A VERY USEFUL AND CLEARLY-WRITTEN VOLUME, WHICH, WHILE CAREFULLY AVOIDING ABSTRUSE AND INTRICATE TECHNICALITIES, AFFORDS INFORMATION UPON ALL IMPORTANT MEDICAL SUBJECTS IN A FORM WHICH PLACES IT WITHIN THE COMPREHENSION OF THOSE WHO LACK SCIENTIFIC TRAINING AND SCIENTIFIC KNOWLEDGE

Some Press Opinions

"This is a book which would prove useful from time to time in any household, and is, moreover, so well written—its prime merit that of clearness—as to furnish reading of an interesting character quite apart from the idea of turning the information to immediate use."—*Guardian.*

"The book should be of great service to such classes as ship captains, nurses, and those in the country who live some distance from a doctor."—*Liverpool Courier.*

"No one could read it through without acquiring a large amount of sound information, not only in regard to the organs of the human body, their functions, and the diseases to which they are liable, but also a good deal of learning in regard to such important matters as clothing, diet, exercise, sanitation, and ventilation. It is a thoroughly practical, useful book, singularly complete."—*Scotsman.*

"Medical terms are arranged and explained in alphabetical order, and the details given are so practical and clearly put that it is a book we would strongly recommend to nurses. By having this book in the house the nurse need not be obliged to write to busy journals on simple medical matters, but in addition to finding the answer to occasional queries, we can confidently say that nurses will find this an admirable text-book for occasional study. . . ."—*Nursing Times.*

It covers the whole scope of those special affairs of the home which a British wife and mother delights in directing, retaining as its groundwork whatever remains of present-day value from the old homely habits and customs which have served our race so well in the past.

It imports into its survey such tested and proved new ideas in home economies and efficiency as have been forced upon us by altered conditions, and deals with the mechanism and science of the home, particularly in culinary matters, with a due recognition of the improvements which latter-day invention has placed at the command of the housewife.

It steers clear of extravagance, recommending only what is necessary and sufficient in all cases. Thus it makes for economy at every turn.

It is simplicity itself in arrangement, which is strictly alphabetical, with cross references linking up leading subjects with their kindred supplementaries. It is as easily consulted as it is easily understood.

PREFACE

THE annual volumes of *Who's Who* are confined to those still living. But it has long been felt that it is not the biographies of the living only that are required.

To learn details of the career of a distinguished man recently dead, it has so far been necessary to look him up in a back volume of *Who's Who*. This entailed on the busy journalist, or man of affairs, the necessity for keeping the whole of the past volumes on his shelves. To obviate this the biographies of all those who died between 1897 and 1916 (the first twenty years of the new issue of *Who's Who*) have now been re-edited and collected into the present volume, which forms a companion book to the older one, and will probably prove as indispensable.

It had been the intention of the Publishers to bring this volume out in 1916, but difficulties arising out of the war unfortunately rendered that impossible.

24 *Sept.* 1919.
