The administrative county of London set up in 1888 embraces the cities of London and Westminster, together with 27 boroughs, all represented on its county council, which has a county hall overlooking the Thames at Lambeth. The county covers 117 sq. m. and extends from Hampstead to Lewisham and from Hammersmith to Woolwich. Its council is the authority for education. It controls the fire brigade and the tramways and is the poor law authority. Owing to London's size special bodies have been created to look after other branches of the public services. The metropolitan police is a distinct body under the home secretary; the metropolitan water board provides water for an area larger than the county; and a traffic board has been set up. To supervise the activities of the port of London there is an authority that owns the docks and controls the shipping from the mouth of the estuary to Teddington. London is the seat of a bishop whose diocese covers Middlesex. Southwark which is in the county is the seat of another bishop. Pop. (1931) 4,396,821.

Outside the county is an area equal to it in population and greater than it in size, which with it makes what is called Greater London. This extends well into the counties of Kent, Essex, Middlesex, and Surrey, and into Hertfordshire, and Buckinghamshire. Among its boroughs and urban districts are Bromley, Leyton, Ilford, Walthamstow, West Ham, East Ham, Dagenham, Tottenham, Willesden, Finchley, Southgate, Edmonton, Brentford and Chiswick, Heston and Isleworth, Twickenham, Croydon, Wimbledon, Richmond, Barnes, Mitcham, and Sutton. This Greater London may be defined as a district extending 15 m. each way from Charing Cross and looked after by the metropolitan police. It covers 692 sq. m. Pop. (1931) 8,202,818.

London is a centre for almost every kind of human activity. Its factories stretch from Luton to Guildford and from Slough to Dagenham and Erith and produces a great variety of articles. Its sporting interests are proved by cricket, football and other grounds: Lord's, the Oval, the stadium at Wembley, lawn tennis at Wimbledon, Rugby football at Twickenham, and racecourses at Epsom and elsewhere on the outskirts. The leading theatres and cinema houses are near Charing Cross, although there are new and fine ones in the suburbs. Every borough has its parks and open spaces, and there are also several belonging to the crown, Hyde Park, Regent's Park, and Hampton Court for instance. Epping Forest and Burnham Beeches belong to the city. The chief of the art collections are the National Gallery, National Portrait Gallery, Wallace Collection, and Tate Gallery. The great museums are the British at Bloomsbury, and several at South Kensington. The zoological gardens are in Regent's Park. As an educational centre London has its university; this has several colleges and in 1932 the building

Malta arms

After being held successively by the Phoenicians, Greeks, Romans, and Moors, Malta was a dependency of Sicily from 1090 until 1530, when it passed to the Knights of S. John. They ruled it until 1798, when it was taken by Napoleon. In 1814 it became a British possession. Since 1921 Malta has been self-governing, the adjacent islands of Gozo and Comino being joined with it for administrative purposes. Under the constitution of 1921 there is a legislature, consisting of a senate and a legislative assembly, elected by proportional representation. In 1930, when a general election was impending, trouble between the governor and the Roman Catholic church came to a head. The British Government suspended the constitution and sent out a commission of inquiry which reported in favour of restoring the constitution. This was done in June, 1932, and the postponed general election was held, but further trouble was aroused by the decision to make Maltese, instead of Italian, an official language. The other official language is English. Pop. (1931) 241,621.

Now nominally Christian, the Maoris are eager for education, and display a high level of intelligence They send four members to the house of representatives

When, in 1840, Great Britain assumed the sovereignty of New Zealand she guaranteed the Maoris possession of their lands and fisheries Friction, however, between natives and colonists resulted in the first Maori war, 1845–48, which was closed by the definite settlement of the boundaries The second war, due primarily to the desire of settlers for the rich Maori lands, was waged in a desultory fashion between 1860–70 Despite their bad leadership and ignorance of European tactics the Maoris fought stubbornly, and the war increased in bitterness between 1863 64 Exhausted and broken spirited, they finally submitted, and by 1871 had acquiesced in British control In 1931 they numbered 68,850

MAP. Representation of the earth or some portion of it on a plane surface Most of the earliest maps were based on the seaways, and the Mediterranean was earliest mapped with any great degree of accuracy To the ancient Egyptians and Greeks we owe the first efforts at measurements of the earth's surface and the conception of the network of parallels and meridians which are an everyday feature of modern maps Eratosthenes (284–204 B C) was the first to measure the length of a degree, and Ptolemy the first to insist upon a complete network As soon as the map of the world was known in outline, attention was given to small areas The first stage in accurate map-making or cartography, is the precise measurement of latitude and longitude The next stage is when the positions of inland landmarks are determined

in relation to the coasts The more modern maps include representation of the heights

Since a map is flat, and the earth's surface is curved, it is not possible to make a map in which there is not some distortion, and various methods are adopted to reduce the inevitable distortion to a minimum These include Mercator's, a cylindrical projection, conical, perspective, orthographic, equidistant, stereographic, and gnomonic, or central, projection

History. In the centuries before the Spanish conquest the Aztecs established their rule over much of Mexico. In the reign of Montezuma II Mexico was invaded by the Spaniards under Cortés, and conquered in 1519–21. For three centuries it was governed by Spain. In 1821 Iturbide declared himself emperor, but in 1824 a republic was established. The French took Mexico City in 1863, and installed a provisional government which elected Maximilian, brother of the Austrian emperor, as emperor. On the fall of the empire in 1867 a republic was again set up, and in 1876 Porfirio Diaz was elected president, a position he held till 1911. Under his dictatorial rule the finances were rehabilitated, guerrilla warfare was put down, and economic conditions improved. The period which followed the downfall of Diaz was marked by internal disorders and by friction with the U.S.A., with one leader and then another gaining a temporary supremacy, but about 1930 a greater amount of order was secured. The differences with the Roman Catholic Church, that had resulted in a three years' interdict, were composed in 1929.

MONSOON (Ital. monsone; Arab. mausim, season). Name of a rain-bearing wind which blows over the Indian Ocean from May to Sept. In the latitude of the Arabian Sea and the bay of Bengal the normal wind is the N.E. trade, but in these regions the N.E. trade blows only during the cool season. When the sun is overhead in N. latitudes a barometric depression develops in N.W. India, with the result that the S.E. trade blows across the equator, and then continues as a S.W. wind to reach India and circle round this centre of low pressure, so that storms from the bay of Bengal pass up the Ganges valley from the S.E.

Most of India receives from 60 to 90 p.c. of its total annual rainfall during the period of the monsoon; the fall at a given place varies from year to year, and the comparative failure of the periodical downpour means famine and plague; the important economic event annually for the Indian peasant is the "bursting" of the heavy clouds which the wind rolls over India from the Arabian Sea. The term monsoon has gained a technical significance as descriptive of the special type of summer rainfall, when very nearly the whole of the annual precipitation occurs during the three midsummer months. *See* Wind.

TOPOGRAPHY. There are three main divisions in the physiography of the country: (1) the Mediterranean border; (2) the plains of the W., and (3) the Atlas mts. in the desert hinterland. This last is barren and arid, being largely sandy

waste and rock but the two former are fertile. Forests are plentiful, oaks and cork trees being the most numerous, but cedars are plentiful on the N.W. Atlas slopes.

CONSTITUTION. In principle, the country is an absolute monarchy under a sultan. In fact, the sultan is under French protection, and the country is divided into a French, a Spanish, and an international zone. The sultan resides in the French zone, generally at Rabat, which is the administrative capital, or at one of the other chief towns, Marrakesh (Morocco city) Meknes or Fez. Tetuan is the chief town of the Spanish zone and Tangier of the international zone.

COMMERCE AND INDUSTRY. Agriculture is the most important occupation, barley, wheat, beans, oats, and linseed being the chief products. Timber is milled and much fruit cultivation and market gardening is carried on, dates, olives, vines, and almonds being grown. In the French zone there are, as well, large stock-raising industries, cattle, sheep, goats, asses, and camels being raised. Phosphate is the principal mineral but lead and manganese are also produced in exportable quantities. Fishing is important, the chief centres being Fedhala and Casablanca The manufactures are few and local, largely owing to lack of adequate power, the only station of any size being at Casablanca. The chief ports are Casablanca, Rabat, Tangier, and Ceuta. Railways link up the principal centres of the country and the roads are many and good.

HISTORY. After the decline of the great Saracen power, Morocco remained a battle-ground of warring tribal factions until the end of the 19th cent. At that time the European exploitation of the country increased, Spain, France, and Germany all obtaining footings. There was constant trouble with the natives and serious international friction from time to time, but in 1912 the Sultan accepted French protection, and in the same year a treaty between France and Spain defined their respective spheres of influence and interest. In 1925 the convention of 1923, creating the Tangier zone, came into operation. The country is now pacified, the last serious revolt ending with the surrender of the tribal leader Abdel Krim to the French and Spanish forces in 1926.

MOSCOW (Russ. Moskva). City and capital of Russia (U.S.S.R.). Built on seven hills, above the river Moskva, it is 400 m. by rail S.E. of Leningrad. The dominating feature is its Kremlin, or citadel, dating from the 12th century. This ancient residence of the tsars, now the headquarters of the Soviet government, contains some of the most lavishly decorated churches in the city, among them being the cathedrals of the Annunciation, the Archangel, and the Assumption, where former emperors were crowned. Here, on the site of two monasteries, now demolished, stand a new military academy and barracks of the Red Army. Close by the Kremlin is the Red Square, the scene of political demonstrations. In a granite mausoleum lie the embalmed remains of Lenin, exposed to the public view. In the same neighbourhood are the interesting historical museum, S. Basil's cathedral, with its twelve domes, all dissimilar, and the Kitai Gorod, one of the oldest quarters.

The most noteworthy of the new buildings erected by the Soviet government include Government House, where state employees are lodged, the Lenin institute, the central post and telegraph office, the palace of the Soviets, built on the site of the former cathedral of the Redeemer, the Komintern broadcasting station, and a large electrical power station. Most of these are in a severely modern style of architecture, which contrasts strongly with that of the older buildings. In addition, many of the former churches, palaces, and large private houses have been utilised as public institutions and museums. Of the latter alone there are about 170, many of them serving purposes of propaganda. The chief picture gallery is the Tretyakov, whilst the grand opera house and the Moscow art theatre maintain a high standard in music and drama. The Central aerodrome, in the Petrovski Park, is the focus of air services to all parts of Russia.

Moscow. Plan of the city, since 1918 the capital of Soviet Russia

After the disruption which followed upon the Revolution had passed, a fresh impulse was given to the city's commerce. This was greatly assisted by the electrification of its transport and industries. One of the details of the Five Year Plan was the incorporation within the city of a wide belt of outlying territory containing workers' settlements and industrial plants and served by a system of electric railways, and it was hoped that by 1933 the population of Greater Moscow would reach 3,000,000. The existing industries are chiefly concerned with the metallurgical, electrical, textile, and canning trades. Moscow was the capital of Russia from about 1480 to 1703, and again since 1918. Pop. MOUNTAIN. Term used somewhat loosely to describe an elevated portion of the earth's crust. That crust is for ever undergoing changes by warping, fracture, and weathering, and this complex of activities produces the variations in elevation to which mountains are due. In the simplest cases mountains are due to actual building, for volcanic cones, as Fuji and Vesuvius, are the product of volcanic outbursts.

During geological time the earth has decreased in volume, and its crust, adjusting itself to the changing conditions, has produced crinkles, the result of the tangential warping strains produced continuously during the adjustment The most recent crinkles are the great mountain ranges of the world as we now know them. *See* Everest, Kamet, Mont Blanc, Nevis, Scafell, etc.

NEGRITO (Span., little negro). Term denoting diminutive peoples of the black race in S.E. Asia and the equatorial African negrillos, or pygmies. Once widespread in tropical Asia, the negrito stock survives in four well-marked types: the Aeta of the Philippine islands, the Andamanese of the Bay of Bengal, the Semang of the Malay peninsula, and the Tapiro, discovered in 1910 in Dutch New Guinea. They are dark-skinned, long-armed, with medium or roundish heads, broad noses, prominent eyes, prognathous jaws, and short, woolly, or frizzy hair. They use snares and arrows. Their dress, dwellings, and social organization are on the simplest levels.

NEGRO. Collective name of the indigenous people of Africa, S. of the Sahara desert. Embracing very many distinct tribes and several distinct races, the word denotes generally a dark-skinned, broad-nosed, thick-lipped, and woolly-haired people. Many strains of genuine negro fail to conform to all these particulars, however. Allied to the Melanesian negroids and the pygmy and negrito peoples of Africa, the negro, except as regards hair, comes nearer to the anthropoid than do the white races. Bantus, Zulus, and Hottentots are the three chief stocks in Africa. Often reaching remarkable levels of political and social organization, as in the case of the Fula empires, the negro is generally democratic in tendency, limiting the power of the tribal chief by tabu and social law Polygamy everywhere obtains, wives being purchased as any other possession. Negroes in Africa are estimated to number 210,000,000.

The negro population of the New World is between 20 and 30 millions, of which about 12,000,000 are in the U.S.A. Imported from Africa as slaves, they have brought to the U S.A. racial and social problems, peculiarly acute after the emancipation of the slaves, when the southern states were for a time controlled by the negro vote and much misgovernment resulted. A reaction followed, and in some states the negro was practically disfranchised. In the south, segregation of the negro in public conveyances, places of amusement, schools, churches, etc., is enforced, and inter-marriage is prohibited. The hope that the negros would disperse more evenly throughout the states, thus lessening the acuteness of the colour problem, has not been fulfilled, although such redistribution has been extended during the 20th century.

The West Indies, except in Cuba and Porto Rico, have an overwhelming proportion of negro inhabitants, who are most flourishing in Barbados. Brazil and Guiana have the largest negro element in S. America, but there has been considerable intermixture with the whites, and there is no acute colour problem.

NEGRO, Rio. River of S. America. The largest left bank tributary of the Amazon, it rises in Colombia by many headstreams, the chief of which, the Guainia, forms part of the boundary of Venezuela. New York proper occupies the whole of the island of Manhattan The other four are Bronx on the mainland, Queens and Brooklyn on Long Island, and Richmond on Staten Island Its total area is 309 sq m, and around it is a Greater New York extending into New Jersey and covering nearly 4,000 sq m The city has two great railway terminals the Grand Central and the Pennsylvania, and services of overhead and underground railways Bridges cross the East river to Long Island, while the Hudson is crossed

New York city arms

New York. Plan of the older and principal part of the city, showing the shipping terminals on the Hudson and East rivers

New York. Three objects of interest in the commercial metropolis of the United States

by tunnels, ferries, and the new George Washington bridge. Docks and wharves line both rivers, and on the Hudson the great liners are berthed. The airports are on Long Island.

The oldest part of New York is the narrower or S. end of Manhattan, and from here it has extended through the island and beyond. For 2 m. from the Battery, a historic spot on the S.W., the street plan is irregular, and the streets are named. After that the usual American plan, rectangular and numbered, prevails. The streets run E. and W., 20 to the mile; the avenues run N. and S., the long way of the island, 7 to the mile. Broadway goes from the Battery right through the city until it becomes the high road to Albany. In the older part of New York are Trinity Church and the city hall. Near the former is Wall Street, with the stock exchange and treasury building. The heart of the newer city is Times Square, near which are the public library, the Roman Catholic cathedral, and the principal hotels and theatres. Farther N. is Central Park, the finest of the city's parks; it contains the metropolitan museum of art. The American museum of natural history is near. The buildings of Columbia university are beyond, and on the heights, too, is the new Anglican cathedral. A second university is the New York. In Bronx is the zoological garden. Skyscrapers are a feature of the city. For long the Woolworth Building on lower Broadway was the highest, but the new Empire State building is higher. Others are the Bank of Manhattan, and the Chrysler Building, and there are many with over 30 storeys. The Rockefeller centre, which consists chiefly of places of amusement, contains the British Empire building. Riverside Drive, with Grant's Tomb, fringes the Hudson. The Bowery at one end and Harlem at the other are notable, or notorious, quarters. Through New York pass a

great proportion of the country's imports and exports. Its manufacturing industries are many, but it is better known perhaps for its financial and distributing activities. The chief newspapers are The New York Times and The New York Herald-Tribune. Pop. (1930) 6,930,446.

NEW YORK STATE BARGE CANAL. Waterway system joining Buffalo on L. Erie and Troy on the Hudson river. It consists of the Erie, Champlain, Oswego, and Cayuga-Seneca canals, together with a number of smaller canals, lakes, feeders, reservoirs, etc., and is 575 m. long in all. There are 57 locks on the main channels, which are 12 ft. deep and vary in width from 75 to 200 ft.

NEW ZEALAND. British Dominion in the Pacific Ocean. Politically it embraces the two main islands, North and South, the small Stewart Island separated from South Island by Foveaux Strait, and many islands in the neighbouring seas. In addition the Dominion is the mandatory for the former German colony of western Samoa. The area, excluding annexed islands and mandated territory, is 103,569 sq.m. Wellington, on North Island, is the capital. Other important towns are Auckland, Christchurch, and Dunedin, all on the coast, and there are smaller places.

New Zealand arms

The two islands are in striking contrast to each other. South Island consists of a great mountain range, the Southern Alps, the culminating peak, Mount Cook, being over 12,000 ft. high, with summer pastures, Alpine lakes, glaciers and snow fields. The W. slopes almost reach to the shore and are clothed with mighty fern forests; the E. slopes reach the Canterbury Plains. North Island consists of a highland reaching from Mount Egmont to East Cape, and of two peninsulas. Its Rotorua district is famous for its geysers and it has active volcanoes. Both islands possess large lakes and glaciers. The chief rivers are the Waikato and Wanganui in N. Island, and the Buller, Clutha, and Grey in S. Island.

N'GURU. Town of Nigeria. Situated in the extreme N.E. of the country, 150 m. N.E. of Kano, it is the terminus of the Nigerian Rly., the extension from Kano being completed in 1930.

NIAGARA. River of N. America. Flowing between Lake Erie and Lake Ontario, it is about 34 m. long, and constitutes part of the boundary between the U.S.A. and Canada On the W. bank is Ontario, on the E. New York state. From Lake Erie it is navigable for 20 m. to the upper rapids; from the Falls it passes through a channel to Lewiston, 7 m. from the mouth, whence it is again navigable. It is crossed by three bridges below the Falls.

NIAGARA. Watering place of Ontario, Canada. It stands on the Canadian side of the Niagara river, where it enters Lake Ontario, 15 m. below the Falls. It was the first capital of Upper Canada, now Ontario. On the American side stands Fort Niagara. The first fort was established here in 1675.

NIAGARA FALLS. Waterfall on the lower portion of the Niagara river, N. America. During its course from Lake Erie to Lake Ontario the river, which here divides Canada from the United States, makes a total descent of 326 ft. This cataract is divided into two by Goat Island. The American Falls, on the E. side, are 1,080 ft. wide and 167 ft. high, and the Horseshoe or Canadian Falls, on the W. side, are 3,100 ft. across and 158 ft. high. Below the descent the river plunges through a deep and narrow ravine to Lewiston, 7 m. distant. About 2 m. below the Falls is the whirlpool.

Niagara. The river and the falls

The water power is used for the generation of electricity, the water being drawn off through tunnels above the Falls and returned into the chasm below. The amount that may be taken from the river is limited by treaty. The shores along both sides of the Falls have been made government reservations; they are the Queen Victoria Niagara Falls Park (154 acres) and the New York state park (115 acres). The Falls are illuminated at night by searchlights. In 1860 Blondin crossed the gorge on a tight rope, and in 1883 Captain Webb lost his life in an attempt to swim the rapids.

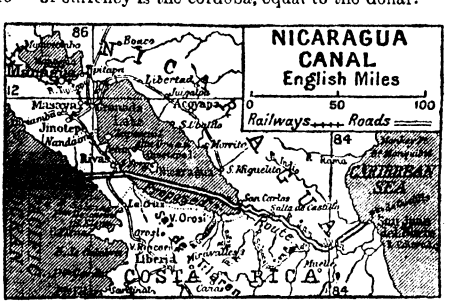
NIAGARA FALLS. City and port of Ontario. It stands on the W. side of Niagara river, here crossed by three bridges, about 2 m. below the Falls, opposite the American city of Niagara Falls, and is served by the C.N. Rlys., the Michigan Central and electric railways. Pop. (1931) 19,046.

NIAGARA FALLS. City and port of New York state, U.S.A. It stands on the Niagara river, 23 m. by rly. N.N.W. of Buffalo, extending from above the Falls to 3 m. below them, and is served by the New York Central, the Michigan Central, and other railways. It is the seat of Niagara University (Roman Catholic). Pop. (1930) 75,460.

NIAMEY. Town of French W. Africa. The capital of the Colony of the Niger, it is situated on the E. bank of the Niger river, about 150 m. above the point where it enters Nigeria.

NIAM-NIAM (great eaters). Dinka name of a negroid people of central Africa. Found on the watershed between the tributaries of the Bahr el-Ghazal and the Welle basin, they are an agile, round-headed, thick-lipped, chocolate-hued race, and exhibit aboriginal Nuba elements with a certain amount of Fula admixture.

NIAS. Island of the Netherlands E. Indies. Off the W. coast of Sumatra, it covers an area of 1,800 sq. m. Its soil is extremely fertile, producing coconuts and rice. The inhabitants are Malays, akin to the Battas. The chief town is Gunung Situli. Pop. 159,799.



NICARAGUA. Lake of Central America. It lies in the S.W. of Nicaragua, its S. end bordering on Costa Rica, and is separated from the Pacific by a narrow isthmus. Oval in shape, it measures 110 m. by 45 m., and has an area of about 3,000 sq. m. It receives the surplus waters of Lake Managua at its N. end, via the Tipitara river, and discharges through the San Juan river into the Caribbean Sea. It contains hundreds of islands; water fowl and alligators abound. It has been proposed to utilise the lake as part of a canal across the isthmus.

NICARAGUA. Republic of Central America. The largest of the group of republics on the isthmus, it covers 51,660 sq. m. It is bounded N. by Honduras and Salvador, S. by Costa Rica, E. by the Caribbean Sea, and W. by the Pacific. Managua is the capital. Other towns are Leon, Granada, and Matagalpa. The chief ports are Corinto and San Juan, on the E., and Bluefields on the W. The land is crossed by two mountain ranges, and has healthy fertile uplands and tropical lowlands. There are two large lakes, Nicaragua and Managua, connected by the Tipitara river. The inhabitants are negroes, Indians, and Spaniards.

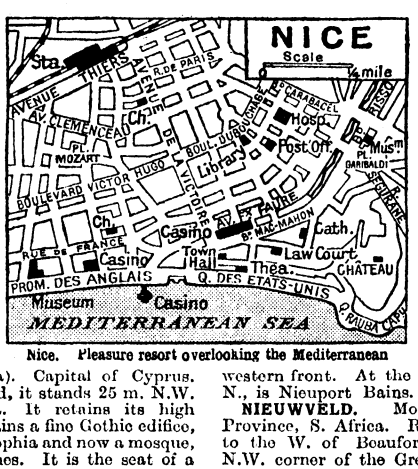
Nicaragua arms

TRADE AND FINANCE. The W. area produces coffee, sugar cane, cocoa, and maize; the E. area bananas, coconuts, and pineapples. Extensive forests yield mahogany, cedar, gums, and medicinal plants. A little gold is mined. The state owns about 200 m. of railways, and there are air services from Managua. The unit of currency is the córdoba, equal to the dollar.

Nicaragua Canal. Map showing the course of the proposed canal between the Caribbean Sea and the Pacific Ocean

GOVERNMENT. The constitution provides for a president, elected for four years, and a parliament of two houses, deputies elected by universal suffrage for four years, and senators elected for six years. There is a council of ministers appointed by the president. The prevailing religion is Roman Catholic. There is no army, but order is preserved by a national guard officered by Americans. The republic is a member of the League of Nations.

HISTORY. After being a Spanish possession for three centuries, Nicaragua became independent in 1821. In the 20th century it passed under the influence of the United States, which in 1916 obtained by treaty the right to cut a canal through the country. As the result of much disorder the country was occupied by American marines from 1927–31. Pop. 750,000. *See* Central America map, p. 255.



NICE. City and pleasure resort of France. On the Riviera, it stands on the Baie des Anges, an opening of the Mediterranean, at the mouth of the river Paillon, 100 m. N.E. of Marseilles. Noted for its wonderful climate and beautiful surroundings, it consists of an old town with narrow streets on the left of the Paillon, and modern suburbs on the right. It has fine squares and boulevards. In addition to the cathedral and many other churches the buildings include the prefecture, once the royal palace, palais de justice, and museums. The casino is owned by the municipality. There is an observatory on Mont Gros. In 1928 a casino was erected. A carnival is held every April. Pop. (1931) 219,549.

Nice arms

NICOBAR. Group of islands in the Indian Ocean. Of the 21 islands 12 are inhabited. With an area of 635 sq. m., they lie S. of the Andaman Islands, to which they are joined administratively, and from which they are 75 m. distant. They are British territory. Great Nicobar is the largest island of the group. Pop. 9,272.

NICOLET. Town of Quebec, Canada. Situated on Lake St. Peter, at the mouth of the Nicolet river, it is 98 m. N.E. of Montreal on the C.N.R. It has a cathedral. Pop. (1931) 2,868.

Nice. Pleasure resort overlooking the Mediterranean

NICOSIA (Gr. Loukosia). Capital of Cyprus. In the centre of the island, it stands 25 m. N.W. of the seaport Larnaca. It retains its high Venetian walls, and contains a fine Gothic edifice, once the cathedral of S. Sophia and now a mosque, English and other churches. It is the seat of a Greek archbishop. Pop. 18,579.

NICOSIA. City of Sicily. In Catania, it is built among the heights of Monte San Giovanni, 42 m. W.N.W. of Catania. It has a fine Norman cathedral and other churches. Pop. 14,000.

NICOYA, GULF OF. Inlet of the Pacific Ocean on the west coast of Costa Rica. Protected by the peninsula of Nicoya, it penetrates about 50 m., and is between 20 m. and 30 m. wide.

NICTHEROY. City and watering place of Brazil. The capital of the state of Rio de Janeiro, it is on the N. shore of the bay of that name. A sea bathing resort, it is connected with Rio de Janeiro by ferry. Pop. 108,000.

NIDAROS. City and seaport of Norway. Formerly known as Trondhjem, it lies at the mouth of the river Nid, 350 m. by rly. N. of Oslo. The cathedral, built in the 12th century over the tomb of S. Olaf, has a Gothic nave and choir with a Romanesque transept. It is the coronation place of the kings of Norway. Buildings include the arsenal, the museums, and the Stiftsgaard. There is a trade in wood pulp and timber, and a broadcasting station. Pop. (1930) 54,135.

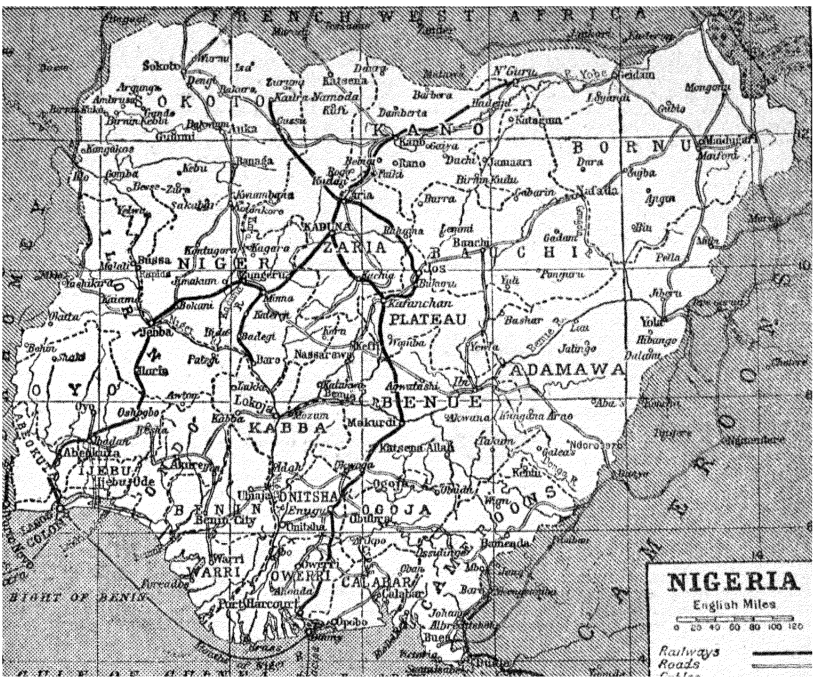
NIDD. River of Yorkshire (W.R.). It rises on Great Whernside, and flows through Nidderdale, past Knaresborough, to the Ouse at Nun Monkton, 8 m. above York. The river is used to supply Bradford with water.

NIDD. Village of Yorkshire (W.R.). Standing on the river Nidd, 3 m. W. of Knaresborough, it has a station (Nidd Bridge) on the L.N.E. Rly.

NIDDRY. Village of West Lothian. It is situated W. of Edinburgh. Near by are the ruins of Niddry castle.

NIEDERWALD. Mountain ridge of Germany. It forms the W. end of the Taunus at the upper end of the great gorge of the Rhine. Dominating the outlook from the river is the colossal statue, Germania, erected 1877–83 to commemorate the founding of the empire in 1871.

NIEMEN (Ger. Memel). River of Europe. It rises S. of Minsk, in Russia, flows through Poland and Lithuania, and after a course of 550 m. enters the Baltic Sea through the Kurisches Haff, East Prussia.



NIEPPE. Forest and village of France. The former covers about 10 sq. m. and is near the frontier of Belgium. The village is slightly N.W. of Armentières. Both were the scene of hard fighting in Oct.–Nov., 1914, and April, 1918.

NIEUPORT. Town of Belgium. In Flanders, it is on the Yser, 10 m. S.W. of Ostend, and is connected by rail with Dixmude and by canal with Furnes. Before 1914 it possessed some fine old buildings, including the church of Notre Dame, the Cloth Hall, the hôtel de ville, and the Templars' Tower, but these and many others, as well as numerous houses, were destroyed during the Great War. The town has now been rebuilt and contains a British war memorial. During the Great War there was much fighting around it, especially in 1914, when it was the extreme northern point of the western front. At the mouth of the Yser, 2 m. N., is Nieuport Bains.

NIEUWVELD. Mountain range of Cape Province, S. Africa. Running W. to E., it lies to the W. of Beaufort West and forms the N.W. corner of the Great Karoo. Through the Sneeuwbergen range to the E., it joins the Drakenberg range.

NIEVRE. Department of France. In the centre of the country, it includes the mountainous district of Morvan in the E. and less elevated regions in the N., while in the W. the dept. is flat. It has an area of 2,658 sq. m. The chief rivers are the Loire, Nièvre, Allier, Aron, Cure, and Yonne. It is an agricultural district, and much of the land is forest. Nevers is the capital. Pop. (1931) 255,195.

NIGDE. Town of Turkey. In Asia Minor, it is situated about 80 m. N.W. of Adana, and is a trade centre. Pop. (1927) 59,289.

Nigeria. Map of the West African protectorate belonging to Great Britain and traversed by the rivers Niger and Benue

NIGER. River of W. Africa. Rising in the mountains on the borders of Sierra Leone and French Guinea, it flows N.W. as far as Timbuktu, where it turns in a S.W. direction and discharges after a course of over 2,600 m., into the gulf of Guinea through a great delta. The only affluent of any size is the Benue. The area of the basin is estimated at 580,000 sq. m., and that of the delta, the largest in Africa, at 14,000 sq. m. Navigation on the middle and upper reaches of the river is limited by its general shallowness and occasional falls, but on the lower reaches it is excellent.

NIGER. French colony of W. Africa. The most easterly of the four colonies which together compose French West Africa, it is bounded S.W. by the Niger river, S. by Nigoria, and W. by Lake Chad. Northwards it extends into the desert to an ill-defined limit, but the approximate area is some 463,000 sq. m. In the N. the country is desolate and arid, but the centre and S. are richly wooded. Cattle, sheep, and goats are reared, and horses and camels are bred. The colony suffers largely from lack of water, there being only three areas where the supply is adequate—round Lake Chad, on the Niger river in the W., and a small area in the S. zone where there are wells. Niamey is the chief centre. Pop. (1931) 1,490,150,

NIGERIA. British colony and protectorate of W. Africa. Bounded W. by Dahomey, N. by French W. Africa, E. by the French Cameroons, and S. by the gulf of Guinea, it includes the colony of Lagos, the Northern and Southern provinces, and the mandated territory in the Cameroons. These various territories, which cover a total area of 363,625 sq. m., are centrally administered, Lagos, the chief port, being the capital. Other important centres are Kaduna and Enugu. A belt of dense mangrove swamp stretches along the coast, intersected by innumerable creeks. The rivers Benue and Niger (from the latter of which the colony takes its name) and their tributaries water the country and provide communication. This is augmented by an extensive rly. system, in the W. from Lagos, in the E. from Port Harcourt, to Kaduna, with an Extension to Kano and N'guru. There are, moreover, a very large number of roads linking the chief centres of the interior with the rly. or the coast, and a comprehensive telegraph system is maintained. At Lagos there is a wireless station. The chief exports are palm oil, palm kernels, tin, hides and skins, ground nuts, cotton lint, cocoa, mahogany, and rubber. The principal tin fields are in the Bauchi district. Other minerals include gold, silver, lead, coal, and lignite. The difficulties of early colonisation were the climate and the hostility of the natives. Nigeria has for several centuries been the home of large native empires, including the Fula and the Hausa. PANAMA CANAL, THE. Canal through the isthmus of Panama, connecting the Caribbean Sea with the Pacific Ocean. The canal has a total length of 50¾ m.; it was informally opened to commerce in 1914. The attempt to make a canal by Ferdinand de Lesseps, the constructor of the Suez, was a failure, owing to financial trouble and unhealthy conditions. The U.S.A. purchased in 1903 the rights and property of the New Panama Company, and obtained from the republic of Panama a strip of land on either side of the proposed waterway, the Canal Zone. Near the Caribbean outlet of the Chagres river was built the Gatun Dam, across the channel of the stream, and another dam about 20 m. S.E. at Gamboa. The waters of the Chagres were allowed to accumulate until a lake was formed, 164 sq. m. in extent and at an alt. of 85 ft. The channel of the canal begins about 4½ m. out to sea in Limon Bay at a depth of 41 ft., and runs for 8 m. till it reaches the gigantic three-stepped, double-flighted stairway of locks at Gatun. These lift the ship to the Gatun lake, through which the channel passes for 20 m. to the Culebra cut, which runs to the Pedro Miguel lock at the other extremity of the highest level section. Below is the Miraflores lake 55 ft. above sea level, from which the Miraflores locks in two steps give access to the 8 m. sea-level stretch on the Pacific side. Its minimum width is 300 ft. at the bottom, and minimum depth 41 ft. An important result for the British Empire was that New York was brought nearer than Liverpool to Yokohama, Sydney, and Melbourne. In 1931 5,529 vessels passed through the canal.

PANAMA CANAL ZONE. Strip of land bordering the Panama Canal, belonging to the U.S.A. It consists of 5 m. on either bank and has a total area, land and water, of 554 sq. m. RAILWAY. The first steam railway line was the one between Stockton and Darlington, opened in 1825, although before this time vehicles had been hauled along tracks by animal power, and steam had been used in an elementary fashion in connexion with the coal mines Today there are something over 700,000 m of railway lines in the world More than a third of this huge total, over 260,000 m , is in the United States Great Britain has something over 20,000 m At first each line had its own gauge, but gradually a standard gauge of 4 ft 8½ in. was adopted, and this is now almost universal.

Radnorshire Map of the inland county of Wales

In the United States the railways are owned by companies working very much as do other public companies. In Great Britain the lines are also owned by companies, but the state, through the ministry of transport, exercises a considerable amount of control over them. In some countries, e.g. Australia and Germany, the railways are owned by the state, although in the latter country they are operated by private enterprise. In Canada there are two great systems, one owned by the state, the other by a company. In France and Italy also some of the lines are state property.

In the century after 1825 enormous improvements were made in the railway services. One of the most far-reaching was the use of electric power, which was found most suitable for short-distance services. London was one of the first cities to make use of it, and the underground railways of the metropolis are nearly all worked by electric power, while some of the suburban lines, especially those in the south, have been electrified. Manchester and Liverpool have followed this example, and the country has about 2,500 m. of electric lines. Electric railways have been built to serve the needs of other great cities, e.g. Berlin, Paris, New York, Montreal.

In Great Britain during the Great War, and until August, 1921, the railways were controlled by the government, but they were then handed back to companies, under, however, a stricter measure of control than before. In 1923 the existing lines were amalgamated into four great combines, which are as follows: (1) Southern. This includes the London & South Western; London, Brighton & South Coast, and South-Eastern & Chatham. (2) Great Western: Great Western; Cambrian, and other lines in Wales. (3) London, Midland & Scottish: London & North Western; Midland; Lancashire & Yorkshire; North Staffordshire; Furness; Caledonian, Glasgow & South Western; Highland. (4) London & North Eastern; North Eastern; Great Eastern; Great Central; Great Northern; Hull & Barnsley; North British, and Great North of Scotland. Since then the companies have been severely affected by the growth of road services, for both goods and passenger traffic. To meet this they have obtained power to run road services themselves, while the Gt. Western has started an air service. In 1933 all the London railways, with the other transport services of the metropolis were placed under a board.

RAINFALL. General term used to signify the aqueous precipitation from the atmosphere, whether in the form of rain, hail, or snow. The study of rainfall is concerned with the reasons why precipitation occurs in particular areas, with the quantity which falls annually, and with the distribution from season to season. Water vapour is always present in the atmosphere; warm air has a greater capacity for water vapour than cold air; it rains whenever warm wet air is sufficiently chilled. The air is warmest at its lowest levels, consequently rising air is chilled and is likely to deposit rain. Mountains and other elevated regions are rainier than the neighbouring lowland. Very cold air is almost perfectly dry, and further cooling fails to produce a fall of snow.

The older city, which was built on the seven hills, is on the left bank. The river has been canalised to Fiumencio, the outport. The city is well served by railways and air lines. Its buildings may be divided into three groups. First are the ruined edifices of ancient Rome, some of which have been restored. Chief of these are the temples, basilicas, and other buildings in the great forum, where much excavation work has been done by the various schools of archaeology, and those on the adjoining Capitoline and Palatine hills. Other forums, those of Trajan, Caesar, Nerva, and Augustus, have also been excavated. Yet other buildings of the imperial age are the Colosseum, the theatre of Marcellus, the Mamertine prison, and the markets of Trajan. The triumphal arches, especially that of Titus, are notable, as are the columns and obelisks and the remains of the baths and aqueducts.

Rome arms

Medieval and ecclesiastical Rome is represented primarily by S. Peter's and the palace of the Vatican. Many noble churches and some beautiful palaces belong to this period, as do some fine fountains. The churches include S. John Lateran, S. Paul outside the Walls, San Lorenzo, Santa Maria Maggiore, and Santa Maria del Popolo. The palaces include those of the Borghese, Barberini, Farnese, and Colonna families. To this age, too, belong most of the works of art in which Rome is superbly rich. Perhaps the finest of these are in the Vatican galleries and museums, but there are many other collections in the city. The castle of S. Angelo, an old building, was once the palace of the popes. The Pantheon is a magnificent temple converted into a Christian church.

INDUSTRY AND FINANCE. The country is mainly an agricultural area, and produces maize, wheat, barley, oats, and rye. Cattle and sheep are reared, and the vine is grown. There are vast expanses of forest, and the land is rich in minerals, especially oil. Salt mining is a state monopoly. The unit of currency is the leu, equal to the franc, and divided into 100 bani.

GOVERNMENT. Rumania is governed by a king, a cabinet, and a legislature of two houses, senate and chamber of deputies. The latter consists of 387 members. Most of the people belong to the Greek Church. There is an army in which all males must serve, a small navy, and an air force. The country belongs to the League of Nations.

HISTORY. In 1861 Wallachia and Moldavia, nominally parts of the Turkish empire, were united as Rumania, and a prince was elected to rule over them. In 1866 Carol, a Hohenzollern prince, was elected as ruler, and in 1881 he was declared a king, the country having been, since 1878, entirely independent of Turkey. Additional territory was acquired after the Balkan Wars in 1913, and in 1916 Rumania entered the Great War and was overrun by the Austrians and the Germans. In 1919, however, the kingdom was restored and greatly enlarged, and after a short period of Bolshevist domination it entered upon a more stable period under its second king, Ferdinand. In 1927 Ferdinand died, and as his son Carol had renounced the succession, a grandson, Michael, succeeded. However, Carol's friends created some unrest, and in 1930 that prince supplanted his own son on the throne.

TOPOGRAPHY The N. limit of Russia is the Arctic Ocean, on the W it is bounded by Lapland, Finland, Estonia, Latvia, Lithuania, Poland, and Rumania The Pacific washes its E shores, whilst Asia Minor, Persia, Afghanistan, Chinese Turkestan, Mongolia, and Manchuria form its S margin Its island possessions include the N part of Sakhalin, and the Commander Islands, as well as those off the Arctic coastline, including Kolguev, Novaya Zemlya, the Nicholas II group, the New Siberia group, and Wrangel Island This vast area is peopled by many diverse races and tribes, with different languages and habits of life Russians and Ukrainians comprise nearly three-quarters of the population. The most characteristic of the physical features is the immense plain, or steppe, which occupies the greater part of its surface This is broken by well defined mountainous regions, such as the Caucasus, the Urals, the outlying spurs of the mountain systems of Central Asia, including the Altai, Tian Shan, Hindu Kush, and Sayan, and the Verkhoyansk, Stanovoi, Yablonoi, Kamchatka, and Sikhotu Alin ranges of N and E Siberia The chief rivers are the Volga, Ob, Yenisei, Lena, Amur, Pechora, Don, Dnieper, Ural, Sir Darya, and Amu Darya, the majority of which have large and important tributaries. The Central Asiatic area contains vast desert regions, while the largest lakes are those of Baikal, Balkhash, Ladoga, Onega, Ilnen, the sea of Aral, and the Caspian

GOVERNMENT The union is divided into the following republics —The Russian Socialist Federated Soviet Republic, comprising by far the greater part of the entire territory, the Transcaucasian Socialist Federated Soviet Republic, and the Ukrainian, White Russian, Uzbek, Turcoman, and Tajik republics. Included among these are the Far Eastern, Leningrad, N Caucasian, Siberian, and Ural areas, and a number of autonomous areas and autonomous republics The administrative organisation of the U S S R consists essentially of a Communistic oligarchy, which virtually resolves itself into a dictatorship Representation is by a system of soviets, or councils, whose congress, consisting of 1,500 members, meets once a year The supreme power is vested in the praesidium of the central committee With some exceptions all citizens over the age of 18 may vote at elections The defence of the Union is entrusted to the Red Army, supplemented by a militia of "workers," who alone have the privilege of serving under arms There is compulsory service between the ages of 19 and 40 The air force is a powerful organization. The navy, strategically of less importance, has not been developed equally with the other arms Since the Orthodox Greek Church was disestablished in Russia in 1917 the teaching of religion to the young has been forbidden At the same time many churches and religious buildings have been converted into state institutions, while the clergy have been deprived of constitutional rights Encouragement has been extended to the Jews

PRODUCE AND TRADE Possessing large areas of highly fertile soil, Russia is primarily an agricultural country The chief crops of the European portion are hay, rye, wheat, millet, oats, barley, and potatoes Cotton, silk, flax, hemp, kendyr, tobacco, sugar beet, and sunflower seeds are also extensively produced Tea-growing is an increasing industry, especially in the neighbourhood of Batum, while large quantities of fruit are exported from the Crimea, the Caucasus, the Ukraine, and the Caspian region Siberia is the principal centre of the dairy industry Furs have always played a prominent part in Russian commerce, the bulk of them emanating from Siberia The timber resources are enormous, the most densely forested areas being in the Caucasus, the Far Eastern region of Siberia, as well as large areas in N and Central European Russia Livestock, game, honey, wool, and bristles are among the remaining natural products of importance Since the abolition of private enterprise and profit, commercial exploitation has been undertaken by state trusts The mineral resources are vast, especially in Siberia, where the great bulk is still untapped The principal oilfield is around Baku

Soviet industries are largely concerned with the production of machinery There are large electrical stations at Moscow, Leningrad, Dnepropetrovsk, Nijni-Novgorod, and other places The railway system is inadequate and is largely supplemented by river transport, but it includes the Trans Siberian and Turkestan Siberian lines connecting with the Far East Air services are in operation, and roads have been extended and improved. The numerous canals included are recently built to link the Volga and the Don, affording direct communication between the Black Sea and the Caspian The Russian educational system, in addition to schools, universities, and technical academies, provides for separate establishments for the dissemination of communist propaganda. The unit of currency is the paper chervonetz, equal to 10 roubles of the old gold coinage. There are also silver, copper, bronze, and nickel money in multiples of kopecks

HISTORY. In 1547 Ivan IV took the title of tsar of all the Russias and began the conquest of Siberia. Peter the Great founded St Petersburg and introduced western ideas Under Catherine II Russia became a great power, extending her European territories by annexing much of Poland and the Crimea In the 19th century Alexander II (1855–1881) attempted to liberalise political institutions by freeing the serfs and establishing a new judicial procedure,

Revolutionary movements spread widely after the Russo-Japanese War (1904–05). In March, 1917, the Russian nation destroyed Tsarism and established a socialist republic This made way in November, 1917, for a Bolshevist Government under Nikolai Lenin The Bolshevists made peace with Germany, sacrificing great territories, and waged successful war against the tsarist armies. They established a working class republic, disestablished and disendowed the Church, abolished all private property, made private trade illegal, and deprived all except members of the working classes of any rights whatever. They simultaneously launched a revolutionary campaign in morals

The death of Lenin in 1924 enabled the extreme Bolshevists to re assert themselves under Joseph Stalin They instituted the state collectivisation of farms, and launched the Five Year Plan, designed to make Russia a leading manufacturing and militarist nation In 1933, on the failure of this project to attain the success expected of it, a second Five Year Plan was launched

GOVERNMENT. Since April, 1931, Spain has been a republic. Its head is the president and the legislature, which consists of one chamber only, is called the Cortes. Members of this are elected for four years by all persons over 23 years of age, and, theoretically, the premier and the other members of the ministry are responsible to it. There is no state religion, but most of the people are Roman Catholics. The army is raised by compulsory service, and there is a small navy.

INDUSTRY AND FINANCE. The chief products of the land are wheat, barley, rye, and oats. Cattle, sheep, and goats are kept, and the vine is extensively grown. The mineral wealth is considerable, and much copper and iron ore are exported. The unit of currency is the peseta, nominally equal to the French franc. Spain has a colonial empire in Africa which covers 128,696 sq. m., and includes Rio de Oro and parts of Morocco and the Guinea coast.

HISTORY. Spain is a union of several small kingdoms, Castile, Aragon, Leon, and others, which were united into two, and then later, in the 15th century, into one by the marriage of Ferdinand, the heir of Aragon, with Isabella, the heiress of Castile. In the south of the land the Moors had established the kingdom of Granada, and there was constant warfare between them and the Christians until, in 1492, the city of Granada, the last Moorish stronghold, was surrendered. At the same time the discovery of America by Columbus gave to the Spanish sovereigns vast lands in the New World; and for the next three centuries, Spain was a great European power.

Early in the 19th century the American colonies, except Cuba, were lost, and in 1833 a long and intermittent war broke out over the succession In 1886 Alphonso XIII was born a king, and in 1898, after a war with the United States, Cuba and the Philippine Islands were lost In the 20th century there was almost continuous unrest, and from 1923-30 the country was ruled by a dictator The unrest culminated in 1931 when the king withdrew and a republic was proclaimed A new constitution was adopted and measures of reform were passed These included the granting of autonomy to Catalonia, the disestablishment of the church, the suppression of the religious orders, members of which were forbidden to teach in the schools, and the confiscation of the property of the nobles

Mainly a plateau ranging from 1,000 to 7,000 ft. in height, scattered with isolated kopjes and broken in the E. by the Drakenberg Mts., it is largely covered by the bush veld, which provides good pasturage. The climate is hot, dry, and dusty, and during the rainy season malaria is prevalent. Although mainly a stock-raising country, large areas are suitable for agriculture, and maize and tobacco are plentifully produced. The country is rich in minerals, coal, copper, iron, and lead being found, but the chief wealth lies in the gold and diamond mines. Johannesburg is the largest town, but Pretoria is the capital. Founded by Boer farmers about 1836, it was recognized by Britain in 1852, but was annexed in 1877. In 1880 the Boers rebelled, and responsible government was granted them in 1881. The discovery of the goldfields led to further trouble, which helped to precipitate the South African War. HISTORY. The Ottoman Empire derived its name from Othman (1259-1326). At the close of the 19th century the empire had shrunk considerably, and was in a state of disorder. In 1908 the general discontent compelled Abdul Hamid II to restore the constitution and summon a parliament. In the next year the Young Turks under Enver Pasha successfully revolted, and deposed the sultan. A war with Italy in 1911 cost Turkey Tripoli and Cyrenaica; the next year saw the outbreak of the Balkan Wars, the outcome of which was that Turkey in Europe was reduced to Constantinople and other small districts. In the Great War Turkey sided with Germany, and suffered severe losses. In 1920 a government was set up at Ankara, and under Mustafa Kemal Pasha this soon became the dominating power in the country. The designation Ottoman Empire was abolished, and in 1923 the republic came into existence. Since then the country has prospered under the dictatorial rule of Mustapha Kemal. It is a member of the League of Nations.
