Miso- (məiso, miso), before a vowel usually **mis-**, repr. Gr. μισο- (μισ-), combining form of the root of μισεῖν to hate, μῖσος hatred. The compounds formed in Greek with this prefix are of the same kind as those with the similar φιλο-, PHILO-, but, both in Greek and in English, they are much less numerous than in the case of the latter prefix. The most important adoptions and coinages will be found as main words, viz. b. *Misprision of treason, of felony*: originally, an offence or misdemeanour akin to treason or felony, but involving a lesser degree of guilt, and not liable to the capital penalty. Hence it was often supposed that the word *misprision* itself expressed the sense of 'failure to denounce' a crime This imagined sense Sir E. Miss (mis), *sb.*[1] Forms. 3-6 **mis, mysse,** 3-7 **misse,** 4-5 **mys,** (5 **myss,** 6 **myshe**), 6- **miss** [Partly f. MISS *v.*[1]; but other formations (likewise from the OTeut. **misso-*) seem to have coalesced with this. In the sense of 'loss' (branch I) the word may partly represent OE. **miss* neut., 'absence, loss' (Sweet *Anglo-Saxon Dict.*), or be ad. ON. *missir* masc. or *missa* fem., 'loss'. In some of the earlier examples of branch II (fault, mistake) the word appears to have been evolved (like MIS *adv.*) from the resolution of compounds of MIS- *prefix*[1]; of similar origin are MHG., MLG., MDu. *misse* mistake, ill-success, Du. *mis* error. In the sense of 'missing a mark', etc. (branch III) it has not been found earlier than the 16th c., and may be purely a late formation on the verb, cf., however, early mod.Du. *misse* 'vanus ictus, jactus' (Kilian), which was developed from the adverbial use in *misse slaan*, to miss one's stroke. Cf. also ON. *á mis* adv., so as to miss or fail to meet, whence the ME. *on mis* (see 4 below), later AMISS *adv.*, is prob. adopted.]

Miss (mis), *sb.*[2] [Shortening of MISTRESS.

Probably this oral shortening may have been suggested by the written abbreviations 'Mis' and 'Mis[r]' (the latter representing the spelling *mistris*) which were common in the 16–17th c. In the following quots. it is not quite certain that 'Mis' is not a mere graphic abbreviation.

2. Prefixed as a title to the name of an unmarried woman or girl (not entitled to the prefix 'lady' or some higher designation of rank).

In modern use, when *Miss* is prefixed to the surname alone, e.g. *Miss Smith*, it normally indicates the eldest (unmarried) daughter of the family, in referring to the others the Christian name is employed, e.g. *Miss Ethel Smith.* (But for reasons of convenience the Christian names are often inserted or omitted without regard to this rule.) When the title is applied to several persons of the same name at once, usage sanctions two forms, viz. *the Misses Smith* and *the Miss Smiths*, the former being regarded as grammatically the more proper.

c. In angry or contemptuous use.

4. A young unmarried woman; a girl, esp. a schoolgirl, or one who has lately left school, in modern use, often connoting the squeamishness or sentimentality characteristic of girls of such an age.

In literary English use now only playful or contemptuous; in trade use (distinguished from *ladies* and *children*, with reference to sizes or styles of articles of clothing), *misses* denotes girls of from about 10 to 17 years of age. The American dicts. describe the word as being in colloquial and trade use.

5. *Comb.* †**mister man, misters** (genitive) **man**: a craftsman, artificer; a man having a certain occupation. Also †**mister folk.** Phrases like *all mister men, what mister man, such a mister man* came to be analysed as 'men of all misters', 'a man of what mister', 'of such a mister'; and these were subsequently interpreted as = 'men of all classes', 'a man of what (such a) class, or kind', 'what kind of a man', etc. The idiom occurs as an archaism in Spenser and later writers, from whom it was adopted (but with misapprehension of its meaning) by Pope and Scott; it survives dialectally in Yorkshire (see E. D. D.).

Mister (mi·stəɹ), *sb.*[2] Also 6 **myster.** [See MASTER *sb.*[1] 21, note.]

1. Used as a title of courtesy prefixed to the surname or Christian name of a man (not entitled to be addressed as 'Sir' or 'Lord'), and to designations of office or occupation.

The word in mod. use may be best described as the oral equivalent of the written prefix MR (q v in its alphabetical place) In writing, the unabbreviated form is now used only with more or less of jocular intention; in a passage like quot. 1854 in d, most persons would now write 'Mr.' (with inverted commas)

1. Originally, a Flemish copper coin of very small value; according to some early Flemish writers, worth ¼ of a Flemish penny, though other, chiefly smaller, values are also mentioned. In Eng. use mainly as a proverbial expression for an extremely small unit of money value. In books of commercial arithmetic in 16–17th c. it commonly appears as the lowest denomination of English money of account, usually $\frac{1}{384}d$, but sometimes $\frac{1}{512}d$, and sometimes $\frac{1}{192}d$; it is, however, unlikely that the word was ever in Eng. mercantile use. From the 14th c. *mite* has been the usual rendering (though the Wyclif versions have 'mynutis') of L. *minūtum* (Vulg.), Gr λεπτόν in Mark XII. 43, where two 'mites' are stated to make a 'farthing' (Gr. κοδράντης, L. *quadrans*); hence the word is now popularly taken as equivalent to 'half farthing'.

2. A sacerdotal head-dress.

a. *Hebrew Antiq.* Used (after L. *mitra*, Vulg., and *μίτρα*, LXX.) for the ceremonial turban of the high priest (Heb. מִצְנֶפֶת *miṣnepheth*, צָנִיף *ṣānîph*); also (in Wyclif and the Douay Bible, though not in the other versions) for the head-dress of the ordinary priests (Heb. מִגְבָּעֹת *migbāʿōth*; Coverdale and the Bible of 1611 'bonnet', 1884 Revised 'headtire').

For the 'mitre' of the English Bible of 1611 the Vulgate has *cidaris* or *tiara* (*mitra* only in Exod. xxxix), its *mitra* is the 'bonnet' of the English Bible. Wyclif's rendering of *cidaris* by 'mytre' is noteworthy, as probably indicating that the word was already current in English (in sense 1 b).

b. *Eccl.* A head-dress forming part of the insignia of a bishop in the Western Church, and worn also by certain abbots and other ecclesiastics as a mark of exceptional dignity. In its modern form, it is a tall cap, deeply cleft at the top, the outline of the front and back having the shape of a pointed arch; the material has usually been white linen or satin, embroidered and often jewelled; but mitres of gold or silver have also been used.

The application of *mitra* in med.L. to the episcopal head-dress was doubtless suggested by its occurrence in the description of the attire of the Jewish high-priest. (See a.)

In the Anglican church after the Reformation, the mitre, though theoretically part of the episcopal insignia, was seldom actually worn except at coronations down to that of George III. In recent times some bishops have revived its use on special ceremonial occasions.

Mitre (mai·tə), *sb.*[2] Also **miter**. [Of somewhat uncertain origin: perh., as is usually assumed, a transferred use of prec., but the development of sense is not easy to explain.

Possibly there may be a reference to the early form of the episcopal mitre, which had a vertical band bisecting a rectilinear angle at the top.]

1. In Joinery and other mechanical arts: A joint (also *mitre-joint*) in which the line or plane of junction makes an angle of 45° with the side of each of the two pieces joined, so that the adjacent sides meet in a right angle; the shaped end or edge of a piece of material intended to form such a joint with another; an angle or slope of 45°. Now sometimes applied to any joint in which the angle made by the sides of the joined pieces is bisected by the line of junction.

Keyed mitre: a mitre-joint strengthened by the insertion of keys (KEY *sb.* 9). *Lapped mitre*: a combination of the lap and mitre joints.

Our earliest example of the vb, in any form other than the pa. pple., is of the date 1538, and it was extremely rare until Shakspere's time. The L. *miscēre* —**mik-sk-* is f. the Indogermanic root **mik* (*meik*, *meik-*), represented by Skr. *miçra* (—**mikro-*) mixed, and by many vbs. with the sense 'to mix' in the various langs. F. *misaine* (in mod.Fr. foresail, foremast; c 1381 *migenne* in Hatz.-Darm.), believed to be ad. It. *mezzana* mizen-sail; the It. word is fem. of *mezzano* middle. Cf. Sp *mesana*, Pg *mezena* foresail, Du. *bezaan* (earlier *bezane*), G. *besan* (*-mast, -segel*) mizen

The agreement of the use in Eng. and It. suggests that the divergent use in mod. Fr. is not original, the statement that It *mezzana* originally meant 'mainsail' seems to be merely a conjecture based on the etymological meaning of the word, the precise implication of which is uncertain. some have suggested that it may be 'middle-sized'.

1. (Also **mizen-sail.**) A fore-and-aft sail set on the after side of the mizen-mast. C. *adj.* = MORE *a.*

[In OE. the construction of *ma* with a partitive genitive (see B 1, 2) was sometimes inconvenient, because the sb which was felt to be virtually the subject or object of the verb, or the regimen of the prep., did not show the nature of this relation by its inflexion Hence the genitive was occas replaced by the case in which the sb would have stood if *ma* had been absent, or (to express the same thing in another way) the sb was placed in apposition with *ma*. In this way *ma* became practically an indeclinable adj.]

The sb cannot well be identified with OE *mán* wickedness (though the cognate ON. *mein* has the sense of 'hurt'), perhaps its phonetic coincidence with this may be the cause of its being unrecorded in OE. The word has app no cognates in Teut or elsewhere, as there seems to be no sufficient ground for etymologically identifying its derivative OE. *mænan* to complain (Mean *v*[2]) with *mænan* to intend, mean, speak of (Mean *v*[1])]

Mock (mɒk), *v.* Forms: 5 **mokken, moke, mocque**, 5-6 **mokkyn, mok**, 5-7 **mocke**, 6- **mock**. [ME. *mokken, mocque*, ad. OF. *mocquer* (F. *moquer*) to deride, jeer, a northern dialect form corresp. to the synonymous Pr. *mochar*, It. *moccare*.

According to some scholars, the word represents a popular L. **muccāre* to wipe the nose (whence F *moucher*, It. *mocare*), f **mucc-us* (class. L. *mūcus*, see MUCUS). With the OF. (whence the Eng.) transitive use, cf L. *emungĕre* to wipe the nose, to cheat. The reflexive use (the only one in mod Fr.) *se moquer de quelqu'un*, may originally have denoted the derisive gesture imitative of the movement of wiping the nose. In mod Provençal, according to Mistral, *mouca* means 'to wipe the nose', 'to strike on the nose', while *se mouca* = F *se moquer*, and *moucado* means 'a blow on the nose', 'a humiliation'.

Another hypothesis, less plausible semasiologically, would connect the word with Ger. dial. *mucken* to growl, grumble, OHG. *ermuccazan* 'mutire' (mod.G *mucksen* to grumble).]

By some writers used in a wider sense, so as to be applicable to any proposition in which the predicate is affirmed or denied of the subject with any kind of qualification, or which contains an adverb or adverbial phrase. Of a syllogism: Containing a modal proposition as a premiss.

Modality (mŏdæ·lĭti). [ad. med.L. *modālitās*, f. *modālis*. see MODAL and -ITY. Cf. F. *modalité*.]

1. The quality or fact of being modal. Also, a modal quality or circumstance; the modal attributes of something; † a question or point relating to mode, manner, or method, and not to substance. Now *rare*.

a 1617 BAYNE *On Eph* (1658) 144 Liberty in this sense, contingency, necessity, these are modalities agreeing to effects, as effects are in order to their second causes 1647 M HUDSON *Div Right Govt* II III 87 Even the temporal part of that promise was performed exactly in the reality, though not in the Modality thereof. 1656 *Burton's Diary* (1828) I. 44 Shall punctilios and modalities and forms, bind and tie up a Parliament? 1704 NORRIS *Ideal World* II. x. 401 We cannot conceive the modality of any substance as a Being distinct from that substance. . b. In Kantian and subsequent use, that feature of a judgement which is defined by the class in which it is placed when judgements are classified into problematic, assertory, and apodictic.

This is a development of the older sense 2 a; the distinctive features of 'problematical' and 'apodictic' judgements being 'modalities' in the earlier sense, the term was extended to apply also to that of 'assertory' judgements. In Kant's classification 'the Categories of modality' are those of possibility and impossibility, existence and non-existence, necessity and contingency; the term is coordinate with Quantity, Quality, and Relation.

1836 *Penny Cycl.* VI 368/1 These Categories consist of four primordial classes: 1 quantity, 2 quality, 3. relation, 4 modality; each class containing three Categories 1884 tr. *Lotze's Logic* 53 What modality have such sentences as these, 'S will be P', 'S ought to be P', 'S may be P', 'S has been P'? No one of them affirms reality, but the unreal which is past in the last is something quite different from that which is permitted, enjoined, or future in the others If all these shades of meaning had been taken into account, the forms of modality might have been correspondingly increased in number.

3. *Civil Law.* 'The quality of being limited as to time or place of performance, or, more loosely, of being suspended by a condition. said of a promise' (*Cent. Dict.* 1890)

‖ **Moire** (mwār, mwą̄r, mō·ɪ) Also 7 **moyre.** [F. *moire*, according to Fr. lexicographers an adoption of some form of Eng. Mohair.

The OF *moire*, the name of some textile fabric mentioned by Chrestien of Troyes (12th c.), is believed to be unconnected with the modern word]

Originally a kind of watered mohair; afterwards, any textile fabric (but usually silk) to which a watered appearance is given in the process of calendering; a watered or clouded silk.

Moire antique, explained by Fr lexicographers to mean a watered silk of large pattern, is in Eng use practically synonymous with *moire*, which is apprehended as a shortened form.

2. An ultimate unit of being; an absolutely simple entity.

Chiefly used with reference to the philosophy of Leibniz (1646–1716), according to which the universe of existence consists of entities without parts, extension, or figure, and possessing, in infinitely various degrees, the power of perception. Those among these 'monads' which have the perceptive power in the higher degrees are souls; the rest are formed in the view of the percipient mind into aggregates, which constitute bodies. The term was adopted by Leibniz from Giordano Bruno (*d.* 1600), with whom the 'monad' has the twofold aspect of a material atom and an ultimate element of psychical existence.

Monarchian (mɒnā·rkiăn), *sb.* and *a. Eccl. Hist.* [ad. late L. *monarchiānī* pl., f. *monarchia*: see MONARCHY and -AN.

The term *monarchiani* is merely a nickname applied by Tertullian (*Adv. Prax.* x) to certain opponents of the doctrine of the Trinity, in derision of their unintelligent use of the word *monarchia* ('Monarchiam, inquiunt, tenemus', *ibid.* II). In early apologetics, *ἡ μοναρχία τοῦ Θεοῦ* ('the monarchy of God') was a current designation for Christian monotheism, and these heretics regarded themselves as the defenders of this cardinal doctrine against the Trinitarians.]

A. *sb.* One of those heretics in the 2nd and 3rd centuries who denied the doctrine of the Trinity.

Modern historians distinguish between 'Dynamistic' or 'Adoptionist' Monarchians, who regarded Christ as a man endowed with Divine power, and 'Modalistic' Monarchians, who maintained that He was an incarnation of God the Father.

Monism (mǫ·nizm). [ad. mod.L. *monism-us*, f. Gr. *μόνος* single : see -ISM.]

1. *Philos.* A metaphysical system based on the assumption of a single ultimate principle or kind of being instead of two or more : opposed to DUALISM and PLURALISM in various applications.

a. The doctrine that only one being exists.

1862 F. HALL *Hindu Philos. Syst* 160 To the Vedántins the establishment of monism, or non duality, is most essential. They wish to make out the soul to be Brahma, and the world to be false ; whence it would follow, that Brahma solely is true, and that nought but him exists.

b. A general name for those theories which deny the duality (i e the existence as two ultimate kinds of substance) of matter and mind.

Thus materialism and idealism or spiritualism are both species of monism; the name, however, is often applied specifically to a third variety, viz the doctrine that physical and psychical phenomena are alike manifestations of a reality which cannot be identified with either matter or mind

1876 tr *Haeckel's Hist Creat.* I. II 35 The Monism here maintained by us is often considered identical with Materialism 1887 *Encycl. Brit.* XXII. 564/1 Until dualism had been thought out, as in the Peripatetic school, it was impossible that monism (or at any rate materialistic monism) should be definitely and consciously maintained. 1898 ILLINGWORTH *Div Imman* III 71 Monism..started from the physical side, from analysis of the cerebral conditions of thought.

c. The doctrine that there is only one Supreme Being, as opposed to the belief in a Good and an Evil Principle as co-ordinate powers

1872 MORRIS tr. *Ueberweg's Hist. Philos* I. 334 Against the dualism of the Manichæans .Augustine defends the monism of the good principle.

In accordance with its etymology, *monachus* originally meant a religious hermit or solitary, but was from an early period applied to cœnobites, and this eventually became the ordinary use.]

1. A member of a community or brotherhood of men living apart from the world under the vows of poverty, chastity, and obedience, according to a rule (characteristic of the particular order), and devoted chiefly to the performance of religious duties and the contemplative life. The different orders of monks are distinguished by habits of various shapes and colours (cf b).

In England, before the Reformation, the term was not applied to the members of the mendicant orders, who were always called *friars* From the 16th c. to the 19th c., however, it was usual to speak of the friars as a class of monks In recent times the distinction between the terms has been carefully observed by well-informed writers In Fr. and Ger. the equivalent of *monk* is applied equally to 'monks' and 'friars'

The word properly belongs to Christian use, but is sometimes applied to persons of other religions (e.g. Moslems, Buddhists).

I. The simian animal, and transferred uses.

1 In its widest application, an animal of any species of the group of mammals closely allied to and resembling man, and ranging from the anthropoid apes to the marmosets; any animal of the order *Primates* except man and the lemurs. In a more restricted sense, the term is taken to exclude the anthropoid apes, and the baboons, in popular use associated chiefly with the greenish long-tailed species having cheek-pouches, often kept as pets.

By some writers, the word *ape* is used to express the wider of the two senses above explained, and *monkey* is confined to its narrower application Others employ *monkey* as the wider term, restricting *ape* to the tailless and especially the anthropoid 'monkeys'.
