1. A seasonal wind prevailing in southern Asia and especially in the Indian Ocean, which during the period from April to October blows approximately from the south-west, and from October to April from the north-east, the direction being dependent upon periodic changes of temperature in the surrounding land-surfaces.

The south-west or summer monsoon is commonly accompanied by heavy and continuous rainfall, and is therefore often referred to as the *wet* or *rainy monsoon*, the north-east or winter monsoon being known as the *dry monsoon*.

In the 16-17th c. the spelling *moneth* was almost universal.]

A measure of time corresponding to the period of revolution of the moon.

1. Any one of the twelve portions into which the conventional year is divided. (When not otherwise determined by the context, the reference is to the 'months' inherited by Western civilized nations from the Romans, and known by the names January, February, etc.) More explicitly *calendar month*, less commonly † *calendary, civil, political, usual month* (for illustrations of these designations see under the adjs.)

The primitive calendar month of ancient nations began on the day of new moon or the day after, and thus coincided (except for fractions of a day) with the synodical month (see 2). Among many peoples of antiquity, however, it was from a very early period found desirable that the calendar year should contain an integral number of the smaller periods used in ordinary reckoning. Hence the true 'months' were superseded by a series of twelve periods each having a fixed number of days (on the average one-twelfth of the number in the calendar year), and thus having no relation to the changes of the moon; but this artificial period continued to bear the name of 'month'. The systems according to which the reckoning by months was brought into relation with that by years were very various. In the Julian calendar, the months in leap year had alternately 31 and 30 days, while in other years February had only 29 instead of 30. This symmetrical arrangement was under Augustus broken up by the transference of a day from February to August, and of a day from September and November to October and December respectively, producing the system now in use.

2. *Astr.* **a.** (In full *Lunar month*.) The period in which the moon makes a complete revolution relatively to some point, either fixed or moveable.

There are thus several species of lunar month, as the time of the revolution is different according to the point with regard to which it is reckoned. Usually the term denotes the *synodical month*, i. e. the period from one new moon to the next, the length of which is 29 days, 12 hours, 44 minutes, 2·7 seconds. The other kinds of lunar month (the lengths of which are all between 27 and 28 days) are the *anomalistic, sidereal, tropical*, and *nodical month* see those adjs.

Mood (mūd), *sb.*² [An alteration of MODE *sb.*, due to association with MOOD *sb.*¹]

1. *Logic.* (= MODE *sb.* 3 a.) Any one of the classes into which each of the four 'figures' (see FIGURE *sb* 23) of valid categorical syllogisms is subdivided on the ground of the several ways in which syllogisms differ with regard to the quality and quantity of their constituent propositions.

The moods have mnemonic names (BARBARA, CELARENT, etc.), in which the three vowels represent the quality and quantity of the three propositions: A = universal affirmative, E = universal negative, I = particular affirmative, O = particular negative. (Some of the consonants also have significant functions.) The number of recognized moods is 19, viz. four in the first figure, four in the second, six in the third, and five in the fourth.

A different, probably a historically older, sense of the word occurs in some writers (e g Aldrich and Whately) alongside the sense above explained, and without being expressly distinguished from it. In this sense the mood of a syllogism is the type of structure to which it belongs in respect of quality and quantity alone, without regard to the figure, so that, e.g. Celarent in the first figure and Cesare in the second would be not two moods but two varieties of the same mood. (See quot. 1906, where this sense is definitely adopted to the exclusion of the other.)

[1532 · see MODE *sb.* 3 a.] 1569 J. SANFORD tr. *Agrippa's Van. Arts* 21 b, A Syllogisme .which ought to be in one of the .xix. Moodes 1589 *Marprel. Logic* XVI. 136 We call each of these triplets of propositions a mood or form of the syllogism. 1884 tr. *Lotze's Logic* 88 The above rule, which, where both premisses are affirmative, requires one to be universal, prescribes a particular affirmative conclusion, and admits the moods *Darapti, Datisi,* and *Disamis.* 1906 JOSEPH *Logic* XII 240 The difference of mood depends on the quantity and quality of the propositions composing the syllogism. This may be the same in different figures, or different in the same figure. The different moods have received distinct names in the various figures wherein they occur; and hence what are called the 'mood-names'. indicate both figure and mood.

2. *Gram.* Any one of the several groups of forms in the conjugation of a verb which serve to indicate the function in which the verb is used, i.e. whether it expresses a predication, a command, a wish, or the like; that quality of a verb which depends on the question to which of these groups its form belongs.

Cognate words for 'moon' and 'month' are found in all branches of the Indogermanic family; outside Teut. the following types occur: **mēnā* (Gr. μήνη moon), **mēnon-* (Lith. *mėnů* moon), **mēne-s, -os-* (Lith *mėnesis*, dial. *mėnas*, month), and with reduced grade of stem-suffix **mēns-* (Skr. *mās, māsa*, Zend *mānha*, OSl. *mĕsęcĭ*, moon, month, Gr. μήν, Ion. μείς, L. *mēnsis*, Irish *mí*, month). The prevailing view that the root is **mē-*, to measure (the moon having, it is supposed, been named from its function as a measurer of time) is plausible, but cannot be considered certainly true.]

1. The satellite of the earth; a secondary planet, whose light, derived from the sun, is reflected to the earth and serves to dispel the darkness of night.

The moon's constantly recurring changes and phases (see 1 c and NEW MOON, FULL MOON, HALF-MOON, HARVEST MOON, and cf CRESCENT, QUARTER) have caused it to be taken as a common type of changeableness or fickleness. They are popularly supposed to influence the health of body and mind, and to cause lunacy (cf LUNATIC) The moon's appearance to the eye of being diversified with light and dark patches gave rise to the fanciful comparison of its disc to a man's face (see 1 f and MAN-IN-THE-MOON). It has been worshipped as a deity by many races; in classical mythology it was identified with various goddesses (see 1 b). Its white or silvery light is taken as emblematical of coldness or chastity.

The moon's attraction is the chief cause of the tides The period in which the moon completes her series of changes, or in which her orbital revolution brings her back to the same apparent position with regard to the sun, is called a month; in astronomical use this term is applied in a wider sense (see MONTH *sb*[1] 2 a).

b. Since the disappearance of the grammatical genders of OE, in which *móna* was masc, the feminine pronoun has commonly been used in referring to the moon, even when no personification is intended (the neuter pronoun occurs, but less frequently); in poetry the moon is often personified, always as a female, and sometimes, after classical example, identified with various goddesses, as Cynthia, Diana, Phœbe.

2. The moon as visible during one (lunar) month is in popular language spoken of as a distinct object from that of another month; its 'age' being the number of days that have elapsed since new moon. Similarly, the sb. is used with qualifying words for: The moon as shining or visible at some particular time or place, or as presenting some particular appearance. (See also NEW MOON, FULL MOON, HARVEST MOON, etc.)

Some believe the word to be merely a use of Gr. **μαῦρος** black (which on this view is aphetic from **ἀμαυρος** blind), but this adj. 1. In *Ancient History*, a native of *Mauretania*, a region of Northern Africa corresponding to parts of Morocco and Algeria. In later times, one belonging to the people of mixed Berber and Arab race, Mohammedan in religion, who constitute the bulk of the population of North-western Africa, and who in the 8th c. conquered Spain. In the Middle Ages, and as late as the 17th c, the Moors were commonly supposed to be mostly black or very swarthy (though the existence of 'white Moors' was recognized), and hence the word was often used for 'negro'; cf. BLACKAMOOR.

b. qualifying an adj. or adv., to form the comparative.

With most adjs. and advs of more than one syllable, and with all of more than two syllables, this is the normal mode of forming the comparative. A few monosyllables (e. g. *right*, *just*) normally form their comparatives in this way instead of taking the suffix *-er*.

c 1175 *Lamb. Hom.* 5 Þes we ahte to beon þe edmoddre and þa mare imete. 1340 Hampole *Pr. Consc.* 858 And what es mar horibel in stede þan a man es when he es dede? 1375 Barbour *Bruce* VII. 555 He beheld hir mayr ynkirly. 1711 Steele *Spect.* No. 6 ? 2 He finds Rest more agreeable than Motion. 1788 Mrs. Hughes *Henry & Isabella* I. 180 He was..more gallant, more generous, more everything that is agreeable in youth, than his brother. 1821 Southey in *Life* (1850) V. 106 His merits are every day more widely acknowledged. 1831 Landor *Popery* 30 It is more just that a bishop's salary should be reduced to a thousand a year than an admiral's to three hundred. 1884 tr. *Lotze's Logic* 348 The true law is far more complicated.

c. Often prefixed to monosyllabic and disyllabic adjs. and advs. which have otherwise a regular comparative in *-er*; as *more true*, *more busy*, *more often* = *truer*, *busier*, *oftener*.

By mod. writers this alternative form is used (1) for special emphasis or clearness; (2) to preserve a balance of phrase when other comparatives with 'more' occur in the context; (3) to qualify the whole predicate rather than the single adj. or adv.

c 1330 R. Brunne *Chron.* (1810) 235 Was neuer at Saynt Denys feste holden more hy. 1340 *Ayenb.* 63 Ac þe leazinges likinde byeþ more grat zenne. *c* 1400 Maundev. Misc.* Ser. II. 211 A clumsy collector, who more often than not knew neither how to read nor to write.

d. Formerly often prefixed pleonastically to the comparative of the adj. or adv. *Obs.* exc. *arch.*

In quot. *c* 1205 the use is not pleonastic.

5. Expressions in which *more* (in sense B. 2) is followed by *than* with a designation of number or quantity admit of being used instrumentally or adverbially, as in 'more than ten years old'. The analogy of these has given rise to expressions like 'more than once' (a multiplicative corresponding to the quasi-numeral 'more than one'). Hence, from the 16th c. onwards, *more than* has been placed before adjs, advs., vbs., and descriptive sbs., to indicate that the word thus qualified is (in some obvious respect) inadequate to the intended meaning.

More, var. MOHUR, obs. f. MOOR.

-more (mōˑɹ), *suffix*, forming advs. of place (rarely of time) in the comparative degree (most of which have given rise to adjs of identical form). Chiefly appended to advs. having already the comparative ending *-er*, as in *backermore*, *downermore*, *farthermore*, *furthermore*, *hindermore*, *innermore*, *outermore*, *overmore*, *rathermore*, *uttermore*; in the 16–17th c. a few formations occur in which it is added to a positive or uncompared adv, as *hindmore*, *hithermore*, *inmore*, Sc. *yonder mair.*

The suffix is identical with MORE *adv.*; the addition of this adv. to comparatives occurs in Scandinavian, as ON. *fyrrmeir* earlier, *firrmeir* farther off, *nærmeir* nearer, OSw. *innarmer* = INNERMORE, *nithirmer* = NETHERMORE. The earliest instances in Eng. occur in the Ormulum (*furthermore*) and the Cursor Mundi (*farthermore*, *innermore*); it is therefore likely that the use was originally due to Scandinavian influence. But the majority of the comparatives in *-more* were formed to correspond to previously existing superlatives in -MOST, which were partly altered forms of OE. superlatives in *-m-est*, and partly new formations on the analogy of these.

Morganatic (mɒ̄rgănæ·tik), *a.* [ad. mod.L. *morganāticus* (whence G. *morganatisch*, F. *morganatique*, It. *morganatico*, etc.) evolved from the med.L. phrase *matrimonium ad morganaticam*, where the last word is prob. synonymous with *morganāticum* MORNING-GIFT, f. OHG. *morgan* (= MORN) in **morgangeba* morning-gift (*morgangiba* in Gregory of Tours, 6th c.; MHG. *morgengâbe*). The literal meaning of the term 'morganatic marriage' (*matrimonium ad morganaticam*) is, as is explained in a 16th c. passage quoted by Du Cange, a marriage by which the wife and the children that may be born are entitled to no share in the husband's possessions beyond the 'morning-gift'.] The distinctive epithet of that kind of marriage by which a man of exalted rank takes to wife a woman of lower station, with the provision that she remains in her former rank, and that the issue of the marriage have no claim to succeed to the possessions or dignities of their father; also, occasionally, used to designate the marriage, under similar conditions, of a woman of exalted rank to a man of inferior station. Hence *morganatic husband, wife.*

A morganatic marriage is sometimes called a 'left-handed marriage' (G. *Ehe zur linken hand*), because in the ceremony the bridegroom gave the bride his left hand instead of his right. The latter term is sometimes used in a wider sense, for the *matrimonium inæquale* of German law, in which, though the spouse of inferior rank was not elevated, the children retained the rights of succession

Mormon (mɒ·ɹmən). [f. *Mormon*, the name of the pretended author of 'The Book of Mormon': see below. The earlier name was Mormonite.]

1. A member or adherent of a religious body, calling itself 'The Church of Jesus Christ of the Latter day Saints', founded in 1830 at Manchester, New York, by Joseph Smith, on the basis of alleged Divine revelations contained in the 'Book of Mormon', which Smith professed to have translated by special inspiration from the original written on gold plates, miraculously discovered by himself.

The feature of the sect which is popularly best known, and which is referred to in allusive uses of the name, is the practice of polygamy: but this is not countenanced by the Book of Mormon, and is now understood to have been abandoned in obedience to the law of the United States.

[Com. Teut.: the OE. forms represent three distinct types, each of which is represented in one or more of the other Teut. langs. (1) OE. *morgen* (inflected also *morgn-*, *morn-*) = OFris. **morgen, morn,* OS. *morgan* (MLG, MDu., Du. *morgen*), OHG. *morgan* (MHG, mod.G.

The affinities outside Teut. are doubtful. Some refer the word to the pre-Teut. root **merk-* to be dark; but the absence of consonant ablaut, as well as the inappropriateness of the sense, seems to render this view less probable than the alternative hypothesis that the root is **mergh-*, represented by Lith. *mirgu* to twinkle, *margas* parti-coloured.

The present monosyllabic form descends, partly at least, from the OE. contraction in oblique cases, *morne*, *mornes* for *morg(e)ne*, *morg(e)nes*. (The same contraction existed in ON.) But it may also in part represent the result of a process of contraction starting from ME. *morwen*, the intermediate forms being *morun*, *moren*, etc.

The ME. forms that retain the final *n* are for convenience placed here, though many of them might with equal propriety be referred to MORROW. In MSS it is often doubtful whether the word is *morn* or *morw* = 'morrow']

It is possible, however, that the two senses of the Latin word are equally original, the suffix *-ārium* being employed in two different functions.]

It is probable that *mort* here is a mistake for *morve*, running of the nose, glanders (for which, or its dial. variant *mourve*, Cotgr. has erroneously *mourrie*). The notion that the morbid matter of glanders came from the spine was generally held. The 16th c. Alienations in mortmain, as being injurious to the rights of the crown and the mesne lords, were forbidden by 7 Edw. I, st. 2 (see quot. 1279) and many subsequent Acts, known as the 'Statutes of Mortmain'. The intention of these statutes was to a great extent evaded by judicial interpretations *The Mortmain Act*: the statute 9 Geo II, cap 36, passed in 1736, imposing restrictions on the devising of property to charitable uses; also, the title of various later statutes having a similar object. *Licence of mortmain*: an instrument conveying the permission of the king to alienate property in mortmain.

Mosquo, -quy, obs. forms of Mosque.

Moss (mɒs), *sb.*[1] Forms: 1, 3, 6 **mos,** 2, 6 **mose,** 4–6 **mosse,** 5 **moos, mosh,** 4– **moss.** [OE. *mos* neut., bog (also 12th c. *mose* moss), corresponding to MDu., MLG. *mos* bog, also moss, lichen, mildew (Du. *mos* moss), OHG., MHG *mos* (mod.G. *moos*) bog, moss, MSw., Da. *mos*:—OTeut. **muso*[m]; declensional variants are represented by Flemish *moze* mud, ON. *mose* wk. masc., bog, moss, Sw. *mosse* masc., bog, *mossa* fem., moss. From a different ablaut-grade of the same root (OTeut. **meus-, meus-*) are OE. *méos* (? masc.) moss (see Mese *sb.*[1]), OHG. *mios* masc.," moss (mod.G. *mies* masc., neut., moss, lichen; in some dialects bog), ON. *mýr-r* Mire *sb.*[1] Cognates outside Teut. (f. Indogermanic **mus-*) are L. *muscus* moss, OSl. *mŭchŭ* moss, ? Lith. *musai* scum on sour milk. The Fr. *mousse* fem. (Pr. *mossa*), moss, is prob. of Teut. origin.

All branches of Teut. exc. Gothic have the word or its cognates in both the senses 'bog' and 'moss' (the plant). As moss is the characteristic plant of bogs, there is no reason for doubting the identity of the word in the two senses. Which is the prior sense is doubtful; the fact that the cognates outside Teut. have the sense 'moss' only is not decisive. The sense 'bog' is the only one known in OE.; but the use as the name of the plant (called in OE. *méos*) presumably existed in OE, as a late adoption from continental Teut. would be very improbable. The 13th c. northern form *mose* (sense 3, quot *c* 1150) is perh. adopted from ON.; it cannot be the ancestor of the mod. form with unvoiced (s).]

The OE **mást**, the normal representative of the Com. Teut. type, has been found only in Northumbrian, but it is not certain that it existed only in that dialect. The ordinary OE form (WS **mást**, Kentish **mést**) has abnormal umlaut, and seems to descend from a prehistoric **mâ-ist*, a re-formation due to a consciousness of the grammatical relation of the word to **mâ** Mo. The umlaut form survived, in the south, down to the 15th c., but seems to have now entirely disappeared even in dialects. (The 19th c. northern form **meast** represents OE **mást**; the coincidence with the early ME. **meast** :-OE **mést** is accidental.) The establishment of **most** as the only form in the midlands and south was probably due to the influence of the related *mo*, *more*.

The southern form **most**, occasionally spelt **moist**, was often used, esp. in rimes, by the Sc. poets of the 15-16th c.]

Most, obs. form of MUST *sb.* and *v.*

-most (mōust, möst, məst), *suffix*, forming adjs. in the superlative degree (many of which are also used as advs.), is an altered form of OE. *-mest* (= Goth. *-umist*), a combination of two distinct OTeut. (and Indogermanic) superlative suffixes, *-mo-* (which occurs, e.g., in OE. *forma* first, *hindema* last, and in L. *prīmus* first), and *-isto-* **-EST.** Those OE. superlatives in *-mest* which either descend from OTeut., or are extensions of OTeut. superlatives in *-mo-*, are formed not on adjs. but on prepositional or demonstrative stems; examples are *æftemest* (see AFTERMOST), *formest* or *fyrmest* FOREMOST, *inmest* INMOST, *niðemest* lowest, *ufemest* or *yfemest* (see OVEMEST), *ütmest* or *ýtmest* UTMOST, *ýmest* (= Goth. *auhumists*) highest; the only instance (among the words belonging to this primary group) of formation on an adj.-stem is *midmest* MIDMOST. On the analogy of these older words, the suffix *-mest* was in OE. used to form superlatives of several adjs. of local and temporal signification, as *lætmest, siðemest* latest, *éastmest, westmest* (also *westema*), *norðmest, súðmest.*

In late OE. the adjs. in *-mest* came to be regarded as compounds of *mæst* MOST, as the frequent spelling *-mæst* shows. The subsequent history of the written form of the suffix coincides with that of the adj., exc. that the absence of stress led to the occasional retention of the spelling *-mest* (beside the quasi-etymological *-most*) down to the 16th c. In mod. English the formal pronunciation of the suffix is assimilated to that of the adj., though colloq. the normal pronunciation (məst) is usual.

As the superlatives in *-mest, -most* corresponded to comparatives in *-er*, analogy led to the insertion of *r* or *er* before the suffix: thus *aftemest* was in early ME altered to *aftermest*, and *ovemest* was replaced by *overmost.* In the 15th and 16th c. the suffix *-most* (interpreted as identical with MOST *a.*) was added to many comparatives in *-er*, on the analogy of earlier adverbial formations in **-MORE**, as in *furthermost, hindermost, innermost, lowermost, outermost, uppermost, uttermost.*

In ME. and modern English, the suffix has been appended to certain positive adjs.; to sbs used adjectively, as in *backmost, bottommost, topmost*; and to advs., as in *downmost, upmost, hithermost.*

The restriction of the application of the suffix to words denoting position in place, time, or serial order, which existed in OE., has almost universally been adhered to in the subsequent formations; the only exception, in a word that has obtained any degree of currency, is *bettermost.* The only other violations of the rule occur in mere nonce-words, as in the following quot.

Mote (mōut), *sb.*[6] (See quots.)

1858 SIMMONDS *Dict. Trade*, *Mote*, ..a name for the nut of the *Carapa guineensis*, used for extracting oil in Sierra-Leone. 1867 BENTLEY *Man. Bot.* (ed 5) 508 An oil of a similar nature is also obtained from *Carapa Touloucouna*; it has been imported under the name of mote-grease.

Mote (mōut), *v.*[1] *arch.* Forms: *α.* 1 **mót** (*pl.* **móton**, *subj.* **móte**, *pl.* **móten**), 2–9 **mot** (2–5 *pl.* **mote**(n, 2–4 *subj. sing.* **mote**), 4–5 **moot**(e, **mut**, 5 **mowte**, **mutt**, 5–6 **mott**(e, 6 **moit**, (**mothe**), 6–7 **mought**, 6, 8 *Sc.* **mat**, 4– **mote**; *β* *2nd sing.* 1 **móst**, 2–5 **most**, 4–5 **moste**, 4 **must**. [A WGer. and Gothic preterite-present verb (wanting in Scandinavian): OE. *mót* corresp. to OFris. *mōt*, OS. *mōt*, *muot* may, must (Du *moet* must), OHG., MHG. *muoz* may, must (mod.G. *muss* must), Goth *gu-mōt* (it) has room, related to OHG. *muoza* (mod.G *musse*) leisure :—OTeut. type **mōtā*.

The primary sense seems to be that preserved in Gothic, from which the sense 'is permitted, may' can easily have been developed The transition from this to the sense 'is obliged, must' is more difficult to explain; it may have arisen from the use in negative contexts, where the two senses ('may not', 'must not') are nearly coincident Normally, OTeut. **mōt* should be the perfect of a verb **mat-*, but there is no trace of a vb. of this form with a suitable sense; the word may be related to **met* to measure (see METE *v.*).

If the verb had come down to mod. English, its form would have been *moot* Exc in northern dialects, it seems not to have survived in colloquial use beyond the 15th c., or at latest the middle of the 16th c. In the 16th c. it was often confused with *mought* (see MAY *v.*), with which it was prob. identical in sound. In the early part of the 16th c, the verb was still used correctly as a present tense, though commonly misspelt *mought*. In the archaistic use of Spenser and later writers, on the other hand, it is, even when written *mote*, almost always a preterite except in traditional phrases.

The pa. t (OE. *mōste*) is treated under MUST The survival of the inflected 2nd person (OE *mōst*) is doubtful after the early part of the 15th c., on account of its formal coincidence with the pa. t, which by that time had already assumed the function of a present.]

(Doric), *μήτηρ, μητέρ-* (Attic and Ionic), L. *māter*, OSl. *mati*, OIrish *māthir*.

As in the case of FATHER, the substitution of *th* for the earlier *d* dates from the beginning of the 16th c, though the pronunciation with (*ð*) probably existed earlier. The occasional occurrence of the spelling *moþer* in the 14th c. (e. g. in the Göttingen MS. of the Cursor Mundi) has prob. no phonetic significance, being due to association with words like *broþer, oþer*, which in fact occur in the immediate context of several of the examples. The development of OE. *é* to mod. E. *ē* (through *ǣ, æ, u*) is normal in the case of words in *-ther, -der*. cf. *brother, other, rudder*. In OE. the genitive sing normally coincided in form with the nom., and many instances of the uninflected genitive occur in ME. and early mod E. (see also 15 b). The genitive *mōderes* is common in the Northumbrian gospels (10th c.).]

1. A female parent; a woman who has given birth to a child. Correlative with *son* or *daughter*.

As with other terms of relationship, *my* is (exc in poetic language) commonly omitted before *mother* used vocatively On the other hand, in the 3rd person the use of *mother* for *my mother* is colloquial and familiar, in the middle of the 19th c. it was regarded as vulgar, or at least as unfashionable, but has now regained currency.

Mother (mʌ·ðəɹ), *sb.*4 [Corresponds in meaning to MDu. *moeder*, *moer* (in mod.Du. *moer*), G. *mutter*, identical in form and gender with the equivalent of MOTHER *sb.*1

Comparison with the synonymous It, Sp *madre* scum of liquids, F. *mère* (*de vinaigre*), OF. *mere* 'vendange pressée' (=sense 3 below), seems to show that this word, in Eng, Du, and Ger., is really an application of MOTHER *sb.*1 The transition of sense is difficult to explain; but most probably the scum or dregs of distilled waters and the like was regarded as being a portion of the 'mother' or original crude substance which had remained mixed with the refined product, from which in course of time it separated itself (The term may possibly have belonged originally to the vocabulary of alchemy) An explanation sometimes given, that 'mother of vinegar' was so called on account of its effect in promoting acetous fermentation, does not agree with the history of the use. It has been pointed out that Gr. γραῦς, old woman, is used in the sense 'scum, as of boiled milk', but the coincidence is prob. accidental.

Most etymologists have regarded the word (with its Du. and Ger equivalents) as altered by popular etymology from Du. *modder* masc, mud, mire (for which Middle Du. has a rare variant *moeder*, occurring chiefly in derivatives) = LG. *modder*, *moder* (whence mod.G. *moder*), HG. dial. *motter* masc. (for which a variant *mutter* occurs). This notion goes back to Kilian's (Du. or Flemish) dictionary of 1598, which contains the two following entries: (1) '*Modder, muder, moyer, more, moer*, limus, cœnum mollius, lutum, volutabrum; Ang. *mire, mudde*'; and (2) '*Modder, moeyer, moeder, grondsoppe*, fæx, fæces, crassamen, crassamentum; Ang. *mother*'. But there appears to be no evidence that the form *modder* was ever used for 'mother' or 'scum', nor is that sense recorded for Ger. dial. *motter*.]

†b. In 1843 MM. Mérimée and Lenoir (*Archit. Mil. au Moyen-Age*) fancifully applied the name *moucharaby* to a kind of balcony projecting from the walls of certain European mediæval castles. It does not appear that this application of the word ever had any actual currency either in Fr. or Eng.; but *moucharaby* was inserted with this explanation (its proper sense being ignored) in Ogilvie's *Imperial Dictionary* (1850), and the entry has been copied with verbal alterations and expansions into various later Eng. Dicts.

The word also exists in the compound ON. *almúge, almúg-r* (MSw. *almoghe, -mogher*, Sw. *allmoge*, Da. *almue*), common people.

Evidence that the word existed in some other Teut. lang. may possibly be afforded by Sp. *muga* landmark, pile (so app. med.L. *muga* from Spain), which, however, some scholars assert to be from Basque; and med.L. *mugimum* hay-stack (one example from Italy dated 1334). The conjecture that the first element in OHG., MHG. *mûwerf* MOULDWARP represents this word is very doubtful.]

In England now mainly dialectal; in the U. S. it seems to be general.

OF. *moe, moue* mouth, lip, pout (mod.F. *moue* pouting grimace), of obscure origin; or perh. a MDu. *mouwe* of the same meaning.

The MDu. word is prob. from OFr.; some, however, think that it was the source, regarding it as a special use of *mouwe* thick flesh (Mow *sb.*¹), from which sense the senses 'thick lip', 'pout' are assumed to have been developed.

In England the word has little colloquial currency, and the pronunciation is uncertain. The British Dicts. give (mau), the recent U. S. Dicts. (mōu). In Scotland, where the word is still in use, the sound is (mau).]

2. As a prefixed title Now pronounced (mi·stəɹ), or with entire absence of stress (mistəɹ, m'stəɹ). The want of a plural form is supplied by *Messrs.,* MESSIEURS 2.

Until the latter half of the 17th c. the title was often written in the full form *master*; but there is reason for believing that from the 16th c. it was, at least in rapid or careless speech, treated proclitically, with consequent alteration of the vowel of the first syllable. (See MISTER *sb.*[2] I, quot. 1551.) Eventually the word came to have the weakened pronunciation whenever it was used as a prefixed title, and it became customary to employ the abbreviated spelling always for this use, and for this only. Hence at the beginning of the 18th c. *master* and *Mr.* were already regarded as distinct words. Cf. MISTER *sb.*[2], which is merely an occasional (chiefly jocular) rendering of the pronunciation of the word of which 'Mr.' is the accepted spelling.

The early history of the application of *Mr.* is identical with that of the use of its fuller form: see MASTER *sb.* 21. From the 17th c. it has been the customary ceremonious prefix to the name of any man below the rank of knight and above some humble but undefined level of social status, except where usage requires the substitution of some honorific title, such, for instance, as those denoting military and naval rank. As with other titles of courtesy, the inferior limit for its application has been continually lowered; at the present day any man however low in station would be styled 'Mr.' on certain occasions, e. g in the address of a letter. Modern custom forbids the use of the prefix when *Esquire* is appended to the name, and it is now omitted after 'The Hon.' and 'The Rev.' (though some still write 'the Rev. Mr. A.' when the Christian name happens to be unknown); but in other than ceremonious use 'Mr' is substituted for these titles.

The use of *Mr.* before a *prefixed* title of office is nearly obsolete. The Judges of the Supreme Court are still styled 'Mr. Justice A.'; the designations 'Mr. Baron A.', 'Mr. Serjeant B.', belonged to dignities now abolished. In municipal use we still occasionally read of 'Mr. Alderman A.', 'Mr. Deputy B.', 'Mr. Councillor C'.

Before an official title *not* followed by the name, the prefix *Mr.* is still common, as in 'Mr. Chairman', 'Mr. Editor', 'Mr President', 'Mr. Mayor'. These are now used only vocatively; 'Mr. Speaker' is used also in the 3rd person

2. As a prefixed title of courtesy. Now pronounced (mi·sis, mi·siz).

In the latter half of the 17th c. there was a general tendency to confine the use of written abbreviations to words of inferior syntactical importance, such as prefixed titles. The form *Mrs.* for *mistress* therefore fell into disuse exc. when prefixed to a name, and in this position the writing of the full form gradually became unusual. The contracted pronunciation, which in other applications of the word has never been more than a vulgarism (see MISSIS), became, for the prefixed title, first a permitted colloquial licence, and ultimately the only allowable pronunciation. When this stage was reached, *Mrs.* (with the contracted pronunciation) became a distinct word from *mistress.* As to the chronology of these changes evidence is wanting; but it may be noted that Walker 1828 says that *mistress* as a title of civility is pronounced *missis,* and that 'to pronounce the word as it is written would, in these cases, appear quaint and pedantick'.

a. Prefixed to the surname of a married woman (sometimes with her Christian name or that of her husband intervening).

Originally distinctive of gentlewomen, the use of the prefix has gradually extended downwards; at the present time, every married woman who has no superior title is styled 'Mrs.' even though her husband is of so humble a position as not ordinarily to be referred to as 'Mr'. In British use the insertion of a woman's Christian name after *Mrs.* (as 'Mrs. Mary Smith') is rare exc in legal documents, cheques, or the like, the normal practice when distinction is needed being to insert the husband's name (as 'Mrs. John Smith'). In the U.S. both these modes of designation are in general use.
