Mean (mīn), *a.*[1] and *adv.*[1] Forms: 3 **meane**, 3-4 **mene**, 4-5 **meen**, 5 **mean**. [App. repr. (with normal loss of prefix) the earlier 1-MENE, OE. *gemǽne* = OFris. *gemēne*, OS. *gimēni* (MLG *gemeine*, MDu. *gemēne*, Du. *gemeen*), OHG. *gimeini* (MHG. *gemeine*, mod.G. *gemein*; Sw., Da *gemen* from Ger.), Goth. *gamains*:—OTeut. **ga-mainī-*, f. *ga-* copulative prefix (synonymous with L. *com-*) + **mainī-* :—pre-Teut. **moinī-* in L. *commūnis* (:—**com moinī-s*) Common *a.*

The pre-Teut. **moinī-* is believed to be a ppl. derivative of the root **mei-, moi-* (as in L. *mūtāre* :-**moitāre*) to change, whence L. *mūnus* (-**mo.nos-*) reward, gift, and perh. (with the notion of change for the worse) OTeut. **mainо-* wicked, Man *a.*

The primary sense of Teut **gamainī*, as of L. *commūnis*, is 'possessed jointly', 'belonging equally to a number of persons'. In OE., and in the early stages of the other Teut. languages, this was substantially the only sense; but in ME., as in Du. and Ger., it underwent a development corresponding to that of Common *a.*, so that it acquired the senses of 'ordinary', 'not exceptionally good', 'inferior'. In English this development was furthered by the fact that the native word coincided in form with the word adopted from OF. *meien, meen* (see Mean *a.*[2]) middle, 'middling', which was often used in a disparaging or reproachful sense. The uses in branch II below might be referred almost equally well to the native and to the foreign adj.; the truth is prob. that they are of mixed ancestry.

It is often supposed that the sense-development of the word has been influenced by OE. *mǽne* false, wicked (cogn. w. *mān* Man *sb.*[2] and *a.*); but this does not seem possible, as this adj. did not survive into ME., while the moral senses of *mean* do not appear before the mod. Eng. period.]

Du. *meenen*), OHG. *meinen* to have in mind (hence also, to love), to intend, signify, make known, mention (MHG and mod.G. *meinen*, now chiefly, to have in one's mind, to hold or express an opinion); cf. the compounds, OS. *gimênian* to make known, OHG *gemeinen* to proclaim, show forth, *bimeinen* to decree, destine, dedicate (whence *bimeinida* testament). The Scandinavian forms, Icel. *meina*, Sw. *mena*, Da. *mene*, are from Low German.

The W Ger **mainjan* is cogn. w. OFris *mêne* opinion, OHG *meina* fem., ? opinion (found only in Otfrid in certain phrases, *thia meina, bi thia meina*, etc., meaning 'verily', 'forsooth'). Outside Teut., the OSl. formal equivalent, *mĕnitĭ*, exhibits an extraordinarily close parallelism of meaning, having all the varied senses of the OE. and OS. verb. The ultimate etymology and the order of sense development are doubtful; the prevailing view that the root is **men* to think (see MIND *sb.*) would account plausibly for all the recorded senses, but involves phonological difficulties that have not been satisfactorily disposed of.]

For other derivatives of the Teut. root **mas-*, **mēs-*, expressing the notion of 'spot' or 'excrescence', see MAZER.

It is possible that the word may have come into Eng. from continental LG. For its existence in OE. there is no other evidence than the occurrence, in a 12th c. MS., of *mælescræf.* as a spelling of *mælsceafi* MALSHAVE. The phonetic development is irregular: normally the modern form should be **mazel* (cf. HAZEL [1], for which spellings like *hesel*, *heasle* occur in the 15–16th c.). That the dialectal form *meas'e* appears in literary English may be due to a mistaken association of this word with MESEL leper, a similar confusion occurred in MHG., where *maselsucht* (etymologically 'measles') was often used for *miselsuchi* leprosy.]

4. Used to represent the terms applied in their native languages by North American Indians to denote any object or ceremony supposed by them to possess a magical influence; a spell, charm, fetish; sometimes = MANITOU. Hence used, by later writers, to express the same or similar meanings as current among other savage peoples.

As savages usually regard the operation of medicines as due to what we should call magic, it is probable that their words for magical agencies would often be first heard by civilized men as applied to medicine, and hence it would be natural that 'medicine' should be regarded as their primary sense.

Meet (mīt), *sb.* [f. Meet *v.*] The meeting of hounds and men in preparation for a hunt. Also, by extension, applied to other kinds of sporting meetings (e.g. of coaches, cyclists).

1831-4 R. S. Surtees *Jorrocks's Jaunts* (1838) 39 They overtook a gentleman perusing a long bill of the meets for the next week, of at least half a dozen packs. 1854 Warter *Last of Old Squires* vi. 58 If it so happened that the foxhounds did not make their usual meets in the neighbourhood. 1893 *Times* 4 May 12/1 The interesting meet of the stage-coaches to be held to-day. 1897 *Outing* (U. The etymological sense is thus 'commensurate'.

OE. had *mǽte* adj. of similar formation without the prefix, but it occurs only in the senses 'small, inferior'. The formally equivalent ON. *mátr*, 'valuable, excellent, lawful', may possibly be the source of some of the Eng senses. The alleged OE. *gemet* adj , sometimes assigned as the etymon, appears to be merely a predicative use of *gemet* sb., measure, what is fitting; and if the adj. existed it is ME. form would not have had close *ē*]

The medical writers spoke of the human fœtus as consisting of a 'spermatic' and a 'menstrual' part, derived from the two parents respectively; the alchemists employed this language in a transferred sense, the 'menstruum' with them being the solvent liquid. -ment (mĕnt), *suffix*, forming sbs. Originally occurring in adopted Fr. words in *-ment*, either representing Latin sbs. in *-mentum*, or formed in Fr. on the analogy of these by the addition of the suffix to verb-stems. The Latin *-mentum* was added to verb-stems, and the resulting sbs. sometimes expressed the result or product of the action of the verb, as in *fragmentum* fragment, and sometimes the means or instrument of the action, as in *alimentum* aliment, *ornāmentum* ornament. In late popular Latin, and hence in French, the suffix, while retaining its original functions, came (through sense-development in some of the older words) to be also a formative of nouns of action. In AF. the suffix was still more frequently employed than in continental OF. Of the many words in *-ment* adopted into English from French, some have concrete senses, as *garment*, *habiliment*; the majority are nouns of action, as *abridgement*, *accomplishment*, *commencement*. In most of the instances the Fr verb has been adopted into English as well as the sb. derived from it. Hence the suffix came to be treated as an English formative. Early examples of its use as appended to native English verb-stems are *onement* (Wyclif's rendering of L. *unio*), and *hangment* (in the Promptorium *c* 1440 given as the equivalent of L *suspendium*, *suspencio*). In the 16th c. the suffix was very freely added to English verb-stems, not only to those of Romanic etymology (as in *banishment*, *enhancement*, *excitement*), but also to those of native origin; examples of the hybrid formations of this period still surviving in use are *acknowledgement*, *amazement*, *atonement*, *betterment*, *merriment*, *wonderment*. Since the 16th c. many new derivatives in *-ment* have been formed from verbs of obvious French origin. Among verbs of native English etymology, those with the Romanic prefix *en-* (*em-*), and those with the native prefix *be-*, seem to have given rise to derivatives of this form with especial frequency: examples are *embankment*, *embodiment*, *enlightenment*, *entanglement*; *bedazzlement*, *bedevilment*, *bedraggletment*, *bereavement*, *besecchment*, *besetment*, *bewilderment*. Of formations in *-ment* from other native verbs there are few instances since Shakspere's time. It is rarely that the suffix has been appended to any other part of speech than a verb, as in *dreariment*, *funniment*, *oddment*.

The letter *y* (after a consonant) ending a verb is changed into *i* when the suffix is appended, as in *accompaniment*.

A. *adj* Of or belonging to the Old English kingdom of Mercia or its language.

Although the political limits of Mercia were different at different periods, it may broadly be said to have occupied the middle of South Britain, between Deira on the north and Wessex on the south, and between Wales on the west and Lindsey and East Anglia on the east. The Mercian dialect of Old English belongs to the Anglian (as opposed to the Saxon) division, and is the dialect from which modern standard English mainly descends.

Mercy (mɔ̄·ɹsi), *sb.* Forms: 2-5 **merci**, 4-6 **mersy, mercye**, 4-7 **mercie**, 5 **merce**, 6 **mersye**, *Sc.* **marcie**, 3- **mercy**. [a. F. *merci*, earlier *mercit* = Pr. *merce-s*, Sp *merced*, Pg *mercé*, It. *mercede*:—L. *mercēdem* (nom. *mercēs*) reward, fee, in Christian Latin from the 6th c. often used in the sense of *misericordia* (= I below) and in that of thanks.]

The post classical uses of *mercēs* are developed from the specific application of the word to the reward in heaven which is earned by kindness to those who have no claim, and from whom no requital can be expected. The Eng. uses explained below represent OF senses that for the most part have not survived in Fr., where the word has been in great part superseded by *miséricorde*. The chief uses of *merci* in mod. Fr. are in the sense 'thanks' (cf. GRAMERCY), and in phrases corresponding to those in 5 below.

The word is often referred to the Indogermanic root **mer-* (*mor-, mr-*) to die, and supposed to have originally designated the sea as 'lifeless' in contrast with the land as abounding in vegetable life, but this is very doubtful, Brugmann suggests that the *r* may belong to the suffix.

1. The blackbird, *Turdus merula. arch.*

Perhaps never in popular use, but constantly occurring in Scottish poetry from the 15th c. Drayton adopted from some Scottish poet the traditional association of 'mavis and merle', which he frequently repeats, and which in the 19th c often appears in English and American poetry from imitation of Scott or Burns. As used by Caxton and perh. by Philemon Holland, the word is an independent adoption from French.

In recent use sometimes in a wider sense, corresponding to the mod.L. *Æsalon*, as applied by some ornithologists to a subdivision of the genus *Falco* including the merlin proper and some closely allied species.

In the 17th c. some writers regarded the name as properly belonging to the female bird.

The transition from the assumed original sense 'short' to the OE. sense 'pleasant' is somewhat difficult, but may have been brought about through the intervention of a derived factitive verb, meaning 'to shorten', and hence 'to shorten time', 'to cheer'; cf. ON. *skemta* to amuse, f. *skamt*, neut. of *skammr* short.]

Merry-andrew, Merry-Andrew (merɪr æ·ndrʊ). [app. f. MERRY *a.* + *Andrew* proper name (cf. ANDREW 2).

Hearne's statement, in the preface to his edition of Benedictus Abbas (1735) that 'Merry Andrew' was originally

applied to Dr. Andrew Borde (died 1549) has neither evidence nor intrinsic probability, though Borde had a reputation for buffoonery, as is shown by the traditional attribution to him of various collections of jests. In 1668 (29 Aug.) Pepys says that he saw at Bartholomew Fair a ridiculous play called 'Marry Andrey', but that this title has any connexion with *merry-andrew* is very doubtful.]

Mesh (meʃ), *sb.* Forms: 6-7 **meishe, meash,** 6–8 (9 *dial*) **mash,** (8 **marsh**), 6–**mesh.** [Known only from the 16th c ; cogn. w. OE. *max* (?**mæsc.*) neut., net and ON. *mpskve* (see MASK *sb*.[1]); but the precise nature of the relation is undetermined

The Teut. langs have words with this meaning representing two ablaut types: (1) OTeut. **mask-* (OE. *max*, ?**mæsc* ? neut.; OHG *masca*, MHG , mod G *masche* fem ; M Du *masche* fem ; ON *mpskve*, Norw *moske* wk masc.; Sw *maska*, Da. *maske* fem are from LG.), (2) OTeut. **mêsk-* (OHG. *mâsca*, MHG ?*mâsche*; MDu. *maesche*). The Eng. form *mask* would regularly represent an OE **mæsc*, but the OE. word occurs only once in the metathetic form *max*, and in that instance means 'a net' The 16th c. forms *meishe, meash*, indicate a pronunciation with long vowel, mēʃ; for the shortening to *mesh* cf. *flesh*. On the whole, on account of the absence of the word in ME., its form-history in the 16th c , and the frequency with which fishing terms were adopted from Du., it seems not improbable that *meash* (shortened to *mesh*) and *mask* represent adoptions respectively of the MDu. forms *maesche* and *masche*. The resemblance between the Eng. form *marsh* (18th c) and the Flemish *maersche* (Stallaert) is prob. accidental

The Teut. **mêsk-* (·**mask-*) is cognate with the Lithuanian *mezgù* I knit, *mazgas* knot]

Messiah (mesəi ă). Forms: *α.* 4 **Messie,** 4-5 **Messye,** 5 **Messy, Messe, Myssye**; *β.* 3 **Messyas,** 4-8 **Messias**; *γ.* 7 **Messiah.** [The *α* forms are a. F. *Messie*, ad. L. (Vulg.) *Messīās*, a. Gr. *Μεσσῑ́ας*, ad. Aramaic מְשִׁיחָא *mᵉshīḥā*, Heb. מָשִׁיחַ *māshīᵊḥ* anointed (in the LXX rendered Χριστός, CHRIST), f. מָשַׁח *māshaḥ* to anoint. These forms do not occur in any Eng. transl. of the Bible, though common in other literature down to the 15th c. The form *Messias* was used in John i. 41 and iv. 25 (the only passages in which the word is found in the Gr. or Latin N.T.) by Wyclif after the Vulgate, and by later translators from 1526 to 1611 directly after the Greek. The form *Messiah*, invented by the translators of the Geneva Bible of 1560, is an alteration of the traditional *Messias*, intended to give it a more Hebraic aspect (the translators having on principle eliminated the Græcized forms of proper names from the O.T., though retaining them in the N.T.). In the Bible of 1611 it was adopted in Dan. ix. 25, 26, and although it occurs in no other passage of the 'Authorized Version', it eventually became the only current form. The Revisers of 1880-84 have substituted it for *Messias* in the two N.T. passages, but on the other hand have removed it from its original place in Dan. ix, where they read 'the anointed'.] The Hebrew title (= 'anointed') applied in the O.T. prophetic writings to a promised deliverer of the Jewish nation, and hence applied to Jesus of Nazareth as the fulfilment of that promise. (Chiefly preceded by *the* or defining word, exc. in the three Bible passages and sometimes in poetry, where it is treated as a proper name.) Hence *transf.*, an expected liberator or saviour of an oppressed people or country. (Written with capital M.)

‖ **Meta** (mī·tă). *Rom. Antiq* Pl. **metæ** (mī·tī). [L. *mēta.*] One of the conical columns set in the ground at each end of the Circus, to mark the turning-place in a race. Hence *transf.* A boundary.

Brit.* i 2 in *Holinshed*, So that the aforesaid line shall henceforth be their *Meta* and partition from such as be ascribed to America. 1662 RAY *Three Itin.* III. 183 In Somersetshire they have a way of setting their mows of corn on a frame, standing upon four stones cut with a shank, and upon that an head like a meta. 1845 *Athenæum* 1 Feb. 126 We have the cross erected between two 'metæ'.

Meta- (me·tă), *prefix*, before a vowel normally **met-** (also before *h*, the resulting *meth-* being pro-

nounced mep), repr. Gr. *μετα-*, *μετ-* (*μεθ-*), which occurs separately as the prep. *μετά* with, after; etymologically corresponding to MID *prep.* In Gr. the prefix is joined chiefly to verbs and verbal derivatives; the principal notions which it expresses are: sharing, action in common; pursuit or quest; and, especially, change (of place, order, condition, or nature), corresponding to L. *trans-*. In some few formations *μετα-* represents the prep. *μετά* in syntactical combination, with the sense after or behind, as in *μετάφρενον* METAPHRENON.

The words derived from Gr. words containing the prefix, or from assumed Greek types normally constructed, are given in their alphabetical place. The words enumerated in this article are modern formations, in which the prefix is employed in ways not strictly in accordance with Greek analogies. The prefix is often hyphened, and the *a* remains unelided before a vowel or *h*.

1. The supposed analogy of METAPHYSICS (misapprehended as meaning 'the science of that which transcends the physical') has been followed in the practice of prefixing *meta-* to the name of a science, to form a designation for a higher science (actual or hypothetical) of the same nature but dealing with ulterior and more fundamental problems. **Metache·mistry** ? *nonce-wd*, the chemistry of the supersensible. **Metamathema·tical** *a*, beyond the scope of mathematics. **Metamathema·tics**, 'the metaphysics of mathematics; the philosophy of non-Euclidean geometry and the like' (*Cent. Dict.* 1890) **Metaphysio·logy**, a name invented by G. H. Lewes for a doctrine of life and vital phenomena which should base itself on principles outside of and higher than those of physiology and the material organism; hence **Metaphysiolo·gical** *a*, **Metaphysio·logist**. **Metatheo·logy** *nonce-wd.*, a profounder theology than that recognized by divines. Similarly in **Meta-e·lement**, **Metagno·stic** *a.* [cf GNOSTIC *a.*], **Metaorganism** (see quots.); **Metapheno·menal** *a.*, existing behind phenomena. See also META-GEOMETRY, METEMPIRIC.

Ent.* [Gr. *σθένος* strength], having most strength in the hinder part of the body; *sb. pl.*, a division of insects characterized in this way.

4. *Bot.* and *Zool.* Used with the sense 'later', 'subsequent', 'more developed'; sometimes indicating the latest of three stages, correlated with PROTO- and MESO-. **Metaphase**, **Metaphasis** (metæ·făsis), the separation of the daughter chromosomes in nuclear division. **Me·taphyte**, ‖ **Meta·phyton**, a multicellular plant; hence **Metaphy·tic** *a.* (Jackson *Gloss. 5. *Geol.* In imitation of METAMORPHISM, the prefix has been used irregularly to form words referring to certain specific varieties of metamorphic processes, as **Metache·mic** *a.*, **Metape·psis** (hence **Metape·ptic** *a.*), **Meteta·xis** (hence **Meteta·xic** *a.*), **Meta·tropy**: see quots.

6. In *Chemistry.* **a.** *Meta-* is used to designate compounds derived from, metameric with, or resembling in composition those to the names of which it is prefixed, as *metachloral*, METALDEHYDE, etc. More systematically, it is used to distinguish one class of acids and their corresponding salts from another class (the ORTHO- acids) consisting of the same elements in different proportions, the *meta-* acids containing one, two, or three molecules of water less than the *ortho-* acids; the salts of these acids have names formed by replacing *-ic* by *-ate*. (A few of these compounds will be found in their alphabetical place; the most important of those remaining are placed below.)

The use of the prefix in chemistry was first introduced by Graham in 1833 (*Phil. Trans.* 253): see METAPHOSPHATE, METAPHOSPHORIC. The more definite use (correlated with *ortho-*) was introduced by Odling in 1859.

The word has passed (directly or indirectly) from Latin into all the Rom. and Teut. langs.: cf. Pr. *metalh*, Sp, Pg. *metal*, It. *metallo*; G. *metall*, Du *metaal*, Sw. *metall*, Da *metal*.]

1. Any member of the class of substances represented by gold, silver, copper, iron, lead, and tin. Originally this class was regarded as including only these bodies together with certain alloys (as brass and bronze), and hence as definable by their common properties, viz. high specific gravity and density, fusibility, malleability, opacity, and a peculiar lustre (known specifically as 'metallic'). In process of time other substances were discovered to have most but not all of these properties; the class was thus gradually extended, the properties viewed as essential to its definition becoming fewer. From the point of view of modern Chemistry, the 'metals' are a division (including by far the greater number) of the 'elements' or simple substances. Among them are all the original (simple) 'metals', of the later additions to the list some possess all the properties formerly viewed as characteristic of a metal, while others possess hardly any of them; the 'metallic lustre' is perhaps the most constant. By some chemists the radical ammonium (NH_4) and derivatives thereof have been designated as 'metals', on account of the analogy of their compounds with those of the metals potassium and sodium.

In popular language the term is not applied to a metallic element when in such a state of combination that its identity is disguised. (Cf. METALLIC *a.* 2.)

Metaphysics (metăfi·ziks), *sb. pl.* [pl. of Metaphysic *sb.*, repr. med.L. *metaphysica* (neut. pl.), med. Gr. (τὰ) μεταφυσικά (neut. pl.), an alteration of the older τὰ μετὰ τὰ φυσικά, 'the (works) after the Physics' (cf. Meta- and Physics), the title applied, at least from the 1st century A.D., to the 13 books of Aristotle dealing with questions of 'first philosophy' or ontology.

This title doubtless originally referred (as some of the early commentators state) to the position which the books so designated occupied in the received arrangement of Aristotle's writings (τὰ φυσικά being used to signify, not the particular treatise so called, but the whole collection of treatises relating to matters of natural science). It was, however, from an early period used as a name for the branch of study treated in these books, and hence came to be misinterpreted as meaning 'the science of things transcending what is physical or natural'. This misinterpretation is found, though rarely, in Greek writers, notwithstanding the fact that μετα does not admit of any such sense as 'beyond' or 'transcending'. In scholastic Latin writers the error was general (being helped, perhaps, by the known equivalence of the prefixes *meta-* and *trans-* in various compounds); and in English its influence is seen in the custom, frequent down to the 17th c., of explaining *metaphysical* by words like 'supernatural', 'transnatural', etc.]

1. That branch of speculative inquiry which treats of the first principles of things, including such concepts as being, substance, essence, time, space, cause, identity, etc.; theoretical philosophy as the ultimate science of Being and Knowing.
