Inference (ɪ·nfĕrĕns) [ad med L. *inferentia* (Abelard *Ouvr inédi* ed Cousin, 325, 328) (cf It *inferenza* 'an inference, an implying', Florio 1611), *f inferent-em*, pr. pple of *inferre* to INFER used instead of cl L. *illatio*]

1 The action or process of inferring, the drawing of a conclusion from known or assumed facts or statements, *esp* in *Logic*, the forming of a conclusion from data or premisses, either by inductive or deductive methods, reasoning from something known or assumed to something else which follows from it, =ILLATION Also (with *pl*), a particular act of inferring; the logical form in which this is expressed

In English, the word appears first in the general sense, not as a term of formal logic. In logical treatises it is found nrt applied to the deductive process of the syllogism, and its conclusion (*mediate inference*); its application to the inferring of a conclusion from a single proposition by conversion, opposition, permutation, or the like (*immediate inference*), and its use in the logic of induction (*inductive inference*) appear later, and are not accepted by all logicians. On the other hand, some restrict the term to induction, and deny that either a syllogism or an immediate inference can properly be called an inference

1594 HOOKER *Eccl Pol* II x 3 These are but weake and feeble disputes for the inference of that conclusion which is intended. 1605 *Lond Prodigal* III ii, 'Tis merely unsound unprofitable idle inference. 1643 MILTON *Divorce* II xv, Therefore shall man cleave to his wife' : why this is no absolute command, but with an inference, *Therefore*. 1736 BUTLER *Analogy* II vii 308 Religion is a matter of deduction and inference. 1815 JEFFREY *Lord's Apost* VIII 436 That is too thin an evidence of intention to afford much inference. 1827 WHATELY *Logic* iv, The Province of Reasoning or *Incidendy*, Of Direct and Indirect Proof. 1836 SIR W. HAMILTON *Logic* xv (1860) I 279 Inference or illation, indicates the carrying us into the last proposition which was virtually contained in the antecedent judgements. *Ibid* II App 255 There are various Immediate Inferences of one proposition from another The first of these is *Conversion*. 1843 MILL *Logic* II i § 3 Cases of inference in the proper acceptation of the term, those in which we set out from known truths, to arrive at others really distinct from them. *Ibid* IV i § 2 In almost every act of our perceiving faculties, observation and inference are intimately blended. 1864 BOWEN *Logic* vi 148 Inference or Reasoning is that act of Pure Thought whereby one Judgment is derived from another, or from two others. 1866 FOWLER *Deduct Logic* III i (1869) 70 In any inference, we argue either to some thing already implied in the premisses or not. If the latter, the inference is inductive, if the former deductive. If the deductive inference contain only a single premiss, it is immediate, if it contain two premisses, and the conclusion be drawn from these jointly, it is mediate, and is called a syllogism. 1874 STUBBS *Const Hist* I i 2 This is not a matter of inference It is a recorded fact of history

The form of the mod L. word shows that it was orig. meant as an *ordinal*, viz the 'infinitieth' in order, that which is not an infinite distance from the first, but the ordinals are also used to name fractions e.g. hundredth (part), $\frac{1}{100}$, thousandth (part) $\frac{1}{1000}$, hence, *infinitesima pars, infinitesimal part or infinitesimal*, came to mean unity divided by infinity, $\left(\frac{1}{\infty}\right)$, and thus an infinitely small part or quantity. 2 (Chiefly *Math.*) As a fraction or fractional quantity. The inverse or reciprocal of an infinite quantity, †an infinitely small fraction or part *of* anything (*obs.*). Hence **b** (*Math.*) An infinitely small quantity or amount, a quantity less than any assignable quantity.

Chiefly used of the infinitesimal differences or *differentials* treated of in the differential and integral calculus: see DIFFERENTIAL A 3, B 1 a. Mathematicians distinguish different orders of infinitesimals, thus, if we make a infinite, $\frac{1}{a}$ is an infinitesimal of the first order, $\frac{1}{a^2}$ (being infinitely less than $\frac{1}{a}$) an infinitesimal of the second order, and so on.

A *adj.*

1 *Gram.* The name of that form of a verb which expresses simply the notion of the verb without predicating it of any subject. Usually classed as a 'mood', though strictly a substantive with certain verbal functions, esp those of governing an object, and being qualified by an adverb.

(Called by Quintilian and Priscian *infinitus modus*, by Donatus *infinitivus* because it has not definite persons and numbers, whence it has also been called by some, *impersonativus* and *enuntiativus*. In the short grammar of Dionysius Thrax (B.C. 80), it is called ἀπαρέμφατος, i.e. without modification of sense, unmodified.)

In modern Eng., the infinitive has the simple unmodified form of the verb, agreeing in this respect with the imperative, and (except in the verb *be*), with the first pers. sing. and the whole plural, of the present indicative. In OF., the infinitive had (in the nom. acc. case) the suffix *-ar*, *-er*, or *-ir*; it had also a dative form in *-ame*, *-eme*, *-ime*, or *-e*. The latter is sometimes fancifully called by modern grammarians, the *gerundial or gerundive infinitive*: as nouns of case, it is one of its functions to be the Latin gerund or gerundive (in *-ndum*) more to the I. supine. The OF. noun or infinitive is the source of the more (or less) frequent simple infinitive, as in 'we can *hear come*', 'they need not *come*'. The dative infinitive is formally the source of the infinitive with *to*, and function only the origin of this in such uses as 'he went *to* go the light', *infinitive of purpose*; 'it was easy *to do*', *(of actual infinitive)*.] but *to* is now prefixed also to the nom. acc. infinitive where OF. had the simple form in *-ar*, *-er*, or *-ir*: as 'to believe', 'he likes *to* do it'. See *to prep.*

Inflect (*infle*ʊ·*kt*), *v.* [ad. L. *inflect-ere*, f. IN- *in* + *flectere* to bend.]

1 *trans.* To bend inwards, to bend into a curve or angle; hence simply, to bend, to curve

c 1425 *Found. St. Bartholomew's* (E. E. T. S.) 5 Whan he from so grete an highnesse wolde inflecte & bowe downe his eye to the lower party downward, he behelde, and sawe pyte. 1578 Banister *Hist. Man* 1. 24 These [cartilages] occupying the meane space betwixt the ribbe and brest bone, are by expiration inflected. 1665 Grew *Anat. Nectar Sect.* viii. 44 It cannot be apprehended but that the line be inflected if some parts of it move faster than others. 1724 Blackwell *Contin.* 1730 81 To understand distinctly, they ascend, And there inflect their course, and downward tend. 1732 Arbuthnot *Rules of Diet* 410 They must be inflected to that side where the Muscle pulls strongest. 1804 C. B. Brown *Edgar Huntly* I. v. 51 The course of a general wind is often inflected, from 30 to 80 degrees, by the hollow of a river, a ridge of hills, &c. 1875 Darwin *Insectiv. Pl.* viii. 288 The tentacles were soon energetically inflected

b. *fig.* To bend, incline, dispose

c 1555 Harpsfield in *Documts. Hen. VIII* (Camden) 174 Ruth by no means could be inflected to break company from her mother in law. 1644 *Vox Populi or Smart* 17 Inflecting, fashioning, and refashioning their religion according to the will and wantonness of them. 1657 W. Rev.* II. 378 That Memoir of Turgot's which is at this time still inflecting toward itself the new as it did the old authorities

† 2 *Optics.* To bend in or deflect (rays of light) in passing the edge of an opaque body or through a narrow aperture; to DIFFRACT. *Obs.*

1704 Newton *Optics* (Qu.), Are they [rays of light] not reflected, refracted, and inflected by one and the same principle, acting variously in various circumstances? 1727 tr. Chambers's *Cycl. s.v. Ray.* Sir Isaac Newton suspects they [light rays] may have a power of being inflected, or bent by the action of distant bodies. 1821 [see INFLECT *v.* 2b].

3 *Gram.* To vary the termination (of a word) in order to express different grammatical relations

1668 Wilkins *Real Char.* 449 As to the inflexions of Adjectives by the degrees of comparison, those may be also inflected through all degrees, have several irregularities in the manner of it. 1747 Johnson *Plan Dict.* Wks. 1787 IX. 178 We are to examine, how they [words] are inflected through their various terminations. 1871 *Public Sch. Lat Gram.* § 24. 2. Flexion, or Stem-flexion, is the method of inflecting a Noun, that is, of making such changes in its form as may indicate changes in its meaning and use

4 To modulate (the voice), *spec.* in *Music*, to flatten or sharpen (a note); by a chromatic semitone

1828 Webster, *Inflect* . . . 2. to modulate; as the voice. 1867 Macfarren *Harmony* 5 With the Greeks it allowed of no notes inflected by sharps or flats. 1880 Prout *Harmony* xii. § 274 Wherever a modulation takes place, the note inflected by an accidental is regarded as belonging to the key in which it is diatonic.

Hence **Inflecting** *ppl. a.*, that inflects

1666 *Phil. Trans.* I. 24. The air light, and clear without inflecting parts. 1831 Brewster *Newton* (1855) I. iv. 43 He ascribes it [soft sound] to the variable density of the ether within and without the inflecting body

Inflected (*infle*ʊ·*ktĕd*), *ppl. a.* [f. prec. + -ED.]

1 Bent or curved; bent inwards

1648 tr. I. Browne *Pseud. Ep.* III. i. 109 Tooles and mends unto us . . not to be directly, or at length but some what inflected, that the muscles may be at rest. 1796 H. Boldero in *Phil. Trans.* LXXXVI. 28 The angle, which the inflected ray makes with the line drawn [etc.]. 1847 Lewes *Hist. Philos.* (1867) I. 8 There sit in an inflected position. 1870 Robinson *Anim. Life* Introd. 48 The angle of the lower jaw is almost always inflected. 1875 Darwin *Insectiv. Pl.* viii. 165 All the tentacles except three inflected or sub-inflected

2 *Gram.* Of a word: Varied in the terminations to express varied grammatical relations. Of a language: Characterized by grammatical inflexion

1775 in Ash. 1865 Tylor *Early Hist. Man* iv. 64 In flected languages such as Latin. 1877 Earle *Philol. Eng. Tongue* § 40 The essence of an inflected language is, to express by modifications of form that which an uninflected language expresses by arrangements of words

3 *Inflected arch*: an arch having the curve of its flanks reversed near the crown so as to terminate in an acute angle. (Knight *Dict. Mech.* 1875.)

Hence **Inflectedness,** the state or condition of being inflected

1811–31 Bentham *Univ. Gram.* Introd., Wks. 1843 VIII. 92 Sparingly inflectedness and copiously inflectedness as applied to language

Inflection : see INFLEXION.

Inflective (*infle*ʊ·*ktiv*), *a.* [f. INFLECT- + -IVE, in mod. F. *inflectif*.]

1 Having the quality of inflecting, tending to inflect

1666 *Phil. Trans.* I. 240 The Inflective veins of the Air (if I may so call those parts, which . . have a greater or less Refractive power than the Air next adjoyning). 1733 Dunham *Disc. Theol.* 1. 1. 1. 1. Although this inflective Quality of the Air be a great Incumbrance and Confusion of A to name all the Stars visible

2 Pertaining to or characterized by grammatical inflexion

1799 W. Taylor in *Monthly Rev.* XXVIII. 569 Inflective and derivative syllables. 1875 Whitney *Life Lang.* xi. 104 The glories of a completely inflective language. 1885 *Century Mag.* XXIX. 376 Their language had passed into the inflective or highest stage

Inflector. Infle. bot. *rare*—[f. INFLECT- + -OR.] That which inflects or bends. (In quot. *attrib.*)

1851 Richardson *Geol.* viii. 271 Propulsion through the water by the action of the inflector muscles of the tail

† Inflege, *a. Obs.* [N-.] = UNFLEDGED. a 1661 Fuller *Worthies, Yorkshire* (1662) 97 He therein made nests for many birds, which otherwise, being either indulged or maimed, must have been exposed to wind and weather

† Inflexe ing, *vbl. sb. Obs. rare*—[f. IN- + FLEXING.] A place to flee into, a refuge

a 1300 *Cursor Mundi* (Cotton) 4 Mi mast and in fleing mine, Mi helper and leer mine

Inflesh, obs. form of ENFLESH *v.*

† Inflex, *sb.* [ad. L. *inflexus* (n. stem), synonymous with *inflectio* INFLEXION.] In the grammar of the Bantu languages, the particle prefixed to a root, to form a noun, which has functions similar to those of inflexional suffixes in the Aryan and Semitic languages (Also called *prefix* or *initial*.)

1859 Colenso *First Steps Zulu Kafir* ii. 4 Every Zulu noun consists of two parts, the *root* and the *inflex*: the latter being a small particle, which is set before the root, forming with it the complete noun. We give the name of *inflex* to this initial particle, because, by changes of it, or can mutilations of it, the root is inflected, or varied, as we say in Latin and Greek, by means of terminal particles. Thus in the Zulu word *umuntu*, person, the root is *ntu*, and the inflex *umu*, which is changed to *aba* for the plural, and the whole word becomes *abantu*, people

†Inflex x, *a. Bot. Obs. rare* [ad. L. *inflex-us*, pa. pple. of *inflectere* to INFLECT.] = INFLEXED 1.

1753 Chambers *Cycl. Supp. s.v. Leaf, Inflex Leaf* that which in growing from its base, turns its point again toward the stalk. 1796 Martyn *Rousseau's Bot.* xxii. 234 The petals are inflex, or bent upwards at the end

Inflexed (*infle*ksĕd), *ppl. a.* [f. as prec. + -ED.] Bent inwards, inflected

1661 Feltham *Disc. Luke* xiv. 20 Wks. (1677) 361 Towards right hands backs became inflex'd and crooked. 1758 J. Phillips *Cyder* iv. 69 Suffice it to provide A brazen tube In flexe. 1735 H. Brooke *Univ. Beauty* ii. 265 His grand machine . . Some most direct where, seeming most inflex'd. 1816 Keith & N. Hall *Botanist* (1843) II. 256 Petals . . Inflexed with an inflexed fork. . . usually bent under the body. 1830 Lindley *Nat. Syst. Bot.* 39 Otto in *Flora* for 1821 p. 182 The apices of the petals are often inflexed

Inflexibility (*infle*ksĭbĭ·lĭtĭ). [f. INFLEXIBLE + -ITY: cf. F. *inflexibilité* (1611 in Hatz. Darm.).] The quality or condition of being inflexible, incapability of being bent, unyielding stiffness, rigidity, firmness of purpose, obstinacy

1611 Florio, *Inflessibilità*, inflexibilitie. 1700 in Phillips. 1730 A. Baxter *Inq. Nat. Soul* II. 125 (J.) Against the inertia of matter, or the inflexibility of mechanism. 1742 Fielding *Joseph Andrews* iv. The squire, who knew his inflexibility, interrupted her. 1818 Scott *Rob Roy* xxxiii. His features arranged into the utmost inflexibility of expression. 1873 T. Hardy *Desp. Rem.* 218 Mere inflexibility of purpose is not necessarily an excellence. 1876 tr. *Hamerton's Contemplation* 137 Bone cannot swell, in consequence of its inflexibility

Inflexibility 2 : see INFLEXIBLE 2.

Inflexible (*infle*ksĭbl), *a.*[1] [ad. L. *inflexibil-is* (= IN- + *flexibilis* FLEXIBLE cf. F. *inflexible* 13–14th c. in Littré).] Not flexible.

1 Incapable of being bent, unbendable, not pliant, rigid, stiff

c 1400 *Lanfranc's Cirurg.* 11 pa If bat he [the ligament] hadde be inflexible as a boon oon lyme myste not han meued wyboute anober. 1545 Joye *Exp. Dan.* vi. (R.) Of this thing is the kynge's scepter a very apt signe and token, in that it is feinne and inflexible. 1607 Topsell *Fourf. Beasts* (1658) 153 His trunck is crooked, grisly, and in flexible, at the root next to the nose. 1793 Pope *Odyss.* xxi. 188 The bow inflexible resists their pain. 1798 Pemberton *Newton's Philos.* 61 If two equal bodies be hung at the extremities of an inflexible rod. 1890 *Nature Mag.* Dec. 69/1 An ivory handled knife with a very delicate inflexible blade

2 Unbending in temper or purpose, not to be turned from a purpose by persuasion or argument; immovable, inexorable

1598 Barrey *Ianua Dr. P. R.* iii. (Add MS. 27944 ff. 15/1) He is inflexible, stedfast and faithfull. 1660 Cat. Grace *Chron.* (Rolls) 168 The bishop was inflexible. 1842 Tennyson *Poet. Wks. Man* (London) 6 Not to be more movable nor inflexible towards me your poor serv't. 1694 Kettlewell *Comp. Penitent* 145 Fill me with an inflexible Integrity and Constancy in my Duty. 1726 Lady M. W. Montagu *Lett. to her Daughter* 21 Now, she remains still inflexible, either to threats or promises. 1777 Watson *Philip II.*, *Introd.* (1839) 29 Solomon addressed to his purpose with inflexible obstinacy. 1855 Macaulay *Hist. Eng.* xvi. III. 727 Billop, though courteous, was inflexible

3 Unalterable, rigidly fixed

1693 Smith *Inq. Sermon* (1698) III. 84 To make it the Rigid Inflexible Rule, which it is to Judge by. 1871 Nadieu *Prov. & Cur. Dis.* I. xiii. 220 Nature's laws are more inflexible than man. 1885 *Gd. Words Suppl.* Jan. 11 so the moral order of the universe is as inflexible as the physical order

† Inflexible, *a.*[2] *Obs. rare* [f. I *inflex-* (see INFLEX *v.*) + -IBLE.] Capable of being inflected, inflexible

1432–50 tr. *Higden* (Rolls) III. 403 Hym semede his herte to be more inflexible (L. *inflexi*) to melody then to chevalery

1796 H. Boldero in *Phil. Trans.* LXXXVI. 253 Wherefore I conclude that the rays of the sun's light differ in degree of inflexibility, and that those which are least refrangible are most inflexible. 1897 H. Hughes in *Encycl. Brit.* XXIII. 895 Supposing that the rays which differ in refrangibility differ also in inflexibility

Inflexibleness. *rare* [f. INFLEXIBLE + -NESS.] = INFLEXIBILITY 1.

a 1617 Hieron *Works* (1619) II. 372 For the inflexiblenesse of it [man's heart], I shewed you erewhile of what a stony qualitie it is. a 1688 W. Clarke 17 *Sermon* (1699) 449 The inflexibleness of true doctrine

Inflexibly (*infle*ksĭblĭ), *adv.* [f. as prec. + -LY 2.] In an inflexible manner, rigidly, firmly, obstinately, unalterably

1534 More *Comf. against Trib.* II. xiii. Wks. 1304/1 Inflexibly set upon the purpose to destroy himself. 1647 B. Hall *Christ Mystic* (R.), We know him indeed to be infinitely and inflexibly just. 1776 Gibbon *Decl. & F.* xxi. (1869) I. 582 The payment of this tribute was inflexibly refused. 1898 Nan. *Gaz. Exped.* I. xxiv. 350 As far as we could see, it [the ice] remained inflexibly solid

Inflexion, inflection (*infle*ksʃən). [ad. L. *inflexion-em*, n. of action f. *inflectere* (ppl. stem *inflex-*) to INFLECT. Cf. F. *inflexion* (14th c. in Godef. *Compl.*)] As to the spelling of CONNEXION, DEFLEXION.

1 The action of inflecting or bending, or, more particularly, of bending in or towards itself

1531 Elyot *Gov.* I. xxiii. [xxiv.] Glauning much in his daunse coulde imagine the inflexions of the serpente. 1646 Sir T. Browne *Pseud. Ep.* III. i. 104 They conceive there may be a progressive or advancement made in motion without the inflexion of parts. 1796 Burke *Suit. & R.* III. 288, I here is required a small inflexion of the body. 1837 Whewell *Hist. Inductive Sc.* (1858) II. 61 The inflexion of a direct motion into a curve. 1875 Darwin *Insectiv. Pl.* viii. 272 Sufficient to cause the inflection of a single tentacle

b The condition of being inflected or bent, *concr.* a bending, bend, curvature, or angle

1658 Sir T. Browne *Gard. Cyrus* II. 45 The Labyrinth of Crete, built upon a long quadrate, containing five large squares, communicating by light inflections, answering in the centre of the middle square, and lodging of the Minotaur. 1662 Stillingfl. *Orig. Sacr.* III. i. § 16 The several inflections of the joynts serve for all kind of figures. 1771 Smollett *Humph. Cl.* 18 July, Let to Lewis, [the] new curved wording to the inflexions of the road. 1802 Paley *Nat. Theol.* xiii. 313 The use of the inflexion in the ridge is highly instructive, from the great disturbance of the primary strata, and the variety of their inflexions. 1837 Brewster *Magic* (1854) 134 This angular inflexion of the magnetic equator in the south sea. 1856 Woodward *Mollusca* 4 3rd Ligament contained in a spoon shaped inflection

c *fig.* A mental or moral bending or turning

1597 Hooker *Eccl. Pol.* v. xxxviii. § 1 The very steps and inflections every way of all passions whereunto the mind is subject. 1774 J. Bryant *Mythol.* I. 190 He allusion will not be obtained by these inflexions or deflexions. 1890 Boldrewood *Col. Reformer* (1891) 158 I venture to say selfanalysis men are not infrequently insincere and evasive . . Were the moral processes susceptible of dissection [etc.]

† 2 *Optics.* The bending of a ray of light, at the edge of a body, into the geometrical shadow. Now called DIFFRACTION. *Obs.*

1704 Newton (*title*) Opticks: or a Treatise of the Reflections Refractions, Inflections and Colours of Light. 1728 Pemberton *Newton's Philos.* 377 These shadows are also observed to be bordered with colours. His own author calls the inflection of light. 1796 H. Boldero in *Phil. Trans.* LXXXVI. 228 If a ray passes within a certain distance of any body, it is bent towards, this we shall call Inflection. 1831 Brewster *Newton* (1855) I. iv. 104 There is an inflexion of light differing, both from refraction and reflexion, and seeming to depend upon the unequal density of the constituent parts of the ray. 1865–72 Watts *Dict. Chem.* III. 810 The Light . . These effects, formerly known as Inflection, and now called Diffraction

3 *Geom.* Change of curvature from convex to concave at a particular point on a curve, the point at which this takes place is called a *point of inflexion* (or shortly *an inflexion*), at such a point the moving tangent to the curve becomes stationary, the direction of its angular motion being changed, hence *inflexion* is also applied to such a stationary tangent itself, or to the analogous stationary osculating plane (*plane inflexion*) in a non plane curve

1721 Bailey, *Inflection Point of a Curve* is the Point where a Curve begins to bend back again a contrary Way 1743 Emerson *Fluxions* 144 The Point of Inflexion or contrary Flexure is that Point which separates the Curve from the concave Part of the Curve 1881 Minchin *Unipl. Kinemat.* 100 Points on this circle are therefore points of inflexion on the roulettes to which they give rise, and the circle is hence called the *Circle of Inflexions* 1886 A. G. Greenhill *Diff. & Integr. Calc.* 240 At a point of inflexion the curve crosses the tangent

4. *Gram.* The modification of the form of a word to express the different grammatical relations into which it may enter, including the declension of substantives, adjectives and pronouns, the conjugation of verbs, the comparison of adjectives and adverbs, but some treat the last under Derivation or Word-formation)

1668 Wilkins *Real Char.* 297 The rules which are proper and peculiar to any one Language about the Inflexion of words, and the Government of them. *Ibid.* 453 Yet doth not there design to give an account of the just number of words in the Latin, but only to shew the great variety [of words] which is made by the Inflexion and Composition of Verbs. 1876 Mason *Eng. Gram* (ed. 21) 7 The process of forming the different cases of a noun is called inflection

b. comb. An inflected form of a word, also, the inflectional suffix or ending of a word

1668 Wilkins *Real Char* 21 Rules for all such Grammatical Derivations and Inflexions. 1841 Edinburgh *Phil. Jrnl.* I. 277 It has now been demonstrated by means of a comparison of the inflexions. 1871 Rolfe *Latin Gram.* 11 xviii 189 The indicative mood contains no special inflexion to distinguish it. 1874 *Hall Eng. Sounds* 160 Old English is the period of full inflections. Middle English of levelled inflections. and Modern English of lost inflections. 1876 Mason *Eng. Gram* (ed. 21) 49 This power of treating an inflected form or a complex phrase as though it were a single declinable word, and adding inflections to it, is very remarkable in English

5 Modulation of the voice, in speaking or singing a change in the pitch or tone of the voice

a 1600 Hooker (J.), The motion of his body and the inflection of his voice 1783 Blair *Rhet.* v. 128 With regard to inflexions of voice there is a remarkable variety. Intonations, it has appeared easier to express different tones by varying the tone with which they pronounced the same word, than to contrive words for the purpose. 1795 Mason *Q. Mus.* 139 It does neither so easily and generally admit, nor so variously introduce those accentual inflexions which they love to employ. 1839-40 W. Irving *Hallect Rab* (1855) 53 Such melodious sounds and exquisite inflexions could only be produced by organs of the most delicate flexibility. 1880 Grove *Dict. Mus.* II. 163/2 A series of inflexions usually described by modern writers as the 'Gregorian Tones'. 1885 F. M. Peard *Contrad.* I. 10 There was an inflection in her voice which suggested command

Hence **Inflexionless** (inflectionless) *a.*, void of inflexion or modulation

1878 J. A. H. Murray in *Lingal. Intel* VIII. 398 The language had at length reached the all but inflexionless state which it now presents. 1888 Miss Spender *Asphodel* III. viii. 225 His voice was subdued and inflectionless

Inflexional, inflectional (infle kʃənăl), *a.* [f. prec. + -al.] Pertaining to or characterized by grammatical inflexion

1832 J. C. Hare in *Philol. Museum* I. 666 That disposition to shorten inflexional terminations. 1851 Farrar *Orig. Lang.* 183 *note*, Pott's formula for the morphological classification of languages was that they are totating 'agglutinative', and 'inflectional'. 1872 Whitney *Life, Lang.* vi. 107 It does not lose what it once possessed in the way of inflexional apparatus. 1875 Freeman *Norm Conq.* V. xxv. 509 Had no Norman ever set foot on our shores, the inflexional Old English would still have passed, sooner or later, into the non inflexional modern English

Hence **Inflexionally** (infle ctionally) *adv.*, in regard to inflexion

1885 G. Baden Powell in *Contemp. Rev.* Oct., The Bushman language is classed inflectionally with the Basque, Finn [etc.]

+Inflexity. *Obs. rare*—[f. L. *inflexus* inflected + -ity, after Flexity.] Of rays of light The quality of being inflected see Inflect *v.* 2

1797 Brougham in *Phil. Trans.* LXXXVII. 260 We may, therefore, say that the rays of light differ in degree of refrangity, reflexity, and flexity, corresponding inflexity and deflexity

It *influenza* has the various senses of Eng *influence*, but has, besides, developed (app from the notion of 'astral' or 'occult influence') that of 'visitation' or 'outbreak' of any epidemic disease which assails many people at the same time and place (e g *influenza di catarro*, *influenza di fabbre pestilenziale*), a sense known as early as 1504, hence, absolutely, 'an epidemic' in 1743 applied specifically to the epidemic (called also *la grippe*) which then raged in Italy, and thence over Europe generally, and for which the Italian word (anglicized in pronunciation) became the English specific name]

1 A specific zymotic disorder, highly contagious, and occurring for the most part in widespread epidemics Its symptoms and sequelæ are extremely variable, but generally include rapid prostration and severe catarrh The mortality is not high in proportion to the numbers attacked

The term was often applied loosely to any severe catarrh of the respiratory mucous membrane, esp to a 'cold in the head' with running at the nose sometimes called in *common influenza* The most frequent incidence has been between the epidemic of 1847–8, and that which began in 1889, during which period no true influenza visited Great Britain

5 *spec in Eng Law* **a** A complaint or charge against a person lodged with or presented to a court or magistrate, in order to the institution of criminal proceedings without formal indictment

The original object of this procedure was to dispense with the previous finding of a grand jury. Criminal informations are laid in any criminal court, partly at suit of the Crown, partly at suit of an individual, to enforce a penalty under a penal statute (the penalty being so paid partly to the use of the Crown, partly to the informer); (*b*) in the Queen's Bench Division in the name of the Crown alone, being either (*c*) *officio* informations for misdemeanors dangerous to the government (e g seditious libel, or informations filed by the Master of the Crown Office, on the complaint of a private individual, for gross misdemeanours (*d*) before a Justice of Peace in order that he may bind over recognizances, being a statement of the facts by the prosecutor, verbally or in writing, with or without oath. Most of these uses exist also in the United States, where, however, the more common sense is 'An official criminal charge presented, usually by the prosecuting officers of the State, without the interposition of a grand jury'

Infra-, *infowrme*, obs. ff. Inform *v.*

Infra- infrā, *prefix*, repr. I. *infra* adv. and prep. 'below, underneath, beneath' (in med. I. also 'within'), used in numerous recent formations, chiefly adjectival

This use of *infra* is scarcely a Latin one, though *infra fortunam* 'situated below the fortune' occurs in a translation (Lewis and Short), and *infra dignitatem* 'lying within the walls in Gregory of Tours (Du Cange). Its recent development follows the analogy of other prepositions, it is regularly opposed to *supra*, sometimes to *super*: the second element ought strictly to be one of Latin origin, but it is used in English.

A In prepositional relation to the sb represented in second element

1 Denoting 'below', 'beneath' (i. e. 'lower down than'), in respect of local situation or position. Chiefly in terms which are the adjectival representatives of phrases in which *infra* would be followed by *se* in the accusative, as *infra-axillary* 'that is *infra axillam*, below the axilla or axil', *infra mammary*, 'that is *infra mammas*, below the breasts' The majority of these are anatomical terms. In a few cases the second element appears to be a sb. as *infraclavicle*. More rarely *infra-* is simply prefixed to an adj., as *infra-red*, *infra-acid*.

2 Denoting 'below', 'beneath' in respect of status or condition, as *infrahestial* 'lower than bestial', 'beneath the brutes' In these, *infra-* seems to be directly prefixed to an adjective

3 Denoting 'within' (as in med. L.), as *infra-mentoral*, *-sternal* (see these words below) here the formation is as in 1

B In attributive or adverbial relation to the second element 'lower', 'inferior', 'under-', as *infraconstructos*, *infraposition*, etc.

Such compounds can be formed at will when required, the following are the principal ones in use For the etymology of the second element see the simple words Axillary, Barbial, Cortical, etc

In most of these compounds, practice varies as to the use of the hyphen, the hyphen is usual when the compound is new, or more or less of a nonce word, e. g. *infra-red*, *infra-human*, *infra-natural*, but it is usually omitted in recognized terms, as *inframaxillary*, *infrascapular*, except when the following element begins with a vowel, as in *infra-auditory*, *infra-inguinal*, *infra-orbital* It may however be used for the nonce, whenever emphasis is placed either on the prefix, or on the composite character of the word

-ing[1], suffix forming verbal derivatives, origin ally abstract nouns of action, but subsequently de veloped all the various directions of use -*ing*, -*inge*, OFris -*inge*, -*enge*, -*ineg*, OS -*unga* (MLG and MDu -*inge*, Du -*ing*), OHG -*unga*, -*ung* (MHG -*unge*, Ger -*ung*), ON -*ung* and -*ing*, not known in Gothic —O leut type * -*ungō* (and ? * -*ingō*) stem , not identified outside Teutonic In OE the more usual form was -*ung* (inflected -*unge*, but -*ing* also was frequent, esp in derivatives from original *ja* verbs (see Cosijn, *Altwests Gramm* II 21, 22) In early ME , -*ung* rapidly died out, being scarcely found after 1250 and -*ing* (in early ME -*inge*) became the regular form In later MF , -*yng* was a frequent scribal variant

1 The original function of the suffix was to form nouns of action, as *a tning* AARING, from *to aran* to ear, plough, OFRIS *ethning*, -*ening*, -*ining*, -*ing* CHEALING, *cilding*, *ung* CHIDING, *cvipan*, CEPPING, *gebing* EBBING, *fedung* FEDING, *gadering* GATHERING These substantives were originally abstract, but even in OE they often came to express a completed action, a process, habit, or art, as *lārung*, -*ung* BLESSING, *learnung* LEARN ING, *lādung* leading, leadership, LEADING, and then admitted a plural, sometimes they became concrete, as in *bedding*, *earthing* dwelling, *offung* OFFERING, *rynning* rennet, LARNING ‡ During the ME period all these uses received greater development, and in the 14th c the formation became established, esp in the gerundial use (see 2 below), as an actual or possible derivative of every verb By later extension, formations of the same kind have been analogically made from substantives (see e, g, below), and, by ellipsis, from adverbs, as *innings*, *offing*, *outing*, *homing* (home coming), while nonce words in -*ing* are formed freely on words or phrases of many kinds, e g *oh text-hearing*, *hoo hooing*, *pishooing*, *jo hoing* (calling *oh !*, *hoo ! hoa !*, etc) *hee-hawjedoing* (saying 'how do you do?'), 'I do not believe in all this *puttying*' having pints of beer

In current use, verbal substantives in -*ing* may be grouped as to their sense, under the following heads

a Nouns of continuous action or existence, as *raining*, *falling*, *flying*, *kicking*, *leaning*, *pushing*, *running*, *sleeping*, *speaking*, *standing*, *walking*, they are distinguished from verbal nouns in the form the verb stem + -*ing*, as *a fall a kick*, *a push*, *a run*, *a sh ot*, *a step* etc, in that the latter denote a momentary or short duration, having a definite beginning, and end as grammatically take a and plural, while the abs in -*ing* imply indefinite duration without reference to beginning or end and take no plural Of 'a hold *ing*', 'a *holding* is continuous there is no break, but not many of it

b The notion of action may be limited to that of a single or particular occasion, as *a bu sting*, *a wedding*, *a meeting*, *a sitting*, *a morning*, *an evening*, *an outing* As thus used, the sb takes a plural 'three long sittings'

c The notion of simple action passes insensibly into that of a process, practice, habit, or art, which may or may not be regarded as in actual exercise, e g *reading* and *writing*, are now common acquirements so *dr awing*, *sing in g*, *fencing*, *smoking*, *swimming* Words of this kind are also formed directly from sbs which are the names of things used, or persons engaged, in the action such are *balloon ing*, *blacksmithing*, *canvassing*, *climbing*, *cricketing* (cricket), *fighting*, *fowling*, *guard ing*, *hopping* (hop-picking), *hunting* (gathering hurts), *mooning*, *nutting*, *sniping*, *buccaneering*, *cattering*, *soldiering*, and the like

d Hence often transferred to the concrete or material accompaniment or product of the action or process, as 'the paper was covered with *weaving*', so *binding*, *blacking*, *dripping*, *dubbing*, *lightning*, *sewing*, *stitching* etc

e Hence as the designation of a material thing in which the action or its result is concreted or embodied, as *a weaving* was affixed to the wall , so *a corn ing house*, *a landing*, *skating*, *sounding* (of a river), etc A peculiar instance is *a being*, one wherein the attribute of *being* or existence is exemplified, now usually *a being*

f Often used as the collective designation of the sub stance or material employed in an action or process as *clothing*, that with which one is clothed *saddling*, *carpeting*, *ceiling*, *edging*, *flooring*, *gearing*, *gilding*, *housing*, *lining*, *rigging*, *roofing*, *shipping*, *tackling*, *tiling*, *trimming*, etc

g In the preceding group there is often a sb of the same form as the verb, with which the noun in -*ing* comes to be closely associated, as in *bed*, *bedding* — *clothes*, *clothing* — *floor*, *flooring* , *sail*, *sailing*, *ship*, *shipping*, etc Hence true formations in -*ing* from substantives without a corresponding verb, esp in industrial and commercial language, with the sense of a collection or indefinite mass of the thing or of its material, as *anthering*, *coping* or *corneing*, *cottering* *timbering*, *piping* *scaffolding*, *tubing* *tuggings*, *quilting*, *tacking*, *sheeting*, *shirting*, *tickings*, *trouserings*

h. In some words the concrete sense ppx as exclusively or preferentially, in the plural *ings* e g *carvings*, *leerings*, *sweepings*, *tidings*, *hangings*, *innings* *moorings*, *trappings*

Other exceptional or irregular uses of -*ing* are discussed under the individual words

The old sb in -*ing* often forms the second element in a compound The first element may be a qualifying adj which in the finite tenses of the sb formerly stood either before or after it, but in the vbl sbs and adjs regularly preceded, and thus came to be treated as the first element in *ox go or go ox* came *ox going*, now *ox gone*, or *outgoing* — *to do something in vain*, *swimming off as in sea*, *up rising*, *well doing*, *well being*, *well meaning* (adjs) In the vbl sb, the direct, indirect, or adverbial object of the verb, as *book keeping*, *child bearing*, *class teaching*, *house keeping*, *sheep shearing*, *sea faring*, *hand writing*, *type writing*, in merrily-a subjective genitive, as *cock crowing*, *sun rising*

The vbl sb often stands in an attributive relation to another sb, as in the *building trade*, = the trade of building, *drawing materials* = materials for drawing, *singing lessons* = lessons in singing, when such expressions are habitually established, they are regularly hyphened, and pronounced with the stress on the first element, as in *bee-keeping*, *bone-carving*, *knife-boarding*, *match-selling*, *house-flooring*, *press-hanging*, *stock-taking*, *tea-tasting*, *sheep-washing*, *steel-facing*, *wheel-thinking*, *ring-dancing*, *turn-tabling*, *walking-stick* etc But, when the classification is only occasional, and the vbl sb stands in a simple attributive relation to the following sb, it approaches in function to an adjective, and is usually left in the form of a distinct apple (1896) used adjectivally The sense generally determines the nature of the collocation thus, *drawing lessons* are not lessons in drawing, but lessons in drawing, *a painting fee*, not a fee that paints but a fee of painting, *a drinking cup*, not a cup that drinks, but a cup for drinking with A difficult case is *walking staff* = *walking stick* = a *walking stick* = a stick for walking. But in some cases in which the second element denotes a machine, agency, or agent, it is difficult to say whether the vbl sb used as the vbl sb used attributively or the present pple used adjectivally, e g *a sitting tool*, *a bursting chair*, *an advertising agency* In accordance with general analogy such combinations are, as a rule, treated in this dictionary as attrib uses of the vbl sb

2 The most notable development of the vbl sb in -*ing* is its use as a gerund, i e a substantive with certain verbal functions, particularly those of being qualified by an adverb instead of an adjective, and of governing an object like a verb e g the habit of *speaking slowly* (= loose speaking , he has hopes of *coming back speedily* (= a speedy return), he practises *writing* = the writing of *books*, *articles*, *essays* in the art of *building* *learning a house* (= the building of a house for himself), after *having written a letter* (= the completion of the writing of a letter

This gerundial use is peculiar to English, of which it is a characteristic and most important feature, it was unknown to OE and early ME.

The first traces of it are set pointed out (see R Blume *Ursprung und Entwicklung des Gerundiums im Englischen*, Bremen 1880) occur c 1340 in the Ayenbite of Inwit and in the writings of Rich ard Rolle of Hampole in the separation of the adv in *downcoming*, *downfalling*, *ingoing*, etc, and the placing of it after the vbl sb, *comen, down falling* (*here, goinge in* (*ther*, *comyng, down in, fall down to in* This was soon extended to adverbs and adverbial phrases generally, so that it has now established that any vbl sb could, like the vbl sb belonging, take an adverbial qualification In other respects the vbl sb first retained its construction as a 1330 HAMPOLE *Prose Tr* (E E T S) 21 'all manere of outthlaw eynge of ydlenes and of unprofytly spekynge 1375 BARBOUR *Bruce* XIII 380 Cuthbert's vnsound and knowlechyng, and ceassyng by mercy schuld amende vs *Ibid* XIV 74 with outten mercy askynge This gerundial construction is very frequent in Wyclif Bible (1388) and it is significant that he regularly uses it in translating the Latin gerund, while he retains the original subst mixed construction in rendering the Latin gerundive Thus, *Exod* XIX 1 'the thridde month of the goyng of Yrael out [*egressionis*] of the lond of Egipte' but *Deut* XII 30 'in resey vynge [*requirendi*] the lifiynge of him', *Mark* II 15 'power of heelynge [*curandi*] sikenesse, and of castynge out [*ejiciendi*] fendis' Imitation of the Latin gerund was thus up and running at the time of the development of the Eng gerundial use of the vbl sb Another influence may have been the literal rendering of the Fr gerund (identical in form with the pr pple) after *en*, as in *en tenant*, L *in tenendo*, in coming,

The full development of the gerundial use before 1400 led necessarily to an indefinite increase of vbl sbs in -*ing*, since every verb now had one as an actual or potential dependent In conjunction with the formal identity of gerund and present pple (see the pr pple) this led, also, at a later date to the introduction of gerundial expressions for the perfect and future tenses,

for the pr. ns was not corresponding in form with the rules he ... ame tense and voices. Thus SIDNEY *Arcadia* 1 968 'a wit of consider tion in not *having demanded* thus h' SPENSER *F. Q.* III iv 50 'feare of *being* fowly *shent*, MERS *Test. Tel.* 1 xi 8 2 'by *being* unto God *united*, KS *Lycidas* 1 10 'in *having known* no touche is youth, *I implead* in 19 'I will weepe for *having* tred you, *Mod.* 'The news of his *being about to return* e, instead of *having been slain* by the enemy'

it, although the gerundial use was fully established by t it was a long time before it was distinctly separated t the earlier substantival use The vbl sb has *the* (or valent) before it, and *of* (or equivalent) after it, *having been made, being about to go* etc, which have the same form as the corresponding participles (see 1a 2a) The identity of form of participial and gerund probably also assisted the process whereby, at a later date such a combination as the king went a hunting formerly *was* or *an* hunting, was shortened to the king went hunting, the latter word being then taken as the participle and this to the shortening of the sb as a building, into, was built ng to the adjective building, in which a building is taken as a pple it must be explained as a pple *passive* l ning, built To this same cause must be ascribed some of the unique restrictions of the gerund and the tendency of the vbl sb when used attributively to run together with the pr. pple used objectively, as in *sitting tools, a dri ng wheel* etc

The termination *-ing* is that of the pres. pple, whether used as part of the verb, or adjectivally; also of adjectives of participial origin or formation, as *surprising, charming, blessing, freshwater, non-jurring, hulking, lumping, straplping, swinging*, and of prepositions or adverbs of participial origin as *concerning, during, excepting, notwithstanding, pending, touching*

As with the vbl sb (1a), words of participial form and use may be formed on other parts of speech or on phrases, e g *buccaneering* adventurers sailors *go hoeing* lustily, *hero ally-ing* acquaintances

3 -ing, a suffix forming derivative masculine sbs with the sense of 'one belonging to' or 'of the kind of', hence 'one possessed of the quality of', and also as a patronymic = 'one descended from, a son of', and as a diminutive Found in the same form, or as *-ung*, in the other Teutonic langs Of examples are *ayling* ATHELNEY *cyning* KING *farthing* 'a young child, *fugeling* fugitive, *hlæwing* whoremonger, also the patronymics *Ælfwealding* son of Æthelwulf, *Legbrihting, Cerdicing, Wodening*, etc (OE Chron anno 855) *Aldaning*, etc (*Andrif Gosp* Luke III 38), and the gentilic names *Hocsingas, Islingas, Centingas* (men of Kent), with such Scriptural names as *Gedeoning, Matthiasing, Simoning*, etc Thus suffix also formed names of nouns, as *pending, penning* PENVI, *scilling* SHILLING, and of fractional parts, as *feorþing* quarter, FARTHING, *teoþung, ung* tenth, TITHING so ON *þriþjung-r* third part, *thriding* RIDING (of Yorkshire)

Among words of various ages with this suffix are *berthing, bunching, gelding, goldfinch, herring, hireling, sweeting, whiting, wilding* See also the compound suffix -LING (-l + -ing)

[Voss. *Etym.* (1662) held that some French etymologists to be adopted from Fr., with coalescence of the article, for *Lingot*. The origin of a term of alchemy (as this evidently was) in Lat., is not *a priori* probable. Also, the only recorded sense of *lingot* (which appears frequently in 15th–16th c.) is—our sense 2, while the English *ingot* before 1538 is known only in the Chaucer quotation (not unique as regards the sense) from *in adv.*, and *gotan*, ancient participle of Oe. *geótan*, Mk. *geotan*, 3 *pr. sg. geteð* mod. dial. *gett* to pour, to cast (metal). Here there is the difficulty that the pa. pple. *gotен* was conformed to the rest of the vb., as *gotan, gotin, goten*, before the 14th c., the hard *g* might perh. have been softened in an old variety, and, in the dern. river *gote*, 'water-course, gutter, drain', but even in that case we should have expected an original final vowel, giving ME. *ingote*. The existing evidence is thus too contradictory for any certain conclusion.]

† Some of the Inns of Chancery and of Court derive their specific names from those of noblemen or persons of quality, whose residence or property they formerly were, and from whom they were at first often rented It has hence been sometimes assumed that the term *inn* here meant originally 'the town house or residence of such nobleman or gentleman, e g that 'Lincoln's Inn' meant originally 'the Earl of Lincoln s town house' but there is no evidence that *inn* ever had any such specific sense (as distinct from its general sense of 'habitation, lodging, house'), some it, and no proof that any of these houses have the name *hospitium* or *inn*, until it was actually the *hospitium or hostel* of a body of students.

'within' These two words were originally different in sense, *innan* being orig. 'from within', but in late OE. there remained little or no distinction between *innan* and *inne* as adverbs, the main difference being that *innan* was only an adv., while *innan* was both adv. and prep. A few examples of *innan* as prep. are found in 12th c., and *innan* adv. occurs in Hatton Gospels and Lavamon *Inna* prep. in Lamb. Hom. may be an error for *innan* or *inne*. But the ordinary early ME. form for both adv. and prep. was *inne*, frequent in southern writings c. 12–14th c. It is very rare in the Kentish of Shoreham and the Ayenbite, in which the prep. is regularly *ine*. In northern works, from *Cursor Mundi* onwards, and in Midland works after the time when final *-e* became mute, *inne* (*ynne*) appears to be merely an occasional spelling of *in*]

Insect (i nsekt), *sb* [ad L. *insectum*, ellipt for *animal insectum* animal notched or cut into (Pliny), from *insect-us*, pa pple of *insecare* to cut into, a rendering of Gr. *ἔντομον* insect (Aristotle) cf. Entomo-. Cf F *insecte* (Du Pinet, 16th c in Hatz-Darm.)]

1 A small invertebrate animal, usually having a body divided into segments, and several pairs of legs, and often winged; in popular use comprising, besides the animals scientifically so called (see 2), many other arthropods, as spiders, mites, centipedes, wood-lice, etc., and other invertebrates, as the 'coral-insect', formerly (and still by the uneducated) applied still more widely, *e g* to earth-worms, snails, and even some small vertebrates, as frogs and tortoises.

1601 Holland *Pliny* Explan. Words Art, *Insects*, little vermine or smal creatures, which haue (as it were) a cut or diuision betweene their heads and bodies, as Pismires, Flies, Grashoppers, vnder which are comprehended Earth-wormes, Caterpillers [etc] 1611 Cotgr, *Insecte*, an insect, a small Reshlesse, and bloudlesse vermine, diuided (in some sort) betweene the head, body and bellie, as an Ant, Fly, Bee, etc, vnder which, the Earthwormе, Caterpiller, etc be also comprehended 1646 Sir T Browne *Pseud Ep* III xv 149 The Scolopendre of a hundred footed insect 1658 *Bergerac's Satyr Chan* xxvi 95 Methinks I hear an angry frog croak I use this Author something ill to reduce him to the Insects 1661 Lee *Hist Anim & Min* Introd. 2 *Zool* An animal belonging to the class *Insecta* of *Arthropoda* see Insecta 2

Only gradually restricted from the wider popular use The earlier quots. here refer to true insects, but their authors would undoubtedly have included other animals under the name.

1601 Holland *Pliny* xi 1 310 Many and sundrie sorts there be of Insects and well may they all be called *Insecta* by reason of those cuts and diuisions, which some have about the necke, others in the breast and belly, the which doe goe round and part the members of the bodie, hanging togither only by a little pape and fistulous conveiance 1658 Phillips, *An Insect*, the smallest sort of Animal, as a Fly, Bee, or Ant, some think them to be so called, because they have a kind of division, or section, between the head and the belly 1709 Locke *Elem Nat Philos* v (1750) 38 They are called insects, from a separation in the middle of their bodies, whereby they are, as it were, cut into two parts, which are joined together by a small ligature as we see in wasps, common flies, and the like 1753 Chambers *Cycl Supp*, *Insects* make one of the classes of animals, the characters of which are, that their body is covered with a sort of bony substance instead of skin, and their heads are furnished with antennæ, called horns. Linnæus *Syst Nat* p 83 1774 Goldsm *Nat Hist* IV 137 We may define insects to be little animals without red blood, bones or cartilages, furnished with a trunk or else a mouth, opening lengthwise, with eyes which they are incapable of covering, and with lungs which have their openings in the sides. 1808 Dtank *Elem Nat Hist* II 217 Latreille divides the class of insects, as now restricted, into eleven orders The *Parasita* and *Hyposmenes*, which Latreille previously arranged with the Arachnides, Dr Leach first added to the class of Insects 1862 Darwin *On Fertil Orchids* 1 38 Certain orchids require special insects for their fertilisation. 1892 L C Miall in *Nature* 10 Sept 457/1 We understand insects to be animals of small size, furnished with a hard skin and six legs, breathing by branched air tubes, and commonly provided in the adult condition with wings.

Most frequently followed by *of*, in the prepositional phrase *in stead of, instead of* (= F. *au lieu de*), formerly also *in the stead of*, which is still used dialectally, e. g. in the southern counties of Scotland. See STEAD *sb.*

Of 16 instances of the phrase occurring in the text of Shakspere, 6 are printed conjunctly, but not one of these so occurs in the earlier quartos. The only instance of the conjunct spelling before 1600 is that in 3 Hen. VI, v. 1. 54, where the *True Tragedy* of 1595 has 'Instead of that', and 1619 'Instead of that'. In all other instances, the earlier reading is *in stead*, or *in stead*. Thus in 1 Hen. IV, v. 1. 8 the 1623 Folio has 'instead of thee', but the Qo of 1598 'in stead of thee', and the 6 Qos 1599–1632 'in stead of thee'.]

4 *Comm.* The act or system of insuring property, life, etc., a contract by which the one party (usually a company or corporation) undertakes, in consideration of a payment (called a *premium*) proportioned to the nature of the risk contemplated, to secure the other against pecuniary loss, by payment of a sum of money in the event of destruction of or damage to property by the particular risk (e.g. fire, or other accident), or of the death or disablement of a person, the department of business which deals with such contracts. Also called Assurance (and in 17th c. sometimes Ensurance)

Assurance is the earlier term, used alike of marine and life insurance before the end of 18th c. In general application is retained in the titles and policies of some long-established companies (e.g. the London Assurance Corporation) *Insurance* (in 17th c. also Ensurance) occurs first in reference to fire. (1635 in Insure *v.* 4), but soon became extensive with *assurance*, the two terms being synonymous in Magens 1755 (see Assurance 3). *Assurance* would probably have dropped out of use (as it has almost done in U.S.) but that Babbage in 1826 (see quot.) proposed to restrict *insurance* to risks to property, and *assurance* to life insurance. This has been followed so far that *assurance* is now rarely used of marine, fire, or accident insurance, and is retained in Great Britain in the nomenclature and use of the majority of life insurance companies. But in general popular use, *insurance* is the prevalent term. Mr. T. B. Sprague, followed by others, considers *assurance*, *ensure*, *assurer*, etc., the proper words for the action of the company or persons undertaking the risk, *insurance*, *insure*, *insurer*, etc., for that of the person paying the premium. This would be in some respects a useful distinction, if it could be carried out; but it would leave the members of mutual societies at once *assurers* and *insurers*

If this distinction be admitted *assurance* will signify a contract dependent on the duration of life, which must either happen or fail, and *insurance* will mean a contract relating to any other uncertain event which may partly happen or partly fail. 1848 Arnould *Mar. Insur.* (1866) I. I. 3 Marine Insurance in its essential nature is a contract of indemnity. 1853 A. Farr in *Reg. Intend (intɛ·nd), *v.* Forms: 4-5 **entend**, 4-6 **entende**, *β* 4-7 **intende**, 5- **intend** (Also 6, *3rd pers sing.* intent) [ME. a. F. *entendre*, in 11th c. also *intendre*, to stretch, extend, strain, direct one's thoughts or faculties, to hear, understand, expect, occupy oneself (also *refl.*) = L. *intendĕre* to stretch out or forth, to strain, direct, spread out, increase, turn one's attention, purpose, endeavour, maintain, assert, in med. L. also, to understand, interpret, f. *in-* (IN-[2]) + *tendĕre* to stretch, to 'tend'.

The extensive and complex development of senses in I and OF. is reflected also in English. But the chronological appearance of the senses here does not accord with their original development, those first taken over from French in 13-14th c. being figurative uses, far removed from the literal sense, which was only adopted directly from L. about or after 1600. As an attempt at chronological order would only end in chaos, a logical arrangement, according to the main with the development as gathered from ill dated examples, is here followed. But the history of consenses is obscure: see VI. The sense of early quotations is also often difficult to determine.]
