Intensify (intē·nsĭfəi), *v.* [f. L. *intens-us* Intense + -FY. corresp. to L. type **intensificare* after *sanctificare*, etc. see -FY.]

In a note to quot. 1817, Coleridge says 'I am aware that this word occurs neither in Johnson's Dictionary nor any classical writer. But the word, 'to intend', which Newton and others before him employ in this sense, is now so completely appropriated to another meaning, that I could not use it without ambiguity. while to paraphrase the sense, as by *render intense*, would often break up the sentence and destroy that harmony of the position of the words with the logical position of the thoughts, which is a beauty in all composition, and more especially desirable in a close philosophical investigation. I have therefore hazarded the word, *intensify*, though, I confess, it sounds uncouth to my own ear'

Intent (intɛ·nt), *a.* [ad. L. *intent-us* bent on (something), strained, attentive, earnest, eager, pa. pple. of *intendĕre* to INTEND, cf. OF. *entent* intended, attentive, as adjunct.

Intent and *intentive* are etymologically doublets, *intentus* and *intensus* being two forms of the L. pple., but already in L. *intensus* was (like the simple *tensus*) more restricted in its use than *intentus*, and in English *intent* is the more violent, while *intentive* was extended to the notion of mentally or nervously on the stretch, intent, eager attention. In the modern days this differentiation has been made more complete. So with *intention, intension*.

‖**Inter** (i·ntə), the L. preposition = 'between', 'among', occurs in a few Latin phrases occasionally in Eng., e.g. *inter alia*, amongst other things (for usually *inter alios* 'amongst others, other persons'), *inter nos*, between ourselves, *inter se*, between or among themselves (†Rarely with English object.)

Inter-, *prefix* The Latin preposition and adv., *inter* 'between, among, amid, in between, in the midst', entered into combination with verbs, adjs., and sbs., as in *inter-cēdere* to go between, intercede, *inter-spĕrse* to scatter on the way, intercept, *inter-vĕnire* to interpose in speech, interlude, *interpretāri* to throw between, interject, *interspīnŏsus* to put between, interpose, *intervenire* to come between, intervene, *intercalāri* intercalary, *interdŭs*, *dialis* lying between the fingers, *interfluus* flowing between, *intermedius* intermediate, *intermūrālis* between walls, *interannuus* a place between rivers, *interscānum* the space between the cylinders, *intervallum* the space between two columns, *internuntius* a messenger between, *interregnum* the time between two reigns, *intervallum* the space between two ramparts, interval. Some of these uses received great extension in late L. and the Romanic languages.

Of all these classes representatives are found in English, the earlier derived through French, the later often immediately from Latin. The Fr. form of the prefix is *entre*, and it was with *entre-* or *enter*, as in *entr'echange, entrecouse, entr'ire*, that these words were taken into ME., and new compounds formed in Eng. itself. In ENGL. Bible, between the 15th and 17th centuries, *entre, enter*, gradually yielded to the L. *inter-*, *intr-*, *intra-* and *interpr-ise*, with their derivatives, being now the only relics of the earlier form. On the pattern of the words from L., many new derivatives have been formed from L. (or Gr.) elements, esp. the adjs. formed on the type (rare in L.) of *inter-mūri-āl-is* see 4 below.

In some cases English received from Latin and French both the simple word and its *inter-* compound such are *change, inter-change, commune, inter-commune, view, inter-view, column, inter-column*. By extension from such compounds, *inter-* became a living prefix, freely used to form new compounds upon verbs, nouns, and adjs., not

merely of Latin and French, both of mixed English origin, as in *inter-taxon*, *inter-talk*, *inter-brain*, *inter-tidal* Finally, the same process which produced such adjs as *anti-slavery*, *anti-vaccination*, *anti-war* (see ANTI- 4), has produced the adjs *inter-college*, *inter-island*, *inter-town*, *inter-university*

The following are the uses of the prefix as an English formative element

1 In adverbial or adjectival relation to the second element

a Prefixed to verbs, participles, vbl sbs, and ppl adjs, to form verbs, etc

These are entered here in the unaffected form as verbs, but some of them are exemplified only in the form of participles or vbl sbs As a rule, wherever there is a verb compounded with *inter-*, the usual derivatives (vbl sb and ppl adj in *-ing*, agent in *-er*) are possible Some of the verbs may be regarded as formed from sbs, e g *intern-land*, *-earth*, *-layer*, *-mesh*, *-net*, *-word* The stress is on the radical element

a Denoting 'Between or among other things or persons', between the parts of, in the intervals of, or in the midst of, something; together *with*, between times or places, at intervals, here and there

vb interbreathe *interbreathing* vbl sb), *chase*, *check*, *circle*, *cloud*, *come*, *crust*, *curl*, *dash*, *disinguish* (*interdistinguishable* adj), *filter*, *fork*, *forge*, *gild* (in ppl adj *-gilt*), *insect*, *intervein*, *layer*, *rise* (in pres ppl *-lying*), *lighten*, *mention*, *pave*, *peal*, *receive*, *rule*, *set*, † *situate*, *smile*, *sole*, *space*, *tune*, *trace*, *whistle*, *word*

With an uni verb, *inter-* sometimes stands in prepositional relation to a following noun, the verb thus becoming trans with the noun as obj, as *interwreathed* (to wreath across between)

Such formations with INTER- are found in 15th c, and with *inter* from 16th c of INTERPOSE Words of this form are much used by S Daniel c 1603

b Denoting 'Between or among themselves or one another', with each other, mutually, reciprocally, alternately (in a *vbl sb*, mutual, reciprocal), 'together' as in *interaccuse*, *arch*, *assure*, *balance*, *bring*, *charge*, *chase*, *cheque*, *circulate*, *clash*, *clasp*, *crystallize*, *debate*, † *devour*, *grapple*, *inundate*, *jangle*, *jostle*, *leap*, *mason*, *mat*, *mix*, *nuzzle*, *meet*, *mesh*, *minister*, *nod*, *oscillate*, *perambulate*, *pledge*, *plight*, *pour*, *quarrel*, *rime*, *salute*, *shade*, *shift*, *strive*, *talk*, *thread*, *tie*, *vary*, *wed*, *weld*, *wish*, *worry*, *wrap*, also INTERMINGLE, -MARRY, WEAVE, etc With a trans verb, *inter* sometimes = 'each other reciprocally' as obj, the resulting verb thus becoming intr, as *interchase* to chase each other, *-choke*, *-clog*, *-confound*, † *-enjoy*, *-touch*, also INTERDISPERSE, etc

These appear in the 17th c, see *interconsult* in 15, *-enjoy* in 16, in 1691 De Quincey *Hygie Vet Leon*, 1844, 18 note says 'The late Mr Coleridge suggested, and by his own example sanctioned, the use of the preposition *inter* for expressing cases of reciprocal action, or, in his language, of interaction Thus the verb *interpenetrate*, when predicated of the substances A and B, implied that by an equal action and reaction, each penetrated the other But, even as a possible English word, it may be found occasionally in Shakspere, and much more frequently in Daniel, a writer of the same age The stress is on the radical element

4 Prefixed to *adjs* (originally, and most frequently, of Latin origin), in prepositional relation to the sb implied (as *inter-aconous*, 'that is *inter acinos*, between the acini' Cf Anti- 3, Infra 12) or sometimes to a phrase consisting of the adj + a sb (as *inter accessory* 'between accessory processes')

For the etymology of the second element, see the simple words Accessory, Across etc Ancient Latin had only a very few examples of this formation as *inter-annalis*, *interanimus*, *interdigitalis*, *interlimis*, *intermestris*, but their number in modern times chiefly since 1600 and especially since 1800, is very great, and they are formed freely when needed Logically they are composed of *inter* + 1 sb. stem + adj suffix, but as the adj suffix is the same that is used in forming an adj from the simple word (e g *nation*, *al inter national*, *college al*, *inter college adv*), they have the form of being composed of *inter* + adj, and in some later formations as *inter-acinous*, *+interangular*, *interaxis*, *intermotor*, this is actually their structure The main stress is on the radical part

Intercalary (ɪntə·kălărɪ), *a.* [ad. L. *intercālāri-us* or *intercalārs*, f. *intercalāre* to INTERCALATE.]

1. Of a day, days, or month. Inserted at intervals in the calendar in order to bring an inexact reckoning of the year into harmony with the solar year. In the Jewish, Greek and Roman calendars, intercalary days or months were necessary chiefly to adjust the lunar to the solar reckoning, of time. Since the reform of the calendar by Julius Cæsar no one intercalary day (now February 29) is required only once in 4 years, see BISSEXTILE and LEAP-YEAR.

1614 RALEIGH *Hist. World* II. iii. § 6. 255 An Addar was an intercalare Moneth, added, some yeares once the other twelue to make the Solarie and Lunarie yeare agree. 1662 HAWKINS tr. *Scaliger* viii. Wks. 1684 IV. 607 An intercalary day between two months. 1777 ROBERTSON *Hist. 10 Money paid for the use of money lent (the *principal*), or for forbearance of a debt, according to a fixed ratio (*rate per cent.*)

Interest is paid at fixed intervals, usually one or twice in the year. *Simple interest* is the interest paid on the principal as lent. *Compound* (*=compounded*) *interest* (*interest upon interest*) is the interest eventually paid on a principal periodically increased by the addition of each fresh amount of interest as it becomes due and remains unpaid. Interest in this sense is formally called *usury*, a use still applied when interest is charged at a rate beyond what is considered legitimate or just

In mod. *interesse* (Interest) differed from *usura* (Usury) in that the latter was avowedly a charge for the use of money which was forbidden by the Canon Law, where as originally *interesse* referred to the compensation which under the Roman Law, was due by the debtor who had made default The measure of it depended on the *id quod interest*, *the difference between the creditor's position* in consequence of the debtor's laches and the position which might reasonably have been anticipated as the direct consequence of the debtor's fulfilment of his obligation The compensation was always permissible when it could be shown that such loss had really arisen *abundum ex officio* As a later development *interesse* came to mean the pecuniary penalty to which was also recognised as giving a claim to *interest*. both cases appear to be included in the formula *damna et interesse*. The *interesse* was presumably a fixed sum specified in the contract, but a percentage reckoned periodically, so as to correspond to the creditor's loss was afterwards substituted. In mediæval England and in the first half of the 14th cent) Interest in the modern sense was first sanctioned by law (though apparently under cover of the Canonical fiction) by 37 Hen. VIII c 9 (repealed quot 1545), this statute was repealed in 1552, but re enacted in 1571 (see W. J. Ashley *Engl. Econ. Hist.* II ii 397, 466, and T. S. Tucker in *Dict. Pol. Econ.*, 1896, II 499)

‡ [Note The actual history of the words *interlope*, *interloper*, is somewhat obscure. Our earliest examples belong to the end of the 16th c. No form nor cognate of these words is found in any other language until after 1700, when the English sb. was adopted in Fr. as *interlope* (Savary *Dict. de Comm.* 1723), now *interlope*, applied to a ship, and to a limited extent in Du. and I. G (*enterlopen* in Halma, 1758–63, *enterloper* in *Bremisches Wchb.* 1767). In Du. *enterloper* is expressly stated in 1768 to be 'van de Engelse ontleend', borrowed from English, and is explained to mean the same thing as the proper Du. term *Interlooper*, used from the end of the 16th c. *Interlope*, *interloper* were thus of English formation. About 1600, *interlopers*, *intermeddlers*, *strugglers*, *struggling Englishmen*, are synonymous appellations of the same class of persons (see Interloper 2 a, 1603, Intermeddler c., 1601). Some of these synonyms suggest connexion with *land loper*, 'vagabond, vagrant, straggler', in common use before 1580 in place of the earlier *land leaper* (1560–1631), *lope* being the form of *leap* in eastern and some north midl. dialects (= north dial. *loup*, *loop*). It seems probable therefore that several of the earlier *interlopers* are identical with those of *inter* meddler and fund *loper* respectively, at least, this seems more likely than that the word should have been compounded of the L. and Engl. prefix *inter-* and the Du. or I. G. *lōpen*, *loopen* to run, *loper*, *looper* runner, a combination which could not well have arisen in England, and of which we have no historical indication in any foreign parts where English and Dutch traders came in contact. The earliest known references to the practices of interlopers are in connexion with the Russia Company, see Sir L. A. Jond's Introduction to *Acts at close of 16th c.* (Hakl Soc. 1868) p. xxi *seqq.* But the word soon bec. one a well known term in connexion with the trade of the East India Company, chartered in 1600.]

†**Interlude**, *sb.* [ad. med.L. *interludium* (Du Cange), f. *inter-* (Inter 2) + *ludus* play, possibly after an Ar. **intercludo*.]

1 A dramatic or mimic representation, usually of a light or humorous character, such as was commonly introduced between the acts of the long mystery plays or moralities, or exhibited as part of an elaborate entertainment, hence, in ordinary 17–18th c. use) a stage play, esp. of a popular nature; a comedy, a farce. Now (after Collier, see quot. 1831) applied as a specific name to the earliest form of English drama, as represented by the plays of J. Heywood.

Into (ɪ·ntʊ), *prep* Also 1 in to, 2-3 (*Orm*.) innto, 2-6 in to [Orig the two words, *in* adv., to prep., as in the similar collocations *out to, up to, down to, away to, off to, on to, in from, out from away from, out of*, etc, in which the adv expresses the general direction of motion, and the prep specifies or has reference to a particular point or place In the case of *in to*, the two words may refer to the same space, as in 'he went *in to* the house', or the *to* may refer to something which is *in* the space entered, as in 'he went *in to* the parlour', it is from the former of these that the combined *into* has arisen, in the latter the words are still written separate But in early MSS and editions this is often neglected, not only are the words often written separate when the sense is combined, but they are sometimes written in one, when the sense is the unconnected *in to* (= person etc.) In *in to*, the *n* is long, in *into* the *n* is shortened by its rapid passage into the allied mute, *t*]

General Sense.—The preposition expressing motion from without to a point within limits of space, time, condition, circumstance, etc., the motion which results in the position expressed by IN, or which is directed towards that position

In the Teutonic languages as in Latin this was originally expressed by the prep *in* followed by the accusative or case of direction, and so distinguished from the simple notion of position expressed by *in* with the locative or dative) but, when the case endings were becoming weak, end or lost in OE., so that the language was losing the power of making the dist notion expressed in Latin by *in aquam in aquam*, the prep *in* or *into* was substituted for the latter The other Teutonic langs having retained the inflexions, esp in the article and demonstratives, have not required a parallel formation of Ger *in den (ins) wasser*, in dat (ind) water In OE *inn* was usually, like the simple *in*, construed with the dative, but also not infrequently, with the accusative like the simple *in* (on) which it superseded or the L *in* which it rendered see sense 1

As the prep *in*, partly from it OF blending with *en* (see IN prep 2) partly from its substitution with L *in*, had various uses not readily expressed by modern prepositions, *on-to* was formerly used in certain cases properly expressed by *into upon, towards, a mind, etc.* (see ON 12)

The earlier use of the simple *in* has died out gradually, so that there long remained (and still remains in uses and constructions in which it has the sense of *into* (see *prep* 2) conversely in some dialects, as in Central and North eastern Scotch, *into* was extended to express position and thus took the sense of *in* (cf. *in, down into* sec III

Intuitionism (intiū·ĭʃnĭzm). [f. INTUITION + -ISM.]

1 The doctrine of Reid and other philosophers of the Scottish school, that in perception, external objects are known immediately, without the interven tion of a vicarious phenomenon

1842 *Blackw. Mag.* LXII. 243 Representationism could not possibly be avoided, neither could intuitionism be possibly fallen in with, on the analytic road which he took. 1874 W. L. Ward *Life* (1884) I. 204 He [Mill] accounted the controversy between intuitionism and phenomenism far more fundamental than any other, in matters no less of social than of strictly philosophical speculation. 1894 G. M. Sloane *Life James Mackintosh* 103 His philosophic creed, being the intuitionism of the Scottish School

2 = INTUITIONISM 1

1874 Sidgwick *Meth. Ethics* I. 9 What we may call *Intuitionism*. 1884 *Athenæum* 11 Oct. 463/2 Prof. Sidgwick showed his strong preference for intuitionism over the other two methods, egoism and intuitionism, which completed his trio of possible schemes of ethical study by logical process.

Intui tionist [f. as prec. + -IST.] One who holds the theory of intuitionism

1. An adherent of the doctrine of Reid concerning immediate perception see prec. 1

1850 in *Cent. Dict.*

2 = INTUITIONALIST 1

1855 Miss Cobbe *Intuit. Mor.* 76 Where the Deductive Science of the Intuitionist stops, there the Inductive Science of the Experimentalist meets it. 1865 Mill *Exam. Hamilton* 208 The most strenuous Intuitionist does not include this among the things that I know by direct intuition. 1879 H. Spencer *Data of Ethics* IV. § 55 Now I am at one here with the pure intuitionists, who hold that moral perceptions are immate in the original sense

attrib. 1885 *Athenæum* 8 Aug. 170 ? He gives to the intuitionist theory as strong a position as can well be given to it

Hence **Intuitionti stic** *a.*, holding the theory of intuitionism

1888 W. G. Ward *Ess.* (1884) II. 155 And this criticism of Intuitionistic philosophers suggests a more general remark

Intuitionless (intiū·ĭʃnlĕs), *a.* [f. as prec. + -LESS.] Devoid of intuition

3 *Math.* a *Arith* and *Alg.* Of such a nature in respect to another operation, relation, etc. that the starting-point or antecedent of the one is the result or conclusion of the other, and *vice versa*, opposite in nature or effect. Opp. to *direct*, q. v.

Inverse Method of Fluxions see quot. 1707

Inverse ratio is a ratio related to another ratio in the way defined above, i. e. one in which the terms are reversed, *i. e.* the ratio of two quantities which vary inversely, i. e. one of which increases, in the exact proportion in which the other decreases, and *vice versa*. So *inverse proportion* (the popular language of which is loosely extended to the case of two things, one of which decreases, or is less, in the same degree or in greater) *Inverse square*, often used for the relation of two quantities one of which varies inversely as the square of the other. *Rule of Three inverse* that case of the Rule of Three in which the antecedent of each of the ratios corresponds to the consequent of the other

1656 Barrow *Euclid's Data* VII. Inverse ratio is when the consequent is taken as the antecedent and so compared to the antecedent as the consequent. 1790 Pearse *Fr. & It.* 139 The operation of opinion being, in the inverse ratio to the number of those who abuse power. 1793 Benson *Math. Recid.* 19 A balance of which one arm should be ten inches, and the other one inch long, and each arm should be loaded in an inverse proportion to its length. 1806 Hutton *Course. Math.* I. 44 Rule of Three Inverse, is when more requires less, or less requires more. 1807 *Ibid.* II. 23 The direct method [of fluxions] consists in finding the fluxion of any proposed fluent . . and the inverse method consists in finding the fluent of any proposed fluxion. 1816 Playfair *Nat. Phil.* II. 295 The attraction of a spheroid, in the plane of its equator, does not decrease exactly in the inverse ratio of the square of the distance. 1816 Ir. Lacroix's *Diff. & Int. Calculus* 547 By substituting for x the inverse function of $\phi(z)$, by which is understood that function which written instead of x in the expression of $\phi(x)$ produces z as the final result: *Ibid.*, ϕ^{-1} and log. are inverse functions of each other, since $\log.(e^z) = z$. 1834 Mrs. Somerville *Connex. Phys. Sc.* viii. (1849) 70 The inverse problem had now to be solved. 1865 Todd Dobell *Historical Notes* 51 The ratio of its extent appeared to be inverse with the degree in which it was sought. 1888 Minchin *Unipl. Kinemat.* 16 Matter attracting according to the law of the inverse square of distance

b *Geom. Inverse point, line, curve* etc., one related to another point, line, curve, etc. in the way of geometrical inversion: see Inversion 5 (b)

1796-98 Withering *Bot. Arrang.* (ed. 3) I. 122 Petals . . inversely heart shaped. *Ibid.* II. 119 Root-wood like, in reversely conical at the crown. 1849 Murchison *Siluria* xiii. 311 Of an inversely pyramidal shape.

Inversion (invɔ́·ʃən) [orl. L. *inversion-em* an inverting, n. of action from *invert-ĕre* to Invert, cf. F. *inversion* (1570 in Hatz.-Darm.)] The action of inverting, the condition of being inverted

I 1 a Turning upside down

1598 Florio, *Inuersione*, an inuersion, a turning inside out, or upside downe, a misplacing. 1704 R. Cotton's *Table Alphab., Inversion*, turning upside down, turning contrariwise. 1865 Power & Tuke *Histol.* iii. 82 Active inversion of the Lobe into the vesicle during cell-life. 1866 Treasury *Gdns.* I. iv. 36 They often mistook this vertical inversion for the reflection from a lake

b *Geol.* The toppling back of stratified rocks upon each other, so that older strata overlie the newer

1849 Murchison *Siluria* iv. 79 A great fault was supposed to intervene, to account for this apparent inversion. 1882 *Geikie Text-Bk. Geol.* iv. iv. 538 Individual mountain-present spectacular examples of inversion, great groups of strata being folded over and over each other.

2 A reversal of position, order, sequence, or relation

1599 H. Buttes *Dyets dry Dinner* M ij, We may now a dayes vse Plines wordes with an inversion of the sense. 1639 Fuller *Holy & Pr. War* (1647) 61 The inversion of order brought all to confusion. 1646 Sir T. Browne *Pseud. Ep.* I. iii. 9 A recognition, or rather an inversion of the creation, making God one day to be made on whom he rather that is, after our Image, is he made us after his owne. 1695 Woodward *Nat. Hist. Hunt *Bulbaria* (1880) 1, In an unnatural inversion of the manners of society

†b *Rhet.* The turning of an opponent's argument against himself, = Epanorthosis 3. *Obs.*

1551 T. Wilson *Logica* (1567) 34 b, You may confute the same by inuersion, that is to saie tourninge his talke the contrary. 1657 J. Smith *Myst. Rhet.* 125 Inversion is a figure, whereby the Speaker retorts or turns upon him, as a thing for himself, which was reported of the adverse part on him.

c *Gram.* Reversal of the order of words, = Anastrophe

1586 A. Day *Eng. Secretary* II. (1625) 81 *Anastrophe*, a preposterous inuasion of words besides their common course, it faults no matter herein without. 1620 T. Spencer *Dec. Logicke* ii. 259 Inversion is when the Consequent, or bond, is placed before the Antecedent. 1795 Boswell *Johnson* an. 1750, The structure of his sentences often has somewhat of the inversion of Latin. 1875 Jowett *Plato* (ed. 2) IV. 279 Any arbitrary inversion of our ordinary modes of speech is disturbing to the mind.

d *Mus.* The action of inverting an interval, chord, phrase, or subject (see Invert v. 2 e), also, the interval, chord, etc. so produced (in relation to the original one)

First, second, etc. *inversion* (of a chord): the chords produced by taking the successive higher notes of the original chord respectively as the lowest note

1806 Callcott *Musical Grammar* II. i. 160 When any lower Note of an Interval is placed an Octave higher, or the higher Note an Octave lower, the change thereby produced is called *Inversion*. 1848 1875 [see Invert v. 2 e]. 1889 Prout's *Counterp.* xix. 159 Sometimes . . the answer is made by contrary motion, constituting a Fugue by inversion. 1888 W. S. Rockstro in *Grove Dict. Mus.* II. 56 (Title) Double Counterpoint in the Octave . . the Inversion is produced by transposing the upper part-six octaves or four octaves; that the Inversion may take place in any other Interval. *Ibid.* 57 The Chord of the 6-4 is called the First Inversion of the Common Chord, and the Chord of the 6-4, the Second. 1889 J. Pierce *Harmony* § 131 A chord which consists of three notes, has two inversions, because it contains two notes besides its root; and either of these notes can be placed in the bass.

e. *Logic.* A form of immediate inference in which a new proposition is formed whose subject is the negative of that of the original proposition

1806 Whately *Manual of Logic* (ed. 2) III. iii. § 102 Inversion is the inferring from a given proposition another proposition whose subject is the contradictory of the subject of the original proposition. The given proposition is called the Invertend, that which is inferred from it is termed the Inverse. The rule for Inversion is Convert either the Obverted Converse or the Obverted Contrapositive

3 *Math.* a *Arith* and *Alg.* The reversal of a ratio by interchanging the positions of the antecedent and consequent

1660 Barrow *Euclid* v. xv Because *A F*. *B C* by inversion shall be *A E*. *C B*. 1695 Alex. Ham. *Exam. Tyal.* 102 The Alternations and Inversions of which, follow from what was before proved. 1827 Hutton *Course Math.* I. 327 If four quantities be proportional, they will be in proportion by inversion, or inversely. 1837-8 Sir W. Hamilton *Logic* xv. (1860) I. 278 The two operations tend to each other in a determinate ratio: the ratio of inversion

b *Geom.* A transformation in which for each point of a given figure is substituted another point in the same straight line from a fixed point called the *origin* or *centre of inversion*, and so situated that the product of the distances of the two points from the centre of inversion is constant (*cp. dual* or *spherical inversion*). Also extended to similar transformations involving a more complex relation of corresponding points or lines, *is quadratic in*-, *zonal*, *tangential inversion*

1878 B. Williamson *Diff. Cal.* (ed. 2) 218 If the focus be of course the origin of inversion the inverse is a curve called the Limaçon of Pascal. 1885 Watson & Burbury *Math. Theory Heat* I. 125 According as the centre of inversion is without or within the original sphere

4 *Mil.* An evolution by which ranks are converted into files

1854 Barnes's *Mil. Discipl.* xxvi. (1862) 178 Inversion of ranks always produce files or files, and Conversion rank or ranks. 1859 R. Pelet *Mil. Operations* I. 85 My subject in this Chapter will be the Rank-finding and Flank-filing, and Inversion, ranking and Files finding, which are by some called Inversion and Conversion. 1872 [see Invert v. 3].

5 *Chem.* **a** Decomposition of certain carbohydrates into two different substances, as of cane-sugar into dextrose and lævulose, whereby the direction of the optical rotatory power is reversed

Cf. Inverted 6.

1864 tr. Watts *Dict. Chem.* II. 722 A solution of cane-sugar left to itself, or warmed with dilute acids, loses its dextro-rotatory power, and acquires a lævo-rotatory power which, when the transformation, or *inversion* is complete, amounts to 36 for every 100 of the original rotation to the right.

It does not appear whether the vb was formed from the adj (which would *a priori* be the more likely) or *vice versa*. The affinities outside Eng. are also uncertain, there was a rare MHG *erken* to be exasperated, to be exasperated with free *erken* and adj *erkich* abhorrent, which suits the sense, but the rarity of this, with its non appearance in LG., causes difficulties. On the other hand the primary meaning of the word in Eng. has suggested its identity with ON *yrkja* (= Goth *vaurkjan*, OE *wyrcan*) to work to take effect upon. So *yrkt* to work, prepare, ON *yrkisk* to worry being that the notion 'it works me might have developed in Eng. that of 'it wearies, tires, or disgusts me. But for this there is no actual evidence, ON *yrkia* does not even appear impersonally used.]

The long type *iiern* has no continental parallel, in OE, as a simple sb, it was app chiefly poetic, but it became the standard form in ME, the second syllable was from the 14th c variously spelt *ern* *yn*, and from early in the 16th c always *on*, the short form *iren* being *yron*, on which *-on* gradually gained, and became the usual one from 16th In early ME southern dial, *iren* was reduced to *ire*, *yre* found in literature in 13th c, and still the sw dialect form from Berkshire to Cornwall In north dial, on the other hand, *iren* was compressed to *irn*, *yrn*, still used as *irn*, *irne*, *ern*, *airn*, in Sc and north Eng dial (see *Eng Dialect Dict* s v) In the standard Eng form the *i*-prothesis app did not take place until after diphthongation of the *i* whence through a phonetic series *i ren*, *ai ren* *ai rən*, *ai rn*, *ai ən*, came the exist ing *ai ən*, *dial ai ən* of the syncopated pa pples *born*, *borne*, *torn*, *worn*, *lohn*, *swoln*, and Sc. *fal'n*, *fawn*, from earl *ieborn*, *toren*, *woren*, *bollen*, *swollen*, *fallen*, *fawen*, 16th c. dial spellings *arn*, *yern*, *yarn*, are ambiguous in some cases they may have meant *ern*, *ai ən*, in others *yern*, *yarn*, the latter prob from Norse *jarn*, Da. *jern*. The plural *yrnes*, *irnes* (*ys*, *-esse*, *etc*) could arise alike from *yrn*, *irn*, or from *yren*, *iren* (as in *heven*, *hevnes*)

The form of the original *isarn* has been much discussed, it has been viewed by some as a negative form, perh adj form, and suggestions made of its relation to *is* ice with the notion of 'gleaming hot or fire', *ex* Goth *ais* OHG *er*, OE *æren*, but neither case with much probability Some class it among the Inde-eur neuter n-stems with *r* in non nasc and *n* in oblique cases (eg Skt *ásthar* gen *ásthnas*, Lat *femur*, *femin-is*, and suppose an orig nom **isar*, gen **isnos* (yielding by Verner's Law **isan-as*), whence the later forms in *r* and *n*, and (by confusion) *s*. The Celtic loanwords of Gothic and cognates is also doubtful Grimm and others suggested a borrowing of the *iron*, giving OG *isarn*, *iarn*, *eisarn*, others from *iron* through **eisarn*, *earn*, *iarn* (See Müller in *P & B Beiträge* VII 547, Noreen in *Arkiv for Nordisk Filologi* IV 110 note, *Abrahamsen gramm Untersökelser* 193) Uncertainly also attaches to the phonetic history of Ob *iron* whether it merely arose by chotacism from *iron*, or from *isarn* through an intermediate *irern*, shortened like *ferren*, *heren*, *murrery*, *cowardes*]

1. A metal, the most abundant and useful of those used in the metallic state, very variously employed for tools, implements, machinery, *constructions*, and in many other applications

Pure iron is soft and of a silvery white colour, but is scarcely known, the metal as commonly used has always an admixture of some other substance, usually carbon, and varies in colour from tin white to dark grey It is of three kinds, differing in the proportion of carbon present, and in properties *malleable iron*, or WROUGHT IRON, which is comparatively soft, very tenacious, fusible only at a very high temperature, and capable at a red heat of being hammered or rolled into any required shape, CAST IRON, which is hard and brittle, and fusible at a lower temperature; and STEEL, which partakes of the properties of both Iron is very rarely found native (the known instances being mostly of meteoric origin), but is obtained from its ores, which are chiefly oxides or salts of the metal Chemically, iron is a metallic element symbol Fe (*Ferrum*), atomic weight, 56 In alchemy it was represented by the sign for the planet Mars (♂)

-ish[1], a suffix forming adjs. of Com. Teut origin. Goth *-isks*, ON. *-iskr*, OS., OFris., OF. *-isc*, Ger. *-isch* cognate with Gr. *-ικος* of dim suffix of obs Sometimes syncopated to *-sh* spelt also *-ch*

In Scottish usually *-is*, sometimes syncopated to *-s* In words of old formation, the preceding vowel had umlaut which was often present in the obs whence the adj in-use was formed), in later use the vowel has usually been altered back to that of the sb when this is in use, e.g. *Scottish, Danish* after *Scot, Dane*, the modified vowel being retained in other cases, as in *English, French, Welsh*

1 In OE and the cognate langs., chiefly forming gentile adjs from national names e.g. *British* (OI *Brittisc*, *Englisch* (OI *Englisc* ? *Ags. Inglis*, *Scottish, Scotch* (OE *Scyttisc* Sc. ? *Scottis*, *Irish* (OI *Iersc*), *Welsh* (OE *Wælisc* ? *Ags. Wallis*, *Danish* (OI *Dønisc* ? *Sc Denise*, *Dense*, *Frankish, French* (OL *Frencisc*), so in many adjs of various ages, as *Alemannish, Flemish Flemish Gaulish*, ? *Greekish* (OI *Grecisc Icelandish Jewish, Jutish, Netherlandish Polish Polish Spanish Swedish Turkish Yiddish*

2 Added to other sbs., with the sense 'belonging to a person or thing,' of the nature or character of' These were not numerous in OI whence only a few have come down to later times Examples are *folcisc* popular, *hǣðenisc* heathenish, *þēodisc* national, *mildtsisc* inhandish *mildtsian* to be kind *wīfisc* (which come close to the gentile group in 1), also *ingenisc* human, *cildisc*, childish, childlike

In later times this ending has become exceedingly common, sometimes in the earlier colourless sense as *boyish, girlish, waggish*, but chiefly in a derogatory sense 'Having the bad or objectionable qualities of as in *apish, babyish, boorish, bookish, clownish, cowish, devilish, dogish, doltish, elfish, foolish, hoggish, ladylike, mannish, mawkish, monkish, owlish, piggish, pettish, prudish, rowdyish, selfish, shrewish, slavish, sluttish, sottish, swinish, thievish, wasp ish, wolfish, womanish* (These have usually corresponding Ger forms in *-isch*) Also from names of things, with sense of the nature of, tending to, as in *aguish, black ish, book ish, brownish, feverish, fiend ish, hellish, monarch-*, or from other parts of speech, as *snappish, stand-offish, uppish*

In recent colloquial and journalistic use, *-ish* has become the favourable ending for forming adjs for the nonce (esp of a slighting or deprecatory nature) on proper names of persons, places, or things and even on phrases, e.g. *Dreadnought-ish, Hall Caine-ish, Jeannish, Macdonald-ish, Martineau-ish, Queen Annish, Spectator-ish, Tupper-ish, Ward J. Holbrook all-over-ish at homeish devil may care ish, house of-lords-ish, jolly good fellowish, merry-go-roundish out of townish*, and the like

A Home tab sneer at the tendency of the Eternal-Feminine to relax the tension of our ideals. **1894** *Daily News* 4 Jan 4/3 Some huge pile of building, generally much more Queen Anne tab than the houses of Queen Anne's own time.

3 Added to adjs with the sense 'of the nature of, approaching the quality of, somewhat', apparently first with words of colour (which may have been treated as nbs and so have originally come under 2) e g *blaush* (a 1400), *blackish* (a 1500) *brownish reddish, whitish, yellowish*, etc. In late use also with other adjs, and now, in colloquial use, possible with nearly all monosyllabic adjs, and some others, e g *brightish broadish, coldish, darkish, dimmish, dryash, dullish, dunkish, feeblish, goodish, hardish, loudish, narrowish, oldish, palish, poorish, quietish, smallish, smartish, softish, tallish, thickish, thinnish, warmish, weakish, wettish, youngish*. Derivatives of this type are peculiar to English among the cognate languages: those formed on adjs of colour answer to F adjs in *-âtre*, as *bleuâtre, noirâtre*, and to Ger adjs in *-lich*, as *blaulich, schwarzlich*. Of other adjectives, only a few have equivalent Ger forms in *-lich*, the force of *-ish* is ordinarily given in Ger by the qualifying *etwas* or *ein wenig*.

From adjs in *-ish*, advbs in **-ishly** and nbs of quality in **-ishness**, are formed *ad libitum* e g *devilishly, girlishness, feverishly, feverishness*.

-ish-, ² suffix of verbs, repr F *-iss-*, extended stem of verbs in *-ir*, e g *périr* to perish, *perissant, ils perissent*. The F *-iss-* originated in the I *-isc-* of inceptive verbs, which in It, Pr, and Et was extended to form a class of simple verbs, correspto I verbs in *-ire* and *-ere*, and including others which were assimilated to these. At their first adoption, these verbs ended in Eng in *-ise*, *-ize*, *-isce*, which before 1400 changed to *-isshe*. In the original *-is*, *-ize*, was retained longer, and appeared in 16th c as *-ice*, *-eese*, *fleurees*. Among the chief simple verbs coining are *abolish, accomplish banish, blandish, blemish, brandish, burnish, cherish, demolish embellish establish, finish, flourish furbish furnish, garnish, impoverish, languish, nourish, perish, polish, punish, ravish, relinquish, replenish, tarnish, varnish, vanquish*.

In some cases, other Fr endings have been levelled under this suffix in Afr or English such are *admonish, astonish, diminish, distinguish, etc mish, famish, lavish, munish, monish, publish, relish*, etc. for the history of which see the individual words.

In a few words the F *-iss-* is represented in Eng by *-ice*, as even *v.* e g *accomplice, adventice*, *chastice, amortice*, as Amortize, *rejoice, rejoyce* has given Rejoice.

Isinglass (ai·nglɑːs) Forms: 6 **isonglas, -y ison glass**, 7–8 **isonglass, ising glass**, 8 **icin-glass, icing-glass**, 7– **isinglass** [Supposed to be a corruption or imperfect imitation of an obs. Du. *huisenblas* (Kilian *huysenblaes, huysblas*), Ger. *hausenblase* isinglass, lit. 'sturgeon's bladder'. See Hausen and Huso.

No English form approaching the Du. more closely have been found so that, if this was the source, the perversion of the name would seem to have been made at its first adoption.]
