35 mm or 16 mm or a shooting script of the film is deposited with the Board and that the certificate shall be valid for five years from the date of its issue

During the period April 1, 1952 to January 31, 1953 the Central Board of Film Censors examined 2,298 films of which 53 were also examined by Revising Committees in addition to Examining Committees 2,434 films were granted certificates Of these 2,411 were 'U' and 23 'A' certificates 21 films were refused certification, while a number of films were certified after excision of certain portions The total footage ordered to be cut during the period was 46,995 Appeals were received by the Government in respect of 8 films Three were rejected and in the case of 2 the decision of the Board was reversed In regard to the remaining three films, the Board was asked to issue certificates subject to certain cuts 15 films were re-examined by Reviewing Committees of the Board The certificates of two of these were converted from 'U' to 'A' and in the case of six films orders for excision of certain portions were issued During the period 711 films were certified as predominantly educational

GLASS INDUSTRY

THE more commonly used raw materials are sand, borax, soda ash and salt cake, dolomite, lime or limestone, salt petre and sulphur, manganese dioxide and colouring materials Though supplies of sand are in plenty, its quality is not uniform Nearly all the glass factories of northern India and West Bengal obtain their requirements of sand from the Allahabad district Subsequent to the Tariff Board s inquiry in 1932, little progress has been made in the installation of grading and washing equipment for sand Borax is mostly obtained from abroad, while soda ash is received from indigenous manufacturers and importers Sufficient quantities of lime or limestone are available Coal is the commonest fuel The bulk of refractories is obtained from indigenous sources The demand for refractories by the glass industry is estimated at about 10,000 tons per year

The industry comprises the manufacture of sheet glass, blown and pressedware and bangles The industry has developed mainly under the private sector with reported capital investment of Rs 5 78 crores in 1951

Some 26 000 workers excluding those engaged in cottage industries are employed in the industry Government protection to the sheet glass section was granted in 1950

The total number of factories in 1951 was 109 and their regional distribution was as under —

State	No of units	Annual rated capacity
		Tons
West Bengal	30	63,600
Bombay	22	43,560
Uttar Pradesh	21	36,960
Madras	8	6,850
Bihar	8	16 380
Madhya Pradesh	5	4 220
Punjab and PEPSU	4	4,140
Delhi	2	1,200
Rajasthan	2	900
Hyderabad	2	3,960
Saurashtra	1	360
Mysore	1	720
Travancore Cochin	1	600
Orissa	1	3,600
Madhya Bharat	1	1,800
Total	109	188,850

Besides there were 35 units with an installed capacity of 30 000 tons which had not been in operation for over three years bringing the total capacity of all the units in the country in 1951 to 218 850 tons

The manufacture of bangles was undertaken by about 100 units, mostly established on a cottage industry basis and localised in the Ferozabad district in Uttar Pradesh and Belgaum district in Bombay The rated capacity of these factories was placed at 35 000 tons In the sheet glass section there were three units in existence in 1950-51 with a combined rated capacity of 23 4 million sq ft equivalent to about 11,700 tons

OUTPUT

Actual output of glassware is shown by the following table

—	1949	1950	1951
	Tons	Tons	Tons
Bangles	17,000	16 000	14,000
Bottles and phials	46,951	51,850	60,948
Table and pressedware	6,625	12,950	11,372
Lampware	9,937	13,150	15,362
Scientific glassware	1,987	2,137	1,970
Miscellaneous	1,324	1 985	3,291
Sheet glass	1,936	5,098	5,800
„ in million sq ft	(3 5)	(9 57)	(11 1)
Total	85,760	103,270	112,743

During 1952 the actual production, however, showed a decline The output of sheet glass dropped to nine million sq ft and that of laboratory glass to 1,476 tons A small increase of a little over 10 per cent was noted under glass shells for electric lamps whose production rose from 144 lakh pieces to 166 8 lakh pieces in 1952 , but the other glassware reported a fall from 90 324 tons in 1951 to 85,224 tons in the following year

The year was notable for a good increase of 30 000 tons in the capacity on account of 8 new units coming into existence

Imports and exports are as follows

(Rupees in lakhs)

—	1948 49	1949 50	1950-51	1951-52	1952 53
Imports	165	191	57	214 73	128 05
Exports	24 3	10	15	21 42	24 16

DEVELOPMENT PLANS

For meeting the domestic and export needs, it is necessary for the industry to produce 127,500 tons in 1952 53 and 163,500 to 168,500 tons by 1955 56 of all types of glassware other than bangles Even then imports of glass to the extent of Rs 30 lakhs might be necessary in 1952 53 and of Rs 20 lakhs in 1955 56

The following table summarises the programme of development during the period of the Plan —

—	1950-51		1955-56	
	Annual rated capacity	Actual production	Annual rated capacity	Actual production
	Tons	Tons	Tons	Tons
Bangles	35,000	16,000	35,000	16,000
Sheet glass	11,700	5,850	52,200	26,000
Blownware and pressedware including glass shells	201,550	86,100	237,800	137,500
Safety glass (m sq ft)			0 5	0 5
Optical glass			12	10
Total (excluding bangles) ..	213,250	91,950	290,012	168,510

*

HIDES, SKINS AND LEATHER

THE Republic is regarded as a surplus area in respect of its resources of raw hides and skins It is estimated that normally it produces 16 2 million cow hides, 5 5 million buffalo hides, 23 2 million goat and 15 1 million sheep skins a year Only a portion of the cattle and buffalo hides is obtained from slaughtered animals and the bulk, about 75 to 80 per cent is derived from animals that die a natural death

The bulk of the production is carried on in small towns and villages

The tanning industry comprises four sections, *viz*, 1 organised tanneries producing finished vegetable tanned buffalo leather and chrome tanned upper leather, 2 tanneries producing vegetable tanned leather known to the trade as E 1 kips and E 1 tanned skins, 3 small-scale chrome tanneries producing chrome tanned upper leather, and 4 village tanneries producing vegetable tanned cow and buffalo leather and vegetable tanned leather from goat and sheep skins

The number of factories and annual rated capacity in 1950 of each of these sections was as follows —

—	Number of factories	Capacity in million
1	26 (16 produce chrome)	3 184 (hides for vegetable tanning) 1 976 (hides for chrome tanning)
2	500	10 (tanned hides) 20 (tanned skins)
3	250	3 (hides)
4		8 to 9 (raw hides) 3 to 4 (raw goat and sheep skins)

The second section is mainly concentrated in south India, while the third is located in Calcutta and worked by the Chinese

PRODUCTION

The following is the trend of production —

Year	Chrome and tanned hides	Vegetable tanned buffalo and cow hides (in terms of cow hides)	Leather cloth (000 yards)
	(thousands)	(thousands)	
1948	1 087 2	1,958 4	
1949	580 8	1,834 8	
1950	879 6	1,514 4	
1951	650 4	1,704 0	1,868 8
1952	823 2	1,478 4	845 6

According to the census of manufactures, 1950, the total fixed investment in 81 factories giving employment to 8,340 workers in 1950 was Rs 85 lakhs and the working capital Rs 261 lakhs

The annual requirements of raw materials at the beginning of 1950 51 were —

Raw hides—20 million pieces, raw skins—25 million pieces, lime —25,000 to 30 000 tons wattle bark and wattle bark extract—30,000 tons (imported), other barks —300,000 tons, myrabolans—25 000 to 30,000 tons sodium sulphide—700 tons, boric acid—1,000 tons sulphuric acid—1,500 tons, sodium bichromate —1,200 tons, sodium thiosulphate—300 tons, fish and vegetable oils—4,000 tons, coal tar dyes—125 tons, artificial bates—60 tons, water and nitrocellulose pigment finishes—150 tons, and tallow—1,000 tons

Imports of manufactured leather are insignificant but exports play a vital part in the foreign trade as shown below —

—	(Value in lakhs of rupees)		
	Hides, tanned or dressed including calf skins	Skins tanned or dressed	Leather unwrought
1948-49	4,96 4	7,20 4	39 4
1949-50	8,53 3	11,73 0	58 5
1950 51	12,12 2	13,24 8	58 0
1951-52	13,61 3	11,31 7	39 2
1952-53	9,22 1	10,74 4	15 7

The main problems about raw material relate to the supply of hides and skins and wattle bark Supplies of hides have to be arranged from Pakistan As for wattle bark, the Government of Madras is reported to be taking steps for bringing about 21,000 acres under wattle plantation

FOOTWEAR INDUSTRY

The principal use of leather is for the production of footwear According to the Monthly Statistics of Selected Industries, nine of the large scale factories in existence had an annual capacity of 4 7 million pairs of Western type footwear in 1951, while small scale factories and cottage units turn out annually about 13 million pairs of Western type footwear, and 70 million pairs of the indigenous kind

The output of the large scale factories since 1948 is given below —

—	Western type (million pairs)	Indian type (million pairs)
1948	3 202	2 068
1949	2 850	2 108
1950	2 837	1 997
1951	3 641	2 074
1952	3 367	1 806

On the basis of the level of footwear production estimated at 85 million pairs in 1950 51 the requirements of raw materials are approximately 10 25 million tanned hides and 4 million tanned skins 4 51 million reels for upper and 300 tons for others of thread, 240 million pieces of eyelets 1 100 tons of other items of grindery and 7 5 million yards of abrasives

Imports and Exports are as follows —

no of pairs

—	1948-49	1949-50	1950-51	1951-52
Imports		24,140	Negligible	
Exports	778,145	380,933	539,228	1,417,506

The Planning Commission thinks that exports during the period of the Plan should fluctuate between 0 539 million pairs and one million pairs and has recommended that the production should be raised from 85 million pairs in 1950 51 to 91 million pairs by 1955 56 by fuller utilisation of the existing capacity of large scale factories, and through the establishment of 100 new small-scale units each with a daily output of 100 pairs of Indian type

*

JUTE INDUSTRY

The following table gives the details of the production trends of raw jute in the Indian Union —

Year	Lakh acres	000 bales
Average		
1936 37 to 1938 39	8 7	1,904
1944–45	5 9	1,164
1945–46	5 9	1,459
1946–47	5 3	1,320
1947–48	6 5	1,658
1948–49	8 3	2,055
1949–50	11 6	3,117
1950–51	14 5	3,270
1951–52	19 5	4,677
1952–53	18 34	4,695

Following the partition India has not only ceased to be an exporter of raw jute but presently depends on imports from Pakistan These are arranged under bilateral trade pacts concluded periodically for a short duration

The statistical position of raw jute for 1951 52 season (actual) and for 1952 53 season (estimated) is given below —

(Bales)

	1951–52 July June	1952–53 July June
Supply		
Opening stock—		
With Mills	10,13,000	11,05,000
With balers	43,000	50,000
Indian Crop	46,78,000	46 95,000
From Pakistan	18,00 000	15,00,000
Total Supply	75,34,000	73,50,000
Consumption		
Mill Consumption	61,00,000	56 30,000
Domestic Consumption	1 00,000	1 00,000
Total Consumption	62 00,000	57,30,000
Carry over		
Theoretical	13,34,000	16,20,000
Actual	11,55,000	Not Available

Though India has achieved self sufficiency, she still depends on Pakistan for quality jute

The following table gives the trend of mill consumption of raw jute —

Year ended June	Lakh bales
1947-48	61 7
1948 49	62 0
1949 50	49 1
1950 51	51 1
1951 52	56 88

JUTE INDUSTRY

In 1950 there were 112 registered jute mills with a total number of 72,161 looms, of these 101 were located in West Bengal

The loomage on June 30, 1951 was 72,235 capable of producing 100,000 tons of jute goods per *month* 107 mills had a fixed capital of Rs 29 81 crores and a working capital of Rs 37 4 crores in 1950 In the same year 306,000 workers found employment in the industry

The progress of the industry during the past few years is summed up in the following table —

(In thousand tons)

Year (July June)	Production				Exports	Stocks
	Hessian	Sacking	Others*	Total		
1939 40	576	646	42	1,264	1,147	146
1940 41	449	499	36	984	821	145
1941 42	591	588	46	1,225	825	251
1942 43	484	662	59	1,205	689	275
1943 44	393	521	40	954	635	195
1944 45	415	545	40	1,000	677	177
1945 46	463	581	41	1,085	801	188
1946 47	418	510	34	962	800	176
1947 48	483	520	32	1,035	896	120
1948 49	494	577	110	1,081	872	107
1949 50	285	505	111	901	787	71
1950 51	329 7	498	35 2	857 9	649	90 4
1951 52	309 4	607	28 8	945 2	769	30

* Includes production of non member mills in 1948-49 and 1949-50

PRICES

The following table gives the average quotations of jute manufactures since 1940 41 —

July June	Hessian 40"×8 oz per 100 yards			B Twills—2¼ lb, 44×26½ 6×3' per 100 bags		
	Rs	a	p	Rs	a	p
Average						
1940 41	13	14	0	32	3	0
1941 42	18	11	0	38	10	0
1942 43	17	5	0	56	4	0
1943 44	21	5	0	66	9	0
1944 45	22	2	0	64	2	0
1945-46	21	15	0	65	7	0
1946 47	35	10	0	97	7	0
1947 48	43	14	2	118	14	3
1948 49	40	11	0	137	12	0
1949 50	48	7	0	155	12	0
1950 51	54	1	0	183	12	0
1951 52	64	9	0	206	1	0
April 1953	39	4	0	87	9	0

In order, however, to have a correct perspective on the prices of raw jute and jute manufactures, the following index number of prices will be interesting —

INDEX NUMBER OF PRICES

(Base July 1914=100)

Period	Raw Jute	Manufactured Jute	% of Jute Goods to Raw Jute
Average of 1924 28	114	156	137
,, ,, 1929 33	59	88	149
,, ,, 1934 38	49	69	141
,, ,, 1939 43	97	134	154
,, ,, 1944 48	188	274	146
1947	251	366	146
1948	296	383	129
1949	290	391	135
1950	301	424	141
1951	517	645	125
1952	277	386	139

Ever since the devaluation of the Indian rupee and non devaluation of the Pakistani rupee, supplies of raw jute from Pakistan badly needed by Indian jute mills became difficult and while there was a boom in the demand for jute goods due to outbreak of hostilities in Korea in mid-1950, the production of jute goods outside India considerably increased This competition became intense following Pakistan's decision to charge a higher price for supplies meant for India and, consequently, the Government reduced the export duty in May 1952 from Rs 750 to Rs 275 per ton in the case of hessian and from Rs 350 to Rs 175 on sacking With effect from March 1, 1953, export duty on sacking was lowered further to Rs 80 Efforts were also made to stimulate American offtake of jute goods by sending a goodwill mission On March 30 1952 the working hours were reduced from 48 to 42½

The main problems facing the industry, observes the Planning Commission, are shortage of raw material, modernisation of equipment and possible competition in the foreign markets from substitutes and other products Lack of finance is a major factor deterring the industry from undertaking modernisation The task, therefore, is to utilise the existing capacity more fully by procuring greater supplies of raw jute On this basis, it hopes that the output of the mills can be stepped up from 858,000 tons in 1950-51 to 1,200,000 tons in 1955 56 and exports from 650,000 tons to 1,000,000 tons.

LAC INDUSTRY

LAC is a resin which finds extensive application in industries It is a resinous protective secretion of an insect which lives by sucking the sap of certain trees and shrubs called lac hosts

There are four crops of sticklac, named after the Hindu months in which the collection of each crop commences These are Baisakhi' and Katki' from one strain of the insect (Rangeeni) and Jethwi' and Aghani from another strain (Kusumi) The first processed product, after the crushing and washing of sticklac is known as 'seedlac From this shellac is manufactured

Sticklac is generally an Indian product though for some time now Thailand has been a competitor

The average production of sticklac in different States from 1946 to 1953, a period during which shellac was free from price control, is as follows —

States	Average crop (In maunds)
Bihar	673,019
Madhya Pradesh	290,941
West Bengal	48,535
Vindhya Pradesh	33 272
Assam	21 379
Orissa	20 319
Bombay	15 211
Uttar Pradesh	11,633
Other States	27 480
Total	1,141,819

There are no regulated markets for trading in sticklac

Out of the 489 factories in the country, 405 are located in Bihar, only two are, however, fully mechanized

Yield from sticklac varies from year to year and locality to locality

Roughly the yield of seedlac and shellac is 65 per cent and 55 per cent of sticklac

The cost of manufacturing one maund of shellac from seedlac is about Rs 16 and of converting sticklac into seedlac is Rs 3 In 1939 these were roughly Rs 3 8 and as 8 respectively

Prices of shellac and seedlac have been subject to wide fluctuations

During the first war, the price of T N Shellac at Calcutta ranged between Rs 32 and Rs 50 per maund but the upward movement initiated in 1917 18 lifted it beyond Rs 200 in October 1920 Then followed a downward trend except for a slight recovery in 1927 28 and 1934 35, and the rate touched the bottom at Rs 18 in 1933 34 and sought a fresh lower level at Rs 13 per maund by April June 1939

During the Second World War - July 1942 to April 1946 the prices were controlled on T N basis at Rs 64 and later at Rs 70

After decontrol, the prices started rising, but in March 1950 they fell to Rs 95 on T N basis as compared with an average price of Rs 130 in December 1949

Following the outbreak of the Korean war, the price touched Rs 190 in January 1951 but declined by the end of March 1952 to Rs 92 per maund

During 1952-53 the market was subdued with pure T N Shellac fluctuating between Rs 84 and Rs 66 There has been a firm trend since 1953 April and in November the rate was around Rs 107 per maund

About 90 per cent of the total quantity of processed goods is exported

The U S is the best customer, followed by the U K and Germany

EXPORTS

The data relating to the average annual exports in seven years preceding the War (1932 33 to 1938 39) and in the corresponding post war period (1946 47 to 1952 53) are given below —

——	(Tons) Pre war	(Tons) Post war
SHELLAC AND BUTTON LAC

GRAND TOTAL	31,129	30,065

Lac has made significant contributions to the development of art and industry

Shellac is consumed chiefly by five industries

The gramophone industry consumes about 11 to 13 thousand tons

The varnishes and paint industry absorbs something like 4 to 6 thousand tons

The total demand from the electrical industry is estimated at 3 000 tons as against 6 000 tons in pre war years

Nearly 3,000 tons are used in the hat industry as a stiffening material

The manufacture of sealing wax requires about 1,500 tons

The Indian Lac Association for Research was formed by traders in Calcutta in 1921 and the Government found the funds by levying a cess on all exports of lac other than refuse lac at as 4 per maund and for refuse lac as 2 per maund

The Indian Lac Cess Committee was established under the Lac Cess Act of 1930 and the cess was raised to as 7 and as 5 respectively With effect from April 1948 this cess was doubled

The Government of Bihar appointed in January 1953 a Committee to report on the condition of the industry and to recommend remedial measures

Some of the more important recommendations are given below —

(1) The *fatka* in the trade should be replaced by a system of specific delivery contracts

(2) Export of seedlac and shellac on consignment should be stopped, and floors and ceilings should be fixed for prices of seedlac and shellac Export of sticklac should be banned

(3) The total lac production in the country should be raised by approximately three lakh maunds a year during the next five years

(4) The Indian Lac Cess Committee should be replaced by a Lac Board whose functions should correspond to those of the Tea Board

In addition to effective propaganda abroad for increased consumption of shellac, steps should be taken to stimulate domestic consumption also

NON-FERROUS INDUSTRY

ACCORDING to Dr D N Wadia, formerly Mineral Adviser to the Government of India, mineral resources of India for aluminium copper and antimony are sufficient to meet our present and future requirements As regards lead, zinc and tin, our resources are not likely to be sufficient and imports will be required to meet the deficiency in these metals And about the rest of the non ferrous metals, our mineral resources are negligible The position regarding these metals is briefly described below

(*a*) **Aluminium Ores** :—India is rich in deposits of high grade Bauxite which are estimated at 250 million tons These are generally located in Jabalpur and Balaghat Districts of Madhya Pradesh Belgaum, Kolhapur Thana and Kaira Districts in Bombay Ranchi Plateau in Bihar, and Shevaroy Hills in Salem, Madras

(*b*) **Copper Ores** —Copper pyrites is the principal ore of copper The deposits of copper pyrites in India are in Singbhum and Baragunda in Bihar, Khetri mines in Jaipur, Sikkim State, Mysore State and in the Salem District of Madras State Although only the Singbhum deposits are worked at present, the copper belts of Sikkim and Khetri are very promising

(*c*) **Lead Ores** :—Lead ores are known to occur at a number of places in India Special mention may be made however, of lead deposits in Jaipur and in Zawar Mines in Udaipur where lead is found in association with zinc, in Chhota Udaipur in Gujarat and in Hazaribagh in Bihar

(*d*) **Antimony Ores** —Antimony ore deposits have been found at the Shigree Glacier in Lahaul, Kangra District Punjab (India)

(*e*) **Zinc Ores** :—At present zinc deposits are known to occur at only two places in India Zawar mines in Udaipur and in the Riasin District in Kashmir State

(*f*) **Tin Ores** —Several localities are known in India where tin stone (Cessiterite) has been found in small quantities The most interesting of these areas is that in the Hazaribagh District of Bihar None of these ores are said to be very promising

PRODUCTION OF METAL

The only non ferrous metal produced in India before the war was copper The Indian Copper Corporation Ltd started working the Singbhum copper deposits in Bihar in 1928 29

The production of refined copper in tons is as follows 1946—6,310, 1947—5,932, 1948—5 864, 1949—6,590, 1950—6,614 1951—7 083, 1952 - 6 079

There was practically no refining industry for the recovery of metal from scrap and most of the industrial non ferrous scrap was exported to Japan and Germany

As regards processing of semi manufactures the only production was of brass sheets by the Indian Copper Corporation Ltd averaging about 8 000 tons per annum, and electric copper wires and insulated cables by the Indian Cable Co Ltd A more recent development is the manufacture of brass and copper pipes and tubes Their annual capacity is 360 tons but the actual production has never exceeded 11 tons and 60 tons respectively

For antimony a smelter was set up during the war at Bombay by the Star Metal Refinery with a capacity of 00 tons per annum This capacity has now been increased to 700 tons, per annum The ore brought from Chitral State (Pakistan) was used for smelting antimony and the plant had reached full production in 1946 47 After the partition of the sub continent, the ore supplies from Chitral were cut off and as a result the production suffered The production from 1949 to 1952 was 100 tons in 1949, 375 tons in 1950 327 tons in 1951, and 181 in 1952

There is a new Lead Smelter at Katrasgarh in Bihar with a capacity of 7,000 tons per annum The production of lead in 1949 and 1950 was, however, only about 600 tons a year due to the difficulties of transporting ore from the Jawar mines in Udaipur to the Smelter The company has now set up an ore dressing plant at the mines which will reduce the weight of the ore to be transported The capacity of this plant is reported to be 9,000 to 10,000 tons of lead concentrates of 60 to 65 per cent lead and 7,000 to 8,000 tons of zinc concentrates averaging 55 per cent zinc The production in tons is as follows 1948—625, 1949 -594, 1950—627 1951—859, 1952—1,131

No progress has been made in the production of zinc in India Although the Jawar mines were originally prospected by the Geological Survey of India for zinc and although the ore in the Jawar mines contains about 13 per cent lead and 9 per cent zinc, there is no immediate proposal for producing zinc The present plans are only to produce from the zinc-bearing ores lithopone and zinc oxide which are required for the paint industry

SEMI-MANUFACTURES

The greatest progress in the non ferrous industry made since 1939 is in regard to the semi manufactures Several brass and copper rolling plants were started for rolling brass and copper sheets mainly in Bombay The combined capacity of these new plants is about 20 000 tons per annum

Some lead sheets are also manufactured in the Calcutta area, but at present they are rolled in 3 ft width, while the chemical industries require lead sheets of 7 to 9 ft width Aluminium and lead foils for tea chests are also manufactured in the Calcutta area and the present capacity is estimated to be sufficient to meet India's requirements

Several rolling plants for rods and bars of brass copper, etc were started during the war afterwards an Extrusion Press was set up in Calcutta by National Tubes and Pipes Ltd Arsenical copper rods which are required for railway locomotives as boiler stays were manufactured in Jaipur by the Jaipur Metal Industries Ltd during the war and all the requirements of railways can be met by indigenous production The present capacity for rods and tubes of brass and copper may be estimated at about 10,000 tons, which is enough to meet the present requirements of the country The manufacture of lead pipes was started during the war at Konnanagar

A new plant for lead pipes was also set up in Bombay during 1949 The present production is about 330 tons per annum, but this could be increased to 1,000 tons, if required

A plant for the manufacture of electrical wires and cables was set up near Calcutta during the war by the National Insulated Cable Co The total production of electrical bare copper wire and cables of this company and the Indian Cable Co is estimated to be about 10,000 tons per annum

Two plants one in Bombay and the other in Calcutta for the manufacture of enamelled copper wire required for making electric motors and fans have a total capacity of 2,000 lbs per day

A number of concerns have been started for manufacturing different kinds of non ferrous alloys The refining and reconditioning of railways scrap and other industrial non ferrous scrap is now done in this country, which was formerly largely exported The total present alloying capacity in the country may be estimated at about 20 000 to 25,000 tons per annum

A plant for the recovery of silver from old coins has been taken up for implementation at the Alipore Mint This plant will also be able to recover about 3 600 tons of electrolytic copper from copper scrap

A scheme for erecting a ferro-manganese plant with an annual capacity of 10,000 tons, has been approved This plant is proposed to be installed at the Hirakud Dam site in collaboration with an Italian firm

In most cases there is a protective duty of 30 per cent In the case of zinc and lead sheets the protective duty is fixed at 20 per cent and of arsenical copper rods, brass rods and brass wires a protective duty of 35 per cent The import duty on machinery is 5 per cent which is applicable to all industries

ALUMINIUM

Aluminium is the only non ferrous metal which India can produce in large quantities because of extensive deposits of bauxite and adequate supplies of bulk power There are two units The Indian Aluminium Co working in collaboration with the Canadian Aluminium Co has put up an alumina plant at Muri in Bihar The alumina produced is converted into pig aluminium at Alwaye and rolled into sheets and finished goods at Calcutta The Aluminium Corporation has an integrated plant near Asansol

The two plants have a total capacity of 4 000 tons of aluminium ingot per annum Their rolling mills have a combined capacity of 3,500 tons The capacity of the alumina plants is 14 000 to 15,000 tons and the capital invested in the industry is about Rs 350 lakhs

The production of aluminium in tons since 1948 is follows —1948 3,369, 1949 3,480, 1950—3 590 1951—3,848 1952—4 425

Except bauxite and coal most of the other raw materials are available only partly or not at all from indigenous sources Caustic soda and soda are not produced in enough quantities, cryolite aluminium fluoride, carbon blocks and filter cloth have to be imported, and the possibilities of producing greenland in this country are yet to be investigated

The demand for aluminium has been estimated at between 15 000 tons and 20,000 tons The handicaps of the industry are the small capacity of the units the inherent refractory nature of Indian bauxite which costs more to mine, and expensive raw materials such as petroleum coke

The Indian Aluminium Co envisages the expansion of the smelter at Alwaye to 5,000 tons and to raise the rolling capacity of its mills at Belur to 6 000 tons per annum The Aluminium Corporation has a scheme to step up its production of aluminium ingots to 2 000 tons per annum and the sheet rolling capacity from 500 tons to 3,000 tons These plans of both the units are expected to be completed by the end of 1953

For the planned period, the installed capacity is expected to be stepped up from 4 000 tons in 1950 51 to 20,000 tons by 1955-56 and production from 3,677 tons to 12,000 tons The industry is protected by a protective duty of 30 per cent

IMPORTS OF NON-FERROUS METALS

——	1950 51	1951 52	1952-53
Aluminium (Cwts)	193 600	185,623	120,777
,, unwrought (Cwts)	57,033	50,161	23,731
Brass, Bronze etc (Cwt)	289,881	36,127	31,882
Copper (Cwts)	748,958	107,146	412,218
,, unwrought (Cwts)	596,016	81 591	389,843
,, old for re manufacture (Cwts)	125,040	13,040	3,494
Ferro Alloys (Tons)	2,406	2,538	1,293

Lead (Cwts)	313,738	154,194	67,008
Tin ,,	86,195	73,037	40,572
Zinc ,,	695,856	363,716	403,712

OPIUM INDUSTRY

IN addition to being a narcotic, opium is the base of many medicinal drugs Because of its devastating effect as a dope, the Central and State Governments have adopted various measures to put an end to the evil and a very small fraction of the population is now left still making habitual use of the drug With a view to restricting its manufacture only for medicinal and scientific purposes, the Government has taken in hand improved methods of poppy cultivation, restricted the cultivation of poppy through licenses and confined production to its factories at Ghazipur and Neemuch Only a small percentage of opium is sold to the State Governments after processing and the balance is exported for medicinal and scientific purposes

Poppy cultivation is confined to the States of Uttar Pradesh, Madhya Bharat, Rajasthan and Himachal Pradesh and a negligible quantity is grown in Bilaspur The entire crop has to be sold to the Central Government at a fixed price The opium poppy grown in India is of three varieties—Banaras in U P Malwa in Madhya Bharat and Rajasthan and Himalayan in Himachal Pradesh Cultivation starts in November and the crop is harvested in April or May Preparation of the land for the reception of the seed is a prolonged process, the field being given 20 to 25 ploughings Opium is derived as a juice called latex After collection it is dried by the farmer before being delivered to the Government

The area under poppy cultivation, which used to be 760 000 acres in 1905 06 is now barely 70 000 acres The production fluctuates according to the overseas demand and its trend in recent years is given below —

Year	Acreage	Production (Maunds)	Exports (Tons)
1948 49	69,425	9 515	35
1949 50	51 480	7,030	172
1950-51	69 720	13 700	348
1951 52	56,190	9 045	167

At a conference of the State Governments in 1949 it was decided to reduce the supplies to States at a progressive rate of ten per cent every year so that these supplies will cease completely by 1959 The trend of domestic consumption of excise opium is given below —

Year	Consumption in Maunds
1948-49	3,895
1949 50	2,925
1950 51	3,170
1951-52	3,700
1952 53	3,135

In 1946 the Central Government erected a huge alkaloid plant at the Ghazipur factory for manufacturing medicinal preparations and India claims today the distinction of producing alkaloid products including thebaine, papaverine and cotarnine During the past five years, sales of alkaloids in the country have gone up from 515 lb in 1947 48 to 1,430 lb in 1950 51 and then declined to 1 198 lb in 1951-52, while exports, which were insignificant in 1947 48 and only 374 lb in 1950 51, shot up to 1 479 lb in 1951 52

INTERNATIONAL CONTROL

International efforts to control opium date back to the beginning of the present century, and the League of Nations and the United Nations Organisation have, during the last three decades been endeavouring to confine its use solely to medicinal and scientific purposes An International Opium Commission met in Shanghai in 1909 at the initiative of President Theodore Roosevelt as a result of which the first Opium Convention was drawn up at the Hague in 1912 Several treaties on narcotics have been signed since then but all efforts at limiting production of opium have met with limited success

The Geneva Convention of 1925 provides for measures to regulate international trade in opium and other dangerous drugs In 1950 the United Nations proposed a draft plan for creating an international opium monopoly, but due to lack of agreement the proposal fell through The latest International Protocol signed at New York on June 23, 1953 aims at limiting production and control of the international and wholesale trade in opium and incorporates many of the salient features of the comprehensive Indian system of control

Until the establishment of the plant for the manufacture of alkaloids opium as a source of revenue lost its importance because of the deliberate policy of the Government to curtail opium consumption and exports Between 1941 42 and 1946 47 the net receipts fluctuated between a surplus of Rs 48 lakhs and a deficit of Rs 52 lakhs Since then the trends have been more helpful for the Central budget Details for recent years are given below —

(In lakhs of rupees)

—	1950 51	1951 52	1952 53 Revised	1953-54 Budget
REVENUE				
Sale of opium to State Governments			62 00	62 00
Sale of medical opium			1 40	1 50
Sale of alkaloids			6 80	6 70
SALE ABROAD		268 48		
Sale of raw opium			120 00	125 00
Sale of alkaloids			4 00	4 00
Sale of miscellaneous			1 00	1 00
Total		268 48	195 20	200 20
Refunds		0 06	0 20	0 20
Net Revenue		268 42	195 00	200 00
EXPENDITURE		Not Available	177 38	293 47

The decrease in revenue is due to slender sales of raw opium to foreign countries The expenditure budget provides for a higher anticipated yield of opium, purchase of stores and machinery for Ghazipur Opium Factory and enhancement of wages as a result of the recommendations of the Fair Wages Committee

PAPER INDUSTRY

THE bulk of the production comprises the more common types of paper, especially printing and writing paper The manufacture of superior varieties is also undertaken but on a restricted scale

There is no mill manufacturing newsprint at present

The following table gives the trend of production —

(In 000 tons)

Year	Installed Capacity	Total Production	Printing & Writing	Wrapping	Special Varieties	Board
1947	105	93	53	17	5	18
1948	105	98	50	17	13	17
1949	110	103	59	13	11	19
1950	114	109	70	15	5	19
1951	137	131	78	24	3	26
1952	147	138	91	22	2 8	22

There are 40 factories engaged in the manufacture of straw and other boards with an annual rated capacity of about 54 500 tons and an actual production of 25,400 tons in 1951 52

The block capital of the paper and paper board industry in 1950 51 was Rs 21 8 crores There were 37 factories and the industry found employment for about 22 000 workers

The State wise distribution of the paper and paper board industry in February 1951 is given below —

State	No of units	Annual rated capacity (tons)
West Bengal	4	98 500
Bihar	1	11 000
Orissa	1	31 500
Uttar Pradesh	2	6,400
Punjab and PEPSU	1	8,500
Bombay	3	5 100
Madras	—	2 600
Hyderabad	1	5 000
Mysore	1	4 000
Travancore Cochin	1	4,000
	17	136 600

There has been a steady fall in the imports of paper and pasteboard from 113,000 tons in 1949 50 to 90,400 tons in 1951 52 The figure for 1952 53 was 106,459 tons Exports have not been appreciable in the past In 1951 52 they were 3,251 tons, and in 1952 53 , 1,702 tons

Sabai grass and bamboo are the chief raw materials which are available locally The use of imported woodpulp has been gradually discontinued and hardly 10 per cent of the raw material is imported Of late, however, the industry has been placing a greater reliance on rags, hemp, hemp ropes and wastepaper One important mill is exclusively dependent on waste paper and rags

For many years the paper pulp section of the Forest Research Institute at Dehra Dun has been carrying out experimental work in connection with the development of new fibres for paper-making

Recent enquiries show that the Kashmir and Tehri Garhwal can supply fir and spruce in quantities sufficient for the establishment of newsprint mills in Kashmir and U P The two species of wood are well known raw material for the production of mechanical pulp for use in newsprint manufacture and the suitability of both the species from the two States has recently been tested at the Forest Research Institute, Dehra Dun

DEVELOPMENT PROGRAMME

The main problem of the industry is the shortage of raw materials accentuated by the partition of the country as the factories in West Bengal were deprived of their supplies of bamboo previously obtained from East Bengal.

The immediate programme of development visualises the expansion of the rated capacity to 211,000 tons of paper and paper board and 30 000 tons of newsprint by 1955 56 at a capital cost of Rs 8 crores The actual production is, however, expected to be 200,000 tons of paper and paper board and 27,000 tons of newsprint by 1955 56

The production of straw-boards is expected to go up to 52,000 tons since the expansion plans of Straw Products Ltd , Bhopal would raise the rated capacity by 4,000 tons to 58,500 tons In addition, about 25,000 tons of paper-boards would be available for consumption making a total of about 77,600 tons by 1955 56 as against an anticipated demand of about 95,000 tons

According to the Planning Commission the production of 200,000 tons of paper and paper-boards by 1955 56 should be adequate and further development, if any, should be in the direction of enabling some of the existing uneconomic units to attain the minimum economic size of 8,000 tons of paper per annum The likely gap of 17 400 tons between output and estimated consumption of straw board and other fibre boards can be met if some of the sugar factories release bagasse by using wood or coal as fuel The use of *semal* wood a basic raw material for the match industry for paper manufacture should be banned and measures concentrated on the plantation of bamboo and *sabai* grass

The newsprint plant of the NEPA Mills in Madhya Pradesh was expected to go into production in 1953 and to meet domestic needs to the extent of 27,000 tons from 1954 onwards

The Five Year Plan for the industry is summarised in the following table —

—	1950 51			1955 56		
	No of units	Annual rated capacity (000 tons)	Actual output (000 tons)	No of units	Annual rated capacity (000 tons)	Actual output (000 tons)
Paper and paper board	17	136 6	114	19	211	200
Newsprint				1	30	27
Strawboard and other fibre boards	18	48 3	22	20	58 5	52 6

*

PLASTICS INDUSTRY

THE plastics industry in India was largely developed during the Second World War and is primarily concerned with turning out finished product from imported raw material At present there are about 100 major factories and several small ones operating on a cottage industry basis The captial investment is placed around Rs seven crores and the industry provides employment for about 12,000

At the beginning of 1950, the more important factories possessed 182 injection moulding machines with a capacity of 403 oz and 154 compression moulding presses with a capacity of 7,074 tons Early in 1953 the respective capacity figures were 550 oz and 10,200 tons The size of the equipment of smaller units is placed at a third of these figures Besides there are 41 extruders with size varying from 1 inch to 4½ inches

The processes used by the industry are (1) Compression moulding (2) Injection moulding (3) Extrusion (4) Fabrication, and (5) Coating of fabrics by plastics Articles manufactured cover an extensive field ranging from electrical accessories and insulated electric cables to spectacle frames artificial leather and waterproof cloth The West Bengal Government has plans to set up a factory for manufacturing plastic teeth Metal using of plastics has been successfully undertaken by a few firms The trend of production of compression and injection moulded goods since 1948 is given below —

Year	Production (million gross)
1948	0 37
1949	1 02
1950	2 29
1951	1 48
1952	1 54

Of the articles produced in 1952, electrical accessories constituted about 24,500 gross and other industrial articles 198 000 gross Nearly 30 per cent, of utility goods comprised combs, while bottle caps made up 90 per cent of industrial goods Production of mechanised toys was an important achievement of the year The details regarding the more important lines of production are furnished below —

Tooth Brushes 12 factories, 24 million annual capacity Output 4 3 million brushes in 1951 and 2 8 million (estimated) in 1952

Spectacle Frames 9 factories, 1 4 million annual capacity Production 0 35 million in 1950, 0 51 million in 1951 and 0 64 million in 1952

Fountain Pens Six major firms Production—3 million in 1949, 3 23 million in 1950, 4 million in 1951 and 3 8 million in 1952

Buttons Production in 1952 about 857,000 gross

Insulated Cables, Wires and Flexible Started in 1950 Annual capacity 8 6 million yards Production—2 814 million yards in 1950, 3 475 million yards in 1951 and about 4 million yards in 1952

Leather Cloth Capacity 5 28 million yards Production in million yards—0 204 in 1948, 0 76 in 1949, 0 93 in 1950, 2 04 in 1951 and 0 95 in 1952

Phenolic Resin Laminate First plant in 1952 Production 40 tons in 1952

RAW MATERIALS

The consuming capacity of the industry in respect of raw materials is about 3,000 tons of Thermosetting moulding powders and about 6,000 tons of Thermoplastic moulding powders Most of the raw materials are imported Imports of raw materials were stepped up from Rs 20 58 lakhs in 1948 49 to Rs 256 lakhs in 1951 52 composed of Rs 158 lakhs of synthetic resin and moulding powder and Rs 98 lakhs worth of semi fabricated plastic raw materials Phenol formaldehyde moulding powder, phenol and formaldehyde and alkyd resin are, however, manufactured in the country out of imported basic materials

The consumption of plastic goods in India has increased five fold since 1948 and practically the whole of it is met from indigenous production The country is now an exporter of plastic goods at an average monthly value of Rs one lakh Imported moulds are expensive and a central tool room for the design and production of moulds is contemplated The present demand for P V C sheets (without textile base) is estimated at 400 tons There is, therefore, a big scope for its manufacture Polythene film and dentures also have a big potential market The application of cellulose plastics, nitrate and acetate is the basis for industries such as acetate rayon and photographic film The demand for phenolic resin used by the surface coating industry is about 500 tons a year In view of the possibility of urea becoming available in the country, the manufacture of urea plastics has a great scope Since benzine and ethylene, the basic materials for polystyrene, are indigenous this branch of manufacture can be profitably explored Industrial nitrocellulose is produced in an ordnance factory This can form the basis for producing sheets rods and tubes required by the spectacle frame and fountain pen industries Lack of technical personnel is the industry's main handicap The U N T A A has, therefore lent the services of a plastics moulding expert to India Steps are being taken by the Indian Standards Institution to formulate suitable standards for the P F moulding powder

PROTECTION

The Tariff Commission recommended in 1950 that protection should be extended to the industry till March 1953 The period was further extended to December 1953 to enable the Tariff Commission to review the position

The Commission's main recommendations were the following —

(1) In the absence of a fully-developed chemical industry supplying the basic raw materials for the moulding powder section of the industry and in order to reduce the cost of production of moulding powder, the manufacturers of such powder should be allowed a refund of the whole of the duties payable on the principal raw materials used in the manufacture of powder This should be available to those who produce at least 200 tons of phenol-formaldehyde moulding powder per annum

(2) The existing revenue duty of 30 per cent *ad valorem* on moulding powder should be converted into an equivalent protective duty which should be kept in force till March 31, 1953

(3) Imports of phenol formaldehyde moulding powder should be permitted only to the extent of the gap between the domestic demand and production

(4) In view of the need to expand the domestic market for plastic goods, assistance to the industry should be given in other ways than by an increase in the import duty

(5) The section of the industry manufacturing plastic goods such as soap boxes and spectacle frames should be helped by granting a reduction in import duty on such raw materials as are not manufactured in the country from 30 per cent to 20 per cent, both *ad valorem* The rate of duty on raw celluloid should also be 20 per cent *ad valorem*

(6) In respect of electrical accessories, the existing revenue duty should be converted into a protective duty to remain in force till March 31, 1953 and the present preferential rate of 24 per cent on imports from the United Kingdom should be raised to 30 per cent and the standard rate adjusted in accordance with the terms of the Indo British Trade Agreement

(7) In regard to spectacle frames the existing revenue duty of 20 per cent should continue

(8) Early steps should be taken to set up a central moulding powder factory in order to co ordinate the production of the existing units and others to be established and to ensure economical production

(9) In view of the necessity for standardisation of plastic ware and rationalisation of its production the scheme for having a central mould-making shop should receive early and favourable consideration of Government

(10) Indian manufacturers of plastics should keep abreast of technical developments in other countries

(11) Early steps should be taken by the industry for the formulation of proper standards for moulding powder and finished articles

(12) The existing revenue duty of 30 per cent *ad valorem* on phenol formaldehyde moulding powder should be converted into a protective duty

(13) The duties of 25 per cent standard on phenol and of 30 per cent standard and 20 per cent preferential, both on formaldehyde and hexamine, these three being the principal raw materials used in the manufacture of phenol formaldehyde powder, should be refunded on import to the manufacturers of moulding powder, who have a minimum annual production of 200 tons

The Government of India issued orders on January 7, 1950 on the Board's recommendations In regard to the main recommendation of the Board suggesting a reduction in the import duties on raw materials used by the industry in producing plastic goods like soap boxes, Government came to the conclusion that "the requirements of the case would be adequately met by a reduction of duty from 30 per cent *ad valorem* to 20 per cent *ad valorem* in respect of only cellulose nitrate (sheets rods and tubes), rennet casein and polyvinyl chloride resin" This meant that raw materials like urea formaldehyde moulding powder, polystyrene, cellulose acetate, cellulose and butyrate would continue to be subjected to 30 per cent duties

*

RAYON INDUSTRY

WORLD'S first rayon factory capable of producing about a hundred pounds of rayon a day was erected in France in the year 1884 Today the world production of rayon, inclusive of staple fibre has risen to the staggering amount of over 3,000 million pounds

It is estimated that in 1951 there were 25,980 mill looms in 476 mills, and 181 278 handlooms engaged in the manufacture of art silk fabrics in India and the industry's needs of filament yarn which till recently had to be imported entirely, were placed at 70 million lbs

The rayon industry is a post war industry There are at present two plants in operation, *viz*, Travancore Rayons Ltd, Perambavoor, and the National Rayon Corporation Ltd, Kalyan, Bombay, with an annual production capacity of 4 million lbs and 5 6 million lbs respectively of filament yarn

The former came into production in July 1950 and the latter in February 1951 Both the factories have adopted the viscose process

Sirsilk Ltd has under construction a factory at Sirpur in Hyderabad State It was expected to be ready in the latter half of 1953 and will have a daily production capacity of 5 tons based on the cellulose acetate process

A fourth factory has been planned for producing 15 tons of viscose staple fibre daily at Nagda in Madhya Bharat by the Gwalior Rayon Silk Manufacturing (Weaving) Co, Ltd

The units operating the viscose process produce also carbon disulphide and sulphuric acid in the factory with the exception of Travancore Rayons Ltd which purchase them from FACT Ltd Sirsilk Ltd has facilities for producing acetic acid, acetic anhydride and acetone to meet its needs

The annual rated capacity of the rayon industry based on a continuous operation for 360 working days is given below —

	Filament yarn (m lbs)	Staple fibre (bales)	Art Silk cloth (m yards)
1 Travancore Rayons, Alwaye	4 0		
2 National Rayon Bombay	5 6		
3 Sirsilk Ltd Hyderabad	4 0		18 0
4 Gwalior Rayon, Nagda		28 000	

The actual production in million lbs of the two factories in operation was as follows — 1950-0 27 1951-4 5, 1952 (Jan-June) —3 2

The capital employed in the two firms already in production in March 1951 was Rs 7 1 crores while the labour employed was 1 400

IMPORTS AND EXPORTS

Imports consist of staple fibre, rayon yarn, yarn of rayon staple fibre and rayon piece-goods and were as follows —

(Quantity in million lbs and value in lakhs of Rupees)

Year	Yarn		Piece goods		Staple fibre (cut fibre and waste)		Staple fibre yarn		Total including other goods mixed
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Value
		Rs		Rs		Rs		Rs	Rs
1948-49	39 9	12 83	4 0	103 6	0 05	0 06	0 75	20 0	1412 6
1949-50	56 9	10 46	14 3	314 8	0 45	6 5	2 76	77 6	1548 9
1950-51	35 3	14 71	1 8	41 7	12 6	189 9	1 25	30 9	1739 4
1951-52	36 5	17 29	3 0	82 4	56 5	1010 1	3 73	117 0	2953 8

Exports of artificial silk piece goods are mainly for Pakistan Ceylon and Anglo Egyptian Sudan The sea borne exports are detailed below —

	M yards	Rs in lakhs
1948-49	24 50	519 1
1949-50	12 28	148 7
1950-51	6 99	95 8
1951-52	8 41	117 0

The report of the Indian Tariff Board on the continuance of *protection to the artificial silk and cotton and artificial mixed fabrics industry* in 1951 placed the productive capacity of the weaving industry at 350 million yards per annum and computed the need for art silk yarn at 70 to 75 million lbs With the completion of the plant belonging to Sirsilk Ltd, the weaving capacity would be further raised by 15 million yards

The domestic consumption of artificial silk goods has, however, remained practically unchanged over a period at 210 million yards but there has been an increase in the imports of filament yarn at the expense of finished goods

FIVE-YEAR PLAN

The National Rayon Corporation contemplates expansion of its plant so as to increase its capacity to 7 million lbs per annum by the end of 1953 and to 14 million lbs by 1955 56, involving a capital investment of Rs 50 lakhs and Rs 500 lakhs respectively Consequently, the rated capacity of the rayon filament industry would be stepped up to 22 million lbs by 1955 56 out of which 4 million lbs would be consumed by the Sirsilk Ltd in weaving rayon fabric so that 18 million lbs would be available for the rayon fabric industry In addition, rayon staple equivalent to 11 2 million lbs would be available from within the country The total additional capital expenditure for achieving these developments has been estimated at Rs 10½ crores

The soft timber resources from the Himalayan region can be utilised for producing 100 tons of pulp per day in order to reduce the dependence on imported rayon grade pulp by 11,500 tons a year The capital needs are placed at Rs 6 crores and the project might be taken up in the second part of the Five-Year Plan The Commission has also recommended the establishment of a few plants for producing at least five million lbs of cotton linters preferably in Madras, Hyderabad and Madhya Pradesh For this purpose, a capital of Rs 60 lakhs would be needed In view of the fact that the existing capacity of the rayon weaving industry is enough to meet the domestic needs and export orders, expansion in this direction is considered unnecessary

*

RUBBER INDUSTRY

INDIA produces about 18,000 tons of raw rubber constituting a little over one per cent of the world output Of an area of about 170,000 acres under rubber cultivation, nearly 75 per cent is located in the State of Travancore Cochin Other rubber growing areas are the districts of Malabar, Coimbatore, Salem, Nilgiris, Madura and South Canara in the Madras State and Coorg Cultivation on a small scale exists in Mysore and Assam

There are about 250 estates owning over 100 acres each and comprising an area of nearly 103,000 acres Small holdings below 100 acres in size number about 14,000 with a total area of 67,000 acres The following are the details —

Year	Production (Tons)	Tapable Acreage	Average yield per acre in Lbs
1948	15,422	118 811	291
1949	15,587	125,791	282
1950	15 599	137 888	253
1951	17,148	148 739	258
1952	19 863	170,000	N A

The year 1952-53 was notable for a slump in the world rubber trade with London price falling by more than half In this country the price of indigenous raw rubber was revised in October 1952 on the recommendation of the Tariff Commission from Rs 122 8-0 to Rs 138 for grade I rubber per 100 lbs with suitable differentials for other grades But the increase in production followed by a fall in consumption resulted in the accumulation of stocks

Compared to 17,118 tons of raw rubber produced in 1951, production went up to 19 863 tons in 1952 whereas consumption fell from 22,427 tons to 21,061 tons On the other hand, the industry had on hand 5 800 tons from the 1951 stock The Government, therefore, removed in December 1952 the control over the movement of raw rubber imposed in 1950

RUBBER GOODS

During the past three years, the manufacturing side of the industry has made a considerable progress with the result that the output of indigenous raw rubber can be readily absorbed

The progress of the manufacturing industry is given below

Product	1950	1951	1952
Footwear (Lakh pairs)	165 6	230 4	228 0
Toys, Baloons etc (Lakh Doz)	105 6	110 4	138 0
Tyres (thousand)			
Automobile (No)	638 4	870 4	721 2
Cycle (No)	3,325 2	3,942 8	4,189 2
Cab (ft)		373 2	385 2
Tubes			
Automobile (000)	698 4	820 8	661 2
Cycle (000)	4 207 2	4 897 2	4,166 4
Hoses			
Radiator (000)	206 4	220 8	154 8
Vacuum Brake (000)	333 6	472 8	444 0
Other Types (000 ft)	2,820 0	3,474 0	3,555 6
Fan Belt	961 2	748 8	1,216 8
Ebonite		199 6	126 0
Waterproof (000 yds)		1,576 8	1,294 8
Latex foam sponge (000 lbs)		471 6	639 6

*

SERICULTURE

SERICULTURE is carried on mainly as subsidiary to Agriculture The country s total production is placed at about 30 lakh lbs The total area under mulberry is about 80,000 acres at present Mulberry is cultivated both as rain fed and irrigated crop The yield of leaf per acre per year from rain-fed garden is about 4,000 lbs Average yield from tank irrigated gardens per acre per year is about 8 000 lbs whereas in the case of deep well irrigated gardens it is 10,000 lbs

The total production of cocoons per year is about 240 lakh lbs and the raw silk produced may be put at 15 lakh lbs Based on the area under mulberry, the total requirement of disease free layings is estimated to be about 600 lakhs of layings per annum

The main producing areas are Mysore and Madras, whose production is placed at 15 lakh lbs and 3 lakh pounds respectively

In Mysore there are about 51,000 rearing families, who practise sericulture as a subsidiary industry

After the Government Organisation was set up the Central Farm at Channapatna began to produce small quantities of disease free layings on Pasteur System and to educate ryots to use the same To supplement the work of the grainages which produce only disease free seed by a controlled campaign of seed cocoon production there are now 4 000 selected seed cocoon rearers to produce My ore seed cocoons, capable of producing about 4 000 lakhs of seed cocoons, *i e*, the entire requirements of the industry for seed cocoons in Mysore and Madras About 96 per cent of the cocoons produced in the State are used for reeling and only 4 per cent for seed purposes

Sericultural education in Mysore is given in a practical manner in the Government Silk Farms, such as Channapatna, Mysore, Kolar, Mugur and Sidlaghatta

The total area under mulberry in Madras State is about 22 000 acres In black cotton soils, the annual yield of mulberry leaf is about 4,000 lbs per acre and in read loam or sandy soils, the yield is about 3,500 lbs Under the present organisation and with the existing acreage under mulberry cultivation, the productive capacity of reeling cocoons and silk will be 15 lakh lbs of cocoons and about 3 lakh lbs of raw silk of both filature and charka grades In the Kollegal area the raw material is worked by handlooms

The sericultural industry was started in Uttar Pradesh in September 1948 The silkworm races reared are univoltine and multivoltine Bengal, Mysore and Kashmir races of mulberry and Eri silkworms About two dozen families have taken it up The industry is practised as subsidiary to agriculture The estimated annual production of Eri is 3 mds dry weight and that of mulberry 2 mds 2 srs dry weight As the industry has recently been started the department of industries provides rearers with rearing appliances on a returnable basis The cocoons are purchased by the Government farm till they instal their own reeling equipment

In Bombay roughly 700 acres are under silk worm food The estimated annual production of cocoons is around 30,000 The estimated annual production of raw silk is around 1,500 lbs There are 11,339 looms in weaving pure silk goods only, and 25 498 looms for mixed goods

There is one Government silk farm in Belgaum District in addition to five Government model silk farms in Belgaum and Dharwar districts

Bengal s silk industry is said to have been carried on from time immemorial The production of raw silk is about 4 lakh lbs The area under mulberry is 16,000 acres The estimated actual annual production of cocoons and raw silk are cocoons (6,785,513 lbs) and raw silk (407,644 lbs)

About 1,500 persons spread over in about 435 villages conduct rearing and reeling operations in the Punjab The silk industry in the Punjab has come to be considered as one of the best subsidiary industries It gives a part time occupation to about 95 per cent of rearers The remaining 5 per cent take up reeling on commercial lines There are about 75 000 mulberry trees available in the Punjab for the purpose of silkworm rearing Apart from this the Department maintains its own mulberry farms and nurseries and the total area of land under these plantations at present is about 75 acres

The estimated total annual production of cocoons and raw silk is 650 mds and 130 mds respectively

BIHAR AND KASHMIR

In Bihar about 50 000 people are engaged in tassar silkworm rearing, about 200 people in rearing mulberry silkworm and about 2 000 people in rearing Eri silk worm The estimated total annual production is nearly 50,000 kahan of tassar cocoon, one lakh lbs of raw reeled tassar and 60 000 lbs of tassar waste per annum Forty five thousand lbs of cocoon mulberry and 3,000 lbs of raw charka reeled silk are produced Besides 60 000 lbs of pierced cocoon and 21 000 lbs of handspun Eri yarn are produced all over the State

Bihar has got a very old silk weaving industry and Bhagalpur is the centre of silk weaving There are about 10,000 handloom weavers engaged in weaving silk goods About 20 per cent of the local silk and the rest foreign silk are used by the weavers

The total annual production of reeled silk and waste silk in Madhya Pradesh is estimated to be 160,000 lbs and 150 000 lbs respectively There are about 1,500 handlooms, weaving tassar and mixed fabrics

Orissa accounts for an annual production of 300 mds of tassar and 60 mds of Eri cocoons

In Himachal Pradesh sericulture is practised only in Mandi district

The Government of Assam started the sericulture and weaving department in 1948 49 and despite the prejudice against the rearing of mulberry silk worms, production has doubled in the past decade and now amounts to 22 000 lbs The output of Eri and muga is estimated at 420,000 lbs and 100,000 lbs respectively

Silkworm rearing is practised by the rearers in Kashmir as an auxiliary occupation next to agriculture

The industry depends only on full grown mulberry trees The annual production of cocoons and raw silk is estimated at cocoons (32,000 mds), superior silk (162,500 lbs)

It may be added here that the silk industry in Kashmir is being run on Government monopoly basis There are about 350 local factories with about 1,000 handlooms

TARIFF COMMISSION

Early in 1952 the Tariff Commission submitted its report on the Sericulture Industry to the Government of India The following were the more important recommendations of the Tariff Board —

(*i*) An *ad valorem* duty of 30 per cent and a specific duty of Rs 3 14 0 per lb should be levied on raw silk tariff item 46, (*ii*) The existing duty of 30 per cent *ad valorem* on silk waste and noils, tariff item 46(1), should be continued (*iii*) The same rate of duty should be levied on silk yarn includign thrown silk warps but excluding sewing thread, tariff item 47 (a), as on raw silk namely, 30 per cent *ad valorem* plus a specific duty of Rs 3 14 0 per lb , (*iv*) An *ad valorem* duty of 30 per cent and a specific duty of Rs 5 per lb should be levied on yarn spun from silk waste, excluding sewing thread tariff item 47 (b), (*v*) The existing duty of 30 per cent *ad valorem* should be continued on yarn spun from noils, excluding sewing thread tariff item 47 (c) (*vi*) The existing duty of 30 per cent *ad valorem* should be continued on silk sewing thread, tariff item 47 (1), (*vii*) An *ad valorem* duty of 35 per cent should be levied on pongee tariff item 48 (a), (*viii*) An *ad valorem* duty of 40 per cent should be levied on fuji bosaki and corded (excluding white cord), tariff item 48 (b) (*ix*) An *ad valorem* duty of 35 per cent, should be levied on other silk fabrics covered by tariff item 48 (c), (*x*) The industry should continue to be protected upto December 31, 1952 for the present, (*xi*) Imports of silkworm seeds should be allowed free of duty (*xii*) The quantum of imports, if import prices fall, should be so adjusted as to meet the gap between estimated demand and domestic production , (*xiii*) While the Board s estimate of the fair selling price of raw silk should remain valid during the extended period of protection, the position regarding the *c i f* prices of imported silk should be reviewed by the end of June, 1952

The Government of India accepted recommendations No (*i*) to (*vi*), (*x*), (*xi*) and (*xiii*) As regards the Board's recommendations No (*vii*) to (*ix*), Government came to the decision that the existing duties should continue

*

SHIPPING INDUSTRY

AFTER the end of the Second World War, the Planning Department of the Government of India appointed a Policy Committee on Shipping It observed India possesses a distressingly small number of deep sea ships which at the outbreak of the war stood at no more than 30 with a total of less than 150 000 tons gross The rectification of this state of affairs should be one of the immediate post war objectives"

This was followed by the constitution of a Reconstruction Policy Sub Committee, with Sir C P Ramaswami Aiyar as Chairman, in 1945 This Sub Committee submitted its report in March 1947 which was approved by the Policy Committee Its principal recommendations were —

(1) India needs two million gross tons of shipping to carry more than 10 million tons of cargo and about three million passengers a year The figure does not include country craft

(2) Hundred per cent of the purely coastal trade of India, 75 per cent of India's trade with Burma and Ceylon and with geographically adjacent countries 50 per cent of India's distant trades and 30 per cent of the trades formerly carried in Axis vessels in the Orient should be secured for Indian shipping in the next five to seven years

(3) As the Indian shipping industry is still very young, emphasis should now be placed on how Indian companies can expand their fleets and the Indian Shipping Board should be empowered to control deferred rebates, rate cutting and all other evils arising from monopolies

The Government of India, by their Resolution dated July 12, 1947, fully endorsed the views of the Committee They agreed that the definition of 'Indian Shipping should be shipping owned controlled and managed by Indian nationals They also laid down that the following conditions should qualify any shipping company for treatment as "Indian shipping companies' —

(*a*) The steamers of the companies should be registered at a port or ports in British India (*b*) At least 75 per cent of the shares and debentures of the companies should be held by Indians in their own rights (*c*) All the directors should be Indian (*d*) The managing agents, if any, should be Indian

PRESENT POSITION

The subsequent developments may be summarised as follows —

(1) Plans for setting up three corporations, each with an authorised capital of Rs 10 crores were announced in November 1947 The first Government-sponsored shipping corporation (The Eastern Shipping Corporation) was registered on March 24, 1950

(2) Indian shipping companies participated in overseas trade for the first time in 1948 Two of them are members of the India-U K - Continent Conference Lines and are entitled to operate 12 ships each The position will be reviewed again at the end of 1954

(3) The coastal trade of the country was reserved in 1950 for Indian vessels in response to a public demand which had been made for the past 25 years With effect from January 1, 1951, a new Indian Coastal Conference, consisting primarily of Indian shipping companies commenced functioning and the two British shipping companies became associated members

The more recent progress of Indian shipping is given in the following table —

Year	No of companies	No of ships	Tonnage (G R T)
1939	9	53	126,709
1946	11	42	98,286
1947	14	60	189,226
1948	15	72	249,261
1949	20	84	332,190
1950	23	90	364 632
1951	23	92	366 646
1952	26	100	383,911
1953 (Jan 1)	25	111	422,734

The Shipping Policy Committee fixed in 1947 a target of two million tons to be attained by 1954 Ten of the 25 companies own only one vessel each Seven of them own a vessel each under 1,000 G R T, while three own a vessel each varying from 1,069 to 1,602 G R T Four others own two vessels each under 2,000 tons Thus 14 out of 25 companies own only 18 vessels with an aggregate tonnage of 12,958 G R T

Eight ferry steamers with an aggregate G R T of 5,284 are engaged in the carriage of passengers on the Konkan Coast and carry approximately a million and a half passengers per year

Twenty three steamers owned by 11 companies with an aggregate G R T of 34,957 run between the Kandla and the Tuticorin Range On an average they carry about six lakh tons of cargo every year on the West Coast of India

Forty four vessels of 206,005 G R T owned by 10 shipping companies participate in the wider coastal trade of India

Three companies owning 23 ships with an aggregate G R T of 168 669 maintain their services in the overseas trades of the country

Planning —Taking into account the financial resources available, a programme of development is formulated which aims at raising the total gross registered tonnage to about 600,000 by the end of the period of the Plan In order to assist the shipping companies in replacing obsolete tonnage operating on the coast, Government has provided funds for constructing ships at Vishakapatnam a total of 100 000 G R T is expected to become available from this shipyard during the period of the Plan These ships will be sold to the shipping companies at reasonable prices

In order to make coastal reservation effective the tonnage required is estimated at 300,000 G R T This also covers the needs of near trades, *e g* India Pakistan, India Burma, and India Ceylon A provision of Rs 4 crores as loans to the shipping companies has been made in the Plan The minimum requirements of additional shipping for overseas trade has been placed at about 100 000 d w t excluding 60,000 d w t required by the Eastern Shipping Corporation for which a sum of Rs 4 4 crores to cover Government's contribution has been provided The additional tonnage for overseas trade will be acquired from the Government loan of Rs 6 5 crores and supplemented by Rs 2 2 crores to be advanced by the shipping companies

According to the Sailing Vessels Committee's Report published in 1949, sailing vessels continue to carry a substantial volume of cargo It is estimated that 150,000 tons of shipping under sail consisting of about 2 000 vessels carry about a million to a million and a half tons of cargo every year These vessels employ about 40,000 men, 2,500 masters 2,500 mates and about 35 000 seamen Taking the average cost of these vessels at Rs 250 a ton, the capital outlay is computed at Rs 4 crores

SHIP-BUILDING

The credit for building the first modern shipbuilding yard goes to the Scindia Steam Navigation Co , Ltd This was founded at Vishakapatnam in 1941 , the company completed two berths in 1947 The first steamer built in this yard was launched on March 14, 1948 by Mr Nehru A third berth of the same capacity (building of ships ranging from 320 to 550 ft in length and from about 5,500 tons to about 15,000 tons dead weight capacity) was ready in 1953 The yard is equipped with a fitting out wharf 1,200 ft long, which will be capable of fitting out six ships of large size and 3 medium sized ships in one year On the engineering side, the hull and structural shop has a fabricating capacity of 8 000 tons of steel per year

On January 21, 1952 Hindusthan Shipyard Ltd was registered to take over this yard The Government of India holds 4 two thirds interest in the Company and Scindias one third The valuation of the shipyard has been provisionally agreed at Rs 270 lakhs which will be paid by the issue of fully paid shares of the new company for Rs 103 lakhs and the balance in five equal annual instalments The aggregate initial capital of the company will be Rs 309 9 lakhs

After the transfer of the ship yard to the new company a five year plan for its development was formulated which was estimated to cost Rs 1 92 crores between 1952 53 and 1956 57 Out of this, Rs 11 77 crores are envisaged to be spent during the four years ending 1955 56 With a view to obtaining the necessary technical assistance an agreement has been made with a French firm for 5 years This provides for advice in setting up a fully equipped designing and estimating office, organisation development and management of the shipyard and the building of ships as well as help in procuring supplies from France and training Indians in France In return, the firm will receive 4 per cent commission on the annual turnover of the yard

The annual break up of the expenditure is visualized as under —

(Rupees in lakhs)

Year	Acquisition of yard	Development of yard	Loans against ships built at yard	Subsidy	Total
1951 52	39 6	10 0	182	—	231 6
1952-53	40 0	100 0	100	42	282 0
1953 54	40 0	110 0	50	60	260 0
1954 55	40 0	110 0	50	60	260 0
1955 56	40 0	145 0	120	70	375 0
1956-57	7 0	150 0	180	70	407 0
	206 6	625 0	682	302	1815 6

Under the Cabinet reorganisation scheme, shipping became the sole concern of the Transport Ministry early in 1951 While matters of policy are dealt with in the Ministry, the newly created office of the Director General of Shipping serves as an executive office, as distinct from the Secretary, for the co ordinated implementation of policy The office of the Controller of Indian Shipping, the Mercantile Marine Department and the Lighthouse Department have come under his administrative control

The administration of the Merchant Shipping Acts and Rules made thereunder, at the ports is undertaken by the Principal Officers, Mercantile Marine Department at the principal ports The Assistant Director of Seamen s Welfare and his officers carry out the planning and execution of schemes and projects for seamen s welfare, scrutiny of the schemes and projects recommended by the Welfare Committees at the ports and administration of the Merchant Seamen s Welfare Amenities Fund

STEEL INDUSTRY

THE first successful and the most outstanding attempt to manufacture steel in the country on a commercial basis was that of the Tata Iron & Steel Co which started its Steel Works at Sakchi in the year 1908 Pig iron was made in 1911 and the first steel ingot a year later

The Indian Iron & Steel Company was started in 1918 at Hirapur about 4 miles from Asansol junction on the Eastern Railway for producing pig iron Eighteen years later it floated another company the Steel Corporation of Bengal to manufacture steel Towards the end of 1952 the two companies were merged

An iron works was started at Bhadravati in Mysore State in 1921 to which a steel plant was added in 1934 During World War II, a 25 ton basic furnace together with two small electric furnaces were installed

The combined capacity of these works is 1 878 000 tons of pig iron and 1,050,000 tons of finished steel

The total capital investment is about Rs 61 crores and the number of workers employed about 60,000

The recent trend of production is given below —

(000 tons)

Year	Pig iron	Steel ingots	Semi-finished steel	Finished steel
1947	1,320	1,256	1,027	893
1948	1,405	1,256	1,012	857
1949	1,528	1,302	1,105	930
1950	1,562	1 438	1,142	1,004
1951	1,709	1,500	1 249	1,076
1952	1,685	1,578	1,308	1,103

Since 1924 there have been three main tariff enquiries into the case of the iron and steel industry—in 1924, 1926 and 1934 In between there were three supplementary enquiries and five special enquiries for the subsidiary industries in India The scheme of protection sanctioned as a result of the tariff enquiry held in 1934 was to remain in force for seven years till 31st March 1941 Before, however, this protection expired, World War II intervened, and the protective duties on imported steel were continued from time to time by continuation Acts, the last extension being for a period of one year till 31st March 1947

Since the war in 1939 the price and distribution of steel have been controlled by the Government though a certain degree of relaxation was introduced in 1952 Even during that year the estimated demand was approximately 2 4 million tons, while the available supply totalled 1,097,000 tons The demands of the Defence Services and the Railways were met in full The selling prices of steel were raised twice in 1952, once by Rs 50 on July 1, 1952, and again, by another Rs 50 on September 22 1952

RAW MATERIALS

The important raw materials are iron ore, coking coal, manganese ore, refractories made from magnesite, dolomite, chromite, fireclay, etc and fluxing materials like silica, limestone and fluor-spar Sulphur is also required for the manufacture of sulphuric acid

In regard to most of these raw materials, India enjoys a favourable position The deposits of iron ore are plentiful and of a superior quality the average iron content of the ore being as much as 69 per cent as compared with 40 per cent in Europe and 50 per cent in the U S This is also true of manganese ore magnesite and dolomite Known deposits of coking coal are estimated at between 1 500 and 2,000 million tons

The principal raw materials brought from abroad are spelter for galvanising tin for tin plates ferro tungsten nickel chromium and fluor-spar Deposits of fluor spar are located in Madhya Pradesh but they are yet to be exploited

As raw materials account for nearly 80 per cent of the cost of pig iron and 60 per cent of the cost of finished steel, they provide the explanation for the low cost of steel produced in India

RE-ROLLING MILLS

The re-rolling mills manufacture a variety of products from blooms and billets In the initial stage the revenue duty on imported billets was removed to encourage the industry and by 1939 there were 32 re rolling mills with a productive capacity of 140 000 tons Towards the end of 1942 when control over distribution of scrap and billets was introduced out of the 130 mills then existing only 75 came within its purview Later several mills were compulsorily closed under Government orders

There are at present 23 registered re rollers of which five are manufacturers of special products such as tin plates, wire and wire products, fish plates and spikes, bars and rods, bolts and nuts, rivets, spring steel, hoops and strips and are called "secondary producers In addition, there are 71 re-rollers who are not registered

The productive capacity on the basis of three shifts is 220 000 tons in respect of secondary producers, 292,000 tons in regard to registered re rollers and 219 000 tons in unregistered factories The actual production was, however, very much below the capacity

In 1933 34 the Tariff Board stated that the re rolling mills had a place in the iron and steel industry in India The subsequent inquiries have revealed that a large proportion of the mills are inefficient and uneconomic in addition to such handicaps as the acute shortage of raw materials

FIVE-YEAR PLAN

The Planning Commission has estimated that the demand for steel will rise from 2 34 million tons in 1952 to 2 8 million tons by 1957, while that for foundry pig iron will be stepped up by 100,000 tons to 700,000 tons

The main difficulty in stepping up the output is finance For assisting development, the Government has agreed to loan Rs 5 crores to the Indian Iron and Steel Company and has also raised the retention prices of steel Though the production of pig iron has been rising, the portion available for sale has fallen from 356,398 tons in 1948 to 287,209 tons in 1951 and much of it is off grade quality

At the beginning of the Plan the following programmes of expansion were under execution —

(1) The Mysore Works have taken up certain schemes for execution in the post war period These cover expansion of cement production and direct recovery of acetic acid from pyro lingneous liquor erection of two electric pig iron furnaces each capable of producing 100 110 tons of pig iron per day and modernisation of iron ore mines and extension of forest tramways to ensure an adequate supply of wood fuel and mineral raw materials By April 1, 1951 it had spent Rs 2 16 crores and the Government may have to lend Rs 2 82 crores during the period of the Plan for financing the installation of 3 electric pig iron furnaces electric Duplex plant, billet and light structural mills and acetic acid plant and extension and improvement of cement plant, ore mines and tramways and shop foundry, etc The implementation of this programme is expected to raise the production of finished steel from 40,000 tons to 100,000 tons

(2) The Steel Corporation of Bengal and the Indian Iron Company have between them projects under execution to increase the installed capacity for finished steel to 345,000 tons by 1953 54

They have also formulated additional proposals to enable them to produce another 350,000 tons of finished steel and 400,000 tons of foundry iron at a cost of Rs 31 7 crores spread over 1953 57

(3) The Tata Iron and Steel Company have formulated a programme of expansion and modernisation of their works at a total cost of about Rs 22 71 crores apart from normal capital expenditure for replacement and maintenance which is estimated to cost additional Rs 10 21 crores Their plan envisages the raising of the capacity for finished steel to 931,000 tons by 1957

The above schemes are expected to produce the following results —

	Unit	1950 51	1957 58
Rated capacity of finished steel	Tons 000	1,015	1,650
Production—			
Pig iron (for foundries)	,,	350	750
Finished steel	,,	976	1,650

The Plan stipulates that the future expansion of the industry should provide for the production of an additional 150,000 tons to 200,000 tons of billets for the re rolling industry The expansion will also call for the creation of certain additional transport facilities involving an outlay of about Rs 10 to Rs 12 crores

The Planning Commission is of the view that in spite of the expansion contemplated, there will be a short fall of a million tons of steel and has, therefore, urged the establishment of a new iron and steel plant through collaboration between the State and an experienced Indian concern The total expenditure on this during the period of the Plan will be about Rs 25 crores and negotiations for participation by foreign concerns and the World Bank have been advocated

*

SUGAR INDUSTRY

THE sugar industry is the second largest industry in India next only to the cotton textile industry, with a capital of about Rs 60 crores of which about Rs 20 crores is fixed capital and Rs 40 crores working capital

It has a considerable influence on the agricultural economy in so far as it brings additional remuneration to those who take to the cultivation of sugarcane

The economy of Uttar Pradesh and Bihar is particularly tied with the development of this industry since three fourths of the sugar production is in these two States

The industry also produces a variety of raw materials for other industries such as power alcohol paper paper board and straw board

The labour employed in sugar factories is roughly 135 000 skilled and unskilled workers

The growth of the industry is attributable to the protection given to it in 1932 for a period of 14 years The import duty in pre war years was as much as Rs 9 4 per cwt of which Rs 2 represented the quantum of the excise duty on indigenous production Protection was continued till 1950 but it was of an academic interest since imports were negligible since 1937

In 1931 32 there were only 32 sugar factories in the country but by 1952 the number of factories producing white sugar rose to 160 Seven of these came into existence in the post war period In addition, there were two more under construction

The industry has so far developed in the private sector the only exception being some of the former Indian States in which the State Governments substantially contributed to its development by financial participation and in other ways.

The year 1952 was notable for another innovation inasmuch as the first factory was built by cane producers on a co operative basis in the Ahmednagar District in Bombay State

On the basis of an average operating season of 120 working days and assuming a recovery of 10 per cent sugar the rated capacity of the 160 factories is estimated to be over 1 5 million tons of sugar per annum The industry in Uttar Pradesh and Bihar alone has a capacity to produce 1 15 million tons

The State wise distribution of the factories is given below —

VACUUM PAN FACTORIES IN 1952-53

	Number	Daily cane crushing capacity, in tons
West Bengal	4	1 925
Bihar	30	27 865
Uttar Pradesh	72	67 484
Punjab	1	100
Orissa	2	350
Madras	16	8 942
Bombay	15	9 225
Part C States	2	1,100
Kashmir	1	600
PEPSU	2	2,650
Mysore	1	1,400
Madhya Bharat	6	3 200
Rajasthan	2	1 100
Hyderabad	3	1 550
Saurashtra	1	350
Travancore Cochin	1	500
Vindhya Pradesh	1	100
Total	160	128 741

The size of the factories operating in the country varies widely from 50 tons to over 2 000 tons of cane crushing capacity per day It is generally accepted that factories with a minimum cane crushing capacity of 800 tons per day should be considered as economic units On this basis only half the number can be considered economic

RAW MATERIALS

The principal raw material is sugarcane Its consumption in 1949 50 was about 10 million tons for a production of 975 00 tons of sugar Approximately 20 to 25 per cent of cane is consumed by sugar factories

Other important raw materials for producing 9 75 000 tons of sugar in 1949 50 were Lime stone 85 000 tons sulphur 5 400 tons coal 100 000 tons coke 9 500 tons and firewood 5,700 000 tons

About 90 per cent of the acreage under cane is now under improved varieties, but the yield per acre has not improved materially and this accounts for the high cost of sugar

The following tables gives the details —

Year	Acre under sugar cane (000 acres)	Gross output of raw sugar (000 Tons)
1948 49	3,624	4 869
1949 50	4 138	4 938
1950 51	4 314	5 616
1951 52	4,826	5 895

PRODUCTION

Price of sugar is not controlled now But there was control from 1942 to October 1952 except for a brief period in 1947 During this period the controlled price of sugar was linked with the minimum price for cane fixed for Uttar Pradesh and Bihar Besides the excise duty, the provincial cess was also levied Since 1948 the floor for cane prices has been and is being slowly lowered

Since gur was excluded from the orbit of control, the parity price for gur was always higher

The details of sugar production are given below —

Year Ended October	Installed capacity (Lakh Tons)	Sugar output (Lakh Tons)
1948	11 99	10 05
1949	11 99	10 01
1950	12 70	9 77
1951	12 70	11 15
1952	15 50	14 94

CONSUMPTION

The per capita consumption of sugar in the pre war period was 6 6 lbs During 1950 51, on the basis of a production of 1 1 million tons of sugar being consumed by a population of 355 million the per capita consumption worked out at about 7 lb In addition *gur* amounting to three times the quantity of sugar is also consumed in the country so that the total per capita consumption is not much behind that of other countries

On the basis of a population of 385 millions and of a production of 1 5 million tons of sugar in the country by utilising the entire rated capacity available the per capita consumption of sugar can be increased to 8 7 lbs by 1955 56

This quantity might be deemed sufficient under present economic conditions according to the Planning Commission In 1953 India had, however to import more than one lakh tons

The main problem is of cane supply The factories in Uttar Pradesh and Bihar are in a number of cases situated so near each other that there is competition between them for cane The industry has also been complaining of the prices fixed for cane Several factories have not enough covered storage facilities for molasses

The Five Year Plan for cane cultivation envisages an increased output equivalent to 703,000 tons of *gur* of which Utter Pradesh will account for 410 000 tons The additional production targets (in tons) for other States are Bombay 80 000, Madras 80 000 Punjab 70 000, Bihar 50,000 and other States 13,000

Another part of the development programme should consist of enabling some of the factories to shift to areas or States where a plentiful supply of cane is assured These and other remedial measures should enable the industry which has a productive capacity of over 1 5 million tons of sugar to produce by 1955 56 about 1 5 million tons as against 1 12 million tons in 1950 51

TEA INDUSTRY

TEA ranks after jute as the second largest item in India's export trade. It earns a foreign exchange of about Rs 94 crores and a revenue of about Rs 14 crores from excise and export duties. The State Governments also derive considerable revenue from the agricultural income tax on tea grown within their jurisdiction as well as from the sales tax on the commodity.

The indigenous plant growing in wild conditions was first discovered in Assam in 1820 and 15 years later the East India Company started an experimental garden which was sold to the Assam Company in 1840. In less than 100 years India has become the tea shop of the world.

On March 31, 1952 there were 6,241 gardens with a total area of 785,884 acres under tea. Of these over 580,000 acres were in Assam and West Bengal, while Madras, Mysore and Travancore-Cochin accounted for nearly 170,000 acres.

Tea is also grown on a limited scale in Bihar, U.P., Punjab (Kangra) and Tripura. The industry as a whole gives employment to a labour force of over a million.

With the cessation of bulk buying in April 1951 and the re-opening of London auctions, the tendency was for better types of teas to do well at the auctions.

By the end of 1951 the sellers' market was at an end and common teas, which were the worst to be affected, fetched only Rs 1-3 a lb. at the end of March 1952 as compared with Rs 1-14 a year before. Simultaneously production costs began to soar and in 1952 the extension of the Minimum Wages Act to the plantation industry prevented many gardens from covering their costs out of prices.

In May 1952 an official team inquired into the problems and recommended certain measures for temporary relief. These included deferred payment of excise duty, guaranteeing the banks of a portion of the loans to gardens, relaxation of provisions in the matter of advance payment of income tax and supply of more wagons. The labour also agreed to forego certain concessions. Thus a substantial cut in production costs was effected by the end of 1952.

By this time tea prices had again begun to look up but to make sure of the recovery the industry decided to effect a voluntary cut of 8 per cent in production and pay more attention to quality. The crisis had forced the closure of over 100 estates, but as a result of the above measures, the industry managed to turn the corner.

The cess levied on teas exported out of India has been fixed at Rs 2 per 100 lbs. since May 1950. This is the maximum rate leviable under the Central Tea Board Act. The excise duty on tea continues to remain at As. 3 a lb. but teas sold in bulk are subjected to a duty of an anna with effect from 1953-54.

For 1952-53, the export quota allotment was fixed at 452,720,021 lbs. being 130 per cent of India's standard export figure under the International Tea Agreement and equivalent to 86·5 per cent of the crop basis of estates.

The following table shows the growth of the industry since 1915 —

Year	Area under tea in thousands of acres	Production in millions of lb	Year	Area under tea in thousands of acres	Production in millions of lb
1915-19 (Average)	662	374	1938	840	447
1920-24 ,,	709	336	1939	841	463
1925	728	364	1940	840	471
1926	739	393	1941	840	500
1927	756	391	1942	841	570
1928	776	404	1943	843	552
1929	788	433	1944	842	507
1930	804	391	1945	841	528
1931	807	394	1946	841	590
1932	840	434	1947	842	600
1933	841	384	1948*	773	561¼
1934	841	395	1949	772·5	577¾
1935	841	389	1950	777	606
1936	842	390	1951	—	624¾
1937	842	423	1952	—	620

* From now on figures are for India only.

The following table shows production by areas (In million lb.)

Year	Northern India: Assam	Darjeeling	Doars and Terai	Cachar	Other Places	Northern India (Total)	South India	Total
1948	271	16¾	130¼	42⅛	¼	460¼	100¼	561¼
1949	273¾	18½	144⅛	41¼	½	478¼	99	577¾
1950	277⅛	14⅜	160¼	47¼	7⅛	508	98	606
1951	287¼	16¼	153⅛	43¼	5¼	509¾	115	624¾
1952	296¼	15	145⅜	41¼	8½	507	113	620

NOTE — Figures for Northern India from I.T.A. and for South India from U.P.A.S.I.

TEXTILE INDUSTRY

COTTON

The statistical position of cotton in the Indian Union is summed up in the following table —

(In lakhs of bales)

	1948 49	1950 51	1951 52	1952 53
Opening Stock	31 36	17 16	18 19	24 58*
Production	23 00	33 00	38 93	36 38
Imports	10 78	8 35	12 64	6 25
Total Supply	65 14	58 51	69 76	67 21
Mill Consumption	42 55	36 10	40 71	43 60
Exports	3 05	1 69	1 97	3 30
Extra Factory Consumption	2 70	2 70	2 70	2 70
Total Distribution	48 30	40 49	45 38	49 50

* The disparity of 20 000 bales remains unexplained

Export quotas of cotton were more liberal at 200 000 bales of Bengal Deshi and 152 000 bales of other short staple growths for 1951 52 and the export duty was reduced from Rs 400 to Rs 200 per bale in March 1952 For the year 1952 53 a quota of 150 000 bales of Bengal Deshi was announced in addition to 100 000 bales of other short staple varieties while Assam Comillas and Cocanadas were made free for export The duty on export of Bengal Deshi was reduced further to Rs 125 in November 1952 and exports of that growth were allowed up to half of the quotas fixed for other varieties Cotton waste is also licensed freely for export and the export duty of 50 per cent *ad valorem* was reduced in the case of soft cotton waste to 30 per cent in March

The total imports in 1952 from all sources were 11 4 lakh bales as against 14 lakh bales programmed for and these proved more than sufficient in view of the emergence of the buyers market for finished goods

The sharp recession in cotton prices resulted in the relaxation of the cotton control in the field of movement and the Government had to reiterate in March 1952 its assurance about supporting the floor prices The prices later rallied and, encouraged by the floor remaining untouched the Government raised the floor for 1952 53 season by Rs 50 with a view to providing a fresh stimulus to cotton growing

In view of the satisfactory supply position, forward trading in cotton was permitted from December 1952 within the ring of the East Indian Cotton Association

The agricultural plan envisages increased production of cotton from 33 00 lakh bales in 1950 51 to 42 29 lakh bales in 1955 56 Meantime the deficit is being met by imports

COTTON MILL INDUSTRY

The cotton textile industry, which is the largest single industry in the country, has made rapid strides during its existence of a century India holds the third place among the countries of the world in its capacity for yarn and cloth based on mechanical equipment and stands second on the basis of cotton consumption

In addition to providing means of livelihood for nearly 10 million handloom weavers the mill industry provides employment to about 800 000 workers

The capital invested is estimated at 100 crores and the annual turn over between Rs 350 crores and Rs 400 crores

The following table gives details about the distribution of mills in India as in August 1952

Where situated	Number of Mills	Number of Spindles installed	Number of Looms installed	Average No of Hands employed	Approximate Quantity of Cotton consumed in bales
Greater Bombay	65	29 20 509	65 370	1,12 468	10 41 910
Ahmedabad	74	20 23,552	42 371	73 235	6 36 060
Rest of Bombay State	61	12 61 022	24,248	50 416	3,83 976
Rajasthan Ajmer and PEPSU	12	1 62 464	3 707	8 576	1 08 408
East Punjab and Delhi	11	2 09,900	5,038	7 039	1 48,656
Madhya Pradesh	29	7,96 974	12 763	24 788	2,98 314
Madhya Bharat and Bhopal	18	4,39 158	11,305	23,162	2 63 928
Bihar and Orissa	3	75 732	1,431	2,037	26 348
West Bengal	36	4 69 830	9 862	21,454	1,31 788
Hyderabad State	7	1 22 440	2,655	7 163	77,882
Uttar Pradesh	7	1 13 596	2,580	6 755	70,766
Madras State	90	19,68 590	8 520	55 007	5,99,124
Travancore Cochin Union	10	1 33 265	726	3 384	30 568
Mysore	11	2 23 028	3,052	11 912	83 102
Pondicherry	3	83 228	1,992	5,238	25 616
Total	437	1 09,03 288	1,95 520	4,12,634	39,26,446

Note Out of the above six mills in Uttar Pradesh, three mills in rest of Bombay State, two in Ahmedabad, two in Rajasthan, Ajmer and PEPSU and one mill each in Greater Bombay, Saurashtra Punjab and Delhi, Madhya Bharat and Bhopal, Madras State and Travancore Cochin were not working The table also excludes 22 mills which have been registered and/or are in course of erection

The actual production of yarn and cloth are as follows —

Year	Yarn in 000 lbs		Cloth in 000 yards				
	Production	Mill consumption	Coarse	Medium	Fine	Superfine	Total
1948	1,447,616	1 036 925	797 620	2 580 567	601 429	339,687	4 319 303
1949	1 359,119	963 214	452 068	2,309,169	809 240	333,726	3,904 203
1950	1,174 220	872 675	421,819	1 781 436	1,200,453	261 383	3 665 091
1951	1 303 861	987,376	363,561	2 080 858	1 347 946	283 866	4 076 186
1952	1 448,400	N o t A v a i l a b l e					4,603,200

On the basis of the full rated capacity of the industry about 50 lakh bales of cotton are required compared to the actual indigenous supply of 26 28 lakh bales in 1949 50 and 33 00 lakh bales in 1950 51 During 1948 49 the cotton consumption by mills was 42 5 lakh bales

On this basis the estimates of the other important raw materials are given below Card clothing —3 500 sets Bobbins 425 000 gross Shuttles —8 300 gross, Heads 900 000 sets, Reads—400 000 pcs Pickers—37 500 gross Mutton tallow 3 600 tons Starch 36 000 tons Coal tar dyes —5 900 tons Hydro sulphite of soda —2 000 tons Zinc chloride—3,000 tons Caustic soda—15,000 tons

SMALL-SCALE INDUSTRY

It is estimated that there are 2,850 000 hand looms and 23 800 power looms in existence in the country About 65 per cent of the power looms are located in Bombay State though the handloom industry has witnessed the largest development in Madras State

The regional distribution of power looms and handlooms, together with their estimated requirements of yarn is given below —

State	No of Power looms	Annual yarn Requirements (m lb)	No of Hand looms	Annual yarn Requirements (m lb)
Bihar	147	0 72	196,218	47 10
Bombay	15 742	76 82	161,255	38 70
Madhya Pradesh	1 123	5 48	105 000	25 20
Madras	1 415	6 91	841 140	201 87
Orissa	10	0 05	129 686	31 12
Punjab	1 339	6 53	46 357	11 13
Uttar Pradesh	342	1 67	253 311	60 69
West Bengal	1 354	6 61	97 151	23 32
Hyderabad	167	0 81	149 000	35 76
Madhya Bharat	24	0 12	18 500	3 72
Mysore	1 303	6 36	35 000	8 40
Rajasthan	36	0 18	26 000	6 24
Saurashtra	269	1 40	20 000	4 80
Travancore Cochin	10	0 04	80 157	19 23
Ajmer Merwara	10	0 05	2 016	0 48
Delhi	481	2 35	750	0 18
Other Areas	28	0 01	190 164	166 46
Total	23 800	116 11	2,851 685	684 40

Statistics of the production of powerlooms are not available The actual output of the handloom sector, which showed a remarkable expansion during the Second World War when it reached a peak of 1,700 million yards, registered a fall in the subsequent period and was as low as 810 million yards in 1950 as against 1 250 million yards in 1948 and 1949

Production of cloth by the handloom industry in 1951 52 has been estimated at 924 million yards

IMPORTS AND EXPORTS

The year 1952 witnessed the emergence of a buyers market in cotton textiles and the accumulation of unsold stocks was accompanied by a fall in prices As a result there was a progressive relaxation of control measures and restrictions In October the prices of a number of varieties including dhoties, sarees and mulls were decontrolled and the policy was further extended to coatings twills etc with effect from January 1 1953 leaving about one third of the mill production subject to price control With effect from July 1 1953 the cloth control was totally abolished

The production control was used towards the end of 1952 for helping the handloom industry by reserving the production of certain varieties including sarees woven of dyed yarn dhoties with borders of certain width lungies sarongs etc

In the post war period foreign exchange difficulties have resulted in shutting out imports of cotton textiles except (*a*) umbrella cloth and special fabrics (*b*) yarn of 80s and above required for handloom purposes and (*c*) yarn of 30s and 60s for manufacture of heralds and reeds

While India was an important importer of cotton goods for several years she has now become an important exporter In January 1953 the Government provided a stimulus to exports by reducing the export duty on coarse and medium cloth from 25 per cent *ad valorem* to 10 per cent

Export quotas for yarn are allowed for the first half of 1953 on a percentage basis of the free yarn made available by each mill in 1952

The following table gives the sea borne export trend —

Year	Twist and Yarn		Cloth	
	Million lb	Rs in crores	Million yd	Rs in crores
1948 49	7 4	1 3	340 92	36 2
1949 50	64 9	11 8	700 86	59 1
1950 51	74 5	17 1	1 269 66	116 7
1951 52	6 2	2 0	423 82	51 7
1952 53	17 3	4 2	614 61	61 3

DEVELOPMENT PROGRAMME

Cotton cloth (mill made and handloom) available for consumption per head averaged 15 to 16 yards in pre war years The consumption in 1951 52 was, however estimated at 12 5 yards as against 9 yards in 1950 51, and has been fixed at not less than 13 yards for 1952 53 so as to be progressively increased to 15 yards by 1955 56

To enable the handloom industry to meet the consumer resistance the Government constituted an All India Handloom Board in December 1952

In regard to the mill industry, it was found that apart from cotton shortage, there were about 150 inefficient and uneconomic units Another important problem related to diminishing productivity

The following table summarises the programme of development of the industry as approved by the Planning Commission —

	Unit	1950 51	1952-53	1955 56
Initial Capacity of Mill industry				
Spindles	No	10 942 241	11,175 283	11,292,241*
Yarn	m lb	1,668 7	1,704 2	1,722 0
Looms	No	194 411	195 849	195 849
Cloth	m yd	4,743 6	4 778 7	4,778 7
Actual Output—				
Yarn	m lb	1,179	1,510	1,640
Mill cloth	m yd	3,718	4,600	4,700
Handloom Cloth	,,	810	1,300	1,700
Exports —				
Yarn	m lb	74 5	—	—
Cloth	m yd	1,269 5	1,000	1,000
Cotton Needed—	m bales	3 5	4 5	4 9

* This figure does not include additions in existing mills for achieving economic sizes

VEGETABLE OIL INDUSTRY

INDIA is one of the most important producers of oilseeds in the world and is consequently a large producer of vegetable oils as well as an exporter of oils and oilseeds

The following figures show the average production of different varieties of oilseeds in recent years along with their share in world production —

—	Average Indian Production (lakh tons)	As percentage of world Production
Groundnut	30 0	36
Castor seed	1 2	26
Linseed	4 0	15
Sesamum	3 0	26
Cotton seed	13 0	13

According to the latest census of the Development Wing of the Ministry of Commerce and Industry, the number of the more important large-scale mills engaged in crushing edible oils in 1951 was 174 with a rated capacity of about 580,000 tons of oil per annum on a daily single shift operation of 8 hours and their regional distribution was as under —

State	No of units	Annual Rated capacity (Tons of oil)
Assam	23	15,300
West Bengal	10	63 288
Bihar	21	52,104
Bombay	8	43,152
Delhi	2	3 660
Hyderabad	2	N A
Madhya Pradesh	12	32,640
Madras	14	74,868
Madhya Bharat	8	13,548
Mysore	4	14,700
Orissa	1	4,440
Punjab	3	10 956
PEPSU	2	3,672
Rajasthan	2	2,136
Saurashtra	4	37,944
Travancore Cochin	9	15 672
Uttar Pradesh	49	190,608
Total	174	578,688*

* Refers to capacity of only 172 units

The capital invested in the organised industry is estimated at Rs 30 crores and the number of workers at 28,000 The most important oilseeds consumed in large quantities for the production of oils are groundnut linseed, rape and mustard, castor seed and sesamum seed Small quantities of cottonseed and mohwa seed are also crushed

IMPORTS AND EXPORTS

The following table shows the imports and exports of oil since 1948 49 —

—	1948 49	1949 50	1950 51	1951 52	1952 53
Imports (Tons)	7 893	34 164	19 143	29 371	28,767
Coconut oil	7,656	30,700	18 070	29 900	23,401
Exports (Tons)	64 361	45,092	120,100	89,073	143 208
Groundnut oil	36,760	28,960	82 270	21,065	68 206
Linseed oil	9 471	7,362	5 664	25,338	28 249
Castor oil	13 020	4 922	25 530	23 913	37 344
Others	4 412	3 848	6 636	18,757	9,409

There is an export duty of Rs 150 per ton on groundnut The tentative export target is 50,000 tons of oilseeds and 170,000 tons of oil for 1955 56

On the basis of the minimum *per capita* consumption of fats in this country the total consumption of fats of the entire population would work out at 7 million tons as against the present estimated consumption of 1 2 million tons

The consumption of vegetable oils in industries has considerably risen since the last war The development of soap, paints and varnish industries has stimulated the consumption of non edible oils Castor oil consumption as a lubricant has also registered considerable expansion During the decade following the outbreak of the war, consumption of vegetable oils by the soap industry has doubled from 30,000 tons to 63,000 tons, and that of paints and varnish industry and lubricant has risen from 15,000 tons each to 30,000 tons and 25,000 tons respectively

The Planning Commission estimates that the additional demand will be stepped up by 100,000 tons by 1955 56

According to the Five-Year Plan the production of oilseeds would increase by 400,000 tons over the estimated production of 5,103,000 tons in 1950 51 Consequently, the supply of oil is expected to rise from about 1,113,000 tons in 1949 50 to about 1 272,000 tons by 1955 56 The total supply of vegetable oils of all varieties including about 110,000 tons of coconut oil is thus expected to be 1 38 million tons by 1955 56

The Commission has recommended measures for assisting the cottonseed industry, introduction of solvent extraction process to secure higher overall recovery of oils and wider utilisation of neglected resources of oil bearing materials such as neem, mohwa, karang and marotty which grow wild

The table below summarises the programme of development envisaged during the period of the Plan —

—	1949 50 Tons	1955 56 Tons
Output of vegetable oils excluding coconut oil	1 113 000	1,287,000
Cottonseed oil	5,000	12,500
Exports of oil	45,000	170,000

VANASPATI

The Vanaspati Industry though a minor branch of the Vegetable Oil Industry is one of the most highly organised and efficient industries Its history is interesting It started on a small scale in 1930 Then it grew rapidly as shown in the table below —

Year	No of factories	Sale in sub-continent in tons
1937	5	32,000
1938	5	40,000
1939	9	51,000
1940	11	65,000
1941	12	84,000
1942	12	71,000
1943	16	87,000
1944	18	103,000
1945	21	134,000
1946	21	138,000
1947	23	96,000
1948	26	127,000
1949	38	152,728
1950	39	167,633
1951	41	172,000

The State wise distribution of factories at the beginning of 1952 with annual capacity was as follows —

State	In production	Under construction	Annual capacity (tons)
Bombay	14	1	133,400
Saurashtra	8	1	22 500
West Bengal	7	1	56 000
Bihar	1		4 960
Orissa	1		7 600
U P	4		42 468
Delhi	2		13 500
Punjab	1		3 000
PEPSU		1	3 000
Madras	7	5	52 900
Mysore	4		10 800
Hyderabad	1		7,500
Travancore Cochin	1		1 200
Madhya Pradesh	2		19 500
Madhya Bharat	1	1	10 500
Total	49	10	388 828

The gap between the installed capacity and actual production has continued to remain wide as will be seen from the following table —

Year	Installed Capacity Tons	Production Tons
1948	216,228	129,696
1949	283 728	155,544
1950	319 728	171 636
1951	325 728	172 320
1952	339 228	190 812

The capital invested in the industry is about Rs 22½ crores Besides 15 000 workers directly employed the industry provides indirect employment for nearly 60,000 workers

Vegetable oils constitute the chief raw material of the industry

There is no import and export is also negligible

Production distribution, sale and price are all controlled for which purpose the country is divided into four zones

The demand for vanaspati at present is estimated at about 150,000 tons a year The Planning Commission however, thinks that the demand would rise to about 190,000 tons by 1952 53 and to about 300 000 tons by 1955 56

The table below summarises the programme of development during the period of the Plan —

—	1950 51	1955 56
No of factories	48	59
Annual rated capacity (tons)	333,228	388,828
Actual Production (tons)	152,600	300,000

WOOLLEN INDUSTRY

THERE are three main groups of mills, those which operate both woollen and worsted systems, those with woollen or worsted systems only and lastly the Amritsar group of mills which purchase ready spun yarn, and from that stage occupy themselves in weaving, dyeing and finishing

Among the first group the Cawnpore Woollen Mills and the New Egerton Woollen Mills, Dhariwal, each with more than 15 000 spindles and operating both woollen and worsted systems, are the largest units in India at the present time

In 1951 there were 44 factories including four put up since the war and the total capital employed was estimated at Rs 7 crores The industry gave employment to about 18,000 workers The number of powerlooms and spindles installed were 2,039 and 116,800 respectively The regional distribution of the woollen industry in 1951 was as under —

Region	Number of units		Total	Rated Capacity (m lbs)
	Spinning only	Spinning and weaving		
Bombay	2	6	8	6 04
Saurashtra		1	1	1 50
Punjab		26*	26	5 70
Uttar Pradesh		4	4	3 90
West Bengal		1	1	0 30
Kashmir		1	1	0 61
Mysore		3	3	2 10
	2	42	44	20 15

* Of these 22 units are mostly for weaving and account for one million lbs of rated capacity

The above rated capacity is assessed on the basis of a single shift of 8 hours per day Some of the mills are, however working more than one shift

Woollen manufactures consist of blankets rugs shawls lohis, coating overcoating, tweed, flannel serge, etc but the major portion is of coarser and heavier types of goods The trend of production of woollen manufactures is detailed below —

Year	Quantity (m lbs)
1947	24 0
1948	20 0
1949	21 0
1950	18 1
1951	17 7
1952	16 7

The fall in production during the years 1950, 1951 and 1952 was mainly due to the difficulty of marketing the goods as a result of consumer resistance to high prices Since August 1952 however the fall in the prices of raw wool and finished goods has been accompanied by the broadening of the demand as well as production

Indigenous wool, including arrivals of 8 million lbs across land frontiers, amounts to 62 8 million lbs Out of this exports account for 24 6 million lbs the indigenous carpet and drugget industry and the cottage sector consume about 13 2 million lbs and 10 million lbs respectively and the mechanised wing absorbs 15 million lbs

The types of wool produced in the country are not suitable for the manufacture of the finer fabrics Based on quality, the estimated annual requirements of the mechanised woollen industry for working at the rated capacity of 20 15 million lbs has been estimated at 33 9 million lbs greasy basis The actual consumption during the past few years has been around 15 million lbs of indigenous wool, 5 to 8 million lbs of imported raw wool and 8 to 13 million lbs of imported tops making a total of 30 to 33 million lbs

Owing to restrictions on imports of finished woollen goods in recent years there has been a gradual decline in imports from 11 176 million lbs valued at Rs 724 lakh in 1948 49 to 3 963 million lbs valued at Rs 298 lakh in 1951 52 The bulk of the imports was yarn and knitting wool

Exports of woollen goods rose in the same period from Rs 304 lakh to Rs 649 lakh carpets and rugs accounting for the bulk of the shipments

HOSIERY INDUSTRY

According to the Tariff Commission, there were in 1951, 875 units, excluding four mills having hosiery section of which as many as 843 were in the Punjab with a capital investment of approximately Rs 3 crores Only 56 units were, however registered under the Factories Act and 46 used electric power

The Ludhiana factories numbering about 805 work during the season but have a rated capacity for consuming 10 425 million lbs of yarn annually The annual rated capacity of the four woollen mills having hosiery section is estimated at 1 313 million lbs of yarn The actual production of the industry has however been very much less than the rated capacity and has been estimated as under by the Tariff Commission in terms of weight of the finished products —

Year	Lakh lbs
1949	37 83
1950	27 57
1951	20 22

Two new units which were under construction in 1950 went into production in 1951 In addition another two units were likely to be established for woollen goods apart from the installation of spinning plants for additional production of worsted yarn

The Planning Commission has estimated the indigenous demand for woollen manufactures at 23 million lbs by 1955 56 and is of the view that if some of the mills work double shift and the existing capacity fully utilised, the establishment of new weaving units during the period of the Plan is unnecessary If, however recognises that the industry is handicapped by inadequate supplies of wool tops and the absence of facilities for technical training and has therefore stressed the need for washing of wool before shearing and grading before marketing The following table summarises the programme of development of the woollen textile industry (mechanised section) —

	1950 51	1955 56
No of spindles in existence	116,800	146,800
Annual rated capacity for cloth on single shift (m lbs)	20 15	20 15
Actual Production (m lbs)	18 00	25 00
Estimated requirements (m lbs)	20 00	23 00

*

MINES AND MINERALS

Allotment under Five Year Plan (mineral development) Rs 1 06 crores

THE mineral wealth of India, as at present known, though by no means inexhaustible, comprises on adequate range of useful products necessary for industrial development

The reserves are ample in respect of minerals essential for basic industries—coal and iron—but the country is deficient in a fairly long list of vital minerals like ores of copper, tin lead, zinc, nickel cobalt and in sulphur and petroleum

The position with regard to aluminium ore refractories, abrasives limestone etc may be considered as fairly adequate while in respect of titanium and thorium ores and of mica, the country has considerable reserves

An idea of India's mineral resources their adequacy, deficiency and present production is given below —

MINERALS ADEQUATE FOR INDIA'S NEEDS

Mineral	Production in 000 tons	
	1950	1951
Bauxite	64	67
Coal	32,307	34,431
Ilmenite	212	220
Iron ore	2,971	3,657
Kyanite	35	42
Sillimanite	1	4
Magnesite	53	117
Manganese ore	883	1,284

Coal, iron ore manganese ore, ilmenite kyanite and mica for which the data is not available are produced in quantities of real importance to industry and other sections of economy

Of these mica manganese ore, kyanite and ilmenite are wholly or largely exported

MINERALS WITH FAIRLY ADEQUATE SUPPLIES

Mineral	Production in 000 tons	
	1950	1951
Barytes	12	8
China clay	53	55
Other clays	277	291
Felspar	1	3
Chromite	17	16
Gold (000 oz)	197	226
Gypsum	206	264
Salt	2,573	2,642

MINERAL NEEDS OF INDUSTRIES

Mineral		Present Annual Consumption	Estimated Requirements in 1955 56
Coal (m tons)		10 0	14 0
Limestone (000 m tons)		5 3	8 9
Gypsum	(000 tons)	97 0	870 0
Iron ore	(,,)	2,672 0	4,000 0 (*a*)
Manganese ore	(,,)	70 0	100 0
Bauxite	(,,)	26 0	60 0 (*b*)
Glass sand	(,,)	108 0	184 0
Ilmenite	(,,)	Nil	3 0
Monazite sands	(,,)	Nil	1 5
Sulphur	(,,)	42 5	82 0
Rock phosphate	(,,)	35 0	108 0
Petroleum crude	(,,)	Nil	1,700 0 (*c*)
Pyrites	(,,)	Nil	22 0

(*a*) When the expansion scheme of the existing steel units is complete, the demand for iron ore is expected to go up to 4 4 million tons This will rise further to 5 5 million tons when the proposed Government steel factory materialises

(*b*) Following the execution of the expansion programme of *Indian Aluminium Co* the demand for bauxite will be about 110,000 tons per annum

(*c*) The addition of two refineries will raise the demand for crude petroleum to 4 2 million tons per annum

As part of the rational policy to ensure efficient working of known mineral deposits, the Mines and Minerals (Regulation and Development) Act was enacted in 1948 Under this Act, the Central Government's concurrence is necessary for the issue of licences and leases for atomic energy minerals and rare minerals There is a proposal to cover other minerals by this provision and also to lay down rules regarding economic units for different classes of minerals with due advertence to local conditions

The Indian Bureau of Mines Act set up in March 1948 continues to tender advice to Government on mineral concessions

The Geological Survey of India has been expanded so that it can cope with the growing work of protecting investigating and mapping mineral deposits and tackling the engineering problems connected with the country's hydroelectric projects

COAL

The most important coal fields are Raniganj and Giridih Bihar and West Bengal contribute about 82 per cent of the total output Other States in which coal is found are Madhya Pradesh, Orissa, Hyderabad, Vindya Pradesh, Assam and Rajasthan

There are about 100 coal fields in India The production in 1952 was over 36 million tons The industry employed in 1951 about 340,000 workers, an increase of 58 per cent over 1941

Indian coal falls mainly into two classes namely, high grade steam and low grade steam

The Metallurgical Coal Conservation Committee placed the reserves of coking coal at 329 6 million tons in respect of selected grade 395 7 million tons of grade I quality and 49 1 million tons of grade II quality With stowing washing and blending the committee thought that a reserve of 2,000 million tons of good quality coking coal could be obtained The Geological Survey of India estimated the reserves of non-coking coal at 39 650 25 million tons of which gondwana coal represented 37,113 25 million tons and balance tertiary coal

The following table gives the details of output —

Year	Production (million tons)
1946	29 27
1947	30 07
1948	29 82
1949	31 44
1950	32 31
1951	34 43
1952	36 23

Recently the mineral concession rules were revised by the Government of India The rules (1949) limit the period of the leases to twenty years with the option of one renewal for another twenty years The rules also require the certificates of approval from the State Governments The Government has also constituted a committee to consider all applications for opening mines

Mechanisation in the industry is at a very early stage of development In the middle of 1951, there were only 374 coal cutting machines in 118 coal mines which represented hardly one fifth of the total output There were nine mechanical loaders of which two were out of order while the number of conveyors was only 19 An event of great importance was the introduction of coal washing plant, for the first time in the history of the industry, by Tatas in their West Bokaro mines

In earlier times the coal used to be sold by the name of steams For the first time the Indian Coal Grading Board was constituted in 1926 The maintenance of grades requires beneficiation but only about 70 collieries are fitted with screening plants and mechanical chutes, the rest are worked by hand labour

The Coal Grading Board has split up the area into Raniganj and Jharia coal fields and has carried out extensive work in the field of grading In 1944 the necessity was felt to control production and distribution of coal and the Colliery Control Order introduced what is known as Coal Commissioner's grade

MINERALS WITH DEFICIENT SUPPLY

Mineral		Production		Imports	
		1950	1951	1950	1951
Copper	(000 tons)	6 6	7 1	41 8	8 6
Graphite	(,,)	1 5	1 6	0 8	0 7
Lead ore	(,,)	1 9	1 8	—	—
Lead pig	(,,)	0 6	0 8	15 4	7 9
Petroleum	(m gals)	—	—	780 8	869 0
Mercury	(m lbs)	—	—	2 4	0 7
Sulphur	(000 cwts)	—	—	1,138 0	770 1
Tin	(,,)	—	—	95 4	59 2
Zinc	(000 tons)	—	—	33 4	20 1

Under the Coal Mines (Conservation and Safety) Act, 1952, the Central Government is empowered (1) to adopt measures for the safety of coal mines or for conserving coal, (2) to authorise the Coal Board to deal with problems of the industry, (3) to levy excise duty on coal and coke, and (4) to frame rules for regulating the industry

The coal industry is thus subjected to a comprehensive control embracing production, allocation prices and wages Levies on exports also differ from country to country

Since the middle of 1952 the overseas demand for Indian coal showed trends of contraction and the mounting stocks at pits forced the industry to offer secret discounts thereby rendering the official prices ineffective

The export trends are summarised below —

(000 Tons)

Country	1950-51	1951-52	1952-53
United Kingdom	3 7	117 0	—
Aden and Dependencies	6 1	55 9	37 8
Pakistan, Western	738 1	128,05 6	119,69 5
Pakistan, Eastern	1680 9	47 78 5	126,56 5
Ceylon	294 3	272 1	321 7
Burma	123 5	124 5	235 3
Singapore	58 7	112 4	114 4
Hongkong	113 1	147 2	155 5
Japan	115 0	812 8	610 6
Egypt	10 1	118 4	10 1
Australia	219 7	193 5	159 1
Others	23 8	256 8	286 3
Coal and Coke—Total	3 395 9	19,628 0	26 605 4

IRON ORE

On account of the high ash of Indian metallurgical coke, it is usual in estimating the Indian iron ore reserves to accept only ores with an iron content of 60 per cent and above Ores below this iron content are used only in very small quantities in Indian blast furnaces

India possesses perhaps the largest reserves of high grade iron ore in the world as well as large quantities of low grade ores The estimated resources are —

	Million Tons
Bihar	
Singhbhum	1,047 00
Madhya Pradesh	
Bastar	610 00
Rowghat	800 00
Chanda	21 90
Drug	120 00
Orissa	
Bonai	648 00
Keonjhar	988 00
Mayurbhanj	18 00
Madras	
Salem Tiruchirapalli	304 65
Andhra	
Cudappah	304 04
Kurnool	3 70
Mysore	
Kemmangundi	105 00
Bababudan	200 00
Sandur	130 00
Bombay and Goa	6 00
Punjab and PEPSU	
Patiala	5 00
Mandi	5 00
Total (not conclusive) more than	5,007 29

Large deposits of high grade ores are limited to a few areas of which the following fields require special mention —

(*i*) *Singhbhum and Orissa* In what is known as the Singhbhum Iron Belt, consisting of the Singhbhum District, in which the Tata Iron & Steel Company's Steel Works are situated, and the neighbouring areas, there exist some of the richest iron ore deposits in the world The iron content of the ore considered usable varies from 60 per cent to 65 per cent

(*ii*) *Mysore* There are big deposits of hæmatite and quartz—magnetite ore in Mysore but the latter are of low-grade and would require concentration before using them The ores used in the Bhadravati Iron Works are from the Bababudan Hills and can be compared to Singhbhum ores containing about 60 per cent iron Incidentally, the total quantity of ore available is not less than 100 million tons

Limonites deposits are also known to exist but they have not been properly explored owing to transport difficulties

(*iii*) *Madras* Very large deposits, mainly magnetite, occur in Salem They have been estimated at 200 million tons They will, however require concentration before use, and there may be considerable losses in the process

(*iv*) *Madhya Pradesh* Large deposits of hæmatite are found in the Bastar, Chanda, Drug and Jabalpur districts of this State Of these, those in Bastar are of very large magnitude and are of the order of 1,000 million tons It is expected that the Chanda and Drug deposits will shortly be utilised for feeding a new iron and steel works to be established in Madhya Pradesh

(*v*) *Other Areas* In Hyderabad the Bailadila range is reported to have hæmanite deposits which are inaccessible and far away from coal fields

The only source of high phosphorus ore is in Bengal It is poor in iron content being 35 per cent to 45 per cent and most of the easily available ore in this locality has been exploited

The deposits in the Ceded Districts in Andhra are estimated to be not less than 100 million tons

The average annual production of iron ore has of late been varying between two and three million tons

The contribution of Mysore ranges between 40,000 and 60,000 tons, and the rest comes practically from Bihar and Orissa

The following is the trend of production —

Year	000 Tons
1949	2,809
1950	2,965
1951	3,657

There has been a small but growing export trade in iron ore as indicated below —

Year	Tons
1949-50	4,300
1950-51	84,513
1951-52	280,102
1952-53	811,571

MANGANESE ORE

North Kanara and Panch Mahals in Bombay, Vishakapatnam in Andhra, Sandur, Shimoga, Chitaldrug and Tumkur in Mysore and Balaghat, Bhandara, Chhindwara and Nagpur districts in Madhya Pradesh are today considered as the most valuable and economically workable centres

Domestic consumption of manganese is given below —

(in Tons)

Year	Production	Domestic Consumption	Exports
1949	645,825	79,264	613,907
1950	882,929	69,325	808,221
1951	1,283,929	88,867	952,000
1952-53	N A	N A	1,364,931

It is estimated that domestic requirements will reach 100,000 tons by 1957-58

To conserve reserves export control was brought into force late in 1948 and ceiling limits were placed for both high and low grades Later, for special reasons, Government decided on a policy of export of high grade ores to the extent of one million tons per annum for a temporary period

India is believed to have abundant resources probably of the order of 70 to 80 million tons of low grade ore, *i e*, containing less than 42 per cent manganese

Provision has been made in the Plan for investigations in regard to beneficiation of such ores

The export price for manganese ore which had touched Rs 175 per ton during the Korean boom and remained almost steady around Rs 155 in 1952 steadily declined to Rs 113 by April 1953

MICA

Mica has been treated as a strategic material and India accounts for a big slice of the world trade in it

The principal mica deposits are concentrated in Bihar, Rajasthan including Ajmer Merwara, and Madras In recent years, its occurrence has been reported from other parts of the country as well

In Bihar the mica belt is 60 to 80 miles long and about 12 to 16 miles wide and produces 'ruby' mica which is in great demand all over the world

At present Rajasthan is responsible for about 25 per cent of the Indian production Most of the production from Rajasthan is sent to Bihar to be split and marketed

The mica belt in the Nellore district in Andhra is about 40 miles long and 5 to 10 miles wide The greater portion of the Andhra output is of "green' variety

Statistics of mica production are not reliable and export figures are always higher than production figures The quantity and value of mica exported from India are given below —

Year	Quantity in 000 cwts.	Value in lakhs of Rs
1948 49	340 2	593 7
1949-50	297 7	684 5
1950-51	383 4	958 5
1951-52	407 7	1320 9
1952 53	283 8	899 5

CHROMITE

Chromite is an important strategic mineral of which India has moderate supplies

The chief deposits are in the Singhbhum district of Bihar, the Mysore and Hassan district

of the Mysore State, the Ratnagiri and Sawantwadi areas of Bombay State, the Krishna district of Andhra, the Salem district of Madras and the Keonjhar district of Orissa

No reliable estimates of reserves are available but the following figures in tons may be given — Reserves in Tons Mysore (135,000), Bombay (67,000), Orissa (200,000) Salem (200,000)

The following table gives details regarding production and export of chrome ore —

Year	Production (Tons)	Exports (Tons)
1949	19 416	6 382
1950	16 729	3 864
1951	15 802	8 838

Export of chromite which was unrestricted till 1948 was brought under control and a ceiling of 10,000 tons was prescribed

MAGNESITE

Large deposits of magnesite used in the manufacture of magnesium salts, metallic magnesium and refractory bricks are known to occur in Salem (Madras), Hassan and Mysore (Mysore), Almora (U P), Coorg, Idar (Bombay), Dungarpur (Rajasthan) and Singhbhum (Bihar)

Of these, the chief producing centres are Salem, Hassan and Mysore

The deposits in Salem have been estimated to contain over 90 million tons within a depth of 100 ft from the surface The Almora deposits are supposed to contain a minimum of 20 million tons.

Only a part of the output is used in the manufacture of refractory bricks for steel works and a considerable quantity is exported

The output and export of magnesite from Salem and Mysore from 1949 to 1951 are given below —

Year	Output (Tons)	Exports (Tons)
1949	90,564	37,099
1950	52,859	16,465
1951	117,071	46,409

GYPSUM

Gypsum deposits are known to exist in several parts of India The better known gypsum bearing regions are in Rajasthan (Jodhpur, Bikaner and Jaisalmer) and in Madras (Tiruchirapalli district)

The reserves are placed at 40 million tons in Rajasthan, 15 3 million tons in Madras and one million tons in Andhra (Nellore district)

Smaller deposits also occur in Tehri Garhwal, Himachal Pradesh and parts of western India, but these have not been explored

The annual production from Indian deposits from 1949 is given below —

Year	Output (Tons)
1949	139,944
1950	206,366
1951	203,602

At present the annual estimated consumption of gypsum is about 94,000 tons for cement manufacture and about 2,000 to 3,000 tons for plaster of Paris

The Sindhri Fertiliser Factory will annually require about 600,000 tons of gypsum

The Planning Commission estimates that by the end of 1955-56 the demand will rise to 870,000 tons as against 127,000 tons in 1951-52 Of the increase cement will account for 45,000 tons to 160,000 tons and fertilisers for 678,000 tons to 690,000 tons

SULPHUR

Native sulphur in deposits of large size is unknown in India though some occurrences have recently come to light in the hill ranges in the north of India, and small deposits of native sulphur produced by bacterial action on sulphates derived from sea-water have been found in the coastal tract of Masulipatnam and in the Barren Island

Deposits of pyrites are more widespread and are found in Kashmir, at Taradevi near Simla, at Amjor near Rohtas in Bihar, Karwar in Bombay and in the Chitaldrug area of Mysore

Substantial quantities of pyrites are associated with the gold deposits of Wynad in the Nilgiri district of Madras Most of the copper deposits also occur in the form of copper pyrites Some of the Indian coals, *e g* Assam coal and Rewa coal are high in sulphur

As there is no production of sulphur in India, the country s requirements are met from imports, for which the recent figures are given below —

Year	Quantity (Tons)
1948	38 300
1949	41,000
1950	55 000
1951	38,507

SALT

The principal centres of salt manufacture in the Indian Union are as follows —

(*a*) Marine Salt Works —

(*i*) Saurashtra and Kutch—Bhavnagar, Jaffrabad, Jamnagar, Lavanpur Porbandar, Bharai and Kandla

(*ii*) Bombay—Dharasana, Bhayandar, Bhandup, Uran and Mithapur

(*iii*) Madras—Nanpada, Pennuguduru, Madras, Cuddalore, Adirampatnam, and Tuticorin

(*iv*) Orissa—Astarang (Puri) and Huma, Gokhurkuda and Sumadi (Ganjam district)

(*v*) West Bengal—Contai (Midnapur)

(*vi*) Travancore Cochin—along the coast

(*b*) Salt Mines —

(*vii*) Himachal Pradesh—Mandi

(*c*) Inland Sources —

(*viii*) Rajasthan—Sambhar, Didwana and Pachbadra

(*ix*) Bombay and Saurashtra—Kharaghoda and Kuda (Rann of Kutch)

Production

At present there are 122 salt works with an annual productive capacity of about 2 804 million tons (76 3 million maunds) of which six units with a productive capacity of about 0 73 million tons (20 million maunds) are owned and operated by Government

The total area under salt is estimated at about 82,000 acres as against 55,600 acres at the beginning of the period of the Plan of which 84 per cent is owned and leased out by the Central and the State Governments In terms of actual production, however, Government factories account for one-fourth of the output

In the private sector, the manufacture is largely in the hands of small licensees or lessees of absentee proprietors, except in Saurashtra and Kutch

The trend of production (in thousand tons) in 1951 52 is given below —

Bombay 644, Madras, 736, Orissa, 40 West Bengal, 2, Rajasthan, 494, Saurashtra, 776, Mandi, 5, Unlicensed factories, 100, total, 2,797

The total block capital invested in the industry is estimated at about Rs 703 lakhs (Rs 595 lakhs in marine salt works and Rs 108 lakhs in inland salt works)

The amount of working capital is about Rs 250 lakhs

The total number of persons employed in the industry in 1948 was approximately 72 000 of which about 57,000 worked in the marine salt works, about 14,000 in the inland salt works and about 600 in the Mandi mines

Until 1939 India was a heavy importer of salt but imports into India since 1947 not only steadily declined but of late the country has become an important exporter as will be seen from the following —

—	Quantity (Tons)	Value Rs in lakhs
1950-51	1 862	1 5
1951 52	86,632	39 4
1952 53	222,617	60 1

The Salt Experts Committee (1950) estimated that the total consumption would rise to 3 0 million tons (81 7 million mds) in five years the break up being domestic consumption 2 1 million tons industries 0 4 million tons livestock and agriculture 0 3 million tons and curing of hides and fish, etc the remainder

The Planning Commission thinks that it will rise to about 2 75 million tons by the end of 1952 53 and to 3 million tons by the end of 1955-56

Salt is produced by solar evaporation except in Mandi where rock salt is obtained by dry mining

Excepting in Saurashtra and Kutch, most of the holdings are small In Madras 3,500 licensees hold 17,000 acres of land under salt The average yield in south India is about 40 tons per acre, while in Saurashtra where the average holding varies from 600 to 1,000 acres, the yield ranges 50 and 90 tons per acre

The distribution is regulated under the zonal system for despatch by rail since the beginning of 1949

A cess of two annas per maund on salt produced in private salt works and 3¼ annas on salt produced in Government works is levied in order to meet administrative charges of the Salt Commissioner s office and finance the development of the industry

Export of salt by sea from other parts of the country to West Bengal were exempted from the payment of cess till 1952 Export of salt to Japan by sea from India are still exempted from cess

Schemes for the existing Government works at Rajasthan and Kharaghoda involve an outlay of Rs 50 lakhs during 1951-56 Rs 100 lakhs are meant for the development of the Mandi mines to obtain an annual output of 66,000 tons from 1955-56 onwards

RARE METALS

The recent technological advances for meeting the rigorous demands of modern times have focussed the attention of the various countries on the possibilities of using new metals or modifying known metals Some of the rare metals which were scientific curiosities till recently are now being produced on a commercial scale in Western countries It is known that the soils of India contain ores from which some of these rare metals can be recovered The Government of India and the Travancore Cochin State Government have jointly floated a joint stock company, the Indian Rare Earths Ltd , to process the monazite sands of Travancore The Company hopes to extract a mixture of oxides of rare earths containing cerium lanthanum, praseodymium neodymium and ten other metals of the rare earth group

Cerium is now being extensively used in glass manufacture cores of chemical electrodes catalyst in chemical manufacture as abrasive in optical glass fabrication and in some structures of steel The use of thorium salts in manufacture of incandescent gas mantles is well known It is also used in glass manufacture, benzene synthesis, metallurgy and cloth impregnation Intensive search has located deposits of pitch blend containing a high percentage of uranium oxides in Rajasthan A belt of uranium minerals over 150 miles long has been found in Bihar and there are sporadic occurrences in Madras as well

Vanadium is of great value to the manufacture of certain types of steel Appreciable reserves bearing titaniferous iron ores containing about 3 per cent oxides of vanadium have been discovered in Bihar Tungsten ore accepted as of strategic importance is found in parts of West Bengal and Rajasthan Chromite ores occur mostly in Chitaldurg (Mysore) and Singhbhum (Bihar) The minerals containing columbium and tantalum used to prevent weld decay and corrosion respectively have been traced in small quantities in the mica producing areas like Nellore, Monghyr, Gaya, Mysore and Travancore

Beryllium used in metallic springs and in manufacturing X ray tubes is produced from the ore known by that name It is found in Rajasthan Bihar and Nellore in Madras Gallium and germanium are found in coal More recently a rich source in the mineral sphalerite was reported from Nepal The National Metallurgical Laboratory at Jamshedpur is examining the economics of Mysore and Singhbhum chromites and of low-grade chrome ores from Talur (Mysore) and has evolved a new electrolytic technique for separating beryllia from beryl The National Chemical Laboratory of Poona has developed quick methods for estimating vanadium, beryllium, uranium and germanium

Lithium is an important light metal of strategic significance In India lithium minerals were first noticed as early as in 1874, and are commonly found as constituents of granite pegmatites The sources are Pihira (Bihar), Jodhpur Bastar (Madhya Pradesh) and Ooregam (Mysore) Kashmir is reported to have crystalline white blocks in a valley north of the famous saphire mines Nevertheless no systematic survey of the resources has yet been undertaken

---

THE FIVE-YEAR PLAN

THE Planning Commission was set up in March 1950 by a resolution of the Government of India A draft plan was presented in July 1951

The final plan was presented to the Government of India on December 7 1952 and laid before Parliament on December 8

The members of the Planning Commission were Mr Jawaharlal Nehru (Chairman), Mr Gulzarilal Nanda (Deputy Chairman), Mr V T Krishnamachari Mr Chintaman D Deshmukh Mr G L Mehta Mr R K Patil and Mrs Durgabai Deshmukh The Secretary was Mr N R Pillai and the Deputy Secretary Mr Tarlok Singh Mr Mehta remained a member till August 26, 1952 and Mr Patil till November 10, 1951 and was subsequently associated with the work of the Commission

The five year period is 1950 51 to 1955 56

Below is given a statistical description of the Plan

Throughout the allotments for Madras include those for Andhra

The total outlay and distribution as between Central and State Governments is as follows (Rs in crores) —

Centre (including railways) 1 241 Part A States 610 Part B States, 173 Part C States, 32 Jammu & Kashmir 13 , Total 2 069

The outlay proposed in the development programmes of States other than Jammu & Kashmir is as follows (Rs in crores) —

PART A STATES Assam 17 49 Bihar, 57 29 , Bombay, 146 44 , Madhya Pradesh, 43 08 Madras 140 84 Orissa 17 84 Punjab, 20 21 Uttar Pradesh 97 83 , and West Bengal, 69 10

PART B STATES Hyderabad, 41 55 Madhya Bharat 22 42 Mysore 36 60 PEPSU, 8 14 Rajasthan 16 82 Saurashtra, 20 41 and Travancore Cochin, 27 32

PART C STATES Ajmer 1 57 Bhopal 3 90 , Bilaspur 0 57 Coorg 0 73 Delhi 7 48 Himachal Pradesh 4 55 Kutch 3 05 , Manipur 1 55 , Tripura, 2 07 and Vindhya Pradesh, 6 39

The table below shows the financial basis of the Plan in crores of rupees —

	Central Government	States including Jammu & Kashmir	Total
Planned outlay on development	1,241	828	2 069
Budgetary Resources			
1 Saving from current revenues	330	408	738
2 Capital receipts (excluding withdrawals from reserves)	396	124	520
3 Internal inter Governmental transfers in connection with the Plan (*i e*, 'Central assistance')	—229*	229*	
	497	761	1,258
External resources already received	156	—	156
TOTAL (of last two items)	653	761	1 414

* Includes Rs 4 crores by way of statutory grants for Scheduled Tribes which will be available for part of the development expenditure on Scheduled Tribes in the Assam State Plan

The balance of Rs 655 crores will have to be found from further external sources or internal taxation and borrowing and deficit financing

OUTLAY

The distribution of expenditure in the public sector is as follows —

	Rs Crores	Per cent of Total
Agriculture and Community Development	361	17 5
Irrigation	168	8 1
Multi purpose Irrigation and Power Projects	266	12 9
Power	127	6 1
Transport and Communications	497	24 0
Industry	173	8 4
Social Service	340	16 4
Rehabilitation	85	4 1
Others	52	2 5
TOTAL	2 069	100 0

In October 1952 it was decided to increase the expenditure on the Plan by another Rs 175 crores to meet the rising unemployment in the country (For details see end of the article)

The following table shows the Development Expenditure Under the Plan in greater detail with the Central contribution —

(Rupees in lakhs)

	Head	Total	Central Government
I	AGRICULTURE AND COMMUNITY DEVELOPMENT		
	Agriculture	184,22 2	59 22 2
	Veterinary and Animal Husbandry including Dairying	22 28 5	4 12 0
	Forests	11,69 5	2 00 0
	Co operation	7 11 2	50 0
	Fisheries	4,64 1	50 5
	Rural Development	10 47 1	
	Community Projects	90 00 0	90,00 0
	Local Works	15 00 0	15 00 0
	Programme for Scarcity affected Areas	15 00 0	15 00 0
	TOTAL	360 42 6	186 34 7
II	IRRIGATION AND POWER		
	Multi purpose Projects	265 90 0	265 90 0
	Irrigation Projects	167,96 5	
	Power Projects	127 54 0	
	TOTAL	561 40 5	265,90 0
III	TRANSPORT AND COMMUNICATIONS		
	Railways*	250 00 0	250 00 0
	Roads	108 87 8	31 24 0
	Road Transport	8 96 9	
	Shipping	18 05 8	18 05 8
	Civil Aviation	22,87 0	22 87 0
	Ports and Harbours	33,08 8	32,06 4
	Inland Water Transport	10 0	10 0
	Posts and Telegraphs	50,00 0	50 00 0
	Broadcasting	3 52 0	3 52 0
	Overseas Communications	1 00 0	1,00 0
	Meteorological Department	62 0	62 0
	TOTAL	497,10 3	409,47 2
IV	INDUSTRY		
	Large scale Industries	140 33 2	126 04 3**
	Cottage and Small scale Industries	27 04 1	15 00 0
	Scientific and Industrial Research	4 61 0	4 61 0
	Mineral Development	1 06 1	1,06 1
	TOTAL	173,04 4	146,71 4
V	SOCIAL SERVICES		
	Education	155,66 1	39,01 6
	Health	99,54 6	17,87 4
	Housing	48,81 6	38,50 0
	Labour and Labour Welfare	6 01 7	3,97 3
	Amelioration of Backward Classes and Scheduled Castes and Tribes	29 87 2†	7,00 0
	TOTAL	339 81 2	106 36 3
VI	REHABILITATION	85 00 0	85,00 0
VII	WORKS AND BUILDINGS	11,02 3	11 02 3
VIII	FINANCE MINISTRY SCHEMES	4,39 6	4 39 6
IX	NORTH EAST FRONTIER AGENCY	3,00 0	3 00 0
X	ANDAMANS	3 82 8	3 82 8
XI	LOANS TO CORPORATIONS	12 00 0	12,00 0
XII	MISCELLANEOUS	17,74 4	6,50 0
	GRAND TOTAL	2,068,78 1	1,240,54 3

* The outlay of Rs 250 crores is additional to the estimated expenditure of Rs 150 crores to cover the current depreciation of assets in the period of the Plan

** Includes lump sum provision of Rs 50 crores for basic industries and transport and programme for mineral exports

† This includes Central grants amounting to Rs 3 crores, in addition, about Rs 9 crores are likely to be available by way of grants from the Central Government under Article 275(1) of the Constitution

TARGETS

The following figures will show how the outlay will add to the production potential of the community in various spheres

	(Rs Crores)
(1) Outlay which will add to the stock of productive capital owned by Central and State Governments	1,199
(2) Outlay which will contribute to building up productive capital in the private sector	
(a) Expenditure on agriculture and rural development (excluding community projects and provision for scarcity affected areas)	244
(b) Loans for transport and industry	47
(c) Provision for stimulating local development (community projects and local works)	105
(3) Outlay on social capital	425
(4) Outlay unclassified above (including provision for scarcity affected areas)	49
TOTAL	2,069

The table below shows the targets set together with figures for 1950 51

	1950–51	1955–56
I AGRICULTURE		
Food grams including gram and pulses (million tons)	52 7	61 6
Cotton (lakh bales)	29 7	42 2
Jute (lakh bales)	33 0	53 9
Sugarcane (million tons)	5 6	6 8
Oilseeds (million tons)	5 1	5 5
II IRRIGATION AND POWER		
Irrigation (million acres)	50 0	69 7
Electrical energy (installed capacity in million kws)	2 3	3 5
III INDUSTRY		
Iron and Steel (lakh tons)		
Pig Iron available for foundries	3 5	6 6
Finished Steel	9 8	13 7
Cement (lakh tons)	26 9	48 0
Aluminium (thousand tons)	3 7	12 0
Fertilsers (thousand tons)		
Ammonium sulphate	46 3	450 0
Superphosphate	55 1	180 0
Locomotives (nos)		150
Machine tools (nos in thousand)	1 1	4 6
Petroleum refining , liquid petroleum (million gallons)	N.A	403 0
Bitumen (thousand tons)	N A	37 5
Cotton manufacture		
Yarn (million lb)	1179	1640
Mill cloth (million yards)	3718	4700
Handloom (million yards)	810	1700
Jute manufacture (thousand tons)	892	1200
Agricultural machinery		
(a) pumps, power-driven (thousand)	34 3	85 0
(b) diesel engines (thousands)	5 5	50 0
Bicycles (thousands)	101 0	530 0
Power alcohol (million gallons)	4 7	18 0
IV TRANSPORT		
Shipping (tonnage)		
Coastal (G R T thousands)	211 0	315 0
Overseas (G R T thousands)	173 5	283 0
Roads		
National Highways (thousand miles)	11 9	12 5
State Roads (thousand miles)	17 6	20 6
V EDUCATION*		
Pupils in		
Primary schools (lakhs)	151 1	187 9
Junior basic schools (lakhs)	29 0	52 8
Secondary schools (lakhs)	43 9	57 8
Industrial schools (thousands)	14 8	21 8
Other technical and vocational training schools (thousands)	26 7	43 6
VI HEALTH		
Hospitals (beds in thousands)	106 5	117 2
Dispensaries (number)		
Urban	1358	1615
Rural	5229	5840
VII DEVELOPMENT INSTITUTIONS		
Panchayatas (thousands)	55 1	69 1
Co operative societies**		
Credit (thousands)	87 8	112 5
Sale and marketing (thousands)	14 7	20 7
Multi purpose (thousands)	31 5	40 5
Lift irrigation (Nos)	192 0	514 0
Co operative farming (Nos)	352 0	975 0
Others (thousands)	27 3	35 8
Total (thousands)	161 9	211 1

* These estimates do not cover (except in respect of industrial schools) Hyderabad, Rajasthan, Ajmer and Vindhya Pradesh In some cases, data for a few States (*e g* U P in respect of primary schools and Madhya Pradesh in the case of junior basic and secondary schools) are also not covered in these estimates

** The estimates here exclude data for Punjab, Orissa, Hyderabad, PEPSU and most of the Part " C " States

OUTLAY IN STATES

The following table shows the development expenditure for the States of Assam, Bihar, Bombay, Madhya Pradesh and Madras

(Rupees in lakhs)

	Head	Assam	Bihar	Bombay	Madhya Pradesh	Madras
	Agriculture	2,76 1	12,84 3	17,48 4	10,05 5	15,93 7
	Veterinary and Animal Husbandry	12 5	92 5	1,66 9	98 8	1,00 0
	Dairying and Milk Supply	—	1 5	6,02 1	36 9	50 0
	Forests	36 3	1,25 0	83 8	40 8	38 8

IRRIGATION

Irrigation—Rs 168 crores

Multi purpose irrigation and power projects—Rs 266 crores

Five new projects are to be taken up in the later stages (1954 55)

Kosi (Stage I)—Rs 66 lakhs, Koyna (Stage I)—Rs 33 lakhs, Krishna (scope not defined), Chambal (Stage I)—Rs 38 7 lakhs, Rihand—Rs 35 lakhs Total cost—Rs 200 crores, sum proposed to be spent during Plan—Rs 40 crores

TRANSPORT, COMMUNICATIONS

Total — Rs 497 10 crores

For railways, the programme is primarily one of rehabilitation Provision for new lines over five years is Rs 20 crores

For roads, out of a total of Rs 108 crores, a quarter is to be spent on national highways, the rest on State roads The provision includes a sum of Rs 2 crores for the Ganga Bridge to link north and south Bihar It is estimated 16,000 to 17,000 miles of village roads can be constructed through local effort

For ports, there is a provision for Rs 12 crores for Kandla Rs 8 crores for port facilities for oil refineries and Rs 12 crores as loan to port authorities for rehabilitation and modernization

For civil aviation, Rs 9 5 crores for purchase of new aircraft and compensation for existing air companies

SOCIAL SERVICES AND REHABILITATION

Social Services—Rs 339 81 crores

Rehabilitation—Rs 85 crores

Assistance to voluntary social welfare organizations—Rs 4 crores

Pre University education (Centre)—Rs 20 crores

Water supply and drainage (States)—Rs 39 crores

150,000 houses for industrial workers (six industries) —Rs 38 5 crores

Development of Scheduled Tribes (in addition to Rs 29 crores)—Rs 9 crores (by way of Central grants)

Community Development Projects	Rs 90 crores
National Extension Service	,, 3 ,,
Local Development Works	,, 15 ,,
Relief Activities in scarcity areas	,, 15 ,,
Rural electrification	,, 27 ,,

Out of a total grant of Rs 15 crores for promoting local development works three crores were provided for 1953-54 Out of this 2 5 crores were distributed as follows —

Assam Rs 6 30 lakhs, Bihar Rs 28 20 lakhs, Bombay Rs 25 20 lakhs, Madhya Pradesh Rs 14 90 lakhs, Madras Rs 40 20 lakhs, Orissa Rs 10 30 lakhs, Punjab Rs 8 90 lakhs, Uttar Pradesh Rs 44 30 lakhs, West Bengal Rs 17 40 lakhs, Hyderabad Rs 13 10 lakhs, Mysore Rs 6 35 lakhs, PEPSU Rs 2 40 lakhs, Rajasthan Rs 10 70 lakhs, Saurashtra Rs 2 90 lakhs, Travancore-Cochin Rs 6 50 lakhs Ajmer Rs 50,000, Bhopal Rs 60,000, Bilaspur Rs 10,000, Coorg Rs 15,000, Delhi Rs 1 20 lakhs, Himachal Pradesh Rs 70,000, Kutch Rs 40,000, Manipur Rs 40,000, Tripura Rs 40,000 and Vindhya Pradesh Rs 2 50 lakhs

The balance of Rs 50 lakhs was reserved for grants to be made by the Ministry of Finance on the advice of the Planning Commission

Out of the Local Development Works grant for 1953 54 Rs 20 lakhs were allotted for student voluntary works and the running of youth camps

SOME EXPECTED RESULTS

National income 1950-51—Rs 9,000 crores

National income at end of Plan—Rs 10,000 crores

Increase in national income—11 per cent

Additional salaries and wages (1955-56)—Rs 134 crores

The estimates of net output in 1955-56 in rupees hundred crores on the basis of 1948 49 prices is given below

NATIONAL INCOME	87 1	100 0

A review of the progress of the Plan during the two years 1951 53 was presented to Parliament by the Minister for Plannings, Irrigation and Power in May 1953 The more important points of the review are given below

The total expenditure on the Plan during the first two years amounted to Rs 585 crores, as against the planned outlay for the entire period of Rs 2 069 crores Thus over 70 per cent of the expenditure was to be incurred during the remaining three years During the period, the Central assistance to the State Governments amounted to Rs 71 7 crores

Industrial production went up by about 15 to 20 per cent over the level of 1950 51 The industries which recorded an increase in production were cotton textiles cement, iron and steel, paper and paper board, sewing machines, bicycles rayon and jute goods

Additional area irrigated by major projects, 1 42 million acres, New power generated 315,000 kW

Increase in the production of agricultural crops since 1951 was—jute 14 lakhs bales, cotton 3 9 lakh bales, sugarcane 0 3 million tons, and food grains 1 15 million tons Agricultural acreage has increased by six million acres

Fifty eight locomotives were produced at the Chittaranjan Works, where as from January 1953, 70 per cent of the component parts of locomotives were being produced

Railway coaches manufactured in 1951 52 numbered 643 Between April 1951 and December 1952, 8,000 railway wagons were also manufactured

Additional coastal shipping tonnage of 77,000 tons was acquired and six ships were built at the Vishakapatnam shipyard

An aggregate length of 380 miles of national highways and strategic roads was constructed and 1 050 miles of existing roads were improved Seven large bridges were constructed

Important State industries which went into production were the Sindri Fertiliser Factory, the Chittaranjan Locomotive Works the Indian Telephone Factory, the Indian Rare Earths Ltd, the new mint at Alipore, the Machine Tool Prototype Factory and the Ambernath (Defence Industry) Factory

Fifty-five community projects were started in October 1952, and a comprehensive national extension service scheme, covering 120,000 villages was also formulated

SPECIAL GRANT FOR EMPLOYMENT

In October 1953 it was decided to increase the expenditure on the Five-Year Plan by Rs 175 crores for financing new specific schemes, which will simultaneously expand employment potential and check growing unemployment in the country

It was also decided that the programme of rehabilitation of displaced persons should be extended to the full planning period instead of ending it in 1953-54

The Deputy Chairman of the Planning Commission, Mr V T Krishnamachari, who addressed the Council before it adjourned, urged the States to tap all possible sources for raising additional funds, including betterment levies, enhancement of water rates and floating of loans for accelerating economic development

Positive action towards relieving unemployment was to be taken on the following lines

1 Establishment of Industrial Finance Corporations in States, 2 Central assistance to States for initiating schemes to end chronic scarcity, 3 Grants for road building activities and execution of small power projects, and 4 Expansion of technical training facilities

A communication was sent to the States indicating clearly the nature of the schemes which would be considered eligible for inclusion under the expanded programme These schemes were to be strictly related to the Plan and were also to be capable of producing results within the planning period

The break up of this investment was Rs 45 crores for extending the rehabilitation programme for the remaining period of the Plan under which refugee townships would be developed, Rs 10 crores for a road programme and Rs 15 crores for port, health, education and housing schemes

The road programme was initiated while the housing scheme was already under way

The additional investments totalled Rs 70 crores

In respect of States, new schemes to introduce permanent improvements in scarcity areas in 12 States and to raise the purchasing power of the people in these areas would cost Rs 35 crores

For these purposes, the Centre was to give the States 50 year loan of Rs 40 crores bearing no interest for the first five years

Other items are Rs 5 crores for setting up State Finance Corporations and assistance to small scale and cottage industries, Rs 2 5 crores for installing thermal power sets in small towns

CENTRAL ASSISTANCE IN THREE YEARS

The Central Government, in the first three years of the Five-Year Plan period, gave assistance to the States to the extent of Rs 27 61 crores in the shape of grants and Rs 250 crores by way of loans for the execution of the Plan

Grants were divided into seven categories

They are, food production, community projects, basic and social education, cottage and small-scale industries, assistance under Article 275 (1) of the Constitution, natural calamities and special development grants for Part "B" States

The amount paid to Part "A" States on this account was Rs 1,030 lakhs, Rs 118 lakhs, Rs 4 lakhs, Rs 7 lakhs, Rs 539 lakhs and Rs 280 lakhs, respectively making up a total of Rs. 1,980 lakhs

A sum of Rs 780 lakhs was distributed as grants to Part "B" States under the same seven categories of assistance

So far as assistance from the Centre to deal with natural calamities was concerned, Assam received Rs 49 lakhs, Bihar Rs 111 lakhs, Madras Rs 72 lakhs, West Bengal Rs 40 lakhs and Saurashtra Rs 30 lakhs

A large portion of the Central loans to States amounting to Rs 250 crores was for river valley projects

Part "A" States received loans aggregating Rs 213 crores, of which river valley projects accounted for Rs 114 crores and Rs 42 crores went for development schemes

Further, Rs 29 crores were given for rehabilitation purposes, Rs 22 crores for minor irrigation, Rs 2 crores for industrial housing, Rs 48 lakhs for community projects and Rs 2 crores for natural calamities

Part "B" States received an aggregate loan of Rs. 87 crores

Punjab, where the Bhakra Nangal project is in execution, was the largest recipient of Central loans, amounting to Rs 62 crores (Rs 54 crores for river valley works)

West Bengal, with the D V C, came next, receiving a loan of Rs 48 crores and Orissa with the Hirakud Project received Rs 31 crores

The total revenue receipts in Part "A" States were in 1951 52 Rs 315 6 crores in 1952 53 Rs 336 90 crores and in 1953 54 Rs 350 5 crores

So far as Part "B" States are concerned, the aggregate revenue was Rs 106 70 crores, Rs 110 91 crores and Rs 115 29 crores, respectively

In the three years of the Plan period the total State revenue receipts were Rs 1,335 crores

While direct Central assistance loan and grants amounted to Rs 300 crores, according to the Schedule, the resources expected to be raised by the States fell short of the targets

PROJECTS UNDER FIVE-YEAR PLAN*

THE following is a list of the projects under the Five Year Plan given State wise The first figure in brackets gives the total cost in lakhs of rupees, and the second figure the investment under the Plan in lakhs of rupees

CENTRAL GOVERNMENT (284,27 , 173,82)

Bhakra Nangal (132,90), Harike (13,80), Damodar Valley (74,98), Hirakud Dam (62,59) Investigations (2,83)

The five year investment is as follows Bhakra —77 50 Harike—10,62, Damodar—41,70, Hirakud—44,00

ASSAM (2,85 ; 283)

Navigation, embankment, drainage (1,00, 1,00), Protection of Dibrugarh (1,00 , 1,00) Umtru Hydro Electric (85 , 83)

BIHAR (25,34 , 16,82)

The following are the irrigation projects — Three hundred tube wells in north Bihar (1 83, 1,74), Tube wells in south Bihar (1,48 , 8), Drainage flood protection (3,75 , 1 18), Sakri Tower Valley (45 10) Triveni Canal Extension (28 , 23), Emergency Pumping (93 , 93), Three hundred tube wells in sugar factory areas (1,61 , 1,61), Sakri Upper Valley Irrigation (93 53), Further 200 tube wells in south Bihar (98 , 98), Irrigation dams and weirs in hilly districts (2 00 , 1 , 8)

The following are the power projects —P B B E B Emergency Tube wells Scheme (84 , 61), Dehri Sasaram lift irrigation and electrification (67 , 54) Gaya electric supply (80 64), Hazari bagh electric supply (33 , 28) Kodarma and Mica Mines electrification (46 4), Coal mines area electrification (3,97 1,50) Taking over of derelict electric supply (33 , 18), Giridih electric supply (— , 18), Giridih Madhopur Jasidih electric supply (27 , 27), North Bihar tube wells and electrification (1,77 1,71) Buxar tube wells and electrification (47 27) Thermal power station in north Bihar (1,10 , 46)

BOMBAY (39,77 , 33,12)

The following are irrigation schemes — Ganapur Storage (3 34, 2 34) Ghatprabha Left Bank Canal (5 45, 4,4) Mahi Right Bank Canal (4 25 , 4 01), Ramand Tank (2 19), Kolchi Weir (11 7) Tower Tapi Valley Stage I (12 16 , 11 1) Revised estimates for Rs 29 11 lakhs are under examination

The following are power schemes Radha nagari Hydro Electric (2,07 , 85), Kolhapur emergency irrigation and city conversion (29 , 17) Jog distribution (2 13 2,13), Chola Power Station (2,95 , 2 67), North Gujarat Electric Grid (2 51 , 1,61) South Gujarat Electric Grid (3 21 2 30), Electrification of towns, villages (96 , 70)

MADHYA PRADESH (17,53 , 9,08)

The following are irrigation schemes —Areetank in Chindwara (32 18) Gangalpara (30 30) Bargoor (22 22) Gondh (75 , 65) Dudhwa (1 50 , 1,13), Sampna (30 , 30), Dukrikhera (30 , 50)

The following are power schemes —Central Thermal Station at Nagpur (4,85 96), Distribution (36 35), Akola Power Distribution (3,71, 218) Gondia extension (33 26) Northern Grid Jabalpur Katni (55 41), Raipur Pilot Station (84 , 32) Power Station, Ballarpur (2,00 , 1,34), Pench Valley Scheme (55) Others (65 , 13)

MADRAS (127,41 , 84,32)

The following are irrigation schemes —Lower Bhavani (9,61 4 94), Malampuzha Reservoir (3,80 , 3,02), Mettur Canal (2,45 , 2,27), Rallapad 2nd stage (58 50), Pomperu Drain (96 41) Cauvery Delta Drainage (30 2), Manimuthar Project (3 98 , 3,92) Upper Pennar Project (84, 84) Bhiravanitippa Project (1 02 , 102), Aranlar Scheme (95 95) Walayar Scheme (1,00 , 100), Mangalam Reservoir (45 45) New G M F Scheme in charge of P W D (4,04 , 3,35), Tungabhadra (19,70 , 11,40)

The following are power schemes —Moyar Hydro Electric Scheme (4 64 , 1,41), Pykara 3rd stage extensions (4 89 2 08), Papanasam 2nd stage extensions (3,36 1,99) Machkhund Hydel Scheme (6,82 4 32), Machkhund Transmission Lines (8,03 , 4 5), Madras Plant Extensions (10 43 , 7,71), Nellore Thermal Scheme (1,01 , 41), Madras Mettur Interconnection (2 18 , 95), Transmission line and distribution (23,93 17,39), Tungabhadra Hydel Scheme (7 94 , 6 43), Acquisition of electrical undertakings (4,50 , 3,00)

ORISSA (12,76 , 6,91)

The following are irrigation schemes —Minor Irrigation (4 02 , 3,00)

The following are power schemes —Daduma Transmission Scheme (2,64 81), Rural Electrification Scheme (50 1 90), Others (91 , 43) Daduma Hydro electric (Orissa s share) (3,26 , 1,84) Hirakud Power Utilization Scheme, 1st stage (1,43 , 64)

PUNJAB (4,91 , 3,64)

The following are irrigation schemes —Dera Babananak Tube well Scheme (12 , 12) Ahwala Tube well Scheme (10 , 10), Extension of irrigation to arid areas of Jandiala and Gurdaspur Division of U B D C from main line (15 , 1) Excavation of new distributary of Kasur Branch (24 , 17) Kiran Nallah (16 14), Raising banks of channels and giving temporary shoots during Kharif (1,1 89), Jagadhari Tube well Scheme (1,33 88) Other schemes (1,07 , 81)

The following are power schemes —Jagadhri Tube wells Scheme (59 , 38)

UTTAR PRADESH (78,74 , 33,21)

The following are the irrigation schemes — 600 State tube wells in Western Districts (1 80 33) 50 additional tube wells in P W Circle (P) (17 10) 200 additional tube wells in P W Circle (W) (71 , 56), 100 State tube wells in Gorakhpur, Basti and Deoria Districts (30 , 12) Extension of pucca lining on tube well guls (1 91 , 1,51) 440 State tube wells in the Districts of Shahjehanpur Sitapore etc (2,30 , 2 09), 803 miles of extension of Sarda canal (49 , 11) 1 062 miles of extension of Sarda canal (90 , 52) Pratapgarh Branch (50 , 37), Trans Kalyani project (60 50) Supra Dam (71 , 26) Belan and Tons canals (1 93 1 83) Kabrai lake (19 , 14) Construction of 5 293 State tube wells (26,49 , 5 00) Lining, irrigation channels guls and canals (90 20), Reservoirs and Bundhis and canal systems including Majhgawar in southern Uttar Pradesh (7 33 , 500), Contour guls and small channels in Hill Districts (90 , 27), Other schemes (1 31 , 22)

The following are the power schemes — Mohammadpur Station (1,30 , 31), Sarda Power House (6,74 , 3,43), Pathri Power House (2,59 , 2,31), Gorakhpur Power House (48 , 16), Ganga Transmission lines (1 00 , 70), Sarda Transmission lines (4,37 , 3 22), Eastern Area Power Station (4 57 1,66), Kanpur Electric Supply administration (7,41 , 1,97) Small Hydel schemes in Hill Districts (60 , 20), Sohawal Power House (24 , 8)

WEST BENGAL (20,74 ; 16,13)

The following are the irrigation schemes — Mayurakshi (15 50 , 12 44) Suvankar Damra (13 , 10) Sonarpur Arrah (1,05 , 1,05), Bagjale Ghuni Jantragachi (99 , 99), other schemes (1,74 , 80)

The following are the power schemes —North Calcutta rural electrification scheme (1,08 61), Appointment of Power Engineer Scheme (16 , 10), other schemes (9 , 5)

HYDERABAD (40,07 , 28,00)

The following are the irrigation schemes — Tungabhadra (23,04 17 09), Rajolibunda (4 30 , 3 14) Godavari First Phase (4,41 , 3,59), Koilsagar (67 47), Sarlasagar (21 , 15), Bendsura (54 , 30), Khasapur (32 31) Minor Irrigation (70 , 70), Bhimanpally (8 , 61)

The following are the power schemes — Nizamsagar Hydro Electric Project (1,75 59) Tungabhadra Hydel (1st phase—Civil Works) (50 , 48), Ramgundam Thermal (3,50 2 14)

JAMMU AND KASHMIR (4,97 , 3,61)

The following are the irrigation schemes — Sindh Valley Irrigation (78 , 63), Land Reclamation Works (25 , 14), Other Schemes (37 35) Remodelling Pratap Canal (40 20) Vishow Canal (25 , 25), Ferozepur Nallah (14 4), Kharbutang Canal (12 , 9), Extension of Zamugar Canal (12 , 2), Remodelling of Tar and Dibb Kuhls and Sindh River (13 , 4) Mawar Canal (11 , 6), Doda Canal (10 , 3) Romushi Canal (10 10), Narvaw Canal (10 4) Other schemes (13 , 7)

The following are the power schemes — Sindh Hydro electric project (1st stage) (1,03 , 93), Transmission line to Jammu from Joginder nagar (28 , 26) Transmission and distribution to Kandi area (37 , 18), Other schemes (18 18)

MADHYA BHARAT (6,13 , 556)

The following are the irrigation schemes — Mohi Bassiya and Bashkan dam (44,44) Borad (80 , 80) Minor irrigation works (2,15 , 2 04)

The following are the power schemes —Central Power House at Indore, Installation of 3,000 kW reconditioned plant at Indore H T from Indore and remodelling lines at Ujjain (1,76, 141) Extension of power plant and remodelling of mains at Gwalior (55 , 48), Rural electrification (17 , 17), Others (26 , 22)

MYSORE (47,36 , 19,84)

The following are the irrigation schemes — Constructing a Reservoir across the Bhadra River near Lakkavalli (20,00, 1 80), Anicut across Tunga River near Sakrebyle (2 00, 1 49), Reservoir across Nugu River (2 20 , 1 90), New tank across Junigehalla (21, 12) Normal expenditure of Krishnarajasagar and allied works in Visweswarayya Canal area (50 50), Reservoir across Salur Halla at Ambligola (18 16), New tank across Suvarnamukhi River at Kariyala (20, 20), Other schemes (1,78 93)

The following are the power schemes —Normal Capital Works (3,20 , 3,20), Mahatma Gandhi Hydro Electric Works (8,33 , 8), Frequency Conversion (30 30), Shimsha Extension (3,20 , 3,11), Extension of transmission lines (1,63, 1,63), Installation of Stepdown Station (1 16 , 1,16), Distribution (2,02 , 2,02), Power supply to irrigation pumping sets (40 , 40), Others (survey of projects) (3 , 3)

PEPSU (2,36 ; 64)

The following are the irrigation schemes — Remodelling of canals (16 , 14), Others (2 , 20)

The following are the power schemes — Electrification of Pepsu towns (2,00 , 30)

---

* The investment does not necessarily meet the total cost Nor does it follow that the projects listed below will be completed before the end of the plan period

Also, Madras includes Andhra

RAJASTHAN (11,24 , 5,45)

The following are the irrigation projects — Jawai Project (3,23 , 2 03) , Parbati Irrigation Project (50 50) , Gudha Irrigation Project (34 , 34) Kali Sill Project (16 , 16) , Other projects (8 , 2,00)

The following are the power projects —Power project (53 , 41)

SAURASHTRA (13,64 ; 6,88)

The following are the irrigation schemes — Ranghola (62 28) Machu (1,25 , 13) , Brahmani (1,00 80) , Sashoi (76 , 58) , Ghee (23 , 15) , Puna (16 , 13) , Surajwadi (29,16) , Moj (81 , 78) , Bhimdad (23 , 23) , Malan (12 38) , Aji (80 , 58) , Bhogava (50 , 30) , Ozat (90 , 10) Shetrunji and Bhadar (3 00 , 1) , Lift irrigation (6 , 6)

The following are the power projects — Establishment of thermal stations (2,62)

TRAVANCORE-COCHIN (23,80 , 15,13)

The following are the irrigation schemes — Peechi (1,73 1 10) , Chalakudy (1 20 98) , Perunchani (68 26) , Wadakkancheri (49 , 44) , Vembanad (80 80) , Neyyar Scheme (1,20 , 1 20)

The following are the power schemes — Palliwasal 2nd stage (2 30 1,60) , Sengulam Hydel (3,25 , 1 85) , Poringalkuthu Left Bank (260 , 1,35) , Transmission and Distribution (9,55 , 5 55)

PART 'C' STATES

AJMER Irrigation Schemes (11 , 11)

BHOPAL Bhopal Electric Power Extension Scheme (28 , 28)

COORG Bulk Purchase of Power from Mysore (35 , 35)

KUTCH Major irrigation works including wells (91 , 91) , Power Project Acquisition of Electricity Undertakings (11 11) Rural Electrification (12 , 12) Total (114 , 114)

MANIPUR Hydro-electric scheme (12 12)

TRIPURA Nationalisation of Electric Supply Company, Agartala (7 , 7)

VINDHYA PRADESH Power project (51 51)

HIMACHAL PRADESH Medium irrigation projects (80 80) , Power installation of Hydel Plants in Mandi, Chamba and Mahasu and extension of electricity from Mandi to Sundarnagar (13 13) Total (93 93)

COMMUNITY DEVELOPMENT PROJECTS

IT is proposed that during the Plan period 1951 56 the Community Development Projects (also called the National Extension Service) should cover one fourth of the country's villages

This means the initiation of work on 1,200 Community Development Blocks

Each Block would comprise 100 villages covering about 160 sq miles a cultivated area of about 90,000 acres and a population of about 66 000

Work on 55 projects (each is about four and a half times the size of a Block) started on Oct 2, 1952 They covered about 1,600 villages with a total population of 12 millions and a land area of 15 million acres (For list and location see below)

In December 1952 a supplement to the first operational agreement was signed, whereby 55 new Development Blocks were to be started (For list and location see below)

The two together are regarded as being equivalent to about 300 Development Blocks

The estimated expenditure on each Block is Rs 45 lakhs

The programme for the rest of the National Extension Service (900 Blocks) will be as follows

1953 54—180
1954 55—270
1955 56—450

It is proposed that out of these 900 Blocks 400 should be selected for intensive development on the lines of the Community Projects The programme proposed is as follows

1954 55—150
1955 56—250

It is estimated that there would be about four Blocks in each district in a State out of which one or more would be selected for intensive development

Generally speaking a project is to be completed in three years, the period being broken into five stages conception, three months, initiation six months, operation 18 months' consolidation, 6 months and finalization, 3 months

The majority of the development Blocks are under the Community Projects Administration (CPA), the rest of the Blocks and the training centres for the staff are under the Ministry of Food and Agriculture

COST

Total cost of programme—Rs 156 2 crores
Share of Centre—Rs 107 2 crores
Share of States—Rs 27 0 crores
Loan for short term credit—Rs 27 0 crores
Total cost during Plan period—Rs 101 6 crores
Share of Centre during Plan period—Rs 73 3 crores
Share of States during Plan period—Rs 18 0
Loans for short term credit—Rs 15 3 crores
Recurring expenditure—Rs 21 7 crores
Non-recurring expenditure—Rs 21 crores
Cost of single Development Block for 3 years—Rs 7 5 lakhs
Share of Centre—Rs 3 25 lakhs
Share of State—Rs 1 25 lakhs
Short term loans —Rs 3 lakhs
Cost of single Intensive Development Block for 3 years—Rs 15 lakhs
Share of Centre —Rs 12 07 lakhs
Share of State—Rs 2 93 lakhs
Allotment under Five Year Plan—Rs 90 crores
American contribution under Technical Co operation Programme (1952 and 1953)—$10 596 000
American contribution (Ford Foundation) for 1952 and 1953—$3 023,000
(For more details about costs see below)

TYPES OF PROJECT

Development projects will be of three main types First of all there are envisaged the so called "basic community development projects, consisting of 300 villages and some 200 000 villagers, in which the primary emphasis will be on raising agricultural production, with some work on public health and sanitation education and road building The smaller basic development ' blocks ' consisting of 100 villages will have exactly the same programme and the same emphasis on agricultural improvement

All except 5 Development Blocks in West Bengal are of this type

Second, there are to be the so-called "composite" development projects and blocks, in which emphasis will be on development of small industries as well as on agricultural production The industry phase of these "composites it is proposed, will be patterned after the industry development project in Nilokheri and Faridabad

There are 8 blocks of this type, all in West Bengal

The third main type of project is a training centre for instructing village workers Each of these centres would be located either in or nearby rural development areas to permit the students practical on the job training in the villages

Substantially the proposed programme aims at these objectives in each village two surface wells or other facility per village to assure a safe, clean drinking water supply , tube wells for irrigation in those areas where tube wells can be sunk (approximately a tenth of the proposed projects are in tube well areas) , in other areas, assistance to canal, tank and well construction for irrigation purposes, with the proposal that at least half the land in each village be given improved irrigation , reclamation of culturable waste land where feasible , sanitary services plus improvement of village drainage as a sanitation measure , improvement of roads to link village to village , and facilities for primary and adult education

Included in the plans for each project and block is the development of a Mandi unit for each 15 to 25 villages where one does not already exist Under present proposals this Mandi unit would have a dispensary and health centre reaching out to the villagers through mobile units and serviced by a health visitor midwives and the sanitary inspector It would also have a transport and tractor servicing centre, a centre for marketing and shopping, a storage godown for agricultural produce and veterinary centre

FORD FOUNDATION

The second part of India's over all community development programme is that which is to be supervised by the Ministry of Food and Agriculture, with financial aid from the Ford Foundation This programme was put under way many months earlier than that of the Community Projects Administration

Part of this programme is the setting up of 15 community development projects, which though smaller (only 100 villages each) propose exactly the same objectives and general programme for agricultural development as those under the Community Projects Administration Plans and budgets have now been approved for fourteen of these projects

Experience at various successful agricultural projects carried on in India over a period of time have led to estimates that in four years a community development programme following these general lines can bring about an increase in food production of roughly 50 per cent in each area In addition there can be an increase in cash income per village of some 35 per cent

The second part of this programme is the establishment of training centres for village workers and project supervisors—the critical core of the whole community development programme of both the Planning Commission and the Food Ministry For each of the large 300 village projects will need a staff of 103 Indian village workers and 22 Indian specialists in agricultural work public health and education The smaller 100 village ' blocks ' will each require about a third of that number This means that a total of roughly 7 500 trained workers must be developed in India as rapidly as possible

For the Basic Community Development Project, Basic Development Blocks and Composite Blocks financial aid will come from the Indo American Development Fund, while for the Development Projects, Training-cum Development Projects and Training Centres financial aid will come from the Ford Foundation

The former group will be supervised by the Government of India Community Projects Administration, and the latter by the Ministry of Food and Agriculture

NATIONAL EXTENSION ORGANIZATION

It is estimated that about 84 000 persons will be needed to put the Community Development Projects through

The administrative structure is somewhat like this

At the very top in Delhi is the Community Projects Administration itself under the Planning Commission which is called the Central Committee for this purpose

The Committee is assisted by an Advisory Board consisting of the Secretaries of the Central Ministries of Food and Agriculture, Health, Education, the Additional Secretary to the Ministry of Natural Resources and Scientific Research and the Government of India s nominee on the Indo-U S Technical Fund

The executive head is designated Administrator of Community Projects, and his office is designated Community Projects Administration It consists of a small secretariat staff and a number of technical experts The C P A is assisted by a team of advisers drawn from the various Central Ministries

In each of the States there is a State Development Committee consisting of the Chief Minister and Ministers in charge of the development departments, for laying down general principles

There is a Development Commissioner who acts as secretary of the Committee He is the leader of a team consisting of the heads of the development departments or secretaries to Government in those departments In some States the Chief Secretary himself may be the Development Commissioner In others States it may be someone else with the rank of an Additional Chief Secretary In any case his rank is never below that of a Secretary to Government

At the District level there is a District Development or Planning Committee This Committee will consist among others of the district heads of the development departments and Chairman and Vice Chairman of the District Board

The Collector of the District will be the Chairman of this Committee, and the District Development officer (also called Extension or Planning Officer) will be the secretary

At the sub-divisional level the Revenue Divisional officer may act as the Extension or Development officer or there may be an assistant to him who will be entrusted with the work of an Extension Officer

The core of the whole organization is the multi-purpose village worker (Gram Sevak) who is directly in touch with the villager and instructs, guides and educates him in his day to day work, and the technical supervisor whose duty is to supervise the work of a group of the village level workers

A multi-purpose village worker will generally be in charge of about 10 villages

The agency in the village through which much of the administration will be carried on such as distribution of improved seeds will be the village panchayat

In each project area there will be seven Social Education Organizers, three of whom will generally be women Of these seven one will be the Chief Education organizer

The trained technical personnel includes besides, of course, the village level workers and social education organizers the following categories agricultural extension supervisors, veterinary doctors, co-operative and panchayat officers, school teachers, doctors, compounders, sanitary inspectors, lady health visitors, midwives, engineers, overseers, mechanics

The existing staff of the various development departments will be absorbed in the N E S organization Thus it can be assumed that about one-fourth of the staff required already exists in the area

Thirty four centres for training multi purpose village workers and technical supervisors will be set up Of these 31 were already in working order at the time of writing (Nov 1953) At these centres 1,430 village workers were under training, and 1,299 had already been trained and sent out Of the supervisory personnel 199 were under training, and 260 had been trained and sent out

Five centres for training social education organizers were started on April 1, 1953 These centres are situated at Nilokheri, Hyderabad, Gandhigram, Shantiniketan and Allahabad Of these the centre at Allahabad will train Chief Social Education Organizers The training period will be six months

The centre at Nilokheri is administered directly by the C P A, while the others are run under the auspices of established institutions

The expenses of training the education organizers are shared among the Government of India, the T C A and the Ford Foundation

The following voluntary organizations engaged in rural uplift (outside the N E S organization) may be mentioned Bharat Sewak Samaj, Bharatiya Adimjati Sevak Sangh, Gandhi Smarak Nidhi, Kasturba Gandhi National Memorial Trust

Andhra Kamaravolu Ashram (Krishna Dist), Gram Seva Mandiram (Anantapur Dist)

Bombay Jana Seva Sangh

Bihar Adimjati Seva Mandal (Ranchi), Santal Paharia Seva Mandal (Deoghar), Bihar Harijan Sevak Sangh (Patna)

Madhya Pradesh Friends Rural Centre (Rasanlia)

Madras Gandhigram and Ambathurai (Madurai), Gandhi Ashramum (South Arcot)

Mysore Bharat Scouts and Guides, Bharat Seva Dal, Adult Literacy Council

Punjab Janta Sundhar Co-operative Society (Sonepat)

Rajasthan Rajasthan Sewa Sangh (Dungapur), Spree Somani Rural Uplift Centre (Jodhpur)

Travancore Cochin Y M C A (Narthandam).

West Bengal Calcutta University Institute.

BUDGET DETAILS

Some details about the major items about cost given above are as follows :—

Development Block —

Cost of staff—Rs 33,000 per annum.

Salary of Block Development officer	Rs	250-400 p m.
Salary of Social Education organizer	,,	125 p m.
Overseer with public health bias	,,	250 ,,

Transport, office equipment, building, stores	Rs	50,000	for 3 years
Local works	Rs	1,50,000	,,
Social education	,,	25,000	,,
Grants-in-aid to local institutions	,,	25,000	,,
Loan for minor irrigation works	Rs	1,00,000	,,
Loan for short term credit	Rs	3,00,000	,,

Total cost (includes items not shown above)	Rs	7 5	lakhs
Recurring expenditure	,,	1 5	,,
Non-recurring expenditure	,,	2 0	,,
Loan	,,	4 0	,,
Share of Central Govt (50 per cent of recurring and 75 per cent of non recurring plus loans other than short-term)	,,	3 2	,,
Share of States	Rs	1 25	lakhs
Short-term loans*	,,	3 0	,,

* Short term loans are to be provided through the Reserve Bank, Co-operative Societies and State Governments

Intensive Development Block —

Total cost for 3 years	Rs	15 0	lakhs
Personnel	,,	2 0	,,
Transport, office equipment	,,	0 23	,,
Tractors	,,	0 24	,,
Demonstration equipment	,,	0 10	,,
Extension sub quarters	,,	0 09	,,
Repair service centre	,,	0 05	,,
Marketing centre	,,	0 10	,,
Key village scheme	,,	0 29	,,
Irrigation	,,	5 00	,,
Reclamation	,,	0 25	,,
Dispensary (recurring)	Rs	0 10	lakhs
Dispensary (building)	,,	0 10	,,
Dispensary (equipment)	,,	0 10	,,
Drinking water	,,	0 50	,,
Drainage and sanitation	,,	0 25	,,
Education	,,	1 50	,,
Social education	,,	0 50	,,
Communications	,,	0 25	,,
Rural arts and crafts	,,	1 25	,,
Housing (staff and rural housing	,,	1 10	,,
Indian contribution	,,	13 6	,,
American	,,	1 4	,,
Recurring expenditure	,,	4 23	,,
Non recurring expenditure	,,	10 77	,,
Loans	,,	7 49	,,
Share of Centre (75 per cent of non recurring, 50 per cent of recurring plus loans)	,,	12 07	,,
Share of State Government	,,	2 93	

STATE-WISE DISTRIBUTION OF PROJECTS

An Operational Agreement signed in May 1952 provided for the starting of 55 projects

The total cost over three years is estimated at Rs 7 95 crores

The distribution and location of these projects is given in the following table

Assam

COMMUNITY PROJECTS ADMINISTRATION

1 Project—Cachar District
2 Project—Darrang District
3 Block—tribal area
4 Block—tribal area
5 Block—North east Frontier Agency

FOOD MINISTRY

6 Project—Kamrup District
7 Training centre

Bihar

COMMUNITY PROJECTS ADMINISTRATION

1 Project—Darbhanga—Monghyr Districts
2 Project—Shahabad District
3 Project—Ranchi District
4 Project—Patna District
5 Block—Santhal Parganas District

FOOD MINISTRY

SECOND SET OF PROJECTS

In December 1962 a supplement to the first operational agreement was signed whereby 55 new Development Blocks were to be started Areas were selected and the position on July 5, 1963 was as follows

Assam

3 DEVELOPMENT BLOCKS

1 North Lakhimpore Block consisting of 8 Mouzas of the Ranganadi Circle of the Lakhimpore District

2 Nowgong Block consisting of whole or parts of seven Mouzas of the Nowgong District

3 Lushai Hills, District Lushai Hills

Bihar

2 DEVELOPMENT BLOCKS

1 Shikarpur Development Block, District Champaran

2 Hura Development Block, District Manbhum

Bombay

6 DEVELOPMENT BLOCKS

1 Vallia Mahal and some villages in Jhagdia Taluk—Broach District

2 Kalol—Panchmahals District

3 Mandangad and some villages in Dapoli, Taluk in Ratnagiri District

4 Baglan in Nasik District

5 Shahada in West Khandesh

6 Indi in Bijapur District

Madhya Pradesh

4 DEVELOPMENT BLOCKS

1 Waraseoni Block District Balaghat

2 Bohuribund Block District Jabalpur

3 Chikhali Block, District Buldana

4 Bazag Karanja Block, District Mandla

Madras

6 DEVELOPMENT BLOCKS

Sites not yet finalised

Orissa

2 DEVELOPMENT BLOCKS

1 Sundargarh Block, District Sundergarh

2 Nayagarh Block, District Puri

Punjab

4 DEVELOPMENT BLOCKS

1 Taran Taran } Jullundur Division
2 Kulu } Jullundur Division
3 Thanesar } Ambala Division
4 Naraingarh } Ambala Division

Uttar Pradesh

7 DEVELOPMENT BLOCKS

1 Bah—District Agra

2 Bafaganj cum Jalalabad Basin of the river Sot in District Badaun and Shahjahanpur respectively

3 Deoband—District Saharanpur

4 Domoriaganj—District Basti

5 Dudhi District Mirzapur

6 Jaunsar Bawar cum Jaunpur Rawain Basin of the river Jamuna in Districts Dehra Dun and Tehri (Garhwal) respectively

7 Details awaited

West Bengal

3 COMPOSITE BLOCKS

1 Hab Block, Sub division Baraset, District 24 Parganas

2 Sonamukhi Block District Bankura

3 Dinhata Block, District Cooch Behar

Hyderabad

2 DEVELOPMENT BLOCKS

Proposals not yet received from the State Government

Madhya Bharat

1 DEVELOPMENT BLOCKS

Talen Development Block, Harsingarh Sarangpur tehsils, District Rajgarh

PEPSU

1 DEVELOPMENT BLOCK

Bhatinda Development Block, District Bhatinda

Rajasthan

2 DEVELOPMENT BLOCKS

1 Nagar Pahari Govindgarh (District Bharatpur Alwar and Jaipur Division)

2 Maulasar (District Nagore Jodhpur Division)

Saurashtra

1 DEVELOPMENT BLOCK

Limbdi Development Block District Zalawad

Travancore-Cochin

1 DEVELOPMENT BLOCK

Ambalapuzha Prakkad Thakazhi Nedumudi Champakulam and Kainkari consisting of the Pakuthies of Alleppey (excluding the Municipal area) Revenue District of Quilon

Bhopal

1 DEVELOPMENT BLOCK

Proposal has not yet been received from the State Government

Bilaspur

1 DEVELOPMENT BLOCK

Ghumarwin Block in Tehsils Sadar and Ghumarwin

Coorg

1 DEVELOPMENT BLOCK

Proposal has not yet been received from the State Government

Vindhya Pradesh

2 DEVELOPMENT BLOCKS

1 Panna Block in part of Panna and part of Pawai Tehsil in the Panna District

2 Jatara Block in the district of Tikamgarh

*

FOREIGN AID TO INDIA

FOREIGN aid to India comprises 1 aid from U N 2 loan from the International Bank of Reconstruction and Development, 3 loan and aid from the U S A, 4 aid under the Colombo Plan from Australia, Canada New Zealand and the U K, and 5 aid from Norway through the U N

The total aid or loan received from each of these agencies is given below

1 Aid from U N and subsidiary bodies (1952) —$ 1 05 million
2 Loan from World Bank (Aug 1949-Jan 1953)— $ 109 8 million
3 Aid from U S A (1952)—$ 91 5 million
4 Aid from Canada under Colombo Plan (1952) $ 28 8 million
5 Aid from Australia under Colombo Plan (1952)—£ 7 2 million
6 Aid from New Zealand under Colombo Plan (1952) —£ 625 000
7 Aid from Norway through the U N (1952) — kr 10 million (Rs 67 lakhs)

WORLD BANK

Loans from the International Bank of Reconstruction and Development are as follows (the figures are in million dollars)

	Amount*	Purpose	Period (in years)	Interest	Amortization starts
1949 Aug	32 8 (15 6)	Railways	15	4%	1950
1949 Sept	7 5 (3 6)	Land reclamation	7	3½%	1952
1950 April	18 5 (8 8)	D V C †	20	4%	1959
1952 Dec	31 5 (15 0)	Ind Iron and Steel Co	15	4½%	1959
1953 Jan	19 5 (9 3)	D V C	25	4¾%	1960
Total	109 8 (52 3)				

* Figures in brackets are in rupees crores † Damodar Valley Corporation

AMERICAN AID TO INDIA

AMERICAN aid to India can broadly be classified under three heads governmental institutional, and private

Governmental aid is channelled through the Indo U S Technical Co operation Programme which has been shaped to support the objectives of India's Five Year Plan and is now in its third year

U S Government contribution in the first year ended June 30 1952, totalled $52 759,888 In the following year it was $44 315,000, and for the year ending June 30, 1954 the U S Congress has appropriated funds totalling $93,565,000

Major institutional aid is given by philanthropic organisations like the Ford and Rockefeller foundations

Private voluntary contributions by individual Americans are distributed through several relief agencies, such as CARE

Large scale American aid to India began in 1951, when India was faced with a threatened famine Americans in large numbers voluntarily contributed hundreds of thousands of dollars worth of foodstuffs clothing and medicine This aid was channelled through various relief groups, which have continued every year to send large quantities of such items since

Also in 1951, the U S Government provided a loan to India of $190 million on easy terms for the purchase of nearly two million tons of food grains in the United States The loan is to be repaid in 35 years at an interest rate of 2½ per cent, with no interest due for a year and no principal due for five years

In addition the U S Government at that time specially re activated nearly 100 World War II Liberty type ships for quick transport of the grain to India, as there was an acute shipping shortage at that time

Technical Co-operation Programme—The Indo American Technical Co operation Programme is one of 35 such programmes of bilateral co operation of the United States and other nations in economic and social improvement These programmes are carried on in Central and South America, the Middle East, South and South east Asia and Africa Eighty per cent of all projects undertaken, world wide, are in agriculture, health and education

U S bilateral aid to these countries is founded on the belief that if America helps in the fight against hunger poverty, ignorance and disease it will thereby promote a stable and peaceful world

The Indo American programme in its present form, dates from the General Agreement between India and the United States signed on January 5 1952 In keeping with an annual basis of planning, this was supplemented on November 3 1952

During the first two years high priority was given to increasing agricultural production, although the programme has been steadily increasing in support of industrial development also It is expected that industrial phases will receive larger attention in the third year allocations

In the first two years of the programme, the United States has provided a total of $88,350 000 for the co operative undertakings under the programme and India has contributed Rs 72 3 crores (about $152 million) All projects support objectives of the Five Year Plan

Each year specific projects are worked out and detailed in what are called 'operational agreements' Under the 1952 programme 11 such operational agreements were concluded Under the 1953 programme nine of the 11 were supplemented and five new agreements were signed

Specific projects are suggested by the Planning Commission of the Government of India, discussed with the American Technical Co operation Administration (TCA) which has offices in New Delhi, and operational agreements are signed designating the scope of particular activities and the amounts in dollars and in rupees

A brief summary of these projects follows

Fertilizer Imports—(U S Contribution $14,580 927) In order to help make up the gap between India's own fertilizer production and the country's needs for increased agricultural production this project calls for import of a total of 186 000 tons of fertilizer largely ammonium sulphate Supplies were obtained in Japan Belgium, Western Germany and the United States Some 135 686 tons have already arrived in India

Expansion of Sindri Plant—(U S Contribution $77,000) In order to increase fertilizer production at the Sindri plant the TCA, at the request of the Government of India engaged experts who studied Sindri's facilities and made recommendations for expansion A team of Indian technicians was sent abroad to study fertilizer production TCA also has agreed to pay for engineering consultants to work with the Government of India on the planned expansion of Sindri

Iron and Steel Imports—(U S Contribution $16 885 000) This project also is designed to meet the needs of an increased agricultural programme Provision is made under the project for the import of 110 000 tons of iron and steel for use by village blacksmiths and for farm implement factories Of this nearly 50 000 tons obtained in the United States has reached India

Locust Control—(U S Contribution $451,000) Locust menace is a recurring problem in south Asia and the Middle East whose countries co operate in the annual campaign To support India's locust control organisation the Indo American programme is providing jeeps and other mobile equipment dusters and sprayers, along with the assistance of spraying planes operated by American pilots from the TCA regional locust control organisation Some 32 jeeps with trailers 20 power wagons 40 sprayers and dusters arrived for use in the 1953 locust campaign The spray planes after the close of the 1952 locust campaign helped with a campaign against rice bug infestation in Bihar and also trained Indian pilots in spraying techniques

Soil Fertility and Fertilizer Use (U S Contribution $200 000) Knowledge of what types of soils exist in various parts of India and how they will respond to use of fertilizers to achieve increased agricultural production is essential to any nation wide agricultural programme The Indian College of Agricultural Research (Pusa Institute), New Delhi, and other institutions have already done important studies in this field Under the Indo American programme, provision is made for supplying latest types of testing equipment to expand their programmes and the advice of technical specialists in developing the system

Marine Fisheries—(U S Contribution $2 462,000) This project provides for two major classes of equipment—diesel engines to power small fishing boats and permit them to go farther from shore and large fisheries equipment to enable large scale operations Also included in the project is provision for refrigeration plants to guarantee protection of the catch and refrigerated vehicles to enable fresh fish to reach a wider market

A group of Indian fisheries experts and an American fisheries adviser made a trip in 1952 to fisheries in Europe, America and Japan, to examine types of equipment suitable or adaptable to India On their recommendations orders were placed for new equipment for India

Tube wells—(U S Contribution $21,500,000) The tube well drilling project calling for 2,000 new wells in the first year and an additional 650 in the second is a direct way of increasing agricultural production by providing irrigation Most of these wells will be dug in the Gangetic plain of north India, where conditions are most favourable for this type of irrigation Each well will irrigate approximately 400 acres, or a total of more than 10 lakh acres

Ground Water Exploration—(U S Contribution $4 500 000) This project is to determine the prospects of drilling tube wells in parts of India other than the proved areas of the Punjab PEPSU U P and Bihar Exploratory wells will be sunk in almost all the other States of India under the project

Community Projects—(U S Contribution $10,596 000) The Community Projects programme is an organised planned approach to the problem of intensive development of India s villages Through this effort nearly 20 million villagers will be helped to learn better agricultural methods, wipe out malaria and smallpox, banish illiteracy and bring their whole area up to a higher level of economic development

Work started on October 2, 1952 in 55 project areas all over India A project area covers more than 300 villages and 250 000 persons Work on 165 additional development blocks was started on October 2 1953 each covering some 100 villages

The U S is providing transportation and other types of equipment for these projects Already 330 jeeps are in use

Also, American extension training specialists are provided to work with development officers of the States as well as with training centres in bringing to villagers the knowledge of improved agricultural methods

Village Workers Training—(U S Contribution $299 200) Thirty four training centres throughout India are now in operation instructing village workers These training centres are set up by the Government of India with the aid of the Ford Foundation and the U S Government

Also, five social education training centres and three public health workers training centres have been started American extension specialists assist the training centres in developing courses of study

Malaria Control—(U S Contribution $5,848,000) This project is designed to conquer, within three or four years, the most serious health problem of India There are an estimated 80 million or more cases of malaria a year, almost all among the rural population that produces the nation s food

The United States is furnishing supplies of DDT and various other types of malaria control equipment as well as expert assistance Ninety malaria units are in operation More than 41,000 tons of DDT has arrived in India, as well as 4 million anti-malarial tablets

Forest Research and Desert Afforestation—(U S Contribution $314,000) The Research Institute at Dehra Dun will be provided with new research equipment, including that for completion of a pulp and paper mill, under this project Part of the U S aid under this project will go to experiments in control of the spread of the Rajasthan desert by treeplanting and other means

River Valley Development—(U S Contribution $10,188,873) This project provides for purchase of heavy machinery, crushers, earthmoving and other equipment for work at India's various river valley projects, as well as for technical advice by construction engineers, dam designers and development specialists

Damodar Valley Project—(U S Contribution $285,000) This project provides for consulting engineering services and advice on the designs, specifications and construction of dams and other engineering facilities planned by the D V C Also provides engineering services for the Bokaro Thermal Plant

Building Materials and Low-Cost Housing Research—(U S Contribution $175 000) These two allied projects are aimed at improving the facilities of the Central Building Research Institute at Roorkee (U P) for developing and demonstrating indigenous building materials and for developing more economical methods of housing design and construction Two U S housing specialists are also provided

Labour Institute—(U S Contribution $100 000) Under this project a Central Labour Institute will be set up at Bombay to promote industrial efficiency and to increase industrial production by encouraging improvement in the safety, health and welfare of industrial workers

Lignite Development—(U S Contribution $250 000) This project provides for supply of equipment for experimental operation of the lignite deposits in Madras State An American mining expert supplied by TCA has been working with Indian experts in the investigation of the deposits, estimated to total perhaps 2,000 million tons

Allied Phases—The basic technical co operation approach rests on the exchange of knowledge and skills largely through the medium of technical specialists in particular fields or through the further training of individuals already doing specific kinds of technical work Under the Indo American programme, these phases are financed solely from U S funds in addition to those allocated under the Operational Agreements

This type of activity exists in several forms, although always at the request of the Government of India Special contract services, in which individual technicians or teams of technicians are engaged for specialised tasks, such as the Sindri and D V C projects, is one form Bringing American technical specialists to India is another Advanced training for Indian technicians in the United States is a highly important phase, in keeping with India s development plans An enlarging field is that of inter university exchanges, between Indian and American technical institutions

Technical specialists are provided by the United States in fields in which request is made by the Government of India Their salaries in India and travel to India are paid by the United States They are usually recruited for two year assignments, for which they obtain leave of absence from their regular employment in the United States

On July 1, 1953 there were 62 such American technical specialists in India Most of these were agricultural extension specialists Other fields were natural resources education, industry, health and sanitation, social welfare, housing and industrial hygiene

On July 1 1953 also, the number of Indian technicians who were in the United States or had returned after training was 176 Another 125 had been selected to go to the U S in three months to a year

Fields of advanced training include agriculture, forestry fisheries, health and sanitation education natural resources, industry, trade and industrial productivity transportation public works, public administration and labour and community services

The United States has also provided funds for inter university exchanges of technical knowledge between India and the United States Typical of these is the arrangement between Allahabad Agricultural Institute and the University of Illinois in 1952 This included assignment of various faculty and staff members from Illinois to work at Allahabad and advanced training for staff members of Allahabad at Illinois Several other such arrangements are under way or are nearing final form

OPERATIONAL AGREEMENTS

(Figures corrected to July 1, 1953)

No	Programme Year	Date Signed	Project	U S Contribution ($)	India s Contribution (Rs)

12	1953	Mar 27, 1953	Exploratory Tube wells	4,500,000	1,20,00,000
13	1953	Apr 20, 1953	Building Materials	100,000	1,00,000
14	1953	Apr 20, 1953	Low Cost Housing	75,000	1,50,000
15	1953	June 8, 1953	Labour Institute in Bombay	100,000	5,00,000
16	1953	June 25, 1953	Lignite Development in Madras	250,000	25,00,000

All the projects under the Indo-American programme are administered exclusively by the Central and State governments of India For example, the Central Ministry of Food and Agriculture has supervision of the fertilizer, iron and steel and fisheries projects It also directs the locust control and tube well projects

Procurement of equipment and supplies imported into India to implement the Indo-American programme is by the India Supply Mission at Washington and by the Technical Co-operation Administration at Washington, in association with each other or through such other arrangements as these two agencies agree to be desirable

The tube well project is an exception, since the contracts are signed in India after tenders are invited through the press

Projects covered by the operational agreements originate in this way A State government in India or the appropriate Ministry or other Central Government organisation is the source of each proposed project Suggested projects are transmitted to the Planning Commission which is responsible for setting broad domestic policy and general supervision of projects under the Indo American programme If the Planning Commission and TCA agree that a project proposal is within the scope of the Indo American programme, the Central Ministry concerned draws up a detailed operational agreement in consultation with the TCA technical and administrative staff Final details are worked out and the agreement is signed

Requests for TCA training awards similarly originate in the Indian States or the Central Government In the States they are presented through the department concerned in which the applicant is working and go to the Central Government Some originate directly in the appropriate Central Government ministries, and some in trade organisations

In addition the U S Government is a major contributor to the U N Technical Assistance Administration, which has extended aid to India in several fields

AID FROM FOUNDATIONS

The Ford Foundation has provided nearly six million dollars for several projects

It has allocated $2 344 000 to help establish and operate 34 centres to train some 7,000 village level workers for the community development projects Another $679 000 has been given by the Foundation to aid in the establishment of 15 pilot development centres Another grant of $1 940 000 provides for setting up a department of extension in each of five major agricultural colleges in India to impart specialised extension education Another $1 041 310 has been allotted for several other projects in the implementation of the community development programme

The Rockefeller Foundation also has extended aid to India in the field of public health, especially training of health personnel This programme has been in existence for more than two decades The Foundation has had one or more representatives in India since 1920, helping the Government of India and State Governments, at their request, to develop public health programmes

It supplied funds for the construction and equipment of the All India Institute of Hygiene and Public Health in Calcutta in 1932, and also aided in the setting up of seven rural demonstration health units

Apart from various training programmes in India, through 1952, the Foundation had given 168 fellowships and travel grants to qualified Indians for advanced studies abroad

Among other activities of the Rockefeller Foundation in India are a malaria control programme in Mysore State and the recently established Virus Research Centre in Poona

Rockefeller grants to India have totalled more than $2 532 000, in addition to all expenses of staff members resident in India, amounting to over a million dollars

The Watumull Foundation also has a sizeable programme for India in the fields of education and population control

PRIVATE AID

Impressive though the above figures may be, it is the private aid—both from individuals and voluntary welfare agencies—that reveals the extent of good-will that Americans bear towards India

For example, in the year ended July 1952 a total of more than $750 000 was contributed by private U S citizens for relief in India These contributions ranged all the way from a one-dollar gift from a five year old to the $200 000 allocation by the American Red Cross for aid to India

The number of gestures from individual Americans and small groups is legion Among the several group efforts in U S towns to combat food shortage was the 'Share a Meal With India campaign launched in Champaign Urbana a small town in the State of Illinois The local population contributed some $4,000 with which 42 tons of wheat was bought and sent to India in 1952 The response to a Harvard University drive to collect $1,000 was so good that $6,700 was collected

Housewives of the small town of Levittown, Long Island, collected three tons of canned and dried foods for Indian orphanages Individual donations are, of course, too numerous to mention A letter written by a nurse, Miss Dorothy Lynch, asking U S pharmaceutical firms to send samples of their products as gifts to India, resulted in a surprise gift of $20,000 worth of vitamin capsules from a single company

In addition to these private campaigns well-organised American relief agencies such as the Co-operative for American Remittances to Everywhere (CARE), the Christian Rural Overseas Programme (CROP) the American Friends Service Committee and the Church World Service, to mention only a few have dispatched large quantities of food, clothing medicine and other aid to India in the last few years For example, CROP has sent more than 550 tons of wheat and 1,500,000 pounds of food products and vitamins

Several of these relief groups yearly allocate a part of their funds towards relief in India but most of their members' individual gifts are channelled through CARE, which has standard food, clothing, tool and medical packages which can be sent to any country of the donor's choice, including India

CARE gift packages to India in three years since the programme started in March 1950 have totalled more than $500 000 in value including some 35,000 food packages, 2 538 ploughs, 1 380 textile packages, 299 midwifery kits 1 040 parcels of children's books and 95 large food packages to educational and medical institutions

A closely related programme to foster closer understanding between India and the United States is the so called exchange of persons programme Early in 1950, the India U S Fulbright Agreement was signed as sequel to the Fulbright Act of the U S Congress, which provides for the use of U S receipts from sales of World War II surplus property abroad for travel grants to students

The agreement provides for the utilisation of the rupee equivalent of up to $400 000 a year towards travelling expenses of Indian students to and from the U S and all expenses of Americans coming to India for study, research or instruction More than a hundred Indian students are awarded Fulbright travel grants every year while nearly one fourth of that number of Americans come to India annually under the programme

Another U S exchange programme under the Smith Mundt Act enables leaders of public opinion, both American and Indian in various fields to visit each other's countries Under this programme several prominent Indians visit the United States on study observation lecture tours every year and Americans come to India on similar tours

India is again a full participant in the U S programme of sharing its technical know how with other countries Hundreds of Indian experts and students go to the United States every year for observation and training in U S techniques

*

U. N. AID TO INDIA

IN 1952 India received assistance from the U N O amounting to $1 045 248, she had the help of 136 experts and 93 fellows In the same year India contributed $275 000 she gave the help of 84 experts and 105 fellows

The table below shows in a summary form the assistance that India has received from the various U N bodies The figures are in U S dollars

	1952	Earmarked for 1953	Approved for 1953	New projects for 1954
UN	214,873	204 026	96 509	100 681
ILO	41 644	101,600	82 600	94 500

FROM U N

Sindri fertilizer plant for 1953 (3 0 27 580) for 1954 (3 0 27 300)

National Instruments Factory for 1953 (1 0, 73) for 1954 (1 0 375)

Cottage industries for 1953 (1 0 8 300) Marketing of handicrafts for 1954 project continues

Ports and shipping for 1953 (3 0 21 430) One hydraulic surveyor and two dredging engineers for work on minor ports in Bombay State for 1954 project continues with 2 experts

Statistical quality control for 1953 (4 0 4 500) Four lecturers conducted training centres

Family planning for 1953 (2 0 9 040) With WHO assistance to organize study of rhythm method for family planning, for 1954 continues with one expert

Lignite utilization for 1953* (2, 0 10,000) To investigate nature of deposits in Madras State and prepare plans for utilization plant

Chemical and allied products for 1953 (1 0, 8 878)* for training staff in administration and accounting For 1953 (1 0, 7,665), for studying possibilities of manufacture of soda ash For 1953 (1 0 7 665)† for assisting in production of butyl alcohol and acetone

Machinery industry for 1953 (1, 0, 8 695) For assisting local production of moulds for plastic industry

Small industries for 1953 (1 0, 9 555) To assist in the manufacture of high tension insulators

Photogrammetry and map reproduction for 1953 (1 0 55 898) for 1954 (2, 0, no estimates) For preparation of large scale maps for hydro electric plants and irrigation schemes

Water resources development for 1953 (1 0 16 620) for 1954 (1 0 8 820) For arid zone research in Rajasthan desert

Telecommunications for 1953 (1 0, 6 465) For designing equipment for direct dialling facilities between main automatic exchanges

Visiting lecturers for 1953 (0 0 1 000) UN statistical experts were to be asked to deliver lectures at Indian Statistical Institute

Water resources development (1, 0, 16,620) under negotiation

Resources development in Damodar Valley (3, 0 22 129) under negotiation

FROM ILO

Employees State Insurance scheme for 1953 (3 3, 16,400) for 1954 (0, 1 no estimates) For advising Government and training personnel

Payment by result and production for 1953 (8 0 32 800) for 1954 (11 0 60 000) For setting up national productivity centre to train management and worker personnel

Development of handicrafts among plantation workers for 1953 (1 2 12 500)

Training within industry for supervisors for 1953 (2, 0 19 900) for 1954 (2 0 10 600) For help in introducing techniques of job instruction job methods job relations in a number of factories in the Ahmedabad region and the Sindri region Also for drawing up plans for a national institute

FROM FAO

Farm machinery for 1953 (11 2, 99 826) for 1954 (5 0 94 500) To help Central and U P Governments in land reclamation cultivation operations service training to operators, and maintenance and repair men working with agricultural machinery

Animal disease control for 1953 (5 0 73 707), for 1954 (5 0 63 800) For help in research and field programmes at Izzatnagar Institute

Agricultural institutes and services for 1953 (2 0 12 586) for 1954 (1 0 11 600) For help in improved tanning methods at training centre in U P

Agricultural economics for 1953 (2 0 12 700) To help Indian Council of Agricultural Research in research programmes and study groups and in theoretical statistics Project will continue in 1954

Fisheries development for 1953 (5 3 47 300) for 1954 (3 0 37 000) For help in inland fisheries and fisheries engineering in West Bengal For help in deep sea fishing in Bombay For help in fisheries community development in Travancore Cochin in the joint Government of India—Norway—U N project For help in designing improved fishing craft and gear

Forest development for 1953 (3 0 16 200) for 1954 (1 0 11 600) For help in manufacture of plywood and mechanical logging For advice on developing research and training facilities of the Forestry Research Institute at Dehra Dun

Nutrition for 1953 (3 0 21 377) for 1954 (1, 0 12,500) For advice on forest preservation centres in U P For training cafeteria workers to encourage consumption of non cereal foods

Land and water use for 1953 (0 0, 952) Travel costs of FAO mission in India

Animal production for 1953 (8 1, 88,900), for 1954 (6, 0, 77,500) To advise Bombay Government on methods of utilizing surplus milk, on improving the processing and bottling plant, on breeding programme To advise U P Government on sheep and wool production, on artificial insemination of live stock at Izzatnagar, on grassland fodder and forage crops

FROM UNESCO

Technology for development for 1953 (4 0 88 300) for 1954 (6 6 134 300) To help conduct engineering courses in the Indian Institute of Technology at Kharagpur Provision for hydro electric dam construction, civil engineering equipment worth $96 500

Indian National Scientific Documentation Centre for 1953 (3 1 51,700) for 1954 (3 0 41,600) $28 000 worth of books, journals and equipment

Central Water and Power Research Station, Poona for 1953 (1, 1 29,100) Photo elastic equipment worth $17 600

Institute of Paleobotany Lucknow for 1953 (1 0 11 900)

National Physics Laboratory for 1953 (1 0 17 000) for 1954 (1 0 8 900) For technical guidance on study of properties of materials at very low temperatures Equipment worth $9 000

Central Institute of Education for 1953 (1 2, 12 100) For training in child guidance

Ahmedabad Textile Research Institute for 1953 (1, 0 8 700), for 1954 (1 1, 9 200) For conducting textile research

FROM ICAO

Civil Aviation for 1953 (3 1 19 100) for 1954 (0 4, no estimates) For advice on aeronautical inspection air lines cost accounting, aeronautical communications

FROM WHO

Malaria and Insect Control in Terai for 1953 (3, 0 2, 000) For malaria control team in the Terai region of U P

Yaws Control for 1953 (1 0 8 500), for 1954 (1 0 10,270) For pilot project in Madhya Pradesh

Population studies for 1953 (2 0 13 500) for 1954 (2, 0, 14 873) For survey of family planning in New Delhi and rural area in South India

Physiotherapy Training Centre KEM Hospital Bombay for 1953 (2 0, 21 000) for 1954 (2 0 10 760) Equipment worth $5 000

Principal, Medical College Trivandrum for 1953 (1, 0 11 500) for 1954 (1 1 11 710)

Professor of Pharmacology, School of Tropical Medicine, Calcutta for 1953 (1 0 13 000) for 1954 (1 1 13 274) To develop School into teaching and research centre for training pharmacologists

Professor of Industrial Hygiene Institute of Hygiene and Public Health Calcutta for 1953 (1, 0, 8 000) for 1954 (1 1, 13 273) To organize and develop training and research department

Tuberculosis centres at Patna and Trivandrum for 1953 (7 0, 59 100)

Tuberculosis control including BCG, Calcutta and Madras for 1953 (7 0 46 000) for BCG alone, for 1954 (11 6 151 236) for TB and BCG To initiate two new TB demonstration and training centres at Calcutta and Madras For mass BCG campaign WHO is providing experts and UNICEF supplies and equipment worth $65 000

Visiting Team of Medical Scientists for 1953 (17 0 57,000) To demonstrate operative and other techniques

Food hygiene for 1953 (1 0, 3 900) To advise on abattoir meat hygiene practices, and utilization of meat by products

* Cancelled

† Cancelled in 1953 and is expected to be implemented in 1954

COLOMBO PLAN

Director, Bureau for Technical Co operation, P W E Curtin, (262 Secretariat, Colombo)

THE Colombo Plan was conceived at a meeting of the Foreign Ministers of the Commonwealth countries at Colombo in *January 1950*

A consultative committee was set up to consider ways and means of carrying out the desired co operative economic development This committee met at Sydney in May and proposed a six-year development plan and a scheme for technical assistance

In July and August 1950 the details of the Technical Assistance Scheme were worked out, and the constitution of the Council of Technical Co operation was proposed

The original members were Australia, Canada, Ceylon, India, New Zealand, Pakistan and the United Kingdom, together with Malaya and British Borneo These were Commonwealth countries, but it was contemplated from the beginning that all countries in the area should be invited to participate in the Plan on equal terms

At the London meeting of the Consultative Committee in September 1950 Burma Cambodia, Indonesia, Laos, Thailand and Viet Nam were represented by observers Viet Nam, Cambodia and Laos shortly afterwards became full members

Burma and Nepal attended the Karachi meeting in 1952 as full members, while Indonesia attended the Delhi meeting in 1953 as a full member

The United States of America has attended as a full member from the Colombo meeting of 1950

Thailand has sent observers to all meetings since the London meeting in 1950, while the Philippines had observers at the Colombo and Karachi meetings

The International Bank for Reconstruction and Development has maintained close liaison with the Committee in its work and has been represented at the Colombo and later meetings

Each of the Commonwealth and Colonial countries drew up their plans for future development over the next six years

These plans were finally issued under the title "The Colombo Plan" on 28th November 1950

As originally proposed it was a six-year plan and was officially launched on 1st July 1951 When the plan was launched the U S A became a member of the Consultative Committee

At present the members are Australia, Burma Canada, Ceylon, Cambodia, India Indonesia, Laos, Malaya, Nepal, New Zealand, Pakistan U K U S A Viet Nam

Two countries in this area which receive aid and are not members of the Plan are Philippines and Thailand

SALIENT FEATURES

Plan period Six years

Total sum allotted £1,868 million

Money to be allocated as follows Transport and communications 34 per cent, Agriculture including river valley development schemes 32 per cent Housing, health, education, 18 per cent, Industry and minerals excluding coal, 10 per cent, Fuel and power, 6 per cent

The distribution and cost of the programmes of the participating countries in million £s were as follows

	India	Pakistan	Ceylon	Malay and Br Borneo	Total	Percentage to Total
Agriculture	456	88	38	13	595	32
Transport and Communications	527	57	22	21	627	34
Fuel and Power	43	51	8	20	122	6
Industry and Mining	135	53	6	nil	194	10
Social Capital	218	31	28	53	330	18
	1,379	280	102	107	1,869	100

The following table gives details about these commitments by Co operating Governments as at 30th June, 1953

(Pound Sterling)

Country	Trainees	Experts	Equipment	Total
Australia	30 ,600	52 472	91 680	409 752
Canada	16,558	62 500		79 058
Ceylon	5,015	—	33,985	39 030
India	15 367	3 155		18 522
New Zealand	52 20	19 552	6 ,80	78,337
United Kingdom	93 806	146 900	740,100	980 806
TOTAL	488,581	284 579	832 345	1 605,505

The following table shows the expenditure by Co operating Governments as at June 30, 1953

(Pound Sterling)

Country	Trainees	Experts	Equipment	Total
Australia	220,377	39,787	29 659	289,823
Canada	143,219	53 863	—	197,082
Ceylon	597	—	1,789	2,386
India	12,114	1,132	—	13,246
New Zealand	80,811	24,744	7,732	113 287
Pakistan	—	—	1 215	1,215
United Kingdom	141,378	111,991	23,751	277,120
TOTAL	598 496	231 517	64,146	894,159

A Council of Technical Co operation was established and a £8 million fund set up for providing technical assistance

The cost of the Bureau during 1952 and the first half of 1953 was £20,000

Under the technical scheme India offered £750,000, Ceylon £400 000, Pakistan £161,290

The anticipated results in 1956 57 were as follows 1 An increase in cultivated land of 13 million acres (3½ per cent), 2 An increase in irrigated land of 13 million acres (17 per cent) 3 An increase in the production of food grains of 6 million tons (10 per cent) 4 An increase in electric power of 1 1 million kW (67 per cent); 5 An increase in the number of universities and technical training institutions from 3 000 to 3,670 6 An increase in the number of technicians from 150,000 to 200 000

Out of a total expenditure of £1 868 million £1 084 million were to be met from internal resources and £784 million from external sources

The external sources were enumerated as follows sterling balances (£246 m), private investment loans floated by private investors in London and other financial centres loans from the International Bank for Reconstruction and Development grants and loans from other Governments

FINANCE

The financial assistance promised by the various Governments was as follows

Australia £51 25 million for the plan period, Canada $25 million for each of the first two years, New Zealand £ one million for each of the first three years U K £ 300 000,000 for the whole six year period

During the first year of the Plan the following sums were made available by the supplier countries

Australia £(A) 8 7 0 000 Canada $25 000 000 New Zealand £1 000 000, U S A $70 000 000 (1950 51) $150 000 000 (1951 52), $280 000 000 (loans from 1950 52)

India earmarked £750 000 for the Technical Co operation Scheme Ceylon £400 000 and Pakistan £161,290 Out of these funds India has supplied five experts (to Ceylon), has taken in 98 trainees from countries of the region in statistics sugar technology, customs administration, broadcasting and engineering and has offered 55 scholarships and fellowships in Indian Universities and specialised Institutions

It must be pointed out that the amount to be given by a country depends on Parliamentary appropriations and cannot really be anticipated So questions like the total allotment the future contributions of the various countries do not permit of a definite answer

Member countries are required to report twice yearly the expenditure incurred and the cost of commitments entered into towards the provision of assistance under the Scheme

By 30th June 1953, the total expenditure incurred and commitments entered into against the £8 million sterling amounted to £2 499 664

The expenditure on trainees amounted to £598 496, on experts £231 517, and on equipment £64,146

The estimates of firm commitments as at 30th June 1953, were £488 581 on trainees, £284 579 on experts, and £832,345 on equipment

The assistance received by India was as follows

From Australia £A 7 2 million till 30 June, 1953, from Canada $28 8 million till 30 June, 1953, from New Zealand £625,000 till end of 1953

The releases from India's sterling balances in U K will be at the rate of £35 million a year together with the unutilized balances of the previous years

Thus during the plan period 1951 1956 the total releases should be in terms of Rupees 3,900 million

The following table gives an analysis of the actual expenditure incurred by India and of the total expenditure incurred upto June 30, 1953

TECHNICAL ASSISTANCE

Contribution to Technical Co operation Scheme by India £750,000 (Rs one crore)

The country provided five experts and suggested the names of 39 during 1953 whose services could be utilized Fifty scholarships were offered to outside students in the first year and 20 in the second The places where foreign students were trained were the various research institutes and the national laboratories and also the following Indian Statistical Institute, Calcutta, Indian Institute of Sugar Technology, Kanpur, Customs Collectorate Bombay, All-India Radio New Delhi Training facilities were also offered in the river valley projects

The number of experts and of training facilities provided upto the end of June 30 1953 is as follows —

PROVISION OF EQUIPMENT

The following table gives the particulars about equipment which India asked upto June 30, 1953

Brief Description of Request	Supplying Country	Actual Cost or Estimated Cost	(Act) (Est)	Present Position
Wool testing equipment	Australia	£A2 000 0 0	(Act)	Already supplied
Microscope	,,	£A87 10 0	(Act)	,, ,,
Mobile Cinema Vans	,,	£A9,600 0 0	(Act)	,, ,,
Equipment for the Indian Dairy Research Institute	,,			
Equipment for Central Rice Research Institute	,,			
Equipment for Indian Institute of Technology Kharagpur	,,	£A65,000 0 0	(Est)	Projects proposed for assistance
Equipment for the Directorate of Plant Protection and Quarantine for Indian Ministry of Agriculture	,,			
Institute of Biological Control (Buildings and Equipment)	Canada	$38,340 (Canadian)	(Est)	The Canadian Government is providing $38 340 for the equipment of the Institute and its maintenance over a two year period
Demonstration film Grasslands of New Zealand	New Zealand	£60	(Est)	Order placed
Publications for the National Chemical Laboratory Poona	United Kingdom	£5,000	(Est)	Firm offer made on June 26, 1952 Publications to the value of £1,892 have been supplied
Books required by National Physical Laboratory, New Delhi	,,	£160	(Est)	Revised Book List awaited
Books required by the Institute of Mines and Applied Geology Dhanbad	,,	£250	(Est)	H is agreed in principle to supply
Books required for the Central Electro Chemical Research Institute, Karaikudi	,,	£1 850	(Est)	Agreed in principle Awaiting revised list of books
Books required for the Central Leather Research Institute	,,	£180	(Est)	Agreed in principle Awaiting Mactaggart s report
Books required by the Geological Survey of India	,,	£103	(Est)	Agreed in principle Initial list supplied (£3)
Books for the Central Buildings Research Institute, Roorkee	,,	£35	(Est)	Agreed in principle—Books on order
Books for the Central Glass and Ceramics Research Institute	,,	£230	(Est)	Books on order
Books required by the Central Food Technological Research Institute Library	,,	£25	(Est)	Agreed in principle India asked to submit revised list
Books required by the Central Water and Power Commission	,,	£560	(Est)	Agreed in principle India asked to submit revised list
Books required for the National Chemical Laboratory, Poona	,,	£200	(Est)	Books on order
Microtome for Electron microscopy supplied to Miss Buch (ECS trainee in the U K)	,,	£56 0 0	(Act)	Already supplied
Supply of Equipment for Technical and Vocational training in India				
Machine tools, etc , 1950 1951 £1 916 18 2 (Act)				
Woodworking Machines, 1951 1952 £ 662 9 11 (Act)	,,	£2,579 8 1	(Act)	Supplied in 1950 1951 1951 1952
Equipment required by Central Water Power Irrigation and Navigation Research Station Poona	,,	£290,000	(Est)	Agreed
Equipment Drugs and Chemicals required by Patel Chest Institute, Delhi University		Between £20,000 and £25 000	(Est)	Awaiting acceptance of offer by India
Equipment for Indian Institute of Technology Kharagpur	,,	£30,000 to £35,000	(Est)	All equipment despatched
Equipment required for the Christian Medical College Hospital Vellore	,,	£12,500	(Est)	Offer made to India Details of request under investigation
Equipment for the Silver Jubilee T B Hospital Delhi	,,	£1,000	(Est)	Firm offer on June 13 1953 for supply of equipment recommended by Dr Scadding
Equipment required by National Metallurgical Laboratory, Jamshedpur	,	£40 000 to £60,000	(Est)	Agreed in principle
Equipment for the Bengal Engineering College, Calcutta	,	£76,000	(Est)	The Government of India has been asked for additional information
Films and Equipment required by the Central Leather Research Institute	,,	£6,400	(Est)	Agreed in principle
Equipment for the Central Electro Chemical Research Institute Kara kudi	,,	£6 500	(Est)	,, ,,
Equipment for the Geological Survey of India	,,	£3,700	(Est)	,, ,,
Equipment for the Central Building Research Institute, Roorkee	,,	£7 118	(Est)	New Delhi to enquire whether this has already been met under U S Aid Scheme
Equipment for Central Glass and Ceramics Research Institute	,,	£8,000	(Est)	Offer to supply part of equipment requested
Surgical Equipment for use of Orthopaedic Surgeon and Team of Physiotherapists	,,	£3,750	(Est)	Equipment already supplied valued at £717 8 0
Equipment for the Institute of Mines and Applied Geology, Dhanbad	,,	£3,700	(Est)	Procurement under way
Equipment for the Fuel Research Institute, Dhanbad	,,	£16,000	(Est)	Offer made to India provided it has not been met from another source
Equipment for the National Chemical Laboratory, Poona	,,	£8,322	(Est)	Agreed in principle
Equipment for Hydrographic Office, Dehra Dun	,			U K are not prepared to meet the request under the Technical Co operation Scheme
Equipment for Blood Transfusion Unit Irwin Hospital New Delhi	,,	£1,800	(Est)	Agreed in principle
Teaching Aids and Text Books for two experts for the Lady Hardinge Medical College	,,	£3,750	(Est)	Consideration deferred

GOVERNMENT INDUSTRIAL UNDERTAKINGS

IN the following pages we give short notes on Government industrial undertakings

The following are under the Ministry of Production D D T factory Government Housing factory, Heavy Electrical Power Plant factory (not set up), Hindustan Machine Tools Ltd , Iron and Steel factory (not set up), Nahan Foundry Ltd , National Instruments factory, Penicillin factory (not set up), Sindri Fertilizers and Chemicals Ltd , Telephone Cable factory, Vishakapatnam Shipbuilding Yard

The following factory is under the Ministry of Defence *Hindustan Aircraft Ltd*

The following factory is under the Ministry of Communications Indian Telephone Industries

The following factories are under the Ministry of Natural Resources and Scientific Research Indian Rare Earths Ltd Bombay Uranium Thorium factory (under construction)

The following factory is under the Ministry of Railways Chittaranjan Locomotive Works

BOMBAY URANIUM-THORIUM FACTORY

(Trombay, Bombay)

The foundation stone of this factory was laid on January 1954 It will work under the auspices of the Atomic Energy Commission

The cost of the factory is estimated at Rs 45 lakhs and it is expected to be completed by the end of 1954

It will produce 205 to 228 tons of thorium nitrate per annum

The factory will process indigenous uranium and thorium ores as well as the uranium bearing residues of the Indian Rare Earths Ltd Alwaye

The uranium will be extracted, purified and converted into metal for use in atomic reactors

The ores will come from Bihar and other parts of India From the Alwaye factory will come the residual coke left after the rare earth chlorides carbonates and tri sodium phosphates are extracted from the monazite

The factory will be self-supporting and will meet its operating costs through the sale of its thorium compounds to the Indian gas mantle industry

CHITTARANJAN LOCOMOTIVE WORKS

(Chittaranjan, Burdwan Dt , West Bengal,
4 Chittaranjan Avenue, Calcutta 13)

The works are under the Ministry of Railways

Construction started on April 1, 1948 and was completed on September 30 1952

Production started on January 26, 1950 The first locomotive rolled out on November 1

The total investment is Rs 14 93 crores

The total number of workers (1953 July) was 3,426

The present out-turn is five locomotives per month

Capacity when complete will be 120 steam locomotives, and 50 spare boilers per year, working single shift

The production schedule has been as follows

Year	No of locomotives	Percentage of parts manufactured
1950	3	—
1951	33	30
1952	45	70
1953	66	80
1954	90	100

General Manager, P C Mukerjee

D.D T FACTORY

(Delhi)

A site adjacent to D C M Chemical Works has been chosen for the factory

The factory will be managed by Government through a private limited company with a Board of Directors under the Ministry of Production

The factory was expected to go into production before the end of 1953

The plans are based on an agreement concluded between the Government of India, WHO and *UNICEF* on the 19th July 1952

Under this, the UNICEF will supply all imported equipment involving an expenditure of about $250,000, WHO will arrange and provide all technical assistance for the factory involving an expenditure of about $100 000 and the Government of India will arrange for the provision of land, buildings, steam, water, electricity etc , at an expenditure of Rs 22,45,000

The Delhi Cloth and General Mills have agreed to provide the required steam and water supplies as well as the necessary sulphuric acid, alum and chlorine for the factory at reasonable prices

GOVERNMENT HOUSING FACTORY

(Jangpura New Delhi)

The factory which was built in the middle of 1950 is managed by a company under the Ministry of Production

It was decided in May, 1952 that the factory should be utilised for producing pre fabricated houses in association with Messrs Bisakha Singh Wallenborg Ltd (the BSW), an Indo Swedish firm

Negotiations with the firm took definite shape and the approval of the Cabinet was obtained in September 1952 to the main heads of agreement with the firm

In slight modification of the previous decision, it was decided that the factory should be used for the production of foam concrete roofing slabs, *pre stressed concrete housing components*, wooden doors and windows in standard patterns, and for the fabrication of steel

In pursuance of this decision, an agreement was signed between the Government of India and the B S W on the 6th December, 1952

The salient features of the new scheme are —

A company called the Hindustan Housing Factory Limited, has been floated to control and manage the affairs of the factory

The paid up share capital of this Company is Rs 1 lakh, contributed equally by the Government and the B S W The two partners are entitled to nominate an equal number of Directors on the Board, and the Chairman is appointed by the Government in consultation with the B S W

To this company, the Government will lease the fixed assets of the present factory at a rent equivalent to the normal depreciation allowable under the income tax law, and the B S W will lease to the company on similar terms all the additional machinery required

The working capital necessary for the day to day expenses of the factory will be provided by the B S W free of interest

Government are not expected to incur any expenditure apart from the subscription to the share capital of the company but they are entitled to 40 per cent of the profits which may become available for distribution

The Hindustan Housing Factory Limited was incorporated on the 27th January, 1953

The Board of Directors have since decided to take over immediately, on lease, the assets of the Government Housing Factory and start large scale manufacture of all forms of woodwork for buildings, particularly doors, windows and furniture, pending the import of the additional machinery required for the production of pre-stressed concrete products

Chairman, Dr S S Bhatnagar

Managing Director, Sardar Sasakh Singh

Directors, S Ranganathan, I C S , K R P. Aiyangar , Sardar Mohkam Singh

HEAVY ELECTRICAL POWER PLANT INDUSTRY

The need for the establishment of a heavy electrical power plant industry in India as a key industry for generation, transmission and distribution of power in the country has long been felt, but due to financial stringency the proposals could not be proceeded with earlier

In view however, of the fact that hydro-electric schemes have made considerable headway and large scale electrification of railways to increase line capacity is also becoming a necessity it has been considered that, to make India self sufficient, it is essential to establish a factory in India to manufacture heavy electrical equipment

The Planning Commission has provided Rs 7 crores for this project out of the lump sum provision of Rs 50 crores for basic industries and transport

HINDUSTAN AIRCRAFT LTD

(Bangalore Dist , Mysore)

The company is managed by a Board of Directors under the Ministry of Defence

It was started in 1940 and has a staff of about 8,500 including workers

It now undertakes the following kind of work

Repair and overhaul arisings of all civil and Air Force aircraft in India, manufacture of trainer aircraft for Air Force and civil flying clubs use, overhaul of aero engines and other aircraft components, manufacture of all metal broad gauge railway coaches, manufacture of heavy duty single and double decker bus bodies

Board of Directors

Chairman Secretary, Ministry of Defence

Vice Chairman, J R D Tata

Directors K Bhavanishankar Rao (Financial Adviser, Ministry of Defence), I V Ganapathy Iyer (Director of Industries and Commerce, Mysore)

Board of Management

Chairman J M Shimagesh, I C S

Members, J R Strandring (Chief Production Engineer) Dr V M Ghatage (Chief Designer), V G Kamath (Financial Manager)

Some important officials

Factory Manager, Albert Zampolino

Chief Inspector, H K Karve

Chief Commercial Engineer, A Mitra

Personnel Manager, G Vasudeva Rao

Sales Manager, A C Banerjee

Purchasing Manager, P P Patel

Stores Manager, G N Krishnaswami

HINDUSTAN MACHINE TOOLS LTD

(Jalahalli, Bangalore)

This is a private limited company under the Ministry of Production registered in Mysore on February 7, 1953

The Registered Office of the Company and the factory are located at Jalahalli, Bangalore

The plans are based on an agreement between the Government of India and Messrs Oerlikon Machine Tool Works, Buehrle & Co , Zurich, Switzerland, concluded in April 1949

The company envisages manufacture in the final stage of 900 high speed lathes, 460 milling machines, 240 heavy duty drilling machines, shaping and planing machines at an estimated capital cost of Rs 8 37 crores

Building work is now in progress Plant and Machinery worth about Rs 50 lakhs were expected to arrive by the end of 1953

The first stage with a capacity for manufacturing 400—8½" centre high speed lathes or any other allied machine tools was expected to be completed by the end of 1953

Key technical personnel (both Indian and European) numbering about 25 have already been recruited Skilled Indian technical workers are being recruited

About 750 workers (excluding the supervisory personnel) are expected to be employed when the factory goes into full production

The company will be largely financed by Government The foreign consultants are allowed 15 per cent of the shares, out of which they will pay 10 per cent in cash, while the remaining 5 per cent will be issued without payment in return for their technical services

It may be added that today there are 16 graded and 100 ungraded firms in India, but the annual value of the graded machine tools produced by them is less than Rs 40 lakhs

Production is still confined to essentially simple and primary types of tools The industry is not in a position to manufacture precision types of machine tools

The monetary value of the annual demand is estimated at Rs 10 crores

Chairman Board of Directors Secretary, Ministry of Production

Managing Director Aftab Rai

Members, P C Bhattacharya, K R P Aiyangar, Dr A Gerber, N N Wanchoo, I C S , Dr Otto M Wenger

INDIAN RARE EARTHS LTD

(Alwaye, Travancore Cochin)

This factory is owned jointly by the Government of India and the Government of Travancore Cochin

The subscribed capital is Rs 80 lakhs, of which the Government of India's share is 55 per cent and of the Travancore Cochin Government 45 per cent

The technical consultants are Societe de Produits Chimiques de Terres Rares

The factory started production in July 1952 It has the capacity to produce 1 500 tons of rare earths chlorides and carbonates, and about 1,800 tons of trisodium phosphate a year from the monazite that will be dug up

The chlorides and carbonates which are exported are used in the manufacture of aerial camera lenses, cinema projector carbon arcs, special optical glasses and so on

The phosphates which are a substitute for soda ash will be used in textile mills, soap factories, and for general cleaning purposes in mills and factories

INDIAN TELEPHONE INDUSTRIES LTD

(Duravani Nagar, Bangalore Dt , Mysore)

Branches National Insurance Bldg , 27, Bastion Road, Bombay 1 , 22, Chittaranjan Avenue, United India Bldgs , Calcutta 13 , Telephone House, Netaji Subhas Road, Madras 1

This was originally started as a Government department in 1948 under the Ministry of Communications On Feb 1, 1950 it was converted into a private limited company with the Government of India as the major shareholder

Total Investment

Authorised Capital	Rs	2,50,00,000
Subscribed Capital	,,	2,50,00,000
Working Capital	,,	2,56,84,200

Board of Directors

L N Jha, I C S (*Chairman*), B R Batra, A I Bennett, A J Mantle (*Alternate Director*), Vithal N Chandavarkar, E V Ganapati Iyer, S Jayasankar, P A Narielwala, R Natarajan (*Managing Director*)

Administration

General Manager, Jagdeesh Prasad

Manager, N K Sen Gupta

Secretary, D V M Rao

The Company is the sole agent for its associate—the Automatic Telephone & Electric Co , Ltd , Liverpool, England

Facts and Figures

Present Production 40,000 telephones per annum , 25,000 exchange lines per annum

Production target 50 000 telephones per annum , 30,000 exchange lines per annum

Number of persons employed (as on 31st October 1953)

Technical—1 525 , Non technical and Administrative—762 , Total—2 287

The factory normally works a single shift Only some sections are at present working two to three shifts

The following amenities are provided

Three Canteens are run for providing lunch to workers and staff, two of which are worked by the Employees' Co operative Society

Other amenities include a well equipped dispensary, a well organised sports club, a library and reading room

Free milk is supplied to employees doing hazardous work

There is a separate rest rooms for girls

The employees themselves have organised a voluntary fund for giving financial aid to needy employees in emergencies

Seven twin block quarters are provided for the staff who do essential jobs There is a hostel in which accommodation has been provided to some of the employees Forty eight other quarters are now under construction

In co-operation with the Hindustan Aircraft Ltd , bus transport facilities have been provided for about 450 employees

There is a technical society for the senior staff where they meet and discuss subjects of scientific interest

All the employees enjoy the benefit of film shows at frequent intervals free of charges

IRON AND STEEL PROJECT

In view of the acute shortage of pig iron and steel in the country, Government decided in February, 1952 that, along with other measures negotiations should be opened with steel firms abroad for putting up a blast furnace of suitable capacity at a new site to be selected in consultation with the prospective participants *

It was also decided that Government would participate in the undertaking by providing necessary finance

The estimated cost is Rs 71 25 crores

Negotiations were thereupon carried on with various parties by the Ministry of Production

In October, 1952 Government decided to depute three officers, namely Mr C C Desai, Mr P C Bhatacharyya and Mr S Bhoothalingam to the U S A for further negotiations with some foreign parties and the World Bank The officers returned to India towards the end of December, 1952 and submitted a Report to Government on the results of their discussions in the U S A

On consideration of their Report Government decided early in January, 1953 to set up a technical mission to prepare a project report for the establishment of the new iron and steel plant

Government have also decided to nominate Messrs Koppers, a well-known firm of the U S A , as technical consultants to the Government of India on this Mission

The Mission which consists of Dr E W Rembert of the World Bank, Mr Hill of Koppers and Mr C R Natesan, Iron and Steel Controller in the Ministry of Commerce and Industry, is now engaged on the preparation of a revised project report

NAHAN FOUNDRY LTD.

(Nahan, Sirmoor District, Himachal Pradesh)

This was started in 1875 and has been continuously expanded

The total investment is about Rs one crore and the number of persons employed is 500 in the works and 300 in the agencies

Production consists of an improved type of cane crushers, bullock and power driven, centrifugal pumps in different sizes, a new patented device Sarovar for taking out water by bullock power for irrigation purposes paddy-thrashers ploughs corn sheller machine (a new patented machine for separating maize corn from their cobs) chaff cutters of different types, boiling pans, cast iron sheets, flour mills power and bullock driven, and miscellaneous items

The company has a net work of 74 agencies in north India with mobile workshops which cater to the needs of the cultivator in the villages in respect of machines and also undertake repairs at site

It is managed as a private limited company (which took over on Jan 1 1953) with the President holding all the shares The affairs are looked after by the Ministry of Production

The Board of Directors

V L Goswami (*Chairman*), N C Mallick, B S Bhatnagar K L Mehta, I C S Ram Lal, I N Sewal

General Manager and Chief Engineer Gandharv Sain

NATIONAL INSTRUMENTS FACTORY

(15, Wood Street, Calcutta 16)

Total investment Rs 9 lakhs Value of production and repair for 19 2 Rs 17 31 lakhs Value up to Oct 30 1953 Rs 13 82 lakhs Number of persons employed 989

This is under the Ministry of Production

It is one of the oldest if not the oldest factory in India engaged in the manufacture and repair of scientific and mathematical instruments in India

It manufactures prismatic binoculars, telescopes, prismatic liquid compasses, sun compasses, thermometers aircraft instruments, excise apparatus, hydrometers, measuring cylinders, barometers, manometers, students' microscopes, concentration eye-pieces, Fortin barometers, drafting machines, and profile projectors

The value of the production for the first nine months of 1952 was Rs 13 58 lakhs

The Planning Commission has provided Rs 182 lakhs for the plan period to reorganize the factory

Superintendent, B C Mukherji

PENICILLIN FACTORY

(Pimpri, Poona Dt , Indian Penicillin Committee, King Edward Road, Parel, Bombay 2)

This is to have the company form of management under the Ministry of Production and is to be located at Pimpri near Poona

The plans are based on a tripartite agreement between Government of India, World Health Organisation (W H O) and United Nations International Children's Emergency Fund (UNICEF), concluded on 24th July 1951

Government will provide land, buildings, fittings, administrative offices, laboratories, pilot plant, workshop, other services like steam plant, electric substation, sewage disposal, water, etc

Estimates for providing these are Rs 1,30,00,000

UNICEF will supply imported equipment valued $850,000

W H O will provide technical assistance valued $350,000

The factory is planned to produce 3,600 billion units of Penicillin per year to start with, rising to 9,000 billion units

Construction of non-residential buildings is in progress and was expected to be completed by the end of March, 1953

*It is now decided that the plant should be located at Rourkela in Orissa

Orders have been placed by the UNICEF for a major portion of the plant and equipment, and consignments were to start arriving from January 1953

Some eleven technical officers are expected to have their training abroad

To meet the immediate needs of Penicillin a Penicillin Bottling Plant with a capacity of 10,000 vials a day and on average 1,500 billion units per year has been set up in the compound of the Haffkine Institute, Bombay

SINDRI FERTILIZERS AND CHEMICALS LTD

(Sindri, Bihar)

This is a State owned private limited company, in which all shares except eight (allotted one each to the chairman and seven directors) are held by the President of India The Company was registered on December 18 1952

The Secretary to Government in the Ministry of Production is the Chairman of the Board of Directors

Authorized share capital—Rs 30 crores, paid up- Rs 17 crores A further sum of Rs 7 5 crores was invested by the Government as a loan at 4½ per cent interest

Profit during the first 14 months was Rs 2 7 crores After providing for depreciation renewal, replacement and partial write off of development expenditure the net profit was Rs 96 000

Started production—February 7 1952 (bags of ammonium sulphate went out)

Average daily production—1 000 tons of ammonium sulphate This is about 80 per cent of rated capacity

Target—350,000 tons a year This should help in the production of one million tons of extra food a year valued at Rs 40 crores It will also result in a saving of foreign exchange of about Rs 12 crores a year in the import of artificial fertilizers

Total production upto March 31 1953—230,000 tons

Price —Rs 290 per ton

The factory consists of gas ammonia sulphate plants, power from 80,000 kW Power House, water (some 12 million gallons a day under full production condition) Adequate arrangements have been made to ensure this large supply of water from the Damodar river for the factory and connected activities

A barrage has also been thrown over the Gowai, a tributary of the Damodar impounding about 1 000 million gallons of water as a stand-by

Then there are a bagging plant, marshalling yards and 12 mile railway track

The factory was 100 per cent complete at the end of 1951 it started production October 31, 1951, gas plant started 13th April 1951, production of anhydrous ammonia started 28th August 1951, marshalling yards completed 30th August 1951, bagging plant commissioned 4th February 1952, bags of ammonium sulphate went out of the factory 7th February, 1952

The township is designed for 4,000 employee families or 20,000 persons, is 1 375 acres, has 4 groups of composite and self sufficient colonies, all modern amenities (electricity, water supply, sanitary services, roads) The township is now complete and fully occupied

There are also a hospital, branch dispensaries, first aid posts, an English high school for boys and girls, three primary schools and one Kindergarten school

Sindri's development plans include the establishment of a coke oven plant for the manufacture of 600 tons of coke per day

A contract for this plant costing Rs 2 35 crores has been placed and construction work is already in hand

The erection of a cement manufacturing plant by the A C C, with an installed capacity of 600 tons of cement a day for the utilisation of Sindri's by product—chalk sludge—is being undertaken

It is also proposed to utilise the coke oven gases for the manufacture of urea, a stable fertilizer with high nitrogen content, which is ideal for rice cultivation

A Fertilizer Mission appointed by the Government of India in association with the T C A, has returned from a world tour after studying the manufacturing processes employed in some of the modern fertilizer plants in the world and has submitted a comprehensive report to the Government of India on the basis of which a joint decision by the Government of India and the T C A will be taken on Sindri's expansion plans for production of other nitrogenous fertilizers like urea and ammonium nitrate

These expansion plans are estimated to cost about Rs 9 5 crores

It is also proposed to set up an independent and efficient marketing organisation for Sindri to take over the distribution responsibilities of its product from January 1954

Board of Directors

Chairman Secretary to Government of India Ministry of Production

Members, J J Ghandy Sri Ram, Sri Narayan Mahtha M P, Financial Commissioner, Railways Joint Secretary, Ministry of Finance (I & C Dvn) A B Chatterji I C S S R Vasavada M A M L A

Mg Dir, A B Chatterji, I C S

TELEPHONE CABLE FACTORY

(Rupnarainpur Burdwan Dt West Bengal)

The control and management are in the hands of an entirely Government-owned private limited company named Hindustan Cables Ltd, under the Ministry of Production

The factory started operating on Nov 10, 1952

The estimated cost of the factory is Rs 110 lakhs, and the sale value of the annual output —Rs 87 lakhs

It is designed to produce annually 469 miles length of cables of different specifications, and was expected to go into production by December 1953

The planning and lay out of the factory has been completed Consignments of plant and machinery have started arriving

The plans are based on an agreement with the Standard Telephones and Cables Ltd of U K concluded on Oct 31, 1949 According to this agreement technical consultants were to prepare drawings designs, estimates supervise erection of factory, provide engineers at their cost for initial construction, put plant and machinery into service train Indian personnel

Chairman Board of Directors, General Manager, Chittaranjan Locomotives

Members B C Mukherji (of Sindri Fertilizers), M P Birla, D C Driver, G D Ambekar, three officials of the Ministry of Production, Finance, Communications

VISHAKAPATNAM SHIP-BUILDING YARD

(Vishakapatnam, Andhra)

This is located at Vishakapatnam in Andhra State It was originally designed by the firm of Sir Alexander Gibb and Partners

It is on eight berths basis, but now has 3 building berths to build ships ranging from 320 to 550 ft in length, and from about 5,000 tons to about 15,000 tons deadweight capacity

The construction of a fourth berth will soon commence

It has also a fitting-out wharf 1 200 ft long which permits fitting out of 6 large ships and 3 medium sized ships in one year

There are about 3,400 technicians, workers and staff

There is a housing estate for employees on a site of 145 acres of land provided with electricity water supply playgrounds, parks, school and hospital buildings, where about 1 500 families of the staff, workers and officers are accommodated

The yard has been managed by Hindustan Shipyard Limited since the 1st of March 1952, a company in which the Government of India have a controlling interest

The Board of Directors consists of 8 Government nominees including the Chairman and 4 nominees of Scindia Steam Navigation Co Ltd

The authorised capital of Rs 10 crores is divided into 100,000 ordinary shares and issued in four stages and so arranged that Government contributes two thirds of capital, thus acquiring a controlling interest

Technical assistance is provided by Societe Anonyme des Ateliers et Chantiers de la Loire, a French firm of ship builders under an agreement entered into with them

So far (Dec 1953) 10 ships of 8,000 tons each have been built, 4 on Scindias' account and 6 on Government account

Orders to build 9 more ships are under execution

Of these 2 are of 8,000 tons deadweight and are of the same design as those built already

The remaining 7 will be of different design, *viz* Maierform design and will be propelled by diesel engines—2 being of 8 000 DWT, and the remaining 5 being of 7,000 DWT

A provision of Rs 14 03 crores in the Five-Year Plan has been made for the acquisition and development of the ship building yard and construction of ships

The following table gives details about the ships built at the yards

	Name of ship	Date of laying keel	Date of launching	Date of completion and sailing	To whom sold
1	Jalausha ' (8,000 DWT)	22- 6-46	14- 3-48	15-10-48	Scindia S N Co Ltd
2	Jalaprabha '	22- 8 46	20-11-48	31- 3-49	"
3	Kutubtara ' (245 DWT)	23 5 47	18-12-48	19- 5-49	"

*8	Jalaputra ' "	28- 9-50	26- 3-51	29- 6-51	Bharat Line Ltd
*9	' Jagrani ' "	9- 5-51	15-12-51	4- 6-52	Great Eastern Shipping Co Ltd
*10	'Jalapratap ' "	9- 5-51	27- 2-52	31- 7-52	Scindia S N Co Ltd
*11	Jalapushpa' "	26-12 51	9- 7-52	30- 9-52	"

* These six ships were ordered by Government

The company is managed by a Board of Directors as already mentioned under the Ministry of Production *Chairman*, N R Pillai I C S *Managing Director*, R L Gupta, I C S *Members*, K R P Aiyangar, N Dandekar, I C S, S Jagannathan, I C S Dharamsey M Khatau, Tulsidas Kilachand, Michael John, Paul Maerton, Capt Newnham, Kasturbhai Lalbhai, P C Bhattacharya

FOREIGN INVESTMENTS IN INDIA*

IN 1948 the Reserve Bank conducted a census of foreign investments in Indian joint stock companies The more important findings are given in the tables below The figures are still the latest available ones as there have been no official investigations since 1948

It was found that about 2 300 foreign companies had investments in India, of which 334 had direct investments

The number of companies with 95 per cent of its investments from abroad was 150, and of companies with 68 per cent of its investment from abroad was 68 per cent

The first two tables show the investments business wise and country wise

Note that equity capital comprises ordinary and deferred shares Creditor capital comprises preference shares and debentures

RESEARCH*

RESEARCH in pure science is done chiefly under the auspices of the Council of Scientific and Industrial Research and the Atomic Energy Commission

Research in applied science and for industrial purposes is also done under the auspices of the C S I R and the various research associations of individual industries

Research in engineering subjects is done under the auspices of the Board of Engineering Research

Medical research is mainly in the charge of the Indian Council of Medical Research

Agricultural research is looked after by the Indian Council of Agricultural Research and the various Central Committees for agricultural commodities like the Indian Central Cotton Committee Indian Central Jute Committee, etc (See under Agriculture)

Research in the humanities—literature, language the arts etc —is done at individual institutions scattered throughout the country

It may be mentioned here that the Central Government has a Scientific Liaison Officer in the U K He keeps in touch with the latest scientific developments in Europe arranges for the training of Indians at research centres in Europe and helps to promote personal contacts between Indian and foreign scientists

Allotment for scientific and industrial research under the Plan Rs 4 61 crores

SCIENTIFIC SOCIETIES

The National Institute of Sciences New Delhi is the premier scientific organization recognized by Government for co ordinating the work of scientific academies, societies and Government departments and services It has the same status as the Royal Society of London or of the National Academy of Washington

Two all embracing science societies are The Indian Science Congress Association Calcutta under whose auspices Indian and foreign scientists meet every year to exchange ideas and the Indian Association for the Cultivation of Science Calcutta

Other scientific societies are Agricultural and Horticultural Society of India Calcutta, Agri Horticultural Society, Madras Anthropological Society Bombay Banaras Mathematical Society (Bharat Ganit Parishad), Lucknow Bombay Sanitary Association, Bombay British Medical Association, Bombay Branch Bombay Entomological Society of India Horticultural Society of India Calcutta Indian Academy of Sciences Bangalore Indian Botanical Society, Calcutta, Indian Ceramic Society, Indian Chemical Society, Calcutta Indian Dairy Association Bangalore Indian Mathematical Society Madras Indian Physical Society Calcutta, Indian Physiological Society Calcutta, Indian Psychological Society, Indian Council of Medical Research New Delhi, Indian Roads and Transport Development Association, Bombay, Indian Society of Genetics and Plant Breeding Indian Society of Social Sciences Mining and Geological Institute of India, Calcutta, Mining and Metallurgical Society National Academy of Sciences Allahabad, National Horse breeding and Show Society of India New Delhi, Psycho analytical Society, Calcutta, Institute of Engineers Calcutta Indian Society of Soil Science, Calcutta, Society of Biological Chemists, Bangalore, Indian Science News Association, Calcutta, Indian Institute of Chemical Engineers, Indian Institute of Metals, Calcutta, Indian Society for Quality Control, Calcutta, Indian Society for Agricultural Statistics

GOVERNMENT RESEARCH

Most Government research is now carried on under the auspices of the Council of Industrial and Scientific Research (Ministry of Natural Resources and Scientific Research) It manages the laboratories and institutions for research awards fellowships puts the knowledge so gained at the disposal of industry It also publishes scientific papers and journals

The Council is administered by a Governing Body with the Prime Minister as President and members as representing science industry and certain Government departments The Governing Body is advised by a Board of Scientific and industrial research consisting of 19 members about schemes for research or investigation of natural resources For individual subjects the Board has advisory committees the number of which at present is 24 is as follows

Glass and Refractory Committee, Chemical Research Committee Physical Research Fuel Research Vegetable Oils Cellulose Research Biochemical Research, Pharmaceuticals and Drugs Plastics Atmospherics Research Essential Oils Metals Research Internal Combustion Engine Research Uniform Calendar Radio Research, Statistics Standards and Quality Control Leather Research, Measurement of Geological Time, Malaria Chemotherapy Vanaspaty Research Building Research Salt Research, Mining Research, High Altitude Research

The 10 National Laboratories which the Council looks after are in the order in which they were started as follows

National Chemical Laboratory at Poona (Jan 4 1950) National Physical Laboratory at New Delhi (Jan 21, 1950) Central Fuel Research Institute at Dhanbad (April 22 1950), Central Glass Ceramic Research Institute at Jadavpur Calcutta (Aug 25 1950), Central Food Technological Institute at Mysore (Oct 21, 1950) National Metallurgical Laboratory at Jamshedpur (Nov 26 1950) Central Drug Research Institute at Lucknow (Feb 17, 1951) Central Road Research Institute at New Delhi (July 16 1952) Central Electro Chemical Research Institute at Karaikudi, south India (Jan 1953) Central Leather Research Institute at Madras (Jan 1953)

The three following laboratories are in the process of establishment

Central Building Research Institute at Roorkee Central Salt Research Institute at Bhavnagar Central Electronic Engineering Research Institute at Pilani, Rajasthan

The Council of Scientific and Industrial Research encourages the formation of trade associations for the purpose of conducting co operative research Where recognition is given Government may make a money grant Examples of industries where such associations exist are

Ahmedabad textiles, the silk and art mills of Bombay, the leather manufacturers and tanners of south India, and the Coimbatore textiles

The Council also encourages research at universities and other institutions through grants in aid

The Atomic Energy Commission has to be mentioned here, it was set up in Aug 1948 It deals with all matters concerning the development and production of atomic energy

In its research work it is assisted by two bodies The Board of Research on Atomic Energy and the Cosmic Ray Committee The research is conducted at its own laboratories, the Tata Institute of Fundamental Research and also at the universities, to whom it makes grants for raising the standard of instruction in physics, chemistry and mathematics

The Atomic Energy Commission also looks after Rare Earths Ltd located at Alwaye in Travancore Cochin A factory is also due to start working in Bombay for extracting uranium and thorium from the waste thrown up by the Alwaye works

The Commission spends much money on cosmic research at various universities and more especially at the following institutions Institute of Nuclear Physics, Calcutta Bose Research Institute of Science Calcutta, Physical Research Laboratory Ahmedabad

For engineering research a body has been set up called the Board of Engineering Research which is assisted by five expert committees

MEDICAL RESEARCH

Medical Research is conducted chiefly under the auspices of the Indian Council of Medical Research New Delhi The Council also grants research fellowships There is a Scientific Advisory Board which deals with technical questions and publishes reports of research carried on at the centres under its charge

Some of the more important institutions where medical research is conducted are

Malaria Institute of India Delhi Central Research Institute Kasauli Punjab All India Institute of Hygiene and Public Health Calcutta King Institute Guindy, Madras School of Tropical Medicine Calcutta Haffkine Institute, Bombay (plague poisonous snakes) Nutrition Research Laboratories, Coonoor, Seth G S Medical College, Bombay Central Malaria Laboratory Public Health Department, Madras (for D D T) Indian Veterinary Research Institute Mukteswar Kumaun U P, University College of Science and Technology, Calcutta National Chemical Laboratory Poona (for dietary protein) Presidency College, Calcutta (for nicotinic acid) Department of Chemical Technology University of Bombay, Bombay (for B vitamins) Indian Dairy Research Institute, Bangalore University Biochemical Laboratory University of Madras, Madras, Medical College Baroda (for physiological reactions to Indian foods), Presidency College Calcutta (for vitamin A), Safdarjang Hospital, New Delhi (for effects of malnutrition), M G M Medical College Indore (for riboflavin and thiomine), Institute of Science Bombay, Assam Medical College, Dibrugarh (for caloric needs of persons of different occupations) College of Nursing New Delhi (nutrition of mothers and infants), M S University, Baroda Tata Memorial Hospital, Bombay (leprosy) Christian Medical College, Vellore (leprosy) Acworth Leprosy Home, Bombay, Victoria Leprosy Hospital Kichpali Government Silver Jubilee Children's Clinic Saidapet, Madras (for leprosy), Central Drug Research Institute Lucknow (pituitary gland) S N Medical College, Agra (pulmonary disease skin diseases and liver), Medical College Amritsar (diabetes), King George's Medical College, Lucknow (lymphoid tissue), S C B Medical College Cuttack (allergy) Lady Hardinge Medical College, New Delhi (sterility), Sawai Man Singh Medical College, Jaipur (guinea worm), Office of Director of Public Health, Madras (infant mortality), Chittaranjan Cancer Hospital, Calcutta (urine), N R Sarkar Medical College, Calcutta (anaemias of pregnancy), Topiwala National Medical College, Bombay (abortions), Stanley Medical College Madras (toxaemias of pregnancy), Grant Medical College, Bombay (polio), Pasteur Institute, Coonoor (influenza), Drug Research Laboratory, Jammu (indigenous drugs), Virus Research Centre, Poona

CIVIL AVIATION

ALLOTMENT under the Five Year Plan, Rs 22 87 crores

Compensation to air companies and purchase of new aircraft, Rs 9 5 crores

India's air transport services were nationalized by an Act of Parliament called the Air Corporations Act 1953 which received the President's assent on May 28 1953 The Act came into force on August 1, 1953

The internal air services are now managed by a corporation called Indian Airlines Corporation, and the external services by Air India International Corporation According to the Act the number of members of a Corporation cannot be less than five and not more than nine Each of the Corporations has a general manager

The Central Government has authority to give the Corporations directions about opening a new transport service closing an existing service or other changes in schedule At the end of a financial year the Corporations must present a report to the Central Government which will be laid before Parliament

Private agencies can use aircraft for purposes of instruction rescue or relief in survey fire fighting crop dusting locust control or for providing joy rides

There were 14 Indian transport companies holding permits on June 30 1953

An Air Transport Council is to be established so that certain points of common interest to different departments may be discussed

An Advisory Committee for each Corporation may also be appointed

There will be a Labour Relations Committee for each Corporation consisting of representatives of the Corporation and of employees formed in such a way that the representatives of employees are not less than the representatives of the Corporation This Committee will give advice to the Corporation on matters of labour

There is to be a special tribunal to determine compensation The amount of compensation is to be determined in accordance with certain principles laid down in a schedule to the Act

Government will negotiate with each company to arrive at an agreed figure If there are differences they will be referred to the tribunal Part of the compensation is to be paid in cash and part in negotiable bonds bearing a rate of interest of three and a half per cent

The names of the existing air companies taken over by the Indian Airlines Corporation as mentioned in the Act are

The Air India Ltd the Air Services of India Ltd The Airways (India) Ltd The Bharat Airways Ltd The Deccan Airways Ltd , The Himalayan Aviation Ltd The Indian National Airways Ltd The Kalinga Airlines

The Air India International Corporation took over the Air India International Ltd

The members of the Indian Airlines Corporation (Mandi House New Delhi) are

B C Mukharji I C S (Chairman) J R D Tata M L Khaitan Michael John B N Jha I C S (Secy Min of Communications) K R K Menon (Secy, R and I Min of Finance) I C Jain I C S (Dir Genl, Civil Aviation), K K Roy, P M Reddy

The members of the Air India International Corporation (New India Assurance Bldg, Bombay 1) are

J R D Tata (Chairman) B C Mukharji I C S K C Mohindra Michael John K C Bakhle B N Jha I C S, K R K Menon, L C Jain I C S

The Indian Airlines Corporation has appointed seven Resident Representatives to take over the services formerly run by the eight companies Three of them have their headquarters in Calcutta and the rest in Delhi, Bombay, Madras and Hyderabad

The line numbers of the airlines and their respective resident representatives are

(1) K K Roy Calcutta, (Airways India Ltd) Great Eastern Hotel

(2) C J Lilkaka, Calcutta (Bharat Airways, Ltd)

(3) P K Ghosh Calcutta (Himalayan Aviation Ltd) (Kalinga Airlines Ltd)

(4) J M Gupta New Delhi (Indian National Airways Ltd) Air India Bldg, Connaught Circus

(5) P M Reddy Hyderabad (Deccan Airways, Ltd) Bashir Bagh Road

(6) B K N Rao Madras (Air India Ltd) Khaleeli Mansions Mount Road

(7) W/Cdr W H Burbury Bombay (Air Services of India Ltd) New India Assurance Bldg, Mahatma Gandhi Rd, Bombay 1

Mr K K Roy is in over all charge of lines 1, 2, 3 and 4 while Mr P M Reddy has over-all responsibility for lines 5, 6 and 7

AIR SERVICES

The services conducted by the Indian Airlines Corporation are now numbered 1 to 7 The following table shows the numbers, the routes and also the names of the former companies which operated the routes when they were taken over

Number 8 is the external service

No	Former Company	Route	Frequency
1	AIRWAYS (INDIA) LTD, CALCUTTA	Calcutta Vishakapatnam Madras Bangalore	4 Weekly

AIRCRAFT

Indian airlines have had a fleet of 110 aircraft But the actual number required to operate the services on the present scale cannot be more than 50

Of the 110 aircraft 91 are twin engined, 21 seater Dakotas 12 twin engined 27 seater Vikings, three four-engined 56 seater Sky masters and four four-engined, 44 seater, fully pressurised Constellations

Two of these four types of aircraft Dakotas and Vikings, both non-pressurised and each carrying a 4 member flight crew consisting of pilot, co pilot radio officer, and air-hostess, are operated on domestic sectors and short range foreign routes like Pakistan (both East and West) Burma, Ceylon, Afghanistan Kashmir, and Nepal, whereas non pressurised Skymasters operate on Calcutta—Bangkok—Singapore—Djakarta route

Pressurised Constellations operate from New Delhi, Calcutta and Bombay to Cairo Rome, Paris, Geneva Dusseldorf, London, Karachi, Aden, and Nairobi

International air carriers, like the Skymasters and Constellations, carry a complement of 7-member flight-crew—commander or pilot-in-command, first officer or co-pilot, flight navigating officer, flight engineer, flight radio officer, flight pursuer or cabin service officer, and air-hostess or stewardess

Sometimes on long range journey like Bombay Nairobi service, even ten member crew is also carried to ensure additional margin of safety

FACTS AND FIGURES

Some basic facts are as follows

Total route mileage	27,763 miles
Domestic route ,,	14,050 ,,
International ,,	13,713 ,,
Aircraft miles flown (Jan June 1953)	9,900,000
Passengers carried (Jan June 1953)	230,000
Freight carried (Jan-June 1953)	48 million lbs
Mail carried (Jan June 1953)	4 4 millionl bs
Load factor (Jan June 1953)	68 5 per cent
No of aircraft registered (1st July 1953)	655
No of aircraft holding certificates of airworthiness (1st July 1953)	167
No of pilots with A licences (1st June, 1953)	440
No of pilots with A 1 licences (1st June 1953)	2
No of pilots with B licences (1st June, 1953)	531
No of pilots with P 1 licences (1st June, 1953)	46
No of Navigators with 1st class licence (1st June, 1953)	12
No of Navigators with 2nd class licence (1st June, 1953)	54
No of Radio Telegraph Operators with 1st class licences (1st June, 1953)	16
No of Radio Telegraph Operators with 2nd class licences	160
No of Radio Telegraph Operators with Provisional licences	5
No of Radio Telephone Operators (Regular) 1st June, 1953	241
No of Radio Telephone Operators (Provisional) (1st June, 1953)	2
No of aircraft maintenance engineers with licences (1st July 1953)	612

On the 14 Indian transport companies 2 24 million miles were flown, and 54 130 passengers and 32 48 million lb of freight were carried between January and June 1953

Thus on the scheduled and non scheduled services together 12 million miles were flown 284,000 passengers carried, 80 million lb of freight, and 4 4 million lb of mail were transported between January and June 1953

The corresponding figures for the preceding half year were 12 7 million miles, 261,000 passengers, 107 5 million lb of freight and 4 4 million lb of mail

AERODROMES

There were 77 aerodromes in India on June 1, 1953

During 1952 53, the revenue that accrued to the national exchequer on account of the Central Government aerodromes was Rs 5,698,400

The Indian airlines contributed to that revenue to the extent of Rs 4,245,296 while the contribution of foreign airlines using Indian aerodromes totalled Rs 1,453,104

Below is a list of the aerodromes maintained by the Civil Aviation Department on June 1, 1953

The following aerodromes are classed as International Aerodromes

Bombay Airport (Santa Cruz), Calcutta Airport (Dum Dum), Delhi Airport (Palam)

The following aerodromes are classed as Major Aerodromes

Agartala (Tripura), Ahmedabad, Begumpet (Hyderabad), Bombay (Juhu), Delhi (Safdarjung) Gauhati, Madras (St Thomas Mt), Nagpur

The following aerodromes are classed as Intermediate Aerodromes

Allahabad, Amritsar, Aurangabad (Hyderabad), Baghdogra (West Bengal), Banaras, Baroda, Barrackpore, Bhavnagar, Bhopal, Bhuj (Kutch), Coimbatore, Cuttack (Bhubaneswar), Gaya, Indore, Jaipur, Jorhat (Assam), Junagadh (Hashod), Lucknow (Amausi), Madura, Mangalore (Bajpe), Mohanbari (Assam), Patna, Porbandar (Saurashtra), Rajkot, Tezpur (Assam), Tiruchirappalli, Trivandrum, Vijayawada, Vishakapatnam

The following aerodromes are classed as Minor Aerodromes

Akola, Asansol, Bareilly, Belonia (Assam), Bilaspur, Chakulia (Bihar), Cuddappah (Andhra), Donakonda (Madras), Gorakhpur (Rusmi), Jhansi Jharsuguda (Orissa), Jubbulpore, Kailashahar (Assam), Kamalpur (Assam), Kanpur (Civil) (Uttar Pradesh), Khandwa, Khowait (Assam), Kolhapur, Kotah (Rajasthan), Lalitpur (U P), Manipur Road (Assam), Mysore, North Lakhimpur (Assam), Palanpur (Deesa) (Bombay), Pasighat (Assam), Raipur, Rajahmundry, Ramnad, Ranchi, Sadiya (Assam), Saharanpur (U P), Shella (Assam), Sholapur, Tanjore, Udaipur, Vellore, Warangal

FLYING CLUBS

There were 10 flying clubs Centrally subsidized on 1st July, 1953—Delhi, Bombay, Madras, Bengal, Bihar, Hind Provincial, Orissa, Northern India, Madhya Pradesh, Government Flying Training School at Bangalore

A new club in Rajasthan started activities with the headquarters at Jaipur in 1953

These flying clubs trained 104 'A' and 47 'B' pilots between January and June 1953

The number of aircraft on charge on June 1, 1953 was 116, out of which 54 were serviceable and 62 unserviceable Out of 116 aircraft 40 belonged to the Government and 76 to the clubs

The number of pilots employed was 80, aircraft maintenance engineers 29, mechanics 82

The aircraft flew 1274 hours in one month—May 1953

There were two centrally subsidized gliding clubs on July 1, 1953—the Indian Gliding Association, Bombay, Delhi Gliding Club, New Delhi

The number of gliders on charge on 1st June, 1953 was 8 all of which belonged to Government The number of pilot instructors was two, and of operator cum mechanic one

The number of hours flown by the Association in Bombay in May 1953 was 26 hours and 22 minutes

It trained 17 pilots upto B certificate 3 pilots upto C certificate one pilot upto CC certificate

The total subsidy granted to flying and glider clubs in 1952 53 was Rs 971,847

The Government bought in all 151 training craft which they loaned to the flying and gliding clubs Of these only 75 (Aug 1 1953) were in commission The total cost of the 151 training craft was Rs 7,239,315

The Civil Aviation Training Centre at Allahabad opened in 1948 trains pilots, engineers aerodrome control officers, radio operators and technicians

AIR TRAINING

Facilities for training in flying aircraft engineering communications and air traffic control available at the Civil Aviation Training Centre, Allahabad comprises the following four wings, viz —

(1) Flying School, (2) Aerodrome Officers Training School (3) Engineering School, (4) Communication School

In addition a Repair and Overhaul Organisation is also attached to the Centre for carrying out repairs and overhaul of the Centre s aircraft

At the Civil Aviation Training Centre at Allahabad (Jan to June, 1953)

20 trainees completed the pilot s ground training course 16 the Dakota conversion course, 11 the aircraft maintenance engineers course, 18 the air traffic control officers course, 29 the aerodrome operators course, 11 the radio technicians refresher course eight the radio technicians advanced refresher course, 13 the radio operators advanced refresher course, and 5 the radio technicians abinitio course at the Civil Aviation Training Centre Allahabad

At the end of June 1953, 79 trainees were under training at the centre

The Centre has acquired the reputation of being the best of its kind in the East

AERONAUTICAL COMMUNICATION ORGANIZATION

This is a branch of the Civil Aviation Department organised in 1946

The aeronautical communication stations provide facilities for air/ground communication, radio aid to navigation, point to point communications and Met broadcasts for the benefit of aviators

For purposes of organization, India has been divided into four regions, each under the charge of a Controller of Communication, who is responsible for maintenance and operation of the communication stations in his region

The communication organisation has the following ancillary units —

The Radio Construction Unit, The Radio Development Unit, The Radio Stores Depot

The new installations and major repairs to technical equipment are carried out by the Construction Unit The Radio Development unit, which came into existence in January, 1948, is engaged in carrying out research and development work on problems pertaining to aeronautical communications The Radio Stores Depot is the central stores organization responsible for the stocking and distribution of all equipment and spares to the stations

A Research and Development Branch was created in April 1946

A Technical Centre has been established in New Delhi Research and Development work concerning problems of aircraft design, construction modification and repair, development of aircraft materials and processes, development and use of safety devices analysis of technical problems of air transportation and, in general, such scientific and advanced technical work considered necessary for the promotion of civil aviation is carried out at this Centre

The need for aircraft manufacturing was keenly felt immediately on the outbreak of the War and the Hindustan Aircraft Company was established in the year 1940 Aircraft, aeromaterials, accessories and parts are now being manufactured in the country

DEVELOPMENTS IN 1953

Night air services continued to operate satisfactorily during the period 13 343 passengers, 524,136 lb of freight and 1 564 396 lb of mails were carried on the night services giving a daily average of 74 passengers, 2,896 lb of freight and 8,643 lb of mails

The Government of India granted a loan of Rs 25 lakhs to Air India International Ltd towards the purchase of two Super Constellation aircraft

A provisional payment of Rs 3 lakhs was made to Bharat Airways Ltd as subsidy to cover the losses incurred by the company in the operation of its scheduled services on the route Calcutta Singapore during October, 1951 to October, 1952

Financial assistance to air companies was continued for the period January to December, 1952, at the rate of six annas per gallon of aviation fuel consumed on scheduled air operations

A new concrete runway at Calcutta (Dum Dum) airport 7 000 feet long by 150 feet wide with a paved overrun of 250 feet at each end was opened to traffic on March 1 1953

The work of extension of the east west runway at Bombay (Santa Cruz) airport from 5 200 feet to 7,000 feet was completed and the runway opened to traffic on May 15, 1953

Air traffic control facilities were provided at Imphal (Koirengie) and Pathankot aerodromes

An aerodrome visual beacon with alternate green and white flashes was installed at Allahabad on February 2, 1953

A land mark beacon was installed at Akola on March 2, 1953 and a mobile rotating beacon (aerial lighthouse) was put into commission at Raipur on April 4, 1953

A rotating beacon with white flashes was installed at Coimbatore on June 9, 1953

Sixteen new facilities were put into commission during the period under review

An aeronautical tele communication station was established at Balurghat aerodrome

An automatic marconi AD 200 VHF/DF facility was installed at the aeronautical tele communication station Nagpur and a high power MF beacon was installed at Mangalore

The reporting beacon previously installed and operated at Kalna was withdrawn and was re installed at Berhampore This beacon will facilitate control of air traffic at Dum Dum airport

Approach control facilities on VHF radio telephony channel were provided at Begumpet, Bhopal, Aurangabad, Jaipur Amritsar, Bangalore, Madras, Cochin and Coimbatore

In addition, a long range HF air ground radio telephony was provided at Bombay aerodrome, control VHF radio telephony at Bhavnagar and inter tower radio telephony at Mohanbari

Radio navigation and communication facilities were installed at Madura airfield

Emergency installations of aeronautical telecommunication and navigation facilities were carried out at Hatwa and Satna

During the period under review 13 major accidents occurred to Indian registered aircraft, of which one occurred outside India, in Nepal

Out of these 13, two accidents related to aircraft engaged on scheduled passenger air services, two to aircraft engaged on scheduled freight air services one to aircraft engaged in non scheduled operations and the remaining eight to flying club and private aircraft

Two of these accidents involved fatalities taking a toll of 21 lives

Dakota conversion courses for B licensed pilots were introduced at the Centre

The budget estimates for the year 1952 53 under the two demands, Revenue and Capital pertaining to civil aviation are as follows —

Revenue	Rs 2,80,28,000
Capital	Rs 1,50 00,000

India is a member of the International Civil Aviation Organisation and has been elected to its Council

AIR AGREEMENT

India has entered into bilateral air agreements with the following 12 countries on the dates shown against each —

U S A	14 11 46
France	16 7 47
Sweden	21 5 48
Pakistan	23 6 48
Ceylon	21 12 48
Switzerland	24 6 49
Australia	11 7 49
The Philippines	20 10 49
Netherlands	24 5 51
U K	1 12 51
Afghanistan	26 1 52
Egypt	14 6 52

The Agreement with Sweden is not operative at present

There are temporary air agreements with Italy, Thailand, Burma Norway Denmark, Iran Iraq, Sweden, Nepal Indonesia

NATIONALIZATION

Authorized capital of the companies taken over	Rs	214,071 429
Paid-up Capital	Rs	69 733 549
Total staff		9 500
Govt loan to Air India International at 4½ per cent interest	Rs	25 lakhs
Govt loan to Deccan Airways at 4½ per cent interest	Rs	19 5 „

Financially, most of India s airlines were a miserable failure Too many more air operators than were warranted for the country s requirements, too many aeroplanes, far in excess of her present needs, duplication and overlapping of existing routes paucity of both adequate and additional traffic potentiality, inadequacy of unexplored or untapped new routes, both in India and the neighbouring countries, lack of general prosperity among the travelling public rigid Government control on fares relating to passengers, air freight, and postal mail the specified routes on which to operate on the basis of a licence issued by the Air Transport Licensing Board of the Government of India s Directorate-General of Civil Aviation and highly prohibitive costs of aviation fuel and oil were some of the contributing factors, leading to the incurrence of huge losses by Indian civil air transport operators

Carriage of a major portion of the postal mail, passenger traffic, and air freight by night air services deprived the day air operators of what was formerly their legitimate due

Fares at present obtaining in India even for day services, are among the lowest in the world Any excessive slashing down of the existing fare structure is bound to be disastrous to the Indian air services There is actually a strong case for an enhancement of the present fares, if India's nationalised airways are not to prove a drain on India s exchequer

RAILWAYS

THE total route mileage of all the railways in India on April 1 1952 was 34 119 44 The total electrified route mileage was 23 99

Some railways are company managed The total route mileage of these railways on October 1 1952 was 965

The total capital at charge on March 31, 1952 was Rs 850 11 crores On other than Government railways the capital at charge was Rs 1 14 crores

There are three kinds of gauges broad (5 ft 6 in), metre (3 ft 3⅜ in) and narrow (2 ft 6 in) There is also a light gauge usually laid on the mountains (2 ft) Examples of this last are the Matheran (Hill) Light Railway and the Darjeeling Himalayan The longest line in this class is the Scindia State 294 miles

The fares are as follows —

Air Conditioned Class	30	pies per mile
*I Class	27	,, ,, ,,
II Class	16	,, ,, ,,
Inter Class	10 5 pies per mile (mail)	
,,	9 , , ,	(ordinary)
III Class	6 , , ,	(mail)
,,	5 , , ,,	(ordinary)

ZONAL ADMINISTRATION

The entire Government railway system is now regrouped into six administrations the Southern Railway the Western Railway the Central Railway the Northern Railway the Eastern Railway and the North Eastern Railway

The headquarters of the Southern Railway are at Madras, of the Western Railway at Bombay of the Central Railway also at Bombay, of the Northern Railway at Delhi, of the Eastern Railway at Calcutta, and of the North-Eastern at Gorakhpur

There are 10 company railways Barasat and Basirhat Light (Calcutta), Bukhtiarpur Bihar Light (Patna), Barsi Light (Kurduwadi)** Bombay Port Trust (Bombay) Calcutta Port Commissioners (Calcutta), Dehri Rohtas Light (Dalmianagar), Madras Port Trust (Madras), Martin Burn Ltd (Calcutta), McLeod and Co (Calcutta)

Before the amalgamation there were 35 railway systems in India of which 22 were owned by the Indian Government

These 22 were —

Assam, Bengal Nagpur, Bombay Baroda and Central India, Bezwada Dhone Kurnool, Darjeeling-Himalayan, East Indian, Eastern Punjab, Great Indian Peninsula, Madras and Southern Mahratha, Oudh Tirhut, South Indian, Bikaner State Railway, Kutch State Railway, Dholpur State Railway, Jaipur State Railway, Jodhpur Railway Mysore State Railway, Nizam's State Railway Rajasthan Railway, Saurashtra Railway, Scindia State Railway

The chief administrations were the Assam Railway, the Bengal Nagpur Railway, the Bombay Baroda & Central India Railway, the East Indian Railway, the Punjab Railway, the Great Indian Peninsula Railway, the Madras and Southern Mahratha Railway, the Mysore State Railway, the H E H Nizam's State Railway the Oudh Tirhut Railway the South Indian Railway and the Saurashtra Railway

The highest administrative authority for the railways is the Railway Board

The Indian Railway Conference Association New Delhi, is a sort of clearing house for all railways

The majority of the railways are still organized on a Departmental basis though the general drift is towards the Divisional organization

There are a number of Committees which have been associated with the Railway Administration Standing Finance Committee Central Advisory Council, Railway Rates Tribunal, Indian Railway Fuel Committee

There are also a number of standardization Committees such as for bridges structure track signalling and inter locking building locomotive, carriage and wagon, electrical, specifications

There are also Railway Users Consultative Committees at the zonal regional and national level

There is a Railway Service Commission in Bombay and another in Calcutta

A training college for railway officers and staff was opened at Baroda in January 1952

In the budget for 1952 53 there was provision for a Railway Research and Testing Centre at Lucknow

Some of the more important officials are given below

Chairman and Member (Engineering) Railway Board F C Badhwar

Chairman Railway Conference Association K P Mushran

General Manager, Central Railway H P Hira

, ,, *Eastern Railway* P C Mukerjee

, ,, *Northern Railway* K B Mathur

,, *North Eastern Railway* G Pande

,, , *Southern Railway* I A Joseph

,, ,, *Western Railway* K P Mushran

STATISTICS

Some statistical information about Indian Railways is given below —

	(Rs in crores)
Capital at Charge (March 31, 1952)	850 11
Total Mileage (April 1952)	34,119 44
Broad Gauge	15,702 37
Metre Gauge	15,060 38
Narrow and Light	3,356 69
New Lines opened to Traffic during 1951 52	16 35
Lines under Construction (1951 52)	284 29
Total No of Locos (March 31, 1952)	8,572
No of Steam Locos	8,483
No of Diesel Electric Locos	17
No of Electric Locos	72
Total tractive effort of Locos in lb	19,65,66,483
Tractive effort of Steam Locos in lb	19,39,57,483
Tractive effort of Diesel Locos in lb	4,58,400
Tractive effort of Electric Locos in lb	21 50 600
No of Passenger Carriages (March 31 1952)	15 034
Total No of Seats (March 31, 1952)	1,008 129
*No of 1st Class seats**	33 496
,, ,, *2nd Class* ,	38 996
, , *Inter Class* ,,	62,437
,, ,, *3rd Class*	873 200
No of Goods Vehicles (March 31 1952)	207 287
Total carrying Capacity in tons	3 649,864
Total No of Passengers Carried (1951 52) (Crores)	123 21
No of 1st Class Passengers (Million)	14 08
No of 2nd Class Passengers (Million)	4 98
No of Inter Class Passengers (Million)	21 42
No of 3rd Class Passengers (Crores)	119 16
Total Passenger Miles (Crores)	3 955
Average Miles per Passenger	32 1
Total Earnings from Passengers (1951 52) (Rs in Crores)	111 4176†
Earnings from 1st Class Passengers (Rs in Crores)	2 2500‡
Earnings from 2nd Class Passengers (Rs in Crores)	4 5712
Earnings from Inter Class Passengers (Rs in Crores)	6 6797
Earnings from 3rd Class Passengers (Rs in Crores)	97 7301
Goods Carried (1951 52) (Million tons)	98 025
Net ton Miles (Crores)	2,901 7658
Average Miles a Ton of Goods was Carried	296 0
Earnings from Goods Carried (Rs in Crores)	153 9493††
Average rate Charged for one Ton one Mile (Pies)	10 2

STAFF

The total strength of Staff (March 31 1952)	934 690§
Class I and II Staff	2,372
Class III and IV Staff	932 314
Class IV and Workshop Staff	650 275
The total cost of all Staff (Rs in Crores)	122 85
The total cost of Class I and Class II (Rs in Crores)	2 91
The total cost of Class III staff rising to above Rs 250 per month (Rs in crores)	6 72
The total cost of Class III staff rising to not more than Rs 250 per month (Rs in crores)	46 13
The total cost of workshop staff plus other staff of the Mechanical Dept Class IV (Rs in Crores)	27 49
The total cost of Class IV staff of all departments other than Mechanical (Rs in Crores)	39 60
Man days lost due to Sickness	7,494,909
Man days lost due to Strikes or Lock outs	17,345
Total Man days lost	7,512,254
Total No of Female Employees	7,899
Class I and II Officers	3
Class III Staff	
Clerks	609
Stenographers	61
Nurses	370
Teachers	398
Others	354
Class IV Staff	6,104

* *First Class was abolished on all Trains except some long distance trains on October 1, 1953*

** There is provision in the 1953 54 budget to take over this railway

† In 1952 53 the total passenger earnings were Rs 100 36 crores

‡ Gross earnings from Class I passengers (Jan March 1953) were Rs 41 25 lakhs

†† 1952 53 Rs 146 13 crores

§ Includes four officers on loan from the Indian Audit and Accounts Service

FINANCIAL STATISTICS (1951-52)

(Rupees in crores)

Capital at Charge	Gross Earnings	Working Expenses	Net Earnings	Percentage of Working Expenses to Gross Earnings	Percentage of Net Earnings to Capital
	FOR INDIAN GOVERNMENT RAILWAYS				
825 39	290 85	224 99	65 86	77 36	7 98
	FOR OTHER RAILWAYS

			TOTAL		
861 55*	294 14*	227 58*	66 55*	77 37	7 72

*There are miscellaneous items which are included in the figure

The total dividend to General Revenues chargeable against Net Revenue Receipts of Indian Railways was Rs 33 41 crores in 1951 52 and Rs 32 51 crores in 1950 51

The value of stores imported direct by the Indian Railways (1951 52) -Rs 18 92 crores

The value of imported stores purchased in India--Rs 10 41 crores

The value of stores of Indian manufacture or of indigenous origin—Rs 68 34 crores

ROLLING STOCK (1952-53)

During 1952 53 791 indigenous coaches and 104 foreign coaches were put into commission compared with 673 and 98 in 1951 52

As regards wagons 6 377 indigenous and 6 611 foreign were put on the line in 1952 53 compared with 3,707 and 671 in 1951 52

ACCIDENTS

Accidents from movement of trains etc

	Killed	Seriously Injured	Minor Injuries
Passengers	403	1 396	1,886
Railway Servants	145	372	5,028
Other Persons	3 500	1 511	420
TOTAL	4 048	3 279	7,334

1	No of Collisions in which Passenger Trains were involved	13	
2	No of Derailment to Passenger Trains	156	
3	No of Train wreckings	8	
4	Attempted Trains wrecking	73	
No of persons killed seriously injured escaped with minor injuries in (1)		14 24 133	
No of persons killed seriously injured escaped with minor injuries in (2)		24 12 117	
No of persons killed, seriously injured escaped with minor injuries in (3)		*Nil* 1 12	
Total Number of persons killed, seriously injured or escaped with minor injuries in accidents due to collision, derailment, fires, failure of engines, etc		127 118 467	

TICKETLESS TRAVELLERS

The number of ticketless travellers during 1952 53 was 8 415 088 (1951 7 900 918)

The total amount of fare and penalty realized was Rs 1,66,68,073 (1951 Rs 1 65,58,180)

The number of persons challenged in the courts was 262 653 (1951 224 500) and the number found guilty 172 013 (1 50 486)

The amount of fine realized was Rs 5,12,219 (Rs 4 57,064)

1953-54 BUDGET

The main figures are as follows —

(Rupees in crores)

	Actuals 1951 52	Budget, 1952 53	Revised Estimate, 1952-53	Budget, 1953 54
Gross traffic receipts	290 82	282 16	269 55	272 28
Working expenses	194 35	187 93	189 10	191 20
Net miscellaneous expenditure	4 72	6 76	6 86	7 00
Appropriation to depreciation reserve fund	30 00	30 00	30 00	30 00
Total	229 07	224 69	225 96	228 20
Net railway revenues	61 75	57 47	43 59	44 08
Dividend to general revenues	33 41	34 00	34 11	34 77
Net surplus	28 34	23 47	9 48	9 31

The Capital budget (revised estimate) for 1952 53 Rs in crores 76 79

The Capital budget for 1953 54 ,, ,, 79 61

The capital programme placed primary emphasis on rehabilitation but due consideration was given to the necessity for augmenting rolling stock, the construction of new lines, relieving bottlenecks and providing better passenger facilities

Works was to commence on five new lines and seven other projects were to be surveyed

The Barsi Light Railway was to be purchased

Railway users were brought into closer contact with the administration at all levels with the establishment of Railway Users Consultative Committees at the regional zonal and national levels

First class railway travel was abolished on October 1, 1953 on all trains except a few

The ultimate objective, it was stated, was to have two classes, an upper and a lower besides air conditioned accommodation

Teachers of recognised schools became entitled to half concession fares on the railways for educational tours from April 1 Concession tickets to volunteers working on community projects were also issued from April, 1953

An *ad hoc* tribunal was set up to deal with labour disputes that cannot be settled by discussion between the Railway Board and the Railwaymens Federation

It was announced by the Minister for Railways in the course of his speech introducing the budget for 1953 54 that indigenous production was able to meet the normal requirements of the railways of rails, wagons and coaches

About 8,000 quarters were to be constructed for railway workers

In 1952 53 the bill for labour welfare was Rs 7 crores

SOME ALLOCATIONS FOR 1953-54

(Rs in crores)

For new lines and restoration of dismantled lines	6 70
Coach building factory at Perambur	1 30
Works, machinery, rolling stock	79 61
Staff quarters and amenities	4 86
Purchase of Barsi Railway	1 89

(Rs in lakhs)

Kalyan Power House	40
Railway facilities for Oil refineries at Kurla	40

The following developmental projects were either completed or taken up during 1952 53

Deesa Gandhidham section of the Western Railway opened in October 1952, Bijnor-Chandpur Sitapur section of the Northern Railway, restored and opened to traffic in November, 1952, Vasad Kathana line on the Western Railway expected to be completed in 1953, Quilon-Ernakulam metre gauge link on the Southern Railway commenced in December, 1952, and extension of Kalyan Power House, on the Central Railway, at a cost of Rs 3 crores, opened in December, 1952, work on the rail cum road bridge over the Ganga near Mokameh, was resumed

The following new lines were taken in hand in 1953 54

Khandwa Hingoli link in Madhya Pradesh, 186 miles long with a total anticipated cost of Rs 7 50 crores, rail connection from the Gau Barabil area to the Manharpur Rourkela section in Bihar and Orissa, 31 miles long at an estimated cost of Rs 3 5 crores, the Champa Korba line in Madhya Pradesh 22 miles long at an anticipated cost of Rs 88 lakhs, the Gandhidham-Kandla link in Kutch, 7 miles long with an anticipated cost of Rs 57 lakhs, the Gop Katkola line in Saurashtra, 21 miles long at a cost of Rs 34 lakhs, and conversion of the Tezpur-Balipara line, in Assam, on the North Eastern Railway, from narrow gauge to meter gauge, 20 miles long at a cost of Rs 40 lakhs

The following seven projects were under survey

The Deva Dasgaon line in Bombay, electrification of the Calcutta suburban section in West Bengal, the Mangalore Hassan line in Madras and Mysore States, the rail connection to Ktah, Uttar Pradesh, rail connection to Chandigarh, in the Punjab, the Tildanga Malda branch in West Bengal, the Fatehpur Churu line in Rajasthan

ROLLING STOCK

The rolling stock programme for 1953 54 would cost Rs 42 crores of which Rs 16 69 crores were for purchases from abroad

At the Chittaranjan Locomotive Works already about 70 per cent of locomotive parts are manufactured

It is expected that by the end of 1954 all except proprietary and some special parts will be manufactured in this country

Till the end of 1952 the Works produced 49 locomotives

The Tata Locomotive and Engineering Co produces metre gauge locomotives Till the end of January 1953 it produced 35

When the two are in full production India will be self sufficient in the matter of locomotive replacement

About passenger coaches the Perambur factory will be able to produce 350 all steel coaches when working at full capacity

Wagons have been manufactured in India for 30 years

Total number of locomotives to be acquired in 1953 54	245
No that will come from Chittaranjan	36
No of boilers to be acquired	187
Total no of wagons to be acquired	11,264
No which will be manufactured in India	7,000
No of passenger coaches to be acquired	1,143
No which will be manufactured in India	600 to 650

EFFICIENCY

Composite index of operating efficiency on broad gauge lines	1950 51	100 7
	1951 52	192 8
Composite index of operating efficiency on metre gauge lines	1950 51	92 4
	1951 52	93 6
Punctuality on broad gauge	1950 51	77 1
	1951 52	78 4
Punctuality on metre gauge	1950 51	74 3
	1951 52	81
No of new trains introduced	4pr 1952 Jan 1953	109
No of trains whose runs were extended	, ,, ,, ,,	108

The statistical position about the regional administrations for 1952 53 was as follows

CENTRAL RAILWAY, 1952-53

(Victoria Terminus, Bombay 1)

Total Route Mileage	5 427 61
Broad Gauge	4 091 14
Metre Gauge	772 49
Narrow Gauge	563 98
New Construction in Hand, Mileage	4 21
Mileage Electrified	184 85
Capital at Charge (Rs in crores)	165 70
Gross Revenue Receipts (Rs in crores)	46 70
Working Expenses , ,, ,,	38 36

LOCOMOTIVES

The country's requirements in locomotives is about 200 a year

At present there are two factories which manufacture locomotives the Chittaranjan Locomotive Works at Chittaranjan in West Bengal and the Tata Locomotive and Engineering Company The former has an installed capacity of 120 locomotives a year and the latter of 100 Together, therefore, they will be able to meet the country's requirements when they go into full production The Tata company which produces metre gauge locomotives works with the co operation of the German firm of Krauss Maffei

At present the out turn from the Chittaranjan works is 60 per year

Meanwhile the import programme has been as follows

	Numbers	Value in Rs lakhs
1948 49	149	4,54
1949 50	432	19,03
1950 51	220	8,79
1951 52	80	3,00
1952 53 (Est)	207	20,80
1953 56 ,,	313	

GOODS WAGONS

The normal annual requirements of Indian railways is about 6,000 wagons

Wagons have been manufactured in India for about 30 years At present wagons are built at the railway workshops and the four following firms 1 Burn & Co, Howrah, 2 Braithwaite & Co, Calcutta 3 Indian Standard Wagons Ltd, Burnpur, 4 Jessop & Co, Calcutta

The four firms listed above have an installed capacity of 6,000 wagons a year so that normally it should be possible to meet India s requirements from internal production The supply of raw materials however like steel and of manufactured parts like wheels and axles do not keep up to the demand

The actual production in 1951 52 was 3,925 wagons

The import schedule is as follows

1951 52	2 460
1952 53	1 744
1953 54	1 460
1954 55	4 740
1955 56	4 740

PASSENGER COACHES

Passenger coaches have been built in this country for the last fifty years in railway workshops though certain parts like wheels axles underframes and electrical equipment have had to be imported

At present coaches are built besides the railway workshops at Hindustan Aircraft Ltd and two private companies —Braithwaite & Co Ltd and Indian Standard Wagon Co Ltd The foundation of the workshop at Perambur in Madras for the manufacture of all steel integral types of coaches has been laid

The installed capacity is roughly as follows the two private companies—250 bogies per annum, railway workshops –500 bogies

The Hindustan Aircraft has plans to increase its capacity to build 100 to 180 bogie passenger coaches per year

The Perambur workshop when it is in full production (1957) will have a capacity to build 300 to 350 all steel integral type coaches per annum It will cost about Rs 4 crores, and will start production by 1955 and will produce about 50 coaches in the first year (1955 56)

The required replacements (both arrears as well as current) during the Plan period is estimated at 8 935 As against this it is estimated that over 5 600 units will be available

Production of coaches and underframes has been as follows

	Coaches	Underframes
1948-49	228	118
1949-50	337	1 540
1950 51	479	984
1951 56	4 380	not available

The import schedule has been as follows

1952 53	274
1953 54	292
1954-55	315
1955-56	315

FIVE-YEAR PLAN

Total allotment Rs 400 0 crores

The *most serious problem* is that of renewal and the provision of new equipment

The proportions of the over age stock are somewhat as follows By March 31 1956 about 2,090 locomotives, 8 535 coaches 47,533 wagons will reach the normal age of replacement

The position about stationary equipment is just as grave Present speeds are restricted over 2,000 miles of track because of its weak condition

As against this the supply position would be as follows

Locomotives Chittaranjan would produce 120 locomotives and 50 spare boilers per annum and the Tata works will produce about 200 locomotives

Coaches The estimated indigenous output during the Plan period is 4 380 The coach factory at Perambur will not start working till 1956

Wagons About 30 000 will be produced during the Plan period

About track it is proposed to deal with 400 to 500 miles of track every year Use will be made of indigenous supply About 2 3 million wooden sleepers (cost Rs 3 9 crores), 8 lakhs of cast iron sleepers and 6 lakhs of steel sleepers will be purchased

Provision has been made for creating two new depots for the creosoting of timber at Cluttenbuckganj and Coimbatore in addition to those already in existence at Dhilwan (Punjab) and Naharkatiya (Assam)

Provision has been made for the opening of new lines at a cost of Rs 20 crores

For the whole Plan period the sum allotted is Rs 400 about Rs 80 crores a year Out of this Rs 320 crores will be raised by the railways themselves and Rs 80 crores will be provided as a grant from the Central revenues

ROADS

THE country s road system in 1950 51 may roughly be described as follows—

The position of extra municipal roads metalled and unmetalled as on March 31 1948 was as follows —

Metalled				Unmetalled	Total
Bituminous	Concrete	Water bound macadam	Total surfaced		
10 711	763	78 634	90,108	158,806	248,914

The mileage of the national highways is 13 500 Out of this the four great trunk roads are 5 000 miles long

The four great trunk roads stretching diagonally across the country form the framework with which most of the important subsidiary roads are linked The most famous is the ancient marching route known as the Grand Trunk Road which stretches right across the northern part of the country from Delhi to Calcutta the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi and the four of them together account for about 5 000 out of the 90,110 miles of surfaced roads in the country

These roads cannot be considered all weather roads according to modern standards The Madras Calcutta Road in particular is far from being bridged throughout its entire length

As regards subsidiary roads, the best and most numerous are in South India The worst served regions are Rajasthan and parts of the Punjab on the one hand, and Orissa and West Bengal on the other, the former owing to its aridity and sparse population and the latter because of the numerous unbridged and mostly unbridgeable waterways which traverse it In addition there are numerous other parts of the country such as the lower Himalayas, which suffer from a dearth of communications owing to difficult terrain

Besides surfaced roads, there is a very large mileage of kutcha roads amounting to approximately 160 000 miles, some of which are good for motor traffic during the dry weather

The department in the Central Government which deals with the overall direction of the roads plan and co ordination of provincial planning is the Roads Organization under the Ministry of Transport The chief official is the Consulting Engineer for Roads

It gives technical advice and arranges for the allocation of Central Road Fund reserves among the States

DEVELOPMENT COMMITTEE

The Road Development Committee recommended the creation of a Road Development Account out of the proceeds of the import and excise duties on motor spirit, whose unexpended balances should not lapse at the end of the financial year

The resolution dealing with the disposal of the Road Development Account at present in force in India was passed by the Indian Parliament in 1950 Its main features may be described as follows The special tax on petrol introduced in 1929 shall continue to be levied for road development the proceeds of which, after retaining a reserve of 20 per cent for administration research and special grants in aid, shall be allocated for expenditure in the different States in the ratio of the petrol consumption in the various areas These sums may be spent on the construction, reconstruction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance—on interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of State Boards of Communications and establishment connected with the control of motor transport

The Government of India, laid down that at least 25 per cent of the State shares in the Road Fund should be used on Feeder Roads and that not more than 25 per cent can be used on roads which compete with the Railways

With the levy of a surcharge on petrol, the share of the petrol duty available for the Road Fund was increased from 2 annas to 2¼ annas per gallon with effect from October 1, 1931 Upto the end of March 1951 total receipts in the Central Road Fund since its inception were about Rs 36¾ crores and those in the Central Road Fund Reserve since its inception were about Rs 7 crores

On the administrative side roads except for the small mileage of National Highways described later are a State subject and may be divided into two main classes, State Roads under the Public Works Department and Local Roads in charge of local bodies

India s road system is grossly inadequate for the country s needs and a comparison with other advanced countries will show how great is the leeway that has to be made

For example, the road mileages per 100 square miles of area are 202 in the United Kingdom, 184 in France 103 in the U S A 90 in Germany 89 in Italy and 70 in Ceylon India s road mileage for the same area is 22 representing less than one ninth of the U K and one third of Ceylon

NAGPUR PLAN

The Central Road Fund could, at best, increase the annual road expenditure by roughly 15 per cent Following persistent representations from the Indian Roads and Transport Development Association of Bombay, the need for an extensive programme of road development was accepted by the Government of India

In December 1943 the Chief Engineers of the various States met in conference at Nagpur and evolved a road plan based on the minimum needs of the country Adopting as their objective the very modest proposition that no village in a well developed agricultural area should remain more than 5 miles from a metalled road the Chief Engineers recommended the increase of Indian Union s road mileage to 385,000 of which 200,000 miles would be motorable

The net increase in road mileage under this Plan now known as the Nagpur Plan works out at 50 per cent

While the Government of India as well as the State Governments endorsed these recommendations in general terms, there was no general acceptance of a time limit for the implementation of the plan

However, five-year programmes for commencement from April 1947 and representing varying proportions of the Nagpur scheme were prepared by the States for their respective areas in 1945 46

These Programmes exclusive of National Highways were estimated to cost nearly Rs 120 crores over the five year period, the following being the allotments (in crores of rupees) proposed for the individual States U P 30 72, W Bengal 12 00 Bombay 20 80, Madras 20 77, Bihar 13 60 East Punjab 4 00 Madhya Pradesh 7 00 Assam (before detachment of part of Sylhet) 5 32 and Orissa 4 00

The Programmes embraced the construction or improvement of 80,000 miles of roads as under

State & District Roads

Mileage improvement	33,393
Mileage, new construction	17,509

Village Roads

New construction & improvement	30,098

Some of the States, particularly Bombay and Madras, have since revised and reduced their 5 year programmes to roughly Rs 8 crores each

Progress in the implementation of the Nagpur Plan is however most disappointing Owing first to shortage of material and later of funds Uttar Pradesh, the Punjab, Orissa and many other States had to abandon large portions of their plans

The 5 year period covered by these plans ended on 31st March 1952 and inclusive of Parts B and C States the total expenditure is estimated at Rs 50 crores representing less than half of what the States planned to accomplish

The Central Government as part of their contribution towards post war development accepted liability for the construction and maintenance of the National Highways with effect from 1st April 1947

10 000 miles of highways are now being maintained by the Central Government

The five year plan for the development of National Highways was originally estimated to cost Rs 36 crores but was reduced to Rs 23¾ crores subsequently Although financed by the Centre, the actual execution of the work is carried out through the State P W Ds But the total expenditure is now expected not to exceed Rs 9 crores

Out of about 1,080 miles of missing links in the National Highway System about 130 miles have since been constructed at a cost of Rs 1 42 crores and 285 miles are under construction

Fifteen major bridges have been constructed at a cost of about Rs 2 crores and 47 more bridges estimated to cost Rs 3 4 crores are under construction

In addition 1,200 miles of highways have been improved and upgraded while work on 580 miles is at present in progress

Total expenditure during 1947 48 to 1951 52 was Rs 21 66 crores

The expenditure of Rs 9 crores on National Highways and Rs 50 crores on other roads during the past few years works out at an average annual expenditure of Rs 12 crores on road development

At present nearly Rs 13 crores is being spent in addition on Road Maintenance, making a total road expenditure of Rs 25 crores

As against this, the Governments at the Centre and in the States are now realizing a revenue of Rs 45 crores annually from motor transport, as under —

	Revenue, approx 1950 52 Rs In Crores
Central Revenues	
Motor Spirit Duties	21 36
Tyre Excise ,,	4 01
Vehicle Import ,,	9 44
	34 81
State Revenue *	
Vehicle Taxes	6 13
Petrol Sales Taxes	4 00
	44 94

*1949-50 estimates

THE NEW PLAN

The second Five Year Plan of National Development which has now been adopted under the Planning Commission s recommendations makes the following provision —

	(Rs in crores)
Central Government	31 24
'A States	50 59
'B States	15 83
Jammu & Kashmir	4 95
'C States	6 27
Total	108 88

INLAND WATER-WAYS

IN pre railway days inland navigation played an important role in the transport system of the country The decline began with the construction of railways in 1855 While the railways received every assistance from the Government to expand the water transport which was then only in its initial stages of mechanisation and was thus not in a position to provide the security, safety and speed comparable with the railways was allowed to languish

Almost simultaneously it received another blow when big irrigation schemes were taken up and consequently large scale withdrawals of water from the already meagre supplies of the rivers were effected

To add to these adverse circumstances there was no central co ordinating authority to improve and maintain the water ways and provide the appropriate navigational facilities as inland navigation has always been a provincial subject

It has come to be recognised that the most rational way to deal with a river is to treat it as a unit from the source to the mouth irrespective of administrative boundaries Also the utilisation of the water resources of a river should, as far as possible, be on a multi purpose basis including irrigation generation of hydro electric power and navigation in order to secure the most economic exploitation

The present constitution therefore provides for the control of the Central Government on navigation on inter State rivers and national water ways Besides a Central Water and Power Commission has been set up to assist in the co ordinated multi purpose development of the water resources of the country

It is consequently expected that inland navigation in the country will before long play its due role in the transport system of the country Further Government has set up a Ganga Brahmaputra Water Transport Board which will co ordinate and stimulate the navigational activities of the States of U P Bihar West Bengal and Assam situated on this river system

Looking back on the state of navigation on the main rivers about a hundred years ago, it is noticed that large steamers plied on the Brahmaputra upto Dibrugarh, on the Ganga as far as Garmukteshwar over 700 miles above Patna, and Kanpur *en route* presented the appearance of a large port on the Yamuna as far as Agra, and on the Ghagra only 30 years ago, a regular service was maintained upto Ayodhya, 200 miles upstream of its confluence with the River Ganga

A number of canals constructed for irrigation included provision for navigation

PRESENT POSITION

At present steamers ply regularly on the Brahmaputra river upto Dibrugarh but on the Ganga is far as Patna only with feeder services upto Buxar on the Ganga and Barhaj on the Ghagra

There are other parts of the country where canal navigation is still active In Andhra and Madras States for instance the Godavari Canals including the Dummagudan Canal the Kistna Canals, the Buckingham Canal the Kurnool Cudappah Canal the West Coast Canals and the Vedaranniyam Canals are important highways for water borne traffic

The Godavari and Kistna Delta canals in Andhra are indeed the chief means of transport in that region and afford a cheap and ready mode of access to all markets

The Buckingham Canal in Madras has played an important part in the trade of the country traversed by it and in particular during the last war when the traffic was heavy it afforded considerable relief to the railways

On the west coast the backwaters form the chief means of communication and transport

In Orissa, too there are some 200 miles of navigable canals in constant use

Then there are the important water ways of West Bengal, comprising besides the delta river system also the canals around Calcutta

The records of imports and exports into and from Calcutta show the extent to which the largest seaport in India depends upon its water way communications Post partition figures show that 12 per cent of the trade of the port arrives and leaves by water ways

As by far the greater proportion of the water borne traffic of the country is carried by the unorganised country boats reliable figures are not available as to the total ton miles of traffic thus moved

It has been estimated however that this would amount to only about one per cent of the total railway traffic of the country

The approximate length of navigable water ways at present in India is as follows —Uttar Pradesh 745 miles, Bihar 715 miles West Bengal 777 miles Assam 920 miles Orissa 287 miles, Madras and Andhra, 1 700 miles Total 5 144 miles

The above mileages are approximate and take into account only the main water ways navigable by steamers and large country boats They do not include the numerous tidal creeks on the coasts which are not connected to an inland water ways system

Out of 5 144 miles of navigable water ways 1,762 miles are navigated by steamers, details of which are given below —

	Miles
River Ganga –Patna to Jalgola (Border)	315
Patna to Buxar (Feeder service)	100
River Ghagra Confluence Ganga/Ghagra to Barhaj	97
River Hooghly Calcutta to Sundarbans (Border)	150
River Brahmaputra Dibrugarh to Dhubri (Border)	400
(Feeder services on tributaries)	375
(Feeder service on Surma Valley)	85
River Bhagirathi—Calcutta to Ganga River (during rains only)	180
River Brahmaputra—Dibrugarh to Sadiya (during rains only)	60
Total	1 762

Statistics of water borne traffic are not maintained in this country Detailed figures are available only for traffic carried on the navigation canals, which are maintained for the purpose of assessing tolls

The tonnage of goods carried on the canals are given below as available —

Uttar Pradesh 24 441 tons (1945 46), Bihar 69 795 tons (1939 40), West Bengal 1 278,870 tons (1938 39) 547,637 tons (1948 49) (Circular and New Cut Canals in Tollys Nullah only) Orissa 185 947 tons (1948-49), Madras*, 1 493 751 tons (1947 48)

It is interesting to note that the two of the largest Steamer Companies, The India General Navigation and Railway Co Ltd, and the River Steam Navigation Co, Ltd, who operate over 5,000 miles of the Ganga and Brahmaputra system of rivers in India and East Pakistan, and who carry about 75 per cent of the total goods handled by power craft, carry about 2 million tons of goods and 10 million passengers per annum (Separate figures for India and Pakistan are not available)

FUTURE

Allotment under the Five Year Plan—Rs 0 10 crores

Conservation of water resources on a multi-purpose basis and/or river training works or resuscitation of old ones offer the following potential new navigable water ways

1 **Uttar Pradesh** : (*a*) Revival of navigation of the Ganga river Patna Buxar Allahabad (*b*) Revival of navigation on the Ghagra river upto Bahram Ghat

2 **Bihar** (*a*) Navigation on the Kosi river is included in the programme of the Kosi Dam Project (*b*) Development of navigation on the Ganduk river (*c*) Development of navigation on the Son river feasible with the construction of the Rihand Dam

3 **West Bengal** (*a*) The construction of a navigation canal from Durgapur to the Hooghly river to connect the coal fields in West Bengal and Bihar with the port of Calcutta, is included in the programme of the Damodar Valley Project (*b*) Resuscitation of the Bhagirathi route affording a direct and much shorter navigation connection from the port of Calcutta to Bihar and U P by the construction of a barrage on the Ganga river This is being investigated under the Ganga barrage project

4 **Orissa** (*a*) Resuscitation of the Orissa coast canal to restore the connection between the Hooghly and Dhamra rivers (*b*) The Mahanadi Valley Project provides for the navigation on the Mahanadi river upto Hirakud dam, about 300 miles from the sea

5 **Assam** The various tributaries of the Brahmaputra offer great scope for development of navigation

6 **Madhya Pradesh** (*a*) Provision for navigation of the Narmada river is aimed at in the investigations in progress on the Narmada Valley projects (*b*) Conditions are favourable to obtain a navigation link between the east and west coasts *via* the Narmada river and the Johut Son rivers or Bearma Yamuna rivers

7 **Bombay** : The construction of dams on the Narmada and Tapi rivers will provide navigational facilities on these rivers

8 **Andhra** Development of the Kistna, and Godavari rivers could also provide navigational facilities

A priority list has been drawn up in accordance with which it is proposed to develop navigation In the first stage it is proposed to extend navigation on the Ganga river above Patna as far as Allahabad

Mr Otto Popper an Inland Navigation Expert and former Member of the International Danube Commission visited India on behalf of the E C A F E in February 1950 In his report he suggested a scheme for better organisation and running of country boat services

The scheme visualises the registration of all country boats with a carrying capacity of 10 tons or more and the issue of certificates of river worthiness the provision of shallow draught tugs for towing the boats, the issue of transport documents for goods carried, etc

The E C A F E have recommended that the improvements suggested by Mr Popper should be given effect to, and have proposed that a pilot project of shallow draught tugs towing country-boats and barges, operated under the auspices of the U N Technical Assistance Programme be initiated The Government of India has approved of the planned project

During the year 1951, the U N Technical Assistance Administration and E C A F E organised a tour for the study of technological advances in inland water transport methods abroad Accordingly a group of twelve members were drawn from India, Pakistan and other countries of the E C A F E region, which made a tour of their own region, and Europe and U S A

On completion of the tour, the group submitted to the U N a comprehensive report on the observations made

* Includes Andhra

PORTS

Allotment under Five Year Plan Rs 33 09 crores

For port facilities for oil refineries Rs 8 crores

There are five major ports in India

For the rest the ports declared open under the Ports Act are as follows The figures in brackets give the number of working ports

Orissa 9 (3) Madras* 54 (30) Travancore Cochin 9 (6), Bombay 87 (approx 80) Saurashtra 60 (29), Kutch 7 (7) Total 226 (approx 150)

The following are classed as major ports Bombay Calcutta Cochin Madras and Vishakapatnam They are directly under the Central Government The rest are classed as Minor Ports and are under the administrative control of State Governments

Technically a Major Port (as defined by the Ports Technical Committee) is one which is capable of taking in ocean going steamers with a registered tonnage of 4 000 or more and berth them along wharves

Mr S Nanjundiah officer in charge of Vishakapatnam Port who made a special survey of *minor ports for the Government of India* suggested the following further classification of Minor Ports Intermediate Ports Minor Ports and Sub Ports Ports which have handled one lakh tons or more of cargo should be Intermediate Ports ports which have handled cargo of less than one lakh but more than 1 500 tons should be Minor Ports the remaining ports should be Sub Ports or Petty Ports

INTERMEDIATE PORTS

According to this classification the Intermediate Ports will be as follows

In Andhra Kakinada, Masulipatam

In Madras Cuddalore Nagapattinam Kozhikode (Calicut) Mangalore Tuticorin

In Travancore Cochin Alleppey

In Saurashtra Bhavnagar Veraval Porbunder Bedi Navlakhi

In Kutch Mandvi

In Bombay Okha Broach Ratnagiri Karwar

The Minor Ports will be as follows —

In Orissa Chandbali Puri Gopalpur

In Andhra Bhimlipatam

In Madras Cuddapatam Porto Novo Pamban Dhanushkodi Ponnani Badagara Tellicherry Cannanore Kasargod Mulpe Hungarkatti Coondapur

In Travancore Cochin Quilon

In Saurashtra Mahuva Pipavav Victor Jaffarabad Sika, Salaya Jodiya Nawabundar Mangrol

In Kutch Mundra

In Bombay Cogha, Dholera Kavi Surat, Bulsar Bilimora Navsari Dahanu Umergaon Bassein Vossawa Ravanda, Bankot, Dhabhol Devghad, Jaighod Mora Achra, Vengurla Tadri Ankola Honavar, Vijaydurg Bhatkal Jaitapur, Malvan, Dwarka Kodinar, Cambay, Nangaon Rajpuri Harnai Dohej Kalyan, Panvel Karanja, Murud, Sodashivghad, Kumta, Behkeri

PORT DEVELOPMENT

Among the recommendations of the Nanjundiah report (May 1951) are the following 1 The existing Minor Ports should be classified into Intermediate, Minor and Sub ports 2 An early decision should be taken about the construction and use of small size steam ships for the coastal trade 3 Country craft industry must be fostered Ports should provide facilities for their laying up, repairs, etc 4 A certain measure of uniformity in Port dues may be brought about

Among the recommendations of the West Coast Major Port Development Committee (April 1948) are the following 1 There is an immediate need for a major port in the area covered by Saurashtra and Kutch 2 This major port should be at Kandla 3 The existing ports in Saurashtra should be placed under one Port Commission

Among the recommendations of the same Committee (July 1949) about a major port between Marmugao and Cochin are the following 1 A deep sea port for ships of large size and tonnage at all seasons of the year is necessary 2 The port should be at Mulpe 3 A rail link should be provided from Mulpe to the industrialized region of Mysore centred on Bhadravati 4 The broad gauge railway linking Madras and Mangalore should be extended to Mulpe

The Ministry of Transport has worked out a programme of development of the five major ports at an estimated cost of Rs 29 27 crores This sum is exclusive of an expenditure of Rs 12 05 crores on the Kandla port and of Rs 8 crores on the creation of port facilities for the oil refineries and of alternative facilities for the existing establishment on the Butcher Island These figures are in addition to R 4 90 crores spent in 1951 52 by the port authorities

The Kandla port is expected to be completed by the beginning of 1956

Towards the end of 1950 a National Harbour Board was set up in order to advise Government on port development

LIGHTHOUSES

Though partition brought about a shrinkage of the coast line under the charge of the Central Lighthouse Department the subsequent federal financial Integration has increased its responsibilities There are 120 lighthouses along a coast of 4 100 miles including Andaman Islands under the direct charge of this department In addition there are local light houses maintained by the port authorities or the State Governments The total number of lighthouses exceeds 1 700

Under the Constitution this is a Central responsibility

Over the next five to seven years the Light house Department visualises a development expenditure of about Rs 2 5 to 3 0 crores exclusive of the needs of Andaman and Nicobar Islands where aids of navigation hardly exist and for which plans have yet to be drawn up A sum of Rs 2 crores will be required during the period of the Five Year Plan for the projects included in the Department's plan as well as for the purchase of one out of two lighthouse tenders required for catering to the needs of the east and west coasts

Three new lighthouses at Dolphin's Nose (Vishakapatnam) Kolithotham (Travancore) and Chanka Islands (Gulf of Kutch) were erected The construction of a new lighthouse at Bhatkal is in progress

To cope with the growing expenditure the Indian Lighthouse Act was amended in 1953 for raising the ceiling on light dues from As 2 per ton to As 4 For the present the rate has, however, been doubled from As 1½ to As 3

BOMBAY

The Port of Bombay is over 75 square miles in extent

The Bombay Port Trust, which was constituted by Government in 1873 is administered by a Chairman appointed by Government and a Board of 24 Trustees, 10 of whom are nominated by Government, 2 elected by the Bombay Chamber of Commerce, 6 by the Indian Merchants Chamber, 1 by the Maharashtra Chamber of Commerce, 2 by the Municipal Corporation, 1 by the Millowners Association, 1 by the Indian National Steamship Owners Association Bombay, and 1 by the East India Cotton Association Limited, Bombay

The entire administration is subject to the provisions of the Bombay Port Trust Act, 1879

The Harbour is about 12 miles long 4 to 6 miles wide with a minimum of 32 feet at low water in the entrance fairway Spring rise above datum is 14 feet 1 inch and the range between mean low and mean high water spring tides is 11 feet 6 inches so that the Port is well endowed by Nature to accommodate deep draft shipping

Passenger Facilities —Trans oceanic passenger traffic is mostly dealt with at the Ballard Pier Station Coastal and Harbour Passenger traffic is dealt with at the New Ferry Wharf

The total number of overseas passengers embarking and disembarking at Bombay in 1950 51 exceeded 135 000 while the number of passengers carried by the coastal services was over 887 000

Wet Docks —There are three wet docks, the main features of which are as follows —

	Number of Berths
Prince's Dock	9
Victoria Dock	13
Alexandra Dock	20 (plus 6 berths for ferry steamers)

The three Docks together have a water area of 101½ acres and about 6 miles of quayage, extensive open storage and shed and warehouse accommodation for the reception and storage of goods, exists

Dry Docks —The main features of the two Dry Docks are as follows —

Hughes Dry Dock	Divisible into two compartments so that 2 ships can be accommodated at a time
Merewether Dry Dock	

Bunders and Timber Ponds —Beyond the Docks are the 'bunders' or open wharves and basins, where coasting and country craft traffic and overside cargo from the docks and stream are handled These bunders have an aggregate quayage of nearly 5 miles

The bunder traffic is an important item in the trade of the Port, over 134 lakh tons or roughly one fifth of the total tonnage of the Port being handled annually over the bunder wharves

Adjoining the bunders are the Timber Ponds covering an area of over 60 acres, where every facility for storage and handling of timber is provided

Ballard Pier Is a 1 500 ft extension of the harbour wall on the west side of the Alexandra Dock entrance lock and is the arrival and departure berth for the foreign mail steamers and other large passenger liners The station building comprises three platforms for tourist and other trains, a handsome concourse with waiting and refreshment rooms and a spacious baggage and customs hall

Bulk Oil Depots —There are three groups of bulk oil installations, one each for liquid fuel and lubricating oil kerosene oil and petrol all on land aggregating 83 acres in extent, leased by the Port Trust

Ample storage space is available within the Port area for grain (80 acres), cotton (127 acres, 1,000 000 bales), and manganese ore (30 acres, 300,000 tons) Large areas have also been reserved for the landing and storage of other commodities such as coal, bricks and tiles, building stones and iron

*Includes Andhra

Port Trust Railway

The Port maintains its own railway system which handles nearly 50 per cent of the rail-borne goods traffic of Bombay Its yearly traffic to and from the trunk railways amounts to over 2,000,000 tons, and its local station-to-station traffic is approximately the same in volume The principal commodities carried are cotton, grain and seeds, oil cake, manganese ore, sugar, kerosene and other bulk oils, coal, charcoal and china clay

Though only 7¼ miles in actual length, it comprises over 130 miles of main lines and sidings all directly linked with the inter railway exchange yard at Wadala, the various storage depots and the docks and wharves

REVENUE AND EXPENDITURE FOR THE YEAR 1951 52

Revenue	Rs 7 01 75 251
Expenditure	5,81,43 247

Statistics showing the volume of shipping handled during the period 1948-49 to 1951-52

Year	No of vessels entered docks and berthed at Harbour Walls	Net registered Tonnage
1948-49	1,988	5,588,427
1949 50	2,083	5,664,653
1950 51	2 079	6,016 774
1951-52	2,767	12,709,870 (gross tonnage)

Board of Trustees

Nominated by Government Chairman L T Gholap, I C S , H P Hira, K P Mushran, Commodore R M T Taylor, R N M M Chudasama, I P A N Sattanathan Brig K K Varma S Jagannathan I C S Dinkar Desai, P R Nayak, I C S , H N Trivedi

STATISTICS SHOWING CARGO HANDLED BY BOMBAY DURING THE PERIOD 1948 49 to 1951 52

Year	Imports	Exports	Total
	Tons	Tons	Tons
1948-49	4,948,000	1 634 000	6,582 000
1949-50	4,927,000	1,358,000	6,285,000
1950 51	5,185 000	1,702 000	6 887 000
1951 52	5 806,439	1,673,152	7,479, 91

CALCUTTA

The Port of Calcutta is situated on the left bank of the River Hooghly which is formed by the uniting of the three offtakes from the parent River Ganges The port is about 80 miles from the mouth of the river and 126 miles from the Western Channel Light Vessel at Sandheads The Port is administered by a Port Commission with jurisdiction under the Calcutta Port Act from Budge Budge to Konnagar

The chief exports from Calcutta are coal, tea, jute, gunnies, bone and bone-meal skins, hemp iron and steel manufactures lac, oil other than petroleum scrap ores pig iron, hides and mica The principal imports are salt, food grains machinery hardware, petroleum asphalt, bitumen metals and other articles

The total tonnage of sea borne traffic passing through the port during the year 1951 52 was 7 582 982 tons as compared with 7,501,499 tons during 1950 51 The total tonnage of exports during 1951 52 was 54,89,914 tons and the total tonnage of imports during the same year was 40,93 068 tons The income of the Port during the financial year 1951 52 was Rs 7,86,82,751

The weight of cargo in tons handled in 1952 53 was 9 073 076 The number of passengers embarked and disembarked during the period is 22,027

The receipts and expenditure for the period 1952 53 are Rs 8 68 29,843 and Rs 8 31,40 064 respectively

The largest vessel to enter the Port was 16,736 tons gross tonnage but speaking generally the ideal ship for the Port is a ship of under 550 feet in length broad in beam and loading to a maximum of about 26 feet

Berths and Anchorages —Anchorages are available at Saugor Roads, Haldia, Kalpi, Diamond Harbour Ulubaria and Garden Reach of which Haldia, Ulubaria and Garden Reach are available only for ships on passage to and from the Port or in emergency

In the port ships lie to moorings when in the stream or alongside jetties with cables forward and aft The largest man of war so far accepted in the Port has been 10,000 tons cruiser class and one berth is available for this class of ship

Accommodation (Kidderpore Docks) —These consist of Nos 1 and 2 Docks and Turning Basin Dock No 1 is 2 700 feet in length by 600 feet wide, with a depth of 30 feet of water and has twelve berths serving single-storey cargo sheds Dock No 2 has a length of 4,500 feet by 400 feet and also provides a depth of 30 feet of water It has eight general berths serving single and double storeyed sheds and six coal berths including two mechanical loading berths

King George's Dock.—This Dock comprises a lock entrance 700 feet long by 90 feet wide, five import berths, one export berth and a berth for the discharge of non dangerous petroleum in bulk which can also be used as a laying up berth

Dry Docks —Five dry docks, owned by the Port Commissioners, are available for the use of shipping, three in Kidderpore Docks and two in King George s Dock

Jetties —The Garden Reach Jetties consist of a coaling jetty for ships up to 460 feet in length and three jetties for ships up to 600 feet, the transit sheds are double storeyed Calcutta jetties are situated on the riverside below Howrah Bridge There are nine jetties with a total length of 4,735 feet, but only five of them are available for ocean going steamers

Wharves —Petroleum Wharves at Budge are situated some 14 miles below the entrances to the docks

Warehouses —The Commissioners provide extensive warehouse accommodation consisting of two Tea Warehouses having a storage area of 304,000 sq ft , a grain and seeds depot at Kantapukar comprising 37 sheds with a storage area of about 1,053,168 sq ft , two sheds at Jhinjerapul with a storage area of 70,200 sq ft , A and B Sheds at Kidderpore, and the Fairlie, Clive, Canning and Strand Warehouses situated close to the Calcutta Jetties with a total floor area of about 292 200 sq ft New extension to salt tea warehouse to provide additional space of 1 12 000 sq ft is under construction

Coal —There are at present six coaling berths at Kidderpore Dock No 2 and one at Garden Reach Jetty

Overall Capacity of Port —Calcutta with the existing facilities has handled a sea borne traffic of nearly 11 million tons a year without congestion or delay

The total number of cargo boats licensed in the Port is 6 968, of which about 2,106 are steel lighters with a carrying capacity of about 130,825 tons

The Port Trust Railway —Communication between the various points in the Docks and Jetties including all the Commissioners warehouses is maintained by the Commissioners Railway which has 198 0·1 miles of permanent way and connects with the two main railway systems serving Calcutta Goods can therefore be railed from any point on the Commissioners premises to any part of India

COCHIN

The Port of Cochin, one of the five major ports in India is a natural harbour lying on the direct route to Australia and the Far East from Europe It is open for deep water traffic in the worst monsoons and provides a splendid anchorage at all times of the year Any ship passing through the Suez Canal can enter the port even in the roughest weather

The Port consists of an extensive area of sheltered backwaters behind an opening, 440 yards wide

The Cochin Harbour Railway is connected with the Broad Gauge system of the Southern Railway

The entrance channel of the harbour is 450 ft wide and about 4 miles long, buoyed on both sides according to regulations The activities of the port are mainly centred in Willingdon Island which has been reclaimed from the backwaters by dredged soil from the inner channels

Inside the harbour there are sixteen stream berths, one passenger berth, one coal berth and four wharf berths Of the sixteen stream berths, one is a swinging berth capable of accommodating vessels upto 650 ft overall in length and 28 ft draft There are three tanker berths in the Ernakulam channel, two of which can accommodate tankers of 575 ft over all in length while the third one can take tankers of 610 ft overall with a draft of 30 ft

The deep water wharf which is 2,200 ft long can accommodate at a time 4 vessels of 450 ft in length

The principal imports are foodgrains, mineral oils coal, cashewnuts hardware, metals chemicals and provisions

The principal exports are coir and coir products, tea, rubber cashew kernels, ginger, pepper and spices

Statistics showing the growth of the Port from 1948-49 to 1952-53

Years	Imports	Exports	Total
	Tons	Tons	Tons
1948-49	991,353	250,932	1 242 285
1949-50	1,008,338	226,732	1 230,070

1951-52	1 262 638	318 209	1 580 847
1952-53	1 224 851	326 443	1 551,294

The total number of passengers embarked and disembarked in 1952-53 was 1 689 Receipts and Expenditure in the same period were Rs 69 41 lakhs and 64 74 lakhs

The administration of the Port is in the hands of an Administrative officer working directly under the Ministry of Transport of the Government of India He is assisted by an Advisory Committee consisting of the representatives of the Government of India, the Government of the State of Travancore Cochin, and the local Chambers of Commerce and Municipalities

Administrative Officer —M S Venkataraman, B A , *Chief Engineer* —C V Venkateswaran B E , *Executive Engineer* —S Subba Rao B E *Mechanical Superintendent* —B D Erani *Deputy Conservator* —H G Fletcher *Harbour Master* —S C I Smith *Traffic Manager* Topen Bhose, B A *Chief Accountant* —A N Alyaswami, M A , *Secretary & Statistical Officer* — J Cyril Raj, M A *Port Health Officer* Dr N S Sankaranarayanan M B B S , D P H

MADRAS

The Madras Harbour is an artificial one formed by two arms projecting from a low, sandy coast

The affairs of the Port are administered by a Board of Trustees which function under the Madras Port Trust Act The Chairman is the Chief Executive Officer of the Board

The Port is about 3/5 mile square (excluding boat basin, etc) with an area of approximately 200 acres

There is accommodation for 18 vessels inside the harbour, 9 at Moorings and 9 at Quays The depth at moorings ranges from 28 ft to 31 ft 6" and at quays from 26 ft to 30 ft Pilotage is compulsory There are no navigational difficulties and the Port is approached direct from the open sea

The Income and Expenditure for the year 1951-52 were Rs 1 36,02 760 and Rs 87,13,829 respectively

The chief imports are coal and coke foodgrains, mineral oils metals timber textiles building materials cement etc Government stores machinery, hardware hides and skins paper and stationery, tanning substances including wattle bark and chemical manures Seeds and nuts hides and skins vegetables and provisions textiles turmeric, ores and tobacco are the principal exports

The export of groundnut oil is also an important item and three oil tanks have been erected

Statistics showing the growth of the Port from 1948-49 to 1951-52

Years	Imports	Exports	Total
	Tons	Tons	Tons

VISHAKAPATNAM

Vishakapatnam Harbour was created in order to supply an outlet for a large area of fertile country adjacent to the east coast of India, with considerable mineral resources and no alternative access to the outside world In 1933, the harbour was first opened for sea going vessels and it now provides the following facilities —

The harbour is provided with three quay berths, each 500 feet long, and equipped with portal electric cranes, transit sheds and railway lines, both behind and on the quay side of the transit sheds In addition, two special coal bunkering berths, one R C C jetty berth and one R C C wharf, are provided Four mooring berths are also provided, at which vessels are served by a fleet of lighters operated by the port A timber jetty berth for bunkering fuel oil has been provided

A graving dock with an entrance 60 feet 6 inches wide is provided The port has a floating crane and can deal with lifts upto 50 ton capacity

Income and Expenditure of the Port for the year 1951-52

	Receipts Rs	Expenditure Rs
Port Fund	70 67 315-12-4	59 20 807-10-7

POSTS AND TELEGRAPHS

THE Indian Telegraph Department is the oldest Government owned public utility in the world

It is the second largest nationalized public utility in India, employing around 220 700 men and gazetted officers

At the close of the year 1951 52 * there were 170,184 permanent and 49,526 temporary officials in the Department 42 084 post offices and 180,731 miles of mail lines

During the year 2 366 million articles including 8 6 million registered articles were posted stamps worth Rs 21 7 crores (including service postage stamps worth Rs 3 8 crores) were sold about 56 million of money orders of the total value of Rs 21 crores were issued and about 2 9 million Indian Postal Orders to the value of Rs 103 lakhs were sold a sum of Rs 37 8 crores was collected for tradesmen on V P articles about 9 4 million insured articles valued at Rs 186 crores were handled

Customs duty aggregating to about Rs 110 lakhs was realised on parcels and letters from abroad pensions amounting to about Rs 2 5 crores was paid to Indian Military pensioners and about 2 100 pounds of quinine and substitutes of the total value of Rs 14 lakhs were sold to the public

On 31st March 1952 there were 144 926 Savings Bank accounts with a total balance of Rs 200 crores and 102 944 postal life insurance policies with an aggregate sum assured of Rs 23 2 crores

There were about 113 949 miles of line including cable and 1 505 923 miles of wire including conductors on the 31st March 1952 The number of departmental telegraph offices were 78 while the number of combined Post and Telegraph offices rose from 1 634 to 3,653 in 1952

The number of paid telegrams dealt with is shown by the following figures —

		1951 52
Inland	Private	21,578,264
	State	2,650,701
	Press	186 929
		1951-52
Foreign	Private	4,616,918
	State	64,725
	Press	64 885
		29,162,422

The outturn of the workshops during 1951 52 represented a total value of Rs 2 05 83 000

The number of messages handled during the year 1951 52 by departmental wireless stations in India was nearly 57 ,000

On 31st March 1952 there were 4 217 exchanges and 184 000 telephones operated by the department and licensed systems About 8 9 million trunk telephone calls were handled during the year 1951 52

The total interest bearing capital outlay of the Indian Posts and Telegraphs Department upto the end of the year 1951 52 was over Rs 36 crores The receipts for the year ended 31st March 1952 amounted to Rs 38 80,76,566 and charge (including interest on capital outlay) to Rs 35 54 21 886 the result being a net gain of Rs 3 26 54 680

For postal purposes India is divided into ten circles namely, West Bengal, Bihar Bombay Central Madras Punjab Uttar Pradesh, Assam Orissa and Delhi Each of the first seven is in charge of a Postmaster General and the Assam and Orissa Circles are controlled by a Director Posts and Telegraphs The Delhi circle is controlled by a Director of Postal Services The Central Circle comprises roughly the Madhya Pradesh the Rajasthan Madhya Bharat and Vindhya Pradesh Unions

AIR MAIL (INDIAN, FOREIGN)

Letters, Letter cards, Post cards and Money Orders are, as a general rule, sent by air wherever air transmission is available and is advantageous without payment of any special air surcharge Packets and Parcels can be sent by air in the inland post and letters, post cards and packets can be sent by air to all foreign countries for which an air mail service is available on payment of special air mail fee Such articles can be registered Insured letters are carried at present by air mail in the inland post only

The inland air fee for packets is half anna for each tola or part thereof in addition to ordinary postage

Registered and unregistered parcels can also be sent by air mail in the inland service

The charges are 10 annas for every 20 tolas or fraction thereof inclusive of ordinary postage A registration fee of 6 annas has to be paid in addition in the case of registered parcels

Air Parcels may be sent to the following countries

Name of the country	Postage, inclusive of air fee for the first pound			Postage inclusive of air fee for each subsequent 4 oz or part thereof		
	Rs	a	p	Rs	a	p
Afghanistan	5	8	0	0	11	0
Australia	10	8	0	2	5	0
Ceylon	2	0	0 (For every pound or part thereof)			
Egypt	7	12	0	1	2	0
France	11	0	0	1	14	0
Great Britain and Northern Ireland	9	12	0	1	14	0
Indonesia	7	0	0	1	0	0
Switzerland	9	8	0	1	12	0
U S A	15	8	0	3	8	0

The general regulations applicable to ordinary surface parcels as regards dimensions, customs declarations, despatch notes compensation and so on, apply to air parcels except that air parcels cannot be accepted for insurance, the same supplemental services as for surface parcels are available

For Air Fees to Foreign Countries see the Post and Telegraph Guide

A direct air parcel service was introduced from December 15, 1953 to Italy, British East Africa and Malaya on the same terms and conditions as are applicable to parcels sent to these countries by the surface route

These terms and conditions regarding size and packing and other restrictions are shown in the Foreign Directory of the P & T Guide, 1952, edition

The following are the rates of postage cum air fee for these countries

Country	Postage cum air fee for the first pound	Postage cum air fee for the subsequent 4 oz or part thereof
	Rs a p	Rs a p
Italy	9 0 0	1 10 0
East Africa	7 4 0	1 6 0
Malaya	5 12 0	1 0 0

Air parcels will be accepted up to a maximum weight of 11 lb

Insured air parcels, however are not for the present accepted (1953, December) Within this country, these parcels will be sent by the surface route only

Air parcels for Italy and East Africa will be concentrated at Bombay and those for Malaya at Calcutta

Air parcels for East Africa namely, the provinces of Kenya Uganda and Tanganyika will be carried exclusively by Air India International Air Service operating from Bombay to Nairobi

Assam and Kashmir

A cheap air mail service for parcels and registered newspapers providing for a limited air transmission between Calcutta and Gauhati or Silchar and *vice versa*, and surface transmission for the rest of the route is available Such articles in addition to the blue air mail label should bear a superscription in bold letters just below the air mail label

"By air between—— ——and————only "

The air fees which are payable in addition to ordinary postage are as follows —

Registered Newspapers	3 pies for every 2½ tolas or fraction thereof in addition to ordinary postage
Parcels	4½ annas for every 40 tolas or part thereof in addition to ordinary postage

A similar service is available between Amritsar on the one hand and Srinagar or Jammu Tawi on the other the air surcharge being as follows —

Registered Newspapers and Packets	3 pies for every 2½ tolas or fraction thereof in addition to ordinary postage
Parcels	3 annas for every 40 tolas or fraction thereof in addition to ordinary postage

Air Letter Service

A light weight "Air Letter' service is available for writing to all countries served by the air mail The postage rates are 3 annas to Ceylon, Pakistan and Portuguese India, 5 annas to Burma and to Afghanistan, 8 annas to the rest of Asia, to Europe, to Egypt and to East Africa, 10 annas to the rest of Africa and to Oceania (Australia, New Zealand, etc) and 12 annas to North and South America Special Air Letter forms in several denominations are available from Post Offices Similar forms of private manufacture, bearing an indication that they have been approved by the Head of a Circle, can also be used, but they should be prepaid with the prescribed charge

Air letters for Ceylon can be registered but cannot be insured, nor is any other facility such as express delivery available Air letters for other countries cannot be registered or insured, nor is any other facility such as express delivery available

Second-Class Mail

Printed papers, newspapers, business papers, sample packets, mixed packets and blind literature packets sent by air as second class mail must conform to the general regulations for such packets set out in the Post & Telegraph Guide and should be clearly superscribed at the upper left hand corner of the cover or wrapper with the *nature of the contents, e g , Printed Papers, Business Papers, Sample Packets*, etc as the case may be They must not contain anything in the nature of a current letter *nor be sealed against inspection* The minimum charges of 4 annas applicable to Business Papers and to Mixed Packets containing Business Papers sent by surface route apply also to Business Papers, and Mixed Packets containing Business Papers sent by air mail For second class air mail to Ceylon, Pakistan and Portuguese India an air surcharge of 1½ annas per tola is chargeable in addition to the ordinary inland postage for Book, Pattern and Sample Packets

The rate of postage including air fee per ½ oz for second-class mail to the various destinations is 2½ annas (subject to a minimum charge of 4 annas for packets containing Business Papers) for Afghanistan and Burma 4 annas for the rest of Asia and for Egypt 5 annas for Europe and East Africa, 6 annas for the rest of Africa and for Oceania (Australia, New Zealand etc) and 8 annas for North and South America

Twenty two	Many thanks for your kind message

Greetings De Luxe Telegrams

Senders of Greetings telegrams to or from offices in India may use their own phraseology in such telegrams on payment of 2 annas in addition to the charge appropriate to the class of message (Express or Ordinary)

These telegrams will be delivered in specially printed artistic forms and envelopes

This DE LUXE service is not applicable to telegrams for Burma

The sender of a DE LUXE telegram should write before the address the special instruction —DLX— which will not be charged for

Hindi and Indian Languages Telegrams

With the declaration of Hindi as the State language of India transmission of telegrams in Hindi and other Indian languages in the Devnagri script (Press and Private) was introduced with effect from 1st June 1949

In this service telegrams in Hindi and other Indian languages written in the Devnagri script are transmitted by means of a special Hindi Morse Code devised by the Indian P & T Department Greetings telegrams in standard texts in Hindi are also admitted

It was made available at first in 1949 between Agra Allahabad Banaras Gaya Jabalpore Kanpur Lucknow Nagpur and Patna In 1950 it was extended to Ajmer Bareilly Indore Jaipur Muzaffarpur New Delhi and Ranchi and in 1951 it was further extended to Belgaum Bhusawal Bombay Calcutta Poona and Sholapur

The service is now available between the following 100 stations, *viz* —

Ahmadnagar Akola Aligarh Alwar Ambala Amraoti, Arrah Asansol Ayodhya Baheri Bakhtiyarpur Ballia Barabanki Baroda Beawar Berhampore (Bengal) Bhagalpur Bharatpur Bhavnagar Bhopal Bijapur, Bijnor Bikaner Broach Burhanpur Chandausi Chapra Dalmianagar Darbhanga Dehra Dun Delhi (M) Dhanbad Dholpur Dhond Dhulia Etawah Faizabad Faridpur Fatehpur Firozabad Gadag Ghaziabad Ghazipur Gondia Gorakhpur Gwalior Hapur Hardwar Hathras Hazaribagh Hubli Jalgaon Jamnagar Jamshedpur Jaunpur Jhansi Jodhpur Karad Katni Khurja Kolhapur Manmad Mathura Meerut Midnapore Mirzapur Moghal Sarai Moradabad Motihari Nanded Nasik Orai, Pachmarhi Pauri (Garhwal) Pilani Pilibhit Pratapgarh Puri Rae Raipur Rajkot Ramgarh (Bihar) Ratlam Rewa Roorkee (M) Sambhar Lake Sandila Sangli Satara Secunderabad Seoni Shahjahanpur Simla Sonepur Sultanpur Surat Surendranagar, Tundla Ujjain, Unao, Wardha

With effect from the 1st July 1950, Greetings telegrams were admitted in Hindi telegraph service For this purpose a selection is to be made from a list of 21 stock phrases From the same date telegrams in any Indian language (for instance Gujarati, Bengali etc) provided they are written in the Devanagari script, are accepted at all stations where the Hindi telegraph service exists Telegraphic Money Orders in Hindi are also admitted from and to a number of those places in Uttar Pradesh and Bihar where the Hindi telegraph service is available

With effect from the 1st January, 1953, abbreviated telegraphic addresses have been allowed to be registered in the Devnagri script at stations where Hindi Telegraph Service is available

Phonocom Service

'Phonocom Service' means an inland telegram written in certain Indian language and accepted at certain specified telegraph offices for transmission to destination over new telephone system These telegrams are charged at inland express rates 'Phonocom Service' is at present available in the following Indian language and between the telegraph offices specified against them —

Language	*Between Telegraph Offices*
Gujarati	Bombay and Ahmedabad

Such telegrams are accepted at inland express rates

TELEGRAMS (FOREIGN)

The charges for foreign telegrams vary with the countries to which they are addressed The rates per word for telegrams to countries in Europe America, etc, are as follows —

	Ordy Rs a	LT Rs a
Europe *via* I R C —		
Great Britain and Northern Ireland	0 12	0 6
Ireland	0 12	0 6
Belgium	0 15	0 7½
Holland	0 15	0 7½
Germany	1 0	0 8
Switzerland	1 0	0 8
Spain	1 2	0 9
France	0 15	0 7½
Italy City of the Vatican	1 1	0 8½
Norway	1 0	0 8
Bulgaria	1 2	0 9
Russia	1 1	0 8½
Turkey	1 1	
Czechoslovakia	1 1	0 8½
Union of South Africa and S W Africa	0 12	0 6
Canada (all zones)	0 12	0 6
United States of America	1 3	0 9½
South America		
Argentina	2 8	1 4
Brazil	2 4	1 2
Chile	2 8	1 4
West Indies		
Jamaica	0 12	0 6
Havana	1 13	0 14½

Ordinary telegrams may be expressed in plain or secret language or any combination of them There will be a minimum charge as for five words to any destination beyond India, Burma Pakistan and Ceylon

Urgent telegrams are accepted on similar conditions as above but are charged for at double the rate for ordinary telegrams

Letter telegrams are accepted in plain language only and charged for at half the rate for ordinary telegram subject to the minimum charge as for 22 words Both private individuals and Government Officials can send such telegrams They are delivered on the morning of the day following the day of booking

Commonwealth Social Telegrams

Commonwealth Social Telegrams (GLL) conveying solely greetings family news or non commercial personal affairs can be availed of throughout the year at special reduced rates, for all Commonwealth countries except Sudan

Minimum charge for a Commonwealth Social Telegram is Rs 3 12 for the first 10 words (excluding the Special Instruction (GLL) which will not be charged) and 6 annas for every additional word

The only Special Services admitted in Commonwealth Social Telegrams are Reply Paid and De Luxe

De luxe Telegrams

Telegrams relating to happy events or greetings may be sent to certain foreign countries for delivery on an artistic form in an envelope of the same character A supplementary charge of four annas per telegram in addition to the charge at the appropriate rate according to the class (i e, Urgent Ordinary, LT, etc), is charged for such telegrams

Press Telegrams

Are accepted at reduced rates to registered newspaper, news agencies and so on The minimum charge is made as for 10 words

Urgent Press Telegrams

Are charged at same rates as for ordinary full rate telegrams except for Commonwealth countries for which the charges are equal to half the charges for ordinary telegrams The minimum charge is made as for 10 words

Radio Telegrams

For radio telegrams addressed to ships at sea from offices in India and transmitted *via* the coast stations at Bombay Calcutta or Madras the charge is thirteen annas per word (ordinary) in nearly all cases

The following are the charges (excluding supplementary charges) for radio-telegrams from offices in India transmitted to ships at sea through the coast stations mentioned in the preceding paragraph —

	Total charge per word Ordinary Rs a
(1) All Government or Private Radio telegrams, excepting those mentioned in (2) and (3) below	0 13
(2) Radio telegrams to British Ships of War or Ships of the Indian Navy	0 8
(3) Radio telegrams to Spanish or Swedish ships	0 12

All radio telegrams in secret language (code or cypher) are chargeable at the same rates as those in plain language

The sender of a radio telegram may prepay a reply He must insert before the address the instruction R P followed by mention in Rupees and annas of the amount prepaid, *e g* R P 7 8 This expression counts as one word

Phototelegrams

Phototelegrams are accepted at all large telegraph offices in India for Great Britain, U S A (New York) San Francisco Australia Egypt Montreal (Canada) and Union of South Africa in rectangular shape bearing an address written on ordinary foreign telegram form or on the photo telegram forming part of the phototelegram to be transmitted Phototelegrams are charged according to chargeable number of square centimetres shown below —

Area in sq centimetre	From India to Great Britain				From India to U S A
	Press		Private		Government		All classes	
	Rs	a	Rs	a	Rs	a	Rs	a
0—150	40	8	67	8	33	12	95	4

Mileage of telephone wire—1 50 377

Mileage of cable conductors —769,377

Mileage of channels -171 119

Total no of telephones—201 000

Total no of trunk calls—10 8 millions

Total no of wireless messages—>74 000

The number of telephones in some of the larger cities is given below (March 31, 1952)

Bombay —46 181 Calcutta 35 794 Delhi —14 582 Madras—11 102 Ahmedabad—3 782 Hyderabad—2 376

Besides the Indian Telephone Industries Factory in Bangalore and the Hindustan Cables Ltd at Rupnarainpur in West Bengal there are factories in Alipur Bombay and Jabalpur

The training centre is at Jabalpur

FIVE YEAR PLAN

Total allotment for posts and telegraphs Rs 50 crores

The main object is to provide a post office for every village with a population of 2,000 or over and increased telephone facilities in cities

Thus there will be automatization of the manual exchanges at Lucknow Patna Jaipur Ajmer, Gwalior Coimbatore and Calcutta

The services in Bombay Delhi Madras Kanpur, Ahmedabad Poona etc will be expanded

Delhi Calcutta and intermediate stations will be linked by underground cable

The expansion of the wireless network will cost Rs 57 lakhs

New power wireless transmitters will be installed at Calcutta Bombay Madras and New Delhi to strengthen coastal wireless stations and re open the Rangoon Telephone Circuit

The factories will be reorganized at a cost of Rs 83 lakhs when the output is expected to increase by about 30 per cent

A telecommunications research centre will be set up at the National Physical Laboratory at Delhi for the present and smaller units at Posts and Telegraphs factories

The building projects such as expansion of Bombay General Post Office will cost Rs 204 lakhs

The Jabalpur Training Centre will be expanded and four large new training centres will be opened at Hazaribagh Baroda, Hyderabad Bangalore

The plan provides for staff colonies at the following places The number in brackets gives the number of quarters

Ahmedabad (120) Bhubaneshwar (140), Bombay (300) Chandigarh (100) Delhi (700), Gauhati (40) Kanpur (100) Nagpur (40) Patna (100), Siliguri (96)

Some of the projects under the Five Year Plan and the total cost are given below The figures are in rupees lakhs

Calcutta automatization (9 73) Bombay auto expansion and replacement (3 71) Lis Hazari (Delhi) exchange (97) Ahmedabad exchange (40) Nagpur 1 500 lines expansion (5) Bangalore exchange expansion (26) Travancore exchange (2) Simla exchange (1) Hyderabad exchange (70) Delhi secretariat exchange (32) Kanpur exchange (44) Lucknow exchange (49), Expansion of other auto exchanges (1 81) Manual exchanges (5 00) Trunk exchanges (41) Carrier equipment (1 10) Bombay Thana cable (32) Telecom circuits for Railways Canals and Civil Aviation Department (1 09) Trunk lines (1 60) Telegraph development (1 34) Long distance trunk cable (4 40) Wireless network (57) Mechanization of post offices (30) Special requirements (1 68) Jabalpur Training Centre and Development Circle (18) Minor works (6 13) Workshops (83) Madras Circle office building (13) Quarters for P and T staff (1 34) Bombay C T O building (35) Bombay G P O building (25), Post office buildings (2 04)

Total Rs 48,96 lakhs

OVERSEAS COMMUNICATIONS SERVICE

Allotment under Five Year Plan Rs one crore

OVERSEAS Communications Service is a State activity working directly under the Ministry of Communications on commercial lines with the Head Office at Bombay Its functions are provision, operation and development of all facilities for communication between India and the outside world

The chief administrative head of the Service is the Director General Overseas Communications Service

The Service has two main branches, viz Traffic and Engineering The Traffic branch is under the control of the Dy Director General (Traffic) who has his headquarters at Bombay while the engineering branch is under the control of the Chief Engineer with his headquarters at Kirkee near Poona

The Overseas Communications Service has stations at Kirkee Dhond Bombay, Madras and Delhi Kirkee is the principal transmitting station and Dhond the principal receiving station while Bombay is the principal operating station of the Service Kirkee and Dhond are connected to Bombay by way of wired wireless circuits

Madras is a cable station while the Delhi station works the direct radio telegraph services —New Delhi London and New Delhi Moscow It also handles the Multi address Press Service for the External Affairs Ministry

The following radio services are now operated by India —

		Date of Inauguration
1	India United Kingdom Wireless Telegraph Service	23 7 27
2	India United Kingdom Radio-Telephone Service	1 5 38
3	India Australia Wireless Telegraph Service	14 1 42
4	India China Wireless Telegraph Service	25 2 42
5	India United States of America Wireless Telegraph Service (*via* Mackay)	15 8 44
6	India United Kingdom and United States Radio photo Service	29 4 48
7	India Afghanistan Wireless Telegraph Service	12 1 50
8	India Japan Wireless Telegraph Service	17 8 50
9	India Indonesia Radio-Telephone Service	2 10 50
10	India Indonesia Wireless Telegraph Service	1 2 51
11	India Thailand Wireless Telegraph Service	15 3 51
12	India Russia Wireless Telegraph Service	18 6 51
13	India Egypt Radio-Telephone Service	2 7 51
14	India United States of America Wireless Telegraph Service (*via* RCA)	2 7 51
15	India Iran Radio Telephone Service	1 3 52
16	India Japan Radio-Telephone Service	14-8-52

RADIO-TELEGRAPH SERVICE

The following lines are in operation

(*a*) Bombay London, (*b*) Delhi-London, (*c*) Bombay Shanghai, (*d*) Bombay New York (*e*) Bombay Melbourne, (*f*) Bombay-Tokyo (*g*) Delhi Moscow, (*h*) Bombay Kabul, (*i*) Bombay Bandoeng, (*j*) Bombay Bangkok, (*k*) Calcutta London

OVERSEAS RADIO-TELEPHONE SERVICE

India today operates five direct services

(*a*) Bombay London, through London calls are extended to the following countries Australia, Barbados, Bahrain Belgium Bermuda Canada, Cuba, Czechoslovakia, Denmark Finland, France Gibraltar Hungary Iceland Israel, Italy Kenya, Luxemburg Mexico Netherlands Northern Rhodesia Norway, Saar Spain, South Africa, South Ireland South Rhodesia South West Africa Sweden Switzerland, Tanganyika, Uganda, U S A, Vatican City, West Germany

This service is also available to the following British registered ships at sea *via* London Queen Elizabeth Queen Mary, Caronia, Queen of Bermuda, Mauretania The following American registered ships America, Constitution, United States, Independence and the following Dutch registered ships Nieuw Amsterdam Rijndam

(*b*) Bombay Djakarta, (*c*) Bombay Cairo, (*d*) Bombay Teheran, (*e*) Bombay Tokyo

These Radiophone facilities are also used for inter-continental interviews, discussions and programme material for purposes of re broadcast both in India and abroad

OVERSEAS RADIO-PHOTO SERVICE

This service enables signalling by radio a manuscript, photograph, drawing—in fact any thing that is in black and white on paper and reproduction as a photo replica of the original

(*a*) Bombay London is also extended to Australia South Africa, Canada Egypt Finland, Norway Sweden, Belgium Switzerland, Portugal, Greece, Denmark, Germany, Italy

(*b*) Bombay New York, and *via* New York to San Francisco The service is regularly used by the business interests for the exchange of balance sheets specification and drawings of machinery etc

OVERSEAS SUBMARINE CABLE SERVICE

The cable chains are —

(*a*) Bombay—Aden — Alexandria—Malta—Gibraltar—London

(*b*) Bombay—Aden—Mombassa—Zanzibar—Sychelles

(*c*) Madras—Penang—Singapore—The Far East

MULTI-ADDRESS BROADCASTS

Overseas Communications Service handles news transmissions on behalf of the Government of India to consular posts abroad The transmissions from New Delhi are picked up by the following Consular posts in Asia, Europe Australia and America Khatmandu, Rangoon Singapore Djakarta Kabul, Bagdad, Teheran Ankara, Paris Cairo London Brussels Rome, Berne, Prague, Moscow the Hague, Bonn Tokyo, Canberra, Peking, and Nairobi

The transmissions from Bombay are picked up by Buenos Aires and Rio De Janeiro

BUDGET

The Five Year Plan has allocated one crore of rupees for development

The plan covers modernising and expanding its existing Bombay and Delhi radio centres and opening similar centres at Calcutta and Madras

At the end of the Plan there will be four independent foreign radio centres for India namely Bombay, Delhi, Calcutta and Madras, which will normally work as complementary to one another

A beginning has already been made by the establishment of a radio centre at Calcutta when a service was opened to London on March 12, 1953

The revenue for the years 1952-53 and 1953 54 was estimated at 121 lakhs and 113 lakhs respectively

The profit of the O C S for the year 1952 53 was estimated at about 36 lakhs i e 36 per cent on the total Capital Outlay of Rs one crore

The table below shows the revised estimates for 1952 53 and the budget estimates for 1953-54 on the expense side

	Revised Estimate 1952-53	Budget Estimate 1953 54
	Rs	Rs
Pay of officers	4,37,000	5,20,000
Pay of establishments	14,69,500	17,41,000
Allowances honoraria, etc	15,88,000	14 98,000
Other charges	9 81,000	11,00,000
Interests and depreciation		
Interest on capital outlay (Charged)	3,00,000	4,08,000
Depreciation (Voted)	6,00 000	7,50,000
Payments to other Government Departments, etc	29,89,500	33,94,000
Charges in England	89,000	86,000
Loss or gain by exchange	—	—
Total	84,54,000	95,06,000
Capital Budget	20,00,000	33,50,000

BROADCASTING

FOR several years limited broadcasting services were maintained by radio clubs in Calcutta, Bombay and Madras

Although the transmitting sets employed by them were of very low power, the broadcasts were popular

The clubs were assisted financially by a government contribution based upon the revenue from licence fees, but this did not suffice to cover the cost of the transmissions and great credit is due to the members of those clubs for the sporting manner in which they provided additional funds and undertook the entire responsibility for the programmes

After negotiations extending over several years, an Indian Broadcasting Company was granted a licence to establish broadcasting services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected at Bombay and Calcutta, the service from the former being inaugurated by the Viceroy in July 1927 and the latter by the then Governor of Bengal a month later

These stations had each an aerial input of one and a half kilowatts, the same as that of the 2LO station in London, of which they were practically duplicates

The programmes were so arranged that both Indian and European music were broadcast daily and the news bulletins and market and weather reports were read in two languages

Owing to financial difficulties the Indian Broadcasting Company went into liquidation with effect from March 1, 1930

Since then the Government of India have been controlling broadcasting in this country

Government for this purpose formed an Indian State Broadcasting Service now called *All India Radio*, and instituted a Central Broadcasting Advisory Committee

In 1934, Government felt justified in embarking on a policy of development and, as a first step, a sum of Rs 2,50,000 was granted for a 20-kW mediumwave station to be established at Delhi

This station was actually opened on January 1, 1936

In the year 1936 a special fund of Rs 40,00,000 was created for the development of broadcasting in India

Orders for extensive new equipment for implementing the scheme of expansion were placed in January 1937

It included 8 transmitters which were put into operation as follows —

Delhi 10-kW shortwave December 16, 1937, Bombay 10 kW shortwave February 4, 1938, Lucknow 5 kW mediumwave April 2, 1938, Delhi 5 kW shortwave June 1, 1938, Madras 10-kW shortwave June 16, 1938, Madras 0 2 kW mediumwave June 16, 1938, Calcutta 10-kW shortwave August 16, 1938, Tiruchirapalli 5 kW mediumwave May 16, 1939

In the year 1942, the Government of India decided to install a high power shortwave transmitter which would be capable of providing broadcasting service to foreign countries

A 100 kW transmitter was opened on May 1, 1944 forming an important landmark in A I R's development programme

Later at the request of the Government of the U K five shortwave transmitters including one 100 kW shortwave transmitter were installed as an urgent war measure These were subsequently taken over by A I R

ALL-INDIA RADIO

All India Radio is a department of the Ministry of Information and Broadcasting, of the Government of India

Its head is the Director General, All India Radio, whose office is located in Broadcasting House, Parliament Street, New Delhi

Other officers at headquarters are Chief Engineer, Deputy Directors General, Deputy Chief Engineer, Director of Programmes Director of Programme Planning, Director of Public Relations, Assistant Director of Listener Research, Deputy Director of Administration and Assistant Directors of Administration

The stations transmit for about five to ten hours a day

This is generally split up into three transmissions, morning, afternoon and evening

Programmes are planned by Station Directors with the assistance of the Programme Executives and Programme Assistants Details are worked out well in advance of their schedule dates and are published in the journals of All India Radio

Programmes are broadcast in 15 major Indian languages and in English

Broadcasting House — Probably the largest centre of broadcasting activity in the East, Broadcasting House was completed in 1948 Architecturally, it is one of Delhi's newest and most striking sights It represents from the point of view of equipment, the latest practice in radio engineering

With its air conditioned studios each with an individual acoustic pattern to suit every variety of sound reproduction its control room —a model of scientific efficiency —its dramatic control panels and effects and echo rooms it constitutes a landmark in every sense of the word in the history of Indian broadcasting

Research and Maintenance Departments —These two departments are located in New Delhi

The Research Department deals with all technical problems concerning reception and transmission Special studies are undertaken on ionospheric data and forecasting transmission conditions, field strengths of short and medium wave stations atmospheric noise levels prevalent in various parts of India, studio and record ng characteristics and development of cheap receivers

The Department also maintains a field station at Lodapur near Delhi where the frequencies of All India Radio Stations are constantly checked

The Maintenance Department handles problems which arise in the upkeep and day to day operation of the engineering equipment used by All India Radio in addition to maintaining Central Stores Depot

Radio Journals —A I R publishes programme journals in English (Indian Listener), Urdu (Awaz) Hindi (Sarang) Bengali (Betar Jagat), Tamil (Vanoli), Gujarati (Nabhovani) and Telugu (Vani)

The Indian Listener' is a weekly, and the rest are fortnightlies

Monitoring Office.—The Monitoring Service (Simla) keeps a round-the clock watch on transmissions from all the main broadcasting systems of the world, monitors news commentaries and selected talks transmitted from those stations in English, in Indian languages and in some foreign languages, from as many as 30 different countries

Public Relations.—For establishing and maintaining contact between All-India Radio and its listeners there is a Director of Public Relations at Headquarters and a Public Relations Officer attached to some stations

Listener Research.—The primary purpose of Listener Research is to determine the listening habits and programme preferences of radio listeners by ascertaining from time to time their reactions to programmes broadcast

This information is necessary for planning programmes calculated to have the maximum listening appeal

Collection of authentic information on this subject is the task which the Listener Research Department of AIR has to fulfil

Although Listener Research in this country is still in its infancy, a good deal of information on the listening audience and on trends of listening has already been collected and more light is constantly being shed on this absorbing subject

For this purpose contact with listeners is maintained through listeners' letters press reactions field surveys and questionnaire studies of listeners preferences and reactions to programme broadcast

By utilising all recognised methods of assessing listener reactions, AIR is trying its best to provide programmes suited to the needs of its listening audience

Advisory Committees, established at the broadcasting centres in consultation with the State Governments, keep the Director-General, All India Radio, in touch with local public opinion in the matter of programme construction and advise him on such matters

BROADCAST PROGRAMMES

The following table shows the number of hours broadcast and the fees paid to the artistes

Year	Hours	Fees
		Rs
1947	36 384	not available
1950	64 529	35 48,000
1951	73 072	38,91 000
1952	74 640	33 16 000
1953	not available	34 76 000

Women's Programmes —These are in the regional language and are broadcast from almost all the stations They consist of music, features and talks

Children's Programmes —Wherever possible the children are divided into two or three age groups The programme is conducted or compered by an elderly character known to the children Another elderly person usually a woman is used to assist the compere

Fables stories from classics and musical items, form the content of the programmes, and listeners are encouraged to participate

The programmes are conducted from all the stations the time varying from 30 minutes to an hour

In the rural broadcasts there is a children's day once a week

School Broadcasts —The school broadcasts are meant to supplement the regular curriculum of the school

The children are divided into two or three age groups, and the talks dialogues, features or musical items are in the mother tongue, English, Hindi or Sanskrit

History geography and general science are the subjects generally covered

The hours vary from station to station

There are Educational Committees to advise the Station Director in the composition of the programme for the academic term and these are announced in pamphlets for each term

Occasionally students from a particular class are taken to the radio station to give a performance

The idea is that students should listen to the broadcasts while at school in the company of their teachers

Industrial Broadcasts—Stations in such industrial towns like Bombay Calcutta Lucknow Madras, Ahmedabad put out suitable programmes in the language of the local working class

The programme contains dialogues features and news reviews all relating to workers and their organisations

For recreation devotional music and popular songs are used

Rural Broadcasts—While the provision of programmes is a Central responsibility the provision of listening sets to the rural population is the responsibility of State Governments

The composition of such programmes is arranged in consultation with the local agricultural and allied departments

Supplementary or spare time occupations are suggested and information is given on items like improved seed new implements sowing crop and cattle pests and their remedies and market rates of current agricultural produce

Weather bulletins during the monsoon are a regular feature of the composite programme

National Programmes—On Saturday nights a concert of classical music, vocal or instrumental Hindustani or Carnatic is arranged at the Delhi studios in the presence of a selected gathering, and is relayed by all stations

This is a national programme as all stations are included in the hook up It lasts about 90 minutes

The object is to make the audiences more classical music minded and to give patronage to deserving artistes

NEWS SERVICES

The following table shows the budget estimates of expenditure in Rs lakhs

	Actuals		Estimates	
	1950–51	1951–52	1952–53	1953–54
External Services	Rs 12 44	12 76	15 00	15 25
News Services	16 44	15 99	18 21	20 14

The News Services Division occupies a wing of Broadcasting House in Delhi and puts out 72 news bulletins in 28 languages (15 Indian and 13 foreign) occupying about 14 hours daily

All the news bulletins are prepared in the News Service Division and broadcast from the transmitters at Delhi set apart for news

Each regional station relays the bulletins suitable for its listening areas

A few minutes are set apart at each station for local announcements This period accommodates news of purely local interest

The Indian languages used in the Home Services are

Assamese Bengali English Gujarati, Hindi, Kanarese Kashmiri Malayalam, Marathi Oriya, Punjabi Sanskrit Tamil, Telugu, Urdu and about 20 other dialects

The broadcasts from the External Services Division consist of daily services to the Middle East East & South Africa West Indies, East Indies South East Asia and Europe

The languages used are Hindi Tamil Gujarati English Burmese Kuoyu Cantonese Indonesian Pushtu French Swahili, Persian and Arabic

All these are radiated from Delhi but they are distinct from the programmes of the Delhi (regional) station Altogether 24 news bulletins a day in twelve languages nine foreign and three Indian—are broadcast

The total output of the External Services is 16 hr and 45 mt daily

Particulars about the External Services are given below

EASTERN SERVICE

General Service (East & S E Asia)	30 mt	news

AIR STATIONS

At present there are 21 broadcasting stations The following table gives the location, says when they were opened, and gives the medium wave length which is permanent

Location	When started	Medium wave length
Ahmedabad	April 1949	312 5 m
Allahabad	February 1949	394 7 m
Amritsar	February 1948	230 8 m
Baroda*	December 1948	250 m
Bombay	February 1938	A 243 9 m (S W acc to season)
		B 353 m "
Calcutta	August 1938	A 370 m (S W acc to season)
		B 300 m
Cuttack	January 1948	222 2 m
Delhi	December 1937	A 337 1 m (S W acc to season)
		B 422 5 m
Dharwar	January 1950	405 4 m
Gauhati	July 1948	384 6 m
Hyderabad*	April 1950	411 m
Jullundur	November 1947	230 8 m
Kozhikode	April 1950	517 2 m
Madras	June 1938	A 211 3 m (S W acc to season)
		B 260 3 m
Mysore*	April 1950	309 3 m
		62 50 m
Nagpur	July 1947	508 5 m
Patna	January 1948	265 5 m
Poona	October 1953	375 m
Tiruchirapalli	May 1939	389 6 m
Trivandrum*	April 1950	454 5 m
Vijayawada	December 1948	357 1 m

* These stations were taken over

Below we give short notes on some of these stations

Ahmedabad—Baroda.—These two stations serve the Gujarati speaking area There are broadcasts for villagers and for industrial workers from Ahmedabad Occasionally items in Marathi are broadcast from Baroda

Under the expansion scheme a 50 kW medium-wave transmitter will be installed in between the two stations, and Baroda will be retained as a supplementary station

Allahabad—Lucknow —An experimental transmitter of the Allahabad University was the nucleus of the Allahabad station used as a supplementary to Lucknow

The claims of Allahabad could not be ignored, particularly in the literary field

Amritsar—Jullundur —The necessity for these two stations was felt immediately after the Partition for the Punjabi speaking population As the capital is now located at Chandigarh Amritsar may be retained as a supplementary station

A 50 kW transmitter (medium-wave) is earmarked for this area

Bombay.—One of the earliest stations to start broadcasting (1927) Bombay has the highest number of licence holders, both in the State as a whole and in the area of the metropolis

It is the most multi lingual station in the AIR list, using 8 languages for broadcasting, including Konkani, Sanskrit and Urdu

There are two sets of transmitters, A & B, with medium and short waves each

There are plans for a 50 kW medium-wave transmitter to go into operation from Bombay

Calcutta.—This is the first station to have a 50 kW medium-wave transmitter As it is not burdened with the need for broadcasting in many languages, it has achieved good progress in technique, and can also train broadcasters to perform.

Cuttack.—As it is the capital of a State Cuttack has a pilot station

The number of licence-holders in this State is the smallest in India

Delhi.—As most of the present development of All India Radio took place during World War II, Delhi received a great deal of attention

All the 100 kW and other short-wave transmitters and the centralised department of news, programme publicity, research and planning, external services, etc , came to be located in Delhi

The weekly national programmes are arranged from Delhi for an all India hook up

Talks of national importance are also broad cast from Delhi once a week (Wednesdays) for a similar nation wide relay

Dharwar —This station was put up as part of the Eight Year Plan of radio expansion It is a small pilot station with only a limited coverage , its running time also is short

Gauhati —The need to provide broadcast facilities for the N E Frontier districts was a factor in making Gauhati a station in the AIR link

In the first instance it was a double station with Shillong, but now all transmitting is done by Gauhati Its strategic position, proximity to Pakistan s Dacca station, and the necessity to provide entertainment to plantations, were the considerations that led to the early establish ment of the station

Hyderabad —The central situation of this station holds immense possibilities for its development as a supplying station for the entire sub-continent Nagpur is the only rival to Hyderabad in this respect

Next to Bombay, Hyderabad is the one which is most multi lingual in its coverage English, Hindi, Urdu, Telugu, are languages commonly used, while Marathi and Kannada are not ignored.

Kozhikode—Trivandrum —Calicut (its former name) was chosen as the site when it was decided to have a station for the Malayalee speaking areas With the taking over of the Trivandrum station where the University had a small pilot plant for broadcasting, it was found suitable to link the two stations for covering almost the same region.

Madras.—This is one of the earliest stations to have broadcasting services run by the Municipal Corporation.

It is multi lingual All the Dravidian languages, Tamil Telugu, Kannada, Malayalam, are used by Madras besides English and occasionally Hindi

Mysore —The station has one short-wave and one medium wave transmitter, and affords a good coverage

It is likely that Bangalore, the other capital of Mysore, will have a 50 kW medium-wave transmitter and a supplementary studio

The musical talent available in this region requires to be fully utilised and a powerful transmitter may be able to serve the entire peninsular audiences

Nagpur —Besides being the capital of M P , it is centrally situated for all India coverage The transmitter originally erected was therefore replaced by a stronger one

Patna —This station was opened only because it was the capital of Bihar The number of licence holders in the area is small There are not many large towns or cities in the State though the total population is large

Delhi, Lucknow and Calcutta met the requirements of the population before Patna had a station That is why Lucknow, Allahabad and Patna had for many months a common programme for the major part of their transmitting time

Poona —The claims of Poona for a station were ignored for a long time because of its proximity to Bombay

It is proposed to replace the present transmitter with a more powerful one

Tiruchirapalli —In the heart of the Tamil speaking country Tiruchirapalli had an early start over all other similar cities The quality of its musical programmes is very high, and many items are relayed by Madras and other stations in the State

Vijayawada —This station was established to meet the needs of the Telugu speaking population It has obvious handicaps

The University is at Waltair, and the capital of the Andhra State was for long a matter of speculation

LICENCES

Broadcast receiver licences are issued at all head and sub-post offices at a fee of fifteen rupees per year, and cover the use of receiving sets throughout India

Broadcast Receiver Licences are issued to Municipalities or other public bodies for the reproduction of broadcast programmes in public places by the Postmaster General of the State

A licence issued for this purpose covers the use of one wireless receiver and any number of loudspeakers at one place only but does not cover any external wiring erected outside the premises of the licensee

A separate Broadcast Receiver Licence is, however, necessary in the case of clubs, institutions, messes, etc , for reproducing broadcast programmes at subscriptions, dances, concerts, bazaars, etc , to which the public are admitted

This licence is also issued by the Postmaster-General at a fee of Rs 50 and is valid for one year

The receiver licence fees per year are as follows:

Domestic, Rs 15 , Commercial, in shops, etc , Rs 50 , Community villages, Rs 10 , Dealers and salesmen, Rs 15

The growth of broadcast receiver licences at the end of each year (in January) beginning with 1937 is given below

Year	Licences	Year	Licences	Year	Licences
1937	50,680	1943	176,061	1949	322,800
1938	64,480	1944	193,585	1950	396,400
1939	92,772	1945	202,829	1951	599,100
1940	119,417	1946	232,368	1952	473,759*
1941	147,121	1947	247,100	1953	587,169*
1942	165,675	1948	286,046		

* Figures on a new basis

It may be explained that licences expire in December and delay on the part of licence holders shows a fall in January But the figures thereafter steadily rise

The following table shows the number and the value of radio sets imported into India over a number of years —

Year	Number	Value in Rs lakhs
1939–40	43 684	61 28
1940–41	38 855	35 32
1941–42	52 416	41 73
1942–43	18 939	32 10
1943–44	5 384	6 53
1944–45	895	1 51
1945–46	5 982	7 04
1946–47	107,114	169 58
1947–48	192 172	288 40
1948 49	42,202	76 59
1949 50	43,355	71 66
1950-51	16 012	25 44
1951 52	29 121	—
1952–53	19 286	—

PRODUCTION OF SETS

The installed capacity of factories manufacturing broadcast sets in India is 200 000 sets a year

The following table shows the trend of production —

Year	Sets
1947	3 036
1948	24 096
1949	16 836
1950	44,340
1951	61 800
1952	71 496
1953	47 000†

FIVE-YEAR PLAN

Total allotment Rs 3 52 crores

Seven new broadcasting stations are to be established at Poona*, Rajkot, Gwalior Indore, Jaipur Jodhpur and Bangalore under the Five Year Plan for development of broadcasting

The Broadcasting expansion project, which is estimated to cost Rs 3 52 crores on the capital side, also provides for equipment of the Bombay, Calcutta and Madras stations with a high power short wave transmitter each for ensuring satisfactory inter regional national and external transmission

It is also proposed to install medium wave transmitters of high power, one each at Bombay, Ahmedabad, Calcutta, Jullundur, Allahabad and Bangalore

Nagpur, Gauhati, Madras, Indore and Hyderabad will each have a medium wave transmitter of medium power, while in Poona, Jaipur, Jodhpur, Gwalior and Rajkot medium wave transmitters of low power are proposed to be installed

Construction of studio buildings at Calcutta and Madras and the extension of Broadcasting House in New Delhi are also important features of the Plan

Other stations are also proposed to be modernised with a view to handling a greater volume of broadcasts and improving the quality of production

Additional facilities will also be available in all stations in respect of accommodation and recording

Construction of additional studios close to Broadcasting House in New Delhi is to be undertaken in order to eliminate overcrowding in the existing studios, which affect adversely the quality of programmes and frequency of rehearsals

The Five Year Plan also provides for increased facilities in the Research Department of All India Radio where problems connected with efficient broadcasting of programmes from both the acoustic and propagation points of view are studied

The proposed staff training school is intended to enable the engineering staff of AIR to keep pace with rapidly developing broadcasting engineering technique

* Opened in October 1953

† For ten months ending October

THE PRESS

ACCORDING to a Government estimate there were 6,762 newspapers and periodicals in India on April 1, 1952

Dailies, 596 (70 English), Weeklies, 2,226 (261 English), Other periodicals, 3,940 (784 English)

According to the same authority the total circulation of dailies is about 2,000,000

The following table gives a language wise distribution of the language papers and periodicals on March 31 1952

	Dailies	Weeklies	Other Periodicals
Assamese	1	6	31
Bengali	24	198	423
Gujarati	42	141	117
Gurmukhi (Punjabi)	18	43	43
Hindi	125	526	877
Kannada	30	87	48
Malayalam	11	46	102
Marathi	41	168	113
Oriya	4	19	44
Sanskrit	nil	3	7
Tamil	15	136	313
Telugu	7	99	217
Urdu	163	311	270
Bilingual or multilingual	33	133	505
Sindhi and other languages	12	49	46

ELECTRIC POWER DEVELOPMENT

THE aggregate generating capacity of the country has grown as follows (kWt) —

1900	1,130
1905	11,750
1910	31,847
1915	57,286
1920	130,009
1925	327,152
1930	598,140
1935	900,402
1940	1,208,422
1945	1,319,316
1950	1 712,515
1952	2,041,700

The total installed capacity at the end of 1952 was 2,041,700 kWt, of which a little over half a million kWt is water power

The *per capita* consumption of electric power in India is ridiculously low It is 9 2 kWt hours as against 986 in England, 1 470 in U S A, 3 518 in Canada 1,944 in Switzerland, 3,099 in Norway and 2,000 in Sweden

The production and sale of electric power from 1948 to 1952 was as follows (in million kWt)

	Generated	Sold
1948	4,600	3,700
1949	4 900	4 000
1950	5,100	4,200
1951	5,900	4,800
1952	6,200	5,000

An analysis of electric power consumption in million kWt is given below The figure in brackets shows the percentage

	1951	1952
Industrial power	3,050(64 0)	3,240(64 4)
Domestic consumption	580(12 2)	610(12 0)
Tramways and electric railways	330(6 9)	320(6 4)
Commercial light and small power	330(6 9)	350(6 9)
Public waterworks and sewage pumping	210(4 5)	230(4 6)
Irrigation and agricultural de watering	200(4 1)	210(4 3)
Street lighting	70(1 4)	70(1 4)
TOTAL	4 800	5,000

INSTALLED CAPACITY

The installed capacity in 1950 according to source is as follows (kWt)

Steam plants (1,004,434), oil gas plants (148,796), hydro plants (550,285)

Some individual industries have power-stations of their own The numbers of installations and the installed capacity are as follows

	No	Capacity (kWt)
Iron and Steel	32	179 006
Cotton	152	96,320
Wool	5	3 233
Cement (primary)	17	93 655
Cement (secondary)	2	1 100
Collieries	114	66,755
Jute	32	44,763
Railways	101	44,308
Paper	14	37,750
Sugar	104	33,769
Aluminium (primary)	2	16,434
Ordnance factories	11	15 777
Copper (primary)	1	9 875
TOTAL	587	642 745

The number of installations and generating capacity for 1950 by ownership is as follows

	No	Capacity (kWt)
Government	201	609 953
Municipalities	19	17 402
Private companies	258	1 085,160
TOTAL	478	1 712,515

The number of installations in Jan 1953 was a little over 610 (exclusive of railway, military stations)

The following statement shows the number of electrified towns and villages at the end of 1950

Population	Number of towns	Number with electric supply	Percentage of towns with electric supply to total
Over 100,000	49	49	100 00
50,000 to 100,000	88	88	100 00
20,000 to 50,000	277	240	86 64
10,000 to 20,000	607	260	42 83
5,000 to 10,000	2,367	258	10 86
Below 5,000	559,062	2,792	0 50
TOTAL	562,450	3,687	0 66

It may be pointed out that six large cities—Bombay Calcutta, Ahmedabad Kanpur, Madras and Delhi account for 59 per cent of the country s installed capacity and 56 per cent of the generated energy

The total number of consumers at the end of 1950 was 240,052

The State-wise analyses as on Jan 1, 1952 are as follows

State	No of stations	Installed capacity (kWt)	Energy generated (mln kWt)	Energy sold (mln kWt)	Capacity in Industrial Plants (kWt)	Capacity in railway plants (kWt)	Annual *per capita* consumption (kWt)
Assam	9	3,343	6 600	5 595	1,570	1 866	0 55
Bihar	19	46,996	132 032	118 593	214,703	9 559	2 87
Bombay	121	441,133	1831 330	1580 273	56 224	44 701	38 15
Madras	24	189,093	775 867	605 509	12 200	3,524	8 76
Madhya Pradesh	32	52,139	81 311	84 055	35 478	168	2 46
Orissa	17	4,845	6 811	5 125	5,422	36	0 29
Punjab	26	63,917	201 140	166 048	5,246	383	—
Uttar Pradesh	50	199,896	589 772	457 939	21 946	6,717	6 00
West Bengal	31	546,174	1207 274	1034 137	141,960	14,448	36 22
Kashmir	4	6,479	25 514	17 375	—	—	3 93
Hyderabad	8	26,234	50 959	43 185	24 189	40	2 14
Madhya Bharat	26	16,362	30 909	24 099	25 190	80	2 89
PEPSU	10	6,896	6 043	10 767	2,774	85	2 26

Delhi	4	42,586	137 281	119 446	8,160	—	58 75
Others	21	8,284	14 977	12 046	2,838	2,150	1 22

FIVE-YEAR PLAN

There are a little over 100 power projects in the Five Year Plan

The total cost of these will be about Rs. 782 5 crores

The proposed expenditure during the Plan period will be about Rs 511 8 crores

The expenditure during 1954-55 will be Rs 107 crores, and during 1955-56, Rs 78 crores

The addition to the installed capacity at the end of the Plan will be 1 07 million kWt

The ultimate addition will be 1 96 million kWt

The consumption of electricity in 1955-56 is expected to be of the following order (in million kWt) (See next column)

Industrial 860, Domestic light and power 860, Commercial light and power 430, Industrial 4,100, Irrigation 332, Other purposes 752

Total 6,474

The three most important power projects now under construction are

The Nangal power house, the power stations on the Damodar, and the Power House No 1 on the Hirakud

POWER PROJECTS

Statistical information about some of the major power projects under the Central Government are given below (power in thousand kilowatts)

Name	Date of completion	Installed capacity	Firm power	Anticipated load
Nangal Power House	1956-57	144	105	98
Damodar				
Bokaro thermal	1952-53	150	—	—
Maithon	1955-56	40	—	—
Konar	—	40	—	—
Panchet Hill	1957-58	40	—	—
Tilaiya	1952-53	4	—	—
Damodar (total)	—	274	193	189
Hirakud				
Power House No 1	1957-58	123	85	85

Statistical information about power projects in States is given below The expenditure is in lakhs of rupees, and the power in thousand kilowatts

State	Total cost	Plan expenditure	Installed capacity	Firm power	Anticipated load
	Rs	Rs			
Assam	85	83	7	7	4
Bihar	11,20	7,09	11	9	29
Bombay	14,12	10,43	84	359	417
Madhya Pradesh	13,89	6,00	73	54	58
Madras	77,73	50,24	307	324	242
Orissa	8,74	3,91	8	5	23
Punjab	59	38	—	—	—
Uttar Pradesh	29,30	14,10	124	169	162
W Bengal	1,33	76	4	2	24
Hyderabad	5,81	3,21	53	45	33
Kashmir	1,86	1,05	7	10	9
Madhya Bharat	2,74	2,28	18	18	18
Mysore	20,27	12,68	120	176	282
PEPSU	2,00	30	—	—	—
Rajasthan	53	41	11	16	15
Saurashtra	2 62	2,13	12	9	8
Travancore Cochin	17,70	10,35	81	66	85
Bhopal	28	28	—	—	—
Coorg	25	25	—	—	—
Kutch	23	23	—	—	—
Tripura	7	7	—	—	—
Vindhya Pradesh	51	51	3	3	2
Himachal Pradesh	13	13	1	1	1
Manipur	12	12	—	—	—

There are also projects which are under different stages of investigation These include Kosi (Nepal and Bihar), Tikarpara and Niraj (Orissa), Narmada, Tapti and Sabarmati (Bombay and Madhya Pradesh), Indravati (Bastar), Sone, Rihand and Nayar (U P), Chambal (Rajasthan and Madhya Bharat), Dihang, Manas and Barauli (Assam)

The total power generation on these projects may be 10 million kilowatts

The schemes under execution may be expected to be in commission during the next quinquennial period and a large portion of the schemes now under consideration may be completed in the next ten years

The Central Government have enacted legislation, The Electricity (Supply) Act, 1948, with a view to bringing about proper rationalisation of the industry and to assist in the rapid electrification of the country

The Act provides for the formation of Provincial Electricity Boards in the States which will take control of generation of electricity by all the licensees

Madhya Pradesh and Delhi have set up such *Boards*

It also provides for the creation of a Central Electricity Authority for exercising a close scrutiny of the work of the Provincial Boards and to advise them on all major power development schemes that may be taken up by the Boards from time to time

This body was set up in 1950

It is required to evolve a sound national policy, and co-ordinate the activities of the appropriate planning agencies

It is to act as arbitrator in disputes between a State Government or a State Electricity Board and the licensees

It has to carry out investigations and collect data about all sides of production and distribution of power

The State Electricity Boards are required to rationalize supply and distribution, prepare and carry out new schemes, acquire existing stations and equipment, give bulk supplies of power to existing licensees, designate wherever necessary existing stations as controlled stations and direct licensees to achieve the maximum economy and efficiency in the operation of their undertakings

BOMBAY

The greatest hydro-electric undertakings in the country are the three schemes developed and brought into operation by Tata Sons, Ltd, and continued under their management until 1929, when they were transferred to the management of the Tata Hydro-Electric Agencies, Ltd, in which Messrs. Tata Sons retained a substantial interest. These undertakings are :—

(a) The Tata Hydro-Electric Power Supply Company, Ltd Supply started in 1915.

(b) The Andhra Valley Power Supply Company, Ltd. Supply started in 1922.

(c) The Tata Power Company, Ltd. Supply started in 1927.

These three Hydro-Electric stations together with the Chola Steam Station of the Central Railway supply a demand of nearly 285,000 kW in and around Bombay up to as far south as Poona

Khopoli—The hydraulic works of the Tata Hydro-Electric Power Supply Company are situated near Lonavla at the top of the Bhor Ghat. The monsoon rainfall is stored in three lakes, namely Lonavla, Walwan and Shirawta, from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghats, where the head at turbine nozzles is 1,725 feet or approximately 750 lb per sq inch The capacity of the Power Station at Khopoli is 65,000 kW

This scheme was formally opened by the Governor of Bombay on the 8th of February 1915

Bhivpuri—Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the north of the Tata Hydro-Electric Supply Company's lakes, where additional power could be developed

These investigations resulted in the formation of the Andhra Valley Power Supply Co and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri The head of water at turbine nozzles is 1,740 feet or approximately 750 lb per sq inch

The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli

The present capacity of this station is 69,000 kW

Bhira—The Tata Power Company's scheme on the Nila Mula River to the south-east of Bombay was investigated and developed along lines similar to the Andhra Valley scheme and has an installed capacity of 132,000 kW

The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways

The Tata Hydro-Electric System, comprising the Tata Hydro-Electric Power Supply Company, the Andhra Valley Power Supply Company and the Tata Power Company, is operated as an integrated electric power system serving an area in the State of Bombay of more than 1,000 square miles

It is the largest power system in the country having a fixed capital expenditure in excess of Rs 16 crores and an annual output representing more than one fourth of the total electricity production

Electric service is rendered to the textile mills and other industries of Bombay and the suburban areas, to the railways for electric traction, to local authorities, and, in bulk for retail distribution, to the electrical undertakings supplying Greater Bombay, Poona and ten other localities within the area.

During the year 1952 53, the three hydro-stations and the railway thermal power station, which is connected to the system, together generated 1,486 million units of electric energy

The transmission network of the system consists of 496 circuit miles of 100,000-volt lines and the distribution network of 106 circuit miles of 22,000-volt overhead as well as 101 miles of 22,000-volt and 116 miles of 6,600-volt underground cables

Substantial additions to the transmission and distribution network are expected to be made during the next few years

The interconnected transmission lines of the Railway add another 272 circuit miles to form the combined Tata Hydro-Railway Grid.

The rate for energy delivered to the Mills, Factories and Railways has, for several years shown a steady decrease and now averages 0 42 of an anna per unit, which compares favourably with that in any large commercial centre in the world

The rates were increased by 12½ per cent for the first time in the history of the companies on account of all-round increasing costs

The load development in the area served by the Tata Hydro Electric System has exceeded the available capacity The available power is distributed to the existing consumers by staggering of working days of the various industries

By continuing to utilise the load staggering periods for essential machine maintenance and overhaul the system capability by mid 1954, not including the Bombay Government Plant, will just be equal to the then expected demand of about 289 MW

Any load which can from now on be supplied is only that which can be taken up by the Bombay Government Plant now being commissioned into service

Further development will have to await the Tatas Thermal Plant which is expected to go in service by 1957 and the supply from Koyna scheme which was inaugurated on January 16, 1954

Grid Schemes

For the development of industries and agriculture in the State of Bombay, the Bombay Government has embarked on the provision of an electrical grid scheme somewhat on the lines of the British Grid It is at present proposed to develop grid schemes area wise in the different parts of the State which may be interconnected at a later stage

In the State of Bombay, there are at present 123 licensees in operation Most of the licensees operate in urban areas Besides, there are 22 power stations owned and operated by the Bombay Government including those of the merged States

The development programme under execution at present consists of (1) North Gujarat Grid Scheme, (2) South Gujarat Grid Scheme, (3) the Jog-Karnatak Electric Grid Scheme, (4) Extension of the Chola Power Station of the Central Railway, (5) the Radhanagari Hydro-Electric Scheme, (6) Rural Electrification and Small Towns Schemes based on small Diesel stations or distribution of power purchased from the existing licensees

Besides this, the Department is entrusted with the work of operation and maintenance of power houses in merged States which were owned and operated by the various former Indian States

Co-ordinated Development

The former Government of Baroda was persuaded to abandon the scheme of establishment of steam station and to take power in bulk at Baroda, Petlad, Kalol, Navsari and Billimora from the Grid schemes for distribution within the State territory

Negotiations were conducted with the Western Railway for the use of a common power system on a co operative basis by the Railway for meeting its power requirements for traction purposes between Ahmedabad and Bombay and by the Bombay Government for supplying electric service to urban and rural population residing within the economic distance of the various sub-stations *en route*

When the Railway electrification scheme is decided on, it will be necessary further to develop more power at the generating stations in North Gujarat and South Gujarat areas and also the transmission systems

Negotiations were also conducted with the Central Railway for the use of a common power system in the Nasik and Khandesh areas However, due to financial stringency, the proposal for joint development in these areas has been dropped for the time being.

North Gujarat Scheme

Under this scheme power is being purchased in bulk from the power station of the Ahmedabad Electricity Company at Sabarmati and distributed to various load centres in the North Gujarat Area

The scheme when completed will comprise about 70 miles of 66/110 kV line, 14 miles of 33 kV and 50 miles of 11 kV transmission lines and about 480 miles of distribution lines a receiving station at Sabarmati and 66/11 kV step-down transforming stations at Baroda, Nadiad, Anand, Barejadi and Petlad and 33/11 kV sub stations at Kalol and many 11 kV/400 230 Volts sub stations in various towns and villages to be served

The Ahmedabad Electricity Company have constructed a new power station known as B station consisting of four 15,000 kW steam turbo sets negotiated by the Government with the Company in the year 1944 45

In order to meet the ever growing requirements of power, the Government have negotiated with the Company for the establishment of a further new power station known as 'C station, initially consisting of three 15 000 kW sets orders for which have already been placed by the Company and the first set of which was expected to be in Commission early in 1954

The ultimate capacity of this C" station is estimated to be 120,000 kW

The 66/110 kV transmission line between Ahmedabad and Baroda and 33 kV line between Ahmedabad and Kalol have been energised and supply commenced to Baroda, Nadiad, Anand, Dakor Umreth, Petlad, Vallabh Vidya Nagar and Kalol licensees as well as to several industries

The work of erecting 11 kV lines in rural areas and the laying of distribution lines in the villages is in progress Supply has already commenced in several villages and is being gradually extended to other villages

This scheme is estimated to cost approximately Rs 268 lakhs

The system demand established upto the end of 1953 was over 14,000 kW and the number of consumers served nearly 2,500

South Gujarat Scheme

This scheme provides for the installation of a steam power station at Utran near Surat, initially comprising two turbo alternator sets of 7,500 kW each for supply of power in areas from Surat to Bulsar, and the construction of a 66 kV transmission line over a distance of about 33 miles from Surat to Billimora

Supply under this scheme is already commenced and bulk power is at present being given to the Surat licensee as from November, 1952

Power in bulk will now be supplied to the licensees and large industries at Navsari, Billimora, Bulsar, Rander and Kathor and to the rural loads in the areas between Surat and Bulsar as soon as the 66 KV transmission system and further distribution lines are completed

Additional demands for power continue to be received and one more 7 500 kW set with boilers and equipment is already about to be erected

Provision of further capacity is under consideration

The system demand upto end of 1953 was 4 300 kW

The scheme inclusive of the third 7,500 kW is expected to cost Rs 386 lakhs

Other Schemes

For the isolated towns and rural areas which are beyond the economic reach of the major Grid schemes but offer good scope for development of cottage and small scale industries and agricultural pumping, Government have established small diesel stations or arranged to purchase power in bulk from the existing power stations of nearby licensees.

These small schemes are known as 'Nursery Schemes

The criteria adopted for selection of places for nursery development are that there should be (*a*) about 2,000 dwelling houses and (*b*) a reasonable magnitude of load of small scale and cottage industries and (or) agricultural pumping which could be operated by electricity so as to increase the productive and earning capacities of people in such areas

A list of towns covered under the Nursery Scheme is given below —

Division	District	Towns covered	Remarks
Northern	Surat	Ten villages in Bulsar Taluka	Supply has already commenced power in bulk is purchased from Bulsar licensee These villages will be later supplied from the South Gujarat Grid Scheme
Northern	Ahmedabad	1) Dholka 2) Dhanduka	Schemes are postponed due to financial strin gency
	East Khandesh	Dharangaon Erandol and Parola	Supply from the diesel power station is expected to commence in the first quarter of 1954
	Sholapur	Akluj	Scheme is postponed due to financial stringency
Central	Poona	Lonavla Talegaon area	Scheme is postponed due to financial stringency Power will be purchased from Tatas
	Satara (North)	21 villages in Satara Taluka	Power in bulk is purchased from Satara licensee Supply has already commenced
	Satara (South)	Islampur Peth	Supply from the diesel power station has been commenced
	Belgaum	Hukeri, Gokak, Chi kodi, Konnur and Sankeshwar	Supply from the diesel power station has already commenced
	Belgaum	Bailhongal	Supply from the deisel power station is expected to commence in 1954 55
Southern	Bijapur	Guledgud, Kamatigi	Supply from the diesel power station has been commenced
	Bijapur	Ilkal Hungund Amin gad, Gudur and Sulebhavi	Supply from the diesel power station is expected to commence in 1954 55
	Dharwar	Gajendragad	Scheme is postponed due to financial stringency
	Ratnagiri	1) Ratnagiri 2) Vengurla 3) Chiplun 4) Malwan	The supply from all the four diesel power stations has already commenced

None of the schemes mentioned above can at present supply any large industrial load, but with the new Surat Steam Station it will be possible to supply power for industrial use under the Bulsar Taluka Electrification Scheme

Jog Power —The Mysore Government has to supply the Bombay Government with electric power upto 10 000 kW at Jog and 1 500 kW at Harihar This power will be distributed in the Dandeli, Dharwar, Hubli and Gadag areas as well as in Byadgi Haveri and Ranibennur

The supply to the Harihar Haveri section was expected to commence at the beginning of 1954 and the Jog Hubli section by the end of 1954

The scheme is estimated to cost Rs 213 lakhs

Koyna Project —The first stage of development of the revised project as at present approved by Government now comprising storage of 36 045 m c ft of water behind the dam of 204 5 feet height above the river bed at Jalkawadi, sufficient to produce 240 000 kW of power

The estimated cost of the dam tunnel neces sary generating plant and transmission and transformation equipment for the first stage development is expected to be approximately Rs 33 crores

The foundation stone of this scheme was laid on January 16, 1954

Initial supply of power from this Scheme is expected to be commenced six working seasons after the funds are alloted for the commence ment of the work

Kalinadi Project —The final report indicates that 325,000 kW continuous is available in the Kalinadi Basin, distributed in four power stations Initially the development of one power station at Supa capable of supplying about 50 000 kW to the districts of Dharwar Kanara, Belgaum and Bijapur is due for examination

Bhatgar Hydro-Electric Project —A demand of about 10 000 kW can be met from this source provided the power station is linked up either with Koyna when and if developed or Tata system at Poona

Bhandardara-Randha Electric Scheme —A demand of 16 800 kW can be met from this source In addition to this, a further 10 000 kW can be obtained during the monsoon This power can be firmed up by the establishment of a steam station of the installed capacity of 15,000 kW in this area

Narbada River Project - The Central Water Power, Irrigation and Navigation Com mission are investigating the possibilities of power development by impounding the waters of the Narbada River in Gujarat It is reported that at one of the Dam sites at Limbdi, 200,000 kW continuous power can be generated This power when available will be utilised in Gujarat in place of the present thermal power

Tapi (Tapti) Project.—Under this project which was initially intended to be an irrigation scheme only it is now proposed to also develop Hydel power with initial installed capacity of 24,000 kW the ultimate capacity being 216 000 kW The work is being carried out by the Central Water power Irrigation and Navigation Commission on behalf of the Bombay Government The Tapti Hydel power when available will supply the power requirements of the South and the North Gujarat Electric Grid Schemes

At present only the irrigation part of the project is being proceeded with because of financial stringency Total cost Rs 6 crores

Radhanagari.— *The Radhanagari scheme is a* multi purpose project for irrigation, power generation and water supply and comprises construction of a dam, about 140 feet high above the deepest foundation across the Bhogavati River, about 32 miles from Kolhapur, and a power station with an installed capacity of 4,800 kW at Radhanagari in Kolhapur District

The R H E Scheme is expected to cost about Rs 246 lakhs

Hydro Electric Supply to Kolhapur City was commenced from August 1952 and to Jaysingpur licensee from March 1953

Besides the R H E Project, the following work of the former Kolhapur State is under execution by the Grid Department

(*i*) The Emergency Irrigation Diesel Power Station for supplying power for irrigation and industries This power station is now inter-connected with the Radhanagari Hydro Electric Power House

(*ii*) Conversion of D C to A C in the area taken over from the Kolhapur licensee

The interconnected system besides supplying power to Kolhapur City which is partly served by Government and partly by the Kolhapur Electric Supply, will supply power to the agri-cultural pumps along Bhogawati and Pancha-ganga rivers and to the licensees of Kolhapur, Ichhalkaranji Jaysingpur and Hupri

Chola Steam Station —In order to relieve the acute power shortage existing in the Bombay-Poona area since 1949 it was decided in con-sultation with the Railway Board to extend the Railways power station at Chola by an additional installed capacity of 54 000 kW

The scheme is expected to cost about Rs 4 crores and will be operated as a part of the Tata Central Railway Interconnected System

The supply was expected to commence in the beginning of 1954

In order that the Bombay Poona area does not suffer from any further shortages of power till the large bulk supply from hydro power from the proposed Koyna Project becomes available Government have granted a license to Tatas for setting up a steam thermal station of 100 000 kW capacity at Trombay with an initial capacity of about 50,000 kW

MYSORE

The first Hydro Electric scheme of any magni tude undertaken in the country or indeed in the East was that on the Cavery River in Mysore State which with its generating station, transmission line and distributing system was inaugurated in 1902

Sivasamudram —The principal object of this scheme was the supply of power to the mining companies on the Kolar Gold Fields about 92 miles from Sivasamundram, the site of the generating station

Since 1902 the supply of electrical energy from Sivasamundram has been provided for Bangalore and Mysore Cities and over 225 other towns and villages in the State

The initial undertaking has constantly been expanded and its total normal capacity now stands at 83 000 H P

The first stage of the Project with an installed capacity of 48,000 kW was put into service with four units of 12,000 kW each on February 21, 1948

The cost of this stage and that of all the civil engineering works for the second stage amounts to Rs 16 crores

The work on the second stage is in progress now and with its completion the total capacity of the station would be 20,000 kW It consists of four more generator units of 18,000 kW each This work is estimated to cost Rs 2 65 crores

The Jog Power plant supplies energy to the north and north eastern parts of the State up to Mysore and Mandya, along Chickmagalur, Hassan, Holenarsipur and Belgola It supplies power to Anantpur, Cudappah and Kurnool Districts of Andhra State

To the Tungabhadra project, a block power of 2,000 kW is being supplied

The State of Bombay receives upto 10,000 kW at the station itself and 1,500 kW at Harihar border

To South Canara in Madras State, this plant supplies 6,000 kW and another 2,000 kW is being supplied to Coorg

At present Mysore supplies electricity to over 500 towns and villages and to over 5 000 irrigation pumping units within the State limits

The transmission system consists of over 900 route miles of 78,000 and 37,500 volt lines with a total of 1,350 miles of circuits

With the construction of the new transmission lines and on the generation of power at Jog, over 600 miles of 110 kV new transmission lines will be in service

TRAVANCORE-COCHIN

Pallivasal The Pallivasal Hydro Electric Scheme was sanctioned by the Government in 1931 and the work was taken up immediately afterwards The first stage of development was completed by the beginning of 1940 and the supply was commenced in March 1940 The scheme utilises the water of the Mudira puzha River diverted at Munnar through a tunnel 9 ft by 8 in and 10 200 ft in length

The second stage extension works of the Pallivasal Hydro Electric Project are now in progress Two additional sets each of 7 500 kW have so far been installed thus bringing the total installed capacity of the station to 28,500 kW

With the completion of the Madupatty Dam in the upper reaches of the Mudirapuzha river, the installation of the sixth and the last 7,500 kW set and certain modification to the first three units in the power station the installed capacity of the Pallivasal power station will be raised to 37 500 kW

The total generation during 1951 was 170 million units About 77 per cent of the power generated is used for industrial purposes and the rest for agricultural and domestic needs

As a result of the negotiations with the Government of Madras it has been possible to get an extra block of 3 000 kW of power from the Papanasam System

Power up to 66 000 volts is available for transmission to plains

The primary transmission network now consists of 434 14 route miles of 66 kV lines, 26 route miles of 33 kV lines and 24 route miles of 22 kV lines and seven 66 kV sub stations

The distribution network consists of nearly 668 miles of 11 kV lines, 621 miles of 400/230 volt lines and 204 distribution centres

The connected load is over 62,200 kW with a maximum peak load of about 28 500 kW

Sengulam — Two new projects have been taken for execution The first of these, the Sengulam Hydro Electric Project envisages the utilisation of the tail water discharged from the Pallivasal Power station over a head of 1,200 feet The project is under execution and is *estimated to cost Rs 300 lakhs*

The various works connected with the project are well under way and the first unit in the Sengulam Power Station was commissioned by the beginning of 1952

The Poringalkuthu Hydro Electric Scheme will utilise the water of the Chalakudi river In the first stage of the project which is now under execution the installed capacity will be 24,000 kW comprising three sets each rated at 8,000 kW This Scheme was scheduled to be completed by the end of 1953

MADRAS*

Madras now ranks next to Bombay in its hydro-electric power output Three hydro-electric stations are now in operation Besides extensions to the existing plants, two more stations are under construction

An 'Electric Power Grid' has been in existence for over 20 years

The grid in the south where it is well formed consists at present of three hydro electric power stations, viz, those at Pykara, Mettur Papanasam and two thermal stations at Madras and Madurai

A good portion of 13 districts from Chittoor to Tinnevelly and Chingleput to Malabar is covered by the Grid In the central and northern regions of the State the grid is yet to take shape

The installed generating capacity under the Madras Grid totals 195,300 kW It has about 5,100 miles of high tension line, operating at voltages from 11,000 to 111 000, and 4,000 miles of low tension distribution lines There are 34 extra high tension sub stations of 110 kV and 66 kV and 44 of 33 and 22 kV with transformer capacity totalling 247 000 kVA and 1,766 distribution transformer stations with an aggregate capacity of 110 800 kV A

The total connected load to the Grid is 468,750 kW

A total of 1,960 towns and villages are receiving supply from the Grid

There are over 274,000 consumers of all classes 111 000 served directly by the department and 163 000 by licensees distributing Government power

The total power generated amounts to over 680 million units representing more than 99 per cent of the total power output in the State

The capital investment is over Rs 21 7 crores and the revenue about Rs 3 78 crores

Madras leads all other States in India in rural electrification with 1,960 villages electrified of which about 1,100 received supply from the Grid the rest from self generating licensees Nearly 16,700 pumps for lift irrigation and 1 800 rural industries are run on electricity with a connected load of 92 000 kW

Pykara Scheme —The scheme utilises the waters of the Pykara river which drains from the Nilgiri plateau having a catchment area of nearly 38 square miles and a fall of about 3,100 ft The flow though perennial is very irregular and often drops to values around 20 cusecs during the dry season

The estimated potential capacity of the full development is around 40,000 kW continuous

The first stage of development was commenced at the end of 1929 and was completed at the end of 1932

The present storage capacity is 1,886 m c ft

Power is transmitted to Coimbatore, which is the main receiving station and also the chief load centre by means of a 50 mile double circuit 110 kV line

The line is extended therefrom at 66 kV to Tiruppur, Erode, Udumalpet, Sembatti and Madurai

At Erode and Madurai tie is established with the *Mettur and Papanasam systems respectively*

Power is now supplied from Pykara to Calicut and Cannanore through 66 kV lines

This system has 1,722 miles of transmission lines of voltage ranging from 11,000 to 110,000 in service There are nine extra high tension sub-stations with transforming capacity of 140,680 kVA and 734 distribution transformer stations with an aggregate capacity of about 41,600 kVA

The final stage of the Pykara Project consisting of a second dam across the Pykara river to provide a storage of 2,000 m c ft a new pen stock, and two generating sets of 13,000 kW each at Pykara station is under execution

This will not only meet the power deficiencies of Mettur and Papanasam stations during periods of unfavourable water conditions but will also meet the demands arising out of the large scale industrial and agricultural developments in the southern districts in the near future

To supplement the output in the Hydro-Grid during water scarcity, an auxiliary steam station at Madurai with an initial capacity of 4 000 kW was completed and brought into operation in February 1951

Mettur Scheme —The Mettur Dam one of the largest structures of its kind in the world is 176 ft high and can impound a total of 93,500 m c ft of water

This storage is primarily for irrigation purposes but part of the water let down for irrigation is utilised to the best advantage for the generation of hydro electric power

Work on the initial installation with 3 units of 10,000 kW each was commenced in the latter part of 1935 and the station started operation in June 1937

The operating head varies from 160 ft at full reservoir level to a minimum of 60 ft The average head is 135 ft

Power is generated at 11 000 volts 50 cycles, 3 phase and stepped upto 66,000 volts for transmission to various load centres The voltage of transmission will shortly be raised to 110,000

Power is transmitted to Singarapet in the north and Erode in the south (a total mileage of 100 miles) taking off from the power station

At Erode the Mettur System is linked with Pykara network Lines are extended in the north to Vellore, Tiruvannamalai and Villupuram and in the south to Trichinopoly Tanjore and Nagapattanam

Papanasam Scheme —This is the third hydro electric scheme to be undertaken by the Madras Government The first stage of the scheme was started in 1938 and the station commenced operation in July 1944

The Tambraparni river drops about 300 ft over the picturesque Papanasam falls at the foot of the Western Ghats in Tinnevelly District

Six miles above the falls a reservoir of 5,500 m c ft is formed by constructing a masonry dam 170 ft above river bed and 800 ft long The gross head developed is 330 ft

The transmission system extends to Tuticorin, Koilpatti and Madura, and is linked with the Pykara Hydro Electric System at Madurai

Bulk power to the extent of 3,000 kW is being delivered to the Travancore Cochin Union Government at the State borders near Shencottah

The Five Year Plan (including projects for Andhra) provides for (*a*) four new power houses at Machkund, Moyar, Nellore and Madurai, (*b*) extensions to five existing power houses—Pykara, Papanasam, Madras, Vijayavada and Visakhapatnam—and (*c*) 1650 miles of new high tension line

In 1950 51 sanction was accorded to the Tungabhadra Hydro Electric Project† and a number of transmission and distribution extensions

The installed capacity on the Andhra side will be 60 000 kW, on the Hyderabad side 110,000 kW

The project was to be completed in 1953-54

All these schemes will add 200,000 kW of extra generating capacity to the Grid In other words, when the plan is completed, the existing generating capacity will have been doubled

The estimated expenditure for the five years 1951 56 is Rs 50 24 crores (includes expenditure for Andhra)

* Includes Andhra

† See below under Hyderabad

Of the schemes included in the plan, the Nellore thermal station with a generating capacity of 5 000 kW was completed and brought into operation in October 1950 The Madurai thermal station had a 4,000 kW turbo set commissioned into service in February 1951 The Papanasam power house extension was completed with the addition of the fourth 7 000 kW unit

The Moyar power house and Madras station first stage extensions were completed in 1952 53 The generating capacity of Vijayavada and Visakhapatnam thermal stations was increased by 6,000 and 3,000 kW respectively The areas will ultimately be connected to the Machkund Hydro Electric Station

WEST BENGAL AND BIHAR

The Damodar Valley Project—This is the most important development scheme serving West Bengal and Bihar jointly Of the seven multi purpose dams included in the entire Project, four form part of the First Phase Programme now under implementation (Tilaiya and Maithon on the Barakar, Panchet Hill on the Damodar, and a dam across the Konar)

The Tilaiya dam was to be ready in 1952, the Konar dam in 1953, the Maithon dam in 1954, and the Panchet Hill dam in 1955, when an irrigation barrage and 1,500 miles of canals and distributaries, of which 83 miles will be navigable, will likewise be finished

A 150,000 kW thermal power station at Bokaro included in the First Phase Programme, has come into commercial operation

The First Phase alone will provide perennial irrigation for one million acres, generate 126,000 kW hydro electricity, and control floods up to 650,000 cusecs

The extra foodgrains expected to be produced on completion of the First Phase are about 10 million maunds, yielding at present prices Rs 30 48 crores annually The estimated monetary value of the extra jute is Rs 3 60 crores per year the sale proceeds per annum of the D V C power has been calculated at Rs 4 18 crores

On the basis of prices prevailing in 1951, the revised cost estimates for the First Phase amount to Rs 76* crores

Mor Project.—The opening of the Mayurakshi canal in July 1951 marked the successful completion of an important phase in the Rs 15¼ crore Mor Project, one of the principal post war development schemes in West Bengal Besides irrigating an area of 600,000 acres, the project will provide about 4,000 kW of electric power annually The necessary plant is already installed

Kosi Project.—The most important scheme in Bihar is the Kosi Project now under investigation with the Central Waterpower, Irrigation and Navigation Commission It will be a multi-purpose project for irrigation, drainage, reclamation of water-logged areas, malaria control, fish culture and recreation facilities

The project comprises a dam, 750 feet high across the Chatra Gorge in Nepal just above the temple of Baraha Kshetra, to store about 11 million acre feet of water, a power plant at the dam site capable of generating upto 1 8 million kW of power at 50 per cent load factor, a barrage in Nepal across the Kosi to control and stabilise the river channel, and to divert its supplies into two canals, one on either bank, for irrigating about a million acres in Nepal territory, and a second barrage near the Nepal Bihar border with two canals on the left and one on the right bank for irrigating over two million acres of land in Bihar

The project is estimated to cost rupees 90 crores The execution of the scheme is expected to take about ten years

ORISSA

The unified development of Mahanadi Valley has been decided upon by the State of Orissa and is being executed through the Central Water power, Irrigation and Navigation Commission, Government of India

It comprises three units namely the Hirakud Dam Project, the Tikarpara Dam Project and the Naraj Dam Project, each with its own canal system and hydro electric power installations The three units are capable of independent development and also of forming an integrated part of the basin wide plan

Hirakud Dam Project.—This involves the construction of a dam—150 feet high and gross storage capacity of the reservoir 5 3 million acre feet—across the Mahanadi about nine miles upstream of the town of Sambalpur, gravity and lift canals on either side and two hydro-electric installations

The project will provide irrigation to 1,094,953 acres of land, generate 350 000 kW and will also provide navigation facilities

The whole scheme is estimated to cost rupees 92 crores and will earn an annual return of 4 29 per cent on the sum at charge

The proposed expenditure under the Five Year Plan is Rs 61 crores

The Hirakud Dam is now under construction It is expected that water for irrigation will begin to flow in 1956

Machkund Scheme—The construction of the Machkund Hydro-Electric Scheme has been undertaken jointly by the States of Orissa and Andhra

The Scheme will harness the Duduma water falls on the Machkund river which forms the boundary between Orissa and Andhra in that stretch A gross head of 840 feet is available there and with the help of a storage reservoir, built to regulate the minimum flow, a power house of 100,000 kW can be installed

The reservoir will be created by constructing a dam at Jalaput, some 18 miles above the falls, to a height of 134 feet above the bed of the river and it will impound 25,450 million cubic feet of water to supplement the river flow during dry season

The cost of the scheme is estimated to be Rs 931 79 lakhs, shared in the ratio of 70 30 by Andhra and Orissa respectively, and the power generated will be utilised by the States in that ratio in accordance with an agreement entered into between the States (originally Madras and Orissa)

Power from the project was to be available in 1953 It is transmitted by a 132 kV line to Berhampur via Jeypore and Rayaghada and will be made available at present in Koraput and Ganjam Districts

ASSAM

Assam possesses large potentials of hydro-power It has roughly been estimated that it should be possible to generate upto four million kilowatts of continuous power in that State by developing eleven sites on different rivers These projects would involve storage by construction of high dams involving a total reservoir capacity, during monsoon, of 68 million acre feet

Most of these projects can be designed as multi purpose schemes for power generation, perennial irrigation, extension and improvement of navigation and flood control

The Government of India through the Central Waterpower, Irrigation and Navigation Commission has undertaken the investigation of two multi purpose hydro electric schemes, *viz*, the Dihang and the Manas

The site of the proposed dam and the reservoir will lie within Bhutan territory

Air survey of the site has been completed Economic statistics for 43 villages in the river basin have also been collected and land classification and soil survey for 147 villages have been made A silt laboratory has also been established

Rs 1,71,722 were spent on this work up to 1952

The State Government has established a small office for purposes of investigation of small rivers and streams for generation of electrical power for local needs

In one scheme namely the Umtru hydro-electric scheme, the work of collection of data has been completed and now the work of the detailed estimate and design of a power station of 8,000 kW is in progress

Three 2,000 kW sets are to be installed initially and a fourth to be added at a later date

The tribal areas near the foot hills of the Naga, Garo and the Lushai Hills offer possibilities for the installation of small hydro electric stations for the development of cottage industries

KASHMIR

As the country-side in Kashmir abounds in small streams and channels, it is considered more feasible to build up small power stations for electrifying suburbs than laying and maintaining long transmission lines over sparsely populated areas

The headworks of the Jhelum power installation is situated six and a half miles from the power house at Mohora and the main connection between the two is a timber flume These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the ultimate generation of 20,000 electrical horse-power

The power house is of sufficient capacity to allow of 15,000 kW generating plant being installed within it Two transmission lines run side by side as far as Baramulla, 21 miles from Mohora at which point one terminates The other continues to Srinagar, further 34 miles.

At present it supplies power to Srinagar, Baramulla, Sopore and other villages nearby

A new hydro electric cum irrigation scheme with the ultimate capacity of 18,000 kW by harnessing the Sindh river at Ganderbal has been taken in hand The scheme is in progress and is expected to be completed within two or three years

At Pahalgam a small hydro electric station of about 186 5 kW exists for the convenience of the visitors there

The Jammu power house employs four generating sets with a total capacity of 1,125 kW, driven by water turbines

The necessity for augmenting the power supply in the Jammu area being urgent, a steam turbine driven generating plant of 1,500 kW capacity has been installed at Miran Sahib and connected with Jammu by a 6,600 volt line

The present supply being inadequate and unreliable the Kashmir Government has been allowed to purchase from the Government of the Punjab about 1,500 kW from Jogindernagar Power Station at an estimated cost of Rs 23 8 lakhs This scheme was expected to be completed in 1953

Schemes pertaining to two hydro-electric power stations at Khirum and Udhampur are under survey

A small Hydro-Electric installation was set up at Bandipore, a town 40 miles to the north-west of Srinagar, in 1951, by utilising a small irrigation channel emanating from River Madhmati, with a head of 25 feet

Its present capacity is 30 kW, it might be supplemented by another set of 30 kW.

* Later estimate Rs 77 8 crores

The outstanding feature of this small scheme is that it has been financed entirely by the local co-operative stores and the electric light in the locality is supplied on a co-operative system

UTTAR PRADESH

Ganga Canal Hydro-Electric Grid —This system supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of the State and to Shahdara in Delhi Seven of the ten falls available for electrification have been developed and there is a steam power stations at Chandausi and Harduaganj with an installed capacity of 19,000 kW

The Grid has in all 38,000 kW of installed capacity

A new hydro electric station at Mohammadpur with an installed capacity of 10 500 kW is under construction At Harduaganj steam station an additional power plant is also under erection which will raise the installed capacity of the station from 10,000 kW to 20,000 kW It will supply some 93 towns with current for light and fans and minor industries, energy for irrigation pumping from tube wells and open wells

The Ganga Valley State Tube well Scheme comprises about 2,300 tube wells, covering the districts of Moradabad, Bijnor, Budaun, Muzaffarnagar, Saharanpur, Meerut, Bulandshahr, Aligarh and Etah, introducing irrigation on the volumetric system over approximately one million acres hitherto without any source of irrigation

The supply of cheap power from some 2 300 sub stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres and rural areas

Sarda Canal Hydro-Electric Scheme — This is one of the major schemes the Uttar Pradesh Government have in hand at present It is proposed to combine into a single drop a number of existing drops on the existing Sarda Canal between its mile 7 and mile 20 and to install a power station near Khatima about 9 miles from Banbassa, the headworks of the Sarda Canal

The power house will generate 41,400 kW out of which 23 000 kW will be firm power The cost of construction of the power station including plant, about 12 miles long tail race channel and allied works, is estimated to be Rs 7 crores approximately

This project will supply electric power to the Kumaon, Rohilkhand and Oudh divisions for domestic, agricultural and industrial purposes It will also augment the power supply of the existing Ganga Hydel Grid

Pathri Power Station Project —This will add an installed capacity of 20 400 kW, out of which 8,500 kW will be firm power, on the Ganga Hydro electric Grid by the construction of a power house on a by pass power channel at Bahadrabad on the Main Ganga Canal

The project is under construction and is expected to cost approximately Rs 2 6 crores

There are several other schemes under consideration, the more important of them being the Pipri Dam and Power Station Project estimated to cost over 29 crores of rupees—Rs 19 25 crores for dams and Rs 10 crores for transmission lines—the Yamuna Hydro-Electric Project estimated to cost rupees 21 crores, the Nayar Dam Project estimated to cost rupees 21 crores and the Ramganga Project at a cost of some 22 crores of rupees

PUNJAB

Bhakra Nangal Project.—The completion of this will turn the Punjab into a regular granary and make it a highly industrialized State The project is now under construction

The most important feature of the project is the construction of the 680 feet high Bhakra Dam on the river Sutlej, forming a reservoir with a live capacity of 5 725 million acre feet

The 90 feet Nangal Dam which is also under construction on the same river about eight miles downstream of the Bhakra Dam will provide necessary storage to smoothen out the diurnal variations in releases from Bhakra Plant and a diversion for the Nangal Hydel Canal which takes off just above this dam

The Nangal hydel canal is designed for a capacity of over 12 500 cusecs, and three power houses two of which having a head of 98 feet each are under construction on this canal

The Nangal Dam is quite complete and it is expected that the first two generating sets at Power House I would be ready in 1954 55 Thus it would be possible to commence commercial supply of electricity from this power house by the end of 1952 Power House II was also expected to be ready for commercial supply of power by the end of 1952

The firm power potential of the project works out to 400,000 kW at 100 per cent factor

This power will be utilised in the States of the Punjab, PEPSU, Himachal Pradesh, Delhi and Rajasthan

New irrigation canals of an aggregate capacity of 15,400 cusecs, i e, Bhakra main line which takes off from the Nangal canal, Bist Doab Canal which takes off at Rupar, and Sidhwan which takes off from the existing Sirhind Canal, are all under construction and will command an area of 6 5 million acres in the States of the Punjab, PEPSU, and Rajasthan, out of which 1 6 million acres is at present virgin waste land

The annual irrigation expected is 3 6 million acres which will yield 1 13 million tons of food grains and 800 000 bales of cotton

The project is estimated to cost Rs 156 crores The costs chargeable to the irrigation and hydro electric portions works out to a ratio of 3 5 to 5

The proposed expenditure during the Plan period is Rs 100 crores

The whole project including the dams and canals is programmed to be completed by 1957 58

Mangla Scheme —This project provides for the generation of 10,000 kW of hydro electric power at Mangla near the Irrigation Branch Head Works on the Upper Jhelum Canal from a head of 30 ft and minimum flow of approx 5,000 cusecs in the head reach of the canal It also provides for the linking of this power station by a double circuit 132 kV line with the 132 kV Grid substation at Jhelum which would be constructed under the Rasul Hydel Scheme

The hydro electric works at Jogindranagar on the Uhl River have now five machines all of which can run during the summer They can supplement the supply of power from the Mangla during the summer, while during the winter the Mangla scheme makes good the deficiency of the Uhl River Scheme

These two schemes are therefore primarily meant to supplement each other during the low water periods at the respective power stations, thus ensuring a constant supply of additional power all throughout the year The schemes are estimated to cost Rs 99 52 lakhs

Uhl or Mandi —Situated on a spur of the Dauladhar Range at elevations ranging between 6,000 and 4,000 feet above sea level, and connected by means of a tunnel over 15,000 ft long, are the works of what is known as the Uhl River Hydro Electric or Mandi Scheme which is now operated by the Punjab P W D Electricity Branch

Due to the extensive nature of the construction works, it was found necessary to build two small temporary hydro electric power stations one at Dhelu near Shanan and the other at Thuji near the headworks at Brot which were linked together to constitute a combined installed capacity of 1,440 kW

Shanan Power Station — The initial installed capacity of Shanan Power Station is 48,000 kW

From the Shanan Power Station energy generated at 11,000 volts is stepped up to 132,000 volts which is the highest voltage adopted for this purpose in the country

This station supplies sub stations at Kangra, Pathankhot, Dhariwal and Amritsar

A single circuit line also runs from Amritsar to Jullundur and is continued at 33 kV to serve Goraya and Ludhiana sub stations

From these various sub-stations lines radiate to supply between them the Amritsar Municipality and the Jullundur Electric Supply Co and also to Kapurthala at two points

HYDERABAD

Nizamsagar Power Station.— The Nizamsagar Reservoir, located on the Manjira river, is now supplying water for irrigation to a large area

The discharge into the irrigation channel is being used to generate up to 1 5 000 kW of power The bulk of the power will be stepped up to 66 000 volts for transmission to Hyderabad city where an immediate demand exists

Devanoor Scheme.—Above the Nizamsagar reservoir, the Manjira river makes a wide loop and, by building a dam near Devanoor village it is possible to obtain a head of approximately 375 feet total The flow will be approximately 1,200 cusecs perennial and power will be developed at two stations along the canal

The total amount of power available from Devanoor will be approximately 40,000 kW perennial, and this is one of the few schemes available to supply continuous power

Tungabhadra Schemes — In conjunction with the Tungabhadra irrigation scheme it is possible to generate over 160,000 kW of hydro power at a number of stations along the canal system

Plans for a station to accommodate five units of 7,500 kW capacity have been prepared

At Sivapur, about 10 miles down the irrigation canal, a dam is being constructed At this dam there is a fall of 60 feet and it is proposed to install three units of 10,000 kW capacity in a station which will be controlled from No 1 Power Station

Below Sivapur there will be another reservoir at Timmapur, where the irrigation requirements can be dropped through 30 feet thus generating about 10,000 kW

Above this point the canal has been designed for a capacity of 7 000 cusecs so that power can be generated from this surplus water The power available will be about 30 000 kW seasonal

At Ipra, near Raichur, a further power station can be installed with a capacity of about 10 000 kW

Krishna Schemes —Two power schemes have been investigated on the Krishna river, one in the upper reaches above the junction with the Tungabhadra and one in the lower reaches where it passes through a range of hills near Devarkonda

The upper Krishna will give a capacity of approximately 50,000 kW and the lower station at the lower Krishna about 100,000 kW

Godavaris Scheme —Apart from these sources, power will be generated on a large scale under the Godavari Valley Development The Godavari main project will have eleven power sites, large and small These are at (1) Kawalguda site 45,000 kW (2) North Bank Canal Developments (four in number) 60 000 kW, (3) South Bank Canal Development (two in number) 40,000 kW, and (4) South Power Branch Development (four in number) 30 000 kW

The total amount of power generated at these places will be 175,000 kW

The Godavari Thermal Power Station at Ramagundam forms a part of the larger industrial development of the valley which is rich in natural mineral resources

The total expenditure up to date is Rs 12 2 millions on machinery and civil works

The power station at Hyderabad is to be expanded at a cost of Rs 5 00 millions so as to raise its capacity to 26,000 kW

Singareni Collieries supply electricity, through a 33,000 kW transmission line, as a temporary measure to Khammamet, Dornakal, Garla and Mahbubabad

The hydro thermal grid system will in course of time electrify the remotest corners of the State

BHOPAL

To generate electric power badly needed to help industries develop in Bhopal, the Government of Bhopal have prepared for the sanction of the Government of India the Kolar Nadi *Hydro Electric cum Irrigation Project*, estimated to cost rupees four crores

A storage reservoir to be constructed across the Kolar Nadi, a tributary of the Narbada, will have a storage capacity of about 390,000 acre feet The water stored during rains will be utilised, at first, for generating 16 500 kW of electric power The tail water will be picked up lower down and utilised for irrigating 96 000 acres of land

RAJASTHAN

The Jawai River Irrigation-cum Hydro Electric Project in Jodhpur Division was taken in hand as early as in 1946 Work is in full swing and is expected to be soon completed

The reservoir across the river Jawai has a capacity of 0 17 million acre feet and besides irrigating some 110,000 acres, will supply water for two generating stations, 1,570 kW maximum output at the canal head and 2,530 kW maximum output at the canal tail where a drop of 92 feet occurs

The cost of the scheme is estimated at 8 24 crores of rupees

The Chambal Irrigation and Hydel Development Project (Madhya Bharat and Rajasthan) aims at harnessing the Chambal for irrigation hydro electric generation and flood control by the construction of three dams and one barrage for the benefit of both Madhya Bharat and Rajasthan States

A dam 190 feet high will be constructed near Chaursigarh Fort with a storage capacity of 7 million acre feet Hydro power to the extent of 28,000 kW to 38,000 kW at 100 per cent load factor will be developed, and the area to be irrigated will be 40,000 acres

The second dam, 100 feet high near Rawat bhata with a storage capacity of 1 3 million acre feet, will develop 30 000 kW to 40 000 kW power at 100 per cent load factor and will provide irrigation facilities for an area of 10,000 acres

The third dam 145 feet high will be located near Gapernath and will develop 30 000 kW to 40,000 kW power at 100 per cent load factor

Total power about 100,000 kW

The barrage will be located near Goanari village and the canal taking off therefrom will irrigate one million acres

The total cost of the scheme is Rs 38 crores

The work on the project was started in October 1948

*

INSURANCE

INDIAN Insurance encountered a particularly difficult period in the year 1952 The restrictions of bank credit, extreme stringency in the money market, consumers resistence, and depressing advices from foreign markets, all combined to create a situation akin to depression There was thus an all round fall in the premium income in all departments in 1952

It was felt that in the stress of keen competition in business, insurers were not strictly adhering in practice to the spirit of the Insurance Act Two sets of Regulations called ' Code of Conduct ', have therefore been evolved one for life offices and the other for general insurers to help establish better practice in procuring business strictly in accord with the provisions of the Law The purport of these Codes is to regulate the business terms and relationship between the insurance offices and their field-workers As these codes are drawn up by the insurers themselves in consultation with one another and self imposed, they are helping the Trade to bring about a healthier atmosphere in their business practice

The Code for the General Insurers came into force on 15th February 1952 and the Code for Life Insurers on 1st January 1953

Though the Employees State Insurance Act was passed in 1948, and the Employees' State Insurance Corporation was also formed in that year to administer the Health Insurance Scheme, it took over four years to put the scheme into effect It was to start with introduced in Delhi and Kanpur regions first offering the benefits of health insurance to over one lakh of industrial workers This took place on the 24th of February 1952 It was extended to the Punjab on the 17th of May 1953

It is proposed to introduce the Scheme by stages at different industrial centres in India so that by April 1954, it will cover all places in the Union with a concentration of employees of over 5,000 When fully implemented, it will give a cover to nearly 20 lakhs of industrial workers

The rate of income tax applicable to Insurance Companies which was raised to about 65 pies in the rupee in 1951, has continued at that figure In assessing taxable income on the basis of income less expenses , the maximum limit for the allowable expenses for life offices is 15 per cent of the Renewal Premiums and such percentage of the First Years' Premiums as is obtained by multiplying the term in years of the corresponding policies by 7½ subject to a maximum of 90 per cent A strong representation has been made to the Finance Ministry from the Trade to accept the limits permitted by the Insurance Rules Nos 17D and 17E as the limits for the allowable expenses in assessing taxable income on the basis of valuation surplus, the portion of the surplus distributed among the policy holders that would be exempted from income-tax has been raised from one half to two thirds The Select Committee in its Report on the Income tax Amendment Bill which was before the House of the People, recommended that this ratio should be further raised from two thirds to four fifths

Co operative Insurance Societies are not liable to income tax as per Section 60 of the Income tax Act Mutual Life Insurance Offices are now agitating for simular concession and have made a representation to the Taxation Enquiry Commission on the plea that the structure of Mutual Insurers and Co operative Insurers are in essence and principle almost the same

DISTRIBUTION OF COMPANIES

The total number of insurers registered under the Insurance Act, 1938, up to 7th October, 1952 was 324 of which 222 insurers were Indian insurers and 102 were non Indian insurers

Of the 222 Indian Insurers, 90 had their head offices in Bombay State 49 in West Bengal 32 in Madras State, 10 in Delhi State 5 each in Punjab and Uttar Pradesh, 8 in Saurashtra, 3 in Hyderabad 2 each in Mysore Orissa and Rajasthan and one each in Ajmer Merwara, Assam Bihar, Madhya Bharat and Madhya Pradesh

Of the 102 non Indian insurers 66 (including one insurer holding standing contracts with Lloyds) were constituted in the United Kingdom 17 in the British Dominions and Colonies 9 in the United States of America, 3 in Switzerland 2 each in Pakistan and Africa, and one each in France, Italy and Java

Most of the Indian insurers carry on life insurance business only They are 115 in number, and of the remaining 107 Indian insurers, 48 carry on life business along with other insurance business, and 59 carry on insurance business other than life Of the Indian insurers, 40 are either Mutual Insurance Companies or Co operative Insurance Societies Further there are a few pension funds, mostly connected with Government services, and the Postal Insurance Fund which are exempt from the operation of the Insurance Act

As regards non Indian insurers, most of them carry on insurance business other than life, 4 carry on life business only, and 13 carry on life business along with other insurance business

LIFE INSURANCE BUSINESS

The total net new life insurance business effected in India during the year 1951 amounted to 474,000 policies insuring a sum of Rs 13,292 lakhs and having an annual renewal premium of Rs 7 31 crores, of which the new business done by Indian insurers amounted to 452,000 policies insuring a sum of Rs 116 46 crores and having a yearly renewal premium income of Rs 6 38 crores The new life business effected by non-Indian insurers amounted to 22,000 policies insuring a sum of Rs 16 46 crores and having a yearly renewal premium income of 0 96 crores

The average sum insured per policy under the new policies issued in India by Indian insurers was Rs 2,575 and under those issued by non Indian insurers about Rs 7,332

The total net life insurance business effected in India and remaining in force at the end of 1951 amounted to 3,414,000 policies insuring a total sum of Rs 792 94 crores including bonus additions and having an annual premium income of Rs 39 74 crores Of this the share of Indian insurers is represented by 3,179,000 policies insuring a sum of Rs 677 02 crores and having an annual premium income of Rs 33 32 crores The share of non Indian insurers is represented by 235,000 policies insuring a sum of Rs 115 92 crores and having an annual premium income of Rs 6 42 crores

Some Indian Life Offices have been operating outside India also The total new sums insured by these offices outside India in 1951 amounted to 17,000 policies insuring Rs 7 08 crores The total business remaining in force at the end of 1951 amounted to 214,000 policies insuring Rs 49 94 crores and having an annual premium income of Rs 2 42 crores

The following table shows the New Sums Insured by Indian Life Offices, the Average Sum Insured per policy and the Total Sums Insured in force at the end of the year —

Year	New Sums Insured.		Total Sums Insured in Force.
	Sum insured (in crores)	Average sum insured per policy	Sum insured including bonus additions (in crores)
	Rs	Rs	Rs
1935	32 81	1,565	151 63
1936	37 80	1,532	174 67
1937	41 74	1,520	196 74
1938	46 68	1,498	218 86
1939	45 96	1,511	232 42
1940	35 23	1,685	243 91
1941	36 68	1,841	256 43
1942	37 89	2,193	266 60
1943	65 24	2,258	310 95
1944	95 20	2,206	366 15
1945	122 78	2,128	459 43
1946	131 43	2,205	514 50
1947	114 06	2,177	547 17
1948	107 68	2,306	566·38
1949	123 13	2,341	636 95
1950	118 38	2,471	635 81
1951	116 46	2,575	677 02

The total new annuity business effected during the year 1951 was for the amount of Rs 7 75 crores, of which the share of Indian Insurers was Rs 2 12 crores The total annuity business remaining in force at the end of the year was Rs 73 82 crores, of which the amount payable by Indian Insurers was Rs 30 64 crores, and by non Indian Insurers Rs 43 18 crores

The total income of Indian and non Indian Insurers during 1951, in respect of their life Insurance business amounted to Rs 52 48 crores, while the total outgo was Rs 37 25 crores

The total income of Indian and non-Indian Insurers during the year 1951, in respect of their life insurance business was made up of —

(In lakhs of rupees)

Particulars of Income	Indian Insurers	Non-Indian Insurers
	Rs	Rs
Premium	37,38	6,41
Interest, Dividend and Rents	6,16	1,32
Other Receipts	91	30
Total	44,45	8,03

The total outgo of these insurers during the year in respect of the life insurance business was made up of —

(In lakhs of rupees)

Particulars of Outgo	Indian Insurers	Non-Indian Insurers
	Rs	Rs
Claims by death	3,58	84
Claims by Maturity	6,41	2,06
Annuities	15	11
Surrender value	1,48	94
Expenses of Management	10,00	1,47
Depreciation and Transfer to Investment Reserves, etc	8,89	40
Miscellaneous	5	69
Transfer to Shareholders' Reserves and dividends	16	2
Total	30,72	6,53

INTEREST RATE & EXPENSE RATIO

The net rate of interest earned on the mean life insurance funds during the year 1951 by Indian Insurers was 3 30 per cent Non-Indian Insurers realized 3 19 per cent The net rates of interest realized on mean life insurance funds by the Indian Insurers in each of five years were as follows —

Year	1947	1948	1949	1950	1951
Rate of Interest per annum	3 03	3 02	3 05	3 16	3 30

The total expenses of management of Indian Insurers in respect of life insurance business, expressed as a percentage of the Premium income during each of five years was as follows —

Year	1947	1948	1949	1950	1951
Expense Ratio ..	30 4	29 0	29 2	28 9	26 8

If the figures of half a dozen Insurers having the largest premium income are excluded, the expense ratio in the case of remaining Insurers would be as under —

Year	1947	1948	1949	1950	1951
Expense Ratio	35 1	32 4	33 2	32 5	28 2

The net rates of interest realised in India on mean life insurance funds by the non-Indian Insurers in each of five years were as follows —

Year	1947	1948	1949	1950	1951
Rate of Interest per annum	3 10 3	15 3	01 3	11 3	19

The total expenses of management of non-Indian Insurers in respect of life insurance business in India expressed as a percentage of the premium income during each of five years was as follows —

Year	1947	1948	1949	1950	1951
Expense Ratio	20 0	21 1	22 0	21 8	23 0

NON-LIFE BUSINESS

The premium income in 1951 of insurers doing fire and other classes of business showed an increase over that in 1950

The net premium income of all insurers under insurance business other than life insurance during 1951 was Rs 18 35 crores (Rs 16 63 crores in 1950) of which the Indian Insurers' share was Rs 13 09 crores and that of the non Indian Insurers Rs 5 26 crores The total amount was composed of Rs 9 39 crores from Fire Rs 4 11 crores from Marine, and Rs 4 85 crores from Miscellaneous Insurance business

The Indian Insurers received Rs 7 12 crores from Fire, Rs 2 48 crores from Marine and Rs 3 49 crores from Miscellaneous Insurance business

The expense ratio for Fire, Marine Miscellaneous were 29, 23 and 27 per cent respectively in 1951 as against 28, 24 and 27 per cent respectively in 1950 Commission ratios in 1951, were 13, 5 and 15 respectively as against 24, 11 and 17 This all round decrease in 1951 is apparently the effect of the Insurance (Amendment) Act, 1950

Some Indian Insurers who transact fire, marine and miscellaneous insurance business also operate outside India These insurers had a net premium income of Rs 6 32 crores in 1951 as against Rs 4 84 crores in 1950 and Rs 3 94 crores in 1949

ASSETS OF INSURERS

The assets of all the Indian Insurers amounted to Rs 249 82 crores on 31st December 1951, which were held invested in —

(In lakhs of rupees)

Particulars	Amount
	Rs
Indian Government Securities	1,21,60
Securities of Part B ' States	1,61
British, Colonial and Foreign Government Securities	4,14
Municipal, Port Trust and Improvement Trust Securities	13,74

Loans on Policies	14,78
Loans on Stocks and Shares	23
Other Loans	1,73
Shares in Indian Companies, Co operatives etc	34,68
Land and House Property	12,48
Agents' Balances, outstanding Premium and Interest, etc	12,44
Deposit, Cash and Stamps	15,81
Miscellaneous	6,60
Total	2,49,82

The following table shows the assets in India of non-Indian Insurers —

(In lakhs of rupees)

Insurers constituted in	Total Assets in India of	
	Life or composite companies	Non-life companies
United Kingdom	21,39	2,50
Dominions and Colonies	22,12	1 18
U S A		65
Switzerland	59	6
Indonesia		5
Total	44,30	4,44

PROVIDENT INSURANCE SOCIETIES

On September 30, 1952 there were in existence 81 Provident Societies Of these 30 were in West Bengal, 21 in Bombay State, 14 in Madras, the rest distributed over the other States

The total new business effected by the societies during the year 1951 amounted to 13 877 policies insuring a sum of Rs 1,06 94,900 The premium income received during the year on these policies amounted to Rs 3,69,400 The business in force at the end of the year amounted to 63 097 policies, insuring a total sum of Rs 3,46,88,700 including bonuses

The total life insurance fund of these societies at the end of 1951 amounted to Rs 85,57,000

The net rate of interest realized on mean life funds of the societies in the year was 3 56 per cent, and the total expenses of management expressed as a percentage of the premium income was 39 2

INSURANCE AGENTS

Insurance agents constitute an important pillar of the insurance structure The rapid increase in their number during the last few years, as indicated by the table below naturally raises the question whether the growth has kept within healthy limits or whether the evil of overcrowding is present in this profession as well

Year	1947	1948	1949	1950	1951
Number of Agents	174,169	170,016	180,737	172,936	177,164

Of the 126,691 licences issued in 1951, 64 200 were fresh and 62 491 were renewals

With the amendment of Section 42 of the Act, which came into force as from September 1, 1950 licences will be issued for a period of three years as against one year which was the practice followed till then The fees for fresh licences as well as for renewals have been increased to Rs 5

Sec 42A enjoins employers of insurance agents (Principal, Chief Special) to be registered Certificates are issued to them, renewable annually During 1951 the number of certificates issued to Principal Agents were 892 fresh and 418 renewal, to Chief Agents, 601 fresh and 43 renewal, to Special Agents, 9,860 fresh and 526 renewals

(For population of Scheduled Castes and Scheduled Tribes in individual States see under Population)

These classes include 779 Scheduled Castes 245 Scheduled Tribes and 198 nomadic tribes besides a number of unspecified groups

The new Constitution provides for special safeguards for the Scheduled Castes, Scheduled Tribes and Backward Classes

The President has defined by means of an order who the Scheduled Castes and Tribes are A similar list of Backward Classes has to await the detailed findings of the Backward Classes Commission

For the Scheduled Castes the safeguards take the form broadly speaking of reservation of seats in the lower Houses of the legislature and of vacancies in Government services For the Scheduled Tribes there is a sort of autonomy in parts of Assam Tribal Councils to watch their interests in some States, while in other States Ministers have been appointed to take charge of Tribal affairs There are also special grants to be used exclusively for uplift work

All these special provisions may come up for review by a Commission appointed by the President at any time within ten years after the commencement of the new Constitution Meanwhile there is an official with the Central Government who is to report to the President from time to time on the working of these provisions

As regards Backward Classes a Commission has been appointed to enquire into their condition

The Commission consists of

Kakasaheb Kalelkar (*Chairman*) N S Rajrolkar M P (Bombay) Bhecka Bhai M P (Rajasthan) Shivalal Singh Chaurasia (U P) Rajeshwar Patel M P (Bihar) Abdul Quaiyum Ansari M L A (Bihar) Lala Jagan Nath (Punjab), Hanappa (Mysore) Atma Singh Namdhari M P (West Bengal), Arunangshu Dey (West Bengal *member secretary*)

The functions of the Commission are to determine the criteria on the basis of which any particular section can be described as socially or educationally backward, to prepare a list of such Backward Classes for the whole of India to examine the condition and difficulties of such classes and make specific recommendations (including financial) for their removal

There is at present a scheme for the award of scholarships to post matric students

During 1951 52 a sum of Rs 8 25 lakhs was sanctioned Out of this 1,410 scholarships were granted

A sum of Rs 3 lakhs was sanctioned for the Scheduled Tribes

UNTOUCHABILITY CAMPAIGN

The Central Government has sought the assistance of three non official organizations—Harijan Sewak Sangh Bharatiya Depressed Classes League Scheduled Castes Federation—to conduct an anti untouchability campaign throughout the country

The Central Government made available Rs 50 lakhs from the 1953 54 budget allocation to the three organizations and also to individual States for the eradication of untouchability through approved non official bodies All these funds are to be used solely for propaganda against untouchability

The organizations to whom grants are made are required to raise voluntary contributions at least to the extent of 20 per cent of the amount allotted to them

On December 30 1953 the Government of India published a Bill entitled The Untouchability (*offences*) Act 1953 The Bill was to be introduced in the budget session of Parliament in 1954

It makes the practice of untouchability and enforcement of any disability arising therefrom a cognizable offence punishable with imprisonment upto six months, or fine upto Rs 500, *or both*

It is meant to apply to the whole of India except Jammu and Kashmir and to all communities and not Hindus alone

In addition to the normal penalties prescribed in the Bill the court may also cancel or suspend any licence in respect of any profession, trade, calling or employment when an offence is committed under this law during the course of such profession, trade, calling or employment

Whoever takes any part in the excommunication of or imposition of any disability on any person who refused to practise untouchability or does any act in furtherance of the objects of this new law will also be guilty of an offence

Under the new law every place of public worship will be open to every untouchable for worship and for the performance of any religious service or for offering prayers therein in the same manner and to the same extent as it is open to any other person belonging to the same religious denomination or to the same section thereof as the untouchable

Every such untouchable will be entitled to bathe in or use the waters of any sacred tank spring or water course in the same manner and to the same extent as other persons belonging to the same religious denomination or any section thereof as the untouchables are entitled to

With regard to removal of social disabilities on untouchables, the Bill provides that no untouchable should on ground only that he is an untouchable be subject to any disability liability restriction or condition with regard to access to any shop public restaurant hotel or any place of public entertainment or use of river, well, etc, road, passage, etc or the use of or access to any public conveyance licensed to ply or hire by any authority constituted under any law

Untouchables will not be refused admission to hospitals dispensaries, educational institutions or hostels attached to them established or maintained for the benefit of the public, on the ground that they are untouchables

No person should refuse to sell any goods or refuse to render any service in the ordinary course of business to any untouchable on the ground only that he is an untouchable

PENALTIES

The clause relating to penalties says that whoever prevents an untouchable from exercising any right conferred by this Act or molests, obstructs or attempts to cause obstruction to an untouchable in the exercise of any such right will be punishable with imprisonment which may extend to six months or with fine which may extend to Rs 500 or with both

Provision is also made for the award of a similar punishment to those persons who deny to others the rights to which they are entitled or are a party to the excommunication of or imposition of any other disability on others on the ground that they have refused to practise untouchability or have done any act in furtherance of the objects of this Act

Whoever abets an offence under this section will be liable to the punishment provided for the offence

If the person committing an offence under this Act is a company every person who at the time the offence was committed was in charge of and was responsible to the company for the conduct of the business of the company as well as the company will be deemed to be guilty of the offence and will be liable to be proceeded against and punished accordingly

This will not however render a person to punishment if he proves that the offence was committed without his knowledge or that he exercised all due diligence to prevent the commission of such offence

Where an offence under this Act has been committed by a company and is attributable to any neglect on the part of any director or manager secretary or other officer then the officer will also be deemed to be guilty of that offence and will be liable to be proceeded against and punished accordingly

If a person who is convicted for an offence under this Act holds a licence in respect of any profession trade or employment in relation to which the offence is committed the court trying the offence may without prejudice to any other penalty to which such person may be liable direct that the licence should stand cancelled or be suspended for such period as the court may deem fit

Where the manager or trustee of a place of public worship which is in receipt of a grant of land or money from the Government is convicted of an offence under this Act the Government may if in its opinion the circumstances of the case warrant such a course direct the suspension or resumption of the whole or any part of such grant

The provisions of this Act will have effect notwithstanding anything inconsistent therewith contained in any other law for the time being in force, or any custom or usage

A member of a Scheduled Castes who has been converted from the Hindu religion to any other religion notwithstanding such conversion will be deemed to be an untouchable' for the purposes of this Act

An untouchable means a member of a scheduled Caste as defined in clause 24 of Article 366 of the Constitution and includes any other person who by custom or usage is regarded as an untouchable ' by any community or section thereof

LEGISLATION IN FORCE

Below is a list of legislative measures in force in Indian States for removing social disabilities among Hindus

Bihar The Bihar Harijan (Removal of Civil Disabilities) Act, 1949, and the Amendment Act, 1951

Bombay The Bombay Harijan (Removal of Civil Disabilities) Act, 1947, The Bombay Harijan Temple Entry Act, 1947

Madhya Pradesh The C P and Berar Scheduled Castes (Removal of Civil Disabilities) Act, 1947, The C P and Berar Temple Entry Authorization Act, 1947

Madras The Removal of Civil Disabilities Act 1938 The Madras Temple Entry Authorization Act, and the Amending Act, 1949

Orissa The Orissa (Removal of Civil Disabilities) Act, 1946—not cognizable The Orissa Temple Entry Authorization Act, 1948

Punjab The East Punjab (Removal of Religious and Social Disabilities) Act, 1947

Uttar Pradesh The U P (Removal of Social Disabilities) Act 1947– not cognizable

West Bengal The West Bengal Hindu (Social Disabilities Removal Act) 1948

Hyderabad The Hyderabad Harijan Temple Entry Regulation No IV of 1358F (1948 49) The Harijan (Removal of Social Disabilities) Regulation No LVI of 1358F (1948 49)

Madhya Bharat Harijan Disabilities (Removal) Act 1949 and the Amendment Act, 1950

Mysore The Removal of Disabilities Act 1948 the Amendment Act of 1948 and 1949 The Mysore Temple Entry Authorization Act, 1948, and Amendment Act 1949

Saurashtra The Removal of Social Disabilities Ordinance 1948

Travancore Cochin The Travancore Cochin Temple Entry (Removal of Disabilities) Act 1950 The United State of Travancore and Cochin (Removal of Social Disabilities) Act, 1950

Ajmer The U P (Removal of Social Disabilities) Act 1947, extended to the State –not cognizable

Bhopal The U P (Removal of Social Disabilities) Act 1947 extended to the State in June 1951—not cognizable

Bilaspur The U P (Removal of Social Disabilities) Act, 1947 extended to the State in June 1951—not cognizable

Coorg The Coorg Scheduled Castes (Removal of Civil and Social Disabilities) Act 1949 The Coorg Temple Entry Authorization Act, 1949—not cognizable

Delhi The Bombay Harijan (Removal of Social Disabilities) Act 1947 extended to the State

Himachal Pradesh The U P (Removal of Social Disabilities) Act 1947 extended to the State in May 1951 not cognizable

Kutch The Bombay Harijan (Removal of Social Disabilities) Act, 1947, extended to the State in May 1951

Tripura The West Bengal Hindu (Social Disabilities Removal) Act, 1948, extended to the State in May 1951

Vindhya Pradesh The U P (Removal of Social Disabilities) Act, 1947 extended to the State—not cognizable

Such of the above Acts as are not shown as 'not cognizable' are cognizable

REPORT FOR 1952-53

Such legislation to penalize the practice of untouchability, both for the sake of uniformity and to cover those States where there is no such law was, in fact, recommended by the Commissioner for Scheduled Castes and Tribes, Mr I M Srikant, in his report for 1952 to Parliament

Untouchability, though forbidden under Article 17 of the Constitution, still persists especially in the rural areas of the country, says the report

The only States which could be said to be free from the "curse" of untouchability are Assam, Manipur and Tripura

In West Bengal, too, though the Scheduled Castes are considered officially low, they are not regarded as untouchables

Legislative measures taken by the States for the removal of untouchability have not proved very effective

Where untouchability has not been made a cognizable offence, the reason for the ineffectual nature of legislation is obvious But even where it is made cognizable legislation has not been of any material help to those for whose benefit it was enacted

Being economically dependent upon non Scheduled Castes, the Scheduled Castes have not the courage to break social barriers

The total eradication of untouchability will take a little time

The problem of Scheduled Tribes is different from and not as complicated as that of the Scheduled Castes since there is no deep rooted prejudice against them in society

After referring to special representation given to Anglo Indians in Legislatures the report observes that reservations have been made for them in the railways customs, postal and telegraph services

There is however a shortage of Anglo Indians for reserved posts because of the non availability of candidates of the requisite qualifications and the new lower scales prescribed Steps have been taken to recruit more Anglo Indians

No complaint, however, was received in this regard

Special grants for the education of the Anglo Indian community were also continued by the Central and State Governments

The report suggests the provision of necessary facilities to the Scheduled Castes and Scheduled Tribes for housing, supply of drinking water security of land tenure debt redemption development of cottage industries, improvement of sanitation provision of free legal aid and representation in local bodies panchayats, etc

While dealing with the living conditions of the lowliest of the low the report says that in cities and towns civic consciousness is so dormant that Corporations municipalities and district boards etc are very reluctant in providing even the primary amenities of life like decent housing, lighting, water supply, etc to their menial Bhangi and Mahar Harijan employees

Large items of expenditure are swallowed up in the construction of luxurious roads and lighting arrangements while the Harijan employee has been relegated to the background under the pretext of financial stringency

Some of these local bodies do not treat them fairly in the matter of decent conditions of service *e g*, maternity leave and permanency of service

ORIGIN

It was during the Round Table Conference held in London, before the 1935 Government of India Act was finally drafted, that Dr Ambedkar suggested the term 'Scheduled Caste' for all those depressed class people who were not only backward socially economically and politically but who also suffered from the social disabilities derived from untouchability

The Government of India (Provincial Legislative Assembly) Orders 1936 give a list of officially recognized Scheduled Castes

The aboriginal tribes which were termed Animists in the census of 1911, Forest and Hill Tribes in the census of 1921, Primitive Tribes in the census of 1931 and Backward Tribes in the 13th Schedule of Government of India (Provincial Legislative Assembly) Order, 1936 and finally Tribals in the census of 1941 are now called Scheduled Tribes according to the new Constitution

It is comparatively easy to define a Scheduled Caste as its distinguishing feature is untouchability but it is more difficult to lay down a uniform criterion for a Scheduled Tribe

The main object of listing these Castes and Tribes separately in the Government of India Act of 1935 and the present Constitution was to give them special political representation and educational and other facilities

Every State has a list of Scheduled Castes and Scheduled Tribes for the granting of educational and other facilities But for political representation the list contained in the Schedule 13 of the Government of India Act (Provincial Legislative Assembly) Orders, 1936 was followed by all the States so far as Provincial Assemblies and Councils were concerned

The Indian States, prior to the advent of Independence, however, had lists which were haphazardly compiled

So, when the new Constitution was on the anvil, it was decided that a thorough going list for Scheduled Castes and Scheduled Tribes should be prepared

SAFEGUARDS

The Constitution of India has laid down certain safeguards for Scheduled Castes, Scheduled Tribes and Backward Classes or the weaker sections of the people

In a chapter on Fundamental Rights, under Articles 15 16 and 17, it has been stated that the State shall not discriminate between any citizens on ground of religion, race caste sex or place of birth This does not prevent the State, however, from framing rules for the reservation of seats in the legislature or of appointments in the public services in favour of any class which is not adequately represented

Similarly under Article 19, the right to freedom is circumscribed by authorising the State to place reasonable restrictions for the protection of the interests of Scheduled Tribes

Under the directive principles of policy, under part 4 Article 46 of the Constitution it is said that the State should promote the educational economic and political interests of the weaker section of the people and in particular the Scheduled Castes and Scheduled Tribes and protect them from social injustice and all forms of exploitation

Under Article 17 untouchability is abolished and its practice in any form forbidden

Article 25 empowers the State to throw open Hindu religious institutions of a public character

Article 29 provides that no citizen can be denied admission into any educational institution maintained by the State or aided by it on grounds of religion, race, caste or language

It has been laid down under Article 164, that in the States of Bihar, Madhya Pradesh and Orissa, there should be a Minister in charge of Tribal Welfare who may, in addition, be in charge of the welfare of Scheduled Castes and Scheduled Tribes or any other work of allied nature while in the Part B State of Madhya Bharat there will similarly be a Minister in charge of Tribal Welfare who may in addition, be in charge of the welfare of Scheduled Castes and Scheduled Tribes or any other work of allied interest

The VIth and VIIth Schedules of the Constitution under Article 244 also provide for the administration and control of Schedule areas and Scheduled Tribes and of Tribal areas in Assam by providing Tribe Advisory Councils for Tribal areas

For the promotion of the welfare of Scheduled Tribes and Schedule areas, provision has been made under Article 275 for grants in aid to be paid out of the Consolidated Fund of India for such schemes of development as may be undertaken by the States with the approval of the

Government of India for raising the administration of the Schedule areas of the State to the same level as that of the other areas of the State

Special provision for grants in aid has been made in the case of Assam

Tribes Advisory Councils have been set up in Bihar, Madhya Pradesh, Madras and Orissa

In the Tribal areas in Assam, District or Regional Councils have to be set up for each autonomous region Three fourths of the members have to be elected on a basis of adult franchise

REPRESENTATION IN LEGISLATURES

Seats are reserved in the House of the People under Article 330 and 332 for Scheduled Castes and for Scheduled Tribes including the Tribal areas and autonomous districts of Assam

The number of seats reserved in any State bears the same proportion to the total number of seats allotted to that State in the House of the People as the population of Scheduled Castes and Scheduled Tribes in the State or the part of the State bears to the total population of the State

Similarly in the Legislative Assembly of every State seats are reserved

The reservation of seats in the House of the People and Legislative Assemblies will cease to have effect on the expiration of a period of ten years from the commencement of the Constitution

The representation of the Anglo Indian community in the House of the People and in the Legislative Assemblies of the States by nomination will also cease after ten years

Under these provisions 72 seats in the House of the People and 477 in the States Legislatures have been reserved for the Scheduled Castes and 26 seats in the House of the People and 192 in the State Legislatures for the Tribes

The claims of members of Scheduled Castes and Scheduled Tribes should be taken into consideration according to Article 335 in the making of appointments to services and posts in connection with the affairs of the Union or of a State consistently with the maintenance of the efficiency of the administration

In order to investigate all matters regarding these safeguards for Scheduled Castes, Scheduled Tribes Backward Classes and Anglo Indians, provision has been made in the Constitution under Article 338 for the appointment of a special officer for Scheduled Castes and Scheduled Tribes who is required to report to the President upon the working of these safeguards at such intervals as the President may direct and the President will cause all such reports to be laid before each House of Parliament

Articles 339 and 340 provide for the appointment of a Commission by the President any time within the expiration of ten years from the commencement of the Constitution to report on the administration of Schedule areas and the welfare of Scheduled Tribes in the States of Parts A and B

The same Articles also provide for the appointment of a Commission to investigate the conditions of socially and educationally backward classes and the difficulties under which they labour and to make recommendations as to the steps to be taken to remove such difficulties and to improve their conditions, and the grants that should be made for this purpose by the Union or any State

Now for the purposes of preparing a list of Scheduled Castes and Scheduled Tribes it has been laid down under Articles 339, 341 and 342 that the President, in consultation with the Governor or Rajpramukh of the State, by public notification should specify the castes, races or tribes to be deemed as Scheduled Castes and specify the Scheduled Tribes to be deemed as Scheduled Tribes

Parliament alone may, by law, include or exclude from this list Scheduled Tribes and Scheduled Castes The notification of such lists by the President cannot be varied by any subsequent notifications

This was done through the following orders The Constitution (Scheduled Castes) Order, 1950, the Constitution (Scheduled Castes) (Part C States) Order, 1951, the Constitution (Scheduled Tribes) Order, 1950, the Constitution (Scheduled Tribes) (Part C States) Order, 1951

A note may also be added on the results of the general elections

Of the 98 seats allotted to the Scheduled Castes and Tribes in the House of the People the Congress won 74 seats, the Scheduled Castes Federation 2 the Communists 2, the Akali Party 2 and the Socialist Party (now P S P) 3 Fifteen others were elected either through local parties or as independents

In the States Assemblies of the 669 total seats for the Scheduled Castes and Tribes the Congress won 461 seats, the Socialists 19 K M P P 15, Communists 19, Scheduled Castes Federation 14, Akalis 8 The rest of the 133 seats were won by local parties and independents

(For an analysis for each State see under General Elections)

SCHEDULED CASTES

The main problem of Scheduled Castes is the social disabilities based on untouchability which is deep rooted in the structure of Hindu society

Legislative measures making untouchability a cognizable offence and enjoining entry into common Hindu temples have been enacted in Part A States as the Removal of Social Disabilities Act and the Temple Entry Act (pp 294 295)

They have been applied to some of the Part B States as well where the Scheduled Castes are badly treated For instance there are some Part B and Part C States where they are not allowed to put on shoes ride on horseback or put on the more expensive type of clothes or silver and gold ornaments, while in many places the Scheduled Castes are not allowed to draw water from the well Inter caste dining or inter caste marriages are out of question

Propaganda by non official agencies like the Harijan Sewak Sangh and the Congress has softened down the custom and the habit of untouchability to a considerable extent Legislative measures helped in keeping up the tempo of the propaganda Ultimately, it will be propaganda and the public opinion created by it that will put an end to untouchability of every kind

As a result of scholarships and other privileges granted to them the Scheduled Castes are coming into their own and are supplying leadership for the community There are, for instance, Ministers in Cabinets and Members of Parliament from Scheduled Castes

Similarly, in the Government services they are beginning to make headway and some have reached the upper ranks of services

The worst sufferers are those members of Scheduled Castes who are at the bottom of the social order and are considered as untouchables even among untouchables, castes like Bhangis, Mchtars, Valmikis and Mangs, and so on That is to say those who are mainly engaged as scavengers or sweepers or in the so called unclean work of removing dead animals, etc

It is very difficult to persuade these people to take to education or lead a decent life and also to provide them with decent houses The period of ten years stipulated in the Constitution may not be long enough to educate them socially and raise them to the level of the other sections of society

SCHEDULED TRIBES

The Scheduled Tribes live in remote forest regions, chiefly in Bombay, Madhya Pradesh, Bihar, Orissa, West Bengal and Assam.

Different Scheduled Tribes belong to different strata of culture and have different habits, customs and modes of life The main characteristics which are common to all Scheduled Tribes are, isolation from other communities, primitive life, belief in sorcery and black magic, nomadic habits, and love of drink and dance It is mostly on hill tops, or valleys or forest areas that the Scheduled Tribes have their habitation

They have been neglected both by Government and society in general who have, nevertheless, exploited them and, ultimately driven them into the forest regions of the country The problem is, therefore, quite different from that of the Scheduled Castes

The foreign Christian Missionaries have tried to improve their lot by starting missions among them as a result of which some leaders like Mr Jaipal Singh, M P have come forward and qualified themselves for membership of Parliament

There are very few educated or socially conscious people among the Scheduled Tribes who can take their due share in the work of State Assemblies much less in Government services

It was very recently that non official organisations have sprung up in the country for doing ameliorative work among them at the instance of the late Shri Thakkar Bapa who had organised Associations in some States with the help of grants from different State Governments

It is only the beginning and there is enormous uphill work to be done before they can catch up with the rest of society Without adequate support in men and money it is doubtful if this work can be accomplished within a period of ten years stipulated in the Constitution

In this connection the Bharatiya Adamjati Sevak Sangh to which all other institutions doing tribal welfare work are affiliated is doing much useful work

Backward classes can be listed after the findings of the Backward Classes Commission are available It will not be easy to list these people as the general condition of the majority of the people in India is also backward, educationally and economically It will, therefore, be very difficult for the State to provide adequate funds for the improvement of these classes

From the point of view of the existing production the Tribal area in Assam can be divided into three distinct categories These are (1) an area of about 2,000 square miles with a population of 60,000 which is self sufficient or has even surplus production (2) an area of 3 700 square miles with a population of 100,000 which has average production, and (3) the balance of about 34,000 square miles with a population of 538,000 which is a deficit area

At present paddy forms the major crop of the area and it is also the staple food of the people so long as it is available Millet and maize are next in importance and are grown extensively in the region Wheat and barley are grown only in some localised areas where climatic conditions are favourable Next to cereals, the tribal people are accustomed to root crops such as kachu, sweet potato and yams which are cultivated They are also found in wild condition

FIVE-YEAR PLAN

The total allotment is Rs 28 9 crores

In addition there are Rs 9 crores by way of grants by the Central Government under Article 271 (1), and Rs 3 crores for the tribal people in the North East Frontier Agency

The foremost needs of the Harijans are housing and education During the period of the plan the States and the Centre will spend Rs 10 crores and 4 crores respectively for the amelioration of the condition of the Harijans

The tribal areas are to be developed Here the emphasis will be on roads and water supply The people will be assisted to take to settled

methods of agriculture in preference to shifting cultivation Among diseases that are to be combated are malaria, skin diseases, leprosy, trachoma and elephantiasis

The nomadic tribes hitherto treated as criminals are to be weaned away from anti social behaviour and re absorbed into normal life

A five year development plan for the tribal areas of Assam (8 lakhs of people living in an area of 40,000 sq miles) estimated to cost Rs 3 crores, was also drawn up by the Planning Commission

A major portion of this expenditure, nearly Rs 1 35 crores, would be spent on development of roads

It is proposed to spend Rs 65 lakhs on medical facilities and public health, Rs 48 lakhs on education, Rs 32 lakhs on agriculture and Rs 20 lakhs on forests

Rs 83 5 lakhs will be required to implement the first stage of two years

In the road development programme, it is planned to build nearly 1,400 miles of road in the Mishimi Hills, Abor Hills, Subansiri area, Sela Sub-Agency, Tirap Hills and Naga Hills

This programme will be co ordinated with another for strategic roads

Development of medical and public health services includes opening of 10 hospitals and 30 dispensaries, education and training of students, appointment of malaria and vaccination staff and supply of drugs and medical instruments It also includes the establishment of a leper colony

Expenditure on education includes opening of primary and secondary schools, both of the middle and high standard, and also vocational training schools Emphasis is laid on the establishment of technical schools which are proposed to be opened in each of the six sub divisions in the area

On agricultural development, the major programme covers the introduction of permanent cultivation in the form of both terrace and wet rice cultivation Introduction of new and commercial cash crops, supply of improved varieties of seeds, training of agriculturists in improved manurial and cultural practices, supply of tools and implements form other important aspects of the programme

The existing sericultural activity in the area has to be promoted, and the plan makes a provision for setting up a fully equipped central farm at Pasighat In view of the future possibilities of sericulture among the tribal people, it is also considered necessary to provide for demonstration and seed supply centres in the area

The Planning Commission has allotted one Development Block to this area to be developed on the lines of the general pattern of Community Projects which will be implemented in various parts of the country

CENTRAL GOVERNMENT GRANTS

The following statement shows the ceilings for grants in aid fixed by the Government of India for the State Governments for welfare schemes for the Scheduled Castes the Scheduled Tribes and Backward Classes for the year 1953 54

(Rupees in lakhs)

Name of State	Scheduled Tribes	Ex Criminal Tribes	Scheduled Castes	Other Backward Classes
Part A States				
Assam	110 00	—	0 50	—
Bihar	21 00	0 50	3 00	2 00
Bombay	12 00	4 00	3 00	—
Madhya Pradesh	19 00	—	2 00	4 00

REFUGEES AND REHABILITATION

BELOW we give a few facts and figures Displaced persons from West Pakistan 49 00 lakhs, from East Pakistan 31 00 lakhs, total 80 00 lakhs

The distribution of displaced persons among the various States is as follows

Assam 277 000, Bihar 79,000 Bombay 341 000 Madhya Pradesh 121 000 Madras 10 000 Orissa 21 000 Punjab 2,468,000 Uttar Pradesh 476 000, West Bengal 2 118 000, Hyderabad 4 000 Madhya Bharat 68 000 Mysore 8 000 PEPSU 380 000 Rajasthan 313 000, Saurashtra 61,000 Ajmer 72 000 Bhopal 18 000 Delhi 510,000 Himachal Pradesh 5 000 Kutch 12 000, Manipur 1,200, Tripura 100 000, Vindhya Pradesh 15 000, Andaman and Nicobar Islands 2 000

REHABILITATION STATISTICS

Below we give some important rehabilitation statistics of D P families (figures in lakhs)

Rural Resettlement

1 Number with quasi permanent allotment	4 18
2 Number settled as tenants	0 33
3 Number with temporary allotment	0 54
Total number of families from West Pakistan settled on land	5 05
Total number of families from East Pakistan settled on land	3 37
Grand total of families settled on land	8 42
Rural loans advanced to displaced families from West Pakistan	Rs 8 28 crores
Rural loans advanced to displaced families from East Pakistan	,, 11 67 ,,
Total rural loans	19 95 ,,

The total amount of land allotted to displaced families from Pakistan (exclusive of land allotted in Punjab and PEPSU) was 746 952 acres (upto September 1952)

Urban Resettlement

Number of residential units provided for displaced persons from West Pakistan through schemes completed or under implementation	
Evacuee houses	1 79 lakhs
New houses built by Government	1 41 ,,
New houses built by private parties with Government assistance	0 42 ,,
Total	3 62 ,,
Expected houses for displaced persons from West Pakistan	
Through evacuee houses	14 70 ,,
Through new construction completed or under construction	9 10 ,,
Total	23 80 ,,

Employment

Number of displaced persons who secured employment through Employment Exchanges	1 97 ,,
From West Pakistan	1 64 ,,
From East Pakistan	0 33 ,,
Number registered	8 79 ,,
Number of displaced persons placed in Central and State Government services through Employment Exchanges	0 80 ,,

Training

Number of displaced persons trained	0 66 lakhs
Number of displaced persons under training or engaged in business	0 16 ,,

Education

Loans

To West Pakistan displaced students for study in India	Rs 53 40 lakhs
To displaced students studying abroad	,, 7 63 ,,

Business and Industrial Premises

Total number of units provided to displaced persons from West Pakistan	0 57 lakhs
Evacuee shops	0 27 ,,
Evacuee industrial premises	0 02
New shops	0 28

Loans

Small Loans

To displaced persons from West Pakistan	
Number of persons to whom sanctioned	1 70 lakhs
Amount sanctioned	Rs 11 33 crores
Amount paid	,, 10 79 ,,
Number of persons to whom paid	1 65 lakhs
To displaced persons from East Pakistan	
Amount sanctioned	Rs 4 24 crores
Loans by the Rehabilitation Finance Administration	
Number of displaced persons to whom loans sanctioned	0 10 lakhs
Amount sanctioned	Rs 8 67 crores
Amount paid	,, 4 89 ,,

Property Claims in West Pakistan

Total number of property sheets registered	10 30 lakhs
Number of property sheets verified	9 73 ,,

Under the small loans schemes loans up to Rs 5 000 are given to individual applicants

Up to September 1952, Rs 11 33 crores were sanctioned to 1 70 lakh displaced persons from West Pakistan Of this Rs 10 79 crores were actually paid to 1 65 lakh displaced persons

A sum of Rs 4 24 crores was sanctioned for the displaced persons in the east

Education

The Government of India were expected to spend Rs 17 lakhs during 1953 54 on grants to disrupted educational institutions from West Pakistan

On direct assistance to students, Rs 73 lakhs were to be spent in the shape of grants stipends and freeships

Rs 7 lakhs were to be spent on schools and colleges in the townships of Delhi, Faridabad and Rajpura

Upto the end of March 1953 the Central Government had spent Rs 5 crores on the education of displaced children

It is estimated that 400,000 students have benefited from the scheme

A sum of Rs 1 70 crores has been provided for the financial years 1953 54 to 1955 56

There were 31 regular centres where persons were given technical or vocational training Some of these were under the Central Government Others under the State Government

About 44,600 persons had been trained upto the end of September 1952, 39,600 from West Pakistan and 5,000 from East

About 11 900 persons were under training, 9 900 from West Pakistan and 2 000 from East

In the centres run by the Ministry of Rehabilitation 8,400 persons had been trained, and 1,700 were receiving training

Ten townships planned and executed as part of rehabilitation of displaced persons are as follows (number in brackets denotes target population) Faridabad (Punjab) (40,000) Gandhidham (Kutch) (75,000) Rajpura (PEPSU) (15 000) Nilokheri (Punjab) (10,000) Tripuri (PEPSU) (6 000) Sardarnagar (30 000), Ulhasnagar (Bombay) (130 000) Govindpuri also called Modinagar (U P) (30 000) Hastinapur (U P) (10 000) Chandigarh (Punjab) (60,000)

Townships planned Kubernagar (Bombay) (30 000) Partapnagar (Rajasthan) (20 000) Habra Baigachi (West Bengal) (40 000) Fulia (West Bengal) (5 000)

Relief

Total number of persons receiving dole from the Government	1 41 lakhs
Temporary liability	0 59
Permanent and semi permanent liabilities	0 76 ,,
Kashmiris in Yole camps	0 06 ,,
Maintenance allowance	
Monthly allowance paid	Rs 4 00 lakhs
Number of recipients	0 16 lakhs

There are about 76 000 unattached women and children including old and infirm persons They are being cared for in homes camps and infirmaries

The Ministry of Rehabilitation grant maintenance allowances to widows unattached women minors or such other persons as are unable to earn a living

This allowance is granted according to a prescribed scale up to a maximum of Rs 100 per month

The number of unattached women and children and aged and infirm persons and their dependents from West Pakistan resettled in destitute homes and infirmaries was 24 740 on September 30, 1952

The number from East Pakistan admitted into various destitute homes was 10 206

The grand total so admitted was 34 946

The number of persons from West Pakistan not so admitted but receiving gratuities from Government was 12,980

Camps for displaced persons from West Pakistan have now been closed down

In West Bengal, dispersal from relief camps still continues Owing to the rise in the influx of Hindus from East Pakistan the population in these camps increased to nearly 59,000 by the end of September 1952

COMPENSATION

In November 1953 the Government of India published its scheme for compensation to five priority categories as follows

(*a*) Widows old and infirm persons in receipt of maintenance allowance, (*b*) inmates of women's homes and infirmaries, (*c*) widows who have verified claims in their own names, (*d*) persons living in certain Government built townships and colonies (*e*) residents of mud hut colonies in the Punjab

The townships and colonies referred to in category (*d*) are

Ulhas Nagar (Kalyan), Sardarnagar (Ahmedabad), Pimpri (Poona), Vallivada (Kolhapur), Warashia (Baroda), Malaviya Nagar, Kalkaji and Tilak Nagar (Delhi), Katni (Tilda) Chakarbhata (Bilaspur), Mana (Raipur), Jaripatka (Nagpur), Rajpura, Tripuri (PEPSU) Modinagar Hastinapur (Meerut) Naini (Allahabad), Ramnagar (Roorkee), Premnagar (Dehra Dun), Alambagh (Lucknow), Govindnagar (Kanpur), Nilokheri (Faridabad), Bairagarh (Bhopal) and Gandhidham (Kutch)

Special treatment is given to the inmates of homes and infirmaries to ensure their proper rehabilitation after they have left the homes

The payment of the interim compensation will also begin with these displaced persons for the same reason

In the case of these persons the rehabilitation grants will be higher

For instance an ordinary priority claimant with a claim of Rs 2 000 will under the above table receive a total payment of Rs 1 200 But in the case of an inmate of a home or infirmary with a similar claim the total payment will be Rs 1 800 This will be made up of Rs 400 as interim compensation and Rs 1 400 as rehabilitation grant

In the case of claims higher than Rs 5,000 the inmates of homes and infirmaries will receive rehabilitation grants which will be approximately 50 per cent more

Amounts so far paid to displaced persons as maintenance allowance will not be deducted from the interim compensation now due to them

The following is the scale of the assessed values of urban claims, compensation, rehabilitation grants and the total compensation (in rupees) respectively to be paid under the scheme –

1,000	200	400	600
2 000	400	800	1 200
3,000	600	1,009	1,609
4 000	800	1,180	1 980
5 000	1,000	1,327	2,327
6 000	1,200	1,454	2,654
7,000	1,400	1,567	2,967
8 000	1,600	1,666	3 266
9 000	1,800	1,758	3,558
10 000	2,000	1 840	3,840
12 000	2 400	1 980	4 380
14,000	2 800	2 097	4 897
16 000	3,200	2 193	5 393
18,000	3,600	2,200	5 800
20 000	4,000	2 144	6 144
22,000	4 400	2,024	6 424
24 000	4 800	1 832	6 632
26,000	5 200	1 576	6 776
28 000	5,600	1 301	6 901
30 000	6 000	1 024	7 024
35 000	7 000	304	7 304
40 000	7 558	*Nil*	7 558
45 000	7,787	*Nil*	7,787
50,000 (and over)	8,000	*Nil*	8,000

There were 10,30,000 property sheets to be verified Out of these 9 73,113 or 94 5 per cent were verified upto September 1952

According to the decision taken at the Indo-Pakistan Conference held at New Delhi in April, 1949 Central Claims Organizations were set up in the two countries for the rapid disposal of claims for pensions, provident funds, and leave salaries of government servants and of the States and local bodies, who had migrated from Pakistan to India

The Indian Central Claims Organization arranges provisional payments to certain categories of displaced persons under the Indo Pakistan Scheme of Provisional Payment of Pensions and Provident Fund and the Government of India s own interim relief scheme

The Union Ministry of Rehabilitation has appointed three Regional Settlement Commissioners to work in connection with the payment of compensation to displaced persons, and the allotment of evacuee lands to non Punjabis and person of non Punjabi extraction having claims for agricultural lands

TOTAL EXPENDITURE

The following table shows the total expenditure on displaced persons from 1947 52 (Rs in lakhs)

Nature of Expenditure	On W Pakistan refugees	On E Pakistan refugees	Total
Grants			
1 Relief	4 233 32	1 264 67	5 497 99
2 Rehabilitation	732 97	405 48	1 138 45
Total	4 966 29	1 670 15	6 636 44
Loans			
1 Urban	1,039 67	454 87	1 494 54
2 Rural	856 20	459 90	1 316 10
3 R E A	318 13	98 77	416 90
Total	2,214 00	1,013 54	3,227 54
Housing			
1 Loans	2 572 58	877 40	3 449 98
2 Capital outlay on civil works	1 088 33	—	1 088 33
3 Purchase of shares	52 50	—	52 50
Total	3,713 41	877 40	4,590 81
Establishment			
Ministry of Rehabilitation	69 69	3 13	72 82
Removal of persons contravening provisions of Influx from Pakistan Control Act	0 22	—	0 22
Grand Total	10,963 61	3 564 22	14 527 83

The following figures give the total expenditure at a glance (figures in Rs crores)

Establishment	0 73
Grants	66 36
Loans	32 28
Housing	45 91
Total	145 28

Expenditure during 1952 53 was Rs 34 33 crores Provision in 1953 54 budget was Rs 32 crores

REHABILITATION FINANCE CORPORATION

The net amount of loans sanctioned by the Administration upto the end of August 1953 was Rs 11 crores

The number of parties to whom loans were sanctioned was over 13,500

Till the end of June over Rs 6 23 crores had been disbursed to more than 8,000 applicants

Of the total amount of Rs 95 lakhs due on instalments repayable by displaced persons till June 30, 1953 only a little over 48 per cent had been recovered

In October 1953 the Government of India issued an Ordinance by which the total funds at the disposal of the Administration was increased from Rs 10 crores to Rs 14 5 crores

Of this total Rs 12 5 crores were to be available for grant of loans directly to displaced persons, and the balance for reimbursement of losses to scheduled banks in respect of loans guaranteed by the Administration

The Ordinance enables the Government to undertake full guarantee for the losses suffered by the scheduled banks against the 50 per cent provided in the previous Act

The Ordinance also extends the period of repayment of loans from 10 to 15 years

Loan Applications up to September 30 1952 are as follows —

State of origin of applicants	Applications received	Applications disposed of	Applications sanctioned	In rupees	
				Amount sanctioned	Amount paid
Bahawalpur State	958	492	194	16 39,700	6,85,502
Baluchistan	897	579	193	15 90,500	7,91,256
East Pakistan	18 818	8,843	2,967	2,30 94,350	1,21,86,376
N W F P	4 261	1,734	597	47,79,800	28,23,981
Sind and Khairpur State	19,553	9,833	3,132	2,36,99,150	1,10,67,023
West Punjab	19 489	9 915	3,312	3,18,93,700	2,13,78,157
Others	1,695	250			
Total	65,671	31,646	10 395	8,66,97,200	4,89,02,295

The number of persons rehabilitated till the end of 1952 was 197 000

Till the end of September refugees from West Pakistan had received Rs 222 11 lakhs, and those from East Pakistan Rs 129 22 lakhs

LOANS BY STATE GOVERNMENTS
