1. One of a company of men sworn to deliver a verdict on matter officially referred to them, a member of a jury, a juryman
The word has the same historical development as is seen in Jury, but has now a wider range of application than *Jurymen*, being freely used historically of members of the ancient inquests out of which the jury system arose, as well as of members of a jury chosen to adjudicate between competitors, and award prizes, to whom 'juryman' is seldom applied

Wharton's Law Lex (ed 7) xv. Unanimity is not required from a grand jury or a coroner's jury

b *Grand jury*: a jury of inquiry, accusation, or presentment (as distinguished from a petty jury or jury of trial), consisting of from twelve to twenty-three ' good and lawful men of a county ', who are returned by the sheriff to every session of the peace, and of the assizes, to receive and inquire into indictments, before these are submitted to a trial jury, and to perform such other duties as may be committed to them

This body represents the *Grand* Inquest (q v) of earlier times. In England its action has by statute and usage become greatly restricted, its principal duty being now ' to examine into accusations against persons charged with crime, and if it see just cause, then to find bills of indictment against them, to be presented to the court ', besides which, however, it may express opinions on changes in judicial procedure, make recommendations on this and kindred subjects, make presentments of nuisances, etc. Formerly, a Grand Jury of twenty four was summoned also upon a writ of attaint, to inquire whether a petty jury had given a false or corrupt verdict (abolished by 6 Geo IV, c 50) In Ireland the Grand Jury had, down to 1898, very extensive powers in reference to the general administration of the country In Scotland *grand juries* do not exist

4. *Theol* The action whereby man is justified, or freed from the penalty of sin, and accounted or made righteous by God, the fact or condition of being so justified

Protestant theologians regard justification as an act of grace in which God accounts man righteous, not owing to any merit of his own, but through imputation of Christ's right teousness, as apprehended and received by faith Roman Catholic theologians hold that it consists in man's being made really righteous by infusion of grace, such justification being a work continuous and progressive from its initiation [1386 Wyclif *Rom* v 16 Sothli dom of oon in to condempnacioun, grace foorthe of many giltis in to iustificacioun] 1526 *Pilgr Perf* (W de W 1531) 31 This grace is called the grace of iustificacyon, or grace iustifyenge, for it iustifyeth our soules before god 1565 J Norton *Calvin's Inst* iii xi § 2 (1634) We simply expound justification to be an acceptation, whereby God receiving us into favour, taketh us for righteous, and we say that the same consisteth in forgiveness of sinnes, and imputation of the righteousnesse of Christ. 1572 39 *Articles Ch Eng* xi, Of the iustification of man That we are iustified by faith only, is a most wholesome doctrine, and very full of comfort, as more at large standeth in the Homily of the iustification. 1583 Hooker *Serm Justification* § 5 The first concept of grace in their [Papists] minds is that the first of iustification the increase thereof, the second iustification 1675 Brooks *Gold Key* Wks 1867 V 61 Justification doth not increase or decrease, but all sins are pardoned at the first act of believing. 1771 Wesley *Wks* (1872) V 57 The plain Scriptural notion of Justification is pardon, the forgiveness of sins. 1827 Hallam *Hist Lit* (1858) I vii 381 The tenet of justification or salvation by faith alone, called, in the barbarous jargon of polemics, solifidianism. 1871 R. K.

K (kā), the eleventh letter of the alphabet in English and other modern languages, was an original letter of the Roman alphabet, taken from the Greek *Kappa* Κ, originally ϰ, from Phœnician and general Semitic *Kaph* כ Its sound in Greek and Latin was, as in English, that of the back voiceless stop consonant, or guttural *tenuis* But at an early period of Latin orthography, the letter C (originally representing Greek *Gamma*) was employed for the k sound, and the letter K itself fell into disuse, except in a few words, notably the term *Kalendæ* and the prænomen *Kæso*, where the traditional abbreviations Kal. and K kept up the memory of the archaic spelling. But, with the exception of such archaisms, C became the regular Latin symbol of the k sound, and, as such, was substituted for Greek Kappa when Greek words were latinized, as in *Κίμων, Κύπρος, κόμμα, Cimōn, Cyprus, comma* In late Latin, when the sound of C before a front vowel had become palatalized, or passed over to (ʧ), as in Italian *cento, cittā*, the same fate befell the C of latinized Greek words, such as *Cyrus*, but later Greek words in living (esp Christian) use such as *κῦριε ἐλεῆσον* (*κύριε ἐλέησον*), which retained the Greek pronunciation, continued to be written with K To Latin scribes of the sixth, seventh, and eighth centuries, K was thus known as a supplementary letter to C, of use in Greek or other foreign words which had the 'hard' or k sound of C before *e, i*, or *y* Hence it was naturally put to use in the writing of Old High German, Old Saxon, Old Frankish, Early Italian, and some dialects of Old French, in which a k sound came before *e, i*, or *y* In writing these languages, C was usually employed, as in Latin, before *a, o, u*, or finally, but in practice there was considerable overlapping, with the final result that, in German, K ousted C, and is now the proper letter for this sound in that language, as well as in Dutch and all the Scandinavian tongues, while, in French, K was ousted partly by C, partly by Qu, according to derivation (Thus Old Northern French *kanon, karole, katre, ke, ki, kel*, became later *canon, carole, quatre, que, qui, quel*) So 13th c It *ke, ki, perké*, became later *che, chi, perchè*

In the Romano British alphabet, K was, as in Latin, of rare use, and was not adopted as a regular letter in Welsh or Irish, though, as being quite familiar to Latin scribes, it was occasionally written as a casual variant of C In Old English, the original Teutonic k-sound was already in the earliest times fronted or palatalized before original front vowels (not the umlauts of back vowels), and for this variety of sound (kʲ, ky) a distinct symbol was provided in the Runic alphabet Yet, in the OE use of the Roman alphabet, both the guttural and the palatal sound were represented by C, although in the practice of individual scribes K was by no means infrequent for the guttural, especially in positions where C would have been liable to be taken as palatal, or would at least have been ambiguous, as in such words as *Kent, kéne, kennan, akenned, kynn, kyning, kyðed, folkes, céak, þcke*. But, even in these cases, C was much more usual down to the 11th century, and K can be regarded only as a supplemental symbol occasionally used instead of C for the guttural sound After the Conquest, however, the Norman usage gradually prevailed, in accordance with which C was retained for the original guttural only before *a, o, u, l, r*, and K was substituted for the same sound before *e, i, y*, and (later) *n*, while the palatalized OE. *c*, now advanced to ʧ, was written Ch Hence, in native words, initial K now appears only before *e, i, y* (*y* being moreover usually merged in *i*), and before *n* (–OE *cn-*), where it is no longer pronounced in Standard English, though retained in some dialects Medially and finally, *k* is used after a consonant (*ask, dark, twinkle*), or long vowel (*make, hawk, Isle, speak, week*), after a short vowel, *ck* is used instead of *cc* or *kk*, but the unstressed suffix, formerly *-ick* (*musick*), is now *-ic*, though, when a suffix in *e* or *s* follows, *k* reappears (*traffic, trafficker, trafficking*).

The native K words, being thus confined to Kc-, Ki-, Kn- (with one or two from the dialects in Ka-, Ky-), are a small company But their number is greatly reinforced by the foreign words of recent adoption, many of them very imperfectly naturalized, with which this letter is crowded These include a few modern European words, Germanic or Slavonic, but they consist mainly of names of animals, plants, trade products, and native offices, from Oriental, African, American, Australian, and Oceanic languages The number of these words is augmented by reason of the fact that some of those languages have two, or even three, distinct gutturals, for which, in ordinary English spelling, K has to stand, the combination Kh is similarly put for several fricative and aspirated sounds in Arabic, Turkish, Persian, Hindi, and other tongues (See the individual words, in the etymology of which the actual origin of the letter is stated) In giving these words English hospitality, it was formerly usual to follow English analogies and write C before *a, o, u, l, r, h*, but the more recent tendency has been to favour the use of K in these positions also, giving the non-English initial combinations Ka-, Klu-, Kl-, Ko-, Kr-, Ku-, by which the uncouth or barbarous character of the words is more strongly suggested Thus *cadi, Caffre, catgut, Calmuck, Can* (*Chan, Cham*), *cloof, Coran, creese, cummerbund*, now more frequently appear as *kadi, Kaffir, kath, Kalmuk, Khan, kloof, Koran, kris, kamarband*

In words from Greek also, many prefer to retain K, instead of latinizing it to C, and this spelling is generally accepted in some words of recent formation, as *kaleidoscope, kamptulicon, katabolism, kinetic, kudos*, while in others, as *kamocize, kakodyle, kratos*, C and K still struggle for predominance In a very few words (not of English formation), K represents Greek χ, esp in the words in *kilo-*, as *kilogramme, kilometre*, etc

1 The letter The plural appears as *K's*, K's, *Ks*, k's (Although now generally pronounced (kēz), the pronunciation (kĭ) was formerly also current)

Kantian (kæ·ntiăn), *a* and *sb* [f the name of the celebrated German philosopher Immanuel Kant (1724–1804) + -ian]

A. *adj.* Of, pertaining to, or connected with Kant or his philosophy

Kant's characteristic doctrine was that a critical analysis of our experience discloses (*a*) in logic, that thought actively synthesizes the matter of sense under certain laws (forms and 'categories') which are *a priori* determinable as universally valid for and within experience, (*b*) in ethics, that an absolutely valid moral 'law' is similarly determinable, whence the reality of God, Freedom, and Immortality is deducible as 'practically necessary', even though to speculative thought the nature and very existence of the non phenomenal or noumenal must remain 'problematic

Hence *Kantian* tends to connote 'aprioriam or 'transcendentalism, viz. the view that certain necessary truths are determinable as implications of our logical and moral experience (R. R. Marett)

1817 *Edin. Rev* XXVIII 491 Mr Coleridge has ever since been floating or sinking in fine Kantean categories. **1858** W. R. Pirie *Ing Hum Mind* II iv 104 A strong bias in favour of the Kantian metaphysics. **1864** H. Spencer *First Princ* I III § 13 (1875) 49 Shall we then take refuge in the Kantian doctrine? shall we say that Space and Time are forms of the intellect—*a priori* laws or conditions of the unknown mind? **1877** E. Caird *Philos. Kant* 566 The ultimate decision as to the Kantian Criticism of Pure Reason must turn upon the opposition of perception and conception, as factors which reciprocally imply, and yet exclude, each other

Karyo- (kæ·rɒ), sometimes **caryo-**, combining form of Gr *κάρυον* nut, kernel, employed in a number of biological terms referring to the nucleus of an animal or vegetable cell, esp to changes which take place in its structure The earliest of these were *karyolysis*, *karyolytic* (introduced by Auerbach in 1874) and *karyokinesis* (Schleicher) Those generally recognized are the following

Karyokinesis (-kăinī·sĭs) [Gr *κίνησις* motion], the complicated series of changes observed in indirect or 'mitotic' division of a cell-nucleus, hence **Karyokinetic** (-kăine·tĭk) *a*, pertaining to karyokinesis. **Karyolymph,** the more fluid portion of a cell-nucleus **Karyolysis** (karĭp·lĭsĭs) [Gr *λύσις*], the dissolution of a cell-nucleus (*Syd Soc Lex* 1887), hence **Karyolytic** (-lĭ·tĭk) *a* **Karyomito sis** [Gr *μίτος* a thread], separation of the nuclear fibres in the process of cell-division, hence **Karyomito ic, -mitotic** *adjs* **An ryoplasm** [Gr *πλάσμα* thing moulded], the formed substance or protoplasm of the nucleus, nucleoplasm (*Syd Soc Lex*) **Karyorrhexis** [Gr *ῥῆξις* breaking], bursting of a cell-nucleus **Karyosome** [Gr *σῶμα* body], one of the segments into which the fibres of a nucleus break up during karyokinesis **Karyostenosis** [Gr *στένωσις* constriction], direct or 'amitotic' division of the nucleus, by simple elongation and constriction, hence **Karyostenotic** *a*

1882 VINES *Sachs Bot* 17 In the process of division into two the nucleus usually goes through a series of changes which are designated by the term *Karyokinesis. 1894 H DRUMMOND *Ascent Man* I 80 The fertilised ovum has completed the complex preliminaries of Karyokinesis 1885 SEDGWICK in *Proc R Soc* XXXIX 243 The 'karyokinetic figures characteristic of the ectodermal nuclei 1888 ROLLESTON *Jackson Anim Life* Those peculiar changes in nucleus which have been termed karyokinetic or karyomitotic. 1897 *Allbutt's Syst Med* VI 491 Fine fibrils floating in the *karyolymph *Ibid* 168 The leucocytes, often at an early date, undergo fatty degeneration and necrosis their nuclei disappearing both by *karyolysis and karyorrhexis 1883 tr *Ziegler's Path Anat* I 83 Fragmentation, lines of granules making up the so called *karyolytic figure 1885 SCHAFER in *Proc R Soc* XXXVIII 91 The cells of lymphoid tissue multiply abundantly by *Jackson *Anim Life* Those peculiar changes in the nucleus which have been termed karyokinetic or *karyomitotic. 1897 *Allbutt's Syst Med* II 7 These cells frequently show the phenomenon of karyorrhexis, that is, a division of their nucleus with a star shaped figure in each end 1899 *Ibid* VI 491 The nucleus or *karyoplasm shows a reticulum of exceedingly fine threads

The word prob belonged primarily to the vulgar and non literary stratum of the language; but it comes into sudden, into literary use c 1000, and that in many senses, indicating considerable previous development The original sense may have been 'to lay hold' with the hand, and hence with the attention, 'to keep an eye upon, watch About 1000, it was taken to render *I observare* (orig 'to watch over'), *custodire*, *servare*, *tenere*, *habere*, and in subsequent development seems to have been largely influenced by the senses of this I word, nearly all of which it has been used to render It is also rendered the simple *I tendere* (orig 'to watch, observe'), and the compounds *conservare*, *præservare*, *sustentare* In sense there is also close affinity between *keep* and HOLD (orig 'to keep in watch over', 'keep in charge') in many uses they are still synonymous and many phrases which have now the one verb formerly had the other but in other senses, as *hold*, *keep* retains the sense of vigorous effort to retain, so that *have*, *hold*, *keep*, form a series, the members of which pass into each other with progressive intensity of action *Hold* has moreover often a sense of 'sustain support, keep from falling', not belonging to *keep*

If *cēpan* was an old word, it would go back to an OTeut **kēpjan*, but no trace of this wk. I is found elsewhere Some compare OE. *copian* (found only once) = I 'computare', and MHG. *kopfen* to watch or wait for, but uncertainty is to the length of the *o* in these words makes it doubtful whether they belong to the root *kōp* Kluge (Beitrage VIII 537) has suggested radical connexion with OHG. *chuofa*, OIc. *kōfa* cubit, orig. 'curved' (as holding, or keeping) The allied Flem *kepen* in Kilian is an error

Uncertainty as to the original sense makes a historical scheme of the various development difficult In the following, some early (and obsolete) senses are placed first under branch I branch II has the chief III the verbal senses, IV the phrases with *keep* as chief element, V those with *keeper* as chief element, VI the combinations with adverbs Although the four groups of these senses are found in the primary and literal senses, the distinction tends to melt away in the fig uses, and exp in the immumer ble phrases, in which pre sentence into which *keep* enters, in several cases these combine the notions of two or more groups In many phrases, also, the sense of *keep* is so indefinite and so dependent upon that of the object or complement, as to be scarcely capable of separate analysis, such phrases are treated under the sb or adj in question e g *keep* COMPANY, *keep* WATCH, *keep* CLOSE

I know: see Can *v* 1.]

The form is properly causative 'to cause to know,' 'to make known,' and was restricted to this use in Goth and OE At an early period, however, in all the Teutonic tongues, the verb also acquired the sense 'to know' This sense may have been taken from Norse, in which both senses were in early use In mod. Eng *ken* is only archaic (in sense 6) and has its pt. and pp. *kenned* (cf *pt n*, *kenned*); in Sc. (where it has entirely displaced 'know') the pa. t. and pple. are *kent*, and south Sc *kend*

The mod pronunciation (*kī*) is abnormal The other OE. words with a similar development are *dæg*, day, *hlæfdige*, lady, *grǽg*, grey, gray, *hrǽgl*, whey; and that *key* had the same vowel as these in ME. is proved not only by the frequent spelling *kay*, but by its constantly rimed with *day*, *way*, *assay*, *play*, etc. This was evidently the standard pron. down to the close of the 17th c., Dryden has the rime with *tray* more than once in one of his latest works (1700). On the other hand, we find even in 15th c. a (northern) spelling *kee*, and in Scottish MSS of the same cent the form *key* (pl. *keys*) shows the vowel in that division not the same as in *day* or *clay*, in somewhat later Scottish (16th–17th c) the identity of the vowel with that which gives mod (*i*) is established by rimes. In mod. Southern Sc. also, *key* has the same diphthong (*kei*) as *fe, me, we, dee, see, tree*, etc., proving that it must from an early period have had the same vowel as these, but not that of *bid* at the time. And the same history in Sc. (*wi*), but in Eng remains (*wī*) The mod pronunciation (*kī*) thus appears to be of northern origin, and the result of a shift that came into the natural Eng use. Cf the surname *Keys* or *Key* (*Cairns*) in *Cambridge* (v. *Key* at *College*, Cambridge).

Kiddy (ki·di), *v. slang.* [Cf. prec. and Kid *v.*[4]] *trans.* To hoax, humbug, take in (a person).

1851 Mayhew *Lond. Labour* I. 462 (Huppe) There they met with beggars who kidded them on to the hulks. 1864 Dickens (Webster), Some of the swell mob so far kidded us as to hire a house and shop, stuff away from London by Whitechapel, and come into Broom from the opposite direction, while we were waiting for them at the rail.

Kide, obs. f. Kith, pa. pple. of Kithe.

Kidenere, -nere see Kidney.

Kidful see Kid *sb.*[4]

Kidge, var. Kedge *a.*

† Kidgell, obs. north form of Cudgel.

*c*1570 *Durham Depos* (Surtees) 264 He cutt 4 kidgells or houghells to hange salmon nets upon. 1575–6 *Ibid.* 295 [He] hyfted up his staff or kidgell.

Kid glove, ki d-glo ve.

1 A glove made of kid-skin, lamb-skin, or other similar leather (*With kid gloves*, in a gentle, delicate, or gingerly manner).

1832 Marryat *N. Forster* xxxii, A new pair of grey kid gloves. 1834 W. Hone *Every Day Book* 69 Men and women's fine gloves, or those that pass in the shops under the denomination of kid gloves, but which are really made from lamb skins dressed at Yeovil. 1888 Bryce *Amer. Commw.* II. iii. xiii. 410 The Americans who think that European politics are worked, to use the common phrase, 'with kid gloves.'

2 *attrib.* as *adj.* Characterized by wearing kid-gloves, dainty or delicate in action or operation, avoiding real exertion or every-day work, free from roughness or harshness.

1856 H. T. Dixon *Poet & Paddock* VII. 115 He was, in fact, a mere kid glove sportsman. 1888 T. W. Higginson *Women and Men* 296 Anti kid glove literature is really no better than the kid glove literature at which it affects to protest. 1892 Zangwill *New Mystery* 81, I don't like your kid glove philanthropists meddling in matters they don't understand.

Hence **Ki d-glo ve** *v. trans.*, to cover (the hands) with kid-gloves. **Ki d-glo ved** *a.*, wearing kid-gloves; also *fig.*, refined, dainty, delicate, etc.

1848 Clough *Bothie* v. 117 Dancing and pressing the fingers kid gloved of a Lady Maria. 1850 Sala *Gas-light & D.* xxiv 276 You can descry a kid gloved hand, with rings outside the glove. 1860 O. W. Holmes *Elsie V.* (1889) 11 The richer part of the community that kid glove their

†b In this sense, chiefly in a genitive phrase, dependent upon following sb Cf KIND *sb* 14

In OE the genitive might be either sing or pl, according to sense, e g *gelic cynnes* (*cynne*) *deorcynn* kinds of each or every kind, *manigra cynna scipu*, ships of many kinds, *þreora cynna treowu*, trees of three kinds In ME, *cynnes* became *kunnes*, *gynnes* and *kynnes* (see *kynne kunne, kynne, kyn, kin* For the latter the genitive sing was often substituted, and conversely, *kynne, kin*, appeared in the sing, esp in the phr *kynne kin*, where it was used as an unmodified genitive, as in *man son, fader broder*, etc The preceding adjectival word agreeing with *kynnes, kins*, dropped its grammatical inflexion early The phrase was transferred to *kinnes*, thus *alle skynnes* (= *alles kynnes, alle kynnes*), *no skynnes*, etc Usually however the two words were at length combined, as in the later forms *askins, anykinis, fele kinis, manykinis, nokinis* or *nakinis, otherkinis, seve kinis, swilkinis, same kinis, thiskinis, whilk kin* (*kind, kyn*), *whatkinis* Few of these came down to 1600, though in the north *whatkin* is found in the 16th c, and survives in Sc and north Eng as *what'n*, beside *scran* from *swilk kin*

The reduction of *kins* to its simple uninflected form may have been assisted by the equivalent use of *manere* (MANNER) from OFr, which it thus found, as *three manner men* = men of three kinds or sorts In this, at an early period, we find of inserted: *an manere of fisce, al manere o snut spices*, the syntactical relation between the words being thus reversed, and although this appears to have rarely extended to *kin* itself, it affected its later representative *kind*, also *sort, species*, etc, so that we now say 'all kinds of things' = things of all kinds. This may have been facilitated by the fact that in the order of the words (as distinct from their syntactical relation) 'al kin things' is more closely represented by 'all kinds of things' than by 'things of all kind'. -kin (kin), *suffix*, forming diminutives, corresp to MDu *-kijn, -ken*, MLG *-kîn* = OHG *chîn*, HG *-chin, -chen, -chan, -chen* (G. *chen*), as in tDu. *hindekijn, -hen*, MLG *kindekîn*, MHG *vndechîn*, G *kundchen* little child, MDu *huse yn, kuushen*, MHG *häuschin*, G *häuschen* a ttle house No trace of the suffix is found in OE The suffix has only a limited use in English It appears occur first in some familiar forms of personal (chiefly ale) names, which were either adoptions or imitations of iminutive forms current in Flanders and Holland, where ich forms appear already in the 10th c The earliest ME xamples noted are *Jankin, Malekin, Watekin*, and *Wile*

Vol. V.

kin, found as early as 1250 (*O. E Misc* 188–191), and evidently then in familiar use These and others of the kind were no doubt common in 13–14th c (for *Jankin* and its variants see Nicholas *Pedigree of Chaucer's Jack*), but are not prominent in literature till the second half of the 14th The A text of 'Piers Plowman' has *Malkin* and *Perkin*, the B text adds *Hankyn*, and the C text *Watkyn*, Chaucer uses *Jankin, Malkin, Perkin Simkin*, and *Wilkin* 1 and in the 'Tournament of Tottenham' there occur *Davykyn, Hawkyn, Tegrykyn, Perkyn*, and *Jonkyn* The Earliest English Wills have *Idkyne* (1497), *Jankyn* (1417–22) and *Watkyn* (1433) As Christian names these seem to have mostly gone out of fashion with the 16th c, but surnames in -*kin* occur later (e g *Wilkin* in Lyndesay's 'Satyre', 2180) most of them have, however, survived as surnames, usually with the addition of *s* or *-son*, as *Jenkins, Watkins, Wilkinson, Dickens, Dickinson*, etc

Instances of the suffix being added to common nouns in the 14th c are rare, but Langland has *bondekin, pulterekin*, and *fendekin*, perhaps on the analogy of the personal names Other words in *-kin* from the same or immediately succeeding period are rather adopted from Du or Low G or obscure origin] and it is doubtful whether the ending was in every case felt as a diminutive such are *barnekin, bod kin, dotekin, Jerkin, kilderkin, napkin* Considerable obscurity attaches to many later words (16–17th c) of the same type, as *jerkin, bumpkin, pipkin, gaskin, gerskin, bumkin, gherkin, firkin, minikin*, etc in some of these the ending is that of different origin or due to assimilation, as in *pumpkin, tamkin* for earlier *pumpion, tampion*. Apparently from Du are the following words *minikin, cannikin, catkin*, and *mannikin* Outside of these and some forms used in oaths, as *Jukins* (for *Judykins*), *bodykins, pittikins*, the suffix is comparatively rare, the only example which has obtained real currency is *lambkin* (1570), though a few others are occasion ally employed, as *boykin* (1542) *doe-kin, godkin, ladykin*, and nonce words such as *gleekin, hoodkin, handkin* (after *mannikin*) *Bootskin* (18th c.) is not clearly a diminutive in origin, and in *cuckoo-kin, thumbikin* (cf also *greenkin*) the force of the suffix is different.

A *adj* Relating to pure motion, i.e. to motion considered abstractly, without reference to force or mass

1864 *Athenæum* No 1924 340/3 Kinematic effects of revolution and rotation. 1879 THOMSON & TAIT *Nat Phil* I i 483 The design of a kinematic machine essentially involves dynamical considerations. 1880 *Nature* XXI 141 M. Mannheim has recently introduced the expression kinematic geometry dealing with motion independently of forces and times

B *sb* = KINEMATICS

1873 W. K. Clifford *Pure Sciences in Contemp Rev* (1879) Oct 717 These rules are called the laws of kinematics, or the science of pure motion.

Kinematical (kainĭmæ·tikăl), *a* [f as prec + AL] Of or pertaining to kinematics, kinematic

1864 in WEBSTER 1879 THOMSON & TAIT *Nat Phil* I i § 91 I have used kinematical curves, which give good instances of kinematical theorems. 1884 *Health Exhib Catal* 143/2 Kinematical Apparatus

Kinematics (kainĭmæ·tiks). [In form a pl of KINEMATIC see IC 2, and quot 1840.] The science of pure motion, considered without reference to the matter or objects moved, or to the force producing or changing the motion (Cf KINETICS)

1840 WHEWELL *Philos Induct Sc* I 146 Ampere, in his Essay on the Philosophy of the Sciences (1834) proposes to term it Kinematics (*Cinématique*). 1859 [R. LEAKE] *Motion* v, The phenomena of Motion . . . what has hitherto been called Dynamics, but more correctly kinematics. 1879 THOMSON & TAIT *Nat Phil* (ed 2) Pref 6 We adopt the suggestion of Ampere and use the term Kinematics for the purely geometrical science of motion in relation to time. 1882 MINCHIN (*title*) Unplanar Kinematics of Solids and Fluids

Kinematograph (kainæ·mătŏgrăf, kainĭmæ·tŏgrăf). Also *-ph*. (Gain-) [ad Fr *cinématographe*, f Gr *κινημα* motion + -GRAPH] A photographic contrivance (invented by Messrs Lumière of Paris) by which a series of instantaneous photographs taken in rapid succession can be projected on a screen with similar rapidity, so as to give a lifelike reproduction of the original moving scene

1896 *Daily News* 21 Feb 5/4 An exhibition of the 'Cinématographe', in the Marlborough Hall of the Polytechnic, Regent street, yesterday afternoon. The Cinématographe is an invention of M. Lumière and it is a contrivance by which a real scene of life and movement may be reproduced before an audience in a life size picture. 1897 *Westm Gaz* 2 May 8/1 It was the lamp of the kinematograph which set the place on fire. 1897 *Pop Sci Monthly* Dec 180 In the cinematograph they are projected upon a screen. 1899 *Harper's Mag* Feb 385 What is called 'the American Biograph —an improved form of the kinematograph

Kinegraph (kăi nĭgrăf) Also cinegraph [irreg f Gr *κινέ-ειν* to move + -GRAPH] A picture representing objects in motion, produced by bringing separate pictures before the eye in such quick succession as to blend the images into one continuous impression

1895 *Anthony's Photogr Bull* IV 100 A simpler optical illusion still is that known as the 'kinegraph'. 1895 *Daily News* 14 July 6/4 Kinegraph, or better, Kinegraph, means a picture of movement—of moving objects.

I 1. The usual title of the male sovereign ruler of an independent state, whose position is either purely hereditary, or hereditary under certain legal conditions, or, if elective, is considered to give to the elected the same attributes and rank as those of a (purely or partly) hereditary ruler

In OE. the title appears first as the name of the chiefs of the various Anglian and saxon 'kins' tribes, or clans who invaded Britain, and of the petty states founded by them, as well as of the native British chiefs or princes with whom they fought, and of the Danish chiefs who at a later time invaded and occupied parts of the country Among the Angles and Saxons the kingship was not strictly hereditary according to later notions, but the *cyning* was chosen or accepted in each case from a recognized kingly or royal race or family usually the nearest descending up to Woden. With the gradual ascendancy and conquests of Wessex in the 9th and 10th c., the king of the West Saxons became the king of the Anglo-Saxons, Englelond, *Angelcynnes gewaruum*, *gentis Angligenæ*, *Anglorum*, and the tribal kings came to an end But there still remained a King of Scotland, and several petty kings of Ireland In European and other more or less civilized countries, *king* is now the title of the ruler of an independent organized state called a *kingdom*, but in mediæval times as still in the Roman Empire, some *kings* were really or nominally subordinate to the Emperor as vassals, *ideally* representing the Roman *Cæsar* or *Imperator*), and a King is said to rank below an Emperor In reference to ancient times the name is applied, like L. *rex*, Gr *βασιλεύς*, Heb *מלך* *melek*, to the more or less despotic rulers not only of great dominions like Assyria, Persia, Egypt, but of petty states or towns such as Jericho, Ai, Mycenæ, Ithaca, Syracuse, and Rome It is still applied to the native rulers of petty African states, towns, or tribes, Polynesian islands, and the like

A the approach of the breeding season, the lower jaw of the male salmon becomes hooked upward with a sharp antagonistic beak known as the *kip*, which is used as a weapon by the fish when two or more fight for the same female; from this 'kip', the name 'kipper' is commonly explained; but this is not compatible with the identity of *kipper* and OE *cypern*, Mdr. *kypre*, which, itself, though phonetically unobjectionable, is also unproved, since the exact sense in which these words were used does not appear from the context. Moreover, in the quots of 1376 and 1533–4 in B 1, *kipper* applies to include both sexes]

A *sb* 1 A name given to the male salmon (or sea trout) during the spawning season (The female is then called a *shedder*.)

Some recent writers give as the meaning 'the male salmon when spent after the spawning season', thus making the term equivalent to KELT, but this is not borne out by the earlier instances, which, when clear, evidently relate to the time when the fish is full of milt, and needs protection on account of its breeding value, nor does it harmonize with some later authorities, e. g. Jamieson, who says, '*Kipper*, salmon in the state of spawning'; it is directly challenged by some (cf quot. 1879), and it seems to have arisen from misapprehension of such qualifications as 'unwholesome', 'out of season', easily applied to fish from the approach of the spawning season. For this Pennant seems largely responsible see quot 1766 in B 1

4 Name of an order or rank a. In the Middle Ages Originally (as in 3), A military servant of the king or other person of rank; a feudal tenant holding land from a superior on condition of serving in the field as a mounted and well-armed man In the fully-developed feudal system One raised to honourable military rank by the king or other qualified person, the distinction being usually conferred only upon one of noble birth who had served a regular apprenticeship (as page and squire) to the profession of arms, and thus being a regular step in this even for those of the highest rank b In modern times (from the 16th *c*) One upon whom a certain rank, regarded as corresponding to that of the mediæval knight, is conferred by the sovereign in recognition of personal merit, or as a reward for services rendered to the crown or country

The distinctive title of a knight (mediæval or modern) is *Sir* prefixed to the name, or 'Sir John Falstaff' *Knight* (also *knighte* or *knyt*) may be added, but is much less somewhat unusual A knight who is not a member of any special order of knighthood (see 12 b below) is properly a *knight bachelor* (see BACHELOR 1 b) Various ceremonies have at different times been used in conferring the honour of knighthood, esp that of the recipient kneeling while the sovereign touches his shoulder with the flat of a sword; knights of the higher orders are now frequently created by letters patent In point of rank the mediæval knight was inferior to the earl and baron; modern knights rank below baronets, and the dignity is not hereditary

In early use the *Knight*, as the type of the military profession was often contrasted with the *clerk*, *merchant*, etc, and in point of rank with *king* The characteristic qualities expected in a knight, as bravery, courtesy, and chivalrous conduct, are constantly alluded to, and the name is used allusively, *as a good knight!* often implied these qualities as well as the mere rank

WIT, Ger *wissen*, and that of CAN, so far as this meant to 'know' Hence Eng *know* covers the ground of Ger *wissen*, *kennen*, *erkennen*, and (in part) *können*, of F *connaître* and L *(g)noscĕre*, *co-gnoscĕre*, and *scire*, of Gr γιγνώσκειν and εἰδέναι (οἶδα) But in Sc the verb KEN has supplanted *knaw*, and come to be the sense-equivalent of 'know' in all its extent of signification As *gecnāwan* came down as late as 1400 in form *cknowen* KNOW, the pa. pple in r-, *y-*, in southern ME, may belong to either form

Signification From the fact that *know* now covers the ground formerly occupied by several verbs, and still answers to two verbs in other Teutonic and Romanic languages, there is much difficulty in arranging its senses and uses satisfactorily However, as the word is etymologically related to Gr γιγνώσκω, *(g)nōscĕre* (*g)nōvisse*, F *connaître* (—L. *cognōscĕre*) to 'know by the senses', Ger *können* and *kennen*, Eng *can*, *ken*, it appears proper to start with the uses which answer to these words, rather than with those which belonged to the archaic vb. to WIT, Ger. *wissen*, and are expressed by L. *scire* and F *savoir*, to 'know by the mind' This etymological treatment of the word, and the uses to which it has been put, differs essentially from a logical or philosophical analysis of the notion of 'knowing', and of forms and phrases by which this is expressed, in which the word 'know' is taken as an existing fact, without reference to the history of its uses.

Know, in its most general sense, has been defined by some as 'To hold for true or real with assurance and on (what is held to be) an adequate objective foundation' Mr James Ward, in *Encycl Brit* XX 49 s v *Psychology*, assigns to the word two main meanings 1 to *know* may mean either to perceive or apprehend, or it may mean to understand or comprehend Thus a blind man, who cannot *know* about light in the first sense, may *know* about light in the second, if he studies a treatise on optics' Others hold that the primary and only proper object of knowing is a fact or facts (as in our sense 10), and that all so-called knowing of things or persons resolves itself, upon analysis, into the knowing of certain facts about these, as their existence, identity, nature, attributes, etc., the particular fact being understood from the context, or by a consideration of the kind of fact which is usually wanted to be known about the thing or person

in question Thus, 'Do you know Mr G ? ,' 'Do you know Balliol College?' have different meanings according to the kind of facts about Mr G or Balliol College, which are the objects of inquiry

[*Note* The origin of *knowledge* sb. and vb. and the question of the original relations between the sb. and vb. themselves are a difficult problem. According to the extant evidence the vb. is exemplified nearly a century before the sb., and is found only in southern Eng., with a form in *-leche, -lache*, while the sb., when it appears *c* 1300, is found only in northern dialect, and has its earliest form in *-lege*. Thus the northern MSS. of *Cursor Mundi* have numerous example of the sb.—the earliest known,—but do not use the vb. Later in the 14th c. the sb. is found in midl. and south. (Hoccl. Wyclif, a northern man), with the forms *-lache, -leche, -lech*; the vb. appears sparingly in the north, with the form *-lege, -leg*. If the sb. were at first only northern the want of earlier examples may be explained by their being no northern literature of the 12th and early 13th c. but this does not account for the vb. not appearing in the old or south southern literature before Wyclif, and leaves the earl relations between the vb. and sb. very perplexing. It can hardly be doubted, in view of the earliest sense of both, that they have a common origin; but what this was it is no easy to determine. The sb. has no parallel in Eng., no appears in any Teutonic lang. Some have referred it to ONorse derivative *-leikr* = play, exercise, action e. g. *kunnleikr* knowledge. If the OE. cognate ending was *-lāc*, as in *wedlāc*, wedlock, but neither the OE. nor ON. form could have given an early ME. *-leche*, this would have required an OE. *-lāce*, of which there is no trace. I on the other hand, we adopt from the vb. the assumption, there are difficulties in explaining the formation of this sb. It has been proposed to associate it with OE. verbs *-lǣcian*, pa. t. *-lǣcode*, a few of which came down as early ME. in *-lechen, -lēche*. In OE. these usually go with derivative adjs in *-lāc* (from an adj. or sb.), to which they are supposed to add a transitive force, as *wōdlāc, wōdlǣcian* = *wōdlic* friendly, *endlǣcan* be friendly with, to treat like friend, *efenlīc* equal, *efenlǣcan* to make equal, mutual *mǣdlic* meet, *mǣdlǣcan* to draw near to, approach, *wrǣtlic* right, correct, *gerihtlǣcan* to make right, correct *sumorlīc* summerlike, *sumorlǣcan* to draw near to summer, *wintrlīc* wintery, *wintrlǣcan* to draw near to winter, etc. Here the radical part is an adj. or sb. If now early ME. *-lech* Know sb.], acknowledgement, confession', went back to an OE. *-lēcnīht*, it is possible that a similar immediately in analogy, or through an adj. **gecnēolīc gecnēowe* conscious of, acknowledging, there was formed a derivative vb. **gecnēolǣcan* 'to become conscious of, make acknowledgement or confession of', which would give an early ME. **i-cnawelechen, ichele*. True, these are not the ME. forms actually found, but some variation in the accentuation of these verbs appears in the instances cited by Sievers (*Angelsæchsische Grammatik*, 2nd ed. 3, § 407, Ann. 17, 18), including a pa. pple *gerihtlǣced*, in the West Saxon *Psalt. Cant.*, beside *gerihtlēhi* while the Rushw. copy of the Lindisfarne Gloss shows, for *mǣdlǣcan*, a form *mēdlegā*, pa. t. *mēdlecade, mēdlecede*, pa. ppple *gemēdlecad*, in the Durham Ritual. We have therefore *ichen, i-cnawelechen, lechede*, may be taken as having the origin. If this was so, the verb *to knowledge* was first formed, and the sb. was derived from it, which would also agree with the extant historical data for the two words, and account for the original sense of the sb.]

A single example of *i-cnoulechien* in same sense, from *gecnáw-, i-know-*, is known in the 13th c. Northern instances of the vb are unknown before the 14th c., and are rare at all times.
