THE territory known as Albania is made up of the old Turkish Provinces of Scutari and Yanina, and of parts of those of Kosova and Monastir. The Albanians, from the point of view of their language, are divided into two principal groups—the Ghegs, who live to the north of the river Shkumbi, and the Tosks in the south.

The early history of the Albanians is complicated and local. But after the death of George Kastrioti—nicknamed and popularly known as Skanderbeg—in 1479, under whom the Albanians had united and heroically resisted the Turks for a quarter of a century, Albania passed under Turkish suzerainty, and thus remained—nominally or actually according to the locality and period—until 1912. At the beginning of the eighteenth century Ali Pasha of Tepelen established a virtually independent Albanian State with Janina as its capital, and waged war against his Albanian rivals the Pashas Bushati (1760-1831) of Shkoder (Scutari), who had temporarily thrown off Turkish control in the north. Between 1878 and 1880 an Albanian League unsuccessfully attempted to establish Albanian autonomy.

The independence of Albania was proclaimed at Vlonë (Valona) on November 28, 1912, and on December 17, 1912, the London Conference of Ambassadors agreed to the principle of Albanian autonomy. Subsequently that Conference decided upon the frontiers of the new country, and agreed that a European Prince be nominated to rule it. Prince William of Wied, having accepted the crown of the Principality from an Albanian deputation at Neuwied, on February 21, 1914, arrived at Durazzo (Durrës) on March 7, 1914. Previously, an International Commission of Control had been constituted to control the International loan to Albania.

Prince William's reign was foredoomed to failure. Intrigue and treachery were followed by revolt in central Albania. After the outbreak of the European War in 1914, the Prince and nearly all the members of the International Commission on September 8 left Albania, which fell into a state of anarchy. By the secret Pact of London of April 26, 1915, provision was made for the partition of Albania, but this arrangement was repudiated by Italy on June 3, 1917, when the Italian Commander-in-Chief in Albania, proclaimed at Gjinokaster (Argirocastro) the independence of Albania. After the Armistice there was fighting between the Albanians and both the Italians and Yugoslavs, but eventually foreign forces were withdrawn beyond the Albanian frontier, and the independence of the country confirmed. On December 17, 1920, Albania became a member of the League of Nations. In January, 1925, the country was proclaimed a Republic, which continued until 1928. A Constituent Assembly for the purpose of changing the Albanian Republic into a Monarchy was opened on August 25, 1928, and on September 1, the necessary amendments to the Constitution were voted and Ahmed Beg Zogu, President of the Republic since January 31, 1925, was proclaimed King. The new régime was generally recognised by the European Powers.

According to the constitution of 1928, Albania is a democratic, parliamentary, independent monarchy, without any state religion and with only one elected Chamber.

On November 22, 1927, a defensive alliance for a period of twenty years was signed between Albania and Italy.

Reigning King.—Zog I, born October 8, 1895, a Moslem by religion and hereditary chieftain of the Mati clan, proclaimed king September 1, 1928. The king is assisted in the administration by a council of ministers appointed by him

Area and Population.—The area of the country is 10,629 square miles, while the population, according to the Census held on May 25, 1930, was 1,003,068.

The country is divided into 10 prefectures, named after the principal towns, which with the population in 1930 are as follows —

Prefectures	Population in 1930		Prefectures	Population in 1930	
	Prefecture	Town		Prefecture	Town
Berat .	142,616	10,403	Korça (Coriza) .	147,536	22,787
Diber (Dibia)	86,992	—	Kosova (Cossovo)	49,081	—
Durrës (Durazzo)	77,890	8,739	Shkoder (Scutari)	132,336	29,209
Elbasan .	111,422	13,796	Vlone (Valona)	53,461	9,100
Gjinokastër (Argi rocastro) .	143,926	10,836	Tirana (Capital)	57,808	30,806

Religion and Education —There is no State religion. The population is distributed according to the following estimates —Moslems, 688,280, orthodox Christians (National Albanian Church), 210,313, Roman Catholics, 104,184. The Gheg Christians in the north are for the most part Roman Catholics under two Archbishops, three Bishops, one Mitred Abbot and an Apostolic Delegate, and the Tosk Christians in the south are members of the Albanian Autocephalous Church, which is under the rule of the Holy Synod (constituted February 18, 1929) and four bishops.

Primary education is nominally compulsory for children between the ages of 6 and 13, but owing to the shortage of schools this cannot be enforced. There were in 1929, 495 State primary schools with 807 teachers (103 women) and 28,199 pupils (5,232 girls), 32 State secondary schools, with 106 teachers (8 women), and 1,247 pupils (94 girls). There are also 14 Infants Schools, and 2 training colleges for teachers. About 902 Albanians are studying abroad.

Justice.—There is in every prefecture a tribunal of first instance with three judges, and a court of cassation, composed of six judges, at Tirana. On January 1, 1928, the new Albanian Penal Code, which is based on that of Italy, and the new Civil Code (April 1, 1929), based on that of Italy, France and Switzerland, came into force, to take the place of the Ottoman laws previously imposed. According to the new Code polygamy is abolished, although Islam is the dominant religion in Albania. The new Albanian Commercial Code came into force on April 1, 1932.

Finance.—The revenue and expenditure for five years ending March 31 is as follows —

—	1927-28	1928-29	1929-30 ¹	1930-31 ¹	1931-32 ¹
Expenditure .	gold francs 25,872,740	gold francs 80,272,000	gold francs 81,827,200	gold francs 81,885,000	gold francs 81,588,422
Revenue . .	27,862,814	28,167,000	81,827,200	81,885,000	29,097,000

¹ Estimates

In May 1925 Albania obtained a foreign loan for the nominal amount of 50,000,000 gold francs in Italian lire, and by the rise in value of the lira the Government made a profit of 15,000,000 gold francs. Thus the sum to be expended was 65,000,000 gold francs. The loan, administered by the Italian Company for the Economic Development of Albania (S V E A), and guaranteed by the yield of the Albanian Customs, and of the Albanian Monopolies on salt, matches, cigarette papers and playing cards, is also guaranteed by the Italian Treasury, and is being used exclusively in carrying out public works. This loan proving inadequate, the Italian Government agreed in June, 1931, to subsidise the Albanian revenues to a maximum annual amount of 10,000,000 gold francs, for a period of ten years. This sum bears no interest, but, on the instance of the Albanian Government repayment is to be considered when the Albanian revenues amount to 50,000,000 gold francs, provided such repayment does not effect the economic development of the country. Expenditure is to be controlled by a commission of two Italian and two Albanian members, one of whom is chairman having equal vote with the other members, but decisions are by majority vote. The Commission has the right to scrutinise all accounts and budgetary provisions, and to make such recommendations for economy as it thinks fit.

Defence.—Military service is compulsory between the ages of 19 and 50. Service with the colours is for 18 months. The strength of the army in 1931 was 771 officers and 12,699 other ranks, organized in 12 infantry battalions, 22 battalions of artillery, 9 engineer companies, and 1 section of armoured cars.

The nucleus of a navy has been formed by the purchase of two patrol vessels, and four motor boats for coastguard purposes.

Production and Industry.—The Albanian economic system is very primitive, each family provides for its own needs. Great tracts of the country remain uncultivated, and the areas at present under cultivation (about 926 square miles) are dealt with in a primitive way. A number of agrarian reforms were initiated in 1930, including the formation of an Agricultural Bank. The State owns some 125,000 acres of the best land in the plain between the rivers Shkumbi and Vjosa. The country for the greater part is rugged, wild, and mountainous, the exceptions being along the Adriatic littoral and the Korcha Basin, which are fertile. Tobacco, timber, wool, hides, furs, cheese and dairy products, fish, olive oil, corn, cattle and bitumen are the principal products of the country. Cattle breeding receives special attention. The wool is made up into coarse and heavy native cloth and exported. There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. The mineral wealth of Albania is considerable but undeveloped. The copper mines in the Puka district are being exploited. The salt-pits at Vlonë (Valona) are said to be of commercial importance, and Selenizza Bitumen mines are also worked successfully. The principal industries in the country are those connected with agriculture, such as flour-milling, olive-pressing and cheese-making.

Commerce—Imports and exports for 5 years are shown as follows (in gold francs) —

—	1927	1928	1929	1930	1931
Imports	24,681,888	32,311,588	38,648,900	33,288,900	29,513,000
Exports	11,106,901	14,694,203	14,682,608	12,352,063	7,509,000

The distribution of trade in 1931 was as follows (in gold francs) — Imports from Italy, 13,840,000, United Kingdom, 1,771,000, Czechoslovakia, 1,982,000, Yugoslavia, 2,783,000, Greece, 1,076,000, United States, 2,804,000 Exports to Italy, 4,966,000, to United States, 770,000, to United Kingdom, 53,000, to Greece, 1,422,000, to Yugoslavia, 144,000

The principal imports in 1931 were cotton and cotton textile, 8,273,000 gold francs, cereals, 2,790,000 gold francs, metals, 867,000 gold francs, the principal exports animal foods and fish, 1,948,000 gold francs, hides and skins, 692,000 gold francs

Total trade between Albania and Great Britain (according to Board of Trade Returns) was as follows —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Albania	273	278	2,544	469	961
Exports to Albania	36,771	32,486	22,531	29,775	33,709
Re exports to Albania	1,619	167	150	298	384

Communications.—All the principal towns of Albania are connected by passable roads which compare very favourably with those in other Balkan countries. The mountain districts of the north are still, however, mostly inaccessible with wheeled vehicles, and communications are still by means of pack ponies or donkeys. The total length of completed roads in the country at the end of 1929 was 857 miles, but a further 360 miles were under construction. A railway to join Durrës with Tirana, 22 miles in length, is under construction. The ports are four in number, viz Shengjin, Durrës (San Giovanni di Medua), Vlonë (Valona), and Sarandë (Santi Quaranta). Durrës is being fully equipped, but the others remain primitive. Number of post and telegraph offices, 55. There are five regular air routes in service Tirana-Shkodër, Tirana-Korcha, Tirana-Vlonë-Gjinokastër, Tirana-Peshkepijë and Tirana-Kukës, and 3 wireless stations.

Banking and Currency.—On September 2, 1925, the National Bank of Albania was established in Rome, with branches in Tirana, Durrës, Korcha, Vlonë, Shkodër, Santi Quaranta and Argirocastro. It has a capital of 12,500,000 gold francs. Albanian participation was to have amounted to 5,625,000, but owing to the failure of Albanians to subscribe, almost the whole of the Albanian quota was eventually taken up by Italians. The remainder of the capital was subscribed by an international financial group headed by the Credito Italiano. The Bank has the exclusive right of issuing paper money and metal coinage. A new currency based on notes freely convertible into gold coin, gold exchange, or foreign bank notes convertible into gold has been established. The monetary unit chosen is the (Frank an) gold franc (5 Lek) (3225806 gr 900 fine), with a parity of 25 2215 to the gold £.

The Bank has issued Bank notes of 100, 20, 5 gold francs and 5 Lek (1 gold franc), and metallic currency as follows —gold, 100 and 20 franc pieces, silver, 5, 2 and 1 franc pieces, nickel, 1, $\frac{1}{2}$ and $\frac{1}{4}$ Lek, and bronze, 0 10 and 0 05 Lek. On August 31, 1932, there were in circulation notes amounting to 12,148,000 francs and coin to the value of 2,069,000 francs, of which 1,276,000 francs were gold, and 793,000 francs nickel coins. Silver and bronze coins, and the 5 Lek (1 gold franc) note, are no longer in circulation. The cover for the note circulation on that date consisted of 23,431,000 francs, of which 5,409,000 francs were in gold, 10,219,000 francs in dollars and 7,803,000 francs in other currencies.

Diplomatic Representatives.

1. OF ALBANIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary — Djemil Dino
Consul General in London — Edwin Cripwell

2. OF GREAT BRITAIN IN ALBANIA.

Envoy Minister and Consul-General — Sir Robert Macleod Hodgson,
 K B E , C M G (appointed June 12, 1928)
Vice-Consul — E H L. Hadwen
Naval Attaché — Capt R R B Ramsay, M V O , R N (Resident in Athens)
Military Attaché — Col H R. G. Stevens, D S O (Resident in Rome)
Air Attaché — Group Captain T G Hetherington, O B E (Resident in Rome.)

ARABIA.

ARABIA is essentially a desert country comprising an area of roughly 1,000,000 square miles and inhabited for the most part by nomadic Bedouin tribes eking out a precarious pastoral existence by the breeding of camels, sheep and goats Bounded on the north by Iraq and Transjordan (Palestine), it is enclosed on the other three sides by the sea—the Red Sea on the west, the Arabian Sea on the south and the Persian Gulf on the east The land-surface of the peninsula enclosed within these limits slopes down steadily from the elevated mountain barrier, which runs down the whole length of its western side parallel with the Red Sea, to sea level on the Persian Gulf, and the uniformity of this slope is only interrupted in the extreme south eastern corner of the peninsula, where the mountains of the Oman district rear their crests to an elevation of 10,000 feet above sea-level With the exception of this mountainous district and the similar district of the Yemen, Arabia is a barren country consisting of vast tracts of steppe-desert, sand-waste and mountainous wilderness It is a country of insignificant rainfall (the Yemen and Oman excepted), here and there, scattered oases, or oasis-groups, are formed The Taif district, for instance, in the Hejaz mountains above Mecca, the Qasim and Jebel Shammar provinces in Central Arabia and the Hasa province near the Persian Gulf are among the best examples of such districts, while Medina, Taima, Riyadh, Jauf and Wadi Dawaair are but a few among the many large oases which occur frequently throughout the country.

The population of Arabia cannot be estimated with any certainty, but would seem to be about 10 millions.

The inhabitants of Arabia are at present found in every degree of transition from the purely nomadic life of the Bedouin to the simple civic life of towns in the interior like Anaiza or Buraida and the more highly developed civilization of Mecca, Medina and Jedda. Political changes have contributed to a development whereby the patriarchal, tribal organisation of the Bedouin has weakened steadily before a natural tendency to communal organisation into States and principalities imposed on the people by the development of civic life. The introduction of modern fire arms and the growth of an Arab nationalist spirit (directed against Turkish domination) in the borderlands of Syria and Iraq tended to encourage this process during the first decade of the present century, and the rise to power of Abdul Aziz ibn Sa'ud, the present Wahhabi King, gave it a further impetus. Ibn Sa'ud set to work to organise the unsettled Bedouin into civic communities under cover of a great Wahhabi revival, and in the spring of 1913 struck the first blow for the Arabs against the Turks by capturing the Hasa province from the latter. The Great War completed and stereotyped the process of political organisation in Arabia, and the ejection of the Turks from the Hejaz, Asir and the Yemen left the Arabs to work out their own salvation unchecked by foreign control. Internecine warfare not unnaturally followed, and the result of a six years' struggle was that a single power (the Ibn Sa'ud dynasty of Nejd) achieved a paramount position throughout the peninsula beyond the southern coastal fringe, where the States of Yemen and Oman are the most important of those which maintain an independent existence together with the lesser principalities of Kuwait and Bahrain, the crucial chiefs of the Oman coast, the Hadramaut and the Aden hinterland, all of which enjoy in a greater or less degree the protection of Great Britain. The principality of Asir (capital Sabiya), reduced in extent to a mere strip of the coast, maintained a precarious independence between Ibn Sa'ud and the Imam of Yemen (capital Sana') until October, 1926, when it accepted the suzerainty of Ibn Sa'ud. In 1930 under a new arrangement with its titular sovereign the Idrisi it was practically annexed to the Hejaz which had itself been conquered at the end of 1925 by Ibn Sa'ud. A dispute between Ibn Sa'ud and the Imam regarding the frontier between Asir and the Yemen is understood to have been settled by a general Treaty concluded between them on December 15, 1931. The northern province of Aqaba Maan was annexed by the British Government to the Palestine mandated area in July 1925.

The Kingdom of Saudi Arabia (Saudiya) forms a personal union under the rule of Abdul-Aziz ibn Abdur Rahman Al Faisal Al Sa'ud, G C I E, who on January 8, 1926, was proclaimed king in Mecca under the style King of the Hejaz and in 1927 changed his title of Sultan of Nejd and its dependencies to that of King. On September 22, 1932, the name of the Kingdom of the Hejaz and Nejd and its dependencies was changed to that of 'The Kingdom of Saudi Arabia'. On May 20, 1927, a treaty was signed at Jedda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter.

For a short account of the rise of the Wahhabis under Ibn Sa'ud, and of the latter's conquest of Hejaz, see *THE STATESMAN'S YEAR-BOOK*, 1929, pp 645-47.

Ibn Sa'ud has placed his State in a dominant position among the States Arabia. The dual character of his realm is maintained provisionally, and there are still two capitals at Mecca and Riyadh. His administration as regards the kingdom of Nejd and its dependencies is simple and of a patriarchal character, without ministers of State or other imitations of Western Europe. The King's eldest son, the Emir Sa'ud, normally resides in

Nejd and exercises there the functions of Viceroy. The administration of the kingdom of the Hejaz, however, as set forth in a 'Constitution' issued on August 29, 1926, is controlled by the King acting through a Viceroy resident in Mecca. This was modified by an order regulating the function of the Council of the Secretaries of State, which consists of four members, a vice-president and a president (H R H The Viceroy). This order, issued in 1931, was further modified in January 1932. There are four Ministries and three State Departments, two of which, namely the Ministry of Internal Affairs and the Department of Public Education, are responsible in the first place to the Viceroy. The Department of Foreign Affairs which is directly responsible to the King, was elevated into a Ministry in December 1930 under the Emir Faisal, the King's second son, who is also the Viceroy of Mecca. The religious law of Islam is the common law of the land, and is administered by religious courts at the head of which is a Chief Judge who is responsible for the Department of Shari'a (legal) Affairs. The Constitution also provides for the setting up of certain advisory Councils, comprising a consultative Legislative Assembly in Mecca, Municipal Councils in each of the towns of Medina and Jedda, and Village and Tribal Councils throughout the provinces. The members of these Councils consist of chief officials and of notables nominated or approved of by the King.

The Government has adhered to the seven International Postal Conventions, the Public Health Treaty of Rome of 1907, the International Treaty of Public Health of 1926, which is not yet ratified and the Treaty of Paris of 1928 for the Renunciation of War, and is in treaty relations with the British Empire, Iraq, Transjordan, Syria, Persia, Germany, Turkey, France, Italy, Afghanistan and Yemen.

The total population of Nejd is estimated at about 3,000,000. Towns with a population exceeding 10,000 inhabitants are (1) Hufuf, (2) Mubarraz, (3) Riyadh, (4) Shaqra, (5) Anaiza, (6) Buraida, (7) Hail; (8) Jauf; (9) Sakaka, and (10) Hauta. Of these Hufuf and Riyadh have populations of about 30,000, but none of the others exceed 20,000.

The products of Nejd are dates, wheat, barley, fruit of various kinds, hides, wool, clarified butter (*saman* or ghi) and abas (Arab cloaks), besides camels, horses, donkeys and sheep. The export trade is still insignificant, though capable of considerable development, especially as regards dates, hides and clarified butter. The export of Arab horses to Bombay is not as active as it was in the past, but the annual export of camels to Syria and Egypt is a steady source of income to the Bedouin. The chief imports of Nejd are piece goods, tea, coffee, sugar and rice.

The frontiers of the Hejaz are not sufficiently definite to allow of anything like an accurate estimate of its area, which probably does not exceed 150,000 square miles. The population is probably about 1,500,000, of whom Mecca, the capital, accounts for some 130,000, Medina for 30,000 and Jedda for 40,000, while the great majority of the rest are Bedouin. The chief port is Jedda, the seaport of Mecca, Yanbu, next in importance, occupies a similar position in relation to Medina, while ports of less importance are Aqaba (now annexed to Transjordan), Muwaila, Wajh, Rahigh, Lath and Qunfuda. Medina produces excellent dates in abundance, Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit, while Bedouin products are hides, wool and clarified butter. But the exports of the Hejaz are insignificant, and the country depends for existence almost entirely on the annual pilgrimage which brings large numbers of pilgrims from abroad each year.

For defence Ibn Sa'ud depends mainly on tribal levies, but the elements

of a small regular army, not numbering more than about 1,000 men, have recently been brought together in the Hejaz.

There are no roads, properly so called, in the Hejaz. From Jedda to Mecca (45 miles), a track across the desert is in some parts metalled. There is also a track from Mecca eastward through Riyadh to Ukair on the Persian Gulf, a distance of 829 miles, which is used for motor transport. A similar route connects Jedda with Medina via Rabigh and Yanbo. Motor cars can now travel between Riyadh and Kuwait and between Riyadh and Hail, Jawf and the Northern Frontier Towns and also between Jedda and Duba and Mowailih and between Jedda and Jizan and Sabia.

The Hejaz Railway from Amman to Medina was administered from April 1924 to July 1925 by the Hejaz Government, the Amir (afterwards King) Ali having taken a prominent part in restoring through traffic to Medina. In July 1925 the Palestine Railway administration took over the section from Amman to Maan. The southern section in Wahhabi territory is not now in working order.

The English gold sovereign is the basis of the currency. On January 22, 1928, a new silver currency, the *Riyal*, weighing 24.055 grammes, 830 fine, was introduced in place of the Turkish *Mejdide* currency. Ten *Riyals* = £1 (gold). The *Riyal* is subdivided into 11 *Qarsh* (piastres) *Miri*, and each Q.M. contains 2 *Qarsh Dary*. The Q.D., $\frac{1}{2}$ and $\frac{1}{4}$ Q.D. are nickel coins. A branch of the Netherlands Trading Society of Amsterdam conducts banking business in Jedda.

Seven powers viz. Great Britain, Soviet Russia, Italy, Iraq, Turkey, Persia and Holland maintain legations at Jedda, with Ministers in the first four cases and *Chargés d'Affaires* in the other three. France is represented by a *Chargé d'Affaires* but has not changed the status of her Consulate. Egypt maintains, unofficially, consular representatives.

Envoy Extraordinary and Minister Plenipotentiary—Sir Andrew Ryan, K.B.E., C.M.G. (appointed January 31, 1930).

Envoy Extraordinary and Minister Plenipotentiary (in London)—Sheikh Hafiz Wahba (November 10, 1930).

Yemen.—The Yemen may be divided as follows. Aden, the Aden Protectorate, and the domains of Imam Yahya b. Muhammad b. Hamid ed Din.

The Zaidi Imam Yahya, whose capital is Sana (Lat. 15° 20' N., Long. 44° 12' E.), has a domain of some 75,000 square miles with a population of two to three millions. His territories include the area to the north of the Anglo-Turkish boundary drawn in 1902-4. In a northerly direction his influence extends to Nejran (Lat. 17° 30' N., Long. 44° 15' E.) of the Yam, whose tenets are those of the sect of Ismailiyya or Fatimiyya, and their chief is the Da'i Ali Mohsin Al Shibani, of the house of the Makarima, whose descent is from Ismail b. Jafar Al-Sadiq, the offspring of Al Husein, the second son of the fourth Caliph Ali. The same tenets are professed by the inhabitants of Haraz near Menakha. To the north of Sana are the Imamic large towns of Amran, Tawila, Al Khamr, Al Suda, Sada (Lat. 16° 47' N., Long. 43° 43' E.), Qufat Al Udhr, and also the region of Al Jauf, Upper, Middle and Lower, with their capitals respectively at Al Matamma, Al Hazm, and Al Ghail, where live the 'Shawaf,' clansmen of the influential Bakul tribe, all of which tracts, watered by the River Kharid, own the Imam's suzerainty. To south of Al Jauf, and to east by north of Sana at a distance of six days' journey, lies the district of Marib, or Saba, whose ruler pays homage to Imam Yahya. Other large towns in the Yemen are Taizz (alt. 4600 ft.), Ibb (6275 ft.), Yerim (8600 ft.), Dhamar (7850 ft.). The altitude of Sana is 7280 ft. The highest mountain is Nabi

Shuaib (11,000 ft) Sumara, Kinan, Takar and many others are all over 9000 feet altitude.

The population of Sana', a walled city with eight gates, is between 20,000 and 25,000. The old-time granaries of the Upper Yemen still exist, and lie chiefly between the towns of Ibb and Al Jubla, and in the Wadi Sahul below Ibb and to its north, though indeed the agricultural products are widely distributed throughout the country and comprise barley, wheat, and millet, together with coffee—the finest berries coming from Menakha. Hides also are largely exported.

The Imam has twelve sons, the eldest of whom is the Emir el Hadi Mohamed Seif al Islam, who commands in the country to the north of Sana'.

The Hadramaut is a considerable tract of fertile valleys lying to the East of the Aden Protectorate. The greater part of it owes allegiance to the Qa'ati dynasty, whose representative is the present Sultan of Makalla. A rival dynasty, the Kathiri, rules a number of towns and villages inland. The whole area is loosely under British protection and control.

Oman.—Muscat is the capital of the independent Sultanate of that name situated at the easterly corner of Arabia. Its seaboard is nearly 900 miles long and extends from Tibbat on the west side of Cape Musandam round Ras Rajir, rather over 200 miles due north of the Island of Socotra, with the exception of a small strip of the east coast of the Musandam peninsula from Dibbeh to Khor Kalba, which is in the administration of the minor chiefs of Trucial Oman. The Sultanate extends inland to the borders of the Great Desert, but of late years the Omanis have become virtually autonomous. The interior is for the most part mountainous, the high country extending down to the sea coast in a series of arid rocky heights, though vegetation exists on the higher mountains. North west of Muscat the sea coast littoral tract is fertile and prosperous, and date groves extend along it for over 100 miles. This strip is known as the Batineh Coast. The remainder of the coast, with one notable exception, is barren and forbidding and rarely visited by Europeans. The exception is Dhofar, which is the name of a small fertile district, comprising a group of villages, at the south-west corner of the Sultanate. Gwadar, a port on the Mekran coast, and a small tract of country round it also own allegiance to Muscat. It is the last remnant of the Omani possessions on the Persian side of the Gulf.

The town of Muscat, once so important and prosperous, has been falling into decay for years now. Most of the trade goes to the sister port of Matrah, which is the starting point of the trade route to the interior, but Muscat still remains the capital and seat of government.

Area, 82,000 square miles, population, estimated at 500,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat and Matrah hardly contain an Arab, being inhabited almost entirely by Baluchis and Negroes. The capital, Muscat, has a population of 4,300, and the adjacent town of Matrah 8,200.

The present Sultan is His Highness Saiyid Said bin Taimur (born August 13, 1910), who succeeded his father Saiyid Sir Taimur bin Feisal, K C I E, C S I, as the 14th of his dynasty to be Imam or Sultan of Oman.

A sister of Saiyid Feisal bin Turki was married to the father of Saiyid Ali II, 9th Sultan of Zanzibar (1902–11), of the other branch of the dynasty which has been reigning there since the separation of the crowns on the death of Saiyid Said bin Sultan, Imam of Oman and 1st Sultan of Zanzibar, October 19th, 1856.

The revenue of the Sultan from all sources varies between six and

seven lakhs of rupees yearly. The population is poor. In the valleys of the interior, date cultivation has reached a high level, and there are possibilities of agricultural development where the water supply more certain. Inland camels are bred in large numbers by the tribes.

Trade is mainly in the hands of British Indians, and imports and exports are mainly from and to India. The chief imports in 1931-32 were rice, Rs 1,040,527, coffee, Rs 241,493, cotton piece goods, Rs 989,015, sugar, Rs 105,136. Dates are the principal export, Rs 777,825 in 1931-32 (Rs 13-12-0 per £ average for 1931-32). Pomegranates, fresh and dried limes, and dried fish are the only other exports of any note. There are no industries of any importance. Total imports for 1931-32 amounted to Rs 3,737,118, and total exports to Rs 1,707,327. Import duty is at present 5 per cent *ad valorem*. There is no export duty, and imports for re-export by the importer within six months are not subject to any duty.

The only port of call for steamers is Muscat where, in 1931-32, 162 steamships of 614,527 tons and 131 sailing vessels of 17,167 tons entered and cleared. It is one of the ports on the subsidiary mail route between Bombay and Basra. The mail service is a weekly one in both directions. The Indian Government maintains a post office and the Imperial and International Communications, Ltd., a telegraph office at Muscat.

Inland transport is by pack animals. The motor road between Muscat and Matrah has been extended for about 30 miles beyond Matrah, thus facilitating communication by car with the Batinah Coast. There is a daily motor bus service between Muscat and Sibi.

The common medium of exchange is the Maria Theresa dollar (*see* p. 643). On the coast, but not in the interior, the rupee circulates. There is one Omani copper coin, which fluctuates in value. The muhammadi of 20 *gay* (1 dollar = 11½ muhammadi) is only money of account. The weights in use are 1 Kiyas = the weight of 6 dollars or 5.9375 oz., 24 Kiyas = 1 Maskat Maund, 10 Maunds = 1 Farásala, 200 Maunds = 2 Bahár. Rice is sold by the bag, other cereals by the following measures — 40 Palis = 1 Farrah, 20 Farrahs = 1 Khandi.

Political Agent and H B M's Consul — Lt.-Col. T. C. W. Fowle, C. B. E.

The State of Kuwait is situated on the north-western coast of the Persian Gulf. The reigning dynasty was founded by Subah abu Abdullah, who ruled from 1756 to 1762. The Sheikh is subsidised by the British Government, which maintains a Political Agent at his Court. The present Sheikh, Ahmed ibn Jabir al Subah (b. 1885), succeeded his uncle the 9th Sheikh Salim ibn Mubarak, on February 23, 1921. Although His Highness has two sons by his first marriage — Abdullah (b. 1905) and Mohamed (b. 1909) — and one by his present consort, the daughter of the late Sheikh Salim ibn Mubarak Jabir (b. June 29, 1926) — the Heir Presumptive according to the Kuwaiti rule of succession is the Sheikh's uncle, Hamad ibn Mubarak (b. 1894), who has a son Mubarak.

Estimated population, 50,000, to which an indeterminate number of Bedouins must be added.

Indian rupees and annas are legal tender in Kuwait town, and the post office, which is administered by the Iraqi postal department, issues Indian stamps overprinted 'Kuwait.' Maria Theresa dollars are still used in the interior.

Political Agent — Lt.-Col. J. C. More, D. S. O.

The British Protectorate of Aden (*see* p. 97).

The Emirate of Bahrain (*see* p. 98).

ARGENTINE REPUBLIC.

(REPÚBLICA ARGENTINA)

Constitution and Government

ARGENTINA was discovered in 1516 by Juan Díaz de Solís In 1585 Don Pedro de Mendoza was sent out by the King of Spain, and in 1536 founded the town of Buenos Aires On May 25, 1810, the population rose against the Spanish rule, and on July 9, 1816, Argentine independence was proclaimed. Between 1816 and 1852 was a period of anarchy, and in 1853 stable government was once more established

The following is a list of Presidents from 1898 onwards —

Gen Don Julio Argentino Roca, Oct 12, 1898—Oct 12, 1904	Dr Don Hipolito Irigoyen, Oct 12 1916—Oct 12, 1922.
Dr Don Manuel Quintana, Oct 12, 1904—Mar 12, 1906 ¹	Dr Don Marcelo Torcuato de Alvear, Oct 12, 1922—Oct 12, 1928
Don José Figueroa Alcorta (Acting), Mar 12, 1906—Oct 12, 1910	Dr Don Hipolito Irigoyen, Oct 12, 1928—Sep 6, 1930 ²
Dr Don Roque Sáenz Peña, Oct 12, 1910—Aug 9, 1914 ¹	Gen Don José Félix Uriburn (Provisional), Sep 6, 1930—Feb 20, 1932
Dr Don Victorino de la Plaza (Acting), Aug 9, 1914—Oct 12, 1916	Gen Don Agustín Justo, Feb 20, 1932

¹ Died

² Deposed

The Constitution of the Argentine Republic bears date May 25, 1853, with modifications in 1860, 1866 and 1898, extensive modifications were being discussed in 1933. The President is elected for six years by 376 electors appointed by the fourteen provinces and the capital, equal to double the number of senators and deputies combined. A Vice-President, elected at the same time, presides over the Senate, but has otherwise no political power. The President is commander in chief of the army and navy, and appoints to all civil, military, naval, and judicial offices, in certain cases with the approval of the Senate, and has the right of presentation to bishoprics, he is responsible with the Ministry for the acts of the executive, both President and Vice President must be Roman Catholics, Argentine by birth, and cannot be re-elected, unless a period of six years intervenes. The President has a salary of 96,000 paper pesos (£8,800 at par), and 28,800 paper pesos for official expenses. The National Congress consists of a Senate and a House of Deputies. The Senate numbers 80, two from the capital and from each province, elected for nine years (one third retiring every three years) by a special body of electors in the capital, and by the legislatures in the provinces. The Chamber of Deputies has 158 members elected by the people. The deputies are elected for four years, one-half retiring every two years. The two chambers meet annually from May 1 to September 30, the lower house receives the budget and initiates fiscal legislation.

President of the Republic—General Agustín P Justo Elected November 8, 1931. Assumed office, February 20, 1932.

Vice-President and President of the Senate—Dr Julio A Roca

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State—namely, of the Interior, Foreign Affairs, Finance, War, Justice and Public Instruction, Agriculture, Marine, and Public Works.

LOCAL GOVERNMENT

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the Central Government. The governors of the various provinces, elected by the people of each province for a term varying between three and four years, are invested with very extensive powers, and are independent of the central executive. The provinces elect their own legislatures, and have complete control over their own affairs. The territories are under the supervision of governors appointed by the President. In Buenos Aires the "Intendente" or Mayor is appointed by the President with the approval of the Senate. He is assisted by a deliberative council of 30 elected by the male inhabitants over 18 years including foreigners who comply

with certain conditions. Voting is compulsory under penalty of a fine. The deliberative council votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

Area and Population.

The Argentine Republic consists of fourteen provinces, ten territories and one federal district, containing the land area and population shown below —

Federal District, Provinces and Territories ¹	Area English sq miles	Population Census 1914	Estimated population Jan 1, 1932 ¹	Pop per sq mile 1932
<i>Federal District</i>				
Buenos Aires (the Federal Capital) .	71	1,576,597	2,195,200	30,918.3
<i>Provinces</i>				
Buenos Aires (La Plata)	118,467	2,066,165	3,162,040	26.7
Santa Fe	52,056	899,640	1,368,068	26.3
Córdoba	64,924	735,472	1,111,190	17.1

Total . . .	1,079,965	7,885,237	11,682,844	10.8

¹ The Capitals are given in brackets. Where no name appears in brackets, the capital bears the same name as the province or territory.

The population is overwhelmingly European in origin (principally from Italy and Spain) with practically no mixture with the aborigines. Immigrants from 1857 to 1930 totalled 7,800,000 of whom 5,000,000 remained. The dwindling Indian population is estimated at from 20,000 to 30,000.

The movement of population for five years is given as follows (excluding territories) —

	Marriages	Births	Deaths	Immigrants ¹	Emigrants ¹
1927	73,670	302,560	139,028	169,538	65,435
1928	76,617	309,303	133,929	137,364	62,125
1929	79,738	312,621	141,657	148,916	82,805
1930	77,876	313,881	134,912	133,183	67,504
1931 ²	77,934	319,317	137,171	63,665	59,706

¹ Excluding first class passengers

² Provisional

Population of the capital, Buenos Aires, on December 31, 1931, was 2,195,200, and of Rosario (Santa Fe), 485,354. Others, estimated, in 1931: Córdoba, 253,182, La Plata, 182,401, Avellaneda, 214,512, Tucumán (1930), 123,572, Bahía Blanca, 102,430, Santa Fe, 125,295, Mendoza (1930), 76,780, Quilmes, 55,309, Paraná, 66,204, Salta (1925), 34,490, Lomas de Zamora, 80,300, Río Cuarto, 89,600, Corrientes, 53,209, Concordia, 31,011, Mar del Plata, 50,084, Santiago del Estero (1924), 29,138, Chivilcoy, 52,487, and Cándil, 52,647.

Religion and Education.

There is no State religion, though the Roman Catholic religion is supported by the State, all other creeds are tolerated and freedom of conscience prevails. There are 1 archbishop (Buenos Aires) and 10 suffragan bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the Republic.

Illiteracy among the voters has fallen from 35 per cent in 1916 to 21.98 per cent in 1930, in the Federal capital, to 2.6 per cent. Primary education is free (subsidised by the General and Provincial Governments), secular and compulsory for children from 6 to 14 years of age. In 1931 the primary schools numbered 11,552 with 54,635 teachers and an enrolment of 1,441,348, there were also 232 secondary, normal and special schools with 89,595 pupils under the Ministry of Public Instruction, and 241 provincial secondary schools with 13,709 pupils. National schools throughout the Republic in 1931 numbered 4,786, with 23,330 teachers and 638,306 students. Private schools numbered 1,360, with 169,598 pupils. There are national universities at Córdoba (founded 1613), with 2,742 students, Buenos Aires (1821), with 11,242 students, La Plata (1897), with 1,880 students, Tucumán (1912), with 600 students, the National University of the Litoral, in Santa Fe, with branches in Rosario (1920), and in Corrientes (1922), with 3,533 students. In 1931, 20,175,312 paper pesos were spent on university education, and a total of 209,906,903 paper pesos on all forms of educational activity.

Justice.

Justice is administered by Federal and by Provincial Courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The Federal Courts are the Supreme Courts, with 5 judges at Buenos Aires, 5 Appeal Courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba, and Rosario (Santa Fe), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor

courts Trial by jury is established by the Constitution for criminal cases, but never practised, except in the province of Buenos Aires

Finance

Total ordinary and extraordinary receipts and expenditures for recent years have been as follows, in paper pesos (£1 sterling at par = 11 45 paper pesos)

Year	Receipts	Expenditure	Year	Receipts	Expenditure
	Paper pesos	Paper pesos		Paper pesos	Paper pesos
1928	918,502,000	897,100,000	1931	763,830,000	886,180,000
1929	791,317,500	990,689,000	1932 ¹	894,955,000	888,852,000
1930	736,890,000	1,094,490,000	1933 ¹	870,253,690	865,113,495

¹ Budget estimates

On June 30, 1932, according to the Corporation of Bondholders, the national debt amounted to 3,697,572,000 paper pesos and the debt of the Provinces to 1,154,710,765 paper pesos, and the Municipalities to 371,593,571 paper pesos, grand total, 5,223,876,335 paper pesos. External debt was 993,719,000 paper pesos. National floating debt October 31, 1932, 885,600,000 paper pesos. National Mortgage bonds outstanding December 31, 1931, totalled 1,435,744,125 paper pesos out of a total of 2,000,000,000 authorized

Defence.

ARMY.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalised citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' army, or first line (Permanent Forces). After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard, the latter is only mobilised in case of war. The period of continuous service, or training in the ranks with the Permanent Forces, is for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 5 military districts for administrative purposes. The strength of the army in 1932 was 2,558 officers and 34,862 other ranks. The army is organised in 5 divisions, 3 cavalry brigades and 2 mountain detachments.

There is a trained reserve numbering 300,000 men, of whom 150,000 men are of the first line, and 150,000 of the special reserve. The territorial reserve numbers 100,000 men.

The weapon of the Argentine infantry is at present the Mauser magazine rifle. The cavalry have a carbine of the same pattern. The artillery are armed with a Krupp 7.5 cm Q F gun.

The estimated military budget for the year 1932 was 73,160,954 paper pesos.

There is a Military Aviation Training School at El Palomar. In 1929 the air force was organised in 3 aviation groups, each comprising 1 bombing flight and 1 observation flight, one group has in addition 1 fighting flight, each group has a photographic and a training centre.

NAVY.

Laid down	Name	Displacement Tons	Armour		Principal Armament	Torpedo tubes	Indicated Horse Power	Nominal speed
			Belt	Guns				
1910	BATTLESHIPS							
	{Moreno Rivadavia }	27,940	in 10	in 12	12 12-in., 12 6-in., 4 3 in A A		45,000	knots 23
1927	CRUISERS							
	{Almirante Brown 25 de Mayo }	6 500 standard	1	2	6 7 5 in., 12 4 in		85,000	
1894	San Martin	6,840	6	6	{2 10 in., 10 6 in., 6 4 7 in 2 8-in., 8 6-in }		13,000	20
1890	{Pueyrredón Belgrano }	6,840	6	6	{1 10-in., 8 6 in 2 10-in., 8 6-in }		13,000	20
1894	Buenos Aires	4,780	—	—	4 6 in., 6 4 7 in		17,000	24
1889	COAST DEFENCE VESSELS							
	{Independencia Libertad }	2,386	8	8	2 9 4 in., 4 4 7 in		3,000	14

There are also 5 modern flotilla leaders, 4 destroyers, 3 submarines, and some training and miscellaneous craft

In 1924-25, the battleships *Moreno* and *Rivadavia* and 4 destroyers were refitted at a cost of 9,500,000 gold pesos, the boilers of all six vessels being adapted to burn oil. The coast defence ironclads *Independencia* and *Libertad* and 3 cruisers of the *San Martin* type have since been converted to oil burning and otherwise modernized. A new naval programme, to involve the expenditure of 75,000,000 gold pesos, spread over a period of ten years, was approved in 1926. It provides for extension of the present dockyard accommodation in the River Plate and at Puerto Belgrano, and the construction of a new yard at Mar del Plata. New construction covered by this legislation includes the cruisers *Almirante Brown* and *25 de Mayo*, and 3 submarines, built in Italy, as well as the 5 flotilla leaders mentioned above, three of which were built in England. Two British built surveying vessels were delivered in 1928. Further orders are to be placed when funds become available.

The active personnel of the navy comprises 337 officers, 130 engineers, 27 electrical engineers, and about 11,000 men (including about 5,000 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice. The training of officers and men has recently been placed on a much higher scientific level.

Production and Industry.

Argentina has an area of about 689,436,900 acres, of which about 197,688,000 acres may be used for agriculture, 269,349,900 acres for cattle raising, 123,555,000 acres are woodland, and the remainder, 98,844,000 acres, are mountain, lake, river, or arid regions. Of the cultivable portion, about 10,000,000 acres require irrigation. In the territories the Federal Government has wide tracts of land amounting to 237,768,000 acres suitable

in general for pastoral colonisation, and these lands are conditionally offered free, or for sale or on lease

The area and produce of principal crops are shown as follows for three years —

	Acreage			Produce (Metric Tons)		
	1930-31	1931-32	1932-33	1930-31	1931-32	1932-33
Wheat	21,283,584	17,295,229	20,022,500	6,321,837	6,148,700	6,300,000
Oats	3,936,966	3,469,918	3,695,000	765,106	1,005,600	1,350,000
Maize	13,776,382	14,468,290	—	10,510,000	7,235,000	—
Linseed	7,511,403	8,640,325	7,487,500	1,990,000	2,170,800	1,350,000

The total grain and meat exported for three years, in metric tons, is shown as follows —

Year	Wheat	Maize	Linseed	Oats	Meat
1929	6,613,341	5,047,792	1,617,488	430,197	687,940
1930	2,213,389	4,670,309	1,169,661	453,638	639,063
1931	8,638,682	9,767,201	1,880,274	644,766	628,723

Alfalfa, on about 14 million acres, for feeding livestock, is Argentina's most successful crop. Cotton, potatoes, sugar, vine, tobacco, and yerba maté (Paraguayan tea) are also cultivated. About 852,842 acres, chiefly in Tucumán, Jujuy, and Salta produced in 1931, 381,793 tons of sugar. Potato crop for 1930-31 was 1,251,118 metric tons, of which 43,308 tons were exported. The total vine area is about 358,800 acres, chiefly in Mendoza and San Juan, average annual production of wine, 117,220,000 gallons. The area under tobacco, 1931, 31,067 acres, output, 10,814 metric tons, Yerba maté, 92,580 acres, producing 38,506 tons. Production of raw cotton in 1931-32, 107,324 tons, of ginned cotton, 30,050 tons, exports, 1931, 25,018 tons. Production of vegetable oils, principally from peanuts, totalled 30,470,864 kilos in 1931. Export of quebracho extract in 1931 totalled 175,845 tons, export of logs for treatment abroad, 88,762 metric tons.

In the provinces of Buenos Aires, Santa Fé, and Entre Ríos 463,000 acres of agricultural lands have been acquired by the Jewish Colonisation Association, 158,000 acres are under cultivation. In 1931 there were 156 rural co-operative societies in Argentina.

The live stock census (July 1, 1930) showed cattle, 32,211,855, horses, 9,858,111, sheep, 44,413,221, goats, 5,647,396, pigs, 3,768,738. The Province of Buenos Aires contains one-third of the sheep within the Republic. Argentine wool exports in 1931-32 were 135,300 tons, compared with 150,000 tons in 1930-31. Exports of butter in 1931 were 23,209 metric tons, of casein (nearly 75 per cent. of the world's output), 13,990 tons, cheese, 479 tons.

The principal industry is meat refrigeration. In 1931, 352,227 metric tons of chilled, and 83,681 metric tons of frozen beef, 5,278 tons of pork, and 83,510 metric tons of mutton were exported. Meat exports, 1931, to Great Britain were valued at 105,863,357 gold pesos compared with 5,201,316 gold pesos to France, the next largest consumer. The largest refrigerating plant in the world, with a daily capacity of 5,000 cattle and 10,000 sheep,

is at Buenos Aires Cattle killed in Argentine in 1931, 2,309,385 head, sheep, 5,388,326 . hogs, 392,428 Exports in 1931 of dry hides, 13,522 tons, of salted hides, 103,284 tons Flour milling ranks second to refrigeration. The average yearly output is 7,000,000 sacks Near Bahia Blanca is being constructed the largest grain elevator in the southern hemisphere, with capacity of 81,000 tons. Mining is of no great importance Gold, silver, and copper are worked in Catamarca, where there are also two valuable tin mines, and gold and copper in San Juan, La Rioja and the south western territories Coal is found in the Andine Provinces, in the Cordillera region of Patagonia and in Northern Patagonia Tungsten is also an important mineral, others being borate, salt, and limestone During 1931 the crude oil production in the State owned oil fields in Argentina amounted to 5,491,144 barrels, from private oil-fields, 6,209,161 barrels In 1932 the figures were 5,575,146 and 7,428,545 respectively

Commerce

Agriculture accounts for from 50 to 65 per cent of total exports Real values of foreign trade in gold pesos, exclusive of coin and bullion (1 gold peso = 4 shillings at par or 96 cents, U S) —

—	1928	1929	1930	1931	1932
Imports	Gold Pesos 830,707,729	Gold Pesos 861,997,355	Gold Pesos 739,182,744	Gold Pesos 616,484,457	Gold Pesos 367,956,396
Exports	1,054,507,658	953,743,919	614,104,180	640,558,451	566,366,438

Gold exports in 1931, 171,730,483 gold pesos, in 1932, 4,989,542 gold pesos, gold imports in 1931, 201,600 gold pesos, in 1932, 98,456 pesos

Imports 1932 and exports 1931 Imports are stated in their 'tariff' or customs values, exports in their 'real' values

Imports	Gold Pesos	Exports	Gold Pesos
Foodstuffs	42,098,251	Live-stock products

Total trade (Board of Trade returns) between Argentina and the United Kingdom for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Argentina into U K	76,788,617	82,446,948	56,665,769	52,714,214	50,870,371
Exports to Argentina from U K	31,209,978	29,074,250	25,234,173	14,785,467	10,663,101
Re exports to Argentina from U K	563,533	603,132	442,006	270,023	203,408

Shipping and Navigation.

The total shipping in the foreign trade entering Argentine ports in the twelve months to June 30, 1932, was 12,069,000 tons, cleared, 17,364,000 tons. The total gross tonnage of the mercantile marine (June 30, 1932) was 336,771.

Internal Communications.

The first railway concession dates from 1854. Railways open, September 30, 1932, 24,752 miles, of which 5,399 miles belong to the State, and 19,353 miles to private companies. Operating receipts in 1930 of both the State and private railways were 242,361,000 gold pesos as against 237,527,550 gold pesos in 1929. Passenger traffic in 1930 was 170,073,000, freight traffic, 41,630,000 tons. Length of good motor roads in 1931, 2,746 miles, of unsurfaced roads, 134,157 miles. Registered motor cars numbered 420,800.

Aviation, under the auspices, chiefly, of foreign companies, has developed rapidly in the Republic. Aerial routes for mail and passengers have been organised from Buenos Aires to numerous points within the Republic and abroad, and from Bahia Blanca to the South coast.

National post office in 1929, handled, it is estimated, 2,300,000,000

pieces of mail and 8,279,920 telegrams. National telegraph lines, 75,413 miles in 1931. Number of telephone exchanges in Argentina in 1931, 537, with 250,286 subscribers. Telephone service is operated mainly by the United River Plate Telephone Company, and by the Compania Telefonica Argentina in Buenos Aires, both connecting with Chile and Uruguay, they have been absorbed by the International Telephone and Telegraph Company. There are 19 broadcasting stations. Wireless telephony between Buenos Aires, Chile, the United States and Europe is in general use, there are 2 wireless telegraph companies.

International cable service to other Latin American countries and the United States is provided by All America Cables.

Banking and Credit.

According to the First Banking Census taken by the National Bureau of Statistics, on December 31, 1925, there were 112 banks in Argentina with 1,033,946,000 paper pesos of capital and reserves, 91 (1 State Bank—*Banco de la Nacion*—77 other Argentine banks, and 13 foreign banks) were ordinary Discount and Deposit Banks with capital and reserves amounting to 710,228,000 paper pesos, 15 were Mortgage Banks with 310,264,000 paper pesos of capital and reserves and 6 were Pignorative Banks whose capital and reserves amounted to 13,454,000 paper pesos.

The Banco de la Nacion (founded in 1905) reported September 30, 1932, capital of 163,400,785 paper pesos, reserves of 30,141,752 gold pesos (apart from the three special Conversion Funds totalling 40,389,295 gold pesos), cash, 971,950 gold pesos, and 291,511,105 paper pesos, deposits, 1,568,723,663 paper pesos, and 99,688 gold pesos. It has 237 branches. Although it is the State Bank, it is not a Central Bank in the ordinary sense, it does commercial banking in competition with others.

On April 5, 1915, a national postal savings bank (*Caja Nacional de Ahorro Postal*) was incorporated. On December 31, 1931, 5,055 branches had 1,437,869 depositors with total deposits amounting to 96,793,297 paper pesos, 3,566 of the branches were in schools. The bank is also patronized largely by married women, who are given, by the law, exclusive control of their accounts.

In August, 1927, the Caja de Conversion returned to the gold standard after a suspension lasting for 14 years, undertaking to redeem paper pesos at the legal rate established in 1889, that is, 1 paper peso for 44 centavos in gold. But heavy withdrawals of gold to New York and London forced the Government to close the Caja de Conversion on December 17, 1929. On December 31, 1932, total stock of gold was 256,922,667 gold pesos, total circulation, 1,338,753,004 paper pesos. In April, 1931, the system was expanded to permit the Conversion Office to issue notes to the Banco de la Nacion, re-discounting prime commercial bills, providing that such notes do not reduce the gold cover below 40 per cent.

Money, Weights, and Measures.

The monetary system of the Republic is nominally on a gold exchange standard, the unit (for foreign transactions) being the *peso oro* (gold peso) which weighs 1.6129 grammes of gold $\frac{1}{10}$ fine. The *Peso oro* which is divided into 100 *centavos*, is of the value of 47.62*d*. in 1931 the exchange value of the gold peso in London ranged between 41½*d* and 28½*d*, in New York, between 34.63 cents and 21.43½ cents. By rigid control of the country's purchases of foreign exchange, the New York value was pegged in 1932 at 25.81 cents. London value that year was between 41½*d*. and

34½d ; March 6, 1933, the gold peso was "pegged" to the French franc at 14 84. One pound sterling (at par) = 5 04 gold pesos. Figures in gold pesos are followed by the abbreviation *o/s* (*oro sellado*, minted gold). The monetary law of November 5, 1881, authorizes the coinage of five and two-and-a-half gold peso pieces. The 5-peso gold piece (the *Argentino*) weighs 8 0645 grammes, 900 fine, and therefore contains 7 25805 grammes of fine gold.

Gold is not widely in circulation. The money in domestic circulation is chiefly paper (*peso moneda nacional*). The paper peso is equal to 44 gold peso, which makes it worth 1s 8½d (11 45 to the £). To convert paper pesos into gold pesos, multiply by '44. To convert gold pesos into paper pesos, multiply by 2 2727. Figures in paper pesos are usually followed by the abbreviation *m/n* (*moneda nacional*, national money). Five, ten and twenty centavo pieces of nickel are coined to meet the demand for small currency.

Since January 1, 1887, the use of the metric system is compulsory.

Diplomatic Representatives.

1 OF THE ARGENTINE REPUBLIC IN GREAT BRITAIN

Ambassador Extraordinary and Plenipotentiary—Dr Manuel Malbran (Appointed June 5, 1931.)

Counsellor—Carlos Miguens

Secretaries—Dr Pablo Santos Muñoz; and Dr Mariano A Barrenechea.

Military Attaché—Major Pablo Berretta

Naval Attaché—Captain Dalmiro Saenz

Civil Attaché—Julián Duggan

Commercial Counsellor—Juan E. Richelet

Consul General in London—Mario Molina Salas

There are Consular representatives at Aberdeen, Birmingham, Bradford, Bristol, Cardiff, Dublin, Dundee, Glasgow, Hull, Liverpool, Manchester, Middlesbrough, Newcastle, Newport, Plymouth, Southampton, Swansea.

2 OF GREAT BRITAIN IN THE ARGENTINE REPUBLIC.

Ambassador Extraordinary and Plenipotentiary—Sir John Joyce Broderick, K B E, C M G (Appointed January 30, 1933.)

Counsellor—E. Millington-Drake

Second Secretary—D. F. Howard, M C

Naval Attaché—Captain E. de F. Renouf, O V O, R N

Air Attaché—Wing Comdr R. B. Maycock, O B E

Commercial Counsellor—S. G. Irving

Consul General (at Buenos Aires)—Victor H. St. John Huckin

There are Consuls at Rosario and Port Madryn, and Vice-Consuls at Bahía Blanca, La Plata, Mendoza, Rio Gallegos, San Julian, Santa Cruz, Santa Fe, Rio Grande (Tierra del Fuego), Villa Constitución and Tucumán.

AUSTRIA.

(DIE REPUBLIK ÖSTERREICH)

Constitution and Government.

THE Republic of Austria was proclaimed on November 12, 1918. The Government was taken in hand by a National Assembly which appointed a temporary cabinet and proceeded to pass laws. On February 16, 1919, the National Constitutional Assembly, consisting of only one Chamber, was duly elected on the basis of universal and proportional suffrage, every Austrian subject, male and female, has a vote if 21 years of age, and is eligible for election if 29 years of age. At the elections held on November 9, 1930, the following parties were returned — Christian Social, 66, Social Democrats, 72, Economic Bloc, 19, Home Bloc, 8, total, 165.

The Constitution, which was adopted December 7, 1929, provides for a President, elected by all citizens of 21 years of age (who may also depose him), his term is for 4 years, and he appoints the ministry and has power to dissolve Parliament, for an Assembly (*Nationalrat*), elected by popular vote for 4 years, and for a First Chamber (*Bundesrat*), chosen by the Provincial Diets in proportion to their population (at present the members number 46). The powers of the *Bundesrat* are advisory. Austria is declared to be a Federal Republic composed of eight provinces and the city of Vienna. All special privileges are abolished, and equal rights granted to all citizens.

President of the Republic — Dr Wilhelm Miklas. Born October 15, 1872. Elected December 5, 1928. Re-elected October 9, 1931.

The Ministry, constituted on May 20, 1932, is as follows —

Federal Chancellor, Minister of Foreign Affairs and Minister of Agriculture and Forestry — Dr Engelbert Dollfuss (Christian Social)

Vice Chancellor — Franz Winkler (Agrarian Federation)

Minister of Defence — Karl Vaugoin (Christian Social)

Minister of Justice — Dr Schuschnigg (Christian Social)

Minister of Finance — Dr Emanuel Weidenhoffer (Christian Social)

Minister of Commerce and Communications — Dr Guido Jakoncig (Home Bloc)

Minister of Education — Dr Anton Rintelen (Christian Social)

Minister of Interior — Herr Franz Bachinger (Agrarian Federation)

Minister of Social Administration — Dr Robert Kerber (March 12, 1933)

The national flag consists of three horizontal stripes, the top and bottom being red and the centre white.

LOCAL GOVERNMENT.

The Republic of Austria comprises 9 provinces, viz., the City of Vienna, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and Burgenland. There is in every province a Provincial Assembly (*Landtag*), consisting likewise of one chamber which is elected on the basis of the same suffrage as the National Assembly. The cultivation of the soil, the educational, ecclesiastical, and charitable institutions, as also public works, chiefly fall within the competence of the provinces. At the head of the Provincial Assembly is the Provincial Committee (*Landesausschuss*) elected by the Provincial Assembly.

Every commune has a council to deliberate and decide its affairs. The members are mostly elected for 5 years. The council elects from its midst

the head of the commune (burgomaster) and a committee for the administration of the affairs and execution of its resolutions. All who are 21 years of age have a vote, while for the passive suffrage the attained age of 24-30 years is required.

Area and Population.

For the boundaries of Austria according to the Treaty of St Germain, signed on September 10, 1919, see THE STATESMAN'S YEAR-BOOK for 1920, pp 674-5.

The area and population of Austria (census taken on March 7, 1923) are shown as follows —

Provinces	Area, English square miles	Population (Census 1923)			Percentage of Population 1923	Population per square mile 1923
		Males	Females	Total		
Vienna	107	860 119	1 005 661	1,865,780	28 55	17,437
Burgenland	1,582	141,144	144,465	285,609	4 37	186
Lower Austria	7,452	725 884	754 565	1,480 449	22 65	199
Upper Austria	4,626	425,917	450 157	876 074	13 41	189
Salzburg	2 702	108 847	114 176	223,023	3 41	81
Styria	6,323	483 291	495,554	978,845	14 98	155
Carinthia	3,680	170 911	190,906	370 817	5 67	101
Tyrol	4,782	154 0 8	159 857	313,885	4 82	64
Vorarlberg	1,005	68,268	71,746	139 999	2 14	139
Total	32,369	3 147,404	3,387,077	6,534 481	100 00	202

Compared with the total population in 1920, the total for 1923 shows an increase of 108,187, or 1 68 per cent, excluding Burgenland of 117,427, or 1 92 per cent. The male population (excluding Burgenland) has increased by 70,530 or 2 40 per cent as compared with 1920. Estimated population December 31, 1931, 6,732 625.

Movement of population (including Burgenland) in 1931 — Marriages, 49,756 (7 4 per mille) living births, 106,661 (15 8 per mille), deaths, 93,846 (13 9 per mille), divorces, 6,573 (0 98 per mille). Emigrants, 1930, 4,181, 1931, 2,585. Of the emigrants in 1931, 223 went to United States, 47 to Canada, 92 to Brazil, 286 to Argentina, and 10 to Australia.

PRINCIPAL TOWNS

The population of the principal towns of Austria on March 7, 1923, was as follows — Vienna, 1,865,780 (estimated pop Dec 31, 1930), Graz, 152,706, Linz, 102,081, Innsbruck, 56,401, Salzburg, 37,856, Wiener Neustadt, 36,956, St. Pölten, 31,576, Klagenfurt, 27,423, Baden, 22,217, Steyr, 22,111, Villach, 22,099, Mödling, 18,677, Wels, 16,418.

Religion.

Religious liberty is one of the fundamental laws of the Republic, and the principle is embodied in the Treaty of St Germain (article 63). In 1910 there were (including Burgenland), 6,225,843 Catholics (93 68 per cent), 206,505 Protestants (3 11 per cent), 194,584 Jews (2 98 per cent.), and 19,052 'others' (0 28 per cent). The Catholic Church has 2 archbishoprics and 4 bishoprics.

Education

The educational organisation of Austria comprises (1) elementary schools, (2) middle schools, (3) schools for special subjects, and (4) universities.

Attendance is compulsory at the elementary schools from 6 to 14 in Austria generally, but there are far reaching facilities for exemption for pupils of 12 years and upwards. The cost of elementary education is borne in the first instance by the communes and provinces. In 1931-32 there were in the Republic 5,842 public and private elementary schools, with 29,383 teachers and 835,348 pupils.

Secondary education is provided in the Gymnasias, Real Gymnasias, Real-Schools and High Schools for women. These institutions are maintained by the State, the provinces, the towns, or private individuals. Of all kinds of secondary schools there were (1930-31) 159 with 55,816 pupils, and 4,582 teachers.

There are also 8 Commercial Academies with 220 teachers and 3,994 pupils.

Austria has three universities maintained by the State, viz, Vienna (in 1930-31, 925 teachers and 12,006 students), Graz (323 teachers and 2,258 students), and Innsbruck (258 teachers and 2,452 students), and there are also two technical high schools at Vienna (354 teachers and 3,635 students) and Graz (139 teachers and 821 students), technical high schools and high schools for other special subjects, and a theological high school (Fakultat) at Salzburg for Roman Catholics (number of teachers, 1930-31, 20, students, 195). There are also 13 other theological colleges, of which 11 are Roman Catholic, 1 Armenian Catholic, and 1 Jewish. In 1930 there were also 35 training colleges for teachers, with 674 lecturers and 5,332 students.

Justice and Crime.

The Supreme Court of Justice (Oberster Gerichtshof) in Vienna is the highest court in the land. Besides there are 3 higher provincial courts (Oberlandesgerichte), 20 provincial and district courts (Landes und Kreisgerichte), and, in connection with these, the jury courts (Geschworenengerichte) and the Schöffengerichte, which are courts composed of professional and non-professional judges. In Vienna is a court for young criminals. There are likewise 243 county courts (Bezirksgerichte), and 1 special court for commercial affairs, 1 constitutional court, 1 administrative court, 1 electoral court, and 11 for industry.

In 1930, 118,689 persons were tried for criminal offences (114,643 in 1929).

Pauperism

Poor relief in Austria is based on regulations dating back to December 3, 1863, according to which the poor, if they cannot obtain assistance from any other source, may claim relief from their native parish. Relief consists of the means of subsistence, medical aid and nursing service during sickness. In every municipality there is a fund for poor relief, derived from endowments, voluntary contributions and certain legal sources, such as fines, contributions from intestate estates of secular priests, etc. If these amounts do not suffice, the municipality must provide for the balance in its budget.

The law for unemployment insurance bears date March 24, 1920. The means for unemployment relief are contributed as to one half by the employers, and as to the other half by the workers.

Finance.

The budgets for five years provided revenue and expenditure as follows, in thousands of schillings :—

	1929 ¹	1930 ¹	1931 ¹	1932 ¹	1933 ²
Revenue	1,824,885	1,980,854	2,172,492	2,002,063	1,824,200
Expenditure	2,018,388	2,214,967	2,425,408	1,999,710	1,824,000
Surplus or Deficit	— 190,053	— 234,113	— 252,916	+ 2,353	— 200

¹ Estimated budget as passed by the Legislative Assembly

² Estimates.

The following are some of the details of the budget for 1932 in thousands of schillings —

Revenue	Thousands of Schillings	Expenditure	Thousands of Schillings
Direct Tax Revenue	365,000	Interest on Debt	306,779
Indirect Tax	198,730	Subventions to Provinces and Municipalities	8,402
Customs	254,222	Pensions	206,460
Monopolies (surplus)	251,980	Social welfare	416,914
Telegraphs, Telephones and Post Office	237,500	Justice	49,990
Excise	169,295	Railways (deficit)	56,831
		Army	82,700

Principal revenues, 1933 budget — Direct taxes, 301 million schillings, indirect taxes, 159 million, customs, 386 million, taxes of turnover, 145 million, tobacco monopoly, 226.8 million. Principal items of expenditure — Social welfare, 293 million, debt service, 211.5 million, pensions, 209 million.

The public debt of the Republic of Austria was composed as follows on Dec. 31, 1931 (in schillings) —

Pre-War Debt	268,333,538
War Debt	273,250
Debts incurred by the Republic	2,323,662,547

Defence.**1 ARMY.**

By the terms of the Treaty of St. Germain, universal compulsory military service is abolished in Austria, and the total number of military forces in the Austrian Army is limited to 30,000 men, including officers and depot troops. The effective strength in 1931 was 1,415 officers and 21,463 other ranks.

Austria is permitted at her own discretion to organise this number of troops either in divisions or in mixed brigades.

The latter organisation has been chosen, and the army has been organised in 6 mixed brigades and 1 independent artillery regiment.

The maximum authorised armaments and stocks of munitions are per 1,000 men —

Rifles or carbines	1,150	500 rounds of ammunition per arm
Machine guns	15	10,000
Trench mortars, light	2	1,000
„ „ medium		500
Guns	3	1,000
Howitzers		

All officers must be regulars. Officers now serving retained in the army

must serve to the age of 40. Officers newly appointed must serve on the active list for 20 consecutive years.

The period of enlistment for non-commissioned officers and privates must be for a total period of not less than 12 consecutive years, including at least six years with the colours. The proportion of officers and men discharged for any reason before the expiration of their term of enlistment must not exceed one-twentieth of the total strength. All measures of mobilisation are forbidden.

The number of gendarmes, customs officers, foresters, and members of police forces must not exceed the number employed in a similar capacity in 1913. Educational establishments and all sporting and other clubs are forbidden to occupy themselves with any military matters. Within two months of the final ratification of the Treaty the air forces of Austria were demobilised. The armed forces of Austria therefore do not include any military or naval air forces. The manufacture, importation, and exportation of aircraft, and parts of aircraft, are forbidden.

The military budget for 1932-33 amounted to 110,400,000 schillings.

2 NAVY

As Austria now has no seaboard, the former Austro-Hungarian fleet has ceased to exist.

Production and Industry.

Agriculture forms the main occupation of the country. In 1931 the total acreage sown amounted to 4,785,632 acres. Of the total in 1931, 2,126,234 acres were in Lower Austria, and 1,001,967 acres in Upper Austria.

The size of farms in Austria is as follows: under 0.5 hectare (1.2 acres), 2.91 per cent.; from 0.5 to 5 hectares (1.2 to 12.3 acres), 9.13 per cent.; from 5 to 20 hectares (12.3 to 49.4 acres), 30.68 per cent.; from 20 to 50 hectares (49.4 to 123.5 acres), 17.98 per cent.; from 50 to 200 hectares (123.5 to 494 acres), 15.92 per cent.; over 200 hectares 23.38 per cent.

The chief products are shown as follows for two years —

Crop	1930		1931	
	Acreage	Yield (metric tons)	Acreage	Yield (metric tons)
Wheat	507,757	326,798	517,500	299,617
Rye	926,784	524,168	934,083	480,872
Barley	429,870	267,322	415,938	216,593
Oats	771,883	400,708	777,438	331,055
Potatoes	465,911	2,658,077	478,514	2,716,742
Turnips	139,162	1,771,271	227,490	2,210,839
Sugar beet	—	805,400	1,055	977,668

Production of raw sugar in 1929-30 was 120,392 metric tons, in 1930-31, 162,563 metric tons.

The foodstuffs produced do not suffice for the population. Forests abound and timber forms an appreciable asset of Austria. The number of animals on June 14, 1930 was: horses, 247,727, cows, 1,207,137, oxen, 259,847, bulls, 78,764, and calves, 767,101.

In 1931 the production of lignite was 2,982,076 metric tons (3,062,981 metric tons in 1930), and of anthracite, 228,144 metric tons (215,888 metric tons in 1930). There were 4 anthracite mines worked in 1931, and 41 lignite mines. The output of iron ore was 511,945 tons in 1931 (1,180,000 tons in 1930), lead and zinc ores, 27,533 tons (127,000 tons), copper ore, 15,960

tons (130,000 tons), lead, 6,119 tons (6,935 tons), copper, 3,235 tons (4,076 tons), crude graphite, 12,080 tons (17,679 tons), and salt, 78,713 tons

The output of pig iron in 1931 was 145,037 tons as against 287,001 tons in 1930, the output of raw steel was 322,857 tons in 1931 and 467,701 tons in 1930

According to the industrial census of June 14, 1930, there were in Austria 367,458 industrial establishments employing 1,432,936 people. Of the total the clothing industry was the most important, with 64,211 establishments and 153,367 employees. The 9 factories of the Austrian tobacco monopoly in 1931 made 225,360,000 cigars, 4,753,151,000 cigarettes, and 45,903 metric quintals of smoking tobacco

Commerce

Imports and exports for 5 years (in 1,000 schillings) were as follows —

	1928	1929	1930	1931	1932
Imports	3,906,492	8,817,700	2,738,929	2,208,234	1,400,000
Exports	2,241,123	2,219,600	1,879,014	1,340,554	860,000

The following table shows the values of the chief trading groups during 1930 and 1931 in thousands of schillings —

Group	Imports		Exports	
	1930	1931	1930	1931
Livestock	227,200	168,000	23,700	17,700
Foodstuffs	622,000	507,500	61,000	37,000
Mineral Fuel	190,800	177,100	2,600	2,700
Raw material and semi manu- factured goods	570,400	450,000	413,100	267,200
Manufactured goods	1,059,200	857,500	1,375,000	980,200
Gold and silver	39,600	48,100	28,200	35,700

The trade in 1931 was distributed among principal countries as follows

Country	Imports	Exports	Country	Imports	Exports
	1000 Schillings	1000 Schillings		1000 Schillings	1000 Schillings
Czechoslovakia	36,804	157,370	Yugoslavia	95,807	100,425
Germany	490,785	217,148	Hungary	196,935	92,100
Poland	178,214	57,980	Great Britain	75,547	98,224
United States	96,299	26,001	Switzerland	94,807	99,36
Italy	93,948	109,625	Russia	122,099	45,540

The total trade between England and Austria (Board of Trade returns) for five years were as follows —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Austria to U.K.	2,819,370	2,781,641	3,389,520	2,729,792	1,087,204
Exports to Austria from U.K.	2,704,003	2,520,582	2,089,555	1,317,918	944,550
Re-exports to Austria from U.K.	575,437	469,174	455,510	412,781	227,647

Internal Communications.

Austria had in 1931, 4,177 miles of railway lines, of which 2,321 miles were operated by the State, 981 miles were private railways operated by the State on its own account, 331 miles, private railways operated by the State on account of their owners, and 544 miles were private railways operated by private interests. There were also 284 miles of light railways privately owned. At the end of 1931, 511 miles of the State railways had been electrified. The amount of freight carried by the Federal Railways in 1931, was 23,610,474 metric tons, the number of passengers, 89,054,347. Gross earnings in 1931 were 538,563,790 schillings and expenditure, 572,672,058 schillings.

There were 21,273 miles of road at the end of 1928, of which 2,450 miles were national, or first-class, 1,029 miles provincial, or second class, 11,926 departmental and 5,868 miles municipal, or third class.

In 1930 number of pieces of mail handled internal, 268,257,000 letters, 106,427,000 post cards, 262,632,000 printed packets. Received from abroad, 62,070,000 letters, 33,834,000 post cards, sent abroad, 92,758,000 letters and 39,805,000 post-cards.

Length of telegraph line 1929, 7,586 kilometres, length of wire, 38,660 kilometres, number of offices, 3,546, number of inland telegrams, 1,377,492, of foreign telegrams, 2,740,572.

At the end of 1930 there were 233,912 telephones in use on the principal systems in the country. Length of line (1930), 31,304 kilometres, length of wire, 768,511 kilometres, inter-urban cables, lines 20,171 kilometres, wire 131,159 kilometres.

An Austrian Air Transportation Company (Oesterreichische Luftverkehrs A. G.) is subsidised by the State (2,087,000 schillings in 1931), and runs a series of regular services.

Banking and Credit.

A new National Bank for Austria was opened on January 1, 1923. It has capital of 43,200,000 schillings. It is a private, not a State, institution. The note circulation on February 7, 1933, was 802,446,000 schillings. Gold and bullion amounted to 149,483,000 schillings. Savings banks deposits amounted to 1,522,000,000 schillings in 1930.

According to the Treaty of St. Germain the Austro-Hungarian Bank was liquidated on July 29, 1923.

Money, Weights and Measures.

The Austrian unit of currency was the krone. But as from June 30, 1925, there came into general use a new unit, the gold *schilling*, made up of 100 *groschen*. The *schilling* contains 0.21172086 grammes of fine gold. It was equivalent to 10,000 kronen. The National Bank issues token coins as follows:—2 schilling pieces, silver, 1 schilling pieces, silver, half-schilling pieces, silver, 10 groschen pieces (copper and nickel), 5 groschen pieces (copper and nickel), 2 groschen pieces (copper) and 1 groschen pieces (copper). Since July, 1926, 100 schilling pieces, gold, and 25 schilling pieces, gold, have also been issued.

The metric system of weights and measures is in use.

Diplomatic Representatives.

1: OF AUSTRIA IN GREAT BRITAIN

Minister Plenipotentiary—Georg Franckenstein. Appointed October 6, 1920.

Counsellor of Legation —Dr Lothar Wimmer
Secretary of Legation —Dr. Max Attems
Consul General in London.—Charles Seligmann

2 OF GREAT BRITAIN IN AUSTRIA

Minister Plenipotentiary —Sir Eric Phipps, K.C M G , C V O Appointed June 5, 1928

First Secretary —R H Hadow, M C

Third Secretary —W G Hayter

Military Attaché —Major and Brevet Lieut-Col F N Mason-Macfarlane, M C

Consul at Vienna —H C Dick, M B E

BELGIUM.

(ROYAUME DE BELGIQUE—KONIGLIJK BELGIE)

Reigning King.

Albert, born April 8, 1875, son of the late Prince Philippe, Count of Flanders, younger son of King Leopold I (died November 17, 1906), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912), married Oct. 2, 1900, to Princess *Elizabeth of Bavaria*, succeeded his uncle Leopold II, Dec 17, 1909

Children of the King—(1) Prince *Leopold*, Duke of Brabant, born Nov. 3, 1901, married on Nov. 4, 1926, to Princess *Astrid of Sweden* Offspring:—Josephine Charlotte, born October 11, 1927 Prince Baudouin, born September 7, 1930 (2) Prince *Charles*, Count of Flanders, born Oct. 10, 1903 (3) Princess *Marie-Joëlle*, born Aug. 4, 1906, married to Prince Umberto, heir-apparent to the crown of Italy, on January 8, 1930

Sisters of the King.—(1) Princess *Henriette*, born Nov. 30, 1870, married

Feb 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

King Albert has a civil list of 9,500,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830 having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831, he ascended the throne July 21, 1831. On his death in 1865 he was succeeded by his son, Leopold II, who reigned until 1909.

By the Treaty of London, Nov 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium. In the Treaty of Versailles (June 28, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organisation of the legislative power were revised in October 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for four years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constituent body is similar to that which elects deputies to the Chamber, the minimum age of electors is fixed at twenty-one years, and the minimum length of residence required is six months. In Belgium only the following women may vote in parliamentary elections: (1) Widows, not re married, of soldiers killed in the Great War, widows of Belgian citizens killed by the enemy during the War, or, failing them, their mothers, if the latter are widows; (2) Widowed mothers of bachelor soldiers killed in the War. (3) Women condemned to imprisonment or subjected to preventive detention, for political reasons, during the enemy occupation of Belgium. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. Senators elected indirectly are chosen by the provincial councils, on the basis of one for 200,000 inhabitants. Every addition of 125,000 inhabitants gives

the right to one senator more. Each provincial council elects at least three senators. There are at present forty provincial senators. No one, during two years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half of the preceding category. The senators belonging to these two latter categories are also elected by the method of proportional representation. A senator must be at least forty years of age. They receive 28,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 187 (law of March 6, 1925) is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 42,000 francs, and a free pass all the year over Government and Companies' railways.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days, but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money Bills and Bills relating to the contingent for the army originate in the Chamber of Representatives.

Parties in the Chamber elected November 27, 1932 — Catholics, 76; Socialists, 73; Liberals, 24; Communists, 3; Flemish Nationalists, 8.

Parties in the Senate elected November 30, 1932 — Catholics, 74; Liberals, 21; Socialists, 63; Flemish Nationalists, 1.

The Executive Government consists of 12 departments, under the following Ministers (appointed December 17, 1932) —

Prime Minister — Comte de Broqueville (Catholic)

Minister of Finance — Henri Jaspar (Catholic)

Minister of Foreign Affairs — Paul Hymans (Liberal)

Minister of Justice — Paul Emile Janson (Liberal)

Minister of Education — Maurice Lippens (Liberal)

Minister of Home Affairs and Minister of Posts and Telegraphs — Prosper Poullet (Christian Democrat).

Minister of Industry and Labour — Philippe van Isacker (Christian Democrat)

Minister of Transport — Pierre Forthomme (Liberal)

Minister of National Defence — M. de Vozé.

Minister of the Colonies — Paul Tseckren (Christian Democrat)

Minister of Public Work and Minister of Agriculture — Gustave St. (Flemish Democrat Catholic)

Minister of Social Welfare and Hygiene — M. Carton de Wiart

Local Government

The provinces and communes (2,671 in 1931) of Belgium have a large measure of autonomous government.

In regard to the communal electorate, the law of April 15, 1920, definitely lays it down that all Belgians over 21 years of age without distinction of sex who have been domiciled for at least six months, have the right to vote. Proportional representation is applied to the communal elections, and

communal councils are to be renewed every six years. In each commune there is a college composed of the burgomaster, the president, and a certain number of aldermen.

Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,444 square kilometres, or 11,752 English square miles. The following table shows the population at various dates —

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1876	5,336,185	508,352	1.05	1910	7,423,784	730,236	1.09
1890	6,069,321	549,312	0.99	1920	7,465,782	41,998	0.06
1900	6,693,548	624,227	1.03	1930	8,092,004	626,222	7.73

Area and population of provinces —

Provinces	Area Eng sq miles	Population		Population per sq mile, 1931
		Census Dec. 31, 1930	Estimated Dec. 31, 1931	
Antwerp (Anvers)	1,102	1,173,363	1,188,353	1,078
Brabant	1,268	1,680,065	1,699,740	1,340
Flanders	West	1,249	901,688	730
	East	1,147	1,149,199	1,009
Hainaut	1,437	1,270,231	1,274,375	886
Liège ¹	1,500	973,131	976,895	651
Limbourg	930	367,642	373,228	401
Luxembourg	1,706	220,920	221,328	129
Namur	1,413	355,965	356,120	252
Total	11,752	8,092,004	8,159,185	694

¹ The cantons of Eupen and Malmédy, ceded to Belgium by the Treaty of Versailles, were joined to the province of Liège by a decree of March 6, 1925.

According to the Census of 1920, 477,658 people were engaged in agriculture, 2,906 in fishing, 1,466,646 in industry, 566,340 in commerce and transport, 116,017 in the liberal professions, 173,037 in the civil service, and 160,081 in domestic service.

In 1930 there were 4,007,418 males and 4,084,586 females, in 1931, 4,041,707 males and 4,117,478 females.

In 1930 the foreigners in Belgium were: Germans, 12,749 (7,960 in 1920); French, 70,201 (67,309 in 1920), Dutch, 64,079 (39,051 in 1920), British, 11,532 (6,246 in 1920), Polish, 48,840 (5,329 in 1920), Italian, 34,890 (3,723 in 1920), total, all nationalities, 316,982 (149,677 in 1920).

Vital statistics for 4 years —

	Marriages	Births	Deaths	Excess of births over deaths
1928	71,485	146,941	105,915	+ 41,066
1929	71,811	146,206	120,782	+ 25,424
1930	71,624	151,408	107,468	+ 43,988
1931	66,168	148,683	108,017	+ 40,521

Of the living births in 1931, 5,511 were illegitimate. There were also 5,064 still-births.

Divorces in 1929, 2,134; in 1930, 2,491, in 1931, 2,581

Emigration in 1931 19,252 (17,815 to European countries and 1,736 to extra-European countries), in 1930, 29,567 (25,949 to European countries and 3,618 to extra-European countries) Immigration in 1931, 32,045, in 1930, 54,409

The most important towns, with estimated population on December 31, 1931.—

Brussels & suburbs ¹	834,522	Alost	38 886
Antwerp (Anvers)	284,811	Louvain (Loewen)	38,734
Ghent (Gand)	170,576	Tournai	35,940
Liège (Lüttich)	165,657	Monsieuron	33,766
Mechlin (Malines)	60 506	Hoboken	32,724
Borgerhout	56,570	Namur	31,611
Bruges (Brugge)	51,795	Junet	30,057
Ostend (Ostende)	47,813	Charleroi	28 612
Deurne	45,787	Lierre	28,043
Seraing	45,166	Mons	27,904
Verviers	44 022	Roulers	27,669
Berchem	43,032	Turnhout	27 065
St Nicolas	39,463	Gilly	26,229
Courtrai	38,979	Genck	24,673

¹ The suburbs comprise 12 distinct communes, viz., Anderlecht, Etterbeek, Forest, Ixelles, Jette, Koekelberg, Molenbeek St Jean, St Gilles, St. Josse ten-Noode, Schaerbeek, Uccle, Woluwe St Lambert

Religion.

Of the inhabitants professing a religion the majority are Roman Catholic; but no inquiry as to the profession of faith is now made at the censuses. There are, however, statistics concerning the clergy, and according to these there were in 1929—Roman Catholic higher clergy, 86, inferior clergy, 6,186, Protestant pastors, 35, Anglican Church, 9 chaplains, Jews (rabbis and ministers), 17. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1920 there were six Roman Catholic dioceses, 204 deaneries, 3,679 Catholic churches and chapels, 6 large and 11 small seminaries.

The Protestant (Evangelical) Church is under a synod.

Education

There are universities at Brussels, Louvain, Ghent, and Liège, the two latter being State institutions. In October, 1930, Ghent University became a Flemish University. In 1931-32 Brussels had 2,721 students, Ghent, 1,881, Liège, 2,734, and Louvain, 4,071. On November 11, 1923 the Colonial School at Antwerp (founded January 11, 1920) and the School of Tropical Medicine were constituted a Colonial University.

There were also 51 technical and commercial high schools, the Royal Academy of Fine Arts at Antwerp, 2 State agricultural institutes (at Gembloux and Ghent), and a State veterinary school at Cureghem, 65 schools of design,

and 4 royal conservatoires at Brussels, Liège, Ghent, and Antwerp *Higher Education*: (Dec 31, 1931) 24 royal athénæums, with 7,989 pupils; 20 special athénæums with 1,551 pupils (903 boys and 648 girls), 5 communal and provincial colleges with 1,683 pupils, and 10 private colleges with 1,905 pupils. There were also 8 lycées for girls with 1,078 pupils. The next grades of schools are the higher grade schools, of which there were 144 State schools (94 for boys and 50 for girls) with 33,148 pupils (22,784 boys and 10,359 girls), 14 communal and provincial (7 for boys and 7 for girls) with 4,389 pupils (2,213 boys and 2,176 girls) and 5 private higher grade schools with 1,139 pupils (2 for boys with 356 pupils, and 3 for girls with 783 pupils). *Elementary Education* (December 31, 1931), there were 8,549 primary schools, with 917,122 pupils. 3,472 infant schools with 249,799 pupils, and 1,357 adult schools with 37,798 pupils. *Normal Schools* there are (1931) 7 for training secondary teachers (249 students) and 81 for training elementary teachers (8,014 students).

There are many private or free schools, mostly under ecclesiastical care. No statistics are available for these.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces.

In 1930 there were 2,293 libraries, with 4,253,231 volumes and 605,621 readers, number of volumes borrowed, 7,748,295.

French and Flemish are both spoken.

Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 280 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

Pauperism.

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospiques civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either State or provincial, provide for the needs of deaf mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

Finance.

Budget estimates (ordinary and extraordinary) for 5 years —

	1929	1930	1931	1932	1933
Revenue	1,000 francs 11,510,089	1,000 francs 11,561,508	1,000 francs 11,685,000	1,000 francs 10,887,000	1,000 francs 10,837,691
Expenditure	10,340,695	11,513,669	12,305,000	11,144,000	10,684,553

Ordinary budget estimates of revenue and expenditure for 1933 —

Revenue	1,000 francs	Expenditure	1,000 francs
Direct taxes	2,410,000	Public debt	3,807,153
Customs and excise	2,885,000	Civil List	41,878
Stamp duties	2,110,000	Foreign affairs	77,502
Other ordinary receipts and taxes	2,287,500	Justice	300,007
Postal	829,092	Education	971,741
		Public Works	115,506
		Social Insurance	1,525,796
		National defence	873,262
Total of all ordinary receipts	10,857,691	Total of all ordinary expenditure	10,684,553

On December 31, 1932, the Belgian public debt amounted to 55,852,000,000 Belgian francs. Internal long term debt was 27,241,000,000 francs, internal short debt, 1,079,000,000 francs, total internal debt, 28,320,000,000 francs, external long term debt 26,398,000,000 francs.

On October 25, 1926, a debt of 20,000,000/ was contracted, for 30 years, for the purpose of stabilising the franc.

Defence

ARMY

According to the Military Law passed in 1923, the Belgian Army is recruited by means of annual calls to the Colours and by voluntary enlistments. Military service is compulsory for those called to the Colours.

Voluntary enlistment is 5 years (for youths less than 17), 4 years (for youths less than 18), and 3 years (for youths over 18).

By the law of 1928 the period of service of 21,000 of the annual contingent is 14 months in the supplementary orders, 13 months for cavalry, horse artillery, and the routine troops of Liège, 12 months for the remainder. The rest of the annual contingent, about 23,000, does 8 months active service. The duration of military obligation is 25 years, of which 15 are in the Regular Army and reserve and 10 years in the Territorial Army.

Military expenditure, 1933, 873,262,073 francs.

The strength of the army with the Colours for 1931 was 4,010 officers and 68,920 other ranks organised as follows —

	Army Corps	Divisions		Regts	Btns	Coys	Squadrons			Battalions	Air Crafts	
	Regular	Regular	Brigades	Regular	Regular	Regular	Cavalry	Cyclist	Machine	Regular	B'balloons	Flights
Infantry	3	6	—	18	60 ¹	284 ²	—	—	—	—	—	—
Cavalry	1	2	—	8 ³	—	—	24	8	16	—	—	—
Artillery	—	—	—	—	—	—	—	—	—	—	—	—

Tanks	—	—	—	—	1	—	—	—	—	—	—	—

¹ Includes 6 Machine gun Battalions

² Includes 72 Machine gun Companies

³ Including 2 cyclist regiments

NAVY.

On grounds of economy, the small Navy formerly maintained by Belgium has been abolished. The ex British sloop *Zinnia*, of 1,200 tons, is still employed on fishery protection service

Production and Industry.

I AGRICULTURE

Of the total area of 3,044,400 hectares, there were in 1931, 1,836,036 hectares under cultivation, of which 39·37 per cent were under cereals, 1·20 per cent vegetables, 4·13 per cent industrial plants, 14·30 per cent root crops and 41·00 per cent forage. In 1930, 1,831,516 hectares were under cultivation. The forest area covers 18 per cent of the land surface.

The following figures show the yield of the chief crops for three years —

Crop	Acreage			Produce in metric tons		
	1929	1930	1931	1929	1930	1931
Wheat	356,223	410,729	381,182	359,935	364,232	376,051
Barley	62,686	84,422	82,579	61,699	83,277	87,472
Oats	743,751	674,102	728,465	747,145	554,807	702,293
Rye	566,815	573,578	543,548	562,950	474,215	520,277
Potatoes	422,404	401,689	425,124	3,908,004	2,962,332	3,563,860
Beet (sugar)	142,656	140,116	128,321	1,570,329	1,865,291	1,465,541
Beet (fodder)	208,393	200,389	207,888	4,564,064	6,215,263	5,327,674
Tobacco	7,439	7,279	6,999	6,820	6,980	6,563

On December 31, 1931, there were 241,989 horses, 1,767,536 horned cattle (including 930,930 dairy cows), and 1,235,214 pigs.

II MINING AND METALS AND OTHER INDUSTRIES

Coal production (in metric tons) —

Year	Coal	Briquettes	Coke	Workpeople
1928	27,678,800	1,956,180	6,111,610	170,672
1929	26,939,930	2,018,110	5,951,760	159,029
1930	27,414,780	1,875,210	5,285,610	163,470
1931 ¹	27,035,270	1,850,330	4,931,060	155,054
1932 ¹	21,413,560	1,320,750	4,476,099	—

¹ Provisional

The following table summarises the production of iron and steel and crude zinc:—

Products	1928	1930	1931	1932
	Metric tons	Metric tons	Metric tons	Metric tons
Pig iron	2,484,696	3,365,240	3,231,680	2,783,500
Wrought iron	304,850	121,780	62,880	35,480
Steel	2,466,630	3,354,170	3,066,450	2,758,280
Wrought steel	1,796,010	3,189,20	2,350,000	2,054,170
Crude zinc	204,228	176,280	—	—

In 1930, the value of the pig-iron was 1,798,337,000 Belgian francs, of wrought steel 3,014,234,000 francs, and of zinc 510,147,000 francs. In 1930, the production of lead amounted to 85,370 metric tons, value 276,813,000 francs.

In 1930, there were 44 sugar factories, output 257,700 metric tons of raw

sugar, 14 refineries, output 178,000 tons, 52 distilleries, output 461,193 hectolitres of potable and industrial alcohol, 1,556 breweries, output 16,662 304 hectolitres of beer, 13 margarine factories, output 44,379 tons; 46 vinegar factories, output 150,223 hectolitres, 15 match factories, output 70,057 million matches

According to an industrial census taken on October 31, 1926, there were 13,082 industrial concerns (of more than ten employees) with a total number of 1,080,331 workpeople, of whom 874,309 were men and 206,022 women. There were also 96,567 salaried officials (84,005 men and 12,562 women). Of the more important industries the following may be mentioned: iron and steel, glass, artificial silk, motor-cars, lace (particularly hand-made lace), linen, and gloves.

Commerce.

By the Convention concluded at Brussels on July 25, 1921, between Belgium and Luxembourg and ratified on March 5, 1922, an Economic Union was formed by the two countries, and the Customs frontier between them was abolished on May 1, 1922.

The following table shows imports and exports for 6 years (in thousands of paper francs) —

Year	Imports	Exports	Year	Imports	Exports
	1000 francs	1000 francs		1000 francs	1000 francs
1927	29 138,507	26 096,614	1930	31 047,016	26,151,571

¹ Provisional

In 1931 the principal articles imported into the United Kingdom from Belgium (according to Board of Trade returns) were —worsted yarn, 682,991*l* ; glass and glass ware, 1,859,041*l* ; cotton piece goods and yarns, 2,225,594*l* ; zinc, 832,873*l* ; iron and steel bars, etc., 3,826,310*l* ; billets, etc., 755,178*l* . The principal exports to Belgium were —cotton piece goods, 587,487*l* ; iron and steel manufactures, 510,378*l* . machinery, 827,892*l* ; coal, 1,276,402*l* ; chemicals, 132,524*l* ; skins and fur skins, 377,175*l* ; woollen piece goods, 566,410*l* .

The total trade between England and Belgium for 5 years was as follows —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Belgium to U K	43,400,977	44,019,077	38,015,736	38,189,870	15,989,806
Exports to Belgium from U K	17,002,370	19,412,970	15,035,266	10,025,509	8,744,978
Re exports to Belgium from U K	10,848,182	9,201,338	6,743,682	4,547,120	4,119,015

Shipping and Navigation.

On July 1, 1932, the Belgian merchant fleet was composed of 240 ships of 537,442 tons, among which were 237 steamers of 531,014 tons.

There were 36 Belgian shipping companies at the beginning of 1931, of which the most important were the Compagnie Maritime Belge, with 44 ships, and the Adoll Duppe, with 35 ships.

The navigation at Belgian ports was as follows —Number of vessels entered, 1931, 17,555, tonnage, 27,793,141, 1930, 18,413, tonnage, 29,113,791. Number of vessels cleared, 1931, 17,486, tonnage, 27,654,991, 1930, 18,331, tonnage, 28,964,997. In 1932, 9,407 vessels of 19,666,745 tons entered the port of Antwerp, in 1931, 11,256 vessels of 22,388,342 tons.

Internal Communications.

The total length of the roads in Belgium (1931) was as follows — State roads, 5,440 miles, provincial roads, 981 miles, conceded roads, 17 miles, total 6,438 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1930 was 1,086 miles.

In September 1926 the State handed over its control of the railways to a private company, the Société Nationale des Chemins de Fer Belges for a period of 75 years. The length of railway operated on January 1, 1932, was 2,945 miles of main line. There were also 170 miles of private railways and 3,004 miles of provincial lines. It is proposed to electrify the railway system of the country. Receipts in 1931 were 3,085.2 million francs, and expenditure was 3,021.2 million francs.

In 1931 the Post Office in Belgium handled 323,860,000 private letters, 66,803,000 official letters, 89,088,000 post cards, 402,081,000 packets of printed matter and 422,457,000 newspapers. On December 31, 1931, there were 1,703 post offices in Belgium. The gross revenue of the Post Office in the year 1931 amounted to 422,314,000 francs, and the expenditure to 472,700,000 francs (in 1930, 390,987,000 and 478,960,000 respectively).

A Régie of telegraphs and telephones for running the services on business lines was created by the law of July 19, 1910, effective Nov. 1, 1930. In 1931 the telegraph system carried 9,899,244 dispatches, of which 2,333,654 were official. Total length of public telegraph wires was 31,666 miles, and of line 6,222 miles. There were 1,569 telegraph offices. Receipts for 1931 were 66,674,000 francs.

In 1931 there were 242 radiograph stations and 28,995 radiotelegrams were despatched

In 1931, the telephone service comprised 461 exchanges, connecting 495 public telephone stations and 227,000 subscribers. There were 1,617,338 miles of telephone line in service, including 1,317,494 miles of local line, 233,436 miles of inter-urban line and 65,423 miles of international lines, and the total number of calls, including 3,103,828 long-distance calls, was 232,477,000. Receipts in 1931 were 350,682,000 francs.

The following are some traffic figures relating to Belgian Air Service (Brussels, Ostend, Antwerp, Liège and Le Zoute) —

	General Traffic				Belgian Traffic			
	1928	1929	1930	1931	1928	1929	1930	1931
Passengers	27,797	28,566	31,767	27,701	1,052	968	—	—
Freight (kilos)	1,067,868	1,408,699	1,391,114	1,389,799	86,289	57,478	76,459	96,068
Mails (kilos)	92,618	101,238	173,852	154,686	22,580	32,160	13,798	20,535

Money and Credit

The *franc*, containing 0.0418422 gramme of fine gold, is the unit of currency.

No gold has been minted since 1882 (save only 5,000,000 francs struck in 1914), and no silver 5 franc pieces since 1876.

On October 26, 1926, the Belgian franc was stabilised and the paper currency relinked to gold, when all notes of the National Bank of Belgium became payable in gold or its equivalent in foreign currency. A new currency unit—called the *belga*, with a weight of 0.20921 grammes of fine gold—has been introduced. One belga equals five paper francs and 35 belgas equal £1 gold. The franc, however, remains the basis of the monetary system, and will continue to circulate in the country, and is the medium of exchange in all domestic business. New nickel coins of the value of 5 francs or 1 belga were put into circulation in 1930, 20 franc nickel pieces are shortly to be minted. The use of the belga is compulsory in all foreign exchange transactions. To provide the necessary funds, a stabilisation loan for the equivalent of 100,000,000 dollars was floated abroad.

The one bank of issue in Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. In 1926 its privileges were prolonged for a further 25 years. Its capital and reserve amounted in 1927 to 264,063,000 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its reserve, in gold or foreign gold securities, must be equal to 40 per cent of its right engagements, 75 per cent of which must be in gold. Its position on February 9, 1933, was (in thousands of belgas) —

Gold and silver Securities	2,688,548 786,409	Notes in circulation Current accounts	3,567,788 335,115
-------------------------------	----------------------	--	----------------------

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks.

The popular savings bank in Belgium is mainly concentrated in the *Caisse Générale d'Épargne et de Retraite*, at Brussels. The *Caisse d'Épargne* is a private company with legally regulated functions and operates under the supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal savings system. On December 31, 1931, this institution had 5,133,738 accounts, with deposits amounting to 9,248,296,000 francs.

The weights and measures are those of the metric system.

Diplomatic Representatives.

1 OF BELGIUM IN GREAT BRITAIN

Ambassador — Baron de Cartier de Marchienne, appointed in 1927
Counsellor of Embassy — Robert Silvercrux
First Secretary — H. H. Prince Eugène de Ligne
Military Attaché — Lieut.-Col. H. G. Nérinex
Air Attaché — Capt.-Aviateur Chevalier Willy Coppens, D.S.O., M.C.
Commercial Counsellor — Charles Bastin
Vice Consul in London — Jules Wuidart

2 OF GREAT BRITAIN IN BELGIUM

Ambassador — Rt. Hon. the Earl Granville, G.C.M.G., G.C.V.O., appointed August 1, 1928
Counsellor — G. N. M. Bland, C.M.G.
First Secretary — D. Mackillop
Third Secretary — J. S. Somers Cocks
Commercial Secretary — N. S. Reyntiens, O.B.E.
Naval Attaché — Capt. J. U. P. Fitzgerald, R.N.
Military Attaché — Major the Hon. W. Fraser, D.S.O., M.C.
Air-Attaché — Group Capt. R. J. Bone, C.B.E., D.S.O.

There is a Consul General at Antwerp, Consuls at Liège and Leopoldville (Congo), and Vice Consuls at Brussels, Ghent, Ostend and Charleroi.

BELGIAN CONGO

(CONGO BELGE)

Constitution and Government.—The Congo Independent State was founded in 1885 by Leopold II., King of the Belgians, and the State was placed under his sovereignty.

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian Legislature in August and September and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 15 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be reappointed. The King is represented in the Colony by a Governor-General, assisted by several Vice-Governors General. The budget is presented to the Chambers, and voted by them, the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers.

The Annexation has been recognised by all the Powers.

Governor General—Lieut.-General Tilkens (appointed December 27, 1927).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The Colony is divided into four Provinces and sixteen administrative districts. Each district is divided into administrative territories, of which there are 102 in the whole country. *The Katanga Province*, capital Elisabethville, districts Luapula, Tanganyika, Luabala and Lomami. *The Congo-Kasaï Province*, capital Léopoldville, districts Lower Congo, Léopoldville, Kwango, and Kasai. *The Equatorial Province*, capital Coquilhatville, districts Ubangi-Congo, Tshuapa, and Lake Leopold II. *The Eastern Province*, capital Stanleyville, districts Uélé, Kibali-Ituri, Kivu, Maniema, and Stanleyville. The capital of the Colony, formerly Boma, was, by royal decision (1923), changed to Léopoldville. At the head of each Province there is a governor, and at the head of each district a commissioner.

The districts of Ruanda and Urundi (formerly in German East Africa) have been ceded to Belgium as mandatory of the League of Nations. Area about 20 550 square miles. Both districts were united administratively with the Congo, under the direction of a Vice-Governor, by a law of August 21, 1925. Ruanda-Urundi is populated by three races—the Wa-tusi, the Wa hutu, and the Batwa. Both districts are rich in cattle. The frontier was formally ratified on October 20, 1924. Usumbura is the capital.

On July 22, 1927, a convention was signed between Belgium and Portugal by which the former ceded to the latter territory in the extreme south west portion of the Belgian Congo, having an area of 3 500 square kilometres (480 square miles), in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of three square kilometres. Belgium further undertook to commence the construction of a railway to link up with the Portuguese railway (the Lobito Bay-Katanga line). This railway was opened on July 1, 1931.

Area and Population.—The area of Belgian Congo is estimated at 918,000 square miles. The population of Bantu origin according to the latest census was 8,880,881. The white population on January 1, 1932, numbered 22,882. Of these, 17,432 were Belgians, 906 English, 564 Americans, 1,543 Portuguese, 1,489 Italians, 649 French, 361 Dutch, 648 Greeks, 354 South Africans, and 263 Swiss.

Kiswahili is the language spoken by the natives who have been under

Arab influence Bangala is the commercial language on the Upper Congo, Fiole is used near the coast

Religion and Education—The religion of the natives consists of a gross fetichism, mission work is actively carried on. There were, on January 1, 1932, 2,471 missionaries, of whom 1,758 were Catholic and 718 Protestant. In education they co-operate with the Government. The school statistics give 287,779 children as receiving elementary education. Several educational bodies direct under control of the Government establishments for general and professional training, especially at Boma, Léopoldville, Moanda, Coquilhatville, Lusambo, Kabiuda, Stanleyville, Buta, Elisabethville and Buaia. In 1932 the Government grant to the missionaries for educational purposes amounted to 10,135,022 francs, while the total expenditure on education was 21,248,794 francs. An organised medical service exists. The income from a special fund of 150 million francs as well as a Government grant are applied to the medical service.

Justice.—There are 6 courts of first instance, 16 district courts, 16 prosecutors' courts, 102 police courts, and 2 courts of appeal (one at Léopoldville and the other at Elisabethville).

Finance.—Estimates of ordinary revenue and expenditure for five years (in francs) —

—	1929	1930	1931	1932	1933
Revenue	575 619,000	690,910,000	625 860,190	624,652,604	357,736,580
Expenditure	605 607,286	690,732,121	699,564,422	624,113,303	725 757,940

For 1932 the ordinary receipts and expenditure were estimated as follows —

Receipts	Francs	Expenditure	Francs
Duties and taxes	441,835,000	Institutions and services acting in Belgium	207,913,919
Domestic receipts	7,981,000	Expenses of general administration in Africa, those of the Public for e included	172,840,641
Judicial receipts and receipts of the administrative services	84 250,200	Expenses for the social and humanitarian works	102,435 984
Proceeds of capital & revenues	90,556,404	Expenses of economic order	141,422,809
Total	624,652,604	Total	624 113,308

Debt, December 31, 1931, 2,740,789,723 francs, of which 1,757,277,323 francs were Consolidated Debt and 983,512,400 francs Floating Debt

Defence—The Colony possesses a force of native troops amounting to 150 European officers, 139 European non commissioned officers and 13,212 natives, including the recruits and about 5,550 men of the territorial police. The force is recruited by conscription and voluntary enlistment. The term of service does not exceed seven years, and the recruits are trained in two camps of instruction before being drafted to their units.

Production.—The yield of the chief vegetable products in 1931 was as follows (in metric tons) —palm-oil, 44,699, cotton, 43,572, palm nuts, 20,746, rice, 55,769; coffee, 3,982, cacao, 1,331, and rubber. Ivory is still

abundant Cattle thrive only in the districts where there is no tsetse fly, notably in the highlands of Katanga, Ituri and Kivu Mining flourishes, the chief minerals being copper, diamonds, gold, tin, cobalt, uranium, radium, coal and iron The gold mines in 1932 produced 7,784 kilos, chiefly from the Kilo Moto mines The most important mines in the Congo are the copper mines near Kambove in Haut Katanga, operated by the Union Minière du Haut Katanga The total output from these mines in 1931 was 120,000 metric tons of copper The Union Minière produces radium from the Chunkolobwe mines The output of diamonds (chiefly from the mines of the Forminière company in the Kasai district) in 1931 amounted to 3,528,379 carats, of radium 44 gr, of coal 85,713 tons, of tin 198 tons, of cobalt 370 tons

Commerce and Shipping—The value of the commerce for six years was as follows (in francs) —

Years	Imports	Exports	Years	Imports	Exports
	Francs	Francs		Francs	Francs
1926	1,293,197,242	729,801,977	1929	1,943,192,003	1,444,396,477
1927	1,496,358,668	1,055,289,249	1930	1,581,915,177	1,511,490,871
1928	1,624,498,658	1,227,867,419	1931	961,891,551	1,104,045,231

The chief imports and exports were —

Imports		Exports	
	1930		1931
	Francs		Francs
Arms, ammunition, &c	16,529,591	Rubber	7,175,317
Steamers and ships	49,964,909	Ivory	21,550,858
Machinery	245,505,920	Palin nuts	99,534,705
Wines, spirits, beer	61,976,752	Palin-oil	110,466,430
Provisions	154,940,361	Copal	36,695,100
Cottons	56,808,699	Gola, crude (kg)	105,774,866
		Copper, crude	719,069,071
		Diamonds (carats)	137,039,720
		Tin ore	15,616,720
		Cotton	119,720,160
			90,392,680

The special trade was distributed as follows —

	Imports			
	Quantity		Value	
	In metric tons 1930	In metric tons 1931	In francs 1930	In francs 1931
Belgium	235,753	131,385	807,178,979	455,979,124
United Kingdom	8,818	5,517	128,961,627	89,351,419
Rhodesia	337,086	117,417	123,243,947	57,145,433
Germany	15,464	5,979	77,369,610	54,891,937
France	6,676	4,136	58,667,863	37,103,721
United States	20,998	13,640	100,959,421	66,142,510
Luxemburg	12,616	15,863	17,623,544	20,121,665
South Africa	9,280	4,121	29,485,774	31,161,014
Angola	10,946	11,537	84,335,704	26,794,958
Netherlands	2,137	905	21,150,666	11,509,162

	Exports			
	Quantity		Value	
	In metric tons 1930	In metric tons 1931	In francs 1930	In francs 1931
Belgium	149,728	181,701	791,388,819	687,121,400
Rhodesia	17,948	7,478	20,72,127	10,048,823
Tanganika	29,203	14,653	141,200,188	62,182, 86
Mozambique	80,628	40,415	394,711,784	162,026,476
South Africa	867	657	4,195,389	2,009, 97
United States	22,528	22,677	67,598,116	40,798,238
French Eq Africa	10,648	9,011	39,66,987	82,880,179

United Kingdom	5,065	344	18,544,103	2,904,846
Germany	14,830	8,492	22,800,244	10,075,868

According to the Board of Trade Returns the imports into the United Kingdom from the Belgian Congo in 1932 amounted to the value of 47,900*l*, and the exports of British produce and manufactures to the Belgian Congo to 354 185*l*, re-exports from U K were 18,193*l*.

At the port of Boma in 1931 there entered 204 sea going vessels of 823,333 tons. In the coasting trade there entered 90 vessels, including sailing ships, of 9,853 tons, and there cleared 87 vessels, including sailing ships, of 9,942 tons. The two other ports are Banana and Matadi. In 1931, 493 steamships with tonnage of 1,903,573 entered, and 488 with tonnage of 1,878,224 cleared the three ports of Belgian Congo.

Internal Communications—The Congo is navigable for 95 miles from its mouth to Matadi, and on this section ply 15 steamers belonging to the State. Above Matadi, for over 249 miles, numerous rapids, render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool are 1,068 miles of navigable water, reaching Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course (total, 6,279 miles). Above the Stanley Falls the Congo is called Lualaba and navigable for 585 miles, from Ponthierville to Kindu and from Kongolo to Bukama (Katanga).

There were (January 1, 1931) 21,180 miles of road. The total length of railways on July 1, 1932, was 2,566 miles. New railway lines are planned between Zobia and Uélé, and between Kamaniola and Coatermansville (Kivu).

An important development in 1911 was the construction of a pipe line from Matadi to Léopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations delivering 50,000 tons of oil at Léopoldville, the terminus. The concession is for 70 years, at the expiration of which period all the pipe line, with the material, except the vessels and stores of petroleum, will become the property of the Congo Government.

The river steamers run from Léopoldville to Stanleyville and the tributaries of the Congo, they belong to different companies, of which the Unatra Company is the most important. The fleet of the various companies consists of 272 steamers and 517 barges. Powerful tugboats hauling four to eight barges of 800 tons each afford cheap transportation on the Congo river and the largest tributaries.

There is a regular air service between Léopoldville and Fort Francois.

with intermediate stages. The distance is 612 miles. A regular service runs between Leopoldville and Boma, a distance of 217½ miles, and between Léopoldville and Stanleyville (1,062 miles) with stages at Bandundu, Inongo, Coquilhatville, Basankusu, Lualaba and Bakoko. The service between Léopoldville and Boma was restarted in July 1932.

In 1931 there were 79 post offices, and 65 special telegraph offices. In the internal service (1931) 2,237,900 letters, papers, &c., were transmitted, and in the external, 5,078,300 were handled. The Congo is included in the Postal Union. Total length of telegraph lines 4,209 miles. In 1931, 163,300 internal and 110,700 foreign telegrams were transmitted, besides 36,619 official telegrams. There are 27 stations of wireless telegraphy, 60 telephone offices and 14 central stations serving 1,420 subscribers, 4,000 miles of telephone lines, and 5,540 miles of telephone wire. Number of calls in 1931, 2,811,300.

Money and Credit.—The monetary unit is the *franc* equivalent to one fifth of the *belga* and containing 0.0418422 gramme of fine gold. This value was fixed by an agreement with the Banque du Congo Belge on October 10, 1927, approved by Royal Decree on November 14, 1927, authorising the Bank to issue notes in Belgian Congo and Ruanda-Urundi. The notes at present in circulation are of a nominal value of 1,000, 500, 100, 50, 20, and 5 francs. By Royal Decree of December 28, 1920, the Government was authorised to issue copper nickel coins in denominations of 1 franc and 50 centimes. There are also perforated coins also in copper nickel, of 20, 10, 5, 2 and 1 centimes. The notes and coins in circulation in the Colony are not legal tender in Belgium. Eight banks are in existence, of which the three most important are the 'Banque du Congo Belge,' the 'Banque Commerciale du Congo' and the 'Banque Belge d'Afrique,' all three with branches in all the important commercial centres.

Weights and Measures—The Metric System was introduced by law on August 17, 1910.

British Consul—H. C. Swan (at Léopoldville).

There are British Vice Consuls at Elisabethville and Stanleyville.

BHUTÁN.

STATE in the Eastern Hímálaya, between 26° 45' and 28° N latitude, and between 89° and 92° E longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbí and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles, extreme breadth 90 miles. Area about 18,000 square miles, population estimated at 300,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but repeated outrages on British subjects committed by the Bhutan hill men led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhutan Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhutanese Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 1,00,000.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rajás. In 1907 the Deb Rajá, who was also Dharma Rajá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, G C I E K O S I, was elected as the first hereditary Maharaja of Bhután. He died on August 21, 1926, and was succeeded by Maharaja Jik-me Wang-chuk, K C I E.

Chief fortresses or castles Punakhá, a place of great natural strength, Tasichozong (Tashichodzong), Páro, Angduphorang (Wangdupotrang), Trongsa, and Byaka

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures Tásichozong (Tashichodzong), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is no standing army

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, elephants, ponies, chowries, and silk Extensive and valuable forests abound Muzzle loading guns and swords of highly-tempered steel are manufactured

His Highness keeps an Agent at Kalimpong who is also Assistant to the Political Officer in Sikkim for Bhutanese affairs

BOLIVIA.

(REPÚBLICA BOLIVIANA.)

Constitution and Government.

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 23, 1880 Executive power is vested in a President, elected for four years by direct popular vote, and not eligible for re-election, as well as two Vice presidents similarly elected There is a Congress of two chambers, called the Senate and the Chamber of Deputies, which sits at La Paz The suffrage is possessed by all males over 21 years of age who can read and write and have an 'assured income.' There are 16 Senators (2 for each Department) elected for six years (one-third retiring every two years) and 70 Deputies elected for four years (one half retiring every two years), both by direct vote of the people Senators and Deputies receive a salary of 900 bolivianos (70l) per month Sitzings, as a rule, last for 60 days, but may be extended to 90 days Extraordinary sessions may be held for special purposes. The President's Cabinet consists of the secretaries of six departments—Foreign Relations and Worship, Finance, Industry and Agriculture Government and Justice, Public Works, Posts and Telegraphs, War and Colonisation, and Education

President of the Republic—Dr Daniel Salamanca Elected January 5, 1931, assumed office March 10, 1931, for the period 1931-1935

The Republic is divided into 8 departments, 3 territories, 72 provinces administered by sub prefects, and 681 cantons administered by corregidores The supreme political, administrative, and military authority in

each department is vested in a prefect. The territories in the north west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*. Prefects and sub-prefects are appointed by the President of the Republic, corregidores and village alcaldes are appointed annually by the prefects of the provinces. The capital of each department has its municipal council, the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents.

Bolivia's most serious boundary difficulty is with Paraguay, its southern neighbour, and grows out of a long-standing dispute as to where the frontier line crosses the Gran Chaco. Bolivia claims all the Chaco between the Pilcomayo and Paraguay rivers, whereas the Paraguayan claim would cut her off from the Paraguayan River. Clashes between the garrisons in the disputed territory brought both nations to the verge of war in July 1932, the Council of the League of Nations in December, 1932, agreed to dispatch an impartial tribunal to investigate the dispute, hostilities being suspended in the meantime.

The boundary line between Bolivia and Peru in the peninsula of Copacabana is being delimited by a joint commission. That between Argentine and Bolivia was determined by treaty which was ratified in 1929.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets) —

Departments and Territories	Area square miles	Census 1900	Estimated 1929	Per square mile 1929
La Paz (La Paz)	40,686	445,616	736,985	18.1
Cochabamba (Cochabamba)	25,248	328,163	542,735	21.6
Potosí (Potosí)	45,031	325,615	538,521	11.9
Santa-Cruz (Santa-Cruz)	144,941	209,592	346,696	2.3
Chuquisaca (Sucre)	36,132	204,434	327,929	9.0
Tarija (Tarija)	31,567	102,887	170,160	5.4
Oruro (Oruro)	20,657	86,081	142,366	6.8
El Beni (Trinidad)	95,854	32,180	53,221	0.5
El Chaco (Villa Montes)	46,661	—	—	—
Colonial Territories (Riberalta)	27,938	10,000	52,730	1.8
Total	514,155	1,744,568	2,911,283	5.6

The population on December 31, 1931, was estimated at 3,014,069. Boundary disputes make exact calculations of area impossible, one official estimate puts the area at 506,467 square miles, exclusive of the area disputed by Paraguay.

The 1929 estimate showed 1,586,649 Indians, 426,212 whites and 898,429 mixed races. Other estimates (1930) distribute the population thus: Indians, 57 per cent, mixed, 30 per cent., white 13 per cent., and 6,000 Chinese, Negroes, etcetera.

The language of the educated classes is Spanish, that of the natives Q̄ch̄ūa and Aymara.

The estimated population (1929) of the principal towns: La Paz (the actual seat of government, though Sucre is nominally the capital), 146,930; Cochabamba, 86,196; Potosí, 84,083; Sucre (the legal capital and the actual seat of the Judiciary, the University, and the Archbishop), 84,577; Tarija, 11,543; Oruro, 40,700; Santa-Cruz, 30,823.

Religion, Education, and Justice.

The Roman Catholic is the recognised religion of the State, the exercise of other forms of worship is permitted. The religious orders have 17 convents (9 for males and 8 for females); the male members number about 280, the female 280, there are about 567 secular clergy. In 1900 the non Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 6 bishops (La Paz, Cochabamba, Santa-Cruz, Oruro, Potosí, and Tarija). The maintenance of the Church costs the State 120,000 bolivianos a year, 23,000 bolivianos being devoted to the propagation of the faith among the Indians. By a law of March 19, 1912, all marriages must be celebrated by the civil authorities.

Primary instruction, free and obligatory, is under the care of the municipalities and the State. In 1932 there were 2,033 elementary schools with 1,242 teachers and 143,017 pupils. For secondary instruction there were 29 colleges (19 national), 5 clerical institutions, and 5 private schools with, in all, 349 teachers and 4,402 pupils. For special instruction there are 22 establishments with 2,033 students. At Sucre and La Paz are the only two universities which possess more than one faculty. The University at Sucre, known as the St. Francis Xavier University, is one of the oldest in America, having been founded in 1624. There are also a number of training colleges for teachers, including one for Indians. There are 18 institutions offering university instruction, they have 193 teachers and 1,745 students.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting at Sucre has 7 judges, the district courts have each 5 judges, there are local tribunals and parish alcaldes. Public justice is directed by an Attorney-General and by district and local attorneys. The administration of justice is free.

Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, export duties on tin, silver, gold, wolfram, antimony, lead and other minerals, rubber export, patents, and stamps. Tin is the chief single source of revenue. Domestic taxes are collected through the National Tax Collecting Company.

The budget estimates of ordinary revenue and expenditure for 6 years were as follows —

—	Revenue	Expenditure	—	Revenue	Expenditure
	Bolivianos	Bolivianos		Bolivianos	Bolivianos
1927	49,185,126	50,807,124	1930	32,514,161	43,766,603
1928	51,897,187	55,802,972	1931 ¹	19,950,000	34,870,667
1929	46,981,073	46,927,457	1932 ²	27,355,826	43,957,991

¹ Executive has asked permission to borrow 15,000,000 bolivianos.

² This budget set aside by decree in June 1932, revenue is estimated at no more than 18,000,000 bolivianos. A loan of Bs 10,000,000 from the Banco Central de Bolivia will help meet the deficit.

The principal items of expenditure in the 1932 budget were (in bolivianos): public debt, 10,625,855; war ministry, 11,408,385; instruction, 4,561,562; interior, 2,352,700; communications, 2,567,614; justice, 1,667,234.

The public debt of Bolivia on June 30, 1932, amounted to 220,667,926 bolivianos, being external debt, 172,982,275 bolivianos, internal, 26,881,023 bolivianos; and floating, 20,854,623 bolivianos.

Defence

The territory of the Republic is divided into 8 military districts, the Northern, the Central, and the Southern, and 3 'military commands' formed of the departments Santa Cruz, El Beni, Tarija, and the Territories

The law of December 15, 1915, provides for a permanent force of 8,577 men, to which is added an annual contingent of conscripts divided into two categories, the total number of effectives being about 8,000. Military service is compulsory for all males from the 19th to the 50th year. Those from 19 to 25 years of age serve not more than 2 years with the standing army, those from 25 to 30 years of age, 'the ordinary reserve,' return at some time for 3 months' service. After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years' enrolment in the Territorial Guard.

The permanent army consists of 12 infantry regiments, each of 2 battalions, 6 cavalry regiments, each of 4 squadrons, 3 mountain artillery regiments, each of 2 batteries, a field artillery regiment of the same strength, 6 battalions of engineers, 1 aviation corps of 2 flights.

In addition to the above troops there are small bodies of infantry of from 100 to 200 men (called *columnas*) at the chief towns of departments, which can be expanded to battalions, if necessary. There also exist other units, for garrisoning the North, the North West, the South West, and the East, consisting of 300 men each.

The infantry armament is the Mauser (Bolivian Model) rifle of 1898.

Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three quarters of the entire area. It is estimated that about 4,940,000 acres are under cultivation, but agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some regions. Potatoes, cacao, coffee, barley, corn, highland rice, and rubber are the principal products. Bolivia ranks as the second rubber-exporting country of South America, coming next to Brazil. Tropical forests with woods ranging from the 'iron tree' to the light palo de halsa await exploitation. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation. In 1929 it was estimated that there were 1,854,415 cattle, 5,552,074 sheep, 747,581 goats, 1,882,000 llamas and alpacas, 335,580 pigs, and 375,738 equines.

Mining is practically the only important industry, and Oruro is its centre. The mineral wealth of Bolivia includes tin, silver, copper, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world standing next to the Malay Peninsula in the production of this metal. Practically all the tin ore is shipped to Great Britain, where it is reduced to tin in pigs and reshipped to the United States, which is the ultimate consumer of the bulk of Bolivian tin. Under the International Tin Restriction scheme, Bolivia, June 1, 1932, accepted a quota of 14,687 tons per annum for 1932 and 1933. Production of minerals in 1931 was, in metric tons: Tin (metal equivalent), 31,637; silver, 179; lead, 6,669; copper, 2,048; zinc, 14,670; antimony (metal equivalent), 1,348; bismuth, 26; wolfram, 246. Output of gold, 1931, was 26 ounces. Bismuth is mined in La Paz and Potosí by an international company which adjusts production to market demand. Next to China, Bolivia is the world's chief source of antimony. Large deposits of common salt are found near Lake Poopó and in the south of Bolivia. Surface indications of petroleum and gas abound in the whole territory between the Argentine frontier and

the north-west territory bordering Peru, the Standard Oil Company with 16 wells is developing production at Chaco Oriental

Commerce.

The value of imports and exports for five years are given as follows (13 33 bolivianos = 1 £) at par —

—	1927	1928	1929	1930	1931
	Bolivianos	Bolivianos	Bolivianos	Bolivianos	Bolivianos
Imports	66,104,672	62,699,055	71,417,278	56,829,898	29,821,010
Exports	127,083,926	115,500,853	160,617,974	107,305,247	60,618,624

Tin ore has usually constituted in value about 90 per cent of Bolivia's exports since 1920, but in 1931, owing to the continued decline in prices, export of tin (48,886,220 bolivianos) constituted only 79 per cent of the value of total exports. Other principal exports in 1931 were silver, 3,736,427 bolivianos, copper, 924,342 bolivianos, lead, 836,337 bolivianos, tungsten (or wolfram), 169,898 bolivianos, antimony, 379,616 bolivianos, bismuth, 111,508 bolivianos, and zinc, 2,312,205 bolivianos. In 1931 the United States furnished 25·2 per cent of imports, Great Britain, 16·4 per cent, and Germany, 17·0 per cent, of exports, Great Britain took 82·1 per cent, and the United States, 5·0 per cent.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and river ports on the Paraguay, Iténez, Madeira, and the Upper Acre rivers. The chief imports are sugar, flour, coal, iron and steel products, mining machinery, rice, wines and spirits, textiles, and ready-made clothes.

Total trade between U K and Bolivia (Board of Trade figures) for 5 years —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Bolivia to U K	7,245,999	5,989,084	5,391,748	2,278,771	1,879,573
Exports to Bolivia from U K	497,981	673,949	346,813	170,118	194,218
Re exports to Bolivia from U K	14,346	15,066	17,972	20,610	10,448

Communications.

The total length of railway open in Bolivia is about 1,384 miles, including the new line, opened in July, 1917, from Oruro to Cochabamba, 175 miles are under construction from Cochabamba to Santa-Cruz. The principal line is the Antofagasta and Bolivian Railway. Total length in Bolivia, 575 miles. Under the Bolivian-Chilian treaty of October 24, 1904, the Arica-La Paz line (276 miles, of which 151 miles are in Bolivia) was built from La Paz via Lluta with Taregra and to Corocoro.

The Lloyd Aero Boliviano, under the supervision of the War Ministry, has established a number of routes since 1927, principal one is from Cochabamba to Santa-Cruz.

Traffic on Lake Titicaca is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in three systems, are open to navigation by light draught vessels.

There are about 6,843 miles of cart roads connecting the more important towns. Of main highways there were (1929) 1,789 miles passable throughout

the year and 1,107 passable during the dry season; 1,264 miles were under construction

In Bolivia there were, in 1929, 454 post offices. Number of pieces of mail handled, domestic, 2,251,500, foreign, 2,505,695 pieces

There are (1930) about 5,527 miles of telegraph lines. Number of telegrams dispatched, 1929, 855,876 received, 944,468. There are 318 telegraph, telephone and wireless offices. The Bolivian Power Co was given in 1928 a concession to build and operate a countrywide telephone system, an exchange was opened in Oruro in 1930

Banking, Money, Weights, and Measures

On July 1, 1929, on the recommendation of the Kemmerer Mission, the Banco Central de Bolivia was inaugurated at La Paz, taking over the assets of the Banco de la Nación Boliviana. It acts as a central bank of issue. On August 31, 1932, the bank's reserves were 26,118,000 bolivianos (legal reserve, 24,500,000 bolivianos), note circulation, 32,596,000 bolivianos, deposits, 14,287,000 bolivianos

On July 11, 1928, the gold exchange standard was adopted for the currency; which went into effect by presidential decree on notes of the Banco Central de Bolivia (which has a monopoly of the note issue) were convertible on demand into gold or gold exchange. The unit of account is the gold boliviano containing 0.54917 grams of fine gold and equal in U.S. money to 36.5 cents. But on September 25, 1931, gold payments were suspended, and in 1932 the boliviano fell to 10.3 cents, U.S. The law provides for the minting of coins of ten and twenty bolivianos, the former to be called a 'Bolivar' and the latter a 'Double Bolivar,' the 'Bolivar' to weigh 6.10189 grams of 900 fine. There is no Bolivian gold yet in circulation. Gold is legal tender up to any amount, and silver up to 10 bolivianos. Silver coins are minted in denominations of 1 boliviano (15 grams 800 fine), one half, and one fifth bolivianos. But paper notes in denominations of 1, 5, 10, 20, 50 and 100 bolivianos are the chief circulating medium.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

Diplomatic and Consular Representatives.

1 OF BOLIVIA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary—Carlos Victor Aramayo (appointed March 25, 1926).

First Secretary—Mamerto Urriolagoitia.

Financial Counsellor—Carlos Navarro

Military Attaché—Lt-Col Meliton Brito

Consul-General (in London)—Mamerto Urriolagoitia

2 OF GREAT BRITAIN IN BOLIVIA.

Minister and Consul-General.—R. L. Nosworthy (appointed August 4 1931)

Second Secretary and Vice-Consul—G. E. Vaughan

There are Consular representatives at Oruro, Sucre, Potosi, and Cochabamba.

Statistical and other Books of Reference concerning Bolivia.

BRAZIL.

(ESTADOS UNIDOS DO BRASIL)

Constitution and Government.

BRAZIL was discovered on May 3, 1500, by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement, in 1815 the colony was declared 'a kingdom,' and on May 13, 1822, Dom Pedro, eldest surviving son of King João VI of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor

and Perpetual Defender' on October 12, 1822. On November 15, 1889, his only son, Dom Pedro II (born 1825, died 1891), was dethroned by a revolution, and Brazil declared a Republic under the title of the United States of Brazil.

The following is a list of Presidents since the establishment of the Republic:—

Marshal Deodoro da Fonseca, Nov 15, 1889—Nov 23, 1891 ¹	Marshal Hermes da Fonseca, Nov 15, 1910—Nov 15, 1914
Marshal Floriano Peixoto (Acting), Nov 23, 1891—Nov 15, 1894	Dr Wenceslâs Braz, Nov 15, 1914—Nov 15, 1918
Sen'or Prudente de Moraes Barros, Nov 15, 1894—Nov 15, 1902	Dr Francisco de Paula Rodrigues Alves ²
Dr Manuel Ferraz de Campos Salles, Nov 15, 1894—Nov 15, 1902	Dr Deiphim Moreira (Acting), Nov 15, 1918—July 28, 1919
Dr Francisco de Paula Rodrigues Alves, Nov 15, 1902—Nov 15, 1906	Dr Epitacio da Silva Pessoa, July 28, 1919—Nov 15, 1922
Dr Affonso Penna, Nov 15, 1906—June 14, 1909 ³	Dr Arthur Bernardes, Nov 15, 1922—Nov 15, 1926
Dr Nilo Peçanha (Acting), June 14, 1909—Nov 15, 1910	Dr Washington Luiz Pereira de Souza, Nov 15, 1926—Oct. 25, 1930 ⁴

¹ Resigned.

² Died

³ Owing to illness did not take office—Nov 15, 1918, died Jan 16, 1919

⁴ Deposed

The existing constitution, adopted in 1891 and modified in 1926, was reaffirmed by the Military Junta, which took over control in October, 1930. A committee to draft a new constitution began its labours November 10, 1932. According to the old constitution, the United States of Brazil consists of twenty States, the Federal Territory of the Acre, and one Federal District. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence, for the maintenance of order, for the reorganization of the State finances when payments on its funded debt are suspended for more than two years, and for the execution of the Federal laws and judgments. Control of import duties, stamps, rates of postage, and bank note circulation belongs to the Union, but export duties as well as taxation on real property, professions and industries, are the property of the various States.

The National Congress, which consists of the Chamber of Deputies and the Senate, meets usually on the 3rd of May at Rio de Janeiro (the Federal capital) and sits four months, but may be prorogued or convoked extraordinarily. Deputies and Senators are paid, and cannot become Ministers of State without resigning their seats in Congress. The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority). No State has less than four representatives. The Chamber initiates legislation relating to taxation, to fixing the strength of land and sea forces, and in proceedings against the President of the Republic and Secretaries of State. Senators, 68 in number, are chosen by direct vote, three for each State, and for the Federal district, for nine years, one third being elected every three years. The Vice President is President of the Senate.

The President of the Republic must be a Brazilian by birth, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. He and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period. No candidate may be related by blood or marriage, in the first or second degree, to the actual President or Vice-President, or to one who has ceased to be so within six months.

The President appoints and dismisses ministers, is in supreme command of the army and navy, and, with the authorization of the National Congress, when recourse to arbitration has failed, has the power to declare war and make peace. He (with the consent of the Senate) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with committees of the Chambers.

The franchise, under a decree of February 24, 1932, extends to all citizens, both men and women, not under twenty-one years of age, duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience. Citizens who are eligible but do not register can not hold office or be employed in the Government service. Voting is secret.

President of the Republic — Dr Getulio Vargas. Assumed office November 3, 1930, after a military uprising in various states and the capital had forced the resignation of President Washington Luis Pereira de Souza and prevented the installation of Dr Julio Prestes, elected March, 1930. A general election has been proclaimed for May 3, 1933, at which, it is announced, secret balloting, woman suffrage and proportional representation will be utilized.

There are 7 Secretaries of State at the head of the following Departments — 1 Finance, 2 Justice and Interior, 3 War, 4 Marine, 5 Foreign Affairs, 6 Communications and Public Works, 7 Agriculture. In addition President Vargas established ministries of 8 Labour, Industry, and Commerce, and 9 Instruction and Public Health.

I LOCAL GOVERNMENT

Each State is organised under the republican form of government, with administrative, legislative, and judicial authorities distinct and independent. Each State is governed by its own Constitution and laws which must agree with the constitutional principles of the Union, if they infringe the latter, the Federal Government, after due process of Federal law, has the power to interfere even by force of arms, if necessary. Taxes on inter-state commerce, levied by individual States, which previously flourished, were, by a decree of the Provisional Government in 1932 ordered to be gradually extinguished, finally ceasing January 1, 1938. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a Prefect appointed by the President of the Republic.

Area and Population.

Following are the census returns of 1920 and estimate for December 31, 1929 (capitals of States in brackets) —

States	Area sq miles	Population		
		1920 (Census)	Per sq mile 1920	1929 (Estimated)
Alagoas (Maceió)	22,577	978,748	43.3	1,189,214
Amazonas (Manáos)	731,863	363,166	0.5	433,777
Bahia (São Salvador)	164,601	3,334,465	20.2	4,135,894

States	Area sq miles	Population		
		1920 (Census)	Per sq mile 1920	1929 (Estimated)
Ceará (Fortaleza)	40,241	1,319,228	32 7	1,626,025
Espírito Santo (Victoria)	17,308	457,328	26 0	661,416
Goyaz (Goyaz)	288,462	511,919	1 9	712,210
Maranhão (S Luiz)	177,515	874,337	4 9	1,140,635

São Paulo (S Paulo)	112,278	4,592,188	40 9	6,392,190
Sergipe (Aracajú)	15,089	477,064	31 6	547,965
Federal District (Rio de Janeiro)	431	1,157,873	2,686 4	1,468,621
Acre Territory	58,672	92,379	1 6	113,725
Total	3,275,510	30,635,605	9 3	40,272,650 ¹

¹ Total estimated, January 1, 1931, 41,477,827

In 1920 the population consisted of 15,443,818 males and 15,191,781 females. Of these 1,565,961, or 5 per cent, were foreigners, viz, 558,401 Italians, 433,575 Portuguese, 219,142 Spaniards, 52,870 Germans, 50,251 from Asiatic Turkey, 33,621 Uruguayans, 27,976 Japanese, 26,354 Austrians, 22,117 Argentinians, and 141,650 other nationalities. Some 100,000 Indians are to be found in the Amazon area. The language is Portuguese, though Italian and German are widely used in the Southern States.

In 1930 the estimated population of Rio de Janeiro was 1,468,621, São Paulo, 879,788, S Salvador, 329,898, Recife, 340,543, Belém, 279,491, Curitiba, 100,135, Porto Alegre, 273,376, Manaus, 83,736, Niotheroy 108,233, Bello Horizonte, 108,849, Fortaleza, 98,848, Maceió, 103,980, São Luiz, 62,895, Parahyba, 74,104.

The number of immigrants between 1820 and 1930 was 4,518,558 including 1,480,000 Italians, 1,288,000 Portuguese, 574,000 Spaniards, 198,000 Germans, 110,000 Russians and 89,000 Austrians. In 1931 the number of immigrants was 31,410, including 8,152 Portuguese, 5,631 Japanese, 2,914 Italians, 1,315 Poles, and 2,621 Germans.

--

Religion.

The population is overwhelmingly Roman Catholic, but in 1889 connection between Church and State was abolished, and absolute equality declared.

among all forms of religion. The Government left to the Church all religious buildings and their properties and income, religious orders are allowed and are prosperous. They maintain 6 seminaries, there is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, and there are besides 14 archbishops, 44 suffragan bishops, 7 prelates, and 3 apostolic prefects. There are 20 seminaries. There are eight leading Evangelic sects (and innumerable small ones), while Judaism, Buddhism, Mahometanism, Spiritualism, and Positivism have many followers. Evangelic sects maintain 10 seminaries.

Education

Education is free but not compulsory, except in some States (*e.g.* Ceara, Maranhão, Alagoas, Matto Grosso, Minas Geraes, S. Paulo, Santa Catharina). The Union Government undertakes to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations, while primary schools are chiefly maintained and supervised, either by the States or by the municipalities and private initiative. There is one official university in Brazil, the University of Rio de Janeiro (Federal District), founded on September 7, 1920, and two private universities, at Bello Horizonte (Minas Geraes) and Curityba (Parana), there are moreover 56 faculties which confer degrees. At the Capital are maintained by the Federal Government a school for the blind, another for deaf and dumb, a School of Fine Arts, and a National Institute of Music, there being similar private institutions in the Federal District and some States. There are seven engineering and mining polytechnics at Rio de Janeiro (University), S. Paulo, Rio Grande do Sul, Bahia, Minas Geraes, and Pernambuco, 19 schools of medicine, pharmacy and dentistry, 12 schools of law and social sciences, and 97 industrial schools, 41 agricultural, and 48 commercial schools. The Oswaldo Cruz Institute, in Rio de Janeiro, is devoted to experimental medicine, and the Butantan Institute, in S. Paulo, to the preparation of anti-ophidic serum.

There were in January, 1931, 3,973 boys' schools, 2,167 girls' schools and 29,295 co educational schools (total 35,435) of which 426 were Federal, 17,965 State, 6,655 municipal, and 10,389 were private, these were divided into 33,049 primary schools, 1,145 high schools, 87 colleges, 211 teachers' colleges, and 943 special schools. Teachers numbered 73,555, total enrolment, 2,284,883.

Justice.

There is a supreme Federal court of Justice at Rio de Janeiro, which celebrated its centenary on January 20, 1929. There are also Regional Tribunals in each State as well as in the Federal District and the Territory of Acre. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount. Capital punishment has been abolished. There is no divorce.

Finance.

Receipts and expenditures in recent years have been as follows (1 gold milreis = 4 567 paper milreis = at par about 6d sterling = 12 cents. U S) —

—	Revenue		Expenditure	
	(Gold) Milreis	(Paper) Milreis	(Gold) Milreis	(Paper) Milreis
1928 ¹	198,869 000	1,808,325,000	125,401,846	1,349,458,397
1929 ¹	190,386,000	1 530,109,000	129,043,156	1,442 054,444
1930	120,933,000	1,074 746,000	127,123,000	1 820,685,000
1931	79 785,057	1,130 980 262	89,742,545	1,385,078,728
1932 ²	109 586,000	1,392,751,000	34,406,900	1,894,285,000
1933 ²	87,756,000	1,502,675,000	34,264 855	1,861,975,003

¹ A commission of auditors appointed by the Provisional Government to examine the accounts for the 3 years 1927 to 1929, reported that instead of the aggregate surplus shown, there was actually a deficit of 491,169 contos paper

² Budget estimate.

The consolidated Federal foreign debt of Brazil on December 31, 1931, amounted to 97,136,746l (British), 325,171,000 francs, and 144,615,500 dollars (United States). Inability to secure sufficient foreign exchange for service on this foreign debt forced Brazil in October, 1931, to tender 5 per cent scrip as interest payments on all but three of her foreign loans. External debt of the States on December 31, 1931, was 49,513,000l, 223 592,000 dollars (U S), 282 113,600 francs and 8,900,000 florins, of municipalities, 12,566,875l, 67,673,000 dollars (U S) and 50,879,000 francs. Internal funded debt, December 31, 1931, was 2,589,709 contos paper, in addition, inconvertible Treasury notes in circulation November 30, 1932 totalled 3,006,368 contos paper.

Defence.

Army—Under the military law of 1923 military service is obligatory on every Brazilian from 21 years of age to 44. The terms of service are 9 years (from the 21st to the 30th years of age) in the army 'first line' (1 in the ranks, the rest in the reserve), and 14 years (from the 30th to the 44th years of age) in the army 'second line' (7 in the 'second line' and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The total peace strength for 1931 was 4,214 officers and 42,818 men, organized in 4 divisions, 3 cavalry divisions, 1 mixed brigade, and 1 coast defence district.

Mobilisation would yield about 120,000. The military police under the War Office number 85,450, capable of expansion to 180,000. Infantry are armed with the Mauser rifle, the field and horse artillery with 75 mm. guns.

Navy —The principal ships of the Brazilian navy are as follows —

Laid down	Name	Displacement	Armour		Principal Armament	Torpedo Tubes	H P	Nominal speed
			Belt	Gun				
1907	BATTLESHIPS (Minas Geraes (Sao Paulo)	19,281	9	9	{ 12 12 in , 22 4 7 in , 2 3 in A A }	—	23,500	21
1907	PROTECTED CRUISERS (Bahia Rio Grande do Sul	3,150	—	—	10 4 7 in , 4 3 in A A	4	22,000	27
1898	COAST DEFENCE VESSEL Florianopolis	3,200	14	8	2 9 4 in , 4 4 7 in	—	3,400	15

There is 1 river monitor (*Pernambuco*), 2 river gunboats, 11 destroyers, 4 submarines (of which only one is of an ocean-going type), and a submarine depot and salvage vessel. The cruisers *Bahia* and *Rio Grande do Sul* were refitted in 1925-26, new engines and oil fired boilers being installed.

There are three naval arsenals—at the Ilha das Cobras (Rio de Janeiro), Para, and Ladario de Matto Grosso (this latter a river arsenal).

Rio de Janeiro (Federal District) is the seat of the military college, the general staff school, the military school, the veterinary school, the school of aviation, the improvement school for officers, the naval school of war, and the professional schools of the navy. In the State of Rio de Janeiro is the naval school.

Production and Industry.

Brazil is an agricultural country, though only a small fraction of its soil has been brought under culture, and she is a heavy importer of wheat and flour. The cultivated area covers about 17,387,000 acres, of which 4,133,000 acres are in coffee, 6,919,000 in maize, 1,500,000 in cotton, and 1,315,000 in rice. Brazil ranks first in the production of coffee, second in the production of cocoa, and third in that of sugar and tobacco. Coffee, the chief product cultivated, accounts annually for from 60 to 75 per cent. of Brazil's total exports. The four States of São Paulo, Rio de Janeiro, Espírito Santo, and Minas Geraes are the principal districts for coffee growing. Brazil, with 2,924,739,376 coffee trees, has two thirds of the world total and three fourths of the coffee. Sales are now controlled by the National Coffee Council, under Government supervision. The average annual crop of Brazil in the past has been about 13 million bags (1 bag = 132 pounds); exports, 1931-32, 14,618,000 bags, 1930-31, 16,396,600 bags. Exports of orange are growing,—in 1931, 2,054,302 boxes of which Great Britain took 84 per cent.

Indiarubber is another great natural product of the country, the principal rubber growing districts being the Acre Territory and the States of Amazonas and Pará. The best rubber to be found on the world's markets, the '*fine hard Pará*,' comes from Pará, but production has declined.

The chief crops, with production and value for 1931-32 were —

Crops	Amount	Value	Crops	Amount	Value
	(Metric tons)	Contos of reis		(Metric tons)	Contos of reis
Coffee	1,561,604	1,405,444	Maté	167,900	92,845
Maize	5,083,853	1,372,640	Potatoes	494,566	98,913
Sugar	986,988	468,469	Wheat	135,517	54,218
Rice	1,048,076	586,922	Cocoa	91,623	69,633
Tobacco	84,982	212,455	Rubber	17,294	19,028
Mandioc	762,710	244,074	Brazil nuts	23,840	21,470
Beans	674,428	236,050	Wine (gallons)	31,915 3/4	99,950
Cotton	119,802	176,706	Bananas (bunches)	53,907,592	107,815

The census of cattle for 1931 showed that there were in Brazil 42,589,000 cattle, 22,098,812 swine, 10,661,000 sheep, 5,231,000 goats, 6,827,550 horses, 2,745,000 asses and mules.

Both the forests and mines of Brazil are important. Total exports of timber 1931, 101,697 metric tons. Manganese ores, found in Minas Geraes, are the principal mineral export, exports in 1931, chiefly to the United States, were 95,550 metric tons. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Parana, and São Paulo. Total reserves are estimated at about 5,000 million tons, and the annual output, from 7 mines, about 370,000 tons. Iron is found chiefly in Minas Geraes. At Itabira foreign capital is now opening up what is believed to be one of the richest iron ore deposits in the world. Gold is found in practically every State, though large scale mining is confined to a single mine in Minas Geraes, the production in 1930 was 96,750 ozs. Export of gold has been forbidden since 1918, the output is used to guarantee the inconvertible Treasury and Bank notes. Diamond districts are Diamantina, Grão Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. A great part of the world's supply of monazite comes from Brazil, chiefly from Bahia and Espirito Santo.

The most important manufacturing industry in Brazil is cotton weaving (largely in São Paulo and Minas Geraes). There were in 1929, 347 cotton factories with 2,620,471 spindles and 78,910 looms. There are also 13 silk mills, 35 woollen mills, 18 jute mills, 18 paper mills (output, about 70,000 metric tons annually), over 2,000 tobacco factories, and approximately 216 sugar factories. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics and the United States. There are 15 packing houses. There are about 500 hydro-electric plants, with a combined capacity of 700,000 horse power.

Commerce.

Imports and exports (excluding specie) for 5 years (Brazilian official values 1 conto of reis = 25¢ at par) —

	1928	1929	1930	1931	1932

Shipping and Navigation.

Inland waterways, mostly rivers, are open to navigation over some 40,300 miles. By means of its waterways Brazil is connected with the neighbouring States. All coasting and river vessels must be Brazilian. Merchant shipping under Brazilian flag in 1932 included 13 sailing vessels of 4,483 tons, and 296 steam vessels of 491,647 gross tons. Rio de Janeiro and Santos are the two leading ports.

Internal Communications.

Railway history in Brazil begins in 1854 with 89 miles. On December 31, 1931, the total length of railways 22,279 miles, with 3,895 locomotives, 45,078 freight waggons and 3,888 passenger cars. Of this total 13,153 miles were the property of the Union, 3,319 were operated under Federal concessions, 1,558 miles belonged to the States, and 4,219 miles were privately owned. The Central Brazil Railway (2,082 miles) is the principal railway in Brazil, and is owned by the State, and joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay. The Paulista railway is electrified from Jundiahy to Rincao (177 miles-), and the Oeste de Minas railway from Barra Mansa to Augusto Pestana, a length of 44 miles. The total length of highways in 1932, was 90,644 miles, of which 20 per cent were first class roads. Motor cars, 1932, totalled 224,820.

Of the telegraph system of the country about half, including all inter-State lines, is under control of the Government. There are 75,000 miles of line, including 46,291 miles of Government property, 7,516 miles of railway property and 21,196 miles of submarine cable. In 1928 there were 5,115 telegraph offices. Three submarine cables connect Brazil with Europe, 2 with the United States, and 3 with the River Plate. All-America Cables operates land lines between Sao Paulo and Santos and submarine cable from Rio de Janeiro and Santos linking those points with all Latin America and the United States. Telephone service in the State of Rio Grande do Sul as well as point-to-point radio telegraph service between the cities of Rio de Janeiro, Porto Alegre, Sao Paulo, Florianopolis and Curitiba are furnished by the Companhia Telefonica Rio Grandense.

About 40 wireless stations, including one very powerful one, have been established, there are 485 wireless land stations. Radio telephonic communications with the United States was opened in December, 1931.

Brazilian Post office, with 4,870 offices, during 1931 handled 1,506,259,574 letters and post cards, air mails handled 3,324,884 pieces of mail.

Since 1927 several companies, especially the *Compagnie Generale Aero-postale*, the *Kondor Syndicate* and the *Pan American Airways*, furnish air-mail and passenger services; in 1931 66 planes were in service.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

Money, Credit, and Banking.

A law, passed December 18, 1926, set up a new unit of account called the *cruzeiro*, a gold coin to contain 2 grammes of gold 900 fine. Gold coins of 2, 5 and 10 *cruzeiro* will eventually be minted, along with subsidiary token coinage. In the meantime the unit is the *milreis* (1,000 reis) which was stabilized at that time as follows: 1 gold *milreis* = 4 567 paper *milreis* = 5½*d* (sterling at par) = 11 96 cents (U.S.). But in its 1931 finances, the Government reckoned 1 gold *milreis* = 6 75 paper *milreis* = 4*d* sterling. To convert gold *milreis* into paper, multiply by 6 75. The exchange value of the gold *milreis* in London in 1932 ranged between 5½*d* and 3½*d*, in New York between 7 50 cents and 6 00 cents. The currency in use is chiefly paper, of the following denominations: 1, 2, 5, 10, 20, 50, 100, 200, 500 and 1,000 *milreis*. The last named is always called '1 conto of reis'.

A law of April, 1927, placed the volume of currency under control of the *Caixa de Estabilizacão*, but the Provisional Government on November 22, 1930, abolished the bureau and transferred its functions, with certain restrictions, to the Bank of Brazil.

Total paper currency in circulation, December 31, 1930, had been reduced to 2,713,600,000 *milreis* (about 56,500,000*l*), but its convertibility into gold had been suspended by the decree of November 22, 1930, which transferred the entire gold reserve abroad to protect the foreign exchange value of the *milreis*.

The Bank of Brazil with an authorised capital of 70,000 contos of reis (increased in June, 1921, to 100,000 contos of reis) has 83 branches throughout the Republic. Its reserves, December 31, 1931, stood at 211,457 contos, current accounts, 1,657,308 contos, collateral loans, 2,716,952 contos, cash on hand, 278,839 contos, notes in circulation, 170,000 contos.

Commercial banks on June 30, 1932, had cash on hand of 1,038,738 contos out of total resources and liabilities of 26,846,232 contos.

Weights and Measures.

The metric system has been in use in all official departments since 1862. It was made compulsory in 1872, but the ancient measures are still partly employed in certain rural districts of the interior. They are —

The <i>Libra</i>	=	1 012 lbs. avoirdupois.
„ <i>Arroba</i>	=	82 38 „ „
„ <i>Quintal</i>	=	129 54 „ „
„ <i>Alqueire</i> (of Rio)	=	1 imperial bushel, or 40 litres.
„ <i>Oitava</i>	=	55 34 grains.

Diplomatic and Consular Representatives.

1 OF BRAZIL IN GREAT BRITAIN

Ambassador Extraordinary and Plenipotentiary —Dr Raul Régis de Oliveira, G B E (appointed December 13, 1924)

Counsellor —Carlos Taylor

Secretary —Deico H de Moura, O B E

Consul-General in London —A de Maya Monteiro

There are Consul Generals also at Liverpool and Southampton, Consuls at Manchester, Cardiff, Swansea, and Glasgow, and Consular representatives at Belfast, and Dublin

2 OF GREAT BRITAIN IN BRAZIL

Ambassador Extraordinary and Plenipotentiary —Sir William Seeds, K C M G, appointed April 11, 1930

Third Secretary —A N Noble

Commercial Secretaries —E Murray Harvey, O B E, M C and J G. Lomax, M B E, M C

Naval Attaché —Captain F de F Renouf, C V O, R N

Military Attaché —Major L H G Andrews

Air Attaché —Wing Commander R B Maycock, O B E

There are Consular representatives at Rio de Janeiro (C G), Bahia, Pará, Pernambuco, Rio Grande do Sul, São Paulo, Santos, Ceara, Maceió, Maranhão, Porto Alegre, Manáos, Morro Velho, Ilheos, and other towns

BULGARIA.

(BLGARIYA)

Reigning King (Tsar)

Boris III, eldest son of Ferdinand of Saxe Coburg and Gotha, and of the late Marie Louise (died January 31, 1899), eldest daughter of Robert the last reigning Duke of Parma, born January 30, 1894, succeeded to the throne on the abdication of his father, October 3, 1918, married October 25, 1930, to Princess *Giorgianna* of Savoy, daughter of King Victor Emanuel III of Italy

Offspring — Princess *Marie Louise*, born January 13, 1933

Brother and Sisters of the King — (1) Prince *Cyril*, born November 17, 1895, (2) Princess *Eudoxia*, born January 17, 1898, and (3) Princess *Nadajda*, born January 30, 1899, m. January 24, 1924, to Duke Albert Eugène of Württemberg

According to the Constitution the Sovereign and the heir to the throne

must profess the Orthodox religion, and must reside permanently in the country. The royal title is hereditary.

The civil list is fixed (1933) at 5,000,000 leva, besides 26,170,000 leva for the maintenance of palaces, &c

Constitution and Government.

The Principality of Bulgaria was created by the Treaty of Berlin, signed July 13, 1878. On October 5, 1908, Bulgaria declared her independence, and the Powers recognised Bulgarian independence, and the title of 'King of the Bulgarians' assumed by Prince Ferdinand. On September 18, 1885, the province of Eastern Rumelia was united with Bulgaria.

On September 30, 1912, Bulgaria allied with Serbia, Greece and Montenegro commenced war on Turkey (First Balkan War), which was ended by the Treaty of London on May 30, 1913, by which Turkey ceded to the Allies all its European territory west of a line drawn from Midia on the Black Sea to Enos on the Aegean, and also Crete. Crete was eventually ceded to Greece.

The Balkan League broke up almost immediately after the signing of the Treaty of London, owing to disagreements among the allies as to the division of the territory ceded to them, and on June 29, 1913, war broke out among the allies (Second Balkan War). On July 10, 1913, Rumania intervened to impose peace on the allies and to exact for herself from Bulgaria an extension of her frontier. Peace came finally on August 10 (July 26 old style), 1913, by the Treaty of Bukarest, between Bulgaria on the one hand, and Rumania, Serbia, Greece and Montenegro on the other.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the *Sobranie* or National Assembly, composed of 227 members. The members are elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. On April 13, 1927, the *Sobranie* agreed to adopt the principle of proportional representation. Every member receives 400 levas a day (including Sundays and holidays) during the session. All over 30 years of age who can read and write (except the clergy, soldiers on active service, persons deprived of civil rights, &c) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the King, when new elections must take place within two months. Laws passed by the *Sobranie* require the assent of the King. Questions concerning the acquisition or cession of territory, changes in the constitution, a vacancy on the throne, or the appointment of a regent have to be decided by a Grand *Sobranie*, elected for the special purpose in a manner similar to that in which the ordinary *Sobranie* is elected, but with double the number of members.

Parties in the *Sobranie* (elected June 21, 1931) — *Liaptchef* Coalition, 79; National Bloc, consisting of Agrarians, 74, non Radoslavist Liberals, 29, Democrats, 41, Radicals, 7 (total 151), Social Democrats, 5, Communists, 31, Macedonian group, 8. Total, 274.

The executive power is vested in a Council of Ministers nominated by the King. The cabinet (appointed October 12, 1931 and reorganized December 31, 1932) is composed as follows —

Premier and Minister for Foreign Affairs.—Nicholas Moushanoff (Democrat)

Minister of Interior.—Dr Alexander Ghurghinoff (Democrat)

Minister of Education.—M. Boyayeff (Liberal)

Minister of Justice.—M. Katchakoff (Liberal).

Minister of Commerce.—Dimitri Ghitcheff (Agrarian)

Minister of Finance — *Stephan Stephanoff* (Democrat)

Minister of Public Works — *Verghil Dimoff* (Agrarian)

Minister of Posts and Railways — *Stoyan Kostuorkoff* (Radical)

Minister of Agriculture — *Constantine Mouravieff* (Agrarian)

For local administration the country is divided into a number of Departments, each under a Prefect assisted by a Departmental Council and aided by several sub-prefects. Each community has its Kmet or mayor and its Council.

Area and Population

The area of Bulgaria is 103,146 square kilometres, or 39,814 English square miles, and the census population on December 31, 1926, was 5,478,741 (2,743,025 males and 2,735,716 females), as against 4,846,971 (2,420,784 males and 2,426,187 females) in the census of 1920. Population on June 30, 1931, was estimated at 6,006,000 (3,013,000 males and 2,993,000 females), 20.6 per cent of the population was urban and 79.4 per cent rural.

By the Peace Treaty of Neuilly, signed on November 27, 1919, Bulgaria ceded Thrace to the Allied and Associated Powers and the Strumnitza line and a strip of territory on the north west frontier to Serbia. Bulgaria was deprived of its Aegean littoral, but an efficient economic outlet to the same sea was promised to her by the Treaty, but has not yet been put into effect.

Population of districts, according to census of December 31, 1926 —

District	Area in sq miles	Population	Per sq mile	District	Area in sq miles	Population	Per sq mile
Burgaz	5,257	484,759	99.2	Shumen	2,313	359,485	155.5
Haskovo	1,916	245,834	128.1	Sofia	3,567	641,135	179.7
Kustendil	1,532	243,493	158.9	Stara Zagora	2,561	326,285	127.4
Mastanly	1,523	183,328	120.7	Turnovo	3,010	503,251	168.0
Pashmakly	1,067	68,860	64.5	Varna	1,472	230,121	156.6
Petritch	2,624	186,040	70.9	Vidin	1,635	276,904	169.4
Pleven	2,948	431,804	146.4	Vratza	2,661	392,753	147.8
Plovdiv	3,823	561,021	146.7				
Ruse	1,903	341,648	179.4	Total	39,814	5,478,741	137.7

According to the census of 1926, there were 4,455,355 Bulgarians, or 81.32 per cent of the total population, and 128,747 belonging to other Slav races. Of non Slav races, Turks numbered 577,552, or 10.54 per cent.

The capital is the city of Sofia, with a population (census, 1926) of 213,002. The other principal towns, with population in 1926, are Philippopolis (Plovdiv), 84,655, Varna, 60,563, Ruschuk (Ruse), 45,788, Slivno (Sliven), 29,263, Plevna (Pléven), 28,775, Stara Zagora, 28,957, Shumen, 25,187, Burgaz, 31,157, Jambol, 23,037, Haskovo, 26,256, Pazarjik, 21,578, Vidin, 18,507, Vratza, 15,672, Kustendil, 15,440.

The movement of population in four years has been:—

Years	Marriages	Living Births	Still births	Deaths	Surplus of Births
1928	55,987	185,189	1,214	91,713	+ 86,476
1929	55,652	178,417	1,282	102,655	+ 70,764
1930	54,483	179,973	1,451	92,771	+ 87,302
1931 ¹	55,555	170,950	1,387	98,192	+ 72,758

¹ Preliminary figures

Religion and Education

The national faith is that of the Orthodox Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox Communion. The Church is governed by the Synod of Archbishops. There are 11 Dioceses, viz, Sofia, Plovdiv, Stara Zagora, Shiven, Varna, Ruse, Tirmovo, Vratza, Lovetch, Vidin and Nevrokop, in addition to 4 in Macedonia and 1 in Thrace (suspended at present). In addition to the Archbishops in charge of these dioceses there are Bishops of Bregalnitz, Dragovitz, Nichava, Velitza, Vranitza and Znepolye. The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c. There were, according to the last census of 1926, 4,568,773 members of the Orthodox Church of Bulgaria, 789,296 Moslems and 40,347 Catholics, 6,735 Protestants, 46,431 Jews, 25,402 Armenian-Gregorians, and 1,757 others.

Elementary education is obligatory and free for children between the ages of 7 and 14. The census of 1926 showed that 26.53 per cent of the male population and 53.60 per cent of the female population were illiterate.

The following are the educational statistics of Bulgaria for 1930-31 —

Schools	Number	Teachers			Attendance		
		Male	Female	Total	Male	Female	Total

Justice.

The lowest Court is that of the Justices of the Peace, who possess jurisdiction in minor civil and criminal cases. The Departmental Court, or Court of First Instance, is competent to pronounce sentence of death and penal servitude, and also acts as a Court of Appeal. Above these are three Courts of Appeal, sitting at Sofia, Plovdiv and Ruse. The highest tribunal is the Court of Cassation, sitting at Sofia, and composed of 12 judges.

Finance.

The revenue and expenditure of Bulgaria for 5 years were as follows (in thousands of leva) —

—	1928-29 ¹	1929-30 ^{1, 4}	1930-31 ⁴	1931-32 ⁴	1932-33 ⁴
Revenue	7,174,268	6,712,729	5,597,403	5,870,243	6,000,000
Expenditure	6,493,845	6,768,890	6,875,408	6,694,779	5,998,063

Total	6,000,000	Total	5,998,063

On June 30, 1932, the total debt of Bulgaria was given as follows: Foreign debt consolidated, 567,865,065 gold francs, 258,152,145 French francs, 4,157,560² sterling, 17,107,500 dollars, 3,618,250 paper roubles, total equivalent to 20,393,816,296 leva, non consolidated, 10,500,000 French francs, 2,829² sterling, 3,403,308 dollars, 35,200 R M., 471,473 gold Italian liras, 55,000,000 lei, total equivalent to 591,599,312 leva, or a grand total of consolidated and non consolidated foreign debt of 20,985,415,608 leva. Internal debt 6,286,870,392 leva (consolidated, 2,528,241,300 leva, non consolidated, 3,758,629,092 leva).

Defence.

The pre-war peace strength of the Bulgarian army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

Under the terms of the Treaty of Neuilly of November 27, 1919, the total military forces of Bulgaria must not in the future exceed 20,000 men, enrolled by voluntary system. The strength in 1932 was 980 officers, 18,552 other ranks. The obligatory military service is abolished. All measures of mobilisation are prohibited and, in order to prevent the formation of a reserve, service in the ranks is to be for a minimum period of 12 years. Officers serving at the time when the treaty was signed must undertake to serve at least till the age of 40 and newly appointed officers serve for at least 20 years.

A frontier guard of 3,000 men voluntarily enlisted is permitted (strength in 1932, 2,915), and in addition the number of armed gendarmes, police, customs officials and forest guards must not exceed 10,000 (strength in 1932, 6,643).

The maximum authorised armaments and munition supplies are —

	Per 1000 men	Munitions per arm
Rifles or carbines	1,150	500 rounds
Machine guns	15	10,000
Trench mortars, light	2	1,000
„ „ heavy	2	500
Guns or howitzers	3	1,000

No military or naval aircraft is permitted.

The manufacture of arms, munitions and war material is only to be carried out at one factory under State control. The importation and exportation of arms and munitions are prohibited.

In 1931 the strength of the active army was 969 officers, 17,859 other ranks, organised in 8 infantry regiments each of 3 battalions, 3 cavalry regiments each of 4 squadrons, 8 artillery groups each of 3 batteries, 3 battalions of engineers and auxiliary services. The gendarmes numbered 336 officers and 6,132 other ranks, and the frontier guard 150 officers and 2,810 other ranks.

The military budget for 1931-32 amounted to 1,109,620,000 levas.

Under the terms of the treaty Bulgaria has surrendered all warships and submarines, but is permitted to maintain on the Danube and along the coast 4 torpedo boats and 6 motor boats, now of little value, all without torpedoes and torpedo apparatus, for police and fishery protection duties.

Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights.

According to the census of 1926, 80.02 per cent of the population (2,464,421) were engaged in agriculture, most of them being small proprietors holding from one to six acres. The methods of cultivation are primitive, but machinery is being gradually introduced.

The total area of Bulgaria is 10,814,617 hectares, or 25,786,550 acres, of this the cultivated area is 4,118,488 hectares, or 10,172,653 acres, and the forest area 2,825,472 hectares, or 7,178,916 acres (655,614 hectares belonging to the State, 1,571,937 hectares to the municipalities, and 597,921 hectares to others).

The area and yield of cereals for 2 years are given as follows —

Cereals	1931		1932 ¹	
	Area	Yield	Area	Yield
	Acres	Metric tons	Acres	Metric tons
Wheat	2,962,880	1,737,205	3,076,224	1,874,850
Rye	696,987	2,0,592	543,716	257,456

Maize	1,675,646	888,758	1,824,138	1,054,429
Total (including all others)	6,454,947	8,520,129	6,590,777	3,241,987

¹ Provisional

Fruit grows in abundance, especially in the neighbourhood of Kustendil. The area under vines was 216,285 acres in 1930, and the vintage about 34,206,148 gallons. Cotton in 1932 yielded 18,224 quintals, and in 1931, 10,639 quintals from 19,693 acres and 13,087 acres respectively. Sugar production in 1930 was 51,273 metric tons, the area under beet being 57,988 acres, production in 1931, 24,953 metric tons, 15,354 acres were under rose cultivation in 1931, producing 1,863 kilogs of essence, as against 16,467 acres and 1,862 kilogs in 1930. Tobacco area in 1932, 47,201 acres, yield, 14,158 metric tons, 1931 yield 24,850 metric tons from 76,535 acres. In 1929, the production of silkworm cocoons amounted to 2,374,553 kilos valued at 189,964,210 levas, in 1930, the production was 2,265,275 kilos valued at 79,284,625 levas, and in 1931, the production was 1,109,589 kilos valued at 38,835,615 levas.

According to the census of December 31, 1926, there were in Bulgaria 8,739,808 sheep, 1,817,437 cattle, 1,260,647 goats, 1,002,089 pigs, 482,180 horses, 27,057 mules, 185,314 donkeys.

Industry is not much developed, though the State encourages industrial enterprise. On January 1, 1932, there were 1,367 'encouraged' undertakings in operation. Mining development has been slow. The country is rich in coal, there are three State mines (at Pernik, Bobovdovl and Maritza), and several privately owned mines. Total coal production in 1931, 1,522,541 metric tons, of which 1,294,972 tons came from State mines and 227,569 tons from privately owned mines, compared with 1,593,041 tons (1,396,238 tons from state mines and 196,803 tons from private mines) in 1930. The following were the principal minerals in 1930 in metric tons (figures for 1929 in parentheses) —copper, 27,448 (31,370), zinc-lead 2,762 (11,896), lead copper 9,737 (9,923), aluminium 5,747 (3,613), salt 1,704 (3,653).

Commerce.

Shipping and Communications.

Mercantile marine comprises 11 vessels of 8,242 tons

The number of vessels entered at all the Black Sea ports of Bulgaria in 1931 was 5,420 of 1,972,869 tons, number of vessels cleared, 5,393 of 1,960,460 tons. At all the Danube ports there entered, in 1931, 13,816 vessels of 2,698,750 tons, and cleared, 13,850 vessels of 2,724,048 tons.

In 1931, there were in Bulgaria 4,736 miles of State roads, and 5,604 miles of communal roads, total 10,340 miles of road.

In 1931, Bulgaria had 1,573 miles of railway of ordinary gauge and 285 miles of narrow gauge, total, 1,858 miles. All the lines belong to the State,

which works them Railways connect Sofia with the general European system. In 1931, there were 38 miles of electric tramways

There were, in 1931, 578 post offices Total correspondence handled, 46,330,853 letters and postcards, 1,029,838 parcels Length of telegraph line (excluding line belonging to the railways) in 1931, 1,398 miles, number of offices, 571, number of messages, 2,875,331 In 1931 there were 560 telephone stations, length of line, 9,252 miles, number of conversations, 64,183,930, of which 31,119 were international

Money and Credit.

The National Bank of Bulgaria, with headquarters at Sofia and branches in the different towns of Bulgaria, has a capital of 500,000,000 leva, provided by the State It has the sole right of note issue On August 7, 1932, it had in hand 1,516,422,000 leva in gold and silver, and reserves of 1,192,487,000 leva The note circulation on the same date was 2,663,603,000 leva There is also a State Agricultural Bank for the purpose of providing cheap credit for the agricultural community Its capital is 688,414,000 leva The Bulgarian International Bank for facilitating and encouraging international trade was established on January 11, 1922 The original capital of this bank was 75,000,000 leva, of which 30,000,000 leva were apportioned to the Bulgarian National Bank and the Bulgarian Agricultural Bank, and the remainder to foreign banks and organisations The Bulgarian Co operative Bank is another State bank founded in 1910

Deposits in the 548 Postal Savings Banks of Bulgaria at December 31, 1931 amounted to 1,199,000,000 leva

There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (francs), but the gold circulation is supplied by foreign 10 and 20 franc pieces There are silver coins of $\frac{1}{2}$ lev and 1 lev, 2 and 5 leva (francs), nickel coins of 2½, 5, 10, and 20 stotinki (centimes), the notes of the National Bank circulate at par The *leva* has been stabilised at 92 leva to 1 gramme of fine gold, or 673 659 leva = 17 (gold)

The metric system is in general use On April 1, 1916, the Gregorian Calendar came into force in Bulgaria

Diplomatic and Consular Representatives.

1 OF BULGARIA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary.—Pantcho Hadjimisheff Appointed October 16, 1924

First Secretary—Ilia Boyadzieff

Military Attaché—Major Vladimir Stoitcheff.

2 OF GREAT BRITAIN IN BULGARIA

Envoy Extraordinary and Minister Plenipotentiary—S P P Waterlow, C B E Appointed October 12, 1929

First Secretary—J. Balfour

Military Attaché—Major B J O'Leary, R A

Naval Attaché—Capt R B Ramsay, M V O, R N

There are Consular representatives at Sofia, Varna, and Bourgas

CHILE.

(REPÚBLICA DE CHILE.)

Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain, constituting a national government on September 18, 1810, finally freeing itself from Spanish rule in 1818

The following is a list of the Presidents since 1896 —

Don Federico Errázuriz, Sept 18, 1896—Sept 18, 1901	Don Juan Luis Sanfuentes, Dec 23, 1915—Dec 23, 1920
Don Germán Riesco, Sept. 18, 1901—Sept 18, 1906	Don Arturo Alessandri, Dec 23, 1920—Sept 10, 1924.*
Don Pedro Montt, Sept 18, 1906—Aug 16, 1910 ¹	Gen. Don Luis Altamirano (Acting), Sept. 10, 1924—Jan 23, 1925.*
Don Elías Fernández Albano (Acting), Aug 16, 1910—Sept 6 1910 ¹	
Don Emiliano Figueroa Larraín (Acting), Sept 6, 1910—Dec 23, 1910	
Don Ramón Barros Luco, Dec 23, 1910—Dec 28, 1915	

Junta appointed

Don Emilio Bello Codecido (Acting), Jan 27, 1925—Mar 21, 1925

¹ Died

² Left Chile.

³ Deposed.

Don Arturo Alessandri (restored), March 21, 1925—Oct 1, 1925 *	Don Manuel Trucco (Acting), Aug 18, 1931—Nov 15, 1931
Don Luis Barros Borgoño (Acting), Oct 1, 1925—Dec 23, 1925	Don Juan Esteban Montero, Nov 15, 1931—June 4, 1932 *
Don Emiliano Fagnano Larraín, Dec 23, 1925—May 6, 1927 *	
Gen. Don Carlos Ibañez (Acting then elected), May 6, 1927—July 26, 1931 *	<i>Junta appointed.</i>
Don Pedro O'azco (Acting), July 26, 1931—July 27, 1931 *	Dor Carlos Dávila (Acting), July 8, 1932—Sept 13, 1932 *
Don Juan Esteban Montero (Acting), July 27, 1931—Aug 18, 1931 *	Gen. Don Bartolomé Blanche (Acting), Sept 13, 1932—Oct 1, 1932 *
	Don Abraham Oyanadel (Acting), Oct. 1, 1932—Dec. 24, 1932
	* Resigned

By the Constitution which came into force on October 18, 1925, legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies, both of which are elected by direct popular vote. The Senate consists of 45 members, elected for eight years, who represent 9 provincial groups of departments. Each group elects five senators. One half the Senate is renewable every four years. The Chamber of Deputies consists of 132 members elected by departments or groups of departments, one member for every 30,000 inhabitants or fraction of not less than 15,000. Electors are all registered citizens of 21 years of age or over, who are able to read and write, electorate numbers 368,436 of whom 287,000 participated in the presidential election of October 4, 1931. All voting is by ballot. Congress sits from May 21 to September 18. The President of the Republic is elected for a term of six years, by direct popular vote. A retiring President is not re-eligible. In legislation the President has a modified veto, a bill returned to the Chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The validity of all elections of President, Deputies and Senators is determined by a special body called *Tribunal Calificador*, consisting of five members chosen by lot from among the following: One each from past-presidents or vice-presidents of the Chamber and Senate; two from members of the Supreme Court, and one from members of the Court of Appeal of the city where Congress meets. The capital is Santiago.

President of the Republic—Don Arturo Alessandri. Elected October 30, 1932, assumed office, December 24, 1932.

The salary of the President is fixed at 120,000 pesos, with 30,000 pesos for expenses.

The President is assisted by a number of Ministers of State, one for each ministry, who constitute a Cabinet and who are responsible to him. Ministers may speak in Congress but do not vote.

LOCAL GOVERNMENT

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*, and the Provinces into Departments, with *Gobernadores* as chief officers, appointed by the President. The Departments constitute one or more municipal districts each with a council or municipality of 5 to 15 members, elected for three years. The Federal Government in 1930 took over control of the finances of the 65 Departments, to safeguard a loan made to them in New York of 15 million dollars.

Area and Population.

Chile is divided into 15 provinces and 2 territories. All provinces except two now extend from the Pacific to the international boundary, while the

inter provincial boundaries in most cases now follow watersheds instead of rivers, thus confining within one province the waters of a single system and avoiding jurisdictional disputes

For an account of the dispute between Chile and Peru regarding the provinces of Tarapacá and Tacna Arica, see the STATESMAN'S YEAR BOOK for 1931, p 718

The present areas of the various provinces and their populations, as determined by the census of 1920 and that of November 27, 1930, are as follows —

Provinces	Area Sq Miles (1930)	Popula- tion 1920 ¹ (Census)	Pop 1930 (Census)	Provinces	Area Sq Miles (1930)	Popula- tion 1920 ¹ (Census)	Popula- tion 1930 (Census)
Tarapacá	21,252	117,239	113,331	Concepción	4,404	291,071	329,495
Antofagasta	47,805	172,350	178,765	Bio Bio	6,129	164,362	180,688
Atacama	21,409	48,413	61,098	Cautín	10,472	312,466	363,791
Coquimbo	15,333	176,041	198,336	Valdivia	10,686	18,410	236,115
Aconcagua	5,774	422,160	463,544	Chiloé	12,680	179,507	183,499
Santiago	6,530	718,211	967,603	Territories			
Colchagua	6,141	284,942	295,971	Aysen	38,351	1,660	9,711
Talca	5,911	200,665	218,227	Magallanes	52,054	28,960	37,913
Maule	5,937	203,155	197,468				
Ñuble	5,462	229,981	231,890	Total	285,133	3,781,573	4,287,445

¹ Population in 1920 of the present areas as revised in 1927

Many islands to the north, west, and south belong to Chile. The coast line is about 2,485 miles in length, the average width of the country, 100 miles.

In 1885 the population of the present area numbered 2,507,380, in 1895, 2,695,911, in 1907, 3,231,496, of the 3,753,799 shown by the census (of 1920, which included Tacna, since handed over to Peru), 1,865,827 were males and 1,887,972 females. Of the total population in 1930 49.4 per cent were urban. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegiens*, mostly nomadic, living in or near Tierra del Fuego, the *Araucarians* (101,118) in the valleys or on the western slopes of the Andes, the *Changos*, who inhabit the northern coast region and work as labourers. The total number of foreigners included in the census of 1920 was 120,436, as against 134,524 in 1907.

The two leading cities, with census population in 1932, are Santiago, 702,431, and Valparaíso, 189,119. Viña del Mar has 49,488. Other towns with census population in 1930 are:—Concepción, 77,589, Iquique, 46,458, Talca, 45,020, Chillán, 39,511, Antofagasta, 53,591, Temuco, 35,748, Magallanes, 24,307, Talcahuano, 27,594, Valdivia, 34,296.

Births in 1930, 169,895, marriages, 39,202, deaths, 105,140, immigrants, 39,270, emigrants, 37,860.

Religion.

The Roman Catholic religion was maintained by the State, but in 1925 the church was disestablished. There is one archbishop (Santiago), 10 bishops, and four vicars apostolic. There were in 1928, 595 churches and chapels.

Education.

Education is gratuitous and at the cost of the State, and since August 26, 1920, compulsory for at least six years in the cities and four years in the

rural districts. A decree issued February, 1928, makes it compulsory for all children between the ages of 7 and 15. There were in 1930, 3,860 public and private primary schools with 559,016 pupils and 9,856 teachers, 6 public normal schools with 1,342 pupils and 200 teachers, 175 public and private secondary schools with 51,624 pupils and 2,438 teachers, 10 public commercial schools with 211 teachers and 4,229 pupils. Professional and secondary instruction is provided in the State University of Chile, with 3,338 students in 1930, the Catholic University at Santiago (1,049 students in 1930), the National Institute of Santiago, the University of Concepción (1920), and in the lyceums and colleges established in the capitals of provinces, and in some departments. A school of technology was opened at Valparaíso (Universidad Industrial de Valparaíso). There are besides agricultural schools, schools of mines, and professional schools. Education expenditures in 1929 took 160,546,991 pesos.

There are 678 newspapers and journals published in Chile, including 86 dailies and 137 weeklies.

Justice and Crime.

There are, in addition to a High Court of Justice in the capital, eight Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and second class judges in the subdelegations. The police force includes about 15,815 officers and men, it is organised and regulated by the President of the Republic at the charge of the national treasury.

Finance.

In recent years the revenue and expenditure were as follows (40 pesos = £1 at par, 1 peso = 12 cents, U S) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Pesos	Pesos		Pesos	Pesos
1928	1,021,041,399	982,733,620	1931	733,805,209	1,027,115,597
1929	1,267,556,419	1,189,934,017	1932 ¹	650,225,000	494,417,000
1930	1,132,811,535	1,181,490,328	1933 ¹	927,140,073	927,140,073

¹ Estimates

Customs revenue in 1930, 532,805,478 pesos, in 1931, 302,309,000 pesos. Nitrate taxes, 1929, furnished 299,782,473 pesos (23.65 per cent. of revenue), in 1930, 181,072,542 pesos (33.96 per cent.).

On September 1, 1932 external debt was 2,430,829,000 pesos; arrears of interest, 161,742,121 pesos, external floating debt, 337,543,009 pesos, guaranteed foreign loans, 1,155,460,978 pesos, and external Treasury notes, 39,406,087 pesos, internal debt, 929,488,798 pesos. Payments on external debts were suspended July 30, 1931.

Defence.

ARMY

The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 50th year, inclusive. Recruits are called up in their 20th year, and are trained for one and a half years. Afterwards they serve for 12 years in the reserve of the active army, after which they belong till the completion of their 50th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 4 zones or military districts, each of which

furnishes a complete division on mobilisation. The army is organised in 5 divisions and 1 cavalry division, comprising 15 regiments and 3 mountain infantry battalions, 9 cavalry regiments, 5 field artillery regiments, 5 heavy artillery groups and 8 mountain artillery groups, 1 engineering regiment and 5 engineering battalions, 5 battalions of railway troops and 2 aviation groups. The total strength of the active army in 1927 was 1,430 officers and 20,950 other ranks.

The infantry are armed with the Chilean Mauser rifle (1895), calibre 7 mm, and the cavalry with a carbine of similar pattern and lance. The field artillery are armed with Q F Krupp guns.

In December, 1918, an Air Force was formed under British instruction, and comprises 1 aviation regiment of 2 observation, 2 fighting and 2 bombing flights.

NAVY

The principal vessels of the Chilean fleet are as follows —

Name	Launched	Displacement, Tons	Extreme Armouring, Inches	Main Armament	Torpedo Tubes	Indicated Horse Power	Nominal Speed
<i>Battleship</i> <i>Almirante Latorre</i>	1918	28,000	10	10 14 in, 14 6 in, 4 4 in	4	37,000	23
<i>Coast Defence Vessel</i> <i>Capitan Prat</i>	1890	6,900	12	4 9 4 in, 8 4 7 in	2	12,000	18 3
<i>Armoured Cruiser</i> <i>O'Higgins</i>	1897	8,500	7	4 8 in, 10 6 in, 12 3 in	2	16,000	21 5
<i>Protected Cruisers</i> <i>Blanco Encalada</i>	1893	4,420	—	2 8 in, 10 6 in	5	14,500	22 0
<i>Chacabuco</i>	1898	4,500	—	2 6 in, 10 4 7 in, 5 3 in	5	15,500	24 0

The *Almirante Latorre* served in the British Fleet during the war as the *Canada*, and in 1930-31 was refitted and modernised at Devonport Dock yard under a contract between the Chilean Government and the Admiralty. There are 11 large destroyers, all built in England, 9 submarines, and various training and auxiliary vessels. A submarine depot ship, the *Araucano*, and two oil tankers were completed in British yards in 1930. The general efficiency of the personnel of the Navy appears to be high, the active strength at present is about 8,000.

A number of British naval and air officers have been lent to the Chilean Navy in recent years in connexion with the re organisation of training in certain branches.

Agriculture and Industry.

There are three zones in Chile—the arid zone in the north, which for many years has furnished the world's entire supply of natural nitrate of soda, 90 per cent of its iodine and 18 per cent of copper consumed, the agricultural zone in the centre, and the forest zone in the south. Mining in the north and agriculture in the centre are the principal occupations. Total area of agricultural land (1927) was 59,038,055 acres, of forest land, 11,231,685 acres, of fruit trees and vines, 273,907 acres, of meadows, 32,557,067 acres. Number of farms in 1930, 210,736 with an average value of 28,800 pesos. Chile produces annually large quantities of cereals, besides excellent wine (4,624,900 litres exported in 1931, chiefly to Germany and Belgium), fruit, and vegetables. Capital invested in vineyards is about

414,000,000 pesos Tobacco output from 7,950 acres in 1930 was 6,035,400 kilos The principal crops of the harvest for 3 years are shown as follows —

	Acreage			Produce in Metric Cwts		
	1928-29	1929-30	1930-31	1930	1931	1932
Wheat	1,065,362	1,723,845	1,516,632	9,125,261	5,767,004	5,766,243
Barley	188,136	152,107	106,291	999,176	845,830	674,272
Oats	213,897	297,370	166,251	1,509,591	741,517	714,560
Maize	111,645	93,682	93,090	596,015	687,570	882,072
Haricots	157,526	164,247	164,340	766,900	638,885	637,000
Pears	43,615	52,008	48,800	196,251	202,161	169,000
Potatoes	107,817	105,288	110,631	4,023,065	4,472,937	4,097,000
Vines	200,101	209,910	—	70,527,913 ¹	64,015,142 ¹	50,081,090 ¹

¹ Gallons

The live stock census of June 30, 1930, showed 441,027 horses, 37,455 asses, 31,414 mules, 2,387,940 cattle, 6,263,482 sheep, 788,331 goats, and 331,156 pigs

Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep farming, largely by British subjects, wool exports, 1931, 10,137 tons. Extensive natural forests are found, the largest in the provinces of Valdivia, Llanquihue and Chiloé. Exports of soap bark (*quillaya*) in 1931 amounted to 1,683 tons, principally to Germany.

The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá. The metals obtained are gold, silver, copper (Chile is the world's second largest producer of copper, with 1931 output of 215,696 tons, and exports of 211,738 tons), cobalt, zinc and manganese, the non metallic substances being coal, nitrate, borate, salt, sulphur (about 15,500 tons per year) and guano. Production of gold in 1931 was 16,718 ounces, of silver, 372,361. Iron ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000,000,000 tons. Exports usually exceed 1,000,000 tons annually (principally by the Bethlehem Steel Corporation which operates the largest mine at El Tofo), but in 1931 fell to 712,000 tons. Coal production in 1931, 1,107,266 tons. Reserves total 2,000,000,000 metric tons, mostly low in thermal units.

Nitrate of soda, or 'salitre,' is Chile's most important article of export and a substantial source of governmental revenue. It is found in the section of the desert of Atacama known locally as the 'pampa salitrera,' a territory comprising an area of some 500 miles in length, lying between latitude 15° and 26° south, and situated at an elevation above sea level of from 2,000 to 6,000 feet. There are 152 nitrate works or oficinas with a productive capacity of 58,136,000 quintals, 32 were in operation in 1930. Production, 1930, 2,445,822 tons, exports, 1,785,728 tons, 1931, 1,125,921 tons, exports, 1,454,611 tons. About 90 per cent of the world's supply of iodine is a by product of the Chilean nitrate oficinas; output, 1929, 1,400 tons.

In 1928 Chile had 8,585 manufacturing establishments, with capital of 1,446,587,060 pesos, using raw materials valued at 335,269,411 pesos, with output worth 1,575,237,072 pesos, 97,832 employees (including 4,762 foreigners) earned 218,608,865 pesos. Electric power is abundant.

Commerce.

Shipping and Navigation

The commercial shipping of Chile consisted, in 1932, of 111 steamers, motor driven vessels and sailing vessels of 178,680 tons gross. The shipping entered and cleared at the ports of Chile in foreign trade in 1931 was as follows. Entered, 2,004,000 tons, cleared, 2,052,000 tons.

Communications.

In 1930, there were in Chile 24,414 miles of highways, of which 20,045 miles were earth roads, 3,878 miles of sand and clay or gravel, 358 miles of macadam and 37 miles of concrete or asphalt. Only 37 miles can be called first class and 358 second-class. About 16,000 are fit for motor traffic. There were (1930) about 30,000 automobiles and 14,700 trucks and motor-buses. There are 851 miles of navigable river, and 497 miles of navigable lakes.

The length of State Railway lines amounted in 1930 to 3,600 miles, private railway lines, principally British owned, to 1,940 miles, making a total of 5,540 miles. State Railway lines are—Arica La Paz Railway, (Chilean section) 128 miles, North Longitudinal Railway, 442 miles, Central North Line, 1,078 miles, Central South Line, 1,770 miles, and Puente Alto Valcan Railway, 38 miles. The Government has 70 per cent. ownership of the Chilean Transandine Line. State owned lines produced an operating profit in 1930 of 23,649,545 pesos. Electrification of the railways was commenced in 1921 on the line between Valparaiso and Santiago, a distance of 115 miles. Aviation is highly developed between interior points and abroad, a plant for the manufacture of airplanes was established in 1930.

The 890 post offices and agencies dispatched in 1930, 101,231,000 postal pieces. The length of telegraph lines at the end of 1930 was 19,727 miles (10,555 miles Government and 9,172 miles private). In 1930, there were 430 Government offices, and 532 private offices. There were (1930) 327 telephone exchanges with 35,489 subscribers. The largest telephone company is the American-owned Chile Telephone Company which operates in Santiago, Valparaiso and other cities, with 249 exchanges and 30,967 subscribers.

A chain of wireless stations along the coast for shore-to-ship transmission is operated by the Navy, stations are at Arica, Antofagasta, Coquimbo, Valparaiso, Talcahuano, Valdivia, Puerto Montt, Magallanes (formerly known as Punta Arenas), and Quilicura (near Santiago). The first international radio station was opened at Quilicura in 1928. A wireless station is also being erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso. There are 3 large broadcasting stations.

Banking and Credit.

In August, 1925, the Government established at Santiago the Central Bank of Chile, with (1930) 90,832,000 pesos paid up capital, which should

have the right of issuing a new peso, value 6*d*, to be the basis of a new national currency. The Central Bank commenced operations on January 11, 1926, and gold payments were re-established. On January 13, 1933, the Central Bank had gold at home amounting to 77,682,000 pesos, gold abroad, 75,593,000 pesos and deposits, 329,690,000 pesos; bank notes in circulation were 477,648,000 pesos. In January, 1932, its minimum reserve was set at 35 per cent in gold or demand deposits in New York or London.

The paid-up capital and reserve funds of 16 leading Chilean and 7 foreign banks amounted on December 31, 1930, to 643,325,838 pesos, total loans and investments, 1,834,525,098 pesos. Three mortgage banks specializing in industrial, agrarian and mining loans were merged in 1931 into the Chattel Mortgage Bank at Santiago. A decree in March, 1931, gave the Caja Nacional de Ahorros a monopoly of savings accounts, other banks being given from 6 to 12 months in which to close out their savings accounts, on December 31, 1930, the savings deposits amounted to 28,400,000 pesos, total deposits, 472,200,000 pesos.

Money, Weights, and Measures.

The monetary unit is the gold *Peso*, containing 0.188057 gramme of fine gold, worth 6*d* sterling or 12 cents, U.S. £1 sterling therefore equals at par, 40 gold pesos. Only gold coins of 20, 40 (called, officially, the 'libra Chilena' and equal to the £ sterling), 50 and 100 pesos are minted. But no gold circulates. The silver coinage is mainly one coin, the peso, with a fine silver content of 2.4 grammes. In April, 1932, the convertibility of the currency was suspended. In 1932 the exchange value of the peso in London ranged between 65.00 pesos to the £ and 58.00, in New York it ranged from 12.18 cents, U.S. to 6.12 cents, being pegged in April at the latter figure. There are nickel coins of 0.20, 0.10 and 0.05 peso. Actually the currency in circulation is chiefly paper issued by the Central Bank in lieu of gold, in denominations of 10,000, 5,000, 1,000, 500, 100, 50, 10, 5, and 1 pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent. Greenwich time has been adopted in place of Chilean time.

Diplomatic and Consular Representatives

1. OF CHILE IN GREAT BRITAIN

Ambassador — Señor Don Agustín Edwards (Appointed March 7, 1933)

Minister Counsellor — Don Manuel Salinas

Secretaries — Luis Renard, C. Manuel Pereira, and Alfredo Condon

Commercial Counsellor — Jorge Buchanan

Commercial Attaché — Santiago Monk.

Consul-General in London. — Tomás de la Barra Fontecilla.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

2. OF GREAT BRITAIN IN CHILE

Ambassador — Sir H. G. Chilton, K.C.M.G. (Appointed July 31, 1930)

First Secretary — G. H. Thompson, C.M.G.

Naval Attaché — Captain E. de F. Renouf, C.V.O., R.N.

Military Attaché — Major L. H. G. Andrews.

Air Attaché—Wing-Commander R. B. Maycock, O B E.

Commercial Secretary—A J Pack, O B E

Consul General at Valparaíso—D F S Filiter

There are Consular representatives at Coquimbo, Antofagasta (C), Arica (V C), Coronel, Iquique (V C), Magallanes (C), Santiago (V C), Talcahuano (V C), Tocopilla, and other centres

CHINA.

(CHUNG-HUA MIN-KUO, *i. e.* REPUBLIC OF CHINA)

Government

On February 12, 1912, China, one of the oldest of Monarchies, became a Republic

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line, but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth name in the canonised series of *Ta Ch'ing* Emperors. He was born on February 11, 1906, succeeded his uncle, the Emperor Kuang Hsu, on November 14, 1908, and abdicated on February 12, 1912. On December 1, 1928, he was married. He retained the title of Emperor of the Manchu Imperial House up to November 5, 1924 (when it was abolished), together with other rights of preferential treatment secured under the Abdication Agreement, making P'u-yi an ordinary citizen of the republic. For account of the Revolution of 1911, see *STATESMAN'S YEAR BOOK* for 1912, pp. 699-701, and for later developments, see *STATESMAN'S YEAR BOOK* for 1919, pp. 740-41, and the *STATESMAN'S YEAR BOOK*, 1928, p. 734.

The present Government at Nanking (December, 1932) is a Committee Government, representing broadly the Kuomintang, or National Party. According to the 'Organic law of the National Government of the Republic of China,' which the Kuomintang promulgated on October 4, 1928 (amended December, 1931), the National Government is to be composed of five *Yuan* (Councils)—Executive, Legislative, Judicial, Examination, and Control. There shall be a President and from 24 to 36 Government Councillors, and a President and Vice President of each *Yuan*, who are to be elected by the Central Committee of Kuomintang. The Executive, Legislative, Judicial, Examination, and Control *Yuan* shall be responsible to the Central Executive Committee of the Kuomintang. Decrees, decisions, and commands of military mobilisation shall be signed by the President of the National Government, and counter-signed by the President of the appropriate *Yuan*, and by the Minister of the appropriate Ministry. The Executive Council shall be the highest organ of the National Government. It shall establish Ministries to which will be entrusted various executive duties, and it may appoint commissions for specified executive matters. It may introduce in the Legislative Council Bills on matters within its competence. Budgets, amnesties, declarations of war, peace negotiations, conclusions of treaties, and other important international matters are to be submitted to the Legislative Council.

The Legislative Council shall be the highest legislative organ. It shall have power to decide upon legislation, budgets, amnesties, declarations of war, negotiations for peace, the conclusion of treaties, and other important international matters. It shall have a President and Vice President, and shall be composed of between 49 and 99 members to be appointed by the National Government at the instance of the President of the Legislative Council. The term of office shall be two years, and members shall not concurrently be non political administrative officials of the various organs of the Central or local Governments.

The Judicial Council shall be the highest judicial organ, and shall take charge of judicial trial, judicial administration, disciplinary punishment of officials and trial of administrative cases. The granting of pardons,

reprieves, and restitution of civil rights shall be submitted by the President of the Judicial Council to the National Government for approval and action.

The Examination Council shall be the highest examination organ, and shall take charge of examinations and determine qualifications for the public service. All public functionaries shall be appointed only after they have passed an examination and their qualifications for the public service have been determined by the Examination Council.

The Control Council shall be the highest supervisory organ, and shall, according to law, exercise the powers of impeachment and auditing. It shall have a President and Vice-President, and shall be composed of from 19 to 29 members who are to be appointed by the National Government at the instance of the President of the Control Council. The security of tenure of office by members shall be determined by law, and members shall not concurrently hold any office in any organs of Central or local Governments.

President of the National Government of China — Mr Lin Shen (February, 1932)

There is also a Cabinet of Ministers, appointed in January, 1932, as follows:—

President of the Administrative Council — Wang Ching wei

Minister of Finance — Soong Tse wen (T V Soong)

Minister of Foreign Affairs — Dr Lo H en kan

Minister for War — General Ho Yin chin

Minister of the Navy — Admiral Chen Shao luan.

Minister of Industry — Chen Kung po

Minister of Education — Chu Chia hua

Minister of Railways — Kuo Meng yu

Minister of the Interior — General Wang Shao shan

Minister of Communications — Chih Chia hua

Minister of Justice — Dr Lo Wen Kan

LOCAL GOVERNMENT

In July, 1928, six special municipalities were organized at Nanking, Shanghai, Tsingtao, Tientsin, Hankow and Canton, and several new ordinary municipalities were also established, but in May, 1930, the distinction between special and ordinary municipalities was revoked. There is still a difference between municipalities under the direct control of the Executive Yuan and those under provincial control. The Mayor of a city of the former type is appointed by the Government, while in the other case a Mayor is recommended by the Provincial authorities, for approval by the Central Government, or else is directly appointed by the local authorities. In municipalities under Executive Yuan control, the heads of the different bureaux are either directly appointed by Government or are recommended by the Mayor for subsequent approval by the Government. Bureau heads in municipalities under provincial control are either directly appointed by the provincial authority or are recommended by the Mayor for approval by the Provincial Government.

Area and Population.

According to statistics compiled by the Ministry of the Interior (1932), the total population of China is 474,787,386. The most recent estimate of the area of the country (including Manchuria) is 4,278,352 sq miles.

The following table gives a statement of the area and population of the Chinese Republic according to the estimate of the Post Office in 1926:—

The 18 Provinces of China Proper	Area English square miles	Population (Estimated)	Population per square mile	Capital
Chile	115,680	38,905,695	335	Peiping
Shantung	55,984	34,375,849	614	Tai nan

Estimates prepared by the Chinese Maritime Customs in 1929 gave the total of 438,983,373, inclusive of 19,290,000 for Manchuria. The figures for Mongolia and Tibet are rough estimates, and a certain amount of reserve should be maintained in regard to all these figures.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki, ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on June 2, 1895.

By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan (called Dalny by Russia and Dairen by Japan) and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth, signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China agreed to the transfer to Japan from Russia of the lease of the Liao tung Peninsula and the control

of the railway from Port Arthur to Ch'ang-chun (Kwan ch'ángtzu), and conceded to Japan the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce

The Chinese Government granted to the French in April, 1898, a 99 years' lease of the Bay of Kwang-Chau-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor General of French Indo-China.

In accordance with a Convention signed between the British Government and the National Government of China on April 18, 1930, the Rendition of Wei-hai-Wei to China took place on October 1, 1930

The Belgian concession at Tientsin was formally restored to China on January 15, 1931.

Peiping (formerly called Peking), the capital of China until 1928, has a population of 811,138 according to the 1926 census of the Municipal Bureau. According to the Census of the Metropolitan Police Administration, taken in 1927, the population of Peking and its suburbs is close on 1,297,718 (779,704 males and 518,014 females). The population of the treaty ports is given as follows for 1931 by the Chinese Maritime Customs: Aigun, 38,112, Harbin, 330,438, Hunchun, 39,000, Lungchingsun, 4,059, Antung, 91,015, Dairen, 282,665, Newchwang, 106,040, Chinwangtao, 20,020, Tientsin, 1,387,462, Lungkow, 10,676, Chefoo, 131,659, Tsingtao, 390,337, Chungking, 635,000, Wanhsein, 210,837, Changsha, 606,972, Yochow, 4,800, Ichang, 107,940, Shasi, 113,526, Hankow, 777,993 (including Wuchang and Hanyang), Kiukiang, 80,166, Wuhu, 135,385, Nanking, 633,452, Chinkiang, 199,776, Shanghai (including neighbouring districts), 3,259,114 (the International Settlement at Shanghai has a total of 1,007,868 inhabitants, of which 971,397 are Chinese and 36,471 foreigners), Soochow, 260,000, Hangchow (municipal area), 506,930, Ningpo, 218,774, Wenchow, 631,276, Santuao, 9,000, Foochow, 322,725, Amoy, 234,159, Swatow, 178,636, Canton, 861,024, Kongmoon, 32,200, Samshui, 9,160, Kuangchow, 45,757, Pakhoi, 36,000, Wuchow, 90,000, Nanning, 68,110, Lungchow, 13,600, Mengtsz, 193,004, Szemao, 20,000, Tengyueh, 19,000. In addition, there are also a number of other places open to international trade, these are called commercial ports or marts, and were opened at the instance of the Chinese Government. Nanking is the present capital.

According to the estimate of the Customs authorities, in 1931 the total number of foreigners resident in China was 370,393, made up as follows.—

American	8,637	French	8,651	Russian	106,479
Austrian	245	German	3,444	Spanish	334
Belgian	546	Italian	756	Swedish	242
British	13,344	Japanese	200,021	Swiss	309
Czechoslovak	276	Mexican	4	Other Countries	2,455
Danish	650	Norwegian	229		
Dutch	700	Polish	14	Total	370,393
Finnish	89	Portuguese	2,363		

The total number of Chinese abroad was estimated in October 1928 to be about 6,246,682 persons, including 1,456,264 in British South India and South Sea Islands

Until 1929 there were 23 Treaty Powers in China, as follows: Great Britain (1842), United States (1844), France (1844), Norway and Sweden (1847), Denmark (1868), Netherlands (1868), Spain (1864), Belgium (1865), Italy (1866), Peru (1874), Brazil (1881), Portugal (1887), Japan (1895), Mexico (1899), Chile (1915), Switzerland (1918), Bolivia (1919), Persia (1920), Germany (1921), Soviet Russia (1924), Austria (1926), and Finland (1927). Of these powers, Germany, Bolivia, Persia, Chile, Austria, Mexico,

Soviet Russia, and Finland have renounced the privilege of consular jurisdiction. Fixed Customs Tariff Conventions were definitely renounced by all powers except Japan in 1928. Italy, Belgium, Denmark, Spain and Portugal signed treaties with China in 1928 and on certain conditions agreed to submit to Chinese jurisdiction after January 1, 1929.

During 1928 the National Government announced that treaties that had lapsed, or were about to lapse, would be abrogated and new treaties negotiated on a basis of "equality." Treaties of a commercial character have been made with the principal nations. As from January 1, 1930, the Chinese Government declared the withdrawal of extra territorial privileges from foreigners in China. In an Aide Mémoire from the British Government on December 20, 1929, however, it was stated that 'His Majesty's Government are willing to agree that January 1, 1930, should be treated as the date from which the process of the gradual abolition of extra territoriality should be regarded as having commenced in principle.' This date was later extended to January 1, 1932, but at the end of December 1931 the Chinese Government announced that the proposal to abandon extra territorial rights on January 1, 1932, had been postponed.

Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz Confucianism, Buddhism, and Taoism.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Republic, and was fully commended by Confucius, Confucianism has little outward ceremonial.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism — originally a pure philosophy — having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Most Chinese (not Mohammedans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist.

Mohammedans are found in every province of China, being most numerous in Kansu, Sinkiang, Shansi, Shensi, Chihli, and Yunnan. There are 30,000 in Peking, with 30 mosques. Estimates for all China vary widely, from 3,000,000 to 80,000,000, 20,000,000, however, is generally favoured.

Roman Catholicism has had a footing in China for more than three centuries. In 1929 it had 76 bishoprics and 3,616 foreign missionaries, and counted 2,486,841 native Christians. Protestant Missions date from 1807. In 1922, native Christians numbered 806,928 (366,524 communicants). Attached to Protestant Missions in 1920 were 27 colleges of university standing, 256 middle schools, and 581 higher elementary schools. Under Christian instruction were 189,794 pupils. The Russian Orthodox Mission dates from 1685. In 1923, the Church counted 5,000 baptised Chinese adherents.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'ai-fêng, capital of Honan.

Education.

Since September 3, 1905, an enormous impetus has been given to the new educational movement, schools for the teaching of 'western learning' springing up in every town throughout large portions of the Republic.

There are two kinds of primary schools, the higher and the lower. The former are established by district governments, and are intended as inter-

mediaries between the lower primary schools and the middle schools. The total for the whole country in 1923 was 10,236, with 582,579 pupils. The latter—also called Citizen Schools—are established by local government boards, although in recent years a good number have been founded with private funds. The total number was 167,076, with 5,814,375 pupils, in 1923.

The Government Universities are the National University at Peking, Wuchang Normal University, Chung Chow University, Kaileng; National South-Eastern University at Nanking, North Western University at Sianfu, in Shensi Province; North-Eastern University at Mukden; Tung Luh University in Yunnan Province, Peking Normal University; and Hangchow University. In addition to the above there are several Universities supported by private funds. The Chiao Tung (Communications) University, under the aegis of the Ministry of Communications, was opened on July 21, 1921. It is now divided into three Colleges, each with a university status: Nanyang, Shanghai, Tangshan, Chihli Province, Communications, Peking. The National University of Peking was established in 1898, and completely reorganised in 1917. In February, 1920, five women students were admitted for the first time. In the year 1928-29, there were 34 universities and colleges and 16 High Technical Colleges in China, including Government and private institutions. The total number of students was 19,453, of whom 3,507 were enrolled in the Faculty of Law, 2,271 Arts, 2,135 Engineering, 1,232 Science, and 1,127 for Business Administration.

The Peking Union Medical College was founded early in 1906 for the training of Chinese medical students. On July 1, 1915, the China Medical Board of the Rockefeller Foundation assumed the full support of the Union Medical College.

There are numerous Protestant and Catholic mission schools, colleges and universities at Shanghai and other ports, where the English and French languages and lower branches of Western science are taught.

A modern university for Chinese, with British professors, has been successfully established in Hongkong, and attracts students from many parts of China.

According to statistics compiled by the Ministry of Education, 1,481 students in 1929-30 were granted certificates to study abroad. Of this total, 826 students proceeded to Japan, 272 to America, 173 to France, 84 to Germany, 60 to Belgium, 55 to Great Britain, and 14 to Austria. Among these were 162 women students, or about 11 per cent.

Justice.

A provisional Criminal Code was drawn up in the closing year of the Tsing dynasty, and proclaimed on March 10, 1912, the first year of the Republic. The code was framed after the Continental system, and adopts the most modern legislation in regard to conditional release and postponement of punishments. There are special provisions for the treatment of youthful offenders and insane persons. As regards the power of inflicting penalties, the arbitrary use of power by the court is guarded against by fixing a maximum and minimum sentence for each case. A second draft of this code was completed in 1919. Texts in both English and French have also been published. Altogether, three codes have been drawn up and revised—the Code of Civil Procedure, the Commercial Code, and the Code of Criminal Procedure. The work of drawing up and revising the new Codes is undertaken by the Law Codification and Compilation Commission, which is also engaged in the drafting of commercial laws.

There are at present 276 courts and procuratorates, with the Supreme

Court and the Procuratorate-General at the head of all. The Supreme Court of China may be likened to the House of Lords or the Judicial Committee of the Privy Council of Great Britain. As its name implies, it is the highest tribunal in the land. It was reorganised in 1912 into two divisions—Criminal and Civil—since increased to seven, five Civil divisions and two Criminal divisions. In each division there is a presiding Judge with four other judges. The cases handled by the Supreme Court in 1926 were Civil, 5,430, Criminal, 1,953.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States Court for China (established 1906).

Finance.

Receipts and disbursements (ordinary revenue and expenditure) of the Nationalist Government, for 4 years, from July 1 to June 30 are shown as follows:—

	1928-29	1929-30	1930-31	1931-32 ¹
	Dollars	Dollars	Dollars	Dollars
Revenue	334,296,466	438,063,208	560,926,159	634,644,906
Expenditure	434,440,712	539,005,919	714,374,453	682,990,864

¹ Estimates

Principal items of revenue, 1931-32. Salt tax, 144,222,716 dollars, customs duties, 369,742,637 dollars, rolled tobacco and other consolidated taxes, 88,681,798 dollars, wine and tobacco tax, 7,625,785 dollars, stamp tax, 4,798,950 dollars, bank dividends, 1,610,600 dollars, income from state railways, 516,953 dollars. Proceeds from state loans amounted to 180,014,470 dollars. Principal items of expenditure: military services, 303,777,063 dollars, loan services, 238,754,172 dollars, civil expenses, 56,439,935 dollars, party expenses, 1,573,000 dollars, indemnity, 31,089,750 dollars.

Likin (local customs dues on internal transit) was abolished on January 1, 1931.

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Chinese Maritime Customs, an institution founded by Sir Robert Hart, which has a large staff of Foreign and Chinese subordinates. By agreement, dated February 13, 1898, China undertook that the post of Inspector General should be held by a British subject so long as British Foreign Trade predominated.

By the terms of the Reorganisation Loan Agreement of 1918 the Chinese Government agreed to take immediate steps for the reorganisation, with the assistance of foreigners, of the system of collection of the salt revenues. A Central Salt Administration was established in Peking under the control of the Minister of Finance, with a Chief Inspectorate under a Chinese Chief Inspector and a foreign Associate Chief Inspector, who exercise the chief authority for the superintendence of the issue of licence and the compilation of reports and returns of revenue.

By exchange of Notes effected on September 19 and September 22, 1930, it was agreed that Great Britain should return her share of the Boxer Indemnity as from December 1, 1922, to the control of the Chinese Government which would apply the bulk of the funds thus remitted to the creation of an endowment to be devoted to the rehabilitation and building of rail-

roads in China and to educational purposes. The funds to which the agreement refers amounted on June 30, 1930, to 3,515,419*l* 9*s* 3*d*, and the total amount of the sums payable by the Chinese Government between that date and December 31, 1945, when all payments are due to cease, will be 7,847,098*l* 4*s*. 8*d*

The customs receipts for 4 years were (in Haikwan taels) —

Year	Foreign Trade	Home Trade	Total	Total	Exchange
	Taels	Taels	Taels	£	Pence
1929	133,817,451	18,012,642	152,530,093	20,257,945	81½
1930	159,847,073	20,772,685	180,619,758	16,415,455	22½
1931	130,201,063	16,908,334	247,118,397	18,983,972	18½
1932	184,309,000	15,930,000	200,239,000	18,772,406	22½

The public debt on January 1, 1931, amounted to the equivalent of about 152,900,000*l*, and the internal loans on June 1, 1931, to 741,640,699 dollars, of which 191,558,860 were Peking issues and 550,081,839 were Nanking issues. Of the former, arrears of capital and interest to January 1, 1931, amounted to some 19,989,000*l*, and of the internal loans, 488,413,139 dollars were secured on customs revenue.

Defence.

ARMY

The organisation of the national army is based on a system of compulsory citizen service. Service is normally voluntary for three years with the active army and three years in the reserve. Recruits must be between the ages of 20 and 25. In 1929 the National Government produced a paper organisation of the national army in 114 infantry divisions, 8 cavalry divisions, 13 artillery regiments and 15 engineer battalions. This is being reduced to 65 infantry divisions, 8 cavalry brigades, 16 artillery regiments and 8 engineer regiments. The nominal strength is 800,000 men.

NAVY

The weakening of the central power had seriously affected the efficiency of the Navy, but this has been restored to some extent since the Nanking Government was established. In July, 1929, the Government requested the services of a British Naval Mission to reorganise the training of the Fleet, the services of two officers of the Royal Navy and a number of ratings have since been lent. A number of Chinese junior naval officers are under training in the British Navy.

The largest vessel is the cruiser *Hai Chi*, of 4,300 tons displacement and 24 knots, carrying a main armament of 2 8 in. guns, 10 4 7-in. guns and 5 above water torpedo tubes. The *Ying Swee* and the *Chao Ho* were built in England (1911), mainly for training purposes, each having a displacement of about 2,600 tons and a contract speed of 20 knots. The main armaments consist of 2 6-in and 4 4 in guns. There are also three 3,000-ton cruisers, *Hai Yung*, *Hai Chou*, and *Hai Shen*, built 1897-98, of 19 5 knots speed, armed with 3 6 in and 8 4 1-in guns, and the *Yat Sen*, built 1930, of 1,650 tons, armed with 1 6 in, 1 5 5-in, and 4 3 in guns. In addition there are 20 steel gunboats of over 400 tons, 16 smaller river and other gunboats, 3 destroyers, 8 torpedo boats, and various other vessels, many of which, as the result of neglect, are believed to be without fighting value. Two cruisers of 3,000 tons and a number of gunboats are under construction.

There are no naval bases of any importance. Existing dockyards are Foochow, Taku, Kianguan (Shanghai), and Whampoa (Canton).

Production and Industry.

Agriculture.—China is essentially an agricultural country, and the land is mostly freehold held by families on the payment of an annual tax. Total arable land in China is estimated at about 192,060 square miles. The holdings are in general small, irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, and millet and other cereals, with peas and beans, are chiefly cultivated in the north, rice, sugar, and indigo in the south. The country's total harvest in a normal year is estimated at 42,337,461,000 catties of wheat and 12,820,267,000 catties of barley. Treaties forbid the export of grain with the exception of wheat, soya beans, kaoliang, indian corn, buckwheat, and barley from Manchuria. An embargo may be applied in case of a famine in China. China's fibre crops are also important. Chief are abutilon, hemp, jute, ramie and flax.

Cotton is grown widely even as far north as the southern and central part of Chihli, the chief area of production being the Yangtse valley. In 1931 the area under cotton in the 12 principal cotton producing provinces (Liaoning, Hopei, Shantung, Shansi, Honan, Shensi, Kiangsu, Chekiang, Anhwei, Kiangsi, Hupeh, and Hunan) was given as 31,637,779 *mow* or 5,272,963 acres, and the yield 6,399,780 *piculs* of ginned cotton. In 1930, the area was 37,593,012 *mow* (6,265,502 acres), and the yield 8,809,567 *piculs*. The preliminary estimate for 1932 is 37,079,835 *mow* (6,179,839 acres) and 8,094,863 *piculs*. Tea is cultivated exclusively in the west and south, silk culture is one of the most successful industries of China, about 25 per cent. of the world's supply of raw silk is from China. The production of silk cocoons is estimated at 3,300,000 *piculs*, of which about 40 per cent is produced in the central provinces of Kiangsu, Chekiang and Anhwei.

Pigs are raised everywhere in China, and pigs' bristles have become an important article of export. The annual output is over 100,000 *piculs*, valued at about 10,000,000 Hk Tls. about two thirds are exported. In Mongolia, camels are raised solely for the hair they produce.

Manufacture—An important feature in the development of Chinese industries is the erection of cotton and wool mills, and of silk filatures in Shanghai, Canton and elsewhere, while native looms are found in most dwellings. The production of cotton yarn in China during the year ended December 31, 1932, totalled 2,283,898 *piculs*, of which 305,977 *piculs* were produced in Japanese, 1,427,919 *piculs* in Chinese, and 550,002 *piculs* in British owned mills. The production of cotton piece goods for the year amounted to 20,233,710 *piculs*, of which 10,190,970 *piculs* were manufactured in Japanese, 8,242,740 in Chinese, and 1,800,000 bales in British mills. In December 1932, 128 cotton mills in China had 4,516,898 spindles and 42,596 looms distributed as follows: 41 Japanese-owned mills (1,757,248 spindles and 19,306 looms), 84 Chinese-owned (2,589,040 spindles and 20,599 looms), 2 British-owned (160,610 spindles and 2,671 looms). At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. Flour milling is making rapid strides in China. There are 173 modern mills in Shanghai (of which only 18 were working in 1930), 11 mills at Tsingtao, 6 at Wushih, and 5 at Hankow. Manchuria possesses about 50 flour mills. At Hanyang, near Hankow, are large Chinese iron works, supplied with ore from mines at Tayeh, about 60 miles distant. There are also 400 glass factories.

Mining.—Most of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The coal-fields cover an area of 133,513 acres and the average annual coal output is estimated at 29,000,000 metric tons, of which 9 to 10 million metric tons are from native coal mines, over $7\frac{1}{2}$ million metric tons from semi-modern mines, and 11,196,100 metric tons from the Fushun and Kailan coal mines. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is the oldest in the world, in Chihli, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. Three hundred million tons of ore are estimated to be in Shansi, the reserve of other deposits amounts to about 300 million tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. They have an ore reserve of 35,000,000 tons. On the Upper Yangtse and in Shensi province petroleum is being worked, there are 91 wells in the country. Oil is also being extracted from shale beds in South Manchuria and Shansi Province. Tin ore is plentiful in Yunnan where the tin mining industry has long existed. Tin is the most important mineral export, about 10,000 tons are produced annually. It is mined extensively in Yunnan, and through Mengtaz it reaches Hong Kong, whence it is shipped to foreign countries. In antimony China occupies a unique position, since 1903 the country has produced more than 60 per cent. of the world's total production. More than 90 per cent comes from Hunan, the output in 1930 was 14,700 tons. Mining for wolfram is being carried on at Swatow, and in the Kiangsi and Hunan Provinces, molybdenum ore has been found at Yungtaih sien, in Fukien and Kiangsi, bismuth has also been worked. The total output of salt in 1930 was 2,562,000 tons (2,408,000 tons in 1929).

			Silk and cotton piece goods	44,183,489	30,410,253
			Bean Oil	16,991,286	4,803,415

Of the tea in 1932, 81,246 piculs were exported to Hong Kong, 39,531 to Great Britain, 21,660 to France, 50,592 to the United States, and 230,262 to Russia. The total export of tea to foreign countries has been as follows (in lbs) — 1895, 248,757,333, 1905 182,573,064, 1915, 237,647,066, 1930, 92,539,733, 1931, 93,760,800, 1932, 86,140,800

Total export of raw silk for past five years 1928, 176,039 piculs, 1929, 180,034 piculs, 1930, 146,862 piculs, 1931, 133,047 piculs, 1932, 76,670 piculs

The following figures give the import and export of gold and silver through the Maritime Customs in thousands of Haikwan Taels —

Year	Gold		Silver	
	Imports	Exports	Imports	Exports
1929	1,005	2,975	121,430	16,604
1930	2,571	19,110	102,560	33,554
1931	11	85,697	75,888	30,443
1932	174	77,642	62,255	37,965

In addition to her overseas trade China has an extensive coast and river trade, in which under 'Inland Waters Steam Navigation Regulations,' steamers under foreign flags are allowed to participate. At the end of 1931, 3,430 vessels were on the register, of which 519 were foreign, and 2,911 Chinese, at the end of 1930, the figures were 544 and 2,676 respectively

In recent years the quantities and value of the imports of tea into the United Kingdom from China, including Hong Kong, Macao, and Weihaiwei were (according to the Board of Trade returns) —

Year	Quantities	Value	Year	Quantities	Value
	lbs	£		lbs	£
1926	13,481,165	944,125	1929	9,209,619	620,931
1927	12,517,851	852,859	1930	8,740,961	529,470
1928	6,580,893	525,719	1931	8,616,116	640,806

Other important articles of trade between Great Britain and China (according to the Board of Trade returns) in two years were —

Imports into U K	1930	1931	Exports from U.K.	1930	1931
	£	£		£	£
Raw and waste silk	202,535	164,794	Cottons	1,887,981	2,145,874
Egg yolk	3,375,606	2,846,988	Iron and steel	1,417,904	1,147,610
Bristles	856,696	256,615	Woolens	1,037,043	1,060,049
Camels hair	418,864	279,298	Machinery	1,487,836	1,163,836

Total trade between United Kingdom and China¹ for 5 years —

	1928	1929	1930	1931	1932

¹ Exclusive of Honk, Kong, Macao and Leased Territories

Shipping and Navigation.

During 1931, 181,607 vessels of 160,005,101 tons entered and cleared Chinese ports. Of these 50,534 of 60,560,794 tons were British; 6,130 of 6,177,767 tons, American, 882 of 1,543,183 tons, French, 824 of 3,443,874 tons, German, 236 of 748,438 tons, Italian, 31,589 of 43,042,411 tons, Japanese, 2,493 of 5,497,770 tons, Norwegian, 3,723 of 1,188,137 tons, Portuguese. Of the total tonnage, 137,575 were steamers with a tonnage of 155.3 million tons, and 44,032 were sailing vessels (all Chinese junks), with a tonnage of 4.67 million tons.

The nationality of the vessels (direct foreign trade) was mainly as follows —

Nationality 1931	Entrances		Clearances	
	No	Tons	No	Tons
British	6,764	9,126,342	6,741	9,077,757
American	787	1,911,346	767	1,859,403
French	209	647,718	196	612,428
Italian	51	223,480	45	204,819
Japanese	4,734	8,118,001	4,670	8,141,432
Portuguese	861	261,042	864	257,164
German	167	631,054	173	679,408
Chinese	19,718	2,526,178	17,900	2,494,406
Total (all Nationalities)	34,283	25,914,444	31,663	25,654,360
Total (1932)	30,824	22,181,646	29,505	22,359,159

Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and most are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. At the end of 1929 there were 34,810 miles of motor roads open for traffic.

Chinese railway history began in 1876 when the Woosung line, built by foreign enterprise, was opened. At the end of 1930, there were 12,335 miles of railway in China (excluding 1,857 miles in Manchuria), of which about 1,300 miles have been constructed by British enterprise and British capital.

The principal railways in China are:—(1) South Manchuria Railway, from Changchun to Dairen, 693 miles [see also under Manchuria]; (2) Peiping Mukden line, 847 miles, (3) Peiping-Suiyuan Railway, 817 miles;

(4) Peiping-Hankow Railway, 1,244 miles, (5) Lung Hai Railway, 832 miles, (6) Shanghai-Nanking Railway, 258 miles, (7) Tientsin Pukow Railway, 1,009 miles, (8) Shanghai-Hangchow Ningpo Railway, 219 miles, (9) Hupeh-Hunan Railway, 417 miles, (10) Kiaochow Tsinan Railway, 395 miles, (11) Yunnan Railway, from the Tonkin border to Yunnanfu, 290 miles, and (12) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifeiho (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok, and southerly from Harbin to Changchun, joining the South Manchuria Railway. This line was built by the Russians, and under agreements dated October 2, 1920, and May 31, 1924, is operated by Russians and Chinese. It runs for 1,100 miles in Chinese territory. The gauge is the Russian standard of 5 feet, whilst that of all the other railways is 4 feet 8½ inches, with the exception of the Yunnan Railway, which has a gauge of 1 metre. The total revenue of the Government railways in 1930 amounted to 104,848,368 dollars, as compared with 103,788,746 dollars in 1929.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities in the country, and there are lines to all the neighbouring countries. The telegraph lines have a length of 52,050 miles. Number of telegrams transmitted by the Post-office in 1929, 24,501. The value of the international money orders issued in 1929 was 1,800,332 dollars, and of those cashed, 3,136,692 dollars. Domestic money orders issued in 1929 amounted to 131,784,800 dollars, and those cashed to 131,204,800 dollars. The administration is now completely under Government control. Wireless Telegraph Stations have been installed at many centres.

Telephones are in use in the main cities of China, and long distance telephone communication has been introduced along the railways and in the trade areas. Wireless telephone services have also been established.

The postal work of China, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. The work of the Post Office extends over the 18 Provinces of China proper, the New Dominion and Manchuria, which have been divided into postal districts, or sub districts (42,518 at the end of 1924). The Postal Service with Tibet has been suspended. In 1929, there were 12,263 post offices open, and the number of letters posted was 447,060,250, of postcards 44,166,090, of newspapers, 49,876,890, of printed matter, 63,596,810, of commercial papers, 3,418,920, of samples of merchandise, 1,216,100, of trade circulars, 7,897,360, grand total of 724,512,360. The number of parcels posted in 1929 was 6,857,250. The revenue of the post office in 1929 was 38,423,311 dollars, and the expenditure 37,411,618 dollars. On December 31, 1929, the postal staff numbered 85 foreigners and 37,783 Chinese. China in 1914 joined the Postal Union.

The transmission of mails by air on the Shanghai Nanking sectional line of the Hu jung (Shanghai Chengtu) Aerial Transportation Administration and the Shanghai-Hankow line of the China National Aviation Corporation was commenced from July 8 and October 21, 1929, respectively.

Banking and Credit.

Banking on modern lines dates from the close of the Tai-ping rebellion in the 'sixties, when the rapid expansion of trade in Shanghai created a

demand for credit facilities. In 1902, the Board of Finance established the Ta Ching Bank, with a capital of 4,000,000 Kuping Taels, which was soon raised to 10,000,000 Kuping Taels. Prompted by the success of the Ta Ching Bank, the Board of Posts, Railways, and Telegraphs launched in 1905 a scheme to organise a bank for the control of the finances of the Railways, Telegraphs, Posts and Navigations, and the management of an issue of national loan bonds for the redemption of the Peking Hankow Railways, and this scheme finally culminated in the establishment of the Bank of Communications in 1906. The year 1905 marked also the beginning of commercial banks in China. The Chekiang Railway Company, which was then a private company, founded the National Commercial Bank in Hangchow with a capital of 1,000,000 dollars, half of which was subscribed by the Railway itself, and the other half by its stockholders. In the same year was formed the Commercial Bank of China, in the following year, the Ningpo Commercial Bank, and in 1910, the Commercial Guarantee Bank of Chihli. In 1911, the Manchu régime collapsed, and with it the Ta Ching Bank. However, it was speedily reorganised as the Bank of China. From 1914 onwards the establishment of new banks proceeded at a rapid pace, and there are now about 150 banks with over 400 branch offices. The total capitalisation of Chinese banks approximates 400,000,000 dollars, but not more than 150,000,000 dollars have been paid up. Total reserve funds amount to about 20,000,000 dollars.

Of these banks, the Bank of China is the largest, having about 100 branches and sub branches, and an authorised capital of 60,000,000 dollars, and a paid-up capital of 19,760,200 dollars. Next in order comes the Bank of Communications, whose capital has reached 20,000,000 dollars, 7,713,500 dollars of which are paid up. It has about 40 branches. The Chinese Government's share in the Bank of China and the Bank of Communications has been wiped out. The Bank of China declared a net profit in 1931 of 1,837,427 dollars.

A new State bank, called the Central Bank of China, was opened in Shanghai on November 1, 1928. It is capitalised at 20,000,000 dollars and has the right to issue convertible notes, to mint and issue coins, and direct the flotation of foreign and domestic loans. The Minister of Finance is appointed Director General of the bank. The capital is supplied by the Treasury, and though shares may be issued to the public they must never exceed 49 per cent of the total capital. The name of the State bank was subsequently changed to 'The Exchange Bank of China' and a sum of 4,000,000 dollars added to the share capital.

Sino foreign banking institutions are numerous, having grown rapidly during 1921. In 1918, the Exchange Bank of China was established with Sino Japanese capital. It has a subscribed capital of 10,000,000 yen. The Italian Bank of China, the Sino French Bank, the Sino Scandinavian Bank, and numerous Sino Japanese institutions were inaugurated in 1921. The Chinese American Bank of Commerce was established by American and Chinese capitalists, with equal interests, under a special charter issued on April 12, 1920, by the Chinese Government.

On July 1, 1924, the Manchurian Official Bank, Fengtien Industrial Bank, and the Bank of the Three Eastern Provinces were amalgamated under the name of the Government Bank of the Three Eastern Provinces, with a capital of 20,000,000 dollars.

Government ordinances governing savings banks in China were first promulgated in 1908. About May in that year a savings department was organised by the Ta Ching Bank, now Bank of China. This was followed later by the establishment of special savings banks in various provinces and

other savings departments attached to commercial banks in recent years. In 1925, there were 20 such institutions with total savings deposits amounting to 38,017,942 dollars

Post Office savings banks at 11 district head offices were opened on July 1, 1919. By June 30, 1931, there were 496 establishments with savings facilities, with 131,867 depositors, and total deposits amounting to 24,993,436 dollars

Money, Weights, and Measures.

MONEY

The currency of China is on a silver basis, and consists of taels, dollars, copper cash, and bank notes. The *tael* is really a weight of silver (about an ounce) of a certain degree of fineness. Theoretically it is divided into 10 *mace*, 1 *mace* = 10 *candareens*. The denominations of the dollar are 1 dollar = 100 coppers, 1 copper = 10 cash. The *tael* varies in different parts of the country, the principal taels being (1) the *hankwan* or customs *tael*, weighing 583.3 grains (in 1928 it was equal in value to 2s 11½d), (2) the *K'up'ing tael*, weighing 575.8 grains, (3) the *Tsaoping tael*, weighing 565.65 grains. These are all called treasury taels. The principal local taels are (1) Peking or *Kungfah tael*, (2) Tientsin or *Hang Ping Hwa Pao tael*, (3) Canton *tael*, (4) Newchwang *tael* (nominal), (5) Shanghai *tael*. Different taels, about 170 altogether, are in use in every province in the country.

There is unparalleled currency confusion. Although a dollar should be equal to 100 coppers, in fact it is worth almost 350 coppers in some parts of the country, varying from day to day. In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October, 1908, commanding the introduction of a uniform *tael* currency, of which the unit must be a silver *tael* coin of .98 touch weighing 1 K'up'ing or Treasury-scale *tael* or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (*yuan*) of .90 touch and weighing 72 Treasury-weight *tael* as the unit of currency. The touch and weight of the silver subsidiary coins (50c, 25c, 20c, and 10c) were also definitely specified, while provision was made for further subsidiary coins (5c nickel, 2c, 1c, ½c, and ¼c copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but as they are at a discount in every province other than the one in which they are minted, confusion has been rendered more confounded. There are ten different varieties of dollars in circulation. A new Central Mint has now been established in Shanghai by the National Government.

As from March 10, 1933, the silver dollar became the official currency, the rate of exchange being fixed at 1 dollar = 0.715 *tael*.

In China, standards of weights, measures and length vary all over the country. Generally speaking, two kinds of standards are now in use, namely, the old and the new. The old standard was formulated from the Weights and Measures Law promulgated in 1914, establishing a double system, the standard metric unit and that based on *ying tsao ch'ih*, or 'builder's foot' for length and *Kuping tael* or *liang* for weight. The law governing the new standard was promulgated by the National Government on February 6, 1929, and it is intended to be the legal standard of weights and measures throughout China. For convenience' sake and customary usage it also established a double system; one is the standard metric unit

and the other, which is temporary in nature and to be abolished as soon as the people are accustomed to the use of standard units, is designed only for market use. The latter is derived from the former by taking one litre of Kung Sheng as one Shih Sheng, which is nearest to the Chinese customary unit of capacity 'Sheng', one half kilogramme as one Shih Chin, which is the average weight of the different varieties of 'Chin' in different localities, and one third of a metre or Kung Ch'ih as one Shih Ch'ih, which is the average length of different varieties of Chinese 'Foot' in different localities, thus constituting the so called 1-2-3 system of Chinese weights and measures based on International metric standard. Such a system as devised by the Ministry of Industry, Commerce and Labour and proclaimed by the National Government to be put into force may also have great bearing on the users of British 'Foot Pound' system by taking the following approximate value: 1 quart equals to 1 litre, 1 pound equals to $\frac{1}{2}$ kilogramme and 1 yard equals to 1 metre. The Russian and Japanese system can also be thus varied accordingly so as to fit themselves to the International System. The following table shows the old units of weight, capacity and length —

WEIGHT

10 <i>Sü</i>	= 1 <i>Hao</i>
10 <i>Hao</i>	= 1 <i>Li</i>
10 <i>Li</i>	= 1 <i>Fên</i> (Candareen)
10 <i>Fên</i>	= 1 <i>Ch'ien</i> (Mace)
10 <i>Ch'ien</i>	= 1 <i>Liang</i> (Tael) = 37.801 grammes
16 <i>Liang</i>	= 1 <i>Chin</i> (Catty) = 596.816 ..

CAPACITY

10 <i>Sho</i>	= 1 <i>Ko</i>
10 <i>Ko</i>	= 1 <i>Sheng</i>
10 <i>Sheng</i>	= 1 <i>Tou</i> = 10.354668 litres.
5 <i>Tou</i>	= 1 <i>Hu</i>
2 <i>Hu</i>	= 1 <i>Tan</i> Commodities, even liquids, such as oil, spirits, &c, are commonly bought and sold by weight

LENGTH

10 <i>Fen</i>	= 1 <i>Ts'un</i> (inch)
10 <i>Ts'un</i>	= 1 <i>Ch'ih</i> (foot) = 32 metres
10 <i>Ch'ih</i>	= 1 <i>Chang</i> = 3.2 metres.
180 <i>Chang</i>	= 1 <i>Li</i> = 576 metres = $\frac{1}{2}$ mile

By treaty between Great Britain and China, the *Ch'ih* of $14\frac{1}{2}$ English inches has been adopted as the standard, the Tael, Catty, and Picul have been fixed at $1\frac{1}{2}$ oz., $1\frac{1}{2}$ lb., $133\frac{1}{2}$ lb. avoirdupois respectively. 1 *Mow* = $\frac{1}{3}$ of an acre.

Diplomatic Representatives.

1 OF CHINA IN GREAT BRITAIN

Envoy and Minister — Quo Tai chi. (Appointed August 1, 1932)

Counsellor. — Dr. Wei Chang chen.

First Secretaries. — Tennyson Tan and Dr. Ching Lin hsia

Second Secretary. — Tsu Ming-chiu

Third Secretary. — Tish Tseng-li

Attaches — Loh Ming-sin and Fang Cheng-tien

Consul General in London — Dr. Wei Chang chen.

2 OF GREAT BRITAIN IN CHINA

Envoy and Minister—Sir M W Lampson, K C M G, C B, M V O
(Appointed October 22, 1926)

Counsellor.—E M B Ingram, O B E

Secretaries—A Holman, M C, J N Behrens, and H A Caccia

Chinese Secretary—Sir Eric Teichman, K C M G, C I E

Naval Attaché—Captain J G P. Vivian (Headquarters in Tokyo)

Military Attaché—Lt-Col V R Burkhardt, D S O, O B E

Commercial Counsellor—L B Beale, C B E (at Shanghai)

Judge—His Honour Sir P Grain, Kt (at Shanghai)

There are British Consular representatives at Peking, Amoy, Canton (C G), Changsha, Chefoo, Chung-king, Foochow, Hankow (C G), Harbin, Ichang, Mukden (C G), Newchwang, Nanking (C), Shanghai (C G), Swatow, Teng-Yueh, Tien tsin (C G), Yunnan-fu (C G), Ningpo, Kashiagar (C G), Tsinaifu, and Tsingtao

Chinese Outer Territories

Manchuria.

Manchuria, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 363,610 square miles and a population, according to the latest investigation, of 24,520,661 at July 31, 1927. Immigration from the densely crowded parts of Central China is rapidly increasing the population. In the year ending June 30, 1930, 77,000 Chinese arrived in Manchuria. Manchuria consists of 3 provinces—Liaoning (Sheng-King or Feng-tien) (area, 56,000 sq miles, population, 15,000,000), capital Mukden, Kirin (105,000 sq miles, population, 7,500,000), capital Kirin, and Heilung-chiang or the Amur province (203,000 sq miles, population, 2,500,000) with Tsitsihar (Heilung Hsien) (population 30,000) for its capital. The chief towns are Mukden, the capital, with about 250,000 inhabitants, Newchang (65,600) standing about 30 miles up the Liao river, at the mouth of which is the port of Ying-k'ou, often called Newchang. Besides Newchang, Mukden, An-tung (72,500), Tatung kou, Tiehling, Tung-chiangtru, and Fakumen are open to commerce. Other important towns are Hsin min fu, Liao-yang, Feng hwang cheng, and Taonanfu, a town rapidly risen to importance, on the border of Eastern Mongolia. In Kirin province is the town of Chang-chun (Kwangchengtze), with 80,000 inhabitants.

There is no longer a Manchu population in Manchuria. A few scattered communities alone remain. Manchuria is primarily an agricultural country, its soil is one of the richest in the world. The area under cultivation in Manchuria totals 81,718,945 acres. Beans, millet, wheat and rice are the principal crops. In 1930 the area under wheat was 2,125,000 acres (1,552,470 tons), millet, 2,890,000 acres (3,692,000 tons), soya beans, 7,000,000 acres (5,351,000 tons), kaoliang, 3,060,000 acres (5,136,000 tons). Formerly the whole of the wheat yield was exported, but of late years the flour industry has been growing with the increase in the wheat production. There are now some 40 mills in Manchuria, which turn out about 15,000,000 sacks annually. Extensive forests also abound; their estimated extent is 28,756,000 acres. The soil of certain districts—especially in the vicinity of Mukden and Harbin—is suitable for beet and flax growing, and the industry

is slowly developing Manchuria is rich in minerals, such as coal, iron, gold, silver, lead and marl for cement.

The Russian lease of Port Arthur and Talien-wan (called Dalny by the Russians and Dairen by the Japanese), and the southern extremity of the Liao-tung peninsula and the South Manchuria Railway were transferred to Japan by the Portsmouth Peace Conference, September 5, 1905. On December 22, 1905, China gave official recognition to this transfer and granted Japan the right to extend the railway from Mukden to Antung at the mouth of the Yalu river, where it connects with the Korean railway. In 1912 a branch line (78 miles) from Changchun, the northern terminus of the Japanese South Manchuria Railway to Kirin, constructed by joint Japanese and Chinese enterprise, and operated under special convention by the South Manchuria Railway, was opened to traffic. The total length of the South Manchuria Railway is 693 miles (Dairen to Changchun, main line 438 miles, branch to Port Arthur, 29 miles, branch to Newchwang, 14 miles, Fushun coal mines, 31 miles, branch to Yentai, 10 miles, and Mukden to Antung, 171 miles). On August 1, 1917, the whole of the railway system of Korea (some 1,000 miles in length) passed under the management of the South Manchuria Railway, giving the latter a through line under its own management from Fusan, the Korean port nearest Japan, to Changchun, where connection with the railway system to Harbin and thence to Leningrad is effected. Besides the South Manchuria Railway, Manchuria is traversed by the Chinese Eastern Railway (1,078 miles), the Perping Mukden Railway (723 miles), the Ssuningkai-Taonan Railway (312 miles), and a number of smaller lines (2,058 miles), total length, 35,448 miles. There are 265 post offices and 550 postal agencies.

On September 18, 1931, the Japanese army occupied Mukden. A series of military operations continued, and on February 18, 1932, the three north eastern provinces of China, together with Jehol, were, with the assistance of Japan, proclaimed an independent state under the style of Manchukuo. Japan has formally recognised Manchukuo, and a *modus vivendi* has been established with the Soviet Union. The League of Nations in 1932 sent a commission of inquiry, under the chairmanship of Lord Lytton, to inquire into the formation of Manchukuo, and in February 1933 adopted the Lytton report. No other Power has recognised the new Manchurian Free State.

Tibet

Tibet, extending from the Pamir region eastwards between the Himalaya and Kwen-lun mountains to the frontiers of China, has an area of 463,200 square miles with a population estimated at between 1,500,000 and 6,000,000. Probably 2,000,000 is near the mark. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas and assisted by five ministers. Early

in 1908 the territory of Western Szechuen and the adjoining territory of Eastern Tibet were united into a new 'special administrative area,' known as the Province of Sikang, with Batang, re named Baanfu, as capital

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier. A telegraph line, 144 miles long, connects Lhasa with Gyantse.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade marts authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla-Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. From Almora to Gartok the direction is almost due north, and from Simla to Gartok is almost due east.

For the removal of hindrances to the Indian trade a treaty was made with China in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier, for marts at Yatung, Gyantze, and Gartok for Tibetan and British merchants, for the demolition of forts on the trade routes, for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff, for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. China paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumbi valley by the British began in February, 1908. Further, no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

Sin-Kiang, or the New Dominion, consists of Chinese Turkestan, Kulja,

and Kashgaria, and comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Governor residing at Urumchi, or Tihwafu, the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Khirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Ili, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Urumchi, the subordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity. A trade agreement with Soviet Russia was signed in 1924.

In 1927, imports from India totalled 11,86,848 rupees, and exports to India 28,14,568 rupees, trade with Afghanistan in the same year was imports, 8,30,500 rupees, exports, 5,47,540 rupees, with China, imports, 19,89,850 rupees, exports, 7,37,250 rupees.

British Consul General at Kashgar —Lieut.-Colonel R. A. Lyall.

Mongolia.

The vast and indefinite tract of country called **Mongolia** stretches from the Khinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtish river. On the north it is bounded by Siberia and on the south by the outer Kan su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,875,000 square miles, and its population about 750,000 Mongols and about 100,000 other nationalities, principally Chinese and Russians. The monks (lamas) are the most important element in the population, forming 15 per cent. of the total, and over 30 per cent. of the male population. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration, and a large area of what was known as Mongolia, extending from China proper and Manchuria to the Gobi Desert, is now indistinguishable from Chinese territory, and has in fact been absorbed within Chinese administration in Manchuria. Chinese settlers are gradually invading the Gobi Desert. Irrigation alone is needed. Inner Mongolia and portions of the adjacent provinces in China proper are now divided into three provinces, Jehol, Chahar, and Suiyuan, each of which is governed by a provincial committee, appointed by the Chinese Government. The chief town or centre of population is Urga (which, since 1924, is known as Ulan Bator Hoto, i.e. 'Town of the Red Heroes'), 170 miles due south of Kiakhta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert. Urga has some 100,000 inhabitants. Kiakhta is a Siberian frontier town, and stands about 100 miles from the south end of Lake Baikal. The chief exports are livestock and animal products. The following quantities were exported in 1930: sheep's wool, 8,770 tons; pigs, 1,200,000; sheep and goats, 2,000,000. The trend of Mongolia's trade has recently changed from China to Russia, as is shown in the following table:—

	Imports		Exports	
	China Trade	Russian Trade	China Trade	Russian Trade
1927	Tukhrík 27,600,000	Tukhrík 4,000,000	Tukhrík 12,080,000	Tukhrík 16,900,000
1928	25,400,000	7,100,000	10,780,000	21,000,000
1929	8,700,000	2,300,000	6,000,000	21,500,000

The foreign trade of Mongolia in recent years has been handled by Government organisations backed by Soviet capital. The chief trading concern is the Monggo Central Co operative Society.

During the summer months motor car services cross the Gobi desert, the journey between Kalgan and Urga (1,160 road miles) occupying 4-6 days. It was inaugurated in 1917. During 1930 work was commenced on the new railway line from Tao An to Solun.

For a history of political events in Mongolia from 1912 to 1923, see THE STATESMAN'S YEAR BOOK for 1923, p. 794.

Inner Mongolia is still part of China.

Outer Mongolia—In 1924, on the death of the last Hutukhtu or theocratic ruler of Outer Mongolia, there was a revolution, as a result of which the Mongolian People's Revolutionary Government, run on Soviet lines, was established. According to the constitution adopted in November, 1924, which follows the Soviet model, the highest power is vested in a parliament (the *Great Huruldan*) which is elected by universal suffrage, male and female, over 18 years of age. It has to meet once a year at least, and alone has the power to amend the constitution. It elects from its number 30 members who form the executive committee (the *Little Huruldan*) which is responsible to it. This committee elects five of its members to a board which carries on current state affairs.

In 1932 the population of Outer Mongolia was estimated at 540,000, of whom about one sixth were Russians and some 5,000 Chinese. The Mongols are mainly herdsmen, and in 1928 were estimated to have 1,340,000 horses, 270,000 camels, 1,500,000 oxen, and 10,600,000 sheep.

There are some gold mines in the country, as well as other mineral deposits of unascertained value. Wool, skins and furs are exported, chiefly to the Soviet Union. In 1925 exports from Outer Mongolia were estimated at 24,500,000 Mexican dollars, and imports at 24,000,000 Mexican dollars. A tannery, a brick works, and a sawmill are the only industries.

Communications are chiefly by caravan route. In 1926 an agreement was reached between the Soviet Union and Outer Mongolia for the construction of a railway between Urga and Chita, but, according to the latest information, has not yet been implemented. An air service has been established between Verkhneudinsk and Urga, and there are steamer services on the Selenga and Orkhon rivers. There is telegraphic communication with the Soviet Union, and a wireless station has been established at Urga.

Since March, 1915, Mongolia has had a legal currency of its own. The present currency, introduced in 1925, is based on the *Tukhrík*, a silver coin equivalent theoretically to half an American gold dollar, and divided into 100 *Monggo*. In 1924 a state note issuing bank, the Commercial and

Industrial Bank (Mongolbank), was founded, with a capital of 175,000 Mexican dollars, which has since been increased to 3,000,000 Mexican dollars. The Soviet State Bank holds fifty per cent of the capital.

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

Tannu Tuva (Tuvian People's Republic) is an independent republic, under Soviet protection, to the north west of Mongolia, between 50° and 53° N lat., and between 90° and 100° E long. It is bounded to the East, West and North by Siberia, and to the South by Outer Mongolia.

As Uryankhai the territory now known as Tannu Tuva was considered part of Outer Mongolia until the Mongolian insurrection of 1911. Russian colonists had been settled there since 1870, and consequently the Imperial Russian Government at this time made claims to the territory. It was not included in autonomous Mongolia, and after a period of nominal independence, it was proclaimed a Russian protectorate on the outbreak of the Great War in 1914, and became virtually a department of the Ussinsk district of the Altai Province of Siberia.

During the Russian Civil War Uryankhai came again under Chinese jurisdiction, but after the Soviet occupation of Urga it was proclaimed an independent republic under the name of Tannu Tuva. The Chinese Government and the Government of the Mongol Republic set up under Soviet influence protested against its separation from Outer Mongolia, and a mixed commission was appointed to settle its status. In 1926 a Treaty of Friendship was signed by Outer Mongolia and Tannu-Tuva.

According to the Constitution adopted in 1924 supreme power is vested in the *Great Huruldan*, which is composed of district representatives elected by all citizens of 22 years of age excepting those belonging to high noble and priestly families. The *Great Huruldan* meets once a year and elects a *Little Huruldan* of 30 members, which in turn elects a President and the members of the Government, who are responsible to it. The *Little Huruldan*, which is the legislative body, meets four or five times a year.

President of the Little Huruldan — M. Tonduk.

The area of Tannu Tuva is about 64,000 square miles. The total population is about 65,000, of whom some 50,000 are Tuvians, 12,000 Russians, and the rest Chinese and Mongols. The Tuvians are a Turkic people, formerly ruled by hereditary or elective tribal chiefs.

Tannu Tuva is well watered and has much good pastoral land. The Tuvians are mainly herdsmen and cattle farmers, and the Russians in Tannu Tuva merchants, farmers, and gold prospectors. There are deposits of gold and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. The capital city is Kysylchoto (in Russian Krasny), formerly known as Khem Belder (Russian Bielotsarsk). It has some 10,000 inhabitants.

A Soviet steamer service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. There is a telegraph line connecting Kysylchoto with Soviet Russia.

COLOMBIA.

(LA REPÚBLICA DE COLOMBIA)

Constitution and Government.

THE Republic of Colombia, which in colonial days was called 'Vice royalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted December 17, 1819, together with the present territories of Panama, Venezuela and Ecuador, the State of 'Greater Colombia,' which continued for about twelve years. It then split up into Venezuela, Ecuador, and the Republic of New Granada in 1830. The Constitution of May 22, 1858, changed New Granada into a confederation of eight States, under the name of Confederation Granadina. May 8, 1863, saw another Constitution, and the adoption of the name of the United States of Colombia. The revolution of 1885 led the National Council of Bogotá, composed of two delegates from each State, to promulgate the Constitution of August 5, 1886, which abolished the sovereignty of the States, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May, 1928, abolished their right to borrow abroad without the sanction of the central Government.

The legislative power rests with a Congress of two Houses, the Senate, of about 58 members, elected for 4 years, and the House of Representatives, of about 131 members, chosen for 2 years. By the Act of 1930 the Senators are elected indirectly by departmental assemblies, at least 3 senators for each department and more according to population, the Representatives are chosen by the people in each department (one for every 50,000). Congress meets annually at Bogotá on July 20.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re election until 4 years afterwards. Congress elects, for a term of one year, two substitutes, one of whom occupies the presidency in the event of a vacancy during a presidential term. Public expenditures are supervised by the Controller General, who is responsible, not to the President, but to Congress.

President of the Republic — Dr Enrique Olaya Herrera. Elected February, 1930. Holds office from August 7, 1930, to August 7, 1934.

The ministries are those of the Interior, Foreign Affairs, Finance, War, Public Instruction, Industry and Labour, Public Works, Agriculture and Commerce, and Posts and Telegraphs.

On November 8, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognise the independence of Panama and receiving as indemnity for the Panama Canal zone 25 million dollars (5 millions sterling) and certain rights in the zone. (See Introduction of THE STATESMAN'S YEAR BOOK, 1915.) This Treaty was ratified by both countries in 1921. A mixed Commission in (1933) determining the boundary between the two.

A boundary dispute with Peru, which has lasted for over 100 years, was settled in 1928, but broke out again in 1932 with the seizure by Peruvian volunteers of the town of Leticia which had been incorporated in Colombia. Fighting broke out in 1933. Diplomatic relations with Ecuador, suspended in 1925, were resumed in 1931.

Area and Population.

The area of the Republic is estimated at about 447,536 square miles. It has a coastline of about 2,046 miles, of which 868 miles are on the Caribbean Sea and 1,178 miles on the Pacific Ocean. The area and population of the 14 departments, 3 intendencias and 7 commissaries were, according to the census of November, 16, 1928, as follows (the capitals in brackets)

	Area sq miles	Census Population, 1928			
		Males	Females	Indians	Total
<i>Departments</i>					
Antioquia (Medellin)	25,516	490,664	520,660	—	1,011,324

Vichada (Puerto Carreño)	38,507	1,119	904	8,804	11,117
Grand Total	447,536	3 890,923	3 881,210	69,867	7,841,000

Of the total population (including Indians) in 1928, 3,937,892, or 50.16 per cent, were males, and 3,913,108, or 49.84 per cent., were females. Immigration is almost negligible, foreigners in 1928 numbered 85,251, including German, 1,682, English, 1,486, United States, 1,607, Italian, 1,916, Syrian, 2,967, and Venezuelan, 14,743. Urban population totalled 2,437,848, or 31 per cent; for every 1,000 townspeople there are 2,200 country people. Population over 10 years of age numbers 5,610,715, of whom 51.57 per cent are literate. Illiterate men number 23.12 per cent., and illiterate women 25.12 per cent of those over 10 years of age. Illiterates were 68 per cent of the population at the 1918 census.

The bulk of the population lives at altitudes of from 4,000 to 9,000 feet above sea level.

The capital, Bogotá (census population, 1928, 235,421), lies 8,600 feet above the sea. The chief commercial towns, with their population in 1928, are Barranquilla (139,974), connected with the coast at Puerto Colombia

by 17 miles of railway and by road, Cali (122,847), Medellín (120,044), a coffee and mining centre, Cartagena (92,494), Manizales (81,091), Ibague (56,333), Cúcuta (49,279), Bucaramanga (44,083) Buenaventura, the principal port on the Pacific, was destroyed by fire in 1931, it is being rebuilt

The language spoken is Spanish—the purest Spanish spoken in South America.

Religion, Education and Justice

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 each. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion are permitted, so long as their exercise is 'not contrary to Christian morals nor to the law'.

Primary education is free but not compulsory. In 1931-32 there were 7,495 primary and secondary schools with 447,946 pupils, in 1930-31 there were 25 industrial schools with 1,392 children, 6 art schools with 399 pupils, 17 normal schools with about 1,000 pupils. The oldest University is that of Bogotá (founded 1572). This and the School of Mines at Medellín are national institutions. The other Universities are maintained by Departments, they are the Universities of Antioquia at Medellín (founded 1822), with 1,000 students, of Bolívar at Cartagena, of Cauca at Popayán, and of Narino at Pasto.

A new judicial code, published in the Diario Oficial, October 24, 1931, went into effect January 1, 1932. The Supreme Court, at Bogotá, is divided into 4 chambers—civil cassation, criminal cassation, general business and civil 'de unica instancia'. Each judicial district has a superior court of 3 judges or more. By a decree of November 12, 1932, married women were granted full control of their property, and a share of property jointly acquired since marriage.

Finance

Ordinary revenue and expenditure for 6 fiscal years in gold pesos (normally 1 gold peso = 97 cents, U S, but in 1931 its value was fixed at 95 cents) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1927-28	63,267,488	55,607,764	1930-31	49,357,917	61,991,755
1928-29	75,514,880	52,384,199	1931-32	43,694,101	52,208,930
1929-30	75,238,928	84,025,618	1932-33 ¹	52,435,600	32,435,600

¹ Estimates

The main items of ordinary expenditure in 1931-32 were: Interior, 8,695,328 pesos; Finance, 20,342,029 pesos; War, 3,987,400 pesos; National Education, 1,482,971 pesos; Public Works, 8,052,868 pesos; Posts and Telegraphs, 4,361,319 pesos; Hygiene, 2,583,002 pesos.

The external debt on June 30, 1932, stood at 162,178,032 gold pesos, divided as follows: Central Government, 79,777,632 pesos; Departments, 60,183,500 pesos; Municipalities, 22,218,900 pesos. This does not include 48,048,500 pesos borrowed abroad by various banks, equal to 16,951,332 dollars (U S) and 75,728,102 French francs. About 88 per cent are dollar obligations. The national internal debt on June 30, 1932, was 44,254,571 pesos. On February 12, 1932, the Government suspended the transfer abroad of the sinking fund payments on its external debt, but continued interest transfers on the national and the bank debts, the external debts of Departments and Municipalities are in default.

Defence.

Military service is compulsory between the years of 21 and 45. Service with the colours is for 1 year. The permanent army consists of 3 divisions of 2 brigades of 2 regiments of infantry, total 12 infantry regiments, 2 cavalry regiments, each of 4 squadrons, 1 artillery regiment, 1 engineer battalion, 1 transport battalion of 3 companies. The peace effective in 1930 was 499 officers and 8,000 other ranks. In war time every fit Colombian is compelled to serve, and the war effective is about 50,000. The infantry are armed with rifles of the improved Remington pattern, with the French Gras rifle, and with the 88 pattern Mauser.

Colombia has 1 seagoing gunboat, 3 coastguard patrol vessels built in 1925, 5 river gunboats, and several motor launches for customs services. Three of the river gunboats, armed with one 3 in. and four machine guns each, were built in the United Kingdom for the Colombian Government in 1930.

Production and Industry

Very little of the country is under cultivation but much of the soil is fertile, and is coming into use as roads improve. Colombia is the largest producer of mild coffee, demand for which is unaffected by over production in Brazil. Crops are grown by smallholders, and are picked all the year round. Quality is carefully guarded, importation of foreign seeds has been forbidden since 1923. Exports, 1931, 3,017,399 bags of 60 kilos. United States takes over 90 per cent of the total. Tobacco is also grown. Cotton area is 150,000 acres. Cocoa, sugar (about 40,000 metric tons annually), vegetable ivory, tagua (or vegetable ivory nut), and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, exports, 1931, 5,424,000 stems. About one third of the bananas imported into the United Kingdom are from Colombia. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena River, but little or no wood of any sort is exported. Forest lands total 150 million acres.

Colombia is rich in minerals, and gold is found in all the departments, exports in 1931, 17,976,000 pesos, in 1930, 9,063,057 pesos. The richest mines are in Antioquia, Cauca, Caldas, Tolima, Narifio, Choco, and Cundinamarca. Other minerals are copper, lead, mercury, cinnabar, manganese, emeralds, and platinum (first discovered in Colombia in 1735), which was long abundant in the alluvial deposits of the Choco River but exports (valued at 1,220,000 gold pesos in 1931) are dwindling. The working of the emerald mines is a Government monopoly or Government-controlled, exports are rigidly controlled, only the finest stones being sent abroad. The chief mines are those of Muzo (Government-owned) and Chivor (American owned). The country also has coal, iron, limestone, sand, and fireclay deposits, so that in some parts it is highly favourable for the development of metallurgical industries. The extraction of salt from the mines in Zipaquirá and the evaporation at the numerous natural salt pans along the Caribbean coast are a Government monopoly, leased to the Banco de la República, annual revenue is about 1,500,000 gold pesos. There are extensive deposits of coal of high quality, especially near Cali. Petroleum has recently been found, production has risen from 447,744 barrels in 1924 to 18,236,000 barrels in 1931; exports, 16,989,000 barrels. The output is piped from the oilfields to the coast.

Commerce.

Exports and imports were placed in 1931 under Government control, to protect the foreign exchange value of the gold peso

Imports and exports for 6 years (5 gold pesos = 17) —

Year	Imports	Exports	Year	Imports	Exports
	Gold pesos	Gold pesos.		Gold pesos	Gold pesos
1926	110,690,629	111,717,249	1929	126,876,990	126,871,945
1927	125,765,863	108,998,722	1930	62,441,091	112,708,549
1928	148,546,867	133,606,482	1931	41,056,000	98,009,000

Trade by principal countries (1931) in pesos gold —

Imports	1931	Exports	1931
United States	17,243,520	United States	81,432,161
United Kingdom	6,598,000	United Kingdom	2,062,154
Germany	5,112,000	France	2,004,224
France	2,161,000	Holland	2,924,621
Belgium	1,717,000	Germany	2,764,493
Holland	1,717,000	Canada	4,454,273

Important articles of export (1931) were, in gold pesos — Coffee, 55,174,000, petroleum, 15,862,000, bananas, 4,851,000, gold, 17,476,000, platinum, 1,220,000, hides, 1,667,000. The chief imports are textiles, food stuffs, metals, and agricultural and mining implements.

Total trade between United Kingdom and Colombia for 5 years (Board of Trade figures) —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Colombia into U K	2,276,072	2,106,245	1,897,085	764,126	880,860
Exports to Colombia from U K	3,654,126	3,240,855	1,552,756	1,352,245	1,528,713
Re exports to Colombia from U K	1,956	62,672	31,060	25,512	18,006

Shipping and Communications.

Owing to the mountainous character of the country, the construction of arterial roads and railways is both costly and difficult. The roads are generally simple mule tracks, though some progress has been made by the Government in the construction of main roads, railways and ropeways. The overhead ropeways connecting Mariquita with Manizales is the longest in the world. Total length of motor highways, 1,865 miles, a new road is now under construction connecting all parts of the country.

In Colombia there are 15 lines of railway (11 national, and 3 British companies), with a total length (1931) of 1,432 miles, about 1,900 miles are under construction. Of the total, 614 miles have a gauge of 3 ft., the rest a metre gauge. The national lines were placed in 1931 under the administration of a non-political council. Most of them are small disconnected lines serving principally as feeders to the Magdalena river, which is the main traffic route between the Caribbean and the interior.

A daily airplane service connects Bogotá with Barranquilla on the Atlantic coast; from there a bi-weekly service (mail and passengers), reaches New York in 3½ days.

The Magdalena river is subject to drought and despite possible minor improvements, navigation is always impeded during the dry season. That river is navigable for 900 miles, small steamers ascend to La Dorada, 592 miles from Barranquilla. A British river-transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German, and native, ply on the rivers. A project is on foot to open the Bocos de Canevia to navigation by ocean steamers, converting Barranquilla into an ocean port.

In 1930, the post office handled 15,286,583 letters and post-cards and 15,659,322 packets of printed matter, samples, and business papers. Number of offices, 1,075. There are 23,020 miles of Government telegraph lines, number of offices, 880. Telephone system is being extended, wireless telephony is utilized between Colombia, Chile and Argentine.

International cable service to all Latin America and the United States is furnished by the lines of All America Cables which touch Colombia at Cartagena, Barranquilla and Buenaventura. From the last point a connecting land line, operated by the company, extends to Bogotá *via* Cali. The company is installing wireless telephone and telegraph stations at Bogotá and Medellín for North American and European service, the Marconi Wireless has a station in Bogotá covering points in the interior as well as abroad.

Money, Weights, and Measures

Under the Law of June 12, 1907, the monetary unit was a gold peso equal to one fifth of a pound sterling and of proportionate weight, the fineness being the same it equalled 97.3 cents, U.S. After Great Britain's departure from the gold standard, the gold peso on September 25, 1931, was linked to the dollar (U.S.) at the rate of 105.25 pesos = 100 dollars, 1 peso = 95.01 cents (U.S.). Gold coins are 2½, 5, and 10 pesos. Silver coins are (900 fine) the half peso, and 20 and 10 centavos. Nickel coins for 1, 2, and 5 centavos are legal tender. There are also notes representing gold pesos of 1, 2, 5, and 10 pesos respectively. On June 30, 1932, the total currency of Colombia consisted—gold coinage, 6,340,000 pesos, bullion, 2,443,000 pesos, nearly all in the Banco de la República; central bank notes, 19,153,000 pesos; Treasury notes, 7,931,000 pesos, silver and nickel coinage and certificates, 13,551,000 pesos, Treasury bonds, 84,000 pesos, other domestic specie, 51,000 pesos, foreign specie, 13,000 pesos, making a total of 49,518,000 pesos. Gold reserves on June 30, 1932, were 8,768,000 held at home and 7,502,000 held abroad by the Banco de la República, all gold is now held in the Banco de la República total of 16,270,000 pesos.

On July 23, 1923, the Banco de la República was inaugurated as a central bank. The capital and reserves (June 30, 1931) amount to 14,102,000 pesos, total assets, 43,583,850 pesos. It has the exclusive privilege until 1943 of issuing banknotes in Colombia. Its note issues must be covered (law of December 1, 1931) by a reserve in gold or foreign exchange of 50 per cent. of their value (later reduced to 30 per cent.), deposits are to be covered by a special currency reserve up to 25 per cent. of their total to turn their gold over to the Central Bank, which has sole power, through a Central Exchange Board, to buy and sell gold and foreign exchange.

The Agricultural Mortgage Bank of Bogotá, formed by the consolidation of the mortgage departments of 5 principal banks in 1925, was supplemented in 1931 by the Agrarian Credit Bank with capital of 10 million pesos subscribed by Government, Departments, Municipalities and others.

There are 21 commercial banks with total paid up capital and reserves (June 30, 1932) of 36,018,000 pesos, including 4 foreign (3 English, 1

Canadian and 1 American) commercial banks and 2 native mortgage banks This does not include the Banco de la República

The metric system was introduced into the Republic in 1857 In custom-house business the kilogramme, equal to 2 204 avoirdupois pounds, is the standard In ordinary commerce the arroba, of 27 5 pounds, or 12½ kilos, the quintal, of 4 arrobas, or 50 kilos, and the carga, or "mule load," of 2½ quintals, or 125 kilos, are generally used The Colombian libra is equal to 1 102 pound avoirdupois The Colombian vara, or 80 cm, is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard

Diplomatic and Consular Representatives.

1 OF COLOMBIA IN GREAT BRITAIN

Minister Plenipotentiary —Alfonzo Lopez

Counsellor —Jorge Garces

Secretary —Manuel Aya

Attaché —Bernardo Samper

Commercial Attaché —Jose Medina

Consul General —Alejandro Lopez

There are consuls or vice-consuls at Liverpool, Bristol, Glasgow and Hull

2 OF GREAT BRITAIN IN COLOMBIA

Envoy Extraordinary and Minister Plenipotentiary —Spencer Stuart
Dickson Appointed February 12, 1930

There are vice-consuls at Barranquilla, Bogota, Cartagena, Pasto, Medellin, Manizales, Santa Marta and Cali, and consular agents at Honda and Buenaventura.

Statistical and other Books of Reference concerning Colombia.

COSTA RICA.

(REPUBLICA DE COSTA RICA)

Constitution and Government.

THE Republic of Costa Rica (literally the 'Rich Coast'), an independent State since the year 1821, and forming from 1824 to 1829 part of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power is now vested in a single chamber called the Constitutional Congress, and made up of 43 deputies, one for every 8,000 inhabitants. The members of the Chamber are elected for the term of four years, one half retiring every two years. The President is elected for four years. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is, by the Law of July 26, 1925, secret, direct and free. Diplomatic relations with Panama, severed since 1921, were resumed October, 1928.

President of the Republic — Dr Ricardo Jiménez Oreamuno, elected on February 7, 1932, assumed office May 8, 1932.

The administration normally is carried on by seven Secretaries of State, appointed by the President, who direct the departments of Interior and Police, Foreign Affairs; Justice, and Public Worship, Education, Public Security; Finance and Commerce, Public Works and Hygiene and Public Health.

Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces, San José, Alajuela, Heredia, Cartago, Guanacaste,

caste, Puntarenas, and Limón The last Census, taken in May, 1927, showed a population of 471,525, made up as follows:—

Province	Population	Province	Population
San José	158,183	Guanacaste	51,142
Alajuela	97,577	Puntarenas	24,739
Heredia	88,407	Limón	32,278
Cartago	70,199	Total	471,525 ¹

¹ There are about 3 500 aborigines (Indians).

Estimated population on January 1, 1932, was 527 690

The vital statistics for four years were as follows —

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1928	8,517	23,109	11 332	11 777	8,858	8,420
1929	8,098	22,662	11,820	10 893	8 506	8 024
1930	2,975	23,650	11,225	12 425	6 707	6 957
1931	2,933	23,838	12,567	11 262	5,247	4,850

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (population, 1932, 55,857, with suburbs, 65,905), and in the towns of Alajuela (9,417), Cartago (17,277), Heredia, with suburbs (13,886), Liberia (8,387), Puntarenas (8,028), and Limón (15,982) The last-named, on the Caribbean coast, is the country's chief seaport There are some 18,000 coloured British West Indians, mostly in Limon Province, on the banana farms The native Indian population is dwindling

Spanish is the language of the country

Religion and Education

The Roman Catholic is the religion of the State, but there is entire religious liberty under the Constitution The Archbishop of Costa Rica has under him the Bishop of Alajuela

Elementary instruction is compulsory and free Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds In 1932 there were 513 elementary schools with 1,882 teachers and 50,188 enrolled pupils For secondary instruction there are at San José a lyceum for boys with 695 pupils and 40 instructors, and a college for girls with 371 pupils and 46 teachers A normal school established in 1915 at Heredia has 700 pupils and 28 teachers The towns of Cartago and Alajuela have each a college Expenditure on education, 1931, 4,086,528 colones

Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation There are also subordinate courts in the separate provinces, and local justices throughout the Republic Capital punishment cannot be inflicted In 1931 there were 2,724 criminal cases, of which 751 were convicted, and 6,280 cases of misdemeanour, including 3,561 drunk convictions, there were 5,277 civil cases

Finance.

The revenue and expenditure for five years have been as follows (nominally, £1 sterling = 10 45 colones, 1 colon = 46½ cents, U S, but since 1926 it has been stabilized at 25 cents, U S) —

—	1928	1929	1930	1931	1932 ¹
	colones	colones	colones	colones	colones
Revenue	33,284,521	35,395,988	27,468,498	24,750,462	26 407 046
Expenditure	28,377,295	36,220,066*	32,513,818*	27,570,946	24,865,179

¹ Estimates

* Excluding provision for amortizing the public debt

Revenue in 1931, included customs revenue, 12 350,142 colones, liquor monopoly 3,417,356, and Pacific Railway 1,940,000 colones (gross). The largest items of expenditure are finance (about 12 per cent), public instruction (17 per cent.), and internal development (16 per cent). Military expenditures were 1 73 per cent of the total.

The foreign debt of the Republic outstanding on January 1, 1932, was 74,406,093 colones, made up of gold refunding bonds, 1911, 1,507,740^l, the French Loan of 1911 (in liquidation), 5,561,000 (pre-War gold) francs, a U S loan of 1926 7,284,000 dollars, Pacific Railway bonds, 1,746,000 dollars (U S), and 78,447^l due to an English construction company. The internal debt amounted to 27,823,237 colones.

Defence.

Costa Rica has an army, including reserve and national guard, of 150,485 officers and men, of whom in 1929, 50,485 were enrolled and organized in 33 battalions to be called out on mobilization. The standing and active army is limited to 500 by a convention reached in 1923 by the States of Central America. Its strength in 1930 was 321. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

Production and Industry

Agriculture is the principal industry. The cultivated area is about 1,039,883 acres, grass lands cover 6,552,000 acres. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The principal agricultural products are coffee, of which 23,014 metric tons were exported in 1931-32, bananas 5,079,944 stems, and cocoa, 6,599 metric tons. Coffee and bananas account for nine-tenths of the exports. Maize, sugar cane, rice, and potatoes are commonly cultivated. About 5,000 acres are under tobacco. The distillation of spirits is a government monopoly. The live stock, in 1929 consisted of 398,737 cattle, 84,563 horses, 83,174 pigs and 8,177 mules. The second industry of importance is that of gold and silver mining on the Pacific slope. Gold output, 1931, was valued at 32,865 dollars, U S. There are also deposits of quartz, alabaster, granite, oil, alum, slate, onyx, and mercury, and sulphur and copper also exist, but mining in the Republic is not very fully developed.

There were (1929) officially enumerated 6,532 factories and industries in the Republic, all small, including 144 cigar and cigarette factories, 308 cheese-making establishments, 151 hydraulic sawmills, 68 candle-making factories and many coffee drying establishments, starch, broom and wood-work.

factories The most important industries are shoes, soap, and candles. Electricity, derived from water power in the highlands, is widely used as motive power, it was nationalized in 1928

Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (at par 10 45 colones = £1, and 1 colon = 46 5 cents, U.S., but since 1926 it has been stabilized at 25 cents, U.S.) —

—	1927	1928	1929	1930	1931
	Colones	Colones	Colones	Colones	Colones
Imports	65,243,186	71,570,830	79,171,543	43,884,360	34,723,124
Exports	72,238,831	78,548,848	72,671,548	65,833,000	57,116,888

The value of the chief imports for 1929 and exports for 1931 was as follows (19 57 colones = £) —

Chief Imports	1929	Exports	1931
	£		£
Cotton . . .	501,737	Coffee . . .	2,169,807
Iron and steel other than machinery . . .	189,871	Bananas . . .	631,031
Flour . . .	191,176	Cacao . . .	143,471
Mineral oil and derivatives . . .	162,400	Gold and silver bullion . . .	16,027
Motor cars and trucks . . .	153,861	Timber . . .	8,095
Silk goods . . .	100,595	Fruit and vegetables . . .	7,220
		Hides and skins . . .	15,000

Of the import value in 1931, 52 per cent was from the United States, 10 per cent from Germany, 12 per cent from the United Kingdom, 7 6 per cent from Central and South America. Of the value exported in 1931, 60 per cent went to the United Kingdom, 23 per cent to the United States, 11 to Germany, and 8 per cent to Latin America.

Total trade between the United Kingdom and Costa Rica (Board of Trade Returns) for 5 years —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Costa Rica into U K	2,859,040	2,559,687	2,799,284	2,384,834	1,348,809
Exports to Costa Rica from U K	394,883	408,641	162,311	135,021	188,778
Re-exports to Costa Rica from U K	8,372	8,879	4,905	4,086	4,870

Shipping and Communications.

No official figures are available as regards Costa Rican shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1931, there entered the ports of the Republic 514 ships of 1,290,853 tons, and cleared, 510 ships of 1,283,900 tons. Nearly all the steamers of the United Fruit Company are under the British flag.

The railway system connects San José with Limón, the Atlantic port, and has been extended to connect the capital with Puntarenas, the Pacific port. The length of railway is 418 miles—the Costa Rica Railway, 189 miles (main

line and branches, San José to Limón, 103 miles), the Pacific Railway (state owned), 81 miles (San José to Puntarenas, 73 miles), the Northern Railway, 75 miles, and the United Fruit Co Railway, 67 miles. When the railway system is completed, through rail communication will be established between Port Limón and the new port of Almirante in Panama. About 130 miles of motoring roads are now open.

In 1931 there were 211 post offices, air mail service between San José and Puntarenas, and with Central America and the United States was established in 1930.

There are about 3,000 miles of telegraph lines, with 205 telegraph offices. On December 31, 1928, there were 2,560 telephones, the telephone lines had a length of about 1,387 miles. Wireless telegraphy is working from Limón to Bocas del Toro (Panama) 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. The Government has a large wireless station at San José, and a small one at Colorado (mouth of R. San Juan, near Nicaraguan border). There is an international wireless station at Pataiso of high power, it is open for public service.

Banking and Credit

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It was authorised (January, 1932) to issue up to 25,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds, unissued balance of Costa Rica Gold Refunding Bonds of 1911, and other Government securities). The Exchange Control Department, founded in November 1922, is authorised to purchase and sell New York Bank drafts at a fixed rate of 400 per cent (4 to 1), and to issue and to receive in exchange for such drafts its own notes. On July 29, 1932, the Department had balances at New York bankers or in hand of 163,511 U.S. dollars gold. The total circulation of the country on May 31, 1932, was Banco Internacional de Costa Rica, 22,816,000 colones, Exchange Control Department, 721,389 colones, silver certificates, 689,020 colones, silver coins, 804,693 colones, copper, 710,000 colones. Total, 25,741,102 colones.

The National Insurance Bank—a Government bank which has a monopoly of new insurance business—reported July 31, 1932, total insurance written amounting to 62,244,006 colones. The Mortgage Loan Bank on that date, with capital and reserves of 1,800,000 colones, had mortgage loans outstanding of 21,495,016 colones.

Money, Weights, and Measures.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, 900 fine (value about 22 *9d* at par or 46.5 cents, U.S.). The colon since 1930 has been practically stabilized at 1 colon = 25 cents, U.S. Gold coins have, however, disappeared from circulation. Silver coins are 1 colon, 50 centimos, 25 centimos. There are copper coins of 10 centimos, 5 centimos, 1 centimo, and a nickel coin of 2 centimos.

The metric system is legally established and now in use, but in the country districts the following old Spanish weights and measures are found —

The <i>Libra</i>	= 1 014 lbs avoirdupois
„ <i>Quintal</i>	= 101 40 „
„ <i>Arroba</i>	= 25 85 „
„ <i>Fanega</i>	= 11 bushels (imperial bushel).

On January 15, 1921, the Republic adopted as its standard time that of the meridian 90 degrees west of Greenwich.

Diplomatic and Consular Representatives.

1 OF COSTA RICA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary for Europe—Vacant
Consul General—José Vargas Porras

There are Consular Representatives at Birmingham, Cardiff, Glasgow, Manchester, Southampton and Swansea

2 OF GREAT BRITAIN IN COSTA RICA

Envoy Extraordinary and Minister Plenipotentiary and Consul-General
 —Sir Josiah Crosby, K B E, C I E (who is also Minister at Panama, where he resides) Appointed July 16, 1931.

Consul—F N Cox, M B E (San José)

CUBA.

Constitution and Government

CUBA, except for a brief period of British occupancy in 1762–63, remained a Spanish possession from the date of its discovery by Columbus until December 10, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent State. A convention which assembled on November 5, 1900, drew up a constitution which was adopted February 21, 1901, under which the Island assumed a republican form of government, with a President, Vice President, a Senate and a House of Representatives. A law was passed in Washington authorising the President of the United States to hand over the government to the Cuban people upon the undertaking that they should conclude no treaty with a foreign power that would endanger the independence of Cuba, that no debts should be contracted for which the current revenue would not suffice, that the United States should have certain rights of intervention, and be granted the use of Naval Stations. On June 12, 1901, these conditions were accepted. On February 24, 1902, the election of the President and Vice President took place, and the control of the Island was formally transferred to the national government on May 20. The coaling station of Guantanamo Bay was leased to the United States for 2,000 dollars annually, on July 2, 1903. A reciprocal commercial

treaty, December 27, 1903, further strengthened the ties between Cuba and the United States. After political disturbances, an American Commission formed a provisional government in August, 1906, which was continued until January 28, 1909, when the national government was resumed after the institution of electoral reforms. A constitutional convention was convened March, 1928, and approved various changes in the constitution including a proposal to increase the President's term to 6 years without right of re-election. These changes came into effect on May 11, 1928, and, among other things, conferred upon women over 21 years of age the right to vote.

President—General Gerardo Machado y Morales. Inaugurated (second term) May 20, 1929, term expires May 20, 1935.

There is a Cabinet consisting of the Secretaries of State, of Justice, of War and Marine, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, Sanitation and Charity, and of Telegraph and Posts (created in 1925).

The National Congress is made up of a Senate of 36 members and a House of Representatives (126 members, 1 for every 25,000 of the inhabitants). The latter, like the Senators, sit for six years (one-half elected every 3 years), but after 1933 senators will sit for nine years.

The country is divided into six provinces and 119 municipalities. The province is ruled by a Governor elected indirectly by the people and a Council, and the municipality by an Alcalde (Mayor), and an elected municipal council. Havana, the capital, was made a Federal District in 1931, with an Alcaldé and Council appointed by the President.

Area and Population

Cuba has an area of 44,164 square miles (41,634 square miles for the island of Cuba, 1,180 square miles for the Isle of Pines, and 1,350 square miles for the other islands), with an estimated population, on December 31, 1930, of 3,688,174, excluding 63,478 tourists and 12,219 immigrants. About 68 per cent are white. The area, population, and density of population of each of the six provinces, on that date, were as follows—

Province	Area	Population (December 31, 1930)	Pop. per sq mile
	Square miles		
Havana	3,170	971,466	306.4
Pinar del Río	5,206	824,066	62.2
Matanzas	3,256	849,562	110.4
Santa Clara	8,357	787,449	95.3
Camagüey	10,064	271,286	26.9
Oriente	14,211	924,345	65.0
Total	44,164	3,688,174	82.4

The language is Spanish, though English is widely understood.

The chief towns (with population, excluding suburbs 1930) are Havana, 589,079, Cienfuegos, 39,946, Camagüey, 48,773, Santiago de Cuba, 44,976, Guantánamo, 14,199, Santa Clara, 26,740, Manzanillo, 24,670, Pinar del Río, 17,563, Sancti Spiritus, 30,419; Trinidad, 13,851, Cárdenas, 29,304.

Justice and Religion.

There is a Supreme Court in Havana and a Court of Appeal in each of the Provinces. The Provinces are divided into judicial districts, with

courts for civil and criminal actions, with municipal courts for minor offences. The Civil Code guarantees aliens the same property and personal rights as are enjoyed by natives. There is no State Church, though Roman Catholics predominate.

Education

Education is compulsory and free. In the year ending June 30, 1932, the 8,816 public schools had 7,573 teachers, and 434,279 children. There were also 67 travelling teachers who taught, in 145 communities, 3,089 children, 94 night schools for working people with 7,393 pupils. There were also 364 private schools with 1,483 teachers and 26,622 pupils. In each province the Government maintains a special Institute for advanced education, and normal schools for training teachers. Near Havana there is a special school with a staff drawn from English public schools, on which the school is modelled. University instruction is given at the University of Havana (founded on September 12, 1721). In 1929-30, it had 4,795 students, of whom 2,303 were studying medicine; it was closed in 1931, on account of political disorder.

Cuba has 58 libraries containing 622,461 volumes. There are 193 periodicals published, including 50 dailies, 44 weeklies and 46 monthlies.

Finance

Revenue and expenditure (budget estimates) for 5 years —

	1928-29	1929-30	1930-31	1931-32	1932-33
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	84,400,000	85,450,000	76,700,000	60,381,491	51,700,000
Expenditure	84,387,210	85,392,151	76,777,530	60,381,494	51,475,213

The principal items of income anticipated in the budget for 1931-32 were — Customs Revenue, 23,787,500 dollars; land duties, 22,682,000 dollars; National Lottery 2,400,000 dollars; posts and telegraphs, 2,515,500 dollars. The principal items of expenditure were Debt redemption and interest, 8,067,285 dollars (5,808,300 dollars external and 2,158,985 dollars internal); War and Marine, 10,121,907 dollars; Instruction, 9,566,015 dollars; public works, 2,275,287 dollars.

The debt of the Republic of Cuba on January 31, 1932, amounted to — Foreign debt, 151,067,140 dollars, and internal debt, 7,865,900 dollars.

Defence.

The army is composed of 700 officers and 11,700 men, organized in 6 cavalry regiments, 7 infantry battalions and 3 batteries with auxiliary services. The navy consists of 2 cruisers (*Cuba* and *Patria*), 5 gunboats, an armed transport, and about a dozen coastguard vessels of small size. The strength of the navy is 1,000 men, 150 officers and 25 cadets. The air force consists of 116 men.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. Cuba is the largest producer of sugar in the world. In July, 1929, there were 163 sugar mills. Sugar plantations cover 1,600,000 acres. The sugar crop was in 1929-30, 4,787,676 tons, in 1930-31, 3,120,796 tons; and in 1931-32, 2,593,361 tons. Exports in 1930, 3,353,600 tons, in 1931, 2,638,490 tons. By the 'Chadbourne Agreement' of December 8, 1930, Cuba agreed to segregate its surplus stocks of 1,434,076

tons and to market for five years no more than 3,400,000 tons annually, plus 20 per cent of its surplus. Production of raw sugar in recent crop years has been limited by presidential decree, for 1933, to 2,000,000 tons. Exports of refined sugar, 284,171 tons. The production of molasses in 1930-31 amounted to 129,332,412 gallons. Exports, 1930, chiefly to the United States, 160,000,000 gallons. Tobacco exports in 1930 — cigars, 72,483,000 (8,109,683 dollars), cigarettes, 95,391,000 (254,261 dollars), leaf tobacco, 55,342,341 lbs (24,293,381 dollars). Domestic consumption in 1930 was valued at 26,920,211 dollars. Total tobacco exports, 1931, 22,932,145 dollars, 1930, 33,540,575 dollars. Tobacco is grown principally in the famous Vuelta-Abajo district, near Pinar del Rio. Coffee production, chiefly from the Province of Oriente, is reviving. 1931, 54,986,500 kilos, 1930, 47,362,900 kilos. The principal fruits exported are pineapples, bananas, citrus fruit, and coconuts. Cuban fisheries had an output in 1930 valued at 4,442,949 dollars. Output of sponges, 1930, 1,111,708 dozen.

In 1930, the live stock in the island included 4,338,819 head of cattle, 629,112 horses, 89,389 mules, 101,737 sheep and 590,912 swine.

Cuba has forest lands, many of which are in private ownership. State forests total about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar boxes, and mahogany is exported; hard woods are used for railway sleepers, carts, ploughs and other local purposes.

Iron ore abounds, total exports 1930, 25,001 tons. Copper (21,950 short tons produced in 1932), manganese (exports, 2,148 tons in 1930) and gold are also worked. Six salt deposits yield about 50,000 tons annually.

Commerce.

The value of the imports and exports (including bullion and specie) for 5 years were as follows (the Cuban peso = the U S dollar) —

	1927	1928	1929	1930	1931
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports	257,384,062	212,816,812	216,215,113	162,452,268	80,052,504
Exports	24,867,706	278,069,689	241,622,760	167,410,669	118,866,553

The imports and exports were distributed as follows —

Countries	Imports from		Exports to	
	1930	1931	1930	1931
	Dollars	Dollars	Dollars	Dollars
United States	91,872,214	45,939,647	116,050,639	89,073,648
Other American Countries	12,891,703	8,504,141	9,450,598	5,590,597
Germany	6,102,925	3,024,015	2,181,899	1,530,814
Spain	7,588,587	4,181,442	2,484,715	1,141,024
France	5,444,805	2,848,997	4,047,083	2,004,184
United Kingdom	8,860,142	8,976,361	25,469,874	16,552,068
Other European countries	10,901,919	5,560,875	5,441,890	1,712,809
All other countries	18,774,973	9,077,614	2,284,271	1,209,559
Total	162,452,268	80,111,592	167,410,669	118,866,553

The principal exports are sugar and tobacco, the principal imports foodstuffs, earthen and ceramic products, machinery, metals and metal manufactures, and chemicals

In 1931, the United Kingdom imported from Cuba 3,247,739¹/₂ worth of sugar, and 810,122¹/₂ worth of cigars, and exported to Cuba 104,776¹/₂ worth of cotton piece goods

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years —

	1928	1929	1930	1931	1932
Imports from Cuba into U K.	10,239,566	7,934,001	6,872,033	4,292,075	5,335,764
Exports to Cuba from U K	1,649,156	2,026,488	1,282,796	653,821	695,101
Re exports to Cuba from U K	41,394	53,996	31,883	18,625	22,994

Shipping and Communications

In 1930, 5,543 vessels of 22,997,053 gross tons entered and cleared the ports of the Republic in the foreign trade In the coastwise trade (1930) 8,295 vessels entered and cleared

In Cuba there were in 1929, 3,057 miles of railway—the United Railways of Havana, 1,393 miles and the Cuba Railway, 778 miles, being the greatest systems The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east The larger sugar estates have extensive private lines connecting them with the main lines

There were 1,990 miles of Government highways open to traffic in 1930, of which 846 miles are first-class The new and impressive Central Highway, traversing the island for 706 miles from Pinar del Rio to Santiago and costing 101,123,000 dollars, was opened February 24, 1931 There are 463 post, 346 telegraph offices, and 150 radio and radio-telegraph stations, there are ten wireless stations operated by the Government There are 10,939 miles of telegraph wires The telephone system (1929) had 74,584 instruments and 239,417 miles of wire Direct telephone connection with American and European cities has been maintained since 1921 Air mail service between Cuba and Mexico, and between Cuba and New York, was established in 1930, air service between domestic points is highly developed

Currency and Banking.

On November 7, 1914, a law was published authorising a new coinage issue in Cuba with a gold peso (equal to the U S gold dollar) of 1 6718 grammes (1 5046 grammes fine) as the monetary unit The gold coins are the 20, 10, 5, 4, 2 and 1 peso pieces, the 20, 10 and 5 pesos pieces are of the same weight and value as the corresponding United States gold coins Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued.

The coinage of gold is unlimited, but silver must not be minted to the value of more than 12,000,000 pesos The extent of the nickel coinage is determined by the National Executive. The United States coinage is legal tender

The total amount of currency on January 1, 1932, was 77,445,781 dollars, of which 45,364,780 dollars were United States bank notes, amount of the latter in actual circulation was 37,536,821 dollars

Banking is largely in the hands of the Royal Bank of Canada, the National City Bank of New York, the Chase National Bank of New York, the Bank of Nova Scotia, and the Banco del Comercio. Total number of banks and branches is 169. Total deposits, June 30, 1931, 134,390,848 dollars, compared with 144,696,522 dollars the previous year.

The metric system of weights and measures is in use.

Diplomatic and Consular Representatives.

1 OF CUBA IN GREAT BRITAIN

Envoy and Minister —Dr. Guillermo Patterson (August 13, 1925)

Counsellor —Dr. G. S. Solar

Secretary —Dr. Alberto Diaz Pardo

Commercial Attaché —Marino Pérez

Consul (in London) —Francisco Saúche

There is a Consul General in Liverpool, and Consuls in London, Birmingham, Glasgow, Hull, Belfast, Cardiff, and other towns.

2 OF GREAT BRITAIN IN CUBA

Envoy and Minister —Herbert A. Grant Watson, C.M.G. (appointed January 30, 1933)

Naval Attaché —Captain P. Macnamara, R.N.

Military Attaché —Lt.-Col. M. F. Day, M.C.

Consul General —H. W. Border

There are Vice Consuls at Cienfuegos, Havana and Santiago de Cuba.

CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA)

THE term Czechoslovaks comprises two branches of the same Slav nation the Czechs (pronounced Tchechs) of Bohemia, Moravia, and Silesia, and the Slovaks of Slovakia.

The Czechoslovak State came into existence on October 28, 1918. On that day the *Národní Věbor* (National Council) took over the government of the Czechoslovak countries, including Bohemia, Moravia, Silesia, and Slovakia, which had hitherto belonged to the former Austro Hungarian Monarchy. On November 14, 1918, the Czechoslovak National Assembly met in Prague, and formally declared the Czechoslovak State to be a Republic, with Professor T. G. Masaryk as its first President.

By the Treaty of Peace of September 10, 1919 (the Treaty of St Germain), the Allied and Associated Powers formally recognized the Czechoslovak Republic, declaring that 'the peoples of Bohemia, of Moravia, and of part of Silesia, as well as the peoples of Slovakia, have decided of their own free will to unite . . . for the purpose of forming a single sovereign independent state under the title of the Czechoslovak Republic'. For the sake of brevity the Czechoslovak Republic is designated Czechoslovakia.

Constitution and Government.—The Constitution of the Czechoslovak Republic was passed by the National Assembly on February 29, 1920.

According to the terms of the Constitution, the Czechoslovak State is a democratic Republic having an elected President at its head. The territory of the Republic forms a single and indivisible unity. The National Parliament, which constitutes the only legislative body for the whole of the Republic, is composed of a Chamber of Deputies elected for a period of six years and containing 300 members, and of a Senate comprising 150 members to be renewed every eight years. The two Chambers in joint congress elect the President of the Republic for seven years. The President, as head of the State, is supreme commander of the armed forces, and can declare war with the consent of Parliament. He appoints the higher officers and officials, exercises the right of reprieve, and is himself amenable to the laws only on a charge of high treason. He also appoints and recalls Ministers. The Constitution guarantees freedom of the Press and of speech, and safeguards racial minorities, to whom it assures the maintenance of their schools. Privileges derived from sex, birth or calling are not recognised. Marriage, the family and motherhood are placed under the special protection of the law. All these guarantees and rights are protected by the Supreme Administrative Court, which sees to the legality of the public administration.

In principle the two Chambers are equal in so far that they both enjoy the right of initiative, and that even Government Bills may be first introduced in either house. Only in the case of the Budget and Army Bills must the measures first pass through the Chamber of Deputies. It is also the Chamber of Deputies alone that by a vote of non-confidence can compel the

resignation of the Government. A measure passed by the Chamber of Deputies becomes law, despite an adverse decision of the Senate, if the Chamber of Deputies adheres to its first decision by an absolute majority of all its members.

The franchise for the Chamber of Deputies is open to all citizens, without distinction of sex, who are over 21, while all citizens over 30 are eligible for election. The franchise for the Senate is open to all citizens who are over 26, and all citizens over 45 are eligible for election. The electoral system is based on proportional representation.

The Constitution regulates the parliamentary elections on a 'closed scrutiny' basis, the votes being in favour of parties, not of candidates. The allocation of electoral areas is as follows—Bohemia, 9 (for Chamber of Deputies), 5 (for Senate), Moravia and Silesia, 6 and 3, Slovakia, 7 and 4, Carpathian Ruthenia, 1 and 1.

At the elections held on October 31, 1929, the political parties were returned as follows—

Senate (150 members)—Czechoslovak Coalition, 88 (Agrarians, 24, Clericals, 13, Social Democrats, 20, Czechoslovak Socialists, 16, National Democrats, 8, Middle Class Party, 6, League for Election Reform, 1), Slovakian Clericals, 9, German Social Democrats, 11, German Christian Socialists, 8, German National Socialists, 4, German Agrarian and Middle Class Parties, 9, Hungarian Christian Socialist, 6, Communists, 15.

Chamber of Deputies (300 members) at the elections held on October 31, 1929, is as follows—Czech Agrarian, 46, Czech Socialist Democrats, 39, Czech National Socialists, 32, Communists, 30, Czech Clericals, 25, German Social Democrats, 21, Slovak Clericals, 19, German Agrarian and Middle Class Parties, 16, Czech National Democrats, 15, German Christian Socialists, 14, Czech Small Traders, 12, Hungarian Christian Socialists, 9, German National Socialists, 8, German Nationals, 7, Poles and Jews, 4, League for Election Reform, 3.

President—Thomas Garrigue Masaryk (born in 1850 in Hodonín, in Moravia). Elected May 28, 1920, re-elected May 27, 1927, for a period of 7 years.

According to the Constitution, no one may be elected for more than two successive terms, but an exception has been made in the case of President Masaryk.

The Czechoslovak Government, appointed on October 30, 1932, consists of the following Ministers—

Prime Minister—J. Malypetr (Czech Agrarian)

Minister of Foreign Affairs—Dr. Edvard Beneš (Czech National Socialist)

Minister of National Defence—Bohumil Bradáč (Czech Agrarian)

Minister of Finance—Karel Trápl (Non parliamentarian)

Minister of the Interior—J. Černý (Non parliamentarian)

Minister of Commerce—Dr. Josef Maloušek (Czech National Democrat)

Minister of Health—Dr. Franz Spina (German Agrarian)

Minister of Railways—Rudolf Bechyň (Czech Social Democrat)

Minister of Social Welfare—Dr. Ludwig Czech (German Social Democrat)

Minister of Justice—Dr. Alfred Meissner (Czech Social Democrat)

Minister of Agriculture—M. Hodza (Czech Agrarian)

Minister of Education—Dr. Ivan Džerž (Czech Social Democrat)

Minister of Posts and Telegraphs—Dr. Emil Franks (Czech National Socialists)

Minister of Public Works—Jan Dostálek (Czech Clerical)

Minister for the Unification of Laws—Dr. Jan Šrámek (Czech Clerical)

Area and Population —The Czechoslovak Republic consists of Bohemia, Moravia and Silesia, Slovakia, and Ruthenia (Sub Carpathian Russia). Its frontiers have been defined by the Peace Treaties with Germany, Austria, and Hungary. The area and population of the various provinces, according to the census of 1921, and the preliminary results of the census December 1, 1930, are as follows —

—	Area in square kilometres	Area in English sq miles	Population Feb 15, 1921	Population per square mile, 1921	Preliminary Census Dec 1, 1930	Population per square mile, 1930
Bohemia	52,064	20,102	6,670,582	331.8	7,106,766	353.5
Moravia & Silesia	26,738	10,324	3,335,152	323.0	3,563,157	345.1
Slovakia	48,936	18,895	3,000,870	158.8	3,380,885	176.3
Ruthenia	12,656	4,886	606,568	124.1	725,350	148.5
Total	140,394	54,207	13,613,172	251.1	14,726,158	271.7

Of the Czechoslovak citizens 7,345,137 are Czechoslovaks, 3,088,530 Germans, 119,469 Hungarians, 458,094 Russians, 80,182 Poles, 120,277 of Jewish nationality, and 18,954 others. There were besides 238,808 aliens (The results regarding the nationality of the Czechoslovak citizens in the province of Slovakia are not yet known.)

The population of the principal towns with more than 20,000 inhabitants at December 1, 1930 (preliminary census figures), was —

Prague	848,081	Chomutov (Kometau)	33,206	Aš (Asch)	22,943
Brno	268,646	Cheb (Eger)	31,549	Varnsdorf	22,793
Ostrava Moravska	125,347	Jihlava	31,081	Podmokly (Bodenbach)	22,648
Bratislava	123,852	Teplice Šanov (Tep-litz Schönan)	30,911	Přerov	22,362
Píseň	114,150	Pardubice	28,841	Karvinná	22,330
Košice	70,232	Most	28,211	Ostrava Slezska	22,239
Olomouc	65,489	Žhborod	26,069	Zámky Nové	22,141
Budšovice České	43,886	Mukačevó	26,123	Přesov	21,870
Ústí n/L (Aussig)	43,802	Znojmo	25,832	Zlín	21,584
Liberec (Reichenberg)	38,525	Vary Karlovy Karla bad)	24,029	Nitra	21,259
Opava	36,083	Trnava	23,971	Komárno	21,137
Jablonec n/N (Gablonz a d. Neisse)	33,855	Krnov (Jägerndorf)	23,463	Kladno	20,671
Prostějov	33,487				

Movement of population is shown as follows for 3 years:

Year	Births	Marriages	Divorces	Deaths	Surplus of births over deaths
1929	326,307	139,200	4,862	225,527	100,780
1930	333,587	136,987	5,312	207,778	125,814
1931	318,192	129,114	—	212,169	106,023

Religion.—The majority of the population is Catholic. In 1930 the division of the population (preliminary results) according to religion was — Roman Catholics, 10,833,423, Greek and Armenian Catholics, 585,439, Protestants, 1,109,229, Orthodox, 145,588, Jews, 356,763, Old Catholics, 22,747; other faiths, 32,646, and without any religion, 853,717.

In January, 1920, the reformed clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and to found a Czechoslovak Church, which had, according to the Census of 1930, 793,042 adherents.

Education.—Instruction is compulsory between the age of 6 and 14. The schools may be divided as follows: (1) National Schools (Elementary and Advanced Public Schools); (2) Secondary Latin and Technical Schools (Gymnasias and Real-Schools); (3) Universities and Higher Technical Schools; and (4) Trade and Arts, Commercial, Mining and Agricultural, and other special schools. There are practically no illiterates except in Slovakia.

The following table contains the data for elementary and advanced schools (public and private) in Czechoslovakia as at October 31, 1931.

	Elementary Schools (public and private)			Higher Grade Schools (public and private)		
	No of Schools	No of Pupils (boys)	No of Pupils (girls)	No of Schools	No of Pupils (boys)	No of Pupils (girls)
Bohemia	6,076	365,281	370,120	1,090	85,798	76,646
Moravia & Silesia	3,615	212,978	216,149	627	47,131	40,626
Slovakia	4,046	259,751	256,598	154	18,064	16,881
Ruthenia	727	57,962	54,522	18	3,628	3,609
Total	15,064	895,967	897,389	1,889	154,631	137,762

Of the 15,064 elementary schools, 10,241 (68.0 per cent) were Czechoslovak, 3,301 (21.9 per cent) German, 526 (3.5 per cent) Ruthenian, 822 (5.5 per cent) Magyar, 90 (0.6 per cent) Polish, and 84 (0.5 per cent) other and miscellaneous schools. Of the 1,889 higher grade schools, 1,399 (74.1 per cent) were Czechoslovak, 437 (23.1 per cent) German, 4 (0.2 per cent) Ruthenian, 12 (0.6 per cent) Magyar, 11 (0.6 per cent) Polish, and 26 (1.4 per cent) miscellaneous schools. There were 4 foreign national (elementary) schools with 529 pupils, including 2 Russian schools with 236 pupils, 1 French with 222 pupils, and 1 English with 71 pupils.

During the school year 1930-31 there were in Czechoslovakia 349 secondary Latin and technical schools (gymnasias and real schools) with 93,608 pupils. Of these 244 were Czech or Slovak, 90 German, 6 Magyar, 8 Ruthenian, and 1 Polish. There were 5 foreign Latin and technical schools (gymnasias and real schools) with 718 students, including 2 Russian with 420 pupils, 1 Ukrainian with 101 pupils, 1 French with 146 pupils, and 1 English with 51 pupils. The public, or state aided, schools of commerce numbered, during the school year 1930-31, 188, with 34,841 pupils.

There are 4 universities in Czechoslovakia, and 4 technical high schools with students as follows (winter term 1930-31) —

Universities	Number of Students		Technical High Schools	Number of Students	
	Total	Females		Total	Females
Prague, Czech (1848)	10,485	2,356	Prague, Czech	5,173	146
Prague, German	4,927	772	Prague, German	2,014	67
Brno, Czech (1918)	3,044	542	Brno, Czech	1,535	26
Bratislava, Slovak (1919)	2,038	261	Brno, German	1,846	88
	20,444	3,931		10,568	277

There are, moreover, 2 faculties not comprised in the University Association (in Prague and Olomouc), a Ukrainian University at Prague, and a

Ukrainian agricultural academy in Poděbrady, a higher veterinary academy (443 students), a mining academy (267 students), a higher agricultural college (252 students) an academy of arts (204 students), and a high commercial school (in Prague)

Justice—The courts of the Republic are —The Supreme Court of Justice and Court of Cassation sitting in Brno, 4 High Courts of Justice (Prague, Brno, Bratislava, Košice), 37 County Courts (besides the Commercial Court and the Penal Tribunal in Prague), and 420 District Courts

There are also special courts for commercial, industrial, revenue and other matters

A special Administrative High Court decides matters in dispute affecting the administration, *e g.*, appeals against illegal decisions and regulations made by State authorities, in cases of conflict between the central State authorities and the organs of the provincial local government, in cases of claims made against the State or the local administration which have been vetoed by the administrative authorities

Finance—Budget estimates for five years in thousands of crowns —

	1929	1930	1931	1932	1933
Revenue	1000 crowns 9,569,907	1000 crowns 9,412,867	1000 crowns 9,843,827	1000 crowns 9,323,376	1000 crowns 8,634,170
Expenditure	9,534,373	9,366,904	9,838,525	9,318,703	8,632,538

The following are some of the details of the budget for 1932 —

Revenue	Millions of Crowns	Expenditure	Millions of Crowns
Finance	8,920	Foreign Affairs	155
Public Works	151	National Defence	1,309
Pensions	100	Interior	695

Total (including all other items)	9,323	Total (including all other items)	9,319

According to the budget for 1932, the national debt is as follows (in million crowns) —

	Million Crowns
Internal debt	25,901
Foreign debt	8,350
Note Debt	8,300
Total	37,551

A Board of Audit and Control was constituted by an enactment of March 20, 1919. It is charged with the superintendence of State economy, the State property and the national debt. This Board has an equal standing with the Ministries and is independent of them. Its president is nominated, at the request of the Government, by the President of the Republic.

Defence—Service in the army is regulated by the law of March 19, 1920. Liability to service lasts from the ages of 17 to 60, but begins normally at the age of 20. Service in the active army is for 14 months, after which the soldier passes to the first reserve until he attains the age of 40, when he passes to the second reserve, where he remains until 50. By the law of April 8, 1927, the peace strength of the army, beginning with October 1, 1927, has been fixed permanently as follows: for the period from October 1 up to March 31 at 140,000, and for the period from April 1 up to August 30 at 100,000, military persons. By the law of April 8, 1927, as from October 1, 1928, there must be elected from the recruits fit for military service a number of 70,000, with due regard to the probable decrease and increase during the first months after entering the active service. The average strength of the army in 1932 was 141,696 all ranks, inclusive of 12,657 gendarmes. The air force numbered 6,482 all ranks, with 546 aeroplanes. The army is organised in 4 military commands, comprising 12 infantry divisions each of 24 brigades, 2 mountain infantry brigades, 3 cavalry brigades, 12 light artillery brigades, 2 heavy artillery brigades and administrative services.

In the 1933 budget, 1,252 million crowns were allocated for the army.

There is a small defensive force consisting of the 200-ton patrol vessel *President Masaryk* and 22 armed motor launches and tugs for river service.

Production and Industry—The Czechoslovak territory is one of the richest in Europe, both as regards natural resources and industrial development. Agriculture is highly developed and intensive farming is carried on.

For the years 1930 and 1931, the area and the yield of the crops were as follows:—

Crops	Area (in acres)		Yield (in metric tons)	
	1930 ¹	1931 ¹	1930 ¹	1931 ¹
Wheat	1,974,935	2,059,576	1,377,289	1,124,157
Rye	2,599,509	2,490,934	1,787,571	1,387,686
Barley	1,673,271	1,740,944	1,217,790	1,074,608
Oats	2,049,111	2,042,234	1,507,817	1,224,608
Potatoes	1,640,141	1,778,224	8,950,491	9,726,308
Sugar-beet	653,601	460,873	6,421,384	5,240,887
Maize	304,104	347,259	248,501	227,914

¹ Provisional

In 1929–30, there were 148 sugar factories in the country, which produced 1,035,687 metric tons of sugar. Hops of excellent quality are also grown, both for export and beer production (Pilsener). In 1930, Czechoslovakia produced 14,725 metric tons of hops. The agricultural industries include also flourishing beer, spirit, malt and foodstuffs industries. In 1931, the Republic had 440 breweries producing 10,679,232 hectolitres of beer. In 1929–30, there were 916 distilleries with an output of 703,438 hectolitres of spirits.

On December 31, 1931, the number of live-stock was: Cattle, 4,450,965, cows, 2,404,616, pigs, 2,575,921, sheep, 531,125.

In 1931, the fruit crop yielded 327,282 tons of apples, 194,586 tons of pears, and 337,535 tons of stone fruit.

Czechoslovakia ranks among the most richly wooded countries in Europe. The forests comprise 33 per cent. of the whole area (about 11,346,734 acres).

The mineral production of the Czechoslovak Republic comprises both soft and hard coal (chief coalfields Most, Chomutov, Teplice, Moravaska Ostrava, and Falknov), iron, graphite, and garnets, silver (in Bohemia),

copper and lead (in Slovakia), and rock salt (in Eastern Slovakia and Ruthenia)

Coal production in 1932, 15,900,000 tons of lignite and 11,100,000 tons of hard coal. In 1931, there were 269 coal mines, employing 94,925 persons. The output of pig iron in 1932 was, 450,000 metric tons, raw steel, 683,000 metric tons.

The number of factories in 1930 was 12,033. Of these, 1,922 were textile mills, 2,326 glass works and stone factories, 1,807 for food production, 1,407 for furniture and bent wood manufacture, 950 machine factories, 928 for metal manufacture, 396 paper mills, 645 chemical factories.

Commerce — Imports and exports for 5 years are shown as follows (in thousands of crowns) —

	1928	1929	1930	1931	1932
Imports	19,207,908	19,987,858	15,714,508	11,800,585	8,155,200
Exports	21,224,211	20,498,869	14,473,782	13,149,393	7,380,400

Principal articles of import and export in 1930 and 1931 —

Imports	1930	1931	Exports	1930	1931

Total	15,714,512	11,800,586	17,473,782	13,149,393

The chief imports into the United Kingdom from Czechoslovakia in 1931 were, according to the Board of Trade returns: sugar, refined, 307,800*l*, iron and steel, 255,235*l*, fancy goods, 632,564*l*, boots and shoes, 348,973*l*, glass, 750 211*l*. The chief exports from the United Kingdom to Czechoslovakia in 1931 were cotton yarns, 253,301*l*., woollen goods, 262,763*l*.

Total trade between the United Kingdom and Czechoslovakia for 5 years (according to Board of Trade returns) —

	1928	1929	1930	1931	1932
Imports from Czechoslovakia into U K	£ 8,188,905	£ 6,675,687	£ 6,402,617	£ 6,619,588	£ 8,036,874
Exports to Czechoslovakia from U K	2,167,941	2,100,970	1,730,693	1,337,433	959,847
Re exports to Czechoslovakia from U K	177,504	135,977	115,508	127 030	117,086

Communications.—On December 31, 1930, there were 13,849 kilometres or 8,606 miles of railway in the Republic, of which 7,002 miles are owned by the State, 1,525 miles privately owned, 12 miles owned by foreign States, and 67 miles owned by foreign railways. Of the State railways 1,074 miles are double tracked, and of the privately owned lines 66 miles.

In 1930, the total number of passengers carried on all Czechoslovak railways was 334,481,958, on the State railways, 264,761,818. Total quantity of freight, 95,424,293 tons, on State railways only, 73,894,290 tons, the earnings of all railways amounted to 5 094,588,988 crowns, of that on State railways, 4,628,512,392 crowns. Total expenses, 5,118,863,062 crowns, of which on State railways, 4,521,131,404 crowns.

In 1931, there were nearly 49,000 miles of road in the Republic, of which 5,300 miles are maintained by the State, 31,300 by the provinces, the remainder being interregional roads, for the upkeep of which the district authorities are responsible.

The Peace Treaty vested the Czechoslovak State with the right to use certain wharves in the ports of Hamburg and Stettin, and a strip of land on the River Elbe was, in Nov 1929, leased to the Czechoslovakian Government for 99 years. Of the waterways of the country, the Danube is the most important, its chief port is Bratislava (Pres-burg). On the Labe (Elbe) the two main ports are Ústí, n/L (Aussig) and Dečín (Teschen). On the Vltava and Elbe in 1931, 881,529 tons were loaded to be transported abroad, and 997,729 tons were unloaded from abroad. The inland traffic amounted to 808,061 tons. By way of the Danube 518,010 tons were loaded to be transported abroad, and 825,920 tons were unloaded from abroad. The inland traffic amounted to 71,225 tons.

In 1931 there were 16 air routes operating in the international service, and 6 in the national service. The former connect Prague with Paris, Warsaw, Constantinople, Vienna and Berlin.

In 1931, there were 4,592 post offices and 4,066 telegraph offices, and 82,146 miles of telegraph wire, 14,150,121 telegrams were despatched and received. Number of letters handled, 998,828,983. In 1931, there were 146,670 telephone stations and 501,535 miles of telephone wire.

Banking and Currency.—In 1930 there were 23 joint-stock banks in Bohemia, Moravia, and Silesia with a total paid up share capital of 1,852,600,000 crowns and with reserve funds of 1,736,900,000 crowns, 6 Land-banks issuing their own bonds, which at the beginning of 1930 amounted to 4,899,175,000 crowns. In 1930, there were 79 small joint

stock banks in Slovakia and Podkarpatská Rus with a share capital of 390,081,000 crowns and reserve funds of 228,785,000 crowns. In 1930, there were 366 savings banks with 19,655 446,000 crowns of deposits. In 1930, there were in Bohemia, Moravia and Silesia 4,269 Reiffeisen banks with deposits amounting to 5,282,640,000 crowns. On December 31, 1931, the deposits in the Czechoslovak banks amounted to 55,813,600,000 crowns.

The monetary unit is the *Koruna* or Crown of 100 *haléru* or heller.

In October, 1929, the value of the Czechoslovak crown was fixed at 44.58 milligrammes of fine gold, and the currency placed on a gold basis. The share capital of the National Bank, which was set up in 1926, was fixed at 405,000,000 Czechoslovak crowns instead of 12,000,000 dollars as hitherto. The notes of the Bank will be covered by gold to the extent of 25 per cent till the end of 1929, 30 per cent till the end of 1930, and afterwards to the extent of 35 per cent.

The note circulation on February 7, 1933, amounted to 5,467,472,000 crowns. the metallic reserve was 1,708,969,000 crowns.

On August 31, 1932, there were in circulation 18,249,433 ten-crown pieces, 27,336,456 five-crown pieces, 97,430,623 crown pieces, 52,967,312 fifty heller pieces, 120,269,347 twenty-heller pieces, 117,728,106 ten heller pieces, and 94,926,741 five heller pieces, of the total value of 483,663,906 crowns.

Diplomatic Representatives

1 OF CZECHOSLOVAKIA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Jan G. Masaryk, O B E (appointed June 1925)

Counsellor — Vilém Černý

Secretaries — Maximilian Lobkowicz and Jan Gerke

Military and Air Attaché — Lieutenant Colonel Zdeněk Vltavský

Consul — Karel Bujňák

2 OF GREAT BRITAIN IN CZECHOSLOVAKIA

Envoy Extraordinary and Minister Plenipotentiary and Consul General — Joseph Addison, O M G (appointed April 7, 1930)

Secretaries — K T Gurney and R H S Allen

Military Attaché — Lieut Col T D Daly, M C

Commercial Secretary — H Kershaw, O B E

There are Consular Representatives at Prague, Bratislava, Brno, Liberec (Reichenberg), and Karlovy Vary (Carlsbad)

DANZIG.

(DIE FREIE STADT DANZIG)

By Article 102 of the Treaty of Versailles, the Principal Allied and Associated Powers undertook to establish the Town of Danzig with the surrounding territory as a Free City, to be placed under the protection of the League of Nations. The League of Nations also appoints a High Commissioner.

High Commissioner —Dr Helmer Rosling Appointed October 15, 1932

The proclamation of the Freedom of the City and adjacent territory, as well as the coming into force of the Danzig Polish Treaty, in accordance with Article 104 of the Treaty of Versailles, took place on November 9, 1920. According to this Treaty Danzig and Poland form a single customs territory. Since January 1, 1922, the Polish German customs frontier extends to the sea, and Danzig is a unit in the Polish customs administration.

The Constitution provides for a *Volkstag* or Diet of 72 members elected for 4 years and a Senate. This Senate consists of a President, a Vice President and 10 Senators, whereof the President the Vice President and 4 Senators receive salaries. The members of the Senate are elected by the popular assembly (*Volkstag*) for an indefinite period. Election is by majority of votes. Any citizen over 25 years of age is eligible. The salaried members of the Senate may hold no other public office, nor may they without the approval of the Senate follow any other profession, the unpaid members hold no public office except with the approval of the Senate. No member may serve on a board of managers or of directors of a commercial company without the consent of the Senate. The President of the Senate directs and exercises general supervision over the work of the Administration. The Senate is the highest State authority, and its meetings are not public. Plebiscites take place if demanded by a tenth of the voters. Any alteration of the Constitution by the *Volkstag* can only be effected by a two thirds majority, with at least two thirds of the Deputies present.

Elections are universal, direct, equal, and secret on the basis of proportional representation, suffrage being granted to all men and women belonging to the State of Danzig who have attained 20 years of age. The elections for the Legislative Assembly held on November 16, 1930, resulted in the return of the following parties: Social Democrats, 19, German Nationalists, 10, Centre, 11, National Liberals, 2, Communists, 7, German-Danzig People's Party, 2, German Liberals, 1, Poles, 2, German People's Community, 3, National Socialists, 12, smaller parties, 3, total, 72.

Area and Population —The area of the Free City of Danzig is about 754 square miles, and population 407,517 (August 1929).

The territory contains a total of 264 localities, of which 258 are rural communes, 2 for-st-estate districts, and 4 cities. In addition to the municipality of Danzig, whose administrative district had a population in August, 1929, of 285,287 (the district of Oliva having been incorporated with it on July 1, 1926), the following localities are cities —Zoppot, 80,835 inhabitants, Neuteich, 3,160; and Tiegenhof, 3,252. Several centres classed as rural communes or otherwise are considerably larger than most of the 'cities,' as appears from the following list —Ohra, 13,218, Praust, 3,878, Emaus, 2,503, Bürgerwie-en, 2,249, Stutthof, 2,698, Brentau, Hohenstein, Pasewark, Kalthof, Steegen, Lichtenau, Liessau, and Schoneberg, between 1,000 and 2,000.

Births 1931, 8,304, marriages, 3,185, deaths, 4,798

Education.—In May, 1929, Danzig had the following schools —8 high schools for boys, 8 for girls, and 2 for boys and girls, 11 middle schools and 296 elementary schools. In the high schools there were 6,207 pupils (2,915 girls), in the middle schools, 3,228 pupils (1,328 girls), in the elementary schools, 44,632 pupils (21,869 girls). Teachers in high schools, 351, and middle schools, 141, in elementary schools, 1,120.

The Technical University had in the winter term of 1931–32, 77 teachers and 1,826 students.

Finance — For 1926, the Budget of the Free City of Danzig balanced at 117,885,180 gulden, for 1927 at 113,209,220 gulden, for 1928 at 117,028,590 gulden, for 1929, at 128,000,410 gulden, for 1930 at 134,842,600 gulden, and for 1931 at 142,896,050 gulden.

Commerce and Shipping —The total registered gross tonnage on July 1, 1932, was 224,183, comprising 40 steamships, 20 motor-ships, 8 sea lighters of over 250 tons burden each, 1 motor sailing-boat, and 1 other ship.

Shipping in 1931 entered, 5,960 vessels of 4,061,733 tons, and cleared 5,971 vessels of 4,064,333 tons, German shipping predominating, followed by Danish, Swedish, Latvian, Polish, Norwegian and English.

In accordance with Article 19 of the Polish-Danzig Convention of November 9, 1920, a Danzig Port and Waterways Board, composed of 5 Polish and 5 Danzig Commissioners with a President of Swiss Nationality, has been formed to administer and exploit the Port of Danzig.

For centuries Danzig has been a well known grain and timber market and shipping point. Its advantageous geographical situation at the mouth of the Vistula, its vicinity to the great German, Polish, and Russian grain districts, and its foreign shipping connections have placed it at times in the first rank. For lumber Great Britain is Danzig's best customer. Exports in 1931 were as follows: lumber 920,000 tons (824,300 tons in 1930), grain, 180,700 tons (391,300 tons in 1930), sugar, 199,700 tons (192,900 tons in 1930), coal, 5,796,100 tons (5,348,300 tons in 1930).

Communications —Danzig is connected with Germany by four main railway lines —Danzig to Königsberg, 120 miles, Danzig (via Kreuz Schneidemühl) to Berlin, 292 miles, Danzig to Stettin, 230 miles, Danzig to Breslau (via Posen) 297 miles. Danzig is connected with Poland by three main lines —Danzig to Warsaw, 236 miles, Danzig to Łódź, 230 miles, and Danzig to Posen, 183 miles. Besides these railway lines there are regular connections by aeroplanes to Berlin (3 hours), to Königsberg (1 hour), to Warsaw (3 hours), to Marienburg (25 minutes), to Stolp (1 hour), to Stettin (2 hours, 20 minutes). A regular passenger-steamer service is carried on between Danzig (Zoppot) and Swinemünde, Pillau (Königsberg), and Memel. Other shipping lines have arranged a regular passenger service to Libau (weekly), to London-Hull (weekly), to Reval-Leningrad (weekly), to Riga and Helsingfors (weekly), to America and Canada (every third week), to Kalmar and Stockholm (every tenth day), to Copenhagen (every tenth day).

The Berlin Königsberg air line and the Polish mail air line serves Danzig. There is also a freight air service between Danzig and Warsaw.

On January 1, 1931, there were 11,520 principal and 8,361 branch telephone connections in Danzig, or a total of 19,881. Telephone calls in 1929 numbered 21,282,000, of which 1,180,000 were toll calls the remainder being local calls.

The metric system is the sole legal system of weights and measures in Danzig.

Banking and Currency—On October 22, 1923, a new gulden currency was issued by the Danziger Zentralkasse, the provisional bank of issue 25 gulden of 100 pfennige each are equivalent to one pound sterling in gold. On September 21, 1931, the currency was placed on the gold standard. The introduction of the Danzig currency was effected through the Bank of Danzig, which was founded in January, 1924. Bank of Danzig Return, dated January 31, 1931, in Danzig gulden.—Assets: Coin and bullion 3,479,000 (of which gold coin 118,000, Danzig subsidiary coin 3,361,000), balances with the Bank of England inclusive notes 17,100,000, bills of exchange 19,488,000, foreign currencies, 16,151,000. Liabilities (capital paid up 7,500,000, notes in circulation 36,519,000, deposits on demand 1,795,000).

At the end of 1929, there were 68,476 depositors in the Savings Banks with deposits amounting to 54,570,917 gulden, compared with 56,991 depositors with deposits of 44,892,311 gulden at the end of 1928.

DENMARK.

(KONGERIGET DANMARK.)

Reigning King.

Christian X., born September 26, 1870, son of King Frederik VIII and Queen Louisa, married April 26, 1898, to Princess *Alexandrine* of Mecklenburg, succeeded to the throne on the death of his father, May 14, 1912.

Children of the King

- I Prince Christian *Frederik*, born March 11, 1899
 II Prince Knud, born July 27, 1900

Brothers and sisters of the King

- I Prince *Carl*, born August 8, 1872, elected King of Norway, under the title of Haakon VII., November 1905, married July 22, 1896, to Princess Maud Alexandra of Great Britain, offspring Prince Alexander (now Crown Prince Olav of Norway), born July 2, 1903
 II Prince *Harald*, born October 8, 1876 married April 28, 1909, to Princess Helena of Sonderborg-Glücksborg, offspring Princess Feodora, born July 3, 1910, Princess Caroline Mathilde, born April 27, 1912 Princess Alexandrine Louise born December 12, 1914, Prince Gorm, born February 24, 1919
 III Princess *Ingeborg*, born August 2, 1878, married August 27, 1897, to Prince Charles of Sweden
 IV Princess *Thyra*, born March 14 1880
 V Prince *Gustav*, born March 4 1887
 VI Princess *Dagmar*, born May 28, 1890, married November 28, 1922, to Lieutenant Jorgen Castenskiöld

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig Holstein Sonderburg Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Christian X has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 72,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg —

House of Oldenburg

	A D		A D
Christian I	1448	Christian V	1670
Hans	1481	Frederik IV	1699
Christian II	1513	Christian VI	1730
Frederik I	1523	Frederik V	1746
Christian III	1533	Christian VII	1766
Frederik II	1559	Frederik VI	1808
Christian IV	1588	Christian VIII	1839
Frederik III	1648	Frederik VII	1848

House of Schleswig Holstein-Sonderburg-Glücksburg

Christian IX, 1863. Frederik VIII, 1906 Christian X, 1912.

Constitution and Government.

The present Constitution of Denmark is founded upon the 'Grundlov' (charter) of June 5, 1915, as amended on September 10, 1920. This may

in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. The amendments of September 10, 1920, are mostly of a formal character, necessitated by the incorporation of parts of Slesvig in 1920.

According to the present 'Grundlov,' the legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical Lutheran Church, the official Church of the State. The King has not the right of declaring war or signing peace without the consent of the 'Rigsdag'. The 'Rigsdag' is composed of two bodies: the 'Folketing' (House of Commons) and the 'Landsting' (Senate). All men and women 25 years of age and with a fixed place of abode possess the franchise and are eligible for election. The 'Folketing' is at present composed of 149 members, 117 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 31 'Tillægsmandater' (additional seats) are divided among such parties not having obtained sufficient returns at the district elections. One member is elected for the Faroe Islands by simple majority. The term of the Legislature is four years, but the King has power to dissolve the 'Folketing' before the end of the four years. The members of the 'Landsting' are elected indirectly by the 'Folketing's' voters of 35 years of age in the following way. In every 'Folketing's' district electors in a number corresponding to the population are elected by the method of Proportional Representation. The whole country is divided into six 'Landsting's' districts. In each of these the electors elect a number of members of the 'Landsting,' between 10-12. In this way 56 members are elected, one is elected in the Faroe Islands. Moreover, there are 19 members elected by the former 'Landsting,' according to the system of Proportional Representation. The members of the 'Landsting' sit for a term of eight years. There are elections every fourth year for the half of those elected by the electors, while those elected by the 'Landsting' go out all at once after an eight years' term.

The members of the 'Rigsdag' receive 5,600 kr. or 7,200 kr. a year, according to whether their homes are in or outside the capital.

The Rigsdag must meet every year on the first Tuesday in October. To the Folketing all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Højesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in the chamber of which they are members.

The executive (appointed April 29, 1929), acting under the king as president, and called the State Council—Statsraadet—consists of the following departments —

The Presidency of the Council and Ministry of Navigation and Fishing — Th. Stauning

Ministry of Agriculture — K. M. Bording

Ministry of Foreign Affairs — P. Munch

Ministry of the Interior — B. Dahlgård

Ministry of Social Affairs — K. K. Stejneger

Ministry of Justice — C. Th. Zahle.

Ministry of Defence — L. Rasmussen

Ministry of Public Instruction — F. Borgbjerg

Ministry of Ecclesiastical Affairs — N. P. L. Dahl

Ministry of Public Works — J. F. N. Frus Skotte

Ministry of Finance — C. V. Bramsnaes

Ministry of Commerce and Industry — C. N. Hauge

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folketing.

State of parties in the Landsting, after the election of September 6, 1932 — 28 Liberals, 27 Socialists, 13 Conservatives, and 8 Radicals.

Folketing, elected November 16, 1932 — 62 Socialists, 39 Liberals, 27 Conservatives, 14 Radicals, 2 Communists, 1 German Party.

In the year 1920 there were incorporated into Denmark parts of Slesvig which voted for Denmark at the plebiscite held in accordance with the Versailles Treaty of June 28, 1919 (made effective Jan. 10, 1920). The Northern Zone voted on Feb. 10, 1920, and 75,431 votes were cast for Denmark, and 25,329 votes for Germany. The Southern Zone voted on March 14, 1920 and 12,800 votes were given for Denmark, and 51,724 votes for Germany. The new Slesvig territories were incorporated on July 9, 1920, being officially named 'Sønderjydske Landsdele' (South Jutland Provinces).

For administrative purposes Denmark is divided into 21 counties (Amt), each of which is administered by a Governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,300). There are 88 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by universal suffrage and Proportional Representation. Copenhagen forms a district by itself, and has its own form of administration.

Area and Population.

According to the census held on November 5, 1930, the area of Denmark is 16,576 square miles (42,931 square kilometres), and the population 3,550,656, including North Slesvig with 1,500 square miles (3,882 square kilometres) and 177,696 inhabitants.

The following table gives the area and population of Denmark in 1930 —

Divisions	Area 1930 English sq. m.	Population 1930	Population 1930 per sq. m.
City of Copenhagen (Kjøbenhavn) } without suburbs	28	617,069	22,038
Islands in the Baltic	5,136	1,310,225	255
Peninsula of Jutland	11,412	1,623,362	142
Total	16,576	3,550,656	214

The area of the Faroe Islands is 540 square miles, and the population in 1930 was 24,200.

The population (excluding the Faroes) consisted of 1,736,306 males and 1,814,350 females in 1930. The total population at the census of 1925 was 3,434,555, showing an increase during 1925-30 of 0.67 per cent per annum. In Denmark the town population has increased from 1,482,297 in 1925 to 1,558,910 in 1930, while the rural population has increased from

1,952,258 in 1925 to 1,991,746 in 1930 The population is almost entirely Scandinavian, in 1921, of the inhabitants of Denmark proper, 96.57 per cent were born in Denmark

Estimated population on July 1, 1932, 3,590,000.

The population of the capital, Copenhagen (Kjøbenhavn), in 1930 was 617,069, or with suburbs, 771,168, Aarhus, 81,279, Odense, 56,759, Aalborg, 44,365, Horsens, 28,363, Randers, 27,722

The following table gives the total number of births, deaths, and marriages with the surplus of births over deaths, for three years —

Years	Total Births (living)	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1929	65,297	1,619	27,725	39,486	25,811
1930	66,303	1,588	28,973	38,174	28,129
1931	64,299	1,597	29,020	40,566	23,733

Of the births in 1929, 10.77 per cent were illegitimate, in 1930, 10.70, in 1931, 10.70 In 1931, there were 2,472 divorces, in 1930, 2,300

Emigrants, chiefly to the United States and Canada, in 1929, 6,277, in 1930, 3,348, in 1931, 1,186

Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536 The affairs of the National Church are under the superintendence of seven bishops, who have no political character Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1921 there were 3,221,843 Protestants, 22,137 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 535 Greek Catholics, 5,947 Jews, 17,349 other or of no confession

Education

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory The school age is from 7 to 14 In 1931 Denmark had 4,502 lower schools, of these 34 were maintained by the Government, 3,877 by the local communities and 591 were private institutions The instruction in the public schools is mostly gratuitous The number of pupils in the 4,502 schools was on January 1, 1931 497,430 In 1931, 1,749 pupils were admitted to the university, of these 607 were girls For higher instruction there are furthermore (1931) a veterinary and agricultural college at Copenhagen with 70 professors and teachers and 680 pupils, 283 technical schools with about 28,000 pupils; 20 training colleges for teachers with about 1,500 pupils, a high school of commerce with about 450 pupils, 95 commercial schools with about 13,000 pupils, 22 agricultural or horticultural schools and 59 *folkehøjskoler* or popular high schools (adult schools with about 9,500 pupils); a college of pharmacy (founded 1892) with 10 teachers and about 100 students; a school for dentists with 18 teachers and about 160 pupils, a Royal academy of arts (founded 1754) with 22 teachers and about 250 pupils; a Polytechnic Institution (founded 1829) with 110 professors and teachers and about 900 students The *folkehøjskoler* are all private,

but to them and the agricultural schools the State annually makes a grant of about 1,320,000 kroner. The University of Copenhagen, founded in 1479, has about 130 professors and teachers, and about 5,000 students. The University of Aarhus, founded in 1928, has about 100 students.

Pauperism and Old Age Pensions.

Ordinary *poor relief* is regulated by the poor relief law of April 9, 1891 (and its amendments), under which in the financial year 1930-31, 112,762 (8.2 per cent of the population) were relieved at a cost of approximately 39 million kroner.

A law of July 1, 1927, entering into force on October 1, 1927, grants an annual sum of money as old age pension (*Aldersrent*) to any person being 65 years of age and fulfilling certain conditions. The old age pension, which does not involve the loss of civil rights, is granted according to the principle of fixed rates, the law stating the sums which have to be paid under the various circumstances. The pension varies according as the commune of domicile is a town commune or a rural one, and certain deductions are made for self earned incomes. In Copenhagen, for example, the old age pension of a married couple, both 65 years of age, without any earned income, is 1008 kroner per annum. The subvention is paid by the commune of domicile and seven twelfths of it is refunded by the State. For the financial year ending March 31, 1931, 98,835 persons were relieved. The total expenditure was 60.4 million kroner.

According to a law of 1913, assistance without the loss of civil rights is granted to children living with their widowed mothers. The expenditure (divided between the municipalities and the State) amounted in the financial year 1930-31 to 2,100,000 kroner.

Justice and Crime.

The lowest courts of justice in Denmark are organized in 99 tribunals where cases of only small consequence are dealt with by a single judge. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*), these courts are also courts of appeal for the above named minor cases. Of superior courts there are three: *Ostre Landsret* in Copenhagen with 17 judges, *Vestre Landsret* in Viborg with 12 judges, and *Søndre Landsret* in Sønderborg with 4 judges. From this an appeal lies to the supreme court (*Højesteret*) in Copenhagen, composed of 13 judges. Judges under 65 years of age can be removed only by judicial sentence.

In 1929, 4,105 men and 474 women were convicted of crimes and delicts. On March 31, 1931, 1,334 men and 36 women were in the penitentiaries of Denmark.

Finance.

By the terms of the Constitution of Denmark the annual financial budget, called the '*Finanslovsforslag*,' must be laid on the table of the Folketing at the beginning of each session, i. e. at the beginning of October. As to the annual financial accounts, called '*Statsregnskab*,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folketing and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance sheet.

The following shows the actual revenue and expenditure for three years ending March 31 and the estimates for two years —

Year ending March 31	Revenue		Expenditure	
	Current	From State Capital	Current	For increase of State Capital
	Kroner	Kroner	Kroner	Kroner
1929-30	336,107,000	59,924 000	324,131 000	64 110 000
1930-31	343,066,000	68 5*6,000	317,427,000	92 838,000
1931-32	332,600 000	131 460 000	332,562,000	171,087,000
1932 33 ¹	312,7 8 000	48 556,000	298,022,000	71,734,000
1933 34 ¹	301,767,000	53,827,000	300,546,000	68,976,000

¹ Budget estimates

The following is an abstract of the Budget estimates for 1933-34 for current revenue and expenditure —

Current revenue	Kroner	Current expenditure	Kroner
Debit balance of domain revenues	+ 1,030,051	Civil list and appanages	1,072,000
Debit balance of State under takings	+40 014,162	Rigsdag	2,060,000
Interest (net)	584,514	Council of State	499,089
Balance of funds, etc.	624,368	Ministry of Foreign Affairs	4,6 4,894
Direct and indirect taxes	336 028 451	Ministry of Ecclesiastical Affairs	2 467 722
Balance of lotteries	2 673,814	Ministry of Public Works	5,229,319
Separate revenues	2,900,952	Ministry of Public Instruction	63,387,295
		Ministry of Justice	15 917,520
		Ministry of Interior	21 654,391
		Ministry of Social Affairs	80 365,244
		Ministry of Agriculture	10,379,798
		Ministry of War	35 953 873
		Ministry of Marine	21 997,430
		Ministry of Finance	22,997,585
		Ministry of Commerce and Industry	3,8*0,844
		Ministry of Navigation and Fishing	2,625 763
		Pensions	2,012,799
Total current revenue	301,767,886	Total current expenditure	300,545,316

The public debt of Denmark on March 31, 1931, amounted to 71,311,000/
The total foreign debt was 39,185,000/

Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able bodied Danish subject is liable to serve in the army or navy, except the inhabitants of the Faroe Islands. Exemptions in Denmark are few, even clergymen having to serve.

Service commences at the age of 20 and lasts for 16 years. For the first 8 the men belong to the active army, and for the second 8 years to the reserve. At the time of joining, the recruits are continuously trained for 150 days in the infantry, 215 days in the field artillery, 245 days in the coast artillery, and 425 days in the cavalry. The engineers have 200 days, and the train 60 days' continuous training. In the case of about one-fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place twice in the remaining eight years of army service, and then only for 28 days on each occasion.

The country is organised in one territorial command

Infantry and mounted troops are armed with the Krag Jorgensen 8 mm rifle or carbine and the Madsen machine gun, field artillery with a Krupp gun, firing a 14 88 pound shell

The number of recruits called up annually for training is 8,625, which with the permanent establishment, armed police and air force, made up a total of 14,136 all ranks. The military budget for 1931-32 was 32,279,434 kroner

The naval forces have been reconstructed pursuant to the law of National Defence of August 8, 1922. The Navy, as well as the Army, is under the direction of the Minister of Defence

The fleet is for purposes of coast-defence. It now includes three coast defence ironclads of 3 650-3,800 tons, *Peder Skram*, *Olfert Fischer*, *Heriuf Trolle*, each carrying a pair of 9 4-inch and four 6-inch guns, and one of 4,300 tons, *Niels Juel*, with ten 6 inch guns, 4 fishery patrol vessels (*Hvidbjornen*, *Islands Falk*, *Beskytteren* and *Diana*), the ex British sloop *Fylla* (also used for fishery patrol work), 12 torpedo boats, 12 submarines, 6 minesweepers, 8 patrol vessels, the repair ship *Henrik Gerner*, and the minelayer *Lossen*. It has recently been proposed to scrap the three older coast-defence ironclads

Production and Industry

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid

According to the census of July 15, 1931, the extent of the cultivated area in Denmark was as follows (in thousand acres) — grain areas, 3,210, root crop, 1,253, other crop, 98, green fodder and grass 3,167, fallow land, 144, total cultivated area, 7,872. The acreage and production of the chief crops for two years were as follows —

Crops	Area		Production	
	1930	1931	1930	1931
	Acres	Acres	Tons	Tons
Wheat	249,100	259,000	278,000	273,600
Rye	368,700	332,100	254,700	213,500
Barley	928,100	888,600	1,061,000	957,400
Oats	957,500	936,800	997,600	935,500
Mixed grain	751,900	780,600	749,600	740,300
Potatoes	166,800	156,400	984,400	877,300

On June 20, 1932, there were in Denmark 496,000 horses, 3,238,000 head of cattle, 4,886,000 swine, and about 20,000,000 hens

According to statistics collected on July 15, 1925, there were 89,175 industrial factories and shops in Denmark, employing altogether 392,000 persons, of whom 270,000 were actual labourers. Of the total establishments 26,300 factories used mechanical power. In 1931, there were in Denmark 4 distilleries whose output of brandy reduced to 100° amounted to 7,080,000 litres. In 1931, there were produced 1,470,000 hl of strong beer, and 742,000 hl. small beer. In the same year 145,700 tons of beet

sugar were produced at 9 sugar factories, and 79,286 tons of margarine were manufactured at 132 factories

In the Danish fisheries the total value of the fish caught was, 1928, 2,021,000*l*, 1929, 2,097,000*l*, 1930, 2,234,000*l*. The fleet in 1930 consisted of 15,560 boats

Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18 16 kroner = 1*l*) —

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1927	91 800,000	85 300,000	1930	95,217 000	88 985,000
1928	95,592,000	91,229,000	1931	80,661,000	78,397,000
1929	98,698,000	94,064,000	1932	62,800,000	59,570,000

In 1931, the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows —

1931	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances	818,016	805,594	1,049,461	1,035,916
Personal and domestic	213,812	203,670	20,709	0,776
Fuel	96,433	95,623	812	—
Fodder, manure, seeds	126,637	125,278	20,739	19,164
Raw products	269, 99	258,567	88,752	73,315
Industrial products	378,812	368,371	127,960	105,779
Other goods	61,504	57,703	24,966	18,731
Total	1,464,813	1,409,801	1,332,899	1,259,681

The principal articles of import and export, with their respective values, were as follows —

—	1930				1931			
	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner

The following table shows the distribution of Danish foreign trade —

Countries	Imports (General)		Exports (General)	
	1931	1932	1930	1931
	Kroner	Kroner	Kroner	Kroner
Germany	490,943,000	220,000,000	262,103,000	178,678,000
United Kingdom	218,578,000	254,400,000	950,916,000	815,287,000
Sweden	90,611,000	62,200,000	101,561,000	85,474,000
Norway	22,289,000	28,000,000	77,892,000	67,887,000
United States	154,067,000	87,500,000	9,552,000	5,586,000
Rest of America	68,066,000	—	16,370,000	8,042,000
Holland	92,038,000	75,200,000	21,141,000	24,446,000
France	53,120,000	28,900,000	16,289,000	20,509,000
Faroe Islands and Greenland	4,719,000	—	8,657,000	7,235,000

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were —

Imports into U K	1930	1931	Exports to Denmark	1930	1931
	£	£		£	£
Butter	17,162,544	11,689,722	Coal	1,421,609	1,120,965
Eggs	4,893,356	4,406,182	Cottons (piece goods)	863,716	747,416
Bacon	27,631,729	22,393,767	Woollen Goods	603,317	575,855

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Denmark to U K	53,057,529	56,177,715	54,117,596	46,695,558	40,550,327
Exports to Denmark from U K	9,759,936	10,670,084	10,245,522	8,656,592	9,860,499
Re exports to Denmark from U K	781,851	829,150	741,668	556,834	500,742

Shipping and Navigation

On December 31, 1932, Denmark possessed 751 vessels (above 20 registered tons gross) of 1,176,034 registered tons gross in her mercantile marine, of which 519 of 714,433 tons gross were steamers, and 96 motor ships of 426,231 tons gross, and 136 sailing vessels of 35,350 tons

Internal Communications.

Denmark proper (exclusive of Copenhagen) has (March 31, 1932) 7,581 kilometres or 4,711 miles of road, besides 26,945 miles of by ways. There are (1932) railways of a total length of 3,286 English miles open for traffic in the kingdom. Of this total, 1,559 English miles belong to the State. The total value of the State railways (road, buildings, cars, etc.) up to March 31, 1932, was 439,923,000 kroner. The railways have a gauge of 4 ft 8½ inches, except 128 miles of which the gauge is 3 ft 8½ inches.

The Post Office in the year 1931-32 carried 293,609,000 letters and post-cards, and 244,406,000 samples and printed matter. There are 1,434 post-offices. The State telegraphs in 1931-32 carried 3,969,000 messages, of which 992,000 were internal. The length of State telegraph lines (March 31, 1932) was about 8,400 English miles; number of offices 552. At the same

date the railway telegraphs had 450 offices On Dec. 31, 1931, the length of telephonic wires of the State and the private companies was 1,065,700 English miles In the year 1931 there were 562,676,000 telephonic conversations

Banking and Credit

On December 31, 1932, the accounts of the National Bank balanced at 573,761,000 kroner The assets included 193,183,000 kroner in bullion and specie The liabilities included 331,585,000 kroner note issue, 27,000,000 kroner of capital, and 12,040,400 kroner reserve fund In Denmark there are 173 other banks for commercial, agricultural, industrial, and other purposes On March 31, 1931, there were 532 savings banks, with 1,987,300 depositors, and deposits amounting to 2,178,900,000 kroner, or about 1,085 kroner to each account

The nominal value of the coin minted (including recoinage of worn pieces) in Denmark since 1873 is given as follows —

Years ending March 31	Gold	Silver, nickel, aluminium bronze bronze and iron	Total
1873-1931	Kroner 182,096,910	Kroner 86,432,242	Kroner 268,529,152
1932	—	1,261,176	1,261,176
Total (1873-1932)	182,096,910	87,743,418	269,840,328

Money, Weights, and Measures

The monetary unit, the *Krone* of 100 ore, is of the value of 1s 1½d, or about 18 kroner to the pound sterling The krone contains 0.403226 grammes of gold.

Gold coins are 20- and 10-kroner pieces The 20-kroner piece weighs 8.870 grammes 900 fine, and thus contains 8.0645 grammes of fine gold Small change 2 kroner, 1 kroner and ½ kroner pieces of aluminium-bronze, 25 ore and 10 ore pieces of nickel, and 5 ore, 2 ore and 1 ore pieces of iron and of bronze

The standard of value is gold

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912

Diplomatic and Consular Representatives

1 OF DENMARK IN GREAT BRITAIN

Envoy and Minister—Count Preben Ferdinand Ahlefeldt Laurvig,
G C V O (October 9, 1921)

Counsellor.—Poul Scheel

Second Secretary—M Vincens de Steensen-Leth

Honorary Attaché—Baron Paul J Bertouch Lehn

Agricultural Adviser—Søren Sørensen

Press Attaché—C E Aagaard

Consul-General, Counsellor of Legation and Commercial Adviser.—C M Rottboll

There are Consuls at Belfast, Falmouth, Hull, Leith, Liverpool, London

2 OF GREAT BRITAIN IN DENMARK

Envoy and Minister—Hugh Gurney, C M G, M V O Appointed January 2, 1933

Commercial Secretary—H H. Cassells, M.V.O

Naval Attaché—Commander M. A. Hawes

Military Attaché—Col A F A N Thorne, C M G, D S O

Air Attaché—Wing-Commander J H Herring, D S O, M C

There are Consuls at Copenhagen, Thorshavn (Faroe Islands), and Vice Consuls in 14 other towns

Colonies

Greenland is the only colonial possession of Denmark Its area is 46,740 English sq miles, and its population in 1930 numbered 16,630 Of the total 408 were Danes and 16,222 natives, the latter numbered 7,694 men and 8,528 women West Greenland had a population of 15,744 inhabitants, East Greenland 886 inhabitants In the settlement Kap York (Thû'e) lived 274 natives The imports from Greenland into Denmark in 1931 amounted to 5,747,000 kroner, and the exports from Denmark to 2,672,000 kroner The trade of Greenland is a State monopoly

DOMINICAN REPUBLIC.

(REPÚBLICA DOMINICANA)

Columbus in 1492 discovered the island of Santo Domingo which he called *La Española*, and the city of Santo Domingo, founded by his brother, Bartholomew, in 1496, was for long the centre of Spanish power in America. The country declared its independence of Spain in 1821, was invaded and held by the Haitians from 1822 to 1844 when the Dominican Republic was founded and a Constitution adopted. The country was occupied by American marines from 1916 to the adoption of a new constitution in 1924.

Constitution and Government.—The Republic is governed in general under the Constitution of 1844, re-proclaimed, with changes, at various dates down to 1929 when a Revised Constitution was proclaimed on June 20.

Congress is composed of a senate of 12 members (1 from each of the 12 provinces, chosen by direct popular vote for 4 years) and a chamber of 33 deputies (1 for every 30,000 inhabitants or fraction above 15,000 in each province), also chosen for 4 years. Senators and deputies receive 300 dollars (U S) per month.

The executive functions of the Republic are vested in the President, elected for 4 years, by direct vote, who may be succeeded by the Vice-President in case of death or disability. There are 7 Secretaries of State, who are the heads of the departments of the Presidency, Interior, Police, War and Marine, Finance; Labour and Communications, Agriculture and Commerce, Foreign Relations, Health, Social Services and Public Works.

President of the Republic—General Rafael Leonidas Trujillo Molina (Assumed office on August 16, 1930)

Area and Population.—The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the Republic of Haiti. Area is estimated at 19,882 square miles, with 1,017 miles of coast line, 193 miles of frontier line with Haiti, and a population, according to the census of 1920, of 894,665. Total population (1932) is estimated at 1,200,000. The boundary with Haiti long in dispute is being reserved under a treaty signed in 1929.

The population (1921) of the 12 provinces was as follows: Santo Domingo, 146,446; Macoris, 43,612; Seybo, 58,408; Azua, 100,577; Barahona, 48,180; Samaná, 16,915; La Vega, 105,820; Duarte, 77,620; Espaillat, 50,956; Santiago, 122,773; Puerto Plata, 59,025; and Monte Cristi, 67,078. Immigrants, 1930, 9,827; emigrants, 10,998.

The population contains some creoles of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood; there are, however, many Syrians, especially in Santo Domingo City, where the drapery trade is mainly in their hands. The language used by the populace is Spanish, but many educated Dominicans speak English. The Haitian patois is spoken to a considerable extent along the frontier.

The capital, Santo Domingo, on the left bank of the river Ozama, was destroyed in 1502 by a hurricane, and subsequently rebuilt on the right bank of the same river. It was again practically destroyed, except for a few historic buildings, by another disastrous hurricane on September 3, 1930. It has in great part been rebuilt. According to the census of 1920, the City of Santo Domingo had 30,957 inhabitants (between 40,000 and 45,000 in 1932) and the City of Puerto Plata 7,807. Santiago de Los Caballeros 17,152, San Pedro de Macoris, 13,802, La Vega, 6,564, Samaná, 1,656, Sanchez, 3,075, Azua, 4,797, Monte Cristi, 2,580, San Francisco de Macoris, 6,188, and Moca, 3,994.

Religion and Education—The religion of the State is Roman Catholic, other forms of religion are permitted. There is a Papal Nuncio with residence at Port au-Prince (Haiti) as well as an Archbishop, known as the Primate of the Indies, in Santo Domingo City.

Primary instruction is gratuitous and obligatory, being supported by the communes and by central aid. The public or State schools are primary, secondary, technical schools, and normal schools. The Professional Institute was formed into a University by Presidential decree on November 29, 1914. In 1930 there were 341 public schools in the Republic (33 being technical) with 90,366 pupils and 1,807 teachers.

Justice—The judicial power resides in the Supreme Court of Justice, the Courts of First Instance, the Communal Courts and other tribunals created by special laws. The Supreme Court consists of a president and 6 justices chosen by the Senate, and the Solicitor General, appointed by the executive; it supervises the lower courts. The Republic is divided into 3 departments and, in all, 12 judicial districts, each having its own Fiscal Attorney and Court of First Instance, these districts are sub divided, in all, into 72 communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). Each department has a Court of Appeal of 5 magistrates, appointed by the Senate, and a departmental Solicitor General appointed by the President; these courts sit at Santiago, Santo Domingo City, and La Vega. The death penalty was abolished in 1924.

Finance—The receipts and disbursements for 6 years, in U S dollars (adopted in 1897 as the monetary standard, 5 pesos = 1 dollar) were:—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1926	14,279,375	13,481,619	1929	13,984,860	13,967,544
1927	15,819,674	14,495,968	1930	9,975,074	10,642,189
1928	19,269,490	19,692,129	1931	7,811,413	7,920,120

Chief sources of revenue, 1931: Customs, 2,892,352 dollars, Internal Revenue, 3,938,975 dollars, Lottery, 321,783 dollars; Sundry, 158,308 dollars

In accordance with the American-Dominican Convention of 1924, which provided for a loan up to 25,000,000 dollars, an American Receiver General of Customs supervises customs collections and controls the payment of interest and amortization of the three Dominican Bond issues. This arrangement, which dates back to the first American intervention in 1905, is to last until the loans are repaid. The total customs collected by the American Receiver-General from April, 1905, to December 31, 1931, was 106,746,244 dollars.

The bonded debt of the Republic on June 30, 1932, was 16,592,500 dollars. Internal or floating debt was 2,311,612 dollars. On November, 11, 1931, the Government announced a 2 years moratorium on annual payments of principal (between 8 and 9 million dollars) though declaring that interest will be maintained. The step was attributed to lower income due to the hurricane of 1930 and the decline in sugar and tobacco industries.

Defence.—The National Military Force consists of a native foot constabulary comprising, 2,090 men and 175 officers.

The Republic has no navy.

Production and Industry.—Agriculture is the chief source of wealth, sugar cultivation being the principal industry. Of the total area, 9,900 square miles are cultivable, and about 6,600 are under cultivation. The remainder is forest land, mostly pine groves, and is useless for agriculture. The largest sugar estates are in the southern part of the Republic. Exports of raw sugar in 1930, 345,981 metric tons, in 1931, 320,028 metric tons. There are 21 sugar 'centrals,' mostly owned and operated by American companies, although very little of the sugar is sold to the United States. The other principal exports in 1931 were cocoa, 25,616 tons, coffee, 5,128 tons, leaf tobacco, 6,509 tons, sugar cane, 24,343 tons, and molasses, 102,348 tons.

The live stock census taken on May 15, 1921, showed 360,155 cows, 87,876 oxen, 199,127 calves, 162,800 horses, 64,860 mules, 674,232 pigs, 705,000 goats and 2,949,053 fowls, a census of cattle in 1928 showed 487,608.

Various minerals are found, principal among which are gold and copper. Iron is found in the form of black magnetic oxide of iron, and petroleum has been found in the Azua region. Coal of the lignite variety of little commercial value is known to exist in small quantities. Silver and platinum have been found, and rock salt near Neiba exists in large quantities, there being several hills of native salt covered with only a thin layer of soil.

Commerce—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in dollars (5 pesos, by law = 1 dollar U S) —

—	1927	1928	1929	1930	1931
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports	27,784,014	26,787,940	22,729,444	15,229,219	10,151,762
Exports	31,178,769	28,754,528	23,786,497	18,561,841	18,067,162

The foreign trade for 2 years was distributed as follows (in U S dollars) —

Country	Imports				Exports			
	1930		1931		1930		1931	
	Dollars	Per cent	Dollars	Per cent	Dollars	Per cent	Dollars	Per cent
United States	8,545,988	56.12	5,882,655	57.95	4,868,121	23.55	8,427,767	26.23
United Kingdom	895,774	5.98	503,480	4.97	7,829,192	39.50	7,829,192	30.95
France	846,921	2.28	204,688	2.02	2,456,792	12.24	8,091,168	23.06
Italy	252,060	1.65	123,688	1.22	115,928	0.62	143,627	1.10
Porto Rico	65,609	0.43	29,196	0.29	1,614,400	8.70	458,462	3.51
Germany	729,079	4.79	466,332	4.59	697,848	3.76	195,344	1.49
Canada	470,199	3.09	323,680	3.19	279,353	1.51	502,764	3.85
British India	1,072,069	7.04	558,644	5.50	—	—	—	—

In 1931, the chief imports were (in dollars) cotton goods, 1,731,387, rice, 868,553 machinery and apparatus, 504,218, petrol, 502,564, auto mobiles, 73,289, wheat flour, 297,439. Principal exports in 1931 were (in dollars) raw sugar, 7,583,908, cocoa, 1,789,115, tobacco leaf, 403,676, coffee, 1,182,490, molasses, 923,917, refined sugar, 17,384, sugar cane, 60,353, corn, 172,507. Of the export of raw sugar in 1931, 3,969,190 dollars went to the United Kingdom and Ireland, and 2,381,640 dollars to France.

Total trade between the Dominican Republic and the United Kingdom for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
Imports from Dominican Republic to U K	£ 2,656,512	£ 1,733,968	£ 1,851,296	£ 1,019,166	£ 1,717,454
Exports to Dominican Republic from U K	285,487	256,299	152,687	103,988	97,516
Re exports to Dominican Republic from U K	757	1,901	731	967	1,407

Shipping and Communications—The merchant marine of the Republic consists of 94 vessels, two of which are steamers with a tonnage of 374 and 92 sailing vessels of 2,066 tonnage.

In 1930, 1,687 vessels of 2,381,606 tons entered the ports of the Republic and 1,509 with a tonnage of 2,218,259 cleared.

Three main trunk highways, with branches, now extend eastward from Santo Domingo City to Higüey (105 miles), northward to Santiago and Monte Cristi (180 miles), and westward to Comendador (on the Haitian border), and San Juan (161 miles). At Comendador the road joins the Haitian road to Port au Prince. The journey between the Haitian and Dominican capitals is now possible by motor in 12 hours. Total highway mileage in 1930 was 845 miles. There was also about 600 miles of inter-communal roads.

There are two small railway lines in the Republic (1) Samaná-Santiago line, belonging to an English company, which runs from Sanchez on the Bay of Samaná to La Vega, Moca and San Pedro de Macoris (total, 87 miles), (2) a Government line, the Dominican Central railway, which runs from Puerto Plata to Santiago and Moca (60 miles). Total length of line (1930) 147 miles. There are, besides, about 255 miles of private lines on the large estates.

Postal and telegraphic services are united ; number of offices, 1930, 99

The telegraph has a total length of about 1,034 miles, and has been leased to the All-America Cables, Incorporated, which also controls submarine cables connecting, in the north, Puerto Plata with Porto Rico and New York, and in the south, Santo Domingo with Porto Rico, Cuba and Curacao

The telephone system, owned by the Dominican Government, has been leased to an American Company which is installing modern apparatus. There are wireless stations in Santo Domingo City, Santiago and four other towns. Radio telegraph service with the United States was opened in 1931

Money, Weights, and Measures.—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1, viz, 1 peso = 20 cents United States currency. On December 31, 1930, the coinage and currency in the banks of the Republic was gold, 129,706 dollars, Dominican silver, 122,548 dollars, U S silver, 165,821 dollars, notes, 1,372,925 dollars. Total notes in circulation were estimated at between 2 and 3 million dollars

The metric system was adopted on August, 1, 1913, but English and Spanish units are quite common in ordinary commercial transactions

Diplomatic and Consular Representatives.

1 OF THE DOMINICAN REPUBLIC IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Señor Rafael Brache
Consul-General and Secretary of Legation — Señor Guaroa Henríquez

There are consular representatives at London, Southampton, Grimsby, Liverpool, Glasgow, Manchester, Nottingham, Cardiff, Leeds and Birmingham

2 OF GREAT BRITAIN IN THE DOMINICAN REPUBLIC

Chargé d'Affaires and Consul in Santo Domingo — H E Slaymaker

There is also a Vice-Consul at Santo Domingo City, San Pedro de Macoris, Sanchez, and Puerto Plata, and a Consular Agent at La Rowana

ECUADOR.

(REPÚBLICA DEL ECUADOR.)

Constitution and Government.

THE Republic of Ecuador, which is situated in the north west of South America, was constituted May 11, 1830, following the war of independence against the Spanish power in South America. Known originally as the Presidency of Quito, it withdrew from the original Republic of Colombia, founded by Simon Bolivar by uniting the Presidency of Quito to the Vice-Royalty of New Granada (now Colombia) and the Captaincy-General of Venezuela. The Presidency of Quito became the Republic of Ecuador.

Under the present Constitution, promulgated March 26, 1929, the President is elected directly by the people for a term of four years, there is no Vice-President, but the Minister of the Interior succeeds in the event of a vacancy. The cabinet consists of six ministers, enjoying considerable power, both collectively and individually.

Congress consists of two Houses, the Upper has 32 senators (chosen for four years) elected in the following manner: one for each province of the Interior and Coast, one for the Oriental provinces, one representative for the Universities, one for Secondary and Special Education, two for Primary and Normal Education, one for the Press, Academies and Scientific Societies, two for Agriculture, two for Commerce, one for Industry, two for Labour, two for the country folk, one for the Army and one for the defence of the Indian race. The Chamber of Deputies (26, serving for two years) has one deputy for every 50 000 inhabitants for provinces with a population of over 100,000, and two deputies for provinces with less than 100,000 inhabitants. The Oriental provinces elect one deputy each. Electors are adults, of either sex, who can read and write. Congress meets on the 10th of August every year at Quito, the capital, without being summoned by the Government.

Privileges of rank and race are forbidden under the Constitution. Peonage, which had prevailed on many landed estates, was abolished on October 20, 1918. Since 1896 the Indians have been exempted from paying tribute, and have been admitted to citizenship, provided they could read and write.

President — Don Juan Martinez Mera, elected October 31, 1932, assumed office, November 1, 1932.

The Provinces are administered by Governors, appointed by the Government, their subdivisions, or cantons, by political chiefs, and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a military Territorial Chief.

Area and Population.

Since the frontiers of Ecuador have not been settled, no definite figure of the area of the country can be given. Ecuador is said to have more boundaries than any other country, and there are maps of the Republic showing six different frontiers according to six different authorities. One official estimate shows 873,844 square kilometres (337,304 square miles), including the Archipelago of Colon (the 13 Galapagos Islands) with 7,844 square kilometres (3,028 square miles). Calculations of the geographer Wolf,

also officially adopted, show 714,860 square kilometres (275,936 square miles). The country is divided into 17 provinces and one territory—the Archipelago of Galapagos—officially called 'Colon,' situated in the Pacific Ocean about 600 miles to the west of Ecuador

So far no exact census has been taken. It was estimated (1929) that of the total the whites are 10 per cent, Indians, 38 per cent, mixed, 41 per cent, lowland Indians, 1 per cent, Negroes, 5 per cent, others, 5 per cent. The foreign community is composed of about 10,000 persons.

The estimated population of the Republic (December 31, 1931) was distributed as follows among the provinces (capitals in brackets) —

Provinces	Area in Square Miles (Wolf's estimates)	Population (Est 1931)	Population per Square Mile
Esmeraldas (Esmeraldas)	5,464	41,000	7.5
Manabí (Puertoviejo)	7,691	218,000	27.6
Los Ríos (Babahoyo)	2,295	100,000	43.5
Guayas (Guayaquil)	8,331	337,000	40.4
El Oro (Machala)	2,338	62,000	26.5
Carchi (Tulcan)	1,495	62,000	34.7
Imbabura (Ibarra)	2,414	126,000	52.1
Pichincha (Quito)	6,218	254,000	40.8
Leon (Latacunga)	2,595	172,000	66.2
Tungurahua (Ambato)	1,685	180,000	106.8
Chimborazo (Riobamba)	2,989	216,000	71.3
Bolívar (Guaranda)	1,159	74,000	67.3
Cañar (Azogues)	1,521	104,000	68.3
Azuay (Cuenca)	3,873	215,000	55.5
Loja (Loja)	3,705	148,000	39.8
Napo Pastaza and Santiago Zamora ¹	219,095	188,000	0.8
Galapagos Islands (San Cristobal)	2,868	2,000	0.7
Totals	275,936	2,500,000	9.0

¹ These two provinces, formed in 1925, together constitute the "Region Oriental", of their combined areas only about 110,000 square miles have any inhabitants.

The chief towns are the capital, Quito (about 104,000 in 1932), Guayaquil (120,000), Cuenca (42,000), Riobamba (21,200), Ambato (16,600), Loja (17,000), and Latacunga (15,000).

In 1931 there were 99,325 births, 47,443 deaths and 12,898 marriages.

Religion and Education.

The State recognises no religion, but grants freedom of worship to all. The Catholic Church has one archbishop (Quito) and six suffragan bishops. Since 1895 all State appropriations for the benefit of the Church have ceased. All members of the Episcopate are required to be Ecuadorian citizens. Civil marriages are obligatory since December, 1902.

Primary education is gratuitous and obligatory. Higher education (for which fees are nominal) is carried on in 21 secondary schools or colleges (6 private) and in the Central University at Quito (founded in the eighteenth century by the Dominicans); at the Guayas University, in Guayaquil, the Azuay University, in Cuenca, and the Law College at Loja. Private schools, both primary and secondary, are under some state supervision. Estimated expenditures for public education in 1932 are: superior education, 924,800 sucres; secondary, 1,288,588, primary, 3,954,187, special scholarships, 1,423,548, total, 7,591,073 sucres. There were (1932) 2,134 primary schools in the Republic, including 1,674 Government schools, 176 municipal, 63 farm schools, and 222 private schools. Enrolment at the primary schools

(1932) was 154,195; at the 17 secondary schools, 3,230, at the Universities, 958. There are 4 training colleges for teachers.

Justice and Crime.

The Supreme Court in Quito is the highest tribunal and consists of 11 justices elected by Congress for a term of 6 years. Of the eight superior courts two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. There are 496 parochial justices. The popular jury was abolished in 1928, criminal and civil cases are heard before a "special jury" consisting of 3 members of the Ecuadorean bar, or "three citizens of recognised integrity" appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the Constitution. Likewise imprisonment for debt and contracts involving personal servitude or slavery.

Finance

The revenue and expenditure for recent years are given as follows (24 3 sucres = £1 through 1928, thereafter 24 5 sucres = £1, average, 1932, 20 5 sucres = £1, at par, 5 sucres = 1 dollar U.S.)

	1928	1929	1930	1931	1932 ¹
	Sucres	Sucres	Sucres	Sucres	Sucres
Revenue	61,576,027	60,459,135	60,494,241	43,211,362	49,115,440
Expenditure	57,414,140	63,294,453	60,177,638	44,939,391	49,115,440

¹ Estimates.

Customs receipts for year ending December 31, 1931, 18,360,862 sucres.

The public debt on July 2, 1932, was — Foreign debt, including a small loan from the Swedish Match Company of 10,000,000 sucres obtained in 1928, 23,499,341 dollars (U.S.), internal debt, 14,973,417 sucres. The 1928 Swedish Match loan was guaranteed by a match monopoly granted the company, but Congress revoked this in 1931, following the enforced resignation of President Ayora.

Defence

The Ecuadorean regular army has an establishment of 644 officers and 3,976 men. This force is composed of 3 regiments of artillery, 10 battalions of infantry, 4 regiments of cavalry, 2 battalions of sappers, and 1 aviation company, which form the army. Military service was made compulsory on May 24, 1921, but is not enforced. The regular infantry have the Mauser rifle, the artillery have Vickers Maxim, Z B machine guns, old fashioned Krupps and new Ehrhards. The country is divided into 4 military districts. A military school is established at Quito. An Italian Military Mission of 3 members is at present instructing the Ecuadorean army.

The Government has established at Duran an aviation company with Ecuadorean personnel. Two new military American 'Travel Air' machines, and 2 pursuit planes have been purchased by the Government. Flying fields are being established at Guayaquil, Quito, Latacunga, Ambato and Riobamba.

The Navy consists of the gunboat *Cotopaxi* (1884), 300 tons, and several small vessels on coastguard service.

Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on in an average

temperature of 22° C ; and the hill country, the foothills, and the mountain valleys, adapted to grazing, dairying, and the production of cereals, potatoes, and the fruits and vegetables suitable to temperate climes, with an average temperature of 16° C Of the total surface of the Republic only 11,480,000 acres are actually cultivated, rendering an annual gross production of 416,000,000 sucres The staple produce of Ecuador is cocoa, a decline in output owing to the disease known as 'witch broom,' has now been checked The production of cocoa was (in quintals of 101 47 lbs.), in 1930, 387,424 metric tons (exports, 20,082 metric tons), in 1931, 28,818 metric tons (exports, 14,634 metric tons) Cocoa furnishes, in value, about 30 per cent. of total exports Coffee is also grown, 8,337,148 kilos were exported in 1931 Rice production is increasing, output, 1930, 907,807 quintals Wild rubber is abundant, but output has suffered from the competition of plantation rubber in the Orient Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities Considerable attention is being paid to the cultivation of cotton, especially in the province of Manabí, and to sugar, ivory nuts, or *lagua*, are produced and exported in large quantities

Ecuador is auriferous In 1931, 14,620 kilos of gold (cyanide ore), valued at 6,320,854 sucres, were exported At Pillzhum in Cañar rich silver ore is found, but is not now worked Petroleum is found, the output in 1931 was 1,381,121 barrels The area of oil concessions in exploitation in the Republic is 245,419 acres, located in the Santa Elena Peninsula, in the Province of Guayas The country is known to be also rich in copper, iron, lead and coal, and sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands Since December, 1927, all salt mined must be sold to the Government, which has a monopoly of imports, exports and sales

Excepting the inter Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80 000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber The 'balsa wood,' renowned for its lightness and strength, is widely used in airplane construction

Panama or 'Jipijapa' hats, made of *Toquilla* straw, are made very largely in Ecuador, the principal centres being Jipijapa, Montecristi, Tabacunda and Cuenca The Government of Ecuador attempted to monopolise the hat business for its own people by placing a heavy export duty on 'paja toquilla,' but large quantities of the material still go to Peru, both Peru and Japan have become strong competitors of Ecuador in the manufacture of Panama hats Exports in 1931 were valued at 6,446,653 sucres There are flour mills, 13 sugar works, breweries, chocolate factories and 20 textile factories, with capitalization of 11,500,000 sucres

Commerce.

The value of imports and exports for five years is given as follows in sucres

	1928	1929	1930	1931	1932
	Sucres	Sucres	Sucres	Sucres	Sucres
Imports	82,928,926	84,838,263	68,981,166	44,076,122	25,168,009
Exports	98,299,074	86,080,822	80,646,589	50,600,170	49,897,809

Value of the principal imports and exports in 1930 and 1931 were:—

Imports			Exports		
—	1930	1931	—	1930	1931
	Sucrés	Sucrés		Sucrés	Sucrés
Cotton Goods	9,899,420	7,635,342	Cocoa	23,403,591	12,254,544
Metals, Jewellery	9,792,526	6,203,823	Petroleum	15,798,485	15,824,067
Foodstuffs	9,832,251	6,614,034	Coffee	7,601,932	5,980,481
Machinery	6,668,286	3,949,128	Panama Hats	8,402,658	6,446,653
Drugs, Chemicals	5,342,015	4,542,270	Ivory Nuts	8,648,110	3,217,832
Woollen Goods	2,402,519	1,941,071	Gold Ore	7,888,624	6,320,854
Oils & Combustibles	8,451,493	2,222,583	Rice	3,712,325	1,880,871
Silk and Rayon	1,898,601	1,529,593	Fruit	1,169,407	665,511
Paper & Cardboard	2,242,591	1,612,353	Textiles	1,980,112	113,771

The chief articles of import from Ecuador into Great Britain (according to Board of Trade returns) in 1931 consisted of cocoa of the value of 34,885/, hides, 2,471/. The chief exports of British produce to Ecuador in 1931 were, cotton goods to the value of 97,821/, woollens, 16,977/, iron and steel, 17,228/.

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns) —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Ecuador into U K	162,270	136,652	165,063	109,375	123,877
Exports to Ecuador from U K	495,631	580,155	392,280	260,678	198,911
Re-exports to Ecuador from U K	11,206	13,778	7,012	4,645	4,184

Shipping and Internal Communications.

Guayaquil, the chief port, is visited by the steamers passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast. During 1931, 1,271 steam and sailing vessels entered, and 1,410 cleared from, Guayaquil.

Considerable progress in road improvement is being made. A motor road, 375 miles long, from the Colombian border to Babahoya, a river town near Guayaquil, was opened in 1930. There are now 1,591 miles of main trunk roads, 1,121 miles of branch roads and 2,227 miles of bridle paths. There is river communication, improved by dredging, throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof.

A railway is open from Duran (opposite Guayaquil) to Quito (280 miles). The total length of the 9 Ecuadorean railways actually in operation is 702 miles. The journey from Guayaquil to Quito takes two days, with a stop at Riobamba. Railways for the development of local trade have been undertaken by several local authorities. A bi-weekly mail and passenger air service has been established between Ecuadorean and South American ports.

Quito is connected by telegraph with Guayaquil and the coast, with the Republics of Colombia and Peru, and by cable with the rest of the world. Wireless telegraphy has been installed, there are six stations in Quito, Guayaquil, Esmeraldas and other towns.

In 1931 there were 809 post offices in the country and 3,804 miles of telegraph wires.

Banking and Credit.

Ecuador having no mint, the coin of the country is minted in England and the United States

On March 4, 1927, a decree was issued establishing at Quito the 'Central Bank of Ecuador,' with a capital of 10,000,000 sucres, the only body authorised to issue currency. It is organised to protect the country's gold reserves and its general functions resemble those of the Federal Reserve Banks of the United States. The gold holdings of the Central Bank having declined to 14,000,000 sucres, the Government on February 8, 1932, suspended the gold standard, on May 2, strict control of foreign exchange was instituted. On October 31, 1932, the Central Bank had gold in its vaults, 14,175,073 sucres, deposits abroad, 4,685,967 sucres, other reserves, 3,892,831 sucres, total reserves, 22,753,871 sucres, note circulation was 24,661,950 sucres. The 17 member banks affiliated with it had an aggregate capital and reserves (September 30, 1932) of 43,479,646 sucres.

A new General Banking Law has also been enacted, creating the office of Superintendent of Banks to supervise local banks. In addition, all commercial banks are required to have cash reserves equivalent to at least 25 per cent. of their demand deposits and to 10 per cent. of their time deposits.

Money, Weights, and Measures.

A new Monetary Law, prepared by the Kemmerer Financial Mission, was decreed on March 4, 1927. Under this law Ecuador returned to the gold standard with its currency stabilized at the rate of 24 3 sucres to the £ or 5 sucres per American dollar, the previous legal par value of the sucre having been 10 sucres = £1 or 1 sucre = 48 665 cents U.S. But on February 9, 1932, the Government was forced to suspend the gold backing of the sucre "until November 10, 1932." The new gold sucre (named after the national hero, Marshal Antonio José de Sucre) is to contain 0 300933 gramme of pure gold, instead of the previous weight of 0 73224. It is divided into 100 centavos. Gold coins known as 'condors' (25 sucres), and 'double condors' (50 sucres), 900 fine, are minted. Also silver 2 sucre, 1 sucre and $\frac{1}{2}$ sucre pieces, as well as 10 centavos, 5 centavos, 2 $\frac{1}{2}$ centavos and 1 centavo in nickel and copper.

By a law of December 6, 1856, the metric system of weights and measures was made the legal standard of the Republic, but it is not adopted by commerce, the Spanish measures being more general. The quintal is equivalent to 101 47 pounds.

The meridian of Quito has been adopted as the official time.

Diplomatic and Consular Representatives

1 OF ECUADOR IN GREAT BRITAIN.

Minister — (Vacant)

Consul-General in London — Senor Carlos Ararte

2 OF GREAT BRITAIN IN ECUADOR.

Envoy Extraordinary and Minister Plenipotentiary — C. H. Bentinck, C. M. G., appointed January 17, 1929 (who is also Minister at Lima, Peru, where he resides)

Chargé d'Affaires and Consul General in Quito — R. M. Kohan.

There are consular representatives at Quito and Guayaquil.

Statistical and other Books of Reference concerning Ecuador.

EGYPT.

(MISR.)

EGYPT was originally part of the Turkish Empire On December 18, 1914, a British Protectorate over Egypt was declared, and the next day a Proclamation was issued deposing 'Abbās Hilmi, lately Khedive of Egypt, and conferring the title of Sultan of Egypt upon Hussein Kamil, eldest living prince of the family of Muhammad Ali The British Protectorate was recognised by France, Russia, Belgium, Serbia, Greece, Portugal, and the United States of America Sultan Hussein Kamil died in 1917, and was succeeded by his brother The Protectorate terminated on February 28, 1922, and the Sultan was proclaimed King on March 15, 1922

King.

Fuad I. Ahmed Fuad, G C B, was born on March 26, 1868, son of the Khedive Ismail, succeeded his brother as Sultan on October 9, 1917; took title of King on March 15, 1922, married (1) Princess Chivekar, daughter of his cousin, Prince Ibrahim Ahmed, on May 30, 1896; divorced in 1899; (2) Queen Nafī on May 24, 1919, offspring (first marriage) Princess Fewkieh, born Oct 6, 1897, married May 12, 1919, to Mahmud Pasha Fakhry; (second marriage) Prince Faruk, heir to the throne, born February 11, 1920, Princess Fawzieh, born November 5, 1921; Princess Faiza, born November 8, 1923, Princess Faika, born June 8, 1926 and Princess Fathia, born December 17, 1930

According to Article 150 of the Constitution, the King's Civil List is fixed at £E150,000, and the Royal Family's Allowances at £E111,512.

The present sovereign of Egypt is the ninth ruler of the dynasty of Muhammad Ali, appointed Governor of Egypt in 1805, who made himself, in 1811, absolute master of the country by force of arms On April 18, 1922,

the King issued a Rescript fixing the order of succession to the Kingdom of Egypt and declaring the Throne hereditary in the dynasty of Muhammad Ali. The Rescript confirms the King's son, Prince Faruk, as Heir Apparent, and establishes the succession of Kings in the direct male line by primogeniture. Failing such direct line, it provides that the Throne shall pass first to the King's brothers and their direct descendants by right of age, whom failing to the King's uncles and their direct descendants by right of age, it being laid down that each new King establishes a new house and that the succession is vested in his direct line.

Female members of the house and their descendants are excluded, also anyone who is not an possession of full mental powers, who is not a Moslem, or who is not the son of Moslem parents. The King's majority is fixed at 18 years, and in the event of his being a minor when he succeeds a Regency Council will be appointed either by his predecessor or under a secret seal to be opened after his death and ratified by Parliament, or in default by Parliament. This Council will consist of three members chosen from Princes, ex-premiers, ministers and ex-ministers, and Presidents and ex-Presidents of whatever Houses of Parliament may exist.

Constitution and Government.

For an account of the government before 1922, see *THE STATESMAN'S YEAR BOOK*, 1924, pp 834-5

The Constitution, which was promulgated on October 22, 1930, declares Egypt to be a Sovereign State, its monarchy hereditary, and its government representative. Egyptians have equal legal, civil and political rights, irrespective of race, language, or religion. Liberty of the individual and of religious belief is guaranteed, and compulsory elementary education is established for both sexes free in Government schools. All powers emanate from the nation. The King exercises legislative powers concurrently with the Senate and Chamber of Deputies, but the right to initiate financial laws is reserved for the King. No measure can become law unless it is voted by Parliament and sanctioned by the King. The Throne is hereditary in the family of Muhammad Ali, and the succession in accordance with the existing rescript (see above). The King can dissolve the Chamber of Deputies, to which the Ministers jointly and separately are responsible. He is also commander-in chief of the army and navy. But no war of offence may be declared without the consent of Parliament. All powers shall be exercised through the intermediary of the Ministers. No one who is not an Egyptian, and no member of the reigning dynasty, can be a Minister. The King appoints and dismisses Ministers and, on the proposal of the Foreign Minister, diplomats. The Parliament consists of a Senate and Chamber of Deputies. The Senate consists of 100 members of whom the King nominates 60 and the remaining 40 shall be elected by universal suffrage, for a period of ten years. One half of the Senate is to be renewed every five years. The King nominates the President of the Senate. The number of Deputies shall be 160 elected by indirect universal suffrage, with a mandate for five years. Members of Parliament receive an annual allowance to be fixed by internal regulations. Taxes can only be imposed, reduced, or abolished by law, and no public loan, or undertaking committing the Treasury, may be contracted, without the consent of Parliament. The Budget must be presented to Parliament three months before the beginning of the financial year, and must first be discussed and voted in the Chamber of Deputies. The existing financial obligations incurred through the Public Debt or other international engagement cannot be modified. The strength and organisation of the army will be fixed by law.

Islam is the State religion and Arabic the official language. Cairo is the capital of Egypt. The King may exercise his powers in regard to religious establishments and pious foundations and the nomination of religious chiefs according to the laws of the country and in the absence of legislative dispositions, in accordance with current practice. The Constitution does not affect Egypt's obligations to Foreign States or the rights of foreigners acquired in Egypt by virtue of recognised treaties and customs. The provisions relative to the representative Parliamentary régime, the succession to the throne, or the principles of liberty and equality cannot be revised. The Constitution is applicable to the Kingdom of Egypt without prejudice to the rights which Egypt has in the Sudan. The King's title will be established after the status of the Sudan has been definitely fixed by negotiation.

The results of the last elections (June 1-11, 1931), were as follows: — Shaabists (the Party under the leadership of Sidky Pasha) 85, Ittihadists, 38, Nationalists, 8, Independents, 19. The Government had a majority of 96 seats. The forty elected Senators included only Shaabists, Ittihadists and Independents.

The Cabinet was formed on March 14, 1933, as follows: —

Prime Minister and Minister of Finance — Ismail Sidky Pasha.

Minister of Interior — Mahmud Fahmy el Keissy Pasha.

Foreign Affairs — Nakhla El Motei Pasha.

War and Marine — Ali Gamal Ed Din Pasha.

Justice — Ahmed Ali Pasha.

Agriculture — Mohamed Allam Pasha.

Public Works — Mohamed Shafik Pasha.

Wakfs — Ali Bey el Menzawlwi.

Education — Hiliny Issa Pasha.

Communications — Ibrahim Fahmy Kerim Pasha.

LOCAL GOVERNMENT

The Provincial Councils were endowed in 1909 with the powers of applying bye laws, authorising public markets, fixing the number and pay of ghaffirs (village watchmen), and authorising the creation of ezbas (hamlets). They are the local authorities in connection with elementary vernacular education and trade schools. They consist of two elected representatives from each Markaz. The Mudir is the *ex-officio* President of the Council.

Egypt Proper is administratively divided into 5 governorships (*muhâfzas*) of principal towns, and 14 *mudirias* or provinces, subdivided into districts or *Markazes*.

In fourteen towns (Alexandria, Mansûra, Medinet el Faiyûm, Tanta, Zagazig, Damanhûr, Beni Suêf, Mahalla el-Kubra, Minya, Mît Ghamr, Zifta, Kafr el Zayât, Benha, and Port Said), Mixed Commissions composed of both Europeans and Egyptians in equal numbers have been formed to govern locally the towns and look after their interests.

With the exception of Alexandria, all Mixed Commissions have the power to impose taxes on all residents in the town alike, but in case of non Egyptian residents taxes can only be obtained from those who have already given their express consent to be taxed for municipal purposes.

The Municipal Commission of Alexandria obtained in 1890 from European Powers full power to impose local taxation on all residents in the town.

In 56 other towns, another form of local commission exists with four elected members only. Foreign members, not to exceed two in number, can be nominated at the discretion of the Central Government.

These local commissions have practically the same taxing powers as the Mixed Commissions mentioned above.

A third form of local commissions was formed in 1918 under the name of Village Council and exists now in 39 towns in Egypt. This is composed of four elected members only, but without any power of nomination of Foreign members. It has more or less the same taxing power as the Mixed Commissions.

The Central Government has complete power of Veto on all decisions of every form of Commission in Egypt.

Area and Population.

The total area of Egypt proper, including the Libyan Desert, the region between the Nile and the Red Sea, and the Sinai Peninsula is about 383,000 square miles, but the cultivated and settled area, that is, the Nile Valley, Delta and Oases covers only about 13,600 square miles. Canals, roads, date plantations, &c., cover 1,900 square miles, 2,850 square miles are comprised in the surface of the Nile, marshes, and lakes. Egypt is divided into two great districts—'Wagh-el Bahri,' or Lower Egypt, and 'El-Said,' or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census taken in 1917 and on February 18-19, 1927 —

Administrative Divisions	Area in sq miles (approx)	1917 Census	1927 Census			Population per sq mile 1927
		Total	Males	Females	Total

Total	13,574	12,718,255	7,058,073	7,119,791	14,177,864	1,044
Nomads (estimated)	—	82,668	—	—	40,000	—
Grand Total	—	12,750,918	—	—	14,217,864	—

In 1925, Egypt ceded to Italian Cyrenaica the oasis of Jarabub. (For the new frontier between Egypt and Cyrenaica, see map in the 1927 edition of the STATESMAN'S YEAR BOOK)

The growth of the general population of the country is exhibited by the following figures —

1846 (Census)	4,476,440	1907 (Census)	11,287,359
1882 (Census)	6,831,131	1917 (Census)	12,750,918
1897 (Census)	9,734,405	1927 (Census)	14,217,864

The annual rate of increase from 1846 to 1882 was 1.18 per cent, from 1882 to 1897, 2.39 per cent, 1897-1907, 1.49 per cent, 1907-1917, 1.23 per cent, 1917-1927, 1.09 per cent

Births registered, 1931, 664,631, deaths, 397,706, 1930, births, 670,817, deaths, 367,118

The principal towns, with their populations, according to the census of 1927, are — Cairo, 1,064,567, Alexandria, 573,063, Port Said, 104,603, Tanta, 90,016, Mansûra, 63,676, Asyût, 57,136, Faiyûm, 52,863, Zagazig, 52,839, Damanhûr, 51,709, Mahalla el Kubra, 45,642, Minya, 44,325, Suez, 40,523, Beni Suêf, 39,595, Damietta, 34,907, Benha, 28,626, Qena, 27,658, Shibrîn el Kôm, 27,440, Giza, 26,921, Sohâg, 25,289, Rosetta, 23,048, Aswân, 16,458

Religion and Education.

In 1927, the population (excluding 40,000 Nomads) consisted of 12,929,260 Moslems, 999,170 Orthodox, 66,080 Protestants, 116,660 Latins and Uniat, 63,550 Jews, 3,144 others and unknown. Thus Moslems formed 91.19 per cent of the population, Christians, 8.34 per cent, Jews, 0.45 per cent, others, 0.02 per cent. The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded in the year 361 of the Hegira, being 972 of the Christian era. Other centres of higher learning (Islamic Religious Institutions) are the Institutes of Alexandria (Mashakheth 'Ulamâ el Iskandariya), Tanta (Ahmadi Mosque), Asyut, Disûg (Mosque of El Disûgi), Damietta (Ashrafiya Institute and El Bahr Mosque), and Zagazig. All these institutions are under the supervision of the Council of the University of El-Azhar.

There are in Egypt large numbers of native Christians connected with the various Oriental churches, of these, the largest and most influential are the Copts, the descendants of those ancient Egyptians who adopted Christianity in the first century of the Christian era. Their head is the Coptic Patriarch Mgr Yoannes XIX, who was consecrated on December 16, 1928. There are three metropolitans and twelve bishops in Egypt, one metropolitan and five bishops in Abyssinia, and one bishop for Khartum, there are also arch-priests, priests, deacons, and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 284 years from the Gregorian calendar.

Scattered throughout the country there have existed from time immemorial a number of indigenous schools called 'Maktabas'. In 1897, the Ministry of Education endeavoured to bring these independent 'Maktabas' voluntarily under Departmental supervision by means of a system of inspection and reward. Government aid was made dependent upon daily instruction being given in reading, writing, and arithmetic, apart from any religious teaching, and upon the school reaching a satisfactory level of efficiency. The extent to which the scheme has developed is shown in the following table —

Year	Maktabs awarded grants in-aid and under inspection					
	Number of Maktabs	Teachers	Attendance			Grant-in-aid £E
			Boys	Girls	Total	
1927-28	2,361	5,039	174,042	31,859	205,901	19,704
1928-29	2,271	—	166,628	32,168	198,796	18,648
1929-30	2,073	—	157,568	31,221	188,789	16,658
1930-31	1,988	—	153,600	31,808	185,408	15,171
1931-32	1,624	—	180,852	28,033	208,885	—

The following table gives statistics concerning the schools under the immediate direction of the Egyptian Government in 1931-32. The schools marked with an asterisk are administered by the Provincial Councils or by Departments other than the Ministry of Education.

Justice.

Before 1883 the only native tribunals in the country were the *Mahkemas*, presided over by the *Qadis*. At the present time, they retain jurisdiction only in matters of personal law (marriage, succession, &c.), and *wakfs*—the latter being either charitable foundations, or family settlements with an ultimate remainder in favour of a charitable foundation—and also in certain non religious cases (*e.g.* succession) between non Moslem natives. Other Courts of Personal Status, the *Magalis Hasbya* (reorganised by a Law of October 1925), deal with the appointment of tutors, the interdiction of incapable persons and the nomination of guardians for them, the nomination of mandatories for the absent, and the control of the persons so appointed or nominated. In matters of personal law other than intestate succession, non Mussulmans are, however, in general subject to their own Patriarchate, or other religious authority. In other matters, natives are justiciable before the so called Native Tribunals established in 1883. These now consist of 93 Summary Tribunals and of four Judicial Delegations, each presided over by a single judge, with civil jurisdiction in matters up to £E250 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to three years, that is, police offences and misdemeanours, ten Central Tribunals, each of the Chambers of which consists of three judges, and two Courts of Appeal, one at Cairo and the other at Asyút. Under a law of 1904, there are also weekly sittings of the Markaz Tribunals (to the number of 29) in the Governorates of Cairo, Alexandria, Port Said, Suez, and Ismailia for the disposal of petty offences, the judge having powers up to three months' imprisonment or fine of £E10, and the prosecution being conducted by the police. Civil cases not within the competence of the Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to one of the Courts of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905 serious crimes (and, under a law of 1911, and a decree of 1925, all press offences) are tried at the Central Tribunals by three judges of the Court of Appeal sitting as an Assize Court, assizes being held monthly. By a law of 1930 a separate Court of Cassation over and above the Courts of Appeal was set up. The new Court of Cassation is composed of ten Judges divided into two Chambers of 5 Judges each, one for Civil and the other for Criminal cases. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Chef de Parquet*, having under him a Substitut or Substitut-Adjoint at each Summary Tribunal of the circumscription, the investigation of crime is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*. Cases going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, &c., are tried by special administrative tribunals.

The so called 'Cantonal' Courts (numbering approximately 240) composed of village notables, created in 1912, with a general civil jurisdiction in suits up to £5 in value and a petty criminal jurisdiction were suppressed by Law No 84 of 1930, their jurisdiction being transferred to the Summary Tribunals.

Owing to the Capitulations, which still apply to Egypt, foreigners who are nationals of Powers possessing capitulatory rights are exempted from the jurisdiction of the local tribunals. Mixed tribunals were instituted in 1875, consisting partly of native and partly of foreign judges, with jurisdiction, in civil matters, between natives and foreigners and between foreigners of different nationalities, or even between foreigners of the same

nationality if the dispute relates to land in Egypt. These Tribunals have, also, a limited penal jurisdiction, notably in cases of police offences, offences against the bankruptcy laws, and misappropriation of property seized by order of the tribunal. There are three Mixed Tribunals of First Instance, with a Court of Appeal sitting at Alexandria.

Finance.

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,800*l* were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and France began in 1879. In January, 1880, the two Controllers General reported that Egypt could not possibly meet her engagements in full, and in July the Liquidation Law, in accordance with the recommendation of an International Commission of the Great Powers, was promulgated. By this law the Unified Debt was reduced to 4 per cent interest, further conversions were made, and the Unified Debt thus increased to 57,776,340*l*, certain unconsolidated liabilities were added to the Preference debt, which thus rose to 22,587,800*l*, and the Daira Sania debt was increased to 9,512,900*l*, the interest being reduced to 4 per cent. In 1885 and subsequent years further loans and conversions were entered into.

The Daira Sania and the Domains loans were paid off on October 15, 1905, and June 1, 1913, respectively. The amount and the charge of the various debts in April, 1932, were as follows —

	Debt	Charge
	£ sterling	£E
Guaranteed Loan, 3 per cent	8,517,200	807,125
Privileged Debt, 3½ per cent	30,633,980	1,045,384
Unified Debt, 4 per cent	55,250,460	2,154,768
Total	89,401,640	3,507,277

The charges on account of debts of all kinds (including tribute), as shown in the estimates for 1932-33, amount to £E4,101,903.

In 1888 and 1890, reserve funds were established, the balances of which, in virtue of the Anglo-French Convention of April 4, 1904, were placed at the disposal of the Egyptian Government in 1905, less certain sums

remaining in the hands of the *Caisse de la Dette Publique* for the service of the debt. The amount received by the Egyptian Government was carried to a General Reserve Fund. In this Fund on April 30, 1932, there was a balance of £E38,891,257. Of this amount £E15,187,682 represents the engaged Reserve.

Defence.

EGYPTIAN ARMY

By the terms of the British recognition of the independence of Egypt defence is for the present reserved and remains under British control. Service in the army is compulsory, but, owing to the small contingent required, only a fraction (approximately 4 per cent) of the men who are liable actually serve. Service is for five years with the colours and five years in the reserve. In the Sudanese battalions service is voluntary and extended. The army consists of 4 squadrons of cavalry, 4 batteries and 2 garrison companies of artillery, 11 battalions of infantry, and various departments. A few of the higher posts are held by British officers. The strength of the army is about 12,500 officers and other ranks, excluding His Majesty's Body guard. The strength of the latter is approximately 40 officers and 1,100 other ranks.

ARMY OF OCCUPATION

In 1932, the normal British garrison consisted of 3 regiments of cavalry, 3 batteries R H A, 3 batteries Light Brigade R A, 2 companies of engineers and 6 battalions of infantry in Egypt and 2 in the Sudan, and 2 armoured car companies (as well as companies of medical, ordnance, Pay, Service, Signal, and Veterinary departments), the strength being 9,982. Egypt is also the Headquarters of the Middle East Air Command, and contains four squadrons of aeroplanes and a number of air depôts.

NAVY

There are three patrol vessels, *El Amir Farouq*, *Rachid*, and *Abdul Moneim*, maintained by the Coastguard and Fisheries Department, the transports *Sollum* (ex British sloop *Syringa*) and *El Amira Fawzia*, and some smaller vessels, under the Ports and Lighthouses Department, the fishery research vessel *Mabahiss*, and the Royal yacht *Mahroussa*.

Production and Industry

The cultivable area of Egypt Proper was reckoned in 1929-30 at 8,239,185 feddāns (1 feddān = 1,088 acre), and of this 739,945 were taken up for public utility purposes and 1,950,578 were uncultivated for want of reclamation. The *corvée*, or forced labour, has been abolished, but the inhabitants are still called out to guard or repair the Nile banks in flood time. The agricultural population (Fellahin) forms about 62 per cent of the whole. A large proportion of them are small landholders with under 51 feddāns, while others, almost or altogether landless, are labourers, the relation between the employers and the employed being mostly hereditary. The following table shows, on December 31, 1931, the number of landholders and the distribution of the land among foreigners and natives—

Extent of holding in feddâns	Foreigners		Natives		Total of area		Total of Landowners	
	Area in feddâns	Land owners	Area in feddâns	Land owners	Feddâns	Per-centage	Land-owners	Per-centage

Total	503,619	6,131	5,321,461	2,336,949	5,925,300	100.0	2,343,137	100.0

Extensive reservoir works, consisting of a dam at Aswân, a barrage at Esna, a barrage at Nag' Hammâdi (completed in October, 1930), a barrage at Asyût, and a barrage at Zifta, have been completed. The original storage capacity of the Aswan reservoir was 1,065,000,000 cubic metres. The level of the dam has been raised by 6 metres and the capacity of the reservoir increased to 2,423,000,000 cubic metres. Another heightening by 7 metres is to be completed in 1933. The Nag' Hammâdi barrage secures the irrigation of Gîrga Province and part of Qena Province regardless of low flood. The barrage at Esna ensures adequate irrigation to a large area of basin land even in a year of low Nile. The Nag' Hammâdi barrage inaugurated at the end of 1930 is erected across the Nile (Upper Egypt) 588 kilometres south of Cairo. It will improve and assure basin irrigation for a vast area of land, about 580,000 feddâns, on both sides of the Nile. It will regulate the flood waters and thus save the cotton cultivated in these basins from the danger of early floods. It will in future, after the completion of the extensive reservoir works, supply an area of 363,000 feddâns on the left bank of the Nile as well as 150,000 feddâns on its right bank with perennial irrigation. North of Dairût an area of approximately half a million acres has been converted from basin to perennial irrigation in the last ten years. The area and production of cotton in six years were —

Season	Area Feddâns	Crop Qantârs	Season	Area Feddâns	Crop Qantârs
1926-27	1,785,702	7,652,190	1929-30	1,841,478	8,531,172
1927-28	1,516,199	6,087,183	1930-31	2,082,420	8,275,749
1928-29	1,738,472	8,067,942	1931-32	1,682,938	6,367,000

In 1931-32, the area and yield of wheat were 1,588,985 feddâns and 8,369,355 ardebs, barley, 294,573 feddâns and 1,758,776 ardebs, beans, 423,586 feddâns and 1,765,105 ardebs, lentils, 82,081 feddâns and 308,720 ardebs, onions, 43,470 feddâns and 6,468,617 qantârs, maize, 2,113,397 feddâns and 14,188,640 ardebs; millet, 329,651 feddâns and 2,949,931 ardebs, rice, uncorticated, 64,928 feddâns and 163,949 ardebs, sugar-cane, 65,298 feddâns and 47,352,682 qantârs.

In 1931, there were in Egypt 35,714 horses, 741,222 donkeys, 20,527 mules, 792,123 cows, 821,835 buffaloes, 1,239,111 sheep, 636,028 goats, 162,470 camels, and 18,404 pigs.

The principal mineral products in 1931 were (in metric tons) phosphate rock, 257,011, petroleum, 289,419, manganese iron ore, 101,781. Other products are Nitrate shale, carbonates and sulphate of soda, ochres, sulphate of magnesia, talc, building stones, clay, gypsum, natron, nitrate of soda, salt, and turquoise. The following minerals are also known to exist, namely, alum, copper ore, beryl, granite, ornamental stones, and sulphur.

The fishing industry is of some importance. The catch of the Egyptian sea and lakes fisheries in 1931 amounted to 9,850 metric tons, and 5,930 metric tons Nile fisheries. On January 1, 1932, there were 5,026 boats licensed for fishing.

Shipping and Navigation.

In 1931, excluding warships and vessels requisitioned by the military

¹ Including Anglo Egyptian Sudan

authorities, 8,509 steamers of a net registered tonnage of 31,428,601 entered at; and 8,499 steamers of a net registered tonnage of 31,426,862 departed from, all the Egyptian ports (Alexandria, Port Said, Suez, Tor, El Qoseir, Safâga, Marsa Matrûh and Sollûm) The total number of sailing vessels (both foreign and coasting trade) that entered the ports was 2,453 of 125,488 net tons, and of those that departed, 2,453 of 122,516 net tons

Suez Canal.

The Suez Canal is 103 miles long (including 4 miles of approach channels for the harbours), connecting the Mediterranean with the Red Sea. It was opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968.

The following table shows the number and net tonnage of commercial vessels (excluding vessels requisitioned by the military authorities) of all nationalities that passed through the Canal in 1931

Nationality	No of transits	Suez Canal net tonnage	Nationality	No of transits	Suez Canal net tonnage
British	2,976	16,624,352	Greek	25	52,609
American	103	624,535	Italian	286	1,424,005

Belgian	23	83,066	Swedish	79	383,254
French	354	2,084,085	Russia	62	175,494
German	568	3,314,750	Other nationalities	29	148,013
			Total	5,826	80,027,966
			Total (1932)	5,032	28,540,389

The number of Government vessels (war ships and transports) that passed through the Canal in 1931 was 86 of 269,145 Suez Canal net tonnage (including 69 British of 230,814 net tonnage).

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the gross receipts of the company, have been as follows in six years —

Year	No of Transits	Net Tonnage	Receipts	Year	No of Transits	Net Tonnage	Receipts
			Frs				Frs
1927	5,545	28,962,048	764,595,100	1930	5,761	31,668,759	1,098,547,619
1928	6,064	31,905,902	1,167,112,088	1931	5,366	30,037,966	979,677,487
1929	6,274	33,466,014	1,189,955,441	1932	5,032	28,340,280	—

The number of passengers (civil and military) who went through the canal was, in 1928, 315,009; 1929, 325,855; 1930, 305,202; 1931, 270,657

Internal Communications.

In 1931, there were 3,374 miles of rails belonging to and worked by the State, including 2,489 miles of main line, 155 miles of branch line, and 734 miles of sidings. There were also 874 miles of rails of agricultural light railways owned by private companies besides 103 miles of sidings. The State railways have a gauge of 4 ft. 8½ in inside rails (the line, 124 miles in length, from Luxor to Assuan being opened on wide gauge in Dec. 1926), except that to the Western Oases, which is 2 ft. 5½ in.

The number of passengers carried in 1930-31 was 26,937,000, weight of

goods carried, excluding service transports, 5,498,000 tons, and the net receipts, £E2,962,569. The working expenses, £E4,076,825 in 1930-31, represent an average of 58 per cent of the gross receipts, which were £E7,038,894.

The telephones have belonged to the Egyptian Government since April 1918. On April 30, 1931, the telegraphs had a length of 222,709 miles of wire, telephones and trunks 217,246, and railway telephones 4,175. The Eastern Telegraph Company, by concessions, have telegraph lines across Egypt from Alexandria via Cairo to Suez, and from Port Said to Suez, connecting their cables to England and India. The number of telegrams in 1931-32 was local, 2,340,210 commercial and 1,870,324 service, foreign, 138,467 forwarded, 151,552 received, and 120,439 transit. The number of telegrams forwarded and received by wireless stations in 1931-32 was 60,840.

There were, in 1931, 4,206 post offices and stations. In the inland service (1931) there passed through the post office 120,190,426 ordinary and registered articles of correspondence, 24,559,976 ordinary and registered articles of correspondence, and 32,322,775 were despatched and received to and from abroad respectively. Receipts £E720,022, expenses £E670,379.

There are two regular weekly air mail services between Egypt and Europe, between Egypt and India, and also one regular weekly air mail service between Cairo, the Sudan, and South Africa.

Banks and Credit.

The National Bank founded in 1898 has the privilege of bank-notes issue. It has a capital of 3,000,000*l* with reserve funds amounting to 3,000,000*l*. Le Crédit Agricole d'Egypte was founded in November 1930 with a capital of £E1,000,000 (half subscribed by the Government).

On December 31, 1931, there were six mortgage banks and nine ordinary banks working chiefly in Egypt with a total paid up capital of £E16,819,183, *i.e.*, £E9,856,923 for the former, and £E6,962,260 for the latter. Debentures of the mortgage banks amounted to £E34,789,687. The reserve funds (including profits carried forward) of these two groups of banks amount to £E6,274,170 and £E4,533,807 respectively.

In 1901, a Post-Office Savings Bank was opened, and on December 31 of that year, it had 6,740 depositors with balances amounting to £E47,492. On December 31, 1931, the depositors numbered 329,337, and their balances amounted to £E2,498,074.

In April, 1912, a rural savings bank service was inaugurated. At the end of that year the balance of deposits in the new branch amounted to £E25,413, and the number of accounts to 127,927. On December 31, 1928, the balance amounted to £E5,983, and the number of accounts to 517. At the beginning of 1929, this service was cancelled. The balance of deposits in the savings banks of the foreign banks at the end of 1931 amounted to £E1,900,396 and the number of depositors to 31,743.

Money, Weights, and Measures.

MONEY.

By decree of October 18, 1916 (20 Zi l-Higga 1334), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8.5 grammes.

·875 fine, and therefore contains 7 4375 grammes of fine gold. Its value in sterling is £1 0s 6½d. A new coinage was introduced at the same time in which the *Tughra* of the Sultan of Turkey was superseded by that of the ruler of Egypt.

The 10 piastre silver piece weighs 14 grammes 883 fine, and therefore contains 11 67 grammes of fine silver. The piastre is worth 2 46d in English money. It is subdivided into tenths (*ushr el girsh* or *millièmes*).

Coins in circulation are the Egyptian pound (100 piastres) and half pound in gold, 20, 10, 5, and 2 piastre pieces in silver, 1, ½, ¼ piastre pieces in nickel, ⅓ and ⅙ pieces in bronze. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively British sovereigns, which are legal tender at the rate of 97½ piastres. The gold pieces of the former Latin Monetary Union equivalent to the French 20 franc piece are permitted to circulate at a uniform rate of £E0 7715.

Bank notes are issued by the National Bank in various denominations £E1, 5, 10, 50, 100. They are in principle not legal tender, but since the war they have been made legal tender and inconvertible. The amount in circulation at the end of December, 1932, was £E18,751,147. In 1918 the Government issued currency notes of 10 piastres and 5 piastres, but these have now been withdrawn, and the amount of currency notes in circulation has shrunk from £E1,715,000 in September, 1920, to £E50,626 at the end of December, 1932.

The principal units of Egyptian weights and measures are defined in terms of the metre of the 'Commission Internationale du mètre' by the Law No 9 of September 26, 1914. The equivalents remain the same as were defined by the Decree of April 28, 1891.

Measures of length	<i>Diraa baladi</i>	= 0 metre 58 centimetres
"	<i>Diraa mi' mārī</i>	= 0 metre 75 centimetres
" weight	<i>Dirhem</i>	= 3 grams 12 centigrams
" capacity	<i>Ardeb</i>	= 198 litres

MEASURE OF CAPACITY

The *Ardeb* is equal to 43 555 gallons, or 5 44439 bushels.

The approximate weight of the *ardeb* is as follows — Wheat, 334 rotls; beans, 345 rotls; barley, 267 rotls; maize, 312 rotls; cotton seed, 270 rotls.

WEIGHTS

<i>Oqia</i>	.	= 1 3207 ounce
<i>Rotl</i>	.	= 99049 lb
<i>Oke</i>	.	= 2 7513 lbs
<i>Qantār</i>	{ or 100 Rotls or } 36 Okes	= 99 0493 lbs.

LENGTH MEASURES

	Inches
<i>Diraa Baladi</i> (for textiles)	= 22 8347
<i>Diraa Mīmārī</i> (for building, &c)	= 29 5276
<i>Qasaba</i> (for agricultural land)	= 3 8823 yards = 139 7639

MEASURE OF SURFACE

Faddān, the unit of measure for land, = 7,468 148 sq pica = 1 03805 acres
1 sq. pic = 6 0547 sq ft. = 0 5625 sq metre

Diplomatic Representatives.

1 OF EGYPT IN GREAT BRITAIN

Envoy and Minister —H E Hafaz Afifi Pasha

Counsellor—Abdel Wahab Daoud Bey

Secretaries —Georges Cattani and Henri Wassef Semuka

Attaché —Hassan Moharram

2. OF GREAT BRITAIN IN EGYPT

His Majesty's High Commissioner for Egypt and the Sudan —Sir Percy Lyham Loraine, Bt, K C M G Appointed August 27, 1929

Counsellor —R I Campbell, C M G

Secretaries —R C S Stevenson, F R Hoyer Millar and G P La'bouchere

Oriental Secretary —W A Smart

Assistant Oriental Secretaries —L B Graffey Smith, O B E, and N. Mayers.

Commercial Secretary for Egypt and Sudan —G H Selous, O B E

There are Consuls General at Alexandria and Cairo and Consuls at Port Said, and a Vice Consul at Suez

ESTONIA.

(EESTI VABARIK)

THE Estonian Republic is situated on the Eastern shore of the Baltic Sea, South of the Gulf of Finland between 57° 27' and 59° 42' North Latitude and 21° 46' and 28° 21' Longitude (Greenwich), and includes the Baltic Islands Saaremaa (Oesel), Hiiumaa (Dago), and Muhumaa (Moon). The Eastern border towards Russia is formed by Lake Peipus and the Southern by the Republic of Latvia.

In 1721, the country, which had belonged to Sweden since the early part of the seventeenth century, was handed over by Sweden to Russia, and remained under the rule of the latter until 1917. In 1917, after the outbreak of the Russian Revolution, Estonia regained her independence, which was declared on February 24, 1918. By the Treaty of Tartu, of February 2, 1920, Soviet Russia recognised the independence of Estonia. On January 26, 1921, the Supreme Council accorded the Republic *de jure* recognition.

Constitution and Government.—The Constitution of the Estonian Republic was passed by the Constituent Assembly on June 15, 1920, and has been in force since December 21, 1920.

The power of the State is in the hands of the people. The sovereign power is assured to the people by means of the elections to the Legislative Assembly (*Riigikogu*, State Assembly), the referendum, and the right of initiating legislation.

The State Assembly is composed of 100 members, elected for three years on the basis of proportional representation, and by universal, direct, equal, and secret suffrage. The Assembly forms the Government, and accepts its resignation, promulgates the laws, passes the budget, decides the financial

policy generally, ratifies treaties, the mobilisation decree, and state of siege, &c

The signatures of 25,000 citizens are necessary in demanding a referendum, proposing a new law, or amending the existing laws. The budget and measures affecting war, peace and foreign treaties cannot be submitted to a referendum

The executive power consists of the State Head (*Riigivanem*, State Elder), and ministers, who form the Government. The Government directs the foreign and home policy of the Republic, appoints officials (except where special laws exist), and introduces legislation. It is chosen by the State Assembly, and is responsible to that body. The Government collectively and individually must possess the confidence of the Assembly, and must resign if a vote of no confidence is passed. The Government is the Commander in Chief of the Republican defence forces in peace time. In February 1933 a proposal was put forward to alter the Constitution so as to provide for a President.

The members of local organs of self government are elected on a basis similar to that on which rest the elections to the State Assembly.

The national flag of Estonia is blue, black and white in horizontal stripes.

The elections for the Estonian State Assembly were held on May 20-22, 1932, and resulted in the return of the following parties—Agrarians and Settlers, 42, National Middle Party, 23, Socialists, 22, Left Workers, 5, Russian Minority, 5, German and Sweden Minorities, 3.

The Prime Minister is called the State Head.

State Head (Riigivanem).—Constantin Pacts, appointed November 1, 1932

Area and Population.—The boundary line between Estonia and Russia is defined by the Peace Treaty of February 2, 1920. The boundaries between Estonia and Latvia were settled on November 1, 1923. The total area is about 47,548 square kilometres, or 18,353 square miles.

The population of 1,120,000 (January 1, 1932) is composed as to 87.7 per cent. of Estonians, 1.7 per cent. of Germans (Balt), and 10.6 per cent. of Russians and other nationalities.

The Republic is divided into eleven districts, as follows (the capitals are given in brackets, and when two are given the second mentioned is the German name):—Harju (Tallinn Reval), Viru (Rakvere Vesenberg), Jarva (Paide Veissenstein), Laane (Haapsalu), Tartu (Tartu-Dorpat), Võru (Võru), Viljandi (Fellin), Pärnu (Pärnu), Saaremaa Oesel (Kuresaare-Arensburg), Põltsamaa (Põltsamaa), and Valga (Valk). The capital, Tallinn (Reval), was founded in 1219 at the mouth of the Gulf of Finland, and in 1932 had 134,000 inhabitants. The university town of Tartu (Dorpat) had 72,000 inhabitants. The population of the port of Pärnu, on the Gulf of Riga, was 21,000, and that of the manufacturing town of Narva 25,000.

Religion and Education.—There is no State religion in Estonia. Five sixths of the population are Lutherans, the rest Greek Orthodox, Catholics, &c.

Elementary education is obligatory and gratuitous. In 1930-31, there were 1,261 elementary schools in the Estonian Republic. Of this number 1,281 were supported by local authorities and 80 were private schools. The number of middle schools for general education, gymnasiums, and so on, was 74, of which number 23 were private schools.

For special or professional education there are 3 teachers' seminaries, 4 navigation schools, commercial schools with three years' course, agricultural

schools with a 1-3 years' course and industrial schools with a 3-6 years' course

The minority nationals (Germans, Russians, Swedes, Jews, and Letts) receive education in their mother tongue

For higher education there are the Tartu (Dorpat) University (founded in 1632), which on December 1, 1919, was re opened as an Estonian seat of learning maintained by the Government, number of students (1931), 3,292 (2,234 men and 1,058 women)

Justice—The supreme judicial power is invested in the State Court of Justice, which is elected by the State Assembly and sits in Tartu (Dorpat)

The laws are being gradually revised by the State Assembly

Finance—Revenue and expenditure for five years were as follows (in thousand Estonian kroons) —

	1927-28	1928-29	1929-30	1930-31	1931-32 ¹
Revenue	183,868	96,915	91,324	89,752	90,044
Expenditure	180,900	95,771	95,739	96,968	90,044

¹ Estimates

The foreign debt of Estonia (January 1, 1932) was as follows — 16,466,012 dollars to the United States, 1,194,205¹ to United Kingdom, 8,288,896 kronor to Sweden Financial reform loan (1927), 3,848,000 dollars and 675,500¹

Defence—Military service is compulsory. The period of service in the active army is 1 year The army is organised in 3 divisions The peace strength in 1931 was 1,290 officers and 12,245 other ranks, and the mobilizable strength 90,000 Military aeroplanes, 74 The military budget for 1930-31 was 18,452,509 kroons, for 1931-32, 36,426,000 kroons

The naval forces consist of two destroyers (1,800 and 1,600 tons, armed with 4 in guns), one torpedo boat, four gunboats, and over a dozen smaller craft

Production—Agriculture and dairy farming are the chief occupations There are 133,357 allotments on which about 70 per cent of the total population is engaged The total area is about 10,851,648 acres, divided as follows forest land, 2,337,324 acres (21.5 per cent), fields, 2,549,046 acres (23.5 per cent), meadows, 2,249,686 acres (20.7 per cent), pastures, 1,754,174 acres (16.2 per cent), untilfable land, 1,631,978 acres, (15.0 per cent), including a peat bog of 329,440 acres

The principal crops, with acreage and yield, are shown as follows —

	Acreage		Yield in metric tons	
	1930	1931	1930	1931
Rye	866,519	855,676	225,677	147,833
Wheat	90,446	99,153	44,486	47,289
Barley	276,159	278,742	128,809	128,838
Potatoes	168,124	167,562	863,110	854,532
Oats	868,159	866,741	157,779	163,964

The yield of flax in 1931 was 5,922 metric tons from an area of 45,296 acres as against 10,770 metric tons and 80,425 acres in 1930.

In 1932, Estonia had 692,310 head of cattle, 514,420 sheep, 302,890 pigs, 208,240 horses, and 1,190,000 poultry

In 1931, there were in Estonia 357 dairy factories, of which 87·4 per cent were co-operative. Butter is the chief article of export and already represents 36 per cent of the total exports

In 1930, Estonia had 35,740 employees engaged in industry. The most important industries of the country are textile, paper, cement and oil shale industries, forestry, timber, match, flax and leather industries. There are about 100 tanneries in operation. Oil shale output in 1931, was about 500,000 metric tons, the output of crude oil being 15,700 metric tons

Commerce—Trade for 5 years is shown as follows in Estonian kroons —

	1928	1929	1930	1931	1932
Imports	181,973,500	122,967,500	98,369,500	61,224,000	86,860,200
Exports	127,108,900	117,471,300	96,433,800	71,073,300	45,870,900

Principal imports in 1931 (thousand Estonian kroons) were grain and flour, 3,066·1, raw cotton, 3,376·5, sugar, 3,789·9, textile products, 7,860·7, metals, 2,727·2, machinery, 2,334·7. Principal exports in 1931 (thousand Estonian kroons), dairy produce, 29,740·5, timber, 5,670·2, textile products, 7,423·2, paper, 3,307·0, cellulose, 8,668·7

The distribution of trade in 1931 was as follows (in thousand kroons) — Imports, Germany, 18,340, United Kingdom, 4,710, United States, 5,435, Poland, 4,611, Soviet Russia, 6,906. Exports, United Kingdom, 25,990, Germany, 17,261

Total trade between the United Kingdom and Estonia for 5 years (according to Board of Trade returns) —

	1928	1929	1930	1931	1932
Imports from Estonia into United Kingdom	£ 2,271,727	£ 2,497,127	£ 1,901,592	£ 1,908,066	£ 1,257,951
Exports to Estonia from United Kingdom	600,894	463,774	888,479	212,680	348,772
Re-exports to Estonia from United Kingdom	234,142	235,922	124,313	59,476	61,090

Shipping and Communications—On July 1, 1932, Estonia possessed 99 steamers and motorships of 94,018 tons gross, and 47 sailing vessels of 11,999 tons gross

During 1931, 2,902 vessels of 981,262 tons entered and 2,944 vessels of 982,156 tons cleared the ports of Estonia. The principal port is Tallinn (Reval). In 1932, the merchant marine consisted of 97 steamers of 79,462 tons, and 247 sailing vessels of 24,569 tons, with a total tonnage of 114,993

Estonia had a total railway mileage in 1931 of 1,250 kilometres, or 777 miles

In 1931 the post office handled 17,121,585 letters and 5,159,438 postcards in the internal service, received 3,843,939 letters and 1,161,828 postcards from abroad and sent 2,735,460 letters and 1,136,629 postcards abroad

In 1932 there were 436 kilometres of telegraph lines, 607 offices. The number of telegrams sent (1931), 108,103 internal and 284,154 foreign. Number of telephone circuits, 361, length of telephone line, 4,532 kilometres, number of inter urban conversations, 15,848,738

Banking and Currency

The Bank of Estonia (*Eesti Pank*) was founded on February 24, 1919, and began operations on May 3, 1919. Its capital was 10,000,000 Estonian marks, increased in 1921 to 250,000,000 marks. The functions of the Bank, the management of which was controlled by the Government, were to issue and regulate currency and transact ordinary banking business.

It was only on January 1, 1928 that the Bank on reorganisation, obtained the sole right of issue when the existing treasury notes were merged with the bank notes of the Bank of Estonia, and the currency placed on a gold standard.

Three institutions supply the long-term credit needs of agriculture and industry: the Estonian Hypothecary Bank, the Land Bank of Estonia (*Maa Pank*) and the National Mortgage Bank (*Pikalaenu Pank*).

A State Savings Bank was established on January 1, 1928. On December 31, 1931, total deposits amounted to 4,691,417 crowns, the number of depositors being 10,408.

There are two central institutions for co-operative banks: the Estonian People's Bank and the Farmers' Central Bank.

There are besides the above 12 joint stock, one private and 2 municipal banks.

Since January 1, 1928, the unit of currency is the *Kroon*, which is the same as a Swedish gold *krona*, and has a gold content of 0.403226 gramme of pure gold. This is subdivided into 100 *sents*, each sent being equivalent to one of the old Estonian marks, which were stable for almost three years at the ratio of 100 to 1 Swedish *krona*. Abbreviation for internal use *Kr* for 'Kroon,' for international use *Ekr* for 'Estonian Kroon,' and 'S' for internal and international uses for 'sent.'

On February 7, 1932, there were in circulation 33,459,000 kroons in bank notes, at the same date the bank held 7,308,000 kroons of coin and bullion. The denominations of the currency are paper notes, 50, 10, 5, 1 kroon, nickel coins, 25, 10, 5, 3 and 1 sent pieces, silver coins, 2 kroon.

The metric system of weights and measures has been in force since January 1, 1929.

Diplomatic and Consular Representatives

1 OF ESTONIA IN GREAT BRITAIN

Envoy and Minister — Dr Oskar Philipp Kallas (appointed January, 1922)

Consul-General and Counsellor of Legation — Hans Markus

Secretary — Voldemar Ojanson

Agricultural Attaché — Villebald Raud

There are Consular Representatives in London, Aberdeen, Hull, Dover, Belfast, Leith, Bo'ness, Liverpool, Methill, Alloa, Glasgow, Manchester, Dundee, Cardiff, Southampton, Dublin, Newcastle, Sydney, Gibraltar, Malta, Fowey, Burntisland, Grangemouth, Swansea, Montreal, Jaffa, Sydney.

2 OF GREAT BRITAIN IN ESTONIA

Envoy and Minister — H. M. Knatchbull Hugessen, C M G (appointed April 7, 1930), also minister at Riga and Kovno.

Secretary — O. A. Scott, D S O

Naval Attaché — Commander M. A. Hawes, R N

Military Attaché — Major R. C. W. G. Firebrace, R A

Chargé d'Affaires and Consul at Tallinn — A. J. Hill

FINLAND.

(SUOMEN TASAVALLA)

Constitution and Government.

CENTRAL GOVERNMENT

Finland is a Republic according to the Constitutional Law of July 17, 1919

From 1809 Finland was united to the Russian Empire as an autonomous Grand-Duchy On December 6, 1917, the House of Representatives unanimously proclaimed Finland an independent and sovereign State, and she has been recognised as such by the Powers According to the Constitutional Law of 1906, the House of Representatives consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year There are 16 electoral districts with a representation proportioned to the population, a rearrangement being required every 10 years Each district is divided into voting circuits The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them on the list voted

for There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years

The President is elected for 6 years by the votes of the citizens He receives a salary of 700,000 marks and 170,000 marks for allowances The Council of State (Ministry), appointed by the President, must enjoy the confidence of the House of Representatives.

At the elections held on October 1 and 2, 1930, the following parties were returned Social Democrats, 66, Agrarians, 59, Finnish Coalition Party, 42, Swedish Party, 21, Finnish Progressive Party, 11, Small Farmers' Party, 1

President of Finland —Dr Pehr Evind Svinhufvud (born 1861, elected February 16, 1931)

The Council of State, appointed on December 14, 1932, is composed as follows —

Prime Minister —Prof T M Kivimäki (Progress Party)

Minister for Foreign Affairs —A V Hackzell (Coalition Party)

Minister of Finance —Dr H M J Relander (Coalition Party)

Minister of the Interior —Dr Y W Puhakka (Coalition Party)

Minister of Defence —A A Oksala (Coalition Party)

Minister of Justice —H A Malmberg (Swedish People's Party)

Minister of Education —Dr O Muntere (Progress Party)

Minister of Agriculture —Prof K T Jutila (Agrarian)

Minister of Commerce and Industries —F Kallineu (Coalition Party)

Minister of Communications —K E Linna (Progress Party)

Minister of Social Affairs —Dr L Hynninen (Agrarian)

LOCAL GOVERNMENT.

For administrative purposes Finland is divided into nine departments The provincial administration is entrusted in each of the departments to a prefect, who is appointed by the President The unit of local government is the commune Each rural parish and each town forms a commune in which all men and all women of 21 years of age who have paid the local taxes for the preceding two years are voters In all communes a communal council is elected to decide questions of administration and local economy The executive power is vested in rural communes in a college formed by the head of the commune and four or more aldermen elected by the council In towns the executive authority is the magistrates with the burgomaster as president and other members elected by the council There were, in 1932, 38 towns, 25 boroughs, and 538 rural communes in Finland As executive officers of the Prefects there are the bailiffs of 54 and sub-bailiffs of 300 districts

The department of Aland has a county council (*landsting*) consisting of one chamber which is elected on the basis of the same suffrage as the Parliament The county council settles the internal affairs of the government The executive authority is with an executive council, of which the *lantråd* is president

Area and Population.

The area and population of Finland, according to the census taken on December 31, 1920, and that taken on December 31, 1930, were as follows (Swedish names are given in brackets) —

Departments	Area ¹ English sq miles	Popula- tion Dec 31, 1920	Popula- tion Dec 31, 1930	Popula- tion per sq mile, 1930
Uusimaa (Nyland)	4,388	446,329	507,708	115.7
Turku Pori (Åbo Björneborg)	8,397	495,501	522,222	62.2
Åhvenanmaa (Åland)	551	26,911	27,375	49.7
Häme (Tavastehus)	6,737	360,528	389,036	57.7
Viipuri (Viborg)	12,072	558,202	622,553	51.6
Mikkeli (St. Michel)	6,414	204,425	208,901	32.6
Kuopio	13,986	355,701	381,100	27.3
Vaasa (Vasa)	14,800	548,055	582,874	39.4
Oulu (Uleåborg)	65,244	369,095	425,278	6.5
Total	132,580	3,364,807	3,667,007	27.7

¹ Excluding water area, which amounts to an additional 17,314 square miles

Of the total on December 31, 1930, 1,809,068 were males and 1,857,999 females. In 1930, 3,022,257 spoke Finnish, 342,916 Swedish, 8,216 Russian, 3,719 German, 2,113 Lapponic

The growth of the population is shown as follows —

Years	In Towns	In Country	Total	Percentage in towns
1800	46,604	786,055	832,659	5.60
1900	339,613	2,372,949	2,712,562	12.52
1920	657,056	2,985,099	3,642,095	18.04
1930	671,545	2,995,222	3,667,067	18.32
1931	707,159	2,960,346	3,667,505	19.13

According to the census of December 31, 1930, the population was divided according to occupations as follows: agriculture, 2,014,788 (60 per cent), industry, 569,505 (17 per cent), communications, 127,995 (4 per cent), commerce, 145,361 (4 per cent), public administration, 67,526 (2 per cent), professions, 71,201 (2 per cent), others, 455,573 (11 per cent)

The movement of the population for four years was as follows —

Year	Living Births	Of which illegitimate	Stillborn	Marriages	Deaths (exclusive of stillborn)	Excess of Births
1928	77,523	6,134	1,955	25,520	48,713	28,810
1929	76,011	6,192	2,027	25,060	54,459	21,522
1930	75,286	6,228	2,086	24,841	48,240	26,996
1931	71,866	6,008	2,051	23,856	48,968	22,898

Emigration 1927, 6,088, 1928, 5,055, 1929, 6,383, 1930, 3,964, 1931, 741, 1932, 1,609

The principal towns, with the number of their inhabitants at end of 1930, are Helsinki (Helsingfors), 243,560, Turku (Åbo), 66,654, Tampere (Tammerfors), 55,967, Viipuri (Viborg), 55,750, Vaasa (Vasa), 26,101, Oulu (Uleåborg), 24,186, Kuopio, 24,082, Pori (Björneborg), 18,355, and Kotka, 17,376

Religion and Education

The National Church is Evangelical Lutheran religion, but entire liberty of conscience is guaranteed to the members of all religions and

confessions Ecclesiastically (the Evangelical Church of) Finland is divided into 5 bishoprics (Turku being the archiepiscopal see), 56 provostships, and 595 parishes

Of the total population there were at end of 1931 Lutherans, 3,561,591, Greek-Catholics and Raskolnics, 67,863, Roman Catholics, 1,371, Baptists, etc., 9,564, Jews, 1,783, Mohammedans, 299, belonging to the civil-register, 55,034 The Greek-Catholics are under an archbishop, resident at Viipuri

Finland has 3 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), with (1932) 332 teachers and 6,012 students (2,298 women), at Turku (Swedish, opened 1919), with 41 teachers and 234 students (83 women), and at Turku (Finnish, opened 1922), with 26 teachers and 442 students (228 women) In 1931, there were also 1 technical school at Helsinki, with 90 teachers and 758 students (56 women), and 3 commercial schools, one Finnish with 19 teachers and 256 students (46 women), and the others Swedish with 33 teachers and 263 students (41 women)

For secondary education there were, in 1931, 133 lyceums, leading to university, 2,524 teachers and 39,941 pupils (20,176 girls) 80 middle schools (with a curriculum of 5 years), with 699 teachers and 9,541 pupils. There were 8 training colleges for elementary school teachers, with 105 teachers and 1,362 students, and 4 for infant school teachers, with 265 students. There were also 57 high schools for the people, with 440 teachers and 2,869 pupils (1,976 females) For elementary education (1931) there were in the country 5,217 elementary schools, with 219,756 pupils (107,863 girls), 4,668 lower elementary schools, with 108,456 pupils. In the towns there were (1931) 1,396 classes of higher elementary schools, with 42,874 pupils (20,646 girls). There were besides 6 navigation schools, with 249 pupils, 45 commercial schools, with 3,625 pupils, 10 industrial schools, with 1,353 pupils, 2 technical schools, with 221 pupils, 187 schools for arts and crafts, with 6,591 pupils, 52 agricultural schools, with 2,053 pupils, 4 dairy schools, with 113 pupils, 45 cattle-management schools, with 1,728 pupils, 42 household schools, with 2,062 pupils, 6 horticultural schools, with 103 pupils, and 5 forestry schools, with 172 pupils. The school age in primary schools is from 7 to 15 years

In 1930, only 0.9 per cent of persons who have completed their 15th year could neither read nor write

In 1931, there were published 511 newspapers and reviews in Finnish, 116 in Swedish, 71 in Finnish and Swedish, and 6 in other languages

Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the District. In towns these district courts are held by the burgomaster and his assessors, in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Court (*Hörmånsrätt*) in Turku, Vaasa and Viipuri. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government, while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1931, the prison population numbered 7,273 men and 803

women, while the number of sentences pronounced in 1929 was 121,859 for crimes and 42,829 in civil cases.

Pauperism.

The number of paupers in 1930 supported by the towns and the village communities was 142,680 (3·9 per cent of the population), and the total cost was 332,071,229 marks

Finance.

Revenue and expenditure for 5 years in thousands of marks according to Balance of Accounts —

	1929	1930	1931	1932 ¹	1933 ¹
Revenue	4,342,000	4,398,100	4,975,100	2,857,700	2,877,400
Expenditure	4,508,100	4,738,700	4,245,600	2,855,600	2,877,800

¹ Estimates

The main items of the ordinary budget of Finland for 1933 are as follows in millions of marks —

Revenue	Millions of marks	Expenditure	Millions of marks
Direct taxes	401·9	President	2·0
Customs	1148·6	Parliament	11·9
Excise	291·0	State Chancellor and Council	11·0
Mixed taxes	185·0	Administration —	
Fees	81·0	Interior	318·2
Interests, dividends, etc	265·7	Justice	100·2
Miscellaneous revenues	200·8	Foreign Affairs	33·3
State enterprises (net income) —		Finance	50·7
Communications	31·2	Defence	445·0
Industries	3·6	Church and Education	438·0
Sundry enterprises	2·0	Agriculture and Forestry	193·0
State forests	48·3	Communications	156·9
Agricultural enterprises	2·0	Trade and Industry	69·0
Capital incomes	215·4	Social Affairs	53·6
		Pensions	93·8
		Debt	391·6
		Miscellaneous expenditures	25·2
		Investments which give income	232·1
		Investments which do not give income	246·3
Total	2877·4	Total	2877·3

At the end of December, 1932, the foreign loans totalled 2 782,600,000 marks and the internal loans 689,300,000 marks, a total of 3,471,900,000 marks. Of the foreign loans 2,431,700 000 marks, and of the internal loans 505,800,000 marks, were consolidated.

Defence.

ARMY.

The military forces of Finland consist of (1) the army, air force and coast defence, recruited on the principle of universal service, (2) the Civic

Protective Guards Organisation, recruited from the voluntarily enrolled citizens

The President of the Republic is Commander in Chief of the Finnish military forces, but during war he may invest a general with that authority. In peace time the Minister of Defence appointed by the President is responsible for the military administration. The Chief of the Army, assisted by the General Staff, directs the commanding affairs of the army, air force and coast defence.

Every citizen is liable to serve from the age of 17 to the age of 52. The conscripts are divided into troops of the line and the "landwehr".

The troops of the line consist of the standing army and the reserve. All young men who have reached the age of 21 years are summoned to active service. The period of service is generally 12 months—in the cavalry, air force, technical troops, navy, and field and coast artillery 15 months. The term of service is the same for those who are appointed to be trained to officers of the reserve or non-commissioned officers. In the reserve to which the conscript belongs after service with the colours, the period of service is 7 years.

The "landwehr" is divided into three classes, to the first class belong the conscripts who after their service in the reserve are relegated to the "landwehr" (men of 29–52 years), to the second, the conscripts who are considered as incapable for active service in peace time (men of 21–52 years), and the third, young men who cannot on account of their youth yet be enrolled as conscripts (17–21 years).

The effectives in 1932 amounted to 1,907 officers and officials and 29,000 other ranks, organised in 3 divisions.

The Air Force comprises 7 squadrons, 1 air school and 1 seaplane station, with a personnel of 1,910 all ranks.

The Coast Defence consists of the coast artillery and the coast fleet.

The Civic Guards are an essential part of the plan of defence. For the administration the Commander in Chief of the Guards appointed by the President is subordinated to the Minister of Defence, and directly responsible to the President with regard to his command. The number of the Protective Guards is about 100,000.

The military budget for 1933 amounts to 444,997,800 Finnish marks.

NAVY

The naval forces consist of 4 gun boats, 7 motor torpedo boats, 3 mine layers, 4 submarines and a number of small vessels. Two 4,000 tons coast defence ironclads, each armed with 4 10 inch guns, are under construction in Finland, for completion in 1933.

A retired British naval officer is attached to the Ministry of Defence in an advisory capacity.

Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area only covers 6.6 per cent of the land. The land was divided in 1929 into 285,390 farms, and the landed property was distributed as follows—Less than 3 hectares cultivated, number of farms, 109,155, 3–10 hectares, farms 108,642, 10–25 hectares, farms 51,683, 25–100 hectares, farms 15,083, over 100 hectares, farms 827 (1 hectare = 2.47 acres).

The principal crops of 1931 were as follows—rye, 527,896 acres, yielding 815,247 tons, barley, 292,817 acres, yielding 165,580 tons, oats,

1,118,924 acres, yielding 669,661 tons potatoes, 185,586 acres, yielding 977,911 tons, hay, 2,929,078 acres Total land under cultivation, 1931, 5,741,848 acres Butter production in 1931 was 27,927 tons

Domestic animals in 1931 —Horses, 352,956, horned cattle, 1,724,036, sheep, 875,485, goats, 9,522, pigs, 408,113

The total forest land amounts to 62,429,000 acres, of which 24,835,000 acres belong to the State The productive forest land covers 49,764,000 acres, of which 17,570,000 acres belong to the State

Finland had, in 1931, 3,497 large factories, employing an aggregate of 129,579 workers, and yielding an aggregate product of 9,264 million marks The chief were —

	No of Establishments	No of Workers	Production Marks
Iron and mechanical works	636	21,856	1,049,405,000
Textiles	270	20,063	950,750,000
Wood industries	771	36,218	1,636,765,000
Paper	200	17,026	2,238,167,000
Leather, rubber and fur	166	6,754	421,373,000
Chemicals	142	2,170	275,354,000
Graphic arts	194	5,132	247,328,000
Tobacco	8	1,875	231,503,000
Electricity, gas and water	265	2,987	380,817,000

In 1931, there were 427 saw mills with 88 water motors, 386 steam, 17 oil and gas, 2,587 electric motors

Commerce.

Imports and exports for 5 years, in thousands of Finnish marks —

	1928	1929	1930	1931	1932
Imports	5,012,907	7,001,413	5,247,671	8,461,755	9,437,450
Exports	6,245,282	6,429,734	5,404,158	4,456,693	4,630,846

The foreign trade of Finland appears as follows for 2 years —

	1931		1932	
	Imports from	Exports to	Imports from	Exports to
	F Marks	F Marks	F Marks	F Marks
Great Britain	434,598,767	1,991,206,648	639,144,599	2,165,609,969
Russia	93,517,468	99,151,931	173,440,150	69,665,704
Estonia	29,016,071	19,671,319	37,250,785	47,973,089

Shipping and Navigation

The mercantile marine of Finland on January 1, 1932, aggregated 4,593 vessels of 504,170 net registered tons, and consisted of 279 sailing vessels of 66,725 tons, 520 steam vessels of 163,115 tons, 152 motor boats of 14,372 tons, and 3,642 lighters of 259,958 tons

Vessels entered from and cleared for foreign countries, in 1931, were as follows —

Countries	Entered		Cleared	
	Number	Net tons	Number	Net tons
United Kingdom	577	625,530	1,224	1,225,584
United States	70	223,223	87	253,515
Germany	915	690,645	652	480,076
Sweden	1,820	718,722	1,349	857,944
Denmark	574	343,795	510	133,386
Other Countries	1,868	1,189,680 ¹	2,103	1,396,007 ²
Total	5,824	3,786,595	5,925	3,847,811

¹ Includes Estonia, 701 vessels of 117,137 tons, and Netherlands, 176 vessels of 201,947 tons

² Includes Belgium, 279 vessels of 278,390 tons, France, 333 vessels of 272,016 tons, and Netherlands, 222 vessels of 227,445 tons

On the air lines Helsinki-Reval and Helsinki-Turku-Stockholm, 4,064 passengers and 65,895 kilos goods and mail were transported in 1931

Internal Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals, navigable at a length of about 2,500 miles. The number of vessels which passed along the canals in 1930 was 44,735, and the number of timber-rafts 12,778, the receipts from vessels, 9,501,858 marks.

In 1931, there were 16,513 miles of high roads and 15,279 miles of other public roads.

Railway history in Finland begins in 1860, when the State built a line 66 miles long between Helsinki and Hämeenlinna. On December 31, 1931, there were 3,377 miles of railways, all but 158 miles belonging to the State. The gauge is 1,524 metres (4 9 feet). The traffic upon the State railways in 1931 was 19,624,000 passengers and 8,522,000 tons of goods. The total cost of the State railways to the end of 1931 was 6,130 million marks. The total revenue in 1931 was 693,454,000 marks, and the total expenditure 668,980,000 marks.

Finland had 3,273 post and telegraph-offices in 1931, and revenue and expenditure of posts and telegraphs combined were respectively 162,386,000 and 126,365,000 marks. The number of letters and postcards was 71,720,000, ordinary and printed packages, 20,926,000, newspapers, 187,402,000, money-orders, 2,015,000, total, 282,063,000.

There were in 1931, 20,534 miles of telegraph and 22,632 miles of telephone wires belonging to the State in Finland. The number of telegraph messages sent in the year 1931 was 1,002,362. The telegraph system and part of the telephone system are State property.

Banking, Money, Weights, &c.

The Bank of Finland (founded in 1811) is the State Bank and the only bank of issue. The Bank is under the guarantee of the House of Representatives, its capital and reserves are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and foreign correspondents, and the additional right of issue 1,200 million marks. Notes in circulation are 1,000, 500, 100, 50, 20, 10 and 5 markkaa. The paper currency of the Bank of Finland on December 31, 1932, was 1,085 million marks against which the bank held a stock of gold of 304 million marks, and foreign currency 505 million marks. Finland had in 1931, besides the State bank, 14 joint stock banks with 580 offices. The deposits of all private banks on December 31, 1931, were 6,410 6 million marks.

The number of ordinary savings banks at the end of 1931 was 480, number of depositors 796,000, who had to their credit 4110 4 million marks, in the Post Office savings banks 128,762 depositors had 266·8 million marks, and on Consumers' Co-operative Societies' Savings Account 405 4 million marks were deposited.

The *markka* of 100 *penni* is stabilized at the current rate of exchange for the dollar of 39 70, and is of the value of 1 24d.

According to the new monetary law gold coin is to be struck of the value of 100 and 200 markkaa. The former will contain 4 21053 grammes of gold, 900 fine, the latter 8 42105 grammes, 900 fine. Aluminium bronze coins are 20, 10 and 5 markkaa, and nickel coins 1, $\frac{1}{2}$, and $\frac{1}{4}$ markka pieces. Copper coins 10 and 5 penni pieces.

Because of the exceptional conditions on the international money market, the gold standard was, however, temporarily suspended on October 12, 1931, whereby bank notes will not have to be redeemed in gold.

The metric system of weights and measures is officially and universally employed in Finland.

Diplomatic Representatives.

1 OF FINLAND IN GREAT BRITAIN

Envoy and Minister—G A Gripenberg (Appointed *pro tem* 1932)

Counsellor—Eino Walikangas

Naval Attaché—V L Kopio

There are also Finnish consular representatives at Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Southampton, and many other places

2 OF GREAT BRITAIN IN FINLAND

Envoy and Minister—Rowland Arthur Charles Sperling, C.B., C.M.G. (Appointed June 11, 1930)

Second Secretary—J H Henderson

Commercial Secretary—C B Jerram

Naval Attaché—Commr M A Hawes, R.N.

Military Attaché—Major R W G Firebrace, R.A.

Consul at Helsingfors—J A Waite

There are consular representatives at the following places Hango (Hanko), Kotka, Gamlakarleby (Kokkola), Kristinestad (Kristinankaupunki), Kuopio, Turku (Åbo), Lovisa, Vasa (Åbo), Pori (Björneborg), Jakobstad (Pietarsaari), Tampere (Tammerfors), Oulu (Uleaborg), Vimpuri (Viborg)

FRANCE.

Constitution and Government.

CENTRAL

SINCE the overthrow of Napoleon III on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875, by a constitutional law, which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (e.g. a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs), he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

President of the Republic—Albert Lebrun, born August 29, 1871, elected May 10, 1932.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, appointed Jan 31, 1933

Prime Minister and Minister of War —Edouard Daladier

Deputy Prime Minister and Minister of Justice —Eugène Penancier (Senator)

Minister of Finance —Georges Bonnet

Minister of Budget —Lucien Lamoureux

Minister of Interior —Camille Chautemps

Minister of Foreign Affairs —Joseph Paul Boncour (Senator)

Minister of Marine —Georges Leygues

Minister of Air —Pierre Cot

Minister of the Colonies —Albert Sarraut (Senator)

Minister of Public Instruction and of Fine Arts —Anatole de Monzie

Minister of Public Works —Pierre Paganon

Minister of Mercantile Marine —Eugène Frot

Minister of Commerce —Louis Serre (Senator)

Minister of Posts and Telegraphs —M. Laurent Eynac

Minister of Agriculture —Henri Queuille

Minister of Labour —François Albert

Minister of Pensions —Edmond Miellet

Minister of Public Health —Charles Daniélou

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon —

<i>House of Bourbon</i>		<i>Second Republic</i>	
Henri IV	1589-1610	Provisional Government,	
Louis XIII, 'le Juste'	1610-1643	Feb—Dec	1848

		Paul Doumer	1931-1932
<i>House of Bourbon Orléans</i>			
Louis-Philippe (died 1830)	1830-1848		

The Chamber of Deputies is elected for four years, by manhood suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only, in 1885 there was a return to the *scrutin de liste*, in 1889 the uni-nominal vote was reintroduced; in 1919 the *scrutin de liste*, with proportional representation, was again adopted; but in 1927 (July 12) the old system of *scrutin d'arrondissement* was once more introduced.

In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors-General appointed by the prefect of the department. The Chamber is now composed of 615 Deputies.

Chamber of Deputies, elected May 1-8, 1932 — Communists and Socialist-Communists, 20, Socialists, 130, Republican Socialists and French Socialists, 33; Radicals and Radical Socialists, 153; Independent Radicals, 74, Republicans of the Left, 48, Democrats, 15; Democratic Republican Union, Democratic and Social Action, Independents, 127, Others, 15.

The Senate is composed of 314 members, elected for nine years from citizens 40 years old, one-third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population, and (2) of the Deputies, Councillors General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers, but by the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine years Senators, the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

Senate, elected on October 16, 1932. Socialists, 17, Gauche Démocratique, 161; Union Républicaine, 69; Gauche Républicaine, 16, Right, 6, Union Démocratique, 32, Independents, 13.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination, in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 62,000 francs a year and the Presidents of the two Chambers receive allowances for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 1,800,000 francs, with a further allowance of 1,800,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex-Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has, besides, a special institution under the name of *Conseil d'État*, which was introduced by Napoleon I, and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice president, and is composed of Councillors, Masters of Requests (*Maîtres des Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly

those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

II. LOCAL GOVERNMENT

For administrative purposes France is divided into 90 departments including the 'territory of Belfort' (remnant of the department of Haut Rhin). Since 1881, the three departments of Algeria are also treated for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement*, except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1931, in the 90 departments into which France was divided, 38,004 communes. Most of them (33,960) had less than 1,500 inhabitants, and 22,491 have even less than 500, while 173 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 6 years by Frenchmen after 21 years and 6 months' residence, but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members, each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (3,024 in 1931), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace (*juge de paix*), but is not an administrative unit.

The district, or *arrondissement* (279 in 1931), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one half every three years (one Councillor for each canton). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

Area and Population.

I PROGRESS AND PRESENT CONDITION

The legal population at the date of the last two enumerations was —

Departments	Area Engl sq miles	Population		Population per square mile, 1931
		March, 1931	March, 1926	
Ain	2,248	322,918	317,195	143 6

¹ Not including military and naval forces and crews of the commercial navy abroad which in 1931 numbered 98,928, and in 1926, 178,534

According to the Peace Treaty with Germany (June 28, 1919) Alsace-Lorraine has been transferred to France, to date from the Armistice of November 11, 1918. The districts of Lower Alsace, Upper Alsace and Lorraine have become the departments of Bas Rhin (1,848 square miles and population 688,242), Haut-Rhin (1,854 square miles, population 516,726), and Moselle (2,403 square miles, population 693,408). Thus the total area added to France is 5,605 square miles, population (1931) 1,898,376.

In 1926 the rural population was 20,759,181 and the urban population 19,984,766.

According to the Treaty of Versailles (article 45), France obtained from Germany as a compensation for the destruction of the coal mines in the North of France, the exclusive rights of exploitation of the coal mines situated in the Saar Basin. The area of this district is about 751 square miles, and the population 657,870. For 15 years the Saar Basin is to be governed by a Commission of Five, chosen by the League of Nations. At the end of 15 years the population will decide by vote one of three alternatives, viz., the maintenance of the rule set up by the Treaty, union with France, or union with Germany.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872-1911).

Dates	Area sq miles	Domiciled Population	Inhabitants per sq mile	Annual Increase per 10 000 inhabitants
1801	207,765	27,849,008 [26,930,756]	131 [130]	— —

1930 ¹	342,698	748,911	649,125	+ 99,786	28,224
1931 ¹	326,358	730,349	680,710	+ 49,639	28,058

¹ Provisional figures

The number of divorces was 15,450 in 1913, 19,353 in 1929, 20,409 in 1930, and 21,212 in 1931

III PRINCIPAL TOWNS

The following towns, according to the census of 1931, have each a population of over 100,000 (figures for census of 1926 added for comparison) —

	1931	1926
Paris	2,891,020	2,871,429
Marseilles	800,881	652,196
Lyons	579,763	570,840
Bordeaux	262,980	256,026
Nice	219,549	184,441
Lille	201,568	201,921
Toulouse	194,564	180,771
St Etienne	191,088	193,737
Nantes	187,343	184,509
Strasbourg	181,465	174,492
Le Havre	165,076	158,022
Toulon	133,263	115,120
Rouen	122,957	122,898
Nancy	120,578	114,491
Roubaix	117,190	117,209
Reims	112,820	100,998
Clermont-Ferrand	103,143	111,701

The following towns have a population over 50,000, according to the census of 1931

Mulhouse	99,534	Angers	85,602	Levallois Perret	71,181
Limoges	92,577	St Denis	82,412	Argenteuil	70,657
Dijon	90,869	Villeurbanne	82,038	Montreuil	70,450
Grenoble	90,748	Tourcoing	81,972	Calais	70,213
Amiens	90,211	Metz	78,767	Brest	69,841
Nîmes	89,213	Tours	78,585	Versailles	66,859
Rennes	88,659	Le Mans	76,868	Asnières	63,654
Montpellier	86,924	Perpignan	73,962	Besançon	60,367
Boulogne sur-Seine	86,234	Orléans	71,606	Troyes	58,804
		Béziers	71,527	Caen	57,528

Colombes	57,313	Clichy .	55,692	Boulogne	
Avignon	57,228	Courbevoie .	54,185	sur-Mer .	51,854
Saint Maur-		Neuilly sur-		Drancy	51,156
des-Fosses	57,164	Seine .	53,491		
Aubervilliers	55,714	St Ouen	53,146		

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated (complée à part)*, the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is over 2,000, and rural where under 2,000.

Religion

No religion is recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*). As transitory measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship. The places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion, but, in each case, there is required an administrative act drawn up by the *prefet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government.

There are 17 archbishops and 68 bishops of the Roman Catholic Church in France, not including Alsace and Lorraine, Algeria or the colonies, in addition to 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris. There are about a million Protestants in France.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised, the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (30,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

Education.

The public schools constitute the University of France and are divided into three classes, primary, secondary, and superior. The Superior Council of 52 members has deliberative, administrative, and judiciary functions, and a Consultative Committee advises respecting the working

of the school system, but the inspectors general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters, the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school-masters, the other for school-mistresses, there are two higher normal schools of primary instruction one at Fontenay aux Roses for professors for normal schools for school-mistresses, the other at St Cloud for professors for normal schools for school-masters. The law of June 16, 1881, made instruction absolutely free in all primary public schools, that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force, it established that teachers should be lay, for infant schools it substituted *écoles maternelles* instead of *salles d'asile*, it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of primary instruction for 3 years:—

Description of Schools	1928-29		1929-30		1930-31	
	Schools	Enrolled Pupils	Schools	Enrolled Pupils	Schools	Enrolled Pupils
Infant Schools:						
Public	8,115	341,221	8,146	336,688	8,170	343,098
Private	564	33,409	545	32,602	503	31,241
Total	8,679	374,630	8,691	369,190	8,673	373,329
Primary Schools						
Public	68,312	3,308,660	68,437	3,515,128	68,700	3,759,125
Private	11,706	795,588	11,787	843,764	11,646	876,310
Total	80,118	4,099,248	80,224	4,358,887	80,346	4,635,435

On November 15, 1930, there were 323 higher elementary schools for boys and 238 for girls. The number of pupils was on November 15, 1930, 37,000 boys and 37,782 girls, compared with 37,712 boys and 38,328 girls on November 15, 1929.

Courses of instruction for adults are conducted in the evening by teachers in their schools.

The number of primary normal schools (exclusive of Fontenay and St Cloud) is 90 for school-masters, and 90 for school-mistresses. The number of pupil-teachers in primary normal schools in 1931-32 was 6,762 men and 6,875 women.

Secondary Instruction: Boys—Secondary instruction is supplied in two

types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years

The number of public secondary schools for boys and the number of pupils for 3 years were as follows:—

Public Institutions France and Algeria	Nov 1929		Nov 1930		Nov 1931	
	No	Pupils	No	Pupils	No	Pupils
<i>Lycées</i>	125	78,214	125	83,764	125	92,611
Communal colleges	285	41,097	286	44,537	236	48,954

Girls—The following table shows the condition of the institutions for girls —

Institutions	Nov 1929		Nov 1930		Nov 1931	
	No	Pupils	No	Pupils	No	Pupils
<i>Lycées</i> (France and Algeria)	72	34,707	72	37,198	72	41,050
Colleges (France and Algeria)	95	15,450	97	17,446	96	19,151
Secondary courses (France and Algeria)	38	4,631	36	4,695	35	5,557
Total	205	54,788	205	59,339	203	65,758

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896

There are 17 Universities in France. The following table shows the year of foundation and the total number of students on July 31, 1931 —

Universities	Students	Universities	Students
Aix Marseille (1409)	2,988	Montpellier (1125)	3,810
Alger	2,084	Nancy (1572)	4,237
Besançon (1485)	571	Paris (1130)	31,886
Bordeaux (1441)	4,254	Poitiers (1431)	2,107
Caen (1432)	1,828	Rennes (1735)	2,850
Clermont-Ferrand (1808)	1,077	Strasbourg (1567)	3,225 ¹
Dijon (1722)	1,897	Toulouse (1230)	4,370
Grenoble (1339)	3,197		
Lille (1580)	8,748	Total	78,674
Lyon (1808)	4,965		

¹ Including 850 students in the two faculties of Theology

The faculties are of four kinds: 15 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, and Algiers); 9 faculties of Medicine (Paris, Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, Strasbourg, and Algiers); 17 faculties of Science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg, and Algiers); 17 faculties of letters (at the towns

last named), 4 faculties of medicine and 4 faculties of pharmacy (Paris, Montpellier, Nancy, Strasbourg), and 5 mixed faculties of medicine and pharmacy (Algiers, Bordeaux, Lille, Lyons, Toulouse), 15 schools with full functions and preparatory schools of medicine and pharmacy

The following statement shows the number of students by faculties or schools in July, for 3 years —

Students of	1929	1930	1931
	State Institutions	State Institutions	State Institutions
Law	17,381	19,586	20,871
Medicine	14,574	16,246	17,554
Sciences	14,690	15,286	15,959
Letters	15,060	16,928	18,386
Pharmacy	4,955	5,232	5,554
Theology	301	323	350
Total	66,961	73,601	78,674

There are free faculties at Paris (the Catholic Institute of Paris comprising theology, law and advanced scientific and literary studies), Angers (theology, law, sciences, letters, agriculture), Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics), Lyon (theology, law, sciences, letters), Marseilles (law), Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction in political science, the *Ecole libre des Sciences Politiques*, and also one for the study of international law, the *Institut des Hautes Études Internationales*.

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Yearly competitive examinations in the various branches of teaching (*agrégations*) are open to holders of the degree of licentiate, or doctor in the case of law and medicine, and lead to the title of *professeur agrégé* in secondary and higher (law and medicine) instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the *Collège de France* (founded by Francis I in 1530), which has courses of study bearing on various subjects, literature and language, archæology, mathematical, natural, mental and social science (political economy, &c.), the Museum of Natural History giving instruction in the sciences and nature, the *Ecole Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne, the *École Normale Supérieure*, which prepares teachers for secondary instruction and, since 1904, follows the curricula of the Sorbonne without special teachers of its own, the *École des Chartes*, which trains the archivist paleographers, the *École des Langues Orientales vivantes*, the *École du Louvre*, devoted to art and archæology, the *École des Beaux-Arts*, and the *Bureau des Longitudes*, the Central Meteorological Bureau, the *Observatoire de Paris*, and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

Professional and Technical Instruction—The principal institutions of higher or technical instruction dependent on other ministries are the Con-

servatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures, the École des Hautes Études Commerciales, 18 higher schools of commerce with 3,304 pupils (1930), dependent on the Ministry of Public Instruction, the National Agronomic Institute at Paris, the Veterinary school at Alfort, a school of forestry at Nancy, the higher national school of colonial agriculture, national agricultural schools at Grignon, Rennes, Montpellier, 46 practical schools of Agriculture, &c, dependent on the Ministry of Agriculture, the École Supérieure de Guerre, the École Polytechnique, the military school at St Cyr, the École d'Artillerie at Fontainebleau, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War, the Naval School at Brest dependent on the Ministry of Marine, the School of Mines at Paris, the School of Bridges and Roads at Paris, the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai, with other schools dependent on the Ministry of Public Works, the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation depend on the department of Fine Arts, which is attached to the Ministry of Public Instruction. The municipal school of Industrial Physics and Chemistry is dependent on the City of Paris. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Public Instruction) are very numerous, comprising (in 1930—the latest available figures) seven national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris, Strasbourg), two schools of horology, eight national professional schools, 197 practical schools of commerce and industry (of which 47 are for girls) with 29,254 pupils (8,321 girls). In 1929, there were 487 professional schools with 160,491 pupils.

Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*, one in each *canton*) who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury, and one Court of Cassation which sits at Paris, for all criminal cases tried by jury, so far as regards matters of law.

Formerly there was a tribunal of first instance in each *arrondissement* for civil cases, wherein the amount in dispute is between 200 and 1,500 francs, but since the decree of September 3, 1926, such a tribunal exists only in each department. Where the department is an important one, this tribunal may be divided into several sections which sit in the towns other than the capital of the department. Above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 226 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

The French penal institutions consist, first, of Houses of Arrest (3,604 *chambres de sûreté* and *dépôts de sûreté* at the end of 1925). Next come Departmental Prisons (70 in 1925), also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to, reformatories. The reformatories are 7 for boys and 5 for girls. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 3 for women. The average population in 1927 of all penal establishments was 21,207 men and 3,389 women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to Guiana (military and *récidivistes*), the *dépôt de forçats* of St Martin de-Ré is a *dépôt* for transferred hard-labour convicts.

Pauperism, Relief of Old Age and Social Insurance

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1929, the bureaux expended 183,950,800 francs and assisted 760,143 persons. Public assistance is rendered to poor or destitute children. At the end of 1929 the institutions for this purpose contained 172,074 children, the expenditure during the year amounted to 203,525,300 francs. In 1929 the hospitals for the sick, infirm, aged, or infants, numbered 2,078, and at the end of the year had 85,872 patients, besides 88,123 aged and infirm inmates, their expenditure for 1929 amounted to 1,348,815,600 francs. In the same year 808,254 persons received gratuitous medical assistance at home and 318,120 in hospitals, the expenditure for such purposes amounting to 361,259,200 francs. At the end of 1929 the asylums for imbeciles, national, departmental, and private, had 85,179 patients.

An Act was passed in 1905, for the relief of the aged poor, age limit, 70, the infirm, and the permanently incurable. The Act of 1905 provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief on December 31, 1929, was 544,791. The cost to the State for 1929, was 397,878,200 francs. The Old-Age Pensions Law of April 5, 1910, as amended on February 27, 1912, provides for all wage earners old age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the State will contribute 100 francs. This sum will be increased by one tenth for every insured worker who has brought up 3 children of the age of 16. The pensions paid in 1929 amounted to 2,159,023,000 francs.

A law of March 24, 1873, provides protection for new born infants. In 1925, 54,093 infants were placed in 86 departments. In 1913, two further laws were introduced that of June 17 to give relief, varying from 0.50 to 1.50 francs or more per day, to women in confinement, and that of July 14 amended in 1925 and 1926, to give relief to families with numerous children. The rate is a minimum of 22.5 francs per month for every child beyond the third. In 1929, the number of women so aided was 838,656, and the amount of relief 23,143,200 francs. Supplementary relief to nursing

mothers, under the law of October 24, 1914, amounted in 1929 to 38,175,200 francs. In 1929, the number of families assisted was 47,763, at an expense of 8,956,800 francs, of which 3,870,900 francs were contributed by the State. Since 1922 it has been customary, in accordance with the law of June 29, 1918, to award prizes for large families. By law of April 29, 1926, 360 francs per annum is granted to every French family which has more than 3 children living for every child beyond the third under 13.

The law providing for compulsory social insurance which was passed on April 5, 1928, came into force on July 1, 1930.

The law provides for the compulsory insurance of all wage earners whose wages do not exceed 15,000 francs per annum (18,000 francs in the larger cities) against sickness, incapacity, old age and death, and also extends maternity and unemployment benefits. The cost of the insurance is borne by the employer, worker and the state, the amount of contribution from the worker varying in accordance with the remuneration. The assessment amounts to about 8 per cent. for industrial workers and about 2 per cent. for agricultural workers, half to be paid by the worker and half by the employer.

Finance.

The following figures show the budget estimates for 6 years —

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1928	42,496,616,176	42,444,948,760	1931-32 ^a	50,643,485,395	50,640,509,352

1930-31 ^a	50,465,079,818	50,398,167,195	1933	43,880,000,000	55,980,000,000

^a April 1, 1930—March 31, 1931

^a April 1, 1931—March 31, 1932

^b April 1, to December 31, 1932

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807. In 1930 and 1931, the financial year commenced on April 1, but on October 17, 1931, it was decided to revert to the calendar year. The latest budget estimates relate, therefore, to the period April 1 to December 31, 1932.

Budget estimates in francs for the years 1931-32 and 1932 (nine months) —

REVENUE

	1931-32 (12 months)	1932 (9 months)
Taxes	48,163,170,400	34,604,407,100

Total (including all items)	50,640,509,352	41,097,501,752

The French National debt on July 31, 1914, was 34,188,147,969 francs, on January 1, 1920, 240,242,109,503 francs, on December 31, 1928, 459,000,000,000 francs and on March 31, 1931, 480,475,000,000 francs

On March 31, 1931 and 1932, the internal debt of France stood as follows —

	March 31, 1931	March 31, 1932
	Francs	Francs
3 per cent Rentes	19,152,400,733	19,107,436,633
5 per cent Rentes	16,320,619,840	16,187,719,420
4 per cent Rentes, 1917	8,988,889,400	8,979,633,420
4 per cent Rentes, 1918	19,711,962,150	19,679,822,875
6 per cent Rentes, 1920	25,654,274,583	25,614,559,000
Amortizable 5 per cent rentes	10,894,191,200	10,827,418,300
Amortizable 3 per cent rentes	2,306,451,500	2,201,714,000
Amortizable 3½ per cent rentes	8,551,200	7,988,000
National Defence Obligations, 1919	14,351,200,000	14,313,800,500
Total of all Long dated debts	228,037,028,211	232,456,507,266
Short dated debts (2 to 10 years)	15,894,187,000	11,889,640,500
Total of floating debt	30,089,349,000	40,469,034,000
Total Internal debt	284,040,564,211	284,805,240,766

The Foreign Debt on March 31, 1931 and 1932, was made up as follows —

	March 31, 1931	March 31, 1932
1 <i>Debts owing to the Allied Governments —</i>		
Advances by U S Treasury (dollars)	3,865,000,000	3,803,650,000
Treasury Bonds of the British Treasury (l)	7,000,000,000	750,875,000
2 <i>Commercial Debts —</i>		
U S loan of 1921 (dollars)	60,500,500	49,464,000
U S loan of 1924 "	74,740,500	70,740,900
U S Municipal loan to Lyons, Bordeaux and Marseilles (dollars)	40,000,000	45,000,000
Other indebtedness to the U S "	2,110,000	2,110,000
Argentine Bank credits (pesos)	0,730,230	4,606,400

The annual charge on the foreign debt on March 31, 1932, amounted to 800,397,000 francs, and on the internal debt 12,488,190,949 francs

Defence

I LAND DEFENCES

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,685 miles, of which 1,246 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

In consequence of the projected reduction of the term of service in the regular army to one year, France is in process of constructing a trench system of defence, based on the experiences of the Great War, along her Eastern Frontier between the Rhine and Luxembourg. Behind this system are the former German fortresses of Strassburg, Metz, and Thionville and the first class fortresses of Verdun, Toul, Epinal, and Belfort. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts.

II. ARMY.

The French Army is divided into the Metropolitan and the Colonial Armies, both are under the War Minister, but the estimates for Colonial troops other than those maintained in Algeria, Tunis, and Morocco are included in the budget of the Minister for the Colonies. The Metropolitan Army is divided into the *Active Army*, the *Reserve Troops* and the *Territorial Army*. The Army is localised and territorialised in the military government of Paris and 20 Army Corps areas. The normal composition of a French Army Corps is 2 infantry divisions, 1 regiment of cavalry, 1 artillery brigade of three regiments, 1 battalion of engineers, 1 group and 1 company of observation balloons, and administrative services.

The infantry division consists of 3 regiments of infantry each of 3 battalions, and 1 regiment of artillery of 3 groups each of 3 batteries. The cavalry division consists of 3 cavalry brigades each of 2 regiments, 1 group of horse artillery, and 1 group of cyclist chasseurs.

The peace establishment of the French Army provides for 5 Cavalry divisions and 25 divisions of the Active Metropolitan Army. The establishment of the Active Metropolitan Army by units for 1931-32 is as follows —

	Regiments	Independent Battalions	Independent Companies	Independent Groups	Independent Sections	Independent Squadrons
Infantry	79	32	—	—	—	—
Tanks	10	3	—	—	—	—
Cavalry	29	3 ¹	—	—	—	12 ¹
Artillery	67	13	10	2	—	—
Engineers	11 ²	—	—	—	2	—
Air Force	14 ³	—	1	7 ⁴	—	—

¹ Motor machine guns
² Of which 2 ballooning

³ Dismounted dragoons
⁴ Of which 6 artificers

The peace establishment of the Active Metropolitan Army for 1931-32 is 340,637, of whom 270,812 are allocated for Home Defence, and 69,825 form a mobile reserve for the overseas garrisons. Enlistment for the Metropolitan Army is regulated by the law of March 28, 1928, and is on a compulsory basis, but liberal exemptions are allowed. Service in the active army is for 1 year, and begins at the age of 21, the first half of the annual contingent joining in November, the second half in the following May. The total duration of service in active army and reserve is 28 years. Provision is made for the enlistment of 106,000 long service professional soldiers, 76,000 for the Metropolitan and 30,000 in the Colonial Army. After serving for 1 year, the soldier remains immediately available for military service for 3 years. In his fourth year of service he joins the first line of reserve for 16 years, and in his twentieth year the Territorial Army in which he remains for 8 years.

The *Reserve Troops* form divisions corresponding to those in the *Active Army* on mobilisation, in the same districts as those to which the *Active* divisions belong. The *Territorial Army* forms a second line and is similarly organised in divisions on mobilisation. The *Customs Corps* is organised in battalions as are the *Chasseurs Forestiers*, these are both recruited from men who have passed into the *Territorial Army*.

The *Gendarmerie* is a police force recruited from the Army but performing civil duties in time of peace. There is a legion in each military district.

The strength of the *Gendarmerie* is 33,380, of whom about one third are mounted

The *Garde Républicaine* is also a police force and performs duties in Paris similar to those performed by the *Gendarmerie* in the districts Its strength is 2,988

The *Colonial Army* is distinct from the *Metropolitan*, and consists partly of white troops and partly of native troops The Colonial establishment for 1931-32 was 237,363 exclusive of Colonial troops in France and of certain native troops administered by the Ministry of the Colonies. The total peace establishment of the French Army, exclusive of *Gendarmerie*, is $340,637 + 237,363 = 578,900$. The Colonial white troops are recruited either by voluntary enlistment, or by voluntary transfer from the *Metropolitan Army*

The organisation of the extra-European troops by units is as follows —

	Regiments	Independent Battalions	Independent Companies	Independent Groups	Independent Sections	Independent Squadrons
Infantry	52	18	11	—	—	—
Tanks	—	8	—	—	4	—
Cavalry	15	—	7	—	—	8
Artillery	10	1	—	2	12	—
Engineers	—	8	4	—	—	—
Air Force	2	—	—	4	—	—

The administration of the French Army consists of a General Staff and of a number of departments, all under the War Minister In questions of strategy and of higher military policy the War Minister is assisted by a Council called the *Conseil Supérieur de la Guerre*, consisting of himself as President, the Marshals of France and twelve selected generals, of whom one must be Chief of the General Staff

In September, 1919, it was decided that the uniform of the Army should be the horizon-blue dress with kepi The *Chasseurs* or Light Infantry battalions were, however, permitted to keep their distinctive dark blue uniform Khaki was adopted for Colonial and North African troops, and navy blue for the Air Force

The French infantry is armed with the Lebel magazine rifle calibre 815 The French field gun is the 7.5 cm (2.95 in) Q F, shielded gun The French howitzer is the 10.5 cm (3.85 in) howitzer, and as the result of the war the French Army possesses a large variety of heavy guns of all calibres Army estimates for 1932, 5,260,877,870 francs

III NAVY

Under the Washington Treaty, whose provisions affected her very slightly, France was allowed to retain ten capital ships, but the *France* was lost in Quiberon Bay on August 25, 1922, and the nine remaining displace 185,925 metric tons. By the provisions of the London Treaty, she retains the right to lay down additional capital ships up to a total of 105,000 tons during 1931-36 So far, the laying down in 1932 of the 26,500-ton battle cruiser *Dunkerque* is all that has been done towards effecting this tonnage replacement Although the design of this ship has not been finally settled, it is understood that she will be given a main armament of eight 18.2 in guns in quadruple turrets.

The current shipbuilding programme (1931-32) comprises 4 cruisers of 7,600 tons (*Chateaurenault, Gloire, Marseillaise, Montcalm*), 1 flotilla leader, 1 destroyer, 4 escort gunboats, 1 river gunboat, and 1 surveying vessel. In hand from previous programmes there are the battle cruiser *Dunkerque* (mentioned above), 2 cruisers of 7,600 tons (*Jean de Vienne, La Galissonnière*), 1 cruiser minelayer of 5,886 tons (*Emile Bertin*), 6 flotilla leaders of 2,569 tons, 10 submarines, 1 sloop of 1,469 tons, 8 escort gunboats, and 1 transport. The air service, which works in close touch with the Navy, is also being developed. The coast defences are now under the control of the Navy, and have been reorganized in four coast 'naval frontier' districts, in relation to 4 divisions of aircraft (40 flotillas), while a fifth division (10 flotillas) is attached to the active fleet. The naval frontier districts include considerable forces of destroyers, submarines, and minelayers. The chief stations are Dunkirk, Cherbourg, Brest, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona.

The total naval expenditure for 1932 (nine months) was 2,411,263,577 francs.

The Navy is under the supreme direction of the Minister of Marine, assisted by a Chief of the Staff. The latter has charge of all that concerns preparation for war, and is commander in chief designate. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet. The central administration embraces the directorates of *personnel, matériel*, and artillery, the works section, the finance department, the services of submarine defences, hydrography, and a central flying service. In addition to these are the Superior Council of the Navy, which advises the Minister on high policy, and several special committees. For purposes of administration the French coasts are divided into five maritime *arrondissements*, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, each under a vice-admiral, but Lorient and Rochefort are being reduced. Two flag officers are inspectors general and commanders-in-chief designate in the Channel and Mediterranean.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population,' France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet, now large numbers are taken from the shore for engine room and other duties. The active personnel in 1931 numbered 3,880 officers and 58,750 men.

The following is a summary of the strength of the fleet at the periods shown:—

	Complete at end of		
	1930	1931	1932
Battleships—1st Class	6	6	6
Battleships—2nd Class	3	3	3
Aircraft Carriers	1	1	1
Armoured cruisers	2	1	1
Cruisers	13	15	17
Despatch Vessels	50	52	55
Flotilla Leaders and Destroyers	72	74	86
Submarines	70	65	97

Below is a list of the principal ships in service or completing at the end of 1932. Instead of being replaced as proposed under the Washington

agreement, the 6 first-class battleships are being modernised to a certain extent and will all be adapted to burn oil fuel.

Launched	Name	Standard Displacement	Armour		Armament	Torpedo Tubes	Indicated horse-power	Max speed
			Belt	Guns				

1st Class Battleships

								Knots
1911	Jean Bart	22,189	10½	12	12 12in , 22 5 5in	4	28,000	20 5

1929	Commandant Teste	10,000	2	—	12 4in	—	21,000	20 5
------	------------------	--------	---	---	--------	---	--------	------

The four older cruisers are all ex German except the *Thionville*, which was Austrian.

In the flotillas are included 24 flotilla leaders of 2,126–2,441 tons and 28 destroyers of about 1,350 tons, with speeds ranging from 33 to 40 knots, 58 ocean-going submarines, of which 8 are minelayers, and 40 coastal submarines. Most of these are of recent design and construction.

IV AIR FORCE

The Air Minister has under him: the Directorate of Civil Aviation, the Directorate of Army Air Services, the Department of the Naval Air Force, the Central Air Department in the Colonies. The establishment of the Military Air Service is 42,000 officers and men, and is organized in 2 air commands, comprising 14 aviation regiments and 5 independent air groups, with a total of 135 squadrons, of which 3 are in the colonies, 18 in North Africa and 8 in the Levant. There are in France 42 observation squadrons, 32 battle squadrons, 20 day bombing squadrons and 12 night bombing squadrons. The number of first line aircraft air service is 2,286. There are in addition 2 balloon regiments organized in 3 battalions, each of 3 companies.

The total expenditure on the civil, military and naval air services for 1932 was estimated at 2,013,900,000 francs.

Production and Industry

I AGRICULTURE

Of the total area of France, including Alsace and Lorraine (136,101,760 acres) 25,170,407 acres were under forests in 1929, 12,561,333 acres were returned as moor and uncultivated land, and 87,021,115 acres, of which 31,998,239 acres were arable, were returned as under crops, fallow and grass.

The following tables show the area under the leading crops and the production (1 metric ton = 2205 lbs.) for three years —

Crop	Area (1,000 acres)			Produce (1,000 metric tons)		
	1930	1931	1932	1930	1931	1932
Wheat	13,273	12,894	13,389	6,208	7,189	9,018
Mixed Corn	202	202	1-0	85	93	95
Rye	1,845	1,838	1,775	721	710	893
Barley	1,840	1,964	1,936	924	1,039	1,168
Oats	8,457	8,558	8,525	4,151	4,691	5,129
Potatoes	3,529	3,532	3,520	13,923	16,300	15,868
Beetroot	696	619	624	9,443	6,197	7,024

The annual production of wine and cider appears as follows —

Year	Under Vines, acres	Wine produced thousands of gallons	Wine Import, thousands of gallons	Wine Export, thousands of gallons	Cider produced 1,000's of gallons
1900 ¹	3,974,970	1,441,330	114,760	41,010	647,000
1929	3,731,651	1,864,898	243,823	26,940	512,160
1930	3,771,443	1,004,035	275,641	21,072	192,187
1931	3,827,888	1,865,281	333,732	15,598	415,495

¹ Excluding Alsace and Lorraine

The production of fruits (other than for cider making) and nuts for 1931, is given in metric tons, as follows (figures for 1930 in brackets) — Apples and pears 226,870 (126,957), plums 23,602 (38,572), peaches 25,334 (14,976), apricots 7,119 (6,337), nuts 49,317 (27,140), cherries 57,981 (41,292).

On December 31, 1931, the numbers of farm animals were Horses, 2,919,700, mules, 143,600, asses, 240,970, cattle, 15,433,840, sheep and lambs, 9,844,690, pigs, 6,397,970, goats, 1,488,120

Silk culture, with Government encouragement (*primes*), is carried on in 24 departments of France—most extensively in Gard, Drôme, Ardèche, Var and Vaucluse. Silk production for 4 years —

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce
		Kilogs	1000 Kilogs	1000 Francs
1923	63 908	1,689	2,689	53,249
1929	49,514	1,265	2,586	43,733
1930	35,670	976	827	14,714
1931	22 055	564	997	5,573

II MINING AND METALLURGICAL INDUSTRIES

The following are the statistics of the principal minerals produced for 3 years, in thousands of metric tons —

—	1929	1930 ¹	1931 ¹	—	1929	1930 ¹	1931 ¹
Coal	58 780	53,885	50,023	Antimony	5 1	5 1	2 6
Lignite	1,197	1,143	1 040	Auriferous ore	12 4	79	87 0
Iron ore	50,731	48,453	38,476	Manganese	2 6	—	—
Bauxite	673	609	401	Lead ore	20	38	18 3
Pyrites	199	199	193	Rock salt	1,746	1,700	1,403 0
Mineral oil	75	76	74	Potash salts	492	507	367

¹ Provisional figures

The output of iron and steel products was as follows (in thousands of metric tons) pig iron, 1930, 10,032, 1931, 8,250, 1932, 5,549, crude steel, 1930, 9,447, 1931, 7,812, 1932, 5,604

III. MANUFACTURES

Sugar—In 1930–31, there were 109 sugar works, employing 28,936 men, 1,035 women, and 386 children. The yield of sugar during 12 year (expressed in metric tons of refined sugar) was —

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1914–15	802,961	1923–24	446,773	1926–27	641,393	1929–30	825,813
1921–22	273,273	1924–25	750,280	1927–28	780,867	1930–31	1,084,129
1922–23	445,868	1925–26	678,545	1928–29	815,861	1931–32	772,675

Alcohol—In 1906, 59,616 thousands of gallons of alcohol were produced in 1925, 44,264, in 1926, 32,658, in 1927, 37,348, in 1928, 47,360, in 1929, 55,480, and in 1930–31, 67,584

Cotton—In 1929, there were 11,754,400 spindles, 208,200 looms and 286 textile printing machines used in the cotton industry which employed a total number of 212,160 operatives, and produced 298,000 tons of yarns and 1,845,000,000 metres of piece goods

IV FISHERIES.

For the French fisheries, including those of Algeria, the following are statistics for 1930 (the latest available) — Persons employed, 140,539, sailing boats, 16,615, steamers, 752, motor boats, 7,869, value of products 1,232,691,000 francs

Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The chief subdivisions of the special trade in thousands of francs and in tons were for two years —

	Imports				Exports			
	1931		1932		1931		1932	
	Tons	1000 francs	Tons	1000 francs	Tons	1000 francs	Tons	1000 francs
Food products	9 101,676	14,000,995	8,607,079	10,959,919	1,601,845	4,801,217	1,167,202	2,923,435
Raw materials	46,930 285	19,035,607	36,963,982	13,281,919	24,804,931	7 179,080	19 624,142	4,540,187
Manufactured goods	2,065,098	9,189,220	1,974,578	5,634,006	3,928,808	18 955,497	2,708,150	12,229,614
Total	58,097,059	42 205,830	47 545,619	29,825,844	30,335,581	30,435,794	23,199,194	19,693,236

The chief articles of import and export (special trade) were in millions of francs —

Imports	1931	1932	Exports	1931	1932
Wine	2,939 1	2,316 6	Timber	194 6	89 3
Wool	1,800 8	1,370 1	Textiles, silk	1,721 0	897 8
Cereals	2,999 7	2,854 8	„ cotton	1,413 8	971 5
Raw cotton	1,502 0	1,187 5	Wine	665 1	425 4
Coal and coke	3,628 5	2,402 1	Raw silk and yarn	68 0	32 7
Coffee	976 1	1,021 0	Soaps and perfumes	524 6	316 7
Oil seeds	1,458 1	1,332 8	Iron and steel	1,785 0	1,055 0
Sugar	403 7	421 9	Jewellery, etc	504 1	334 2
Petroleum	1,362 7	1,393 6	Automobiles	837 1	518 7
Machinery	1,904 6	1,076 4	Chemical products	2,512 5	1,801 6
Copper	797 5	378 1	Glass	230 0	142 5
Iron and steel	277 1	143 1	Clothing	690 8	191 8
Hides and skins	701 4	830 4	Rubber goods	388 5	257 7
Silk	509 3	199 3	Table fruits	858 8	204 7
Chemicals	932 5	805 3	Vegetables	185 6	81 7

The chief imports for home use and exports of home goods are to and from the following countries, in thousands of francs —

Countries	Imports		Exports	
	1931	1932	1931	1932
United Kingdom	3,724,345	2,457,122	5,048,423	1,961,542
Germany	6,141 735	3,618,594	2,748,855	1,649,825
Belgium	3,683,238	2,440,732	3,582,409	2,341,103
Switzerland	908,963	608,853	2,309,071	1,510,745
Spain	1,404,840	714,697	685,403	386,303
Italy	1,436,761	634,706	992,895	594 636
United States	3,800,497	2,918,453	1,543,047	957,894
Brazil	627,509	534,737	189,624	119,331
Argentina	1,428,333	1,066,605	514 247	322,165
French Colonies	6,214,479	6,220,020	7,318 248	6,302,425

The following table gives the declared value, in pounds sterling, of the more important articles consigned to the United Kingdom from France in four years according to Board of Trade returns. —

Staple Imports into U K	1928	1929	1930	1931
	£	£	£	£
Apparel &c.	1,890,210	1,610,793	1,432,999	1,099,946
Silk manufactures	6,401,182	6,168,365	5,020,755	3,504,308
Woollen goods	4,803,693	3,615,417	3,096,581	2,557,178
Artificial silk manufactures	1,994,639	2,357,668	2,823,823	2,718,918
Fancy goods	761,283	773,836	729,423	501,696
Wine	2,345,793	2,217,138	1,831,582	1,667,876
Brandy	963,038	976,048	878,243	844,614
Leather goods	2,081,655	1,764,268	1,683,827	1,602,938
Motor cars	1,180,083	805,158	716,071	399,367

The total quantity of wine imported into the United Kingdom from France in 1928, was 2,846,185 gallons, in 1929, 2,805,113 gallons, in 1930, 2,442,386 gallons, and in 1931, 2,218,574 gallons

The following table exhibits the value, according to Board of Trade returns, of the principal articles of British produce consigned from the United Kingdom to France in four years —

Staple Exports from U K	1928	1929	1930	1931
	£	£	£	£
Woollen and Worsted	936,261	1,099,308	1,077,187	861,860

Internal Communications

I RIVERS, RAILWAYS, ETC

In 1930, there were in France 41,365 miles of national roads, 5,615 miles of departmental roads, 346,865 miles of local roads, making a total of 393,845 miles.

In 1929, there were 6,160 miles of navigable waterways with a total traffic of 50,223,000 tons.

By a law of July 11, 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State, which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1960, till when (by a Convention made on June 28, 1921), the State guarantees to them working expenses and the interest and redemption of capital and loans.

The length of principal lines open for traffic on January 1, 1931 was 25,964 miles, made up as follows: State, 5,667 miles; Nord, 2,357 miles; Est, 2,983 miles; Paris Orléans, 4,854 miles; Paris Lyons Mediterranean, 6,132 miles; Midi, 2,678 miles; Alsace Lorraine, 1,293 miles. The total receipts for 1931 of all the seven companies was 14,095,417,000 francs, for 1932, 12,011,773,000 francs. Working expenses in 1930 amounted to 14,208,000,000 francs and financial charges, 2,833,552,000 francs.

The electrification of the French railways is now a settled policy. On September 1, 1931, there was a total length of 1,043 miles electrified. The State railway has 60 miles (Paris suburbs), the Orleans railway 147 miles (Paris-Vierzon 127 miles), the P. L. M. 62 miles (Chambéry to the Modane section of the Culoz Modane line), and the Midi about 754 miles.

The following table gives particulars of air traffic for 4 years —

Years	Mileage flown (in thousands of miles)	Passengers carried	Freight (1,000 lbs.)	Mail (1,000 lbs.)
1928	—	19,549	2,545	272
1929	5,692	25,249	3,532	314
1930	5,849	28,885	3,078	478
1931	5,945	34,288	3,896	504

II POSTS, TELEGRAPHS AND TELEPHONES

From April 1, 1930, to March 31, 1931, the receipts on account of posts, telegraphs, and telephones amounted to 3,571 million francs, the expenditure to 3,595 million francs. The number of ordinary letters carried in 1930, was 1,663 millions, and of registered letters 75 millions.

The total length of the telegraphic lines in 1930 was 223,171 miles. In 1930, there were despatched 44,813,940 telegrams, of which 28,898,098 were internal and 11,505,277 international. In 1930, gross telegraph receipts were 304,870,000 francs.

In 1930, the telephone systems in France had 132,900 miles of line, and 3,958,400 miles of wire, number of subscribers (1930) 1,113,000, number of conversations 835,955,908.

Money and Credit.

The nominal value of the French money coined in France during the past years was —

Year	Gold	Silver	Nickel and Bronze	Nickel and Aluminium	Total
	Francs	Francs	Francs	Francs	Francs
1914-1928	165,002,990	585,580,361	1,081,654,199	5,649,974	1,837,887,523
1929	—	227,605,980	5,676,042	8,334,257	236,616,279
1930 . .	—	260,861,680	10,900,444	—	271,762,124
1931	—	354,675,830	12,176,463	50,325,911	417,178,204
1932	—	402,876,670	12,178,303	102,073,372	517,128,345

The ordinary savings-banks numbered 560 (with about 1,800 branch offices) on December 31, 1931, the number of depositors was 9,829,022, with deposits to the value of 30,282,252,670 francs, representing an average of francs 3,080 90 to each depositor.

The National savings banks, on December 31, 1930, held deposits and interest amounting to 15,033,471,000 francs due to 8,957,152 depositors, representing an average of 1,678 francs per account.

The Bank of France, founded in 1800, and placed under State control in 1806, has the monopoly (since 1848) of issuing bank notes. The present privileges of the Bank were last renewed on December 20, 1918, for a further 25 years, i.e., until December 31, 1945. The capital of the Bank is fixed at 182,500,000 francs.

The situation of the Bank on February 3, 1933, was —

	February 3, 1933
Gold	1000 francs
Sight deposits abroad	81,893,917
Advances to the Public	2,930,765
Advances to the State	2,023,779
Notes in circulation	3,200,000
Current accounts and deposits	84,561,690
	18,818,964

At the outbreak of war the maximum note issue of the Bank of France was 6,800 million francs, on August 5, 1914, it was raised to 12,000 million francs; the amount was increased on successive occasions. By the Monetary Law of June 24, 1928, the maximum limit on note issue was cancelled.

The following are the principal banks —The Credit Foncier de France, founded in 1852, which lends money on mortgage, the Crédit Lyonnais, founded in 1863, the Société Générale, founded in 1864, the Comptoir National d'Escompte de Paris, Banque de Paris et des Pays Bas, and the Banque Nationale de Crédit

Money, Weights, and Measures.

The *Franc* of 100 *centimes* was in normal pre-war conditions of the value of 9½d or 25 225 francs to the pound sterling

A new Monetary Law was introduced on June 24, 1928, stabilising the franc on a gold basis. According to this law, the franc, the French monetary unit, consists of 65½ milligrammes of gold, 900/1,000 fine. The Bank of France is bound to convert its notes into gold on demand, and to keep a reserve of gold bullion and coin equal to at least 35 per cent. of the combined total of the notes in circulation and of the credit current accounts. The Mint will strike gold coins of 100 francs, 900/1,000 fine, and these coins shall be unlimited legal tender. To replace the 5, 10 and 20 franc notes of the Bank of France, which will be withdrawn from circulation before December 31, 1932 (from which date they will cease to be legal tender), the Mint, on behalf of the State, will issue silver coins 680/1,000 fine, of a nominal value of 10 and 20 francs. The total issue of such coins must not exceed 3 milliard francs.

The weight of the 10 franc silver coins is fixed at 10 grammes and of the 20-franc piece at 20 grammes, with a margin of five thousandths both as regards weight and fineness.

The metric system of weights and measures is in general use in France.

Diplomatic Representatives.

1 OF FRANCE IN GREAT BRITAIN

Ambassador —Charles Corbin (appointed March 8, 1933)

Counsellor —Roger Cambon, C V O

First Secretary —Jacques Truelle.

Second Secretary —Guillaume Le Verdier

Third Secretaries —Jacques de Blesson and Pierre Saffroy

Attachés —Comte André de Limur and Comte Ghislain Clauzel

Military Attaché —Général de Brigade Voruz

Naval Attaché —Capitaine de Vaisseau Yves Donval

Air Attaché —Lieutenant de Vaisseau Albertas

Commercial Attaché —Vicomte de Poulpique du Halgouët.

Financial Attaché —Jacques Rueff.

Secretary-Archivist —Comte La Combe

Consul General in London —J. Knecht

There are also French Consuls at — Cardiff, Dublin, Glasgow, Liverpool, Manchester (V C.), Newcastle, Southampton (V C.), and other places.

2 OF GREAT BRITAIN IN FRANCE.

Ambassador —Rt. Hon. Lord Tyrrell, G C M G, K.C.B., K C.V.O. (appointed July 30, 1928)

Envoy Extraordinary & Minister Plenipotentiary —R. H. Campbell, C.M.G.

First Secretaries —R. F. Wigram, C M G and O C. Harvey

Third Secretaries —C E Steel and F K Roberts.

Superintending Archivist —W E. Fuller, O B E

Naval Attaché—Captain J U P. Fitzgerald, R N

Military Attaché—Col T G G Heywood, O B E

Air Attaché—Group-Captain R. J. Bone, C.B.E., D S O

Commercial Counsellor—Sir R. Cahill, Kt, C M.G.

Commercial Secretary—A H S Yeames

Consul-General—G D N Haggard, O B E

Canadian Minister in Paris.—Philippe Roy (appointed Sept 28, 1928)

There are British Consular Representatives at Ajaccio, Bordeaux, Brest, Calais, Cherbourg, Dunkirk, Havre, Lille, Lyons, Marseilles (C G), Nantes, Nice, Rouen, Strasbourg (C G), and other towns

ANDORRA.

The independence of the valleys of Andorra was of Carolingian origin. Their political status was regulated by the *Partage* of 1278, according to which they were placed under the joint suzerainty of the head of the French state and of the Spanish Bishop of Urgel. The country consists of gorges, narrow valleys and dehles, surrounded by high mountain peaks of the Eastern Pyrenees. Its maximum length is 17 miles, and its width 18 miles, it has an area of 191 square miles and a population of 5,231, scattered in 6 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171 feet. It is governed by a council of twenty-four members elected for four years by the heads of families in each of the six parishes. Half of the council is re-elected every two years. The council nominates a First Syndic (*Syndic général des Vallées*) to preside over its deliberations, in the First Syndic is vested the executive power. A Second Syndic is also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges (*Bayles*) appointed by the Bishop and by France respectively. There is a Court of Appeal and also a Supreme Court of Andorra at Perpignan. This, and the Ecclesiastical Court of the Bishop, are the highest appeal courts. For criminal suits two magistrates (*le Viguer de France* and *le Viguer Episcopal*) preside over a criminal court at Andorra-la-Vieille. The valleys of Andorra pay an annual due of 960 francs to France and 460 pesetas to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France and his department controls the public services established by France, such as education, posts and telegraphs. A good road runs from Urgel to Andorra, and from there to Encamp. Catalan is the language spoken. Education is in a backward state. French and Spanish currency are both in use.

Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area which is given officially as about 11,049,711 sq kilometres, or 4,265,188 square miles, with a population of 68,374,000. Algeria, however, is under the jurisdiction of the Ministry of the Interior, and Tunis and Morocco are attached to the Ministry of Foreign Affairs. For Syria, Togo, and Cameroon France holds mandates under the League of Nations. The administration of the colonies is directed or controlled by the Ministry

of the Colonies, which was organised as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies, French India a senator and a deputy, Senegal, Guiana, and Cochin China each a deputy, while most of the others are represented on the 'Conseil Supérieur des Colonies'. This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration. In 1931-32, France spent on the colonial service 714,862 472 francs.

The area and population of the colonial domain of France are as follows

—	Year of Acquisition	Area in Square Miles	Population
<i>In Asia —</i>			
India	1879	196	296,410
Annam	1884	39,758	5,119,801

ASIA.

FRENCH INDIA.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, retook it in 1778, restored it a second time in 1785, retook it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814, and 1815, the French possessions in India consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had on February 26, 1931, the following estimated populations —

*Pondichéry	43,499	Modéiharpeth	14,846	Nédoukadou	5,617
Oulgarét	28,899	Ariancoupom	20,636	Cotchéry	6,605
Villénour	23,489	*Karikal	17,558	*Chandernagor	27,262
Tiroubouvané	20,963	Tirnoular	12,558	*Mahé	12,430
Bahour	18,352	Grande Aldée	8,817	*Yanaon	5,249
Nettapacom	12,871	Neravy	7,269	Total	286,410

In 1931, the population of the Provinces was as follows — Pondicherry, 183,555, Karikal, 57,914, Chandernagor, 27,262, Mahé, 12,430, Yanaon, 5,249.

The colonies are divided into five *dépendances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondicherry. The colonies are represented in the Parliament at Paris by one senator and one deputy. At Pondicherry the birth-rate in 1931, was 1.89 per cent. for Europeans and mixed, and 3.52 per cent. for Indians; and the death rate 1.35 per cent. for

Europeans and mixed, and 3.93 per cent for Indians. There were in 1930, 59 primary schools and 3 colleges, all maintained by the Government, with 316 teachers and 10,922 pupils. Local revenue and expenditure (budget, 1932) 2,675,597 rupees. The principal crops are paddy, rice, manioc, ground-nuts. On December 31, 1931, there were 57,148 cattle, 27,349 sheep, and 31,397 goats. There are at Pondichéry 3 cotton mills, and at Chandernagor 1 jute mill, the cotton mills have, in all, 1,335 looms and 72,067 spindles, employing 8,245 persons. There are also at work a few oil presses for ground nuts, and one ice factory. At the ports of Pondichéry, Karikal, Mahé, and Yanam in 1931, the imports amounted to 96,215,000 francs, and the exports to 173,695,000 francs. At these four ports in 1931, 271 vessels entered and cleared. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal. The Banque de l'Indochine has a branch in Pondichéry.

FRENCH INDO-CHINA

CENTRAL GOVERNMENT

Governor-General.—Pierre Pasquier (August 22, 1928)

Secretary General—M. Graffeuil (November 4, 1928)

Government, Area and Population—French Indo China, with an area of about 285,000 square miles and a population, in 1931, of 21,652,000, of whom 42,000 were European (including military forces), consists of 5 States: the Colony of Cochin China, the Protectorates of Annam, Cambodia (including the territory around Battambang ceded by Siam in 1907), Tonking and Laos, and Kwang Chau-Wan, leased from China. The whole country is under a Governor-General, assisted by a Secretary General, and each of the States has at its head an official bearing the title of Resident Superior, except in the case of Cochin China, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head. There is a Grand Council for Economic Affairs and a Government Council for the whole of Indo-China, a Colonial Council in Cochin China, a Protectorate Council, and a Council for Economic Affairs for each of the Protectorate States.

Education—Instruction is given in public and private schools. The system of education is like that of France, and instruction is given in elementary schools and in the three lycées at Hanoi, Saigon and Balat (Annam). For native children there were, in 1931, 5,164 elementary schools, with 330,000 pupils and 9,300 teachers, and 14 high schools (11 lycées for boys with 4,672 pupils, and 3 colleges for girls with 364 pupils). The Indo Chinese University of Hanoi (organised in 1917) has 472 Indo Chinese students. A school of Medicine and Pharmacy (established in 1923) had 80 students.

Justice.—In Cochin-China justice is administered by French magistrates for both Europeans and natives, but in the Protectorates there are native tribunals for matters affecting natives, and French courts for matters affecting Europeans and Chinese. From the native tribunals there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

Finance.—There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces have also

their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1933 the revenue and expenditure of the general budget balanced at 74,980,950 piastres. The outstanding debt of Indo China on January 1, 1931, amounted to 876,000,000 francs and 6,600,000 piastres.

Defence—The military force consists of two divisions and an independent brigade. Effective strength on July 1, 1931, was 834 officers, and 28,676 other ranks (18,091 natives). The naval force on December 31 comprised 4 sloops, 2 gun boats, 2 submarines, and 3 surveying vessels.

Production—Indo China is divided into three main economic areas—(1) The territory tributary to Saigon (Cochin-China, Cambodia, Southern Laos, and Annam South of Cape Varella), which, apart from the fisheries on the Coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haifong (Tonking and the three northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Porte d'Annam and Cape Varella), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district, its main exports are cinnamon, sugar and tea. The minerals of Indo-China are coal (output in 1931, 1,726,000 tons), phosphates (12,871 tons), zinc (18,725 tons), tin (1,688 tons), chrome (2,780 tons), graphite and lead.

Commerce.—In 1887, the French possessions in Indo-China, including Annam, Tonking, Cochin China and Cambodia, were united into a Customs Union. In 1931, the total imports amounted to 1,290,000,000 francs, and exports to 1,123,000,000 francs. The chief export is rice, 961,206 tons in 1931, and 1,191,649 tons in 1932. Other exports are rubber, fish, coal, pepper, cattle and hides, corn, zinc and tin ore. The principal imports are cotton and silk tissues, metal goods, kerosene and motor cars.

In 1932, the imports into Great Britain from Indo-China amounted to 131,601*l*, and the exports from Great Britain, 149,194*l*, re-exports to Indo China from U.K. were 2,024*l*.

Communications—There are 5,252 miles of colonial routes and 10,222 miles of local roads (December 31, 1931).

The principal railways are from Saigon to Mytho (43½ miles), from Hanoi to Nham (111 miles), from Hanoi to Tourane (497 miles), from Saigon to Khanh Hoa (264 miles), from Haiphong to Yunnanfou (534 miles), and from Tourane to Dalat (38½ miles). Total length of line, two-thirds Government, at end of 1930, 1,490 miles. There were 419 principal post offices and more than 700 rural post offices (1930).

In 1931 there were 6,443 kilometres of telephone lines in Indo China, and 37,273 kilometres of wire. The number of calls made was 11,757,000, the number of subscribers 7,599. There is a radio-telephonic service to Europe from Saigon and from Phnom Penh. The length of telegraph line in 1930 was 18,400 kilometres, number of inland telegrams sent, 1,168,000.

Money and Banking—According to a decree of May 31, 1930, the piastre was legally established on a gold basis, the rate of stabilisation being 10 francs = 1 piastre. The piastre will have a gold content of 655 milligrams (10 0308 grains) of fine gold and will be 900 fine.

The Bank of Indo-China has the monopoly of note issue in Indo-China. This privilege was renewed for a period of 25 years by the law of March 1931. Its capital is 120,000,000 francs. Notes in circulation, October 31, 1932, 98,156,956 piastres

British Consul-General at Saigon —F G Gorton

British Vice-Consul at Haiphong —A Mercadier

STATES AND PROTECTORATES

Cochin-China.

Cochin-China was ceded by the King of Annam to France in 1862. Its area is estimated at 26,476 square miles. The whole is divided into 21 provinces. The towns of Saigon and Cholon have been formed into municipalities and a new region Saigon-Cholon has been created. The Colonial Council contains 24 members (12 French, 12 native). The colony is represented in France by one deputy. The population consists mainly of Annamites, Chinese and foreigners. In 1931, the total population was put at 4,467,352, of whom 14,898 were French and 515 European foreigners (excluding the military forces, about 3,000 troops). Saigon had, in 1931, a population of 123,298, of whom 10,600 were French and 365 other Europeans. The town of Cholon has 134,060 inhabitants, of whom 696 are French and 52 other Europeans. There are about 1,861 schools, with 3,296 teachers, and 168,621 pupils.

Of the total area, 2,155,000 hectares (5,387,000 acres) are cultivated (1931). The chief culture is rice, of which the production in 1931 was 2,260,000 metric tons, or about 40 per cent of the total crop of the whole of Indo-China. Other crops are maize, beans, sweet potatoes, earth nuts, cotton, rubber, sugar cane, tobacco, coffee, coco nuts, betel-nuts, pepper, oranges, bananas, etc. The farm animals in 1931, comprised 11,691 horses, 439,981 buffaloes, 579,500 pigs, 5,090 sheep and goats.

River and coast fishing is actively carried on, the fishery products are valued at 1,500,000 francs yearly. There are 34 rice mills in Saigon and Cholon, turning out 3,780 tons of rice a day. In these towns are also 4 saw-mills, 6 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 18,000 Annamites are small traders. The total exports in 1931 amounted to 893,388,672 francs, and imports to 756,277,060 francs. The chief exports in 1931 were rice (1,090,000 metric tons), fish (28,625 metric tons), fat and fish oil (1,964 metric tons), pepper (4,689 metric tons), cotton (1,391 metric tons), copra (7,763 metric tons), silk (3,270 kilograms), shrimps (1,211 metric tons), isinglass (1,694 metric tons). The cultivation of rubber was at a standstill in 1931 because of the crisis. During 1931, 746 steamers of 1,198,063 tons entered at the port of Saigon. The vessels of the Messageries Maritimes and of the Chargeurs Réunis Companies visit Saigon regularly. There is also constant communication with Hong Kong and Singapore by British, Norwegian, Japanese and Chinese vessels. (For railways see Indo-China.) At Saigon there are 10 banks or bank-agencies, but the two chief ones are the Franco-Chinese Bank and the Indo-China Bank.

In 1931, the local budget balanced at 17,000,000 piastres.

Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Huế on

February 23, 1886, by which a French protectorate has been established over Annam. The King Bao-Dai succeeded to the throne on November 6, 1925. The King governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government, represented by a Resident Supérieur. A Chamber of representatives of the people was established in 1926. The ports of Tourane and Qui Nhon are opened to European commerce, and the customs revenue conceded to France, French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population in 1931, 31,885). Province of Binh-Dinh had 557,126 inhabitants in 1931. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 39,758 square miles, with a population in 1932, of 5,119,801. There were 2,854 Europeans, 591,705 Moïs, 9,878 Chinese, and 242 Japanese and Indians. The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. There were in 1932, 751 preparatory schools with 31,416 pupils, 131 elementary schools with 10,891 pupils, 59 secondary schools with 14,530 pupils, one higher secondary school for boys at Hué, with 575 pupils, one at Vinh with 159 pupils and one at Quinhon with 412 pupils, one higher secondary school for native girls at Dong Khanh with 503 pupils, one professional school with 174 pupils, one normal school for boys, and one for girls, both at Hué. Local budget, 1932, balanced at 8,086,105 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is the most important product. Others are cotton, maize, and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced. There are about 804,000 head of cattle in Annam, and cattle rearing is of some importance. There are copper, zinc, and gold in the province of Quang nam, the mines are worked by natives. An important seam of haematite iron is worked about 9 kilometres from Thanhhoa. At Nongson, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. The chief imports are cotton yarn, cottons, tea, petroleum, paper goods, and tobacco, chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea, and paper. In 1930, 229 French ships of 920,762 tons, 27 Chinese of 23,235 tons, and 13 ships (29,206 tons) of other nationalities cleared the port of Tourane, the total tonnage being 978,303 tons. The number of native junks entering the port were 3,703, of a tonnage of 24,540.

Cambodia.

Cambodia is bounded on the south by Cochin China, on the east by Annam, on the north by Laos and Siam, on the west by Siam, and on the south west by the Gulf of Siam. The French Protectorate was established in 1863.

Area, 67,550 square miles, population according to the census of 1931, 2,806,000, of whom 2,000 were Europeans (excluding the military forces), 176,000 Annamites, 148,000 Chinese, 2,475,000 Cambodians, Sino Cambodians, Malaysians, and Laotians, and 5,000 of various races. The present King, Sisowathmonivong, succeeded his late father, Sisowath, on August 9, 1927, and was crowned on July 22, 1928. The country is divided into 14 provinces. The four chief towns are Phnôm-Penh (population 96,000), the capital of the territory, located at the crossing of Tonlé-Sap and Mékong rivers, Battambang, 180 miles further north west, Kampot (92 miles from

the capital), a seaport on the Gulf of Siam, but not accessible for sea-going vessels, and Kompong-Cham. The budget for 1931 balanced at 11,434,020 piastres, including a sum of 728,000 piastres allowed for the civil list of the king and princes. There are (1931) 308 French schools, besides one college and one professional school, and a school of Applied Arts. Total number of pupils in attendance was (1931) 15,368 Cambodian, Annamite and Chinese.

The soil is fertile, but only a part of it is under cultivation (2,150,000 acres) owing to shortage of labour. The chief product of Cambodia is rice which is exported by way of Cholon where the rice is milled, and Saigon where it is shipped. Amongst the other products are tobacco, kapok, cotton, pepper, maize, palm sugar, rubber and silk. Pepper is especially grown in the country of Kampot, the export in 1931 was 3,100 metric tons. Maize growing is extending, the production of maize is estimated at 70,000 tons, the whole of which is exported. Cattle breeding is a flourishing native industry, especially between Phnôm Penh and Manila. Other native industries are weaving of silk and cotton, pottery and making of rush mats. There is a cotton-ginning mill at Ksach Kandal, and another at Chhak-Augré, both near Phnôm Penh, a silk factory, several iron foundries, rice-mills, and saw-mills at Phnôm-Penh, but not very important. Valuable forests cover an area of about 10,000,000 acres. Phosphate and sapphire are the principal minerals but not worked very extensively. The overflow of the Mekong river fills up the Great Lake, which occupies the middle of Western Cambodia. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry. Imports in 1931 17,500,000 piastres, exports, 23,500,000 piastres. The imports comprise salt, wine, textiles, chemicals, the exports comprise rice, salted fish, pepper, maize, cotton, tobacco, fish-oil, palm sugar, sticklac, kapok, wood, resin, hides, and cattle. This last trade is carried between Phnôm-Penh and Manila.

Cambodia possesses two little sea-harbours, Kep and Réam, both on the Gulf of Siam and connected to Bangkok and Saigon by the steamers of the 'Siam Steam Navigation Company'. The Mékong and the Great Lake, with their affluents, give a total of 875 miles of waterways, of which about 370 are not navigable to launches during the low-water season. River-steamers easily reach Phnôm Penh, which has good quays and embankments.

Cambodia possessed in 1930, 1,430 miles of good metalled roads and nearly 188 miles of unmetalled roads and 50 miles of roads in course of construction. The chief roads are from Saigon to the Siamese frontier, via Phnôm-Penh and Battambang, from Phnôm Penh to the Gulf of Siam, and Mount Bokor (hill station), from Saigon to Kratié, and from Phnôm Penh to Angkor via Kompong-Thom. A railway is in course of construction between Phnôm Penh and Battambang.

Of all the countries of the Far East, Cambodia is among the richest in ancient monuments. The ruins of Angkor are specially famous.

Tonking.

This territory, brought under France's protectorate in 1884, has an area of 40,530 square miles, and is divided into 23 provinces, and 4 military territories, with 10,885 villages and a population in 1932 of 8,012,429, of whom 10,338 were French (exclusive of military forces) and 3,082 other Europeans. The King of Annam was formerly represented in Tonking by

a viceroy, but, in July, 1897, he consented to the suppression of the vicerealty and the creation of a French residency in its place. Chief town Hanoi, a fine and large modern town, with a population of 123,210 in 1932 (French, 4,638, natives, 118,982, and Chinese, 4,590). This town on January 1, 1902, became the capital of Indo China, instead of Saigon. In 1932, there were 13 native primary schools (5,764 pupils), 2 native normal colleges (280 students), 1 native college (702 students), 1 school of applied arts (128 students), 1 French primary school for girls (228 pupils), 2 French High Schools (611 pupils), and 1 French Lycée (700 pupils). The local budget for 1932 balanced at 12,946,590 piastres. The chief crop is rice (total production 1931, 1,800,000 tons). Other products are maize, arrow root, sugar-cane, coffee, tea, various fruit trees, and tobacco. A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported. There are rich limestone quarries, calamine and tin mines, and also rich hard coal beds.

Imports in 1931, 434,382,000 francs, exports, 221,000,007 francs.

Chief imports are metal tools and machinery, yarn and tissues, beverages, chief exports, rice, maize, and animal products. The principal port is Haiphong, which is visited regularly by the steamers of three French lines.

The **Laos** territory, under French protectorate since 1893, has an area of 231,400 square kilometres, or 89,320 square miles, the population in 1931 was 944,000. The capital is Vientiane. In the country there is a protected state, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator. The soil is fertile, producing rice (average output about 330,000 tons annually), cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. It can be entered by the Mekong, which is barred at Khone by rapids, and by two new roads from Vinh to Thakhek and from Quang Tri to Savannakhet. A new road following the Mekong connects Thakhek to Pakse, and thence to Saigon. A railway, four miles in length, has been constructed across Khone island, and by means of it several steam launches have been transported to the upper waters, where they now ply. Motor launches ply between Vientiane, Luang Prabang and Houei Sai. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon and Hanoi. The local budget for 1932 balanced at 4,246,100 piastres.

In 1900, the territory of **Kwang Chau Wan** on the coast of China, leased from China in 1898, and increased in 1899, by the addition of 2 islands in the bay, was placed under the authority of the Governor-General of Indo-China. The territory has been divided into 8 administrative circumscriptions, including 1 Municipality, Telokham, a commercial centre, but the Chinese organisation is maintained. Fort-Bayard is the seat of the local Administration. Its area is about 190 square miles and its population 250,000. The imports are chiefly cotton yarns, petroleum, matches, refined sugar, cunao (for tinctorial purposes), the exports are straw sacks, swine, cattle, brown sugar and ground-nuts. Imports in 1931, 11,522,918 piastres; exports, 7,532,444 piastres. The port is free. The territory is regularly visited by the vessels of French, Portuguese, Chinese and English companies; in 1931, 168 vessels of 161,277 tons entered. The local budget for 1931 balanced at 620,000 piastres.

MANDATED STATES IN ASIA: SYRIA AND LEBANON.

Syria and Lebanon have been recognised as independent States to be placed under a Mandatory Power. By decision of the Supreme Council of the

Allied Powers at San Remo (April 25, 1920), France has been assigned the Mandate for Syria, which was confirmed by the League of Nations on July 24, 1922 (Declaration of London)

High Commissioner —M. Henri Ponsot (October 12, 1926)

Area and Population.—The territory under the French Mandate is bounded by the Mediterranean on the west, by Palestine on the south, by Iraq on the east, and by Turkey on the north

For details of the frontier between Syria and Iraq and Palestine, see the *STATESMAN'S YEAR BOOK*, 1928, p. 893 The frontier between Syria and Turkey (Nisibin-Jeziret ibn Omai), was settled by the Franco-Turkish agreement of June 22, 1929

The country was originally organized into 5 territories (*delets*), but since January 1, 1925, two of these, viz Damascus and Aleppo, were united to form the single State, now the Republic of Syria (Sanjaks of Hama, Homs, Damascus, Hauran, Aleppo, Alexandretta and Deir ez Zor) The remaining territories are those of Latakia, formerly the Alawiyya (Sanjaks of Latakia and Tartus), of Lebanon (Sanjaks of North Lebanon, Mount Lebanon, South Lebanon and Bekaa), of Jebel Druze (south of Hauran) The autonomous Sanjak of Alexandretta, set up January 1, 1925, is part of the Syrian Republic

THE SYRIAN REPUBLIC —The Constitution of May 14, 1930, provides for a President, elected by the Legislature for 5 years, the Legislature itself, which consists of 69 members, is elected for 4 years The first general election, which is in two degrees, was held in December, 1931, and January, 1932 The capital is Damascus The present Head of the Syrian State is Mohamed Ali bey el Abed and the Prime Minister is Hakky bey el Azm

THE LEBANESE REPUBLIC, was proclaimed a State on September 1, 1920 It has the following frontiers —North, the Nahr el Kebir, south, the frontier of Palestine, west, the coast, and east, the heights of Anti Lebanon. Beirut is the seat of the Government M Charles Debbas is President of the Republic

THE GOVERNMENT OF LATAKIA was established under that name on May 14, 1930 Capital, Latakia

THE GOVERNMENT OF JEBEL DRUZE has its seat at El Suweideh

The total area subject to the French Mandate may be estimated at 60,000 square miles The total population of this area in 1929 was 2,831,522. The population of the 4 territories was as follows:—Syria, 1,696,638, Lebanon, 862,618 (of whom 342,388 were Christians and 292,247 Moslems), Latakia, 286,920, and Jebel Druze, 51,780 Arabic is the prevailing language, with many dialectical varieties But there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews, and a certain number of Europeans The principal towns are Damascus, population 193,912, Aleppo, 177,813; Beirut, 134,655, Homs, 52,792; Hama, 39,960; Tripolis, 37,260; Antioch, 28,000; Latakia, 21,404, Alexandretta, 13,997; and Zahlah in Lebanon, 20,985 There are no statistics of births and deaths

Religion and Education.—The population is composed mainly of Moslems, of whom there are 1,514,756 The majority are Sunni Moslems (1,075,816) The Druses number about 86,125, the Alawiyya 227,930, and Ismailians 14,882 There have been Christians in Syria since the earliest times. They number at present 506,419, of whom 186,676 are

Maronites, 66,762 Greek Catholics (Uniat), 7,805 Armenian Catholics (Uniat), 32,859 Armenians, 8,887 Protestants, 28,885 Melkites, and 151,326 belong to the Orthodox Church. There are also 16,526 Jews. There are now one Orthodox, one Gregorian Armenian, one Latin, and three Uniat Patriarchs (Melkite, Syrian, and Maronite) of Antioch, none of whom reside in that city. Apart from this there are in French Mandated territory 9 Orthodox Dioceses, one Armenian Uniat Archbishop, six Melkite (Uniat) Archbishops and six Bishops, three Syrian (Uniat) Archbishops, five Maronite (Uniat) Archbishops and four Bishops, one Latin Apostolic Delegate, a Grand Mufti and a Grand Rabbi.

There were in the whole of the mandated territory in 1931, 680 public schools with 64,306 pupils, 1,061 private schools with 81,185 pupils, and 621 foreign schools with 55,736 pupils.

At Damascus there is a Syrian university (founded June 15, 1923), with (in 1931) a faculty of medicine (155 students), a faculty of law (179 students), pharmacy (13 students), dentistry (32 students), and arts (85 students). There is also an Arab Academy, founded in 1913, and amply endowed, and also agricultural colleges at Selémié and Bekaa. There is a school of arts and crafts at Beirut (267 pupils, December 31, 1931).

There are also two universities in Beirut: one French and one American. The American university contains a faculty of medicine and several schools, with a total of 384 students in 1931. The French university (founded in 1875) has a faculty of medicine with 171 students, and several schools, total students, 615 in 1931.

Finance.—The revenue and expenditure for four years were as follows in Syrian pounds (Syrian pound = Francs 20) —

	1929	1930	1931	1932 ¹
	Syrian Pounds	Syrian Pounds	Syrian Pounds	Syrian Pounds
Revenue	24,126,104	18,694,923	19,418,936	17,057,489
Expenditure	20,025,808	16,578,787	18,941,905	17,057,489

¹ Estimates

The Budget for 1931 was distributed as follows in Syrian pounds, paper —

	Receipts	Expenditure	Surplus
	Syrian Pounds	Syrian Pounds	Syrian Pounds
Syrian Republic	10,175,500	10,101,762	178,738
Alexandrette Sanjak	1,258,405	1,072,226	181,259
Lebanon	5,998,663	5,886,987	100,876
Latakia	1,610,848	1,624,977	14,184 ²
Jebel Druze	880,245	855,953	24,292
Total	19,418,986	18,941,905	472,081

² Deficit.

Defence.—A French army is in occupation of the whole country. On January 1, 1932, the effective strength was 301 officers (133 French) and 13,371 other ranks (287 French).

Production and Industry.—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil.

and in cattle breeding, the total area cultivated in 1930-31 was 1,150,000 hectares. The principal products in 1930-31 were wheat, 386,717 metric tons, barley, 311,652 metric tons; maize, 33,108 metric tons, olives, 61,011 metric tons, silk cocoons, 2,760 metric tons (3,775 in 1930), and cotton, 4,117 metric tons. Sesamé, from which oil is produced, is one of the most valued crops, but is very uncertain. Chickpeas, lentils, beans, vetches, and lupins are largely cultivated, production of chickpeas in 1930-31 was 4,264 metric tons. About 19,230 acres in Latakia, Aleppo, Beirut, and Damascus produced 5,294 metric tons of tobacco in 1930-31. The cultivation of cotton has been considerably extended during the last two years. The chief cotton growing centre is the Aleppo district. In 1930-31 the total area under cotton was 76,269 acres. Hemp and sugar cane are also cultivated. The most important fruit trees are the olive, vine, mulberry, lemon, banana, and orange. In 1930-31, there were 183,242 acres under olive trees, against 188,000 in 1929-30. The yield of olive oil in 1931 was 160,000 metric quintals. There were also produced 25,500 tons of apricots and 112,306 tons of grapes. The white mulberry is largely cultivated in Northern Syria for feeding silk worms. There were 2,612,000 sheep and 977,000 goats in 1931.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Northern Lebanon has been worked for iron in ancient and modern times. At Majerha the ore is rich, and the iron good. There is a comparatively rich mine of lignite in South Lebanon. There are indications of petroleum in various places, but the attempts to work it so far have not been successful. There are indications of phosphates, lead, copper, antimony, nickel, chrome, gypsum is widely distributed. There is abundance of marble and good building stone.

The industries of Syria are on a very small scale. Flour, oil, soap, and silk thread are the most important. The chief centres of the silk industry are Beirut, Aleppo, Tripoli, and Latakia. There were 90 spinning factories in 1927. Wine and tobacco are also produced.

Commerce.—The imports and exports for five years (in thousands of Syrian pounds, paper) were as follows —

	1927	1928	1929	1930	1931
	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds	1,000 Syrian pounds
Imports	64,123	66,002	72,998	68,526	57,518
Exports	27,389	26,741	34,237	30,616	20,892

The principal imports in 1931 were (in thousands of Syrian pounds paper) —textiles, 20,884, metal and metal work, 5,104, animal produce, 3,889, colonial produce, 4,395, chemicals and allied products, 2,502. Principal exports were —animal produce, 3,883, fruit, vegetables, etc., 4,597, textiles, 8,243.

The distribution of trade in 1931 was as follows (in thousands Syrian paper pounds):—Imports from France, 7,166, Great Britain, 6,318, United States, 3,849, Italy, 4,704, Turkey, 4,647. Exports to Egypt, 1,890; France, 1,802, Palestine, 3,945, Italy, 1,230.

According to Board of Trade Returns the imports from Syria into Great Britain amounted to 225,537*l.* in 1931, and 235,929*l.* in 1932, while the

exports to Syria amounted to 1,019,239/ in 1931, and 881,986/ in 1932. Re-exports to Syria from U.K. were 26,418/ in 1931, and 15,913/ in 1932

Communications.—Most of the ports of Syria are visited regularly by the steamers of various shipping companies. In 1931, 1,665 vessels of 3,492,811 tons entered the ports of Lebanon and Syria. Beirut was the principal port of call.

In 1927, there were 2,240 miles of macadam roads and 2,754 miles of dirt and gravel roads. Syria is comparatively well provided with railways, and new lines and branches are proposed. The following railways were open in 1931—standard gauge from Rayak to Aleppo and Hama (Turkish frontier) 260 miles, Hama to Tripoli, 64 miles, narrow gauge Beirut to Damascus, 93 miles, Beirut to Mameltein, 11 miles, Damascus to El Hammé, 120 miles. Three companies operate passenger routes across the Syrian Desert between Beirut and Baghdad. An air mail service between Beirut and Marseilles has been in operation since June, 1929.

Currency.—The official currency as from May 1, 1920, is the Syrian Bank Note, issued by the Bank of Syria, under French Treasury control. The monetary unit is the Syrian pound, divided into 100 piastres (1 piastre = 20 centimes), which are exchangeable in Paris at the fixed rate of 20 francs to the pound. On December 31, 1931, the notes in circulation amounted to 11,425,000/ (Syrian). In some parts of the country the Turkish pre-war mepdichs are still current.

There is a Consul-General at Beirut, and Consuls at Aleppo and Damascus.

AFRICA ***ALGERIA**

(L'ALGÉRIE)

Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which are under the appropriate ministries in Paris, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing respectively the French colonists, the French tax payers other than colonists, and the Mussulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

The territories of the South, forming a separate colony, are each under a military command which directs all the administrative and civil services under the authority of the Governor. They have a budget distinct from that of Algeria. The natives are represented on the communal administration. By the law of February 4, 1919, the position of French citizens is accorded to natives, above the age of 25 and monogamous, who served in the war, who are proprietors or farmers, who can read or write or hold a French decoration.

The French Chambers alone have the right of legislating for Algeria, while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends one senator and, since 1923, three deputies to the National Assembly.

Governor-General — M. Jules Carde, appointed October 3, 1930.

Area and Population.

The census of March 8, 1931, which is the last taken, showed a population (including the military forces) amounting to 6,553,451 (of whom 920,788 were Europeans, 5,632,663 natives), on an area of 847,500 sq. miles. The colony has been organised in 2 great divisions called respectively Northern (80,117 sq. miles) and Southern Algeria (767,435 sq. miles). Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements, 304 communes, and 78 mixed communes, in the Civil Territory. Southern Algeria

consists of the 4 Territories of Ain-Sefra, Ghardaia, Touggourt, and the Saharan Oases, organised under decree of August 14, 1905. These territories contain 13 communes, of which 7 are mixed and 6 native.

Population, including military forces, according to the revised figures of the census of March 8, 1931 —

	Municipal Population			Population numbered separately			Grand Total
	European	Native	Total	European	Native	Total	
Northern Territory	875,636	5,026,388	5,902,019	36,521	40,293	76,814	5,978,833
Southern Territory	5,948	561,931	567,879	2,683	4,056	6,739	574,618
Grand Total	881,584	5,588,314	6,469,898	39,204	44,349	83,553	6,553,451

Population, according to Departments and Territories (census of March 8, 1931):—

Northern Algeria (Departments)	Population	Southern Algeria (Territories)	Population
Algiers	2,057,971	Ain Sefra	175,594
Oran	1,436,661	Ghardaia	144,336
Constantine	2,484,201	Touggourt	224,547
Total	5,978,833	Saharan Oases	30,141
		Total	574,618
Grand Total		6,553,451	

In 1931, of the total European population of 920,788, the French numbered 762,852 and foreigners, 157,936.

The chief towns with population in 1931 were Algiers, 257,122, Oran, 163,743, Constantine, 104,902, Bona, 68,778, Sidibel Abbes, 45,902, Philippeville, 47,750, Mascara, 31,449, Tlemcen, 46,060, Sétif, 37,253, Mostaganem, 28,357, Blida, 39,371, Bougie, 25,261, Tizi Ouzon, 38,291.

Religion and Education

The native population is entirely Mussulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with some 400 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in Government grants.

At Algiers (city) there is a University, attended (July 31, 1931) by 2,090 students (871 for Law, 549 Medicine and Pharmacy, 319 Science, 351 Arts). There are also special schools for commerce, the fine arts, hydrography, and agriculture. In 1930 there were also 570 Mussulman schools with 52,498 pupils (544 for boys, 48,715 pupils, and 26 for girls, 3,783 pupils). There are higher Mussulman schools (*médersas*) at Algiers, Tlemcen, and Constantine, with 151 students (November 5, 1931) (128 Arabs, 23 Kabyles). There were, on November 5, 1931, 11 establishments for secondary education for boys with 7,678 pupils (6,683 French, 882 natives and 163 foreigners) and 6 establishments for girls with 3,240 pupils (3,075 French, 89 natives and 76 foreigners). In 1931 there were 1,187 primary and infant schools, public and private, with 129,198 pupils (66,680 boys and 62,568 girls). There were (1931) two normal schools for men teachers with 34 professors and 273

students, and three normal schools for women teachers with 29 professors and 243 students

Justice and Crime

There is an Appeal Court at Algiers, and in the arrondissements are 17 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902, there have been criminal courts and special repressive tribunals for trying natives accused of crime.

Mussulman justice is administered to natives by Justices of the Peace and Cadis in the first instance with an appeal to French courts.

The average prison population in 1931 was 7,091, compared with 6,786 in 1930.

Finance.

Europeans and natives pay the same direct and indirect taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the Military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs.

The budget estimates for five years were as follows (in francs) —

—	1929	1930	1931-32 ¹	1932 ²	1933
Revenue	891,082,165	1,021,863,098	1,199,056,329	977,080,498	1,865,326,043
Expenditure	830,559,759	1,021,749,154	1,195,401,883	977,920,936	1,804,535,716

The details of the 1931-32¹ ordinary budget are as follows —

Revenue		Expenditure	
	Francs		Francs
Taxes	1,004,813,070	Debt, pensions, etc.	226,754,444
State Revenues	60,831,800	Government and Central Administration }	146,933,108
Sundry receipts	8,881,245	Interior	282,093,561
Exceptional receipts	1,200,000	Native Affairs	65,371,249
Payments for State Services }	128,330,214	Finance	93,910,248
		Posts, Telegraphs and Telephones }	79,505,485
		Public Works .	199,544,195
		Agriculture, &c.	46,801,608
		Commerce and Industry	19,975,348
		Forests	33,453,637
		Miscellaneous	1,000,000
Total (including all items)	1,199,056,329	Total (including all items).	1,195,401,883

¹ Financial year terminates March 31

² April 1—December 31, 1932

The extraordinary budget for 1931-32 showed revenues of 973,615,000 francs, and expenditure of 951,115,000 francs.

There is a separate Post Office budget which is estimated to balance revenue and expenditure at 135,981,963 francs for 1932-33.

Defence.

The military force in Algeria and Tunis comprises the XIXth Army Corps, which includes 3 divisions. French residents are under the same obligation to

serve as in France, natives are under the obligation to serve 3 years with the colours and can be called up as reservists in case of mobilisation. The troops may be stationed in North Africa or employed on Colonial expeditions, but they belong to the 'Metropolitan,' not to the Colonial Army. There are 6 regiments of zouaves, each of 3 battalions, of 5 companies, 6 regiments of cavalry (Chasseurs d'Afrique), of several squadrons, 3 groups of field and 1 of heavy artillery, 1 battalion of engineers, and 1 regiment of the Flying Corps. These are all European troops, and in the case of the artillery and engineers their recruiting depôts are in France. The Foreign Legion of 4 regiments of a varying number of battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen, the headquarters of the regiments is in Sidi Bel Abbes, in Oran, but battalions are sent to any colony where they may be required. The Natives are 12 regiments of Algerian Tirailleurs each of 3 battalions, and 6 regiments of Spahis (Arab cavalry) each of several squadrons. The officers and a proportion of the non commissioned officers of the native regiments are French. In 1932, the strength of the garrison of Algeria and of Tunis was 2,960 officers and 69,300 men.

Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c, but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty.

The soil is, under various systems, held by proprietors, by farmers, and by métayers or khammés. Most of the State lands have been appropriated to colonists. The area under cultivation is 24,474,350 acres, of which 5,793,797 acres are owned by European farmers and the balance by native farmers. The chief crops in 1931 were wheat, 3,618,459 acres with a yield of 695,058 metric tons, barley 3,127,630 acres with a yield of 589,063 metric tons, and oats, 557,242 acres with a yield of 119,198 metric tons, maize, potatoes, artichokes, beans, peas and tomatoes. Flax, silk, and tobacco (the cultivation of the latter being most remunerative) are also produced. In 1931 there were 15,859 tobacco planters, the area under cultivation was 56,676 acres, and the yield 18,077 metric tons. Sericulture is in an experimental stage and subsidised by the government. There were 326 growers in 1926, 186 in 1927, and 104 in 1929. In 1929, 6,142 pounds of cocoons were produced as against 16,160 in 1928.

In 1931, the yield of wine was 348,846,718 gallons from an area of 760,605 acres compared with 298,350,470 gallons from 669,332 acres in 1930. Date, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil amounted to 5,499,250 gallons. The area under cotton in 1931 was 12,355 acres. Yield in 1931 was 1,500 metric tons of fibre. State forests (1931), 5,418,164 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 1,111,980 acres are cork-oak trees, 1,691,950 acres Aleppo pine, 1,627,730 acres evergreen oak, and 97,812 acres cedar. The dwari palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c, and for bark for tanning. Con-

siderable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue in 1930 was 16,745,721 francs.

On December 31, 1931, there were in Algeria 170,000 horses, 170,000 mules, 300,000 asses, 900,000 cattle, 6,600,000 sheep, 3,000,000 goats, 90,000 pigs, and 173,000 camels. The wool clip in 1931 was 20,000 metric tons.

There are extensive fisheries for sardines, allaches, anchovies, sprats, tunny-fish, &c, and also shell-fish. In 1931, 1,088 boats of 4,717 metric tons, and 4,128 persons were employed in fishing, and the quantity of fish taken amounted to 20,275,221 kilos. The yield of coral and sponges, 247 kilos.

Algeria possesses deposits of iron, zinc, lead, mercury, copper and antimony. The mineral output in 1931 was as follows: iron ore, 895,000 metric tons, lead, 9,852 metric tons, zinc, 7,727 metric tons, phosphate rock, 459,077 metric tons. Kaolin, marble and onyx, salt, coal, and antimony are also found.

Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000 francs) —

—	Imports	Exports	—	Imports	Exports
	1,000 francs	1,000 francs		1,000 francs	1,000 francs
1926	4 119 041	4 014 986	1929	5 854 351	3 877 492
1927	4 404 544	3 522 018	1930	5 711 000	4 272 000
1928	5 049 908	4 233 781	1931	5 573 000	3 704 000

The imports and exports for 1930 were divided as follows (in thousands of francs) —

—	Imports			Exports		
	From France	From Other Countries	Total	To France	To Other Countries	Total
Animal products	187,464	100,922	288,376	401,542	65,286	466,848
Vegetable products	652,440	425 569	1 078,009	3,093 422	487 876	3,581,198
Mineral products	803 452	366,863	669,215	52,186	206,529	257,415
Manufactured articles	3,456,174	337,926	3,794,100	87 415	199 812	286,727
Total	4,599,920	1,220 780	5,820,700	3,574,485	977,703	4,552,188

The principal imports in 1931 were (in millions of francs), cotton goods 539 (of which 99 per cent. were from France), machines, spare parts, 409 (71 per cent from France), tools, 318 (89 per cent from France), automobiles, 233 (98 per cent from France), petroleum, 211; sugar, 161 (92 per cent. from France), wood, 119, pottery, etc., 142 (92 per cent from France); paper, 132 (92 per cent. from France), hides, skins and furs, 111 (93 per cent from France), chemical products, 124, coal, 108, vegetable oils, 124 (95 per cent from France), soaps and perfumes, 120 (99 per cent from France), iron and steel, 142 (94 per cent from France); cereals, 227.

The principal exports in 1931 were (in millions of francs), wines, 1,917 (99 per cent. to France); cereals, 254 (87 per cent. to France), sheep, 142 (94 per cent. to France), iron ore, 139, brandies and spirits, 102 (97 per cent. to France), fruit, 139 (90 per cent. to France).

In 1929 the receipts of the customs authorities (excepting sugar) amounted to 169,831,672 francs, and in 1930 to 162,003,733 francs

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years —

Re-exports to Algeria from U K	10,195	12,965	25,087	6,827	10,172

Shipping and Communications.

In 1931, 4,859 ships of 8,055,111 tons entered the ports of Algeria, discharging 4,836,936 tons of merchandise, and ships of 7,605,959 tons cleared after loading 5,170,459 tons of merchandise

On January 1, 1931, the mercantile marine of Algeria consisted of 14 vessels of 32,232 tons (overseas trade), 160 coasting vessels of 43,248 tons, and 512 harbour craft of 21,231 tons

There were 28 national roads in 1932, with a length of 4,037 miles, 41 miles of Departmental roads, 7,592 miles of main roads and 19,740 miles of by-roads

On January 1, 1931, there were 3,023 miles of railway open for traffic (exclusive of lines on Tunisian territory), the railway receipts (1931) amounting to 314,200,000 francs. There is a regular postal air service between Algiers and Marseilles (800 kilometres)

The postal receipts in 1931-32 were 38,178,001 francs, and there were 749 post offices. The telegraphic receipts were 16,333,695 francs, and those from telephones 28,773,402 francs

There were on January 1, 1932, 30,041 telephone subscribers, 896 public telephone offices, and 23,806 miles of inter urban line

Postal cheque accounts were opened at Algiers on February 1, 1921, and on December 31, 1931, there were 16,049 accounts with a total balance of 137,126,434 francs

Banking, Money, Weights, and Measures.

The Bank of Algeria is a bank of issue, with a capital of 20,000,000 francs. By the law of April 9, 1932, its note circulation was limited (as a temporary measure) to 3,000 million francs. Several co-operative agricultural banks, assisted by Government funds, are in operation. Barclay's Bank (Overseas), Ltd., have branches at Algiers and Oran

The money, weights, and measures of France only are used

British Consul-General for Algeria — G. P. Churchill, C. B. E.

Vice-Consul at Algiers — F. K. Brennan

Vice-Consuls at Bône and Oran

TUNIS

(AFRIKIYA ; TUNISIE)

Government.—**Sidi Ahmed Bey**, born 1862, succeeded his cousin, **Sidi Mohamed el Habib Bey**, July 10, 1929

The reigning family of Tunis, occupants of the throne since 1705, descend from **Hussein ben Ali**, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey

After the French invasion of the country in the spring of 1881, the treaty of **Kasr-es-Said** (May 12, 1881), confirmed by convention signed June 8, 1883,

placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 8 of the ministers being French and 3 Tunisian. The country is divided into 19 districts (contrôles civils), and 6 military circles, the district governors (contrôleurs) are French, the subordinate officials (Caïds, Kahias and Sheiks) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives, there are Native courts for cases between natives (tribunaux at Ouzara and Charaâ). In 1914, the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

French Resident-General—M. Manceron (appointed January 2, 1929)

Area and Population—The present boundaries are on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the great desert of the Sahara and Libya. The area is about 48,300 English square miles, including that portion of the Sahara which is to the east of the Djerid, extending towards Gadames.

According to the census held on March 22, 1931, the total European population was 195,293, composed of 91,427 French (exclusive of the army of occupation and of the navy), 91,178 Italians, 8,643 Maltese, 449 Spaniards, 463 Greeks, and 3,133 other foreigners. The total native population, according to the census held on March 22, 1931, was 2,215,399, of whom 2,159,151 were Arabs and Bedouins, and 56,242 Jews. Grand total was 2,410,692.

The capital, the city of Tunis had, in 1931, a population of 202,405, of whom 89,801 were Moslems, and 25,399 Jews, besides 83,649 French, 46,457 Italians, 5,529 Maltese, and 1,570 other Europeans. By means of the channel, which was opened in 1893, Tunis is directly accessible to ocean-going vessels. Other towns are Bizerta with 23,206 inhabitants (7,971 Europeans), Sousse with 25,324, Sfax with 39,969, Kaisouan, the Holy City of the Moslems, with 21,532 natives exclusively, Ferryville with 6,123 (5,227 Europeans), and Tinja, 1,655 inhabitants.

The bulk of the population is Mohammedan under the Sheik-ul Islam, and the revenue from the 'Habus' lands, like that from the 'Wakf' lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 195,000 Roman Catholics, under the ministrations of the Archbishop of Carthage, and about 125 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—Within the Regency there are (1931) some 478 public schools, including 8 lycées and colleges, and 32 private schools (of which 6 Jewish schools are provided for by the Government). In the schools there are 83,459 pupils, of whom 54,985 are boys. Of the total number of pupils, 19,499 are French, 37,208 Musulman, 11,950 Jews, 10,281 Italian, 1,196 Maltese and 3,315 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 78 and in the interior 1,254 Musulman primary schools, some of them assisted by Government funds. 24 Moslem apprenticeship-schools have been created during the last few years numbering 490 native pupils. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been

extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns

Finance.—Receipts and expenditure for 5 years —

	1929	1930-31 ¹	1931-32 ¹	1932 ²	1933
	Francs	Francs	Francs	Francs	Francs
Revenue	450,093,400	513,690,900	514,267,500	461,215,126	517,348,180
Expenditure	449,991,037	518,624,905	514,217,639	461,127,600	517,276,579

¹ Year ending March 31

² April 1 to December 31

The estimates of ordinary receipts and expenditure for the nine months April 1, to December 31, 1932, were as follows —

Receipts		Expenditure	
	Francs		Francs
Taxation —		Finance —	189,097,521
Direct	82,708,965	Post Office	34,244,487
Indirect	212,048,075	Local Administration	52,046,158
Monopolies —		Agriculture and Commerce	38,562,965
Tobacco	94,550,000	Education	54,275,201
Others	14,813,825	Public Works	79,092,946
Post Office, Telegraph, &c	24,924,000	Army	3,164,182
Royalties and Miscellaneous	32,170,761	Justice	9,144,140
		Miscellaneous	1,500,000
Total	461,215,126	Total	461,127,600

At the end of 1930, the Tunisian Public Debt amounted to 538,958,000 francs. The yearly charge for interest, together with sinking fund, 1,038,536*l*. In normal conditions the 1903 loan (1,000,000*l*) will be extinguished in 1968 and the rest in 1988.

Defence.—The army of occupation consists of 25,000 men, including 1,145 officers, supported by native regiments (*tirailleurs* and *spahis*), and the Foreign Legion

Production and Industry.—Tunis may be divided into five districts—the north, characterised by its mountainous formation, having large and fertile valleys (*e.g.* the valley of the Medjerdah, and the plains of Mornag, Mateur, and Beja), the north east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons, and citrus fruits, the Sahel, where olive trees abound, the centre, the region of high table lands and pastures, and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. The area of the country is divided as follows — 7,335,000 acres of tillage land, 2,500,000 acres of cork and pine forest, 110,245 acres of vineyards (the production in 1931 was 15,726,872 gallons); and 11,375,000 acres of stockland. The area of wheat in 1931 was 2,000,000 acres, the production was 283,000 tons; of barley 1,237,000 acres, and the production 180,000 tons, of oats 72,500 acres, and the production 33,000 tons. There were 16,512,861 olive trees, and the production was 34,600 tons of oil. In the south of Tunis date palms abound, there were 2,593,131 date palms, of which 1,242,198 produced 52,097,112 pounds of dates. Other products are almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna, and cork. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants.

In 1931, the farm animals were —horses, 94,744; asses, 171,182; mules, 46,993, cattle, 448,671; sheep, 1,941,863; goats, 1,169,613; camels, 148,422, pigs, 23,870

In 1930, 46 mines were worked, value of the mineral output in 1930, 264,000,000 francs. By far the greatest development has been in phosphates, the output of which is increasing yearly. Mineral output in 1931 (in metric tons) —lead, 19,112 (19,400 in 1930), zinc, 800 (1,800), iron, 447,000 (828,000), phosphate rock, 2,148,000 (8,326,000)

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting, tanning and silk weaving are declining

The fisheries are principally in the hands of Italians and Tunisians. In 1931, 3,626 boats (9,226 tons) were engaged in this industry, with a total of 13,498 men. Sardines, anchovies, allaches, tunny (8,227 tons of fish) were caught

Commerce.—The imports and exports for 4 years were as follows:—

	1928	1929	1930	1931
	Francs	Francs	Francs	Francs
Imports	1,680,175,000	1,984,455,000	2,107,455,000	1,935,562,000
Exports	1,233,352,000	1,408,443,000	1,127,233,000	890,701,000

Imports and exports in 1931 were —

Imports	Value	Exports	Value
	1,000 Francs		1,000 Francs
Textiles ¹	258,769	Grain, meal, food	350,384
Colonial produce	164,931	Marble, stone, minerals	138,228
Marble, stone, and minerals	147,933	Crude Metals	55,577
Manufactured metals	218,377	Beverages and wines	54,343
Hides	39,232	Fruits and seeds	20,541
Yarns	36,920	Live animals	19,167
Timber	29,105	Hides	18,527
Mealy foods	120,541		

¹ These goods coming chiefly from England

The share of France in the foreign trade of Tunis in 1931 was 1,136,986,000 francs for imports and 528,803,000 for exports, and that of Algeria 187,638,000 francs and 87,389,000 francs respectively.

Total trade between Tunis and the United Kingdom (according to Board of Trade returns) for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Tunis into U K.	899,939	1,289,416	1,038,455	756,972	678,215
Exports to Tunis from U K	240,190	840,405	887,827	220,069	194,111
Re exports to Tunis from U K	21,609	24,420	14,201	28,688	11,514

In the year 1931, there entered the ports of the Regency 7,910 vessels. Good roads to the length of 3,519 miles have been constructed between 1882 and 1931.

Length of railways, 1,282 miles in 1931 (469 miles broad gauge and 813 miles narrow)

There were in 1931, 3,426 miles of telegraphs, 280 telegraph offices, messages received and transmitted 1,420,918. The telephone systems had 11,665 miles of subscribers' lines and 16,549 miles of inter urban lines in 1931, the number of subscribers being 12,940. There were in 1931, 543 post offices, letters sent and received, 117,103,100, parcels received and despatched, 1,206,658. Operating receipts from the three services in 1931 were 29,075,474 francs, expenditure, 43,958,685 francs. There were 6,703 savings accounts in the Postal Savings Bank in 1931, deposits at the end of that year standing at 99,965,748 francs.

Money, Weights, and Measures.—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The ounce = 31.487 grammes, the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 ounces.

The *Kaffis* (of 16 *whibas*, each of 12 *sahs*) = 16 bushels.

The principal measure of length is the *pik*. The *pik Arabi* for linen = 5392 yd.; the *pik Turki* for silk = 7058 yd., the *pik Andoulsi* for cloth = 7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

British Consul General at Tunis—E. G. Lomas, O. B. E.

There is a Consul at Bizerta, and Vice-Consuls at Sfax and Susa, and Consular Agents at Mehdia, Monastir, Gabes, and Djerba.

FRENCH EQUATORIAL AFRICA (FRENCH CONGO).

The French Congo extends along the Atlantic coast between Cameroon and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N lat to Cameroon, and inland to the meridian of 11° 20' E of Greenwich, and the Kabinda region, which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr el Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841, Libreville was founded in 1849, Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. The boundary between French Equatorial Africa and the Anglo-Egyptian Sudan was fixed by a protocol signed on February 28, 1924.

By decree of January 15, 1910, the French Congo was divided into three circumscriptions which form three colonies, viz. — the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on March 17, 1920, made a separate colony. It extends from Lake Chad across the Eastern Sudan and includes Wadai. Capital, Fort Lamy.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa, which extends over the Gabun, the Middle Congo, the Ubangi-Shari and Chad Colonies.

The area is about 912,049 square miles, containing a population which at the 1931 census numbered 3,192,282, the Europeans numbered 3,300. The area and population of the separate colonies are shown as follows for 1931 —

Colony	Area in square miles	Men	Women	Boys	Girls	Total
Gabun	104,320	117,788	158,180	60,164	51,201	387,283
Middle Congo	172,411	191,795	250,964	119,687	99,463	661,909
Ubangi Shari	286,363	341,481	383,248	186,195	179,210	1,090,084
Chad	398,955	345,553	343,596	187,540	176,317	1,053,006
Total	912,049	906,567	1,185,988	553,586	506,191	3,192,282

The Colonies have each a Lieutenant-Governor, they all have financial and administrative autonomy, and each has an administrative council, the Lieutenant-Governors are under the Governor General of French Equatorial Africa, having his headquarters at Brazzaville, who is assisted by a Secretary-General and a Council of Government. There are a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue chiefly from customs duties, there are native poll taxes. The sale of alcohol to natives is restricted. The budgets showed the following figures. —

	1930	1931	1932
General Budget—	Francs	Francs	Francs
French Equatorial Africa	54,500,000	73,160,000	86,875,000
Local Budget—			
Gabon	16,750,000	21,530,000	17,185,000
Middle Congo	17,250,000	23,500,000	23,600,000
Ubangi Shari	14,240,000	17,000,000	17,800,000
Chad	11,000,000	16,350,000	17,048,200

In the colony there were in 1932, 67 native schools with 5,352 pupils, and 36 European teachers with 92 native assistants. There was also 2 school for European children with 50 pupils and 2 teachers. Private schools in 1932 numbered 81 with 5,864 pupils. These schools are run by the religious missions.

The resources of French Equatorial Africa are quite undeveloped. There are about 300,000 square miles of tropical forest extending to the Gabon coast, containing many species of trees of industrial value. Wild rubber is the most important. Palm oil is produced to some extent. Coffee, cacao and cotton are also cultivated. In the Chad Colony large numbers of cattle, sheep, asses, camels, horses, and ostriches are raised, but there are no facilities for export. Ivory is an important article of export. At the beginning of 1927 there were calculated to be 880,576 head of cattle in Chad. Copper, zinc, and lead are found.

Imports and exports for 1930 and 1931 were as follows —

Colony	Imports		Exports	
	1930	1931	1930	1931
	Francs	Francs	Francs	Francs
Middle Congo	191,460,286	136,112,188	17,053,459	10,261,756

There is considerable shipping at Port Gentil, Libreville and Pointe-Noire, the chief ports at which in 1929, 574 vessels of 1,821,739 tons entered and 572 vessels of 1,803,596 tons cleared. At Loango steamers must anchor about three miles off the coast. Whale fishing commenced in 1922.

On February 6, 1921, a new railway was commenced to connect Brazzaville with the Atlantic at Pointe-Noire, and was completed in 1930.

The Central African telegraph line connects Brazzaville with Pointe-Noire, the terminus of the French cable from Brest via Dakar and Libreville, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles, and also Brazzaville and Leopoldville, and a radio service with France was inaugurated in 1927. In the Chad region there are several stations connecting Fort Lamy, Ati, Faya, and Maô. A line has been laid to connect Brazzaville with Bangui, and another to connect Bangui with Fort Lamy. The total length of telegraph line in operation is about 3,253 miles.

On the north-east of Lake Chad is the state of Kanem, which was completely subjected to France in 1903, and is now only a district of the Shari.

territory with Maô for its capital Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi civilised population of about 1,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshr, which is in communication with Benghazi, on the coast of Tripoli, by caravans, and in 1913 Ain Galakka

The principal banks are Banque de l'Afrique Occidentale, Banque Commerciale Africaine and Banque Belge d'Afrique

Governor-General of Equatorial Africa —R. Antonetti (July, 1924)

MADAGASCAR.

Government.

The last native sovereign of Madagascar, Rânavalona III (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diego Suarez having been surrendered to France. A French Resident General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain, but the Native Government having refused to carry out the clauses of the treaty of 1885, a French expedition was despatched in May 1895 to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

Governor General —Leon Cayla (appointed February 10, 1930)

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, but there is an Economic and Financial Delegation, composed of 24 French citizens and 24 natives. The former are elected by the Chambers of Commerce, Industry and Agriculture and the Municipal Councils. The native members are chosen by the votes of a body of representatives itself elected by the chiefs of the villages. This delegation meets once a year for examination of the budget proposals. Four Europeans and two native members of the Council of Administration also take part in the meetings of this assembly. Madagascar is divided into 8 Regions and 4 Districts. Natives are employed to a large extent in subordinate positions both in the civil and military administration. In all parts of the island the natives are allowed to choose chiefs who represent them in their relations with the Government.

Area and Population.

Madagascar is situated to the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles, its length is 980 miles, greatest breadth, 360 miles, and it has a coast line of over 3,000 miles. The area is estimated at 241,094 square miles. According to the last census (1931) the population (including that of the Mayotte and Comoro islands) was 3,701,770 (19.9 per sq. mile), of whom 3,685,234 were Malagasy, 23,076 were French and 13,460 foreigners, including Europeans and others.

The Malagasy races or tribes are very numerous, the more important being the Hova (910,000), the Betsileo (520,000), the Betsimisaraka (438,400), the Tanala (187,300), the Sakalava (214,000), and the Bara (182,000). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova or Merina, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom intermarry.

The slave trade was nominally abolished in 1877, slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 to 60 years of age formerly 5 francs, has been increased to 10, 15, in some provinces 20, and in Antananarivo to 30 francs. The populations of the chief towns were, in 1931, the capital, Antananarivo, in the centre of the island, 92,475 (6,700 Europeans and 300 Asiatics); Tamatave, 15,022; Fianarantsoa, 12,575; Antsirabe, 8,300; Majunga, 20,000; Diégo Suarez, 12,300; Tuléar, 12,300; Mananjary, 11,000; Sainte Marie, 7,922; Nosy Bé, 12,000. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo Suarez in the north, and Tuléar in the south-west.

In 1896, Diégo Suarez (a French colony from 1885), the island of Nosy-Bé (area 130 sq. miles) on the west coast, and the island of Ste Marie on the east coast (area 64 sq. miles), and in 1914 the Comoro Islands, were placed under the authority of the Governor General of Madagascar.

Religion, Education, Justice.

Up to 1895, a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 150,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission and the Anglo-Chinese Mission), there is also a Norwegian Lutheran Mission and an American Mission. There are in the Colony 1,867 Roman Catholic churches, 3,493 Protestant (high and low), churches and 75 Mosques. The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. On January 1, 1932, there were 2,145 more than 1,000 official schools for European and native children, with 112,000 pupils and 2,000 teachers, and 600 private schools with 67,000 pupils and 1,144 teachers. Children are required to learn the French language. At Antananarivo there are a school of native medicine, an administrative and commercial school, a normal school, and a school of agriculture.

For the administration of French justice there are a *Parquet* consisting

of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts, and the natives have the right of appeal from lower to higher tribunals. There were also arbitration courts for settling labour disputes.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle, and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources. The chief branches of expenditure are general administration, public works, the post office, and the public debt. The budget estimates for the calendar year 1930 balanced at 253,000,000 francs, budget estimates for 1931 balanced at 267,600,000 francs, and those for 1932 at 267,042,150 francs.

The colony has since 1897 contracted debt to the amount of 4,200,000*l.* (principally for public work-) at the average yearly rate of interest of 3.02 per cent. The 1931 budget makes provision for debt revenue, 7,600,000 francs, and the 1932 budget for 12,700,000 francs.

Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 1,580 Europeans, and 3,720 natives. The police and militia, consisting of 3,300 natives, are maintained on the local budget.

Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified on the model of the Torrens Act of Australia. Since then, a decree issued in 1926, specifies that the French State is presumed to be the owner of any land not under cultivation, exploited nor put under registration. And in 1929 there was issued a new regulation concerning the native property and providing reserved zones for the local communities. The principal crops are rice, sugar, coffee, manioc, cotton, cacao, vanilla, tobacco, butter beans, lima beans, cloves, mulberry trees, and rubber trees. The latest statistics give the following acreage—rice, 1,392,425 acres, manioc, 682,925 acres, maize, 213,540 acres, sweet potatoes, 244,845 acres, haricot beans, 91,097 acres, potatoes, 77,207 acres, coffee, 113,537 acres, vanilla, 53,260 acres. Sericulture is encouraged. The forests contain many valuable woods, while caoutchouc, gum, resins and plants for textile, tanning, dyeing, and medicinal purposes abound.

Cattle breeding and agriculture are the chief occupations of the natives. There were on December 31, 1931, 9,000,000 cattle in the island, 3,000 horses, 255,000 sheep, 70,000 goats, 2,000 ostriches, and 500,000 pigs.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, &c., is being undertaken by Europeans, as well as the canning of meat. There are large meat preserving factories at Boanahary (Majunga), Diégo-Suarez, Tamatave, Antananarivo and Antsirabe.

The value of the total output of minerals in 1931 was 16,110,000 francs, graphite (6,287 tons) accounting for 8,842,000 francs, gold (206 kilos) for 3,091,000 francs, and mica (120 tons) for 1,698,000 francs. The pro-

duction of phosphates (800 tons) was valued at 1,600,000 francs, that of precious stones at 787,000 francs. Madagascar produces also industrial stones, corundum, radio-active minerals (betafite and euxenite) and zircon.

Commerce.

The trade of Madagascar has been as follows in five years —

	1927	1928	1929	1930	1931
	Francs	Francs	Francs	Francs	Francs
Imports	579,800,066	688,561,341	807,354,929	602,782,842	507,322,279
Exports	375,035,956	483,596,585	439,578,455	369,668,899	361,349,497

The chief articles of import and export in 1930 and 1931 were the following —

Imports	1930	1931	Exports	1930	1931
	1,000 francs	1,000 francs		1,000 francs	1,000 francs
Cottons	72,529	75,689	Graphite	12,910	8,802
Machinery	9,600	6,361	Mica	8,761	1,698
Iron and steel	21,587	15,159	Raffia fibre	25,600	31,672
Cement	27,123	16,821	Rice	6,374	5,162
Fuel oil	24,090	13,745	Tapioca	2,669	5,477
Flour	11,424	5,016	Coffee	33,348	70,093
Coal	6,251	4,102	Manioc	8,410	13,020
Clothing	13,151	14,981	Hides	31,441	24,604
Boots and shoes	8,046	7,676	Sugar	7,591	9,391
Automobiles	7,306	4,467	Animal wax	7,011	3,879

France supplies the bulk of the imports (378,136,962 francs in 1931), and that country also receives the bulk of the exports (291,579,633 francs in 1931).

According to Board of Trade returns, the imports from Madagascar into Great Britain in 1931 amounted to 337,361 $\frac{1}{2}$, and in 1932 to 292,681 $\frac{1}{2}$, and the exports from Great Britain amounted to 58,894 $\frac{1}{2}$ in 1931 and 55,540 $\frac{1}{2}$ in 1932. Re-exports to Madagascar from U K were 965 $\frac{1}{2}$ in 1931, and 566 $\frac{1}{2}$ in 1932.

Shipping and Communications

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by coasting steamers plying regularly. In 1931, 7,561 vessels of 3,312,823 tons entered and 7,629 vessels of 3,319,566 tons cleared at the ports of Madagascar. Of the total vessels entering, 5,527 were French and 1,680 were British; and of those clearing, 5,557 were French and 1,723 British.

At the end of 1926, there were 1,800 miles of roads. Three railways are at present worked in Madagascar. The first is the through railway line between Antananarivo and Tamatave (229 miles) which was opened for traffic on March 9, 1913, and soon to be electrified. The second is the railway between Antananarivo and Antsirabe (noted for its thermal springs), 98 miles south of Antananarivo, opened for traffic on October 15, 1923. The third is the branch line of the Tamatave railway, from Moramanga to the Antsahanaka Districts, towards the north of the island, which was opened for traffic in October, 1917, a distance of 103 miles. Total railway mileage (including narrow-gauge local lines) on December 31, 1927, 430 miles. A

new line from Fianarantsoa to the east coast of the island (105 miles) is being constructed. This will be electrified. There is also a motor-car service with a network of routes covering more than 800 miles.

There is postal communication throughout the island. There were in 1931, 185 ordinary post offices and 500 rural offices. The telegraph line has (1931) a length of 9,207 miles. There is cable communication to Mozambique, Mauritius, Réunion, and Aden. In 1931 there were 1,490 miles of urban and inter urban telephone line, and eleven Government wireless telegraph stations. The important wireless station at Antananarivo, forming part of the French inter-colonial network of wireless stations, was opened towards the end of 1924.

Money and Banks

By the decree of 22 December, 1925, a Bank of Issue was established—the Bank of Madagascar, with a capital of 200 million francs. The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diégo-Suarez, Mananjary, Majunga and Iulear. The Credit Foncier de Madagascar and La Banque de l'Océan Indien are also established in the island. On January 1, 1920, a Savings Bank was established.

The monetary system is the same as that of France, and all coins and notes which are legal tender in France are also legal tender in the Colony. The Bank of Madagascar issues notes which are legal tender in the islands and its dependencies.

MAYOTTE AND THE COMORO ISLANDS

The archipelago of the Comoro Islands is formed by the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, Anjouan, Moheli and Grande Comore were only under French protection, Mayotte alone being a colony. But by a law of July 25, 1912, and a decree of February 23, 1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a Region under the command of a Lieutenant Governor.

In 1931, the combined population was 130,253, including 501 Europeans.

The island of Mayotte (140 square miles) had a population (1931) of 12,690. There is an increasing emigration to Zanzibar and Madagascar. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar-cane. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grande Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1931 of 109,563. Grande Comore itself is about 40 miles long and 18 miles at its broadest points. Vanilla, cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The principal imports are cotton fabrics, metals, and rice, the principal exports, hides, sugar, copra, sisal, and vanilla.

The other dependencies surrounding Madagascar are the islands Europa, Juan de Nova, Barren, Bassas da India, Glorieuses. Then half way between Cape of Good-Hope and Australia lie Amsterdam and St. Paul, also the archipelago of Kerguelen, whaling and fishing stations, and near the Antarctic pole Crozet islands and Ferre Adelle. Amsterdam, St. Paul, Kerguelen, Crozet and Ferre Adelle were made dependencies of Madagascar by decrees of March 26 and November 27, 1924.

Consular and other Representatives.

OF GREAT BRITAIN IN MADAGASCAR

Consul at Antananarivo —J. Helm Smith

There is also a Vice Consul at Majunga and at Tamatave

RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and population (1931) of 197,933, of whom 194,272 were French, there were also 196 British Indians, 921 natives of Madagascar, 302 Africans, 2,242 Chinese. The chief towns are St Denis, with 26,807 inhabitants in 1931, St. Pierre, 22,048, St Paul, 22,679, St Louis, 17,237. The towns are under the French municipal law. Réunion has a lycée with (1932) 25 teachers and 560 pupils. Primary education is given at St Denis in two schools, one for boys with 722 pupils and 14 teachers, and one for girls with 815 pupils and 20 teachers. There are besides three infant schools under State supervision, and three private establishments. In the rest of the island, primary education is given in 175 schools by 381 teachers, and in 31 private schools. The number of pupils attending school in the island is (1932) 23,579. There is a teachers training course at the lycée attended by 45 pupils with 2 teachers. The chief port, Pointe-des Galets, is connected by a coast railway of 80 miles with St Benoît on the one hand, and St Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar (62,000 acres), rum, manioc (12,000 acres), tapioca, vanilla, essences. The forests occupy about 150,000 acres. The production of spirits (expressed as 100 per cent alcohol) in 1931 amounted to 764,209 litres (168,126 gallons) in industrial distilleries and 3,460,875 litres (761,892 gallons) in other works. The sugar production in 1931-32 was 42,921 metric tons. The chief imports are rice (valued at 22,051,798 francs in 1931), grain, cotton goods (11,205,673 francs in 1931), &c., the chief exports are sugar (51,883 metric tons valued at 72,461,032 francs in 1931), and spirits (4,847,926 litres valued at 29,797,979 francs in 1931). Total value of imports in 1931, 160,185,366 francs, of exports, 121,605,870 francs. In 1931, 154 vessels entered and cleared at the ports of the island. There are about 80 miles of railway. The Tamatave Réunion-Mauritius Telegraph Cable is open for traffic. The wireless station is also open for public traffic. During the year 1931, there were 164,741 telephone conversations and 78,871 telegraph communications. There are 61 post offices and 677 central telephone offices. The budget for 1931 showed 57,375,928 francs for receipts and expenditure. The currency of Réunion consists of local bank notes and token nickel coinage. It has nominally the same value as that of France. The Bank of Réunion has a capital of 6 million francs.

FRENCH SOMALILAND

The colony of the Somali Coast lies between the Italian Colony of Eritrea and British Somaliland. On the north it is bounded by Cape Doumeirah, which separates it from the Italian possessions, on the south by a line drawn from the wells of Hadou to Guedessa, which separates it from the British possessions, the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. It is administered by a Governor, assisted by an Administrative Council. The port of Obok was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1884, Sagallo and Tajurah were ceded to France; in 1885, Ambado, in 1888 the territory was delimited by agreement with Great Britain, in 1888, a port was created at Djibouti, now the seat of government. The territory has an area of about 8,880 square miles, and the native population was estimated in 1931 at 68,965, made up as follows: Somali, 46,687, Arabs, 2,992; Danakils, 18,552, Jews, 78, Abyssinians, 157, Hindus, 499. Djibouti has (1931) 11,366 inhabitants, of whom 628 are European (356 French).

There are two schools for elementary education, one public and the other private. The local budget for 1931 balanced at 14,171,374 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The mineral wealth of the country is imperfectly known. Salt has been mined since 1912, in 1931, 22,000 metric tons were exported, other minerals supposed to exist are gypsum, mica, amethyst, sulphur and petrol. The chief imports are cotton goods, butter, coal, sugar, the chief exports were coffee, ivory, hides and skins. The total imports in 1931 amounted to 220,006,000 francs, and the total exports to 189,911,000 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by railway from Djibouti to Addis Ababa (485 miles). In 1931 there entered at Djibouti 546 steam merchant vessels of 2,053,600 tons. Of these vessels, 226 were French, 173 English, 50 Italian, 2 Dutch, 10 Norwegian, 80 German, 3 Swedish, 1 American, and 1 Belgian.

FRENCH WEST AFRICA AND THE SAHARA.

French West Africa comprises the following colonies — (1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) French Sudan, (6) Mauritania, (7) Niger, and (8) Circonscription of Dakar and Dependencies.

The approximate area and population of French West Africa in 1931 are shown as follows —

Colony	Area (in Square Miles)	Population 1931			Total	Population per sq mile
		Europeans		Native Races		
		French	Foreign			
Senegal	77,750	2,649	2,448	1,579,176	1,584,273	20.3
Guinea	96,852	1,183	1,143	2,234,692	2,236,968	23.0
Ivory Coast	125,067	2,050	814	1,863,452	1,866,316	14.9
Dahomey	47,142	873	93	1,111,034	1,112,000	23.5
French Sudan	561,303	1,567	436	2,853,655	2,855,658	5.0
Upper Volta	113,185	610	58	2,909,580	3,000,243	26.4
Mauritania	322,835	206	115	323,498	323,819	1.0
Niger	455,405	323	16	1,542,375	1,542,714	3.3
Dakar and Dependencies	—	4,989	1,570	47,423	53,982	—
Total	1,799,030	14,400	6,688	14,554,885	14,575,973	—

By decree of September 5, 1932, which came into force on January 1, 1933, Upper Volta ceased to be a colony, its territory and population were distributed as follows to Niger, 27,290 square miles and 268,239 inhabitants, to French Sudan, 20,226 square miles and 713,167 inhabitants, and to Ivory Coast, 59,212 square miles and 2,018,837 inhabitants.

Of the French population, 7,207 were men, 2,578 women, and 1,314 children, while of the foreign population, 2,466 were men, 939 women, and 895 children.

The principal tribes are the Onolofs in Senegal (about 603,000, mostly Moslems), Bambaras and Mandingos in the Sudan (about 1,200,000), Peuhls Faubés in the Sudan, Upper Volta, Niger and Guinea (about 2,000,000), the Mossi in the Upper Volta (about 1,300,000), and the Kroumen on the Ivory Coast.

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments in 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards, the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbata on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

Over the whole of French West Africa there is a Governor General, who is assisted by a Council, the seat of the general government being at Dakar. The Colonies are each under a Lieutenant Governor, the Circonscription of Dakar and Dependencies under a Governor of Colonies, all subject to the direction of the Governor General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, particularly public works and social services, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have however, been relieved of the cost of all the general services.

There were in 1930-31, 310 preparatory schools with 27,522 pupils (2,369 girls), 170 elementary schools with 11,479 pupils (1,039 girls), 88 urban schools with 4,158 pupils (754 girls), 8 higher primary schools with 974 pupils (5 girls), 10 technical schools with 910 pupils. There were besides 195 evening schools for adults with 9,089 pupils, 9 orphan schools with 171 boys and 156 girls, and 2 'medersas' or Mussulman schools with 145 pupils, also 2 Lycées with 450 pupils. There were 76 private schools with 4,549 boys and 3,120 girls. The expenditure on education was 26,000,000 francs.

The following are the financial estimates for 1932 :—

	General Budget	Local Budgets	Supplementary Budgets	Total
	francs	francs	francs	francs
Revenue	185,538,000	477,856,357	148,076,225	811,470,582
Expenditure	185,538,000	477,856,357	148,076,225	811,470,582

The general budget for 1933 balanced at 179,728,000 francs

The military forces in 1932 consisted of 17,400 men, of whom 2,720 were Europeans. In 1931-32 there were 10,600 recruits. The police force numbers 7,620.

The principal agricultural products are ground nuts (510,232 tons in 1931), cocoa (19,212 tons in 1931), and cotton (4,842 tons in 1931).

The imports into French West Africa are mostly food substances, textiles, mechanical implements, and beverages, the exports from these colonies are chiefly fruits, oils and oil seeds, as well as rubber, cotton, cocoa and timber.

The following is a comparative table of values of the imports and exports during 1930 and 1931 for each of the colonies —

Colonies	Imports		Exports	
	1930	1931	1930	1931
	frances	frances	frances	frances
Senegal	796 098,022	860 487,797	599,235,562	371 969 169
French Guinea	97 883,273	63 354 846	58,265,171	48 928,918
Ivory Coast	251,369,460	131,633,571	253 106,585	183,426,157
Dahomey	154,581 471	102 814,726	124,9 1,200	67,605 542
French Sudan ¹	58 810,546	23 271,794	2 877,194	5,507,875
Upper Volta ¹	5 480 604	3,702 487	15,867,802	12,918,721
Niger ¹	21,078 220	21,850,800	41,734 750	10,362,480
Mauritania ¹	1,188,167	1,243,370	1,520 210	1,354,113
Total	1,3 6 484 763	707,855,471	1 097,589,474	651,272,975

¹ A good deal of the trade of these Colonies passes through the ports of the remaining Colonies of French West Africa and is included in local trade returns.

Of the imports, 388,209 645 frances in 1931 and 700,860,291 frances in 1930 were from France, of the exports, 399,357,133 frances in 1931 and 639,140,949 frances in 1930 went to France.

Total trade between Great Britain and French West Africa ¹, according to Board of Trade Returns for three years, was as follows —

	1930	1931	1932
	£	£	£
Imports from French West Africa into U K	678,543	519,315	222,571
Exports to French West Africa from U K	1,737,911	783,690	1,140,472
Re exports to French West Africa from U K	116,215	52,273	51,074

¹ Including French Equatorial Africa

In 1931, 10,371 vessels of 9,677,461 tons entered and cleared the ports of French West Africa.

There were (January 1, 1932) 2,126 miles of railway in operation and 606 miles under construction, 25,300 miles of telegraph. In 1932 there were 239 post offices, divided as follows — Senegal, 51, French Sudan, 41; Guinea, 84, Ivory Coast, 31, Dahomey, 26, Mauritania, 14, Upper Volta, 20, and Niger, 22.

A savings bank was established by a decree of July 22, 1920, and began to function on October 1, 1922, with a single office at Dakar. There are now 4 branch offices at Saint-Louis, Conakry, Porto-Novo, and Niamey. On January 1, 1932, there were 12,557 depositors with 23,779,253 francs to their credit. The Banque de l'Afrique Occidentale Française has the exclusive right to issue notes. It has branches at Dakar, St. Louis, Rufisque, Bamako, Grand-Bassam, Porto Novo, Lome and Kaolack. Its capital is 35,000,000 francs. The Banque Française de l'Afrique and the Banque Commerciale

Africaine are important banking institutions in French West Africa. The use of French weights and measures, and money, is compulsory throughout French West Africa

Governor-General of French West Africa—M J Brévié Appointed 1930

The colony of Senegal was reorganised by the law of December 4, 1920, and March 30, 1925. The capital is St Louis, an old town founded in 1658 (population, 1931, 29,608, Europeans, 901). The other important towns are Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 1931, 53,982, European, 6,559), Rufisque (population, 1931, 14,623, European, 512), Kaolack (14,141) Diourbel (15,402), Thiès (11,016). By a decree of December 1924, Dakar and its suburbs were formed into a special territory called *circonscription de Dakar et Dependances*. Goree, a small island situated in front of Dakar (population, 998), was amalgamated with Dakar in April 1929. There are three municipal communes governed by a mayor and corporation, St Louis, Dakar and Rufisque.

The total area is 74,112 square miles, and the total population in 1931 was put at 1,584,273. The natives of the four towns and their descendants are French citizens, and other natives are French subjects.

The Colony is represented in the French Parliament by a deputy.

The Colony is administered by a Lieutenant Governor, assisted by a Colonial Council of 44 members, 26 elected by French citizens and 18 by representatives of native chiefs of cantons and provinces. The Colony is divided into 15 'circles,' each under the rule of an administrator. The local budget for 1932 was 121,627,700 francs.

For primary education there were in 1931, 56 preparatory schools, 24 elementary schools and 13 regional schools. There were also 4 urban schools at St. Louis and 2 at Rufisque, which give the same instruction as the French primary schools, modified to suit local requirements. At Dakar there are grouped superior technical schools common to all the colonies, a normal school for teachers, a professional school, a commercial and administrative school, a school of medicine. At St Louis a superior primary school has 225 pupils. Secondary education is provided at Dakar and at St Louis (320 pupils in 1931). In 1931, 2,200,000 francs were provided for secondary education. There is a large hospital for natives at Dakar, and for Europeans and natives at St Louis.

The soil is generally sandy. In 1931, there were 840,000 sheep and goats, 491,000 cattle, 70,000 asses, and 47,000 horses. The natives cultivate ground-nuts (production, 1931, 453,841 tons), millet, maize, and some rice, other products are castor beans, some coco nuts, gum from Mauritania, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed. Native industries comprise weaving, pottery, brick making and jewellery.

Imports in 1931, 376,081,000 francs, exports, 371,675,000 francs. The chief imports are cottons, foodstuffs, metal work, and coal. The chief exports in 1931 were ground-nuts (453,841 tons), turtles, hides and skins, ground-nut oil (2,078 tons), gums (5,929 tons).

In 1930 the colony possessed 1,653 miles of telegraph and 1,625 miles of telephone lines. There are 2 French submarine cables, Brest-Dakar and Brest-Casablanca-Dakar. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles), another one Thiès, Kayes and Bamako (French Sudan), 450 miles.

There is a river service on the Senegal from St Louis to Podos (140 miles) open throughout the year. During the rainy season there is a service from Dakar to Kayes (484 miles). The Senegal river is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 6 French lines, and with Liverpool by a British line. La Banque de l'Afrique Occidentale (established June 29, 1901 and reorganised by a law of January 29, 1929), with a capital of 35,000,000 francs, and reserve funds 17,500,000 francs, was founded for the purpose of carrying on financial, industrial, or commercial operations. It has a branch at Dakar, and agencies at St Louis, Rufisque, and Kaolack. La Banque Belge d'Afrique has an agency at Dakar. The Banque Commerciale Africaine has agencies at Dakar, Rufisque and Kaolack.

H B M's Consul-General at Dakar (for French Western Africa, including the Sudan) — R C F Maugham

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends inland so as to include the territories of Koumbia, Siguiri, Kouroussa, Kankan, Kissidougou, Dabola, Beyla, Macenta, Boffa, Boké, Conakry, Forécariah, Kindia, Labe, Mamou, Pita, Gueckédou, and N'zerékoré. The area is about 89,436 square miles, and the population (1931) was 2,236,968, including 2,270 Europeans (1,133 French). A regular system of Government lay schools has recently been introduced all over French West Africa. The principal products are palm oil and nuts, rubber, millet, earth-nuts, rice, gum, bananas, pineapples, and coffee, which is grown in the Rio Nunez Fouta and military regions. There is an experimental garden at Camayenne near Conakry (the capital), where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Fouta Djallon contains cattle in abundance. In 1930 there were 615,000 cattle, 157,000 sheep, 235,000 goats, 2,628 horses, and 153 asses. Gold is found in the river Tinkisso and in the Bouré and Siecké districts. Imports in 1931, 61,374,915 francs, exports, 48,949,487 francs. The principal exports in 1931 were rubber, 842,549 francs, cattle, 1,904,882 francs, ground-nuts, 1,088,634 francs, hides, 5,537,462 francs, bananas, 11,642,130 francs; and palm kernels, 7,130,585 francs, animal wax, 2,344,279 francs, palm oil, 827,674 francs. The principal imports in 1931 were cotton fabrics, 13,843,843 francs, metal goods, 13,257,864 francs, petrol, 1,782,407 francs, wines, 2,310,971 francs, salt, 514,981 francs. A network of roads is being made to connect with the railway station from Conakry to the Niger. The French Guinea railway which runs from Conakry on the coast to the Milo at Kankan (664 kilometres long) was opened in January, 1911, and in August, 1914, was continued to Kankan (412 miles from Conakry). The jetty 1,066 feet long, at Conakry has been completed. In the colony there were (1930) 2,886 miles of telegraph line. The Colony is connected by cable with France and Pernambuco, also with Freetown, Monrovia, and Grand Bassam. There is a wireless station at Conakry affording communication with Dakar (Senegal), Bamako (French Sudan) and Grand Bassam (Ivory Coast). Conakry is visited regularly by the steamers of four French companies and one English company. The budget of the colony provided for 1931 the sum of 55,840,530 francs.

The **Ivory Coast** lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea, and French Sudan. France asserted and obtained rights on the coast about 1842, but did not

actively and continuously occupy the territory till 1882. On January 1, 1933, a portion of Upper Volta was added to the Ivory Coast. Area about 180,802 square miles; population (1931 census), 1,865,778; Europeans, 2,864, total (1933), 3,743,382. The seat of administration, shortly to be transferred to Abidjan, is Bingerville, the capital, formerly called Adjamé (population 1,358, European 111). There is a central school group at Bingerville, and a number of Government schools in the districts. The chief ports, in respect of population and commerce, are Grand-Bassam (population 7,276), Assinie, Grand Lahou (4,187), Sassandra, and Tabou. The chief centres in the interior are Abidjan (9,773 inhabitants, including 1,045 Europeans), Dimbokro, Bouaké, Aboisso, Bondoukou, Agboville, Man, and Korhogo. The natives cultivate maize, rice, plantains, pineapples, and many other fruits. They have also been taught to grow cocoa, the export of which increased from an average of 4 tons in 1904–1908 to 9,808 tons in 1927, 16,318 tons in 1929, and 23,239 tons in 1930. The cultivation of cotton is being developed. Coco nuts and rubber are collected. The mahogany forests inland are worked. Gold is found near Grand Bassam in Baoule, on the Comoe and Bia Rivers, and in Indenié. Manganese deposits have also been located. The imports in 1931 amounted to 131,633,371 francs, and the exports to 133,326,157 francs. Chief imports in 1931 were: tissues, 21,591,161 francs, petrol, 7,963,094 francs, wines, 4,748,184 francs, metal work, 30,249,692 francs. Chief exports were: palm kernels, 6,278,470 francs, palm oil, 5,423,409 francs, cacao, 64,973,438 francs, coffee, 3,944,780 francs, cabinet woods, 32,877,500 francs, cotton, 9,112,656 francs. The ports of the Colony are visited by liners of several French, English, Dutch, German, American, and Italian shipping companies. Number of vessels entered in 1931, 1,026 of 3,818,084 tons, and cleared 1,028 vessels, of 3,323,295 tons. A new wharf at Port-Bouet was opened in 1930. From Abidjan, on the north side of the lagoon, a railway has been constructed, running between Abidjan and Niangoloko (403 miles). Contracts have now been made to lengthen this to the north, to the Niger and Upper Volta. There is a large network of roads suitable for motor traffic, total length about 3,442 miles. At the end of 1930, there were 2,658 miles of telegraphic and 395 miles of telephonic lines. The telegraph connects the principal towns and extends to adjoining colonies. Telephonic communication exists between Bassam, Bingerville, Abidjan, Aboisso, Assinie, and Dabou. There are five wireless stations in the colony. The budget of the colony for 1931 has been fixed at 111,648,600 francs.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and is bounded on the north-east by the river Niger and on the north and north-west by the colony of the Upper Volta, northwards to the French Military Territories. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area is about 41,302 square miles, and the population, according to the latest census of 1931, 1,184,247, including 1,047 Europeans. The seat of government is Porto Novo (the chief business centre), which has about 23,614 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. In 1931, 2,709,572 francs were spent on education. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and

potatoes. In 1929, there were 2,314 horses, 500 asses, 92,095 cattle, 211,950 sheep, 249,798 goats, and 131,569 pigs. The forests contain oil palms, which have been profitably utilised. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces. Imports in 1931, 101,505,113 francs, exports, 67,817,580 francs. The principal exports (1931), were palm kernels, 37,291,988 francs, palm oil, 21,007,253 francs, and cotton 4,930,056 francs. The principal imports in 1931 were, cotton goods 10,877,874 francs, metal goods, 10,561,943 francs, iron, steel and general hardware, 13,254,988.

A new metalled road, called the East Road (297 miles in length), for motor traffic runs from Savé to the Niger. There is also a road from Darsa Zoume to Porga (281 miles). Other roads are Kotonu to Malouville (485 miles), Kotonu to Anecho (68 miles), Abomey to Keton (75 miles). There are now altogether more than 2,711 miles of carriage road, of which 495 miles are first class roads. At Kotonu an iron pier has been erected, and from that port a railway runs into the interior to Savé (162 miles) with a branch line to Whydah and Segborué on Lake Ahémé (36 miles). The line is intended to run to Chaou (400 miles). The gauge is a metre. A metre gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. A new railway linking the Capital with the port of Kotonu was opened to traffic on June 1, 1930 (22 miles). A telegraph line connects Kotonu with Abomey, Togoland, the Niger, and Senegal. In the colony there were (in 1929) 1,725 miles of telegraph line, and 500 miles of telephone line. In 1931, 434 vessels entered and 434 cleared the ports of Dahomey. French coins only are in circulation. The local budget for 1931 was 57,430,000 francs.

The Colony of French Sudan was formed in 1904, from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal. Its old name of Upper Senegal Niger was changed to French Sudan by decree of December 4, 1920. On January 1, 1933, a portion of Upper Volta was added to it.

The Colony is bounded on the north by the Algerian sphere, on the west by Mauritania, the Faldé river, and the frontier of French Guinea, on the south by the frontier of the Ivory Coast, and on the east by the Colony of the Niger. The area is 380,557 square miles, with a population of about 3,568,825 in 1933.

The whole of the French Sudan is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the Colony for 1931 provided for 78,346,000 francs.

The following are the most important towns in the French Sudan with population in 1931 shown in parentheses: Bamako, the capital (19,952), Segou (8,284), Kayes (12,333), Djeuné (5,994), Timbuktu (5,677), Goundam (5,945), Niolo (3,481), Sikasso (9,151), San (3,481), Mosti (4,642), Kita (3,700), Gao (3,653). All the principal towns have regional or urban schools. Bamako has a professional school, a junior high school and a veterinary school; there is a Mussulman superior school at Timbuktu with 110 pupils, called a *médersa* (official).

The natives cultivate ground nuts, millet, maize, rice, cotton, sesame; other products are rubber and karité. Large stocks of cattle abound in the colony. Three European concerns cultivate sisal.

Native industries comprise pottery, brick making, jewellery, weaving, leather-making. Chief imports are cottons, food-stuffs, automobiles, petrol,

918 FRANCE.—MANDATED TERRITORIES IN AFRICA

building material, sugar, salt, beer, total in 1931, 25,768,267 francs
Chief exports are ground-nuts, cattle, gum, kopak, skins, cotton, wool, sisal, kariti and wax, total in 1931, 28,511,069 francs

There is a very complete system of telegraphs throughout the Colony from Kayes to Niamey, Zinder, and Lake Tchad

Since the completion of the section from Thiès to Kayes (January 1924), French Sudan is connected with the coast by a railway 760 miles in length, stretching from Dakar to Koulikoro by way of Thiès, Kayes and Bamako For about seven months in the year small steamboats perform the service from Koulikoro to Timbuktu, and from Bamako to Kouroussa

Wireless telegraph connects Kabara, Kidal and Bamako with the Eiffel Tower in Paris, and with Dakar, Rufisque, Conakry, Abidjan, Kotonu, Brazzaville

Mauritania, formed into a Protectorate in May, 1903, converted into a special 'Civilian Territory' in October, 1904, became a Colony on January 1, 1921, with a Lieutenant Governor at its head It consists of the districts of Trarza, Brakna, Gorgol, Assaba, Guidimaka, Adrar, Levrier Bay, and Tagant, with a total area of 347,400 square miles The native population (census, July, 1931) numbers 322,409, mostly Moorish Mussulmans, European population, 328 The northern limit of the Colony is approximate, and the foregoing area is obtained by taking the latitude 23° 3' N as the northern boundary

The budget of the Colony for 1931 was 18,500,000 francs

The Colony of the Niger was formed by a decree of October 13, 1922 On January 1, 1933, a portion of Upper Volta was added to it Estimated area, 490,490 square miles, population (1933), 1,758,392 The country is composed of a zone in the north, which is largely desolate country, a central strip which is wooded, and the southern zone, richly wooded and abounding in cattle By a decree dated December 28, 1926, the circle of Say and part of the circle of Dori were transferred from the Colony of Upper Volta to the Colony of the Niger On January 1, 1932, there were, including the new territories, 70,101 horses, 877,911 oxen, 2,694,129 sheep and goats, 182,832 asses, 40,940 camels In the southern zone rice, cotton, wheat, tobacco, maize, barley and indigo can be produced In 1932 the chief agricultural products were, millet (530,000 tons) earth-nuts (13,600 tons), manioc (35,000 tons), dates (600 tons), cotton, (790 tons), and beans (97,235 tons) The whole colony lacks water, with the exception of (1) the western districts which are watered by the Niger and its tributaries, (2) part of the southern zone where there are a number of wells, (3) the extreme south east touching Lake Tchad Local budget in 1932, 24,906,100 francs. Niamey is the capital

MANDATED TERRITORIES IN AFRICA TOGO AND CAMEROON.

Togo—Togo, the former German Colony, lies between the Gold Coast Colony on the west and French Dahomey on the east. It was surrendered unconditionally by the Germans to British and French forces in August, 1914, and is now divided between the French and British. The Mandate was approved by the League of Nations on July 20, 1922 Of the total area of 38,700 square miles, the French have obtained about two thirds, 21,893 square miles, the boundary running from the north east in a generally south east

and south direction to Lomé, in such a manner that no part of the coast is included in the British sphere. Lomé (population in 1932, 10,424 natives and 384 Europeans) is the seat of the administration. The total population of the whole of Togo in 1932 was 749,419 natives and 646 Europeans.

The southern half of Togoland is peopled by natives using 30 different languages, of which the principal is Ewe—these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking in all 16 languages, of which Dagomba and Tim are the most important. The majority of the natives are pagans, but many profess Mohammedanism, while Christianity has, latterly, been making some progress in the coast districts. In 1932, 47,000 natives had adopted the Roman Catholic, and 13,500 the Protestant faith.

In 1932, there was 1 high school at Lomé with 34 pupils, 2 boarding-schools (32 pupils), 1 professional school at Sokodé (45 pupils), 1 normal school at Lomé (13 pupils), 6 district schools (1,600 native pupils), 23 village schools (960 pupils), 7 adult courses (300 students), 2 domestic science schools (380 pupils). Total number of teachers, 16 European and 92 natives. In 1932, 2,253,200 francs were voted towards public education.

Inland the country is hilly, rising to 3,600 feet, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with cultivable land. Maize, yams, cassava, plantains, ground-nuts, etc., are cultivated by the natives, oil palms, caoutchouc, and dyewoods grow in the forests, but the main commerce is the barter trade for palm oil, palm kernels, coco, rubber and copra carried on with the European factories. There are considerable plantations of oil and coco palms, coffee, coco, kola, and assada. During recent years the natives have been increasingly engaged in the cultivation of cocoa and cotton. Production of cotton amounted to 2,044 metric tons in 1929, 1,909 metric tons in 1930, and 1,419 metric tons in 1931. Production of cocoa amounted to 5,449 metric tons in 1929, 6,166 metric tons in 1930, and 7,679 metric tons in 1931. Other products in 1931 were, palm oil, 1,479 metric tons, palm kernels, 7,953 metric tons. In the Sokodé and Sansane-Mangu districts in the French sphere there are about 65,000 head of cattle, in some districts horses of small size are bred. Native industries are weaving, pottery, smith-work, straw-plaiting, wood cutting, etc. There is no mining by Europeans, but the natives in the Sokodé and Klouto districts smelt iron, in which this Colony is very rich. For 1931, imports amounted to 28,052,938 kilograms, valued at 69,850,928 francs, and exports to 24,967,045 kilograms, valued at 48,585,547 francs. The principal exports were, palm kernels, 7,008,454 francs, cocoa, 22,671,079 francs; ginned cotton, 8,992,453 francs, copra, 2,303,815 francs, dried fish, 2,747,240 francs. The local budget for 1932 balanced at 34,800,000 francs. There was also a railway budget, 16,667,000 francs; and a budget for public health and native medical services, 5,885,000 francs.

There are good roads, connecting the more important centres of the Colony. There are three railways connecting Lomé with Aneho (Little Popo) (27 miles), with Palime (74 miles), and with Atakpame (108 miles). Total, 204 miles, with 5 stations and sub-stations. There are 13 post and telegraph stations and 4 sub-stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

The port of Lomé has a wharf with a capacity of 600 tons of traffic daily. At Aneho the embarkation is made by means of surf boats. In 1931, 397 vessels cleared at the two ports.

Cameroon—The former German Colony of Kamerun, including the area of French Equatorial Africa ceded by France to Germany, was occupied

by French and British troops in 1916. The greater portion of the territory has been placed under French administration, and a strip on the southern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. Population in 1928 was 1,900,000, of whom 653,479 were men, 687,435 women, and 559,086 children. The Europeans numbered 2,009, of whom 1,634 were French. The portion of Cameroon placed under the Mandate of France by the Treaty of Versailles has, by a decree of March 23, 1921, been constituted an autonomous territory both administratively and financially. The seat of government is Yaoundé. In 1930, there were 89 government schools, of which 1 was a high school at Yaoundé, 70 village schools, 12 professional schools with 350 pupils, and 6 schools for domestic training (157 pupils), with a total attendance of 6,244. There were 34 European teachers and 110 Native teachers. There are also 51 private schools with 7,059 pupils. The budget (1931) provided for 1,872,454 francs for public education. General budget for 1931 balances at 83,261,900 francs, special railway budget, 28,560,000 francs, special medical budget, 15,917,149 francs. Chief products are ground-nuts, palm oil, almonds, hides, timber, cacao and ivory. In 1931, there were 19,277 horses, 12,490 asses, 319,395 sheep and goats, and 48,529 pigs. Imports in 1931 amounted to 104,368,000 francs, and exports to 82,133,000 francs. In 1931, 436 vessels entered at the port of Douala and 106 at Kribi. The country has 2,777 miles of roads, and 292 miles of railway.

AMERICA

GUADELOUPE AND DEPENDENCIES

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper, the principal town of which is Basse Terre, the capital of the colony, and that to the east Grande Terre, they have a united area of 1,380 square kilometres (532 square miles), and a circumference of 275 miles. There are five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Desirade, St Barthelemy, and St Martin, the total area with these is 688 square miles. The colony is under a Governor and an elected council, and is represented by a senator and two deputies. Population (1932) 267,407. Instruction (1931-32) is given in 1 *lycée* at Pointe-à-Pitre, with 495 pupils, a junior school at Basse Terre with 80 pupils, and a secondary course for girls at Pointe à Pitre, with 360 pupils, and 129 public and private elementary schools. The public elementary schools have 420 teachers and 18,820 pupils, and the private have 1,308 pupils. The seat of government is Basse Terre (9,268 inhabitants). Pointe-à-Pitre (30,465 inhabitants) has a fine harbour. Revenue and expenditure balanced at 66,220,864 francs for 1932. Outstanding debt, December 31, 1932, 3,812,282 francs.

Chief products are sugar, bananas, coffee, cocoa, and rum. For local consumption there are grown sweet potatoes, manioc, tobacco, indian corn, and vegetables.

In 1931, the imports were 231,313,100 francs. The principal exports in 1931 were sugar, 17,301 tons, coffee, 495 tons, rum, 115,618 hectolitres, cacao, 154 tons, vanilla, 1,100 kilogrammes, bananas, 4,290 tons. Guadeloupe is in direct communication with France by means of two steam navigation companies. A new wireless station at Destrellan was opened in 1918. Within the islands traffic is carried on by means of roads, of which there were 344 miles in 1931. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 6,122,090 francs, advances loans chiefly for agricultural purposes. The Royal Bank of Canada has also established a branch. There is likewise another bank, the Crédit Guadeloupéen, but this is a private institution, the Banque de la Guadeloupe is the official banking institution of the colony, enjoying the privilege of issuing bank notes. Silver coin has disappeared from circulation, nickel treasury tokens (*bons*) of 1 franc and of 50, 25, 10 and 5 centimes are authorised up to total emission of 1,000,000 francs.

British Consul at Guadeloupe.—J. E. Devaux.

GUIANA.

The colony of French Guiana, on the north east coast of South America, is administered by a Governor, assisted by a Privy Council of 7 members. The colony has a Council-General of 11 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 84,740 square miles, and population, census of 1931, 22,169. Cayenne, the chief town, has a population of 10,741, and the other 14 communes have 11,425. These figures are exclusive of the population of the penal settlement of Maroni, of the floating population of miners without any fixed abode, as also officials, troops, and native tribes. At Cayenne there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. The military force consists of 310 officers and men of the Colonial Infantry. Primary education is given gratuitously since 1889 in lay schools for the two sexes in the communes and many villages. There is also (1930-31) a college for secondary (85 pupils) and higher primary education (47 students), and a normal course for teachers (15 students). There are also several Congregational schools (473 pupils) and a number of private schools (128 pupils). The school population in 1930-31 was 3,263. The penal settlement also has 3 schools with 272 pupils. The budget for 1931 balanced at 16,755,676 francs. The country has immense forests rich in many kinds of timber. There is little agriculture in the colony, only about 7,900 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, sugar cane, tobacco, and gutta percha. The most important industry is gold-mining (placer). Silver, iron, and phosphates are also worked. The exports consist of correa, phosphates, various woods, gold, rosewood essence, balata, and hides. The total imports in 1931 were valued at 42,698,693 francs, and the exports at 30,153,575 francs. There are three ports—Cayenne, Saint Laurent du Maroni, and Oyapoc. Cayenne and Saint-Laurent are visited once a month by a cargo boat of the Compagnie Générale Transatlantique. There is also steamboat communication between the capital and the other towns of the colony. There are three chief and many secondary roads connecting the capital with various centres of population in the interior. There is a telegraph system connecting Cayenne with Macouria, Kourou, Sinnamary and Iracoubo, as well as with the penal settlement. There is a wireless station at Cayenne.

Since 1885, Cayenne has had a penal settlement for habitual criminals and convicts sentenced to hard labour. In 1931 the penal population consisted of 5,954 men.

The Bank of Guiana, under Government control, with a capital of 1,200,000 francs, with statutory reserve fund amounting to 300,000 francs, advances loans for agricultural and other purposes.

MARTINIQUE.

The colony is under a Governor assisted by a Privy Council. An elected General Council votes the Budget, and elective municipal councils administer the communes. It is represented by a senator and two deputies in the French Chamber. Area 385 square miles, divided into 32 communes; population (census 1931) 234,695. The military force consists of one company of infantry and a battery of artillery. There is a law school (at Fort-de-France) with (1931) 65 students, a lycée for boys, with 1,080 pupils, a high school for girls with 1,100 pupils, primary schools, with 24,000 pupils (including 7 private schools); a commercial school with 120 pupils, and a school of arts and crafts (89 pupils). Chief commercial town, Fort-de-France (population, 43,388). The budget for 1931 balanced at 96,428,996 francs.

Sugar and rum are the chief productions, then come cocoa, pine-apple, bananas, coffee and tobacco. There are 15,000 hectares under sugar-cane and food producing crops. Tobacco culture is under special regulations. There are 19 sugar works with distilleries attached, 134 agricultural distilleries, 2 industrial distilleries devoted to the production of rum, and 12 industrial establishments. In 1931, 40,064 metric tons of sugar, 3,584,592 gallons of rum, 1,222 metric tons of bananas, 264 metric tons of preserved pine-apple and 347 metric tons of cocoa beans were exported. The total imports in 1931 were valued at 220,457,000 francs, and the exports at 180,070,000 francs. Vessels entered in 1931, 603 of 1,134,032 tons, vessels cleared, 598 of 1,097,372 tons. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor cars, and subsidised steamers ply along the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables and wireless. The Bank of Martinique at Fort de France with a capital of 3,000,000 francs, the Crédit Martiniquais with a capital of 3,500,000 francs, and a branch of the Royal Bank of Canada advance loans for agricultural and other purposes.

ST PIERRE AND MIQUELON

The largest islands of two small groups close to the south coast of Newfoundland. Area of St Pierre group, 10 sq miles, population in 1926, 3,040, area of Miquelon group, 88 sq miles, population, 544, total area, 98 sq miles, total population, 3,584. Since July, 1921, a Governor organises and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St Pierre. Primary instruction is free. There are 2 public schools for boys, and 3 for girls, with (in all) 26 teachers and 599 pupils. There are, besides, infant schools, 'salles d'asile,' frequented by 140 children. There are a private boarding school and two private schools.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod fishing. Imports in 1929, 221,654,882 francs; exports, 203,266,103 francs. The imports comprise textiles, salt, wines, foodstuffs, meat, and the exports, cod, dried and fresh, and fish products. St. Pierre is in regular steam communication with North Sydney and Halifax, and is connected by telegraph cable with Europe and the American continent. Local budget for 1930: Receipts, 15,317,890 francs; Expenditure, 15,317,890 francs.

AUSTRALASIA AND OCEANIA

NEW CALEDONIA AND DEPENDENCIES

Governor —L. Jore (1932)

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary General, the Procureur Général (the head of the Judicial administration), the Superior Commandant of the Troops, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council General of 15 members. Nouméa, the capital, has a municipality, other centres of population are locally administered by municipal commissions.

The island is situated between the 20° 1' and 22° 26' parallels south latitude, and 161° 30' and 144° 40' east longitude. It has a total length exceeding 248 miles and an average breadth of 31 miles. Area, 8,548 square miles. According to the census of July 1, 1926, the population was 57,165, of whom 15,795 were free, 623 of convict origin, and 23,502 Melanésians and Polynésians. On July 1, 1931, the native population was 27,777. Nouméa had (1931) 10,708 inhabitants, of whom 7,038 were free. The immigrants from France are not numerous. Other immigrants (July 1, 1931) were 5,000 Javanese, 6,000 Tonkinese, 40 Indians, and 164 islanders from the New Hebrides. Primary instruction is provided in public and also in private elementary schools, the former being assisted by the local budget. In 1932, there were 48 public and private primary schools with 2,557 pupils (1,274 being girls), and 67 native schools with 3,133 pupils. In Nouméa the 'Collège La Pérouse' gives classical tuition to 161 pupils and professional instruction (iron and wood) to 49 pupils. Local budget for 1931, receipts and expenses, 37,861,212 francs, of which 36,950,000 francs were for the ordinary budget, and 911,212 extraordinary budget. In 1925 the military force consisted of 95 Europeans and 69 native troops. Of the total area more than half is mountainous or not cultivable, about 1,600 square miles are pasture land, about the same area is cultivated or cultivable, and about 500 square miles contain forest which is being worked. The land is divided into 3 domains: that of the state (in which gratuitous concessions may be made), that of the penal establishment (about 400 square miles), and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pine-apples. There are 200,000 cattle and about 25,000 sheep. The mineral resources are very great, chrome, cobalt, nickel, iron, and manganese abound, antimony, mercury, cinnabar, silver, gold, lead, and copper have all been obtained. The nickel deposits are of special value, being without arsenic. About 128,000 hectares of mining land are owned, and 137,000 hectares have been granted for prospecting. In 1931, the blast furnaces produced 5,534 tons matte of nickel valued at 25,636,523 francs. Local industries are developing, there are a grain storage and cleaning depot, meat preserving works, barking mills for coffee and cotton, and two blast furnaces melting nickel ore. A hydro electric factory was established in 1926. The imports in 1931 were valued at 86,701,259 francs, and the exports at 89,085,656 francs. The imports comprise wine, coal, flour, rice, the exports, minerals, coffee, copra, cotton and preserved meats. In 1931, 97 vessels of 190,454 tons entered and 93 of 176,442 tons cleared at the ports of New Caledonia. Of those which entered, 69 (117,112 tons) were French. Nouméa is connected once monthly with Sydney in New South Wales by regular steamers sailing monthly, and by other vessels sailing

irregularly There is a mail service by steamer along the coast There is a narrow-gauge railway (single line) from Nouméa to Paita, about 20 miles long The proposed extension to Bourail, 105 miles from Nouméa, has, however, been postponed There is a daily motor road service for passengers from Nouméa to Muéo on good roads, the rest of the Colony's roads are only suitable for horseback transport. There are 970 miles of telegraph line and 707 of telephone line

Dependencies of New Caledonia are

1 The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600

2 The Wallis Archipelago, north east of Fiji, with an area of 40 square miles and about 4,500 inhabitants The islands were placed under the French protectorate in 1842 There is a French Resident, and the archipelago is in regular communication with Nouméa Budget for 1931, 335,896 francs

3 Futuna and Alofi, south of the Wallis Islands, with about 1,500 inhabitants, were annexed by France in 1888

4 The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Mare, Lifou, and Uvea, and many small islands with a total area of about 800 square miles The chief culture in the islands is that of coconuts, the chief export, copra and rubber

5 The Huon Islands, 170 miles north-west of New Caledonia, a most barren group

The **New Hebrides**, in accordance with the Anglo French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. In 1914 an Anglo French conference was appointed to devise means of remedying the defects of the condominium Population (census of May 1, 1924), 2,161 In 1925 there were 746 French and 322 English There are French and English courts, and a mixed court with a judge foreign to both nations Local budget for 1932, 6,659,000 francs Exports in 1931 amounted to 15,151,901 francs, of which 11,275,718 were French trade, and 3,876,103 francs British trade, imports were 9,819,635 francs, of which 6,874,720 francs were in French trade, and 3,044,915 in British trade Maize, coffee, cotton, cocoa, vanilla, coconut trees are grown, and are the chief articles of export In some places sulphur is abundant In 1931, 62 vessels of 125,498 tons entered, and 61 vessels of 125,446 tons cleared the ports Of those entering 18 were British (22,080 tons), and 35 French (88,973 tons) Of those clearing 18 were British (22,080 tons), and 34 French (88,921 tons)

FRENCH ESTABLISHMENTS IN OCEANIA

Governor — Louis Bouchet (appointed June 21, 1932)

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and (census 1931) 9,720 inhabitants, the latter with an area of 50 square miles and 2,011 inhabitants, the principal product is phosphate (annual production, 80,000 metric tons) Other groups are the **Marquesas Islands**, with a total area of 480 square miles and 2,283 inhabitants, the two largest islands being Nukahiva and Hivaoa, the **Tuamotu group**, consisting of two parallel ranges of islands from King George's Island

on the north to Gloucester Island on the south, their total population being 4,771, the **Leeward Islands** (Iles sous le Vent) (8,678 inhabitants), of which the more important are Huahiné (pop 1,676), Raiatés and Tahaa (pop 5,416), and Bora-Bora-Maupiti (pop 1,586), the **Gambier, Tubuai, and Rapa Islands**, the Gambier group (of which Mangareva is the principal) having six square miles of area and 501 inhabitants, the Tubuai (or southern) Islands, of which Rurutu is the largest, Raiavavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and 1,389 inhabitants, Makatea, 1,160 inhabitants, Island of Maiao, 117 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population, according to the census of 1931, was 39,920, of whom 29,308 were natives. There were 5,280 French, 301 English, 4,056 Chinese, 169 Americans, 15 Germans, 10 Chileans, 2 Belgians, 1 Dutch, 3 Spanish, 5 Italians, 319 Indo-Chinese, 37 Japanese, 14 Danes, 15 Swedes, 5 Russian, 7 Swiss, 43 Czech, 1 Austrian, 2 Portuguese, 7 Norwegians. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony. Budget for 1931 balanced at 18,867,000 francs.

The most important of the islands is **Tahiti**, whose chief town is Papeete with 7,061 inhabitants (1931 census), of whom 4,848 are French. A higher primary school, with a normal school, has been established at Papeete, and there are (1925) 63 primary schools, with 91 teachers and 3,750 pupils. Pearls and mother o'-pearl are important products. The island is mountainous and picturesque with a fertile coastland bearing coconut, banana, and orange trees, sugar cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1931) 26,187,000 francs, exports 24,396,000 francs. The chief imports are tissues, wheat, flour, metal work. The chief exports were copra (16,806 tons), mother-o'-pearl (319 tons), vanilla (68 tons), and phosphates (114,432 tons). The export of phosphates in 1927, was 135,666 tons, in 1928, 136,806 tons, in 1929, 250,914 tons, in 1930, 172,059 tons. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete. The shipping between the islands is carried on by sailing boats.

Acting British Consul at Tahiti —Dr W J Williams.

GERMANY.

(DEUTSCHES REICH)

ON November 9, 1918, the abdication of the German Emperor was announced, and from that date Germany became a Republic

(For the constitution of the Empire and its rulers see THE STATESMAN'S YEAR-BOOK for 1918, pp 881-884)

Constitution and Government.

The Council of People's Commissioners in Berlin took over the Government of the country, the reigning princes of the Federal States were either deposed or abdicated, the existing Imperial Parliament was declared dissolved, and arrangements were made for summoning a National Assembly. The elections for the body (for which all Germans, men and women, over 20 years of age voted) were held in January, 1919, and resulted, on the basis of proportional representation, in the return of the following parties — Majority Socialists, 165, Centre (Catholic) Party, 90, Democrats, 75; Conservatives, 42, Independent Socialists, 22, German People's Party, 22, and minor parties, 7, total, 423. The National Assembly was summoned to meet at Weimar on February 6 and on February 11, 1919, it elected the first President of the Republic, Friedrich Ebert, who held office from February 11, 1919, until his death on February 28, 1925.

President of the Republic — Paul von Hindenburg. Elected the second President on April 26, 1925, assumed office on May 12, 1925. Re-elected on April 10, 1932.

The President is elected by the direct vote of all citizens, male and female, over 20 years of age. The election must be held either on Sunday or on a day of public rest. The President holds office for 7 years.

On January 30, 1933, the following Cabinet was appointed —

Chancellor — Adolf Hitler (Nazi)

Vice-Chancellor and Reich Commissioner for Prussia — Franz von Papen

Minister of the Interior — Dr. Wilhelm Frick (Nazi)

Minister for Prussian Affairs — Konstantin Count von Neurath

Minister of Defence — General Werner von Blomberg

Minister of Finance — Ludwig Count Schwerin von Krongau

Minister of Economic Affairs and Agriculture ("Crisis Minister") —

Dr. Hugenberg

Minister of Labour — Franz Seldte

Minister of Communications and Posts — Baron von Eitz-Rubenach

Minister without Portfolio, Reich Commissioner for Aviation, and Deputy Commissioner for the Interior in Prussia — Captain Hermann Göring (Nazi)

Reich Commissioner for Employment — Dr. Gereke

Minister of Justice — Dr. Franz Gürtner

Minister for National Enlightenment and Propaganda — Dr. Goebbels (Nazi). Appointed March 14, 1933.

The Constitution of the Republic was adopted on July 31, 1919, by the National Assembly at Weimar, and promulgated on August 11, 1919. It declares that the new Commonwealth is a Republic and that the power of the State is derived from the people. The Constitution provides for Central and State Legislative organs, makes foreign relations, defence, customs duties, taxation and railway services matters for the central authority, lays it down that every component State in the Federation must have a Republican Constitution, with a universal equal, direct, and secret franchise of male and female voters on the proportional system. A State Council (*Reichsrat*) is to be formed for the representation of the component States (*Länder*). All Bills (*Gesetzesvorlagen*) before they are introduced into the Reichstag require the

assent of the Reichsrat, but the Reichstag can pass a Bill into law with a two-thirds majority over the head of the Reichsrat. The principle of the Referendum is provided for in the Constitution. The Constitution further declares all Germans equal before the law, and abolishes all privileges or disadvantages of birth, class, or creed. Freedom of speech and of the Press is guaranteed, so is the right of meeting. Members of the Legislature of the Republic (*Reichstag*) are to be elected by universal, equal, direct and secret votes of male and female voters, on the proportional system. The Reichstag is to be elected for 4 years, one representative for every 60,000 voters. The Cabinet appointed by the President must enjoy the confidence of the Reichstag. Declarations of war and conclusions of peace are made by a law of the Republic.

The Reichsrat consists of 66 members (Prussia 26, Bavaria 11, Saxony 7, Württemberg 4, Baden 3, Thuringia, Hesse and Hamburg 2 each, and the other States 1 each).

The Reichstag, elected on March 5, 1933, is composed as follows: National Socialists (Hitler Party), 288; Socialists, 120; Communists, 81; Centre Party, 73; German National People's Party, 52; Bavarian People's Party, 19; German People's Party, 2; German State Party, 5; Minor Parties, 7; total, 647.

Area and Population.

I. PROGRESS AND PRESENT CONDITIONS

The following table gives the area and population of the present States (*Länder*) of Germany in the order of their magnitude, embodying the returns of the census of June 16, 1925 —

States of the Empire	Area English sq miles	Population June 16 1925 (on territory as at Dec. 31, 1931)			Pop per sq mile 1925
		Male	Female	Total	
Prussia (excluding the Saar and including Waldeck ¹)	113,036	18,531,108	19,644,881	38,175,989	338
Bavaria (excluding the Saar)	29,343	3,553,857	3,825,737	7,379,594	251
Württemberg	7,532	1,243,507	1,336,728	2,580,235	342
Baden	5,819	1,115,477	1,196,985	2,312,462	397
Saxony	5,789	2,373,055	2,621,226	4,994,281	863
Mecklenburg-Schw.	5,066	331,390	342,755	674,045	133
Thuringia	4,537	775,858	831,481	1,607,339	355

Bremen	99	164,949	173,897	338,846	3,423
German Republic (excluding the Saar)	180,985	30,196,823	32,213,796	62,410,619	345

¹ Waldeck was absorbed by Prussia on April 1, 1929.

States of the Empire	Area English sq miles	Population June 16, 1925 (on territory as at Dec 31, 1931)			Pop per sq mile 1925
		Male	Female	Total	
Prussian Saar Dis- trict ¹	574	335,379	334,640	670,019	1,167
Saarpfalz ¹	164	50,300	49,711	100,011	598
Saar District (alto- gether)	738	385,679	384,351	770,030	1,041
German Republic (with Saar Dis- trict) ¹	181,723	30,582,502	32,598,147	63,180,649	348

¹ The figures for the population of the Saar District are those of the census taken on July 10, 1927

Estimated population, January 1, 1932, 64,776,000 (with the Saar, 65,594,000)

According to the Treaty of Versailles (June 28, 1919) Germany has agreed to the following territorial arrangements —(1) Alsace Lorraine ceded to France, (2) the greater part of the Provinces of West Prussia and Posen ceded to Poland, (3) a part of Upper Silesia and of East Prussia likewise to Poland, (4) a portion of Upper Silesia to Czechoslovakia, (5) Memel to Lithuania, (6) Danzig, a Free State under the protection of the League of Nations, (7) Eupen and Malmedy to Belgium, (8) a part of Schleswig to Denmark

Provision was made in the Treaty to settle the ultimate fate of the following areas by *plebiscite* — (1) The Saar Basin (after 15 years), (2) Schleswig (in two zones), (3) districts in Southern East Prussia, in West Prussia and in Upper Silesia. Results of the *plebiscites* — Schleswig (March, 1920), northern zone for Denmark, southern zone for Germany, East and West Prussia (July, 1920) for Germany, Upper Silesia (March, 1921) for Germany. Despite the decision in Upper Silesia, 1,241 square miles, with a population of 892,537, were transferred to Poland

An estimate of the actual areas and populations (according to the Census of 1910) lost to pre war Germany has been made as follows. Alsace Lorraine, 5,607 square miles, population 1,874,014, ceded to Belgium, 400 square miles, population 60,003, ceded to Poland, 17,816 square miles, population 3,854,961. Memel, 1,026 square miles, population 141,238, Danzig, 739 square miles, population 330,630, ceded to Denmark, 1,542 square miles, population 166,348, ceded to Czechoslovakia, 122 square miles, population 48,446, total 27,252 square miles, population 6,475,640

The Saar Basin, which has been placed under the government of the League of Nations for 15 years, has an area of 737 square miles and a population (1927) of 770,030

The population of the German Empire (without Heligoland) was 24,831,396 in 1816, and 31,589,547 in 1837, showing an average annual increase of nearly 1.3 per cent. The following table shows the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent	Year	Increase	Annual Rate per cent
1867 ¹	3,220,083	0 97	1895	2,851,431	1 16
1871	970,171	0 60	1900	4,087,277	1 56
1880	4,175,269	1 13	1905	4,274,100	1 52
1885	1,621,643	0 72	1910	4,284,715	1 42
1890	2,572,766	1 10	1925	4,612,192	0 53

¹ Since 1858

The number of foreigners in Germany, according to the census of June 16, 1925, was 957,096, or 15 3 per 1,000 of the total population of the country. Poles numbered 259,804, Austrians 128,859, Czechoslovaks 222,521, British 6,977, and French 7,290.

II MOVEMENT OF THE POPULATION

The following table shows the movement of the population of the Republic during four years —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1928	587,175	1,220,777	37,962	150,958	777,482	+443,295
1929	589,611	1,183,728	36,270	144,595	842,232	+341,496
1930	562,648	1,163,381	35,931	140,993	746,781	+416,600
1931	515,411	1,063,538	32,030	—	758,013	+305,525

Of the children born in 1930, 600,349 were boys, and 563,032 girls, in 1929, 611,432 were boys and 572,296 girls.

The number of divorces in Germany was in 1929, 39,424 being 61 6 per 100,000 inhabitants, in 1930, 40,722 or 63 3, in 1931, 39,971 or 61 8.

The following table shows the annual number of German emigrants for five years —

Year	Total	Destination						
		European Countries	United States	Brazil	Other American Countries	Africa	Asia	Aus- tralia
1927	61,379	518	47,151	2,212	9,507	1,617	20	354
1928	57,241	675	45,504	1,506	8,269	1,188	19	80
1929	48,794	293	38,188	1,324	8,502	847	84	46
1930	37,399	200	26,427	1,167	9,195	1,328	29	58
1931	18,644	131	8,796	765	8,200	682	12	18

III. PRINCIPAL TOWNS.

German towns are distinguished as large towns (with 100,000 inhabitants and upwards), medium towns (20,000-100,000 inhabitants), small towns (5,000-20,000 inhabitants), and country towns (2,000-5,000 inhabitants). In 1925, 2 towns had over 1,000,000 inhabitants, 22 others over 250,000, 24 others over 100,000, 44 between 50,000 and 100,000, and 151 between 20,000 and 50,000. According to the results of the census of June 16, 1925, the population of the principal towns at that date was. —

Religion.

According to the census of June 16, 1925, there were in Germany 40,014,677 Protestants (64.1 per cent of the total population), 20,193,834 Catholics (32.4 per cent), 87,580 other Christians (0.1 per cent), 564,379 Jews (0.9 per cent), and 1,550,649 adherents of other professions of religion (2.5 per cent).

The Constitution provides for entire liberty of conscience. There is no State Church. Every religious community manages its own affairs, and makes appointments to its offices without interference from the State.

The Evangelical Churches are now united in the German Evangelical Church Union.

There are 6 Roman Catholic archbishoprics, 15 suffragan bishoprics, 1 bishopric immediately subject to Rome, 2 parts of bishoprics attached to non-German bishoprics, and 1 apostolic administration. The 'Old Catholics' have a bishop at Bonn.

The Jewish congregations are federated in the 'Deutsch Israelitischer Gemeinde Bund.'

Education.

Education is general throughout Germany, all children between the ages of 6 and 14 being bound to attend some recognized school. The teachers in German schools are required to hold a Government certificate, and to have undergone a period of training and probation.

According to a school census taken in 1931-32 there were in that year 52,959 public elementary schools in Germany with 190,371 teachers (141,622 males and 48,749 females) and 7,590,466 pupils (3,842,789 boys and 3,747,677 girls). There were in 1931-32, 661 private schools with 48,760 pupils (20,365 boys and 28,395 girls).

According to the law of April 28, 1920, German children are all bound to receive a four years' course of instruction in the 'Foundation School' (*Grundschule*). The next highest school for elementary education is the 'People's School' (*Volksschule*), which, like the *Grundschule*, is supported partly by the State (mostly for personnel), and partly by the municipalities (mostly for school buildings, etc.). Besides the *Volksschule* there is found the 'Middle School' (*Mittelschule*), which differs from the former in that instruction is provided in English and French. In 1931-32 there were 1,471 *Mittelschulen* with 11,524 teachers and 229,618 pupils (107,159 boys and 122,459 girls). Apprentices and young people at work must attend Continuation Schools for 6 to 8 hours weekly during working hours.

To prepare for the Universities and for admission into certain professions, there are several kinds of secondary schools with a course of study extending

in the main over 9 years. Of these the oldest is the *Gymnasium*, which specializes in classical studies, side by side with this is the *Realgymnasium*, which specializes in mathematics, natural science and modern languages, but also teaches classical subjects. The *Gymnasien* are the most fully developed classical schools, the *Progymnasien* differ from these only in not having the highest classes. The *Oberrealschulen* give instruction in mathematics, natural science and modern languages, but not in classics. Experimentally two other kinds of schools have been established—the German High School (*Deutsche Oberschule*) and the *Aufbauschule*, the former to stress German subjects (besides modern languages), and the latter to provide an intensive and curtailed high school education for the bright scholars of elementary schools.

For girls there are *Lyceen*, *Oberlyceen* and certain other educational institutions which prepare for the universities.

In 1931–32 the number of secondary schools was as follows — For boys, Gymnasia and Progymnasia, 450, with 131,710 pupils, Realgymnasia and Realprogymnasia, 426, with 158,201 pupils, Oberrealschulen and Realschulen, 489, with 187,472 pupils. Total number of teachers, 30,265. For girls, High Schools, 784, with 14,650 teachers and 256,077 pupils.

There are 10 fully equipped Technical High Schools, with the right of granting degrees. They are all aided by the States to which they respectively belong. The statistics for the Summer session 1931 were as follows —

Schools	Teaching Staff (1931)	Matriculated Students ¹ (1931)	Of whom		Schools	Teaching Staff (1931)	Matriculated Students ¹ (1931)	Of whom	
			Women	Foreigners				Women	Foreigners

¹ Who have attended lectures

² Including 192 special teachers and excluding 730 assistants

³ In addition to 1,589 on leave or excused attendance at lectures, of whom 945 were inscribed at the Berlin Technical High School, besides 375 special students

There are, besides, the following (number of students in 1931 shown in brackets): 2 Veterinary Colleges (1,036), 3 Agricultural Colleges (1,041), 2 Afforestation Academies (165), 2 Mining Academies (410), 5 Commercial High Schools (3,965), 1 Academy for Practical Medicine (279), 13 Schools of Art (1,697), and 11 Colleges of Music (3,740). There are also 18 Training Colleges for elementary school teachers at the following centres (students in 1931 in brackets) — Altona (164), Benthien (166), Bonn (171), Breslau (177), Darmstadt (64), Dortmund (241), Elbing (294), Erturt (173), Frankfurt-on-Main (171), Frankfurt a d O (161), Halle (161), Hanover (191), Kassel (169), Kiel (279), Kottbus (155), Mainz (256), Rostock (88), Stettin (162).

There are 23 universities in the German Republic, besides the Philosophical and Theological High Schools at Braunsberg, with number of students in the summer term of 1931 (48), Paderborn (321), Frankfurt-on-Main (205), Fulda (121), Trier (253), Mainz (80), Augsburg (59), Bamberg (103), Dillingen (143), Eichstatt (146), Freising (174), Passau

(149), and Regensburg (209), which have only faculties of theology (Roman Catholic) and philosophy (Augsburg has philosophy only)

The following table gives the date of foundation, the number of teachers and students for the summer term of 1931 —

Universities	Professors and Teachers (1931)	Matriculated Students (1931)						Total
		Theology	Jurisprudence, &c	Medicine and Dentistry	Philosophy	Mathematics and Natural Science, &c	Auxiliary Science

¹ Including 294 special teachers and excluding 1,594 assistants

² Including 744 students of Veterinary Science

³ Exclusive of 8,240 on leave or excused from attending lectures

In three universities, namely, Freiburg, Munich, and Würzburg, the faculties of theology are Roman Catholic, four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Münster, and Tübingen, and the rest are Protestant Cologne, Frankfurt, and Hamburg have no theological faculties

Justice and Crime.

A uniform system of law courts exists throughout Germany, though, with the exception of the Reichsgericht, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Central Government. The appointment of the judges other than those of the Reichsgericht is also a State function, and not that of the Central Government.

The lowest courts of first instance are the *Amtsgerichte* (1,737 on January 1, 1931), competent to try petty civil and criminal cases. Cases relating to property in which the amount involved does not exceed 1,000 marks are usually tried by a single judge. In the trial of more serious criminal cases the judge is assisted by two assessors (laymen) (*Schoffengericht*). The *Amtsgerichte* deal also with guardianships, estates and official records. The *Landgerichte* (159 on January 1, 1931) contain both civil and criminal chambers.

The former, consisting of three judges, are competent to deal in first instance with all civil cases in as far as they have not been referred to the *Amtsgerichte*, especially with divorces, and also exercise a revisory jurisdiction over the *Amtsgerichte*. For trying commercial cases there are further commercial chambers, consisting of one judge and two laymen. The Criminal Chamber decides as court of first instance in the majority of criminal cases, that is to say, if they do not come within the competence of the *Amtsgerichte* or of the *Reichsgerichte*. But even the latter may be brought before the Criminal Chamber at the request of the Public Prosecutor. The Criminal Chamber consists of 3 judges and 2 lay assessors. It also hears appeals from the *Amtsgerichte* in criminal cases. For the trial of capital cases, the *Landgerichte* are transformed into *Schwurgerichte*, consisting of three judges and six laymen. The *Amtsgerichte* and *Landgerichte* have as superior court the *Oberlandesgerichte*. There are twenty-seven such courts in Germany. The *Oberlandesgerichte* contain criminal and civil senates consisting of three judges. They exercise appellate jurisdiction over the *Landgerichte* in civil cases, and over the 'small chambers' (and in some cases over the 'large chambers') in criminal cases. The total number of judges on the bench in all the courts above mentioned was 10,095 (Jan. 1, 1931). The supreme court is the *Reichsgericht*, which sits at Leipzig, and has 102 judges. This court exercises an appellate jurisdiction over all inferior courts, and also an original and final jurisdiction in cases of treason. It has 4 criminal and 9 civil senates, consisting of 5 judges each.

Number of persons condemned after trial, 1930, 596,127, 1929, 595,656

Special courts exist for all civil disputes arising from the relationship between employers and employed (*Arbeitsgerichte*, *Landesarbeitsgerichte*, and the *Reichsarbeitsgericht*). Qualified judges are appointed to these judicial bodies and they are attended by representatives of employers and employed. In 1931 there were 452 *Arbeitsgerichte*, 60 *Landesarbeitsgerichte* and the *Reichsarbeitsgericht*. The *Arbeitsgerichte* gave decisions (1931) in 441,243 cases, and settled by arbitration 8,056 cases. The *Landesarbeitsgerichte* dealt with 20,633 appeals. The *Reichsarbeitsgericht* received 982 cases for revision.

Public Assistance (including Poor Relief and Welfare for Children and Juveniles)

The public assistance for the needy was regulated before the war by the law of June 6, 1870, relating to poor relief. This law, however, was already found inadequate at the beginning of this century to meet the conditions brought about as a result of the economic development (industrialisation, development of towns, etc.). When, as a result of the war and inflation period, whole classes of the population became poverty stricken, gradually new methods of assistance were devised to meet the conditions that had arisen. The various regulations laid down in this connection could, however, only be uniformly codified for the whole Reich after the stabilisation of the German currency under the 'Government regulation regarding public assistance' of February 13, 1924.

The public assistance (within the meaning of this regulation) comprises the social care of those wounded in the war, dependents of those killed and persons who, according to the welfare laws, are regarded in a similar way, assistance for persons in receipt of pension from sick and employment insurances, those badly wounded and those who find it difficult to obtain employment, minors in need of help and actual poor law relief is granted by the authorities for public assistance, the District and State Welfare Associations.

The public assistance for juveniles includes all official means for the promotion of youth welfare. This was first legally regulated in the 'Government Law relating to Juvenile Welfare' (*Reichsjugendwohlfahrtsgesetz*) of July 9, 1922. This law contains, *inter alia*, regulations relating to the rearing of children (mother and infant care, care of small children), co-operation of the authorities in regard to trusteeships, guardianship, assistance in education and Juvenile Courts, the care of the youthful offenders was amended in the law relating to Juvenile Courts of February 16, 1923.

The importance of the State Juvenile Welfare Law lies in the fact that it alone grants to all juveniles, who require to be educated, the legal right to education, to physical, spiritual and social fitness, in cases where the parents (or others who are bringing up the child) fail in their duties the existing public bodies (Juvenile Boards—*Jugendämter*) have to ensure their education in another manner.

Particulars regarding the extent of public welfare and public care of juveniles in Germany were published for the first time for the year 1927 in State Welfare Statistics (*Reichsfürsorgestatistik*), and the State Statistics of Public Care of Juveniles (*Reichsstatistik der öffentlichen Jugendhilfe*). During the year 1930–31 the total of 1,057 District Welfare Associations publicly assisted 1,983,859 persons on June 30, 1930 (2,475,576 persons on December 31, 1930). In addition, 1,058,740 persons were helped temporarily, and 371,487 were provided for permanently by institutions (institutional or indoor relief). Assistance in cash and kind by the District Welfare Associations for Public Welfare, inclusive of maternity relief, amounted to 1,493,502,200 RM. (gross costs).

The State Welfare Associations (*Landesfürsorgeverbände*) assisted 224,237 persons during the year 1930–31. The costs of these amounted to 140,146,500 RM.

Besides these direct grants, the Welfare Associations had to meet various other costs (for example, contributions for own installations, free welfare work, costs of administration, etc.) After deducting the corresponding receipts for public welfare and public juvenile care by the District and State Welfare Associations 1,838,931,000 RM were spent during the year 1930–31.

The 1,238 Juvenile Boards were caring for 698,467 children on March 31, 1930, 633,629 minors were under 'guardianships' of the Boards, and 73,014 under their protection. (The State Statistics of Public Care of Juveniles were not published for the year 1930–31.)

The costs for public juvenile care are included in the above mentioned welfare costs, the data supplied by the District Welfare Associations include, *inter alia*, expenses in connection with education and bringing-up of minors, juvenile care and physical training (14,977,000 RM), contributions to orphanages, homes, etc. (7,469,800 RM), cripple, kindergarten and similar institutions (21,090,000 RM), and other expenses in connection with public juvenile assistance (7,093,200 RM). According to the data supplied by the State Welfare Associations the costs amount to 32,243,400 RM for assistance to juveniles, and 7,496,800 RM for other contributions in connection with public juvenile assistance.

Compulsory Insurance.

Social insurance has existed in Germany since 1883. It comprises compulsory insurance of workmen and employees against sickness (including maternity), accidents, unemployment, old age and infirmity.

Under a law of 1888 and amending Acts, workmen and employees with an annual income up to 3,600 marks must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have been obliged to unite into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances, under an Act of 1889 and amending Acts, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy. The employers are responsible both for their own and the workmen's contributions. The latter must be deducted from wages and paid subsequently. Insurance for old age pensions for employees was introduced by law of December 20 1911, and amending Acts 65 being the pensionable age. Unemployment insurance was introduced by the law of July 16, 1927, to take the place of the Unemployment Welfare which had been in existence since the end of the war.

The State makes a grant for invalidity and old age insurance, also provides for maternity benefit.

For the year 1930 the average of those insured against sickness was 21,916,000. Of this total, 19,597,000 (12,075,000 men and 7,522,000 women) were insured in ordinary societies, and 747,000 in *Knappschaften* or societies for miners, and 1,572,000 in supplementary offices. In 1930, about 24,200,000 persons were insured against accident in 66 industrial and 40 agricultural societies.

The total receipts in 1930 of the ordinary societies were 1,798,950,000 RM., of the *Knappschaften* 123,008,000 RM., and of the supplementary offices 196,922,000 RM. The total expenditure of the ordinary societies was 1,691,048,000 RM., of the *Knappschaften* 108,576,000 RM., and of the supplementary offices 189,374,000 RM. The number of cases and days of sickness amounted with the ordinary societies to 8,236,000, and 223,895,000, and with the *Knappschaften* to 417,000, and 12,496,000 respectively. For accident insurance the receipts (1931) were 380,000,000 RM., and the expenditure 418,300,000 RM. For invalidity and old age insurance the receipts in 1930 were 1,530 million RM., and the expenditure was 1,475 million RM., including state subsidy of 404 million RM., appropriations for pensions 906 million RM., other appropriations 99 million marks. The excess of receipts over expenditure was in 1930, 55 million RM., total resources 1,637 million RM. On January 1, 1932, the current benefits for old age, invalidity and sickness amounted to 2,845,000, and pensions to widows and orphans to 654,000 and 545,000, respectively, for the insurance of employees the receipts in 1931 were 523 million RM. and the expenditure 263 million RM. There is in addition compulsory insurance for clerical workers. The number insured is not known exactly, on the basis of the monthly contributions paid it can be estimated at 3.1 million persons at the end of 1931. As insurance of employees is comparatively new, the number of beneficiaries is increasing considerably from year to year. At the end of 1931 there were 155,486 persons receiving old age pensions (23.8 per cent increase over 1930), 72,428 widows' pensions (14.0 per cent increase), and 40,231 orphans' pensions (8.1 per cent increase). Contributions in 1931 totalled 343,484,000 RM., total receipts 523,105,000 RM., pensions accounted for an expenditure of 209,911,000 RM., health insurance benefits 28,986,000 RM.; other benefits 10,448,000 RM., and administration expenses 13,651,000 RM. The excess of receipts over expenditure was, in 1931, 260 million RM.

For the miners' societies the receipts in 1931 were 202 million RM., and the expenditure 226 million RM., for unemployment insurance the contributions in 1931 were 1,373 million RM. and the expenditure 1,531 million RM.

Finance.

The following table shows the revenue and expenditure for five years ending March 31 (in millions of Reichsmarks) —

	1928-29	1929-30	1930-31	1931-32	1932-33 ¹
Revenue	10,987,200	10,146,300	10,585,400	8,567,600	8,219,200
Expenditure	11,846,700	11,817,700	11,877,200	10,042,000	8,219,200

¹ Budget Estimates

The budget estimates for 1932-33 give the principal items of revenue and expenditure as follows —

BUDGET ESTIMATES, 1932-33 (in millions of Reichsmarks)

Revenue		Expenditure	
Taxes	6,824 8	Payments to States and Communities	2,303 4
Customs	1,140 0	General Administrative Expenses	2,191 0
Administrative Revenues	436 8	Unemployment Relief	929 2
Contribution of the German Railway Company to Reparation Payments	70 0	War and Civil Pensions etc	1,381 5
Other Revenues	248 6	Internal Charges arising out of the War, Occupation, etc	325 6
		Payment of Bonds and reduction of Debt	943 5
		War charges	145 0
Total	8,219 2	Total	8,219 2

On March 31, 1932, the total debt of the German Reich (not including the debt arising from the Treaty of Versailles) amounted to 12,137 3 million Reichsmarks, of which 4,643 7 million are pre-war debt, 427 2 million Rentenbank-debt, 741 6 Dawes Loan (1924), 1,424 1 Young Loan (1930), 525 0 million External Loan of 1930, 500 0 million Internal Loan of 1927, 183 0 million Internal Loan of 1929, 1,052 6 million claims for war damages (according to the War Damages Liquidation Act), 225 9 million claims for Poland damages (according to the Poland Damages Act), 1,717 8 million floating debt, and 696 3 million other debts.

The growth of the German debt is shown as follows —

Year (March 31)	Million Marks	Year (March 31)	Million Marks
1871 ¹	769 5	1929	8,971 7
1875 ¹	120 8	1930	10,875 1
1918	4,925 8	1931	12,089 6
1925	2,808 1	1932	12,187 3
1928	7,972 8	1932 ¹	10,424 6

¹ December 31

The floating debt on December 31, 1932, was 1,886,200,000 Reichsmarks, compared with 1,912,600,000 Reichsmarks on December 31, 1931

Defence.**I ARMY**

Under the terms of the Treaty of Versailles, and in accordance with the law of March 23, 1921, enlistment is voluntary and for 12 years.

Officers have to engage to serve for 25 consecutive years on appointment. The Reichswehr is organized in 7 divisions of infantry and 3 divisions of cavalry, with two army corps headquarter staffs. The strength of an army corps staff is 30 officers and 150 N C O's and men, of an infantry division, 410 officers and 10,830 men, of a cavalry division, 275 officers and 5,250 men. The total strength of the army in 1932 was 4,500 officers and 96,000 other ranks. The President is the supreme head of all land and sea forces. Under his orders the Minister of National Defence exercises actual command through the medium of a General Officer appointed chief of the army command, organized as follows —

	Divisions	Regiments	Battalions	Groups	Squadrons	Companies	Batteries
Infantry	7	21	84 ¹	—	—	336 ²	—
Cavalry	3	18	—	—	97 ³	—	—

¹ 21 Instructional ² 63 Instructional ³ 18 Instructional ⁴ 7 Instructional.

By June, 1921, the fortresses specified in the Treaty of Versailles, and also the coast defences of Kiel and Heligoland had been razed. The fortifications on the southern and eastern frontiers may remain in the condition in which they were when the Treaty of Versailles became operative, but according to the request of London (May 5, 1921), all German fortresses had to surrender their equipment, with the exception of Königsberg, which was permitted to retain 38 guns. The maximum armaments authorised are 84,000 rifles, 18,000 carbines, 792 heavy machine guns, 1,134 light machine guns, 63 trench mortars, 189 light trench mortars, 204 7.7 cm. field guns, and 84 10.5 cm. howitzers. No military aircraft is permitted.

The estimates of the Defence Department (Army and Navy) for 1930-31 amounted to 716,300,000 gold marks, and the actual expenditure 490,105,000 marks.

II NAVY

The German Navy is now mainly a coast-defence force and is directed and administered by the Chief of the Naval Department, under the Ministry of National Defence. In addition to the central administrative division are the Office of Naval Command (staff), the General Naval Office (supply and research), the Constructional Division, also the Naval Administrative Office, and some departments dealing with the relations of the Navy to the Defence Ministry, which also controls the Army.

The Treaty allows to the German Government the right of maintaining a navy, recruited and maintained on a volunteer basis. The fleet consists of six pre-Dreadnoughts completed between 1906 and 1908, each displacing approximately 13,000 tons and mounting four 11 inch and from ten to fourteen 6.7 or 6-inch guns. These are the *Hannover*, *Hessen*, *Schlesien*, and *Schleswig-Holstein*. They possess little fighting value, though a certain amount of money has been spent in modernising them. The 26-knot battleship *Deutschland*, of 10,000 tons, driven by Diesel engines, has now been completed. She is armed with six 11 inch and eight 6 inch guns, and

is claimed to have a radius of action of 10,000 miles at 20 knots. A second ship of this type was laid down in June, 1931, and a third in October, 1932. It is proposed to lay down a fourth unit in 1934. These vessels are officially rated as 'armoured ships'. The cruisers include the *Berlin*, of 8,650 tons, completed 1904, and mounting 10 4 1-inch guns, the *Emden*, of 5,600 tons, completed at the end of 1925, armed with 8 6-inch guns, the *Königsberg*, *Karlsruhe*, *Köln*, and *Leipzig* of 6,000 tons, completed 1929-31, armed with 9 6-inch guns, and the *Bremse* of 1,250 tons, completed in 1932, and mounting four 4 1 inch guns. By treaty the cruisers built since the war are limited to a standard displacement of 6,000 tons. There are also 26 destroyers and torpedo-boats, 14 of which date from 1907-13, the remainder were built in 1926-29 to replace worn-out vessels. All these ships are maintained in an efficient state. No submarines or naval air-raft are permitted.

The battleships, cruisers and torpedo boats are divided equally to constitute squadrons severally in the North Sea and the Baltic. The cruisers *Karlsruhe* and *Emden* are training ships, and have recently made extensive cruises with naval cadets and men.

The total personnel may not exceed 15,000, including a maximum of 1,500 officers and warrant officers. Its present strength is 5,063 officers and petty officers and 9,933 men. The officers and warrant officers engage for a minimum of twenty five consecutive years, and the petty officers and men for twelve years. The vessels of war are to have a fixed allowance of arms, munitions, and material.

Naval estimates 1929-30, 180,000,000 marks, 1930-31, 194,334,000 marks, 1931-32, 195,897,200 marks.

Production and Industry

I AGRICULTURE

Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north east.

The subdivision of the soil, according to the latest official returns for Germany, without the Saar, at the beginning of June, 1932, was as follows (in acres).—Arable land, 51,206,167, grass, meadows, pasture, 20,398,952, vineyards 206,952, orchards, market gardens, etc., 1,611,867, total area under cultivation, 73,423,935 acres.

The areas under the principal crops, in acres, and the yields, in metric tons (1 metric ton = 2,204 lbs or 984 an English ton), were for three years as follows —

—	Acreage			Produce (Metric tons)		
	1930	1931	1932 ¹	1930	1931	1932 ¹
Wheat	4,453,065	5,418,322	5,700,610	3,788,902	4,233,310	5,068,934
Rye	11,778,010	10,914,502	11,124,785	7,679,160	6,880,008	8,383,226
Barley	3,797,247	4,047,705	3,920,677	2,860,258	3,018,179	3,221,408
Oats	8,598,765	8,467,367	8,210,682	5,356,856	6,204,907	6,706,359
Potatoes	7,011,142	7,060,440	7,197,630	47,099,600	48,866,883	45,826,603
Sugar Beet	1,207,587	962,370	676,940	14,918,594	11,089,029	7,467,235
Hay	18,920,972	18,846,017	18,911,005	36,987,257	37,014,693	—

¹ Provisional figures

In 1931 the area devoted to vines was 177,947 acres, the wine yield 6,469,792 gallons. Area devoted to tobacco, 1932, 27,115 acres, 1931, 25,955 acres, yield 1930, 21,050,613 kilos; 1931, 23,180,806 kilos. Sugar

production, 1930-31, 2,547,451 tons, 1931-32, 2,547,451 tons In 1930 the hop production was 11,052 tons, in 1931, 7,780 tons

The number of domestic animals in Germany according to the census of December 1, 1931, was —

States	Horses ¹	Cattle	Sheep	Swine	Goats
Prussia	2,376,710	10,787,707	2,310,216	16,226,451	1,484,481
Bavaria	378,294	3 964,522	381,144	2,560 819	309,196
Saxony	143,893	716,826	64,174	859 115	131,817
Württemberg	105,204	1,111 1-9	165 288	630,013	71,886
Baden	65 218	653,602	40,851	521,146	103,251
Other States	382,174	1,889,892	537,663	3,008,401	416,296
Total 1 Dec 1931	8 450,995	19,123 658	3,499,341	23,807,945	2,516,827
Total 1 Dec 1932	8,393 000	19 122 500	3 401 000	22 814 800	2 500,300

¹ Exclusive of Army horses

II FORESTRY

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods The forest area of Germany in its present extent was put in 1927 at 31,635,443 acres, State and partly State forests, 10,328,563 acres, communal forests, 4,914,498 acres, private forests, 15,129,785 acres, and forests belonging to various associations or foundations, 1,262,597 acres Of the whole forest area 9,110,040 acres are under deciduous trees, oak, birch, ash, beech, etc, and 22,525,403 acres bear pine, larch, red and white fir, etc The forest area in 1932 was 31,914,225 acres, or 27 per cent of the total area of Germany

III. MINING

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal, iron and metal smelting works, Central Germany for brown coal, the Harz for iron and copper ore, and the Westerwald for iron ore Saxony has coal mines

In 1925 there were 2,942 mines in Germany employing 808,593 persons (797,350 men, and 11,243 women) Number of blast furnaces in 1930, 165, in 1931, 155

The quantities of the principal minerals raised were as follows in metric tons —

	1929	1930	1931
Coal	168,440 632	142,698,728	118 640,113
Lignite	174,455,946	146,010,044	133,310 730
Iron ore	6,878 677	5,741 205	2,621 800
Iron content	2 080 259	1,845 838	841 534
Zinc ore	269,988	278,274	202,417
Zinc content	142 467	138,653	105,244
Lead ore	160,866	182,140	114,736
Lead content	60,464	68 663	54,261
Copper ore	1,025,465	845 619	886,474
Copper content	23,988	26,972	20 827
Rock salt	2,541 489	2,456,605	2,066,884
Brine salt	501,024	501,258	400,975
Brines used directly (salt content)	792 351	647,095	528,750
Potash	13,816,218	11,962,251	8,051,400
Pure potash content of the product as sold	1,482 501	1,381,420	941,056
Petroleum	102,867	174,326	223,931

In 1913 the total output of pig iron was 16,763,809 metric tons, in 1931, 6,063,000 tons, in 1932, 3,932,541 tons. Ingot steel production (including castings from steel-works) in 1913 totalled 17,147,360 metric tons, in 1931, 8,291,640 tons, in 1932, 5,751,127 tons. In 1930, the output of coke was 32,699,500 tons, in 1931, 23,189,836 tons, in 1932, 19,127,836 tons.

IV. FISHERIES

In 1930 the yield of the North Sea fisheries was 281,770,900 kilos of fish, and of the Baltic fisheries, 32,007,500 kilos of fish.

V. MANUFACTURES

The chief seat of the German iron production is the Ruhr, to a less extent also in Sieg, Lahn, and Dill districts. Steel is chiefly made in the Ruhr. The manufacture of both iron and steel is carried on in the vicinity of the coal mines in the district of the Lower Rhine, and in Westphalia. The electrical industry is found principally in Berlin. The chemical industry is centred on the Rhine, near Mannheim, the Main and Cologne, and in Prussian Saxony. Saxony (Free State) is the leading State in the production of textiles, but Silesia and Westphalia also produce linen, Saxony (Free State), Rhenish Prussia, Westphalia, Wurttemberg, and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony, Bavaria, and Thuringia, silk in Rhenish Prussia and Baden. Beetroot sugar is an important manufacture in Prussia, chiefly in the provinces of Saxony, Silesia, Hanover, and Pomerania. Potash is produced mainly in Prussian Saxony, Thuringia, and Hanover. Glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria, and Saxony, clocks and wooden ware in Baden, Wurttemberg, and Bavaria, and beer principally in Bavaria.

The following are the statistics of the beet sugar manufacture in Germany —

Years beginning 1 September	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs Beetroot to produce 1Kg of Sugar
			Raw Sugar	Molasses	
1927-28	250	10,655,619	1,655,202	313,102	6 44
1928-29	248	11,482,848	1,841,444	328,086	6 24
1929-30	238	11,937,531	1,955,711	338,232	6 10
1930-31	233	15,874,435	2,515,680	394,228	6 31
1931-32 ¹	216	9,414,290	1,559,097	236,780	6 04

¹ Preliminary figures

The quantity of beer (in thousands of hectolitres, 1 hectolitre = 22 gallons) brewed in Germany in 1914 was 59,373, in 1927, 51,619, in 1928, 54,995, in 1929, 58,078, in 1930, 48,560, in 1931, 37,093.

The total number of active breweries in Germany with a yearly production of over 500 hls. was in 1924, 2,367; in 1925, 2,511, in 1926, 2,675, in 1927, 2,719, in 1928, 2,782, in 1929, 2,837, in 1930, 2,830.

Production of alcohol for four years. —

Year	No of Distilleries	Gallons	Year	No of Distilleries	Gallons
1927-28	38,782	61,741,086	1929-30	38,186	68,395,464
1928-29	35,957	71,348,674	1930-31	28,901	56,519,694

Tobacco products in the year ending March 31, 1931 — 6,794,477,000 cigars, 29,748,462,000 cigarettes, 37,289,065 kilos of smoking tobacco, and 2,077,182 kilos of snuff

According to the industrial census of June 16, 1925 there were in Germany 1,852,737 industrial establishments, employing 12,704,135 workpeople, (9,805,923 males, being 77 per cent of the total, and 2,898,212 females, being 23 per cent of the total) The following table gives certain particulars of the more important industries —

Branch of Industry	Number of Factories	Number of Employees	
		Total	Females
Mining, salt works etc	2,942	808,598	11,243
Stone, clay, and glass products	34,898	684,714	94,532
Iron and Metal	3,566	620,502	25,007
Iron and metal manufactures	150,299	863,140	145,000
Engineering and transportation equipment	41,810	1,240,501	72,254
Electrotechnical, clocks and instruments	46,443	598,839	148,209
Chemicals	8,634	318,537	72,680
Textiles	122,987	1,212,437	689,594
Paper and printing	35,765	575,805	194,220
Leather and linoleum	38,627	165,356	28,945
Rubber	1,288	66,200	23,309
Timber	219,335	958,109	88,940
Musical instruments and toys	20,131	119,437	41,475
Foodstuffs	293,373	1,365,499	489,767
Clothing	599,769	1,427,657	745,646
Building	226,949	1,335,858	26,656
Gas, water, and electricity	11,426	148,151	5,785

Commerce.

The following table shows the volume and value of the special trade (exclusive of gold and silver) for five years —

Year	Imports		Exports	
	Double cwts (= 100 kg)	Million marks	Double cwts (= 100 kg)	Million marks
1918	728,323,608	11,206	737,142,752	10,198
1929 ¹	667,784,828	13,447	693,793,158	13,483
1930 ¹	569,529,634	10,393	635,810,728	12,036

The ports of Hamburg and Bremen were the chief gates of commercial intercourse of Germany with the United Kingdom and the United States

Shipping and Navigation.

On June 30, 1932, the German mercantile marine (Lloyd's Register of Shipping) amounted to 2,151 ships of 4,164,842 registered gross tons (5,459,296 tons in 1914)

The following table for 1931 shows the number and net tonnage of vessels entering and clearing German ports (excluding deep sea fishing traffic) —

Flag	Entered				Cleared			
	With Freight		In Ballast		With Freight		In Ballast	
	No	Tonnage	No	Tonnage	No	Tonnage	No	Tonnage
German	44,723	19,367,036	11,877	2,480,747	52,112	18,279,637	5,422	2,937,606

¹ Inclusive of Altona and Harburg Wilhelmsburg

During the calendar year 1931 there passed in transit through the Kaiser Wilhelm (Kiel) Canal 48,286 merchant vessels, aggregating 17,757,136 net tons

Internal Communications.

I RAILWAYS.

On April 1, 1920, all the various German State railways were transferred to the Central Government. On October 11, 1924, as a result of the adoption of the Dawes Scheme, the German railway system was transferred to a private company—the Deutsche Reichsbahn Gesellschaft—which manages and administers the system. The railways, however, remain the property of the State. The total length of railway line was 58,850 kilometres, or 36,257 miles on December 31, 1931. Of this total 58,826 kilometres, or 33,447 miles are State lines.

In 1931, 325,551,668 tons of merchandise including free hauled were carried by the Deutsche Reichsbahn Gesellschaft. The number of passengers (including military) was 1,578 million, who travelled 36,922 million kilometres, an average of 23.4 kilometres per journey per passenger.

On December 31, 1930, there were 3,997 miles of tramway, and 6,050 miles of light local railways.

II CANALS AND NAVIGATION AND AIRWAYS

The length of inland waterways in 1931 was 12,371 kilometres, or 7,689 miles. Of this total 10,020 kilometres or 6,228 miles are rivers or canalised rivers, and 2,351 kilometres or 1,461 miles are canals. The inland waterways fleet at the end of 1931 comprised 18,931 vessels of 6,688,189 tons. In 1931, 86,893,000 tons of goods were carried on the inland waterways.

Air traffic for 3 years —

Year	Miles Flown	Passengers	Passenger Miles	Goods Traffic	Air Mail
				Tons	Tons
1929	6,475,264	96,835	14,785,208	2,070.8	385.8
1930	6,750,653	93,677	14,799,498	2,176.0	481.0
1931	6,424,068	98,167	15,946,524	2,280.8	405.9

III POSTS AND TELEGRAPHS

The postal and telegraphic services are retained in the hands of the Central Government.

Statistics for 1931 — Employees, 358,978, total number of post, telegraph, telephone, and radio offices, 60,950.

The following are the telegraph and telephone statistics for the year 1931 — Length of telegraph lines, 172,100 kilometres or 106,960 miles, of wire, 5,568,600 kilometres or 3,460,910 miles, number of foreign telegrams, 12,835,000, of inland telegrams, 14,162,000, including official service telegrams. Length of telephone lines, 219,800 kilometres or 136,600 miles, of wire, 18,420,700 kilometres or 11,448,500 miles, number of telephone boxes, 3,113,700, of telephone connections, 2,377,500,000.

International cable service is provided by the Deutsch Atlantischen Telegraphengesellschaft, which operates cables via Emden, the Azores, and Emden-Vigo.

Currency, Banking and Credit.

By the Currency Law of August 30, 1924, which came into operation on October 11, 1924, the currency was once more established on a gold basis, with the following gold coins as legal tender 20 and 10 Reichsmark pieces. Provision was also made for silver coins of 1, 2, 3 and 5 marks, and for 1, 2, 4, 5, 10, and 50 pfennig. The notes of the Reichsbank (10 marks and upwards) are likewise legal tender, they have a minimum cover of 40 per cent of their face value in gold and foreign exchange, three quarters of this cover must consist of gold and the remainder of good commercial paper, complying with specified conditions. For the present the convertibility of these notes is practically suspended. Besides the Reichsbank there are the four so called 'private note banks' (1) Bayerische Notenbank, in Munich, (2) Sächsische Bank, in Dresden, (3) Württembergische Notenbank, in Stuttgart, and (4) Badische Bank, in Karlsruhe, which also have the right of issuing notes (50 marks and upwards), on the same terms as the Reichsbank. They may issue notes up to a total of 194 million Reichsmarks.

On October 16, 1923, a proposal was adopted for the setting up of a Renten Bank to issue notes (Rentenmark) secured (since August 30, 1924) by first mortgages in gold marks on the entire German landed property.

On September 30, 1932, there were in circulation Reichsbank notes to the value of 3,741 8 million marks, 'Private Bank' notes (*see above*), 181 8 million marks, notes of the Rentenbank (all of which must be withdrawn by the Reichsbank within 10 years), 411 8 million marks, and coins 1,527 3 million marks, making a total of 5,862 6 million marks.

The condition of the Reichsbank of Germany on February 15, 1933, is shown as follows (in thousands of marks) —

Assets	Amount February 15, 1933	Liabilities	Amount February 15, 1933
Gold	822,883	Capital and reserves	567,426
Bills and cheques	2,317,899	Notes	3,179,744
Loans	76,741	Other liabilities	1,123,018

By the Bank Law of August 30, 1924, the privileges of the Reichsbank were renewed for 50 years.

The Renten Bank commenced operations on November 15, 1923, it is now in liquidation and the process is expected to be completed by April 11, 1935 at latest. On September 30, 1932, its only credits outstanding were those to the Central Government, which amounted to 427 1 million Rentenmarks. The Renten Bank had issued notes to the value of 427 1 million Rentenmarks, of which the Reichsbank had 15 3 million Rentenmarks, cash in hand, and the rest (411 8 million Rentenmarks) were in general circulation.

By a law of March 19, 1924, there was established the German Gold Discount Bank (Deutsche Golddiscountbank) for the purpose of providing foreign currencies for German business. The capital of the institution is 10 millions sterling, one half provided by the Reichsbank (with the aid of English credits), the other half, from private sources, is not wholly paid up. On December 31, 1932, the German Savings Banks had deposits amounting to 9,788 0 million Reichsmarks.

The capital of the Reichsbank is 150,000,000 Reichsmarks.

Money, Weights, and Measures.

The *Reichsmark*, of 100 *Reichspfennig*, is of the normal value of 11½d, or 20 43 *Reichsmark* to the pound sterling. It contains 0 358423 grammes of gold. The metric system of weights and measures is in force.

Diplomatic Representatives.

1 OF GERMANY IN GREAT BRITAIN

Ambassador — Dr Leopold von Hoesch Appointed September 23, 1932
Counsellor — Albrecht Graf von Bernstorff
First Secretaries — Ernst H Kuter and Otto Furst von Bismarck.
Second Secretaries — Dr Gunter Henle, Dr Theodor Auer and Dr Albert Hilger van Scherpenberg
Third Secretary — Dr Werner von Fries
Military Attaché — Colonel Freiherr Geyr von Schweppenburg
Chancellor — F W Achilles

2 OF GREAT BRITAIN IN GERMANY.

Ambassador — The Rt Hon. Sir Horace George Montagu Rumbold, Bart , G.C.M.G., M.V.O. Appointed August 1, 1928
Counsellor — B C Newton, C.M.G.
First Secretary — A F Yencken, M.C.
Second Secretary — W I Mallet
Third Secretary — E D Sandys
Naval Attaché — Commander M A Hawes, R.N.
Military Attaché — Col A F A N Thorne, C.M.G., D.S.O.
Air Attaché — Wing Commander J H Herring, D.S.O., M.C.
Commercial Counsellor — J W F Thelwall, C.M.G., M.C.
Commercial Secretary — R P F Edwards, D.S.O.
Press Officer (First Secretary) — T F Breen, M.C.
Financial Adviser — G H S Pinsent

There are consular officers at Berlin (C), Cologne (C.G.), Frankfurt (C.G.), Hamburg (C.G.), Leipzig (C), Munich (C.G.), Bremen, Breslau, Chemnitz, Dresden, Essen, Hanover, Kiel, Königsberg, Lübeck, Stettin, Stuttgart

THE SAAR.

According to paragraph 49 of the Treaty of Versailles, the Saar Basin was placed under the control of the League of Nations. In 1935, the population shall decide, by plebiscite, what nationality they desire. Meanwhile the district is governed by a commission of 5 nominated by the League, of whom 1 is French, 1 resident of the Saar, and 3 others. There is also a *Landesrat* of 30 members, which co-operates with the Government in an advisory capacity.

Area Prussian Saar district, 573 sq miles, Bavarian Saar, 164 sq miles, total, 737 sq miles

Population (census of July 19, 1927) Prussian portion, 670,019, Bavarian portion, 100,011, total, 770,030 (385,679 males, and 384,351 females) Estimated population on January 1, 1931, 805,274 (404,381 males, and 400,893 females)

In 1927, there were in the area 558,857 Catholics, 201,354 Protestants, 4,038 Jews, and 5,781 others

Principal towns (census of 1927). Saarbrücken (125,020), Neunkirchen (41,031), Dudweiler (23,647), Sulzbach (22,402), St Ingbert (20,817), Saarlouis (15,836), Friedrichstal (13,908), Homburg (11,201)

Number of schools (May 1, 1931) 454, scholars, 112,626, teachers, 2,481

Revenue and expenditure, 1931, balanced at 522,730,094 francs

Production of coal, 1932, 10,438,049 metric tons, 1931, 11,367,011 metric tons, production of coke, 1931, 2,186,953 metric tons, 1930, 2,559,913 metric tons, production of pig iron 1931, 1,515,429 metric tons, 1932, 1,349,493 metric tons, of steel, 1931, 1,539,346 metric tons, 1932, 1,463,429 metric tons, of rolled steel, 1931, 1,113,762 metric tons, 1932, 994,447 metric tons

STATES OF GERMANY.

ANHALT.

(FREISTAAT ANHALT)

The Constitution of the Free State of Anhalt bears date July 18, 1919. According to the law of October 6, 1922, the government is carried on by the Ministry of State, composed of the Prime Minister (Minister President) and either one or two other ministers. At the election held on May 20, 1928, the following parties were returned: Socialists, 15, Middle Class Party, 15; Democrats, 2, Communists, 8, National Socialist, 1

Area, 893 square miles. Population, June 16th, 1925, 351,045. The capital, Dessau, 75,073 inhabitants on June 16, 1925, Bernburg, 36,167; Köthen, 26,595, Zerbst, 19,470, Rosslau, 12,520, Coswig, 10,103. Population by religion: Protestants, 320,850, Catholics, 14,129, Jews, 1,140

Estimated income and expenditure, 1931-32, 32,320,000 marks. Public debt, September 30, 1931, 26,200,000 marks, State property, March 31, 1930, 386,214,000 marks.

BADEN.

(DEMOKRATISCHER FREISTAAT BADEN)

Until 1771, Baden was a Margraviate divided into two or more lines, it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-Duke in 1806. On November 22, 1918, the Grand Duke abdicated, and the Provisional Government proclaimed Baden a Republic.

Constitution.—The Constitution of the Republic of Baden was determined by the National Assembly which met on January 5, 1919, and which was elected on the basis of equal, secret, direct, universal suffrage (with proportional representation) of all males and females over 20 years of age. According to this Constitution of March 21, 1919, the Free State of Baden is a Republic and a component state of Germany. All privileges of birth, religion, and caste are abolished. Women enjoy the same rights as men and are eligible for all public offices. There is no State or established church, but religion is taught in all schools. The right of combining is granted to all citizens, including civil servants. The Initiative and Referendum have been adopted, as also proportional representation. The suffrage is granted to all adults, male and female, who are over 20 years of age. There is only one Chamber (Landtag), the members of which are elected for 4 years. Qualified electors over 25 years of age are eligible as members of the Chamber. No fixed number of seats has been provided for, but generally one member is allocated for each 10,000 voters. The present Landtag, elected on October 27, 1929, will continue until October 27, 1933; it contains the following parties:—Centre, 35, Socialists, 18, German Democratic Party, 6, German Nationalist People's Party, 4, German People's Party (Liberals), 6, Communists, 5, Economic and Farmers' Party, 3, Evangelical People's Party, 3, National-Socialist German Labour Party, 8, total 88.

The Cabinet consists of 4 Ministers and 2 State Councillors (Minister without Portfolio), elected by the legislature. The Landtag also nominates the President of the Cabinet, who is styled officially 'State President'.

Reich Commissary of Police in Baden—Robert Wagner (Nazi) (Nominated March 10, 1933)

For general administrative purposes there are (since April 1, 1924) 40 'Amtsbezirke,' superintended by four general commissioners (Landes-Kommissare). For local government there are 11 circles (Kreise), and 1,536 communes (Gemeinden), 124 communal cities, and 1,412 parishes.

Area and Population:—

District	Area Square miles	Population		Pop per square mile 1925
		1925	1919	
Konstanz	1,610	337,508	320,265	209.6
Freiburg	1,830	599,998	574,026	322.9
Karlsruhe	993	667,653	630,808	672.8
Mannheim	1,386	707,308	670,981	510.3
Total	5,819	2,312,462	2,195,580	397.4

Population in 1925, 1,115,477 males and 1,196,985 females.

Including a part of the Lake of Constance, area is 5,889 square miles.

Principal towns, 1925 —

Mannheim	247,486	Konstanz	31,252	Lörrach	16,011
Karlsruhe	145,694	Baden	25,692	Weinheim	15,793
Freiburg	90,475	Durlach	18,016	Lahr	14,075
Pforzheim	78,859	Offenburg	16,613	Rastatt	14,003
Heidelberg	73,034	Bruchsal	16,469	Villingen	18,982

Marriages, 1931, 17,370, births, 40,687, deaths, 24,448, stillbirths, 1,012, divorces, 1,155

Religion and Education.—In 1925 there were 1,350,479 Catholics, 910,324 Protestants, 8,058 other Christians, 24,064 Jews, and 19,537 others

All religious denominations enjoy equality and self government, appointing their own clergy. The Protestant Church is governed by a synod, and its affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside Baden. The Catholic Foundations Council (Oberstiftungsrat) manages the property of the Catholic Church. The Jews, whose ecclesiastical affairs are managed by the 'Oberrat der Israeliten,' have 15 rabbinate

Instruction is general, free, and compulsory. Schools are under the authority of the State. Religious instruction, however, is provided by each denomination, but there is no compulsion to give or to receive religious instruction. Baden has 2 universities (Heidelberg and Freiburg), 1 technical high school (Karlsruhe), 1 Academy of Arts (Karlsruhe), 1 commercial high school (Mannheim), 17 gymnasias, 13 Realgymnasias, 25 Oberrealschulen, 19 Realschulen, 15 high schools for girls, 3 training colleges for teachers, and a number of technical and special schools

Finance—The budget for 1932 and 1933 fixes the revenue at 425,508,700 marks, and expenditure at 431,041,100 marks (excluding arrears of revenue from previous budgets amounting to 2,903,000 marks, and expenditure to 4,290,400 marks). Debt, September 30, 1931, 142,000,000 marks

Production and Industry—Of the total area, 2,040,807 acres are cultivable land and 1,450,914 acres are forests. In 1932 the area under cultivation was 2,063,710 acres. Oats, barley, wheat, rye and potatoes are grown. Vines in 1931, 36,360 acres, yield 10,910,812 gallons of wine, beetroot, turnips, hemp, hops and chicory are also grown. Tobacco area in 1932, 13,022 acres. The corn crop in 1932 was 427,076 metric tons. The number of animals in 1931 was: cattle, 653,602, pigs, 523,146, sheep, 40,851, goats, 103,251, horses, 65,218. Mineral produce almost solely salt, potash and building-stone

Principal manufactures: Tiles, cigars, jewellery, machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tissues, paper and cardboard, leather, wood work, and brushes

BAVARIA.

(FREISTAAT BAYERN)

Bavaria was for over a century a kingdom, ruled by descendants of the ancient Counts of Wittelsbach, who flourished in the twelfth century Duke Maximilian I of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the Thirty Years' War, and Elector Maximilian Joseph was raised to the rank of king by Napoleon I in 1805 On November 22, 1918, the dynasty was deposed, and Bavaria was declared a Republic

Constitution and Government—On the outbreak of the Revolution the Government was taken over by a Cabinet under the leadership of Kurt Eisner, an Independent Socialist Eisner was assassinated in February, 1919, and a struggle ensued between the extremists of the Left, who proclaimed themselves Bolsheviks, and their more moderate opponents, with varying success on either side By May, 1919, the moderate party had returned to power

The constitution of August 14, 1919, establishes the Free State of Bavaria The supreme power lies with the people The Diet consists of one Chamber, elected for 4 years on the basis of 1 member for every 62,000 inhabitants, at present there are 128 members The suffrage is universal, equal, direct, secret and proportional All citizens over 20 years of age have the vote The supreme executive power is exercised by the Ministry as a whole All privileges of birth and caste are abolished The Church is separated from the State All religious associations have equal rights, and are free in their activities

State of parties in the Bavarian Landtag (elected April 24, 1932)
 Bavarian People's Party, 45, Social Democrats, 20, National Socialists, 43, German Nationalists, 3, Bavarian Peasants' and Middle Class Union, 9, Communists, 8

On March 10, 1933, the Nazis seized power from the then existing cabinet, and appointed General Franz von Epp Police Commissary for Bavaria He has appointed members of his party to executive posts as follows —

Special Commissaries — Captain *Boehm* and Herr *Esser*
Commissary in the Ministry of Finance — Herr *Siebert*
Commissary in the Ministry of Justice — Dr *Frank*

Area and Population —

Regierungsbezirke	Area, Eng sq miles	Population		Pop per sq mile 1925
		1919	1925

BREMEN.

(FREIE HANSESTADT BREMEN)

Bremen is a Free State, with a Constitution adopted on May 15, 1920. The highest power in the State is exercised by the House of Burgesses (Bürgerschaft), consisting of 120 members, elected on a democratic basis by all citizens of the State. The Bürgerschaft elects the Senate of 8 members as the Executive body. Two Bürgermeister chosen from the members of the Senate preside over the deliberations of that body.

The results of the elections for the House of Burgesses held on November 30, 1930, were: United Socialists, 40; National Socialists (Fascists), 32; Communists, 12; Democrats, 5; German People's Party, 16; German National People's Party, 5; Centre, 2; Property Owners, 5; Economic Party, 2; Conservatives, 1.

Area, 99 square miles; population (1925), 338,846 (164,949 males and 173,897 females).

On June 16, 1925, Bremen contained 292,126 Protestants (86.2 per cent), 21,871 Roman Catholics (6.5 per cent), 243 other Christians, 1,508 Jews, others 23,098 (6.8 per cent). In January, 1932, Bremen (town) had 309,378 inhabitants and Bremerhaven 26,170. In Bremen (town) marriages in 1931, 2,779; births, 4,517; deaths, 3,421; excess of births, 1,096; divorces, 386.

Bremen contains two Amtsgerichte and a Landgericht, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

For 1929 the ordinary revenue was 108,602,928 reichsmarks, and expenditure 108,616,668 reichsmarks. Public debt on September 30, 1931, 232,400,000 reichsmarks.

Next to Hamburg, Bremen is the largest port for the international trade of Germany. In 1931, 5,934 vessels, 8,219,444 tons, entered and 6,216 vessels, 8,229,816 tons, cleared. Principal shipping companies, Norddeutscher Lloyd, 'Hansa,' and 'Neptun'.

Railways, 31 miles, owned and worked by the State.

PRUSSIA.

(FREISTAAT PREUSSEN)

On November 13, 1918, Prussia was proclaimed a Republic

Until that date the country was ruled by sovereigns of the Hohenzollern family, the last of the line being William II (1888-1918) For an account of the rise of Prussia, see THE STATESMAN'S YEAR BOOK for 1922, p 973

Constitution and Government

The Constitution, adopted on November 30, 1920, gives a vote to every citizen, male and female, over 20 years of age in general, equal, secret, and direct suffrage Prussia is declared to be a Republic Besides the Diet (*Landtag*) there is a State Council (*Staatsrat*) elected by the Provincial Assemblies on the basis of one representative for every 500,000 inhabitants The function of the State Council is to advise the Diet, and is intended to be a kind of parallel institution to the Reichsrat in the Empire The Diet elects the Premier, and he appoints the other members of the Cabinet The Diet is elected for 4 years on the principle of proportional representation by secret and direct ballot

The Prussian Constituent National Assembly, elected by universal, equal, and secret suffrage of men and women, met on March 14, 1919

On March 5, 1933, the elections were held for a Parliament, and resulted in the return of the following parties 211 National Socialists, 80 Social Democrats, 68 Centre, 63 Communists, 43 German National People's Party, 6 German People's Party, 3 German State Party, 6 Christian Social People's Service Total, 474

The Nazis seized the Government of Prussia on January 30, 1933

Reich Commissioner for Prussia — Franz von Papen

Deputy Commissioner for the Interior — Captain Hermann Goring (Nazi)

Commissary for Agriculture, Domains, and Forests — Dr Hugenberg

Commissary for Education — Herr Rust (Nazi)

For local government Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*) According to the Constitution, there are 14 Provinces. Urban circles consist of towns of over 25,000 inhabitants, rural circles consist of the smaller towns and rural communes (*Landgemeinden*) For provinces and rural circles the local authorities of the constituent areas elect assemblies which appoint executive committees Each province has a governor (*Oberpräsident*), each government district has a president, and deals chiefly with local affairs of State concern In towns the deliberative authority is the town council (*Stadtverordnetenversammlung*), elected on the system of proportional suffrage The executive is a magistracy with the burgomaster as president Each rural circle has a *Landrat*. Local administrative business varies according to the nature of the administrative division The matters dealt with are such as poor relief, roads, light rail ways, etc, but in rural districts they include agricultural interests, and in towns, education, sick-insurance, valuation, collection of certain taxes, management of gas, water, and electric works, etc

Area and Population.¹

I PROGRESS AND PRESENT CONDITION

Provinces	Area Square Miles ^a	Population		Pop per Square Mile (ex cluding Haffe) 1925
		October 8, 1919	June 16, 1925	
East Prussia (Ostpreussen)	15,061	2,228,800	2,256,349	158 0
Brandenburg	15,072	2,445,612	2,592,292	172.0
Berlin	341	3 803,785	4,024 286	11,801 4
Pomerania (Pommern)	11,986	1,787,179	1,878,781	160 8
Border Province (Grenzmark Posen—Westpreussen)	2,978	324,796	332,485	111 6
Lower Silesia (Niederschlesien)	10,267	2,988,541	3,132,135	305 1
Upper Silesia (Oberschlesien)	3,750	1,299,144	1 379,408	367 8
Saxony (Sachsen)	9,759	3,129,193	3,277 604	335 9
Schleswig Holstein	5 819	1,4 2 668	1,519 365	261 1
Hanover (Hannover)	14,897	3,027,864	3,190 439	214 2
Westphalia (Westfalen)	7,804	4,477,482	4,784,169	618.0
Hessen Nassau (including Wal deck)	6,471	2,329,501	2,452,748	379 0
Rhine (Rheinprovinz)	9,462	6,779,914	7,284,028	769 8
Hohenzollern (Hohenzollerische Lande)	441	70,751	71,840	162 9
Total	114,108	86 154,750	88 175 999	387 8

¹ Of the area as at June 16, 1925, exclusive of the Saar (574 square miles), where the census in 1925 could not be taken

^a Including Haffe, East Prussia, 779 sq miles, Pomerania, 800 sq miles, total, 1,079 sq miles

Waldeck was absorbed by Prussia on April 1, 1929

As a result of the Treaty of Versailles, Prussia has lost territory to the extent of 21,646 square miles and a population of 4,601,626 (according to the census of December 1, 1910)

Development of Prussia since 1875:—

Year	Area in Sq Miles (excluding Haffe)	Population	Average per Sq Mile	Percentage of Annual Increase
1875	184,179	25,742,404	191 8	—
1900	184,622	34,472,509	256 1	1 86
1906	185,134	37,293,824	275.9	1 04
1910 ¹	185,184	40,165,219	297 0	1 54
1910 ²	112,626	34,991,539	310 7	—
1919 ²	112,626	36,088,298	320 4	0 85
1925	112,680	38,120,178	338 5	0.98

¹ For Prussia as it was in 1910

² For Prussia as it was on June 16, 1925, exclusive of the Saar

II MOVEMENT OF THE POPULATION

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths incl Still born	Surplus of Births
1927	888 245	788,824	24,558	80,180	486,496	+252,828
1928	862,017	749,499	24,255	79,999	478,904	+275,585
1929	865,221	735,299	23 808	76,107	517,845	+207,954
1930	850,347	718 822	22,991	73,705	454,516	+258,806
1931	825,056	665,884	20,622	66,835	461,432	+198,902

In 1931, 2.63 per cent. of the total births in rural districts and 3.61 per cent in urban areas were stillborn, and 8.20 per cent. in rural districts

and 11.82 per cent in urban areas were illegitimate Divorces in 1931, 25,646

Principal towns with population in 1925 According to the area on July 1, 1932 —

born	421,217				

Religion.

Absolute religious liberty is guaranteed in the Republic According to the census of 1925 there were in Prussia 24,804,018 Protestants (65.0 per cent), 11,943,264 Catholics (31.3 per cent), 54,664 other Christians (0.1 per cent), 404,446 Jews (1.1 per cent), and 969,597 others (2.5 per cent)

The Evangelical or Protestant Church has since October 31, 1817, consisted of a fusion of the Lutheran and Calvinistic bodies, from which, however, there are still a few dissenters It is governed by 'consistories,' or boards elected by the people There are also synods in most circles and provinces, and general synods representing the *old* provinces only The constitution of the Catholic Church differs in the various provinces As a result of the Concordat of July 1929, Berlin has its own Roman Catholic bishop There are approximately half a million Catholics in Greater Berlin out of a population of 4½ millions Altogether in Prussia there are two archbishops and ten bishops

Education

Education in Prussia is compulsory Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities All parents are compelled to have their children properly taught or to send them to one of these elementary schools, in which all fees are now abolished No compulsion exists in reference to a higher educational institution than elementary schools, but parents who send more than one child to any school supported by the community have, in many cases, a reduction made in the charge, and a limited number of pupils (about 10 per cent) whose parents cannot afford to pay the full rate, either enjoy this reduction or are admitted entirely free, at the discretion of the authorities The school age is from 6 to 14 years

The following table gives the educational statistics of Prussia —

—	No	Teaching Staff	Students or Pupils
Universities (1931-32) ¹	14	4,735 ²	54,116
Gymnasias & Progymnasias ³ (1926)	320	6,449	111,684
Realgymnasias, Realprogymnasias, and Higher Realschulen (1926)	866	8,406	162,247

¹ Including Lyceum at Braunsberg and Medical Academy at Düsseldorf

² Including teachers and scholars of preliminary schools

³ Including lecturers and special teachers

	No	Teaching Staff	Students or Pupils

Agricultural schools	14	189	3,345
Other preparatory institutions	21	225	1,701

¹ Including teachers and scholars of preliminary schools

² Including girls' schools not officially recognised

³ Including regular technical and assistant teachers

⁴ Including technical and assistant teachers

There are also 4 technical high schools (Berlin, Hanover, Aachen, Breslau), 2 forestry high schools (Eberswalde, Munden), 1 technical mining academy (Clausthal) (in Berlin the technical mining academy is connected with the Technical High School), 2 agricultural high schools (Berlin, Bonn-Poppelsdorf), agricultural institutes connected with universities, 2 veterinary high schools (Berlin, Hanover), a great number of other schools for various aspects of agriculture, 2 commercial high schools (Berlin, Königsberg i Pr.), 2 academies of local government work (Düsseldorf, Berlin), 15 training colleges for elementary school teachers, and 4 philosophical theological academies (Paderborn, Frankfurt (Main), Kilda, Trier), besides other special schools and State establishments for art and music.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasias, Realgymnasias, and similar schools, as also the normal schools, are maintained and administered by the Government, while all the other scholastic institutions are supported by the community, etc., under control of the Government.

Justice, Crime

Prussia contains 13 Oberlandesgerichte (*see under German Empire*). The Oberlandesgericht at Berlin is called the *Kammergericht*. The prosecution in all criminal cases is conducted by *Staatsanwälte*, or public prosecutors, paid by the State.

Finance

Revenue and expenditure for years ending March 31 —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Reichsmarks	Reichsmarks		Reichsmarks	Reichsmarks
1927-28	4,298,927,512	4,078,473,015	1930-31	4,833,510,664	4,233,233,226

¹ Estimates

Public debt on April 1, 1928, 333,605,588 Reichsmarks; 1929, 381,575,995 Reichsmarks, 1930, 531,678,497 Reichsmarks, 1931, 623,440,338 Reichsmarks; 1932, 596,378,125 Reichsmarks.

Production and Industry.**I AGRICULTURE**

The areas under the chief crops, and the yield in metric tons, for 3 years, were as follows (1 metric ton = 2,204 lbs) —

—	1929		1930		1931	
	Acres	Tons	Acres	Tons	Acres	Tons
Wheat	2,221,441	1,968,913	2,546,654	2,320,566	3,208,821	2,610,214
Rye	8,809,545	6,113,599	8,785,406	5,710,115	8,175,075	4,979,575
Summer barley	1,997,880	1,752,798	1,941,070	1,588,255	2,108,070	1,659,092
Oats	5,951,866	5,210,640	5,709,444	3,838,436	5,588,123	4,287,789
Potatoes	4,621,890	26,592,134	4,559,427	31,966,252	4,576,475	29,658,175
Hay (meadow)	6,921,258	9,504,358	6,900,766	11,569,398	6,885,122	11,812,656

In 1931 there were vineyards on 38,377 acres, yielding 14,770,595 gallons of wine, valued at 17,137,326 Reichsmarks, hops on 40 acres, yielding 111 tons. On December 1, 1931, Prussia (excluding the ceded territories) contained livestock comprising 10,787,707 cattle, 2,310,216 sheep, 16,226,451 swine, 1,484,481 goats, 2,376,710 horses, and 59,075,833 head of poultry.

II MINERALS

Quantities (in metric tons) and values (in marks) of the coal and iron ore raised in 3 years —

—	1929		1930		1931	
	Tons	Reichsmarks	Tons	Reichsmarks	Tons	Reichsmarks
Coal	159,130,474	2,398,074,050	138,995,363	2,062,966,728	115,351,758	1,494,799,528
Lignite	148,895,711	395,506,078	128,556,484	331,820,183	111,368,437	283,694,396
Iron ore	4,308,867	43,823,269	3,786,063	41,558,209	1,709,927	20,106,716
Salt	1,534,134	12,042,536	1,366,064	10,610,020	1,091,196	8,780,910

In 1931 the numbers employed in and about mines in Prussia were underground workers, 228,142, surface workers, 129,241, total 357,383.

Internal Communications—Since April 1, 1920, the Prussian railways (as of the other Federal States) have been taken over by the *Reich*. On December 31, 1930, the railways of the German Republic in Prussia (excluding the Saar) were Deutsche Reichsbahn 31,714 kilometer, private railways 2,599 kilometer, total, 34,313 kilometer.

Savings Banks.—In 1930 there were 1,389 savings banks in Prussia. The deposits amounted on December 31, 1930, to 6,644,080,000 reichsmarks.

SAXONY

(FREISTAAT SACHSEN)

The former Kingdom of Saxony was proclaimed a Republic on November 9, 1918

Constitution and Government.—The Constitution of the Republic bears date October 26, 1920 The Diet was elected on June 22, 1930, and is composed of 32 German Social-Democratic Party, 5 German State Party, 5 German National Party, 5 Saxon Farmers' Party, 8 members of the German People's Party, 13 Communists, 10 Middle Class Party, 2 People's Rights Party, 14 Hitlerites, and 2 Christian-Social People Service

Reich Commissary of Police—Herr von *Killingner* (Nazi) (Appointed March 10, 1933)

Area and Population —

Governmental Divisions	Area, English Sq Miles	Population		Population per Sq Mile 1925
		Dec. 1919	June 16, 1925 ¹	
Dresden	1,674	1,826,262	1,893,026	831.9
Leipzig	1,377	1,223,748	1,807,256	949.4
Bautzen.	958	433,011	461,155	483.6
Chemnitz	804	890,731	980,838	1219.9
Zwickau	978	796,559	852,006	871.2
Total	5,786	4,670,311	4,994,281	863.2

¹ These figures refer to the new area resulting from certain exchanges of territory made with Thuringia on April 1, 1928.

Of the population, according to the census of June 16, 1925, 2,373,955 were males and 2,621,226 females. Children under 15 numbered 1,260,659, married adults, 2,182,004

The growth of the population is shown in the following table.—

Year	Population	Density per Sq Mile	Annual Increase per Cent	Year	Population	Density per Sq Mile	Annual Increase per Cent
1885	3,182,008	548	1 41	1910	4,806,661	880 6	1 82
1895	3,787,688	654 5	1 68	1919	4,670 811	805 8	—
1905	4 508,601	779 1	1 46	1925	4,994 281	863 2	0 26(1910)

The movement of the population is shown in the following table —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus (+) or Decrease (—) of Births
1928	51,023	84,785	3,256	18,193	54,987	+26,492
1929	50,425	88,681	3,052	18,033	61 013	+19,566
1930	45,112	78,799	2,875	16,952	52,788	+23,141
1931	38,158	68,270	2,500	15,088	53,859	+11,911

Divorces in 1929, 3,585

The population of the principal towns was, on June 16, 1925 —

Leipzig	684,728	Zittau	38,353	Riesa	24,928
Dresden	625,016	Freital	36,558	Aue	24 702
Chemnitz	335,982	Freiberg	34,742	Meerane	24,341
Plauen	111,436	Pirna	31,215	Planitz	24,004
Zwickau	80 358	Reichenbach	30,841	Dobeln	23,495
Meissen	45,485	Glauchau	29,135	Werdau	21,047
Bautzen	40,385	Crimmitschau	27,119		

Religion—The vast majority of the inhabitants of Saxony are Protestants. In 1925, there were, Protestants, 4,507,654 (90 per cent), Roman Catholics, 179,549 (3 per cent), other Christians, 9,688, Jews, 23,252 (0 4 per cent). Of the Lutheran Church, the chief governing body is the 'Landes-Consistorium' or National Consistory at Dresden, and it also has a representative Synod (*Synode*) with 28 clerical and 46 lay members (1927).

Education—On May 15, 1931, there were 2,105 public elementary schools with 16,950 teachers and 568,203 pupils, besides 52 private and chapter schools. In addition there were 1 technical high school at Dresden (summer term, 1932, 3,541 students), 1 Commercial College (summer term, 1932, 691), 1 mining academy at Freiberg (summer term, 1932, 170 students), further, and on May, 15, 1930 18 Gymnasias, 23 Realgymnasias, 19 'Oberrealschulen', 37 other high schools, 15 higher girls' schools and 'Studienanstalten', altogether 112 educational establishments, exclusive of the University and a large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany (summer term, 1932, 7,075 students) *See under Germany*

Justice and Crime.—Saxony has one 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 112 'Amtsgerichte'. The 'Reichsgericht' has its seat at Leipzig. In 1930, 66,277 persons were convicted of criminal offences.

Finance.—The following table shows revenue and expenditure for five financial budget periods ending March 31.

	1928-29	1929 30	1930-31	1931-32	1932-33 ¹
	Rm	Rm	Rm	Rm	Rm
Revenue	448,590,414	433,841,038	411,355,289	332,901,000	345 932,380
Expenditure	444,461,583	440,003,597	425,076,876	355,080,000	345,932,380
Extraordinary budget	47,421 597	49,566,125	58,579,624	23 268,000	16,500,000

¹ Estimate

Debt, September 30, 1931, 299,200,000 marks.

Production and Industry.—Saxony is, in proportion to its size, the busiest industrial State in the German Republic, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the principal branch of industry, but mining and metal working are also important. According to the Industrial Census of June 16, 1925, Saxony had 391,447 industrial establishments with 2,144,197 workpeople (743,311 women).

In 1932, of the total area, 2,486,274 acres were under cultivation, viz. — 1,875,994 acres (75.45 per cent) arable, 441,128 acres (17.74 per cent) meadow, 115,850 acres (4.66 per cent) orchards and gardens, 52,904 acres (2.13 per cent) pasture, and the rest vineyards.

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lbs) in 1932 — wheat, 263,714 acres (282,640 tons), rye, 402,795 acres (366,346 tons), barley, 89,371 acres (94,452 tons), oats, 367,030 acres (375,340 tons), potatoes, 268,869 acres (2,046,399 tons), meadow, 441,128 acres (hay, 855,217 tons). The census of live-stock taken in December, 1931, showed 143,393 horses, 716,828 cattle, 859,115 pigs, 131,817 goats, and 64,174 sheep.

The following shows the mining statistics for five years —

Year	Coal Mines					Other Mines			Total		
	No of Mines	Hands	Production in metric tons		Value in 1,000 reichs marks	No of Mines ¹	Hands	Produce in 1,000 reichs marks	No of Mines	Hands	Produce in 1,000 reichs marks
			Coal	Lignite							
1927	61	30,864	4,032,000	10,754,000	102,501	15	347	953	76	31,211	110,454
1928	57	30,260	4,042,000	11,937,000	118,856	15	273	578	72	30,583	119,434
1929	54	31,912	4,177,000	12,968,000	126,565	15	225	455	69	32,137	126,966
	52	27,420	3,564,000	11,555,000	106,408	18	161	238	70	27,590	106,646
1930	50	23,412	3,146,000	11,384,000	90,780	15	137	174	65	23,549	90,964
1931											

¹ Exclusive of mines not worked.

In 1931–32, 138 breweries produced 59,298,547 gallons of beer.

In 1931 there were 354 savings banks having to the credit of their depositors at the end of the year, 647,152,000 Reichsmarks.

THURINGIA

(LAND THURINGEN)

The seven Thuringian States after much negotiation, which commenced in May, 1919, and ended on December 24, 1919, combined into one State. The two Republics of Reuss had by a law of April 4, 1919, already been merged into the one People's State of Reuss, and Coburg had elected to merge with Bavaria. On March 31, 1922, the 'Administrative Districts' (*Gebietsregierungen*) of Thuringia were abolished, and instead the country was divided into 10 town and 15 country Districts (*Kreise*) and one sub-district (*Kreisabteilung*).

The elections to the first Diet of Thuringia were held in June, 1920, and the Diet adopted the Constitution on March 11, 1921. At the election on July 31, 1932, the following parties were returned: National Socialists, 26, Social Democrats, 15, Christian National Peasant Party, 6, Communists, 10, German National People's Party, 2, German People's Party, 1, Democrats, 1, total, 61.

President of the State Council—Herr Sauckel

Area and Population.—The following table shows the area and population of the political districts—

WÜRTTEMBERG.

(VOLKSTAAT WÜRTTEMBERG)

Württemberg was proclaimed a People's Republic in November, 1918
State President and Minister of the Interior —Herr Murr (Nazi) (Appointed March 15, 1933).

Constitution and Government.—The constitution of the Republic of Württemberg bears date September 25, 1919. The supreme power in the State is vested in the Landtag composed of 80 members elected by universal suffrage for 4 years, in accordance with the electoral law of April 4, 1924. The Landtag appoints the State Ministry, the President of which is styled 'State President'.

The Diet which was elected on April 24, 1932, is composed as follows — Right, 12, Centre, 17, Social Democrats, 14, Communists, 7, Democrats, 4, Christlicher Volksdienst, 3, National Socialist, 23.

For administrative purposes the country is divided into the City of Stuttgart, 61 districts (Oberämter), and 1,875 communes (Gemeinden).

Area and Population —

Districts	Area in Sq Miles	Population		Population per Sq Mile 1925
		1919	1925	
Neckar	1,285	980,114	964,586	756.3
Black Forest (Schwarzwald)	1,844	583,524	595,508	322.9
Jagst	1,984	421,391	426,394	210.9
Danube (Donau)	2,417	591,142	593,747	245.5
Total	7,530	2,526,171	2,580,235	342.5

In 1925, there were 1,243,507 males and 1,336,728 females.

In 1925, 1,372,862 or 53.2 per cent, lived in communes of 2,000 inhabitants and upwards, and 1,207,873, or 46.8 per cent, in other communes. Foreigners, 15,578 and Stateless, 418 in 1925.

The movement of the population for three years was —

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1929	22,978	48,031	1,142	5,191	32,618	15,413
1930	22,373	47,850	1,163	5,343	30,913	16,937
1931	19,893	44,293	1,072	4,727	31,630	12,663

Divorces in 1930, 1,083.

The population in 1925 of the largest towns was as follows —

Stuttgart ¹	363,532	Göppingen	22,017	Ravensburg	17,012
Ulm ¹	59,357	Feuerbach ¹	21,055	Tuttlingen	16,281

GREECE.

(HELLENIC REPUBLIC.)

GREECE gained her independence from Turkey in 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the guarantee of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three guaranteeing Powers, of King George I. George I, who was assassinated on March 18, 1913, was succeeded by his son Constantine, who reigned until June 11, 1917, when he was excluded from the throne by the allied Powers. Alexandros, second son of King Constantine, then reigned till his death on October 25, 1920. Constantine returned to Greece on December 19, 1920, reigned until his abdication on September 27, 1922, and died in exile on January 11, 1923. He was succeeded by his eldest son George II, who was forced to leave Greece on December 18, 1923.

Constitution and Government.

By a *plébiscite* on April 13, 1924, the Republic was established. In the voting 758,742 votes were for a Republic and 325,322 votes against. A new Constitution was published on September 22, 1926. It was revised by the Chamber elected on November 7, 1926. The new constitution was published on June 3, 1927. According to the constitution the President of the Republic is elected every five years by the Chamber and the Senate. The Chamber of deputies is composed of 200 to 250 members elected every four years by universal suffrage. The Senate is composed of 120 Senators, of whom nine twelfths, at least, are elected by the people every nine years, the remainder may be elected by the Chamber and the Senate in a common meeting. By a decree dated January 31, 1930, women were granted the right to vote at municipal elections.

President of the Republic — Alexander Zaïmis (elected December 14, 1929)

Elections to the Chamber were held on March 5, 1933, with the following result. Liberals and National Union (Venezelist), 111, Popular Party, 135. The Ministry, constituted on March 10, 1933, is as follows —

Premier — P. Tsaldaris

Minister of Finance — Spyridion Louvaridos

Minister for Foreign Affairs — D. Maximos.

Minister of War — George Kondylis

Ministe of Marine — Alexandre Chatzikyriakos

Minister of the Interior — Jean Rallis

Minister of Agriculture — Jean Theotokis.

Minister of Justice —S. Tsiadouras

Minister of National Economy —George Pasmaglou

Minister of Communications and of Aviation —Peter Rallis

Minister of Education —T. Turkovassilis

Minister of Public Welfare and Minister of Health —J. Makropoulos

Area and Population.

The total area of the country is 130,199 square kilometres or 50,257 square miles, of which the mainland accounts for 41,641 square miles and the islands account for 8,616 square miles

The population of the country, according to the Census of May 15, 1928, is as follows by geographical and administrative divisions

Administrative division	Area in sq miles	Population	Administrative division	Area in sq miles	Population
Central Greece and Euboea	9,646	1,502,842	Macedonia	13,466	1,412,477
Thessaly	5,142	493,213	Epirus	3,604	312,634
Ionian Islands	740	219,157	Aegean Islands	1,510	307,734
Cyclades	994	129,702	Crete	3,195	336,427
Peloponnese	8,600	1,053,327	Western Thrace	3,860	303,171

The following table shows the Departments in the Administrative divisions —

Department	Population	Capital	Population of Capital
<i>Central Greece and Euboea—</i>			
Aetolia and Trianaia	220,055	Missolonghi	9,270
Attica and Boeotia	1,024,867	Athens	452,919

Evros	122,730	Alexandroupolis	12,009
Rhodope	180,441	Komotene	30,136
	6,204,684		

There were 3,076,235 males and 3,128,449 females according to the 1928 census, while the urban population was shown as 33 per cent, and rural population 67 per cent. On December 31, 1931, the population was estimated at 6,480,000.

The changes in the area and in the growth of the population of Greece are shown in the following figures —

Year	Area in sq km	Population	Year	Area in sq km	Population
1828	47,516	758 400	1889 ¹	68,606	2,187 208
1838	47,516	752,077	1907 ²	63,211	2,631,952
1848	47,516	986,731	1920 ³	150,893	5,531,474
1870 ⁴	50,211	1,457,894	1928 ⁵	130,199	6,204,684

¹ Ionian Islands annexed in 1864

² Thessaly and Arta annexed in 1881

³ A strip of Territory ceded to Turkey in 1897

⁴ Macedonia, Epirus, Crete and the Aegean Islands annexed in 1913-14, and Thrace, Imbros and Tenedos in 1919-20

⁵ Eastern Thrace, Imbros and Tenedos ceded to Turkey in 1923

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice, is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), and Serbian (1) monasteries and hermitages (*Sketari*). The monks and the novices till the fields, tend the vineyards, take in the harvest, fish, weave, transact business in their own shops, and, indeed, carry on the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has in the course of time grown to a religious colony of 4,858 males (Census of 1928), distributed in 20 monasteries with their respective dependencies, and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots elected by the brethren of the monastery, while the 'idiorhythmic' monasteries are administered by a board of overseers (*epitropoi*) elected for a certain term of years. For centuries the peninsula was administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery. The Greek government on September 10, 1926, recog-

nized the autonomous form of government existing in Mount Athos for centuries and ratified it by Articles 106–109 of the Constitution. It has also sanctioned by a law the Charter of Mount Athos, which was drawn up at the extraordinary double meeting held by representatives of its 20 monasteries on May 20, 1924.

Since 1925, there has been a fiscal Free Zone in the town of Salonika covering an area of 245,180 square yards on land and 188,968 square yards on water. Since 1924 there has been a Yugoslav Free Zone in the port of Salonika with an area of 78,536 square yards on land and 40,119 square yards on water with 909 miles of railway.

Vital statistics for 3 years —

Year	Living Births	Marriages	Deaths	Surplus of births over deaths
1929	181,870	44,450	115,511	66,359
1930	199,365	44,649	103,811	95,754
1931	198,654	45,189	114,225	84,429

Religion.

According to the census of 1928, there were 5,961,529 adherents of the Greek Orthodox Church, 35,182 Catholics, 9,003 Protestants, 126,017 Mussulmans, 72,791 Jews and 162 belonging to other religions. By the terms of the Constitution of 1864, the Greek Orthodox Church was declared the religion of the State, but complete toleration and liberty of worship was guaranteed to all other sects. The government of the Orthodox Church is at present vested in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens as president and 8 bishops, who must during their year of office reside at Athens. The Orthodox Church has 33 archbishops in the old territory and 47 archbishops and 7 bishops in the new territories. By agreement with the Ecumenical Patriarchate of Constantinople in 1929 the sees within the spiritual jurisdiction of the latter in the new territories were provisionally attached to that of the Holy Synod of Athens for convenience in administration.

Education

All children between the ages of seven and twelve years must attend school, but the law is not well enforced in country districts.

There were (1929–30) 520 infant schools with 522 teachers and 43,284 pupils (23,525 boys and 19,759 girls), 7,570 primary schools with 13,468 teachers and 652,969 pupils (390,077 boys and 262,892 girls). For secondary education there were 511 high schools with 2,993 teachers and 79,297 pupils (58,703 boys and 20,594 girls). There were 26 commercial schools with 288 teachers and 3,279 pupils (2,500 boys and 779 girls). There are 22 agricultural schools with 112 teachers and 773 pupils. There were also 8 seminaries with 98 teachers and 937 pupils. There were also 1 commercial high school with 22 professors and teachers and 465 students (441 boys and 24 girls), 1 agricultural high school with 20 professors and teachers and 143 students (142 men and 1 woman), 4 military colleges with 78 professors and teachers and 1,006 students, 10 practical schools for officers with 169 teachers and 749 students, and 2 other inferior military schools with 31 teachers and 815 pupils. Also 2 naval colleges with 45 teachers and professors and 78 students, and 11 other inferior naval schools with 77 teachers and 1,660 pupils. There were also 3 aviation schools with 45 teachers and 245 pupils.

There are 2 universities in Athens, the National University (founded 1836) and the Capodistria University, with 122 professors and 6,195 students (5,676 men and 519 women), and 1 at Salonika (founded in 1925), with 37 professors and 566 students (512 men and 54 women). The Polytechnic, with 5 faculties, 40 professors and 512 students (511 men and 1 woman), provides instruction in electricity, chemistry, mechanics, architecture, surveying. The School of Fine Arts provides instruction in painting, sculpture, etc., with 11 professors and 250 students (128 boys and 122 girls).

The Ministry of Education is also charged with the Service of Antiquities, managed by an Archæological Council, which is responsible for the conservation and reparation of ancient monuments of all periods (Prehistoric, Classical, Byzantine and Mediæval), the upkeep of museums and the conduct of excavations.

British scholarship is represented in Athens by the British School of Archæology, which, by the aid of grants from the Government, universities, and private subscribers, is able to encourage and carry out scientific research of all kinds, but especially art, archæology and history. Members of the school have in recent years been responsible for the excavations at Knossos, in Crete, in Melos, at Sparta, in Thessaly, at Mycenæ, and elsewhere. There are also similar French, American, Italian, Austrian and German institutions.

Finance.

The estimates of revenue and expenditure for 6 years are as follows —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Drachmai	Drachmai		Drachmai	Drachmai
1927-28	8,837,869,000	9,121,845,000	1930-31	10,841,596,153	10,332,867,544
1928-29	11,114,652,838	10,974,623,833	1931-32	10,340,512,038	10,234,258,924
1929-30	9,866,875,918	9,847,876,962	1932-33	8,676,294,740	8,673,512,592

Particulars of the budgets for 1931-32 and 1932-33 are given as follows

Revenue	1931-32	1932-33	Expenditure	1931-32	1932-33
	Thousands drachmai	Thousands drachmai		Thousands drachmai	Thousands drachmai
Ordinary			Ordinary		
Direct tax	1,722,982	1,425,278	Public debt interest	2,675,840	1,104,342
Indirect tax	5,242,141	4,464,982	Pensions and other obligations	652,405	711,685
Monopoly	504,985	597,590	Public security	440,243	450,402
Tax from stamps	827,633	703,601	Public works	284,232	181,961
Telegraph post and telephone	342,280	389,662	Education	644,962	658,880
Other administrations working for the State	19,951	177,173	Monopoly	141,873	152,317
Income from State property	151,501	113,416	Telegraph, post and telephone	283,575	275,092
Other ordinary revenues	805,069	343,235	Army and navy	1,424,873	1,356,306
Total	9,616,442	8,214,937	Expenses of other administrations	2,023,032	1,899,906
Extraordinary	892,250	202,413	Air Force	—	141,090
Loan	281,830	240,000	Total	8,570,535	6,982,481
Sale of State property	—	13,945	Extraordinary	1,663,724	1,741,031
Grand total	10,240,512	8,676,295	Grand total	10,234,259	8,673,512

The total public debt of Greece amounted on December 31, 1931, to 42,844,123,795 drachmai, distributed as follows: Loans in gold, 29,504,401,111 drachmai, loans in banknotes, 5,904,143,758, floating debt, 4,686,474,692, railroad debt, 2,785,568,000 drachmai, and liabilities according to the treaty of Lausanne 13,536,235 drachmai. The service on this debt during the fiscal year ended March 31, 1931, is estimated at 3,728,861,412 drachmai.

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March, 1898, the financial commission of delegates representing France, Great Britain, and Italy (the mediating Powers) is established at Athens in direct relation with the Greek Minister of Finance. The public debt of Greece is in large measure under the control of this commission. To this commission were assigned, for the payment of the interest on the external debt, the revenues (for the most part in Old Greece) from certain Government monopolies, the stamp duty, and the import duties at the port of the Piræus. The total income from these sources was, 1932, 201,210,275 drachmai from monopolies, and 581,672,069 from the Piræus customs.

The payments made by the commission in 1931 for the service of Greek foreign debts totalled 1,181,837,574 drachmai as compared with 1,472,468,080 drachmai in 1930.

The collection of the assigned revenues and the administration of the monopolies are entrusted to a Greek Company, called the 'Société de Régie des Revenues affectés au Service de la Dette Publique,' which is under the control of the international commission.

Defence.

I ARMY.

Military service in Greece is compulsory and universal. It commences in the 21st year, and lasts up to the 50th. The normal term of service in the active army is 18 months for all arms, followed by 19 years in the first reserve of the active army and 8 years in the second. The normal annual contingent of recruits is about 60,000. Each annual contingent is called up for service in the active army in two batches on May 1 and September 1.

The country is divided into 12 military areas. To these correspond 12 divisions and 1 brigade. Moreover there are two brigades of cavalry and a number of units (telegraphists, railwaymen and engineers), as well as of Army Service Corps directly under the Minister of War. Each division contains 2 or 3 regiments of infantry (6 battalions) and one regiment of Mountain Artillery (3 or 4 batteries). The Air Force consists of 3 flying regiments each of 4 flights.

The effective strength in 1932 was 5,010 officers and the number of other ranks serving was 59,612.

The infantry is armed with the Mannlicher-Schonauer and the Lebel rifle, the polybole guns, Hotchkiss as well as French ones, and the mitrailleuses Schwarglose, St Etienne and Hotchkiss. The artillery is armed with mountain guns of 65 mm and Schneider 75 and 105 m 1919 and by field guns Schneider, M P O F and Krupp as well as with heavy short guns, Schneider 155. The budget expenditure for the army for 1930-31 amounted to 1,138,596,000 drachmai.

II NAVY.

The Greek Navy is not a force of any considerable importance The principal vessels are as follows —

—	Launched	Displacement Tons	Armour		Principal Armament	Torpedo Tubes	Horse Power	Max Speed Knots
			Belt In	Gun In				
Georgios Averoff	1910	9,960	8	6½	4 9 2 , 8 7 5in , 16 3in	3	19 000	22 5
Helle ¹	1912	2,600	—	—	3 6in , 2 3in	2	7,500	20 3

¹ Cruiser purchased 1914, originally built for China Now fitted for minelaying

There are 10 destroyers, 7 torpedo boats, 4 minelayers, 6 submarines, and a variety of miscellaneous craft The *Georgios Averoff* and *Helle* have been completely refitted and modernised

Preliminary work has been done on the new arsenal intended to take the place of the establishment at Salamis The cost of the new work was estimated at 2,800,000*l*

The services of a British naval mission to reorganize the Greek fleet were lent by the Admiralty from 1927 to 1932

Production and Industry.

Greece is mainly an agricultural country Of the total area only one fifth is cultivable The total area under cultivation in 1931 was 1,931,905 hectares (4,829,763 acres) Forest area is 2,406,502 hectares (5,944,059 acres), of which 4,121,119 acres were State owned

By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes Irrigation and drainage canals, farm roads and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved

The acreage and production of the chief crops for two years were as follows —

—	Area in Acres		Production in Metric Tons	
	1931	1932 ¹	1931	1932 ¹
Wheat	1,518,336	1,518,938	305,579	447,698
Barley	556,654	580,810	155,577	210,849
Maize	625,272	592,788	158,708	174,812
Oats	347,736	370,989	76,555	101,865
Tobacco	210,980	158,900	48,216	80,025
Cotton	46,205	71,959	9,881	—
New wine	818,902	855,704	194,587	271,206
Currants	171,964	176,876	100,000	189,140

¹ Provisional figures

Olives are abundant, about 380,000 acres being under cultivation, olive oil production in 1931 was 103,699 metric tons, valued at 1,216,661,071 drachmai, as compared with 97,326 metric tons, valued at 1,159,271,980 drachmai in 1930. Fruit production in 1931 was lemons, 76,363,000, valued at 24,279,438 drachmai, oranges, 93,485,000 (82,108,172 drachmai); mandarins, 83,574,000 (24,645,369 drachmai), apples, 38,275 metric quintals (10,067,880 drachmai), pears, 81,389 metric quintals (19,853,324 drachmai),

figs (dried), 158,105 metric quintals (66,265,795 drachmai) Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre Area under cultivation in 1931 was 2,643 acres, production, 1,178 metric tons Two kinds of cheese are produced in Greece—sliced cheese in brine (commercially known as Fetta cheese) and head cheese

There were in Greece (1931) 250,096 horses, 75,198 mares, 159,507 mules, 352,862 asses, 913,497 cattle, 7,071,725 sheep, 4,625,990 goats, 422,521 pigs, 9,037,099 poultry and 403,594 rabbits

Greece has a great variety of mineral deposits The ore and other minerals worked include iron, iron pyrites, emery, copper, zinc, lead, silver, manganese, aluminium, antimony, nickel, magnesite ore, lignite, sulphur ochre, and various other earths The Laurium district, Thessaly, Euboea, the Aegean islands and other parts of Greece yield a large output of ores and earths

The principal mineral output of Greece for three years is given as follows (in metric tons) —

—	1928	1929	1930	—	1928	1929	1930
	Metric tons	Metric tons	Metric tons		Metric tons	Metric tons	Metric tons
Iron ore	166,368	253,025	256,161	Chromites	20,958	24,214	23,402
Iron pyrites	94,270	133,399	177,848	Emery	13,129	10,560	12,598
Lead (ore)	70,659	44,800	41,610	Zinc	17,671	29,011	—
Magnesite (raw)	104,421	81,023	68,581	Lignite	120,639	156,526	129,623

Industry in Greece is making considerable progress The leading industrial products are olive oil, wine, textiles, chemicals, articles of food In 1931 the value of the production of industries was 6,079,838,000 drachmai, as compared with 6,671,221,800 drachmai in 1930

Commerce.

Value of the commerce of Greece (in thousands of drachmai) for five years was as follows —

—	1927	1928	1929	1930	1931
	1000 Drachmai	1000 Drachmai	1000 Drachmai	1000 Drachmai	1000 Drachmai
Imports	12,600,215	12,416,937	13,275,531	10,525,245	8,825,657
Exports	6,040,196	6,380,861	6,985,196	5,985,686	4,302,429

Principal special imports and exports in 1930 and 1931 —

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is currants, the value of which amounted in 1931 to 1,731,136*l*. Other articles of import in 1930 were — raisins, 76,465*l*; tobacco, 48,034*l*. Of the exports from the United Kingdom to Greece in 1931, cotton piece goods were valued at 675,844*l*, woollens, 353,703*l*, coal, 353,703*l*; iron and steel, 176,601*l*, machinery, 220,200*l*.

The total trade between Greece and the United Kingdom for 5 years was as follows —

	1928	1929	1930	1931	1932
Imports from Greece to U K	3,129,052	2,525,520	2,049,940	2,026,857	2,380,201
Exports to Greece from U K	4,850,443	4,920,570	3,731,692	3,179,021	2,177,840
Re exports to Greece from U K	150,016	128,644	195,131	185,820	182,198

Navigation and Shipping.

The merchant navy of Greece on June 30, 1932, had 551 steam and motor ships of 1,470,064 tons. In the twelve months to June 30, 1932, 5,723,000 tons of shipping in the foreign trade entered the ports of Greece, while 5,545,000 tons cleared.

Internal Communications.

There are about 8,611 miles of roads in Old and New Greece, and 570 miles under construction. There is a canal (opened November 9, 1893) across the Isthmus of Corinth (about 4 miles). In 1931, 6,141 steamers of 3,305,668 tons and 2,644 sailing vessels of 61,749 tons passed through the canal.

Railways were open for traffic in 1929 for a length of 1,667 miles, of which 821 miles were operated by the State. Before the war with Turkey (1912-13) Greece was completely isolated by land from the rest of Europe, but on May 8, 1916, the railway was completed between Gida, on the Salonika Monastir line, and Papapouli, on the Thessalian frontier, a distance of 56 miles, whereby Greece was linked up with the European railways. The Government has also purchased from England for two million francs the Salonika Angista Stavros line, 42 miles long, which was built by the British during the war. The operating revenues of the State railways in 1930 reached 346,230,290 drachmai, while operating expenses were 368,673,800 drachmai.

The telegraph lines on December 31, 1931, had a length of 13,662 miles, with 32,887 miles of wire. The number of offices was 3,830. They handled 3,378,994 inland telegrams, and 880,477 international, of which 416,897 were despatched abroad and 463,580 were received.

In 1930 there were 1,215 miles of urban telephone lines with 2,430 miles of wire, and 4,191 miles of inter-urban lines with 6,916 miles of wire. The number of subscribers was 8,473, and the number of offices 22.

There were 1,284 post offices at the end of 1931, and there passed through the post in that year—Inland post:—letters, 51,108,298, post-cards, 1,890,738, printed matter, journals and samples, 34,687,590, postal orders, 1,168,970, of a total value of drachmai 990,230,680, parcels, 637,296. Foreign postal service (dispatched)—letters, 12,454,465, post cards, 1,230,680, printed matter and journals, 3,102,985, postal orders, 9,810, valued at 7,256,985 drachmai, parcels, 28,805. Foreign postal service (received)—letters, 14,252,825, post cards, 1,203,798, journals and other printed paper, 5,480,635, parcels, 151,347; money orders, 23,165, of a total value of drachmai 31,805,276.

Banking, Money, Weights and Measures.

The National Bank (founded in 1841) was authorised to issue bank notes, the amount being increased each time the privilege of the bank was extended. According to a decree of May 12, 1928, the note-issuing privilege of the National Bank was transferred to the new issuing bank, the Bank of

Greece, as from May 14, 1928, in accordance with the conditions of the Geneva Protocol of September 15, 1927. By the same decree, the drachma was stabilised, its gold content being fixed at 0.01952634 grammes of gold, corresponding to 77.02 drachmai to the U.S. dollar, but the stabilisation has been suspended since April 26, 1932. On January 31, 1933, the total bank-note circulation amounted to 4,602,086,000 drachmai, total gold, 1,883,775,000 drachmai.

On March 31, 1932, there were 33 banks in Greece with deposits amounting to 16,319 million drachmai, and capital, 4,294 million drachmai.

The *Drachma* consists of 100 *lepta*. Nickel coinage in circulation consists of 10, 20 and 50 *lepta*, 1 and 2 drachmai, there are also pieces of 5, 10, and 20 drachmai, made of silver and nickel.

In 1920 the metric system was made compulsory. The use of the Gregorian Calendar has been authorised as from March 1, 1923.

The old weights and measures are still met with. The principal are —

1 oke = 400 drams = 2,832 lbs
 1 kantar = 44 okes = 124,608 lbs
 1 pik = 27 inches
 1 stremma = 2,471 acres

Diplomatic Representatives

1 OF GREECE IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Demetrius Cacalmanos (appointed October 10, 1922)

Counsellor — Christos Diamantopoulos

Secretary — John Kindynis

Naval and Air Attaché — Commander Spyridion Matessis.

Consul General — George Dracopoulos

Secretary Archivist — N. Pendjiky

There are consular officers of Greece at London, Birmingham, Cardiff, Dublin, Glasgow, and various other towns.

2 OF GREAT BRITAIN IN GREECE

Envoy Extraordinary and Minister Plenipotentiary — Hon. Sir P. W. M. Ramsay, K.C.M.G. (appointed November 14, 1929)

First Secretary — V. F. W. Cavendish Bentinck

Second Secretary — A. V. Burbury, M.C.

Naval Attaché — Capt. R. B. Ramsay, M.V.O., R.N.

Military Attaché — Major B. J. O'Leary, R.A.

Air Attaché — Group Capt. R. G. Hetherington, C.B.E.

Consul General at Salonika — H. G. Chick, C.I.E.

There are also British Consular representatives at Athens, Piræus, Candia, Canea, Corfu, Patras, Samos, Volo, Zante, Syra, and Mitylene.

Statistical and other Books of Reference concerning Greece.

GUATEMALA.

(REPÚBLICA DE GUATEMALA)

Constitution and Government.

THE Republic of Guatemala, established on March 21, 1847, after having formed for twenty-six years part of the Confederation of Central America, is

governed under a Constitution proclaimed December, 1879, and modified in 1887, 1897, 1913, and finally in July, 1927. The present Constitution came into effect January 1, 1928. The legislative power is vested in a single-chambered National Assembly, consisting of representatives (one for every 30,000 inhabitants) chosen by universal suffrage for 4 years. In addition a Council of State of 7 members, 3 elected by the National Assembly, and 4 appointed by the President of the Republic, has supervision of public concessions and contracts, and large advisory powers. The President is elected for 6 years, and barred from re-election for a period of 12 years.

On May 27, 1927, the Foreign Ministers of Guatemala, Honduras and Salvador signed a convention binding the three countries to a united foreign policy in the recognition of governments, declarations of war and other matters, this has been ratified by Salvador.

Manuel Estrada Cabrera ruled as dictator for 22 years but was overthrown in 1920. Several short lived dictatorships followed until the election of General Lazaro Chacon who held office from 1926 to 1931.

President of the Republic — General Jorge Ubico (February 14, 1931)

The administration is carried on, under the President, by the heads of seven departments—of Foreign Affairs, Government and Justice, Finance and Public Credit, Public Instruction, Public Works, War, and Agriculture.

Area and Population.

Area estimated at 109,724 sq. kilometres, or 42,353 square miles, but the boundary with Honduras has long been in dispute, in 1930 both countries agreed to submit it to arbitration. The population, according to the 1920 census, was 2,004,900. About 60 per cent are pure Indians, of 21 different groups descended from the Maya Quiché tribe, most of the remainder are mixed Indian and Spanish (*ladinos*), the ruling classes are of European descent. There are about 25,000 foreigners. A system of peonage prevails on the large plantations. Guatemala is administratively divided into 22 departments, each with a governor appointed by the President.

The capital is Guatemala City, with 165,928 inhabitants, almost all *ladinos* or descendants of Europeans. Other towns are Quezaltenango, 80,125, Coban, 26,774, and Zacapa, 18,094.

Religion and Education.

Roman Catholicism is the prevailing religion, but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

In 1931-32 there were 2,410 primary schools with 3,896 teachers, and 110,890 pupils and 65 professional, normal, secondary and special schools with an enrolment of 4,769. The Bureau of Indian Education maintains (1931) 957 rural and ranch schools with 1,808 teachers and 25,693 Indian pupils of whom 16,000 were previously illiterate. The University of Guatemala (714 students in 1931) was established in 1910. The National Central Institute confers degrees which are recognised in all the Central American Republics. Among the other institutions are a School of Handicraft for Women, a National Conservatoire of Music, a School of Art, and a College of Pharmacy and Natural Sciences. The national library contains 20,000 volumes.

Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 26 courts of first instance. All judges, under the 1927 constitution, are appointed by

the National Assembly In all the municipalities there are Justices of Peace

Finance.

Ordinary revenue and expenditure in currency (1 quetzal = 1 U S dollar) —

—	1926-27	1927-28	1928-29	1929-30	1930-31
Revenue .	Quetzales 12 411,182	Quetzales 14,265,751	Quetzales 15,398,825	Quetzales 13,468,870	Quetzales 10,226,191
Expenditure	12,259,067	14,128,979	15,409,150	14,342,811	12,376,569

Customs duties (imports and exports) provided 5,911,491 quetzales in 1929-30, or about 50 per cent of the revenue Public debt took 3,329,100 quetzales in the 1930-31 budget

On June 30, 1930, the external funded debt was 12,588,325 quetzales, on which the interest and amortisation took 2,258,438 quetzales, in addition there was an interest-bearing internal debt of 2,411,755, a non-interest-bearing internal debt of 1,197,610 and a floating debt of 155,450 Total, 16,197,690 quetzales Total, June 30, 1932, 17,481,149 quetzales, including English debt of 1,540,860

Defence.

Military service is compulsory between the ages of 18 and 50 Service in the active army is for 1 year The effectives for 1932 were 315 officers and 6,334 other ranks, organised in 2 infantry corps of 14 companies and 4 groups of artillery The military estimates for 1931-32 were 1,900,528 quetzales

Production and Industry

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic The Atlantic slope is sparsely populated and has little of commercial importance beyond the timber cutting of the Peten, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district

The soil in general is exceedingly fertile and agriculture is the most important industry The principal crop is coffee, accounting for about 80 per cent of total exports, coffee exports in 1929, 662,184 bags, in 1930, 853,093 bags Germans own and control between 30 and 40 per cent of the coffee plantations of Guatemala Next to coffee, banana is the most important export crop, exports, 1930, 4,874,319 stems, sugar output in 1929, 13,566,875 lbs, maize, beans and rice, forming the diet of the population, are the most important domestic crops Guatemala has almost a monopoly of the chicle gum used for chewing in the United States, exports in 1930 were valued at 587,307 quetzales Crop diversification is encouraged by agricultural experiment stations maintained jointly by the International Railways of Central America and the United Fruit Company Cattle-grounds (potreros) occupy about 758,640 acres Census of 1930 showed 416,897 cattle, 183,537 sheep, 79,251 pigs, 63,117 horses, 21,413 goats and 37,049 mules and asses

The forest area has an extent of 1,316,482 acres The department of Petén is rich in mahogany and dye woods, for which there is a ready market in the United States.

There are silver, gold, copper, iron and lead mines, but owing to the lack of transport, mining is little developed. Chrome was discovered in 1916

Commerce.

Value of the commerce for 5 years (1 quetzal = 1 dollar, U S) —

	1927	1928	1929	1930	1931
	Quetzales	Quetzales	Quetzales	Quetzales	Quetzales
Imports	19,785,880	21,464,924	30,399,067	16,478,970	12,971,234
Exports	33,915,225	28,211,572	24,928,229	23,577,819	15,167,386

In 1930, 59.40 per cent of the imports came from the United States, 8.54 per cent. from Great Britain, 12.77 per cent from Germany, 2.94 per cent from France, and 2.79 per cent from Italy, 39.06 per cent of the exports went to the United States, 35.16 per cent to Germany, and 15.65 to Holland

Total trade between Guatemala and the U K for 5 years (according to Board of Trade Returns) —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Guatemala to U K	56,584	39,580	57,748	87,942	210,408
Exports to Guatemala from U K	457,508	437,098	230,906	195,787	174,949
Re exports to Guatemala from U K	11,583	7,818	4,153	2,399	2,097

Shipping and Communications

The chief ports on the Atlantic side are Puerto Barrios, which handles three-fourths of the country's imports, and Livingston, on the Pacific side, San José, chief port for exports, and Champerico

The principal railway system is the American owned International Railways of Central America which represents a consolidation of the Guatemala Railway (198 miles), the Guatemala Central Railway (139 miles), the Occidental Railway (51 miles), and the Ocos Railway (22 miles). Total mileage, 652. The lines extend from Puerto Barrios to Guatemala City, a distance of 198 miles, thence to San José de Guatemala, on the Pacific Ocean, a distance of 74 miles. This route carries both freight and passengers from the Atlantic to the Pacific more quickly than the Panama Canal. The system extends northward to Ayutla on the Mexican border where it connects with the Pan American Railway of Mexico. All roads are of 3 ft. gauge. Total mileage of all lines in 1929 was 691 miles. In 1930 the Government completed the first national electric railway in Central America; it connects Quezaltenango with San Felipe

There are (1929) 1,396 miles of highways. Motor traffic is possible almost everywhere during nine months of the year

There are 379 post-offices. The national telegraph lines have a length of 4,357 miles, and the telephones, 4,950 miles. There are 283 telegraph offices and 112 central telephone stations, number of telephones in use, 1,992. Radio stations have been opened at Quezaltenango, San Marcos, and Guatemala City with service to Peten, Puerto Barrios, and other places. There is a broadcasting station at Fort San José, near Guatemala City.

Air-mail and passenger service connects Guatemala City with Puerto Barrios, Zacapa, Quezaltenango, Mazatenango, San Salvador, Panama and Mexico City

Banking, Money, Weights and Measures.

The creation of the Central Bank of Guatemala, with an authorised capital of 10,000,000 quetzales (2,500,000 quetzales paid up in 1928), and the exclusive right to issue paper money for 10 years, was decreed on June 30, 1928. This ended a paper money regime which had lasted since 1897. Total circulation of banknotes (backed by a gold reserve of 40 per cent) on December 31, 1930, was 5,445,435 quetzales, exclusive of 1,095,262 quetzales representing notes of the old banks not yet called in and cancelled. Gold coin, at home or abroad, totalled 2,957,037 quetzales. By a decree of May 12, 1932, silver coinage is limited to 2,000,000 quetzales, and copper aluminium to 500,000 quetzales.

The unit of currency is the gold *quetzal*, established May 7, 1925, equal to the United States dollar (containing 1,504,665 grains of fine gold), named after the national bird (emblematic of liberty). Gold coins in circulation, 20, 10, and 5 quetzales, quetzal notes in circulation, 100, 20, 5, 2, and 1. Silver coins are in circulation (since May 1, 1933) of the value of 25 centavo, 10 centavo and 5 centavo, and also new 2 centavo, 1-centavo and half-centavo copper aluminium coins. Old notes in circulation (no longer issued) are for 500, 100, 50, 25, 20, 5 and 1 pesos, these have been stabilized at the rate of 60 pesos = 1 quetzal (U S dollar), and will eventually be displaced by Central Banknotes and metallic currency.

The Spanish <i>Libra</i> of 16 ounces	= 1 014 lbs avoirdupois
„ <i>Arroba</i> of 25 libras	= 25 35 lbs „
„ <i>Quintal</i> of 4 arrobas	= 101 40 lbs „
„ <i>Tonelada</i> of 20 quintals	= 18 10 cwt
„ <i>Fanega</i>	= 1½ imperial bushels

The metric system has been officially adopted

HAITI.

(RÉPUBLIQUE D'HAÏTI)

Constitution and Government

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution ratified on July 15, 1932 After being in abeyance since 1917 (their functions performed by the Council of State, nominated by the President) the Senate and Chamber were revived in October, 1930, to sit until 1936 The President is now elected by the 36 deputies and 20 senators, sitting as a National Assembly, for a period of six years Deputies are elected for 4 years by popular vote, senators (4 years) are chosen by electoral colleges in each department

President of the Republic — *Sténio Vincent* , elected November 18, 1930 , term expires May 15, 1936

The administration of the Republic is carried on, under the President, by ten departments supervised by at least five Secretaries of State The President may not immediately succeed himself

In November, 1915, both Houses of the Haitian Congress ratified a treaty with the United States by which the latter agreed to assist in the establishment of responsible, orderly government The treaty, which expires in 1936 provided for a number of American Advisers to the Haitian Government, appointed by the President of Haiti on the recommendation of the President of the United States , these still supervise the constabulary and finances, but public health, public works, and agricultural training were handed over in 1931 to Haitian officials

Area and Population.

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Dominican Republic—is estimated at 10,204 English square miles On January 1, 1927, the estimated population was 2,800,200, excluding

3,000 white foreign residents and the military forces of the United States. The majority of the population are Negroes, there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. Capital, Port au Prince, with 79,797 inhabitants, situated on a large bay and possessed of an excellent harbour. Cap Haitien has an estimated population of 22,000, Cayes and Jacmel, 12,000 each, Gonaives, 10,000, Port de Paix, 5,000. The official language of the country is French, though most of the common people speak a dialect known as Creole French.

Religion and Education

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are French.

Public elementary education is free, the country being divided into 24 inspectors' districts. In 1910 education was made compulsory. The sum allotted for public instruction amounts to nearly 1,000,000 dollars annually, chiefly for agricultural education, but the educational system is still very imperfect, especially in rural districts. In the 6 national lyées in 1925-26 there were 1,042 pupils, in 11 private secondary schools, 3,219 pupils, in 14 national primary schools, under friars, 5,820 pupils, and in 34, under nuns, 7,440 pupils. During 1927-28, 48 rural farm schools had 5,464 pupils. In 1926-27, 85 private city primary schools had 5,517, 417 national rural primary schools, 25,348 pupils, 115 religious national rural primary schools, 5,868 pupils, 240 national urban primary schools, 24,462 pupils.

Justice

Justice is administered by a Court of Cassation and by lower courts, all appointed for 10 years by the President and irremovable, unless impeached.

Finance

About 90 per cent of the revenue of Haiti is derived from customs, paid in American gold on exports and imports. Debt charges absorb about 30 per cent of revenue.

The following table shows the revenue and expenditure (fiscal year ending September 30) for five years (in United States dollars, 5 gourdes = 1 U S dollar) —

	1927-28	1928-29	1929-30	1930-31	1931-32 ¹
Revenue . . .	10,100,955	8,504,366	7,729,683	6,449,316	6,331,886
Expenditure . . .	8,032,282	9,006,731	8,369,460	7,380,275	6,333,336

¹ Budget estimate.

Total public debt, August 31, 1932, was 72,858,000 gourdes, of which 69,235,580 gourdes (equal to 13,847,115 dollars, U S) were represented by the three 'dollar loans' outstanding whose service and retirement are supervised by the American Adviser General Receiver. Under the protocol of 1919, his functions cease with the extinction of the foreign debt (presumably in 1942, at the present rate), but the treaty outlining his duties expires in 1936 and has not yet been extended.

Defence.

An armed constabulary (Garde d'Haiti), both urban and rural, was instituted in 1916. The officers are in part drawn from the United States Marine Corps and Navy, who, according to present plans, will retire by 1936. The establishment (1932) consists of 199 officers and 2,536 non commissioned officers and men.

Production.

The industries of Haiti are mainly agricultural. The most important product is coffee of excellent quality grown by peasants. Production, 1930-31, 26,296,152 kilos. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending. Sugar is likewise grown, and there are 2 sugar-making establishments. An extensive sugar central, founded with American capital, has been constructed near Port-au-Prince. Rum and other spirits are distilled but not exported; the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is encouraged.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked.

Commerce.

Imports and exports for 4 fiscal years ending September 30 (in U.S. dollars) —

—	Imports	Exports	—	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1928	20,248,257	22,667,246	1930	12,741,626	14,144,587
1929	17,287,922	16,723,883	1931	9,576,318	8,968,419

In 1930-31, the principal exports were coffee, 57,983,015 pounds valued at 6,687,967 dollars (about 74 per cent in value of total exports), raw cotton, 9,101,219 pounds (850,895 dollars), logwood, 55,936,184 pounds (384,676 dollars), cacao, 2,574,735 pounds (102,685 dollars). Imports to the extent of 68 per cent (6,577,594 dollars) came from the United States.

Total trade between Haiti and the U.K. for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Haiti to U.K.	165,012	166,974	149,745	195,647	257,871
Exports to Haiti from U.K.	333,389	180,162	166,921	110,347	189,005
Re-exports to Haiti from U.K.	2,927	2,322	1,908	2,288	1,597

Shipping and Communications.

Several lines of steamers (American and Dutch) connect the ports of Haiti with New York, and others (British, French, Dutch and German) with Europe. In 1930-31, 551 vessels of 1,313,725 tons entered and cleared the ports of the country.

Port-au-Prince is connected with Cap-Haïtien by a road 169 miles long, and with Mirebalais and Lascahobas by a road 33 miles long. Total length of motor road in 1932 was 935 miles. A light railway has been constructed from Port-au-Prince to Lake Assué (28 miles), and to Léogane (22 miles), but the traffic is small. The 'National Railroad of Haiti' runs from Port-au-Prince to Verrettes, distance 85 miles. Port-au-Prince has 5 miles of tramway. Total mileage, 1932, 158 miles. The two railroads, the National and the P.C.S. (Compagnie des Chemins de Fer de la Plaine de Cul-de-Sac) are both American owned.

The principal towns are connected by the Government telegraph system,

with 1,490 miles of wire in 1927 A cable runs from the Mole St Nicholas to Santiago de Cuba and from the Mole to Port-au Prince, and also to Cap Haïtien, whence it runs to Puerto Plata (Santo Domingo) and to New York and South America. The All-America Cables has a cable to Haïti.

There were 92 post offices in 1930

Port-au-Prince has a modern automatic telephone exchange, 1,200 miles of telephone cables connect 46 commercial and 17 local exchanges

Money, Weights, and Measures.

The Banque Nationale de la République d'Haïti, established October 21, 1910, with a capital of 10,000,000 francs (present capital, 2,000,000 dollars), undertakes to render services to the Government in respect of loans and other matters, it has a monopoly of the note issue In 1916, the National City Bank of New York purchased control over this bank The Royal Bank of Canada has branches at Port-au Prince and Cape Haïti

The unit of currency is the *Gourde* which has a fixed value in relation to United States currency, i.e. 1 gourde is equivalent to 20 cents U S currency Stock of money on December 31, 1930, 4,902,332 dollars (U S) in notes, of which 1,194,981 dollars were in U S Government notes and 3,707,351 were in notes of the Banque Nationale, gold coinage amounted to 156,518 dollars and subsidiary silver coinage to 13,014 dollars Of the notes outstanding, 1,940,500 dollars were held by the Central bank as a reserve To reduce the use of American money the Banque Nationale was authorized in April, 1928, to issue notes of 20, 50 and 100 gourdes

Use of the metric system of weights and measures has been made obligatory since July 1, 1922

HONDURAS.

(REPÚBLICA DE HONDURAS)

Constitution and Government

ON September 15, 1821, the State of Honduras declared its independence of Spain and set up as a Republic which is governed under a charter proclaimed on October 3, 1824 The present Constitution was rewritten in 1924 Legislative power is vested in a single chamber, the Congress of Deputies consisting of 43 members, chosen for 4 years by popular vote, in the ratio of one per 15,000 inhabitants It meets for 60 days on January 1 each year A Permanent Commission of five members sits whilst Congress is not in session for the transaction of routine or emergency business The President is elected by popular vote for 4 years, holding office from February 1st

President —Dr. Tiburcio Carias Andino Assumed office February 1, 1933

The administration of the Republic is carried on by a Council of six ministers, to whom are entrusted the departments of Foreign Affairs, Interior and Justice, War and Navy, Finance and Public Credit, Public Works and Agriculture, and Instruction

Area and Population

Area about 44,275 English square miles, with a population, on June 29, 1930 (census), of 859,761, or 19 4 inhabitants to the square mile Aboriginal tribes are estimated to number over 35,000, principally Mosquito, Tumo, Poyas and Xicques Indians, all speaking different languages The Spanish-speaking inhabitants are chiefly Indians with an admixture of Spanish blood On the north coast there is a considerable proportion of negroes, chiefly employed by the fruit exporting companies, of whom about 3,000 are British subjects The Republic is divided into 17 departments and one territory La Mosquitia is still practically unexplored and is inhabited by native races who speak little or no Spanish

The capital of Honduras is Tegucigalpa, with (census of June, 1930) 40,049 inhabitants Other towns are Pespire, 7,132; Nacaome, 8,152, La Esperanza, 11,453, Santa Rosa, 10,574; Choluteca, 8,065, San Pedro Sula, 7,820 The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), La Ceiba, Trujillo Puerto Castilla, and Tela. The port of entry for the Bay Islands is Roatan.

Religion, Education, Justice

Roman Catholicism is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any

Instruction is free, compulsory (from 7 to 15 years of age), and entirely secular. The school census of 1928 showed 93,576 children of school age, of whom only 35,182 were then receiving education. In 1929-30 there were 1,527 public schools (1,281 under State control), with 1,953 teachers and 57,359 children enrolled. The 13 secondary schools had 609 pupils, the normal schools 1,107, and the commercial schools, 415. There is a school for the teaching of agriculture with about 52 pupils. At Tegucigalpa there is a National University with faculties of Law, Medicine and Engineering (179 students in 1930-31), a technical school with 157 pupils, and also a military school, at Comayagua there is a school of jurisprudence.

The Judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years, four Appeal Courts, and departmental and local judges. In 1923 a Supreme Court was established at San Pedro Sula to serve the Northern Provinces.

Finance

For the years stated, ending July 31, the revenue and expenditure are given as follows (the new gold lempira, like the old silver peso, is legally fixed at one half the value of an American dollar)

	1923-29	1929-30	1930-31	1931-32 ¹	1932-33 ¹
Revenue	Lempiras 13,728,868	Lempiras 14,314,299	Lempiras 13,168,498	Lempiras 16,568,612	Lempiras 15,400,199
Expenditure	12,803,620	15,021,739	13,575,145	16,568,612	15,400,199

¹ Estimates

Total external debt stood on July 31, 1931, at 10,026,964 lempiras, and internal debt at 15,501,222 lempiras. Payment on debt services, external and internal, in 1930-31 was 2,198,665 lempiras. The external debt, held principally in England and unpaid as to principal or interest since 1872, totalled by 1925, 30,000,000, and was then scaled down to 1,200,000, to be repaid in 30 annual instalments of 40,000 each, derived from a special Consular tax on imports to Honduras, collected abroad and deposited in New York. In 1926 the Government borrowed 1,500,000 dollars in New Orleans, repayable in monthly instalments of 25,000 dollars at 7 per cent interest.

Defence.

Every citizen of Honduras is liable to serve in the army from the age of 21. Service in the active army is for three months, and in the reserves from the age of 23 to 40. Foreigners are exempt from service, naturalised citizens being exempt for 10 years. Under the terms of the Washington Central American Conventions of 1923 the size of the Regular Army is fixed at 2,500 men, including the National Guard. The strength in 1928-29 was 344 officers and 2,258 men. The military budget for 1930-31 was 1,932,018 lempiras, but actual expenditure were 3,140,446 lempiras.

Production and Industry.

The chief culture is that of bananas, on the Atlantic coast (28,960,948 bunches exported in 1930-31 almost entirely by three companies, value of

banana exports was 22,981,400 dollars, U S) The United States took 21,635,022 stems Coconuts are also grown The coconut groves of Puerto Sal extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain over 28,000 fruit-bearing trees Coffee of fine quality is grown, generally by small farmers (exports in 1930-31, 2,483,236 lbs), likewise tobacco The production of sugar from 2 large mills is increasing Exports in 1930-31, 11,749,951 lbs Exports of mahogany in 1930-31 totalled 288,527 feet, chiefly to the United States

Honduras is essentially a cattle producing country, and the Government are now taking steps to encourage breeding

The mineral resources of Honduras are—gold, silver, copper, lead, zinc, iron, antimony, some of them being found in almost every department The rivers still yield gold to the native workers, using primitive utensils, at the rate of about 125,000 dollars (U S) per annum There is only one large mining company, at San Juancito, near Tegucigalpa Deposits of brown and other coal have also been found

Straw hats and cigars are manufactured for local consumption and export, 46,947,378 cigars were exported in 1930-31 A good quality of Panama hat is manufactured in the Departments of Copan and Santa Barbara

Commerce

Imports and exports for 5 fiscal years, ending July 31 (the lempira = 50 cents, U S) —

—	1926-27	1927-28	1928-29	1929-30	1930-31
	Lempiras	Lempiras	Lempiras	Lempiras	Lempiras
Imports	10,680,415	12,573,595	14,860,931	31,892,257	20,582,846
Exports	17,546,289	28,142,787	24,569,165	62,342,436	40,066,173

The United States takes nearly 75 per cent of the exports of Honduras, and furnishes 77 per cent of its imports Bananas constitute from 50 to 90 per cent of the value of total exports

Total trade between Honduras and United Kingdom for 5 years was (according to Board of Trade returns) as follows —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Honduras	824,760	1,108,906	496,415	1,110,919	883,646
Exports to Honduras	185,826	750,828	517,007	88,161	92,511
Re-exports to Honduras	1,627	2,839	2,050	1,635	1,705

Communications.

In general, travelling and transport are accomplished by means of mules and ox carts Slow improvements in road making and repairing continue to be made. There is a fair mail service by automobiles, and a daily autobus passenger and freight service connects Tegucigalpa with both the northern and southern sections The two principal roads are the Carretera del Sur from San Lorenzo, on the Pacific Coast, to Tegucigalpa, 84 miles ; and the Carretera del Norte from Tegucigalpa to Comayagua, and

Lake Yojoa, 154 miles Transport from Lake Yojoa (20 miles across) is continued by road to Potrerillos (25 miles), the head of the railroad to San Pedro Sula and Puerto Cortés A road from Tegucigalpa to Juticalpa and one from Santa Barbara to San Pedro Sula are being built Total mileage of motor roads in 1930 was 361 miles Aviation services connect the principal towns and spread outward to other Central American points

There is a national railway of 66 miles from Puerto Cortez to Potrerillos, taken over by the Government in 1912 and leased to a fruit company The other four railroads are owned and operated by the various fruit companies on the north coast Total length of line (1932) 1,149 miles.

The country has about 1,550 miles of telephone lines and 5,301 miles of telegraph lines Number of telephones in use, 1,035, number of telegraph offices, 304 Number of post offices, 1,928, 332 Honduras has 6 wireless stations, all owned by foreign companies

Money, Weights, and Measures.

By a decree of March 9, 1931, the gold *lempira* (named after a native chief) is the monetary unit, its value is that of 0.836 gramme of gold, 900 fine, or 50 cents, U S currency Coins of 1 *lempira*, 50 cents, 10 cents and 5 cents have been coined The old peso coinage is being withdrawn from circulation The value of the silver *lempira* is legally fixed at one half the value of an American dollar The new *lempiras* have been minted in the United States and were placed in circulation early in 1932 On the north coast the currency is almost entirely American paper money.

There are two banks One is the Banco de Honduras, founded in 1889, which in 1922 and for a short time thereafter acted as the Bank of the Republic It still has the power to issue silver notes but does not act as the Government's fiscal agent The second bank, Banco Atlántida, which belongs mainly to Americans, also issues silver notes which are exchangeable for American currency at the rate of 2 pesos for 1 dollar

The metric system of weights and measures has been legal since April 1, 1897, but English pounds and yards and the old Spanish system are still in general use

1 <i>Vara</i>	= 32 inches
1 <i>Arroba</i>	= 25 lb
1 <i>Quintal</i>	= 100 lb
1 <i>Tonelada</i>	= 2,000 lb

HUNGARY.

(KINGDOM OF HUNGARY)

Constitution and Government.

HUNGARY first became an independent kingdom in 1001. On October 31, 1918, a revolution broke out in Hungary with the object of establishing a Republic. On November 13 King Charles issued a letter of abdication, and on November 16, 1918, Hungary was proclaimed an independent Republic (Hungarian People's Republic), of which Count Michael Karolyi became Provisional President. The two Houses of the Legislature were abolished, and their place taken by a Provisional National Council. The Károlyi régime continued until March 21, 1919, when its place was taken by a Soviet Government, which proclaimed the dictatorship of the proletariat. An opposition Government was, however, soon set up at Arad and Szeged, which with the assistance of the Rumanian army swept away the Soviet Government, and on August 7, 1919, a National Government was again in the Capital. Elections were held on the basis of universal suffrage in January and February 1920, and the new Parliament considered the period of the revolutions of 1918 and 1919 as *de jure* a blank space of time, and resolved that the old monarchical constitution should be continued. Hungary was thus considered a monarchy with a vacant throne, the functions of the monarch being exercised by a Regent. It has been decided that the dynastic question shall be solved at such time as the people are freed from external pressure.

Regent—Nicholas Horthy de Nagybdnya (Elected March 1, 1920)

The Legislature consists of two houses, the Upper House (by a Bill passed on November 11, 1926) consists of 6 groups—(1) elected representatives of the former hereditary members, about 38, (2) members elected by the County Councils and municipalities, about 50 members, (3) heads of the various religious communities, about 31 members, (4) high dignitaries—such as judges, the commander-in-chief of the army, the chairman of the National Bank, (5) representatives of scientific institutions, the Chambers of Commerce, about 40 members, and (6) life members appointed by the head of the State.

The Lower House consists of 245 members. At the elections held on

June 28, 1931, the following parties were elected — Party of National Unity (Bethlen Party), 155, Christian Social Union, 32 Socialists, 14, Independent Agricultural Party, 11, other parties, 12, Independents, 21, total 245

The Ministry formed on October 1, 1932, is composed as follows —

Prime Minister and Minister of National Defence — János de Gombos.

Minister of Foreign Affairs — Kollman de Kánya

Minister of the Interior — Dr. Francis Keresztes Fischer

Minister of Finance — Dr. Béla de Imrédy

Minister of Agriculture — Dr. Nicholas de Kállay

Minister of Commerce — Dr. Tihamés Fabinyi

Minister of Public Instruction — Dr. Valentine Hóman

Minister of Justice — Dr. Andrew Lazar

II LOCAL GOVERNMENT

In Hungary a distinction is observed between communes which are large or small, and county towns and municipalities, which are regarded as communes of a higher order. The representative bodies and executives are elected by the inhabitants of the communities concerned who have possessed an electoral right since 1886 on the basis of secret suffrage, which was in 1929 extended to women also. The representative body in the communes and county towns consists half of members elected for six years, and half of persons who pay the highest taxes, but in the representative bodies of the municipalities ("municipal committee") the proportion of those who pay the highest taxes has been reduced to two fifths of the total number of members. The members of the representative bodies have an authorization for a fixed period. Each community has the right to issue orders within the limits prescribed by law, to be carried out either by its own officials or by the subordinate communities.

Area and Population.

The Treaty of Trianon, signed on June 4, 1920, and ratified by Hungary on November 13, 1920, mentions in general terms the boundaries of the new State with Austria, Czechoslovakia, Yugoslavia and Rumania. The exact boundaries with Yugoslavia and Rumania are to be determined by a mixed commission. As a result of negotiations with Austria and of the consequent plebiscite Hungary has obtained Sopron in Western Hungary.

The population of Hungary according to the census of December 31, 1930, is 8,688,349 and its area 35,875 square miles as against a population of 7,989,089 in 1920. Of the total population, 4,250,110 were males and 4,438,209 females.

The following is the division of the total population according to language as estimated on December 31, 1930 (Census): Hungarian (Magyar), 8,001,112 (92.1 per cent), German, 478,630 (5.5 per cent), Slovak, 104,819 (1.2 per cent); Rumanian, 16,221 (0.2 per cent), Ruthenian, 996, Croatian, 27,683 (0.3 per cent.), others, 58,853.

Vital statistics for 5 years

	1927	1928	1929	1930	1931
Births	218,549	224,693	215,463	219,784	212,902
Marriages	77,026	74,634	78,518	77,907	76,354
Deaths	150,675	146,490	152,847	134,741	144,968

PRINCIPAL TOWNS, WITH POPULATION IN 1930 (CENSUS)

Budapest	1,006,184	Újpest	67,400	Hódmezővásár-	
Szeged	135,071	Kispest	64,512	hely	60,342
Debrecen	117,275	Pécs	61,663	Nyíregyháza	51,308
Kecskemét	79,467	Miskolc	61,559	Győr	50,881
Pesterzsébet	67,907				

Religion.

Religious toleration is one of the fundamental principles of the Hungarian State. There is perfect equality among all legally recognised religions, which include the Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Unitarian, the Greek Oriental, the Gregorian Armenian, the Baptist (since 1905), the Jewish, and the Mohammedan (since 1916). Each has the independent administration of its own affairs.

In 1930 (Census), the population according to religion was estimated as follows: Roman Catholics, 5,034,103 (64.9 per cent), Greek Catholics, 201,093 (2.3 per cent), Helvetian Evangelicals, 1,813,162 (20.9 per cent), Augsburg Evangelicals, 534,065 (6.1 per cent), Greek-Orientals, 39,839 (0.5 per cent), Unitarians, 6,266 (0.1 per cent), Jews, 444,567 (5.1 per cent), others, 15,224.

Education

Public education in Hungary comprises the following grades: —(1) infant schools, (2) elementary schools, (3) industrial and commercial apprentice schools, (4) primary (city) schools, (5) training colleges for teachers, (6) middle or secondary schools, (7) special schools, (8) universities and colleges.

In 1930, 9.6 per cent of the population over 6 years of age was illiterate.

School attendance is compulsory for children of six to twelve years at day schools, and then for three years in continuation schools. There were in the school year 1930-31 altogether 1,101 infants' schools and permanent foster-homes with 1,539 female teachers and 116,375 infants, and 5 training colleges for female teachers of infant schools.

In Hungary there were in the school year 1930-31, 6,856 elementary schools with 966,347 pupils and 19,299 teachers. There were also 4,169 general, 1,453 agricultural continuation schools (or courses) and 54 agricultural public schools with special teachers attached to them. There were 510 apprentice schools, 470 for industrial and 40 for commercial apprentices. The number of industrial apprentices was 53,120 and of commercial apprentices 3,047. There were 20 training colleges for elementary schools for males and 34 for females, with 709 teachers and 9,458 students. The number of primary schools was for boys 183, for girls 192, for both sexes 53, with 78,633 pupils and 3,675 teachers.

In the middle schools the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a sub-vention from the State. There were in 1930-1931, 28 gymnasia, 69 realgymnasia, 22 modern schools, and 43 girls' secondary schools. Total number of teachers, 3,025, pupils, 64,841 (50,071 boys and 14,570 girls).

Of the special schools, 49 are agricultural, 47 industrial and mineral, and 50 commercial, with 31 others. Of the commercial schools, 31 were for boys and 19 for girls, total number of pupils, 10,020. The other special schools had 3,215 pupils. There are 4 agricultural high-schools with 449 pupils.

Hungary has four universities and (since 1919) an independent Faculty of Economics at Budapest (45 professors, 1,397 students in 1930-31), all maintained by the State. In 1930-31 the University of Budapest had 307 professors and 5,198 students, the University of Szeged, 89 professors and 1,779 students, the University of Pécs 53 professors and 1,417 students, and of Debrecen 67 professors and 1,393 students—the last two having been founded in 1912. Total number of students at the Universities, 1930-31, 11,184. There are also 18 theological colleges, viz., 14 Roman Catholic, 3 Protestant, and 1 Jewish, with a total of 119 professors and 942 students, and 3 law schools with 34 professors and 832 students, and the veterinary school with 28 professors and 299 students. The technical high school (polytechnicum) in Budapest has 30 professors and 1,427 students (1930-31), the high school of mining and forestry of Sopron 27 professors and 138 students, and 3 agricultural colleges have 33 professors and 358 students. There are 7 other high schools with 173 professors and 1,670 students.

Justice and Crime.

The Supreme Court in Budapest (curia) is the highest instance in all civil and criminal matters. As courts of first instance, there are county courts (torvényszékek) with collegiate judgeships, district courts (járásbíróságok) with single judges, and jury courts (sajtóbíróságok) for press offences, besides an army special court.

Social Insurance and Pauperism

In 1927 and 1928, two fundamental laws were passed to regulate optional and obligatory social insurance, and called into existence the National Social Insurance Institute. The Institute affords its members medical and hospital treatment gratuitously and pays a subsidy to any member during the period of his illness, and grants, moreover, an old age and disability pension. The membership of the Institute amounted to 575,184 on December 31, 1931, including membership of all other social insurance bodies, 838,181. The insurance of farm workers is optional in Hungary, done by the Agricultural Workers, National Fund, with a membership of 681,001 (end of 1931).

In Hungary poor relief is in the main left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers, while in the larger there are poor houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300.

Finance.

Budget estimates for 4 years (in thousands of pengos) —

	1920-30	1930-31	1931-32 ¹	1932-33 ¹

Grand total (I and II) .	1,199,355,840	1,207,329,000	1,150,785,100	1,207,329,000

Total revenue includes 7,973,660 pengos extraordinary revenue, and expenditure includes 28,706,400 pengos transitory expenditure, and 27,857,500 pengos investments.

The public debt on December 31, 1931, was given at 1,992,600,000 pengos, of which 1561.1 million pengos were foreign debt and 431.5 million pengos domestic.

Defence.

According to the Treaty of Trianon, Hungary is authorised to maintain an army of 35,000 officers, non commissioned officers and men. The Treaty laid down that conscription was to be abolished, and consequently recruiting on a voluntary basis has been substituted. All recruits have to undertake to serve in the Army for a minimum period of 12 consecutive years, at least 6 of which are to be with the colours. Officers now serving will continue to

do so until they attain the age of 40 years at least Officers newly appointed must undertake to serve on the active list for a minimum of 20 consecutive years No reserves or measures for mobilisation are permitted

Hungary is divided into the following seven military districts — Budapest, Székesfehérvár, Szombathely, Pécs, Szeged, Debrecen, and Miskolc To each of these districts is allotted a mixed brigade each composed of 1 brigade staff, 1 cavalry squadron, 2 infantry regiments, 1 trench mortar company, 1 field artillery group, 1 cyclist battalion In addition to the 7 mixed brigades there are the following troops 4 hussar regiments, 1 mounted artillery group, 3 independent batteries, and 3 pioneer battalions Strength in November, 1931, 1 780 officers and 33,213 men

Hungary has a force of 12,000 gendarmerie and of 12,000 police, as well as 6,360 customs guards, and 1,600 river guards The members of this force are under the obligation to serve for a minimum of 6 consecutive years The authorised armament is as follows —Gendarmerie 1 rifle or 1 carbine per man, Police 1 sword or revolver per man (automatic pistols for 5 per cent of the establishment, i.e. 600), Customs Guards 1 rifle per man

A force of 3,000 finance guards is also maintained These are armed with revolvers

Hungary has no navy or air force, but only four patrol vessels for police duty on the Danube

The budget expenditure on the army in 1932-33 was 95,800,000 pengős

Production and Industry.

The cultivation of the soil is the chief industry of Hungary The soil is noted for its fertility and the variety of its products The area and production of crops in Hungary for two years was as follows —

Crop	1930-31		1931-32
	Area	Yield	Estimated Yield
	Acres	Quintals	Quintals
Wheat .	4 011,001	19,745 090	15 937 718*

Grapes .	520,260	85,802,888 ¹	—

¹ Gallons

² Provisional data of threshing statistics

³ Provisional estimates of the Ministry of Agriculture

In Hungary there were, in 1932, 845,548 horses, 1,818,834 cattle, 1,210,491 sheep, and 2,961,195 pigs

The total area under forest in Hungary (1931) was 2,704,502 acres

The production of coal in Hungary was in 1900, 6,575,000 tons; in 1910, 9,086,000 tons in 1927, 7,030,196 tons, in 1929, 7,870,189 tons, in 1930, 6,987,826 tons, and in 1931, 6,887,620 tons The best quality coal is found in the Mecsek Mountain, in the district of Pécs Bituminous coal is found at Ajk Hungary has a considerable number of brown coal and lignite mines Her bauxite deposits may be counted among the largest in the world, production in 1931 was 89,556 tons

Hungary retains important fishery preserves in the Danube and Theiss

rivers and in lake Balaton. The latter, situated in the west, is the largest lake in central Europe, being 50 miles long and from 2 to 7 miles broad. Its waters contain plentiful supplies of perch, carp, pike, sheatfish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the hilly country, "Tokaj," in the northeast section of Hungary.

The industries of Hungary are based on agriculture. They include milling, distilling, the manufacture of sugar (1,256,070 metric quintals of raw sugar in 1931), hemp and flax, and also iron and steel works (159,630 metric tons of pig iron and 316,291 metric tons of steel in 1931). In 1931 there were in Hungary 3,442 factories, employing on an average 195,478 workmen, with an output valued at 2,054 million pengos.

Commerce.

Trade for 5 years is shown as follows —

Year	Imports		Exports	
	Quantity	Value	Quantity	Value
	Million Quintals	Thousands of Pengos	Million Quintals	Thousands of Pengos

Internal Communications

In 1931 there were 2,638 miles of state roads, 9,103 miles of municipal roads and 5,152 miles of inferior roads, total, 16,893 miles of road

The length of railways in Hungary in 1930-31 was 8,665 kilometres, or 5,381 miles, of which 7,098 kilometres, or 4,408 miles, are owned by the State. Of the total 997 kilometres or 619 miles are double track. The passengers carried in 1940-31 were: State railways, 75,847,000, private railways, 34,917,000; and freight, 28,308,000 and 4,533,000 metric tons respectively. There are five air lines over which 3,146 flights were made in 1931 with 6,564 passengers, and 404 metric tons of freight. Distance flown was 482,425 miles.

Number of Hungarian post offices (not including collecting places and railway post) (1931), 2,386. In 1931, the inland postal service handled 262,312,000 pieces of correspondence, and the international 37,158,000

pieces, 9,979,000 parcels were carried on the inland service, and 1,019,000 on the international service. On December 31, 1931, the length of telegraph lines was 5,515 miles, of telegraph wires, 51,829 miles, of telephone lines, 14,897 miles, and of wire 388,383 miles. The postal and telegraphic services are in the hands of the Government.

The total number of telegrams handled in 1931 was 3,426,835 (2,019,790 inland, 1,141,823 foreign, and 265,217 transit) and, 698,685 circulars. The number of telephone conversations in 1931 was local, 128,773,006, inter urban, 3,624,829, international service, 1,431,722.

Currency and Banking

By a law of November 4, 1925, a new monetary unit, the 'pengő' (= 12,500 paper crowns), subdivided into 100 *fillér*, was instituted, and came into use on December 27, 1926. Up to January 31, 1927, new pengo coins were issued to the value of 24,752,105 pengos. The pengo contains 0.263158 grammes of fine gold.

The amount of the bank notes in circulation, issued by the National Bank of Hungary, was 300,740,475 pengos on February 23, 1933. Metal reserve was 125,078,841 pengos.

On December 31, 1931, the total saving deposits in the Postal Savings Bank and the twelve principal Budapest banks amounted to 516,700,000 pengos as compared with 681,600,000 on December 31, 1930.

The metric system of weights and measures is in use.

Diplomatic Representatives

1 OF HUNGARY IN GREAT BRITAIN

Envoy and Minister — Count Laszlo Szechenyi. Appointed December 28, 1932.

Counsellor — Dr Ladislas de Bárdossy.

Secretary — Marquis Alphonse de Pallavicini.

Military Attaché — Major Count Marcel de Stomm.

2 OF GREAT BRITAIN IN HUNGARY.

Minister and Consul General — Viscount Chilton, K C M G. Appointed June 1, 1928.

Secretaries — W. E. Houstoun-Boswall and R. I. Speaight.

Military Attaché — Lieut Col F. N. Mason McFaulane, M C.

Commercial Secretary — Major H. F. Heywood, M C.

Pro-Consul — J. W. Thompson.

ICELAND.

(ÍSLAND.)

Reigning King.

Iceland is united with Denmark by a personal bond of union under the government of King Christian X. (see Denmark).

The first settlers came to Iceland in 874. Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognised the rule of the King of Norway. In 1381, Iceland together with Norway, came under the rule of the Danish Kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since December 1, 1918, it has been acknowledged as a sovereign State, and is united with Denmark only through the identity of the Sovereign.

As King of Iceland King Christian X has a civil list of 60,000 kroner

Constitution and Government.—By the Act of Union of November 30, 1918, Iceland is temporarily united with Denmark in certain affairs beyond the King's person.

According to the Act of Union, Denmark and Iceland are free, sovereign States, united by one King and by the agreement comprised in the Union Act. The order of succession is not to be altered without the assent of both States. In Iceland, Danish citizens enjoy the same rights as Icelandic citizens, and in Denmark the latter enjoy the same rights as Danish citizens. But citizens of either of the States are exempt from military service in the other. Danish goods and products in Iceland and Icelandic goods and products in Denmark are treated no less favourably than those of any other country. Denmark takes charge of the foreign affairs of Iceland, and if Iceland so desires it, special Icelandic attachés or experts on Icelandic conditions may be appointed to Danish embassies and consulates, the expenses arising out of such appointments to be borne by Iceland. Denmark has a minister at Reykjavík, and Iceland a minister at Copenhagen.

An advisory Danish Icelandic committee of eight members has been appointed to review Bills of importance to both States, and also to prepare Bills aiming at co-operation between the two States. After December 31, 1940, the Danish Parliament and the Icelandic Legislature may demand negotiations to be opened concerning the revision of the Union Act.

Denmark has informed the Powers that, in conformity with the Union Act, she recognises Iceland as a sovereign State.

The present constitution of Iceland is embodied in the Charter of May 18, 1920. By the terms of this Charter the executive power belongs to the King, and is exercised by him through responsible ministers, while the legislative power rests conjointly with the King and the Parliament, which is called *Althing*. The *Althing* is composed of 42 members, of whom 36 are elected for the term of 4 years by universal suffrage in constituencies, each electing one or two representatives by simple majority, except the capital, where 4 members are elected by Proportional Representation. The remaining 6 members are elected for the term of 8 years by Proportional Representation for the whole country. The franchise is enjoyed by all Icelandic citizens (men and women) of good reputation (unless they are indebted for poor relief) who are over 25 years of age and have resided in the country during the previous 5 years. All voters are eligible as candidates, save only the superior judges.

The *Althing* is divided into two Houses, the Upper House and the Lower House. The former is composed of 14 members viz the 6 members elected by Proportional Representation for the whole country, together with 8 members elected by the whole *Althing* in common sitting out of the members elected by universal suffrage. The remaining 28 members form the Lower House. The members of the *Althing* receive payment for their services besides travelling expenses, members residing in the capital are allowed 8 krónur

(8s 11d) per day, and members residing outside the capital 10 krónur (11s 1d) per day. This payment has temporarily been raised by 15 per cent.

The Althing must meet on February 15 in every year, unless it is convoked by the King at an earlier date. The Budget Bills must first be laid by the Government before the Lower House, but all other Bills can be introduced in either of the Houses. If the Houses do not agree they assemble in a common sitting, and the final decision is given by a majority of two thirds of the voters, with the exception of Budget Bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can only vote in the House of which they are members.

The executive power is exercised under the King by a ministry divided into 3 departments. The ministry, appointed June 3, 1932, is as follows —

President of the Council and Minister of Finance — Asgeir Asgeirsson
Minister of Justice and of Ecclesiastical Affairs — Magnus Gudmundsson
Minister of Trade and Communications — Thorsteinn Briem

The ministers are responsible for their acts. They can be impeached by the Althing, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can only try parliamentary impeachments.

For administrative purposes Iceland is divided into 16 provinces (*sýslur*), each governed by a chief executive functionary (*sýslumaður*). Each province forms one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 8 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 21 years of age), in urban municipalities by Proportional Representation, but in rural municipalities by simple majority.

Area and Population.—The following table gives the area and population of Iceland according to the census in 1930 —

Divisions	Area, English sq m	Population, 1930	Population, 1930, Per sq m.
The South West	4,125	46,772	11.3
The Western peninsula	3,658	13,071	3.6
The North	13,695	24,961	1.8
The East	5,054	10,461	1.8
The South	12,277	13,605	1.1
Total	89,709	108,870	2.7

Estimated population on December 31, 1931, 109,719.

In 1930, 49,483 were domiciled in rural districts, and 59,387 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1930, the foreign born population numbered only 1,611, or 1.4 per cent of the whole. 592 were born in Denmark, 417 in Norway, 141 in Faroe Islands and 361 in other countries.

The capital of Iceland, Reykjavík, had in 1931 a population of 28,847; other towns are Akureyri, 4,001, Hafnarfjörður, 3,568, Vestmannaeyjar, 3,345, Ísafjörður, 2,441, Siglufjörður, 2,100, Nes, 1,098, Seyðisfjörður, 989.

The following table gives the total number of births, deaths and marriages, with the surplus of births over deaths, for three years —

Years	Marriages	Total living Births	Stillborn	Deaths	Surplus of Birth over Deaths
1929	758	2,644	82	1,287	1,407
1930	759	2,808	68	1,248	1,560
1931	681	2,794	62	1,277	1,517

Of the births in 1930, 15.1 per cent. were illegitimate (15.7 per cent. in 1929)

Religion.--The national Church, and the only one endowed by the State, is Evangelical Lutheran. But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of one bishop. At the census of 1930 only 1,492, or 1.4 per cent. were returned as Dissenters.

Education.--There is a University in Reykjavik. There are 2 grammar schools, 3 public high schools, besides 2 ladies' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school, and several other special schools. The elementary instruction is compulsory for a period of 5 years, the school age being from 10 to 14 years. Before the age of 10 the children are usually privately educated, at any rate in the country. In 1928-29, there were 238 elementary schools, with 400 teachers and 8,709 pupils. There are also several continuation schools for young people.

Pauperism and Old-Age Pensions.--Ordinary poor relief is regulated by the law of May 31, 1927. Each community constitutes a poor district.

There is in every community one Old-Age Pension Fund, to which all men and women from 18 to 60 years of age, to whom pensions are not otherwise secured, are bound to contribute, unless they are considered too poor to do so. In addition the funds receive a subvention from the State. Grants are made to infirm poor persons over 60 years of age who for the preceding 5 years have not received poor relief.

Justice and Crime.--The lower courts of justice in Iceland are those of the provincial magistrates (*sýslumenn*) and town judges (*býarsýslar*). From these there is an appeal to the Supreme Court (*hæstiréttur*) in Reykjavik, which has 3 judges.

In 1930, 37 men (30 in 1929), and 1 woman (1 in 1929), were convicted of crime.

Finance.--Current revenue and expenditure for 6 years.---(1 kr. = 22.15)

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928	643,600	594,908	1931	676,358	706,742
1929	731,584	693,619	1932 ¹	598,689	475,202
1930	754,693	733,709	1933 ¹	473,899	484,272

¹ Budget estimates.

Budget estimates for the year 1933 for current revenue and expenditure —

Revenue	Krónur	Expenditure	Krónur
Taxes	2,670,000	Interest on State debt	1,406,187
Customs and excise	6,025,000	Civil list of the King	78,200
Balance on State undertakings	1,206,800	Althingi	283,067
Balance of domain revenue	28,600	The central administration	299,717
Interest on State assets	550,195	Foreign Affairs	94,600
Other revenues	50,000	Justice, police, etc	1,183,620
		Sanitary affairs	618,571
		Communications	1,887,588
		Ecclesiastical affairs and instruction	1,628,187
		Science, literature, and art	171,645
		Trade, etc	1,912,400
		Social welfare	808,400
		Pensions	294,449
		Other expenditure	150,000
Total revenue	10,580,095 (475,890 l.)	Total expenditure	10,726,631 (484,272 l.)

The public debt of Iceland was on December 31, 1931, 23,513,679 krónur, besides 15,879,803 krónur on behalf of banks and mortgage institutions, or altogether 39,393,482 krónur, of which the foreign debt amounted to 36,377,519 krónur, and the internal debt 3,015,963 krónur

The State assets amounted on December 31, 1931, to 65,018,834 krónur

Defence.—Iceland possesses neither an army nor a navy, nor any fortifications, and according to the Act of Union of 1918 its permanent neutrality is established. Two fishery protection vessels are maintained in commission.

Production.—Of the total area of Iceland, about six sevenths is unproductive, but only about one quarter per cent is under cultivation, which is confined to hay, potatoes, and turnips. In 1930 the total hay crop from cultivated and uncultivated land was about 3,255,000 cwt, the crop of potatoes 72,000 cwt, and of turnips 25,000 cwt. In the spring of 1930 the live stock was as follows—Horses 49,000, head of cattle 30,100, sheep 682,000, goats 3,000.

The total value of the fisheries in 1930 was estimated at 42,717,000 krónur (about 1,929,000 l.), whereof the cod fishery was valued at 39,630,000 krónur, and the herring fishery at 3,187,000 krónur.

Commerce.—Total value of imports and exports for 5 years (kr 22 15 = 1 l.) —

	1926	1927	1928	1929	1930
Imports	2,607,990	2,400,090	2,907,178	3,475,034	3,249,190
Exports	2,895,987	2,861,161	3,612,069	3,849,707	3,718,117

The value of the leading imports and exports for 1930 was as follows —

	Imports	Exports
	Krónur	Krónur
Animals living and animal food	1,374,419	49,074,063
Cereals	4,551,862	—
Colonial produce	4,246,847	—
Textile materials	50,251	459,494
Yarn, rope, etc.	2,566,791	1,808
Textile manufactures	11,161,911	17,099
Skins, hair etc	261,210	4,890,747
Oils, tallow, etc.	4,586,207	5,334,888
Timber and wooden goods	6,427,898	135
Coal	3,818,380	—
Salt	2,540,243	—
Metals and hardware	6,790,378	2,731
Vessels, carriages, machinery, etc	10,118,172	3,564
Other articles	13,493,455	311,019
Total	73,968,024	60,095,538

The following table shows the value of the trade with the different countries in 1930 —

	Imports	Exports
	Krónur	Krónur
Denmark	20,188,211	2,555,409
Great Britain	19,489,105	9,338,191
Norway	7,746,405	4,937,086
Sweden	3,491,998	3,732,168
Germany	11,439,940	4,987,396
Netherlands	1,557,480	139,615
Belgium	932,927	975
Portugal	176,512	3,615,421
Spain	2,307,578	20,440,134
Italy	155,954	7,444,965
United States	2,297,299	1,537,904
Other countries	2,284,615	1,321,274
Total	71,968,024	60,095,538

The chief articles of import from Iceland to the United Kingdom (Board of Trade Returns) for 1931 were fish, 77,167*l*, skins, 14,739*l*, fish oils, 16,622*l*. Chief articles of the United Kingdom exports to Iceland, 1931 coal, 44,599*l*, cottons, 21,227*l*, meal and flour, 26,518*l*, petroleum, 27,149*l*.

Total trade (Board of Trade Returns) between Iceland and the United Kingdom for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Iceland to U K	548,729	550,982	346,167	180,857	230,411
Exports to Iceland from U K	650,013	658,684	702,903	410,404	391,962
Re exports to Iceland from U K	108,933	104,361	122,688	95,147	76,273

Shipping and Navigation.—The mercantile marine of Iceland (above 12 gross tons) was, in 1931, 88 steam vessels of 28,696 gross tons, 286 motor vessels of 7,874 gross tons, and 5 sailing vessels of 175 gross tons total, 379 vessels of 36,745 gross tons

Internal Communications.—There are no railways in Iceland. At the end of 1929 there were completed about 1,300 km (800 miles) of carriage roads outside the towns. In 1931 there were registered 1,577 automobiles, of which 609 were passenger and 968 trucks.

There are 523 post offices.

The length of the telegraph and telephone lines at the end of 1930 was 2,521 miles. The wires had a length of 7,626 miles. There were 372 telegraph and telephone offices. Number of dispatches sent in the year 1930 was 298,914 of which 155,154 were internal. Number of telephone conversations was 607,064. The total receipts amounted to 1,863,749 krónur, and the total expenditure to 1,467,767 krónur, leaving a surplus of 395,972 krónur.

Banking and Credit.—There are 3 banks in Iceland, *Landsbankinn* (The National Bank) a note-issuing bank which belongs entirely to the State, *Bunadabanki Íslands* (The Rural Bank of Iceland) a State Bank founded 1930, and *Útvegsbanki Íslands* (The Fishing Trade Bank), a private joint stock bank, founded in 1930 the majority of shares being held by the Government. On December 31, 1931, the accounts of the National Bank balanced at 68,697,894 krónur. A special department for loans on mortgage is connected with the National Bank.

At the end of 1931 there were 53 savings banks with 23,200 depositors, and deposits amounting to 8,993,000 krónur, or about 388 krónur to each account.

Money, Weights and Measures.—The Icelandic name of the monetary unit is *króna*, pl. *krónur*. Since October 1925 the relation of the value of the Icelandic króna to £ has been altered to £1 = Kr 22 15, but this value is not stipulated by law.

The metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1 OF ICELAND IN GREAT BRITAIN

According to the Act of Union of 1918, Iceland is represented by the Diplomatic Representatives of Denmark.

2 OF GREAT BRITAIN IN ICELAND

Consul at Reykjavík—Asgeir Sigurdsson, C B E

There are also consular representatives at Akureyri, Ísafjörð, Norðfjörð, and Vestmannaeyjar.

IRAQ (MESOPOTAMIA)

IRAQ was freed from the Turks during the Great War. It was recognised as an independent State, to be placed under a Mandatory Power, and the mandate was allotted to Great Britain. On December 14, 1927, a treaty was signed between Great Britain and Iraq by which the former undertook to recognise the latter as an independent State. Iraq was admitted to membership of the League of Nations on October 4, 1932, and the mandate was terminated.

Reigning King.

Faisal (Hon G C M G), b 1883, third son of Husein ibn Ali (Grand Sherif and Emir of Mecca, 1908-1916, King of the Hijaz November, 1916, and Caliph March 7, 1924; abdicated October 3, 1925) by the Sherifa Abdiya, daughter of his father's uncle, Abiulla V, Grand Sherif and Emir of Mecca, 1858-1877. Emir in Damascus October 1, 1918, proclaimed King of Syria March 20, 1920, abdicated July 28, 1920, elected and proclaimed King of Iraq August 23, 1921. Married, 1906, the Sherifa *Huzayma*, daughter of his father's brother, the Sherif Nazir.

Children of the King.—(1) Emir *Ghazi*, Crown Prince, b. March 21, 1912, (2) Princess *Asa*, (3) Princess *Rajna*, (4) Princess *Rafia*.

Government.—In 1920 a Council of State was formed, as a provisional measure to conduct the administration of the country. On August 23, 1921, the High Commissioner proclaimed the Emir Faisal King of Iraq, by election of the people, as the result of a plebiscite in which 96 per cent. of the inhabitants of the country voted in his favour.

The Cabinet, formed on March 20, 1933, is as follows —

Premier — Rashid Ali Beg *el Atlani*

Minister of Foreign Affairs. — General Nuri Pasha *es Sard*

Minister of Interior — Hikmat Beg *Sulaiman*

Minister of Defence — Jalal Beg *Baban*

Minister of Finance — General Yasin Pasha *el Hashimi*.

Minister of Justice — Mohamed Zaki Beg

Minister of Economics and Communications. — Rustam Beg *Hardar*

Minister of Education. — The Seyyid Mohamed *Mehdi*

The Organic Law passed by the Constituent Assembly in June, 1924, provides for a limited monarchy and a responsible government. The legislative body consists of a Senate of 20 nominated 'elder statesmen,' and the Lower House of 88 elected deputies.

In March, 1924, the elective Constituent Assembly met for the purpose of ratifying the Anglo Iraqi treaty, passing the Organic Law and the Electoral Law for the election of a subsequent parliament. It completed these duties early in August, and was then dissolved. The first Parliament under the Constitution was opened by King Faisal on July 16, 1925.

The country is now divided into the following *Liwas*: Mosul, Arbil, Kirkuk, Sulaimani, Diyala, Baghdad, Dulaim, Kut, Karbala, Hillah, Diwaniyah, Muntafiq, 'Amarah, Basrah. Each *Liwa* is administered by a *Mutasarrif*, and is sub divided into *Qadhas* (under *Qaimmaqams*) and *Nahiyahs* (under *Mudirs*).

Area and Population.—The country has an area of 177,148 square miles (the former Turkish vilayets respectively of Baghdad, 113,867 square miles, Basrah, 27,070 square miles, and Mosul, 36,211 square miles) and a population, according to the census of 1920, of 2,849,282. The following are the detailed figures of the census results —

Division	Sunni	Shi'ah	Jewish	Christian	Other Religions	Total
Baghdad	130,000	54,000	50,000	15,000	1,000	250,000
Samarra	68,455	14,215	300	—	—	80,970
Diyala	54,954	40,097	1,689	397	900	104,936
Kut	8,574	93,712	881	127	—	107,798
Diwaniyah	1,000	192,300	6,000	5,000	200	204,500
Shamiriyah	445	189,000	530	20	5	190,000
Hillah	15,988	155,897	1,065	27	28	173,000
Dulaim	247,000	200	2,600	200	—	250,000
Total Vilayet of Baghdad	524,414	750,421	62,635	20,771	2,133	1,360,304
Basrah	24,408	130,494	6,928	2,221	1,549	165,600
Amarah	7,000	284,700	3,000	300	5,000	300,000
Muntafiq	11,150	506,220	160	30	2,440	520,000
Total Vilayet of Basrah	42,558	721,414	10,088	2,551	8,989	785,000
Mosul	244,718	17,150	7,635	50,670	30,180	350,353
Arbil	90,100	—	4,800	4,100	1,000	100,000
Kirkuk	85,000	5,000	1,400	600	—	92,000
Sulaimani	158,900	—	1,000	100	—	160,000
Total Vilayet of Mosul	579,718	22,150	14,835	55,470	31,180	703,353
Grand Total	1,146,682	1,494,015	87,488	78,792	42,302	2,849,282

Education—The medium of instruction in the schools has been changed from Turkish to Arabic in the Arabic-speaking provinces, and to Kurdish in Kurdish-speaking areas, Turkish remains in a few Turcoman towns (Tuzkhurmatli, Kirkuk, Kifri). In 1931 there were 43,000 pupils (boys and girls) in the 324 government primary and elementary schools, with 1,410 teachers. There were in 1931 three secondary schools at Baghdad, Basrah and Mosul with 875 pupils, and 18 intermediate schools at other places with 1,817 pupils. There are two technical schools, a law school, a medical school, an engineering school, a military college and a theological college for both sects. There are one men's training college for primary teachers with 255 students, one women's training centre and one night secondary school. There are 20 centres for illiterates (male and female), having 65 classes in all, at various places in the country. In April, 1922, the King laid the foundation stone of the future Al ul Bait University, and the first block was opened on March 15, 1928. The education budget for the year 1931-32 amounted to 4,133,470 rupees.

Justice—Civil and Shara' Courts are established throughout the country as follows—A Court of Cassation at Baghdad with a British President and 5 Iraq Judges, 2 Shara' Courts of Revision at Baghdad, 5 Courts of First Instance, 11 Single Judge Courts with jurisdiction of a Court of First Instance, 28 Peace Courts, 29 Shara' Courts. In districts where a Peace Court only is established the Peace Judge has limited jurisdiction of a Court of First Instance as well as Shara' Jurisdiction.

Wherever a Civil Court is established there is also a Criminal Court, every judge having either first or second class magisterial powers. Certain administrative officials of outlying places where no courts have been formed have also magisterial powers.

The prison population at the end of 1930 was 3,790 (64 females).

Finance—Civil receipts and expenditure —

—	1926-27	1927-28	1928-29	1929-30	1930-31
	Rupees	Rupees	Rupees	Rupees	Rupees
Revenue	5,67,00,473	5,90,97,055	5,94,44,208	5,72,77,479	4,64,56,781
Expenditure	5,86,71,711	5,69,93,338 ¹	5,99,01,142 ²	5,78,19,390 ³	5,11,57,521

¹ Including 16,70,877 rupees on capital expenditure.

² Including 12,84,044 rupees on capital expenditure.

³ Including 11,58,788 rupees on capital expenditure.

Defence—Besides British Imperial Forces, which passed on October 1, 1922 under the control of the Air Ministry, and now consist of R A F units, there are local forces of the Iraq Army. The establishment of the 'Iraqi Army on April 1, 1931, was as follows—2 cavalry regiments and 1 cavalry school and dépôt, 2 field batteries, 3 pack batteries and 1 artillery school and dépôt, 10 infantry battalions, 2 infantry dépôts, 3 transport companies, 1 mechanical transport company, medical corps, remounts and veterinary department, ordnance department, military police corps, signal battalion, royal military college, staff school; small arms school, motor machine gun company, mechanical transport school and dépôt, Royal 'Iraqi air force, and the King's bodyguard. Total strength (1933) 20,000 of all arms. The Ministry of Defence is advised by a British Military Mission.

On January 1, 1932, the Iraq Police force comprised 62 'Iraqi Gazetted Officers, 224 Inspectors, 3,687 mounted police and 3,688 foot police—total

strength, together with auxiliary police, 8,858 The strength of the British Inspectorate staff is 9 Gazetted Officers and 2 non-gazetted (to be reduced in 1933 to 7 Gazetted Officers only) The force is under complete 'Iraqi executive control, with the exception of the Railway Police, numbering 275 officers and men, which however will come under 'Iraqi executive control in April 1933 Police budget for the year 1931-32, 77,08,790 rupees The auxiliary police, in addition to the railway police, include three small camel corps, total strength, 150 camelmén, who operate in the Western and South Western Frontier, and also 28 armed cars, equipped with Lewis and Vickers guns Attached to these cars are Police wireless stations (mobile and fixed) Of the car sections 2 are employed in the interior of the country, while the remainder are employed solely in the Western and Southern Desert areas stretching from Mosul Liwa in the North to Basrah Liwa in the South There is a large Police Training School in Baghdad for probationary gazetted officers and inspectors

Production—Iraq is a land of great potentialities The soil of the country is rich, but there are vast areas which can only be cultivated if irrigated by canals or pumps The Irrigation Department operates several canal systems, exercising varying degrees of control in water distribution whilst other canals are in the hands of tribal groups and individuals The number of pumps at the end of August 1930 was roughly 1,960, with a total horse power of perhaps 50,950, all in the hands of private individuals or tribal groups The total area actually irrigated by them in a single year is at present about 1,000,000 acres, but reliable figures are not available

The oil resources of the area known as the Transferred Territories near the Persian frontier, 30 miles south of Khanaqin, are being developed by the Khanaqin Oil Company, a subsidiary of the Anglo Persian Oil Company Three wells have now been drilled to the oil bearing strata, and are on production being connected with the pipeline which supplies the refinery at Alwand (Khanaqin) some 30 miles away Oil for consumption in Iraq is refined at the Alwand Refinery and distributed and marketed by the Khanaqin Oil Company in all parts of Iraq at cheap prices controlled by an agreement between the company and the Government The oil resources of the remainder of the Mosul and Baghdad vilayets are being developed by the Turkish Petroleum Company, which in June 1929, changed its name to the 'Iraq Petroleum Co., Ltd., under its Concession of March 1925 Many different structures, chiefly in the Mosul, Kifri and Kirkuk districts, are being tested, and oil has already been struck in eleven wells chiefly on the Babe Gurgur structure north of Kirkuk

The British Cotton Growing Association is encouraging cotton cultivation by offering a secure market to cultivators, and the Department of Agriculture co-operates by undertaking scientific experiments and seed culture The crop for 1928 was 5,202 bales, and for 1929, 4,500 bales (estimated) The chief winter crops are wheat and barley The date crop is important, and the chief producing area is the tidally irrigated riverain belt of the Shatt-el-Arab Wool is also an important export

Commerce.—Imports and exports for five fiscal years (ended March 31) were as follows—

	1927-28	1928-29	1929-30	1930-31	1931-32
	Rupees	Rupees	Rupees	Rupees	Rupees
Imports	10,84,55,242	9,50,04,570	9,82,32,840	7,13,61,615	6,39,78,175
Exports	6,15,40,505	5,57,40,974	5,68,38,285	4,07,12,642	4,62,23,767

Customs gross revenue in 1929-30, 2,22,90,225 rupees, in 1930-31, 1,84,07,626 rupees, in 1931-32, 1,97,54,502 rupees Transit, 1929-30, 5,13,23,901 rupees; 1930-31, 3,25,92,682 rupees, 1931-32, 3,07,67,262 rupees

The export of barley in 1929-30, 81,346 tons, valued at 55,03,415 rupees, in 1930-31, 72,538 tons, valued at 24,70,696 rupees, of wheat in 1929-30, 15,476 tons, valued at 17,37,459 rupees, in 1930-31, 88,626 tons, valued at 58,88,512 rupees, of wool in 1929-30, 6,672 tons, valued at 78,98,898 rupees, in 1930-31, 4,492 tons, valued at 39,34,112 rupees, and of dates in 1929-30, 129,988 tons, valued at 1,87,63,588 rupees, in 1930-31, 158,640 tons, valued at 1,05,69,012 rupees

The total trade between Iraq and United Kingdom, according to the Board of Trade Returns, was as follows for five years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Iraq	1,727,403	1,676,228	1,131,156	705,113	423,940
Exports to Iraq	2,080,957	2,425,649	1,692,499	1,242,118	1,975,902
Re-exports to Iraq from U K	60,684	71,381	84,251	26,673	40,170

Communications.—The Iraqi railway system consists of a metre gauge line from the Port of Basra, which is the Port of Iraq situated on the Shatt el-Arab at the head of the Persian Gulf, to Baghdad, a distance of 354 miles. There are further a metre gauge line, connected with the Basra line by a wagon ferry across the River Tigris at Baghdad, from Baghdad to Khanaqin (110 miles) which is an important town near the Iraqi-Persian Frontier, a branch metre gauge line from the Baghdad Khanaqin line to Kirkuk (109 miles) which is to be extended to Mosul, a standard gauge (4 ft 8½ in) line from Baghdad to Baiji (136 miles) along the right bank of the Tigris towards Mosul. The main Basra-Baghdad line passes the ancient cities of Ur of the Chaldees, Babylon and Kish, and special railway facilities exist to enable travellers to visit these cities. Goods are carried direct from Basra Port to Khanaqin on the Iraqi-Persian Frontier, whence they are transported by road to the markets of Persia. The total route mileage open on March 31, 1932 was 752.70 miles. There were also 169.86 miles of siding, making a total of 922.56 miles. Railway earnings for the year 1931-32 were 61,21,810 rupees, and expenses 58,95,689 rupees.

The Iraqi railway also runs a passenger motor service between Kirkuk and Nisibin via Mosul to connect with the Taurus express to Haidar Pasha, and thence by the Simplon Orient express. This gives a through connection from India to England by sea, rail and road—Baghdad to London in seven days with Wagons-Lits from Nisibin to Calais—and Bombay to London in eighteen days, including two days in Iraq to visit Ur of the Chaldees, Babylon, Kish, etc.

Since the War nearly five thousand miles of roads, chiefly earthen, have been opened for the passage of all classes of traffic.

In the year 1929-30, 820 steamers of a gross registered tonnage of 4,386,967 entered the ports of Basra and Abadan.

At the close of 1931 there were 103 Post Offices in Iraq. At most of these Money Orders are issued and paid. A restricted number of Offices also issue and pay Postal Orders and accept and deliver Insured and Cash on-Delivery (Value-payable) postal packets.

Internal mail communication is maintained over distances totalling 4,955 miles, as follows—1,286 miles by air, 739 miles by rail, 2,413 miles by mechanical road transport, 389 miles by pack animals and runner service, 122 miles by river and 6 miles by tram.

Apart from frontier exchanges of mails with Turkey and Persia ordinary foreign mails are received and despatched by two routes, a weekly service *via* India for correspondence to and from all countries East of Iraq and also East and South Africa, and a bi weekly service across the Syrian desert and through Syria for correspondence with all countries West of Iraq including those in North and South America. The latter service affords mail communication to or from most countries in Europe in less than fifteen days, the time of transit for mails between England and Iraq being ten to twelve days. Parcels are received and despatched by both of these routes.

Air Mail correspondence is both despatched and received in mails conveyed by the Imperial Airways, Ltd., London-Cairo-Baghdad-Karachi service. The transit period between Iraq and England by this service is 4 to 5 days, and between Iraq and India about 3 days. Air Mail communication with Persia and Syria is maintained by means of a Messrs Junkers bi weekly service and an Air Union Orient Lines, Ltd., weekly service respectively.

During 1931 the number of postal packets transmitted by the Inland Post was approximately 4,041,882, including 17,837 parcels. Approximately 1,679,000 postal packets, including 6,318 parcels, were despatched to destinations abroad and 3,334,000 including 31,140 parcels, were received from foreign countries for delivery in Iraq.

Post Office Money Orders issued during 1931 totalled 76,825 of an aggregate value of 29,81,404 rupees, and 67,567 Money Orders, aggregating 25,95,470 rupees, were paid.

On December 31, 1931, the line and wire mileages of the Iraq Telegraph and Telephone System were 4,210 miles and 19,090 miles respectively. The number of Post and Telegraph Offices open for public telegraph traffic was 80, in addition, 62 Railway Telegraph Offices also dealt with public telegrams.

The total number of Inland Telegrams transmitted during 1931 was 153,394. Sent and received ordinary foreign telegrams totalled 41,631 and 42,350 respectively. The number of wireless messages sent was 9,937 and the number received 10,829. At the end of the year there were 32 Departmental Public Telephone Exchanges, and 26 Sub Exchanges operating private systems. The number of connections in the public system was 1,657. A Strowager Automatic Telephone Exchange has been operating at Basrah since 1923.

Currency.—The rupee currency has been displaced by a new national Iraqi currency and note issue, according to a new Currency Law published on April 19, 1931. By this law, which came into effect on July 1, 1931, but was suspended until April 1, 1932, the monetary unit became the dinar equal in value to one pound sterling, and divided into 1,000 fils. Silver coins for 50 (called the Dirham) and 20 fils will be struck, and other coins for 10, 4 (nickel), 2 and 1 (bronze) fils. Notes are for a quarter, a half, and one dinar, and for 5, 10 and 100 dinars. The 50 fils coins are of a silver alloy, the fineness of which is 500 parts of pure silver in 1,000 parts, and of a weight of 9.00 grammes, while the 20 fils coin is of a silver alloy, the fineness of which is the same, but of a weight of 3.60 grammes. Larger coins of 100 fils and 50 fils respectively have subsequently been approved for issue. The Currency is controlled by an Iraqi Currency Board sitting in London.

Diplomatic Representatives.

1. OF GREAT BRITAIN IN IRAQ.

Ambassador — Sir Francis Humphrys, G C V O , G C M G , K.B.E., C I E (Appointed, October 4, 1932)

Counsellor — G D Oglvie Forbes

First Secretary — C H. Bateman, M C.

Air Officer Commanding British Forces — Air Vice Marshal E. R. Ludlow-Hewitt, C B , C M G , D S O , M C

Commercial Secretary — C Empson

British Consul, Baghdad — C A W W Were

British Consul at Basra — L H Hurst

There is also a Consul at Mosul and Vice-Consuls at Kirkuk and Diana Rowanduz

2 OF IRAQ IN GREAT BRITAIN.

Envoy and Minister — Jafar Pasha el Askari, C M G

First Secretary — Atta Amin Beg

ITALY.

(REGNO D'ITALIA)

Reigning King.

Vittorio Emanuele III., born November 11, 1869, the only son of King Umberto I of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1878, daughter of Nicholas, King of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901, married on April 9, 1923, to Count Calvi di Bergolo; has three daughters, born in 1924, 1927 and 1930; Princess *Mafalda*, born November 19, 1902, married

on September 23, 1925, to Prince Philip of Hesse, has two sons, born in 1926 and in 1927 respectively, Prince *Umberto* Nicola Tomaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept 15, 1904, married January 8, 1930, to Marie José of Belgium, born August 4, 1906, Princess *Giovanna*, born November 13, 1907, married to King Boris of Bulgaria, on October 25, 1930, has one daughter, born in 1933, Princess *Maria*, born December 26, 1914

Cousin of the King

Prince *Vittorio Emanuele*, of Savoy Aosta Count of Turin, born November 24, 1870, son of the late Prince Amedeo of Savoy, Duke of Aosta, from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died November 8, 1876

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Geneva. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke, in 1418 they acquired the Principality of Piedmont, and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour of his son, the late King Vittorio Emanuele II, who, by the Peace of Zurich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plébiscites* in Parma, Modena, the Romagna, and Tuscany, on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), was annexed to the Kingdom by *plébiscite* on October 2. After the Great War—by the Treaty of Saint Germain (Sept 10, 1919) there were annexed to the kingdom the Venezia Tridentina, the Venezia Giulia with Zara, the islands of Cherso, Lussino and other minor ones. Later, on January 28, 1924, Fiume was also annexed.

The civil list has been settled (1919) at 11,250,000 lire, by a law of 1925 an allowance of 3,000,000 lire was settled on the Prince of Piedmont, Heir Apparent, Duke of Aosta and the Duke of Genoa receive an allowance of 1,000,000 lire each.

The greater part of the private domains of the reigning family has been given up to the State.

Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles

Albert to his Sardinian subjects According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers, while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera dei Deputati.' To co-ordinate and complete all the activity of the régime, resulting from the Fascist Revolution, there is the *Gran Consiglio del Fascismo* which is composed of the *quadriviri* of the March to Rome appointed for an indefinite period, a certain number of Members (Ministers and other high dignitaries) appointed for as long as they hold their respective office, and an undetermined number of Members to be appointed for the duration of three years, by the Head of Government The *Gran Consiglio del Fascismo* forms the definitive list of the candidates to Parliament, gives its opinion on the Statutes on the arrangement and on the lines of conduct of the Fascist Party Its approval must be obtained on all questions of a constitutional nature including those connected with the succession to the throne and the prerogatives of the Crown The Secretary of the *Partito Nazionale Fascista* is also Secretary to the *Gran Consiglio* and may be invited at the sessions of the Council of Ministers In 1932 the membership of the Fascist party consisted of 1,007,231 members belonging to the male 'Fasci,' of 608,669 belonging to the young combative 'Fasci,' of 50,996 fascist students and of 145,210 persons belonging to the female 'Fasci.'

The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life, a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or, finally, should pay taxes to the annual amount of 3,000 lire On December 20, 1932, the Senators numbered 874 of these 9 are Royal Princes

By the law of May 17, 1928, the whole electoral system has been radically changed Franchise is granted to men of 21 years of age, and also to men aged 18 years, if married or widowers with sons, who are paying a syndicate rate, or taxes to the amount of 100 lire, or are receiving a salary or pension from any public institution Criminals and certain others are excluded.

The Chamber of Deputies consists of 400 members elected for 5 years. To be eligible it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate The whole country is a single constituency The National Syndicate Confederations are entitled to propose a number of candidates twice as great as the number of deputies to be elected Juridical persons and Associations of national character are also entitled to propose a certain number of candidates Out of these lists of candidates the Great Fascist Council selects 400 names which is the roll proposed to the electors If the proposed roll is not approved, fresh elections must be held In this case the lists of candidates must be presented fifteen days before the fixed day for the elections The candidates elected are those inscribed on the list which has obtained the majority of votes The seats reserved to the minority are divided among the other lists in proportion to the number of votes obtained by each list

Each Deputy has an annual allowance of 21,000 lire

The last elections took place on March 24, 1929; out of the 9,682,630 registered electors 8,661,820 (or 89.5 per cent) participated in the balloting; of these 8,517,888 (or 98.3 per cent of the electors) voted in favour of the national list of candidates

The duration of a Parliament is five years, and it must meet annually.

The ministers have the right to attend the debates of both the upper and the lower House, but they have no vote unless they are members.

The executive power is exercised by the King through the Government. The Prime Minister is the Chief of the Government responsible to the King for the general political direction of the Government. The Ministers are responsible to the King and the Chief of the Government for the action of their respective Offices. The Prefects are responsible, in their respective Provinces, for the high efficiency of all the Services connected with the State—with the exception of those connected with the Administration of Justice, of War, of the Navy and of the Air Service.

To discipline mass labour, the Italian State juridically admits Syndicates. Syndical Associations are either grouped territorially, or in Federations. The latter consist of thirteen Confederations, six for the employers and six for the workers. Each Confederation corresponds to the following activities: Agriculture, Industry, Commerce, Banks, Transport on Land and Maritime and Air Transports. The thirteenth comprises Arts or Liberal Professions.

The National Council of Corporations is presided over by the Chief of the Government and through it is carried into effect the principle of integral corporation.

The present Cabinet appointed on September 12, 1929, and reconstituted on July 20, 1932, consists of the following Members:

Prime Minister, Chief of the Government and Minister of the Interior, of Foreign Affairs and of Corporations—Signor Benito Mussolini

Minister of War—General Pietro Gazzera

Minister of Navy—Admiral Giuseppe Sirianni

Minister of Air—General Italo Balbo

Minister of Public Works—Signor Araldo di Crollalanza

Minister of National Education—Signor Francesco Ercole

Minister of Agriculture and Forests—Signor Giacomo Acerbo

Minister of the Colonies—General Emilio de Bono

Minister of Finance—Signor Guido Jung

Minister of Justice—Signor Pietro de Francisci

Minister of Communications—Admiral Costanzo Ciano

LOCAL GOVERNMENT

The State is divided into 92 Provinces, and these into 7,306 Communes. Provinces are administered by a Provincial Rectorate and a President. The President, the Vice President and the Rectors are appointed by Royal Decree. In every province there is a *Giunta Provinciale Amministrativa* which exercises functions of guardianship on Communes and on the *Opere Pie*, as well as jurisdictional functions. The *Consiglio Provinciale dell'Economia Corporativa* represents the interests of the productive activities of the Province. At the head of the Commune (with the exception of Rome where there is a Governor, and Naples where there is a High Commissioner) is the *Podestà* (Mayor) who is appointed by Royal Decree and remains in charge for five years with the same powers which were formally exercised by the elected municipal authorities. In all the capitals of the Provinces and in Communes with more than 20,000 inhabitants, there exists a Council (*Consulta*) of from 10 to 40 members, selected by the Prefect of the Province from among the persons designated by the recognised local syndical associations. The

Consulta has advisory functions only, but its advice must be asked in the case of the approval of budgets and of the imposition of taxes

Area and Population.

The following figures show the increase of the population of the Kingdom of Italy —

Year (1 Jan)	Population	Increase per cent. per annum	Year (1 Jan)	Population	Increase per cent. per annum
1816	18,388,000	—	1927	39,681,000	0.844
1872 ²	26,801,154	0.260	1928	40,064,000	0.940

Religion.

The treaty between the Holy See and Italy, of February 11, 1929, admits and confirms the principle established by the first article of the Fundamental Statute of the Kingdom of Italy that the Catholic Apostolic Roman Religion is the only religion of the State. Other creeds are permitted, provided always they do not profess principles, or follow rites, contrary to public order or to moral behaviour. The profession of such creeds is free, and discussion on religious matters is freely admitted.

The appointment of Archbishops and of Bishops is made by the Holy See, but before proceeding to such appointments the Holy See submits to the Italian Government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature.

Catholic religious teaching is given in elementary and intermediate schools. Marriages may be celebrated before a Catholic clergyman in accordance with the rules of Canon Law, or before a clergyman of other religions admitted by the State. Civil marriages when celebrated in accordance with prescribed legal formalities are also recognized.

According to the Census of 1931, 99.6 per cent of the Italians were Catholics (41,017,369), 82,481 were Protestants, 47,435 Jews, orthodox, 5,890, Muslims, 814, other religions, 2,323, atheists, 17,474, religion not disclosed, 2,885.

Education

Elementary education is free and compulsory up to the age of 14. It is given in 3 grades: Preparatory in the so called 'Maternal Schools' or 'Asili' maintained by the municipalities (3 years), Lower (3 years), and Higher (2 years).

The Secondary schools are divided into 2 grades. In the first grade are the Gymnasium (*Ginnasio*), the Preparatory Course for Teachers, the Preparatory Course of the Technical Institute, the Professional Schools. In the second grade are the classical Lyceum (*Liceo classico*), the Lyceum for Science, the Higher Course for Teachers, the Higher Technical Institute (which is divided into several Sections), the Academy of Arts, the Lyceum for Arts, the *Conservatori di Musica*.

Higher instruction is given in the Royal Universities and Higher Institutes, and also in the Free Universities and Free Higher Institutes ('Free' denotes that they are self supporting).

Physical education is organized by the *Comitato Olimpionico Nazionale Italiano*, which directs and co-ordinates the activity of 33 National Federations. Sports of a popular character are entrusted to the *Opera Nazionale Dopolavoro*. Physical education for boys from 6 to 14 years old is entrusted to the *Opera Nazionale Balilla*, and that for girls of the same age to the *Opera Piccole Italiane*.

¹ Not available² Including Lecturers.

There were also twelve higher institutes for commercial education (Turin, Genoa, Milan, Venice, Trieste, Rome, Bari, Catania, Naples, Florence, Palermo, and Bologna), with 8,409 students in 1931-32; six higher schools of agriculture (Milan, Bologna, Florence, Perugia, Pisa, and Portici) with 988 students in 1931-32, eight engineering colleges (Turin, Milan, Padua, Bologna, Pisa, Rome, Naples, and Palermo) with 3,015 students, the higher naval engineering college at Genoa with 133 students, and that of Naples with 157 students; the school of social science in Florence, with 140 students, the school for Oriental languages in Naples, with 535 students; 10 veterinary colleges (Turin, Milan, Parma, Bologna, Perugia, Pisa, Naples, Messina, Sassari, and Camerino), with 615 students; 6 superior institutes for teachers (Turin, Milan, Florence, Rome, Naples, and Messina), with 1,806 students; the school of architecture in Rome, with 238 students, and the school of industrial chemistry in Bologna, with 93 students.

The Italian Academy consists of 60 members, divided into 4 categories.

Justice and Crime.

Italy has 1 Court of Cassation, in Rome, and is divided for the administration of justice into 18 appeal court districts (with 6 detached sections), subdivided into 126 tribunal districts, and these again into mandamenti, each with its own magistracy (Pretura), 992 in all. There are also 18 Assize Courts and 71 detached sections. For civil business, besides the magistracy above mentioned, *Conciliatori* have jurisdiction in petty plaints.

By a law of November, 1926, a special tribunal was instituted with jurisdiction in offences (*delitti*) against the security of the State.

Statistics of persons convicted of offences of all kinds —

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	Before the Corti d'Assise
1926	843,860	744,475	92,948	6,437
1927	897,505	795,775	95,950	5,780
1928	871,939	777,182	89,382	5,375
1929	816,121	724,416	86,993	4,712
1930	698,204	594,393	97,521	4,290

On December 31, 1931, there were 49,422 male and 3,729 female prisoners, of these 24,796 males and 1,592 females were found guilty. At that date there were 793 establishments for imprisonment before trial, 56 penal establishments, and 20 establishments for the execution of preventive measure of safety.

Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Istituzioni pubbliche di assistenza e di beneficenza' (Opere pie), regulated by the laws of July 17, 1890, and later laws, including that of June 17, 1926.

There is, moreover, the National Institution for the protection of Maternity and Infancy (*Opera Nazionale per la protezione della Maternità e dell' Infanzia*), whose relief expenditure during the year 1931 amounted to 110,456,000 lire, and the relief foundations of the Fascist Party which entertained during the same year 242,233 children in holiday resorts.

Finance.

Total revenue and expenditure for six years (in millions of lire):—

Years ending June 30	Revenue.	Expenditure	Years ending June 30	Revenue	Expenditure
	million lire	million lire		million lire	million lire
1928-29	21,088	20,841	1931-32	19,868	20,404
1929-30	21,008	20,853	1932-33 ¹	20,284	21,829
1930-31	20,522	25,857	1933-34 ¹	17,713	20,614

¹ Estimates.

Estimates for year ending June 30, 1933 —

Sources of Revenue	1,000 Lire	Branches of Expenditure	1,000 Lire

Grand Total	20,234,143	Grand Total	21 828,810

On June 30, 1932, and on Dec 31, 1932, the public debt was as follows —

	Millions of Lire June 30, 1932	Millions of Lire Dec 31, 1932
Consolidated debt	71,735	71,268
Redeemable debt	17,190	17,092
Floating debt	6,647	7,556
Total	95,572	95,916

The foreign public debt on Oct 31, 1932, amounted to 1,653,361,000 lire

On June 30, 1931, the property of the State was as follows —

	Estimated Value, in thousand Lire
Financial assets (Treasury)	10,371,923
Property, immovable, movable, loans, and various titles	17,001,492
Property of industrial nature	27,661,188
Material in use in army, navy, and air force	17,864,140
Property used in the service of the State	3,395,387
Scientific and artistic material	14,081,486
Total	90,375,611

Defence**I. FRONTIER**

The extent of the land frontier of Italy is as follows — French frontier 303 miles, Swiss 450; Austrian 261; Yugoslav 152, frontier of San Marino

24, in all (exclusive of San Marino) 1,166 miles. The coast line of the peninsula measures 2,472 miles, of Sicily, 693, of Sardinia, 830, of Elba and the small islands, 973, the total length of coast is thus 4,968 miles.

II. ARMY.

Service in the army (or navy) is compulsory and universal. Liability to service begins at the age of 21 up to the age of 55.

The term of service in the active army is normally 18 months for all arms. After passing through the ranks, the men are placed on 'unlimited' leave, i.e., they are transferred to the reserve, in which they remain until the age of 55.

The army is divided into the metropolitan army and the colonial troops, the former being under the Ministry of War, the latter under the Ministry of the Colonies.

The establishment of the metropolitan army for 1932-33 was 16,021 officers and 231,000 other ranks organised in 11 army corps and the military commands of Sicily and Sardinia comprising —

	Divisions	Brigades	Legions	Regiments	Battalions	Groups	Squadrons	Batteries	Companies
Carabinieri			21						
Infantry	50	33		111	208				
Cavalry	2	2		12			60		
Artillery—									
Field				32		126		280	
Mountain				3		9		27	
Heavy				22		42		274	
Coast				3		13		18	
Anti Air				5		12		22	
Engineers				15	46				
Railway troops				1	3				
Balloonists						1			
Medical									13
Supply									12
Mechanical Transport						13			
Tanks				1	6				

Besides the above mentioned units, the Volunteer Militia for National Security was formed by decree of August 4, 1924. It is organised in General Headquarters, 4 areas (Milan, Bologna, Rome, Naples), 2 militia headquarters (Palermo, Cagliari), 33 legion group headquarters, 134 legions, and 6 independent cohorts. Its strength in 1931 was about 25,000 officers and 367,000 other ranks, inclusive of permanent formations amounting to 1,709 officers and 8,184 other ranks. Of these the average number called up for annual training was 30,400.

The Carabinieri are a force of military police. They are recruited by selection from the army, and by voluntary enlistment. In 1932 the strength of the Carabinieri was 1,097 officers and 50,000 other ranks.

The colonial forces consist of various colonial units, enlisted voluntarily, and native troops. The establishment in 1932 was 963 officers and 29,137 other ranks. This was distributed as follows: Tripolitania, 408 officers, 11,038 other ranks, Cyrenaica, 353 officers, 11,537 other ranks; Eritrea, 127 officers, 2,953 other ranks; Somaliland, 75 officers, 2,546 other ranks.

The army estimates for 1932-33 amount to 2,960,670,546 lire.

III. AIR FORCE.

By Royal Decree of January 1923, the Commissariat of Aeronautics was constituted. By successive Royal Decree of March 1923, the Royal Air Force was constituted as a separate body independent of the other armed forces. Finally, by Royal Decree of August 1925, the Commissariat was abolished, and instead of it was created the Ministry of Aeronautics.

The Air Force is divided into wings (*stormi*), consisting of different numbers of groups, each of them containing different numbers of squadrons. The Air Force contains the following parts: (1) The Air Force proper, (2) the Air Force co-operating with the royal army, (3) the Air Force co-operating with the royal navy, (4) the Air Force for the colonial army.

The Air Force proper remains at the entire disposal of the Ministry of Aeronautics. The wings destined for co-operation with the army, the navy and the colonial forces depend respectively on the Ministers of War, of Marine and of the Colonies.

For the financial year 1932-33 the Air Force expenditure is estimated at 754 millions of lire.

The number of aeroplanes actually in service amounts to about 2,500, but are gradually increasing.

The strength of the personnel (including officers, non commissioned officers and other ranks) amounted for the year 1932-33 to 24,650 persons.

IV. NAVY

The Treaty of Washington assigned to Italy, in capital ship tonnage, a replacement figure of 175,000 tons (177,800 metric), but the existing ships have a 'standard' displacement of only 86,532 tons. Italy, had she so desired, could have begun the construction of capital ships at any time from 1927 to 1930. Under the London Naval Treaty, she may still lay down capital ships, up to a total of 70,000 tons, at any time up to 1936. The current building programmes (1932 and 1933) include 4 cruisers of 6,790 tons and 4 torpedo boats of 600 tons. Two cruisers of 5,850 tons and a number of destroyers and submarines, all belonging to the 1931 programme, are nearing completion.

The naval expenditure for 1932-33 is estimated at 1,574,923,277 lire, as compared with 1,573,622,800 lire in 1931-32.

The Head of the Naval Administration is the Minister of Marine, assisted by an Under Secretary of State. The Ministry of Marine embraces various general and central directorates covering the personnel, the military and scientific services, naval and mechanical establishments, arms and naval armaments, medical and accountant officers, and civil personnel. Advisory Councils of the Ministry are the Board of Admirals, the Superior Marine Council; and the Committee of Ship Designs. The Office of the Chief of the Naval Staff is entrusted with the study of all problems connected with naval warfare and the employment of the various naval units.

The coast line of the peninsula is divided into zones placed under the jurisdiction of Admirals, Commanders-in-Chief of Maritime departments, with headquarters at Spezia, Naples, and Taranto. In localities more important from a strategical point of view, there exist Maritime commands (Venice, La Maddalena, Castellamare di Stabia, Messina), and in other localities there are stations under charge of Senior Naval Officers (Genoa, Leghorn, Brindisi, Pola and Zara).

The Mercantile Marine is administered by a Directorate General of the Ministry of Communications.

Summary of the Italian navy —

	Completed at end of		
	1930	1931	1932
Battleships	4	4	4
Armoured cruisers	3	3	3
Cruisers	9	14	18
Flotilla leaders and destroyers	85	86	90
Torpedo boats	34	33	30
Submarines	45	46	60

The tables which follow of the Italian fleet are arranged after the manner of other similar tables in this book, but all displacements have been corrected to Washington Treaty standard

First of class laid down	Name	Standard Displacement	Armour		Principal Armament	Torpedo Tubes	Indicated horse-power	Max speed

1911	{ Venezia							

The five cruisers last named are ex-enemy vessels. There are 16 modern flotilla leaders, of from 1,550 to 2,200 tons, and a speed from 34 to 38 knots,

and 40 destroyers with speeds of from 30 to 40 knots, nearly all completed since the war, besides many of earlier date. Eight of the cruisers and many of the destroyers are equipped as mine layers.

The *personnel* consists of over 2,440 officers and 50,000 men.

Production and Industry.

I AGRICULTURE

The area of Italy comprises 76,637,877 acres, mainly distributed, on December 31, 1931, as follows (the figures are in acres) —cereals, 17,887,438, leguminous plants, 2,255,351, industrial plants, 554,384, vegetables, 1,138,974, vines, 1,954,974, olive trees, 1,499,466, woods and forests, 12,306,125, forage and pasture, 12,220,603. The total agricultural land extended to 70,294,640 acres.

According to the agricultural census taken on March 19, 1930, the number of firms engaged in agriculture was 4,114,116. Persons engaged in agriculture as their main occupation number 6,088,088 males and 2,704,349 females, while for 1,207,850 males and 2,938,912 females agriculture is a secondary occupation.

The principal crops for 3 years were as follows —

	Acreage			Produce in thousand quintals		
	1930	1931	1932	1930	1931	1932
Wheat	11,904,708	12,075,378	12,236,887	57,376	66,620	75,151
Barley	581,929	529,880	531,286	2,431	2,408	2,512
Oats	1,262,560	1,222,485	1,111,095	5,348	5,729	6,068
Rye	800,939	287,730	294,061	1,555	1,656	1,826
Maize	8,484,914	8,425,518	8,259,381	29,978	19,332	28,080
Rice	360,644	346,446	338,598	6,501	6,622	6,566
Beans	1,845,772	1,821,688	1,482,660	3,295	4,874	5,912
Potatoes	620,647	651,921	800,486	19,462	19,646	28,237
Sugar Beet	272,769	270,818	207,572	30,030	24,732	24,943
Vines	1,988,517	1,964,974	2,542,762	57,592 ¹	60,856 ¹	74,450 ¹
Olives	1,414,845	1,499,466	—	7,689 ¹	13,599 ¹	—

¹ Produce in metric quintals

On March 19, 1930, Italy had 973,978 horses, 869,781 asses, 455,234 mules, 15,639 buffaloes, 7,012,877 cattle, 3,264,572 pigs, 10,013,370 sheep, and 1,846,075 goats.

II. FORESTRY.

The total forest area was 5,585,400 hectares (13,802,082 acres) in 1931. The forest area belonging to the State on December 31, 1931, was 234,389 hectares (579,199 acres).

III MINES AND MINERALS

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence, and Grosseto), in Sardinia (Cagliari, Sassari, and Iglesias), in Lombardy (particularly near Bergamo and Brescia), and in Piedmont.

Production in metric tons (1 metric ton = 2,204 lbs., or 1,016 metric

tons = 1,000 English tons) of metallic ores and other minerals in 1931 was as follows —

Ores, &c	No of productive mines	Quantity (in thousands of metric tons)	Value (in thousands of Lire)	No of Workers
Iron	13	561	27,985	1,476
Manganese	12	20	2,569	331
Copper	1	13	608	68
Zinc	59	{ 165	33,599	} 5,646
Lead				
Gold	9	5	482	128
Antimony	2	2	758	140
Mercury	10	196	42,945	1,793
Iron and cupreous pyrites	19	646	60,102	3,906
Mineral fuel	38	610	38,044	3,840
Sulphur ore	190	2,179	132,513	11,501
Asphaltic and bituminous substances	16	190	11,088	979
Boric acid	7	5	9,040	465
Totals (including graphite, petroleum and other minerals)	643	—	452,596	37,236

Iron and steel production in 1932 was as follows in metric tons (1931 figures in parentheses) pig iron, 460,538 (509,174), raw steel, 1,391,357 (1,452,694), rolled steel, 1,355,447 (1,637,480)

In 1931 the 9,651 quarries in activity employed 54,051 persons, the output of building and decorative stone being valued at 389,763,421 lire

IV. MANUFACTURES

The Italian industrial census of October 15, 1927, showed that there were 732,109 industrial establishments in the country, having 4,005,790 employees (1,009,890 women). Of the total factories, 692,313 employed from 1 to 10 persons, 34,951 from 11 to 100 persons, 4,151 from 101 to 500 persons, and 694 over 500.

The cotton industry is the largest and most important (10,406 factories with 642,887 employees). Number of spindles in 1931, 5,439,000. Silk culture, while flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. The quantity of silk produced in Italy was (in tons), 1930, 6,197, 1931, 5,393.

The manufacture of sugar is growing in importance. Sugar output (in metric tons) in 1904-5, 74,831, 1913-14, 269,946, 1927-28, 254,954, 1928-29, 353,458, 1929-30, 405,081, 1930-31, 387,747. The manufacture of cheese is also an important industry. The production in 1926 was estimated at 2,500,000 quintals.

Commerce.

The following table shows value of Italy's special foreign trade for five years (in millions of paper lire), excluding precious metals —

Year	1928	1929	1930	1931	1932
Imports	21,920 4	21,803 0	17,843 6	11,643 1	8 247 1
Exports	14,559 0	14,884 4	12,119 2	10,209 5	6,796 0

The value in lire of the leading imports and exports for 2 years was as follows —

Items	Imports (in thousand Lire)		Exports (in thousand Lire)	
	1930	1931	1930	1931
Live animals	494,657	316,498	60,400	204,866
Meat, broth, soup, eggs	425,191	350,448	170 595	170,786
Milk, cheese products	94,674	87,057	395,523	360,009
Fish products	349,565	271 678	35 835	31,817
Colonial produce, sugar	433,305	316,447	77,745	65,125
Cereals, vegetables, roots, and their alimentary derivatives	2,093,551	1,264,446	508,114	375,797
Vegetables and fruit	58,112	69 335	1 562,536	1,313,200
Drinks	27,377	23,500	234 001	224,917

Internal Communications

I RAILWAYS

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of railways (December 31, 1931), 22,554 km., of which 16,928 km. were State railways. Receipts from State railways in 1931, 3,860,306,000 lire; expenditure, 3,547,973,000 lire.

The Government proposes to electrify 287.8 kilometres of railways, already electrified, 1,937 km.

The total length of national roads in Italy (June 30, 1931) was 20,692 kilometres (12,860 miles), covering an area of 114,043,000 square metres.

II. AVIATION.

The statistics of aviation for 3 years were as follows :—

--	1929	1930	1931
Length of air lines (km)	14,689	14,899	18,728
Distance flown (km)	8,008,965	4,488,912	4,898,871
Passengers (No)	25,034	38,361	33,650
Parcels and letters (kg)	25,029	41,675	71,107
Newspapers (kg)	39,224	26,109	34,834
Baggage (kg)	322,110	474,759	440,878
Goods (kg)	134,815	137,610	158,284

III POSTS AND TELEGRAPHS

In the year 1931 (June 30) there were 10,867 post offices. In the postal correspondence (1930-31), 2,406,355,000 pieces, including insured and registered pieces, were dealt with at ordinary rates.

On June 30, 1931, the telegraph lines had a length of 65,147 km, and the wires 534,848 km. There were 10,239 telegraph offices, of which 8,445 were State offices and 1,794 railway offices. In 1930-31, 27,222,662 private telegrams were sent inland, and 2,348,284 private international telegrams.

The telephone service in 1930-31 (June 30) had 307,971 subscribers. There were 904 urban systems, and also 4,052 inter-urban systems. Total number of conversations in the year, 22,633,474 (excluding international conversations).

During the year 1930-31 the maritime radio telegraphic service, with its 16 coast stations, transmitted and received 798,395 words, while local continental radio stations despatched and received 1,081,189 messages of 18,690,478 words.

Banking and Currency.

State notes and bank notes in circulation in lire (December 31) —

--	1928	1929	1930	1931	1932
State notes	161,000,000	80,000,000	—	—	—
Bank notes	17,295,893,000	16,774,337,000	15,680,452,000	14,294,823,000	13,672,000,000

The total coinage in circulation at the end of January, 1932, was . silver, 1,635,143,750 lire, nickel, 448,886,049 lire, bronze, 54,330,806 lire, total, 2,138,360,605 lire.

The value of the money coined in each year —

--	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1901-25	7,024,160	123,991,752	176,329,800	33,158,448	340,504,160
1927	5,400	982,806,540	70 0	—	982,812,010
1928	—	236,518,460	35 0	—	236,518,495
1929	—	237,016,000	35 0	—	237,016,035
1930	—	134,801,000	160 0	—	134,801,160
1931	—	1,760	185 0	828,781	825,716

There is no national bank in Italy. According to the law of May 6, 1926, there is only one bank of issue, the Banca d'Italia. The position of the Bank on February 10, 1933 —

2 OF GREAT BRITAIN IN ITALY

Ambassador Ex and Plen—Rt Hon Sir R W Graham, G C B , G C M G , G C V O , appointed November 25, 1921

Counsellor—J Murray, O M G

Secretaries—P B B Nichols, M C , H M G Jebb and J H U Lambert

Commercial Secretary—R M A E Turner, O B E

Naval Attaché—Capt R B Ramsay, M V O , R N.

Military Attaché—Col H R G Stevens, D S O

Air Attaché—Group Captain T G Hetherington, O B E

Consuls-General—G A Fisher (at Naples), E W P Thurstan, C M G (at Genoa), and G B Gilliat Smith (at Milan)

There are also Consular representatives at Cagliari, Florence, Venice, Bologna, Leghorn, Palermo, Rome, Spezia, Trieste, Turin, and other towns

FOREIGN DEPENDENCIES.

Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N) to Cape Dumeirah on the Strait of Bab-el-Mandeb (12° 30' N) The length of coast is about 670 miles The total area is 45,754 square miles, and the population according to a census taken in 1931 is 621,776 inclusive of 4,565 Italians Massawah has (1931) 4,154 inhabitants, of whom 654 are European, mainly Italian The seat of the Government is Asmara, a modern town 7,765 feet above the sea level, with 21,601 inhabitants (3,101 European) The religions of the native population are the Christian (Coptic rite) and the Mohammedan There are some Roman Catholics and a few Pagans The principal languages of Eritrea are Tigry and Tigré, two languages originating from the ancient Ghehz, the Ethiopian language, which is the ecclesiastical language of the Eritrean Christians. Tigry is spoken by the Abyssinian stock and Tigré in the North, in Massawah and district, and is understood to a certain extent in the whole of Eritrea Other languages are spoken in the plateau, and Arabic in the lowlands and ports

Military force (1932) 98 officers, 111 non commissioned officers, and about 3,500 native troops, exclusive of the police force of the colony

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies

Governor—Riccardo Astuto dei Duchi di Lucchesi

For the financial year 1932-33 the revenue and expenditure of the Colony of Eritrea are estimated at Colonial revenue, 51,294,280 lire , State contributions, 23,000,000 lire ; expenditure, civil administration, 32,311,790 lire ; military, 18,982,490 lire

For climatic and agricultural purposes the country must be divided into two zones, the lowlands along the sea coasts and the plains, where the climate is tropical and the rains fall in winter, and the uplands, where the climate is cool, and sometimes cold, and the rains fall in summer. Both in the lowlands and the uplands the annual rain is sufficient for the successful raising of the crops Irrigation works are being carried on in the lower zone in order to facilitate intensive production by Italian farmers Pasture is abundant, and the pastoral population is partly nomadic. Pearl-

fishing is carried on at Massawah and the Dahlak archipelago. There are gold mines worked successfully in several localities of Hamasien.

At Massawah the imports by sea, the exports, and the tonnage entered were as follows —

—		1927	1928	1929	1930	1931
Imports	Lire	201,360,446	195,627,391	207,503,799	176,614,828	186,825,100
Exports	"	60,196,871	93,712,746	72,499,008	76,270,192	69,068,350
Tonnage entd	Tons	688,657	600,960	597,631	572,205	572,742
(Steamships only)						

Through the land frontier the imports in 1931 amounted to 28,217,293 lire, and the exports to 36,284,668 lire.

There are 75 miles of railway from Massawah to Asmara, 65 miles from Asmara to Cheren, and 53 miles from Cheren to Agordat. The line from Agordat to Tessenet, under construction, has reached a point 65 miles from Agordat. There are monthly sailings between Massawah and Genoa and Massawah and Trieste, and weekly sailings for Egypt, and frequent sailings for the Far East. There are 10 post offices. There is a telegraph line of 465 miles in length with 10 public offices. There are 1,074 miles of telephone lines with 10 public offices. Wireless telegraph stations have been opened at Massawah, Assab, Asmara, and Marsa Fatma Eri. They communicate with the radiotelegraphic system of Italian Somaliland and also with Italy (St. Paolo of Rome). There is thus through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and Maria Theresa thalers. The Italian mint in 1918 issued a new silver coin, the *Tallero d'Italia*, the weight of which is 28.0668 grammes, 835 fine.

Italian Somaliland.

The Colony of Italian Somaliland has an area of about 194,000 sq miles and a population (1931) of 1,010,815 (1,630 Italians and 28 other Europeans). It extends along the east coast of Africa from British Somaliland to Dik's Head in Kenya Colony. The inland boundaries are determined under the Treaty of May 6, 1908, between Italy and Abyssinia, by a line (only partially demarcated) from the confluence of the Ganale with the Dawa, thence to Bender Ziada (45th parallel) on the Gulf of Aden following an irregular line which runs at a mean distance of 180 miles from the coast through Jet, Ato, El Gorum, Bur Lelmis, Bur Gumburn, Bur Burdubo, and Bur Galambaladi to Bender Ziada.

As a result of the Treaty of 1915 and the Colonial rearrangements consequent on the war, Britain has ceded Italy territories on the right bank of the Juba with the port of Kismayu (Chisimaio). This district is incorporated in Somalia and forms one of its provinces. [See map in THE STATESMAN'S YEAR BOOK for 1925.]

Italian Somaliland comprises (I) The territories of Northern Somalia, viz — (1) The territory of the Mijertins, from Bender Ziada, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabà on the Indian Ocean (8° 18' N lat.); (2) the territory of the Nogal, from Cape Gabà to Cape Garad (6° 47' N lat.), formerly occupied by the Mad Mullah; (3) the territory of Obbia, from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the sea near the wells of El Gabobe (about 4° 30' N. lat.). (II) Southern Somalia, formerly called 'Benadir,' which extends from 4° 30' N lat. to Ras Chiamboni (Dik's

Head) Mogadiscio (population 29,562, of whom 675 are Europeans), capital of the Colony, with its territory, has been placed under the direct dependence of the Governor

The principal occupations of the people are cattle-rearing and agriculture. In Southern Somaliland the whole country near the banks of the Webi Shebele and the Juba is inhabited and cultivated by the natives, and in the district of Merca Genale and in that of Villaggio Duca degli Abruzzi there are Italian plantations with a cultivated area of some 70,000 acres. In Northern Somaliland agriculture is almost unknown, the Myertins rear camels and sheep. Exports (1931) were 78,823,060 lire, imports, 128,789,227 lire. Imports are cottons, sugar, rice, tea, coffee, iron, machinery, timber, exports sesame oil, gum, hides, butter, cotton and cotton seed oil, resin, kapok and ivory. In 1931 there were 71 miles of railway open to traffic. In 1931 exports to U K amounted to 28,589% and imports from U K 12,931%. Re-exports from U K in 1931 amounted to 24%. Length of roads 6,200 miles, steamship service on the Juba River from Kismayu to Bardera. In 1931, 1,127 ships entered and 1,144 cleared the ports of the colony. Military force (1932), 123 (Italian) officers, 73 non-commissioned officers and 3,047 (coloured) men. A detachment of the Flying Corps has recently been added.

Governor — Maurice Kava (1931)

The budget of Italian Somaliland for the year 1932-33 is as follows: Revenue proper of the colony, 23,000,000 lire, State contribution, 42,900,000 lire, special administration, 5,740,000 lire, total, 71,640,000 lire. Civil expenditure, 50,286,000 lire, military, 21,354,000 lire, total, 71,640,000 lire.

Twenty three wireless telegraph stations are working in the Colony. The wireless station at Asfoi communicates directly with Italy.

There are in the Colony 9 principal post offices (Mogadiscio, Merca, Brava, Khismayu, Baidoa, Villaggio Duca degli Abruzzi, Obbia, Asfoi and Alula), and 15 secondary post offices. A railway runs from Mogadiscio to Asfoi Adaler Villaggio Duca degli Abruzzi (70.23 miles).

The currency is the Italian lira (silver coins and currency notes issued by the Banca d'Italia).

Tripolitania and Cyrenaica.

(LIBIA ITALIANA.)

Governor (with Headquarters in Tripolitania) — Marshal Pietro Badoglio (appointed December, 1928)

Lieutenant Governor of Cyrenaica — General Rodolfo Graziani (appointed March, 1930)

Italian Libya lies along the north coast of Africa between Tunis on the west and Egypt on the east, in longitude from about 9° to 25° east. The extreme northerly point of Libya is at about the parallel of latitude 33° north. The territory in effective occupation was greatly extended southwards in 1930-31. According to an arrangement with France (September 12, 1919) as a result of the Treaty of 1915, the western frontier extends in a curve from west of Ghadames to south of Tummo including Ghat. On the Egyptian frontier Italy has obtained Jaraboob from Britain. By the Italo-Egyptian Treaty of December 5, 1925, the Eastern boundary is the 22nd parallel.

Tripoli fell under Turkish domination in the sixteenth century, and though, in 1711, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September,

1911, a quarrel broke out between Turkey and Italy, and the latter occupied Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established. This has been recognised by the Great Powers.

For administrative and military purposes the country is divided (since January 24, 1929) into two districts, Tripolitania and Cyrenaica, with their respective capitals at Tripoli and Benghazi.

TRIPOLITANIA.

Area and Population.—The area of the territory is estimated at about 347,500 square miles. According to a census taken on April 21, 1931, there were 522,914 natives and 29,749 Europeans (24,700 Italians). It is estimated that of the total population, 500,356 are Mussulmans, 21,342 Jews, and 1,216 other religions. Of the Mussulman population the negroes of various races form about 35 per cent. Arabic is more generally spoken than written, and both Italian and Arabic are the official languages. The principal towns of Tripolitania are on the coast: Tripoli with 71,793 inhabitants (1931 census), Misurata with 43,000, and Homs with 31,000. Inland are the caravan halting places, Ghadames, Sinaueu, Mizda, Murzák, and Ghat.

Justice.—In both districts justice, in so far as personal status or family or succession matters are concerned, is administered by Mohammedan or rabbinic tribunals for native Mohammedans or Jews according to their own religious law, and by regional tribunals according to Italian law in civil and commercial matters, whether the parties concerned be Italians, strangers or natives, except for special concessions made by the Colonial Judiciary to native mentality. Criminal cases are tried by the regional tribunals with the assistance of two assessors, chosen from the citizens of the best class, who with the President (a professional magistrate) form the Judicial College. One of the assessors must be a Mussulman or a Jew, according to the religion of the accused, but the judges of the metropolitan citizens are all Italians. More serious penal cases are tried by the Court of Assize, consisting of the President of the Court of Appeal with four assessors, two of whom must be Mohammedans or Jews, according to the religion of the accused. Appeals in both the districts, whether in civil or in criminal cases, are heard by the Court of Appeal for Libya, which was instituted in December, 1912, with its seat at Tripoli. There is a final appeal to the Supreme Court of Cassation at Rome. Disputes as to titles to land (which have to be inscribed in the Land Registry) are tried in the first instance by the Land Registry Office, from which there is an appeal to the Regional Tribunal composed of a judge and four assessors, and finally to the Court of Appeal of Libya.

Finance.—For the financial year 1932-33 the revenue and expenditure were estimated at: Revenue proper of the colony, 80,000,000 lire; State contribution, 167,500,000 lire; special administration, 2,266,537 lire; civil expenditure, 94,148,537 lire; military expenditure, 155,618,000 lire.

Defence.—The military force in Tripolitania consists of a corps of Colonial troops numbering 429 officers, 835 non commissioned officers, and 11,866 men (8,784 natives and 3,122 Italians). There is an aviation station

near Tripoli, also a naval command with its station at Tripoli and a higher naval officer at its head. To this are attached some light vessels and tugs, stationed in the harbour.

Production and Industry.—Tripolitania has three zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 square miles, is the only one properly suited for agriculture, and may be further subdivided into (1) the oases along the coast, the richest in N Africa, in which thrive the date-palm, the olive, the orange, and all Mediterranean plants (the yield of dates in 1931 was 50,000 metric tons), (2) the steppe district, suitable for cereals (barley and wheat) and pasture (the barley crop in 1931 was 20,000 metric tons and the wheat crop 4,000 metric tons) This district is the one where Italian colonisation has chiefly spread, it has olive, almond and mulberry trees and ricinus plants, (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine, (4) the Jebel (the mountain district, Tarhuna, Garian, Fessato), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the fertile hills of Msellata. The sub desert zone produces the alpha plant. The desert zone contains some fertile oases, such as those of Ghadamas, Ghat and Fezzan, which produce olives, alpha, henna, palms, oranges, grapes and almonds. In 1928 (latest census) there were in the colony: 506,489 sheep, 336,642 goats, 48,051 cattle, 43,008 camels and 38,073 donkeys, mules and horses.

Sponge-fishing and tunny fishing are of great importance. In 1931, there were 7 fisheries working, the number of tunnies caught was 9,326 compared with 10 fisheries, 6,932 tunnies in 1930. In 1930 the quantity of sponges fished amounted to 103,010 kilogs. Among the other industries the most flourishing is that of tobacco and tobacco manufactures. In 1931 the tobacco crop yielded 700 metric tons (500 metric tons in 1930). The exports of the products of the tobacco manufacture reached in 1930 the sum of 2,600,000 lire. The Mellaha salt pits yielded 22,000 tons of the best salt in 1931, nearly the whole of it being exported. Among the other products are matting, carpets, leather articles, fabrics embroidered with gold and silver, and other articles of value of a local character.

Commerce.—There is a considerable caravan trade between Tripoli and Central Sudan. An important article of trade is ostrich feathers, which are brought overland from Central Africa, and exported to Paris and London from Tripoli to the value of 40,000l to 50,000l annually.

The trade of Tripolitania was: Imports, 1930, 215,266,000 lire, 1931, 185,082,830 lire, exports, 1930, 36,136,000 lire, 1931, 29,710,540 lire. In 1931 the exports to the United Kingdom were 11,657l and the imports 46,098l. Re exports from U K in 1931 were 3,297l.

Communications.—The principal means of communication inland are the caravans which follow long-frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Bengardane (Tunna). In 1912 an Italian cable was laid between Syracuse and Tripoli.

Total length of railways, 161 miles. The principal lines in Tripolitania are a line 78 miles long, along the coast, from Tripoli to Zuara; one 13 miles long, from Tripoli to Tagiura, and one 52 miles long, from Tripoli to Azizia, Henacir, and El Abiat. There are 2,820 miles of carriage road.

There are fortnightly steamship sailings from Tripoli to Naples. From Tripoli to Syracuse and *vice versa* there are two steamship sailings every

week. Malta is always touched. From Tripoli along the coast there are weekly steamship sailings.

During the year 1931, 537 steamers and 151 sailing vessels entered the port of Tripoli, landing 168,517 tons of goods and 23,279 passengers; while 537 steamers and 149 sailing vessels left the port embarking 46,953 tons of goods and 20,444 passengers. During the same period the post office issued post money orders for 89,517,971 lire and paid out money orders amounting to 78,950,777 lire. The number of messages despatched was 238,310, and those received were 216,599. The railways carried 179,409 passengers and 360,373 tons of goods.

Banking and Currency—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli, the Banco di Roma, the Cassa di Risparmio, the Cassa di Piccolo Prestito and other banks carry on financial operations. The official currency is the Italian, but English pounds and francs are also used in commercial transactions.

There is a British Consul at Tripoli and a Vice Consul at Homs.

CYRENAICA.

Area and Population—The area of the territory is estimated at about 73,000 square miles, and with the hinterland (zone of Cufra) 212,000 square miles. According to a census taken on April 21, 1931, the population was estimated at 165,000 (19,000 Europeans, mainly Italians). The principal town is Benghazi with 43,000 inhabitants in April, 1931.

The oasis of Jarabub, on the eastern border of Cyrenaica, was ceded by Egypt to Italy, and Italian troops occupied it on February 7, 1926. On the other hand, the frontier in the neighbourhood of Sollum on the sea was rectified in favour of Egypt.

Justice.—For details as to the Administration of Justice, see above under Tripolitania.

Finance.—For the financial year 1932-33 the revenue and expenditure of Cyrenaica were estimated at: Revenue proper of the colony, 48,680,000 lire, State contribution, 182,600,000 lire, total, 231,280,000 lire, civil expenditure, 93,287,000 lire, military expenditure, 137,992,000 lire.

Defence.—The military force in Cyrenaica consists (1932) of 361 officers, 662 non-commissioned officers and 9,218 men (7,163 natives and 2,055 Italians).

Production and Industry.—Pasturage is abundant and cattle could be bred on a vast scale. An impulse will be given to agriculture by the establishment of large numbers of Colonists from Italy. Bananas are grown at Derna, and experimental planting of wine grapes at Guarscia, under Government supervision, has given promising results. Barley is the chief food of the people. In 1930 the yield in sponge fishing amounted to 62,743 kilos. There is one tunny fishery near Benghazi, catch in 1931 was 392 tunnies and 4,023 pilchards. The development of the valuable salt pans of Benghazi is being advanced slowly. In 1931 the yield was 25,000 tons.

Commerce—The trade of Cyrenaica was (1931) imports, 146,945,540 lire, exports, 19,314,670 lire. The principal imports are cotton goods and

sugar, exports (1931), sponges (6,604,970 lire), hides and skins (1,037,700 lire), wool (1,452,020 lire), cattle (40,210 lire), camels (1928, 283 in number), and carpets (1928, 261,000 lire)

Communications.—Good carriage roads join the coastal centres, and run from there inland, linking up with the old caravan routes which lead through the oases to Darfur, Wadai, and Borker On August 31, 1932, there were 380 miles of road completed A steamer calls every week at Benghazi from Syracuse Another steamer calls every two weeks from Genoa, Leghorn, Palermo, Tunis and Tripoli at Benghazi and continues to Derna and Alexandria (Egypt) In 1912 an Italian cable was laid between Syracuse and Benghazi A railway line 67 miles long runs from Benghazi to el-Abiar and on to Barce, and one 35 miles long from Benghazi to Soluch In 1931, 1,170 vessels of 1,076,081 tons entered, and 1,153 vessels of 1,072,900 tons cleared the ports The length of railway open to traffic was 170 km (106 miles) The number of passengers was 106,563, and the goods traffic 145,975 metric tons

In Cyrenaica the telegraph lines have a length of about 187 miles (1931), with 12 civil telegraph stations, and 36 military radio stations There is a cable from Benghazi to Syracuse During the year ending June 30, 1930–31, 81,685 postal money orders for an amount of 67,972,605 lire were issued and 21,358 amounting to 50,217,575 lire were received During the same period 498,642 messages were despatched and 402,794 received The railways (1930–31) carried 106,563 passengers and 145,975 tons of goods

Banking and Currency —The Banca d'Italia and the Banco di Roma carry on financial operations In 1925 the Cassa di Risparmio della Cyrenaica opened at Benghazi and Derna, and now has branches at Barce, Cirene, Derna and Tobruk

There is a British Consul at Benghazi There are also French, Spanish and Greek Consuls

AEGEAN ISLANDS

Italy occupied the Aegean Islands in 1912, during the Tripoli War By the Treaty of Lausanne, which came into force on August 6, 1924, Turkey ceded them, with the island of Castellrosso, to Italy in full sovereignty The military regime in the islands lasted from the occupation, May 4, 1912, to August 7, 1920 The civil regime was then established, Governors being appointed The Governor, who is subject to the Foreign Office in Rome, is head of the administration, his authority is represented in the smaller islands by the Regent of the Government of Cos and five delegates in the islands of Lero, Calimno, Symi, Scarpanto and Castellrosso The municipalities of the cities of Rhodes and Cos debate autonomously the matters within their province The municipal councils of these two cities are appointed by the Governor The other towns and villages are administered by *sindaci* and *demogeronts* elected by the people according to ancient customs

Governor —Mario Lago (Appointed February 1923)

Area and Population.—The following are the Italian islands in the Aegean with their areas and population in 1931 (Italian names in brackets) —

Island	Area in sq miles	Population 1931	Island	Area in sq miles	Population 1931
Rhodes (Rodi)	542	54,818	Karchi (Calchi)	12	1,788
Cos (Ceo)	109	21,169	Symi (Simi)	24	9,462
Patmos (Patmo)	12	2,990	Astypalaea (Stampalia)	87	1,610
Lipso (Lisso)	6	962	Karpathos(Scar panto)	107	6,574
Kalymnos(Calino)	38	16,512	Casos (Caso)	24	1,925
Leros (Lero)	24	6,151	Castelrosso	3	2,230
Nisyros (Nisiro)	15	8,486			
Tilos (Piscopi)	24	1,228			

The chief towns are Rhodes (capital) with 25,447 inhabitants, Calimno, 16,512, Cos, 11,571, Symi, 9,462

Justice—The special judiciary of the Aegean Islands includes (1) the Department of Judicial Services, under which are all the judicial offices of the possession, (2) the Tribunal of Second Instance (appeal), (3) the Assize Court, (4) a Civil and Penal Tribunal of First Instance at Rhodes, with jurisdiction over the islands of Calchos, Symi, Piscopi, Scarpanto, Caso and Castelrosso, (5) a Civil and Penal Tribunal of First Instance at Cos, with jurisdiction over all the other islands. The magistrates are metropolitans. Special Ecclesiastical and Mixed Tribunals which exert authority in matters of personal status also operate for the Orthodox, Moslems, and Jews, and Mixed Tribunals of Appeal. These special tribunals apply the provisions of Byzantine, Koranic and Talmudic law.

Finance.—The State contribution is 3,000,000 lire on a budget of 36,000,000 lire (1932-33)

Education—There are Government schools for boys and girls, both elementary and secondary, and practical agricultural school, commercial school of first and second degree, and a normal school, and private schools, both elementary and secondary, for the various communities.

Defence.—The Aegean Islands are garrisoned by an infantry regiment of two battalions, one stationed at Rhodes and the other at Cos. These battalions send detachments to the smaller islands. The Royal Navy has a station at Rhodes, to which are attached the units scattered over the Aegean and the naval base of Porto Lago in Leros. The police and passport service is in the hands of the Carabinieri (one company). The Customs services are carried out by the Finance Guard (one company).

Agriculture, Commerce and Navigation.—The agriculture of the islands of Rhodes and Cos is highly developed. These islands are famous for the cultivation of the very famous table grapes, other white and black grapes. Olives, tobacco, oranges, and other fruits, and vegetables are also cultivated. The most important industries are the manufacture of oriental carpets, wines in bottles, olive oils, artistic pottery, and tiles, that are specially exported to Italy and to Egypt. The market to which the greater part of the exports is directed is Egypt, which is connected with Rhodes by speedy steamship lines. Rhodes is developing a considerable tourist traffic, partly dependent on the thermal springs at Calitea. Sponge fishing is of great importance in the islands of Calimno, Symi and Castelrosso. The transit and inter island commerce gives rise to a brisk harbour movement of sailing vessels and small steamers,

which serve the neighbouring islands. This traffic is heightened by the peculiar geographical situation of Rhodes. The countries which import manufactures and food-stuffs are principally Italy, Egypt and Turkey. The trade of Aegean Islands was (1931) imports, 73,264,000 lire; exports, 12,488,000 lire. There are no railways, but there exist about 200 miles of good roads.

Communications—Every week a steamship sails from Brindisi and from Alexandria to Rhodes and *vice versa*. The means of communications are assured by steamships and motorships of the Lloyd Triestino, Adriatica, Messageries Maritimes and many other steamship companies which touch at Italian ports of the Tyrranean and Adriatic Seas and the Piræus, Smyrna, Syria, Palestine and Egypt. There is an air mail every week from Brindisi and Athens to Rhodes.

There are in Rhodes almost 200 miles of good roads and there are telegraph lines (cable and wireless) and automatic telephones in each island.

Banking and Currency.—The Banca d'Italia, the Banco di Roma, the Banco di Sicilia and other banks carry on financial operations. Italian money is current, the metric system of weights and measures is in use.

There is a British Consul at Rhodes.

Concession of Tientsin.—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Pei-Ho and has an area of about half a square kilometre with a population of 6,261 (Chinese, 5,725, Italians, 392, other Europeans, 144) in 1931.

Island of Saseno.—½ miles long and 1 24 miles broad. Lies at the entrance of the Vallona Bay (Albania) and is inhabited by some few shepherds and by marines of the Royal Navy. The island owns a radio-telegraphic station.

Statistical and other Books of Reference concerning Italy.

JAPAN.

(NIPPON)

Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B C, and that the dynasty founded by him still reigns. It was revived in the year 1868 (the first year of the *Meiji*), when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shōgun (the *de facto* sovereign), who had held the ruling power in successive families, since the twelfth century, and in 1871 the feudal system (*Hōken Seiji*) was entirely suppressed. The Emperor bears title of Tennō, but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

Emperor of Japan — Hirohito, born at Tōkyō, April 29, 1901, succeeded his father, Yoshihito, December 25, 1926, married, January 26, 1924, to Princess Nagako, born March 6, 1903, daughter of H I H Prince Kuninomiya (died January 27, 1929). Offspring — Imperial Princess. — I, Princess Shigeko (Terunomiya), born December 6, 1925. II, Princess Sachiko (Hisanomiya), born September 10, 1927, died March 8, 1928. III, Princess Kazuko (Takanomiya), born September 30, 1929. IV, Princess Atsuko (Yorinomia), born March 7, 1931.

Empress Dowager — Princess Sadako, born June 25, 1884, daughter of Prince Kujō, married, May 10, 1900, to late Emperor.

Brothers of the Emperor — I, Prince Yasuhito (Chichibunomiya), born June 25, 1902, married, September 28, 1928, to Setsu Ko Matsudaira. II, Prince Nobuhito (Takamatsunomiya), born January 3, 1905, married, February 3, 1930, to Kiku Ko Tokugawa. III, Prince Takahito (Suminomiya), born December 2, 1915.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are

consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties, and he exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (404 members) is composed of (1) male members of the Imperial family of full age (16 in number), (2) princes and marquises of the age of 30 and upwards (15 princes and 30 marquises); (3) counts, viscounts, and barons of the age of 30 and upwards, who have been elected by the members of their respective orders, to the total number of 18 counts, 66 viscounts and 66 barons, (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition, not to exceed 125 in number, the term of membership being, in principle, for life, (5) 4 members of the Imperial Academy of Sciences above the age of 30 years, who have been elected by the members of that body, (6) 1 or 2 persons above the age of 30 years, who have been elected in Hokkaido and each Fu and Ken from among and by respectively 100 or 200 male inhabitants thereof, paying therein the highest amount of direct national taxes on land, trade or industry, to the total number of 66. The term of membership under (3), (5) and (6) is seven years.

Until May 1925 the suffrage for the House of Representatives was restricted by qualification arising from payment of taxes. But in May 1925 general manhood suffrage was enacted to come into force at the first general election. According to the new law, the members of the House shall number 466 (at present, 455), a fixed number being returned from each electoral district for a term of 4 years.

The proportion of the total number of members to the population of Japan proper is 1 to 133,309. In principle, all the male Japanese subjects above the age of 25 years are electors and those above the age of 30 years eligible. Heads of the families of peers and persons in the army and navy can neither elect nor be elected, holders of certain specified offices in the Government are ineligible, and no Government officials except the *seimukan* (political) class are, while in office, permitted to be members of the House. Such persons as have not lived continuously for not less than a year within the same city, town or village, shall not be registered as electors. Voting is by secret single ballot.

The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 7,500 yen, Vice-Presidents, 4,500 yen, elected and nominated members of the House of Peers and members of the House of Representatives, 3,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

At the elections held on February 20, 1932, the following parties were returned to the 56th Diet:—Seiyūkai, 303, Minseitō, 146, Labour, 5; Other Groups, 12.

The Cabinet (appointed on May 26, 1932) consists of the following members—

Prime Minister — Makoto Saito
Minister for Foreign Affairs — Count Uchida
Home Affairs — Tatsuo Yamamoto
Finance — Korekiyo Takahashi
War — Lt. General Sadao Araki
Navy — Admiral Keisuke Okada
Minister of Justice — Matsukichi Koyama
Education — Ichiro Hatoyama
Agriculture and Forestry — Fumio Goto
Commerce and Industry — Kumakichi Nakajima
Communications — Hiroshi Minami
Railways — Chuzo Mutsuchi
Overseas Affairs — Ryutaro Nagai

Local Government.

For local administration Japan (except Hokkaidō or Yezo, Chōsen, formerly Korea, Karafuto or Japanese Sakhalin, and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi'), towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names. In each prefecture there are a governor ('Chiji'), a prefectural assembly ('Fukwai' or 'Ken kwai'), and a prefectural council ('Fu-Sanji-kwai' or 'Ken-sanji-kwai'), of which the governor is president, in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president, and in each town or village a chief magistrate and a town or village assembly. Prefectural assemblies give decisions upon certain matters prescribed by the Law (chiefly upon financial affairs), and municipal, town and village assemblies, upon public affairs in general. The prefectural council gives decisions upon matters delegated by the prefectural assemblies and upon matters of pressing necessity when the assembly is not in actual session.

Citizenship in a municipality, town, or village, is recognised, in principle, for every male person above the age of 25 years who has resided for two years continuously within the municipality, town or village, with similar exceptions to those in the case of the suffrage for the House of Representatives. Every citizen is qualified to elect and be elected for the municipal, town, or village assembly of his own city, town or village, and also for the prefectural assembly of the prefecture to which his city, town, or village belongs.

Hokkaidō has a governor and a special organisation. Chōsen has a Governor General. The peninsula is administered in 13 Do or provinces, these being subdivided into 329 Tuand Yun or districts. Taiwan (Formosa) also has a governor general, who is invested with very extensive powers. The island is divided into 5 provinces (Shū), each of which has a governor. Karafuto is divided into 7 local divisions (Shichō).

Area and Population.

The Empire consists of the five principal islands of Honshū (mainland), Kiu-shū, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu (Luchu Islands), Ogasawarajima (Bonin Islands), Bōkotō (Peacadores) islands, the

peninsula Chōsen (Korea), and the southern half of the island of Karafuto (Sakhalin) Total area is shown as follows —

Principal Islands	Number of Adjacent Small Islands	Area in square miles

	623	—	880	—

Administratively there exists a division into 47 prefectures. There is also a division into 632 rural districts, 109 cities, 1,708 towns, and 9,986 villages (April 1, 1932)

Taiwan (Formosa) and Bōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N. H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta lien, and adjacent territory and waters, and also the railway between Chan Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans, also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, see Introduction to THE STATESMAN'S YEAR BOOK for 1916.)

The population of Japan, according to the census of October 1, 1930, is shown as follows. —

	Area sq miles	Population according to the Census of the 1st Oct 1930			Pop per sq mile
		Total	Male	Female	
The Empire of Japan .	260,644	90,896,043	45,675,201 ¹	44,720,497 ¹	347

¹ Provisional figures

Estimated population of Japan on October 1, 1932, 32,821,000 males and 32,975,000 females, total, 66,296,000

On October 1, 1930, the number of Japanese residing abroad was 634,913 (361,434 males and 273,479 females). Of these, 158,334 men and 111,547 women were in America, 131,637 men and 105,002 women in Asia, 68,912 men and 55,949 women in Australasia, 2,509 men and 954 women in Europe, and 42 men and 27 women in Africa. On December 31, 1930, the number of foreigners in Japan was 40,651, of whom 30,836 were Chinese, 2,162 English, 2,026 American, 1,097 German, 521 French, 174 Portuguese, 103 Dutch, 1,666 Russian, 322 British Indians, 222 Swiss, 176 Canadian, and 138 Italian.

Movement of population for five years —

Year	Marriages	Births	Deaths	Stillbirths	Divorces	Excess of Births
1927	487,850	2,060,787	1,214,323	116,922	50,626	846,414
1928	499,555	2,135,862	1,236,711	120,191	49,119	899,141
1929	497,410	2,077,026	1,261,228	116,971	51,222	861,793
1930	506,674	2,085,101	1,170,867	117,780	51,295	914,224
1931	496,574	2,102,784	1,240,891	116,506	50,609	861,893

In 1931 the figures represented per 1,000 of the population, 7.60 for marriage, 32.17 for births, and 18.98 deaths.

The following is a list of large towns and cities on October 1, 1930 (census figures):—

Tōkyō .	4,978,390	Kure	190,282	Saseho .	133,174
Ōsaka .	2,453,573	Sendai	190,180	Niigata .	125,108
Nagoya .	907,404	Sapporo	168,576	Sakai .	120,848
Kōbe .	787,616	Yawata	168,217	Wakayama	117,444
Kyōto .	765,142	Kumamoto	164,460	Yokosuka	110,301
Yokohama .	620,306	Kanazawa	157,311	Hamamatsu	109,478
Hiroshima	270,417	Otaru .	144,887	Moji .	108,180
Fukuoka	228,289	Okayama	139,222	Kawasaki .	104,851
Nagasaki .	204,626	Kagoshima	137,236		
Hakodate	197,252	Shizuoka	136,481		

Religion.

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects, (2) Buddhism, with 12 sects (56 denominations). There is no State religion, and no State support. In 1930 Shinto shrines numbered 49,582 (besides 62,157 minor shrines), and the priests, 15,069, Buddhist temples (1929), 71,843 (besides 34,988 minor temples), high priests and priestesses, 54,374. There were, in 1929, 2,591 licensed preachers and 1,740 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects, these are independent of any religious sect, and some of them are supported by State or local authorities.

Education

Elementary education is compulsory. The following are the educational statistics for 1929-30 —

Institutes	Number	Teaching Staff	Students and Pupils
Kindergarten	1,397	4,301	114,749
Elementary schools	25,626	233,476	9,860,877 ¹
Middle " for boys	553	13,775	548,584
Girls High "	970	14,881	367,736
Normal "	106	4,886	68,402
Schools for the Blind and for Deaf Mutes	122	947	7,738
High schools	32	1,280	18,110
Universities and colleges	48	5,707	67,555
Technical schools	957	18,943	280,904
Special technical schools	50	1,809	19,049
Special schools (excluding special technical schools)	102	4,623	64,095
Preparatory technical schools	15,284	18,052	1,236,335

¹ 5,148,328 males and 4,712,540 females

Japan has 5 Imperial universities, and 41 other institutions of university rank (1929-30)

Particulars of the Imperial universities are given as follows —

University	Location	Established	1929-30	
			Teachers	Students
Tokyo Imperial University	Tokyo	1877	648	7,803
Kyoto Imperial University	Kyoto	1897	480	5,478
Tohoku Imperial University	Sendai	1907	245	1,562
Kyushu Imperial University	Fukuoka	1910	258	2,001
Hokkaido Imperial University	Sapporo	1918	275	2,196

The remaining 41 institutions had 3,806 teachers and 48,430 students. In 1931, there were 4,609 libraries in Japan, with 9,635,566

volumes In 1930, 22,476 original books and translations, and 10,130 periodicals, monthly, weekly, and daily, were published

Justice and Crime.

A system of justice founded on modern jurisprudence has been established Judges are irremovable, except by way of criminal or disciplinary punishment There are four classes of courts in Japan, namely, subdistrict courts, district courts, courts of appeal, and court of cassation In the court of cassation five judges preside, in the courts of appeal and in the district courts three judges, in each case one of them being the chief judge In the subdistrict courts a single judge presides A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor

The following are the criminal statistics for four years — In 1926, 155,816 criminals were condemned, in 1927, 105,780, in 1928, 144,409, and in 1929, 152,239

In 1929 there were 56 prisons, 97 detached prisons and houses of correction Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1929 — Men, 41,097, women, 745, total, 41,842

Pauperism

In 1899 new legislation settled that the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen, that funds below that limit are to be made up by the Treasury, and that when the amount of relief exceeds 5 per cent of the funds at the beginning of the fiscal year, one-third of the amount thus granted is to be supplied from the Treasury

The relief statistics for 3 years show expenditure as follows (in yen) —

Year	Food	Clothing	Providing with work	Shelter and Temporary lodgings	Total (including miscellaneous)
1927-28	255,552	91,253	140,774	81,823	606,632
1928-29	112,809	50,697	64,435	126,261	375,086
1929-30	131,665	85,181	257,986	79,904	512,899

In 1928-29 the Government relieved 12,332 persons to the amount of 549,000 yen On March 31, 1929, 604 foundlings were being maintained, and the expense in that year was 98,081 yen There are, besides, several workhouses established by local corporations and private persons The number of hospitals in 1928 was 2,003 (12 state, 92 public and 1,899 private).

Finance.

¹ Including all items

Public debt, March 31, 1932 — Internal loans (4 and 5 per cent), 4,715,078,200 yen, foreign loans (4 to 6½ per cent), 1,472,579,275 yen, total, 6,187,657,475 yen. Floating debt, March 31, 1932, 641,605,254 yen, government rice purchase notes, 75,726,143 yen. Finance debt, 148,280,000 yen. Total debt, January 31, 1932, 7,053,268,872 yen.

II LOCAL

The revenue of the Prefectures for the year 1932-1933 was 430,514,894 yen, and expenditure 430,514,894 yen. The revenue of the cities in 1931-32 was 629,387,387 yen, and the expenditure was 629,284,559 yen. The revenue of the towns and villages in 1931-32 was 437,829,421 yen, and the expenditure was 437,654,332 yen. The total local debt at the end of March, 1931 was 2,374,415,824 yen.

Defence.

I ARMY.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. All those physically capable of bearing arms are divided into two classes, the 'fit,' and the 'absolutely fit'. The numbers necessary for the first line (or active army), called *Gen-eki*, are taken solely from the 'absolutely fit'. Service in the ranks is for 2 years in all arms, then for 5 years and 4 months in the reserve (*Yobu*). Reservists are usually called out once during their reserve service, for 3 weeks. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line, called *Kōbi*. Service in the *Kōbi* is for 10 years, with usually one period of training of 3 weeks. At the end of their *Kōbi* service the men are in the 38th year of their age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve*, is called *Hojū*. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as 'fit' as may be required to make up a certain fixed number. They all serve in the *Hojū* for 12 years and 4 months, during which a part of them is called out for training. After completion of this they are passed to the *Kokumin* until 40 years of age to complete their army service.

The *Kokumin* is divided into two 'bans'. The first ban comprises all the men who have passed, as shown above, through the first line and landwehr, or through the supplementary reserve and landwehr, and who therefore have only 2 years and 8 months to spend in the *Kokumin*. The second ban consists of *Jōbi*, *Kōbi*, *Hojū*, and those of which do not serve for the first ban. It includes (1) those who though 'fit' are not required for the *Hojū*, (2) those who for various reasons have been exempted from military service, and (3) the young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the *Kōbi* from the *Hojū* are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation and for the expansion of other departmental corps.

The standing army of Japan consists of 17 divisions, including the guard, 4 independent cavalry brigades, 2 independent regiments of mountain guns, and 8 regiments of heavy field artillery.

Two infantry regiments form a brigade, and two brigades (12 battalions) a division. The divisional artillery consists of a regiment of field or mountain artillery (6 batteries of 4 guns). A regiment of cavalry of 2 squadrons, and a battalion of engineers, and also a battalion of transport service complete the division. Four infantry, and 4 artillery, ammunition columns, 6 field hospitals, 4 supply columns, and 1 remount dépôt accompany each division in the field. The war strength of a division is reckoned at 18,700 officers and men, 4,800 horses, 36 guns, and 1,674 vehicles.

The strength of the active army and the first and second reserves in 1932 was 17,343 officers and 259,304 other ranks.

The air personnel for the army numbered in 1932, 6,944, organised in 8 flying regiments and a balloon corps. The number of aeroplanes in service was 584, in reserve 254. It is proposed to increase the number in service by 300.

The Japanese Islands are divided into military districts, corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country, the other arms of the Guard division are recruited from each district of the 1st, 2nd, 3rd, 18th and 14th divisions. Abroad there are 16,000 men in Manchuria, and 800 in North China.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools, and the Members of the Military Council.

The arm of the Japanese infantry is the improved rifle; calibre, 6.5 mm. (.256") machine guns and light machine guns, infantry cannons and infantry howitzers, a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction, and also with heavy and light machine guns. The field gun is a q f shielded Krupp of 7.5 cm calibre, which fires a shrapnel of 14.3 lbs. The mountain artillery has a gun

of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries, armed with 4 6" and 5 9" howitzers, firing shells of about 44 lbs and 80 lbs respectively. A 4" gun for heavy field batteries is being introduced.

The military budget for 1930-31 amounted to 210,800,000 yen.

II. NAVY

The administration of the Navy is in the charge of the Minister of Marine, under whose control is also the Naval Technical Department for Naval Construction, while the Chief of the General Staff is directly responsible to the Emperor for Operation, Mobilization, and Intelligence.

The coast of Japan is divided into three maritime districts having their headquarters at Yokosuka, Kure, and Sasebo.

The Japanese Fleet was markedly affected by the Washington Agreement, though Japan remains the third great naval power of the world. Her replacement tonnage was fixed by the Treaty at 815,000 tons in capital ships, which is superior to the strength allowed to France and Italy. By the London Treaty, no capital ships may be replaced during 1931-36. The existing ships are in process of being modernized, it is said at a cost of 5,000,000¹. Recent programmes have been concerned mainly with the building of cruisers, destroyers and submarines for the purpose of replacing obsolete ships. Under the Fleet Replacement Law there are to be built during 1931-38 4 cruisers of 8,590 tons, 12 destroyers, 9 submarines, 1 large and 3 small minelayers, 6 minesweepers and 4 torpedo boats.

The principal state dockyards are at Kure and Yokosuka, where capital ships have been built, and there is a dockyard also at Sasebo, where lighter vessels are constructed. The earthquake of September 1, 1923, almost destroyed the dockyard of Yokosuka, which is the Japanese Portsmouth, but no ship of the active fleet was damaged seriously, and considerable sums have since been devoted to the reconstruction of the yard. The Kawasaki private shipbuilding yard at Kobe and the Mitsubishi establishment at Nagasaki are well equipped with modern plant, and there are lesser building yards at Maizuru, Uruga and elsewhere, as well as the government armour and armament factory at Kure. Japan has made herself practically independent of Europe for the building and arming and equipment of her warships.

A statement of the Japanese fleet follows —

	Completed at end of		
	1930	1931	1932
Battleships	10	10	9
Armoured Cruisers	7	7	7
Aircraft Carriers	3	3	3
Cruisers	27	27	31
First-class Gunboats	2	2	2
Destroyers	106	110	101 ¹
Submarines	67	67	62 ²

¹ The destroyers are 67 first-class and 34 second class.

² The submarines are 27 first-class, 35 second-class.

The following table includes all the battleships which are being retained, and the armoured cruisers and principal protected cruisers.

Year of laying down	Name	Standard Displacement	Armour		Main Armament	Torpedo Tubes	Indicated Horse-power	Speed
			Water-line	On Guns

¹ The battleship *Hyet*, which has been rendered non effective under the terms of the London Treaty, is omitted from this table

Ships building or completing include the aircraft carrier *Ryūjō* of 7,600 tons, six destroyers, nine submarines, four minelayers and six minesweepers

The gross amount of the Navy Estimates for 1930-31 was 262,937,688 yen , for 1931-32, 210,341,290 yen ; and for 1932-33, 211,700,712 yen The active personnel numbers 89,459

Production and Industry (in Japan proper).

About three-fifths of the arable land is cultivated by peasant proprietors and the remaining portion of it by tenants According to the official report of January 1, 1932, taxed land owned by private persons and local corporations was 41,535,881 acres, of which under rice, 7,318,027 acres , other cereals, 6,923,968 acres , forests, 21,493,241 acres , plains, 4,192,630 acres , buildings, 1,188,759 acres

The forest area on January 1, 1931, was 49,128,737 acres, of which 17,902,696 acres belonged to the State, and 3,156,274 acres to the Imperial household

The following are some agricultural statistics for three years —

Crop	Acreage			Produce (metric tons)		
	1929	1930	1931	1929	1930	1931
Rice	7,802,546	7,938,236	7,953,021	10,763,667	12,063,200	9,960,319
Wheat	1,202,930	1,204,401	1,227,552	1,140,703	1,104,851	1,155,537
Barley	959,086	982,403	931,807	1,284,400	1,279,128	1,330,966
Rye	1,217,703	1,183,163	1,456,176	1,321,014	1,098,278	1,543,104
Tobacco	89,317	90,078	90,236	61,673	61,382	63,361
Tea	106,207	94,427	93,351	39,392	38,646	38,305

In 1930, the number of oxen was 1,498,260 , horses, 1,489,979 , sheep, 23,702 , goats, 217,189 , swine, 742,311

The mineral and metal products for 1929 and 1930 were —

Mineral or Metal		1929		1930	
		Quantity	Value	Quantity	Value
			Yen		Yen
Gold	grammes	10,422,322	14,764,627	12,068,000	16,120,000
Silver		160,604,484	6,139,329	175,064,600	4,511,000
Copper	kilos	75,469,049	69,399,311	79,033,000	50,231,000
Lead	"	3,873,944	853,231	3,581,000	686,000

Coal	"	34,237,317	245,761,504	31,376,000	192,996,000
Sulphur	"	65,464	3,638,048	62,360	3,396,000
Crude petroleum	hectolitres	3,113,399	13,707,355	3,166,000	14,272,000
Total value (including all others)		—	569,809,059	—	537,411,000

In 1930, the number of mining workers was as follows —in collieries, 204,526 ; in metal mines, 45,025 , various, 8,918 , total, 258,469

In 1931, the total number of cocoons obtained was 364,021,706 kilos, valued at 275,555,721 yen

On December 31, 1930, the number of employees in the 62,284 factories was 1,633,563 (796,282 males and 887,281 females)

The value of the principal manufactures in 1930 was as follows woven goods, 1,102,367,461 yen, earthenware, 62,419,980 yen, lacquered ware, 28,244,095 yen, matting, 14,144,615 yen, oil, 34,102,586 yen, grege silk, 536,663,848 yen, leather, 25,666,003 yen, sugar, 129,560,236 yen.

At the end of 1930 there were 20,306 textile factories operating in Japan, employing 163,056 men and 740,843 women. The number of spindles, at the end of 1929, was 6,836,516, and of looms 77,898

In 1930 the raw marine products amounted to the value of 162,928,226 yen; the manufactured products to the value of 146,969,338 yen. The production of salt in 1930 was 628,682,140 kilograms, in 1931, 521,125,000 kilograms

Commerce.¹

Trade for 5 years was as follows:—

—	1928	1929	1930	1931	1932
	Yen	Yen	Yen	Yen	Yen
Imports	2,196,814,780	2,216,240,020	1,546,071,870	1,235,675,266	1,431,461,000
Exports	1,971,955,350	2,148,618,650	1,469,352,293	1,146,981,820	1,409,992,000

¹ Excluding bullion and specie.

Total	18,818	54,482,839	17,930	56,812,818	18,313	55,887,000	18,842	58,825,204

Of the total steamships entered in 1931, 1,390 vessels of 7,093,160 tons were British, 530 of 3,215,153 tons American, 245 of 1,077,855 tons German, 294 of 929,439 tons Norwegian, 51 of 96,664 tons Chinese, 115 of 752,809 tons French, and 13,172 of 37,019,321 tons were Japanese.

On Dec 31, 1930, the registered merchant navy (Japan Proper) consisted of 3,351 steamers of European style, of 3,907,908 tons, and 15,379 sailing vessels of Japanese style, of 896,231 tons. There were only 19 steamships of more than 10,000 tons, all belonging to the Nippon Yusen Kaisha. On July 1, 1932, the mercantile marine comprised 1,964 vessels of 4,225,014 tons gross.

Internal Communications.

The total length of roads in Japan is 585,449 miles (1929).

The first railway in Japan was built in 1872, between Tokyo and Yokohama, a distance of 18 miles. By 1880 there were 73 miles of railway in operation, by 1900, 3,638 miles, by 1910, 5,354 miles, by October, 1923, 9,974 miles. The following table gives the railway statistics for 1930-31 —

	State Railways	Railways owned by Private Companies	Total
Length in miles	9,002	4,861	13,363
Gross income, yen	439,283,129	81,066,696	520,292,825
Expenditure, yen	284,824,020	52,478,895	337,297,415
Goods carried, tons	64,087,099	22,949,877	87,036,976
Passengers, number	824,152,598	428,870,560	1,252,528,158

It has been decided to make the standard gauge 4 feet 8½ inches. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,000 yen. Japan has been conceded by China the right to build five railway lines in Manchuria and Mongolia. Comprehensive plans have been made for the electrification of the Japanese Government railways. On June 30, 1929, there were 3,492 miles electrified, of which 153 miles were state-owned and 3,339 miles owned by private companies.

There are (1930-31) 1,280 miles of electric tramway in Japan.

The air traffic has been as follows (years ended March 31) —

	1926-27	1927-28	1928-29	1929-30	1930-31
Number of aviators	249	273	386	412	460
Number of flights	14,747	17,987	17,528	20,628	30,018
Number of machines	88	100	107	118	123
Distance flown (kilometres)	762,354	878,230	1,106,802	1,711,623	2,846,052
Hours flown	5,949	7,318	8,894	12,108	15,459

The following are postal and telegraphic statistics for four fiscal years (ended March 31) —

—	1927-28	1928-29	1929-30	1930-31

The notes of the Bank of Japan are of seven denominations, 1, 5, 10, 20, 50, 100, and 200 yen

The total amount of notes in circulation on Jan 28, 1933, was 1,226,972,000 yen, cash and bullion 459,660,000 yen, discounts 661,999,000 yen, advances 119,784,000 yen, state and public deposits 423,443,000 yen. On March 31, 1929, the gold stock of Japan was 1,178,000,000 yen, of which 91,000,000 yen were held by the Government and 1,087,000,000 yen by the Bank of Japan. The embargo on the export of gold, imposed on September 12, 1917, was removed on January 11, 1930, and Japan thus returned to the gold standard. The embargo, however, was re-imposed on December 13, 1931, to check the gold efflux.

The modern banking system dates from 1872. The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaidō Colonisation Bank, the Bank of Taiwan, Bank of Chosen. There are also (1931) 19 agricultural and industrial banks, 680 ordinary banks, and 87 savings banks. The condition of the banks (ordinary, saving and special) for three years (December 31st) was as follows

Year	Paid-up Capital	Reserve Fund	Deposits	Net Earnings	Rate of Dividend
	Yen	Yen	Yen	Yen	Per cent.
1929	1,733,192,000	989,447,000	12,203,003,000	338,831,000	7½
1930	1,695,286,000	995,096,000	11,731,161,000	292,502,000	7 3
1931	1,656,374,000	982,900,000	11,168,940,000	266,518,000	6 6

The depositors in the Post Office Savings Bank on March 31, 1931, numbered 36,719,034, and their deposits amounted to 2,495,348,632 yen, on March 31, 1932, there were 39,396,330 depositors with 2,796,189,761 yen to their credit

Money, Weights, and Measures

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0.75 gramme of pure gold, and is called the yen = 2s $0\frac{1}{2}d$, which, however, is not coined. The pieces coined are as follows — Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (10 and 5 sen pieces), and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are 900 fine, and the silver coins 720 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one yen silver coin formerly issued is withdrawn. The old copper 2, 1 and $\frac{1}{2}$ sen pieces are used as formerly.

Weights and measures are as follows —

The <i>Kin</i>	= 160 <i>monmé</i>	= 1 323 lbs avoirdupois
„ <i>Kwan</i>	= 1,000 „	= 8 267 lbs „
„ <i>Sun</i>		= 1 193 inches
„ <i>Shaku</i> (10 sun)		= 11 930 inches
The <i>Ken</i>	= 6 <i>shaku</i>	= 5 965 feet
„ <i>Chô</i>	= 60 <i>ken</i>	= $\frac{1}{8}$ mile, 5 4229 chains
„ <i>Ri</i>	= 36 <i>chô</i>	= 2 44 miles
„ <i>Ri</i> sq		= 5 9552 sq miles
„ <i>Tsubo</i>		= 3 9538 sq yds
„ <i>Chô</i> , land measure		= 2 45 acres
„ <i>Koku</i> , liquid		= 39 6804 gallons
„ „ dry		= 4 9601 bushels
„ <i>To</i> , liquid = $\frac{1}{10}$ <i>koku</i>		= 3 9680 gallons
„ „ dry		= 1 9851 pecks

The metric system was made obligatory by a law passed in March, 1921, but has not yet been enforced. The following rates are recognised —

metre	= 3 3 <i>shaku</i>
gramme	= 0.266667 <i>monmé</i> ($\frac{1}{18}$ <i>monmé</i>)

Diplomatic Representatives.

1. OF JAPAN IN GREAT BRITAIN

Ambassador Extraordinary and Plenipotentiary — His Excellency Tsuneo Matsudaira, G. C. V. O. (Appointed July 24, 1928.)

Counsellor — Sotomatsu Kato, C. B. E.

First Secretary. — Kanzo Shiozaki.

Second Secretaries. — Kumauchi Yamamoto and Takashi Mori.

Third Secretaries. — Yutaka Ishizawa and Yoshitaro Yamada.

Attachés. — Akira Miyazaki, Hisanaga Shimadzu, Hisanari Yamada, Shigenobu Shima, Toshio Katsube, Koichi Asakai, Shiro Ishiguro, and Takezo Toko.

Naval Attaché — Captain Arata Oka.

Military Attaché — Major General Rikichi Ando.

Financial Attaché — Juichi Tsushima.

Commercial Counsellor and Consul-General. — Shinjiro Matsuyama.

Chancellors. — Yoshio Sumino, M. Yamashita, and I. Kakegawa.

There are Consuls at Glasgow, Liverpool, Cardiff, Middlesbrough, and Manchester

2 OF GREAT BRITAIN IN JAPAN.

Ambassador Extraordinary and Plenipotentiary—Hon Sir Francis Oswald Lindley, G C M G, C B, C B.E., appointed May 27, 1931

Counsellor.—T M Snow

Counsellor (local rank) —W B Cunningham

Secretaries —A D F Gascoigne and E E Crowe

Naval Attaché —Captain J G P Vivian, R N

Military Attaché —Lt Col. E A. H James, R E

Commercial Secretary —H A Macrae, M B E

Commercial Counsellor —G B Sansom, C M G

There are Consular Representatives at Tokio, Yokohama, Osaka, Shimonoseki, Kobe, Nagasaki, Tamsui (in Formosa), Dairen, and Seoul

3 OF JAPAN IN CANADA

Minister —Iemasa Tokugawa (appointed April 30, 1929)

4 OF CANADA IN JAPAN

Minister —Herbert Meredith Marler (appointed January 12, 1929)

KOREA (CHŌSEN)

Government.—By a treaty concluded between Japan and Korea on August 22, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and the title of the country was changed back to 'Chosen,' from Tai Han, which had been adopted in 1897, and the office of Japanese Governor General established. By an Imperial Rescript of 1919, Korea is to be treated as in all respects an integral part of Japan, Koreans to be on the same footing as Japanese. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese patents of nobility conferred upon them.

Governor General —General Kazunari Ugaki (June, 1931)

Area and Population —The area is 85,228 square miles. Population at the end of 1930, 20,256,563 (10,320,067 males and 9,936,496 females). Of this number, 501,867 were Japanese, 19,685,587 Koreans, and 69,109 foreigners. The 1930 returns give the number of British subjects as 235, Americans 838, French 76, and Germans 80. At the end of 1930 the population of the largest cities and towns was as follows —Keijo-fu (Seoul), the capital, 350,426 (97,758 Japanese), Fusan fu (Pusan), 130,397 (44,273 Japanese), Heijo fu (Pyong Yang), 136,927 (18,157 Japanese), Taikyu fu (Tai Ku), 101,078 (29,633 Japanese), Chemulpo 63,658 (11,238 Japanese).

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

Religion and Education.—The knowledge of Chinese classics and of Confucian doctrine, formerly considered essential to the education of the upper classes, has given way under Japanese and foreign influence to a more practical system of instruction, but the worship of ancestors is still observed with as much punctiliousness as in China. In the country

there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. There is a large number of Christian converts. French missionaries were working in the country from 1784 and struggled for a century in the face of official persecution. The ban on Christianity was raised in 1882 and the first Protestant missionaries came to Korea in 1884. In 1930 there were 321 foreign missionaries working in Korea and a membership of 314,534 converts (communicants) was claimed. The missions early established numerous hospitals and schools throughout the country.

Since annexation the Japanese authorities have provided schools in all parts of the country, but it is recognized that much is required to be done, as less than 40 per cent of the Koreans are literate. Plans are now being drawn up to establish an elementary school in every *myen* or village, but lack of funds hinders the speedy attainment of this ideal. Technical schools are being gradually introduced.

In 1931 there were for the education mainly of Japanese 467 elementary schools with 71,836 pupils and 2,010 teachers, 11 middle schools with 6,026 pupils, 1 medical school, a law school, 3 normal schools with 1,569 students and 101 teachers, a higher technical school, a higher commercial school and a higher agricultural school, 25 girls' high schools with 8,947 pupils, and 203 kindergarten schools and various private schools. For the education of Koreans there were 1,176 common schools with 476,246 pupils, and 80 private common schools with 23,464 pupils, 26 higher common schools (11 private) with 12,799 pupils, 16 (10 private) higher common schools for girls, with 4,749 pupils, besides various industrial schools. There is a University at Seoul with 534 students (May 31, 1931), of whom 182 were Koreans and 352 Japanese. The preparatory course has 318 students.

In Seoul there are three daily Korean newspapers, and 2 Japanese besides others published at Chemulpo and in other parts of the country. There is a Government-subsidised daily newspaper in English, published at Seoul.

Finance.—The finances of Korea form a special account in the Budget of Japan. The estimated revenue and expenditure for two years are shown as follows —

Revenue	1931-32	1932-33	Expenditure	1931-32	1932-33
	Yen	Yen		Yen	Yen
Ordinary	202,057,540	179,556,988	Ordinary	186,672,827	168,514,689
Extraordinary	37,672,243	35,899,419	Extraordinary	53,056,936	51,941,718
Total	239,729,783	215,456,407	Total	239,729,783	215,456,407

The outstanding debt (March 31, 1932) is 406,996,480 yen.

Production.—Korea is almost entirely an agricultural country, the cultivated area at end of 1930 was 10,796,113 acres. The Japanese own nearly one-half of the cultivated land. The chief crops are rice (about 33 per cent of the cultivated area), barley, wheat, beans, and grain of all kinds, besides tobacco and cotton. The rice crops for 4 years were (in bushels) —1927, 103,045,131, 1928, 80,485,957, 1929, 81,617,865; 1930, 95,903,385. In 1930, 37,839,940 bushels of barley were produced, 22,450,240 bushels of soya beans, 169,772,397 lbs of Upland American cotton and 55,255,349 lbs of native cotton. Whale fishing is carried on on the coast. In 1930, 54,835,967 pounds of apples and 26,594,750 pounds of pears were produced. Silkworm rearing is also carried on and in 1929 there were produced 2,424,010 bushels of cocoons, in 1930, 2,775,160

bushels Live-stock is raised as a by-product of agriculture. The cattle are well known for their size and quality. In 1930, there were 1,611,585 cattle, 55,544 horses, 1,386,891 pigs, 7,676 donkeys and 23,813 goats The fishing industry is developing, value of catch in 1930, 50,129,028 yen

Gold mining is carried on, the value of the 1930 output was 6,207,644 yen There are several foreign-owned gold mines in active operation Copper, iron, and coal are abundant in Korea, the development of these resources has been impeded by defective means of communication, but is making steady progress The output of pig iron in 1930 was valued at 5,928,071 yen, iron ore at 2,808,173 yen, and coal 5,827,966 yen Anthracite coal mines in the north of Korea are in operation Graphite and mica also are found in fair quantities The total value of mineral products in 1930 was 24,654,463 yen The Government has the monopoly of ginseng, salt and tobacco, the latter yielding 36,534,817 lbs. in 1930 At end of 1930 there were 4,249 factories with 81,790 employees, while the value of the output was 320,007,290 yen

Commerce.—The open ports are Seoul, Chemulpo, Fusan, Gensan, Chinnampo, Mokpo, Kunsan, Seishin, Ping-Yang (inland city), Wiju, Yong Am-Po (1908), Yuki, Joshin and Shin wiju

Trade (merchandise only) at the open ports —

—	1927	1928	1929	1930	1931
	Yen	Yen	Yen	Yen	Yen
Imports	383,417,007	413,990,943	423,093,551	367,050,000	270,466,331
Exports	353,924,702	365,978,524	345,664,056	266,540,000	261,798,539

The imports in 1931 included cotton goods, 26,522,391 yen, machinery, 9,389,508 yen, silk goods, 10,614,921 yen, timber, 4,879,984 yen, mineral oil, 6,706,133 yen, grass cloth, 2,414,715 yen, sugar, 5,640,560 yen, paper, 5,816,832 yen, flour, 3,804,028 yen, fertilisers, 8,632,615 yen; and coal, 8,521,705 yen The principal exports were rice, 138,478,355 yen, beans, 13,807,822 yen, hides, 1,391,891 yen, cattle, 2,793,412 yen, silk, 12,015,054 yen, cocoons, 1,553,073 yen; and gold ore, 1,105,858 yen Of the total imports in 1931, the value of 217,770,365 yen was from Japan, of the exports, the value of 249,026,697 yen was to Japan From Great Britain and the United States of America respectively, direct imports amounted to 1,313,419 yen and 4,550,470 yen, but there is also considerable indirect trade via Japan

Imports from United Kingdom (Board of Trade Returns) were 145,182/ in 1930, 58,705/ in 1931, and 112,201/ in 1932, exports to United Kingdom were 1,295/ , 217/ and 31/ , and re exports from U K were 231/ , 4,862/ and 100/ in the three years respectively

Shipping and Communications —The shipping entered at the open ports in 1931 had a tonnage of 9,653,786, and those that cleared a tonnage of 9,679,305 In March 1931 there were 197 steamships, of 54,957 tons, and 692 sailing ships, of 22,905 tons, registered in Korea

Transport in the interior is by rail, road (motor-car, oxen, pack-horses, etc.), and river The railways are being rapidly extended and the roads are being gradually improved At the end of March 1931 there were 11,872½ miles of completed roads Length of railways, 1932 (public and private), about 4,950 miles, number of passengers carried (1931–32) 19,673,740.

Number of post offices 781 There were 24,845 miles of telegraph wire

open (March 1932), and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced into all the principal towns, length of lines 90,105 miles (March, 1932). During the fiscal year ended March 1932 189,408,735 telephone messages, and 5,596,075 telegrams were sent.

In 1931-32, 238,411,914 ordinary mails were collected and 255,358,734 delivered, 2,005,692 parcels were collected and 3,200,541 delivered.

Currency and Banking—Regulations for banking were framed in 1906. In 1932 (Jan.) there were 15 banks, semi Government and ordinary, with 60,971,000 yen paid up capital, with total deposits at December 31, 1931, amounting to 180,114,000 yen.

A central bank, the Bank of Chosen, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai-Ichi-Ginko) as the Government Treasury. Notes of this bank are permitted to circulate unrestrictedly within the jurisdiction of the Government General of Chosen and are exchangeable with gold coin and convertible notes issued by the Bank of Japan. The Bank of Chosen has a paid up capital of 25 million yen, the deposits amounting to 111,462,998 yen (Dec 31, 1931). Notes issued at Dec 31, 1931, 100,909,792 yen. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan, silver bullion, however, must not exceed one fourth of the total reserve. The postal savings banks had 2,283,871 depositors with a total amount 41,432,669 yen on March 31, 1932.

The coinage consists of gold pieces of 5-, 10, and 20 yen, silver of 10-, 20, and 50-sen, nickel of 5 sen, and 10-sen, and bronze of 1 sen. The gold coins, however, are not in general use, the ordinary medium of commerce being the notes of the Bank of Japan or of the Bank of Chosen which are issued in the following denominations, viz 100 yen, 20 yen, 10 yen, 5 yen, and 1 yen. The old nickel coin has been wholly withdrawn from circulation, and the cash currency is now rarely seen, and then only in remote parts of the country. Under certain regulations, bills of exchange and cheques may pass into the currency. In the more important commercial towns there are authorised 'note associations' of merchants for the transaction of business relating to bills.

British Consul-General at Seoul—William Massy Royds
Vice Consul—L. H. Whittall

FORMOSA (TAIWAN)

The Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

Governor-General—Eizo Ishizuka

The Island has an area of 13,890 square miles, with a population according to the census of Oct 1, 1930, of 4,592,537 (2,853,288 males and 2,239,274 females). There were 220,780 Japanese, and 43,118 foreigners in the Island in 1929. The chief towns are Taihoku (195,555 inhabitants in 1925 Census), Tainan, Kōrun, and Taichu. The official language is Japanese, but Chinese (Amoy dialect) is the most used.

Many improvements have been effected by the Japanese administration. A colonising scheme was commenced in 1909, whereby Japanese were settled

in Taiwan. An educational system has been established for Japanese and natives. In 1930-31 there were for the instruction of the Japanese 134 primary schools, with 876 teachers and 34,163 pupils. For the instruction of the natives there were 757 schools, with 5,411 teachers and 248,478 pupils. There are also normal schools, a medical school, an industrial school, and a school for teaching the Japanese language to natives, and native languages to Japanese. The University of Formosa was opened in April, 1928.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

¹ Budget estimates

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric, while camphor is worked in the forests under a Government monopoly. The production of crude camphor and camphor oil respectively was in 1925, 2,447,043 lbs and 5,019,131 lbs; in 1926, 1,665,817 lbs and 4,633,284 lbs, and in 1927, 1,719,510 lbs and 11,639,760 lbs. The quantity of tea produced in 1931 was 21,656,800 lbs; in 1930, 22,977,064 lbs, in 1929, 24,209,044 lbs. Production of rice in 1932, 45,029,066 bushels, in 1931, 37,121,725 bushels. Area under cane and production of raw sugar in 1928, 257,231 acres, 722,788 tons; 1929, 285,336 acres, 973,595 tons, in 1930-31, 208,421 acres, 784,655 tons, 1931-32, 243,666 acres, 957,720 tons. There are active fisheries: value of catch in 1930, 11,771,144 yen. The number of animals (December 31, 1930) was — horses, 325, goats, 83,875, cattle, 92,323, pigs, 1,750,464, buffaloes, 298,586. The industries comprise flour milling, sugar, tobacco, oil, spirits, iron work, glass, bricks, soap, and many other manufactures. Mining is making steady progress: gold (636,486 yen), silver (10,790 yen), copper (3,611,986 yen), and coal (9,618,416 yen) being the principal minerals in 1930, the output of coal in 1930 was 1,598,728 tons. The total value of minerals in 1930 was 15,141,198 yen. There were 43 new style and 78 old style sugar mills in Taiwan in 1931.

The commerce of Formosa is largely with Japan, imports in 1930, 45,131,193 yen from foreign countries, 123,127,117 yen from Japan; total imports, 168,258,310 yen, exports, 22,807,963 yen to foreign countries; 218,633,341 yen to Japan; total exports, 240,441,304 yen. In 1931 the imports from Japan amounted to 114,763,307 yen, exports to Japan 201,424,107 yen. Imports from other foreign countries, 30,858,816 yen, exports to other foreign countries, 19,448,759 yen. Total imports, 145,622,123 yen; and total exports, 210,872,866 yen. The chief exports in 1931 were tea, 7,363,130 yen; sugar, 2,856,530 yen; camphor and camphor oil, 1,586,448 yen; alcohol, 332,850 yen, coal, 2,295,114 yen. The chief imports in 1931 were manures, 13,686,085 yen, soya beans, 1,537,285 yen, timber, 1,103,782 yen, gunny bags, 1,652,823 yen.

In March 1930 there were 25 steamships, of 4,962 tons, and 144 sailing

vessels, of 8,170 tons, registered in Formosa In 1930, 1,886 vessels of 3,640,258 tons entered the ports of Formosa from countries and Japan.

Roads have been and are being constructed throughout the Island There were, in 1930, 620 5 miles belonging to the Government and 387 2 miles to private companies, and 1,053 3 miles to exclusive use of private companies In 1932 there were 178 post offices, through which passed packets (including parcels), 67,808,987 The telegraph service has 194 offices, length of line 875 miles, of wire, 3,735 miles, messages (1932), 3,031,134 Telephone line, 2,285 miles, calls, 66,843,999

The post office savings bank had 484,072 depositors with 17,855,759 yen to their credit (1931-32)

The coinage current in the Island is that of Japan

Bōkotō, or the **Pescadores**, consist of about 12 islands, with a total area of about 50 square miles

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude It has an area of about 13,935 sq miles, and, in 1930 (census), the population was 295,187 (168,528 males, 126,659 females) The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals There is a vast forest area of larch and fir trees The minerals found are coal and alluvial gold, coal raised in 1930, 644,963 tons

The revenue for the year ending March 31, 1932, is estimated at 23,092,628 yen, and expenditure 23,092,628 yen

The leased Territory of **Kwantung**, the southern part of the Liaotung Peninsula, has an area of about 1,444 sq miles, and a population (October 1, 1930) of 1,328,011, of whom 809,044 were males and 518,967 females At the end of 1930, there were 1,055,550 Chinese and 233,158 Japanese (exclusive of army and navy) The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairend, formerly called Dalny) At the end of 1930 there were 55 elementary schools with 29,642 pupils, 10 secondary schools with 4,833 pupils, and 8 girls' schools with 3,920 pupils, for the instruction of the Japanese, and 155 schools with 36,026 pupils for the instruction of the natives, also an American Presbyterian Mission with a church and a hospital

The revenue for 1932-33 is estimated at 22,736,016 yen, and expenditure, 22,736,016 yen

At the end of 1930 there were 140 steamships of 359,835 tons, and 104 sailing vessels of 4,151 tons, registered in Kwantung

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables There is an active fishing industry, the value of the catch in 1930 (9,562,015 kwan) being 3,848,214 yen, as compared with 12,831,256 kwan in 1929, valued at 4,682,117 yen The chief manufactured product is salt, which is abundant in the Territory In 1930 production amounted to 415,777,800 kin Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinohow, Pulantien, Pitzewo, and Port Arthur The port is free, goods being subject to duty only on crossing the frontier of the leased territory The trade is mostly with Japan and China Imports (1931), 97,934,730 yen, exports, 192,872,735 yen, of which 53,287,704 yen were imported from Japan, and 74,886,138 yen exported to that country

Dairen has a fine harbour, ice free all the year, and protected by a break-water 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the South Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Harbin, and the Eastern Chinese Railway System, 8,115,808 passengers and 15,193,272 tons of goods were carried during 1930-31. In 1930 its total length was 699 miles.

Gold and silver coin and the notes of the Yokohama specie bank are current.

Pacific Islands.—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These include —(1) *The Marianne (or Ladrone) Islands*—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000*l*. Sipan is the seat of Government. The Japanese population of the islands at October 1, 1930, numbered 19,835, and the natives 49,695. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands*—The Carolines consist of about 549 coral islets, Ponape having 8,910 inhabitants, Yap 6,735, and Parao 8,101 (each at October 1, 1930). The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into two groups: (a) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There are in Truk 749 Japanese, 23 Foreigners, and 15,200 natives; in Ponapé there are 689 Japanese, 20 Foreigners, and 8,201 natives. (b) The Western Carolines, with Palau and Yap as administrative centres. There are in Palau 2,078 Japanese, 6,009 natives, and 14 Foreigners. In Yap there are 241 Japanese, 6,486 natives, and 8 Foreigners.

(3) *Marshall Islands*—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratak (with thirteen islands) and Ralick (with eleven islands), first came under German rule in 1885. The population on April 1, 1930, was of 335 Japanese, 17 foreigners, and 9,356 natives. The chief island and administrative centre is Jaluit, Protestant (American) and Catholic missions are at work. There are plantations of coco palm (1,705 hectares). The chief export is copra.

Justice is administered in 3 district courts and in a court of appeal. The islands contain 13 primary schools for Japanese and 23 for natives. Besides coco palm, the principal products are sugar cane (island of Saipan) and cotton (islands of Rota and Tinian). In 1930, there were in the islands 3,446 cattle, 2,215 goats, and 9,486 pigs.

The revenue for the Pacific Islands for 1931-32 is estimated at 4,953,453 yen, and expenditure, 4,953,453 yen.

LATVIA.

(LATVIJAS REPUBLIKA)

LATVIA, along the southern part of the Baltic littoral, is inhabited chiefly by Letts. As early as the 13th century the Letts fought against the Germans (battle of Durbe, 1260), but in the long run the Germans carried the day, and the state created by the Teutonic Order under the form of a Federal Republic (consisting of Estonia, Latgale, Livonia, and Courland) lasted until 1560. Eventually, Estonia passed under the rule of Sweden, Latgale and Livonia under that of Lithuania-Poland, while Piltene and Oesel became Danish. Courland alone retained her independence under the form of a vassal duchy of Lithuania-Poland. In 1621 Livonia was annexed by Sweden, and in 1710 by Russia. In 1772, after the first partition of Poland, Latgale was assigned to Russia, and in 1795 Courland joined Russia. From this time onwards, Latvia was under Russian rule.

In 1917 Lettish public opinion expressed itself in favour of the separate existence of Latvia, and announced its view officially in the Russian Constituent Assembly in January 1918. An organization for establishing the independence of the country was formed, and on November 18, 1918, it proclaimed in Riga the sovereign Free State of Latvia, which has been recognised as an independent State by all the Powers, and was admitted to the League of Nations on September 22, 1921.

Constitution and Government.—The Latvian Constitution which was passed by the Constituent Assembly on February 15, 1922, declares that Latvia is an independent democratic Republic and that the sovereign power of the State is vested in the Latvian people. The *Saeima* (Parliament) consists of 100 representatives elected for 3 years by universal, equal, direct, and secret vote on the basis of proportional representation, by citizens of both sexes over 21 years of age. Its powers expire on the day on which the new *Saeima* assembles. The *Saeima* elects the President of the State by absolute majority, and he holds office for 3 years. No person can hold this office for more than 6 consecutive years. The President must be over 40 years of age. He is the Chief of the armed forces of the State, and, for the period of war, appoints a commander-in-chief. War can only be declared after a vote of the *Saeima*. The President chooses the Prime Minister, who forms the Cabinet, and the Cabinet is responsible to the *Saeima*. The President may propose the dissolution of the *Saeima*, which proposal shall then be followed by a vote of the people. If this proposal is accepted by the people, the *Saeima* is dissolved and new elections are proclaimed; if not, the President of the State is to be considered as having resigned and the *Saeima* elects a new President. All citizens are equal before the Law. The Judges are independent and irrevocable. The State Control is an independent collegial institution, its chief being elected by the *Saeima* for a definite period.

The elections to the *Saeima*, held on October 15, 1931, returned the following parties Right, 29 (National bloc, 5, Farmers' League, 16, Clerical Catholic Party, 8), Centre, 26 (Economic Party, 7, Centre Party, 6, Latvian National Party, 5, Progressive Union, 3, various smaller parties, 5), Left, 28 (Social Democrats, 21, Communists, 7), National Minorities (Germans, Russians, Jews, Poles), 17, total, 100

The Ministries are those of Interior, Foreign Affairs, Finance, War, National Welfare, Education, Agriculture, Justice, Communications, and State Control

President of the State—Albert Kivass (elected April 9, 1930)

Prime Minister—Adolfs Bļodnieks (appointed March 22, 1933)

Area and Population.—Latvia consists of the former Russian Province of Courland (about 10,435 square miles), four southern districts (Riga, Wenden, Wolmar, Walk) of the former Russian province of Livonia (about 8,715 square miles) and three western districts (Dvinsk, Reshitza, Lutsin) of the former Russian province of Vitebsk (about 5,292 square miles), making a total of about 24,440 square miles, or, including inland lakes, about 25,000 square miles. The total length of the frontier line of Latvia is 1,040 statute miles, with a coast line of 338 statute miles. For administrative purposes Latvia is divided into Vidzeme (Livonia), Kurzeme (Courland), Zemgale, and Latgale

The chief town is Riga (the capital), population (1930) 377,917, population of other principal towns according to 1930 Census, Liepāja (Libau) 57,238, Daugavpils (Dvinsk), 43,226, Jelgava (Mitau), 33,048, Ventspils (Windau), 17,253, Rēzekne (Rositten), 12,680, Valmiera (Wolmar), 8,368, Cēsis (Wenden), 7,692

The census taken in 1930 showed a population of 1,900,045 in Latvia, of which 1,843,877 were Latvian citizens, and 56,168 foreigners (including 21,336 persons without nationality). Of the Latvian citizens 78.42 per cent. were Letts, 12.52 per cent. Russians, 4.97 per cent. Jews, 3.68 per cent. Germans, 3.12 per cent. Poles, 1.36 per cent. Lithuanians, 0.40 per cent. Estonians, 0.45 per cent. other nationalities, and 0.08 per cent. were persons with unknown nationality

The birth rate during 1930 was 19.81, and the death rate 14.20 per 1,000

Religion and Education.—The majority of the population in Latvia is Protestant (56.58 per cent.), but in Latgale and one district of Kurzeme there are also many Roman Catholics (23.69 per cent.), while in Riga, Ventspils and south east of Vidzeme there are a number of Greek Catholics and members of the Orthodox Church (8.93 per cent.)

During the year 1931-32 there were 2,083 elementary schools in Latvia, with 197,540 pupils and 8,255 teachers. Most of these schools were supported by the State or municipal institutions, only 129 being supported by private persons or societies. The State or municipal institutions also supported 85 of the secondary schools in the country, the remaining 57 being supported by private persons or societies. In these 142 secondary schools 2,634 teachers taught 21,844 pupils

Each national minority has the right to its own schools (elementary and secondary) with its own language of instruction. The State contributes to the maintenance of these schools according to the percentage of inhabitants of the respective national minorities. In 1931-32, instruction was given in elementary schools in the following languages (figures in brackets refer to secondary schools).—Lettish in 1,514 (86) schools, with 142,192 (15,508)

pupils and 5,467 (1,692) teachers; national minorities in 569 (57) schools, with 55,348 (5,887) pupils, and 2,788 (942) teachers

Formerly the University of Dorpat served the whole of the Baltic provinces of Russia, and as Dorpat became an Estonian institution, the Riga Polytechnic was in 1919 raised to be the Latvian University. The number of students in 1931-32 8,766, and of professors, 373. There are also 116 technical professional schools with 10,082 pupils, a Musical Academy with 391 students and 42 teachers, and an Academy of Arts with 301 students and 22 teachers.

Finance.—Revenue and expenditure for five years are shown as follows —

	1928-29	1929-30 ¹	1930-31 ¹	1931-32 ¹	1932-33 ¹
	Lats	Lats	Lats	Lats	Lats
Revenue	209,955,000	186,491,720	178,649,186	177,824,000	183,582,807
Expenditure	203,696,000	186,491,720	178,649,186	177,824,000	133,582,807

¹ Budget estimates

The National Debt of Latvia on April 1, 1931, was as follows —To United States of America, 6,889,189 dollars, to Great Britain, 1,925,000£. The internal debt amounted to 764,000 Lats.

Defence.—The standing army numbers 2,200 officers and 23,000 men, organized in four divisions. There are also 550 men in the Air Service organized in 1 regiment. Service is compulsory, beginning at the age of 21, and lasting to the age of 50. Service with the colours has been reduced, according to the law of May 16, 1928, to 12 months in the case of the infantry and 15 months for other arms.

Latvia maintains a coast defence squadron, comprising at present 2 submarines and 4 ships of different types.

Production and Industry.—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life. In 1932 the principal crops were rye, 599,750 acres, 299,550 metric tons, barley, 462,250 acres, 192,660 metric tons, oats, 811,500 acres, 332,990 metric tons, wheat, 258,000 acres, 144,020 metric tons; potatoes, 256,000 acres, 1,205,140 metric tons, flax, 79,250 acres, 19,274 metric tons (18,610 metric tons linseed). Latvian forest lands, State and private (4,098,280 acres), produced in 1930-31, 2,285,327 cubic metres of timber (with firewood, 1,297,882 cubic metres). On December 31, 1931, there were 3,032 industrial enterprises in Latvia, employing 66,304 hands. The number of workers employed in the principal industries was as follows:—metallurgical, 12,451, chemical, 4,161, textile, 8,860; mineral working, 284; and woodworking, 11,152.

Live-stock in 1932. horses, 366,000; cattle, 1,153,100; sheep, 984,000; pigs, 581,600.

Latvia does not possess much mineral wealth.

Commerce and Communications.—Latvia has about 840 miles of sea-coast; its 3 principal harbours are Riga, Liepaja, and Ventspils. Three Russian main lines converge on Latvian ports, viz. the Riga-Tsaritsin line, the Ventspils-Moscow line, and the Liepaja-Romni line.

Trade for four years:—

Year	Imports		Exports	
	Metric tons	1,000 Lats	Metric tons	1,000 Lats
1929	1,545,028	362,147	1,825,466	278,868
1930	1,445,517	296,828	1,241,779	247,877
1931	1,049,611	177,083	773,587	163,757
1932	729,932	84,731	656,218	96,515

The commerce for two years was distributed as follows (in thousands of lats) —

	1931		1932	
	Imports	Exports	Imports	Exports
Raw materials and semi-manufactured articles	1,000 Lats 50,955	1,000 Lats 49,768	1,000 Lats 30,823	1,000 Lats 29,029
Manufactured articles	95,227	60,598	41,090	33,672
Food products	28,386	51,227	11,171	33,796
Cattle	1,514	2,162	657	18
Precious metals, etc	1,001	2	385	—
Total	177,083	163,757	84,731	96,515

The main export articles of Latvia are (1932) timber, 19,064,000 lats, flax, 5,059,000 lats, butter, 30,990,000 lats

In 1932 the imports (value in thousand lats) came from Germany, 30,406, United Kingdom, 11,632, Czechoslovakia, 1,358, Soviet Russia, 5,508, Poland, 4,876, United States of America, 3,164 Exports to the United Kingdom, 29,787, Germany, 25,272, Soviet Russia, 14,222, Belgium, 5,742

In 1931 the principal imports of the United Kingdom from Latvia (according to the Board of Trade Returns) were sawn timber, 840,709, pit props, 154,675, flax 646,443. The principal exports to Latvia were iron and steel, 55,049, herrings, 205,286, cotton goods, 100,733.

Total trade between Latvia and the United Kingdom for 5 years (according to Board of Trade Returns) —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Latvia into U K	5,748,135	5,467,018	4,746,797	2,927,537	2,667,430
Exports to Latvia from U K	1,292,957	1,496,447	1,152,046	590,712	590,568
Re exports to Latvia from U K	176,811	134,689	95,360	31,314	44,836

On July 1, 1932, there were 106 steamships and motorships of 187,238 tons gross, and 8 sailing vessels of 1,241 tons gross, making a total of 114 vessels of 188,479 tons gross sailing under the Latvian flag. There were also 4 ice-breakers.

In 1931, 2,937 vessels of 1,476,924 tons entered and 2,926 of 1,457,884 tons cleared the ports of Latvia.

To facilitate the transit of goods to and from Russia, the Latvian main lines converging on the ports of Riga and Ventspils have been altered to the Russian gauge, while for Western traffic (Riga-Ostend-Paris line) and internal communications the normal and narrow gauges are used. Of the total length of Latvian railways—1,715 miles on January 1, 1932—1,084 miles were of Russian gauge and 198 miles of the normal gauge. Gross receipts of Latvian railways in 1931 were 39,182,000 lats and expenditure 39,266,000 lats, 13,986,000 passengers were carried and 3,097,000 tons of freight handled. There were also 797 miles of macadamised high roads. The navigable inland waterways (1,829 miles) carried about 721,069 tons of goods.

On April 1, 1932, there were 1,430 post offices in the country, length of telegraph line, 2,053 miles, length of telephone lines, 20,332 miles.

Banking and Currency—The legal tender in Latvia is the *Lat* equal to one gold franc, and representing 2903226 grammes of fine gold. Notes of 20, 25, 50, 100 and 500 lats are in circulation, also silver coins of 1, 2 and 5 lats, bronze and nickel coins of 1, 2, 5 santims, and 10, 20, 50 santims respectively. The issue of notes in Latvia is strictly limited to the amount of cover, and notes can be encashed in gold.

On January 1, 1932, there were 18 joint-stock Banks, 36 mutual credit societies and 12 communal credit institutions in Latvia, with an aggregate capital of 44,046,000 lats, and assets totalling 162,687,000 lats. The Bank of Latvia (*Latvijas Banka*) which commenced operations on November 1, 1922, had on January 30, 1933, notes in circulation amounting to 84,905,155 lats, deposits, 91,077,377 lats (including 72,000,798 lats on current account), and gold bullion and coin, 38,010,140 lats.

The metric system has been established by law, but the old Russian system of weights and measures was used until January, 1, 1924.

Diplomatic Representatives.

1. OF LATVIA IN GREAT BRITAIN.

Envoy and Minister—(Vacant)

Chargé d'Affaires ad int and Consul General—C L Seya

First Secretary—Gustavs Lerche

Second Secretary—Arnolds Stritzky

Agricultural Adviser—Emils Zolmanis

There is also a Consulate General in London, and consular representatives in Belfast, Hull, Swansea, and other towns.

2 OF GREAT BRITAIN IN LATVIA

Envoy and Minister—H M Knatchbull-Hugessen, C.M.G. (appointed April 7, 1930), also Minister to Lithuania and Estonia

First Secretary—O A Scott, D.S.O.

Naval Attaché—Commander M. A. Hawes, R.N.

Military Attaché—Major R O W G Firebrace, R.A.

There are consular representatives in Riga and Libau.

LIBERIA.

Constitution and Government.—The Republic of Liberia had its origin in the efforts of several American philanthropic societies to make permanent provision for freed American slaves by establishing them in a colony on the West African coast. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by Great Britain and France, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with important differences. The executive is vested in a President and a Council of 8 Ministers, and the legislative power in a parliament of two Houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for six years. The President must be at least thirty five years of age, and have unencumbered real estate to the value of 2,500 dollars, or 500*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

President of Liberia — Edwin Barclay (1932–1936)

Liberia is one of the original members of the League of Nations.

Area and Population.—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 43,000 square miles. The total population is

estimated at 1,000,000, all of the African race. Since the organisation of the frontier force the Government has obtained complete control of Northern Liberia and of the Kroo countries in Southern Liberia. The indigenous natives belong in the main to six principal stocks: (1) the Mandingos (Muhammadan), (2) the Gissi, (3) the Gola, (4) the Kpweai, (5) the Kru negroes and their allies, and (6) the Greboes. The Kru tribes are mostly Pagan. The number of Americo-Liberians is estimated at about 12,000. About 60,000 of the coast negroes may be considered civilised. There is a British negro colony of about 500, and there are about 150 Europeans and Americans. The coast region is divided into counties, Bassa, Sino, Maryland, and Grand Cape Mount, each under a Government superintendent, and Montserrado, subdivided into 2 districts, each under a superintendent. Monrovia, the capital, has, including Kintown, an estimated population of 10,000, and is administered as a Federal District by a Municipal Board appointed by the President. It is one of the eleven ports of entry along the 350 miles of coast, the others being Liberian Jene (river port), Roberts port (Cape Mount), Marshall (Junk), Buchanan, River Cess, Greenville (Sinoe), Sasstown, Grand Cess, Harper (Cape Palmas), and Kablaki (river port). Other towns are Royesville, Arthington, Careyburg, Millsburg, Whiteplains, Bopora (native), Rocktown (native), Garraway, Upper Buchanan and Edina.

Religion and Education—The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, or Methodist). There are several American missions at work and one French Roman Catholic. The Government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In the year 1930 there were 169 schools, of which 51 were Government schools and 118 were maintained by missions. The total number of pupils receiving instruction amounted to 7,588. The Methodist Episcopalians have a college at Monrovia and an agricultural and industrial institute at Kakata, the African Methodist Episcopalians have a college at Monrovia, and the Protestant Episcopalians a college at Cape Palmas. The Government has a college with (1930) 9 professors and 84 students. A criminal code was enacted in 1900, the customs laws were codified in 1907.

Finance.—The revenue and expenditure for 5 years (in American dollars):—

	1926-27	1927-28	1928-29	1929-30	1930-31
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	950,474	1,276,487	1,028,123	980,156	482,029
Expenditure	984,285	1,712,709	1,098,152	985,554	1,000,665

The customs duties were for 1927-28, 767,597 dollars; for 1928-29, 604,226 dollars; for 1929-30, 461,099 dollars, for 1930-31, 250,549 dollars.

In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, of which 2,027,700 dollars has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on customs revenues and head moneys. The Loan Agreement also provides for financial supervision by American officials. The external debt in 1931 was 2,192,000 dollars (Bonds) and 63,022 dollars interest. The default in the Firestone Loan payments (interest and sinking fund) date from November, 1931.

Defence.—For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The establishment organized on a militia basis numbers 4,000, divided into 7 infantry regiments. There is in addition an enlisted Frontier Force of about 700.

Production, Commerce.—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked, but the working of one para rubber plantation has begun, and rubber is being produced. The soil is productive, but cultivation is neglected, cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, palm oil and palm kernels, kola nuts, chillies, beni seed, coffee, anatto seed and rice are also produced. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. No survey of the mineral resources of the country has been made by an expert mineralogist, and although iron exists and is worked by the natives, no mineral deposits of sufficient importance to warrant exploitation have yet been found.

The trade for five years was as follows (in dollars) —

—	1927	1928	1929	1930	1931
	Dollars	Dollars	Dollars	Dollars	Dollars
Imports	2,896,081	4,029,506	2,064,440	1,228,102	858,742
Exports	1,614,671	1,465,568	1,475,356	838,739	679,885

The chief imports are rice, cotton goods, gin, tobacco, building material, galvanised iron, ready made clothing, and dried and preserved fish. The chief exports in 1931 were coffee (1,691,068 lbs.), piassava fibre (10,115,747 lbs.), palm oil (276,952 gallons), palm kernels (10,035,144 lbs.), rubber (323,733 lbs.), ivory (8,409 lbs.). Imports in 1931 were chiefly from Germany (267,726 dollars), United Kingdom (280,993 dollars), the United States of America (130,285 dollars), and Holland (68,453 dollars).

According to Board of Trade Returns, the value of the trade between the United Kingdom and Liberia was as follows in five years —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports into U.K. from Liberia	63,316	58,512	42,767	31,290	14,859
Exports of U.K. produce to Liberia	211,297	133,452	119,575	65,425	82,068
Re-exports to Liberia from U.K.	22,268	17,874	9,699	6,851	4,586

Shipping.—In 1931, 647 ships of a tonnage of 1,650,082 entered and cleared. Of these, 181 of a tonnage of 501,177 were British.

Communications.—There are no railways in Liberia, and means of transport are extremely limited. At present there are about 150 miles of road fit for light motor traffic, all of which are in the coastal area. In the interior communication is maintained between villages by tracks, all goods being carried by native porters.

The River St. Paul is navigable for a distance of 25 miles from its mouth

for small craft of shallow draft, and a service of motor launches runs between Monrovia and White Plains

There is cable communication with Europe and America via Dakar, and a wireless station is maintained by the Government at Monrovia. There is no telephone or telegraph service in the country

Money, Weights, and Measures —The money chiefly used is British silver, but there is a Liberian coinage in silver and copper. Official accounts are kept in dollars and cents, but commercial accounts are generally in English currency. The Liberian coins are as follows —Silver, 50-, 25-, and 10-cent pieces, copper, 2 and 1-cent pieces

Weights and measures are the same as Great Britain and the United States

The Bank of British West Africa, Ltd., withdrew from Liberia in October 1930, and the Firestone Plantations Company have established a bank at Monrovia under the title of 'United States Trading Company (Banking Department)'

LIECHTENSTEIN.

THE Principality of Liechtenstein, lying between the Austrian Land of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign State consisting of the two counties of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the

latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI, the two lordships were constituted as the Principality of Liechtenstein. After the break up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation, from 1815 to 1866 it formed part of the German Confederation, since the break up of which it has joined no similar union.

The Reigning Prince is **Francois I**, born August 28, 1853, succeeded his brother, February 11, 1929. The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution, adopted in October 1921, provides for a Diet of 15 members elected for four years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of Government is Vaduz (pop. 1,715). The principality has a High Court. Since February 1921, Liechtenstein has had the Swiss currency, and since January, 1924, it has been included in the Swiss Customs Union, the posts and telegraphs are administered by Switzerland.

Area, 65 square miles, population, of German origin (Census 1930), 10,213, Catholics, 9,492, Protestants, 253. In 1931 there were 207 births, 64 marriages and 130 deaths. The revenue for 1930 was 1,949,246 Swiss francs and the expenditure 1,774,364 francs. Budget estimates for 1931 revenue, 1,773,100 francs, expenditure, 1,314,449 francs, for 1932 revenue, 1,860,700 francs, expenditure, 1,408,646 francs, for 1933 revenue, 1,854,500 francs, expenditure, 1,434,176 francs. Public debt on December 31, 1932, 4,803,691 francs. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The Principality has no army (since 1868). The population is in great part agricultural, the chief products of the country being corn, wine, fruit, wood, and marble. The industries are cotton weaving and cotton spinning, leather goods, and pottery. The rearing of cattle, for which the fine alpine pastures are well suited, is highly developed.

Administrator —Dr. Joseph Hoop (appointed August 4, 1928)

LITHUANIA.

(LIETUVA)

LITHUANIA became a Grand Duchy in the early part of the thirteenth century. In 1386 the Grand Duke Jogaila embraced Christianity and married the Polish Queen Hedvig, thus becoming King of Poland. During the reign of Vytautas (Vitold) the Great (1392-1430) Lithuania reached the zenith of her power and prosperity, her frontiers extending from the Baltic to the Black Sea. After the death of Vytautas the Great, Polish influence gradually increased in Lithuania, and in 1569 the Lithuanians were forced to unite

with the Poles at Lublin, the Lithuanians retaining their own treasury, laws, courts of justice, and army Both countries elected the same king and had a common Seim (parliament)

At the end of the eighteenth century Lithuania fell under Russian rule

In 1917 a Lithuanian Conference of 214 representatives at Vilna elected a Lithuanian State Council (*Taryba*) and demanded the complete independence of Lithuania The independence of the Lithuanian State was proclaimed on February 16, 1918

On December 20, 1922, Lithuania received *de jure* recognition by the Great Powers Russia had already accorded that recognition in the Treaty of Peace of July 12, 1920

Constitution and Government—The constitution adopted by the Constituent Assembly on August 1, 1922, and amended on May 15, 1928, declares that the State of Lithuania is an independent Democratic Republic The Diet (or *Seimas*) is the exponent of the sovereign power of Lithuania, and makes laws, ratifies treaties with other States, approves the State budget and superintends the execution of the laws The Executive Power is placed in the hands of the President of the Republic and of the Cabinet of Ministers The President of the Republic is elected by the people for seven years, and he appoints the Minister President (Premier), and all other Ministers, as recommended by the Premier The President also appoints the higher military and civil officials of the State In case of the absence or illness of the President, his place is to be taken by the Premier All the acts of the President must be countersigned by the Premier or the proper Minister The Cabinet of Ministers is responsible to the Diet and resigns on an expression of a lack of confidence by the latter The Members of the Diet on entering the Cabinet of Ministers do not cease to be Members of the Diet

All the citizens of Lithuania, without distinction of sex, nationality or religion, are equal before the law, there are no classes or titles All citizens are also guaranteed inviolability of person, homes, and correspondence, and freedom of religion, conscience, Press, speech, strikes, assembly and organization

The Diet of Lithuania is elected every five years by universal, equal, direct and secret suffrage according to the proportional system, the electoral unit being one representative to 50,000 inhabitants

President of Lithuania—Antanas Smetona (1932-39)

Prime Minister and Minister of Finance—Juozas Tūbelis

For administrative purposes the territory of Lithuania is divided into 20 districts, of about 100,000 inhabitants each The districts are divided into communities, with about 15 communities to each district National minorities (Jews, Germans, and Poles) enjoy cultural autonomy

Area and Population.—The Lithuanian Government claims that Lithuania consists of (1) the whole of the former Russian Province of Kaunas (Kovno), (2) the Province of Vilnius (Vilna), minus the districts of Disna and Vileika, (3) a part of the Province of Gardinas (Grodno), north of the Niemen River and the narrow hinterland of the city of Gardinas (Grodno) in the south, (4) the Province of Suvalki minus the southern parts of the districts of Suvalki and Augustovo, (5) part of the Province of Courland between the old German frontier and the Holy Aa (Sventoji) River by the Baltic Sea, and (6) the territory of Klaipeda (Memel)

For the northern and eastern frontier of Lithuania, see THE STATESMAN'S YEAR BOOK for 1929, p 1076.

In the *south* (in the region of the Province of Suvalki) the frontier with Poland has not yet been conclusively agreed upon by Lithuania and Poland. Both Lithuania and Poland lay claim to Vilna, but though the Great Powers (on March 15, 1923) recognized the *de facto* boundary between the two countries as *de jure*, and though the League of Nations has endeavoured to bring about a solution of this problem, no agreement has been reached. The southern part of Lithuania occupied by Poland has an area of about 27,000 sq kilometres (10,422 sq miles), with a population of 1,000,000.

The total area of Independent Lithuania (including Memel) is 55,670 sq. kilometres (21,489 sq miles), and the population (January 1, 1932) 2,392,983.

The Memel territory (area 943 sq square miles, population 146,000), which was detached from Germany by the Treaty of Versailles and at first placed under the control of the conference of ambassadors, who handed it over to Lithuania on February 16, 1923. According to the Memel Convention signed May 8, 1924, between Lithuania on one side and Great Britain, France, Italy and Japan on the other, the Territory of Memel constitutes a unit under the sovereignty of Lithuania, but with a large measure of local autonomy. The port itself is regarded as one of international concern.

The Lithuanians claim that the capital of Lithuania is Vilnius (Vilna), with a population of 214,600 in 1914. Other large towns are Kaunas (Kovno), seat of the Government, 113,000, Gardinas (Grodno), 61,600, Klaipeda (Memel), 37,400, Siauliai (Shavli), 23,249, and Panevežys (Poneviej), 20,562. Of these cities, Vilna and Grodno are in possession of Poland.

Religion—In Independent Lithuania, according to the census of 1923, Roman Catholics formed 80.5 per cent, Jews 7.3 per cent, Protestants and Calvinists 9.5 per cent, Greek Orthodox 2.5 per cent. In the Memel Territory Protestants form 91.7 per cent., Roman Catholics 5.3 per cent. In April, 1926, the Vatican decided to declare Lithuania a Church Province, with an Archbishop and four bishops.

Education—In 1931–32 there were 2,541 primary schools with 4,655 teachers and 245,685 pupils, 48 secondary schools with 395 teachers and 4,862 pupils, 53 gymnasiums (high schools) with 956 teachers and 15,249 pupils, and 11 teachers' training colleges with 1,185 pupils. In addition to these there are 25 special training schools of higher grade giving commercial, technical, art and music courses, with a total of 3,720 pupils, and 87 special schools of lower grade with 4,088 pupils. The University of Vytautas the Great, at Kovno, which was opened on February 16, 1922, has (1932) 285 professors and teachers and 4,475 students. The academy of agriculture has 45 professors, etc., and 246 students.

Finance.—Revenue and expenditure for 5 years are shown as follows —

	1928	1929	1930	1931	1932 ¹
	Litas	Litas	Litas	Litas	Litas
Revenue	310,820,780	338,541,200	347,694,100	340,085,700	282,196,889
Expenditure	280,481,207	269,059,800	320,620,700	335,289,800	282,196,389

¹ Estimates.

During 1931 the largest expenditures were incurred by the following Ministries. Communication, 72 million litas, Agriculture, 64 million litas,

and Defence, 55 million litas. The largest source of revenue was derived from indirect taxes (especially customs), which amounted to 96 million litas, from government enterprises (railways, postal service, telephone, telegraph), and indirect taxes (alcohol, playing cards and match monopolies), to the sum of 68 million litas.

On September 1, 1932, the national debt of Lithuania was 140,380,001 litas (14,038,000 dollars). Of this sum 2,459,236 litas (245,923 dollars) were for internal indebtedness, and 137,920,765 litas (13,792,076 dollars) foreign obligations. The larger foreign creditors were the United States, 6,386,227 dollars, Great Britain, 120,209 dollars, and the Swedish Match Syndicate, 4,129,032 dollars.

Defence.—Military service is compulsory, beginning at the age of 21. Service in the active army is for $1\frac{1}{2}$ years. The establishment of the active army in 1932 was 1,587 officers and 18,668 men, organized in 3 divisions: cavalry brigade, technical and air forces. There is in addition an auxiliary force of about 52,000 men.

Production.—Lithuania is an agricultural country, and preponderantly rural in character. Of the total population, 76.7 per cent is engaged in agriculture, 10 per cent in commerce, industry and communications. The resources of the country consist of timber and agricultural produce. Of the total area, 49.6 per cent is arable land, 25.3 per cent meadow and pasture land, 15.9 per cent forests, and 9.2 per cent unproductive lands. In 1931 in the agricultural territory of Lithuania, 5,565,800 hectares (about 13,747,526 acres), there was produced (in metric tons) rye, 413,571, wheat, 226,974, barley, 236,114, oats, 407,364, potatoes, 1,961,964, flax fibre, 25,487.

Lithuania is made up of small and middle-sized farms. Approximately half of the available agricultural area is made up of farms from 5 to 23 hectares. The dividing up of the land into smaller holdings has promoted a lively development of livestock raising, dairying and agricultural co-operative societies.

In 1931 the country possessed 597,050 horses, 1,297,376 cattle, 1,221,450 sheep, and 1,568,543 pigs. Poultry farming is also an important occupation.

Forests cover 1,029,404 hectares (about 2,542,627 acres). 70 per cent of the forests consist of needle bearing trees, mostly pines, and the remainder of leaf-bearing trees. In 1930, about 90,000 tons of peat were produced.

In 1931 there were 1,132 industrial establishments (with not less than 5 working persons) with 25,221 working persons. The values of the production of principal commodities in 1931 were: meat and fish, 60,057,000 litas, manufactured timber, 21,380,000 litas, tissues and yarns, 20,420,000 litas, machines and metallic wares, 14,898,000 litas, leather, 14,601,000 litas, flour, 28,914,000 litas.

Commerce.—Trade for five years —

	1927	1928	1929	1930	1931
	Litas	Litas	Litas	Litas	Litas
Imports	265,094,000	291,091,400	806,422,400	812,418,200	277,959,100
Exports	245,929,300	256,881,800	829,841,900	818,788,900	278,119,100

In 1931, meat exports amounted to 81,160,000 litas, butter, 47,200,000 litas; cellulose, 21,100,000 litas; pigs, 19,300,000 litas. Other items of

export were timber, flax and eggs. In 1931 46 per cent of the exports were to Germany, 33 per cent. to Great Britain and 5 per cent to Latvia.

The principal items of import in 1931 were: cotton goods, 25,400,000 litas, woollen goods, 15,800,000 litas, coal, 11,500,000 litas, sugar, 9,800,000 litas, yarns, fertilizer, iron machinery and cement. Of the total imports 47 per cent came from Germany, 7 per cent from Great Britain, 7 per cent from Czechoslovakia and 3 per cent from the United States.

Total trade between Lithuania and the United Kingdom for five years (according to Board of Trade Returns) —

	1925	1929	1930	1931	1932
Imports from Lithuania into United Kingdom	£ 357,148	£ 587,061	£ 791,015	£ 1,487,692	£ 1,896,866
Exports to Lithuania from United Kingdom	355,367	380,006	367,708	300,866	392,755
Re-exports to Lithuania from United Kingdom	22,968	14,444	30,381	5,968	16,387

Shipping—In 1931, 981 vessels of 445,500 tons entered and 982 vessels of 448,000 tons cleared the port of Memel.

Internal Communications.—On December 31, 1930, the total length of railways was 1,699 kilometers (1,050 miles), of which 1,189 kilometers (738 miles) were broad gauge lines.

There are about 15,582 kilometers (9,738 miles) of roads in the country, while of the waterways those navigable for steamboats extend to 481 kilometers (301 miles), for rafts to 2,000 kilometers (1,242 miles), total, 2,586 kilometers (1,606 miles). The river Niemen is navigable for about 270 days in the year, good for floating, 1,977 km (1,234 miles).

Banking and Currency.—By a law promulgated on August 16, 1922, a national currency, based on the gold standard, with the *Litas* as unit, was introduced to replace the Ost mark, Ost rouble, and German mark hitherto in circulation but now withdrawn. The litas contain 0.150462 grammes of pure gold, and is equivalent to a tenth of the American gold dollar. The par of exchange with the pound sterling is 48.86 litas. There are no gold coins in circulation, but a 50-litas piece weighing 8.3592 grammes 900 fine is provided for in the currency law. Silver coins in circulation are 5, 2 and 1 litas, and there are also a number of subsidiary copper-aluminium coins ranging from 50 centas to 1 centas. The Bank of Lithuania (*Lietuvos Bankas*) was established in August 1922, on joint-stock principles, 50 per cent of the shares being held by the State and the balance being available for private subscription. The Bank's capital stock is 12,000,000 litas. The Bank enjoys during twenty years the sole right of issuing bank notes. Although under the law the bank note issue calls for a gold cover of one third, yet in practice the Government has decided that the actual security must represent 100 per cent in the form either of gold or stable currencies backed by gold. On February 15, 1933, the bank-notes in circulation amounted to 92,630,000 litas, gold coin and bullion, 49,793,000 litas. The Land Bank, with a paid-up capital of 50,000,000 litas, is under the control of the Government, and grants agricultural credits to farmers and agricultural co-operative societies. Lithuania has 7 joint stock banks, the capital of which on July 1, 1932, reached 86,000,000 litas. Deposits in all credit institutions (not including government thrift institutions) on the same date amounted to 205,434,100 litas and loans and special accounts 272,880,400 litas.

The weights and measures are of the metric system.

LUXEMBURG.

Reigning Grand Duchess.—Charlotte, born January 23, 1896, was the daughter of William, Grand Duke of Luxemburg, Duke of Nassau (died February 25, 1912) and of Marie Anne, Princess of Braganza, born July 13, 1861, succeeded on the abdication of her sister *Marie Adelaide*, on January 9, 1919; married to Prince Felix of Bourbon-Parma on November 6, 1919. *Offspring* — Prince Jean, born January 5, 1921, Princess *Elisabeth*, born December 22, 1922, Princess *Marie Adelaide*, born May 21, 1924, Princess *Marie Gabrielle*, born August 2, 1925, Prince *Charles*, born August 7, 1927, and Princess *Alix*, born August 24, 1929 Sisters of the Grand Duchess — Princess *Marie-Adelaide*, born June 14, 1894, died January 24, 1924; Princess *Hilda*, born February 15, 1897; Princess *Antonette*, born October 7,

1899, Princess *Elisabeth*, born March 7, 1901, Princess *Sophie*, born February 14, 1902

The early history of Luxemburg may be divided into four periods, viz., from 963 to 1443, when the country was part of the Holy Roman Empire, from 1443 to 1506, the Burgundian period, from 1506 to 1714, the Spanish period, and from 1714 to 1795, the Austrian period. From 1795 to 1815 the Duchy was French. The Congress of Vienna made the Duchy into a Grand Duchy, and from 1815 to 1866 the Grand Duchy was included in the dissolved Germanic Confederation. By the Treaty of London, May 11, 1867, it was declared neutral territory, and its integrity and independence were guaranteed.

On September 28, 1919, a Referendum was taken in Luxemburg to decide on the political and economic future of the country. Those entitled to vote were men and women of 21 (voters on the register, 127,775, actual voters, 90,984). The voting resulted as follows —for the reigning Grand Duchess, 66,811, for the continuance of the Nassau Braganza dynasty under another Grand Duchess, 1,286, for another dynasty, 889, for a Republic, 16,885, for an economic union with France, 60,133, for an economic union with Belgium, 22,242. But France refused in favour of Belgium to consider the possibility of an economic union, and negotiations to this end between Belgium and Luxemburg were concluded on December 22, 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The Agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian currency in the Grand Duchy. It came into force on May 1, 1922.

Constitution and Government —The Constitution now in force was proclaimed on October 17, 1868, in 1919 some important changes were introduced into it, viz. the Constituent Assembly decided that the sovereign power resided in the Nation (Article 32), that all secret treaties were abolished (Article 37), that the deputies are to be elected on the basis of universal suffrage, pure and simple, by scrutiny of lists, according to the rules of proportional representation and in conformity with the principle of the smallest electoral quotient (Article 52).

The country is divided into four electoral districts: the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg and to have completed 21 years of age, to be eligible for election it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The electors may be called upon to record their votes by means of a referendum or plebiscite in all cases and under the conditions to be determined by law (Article 52). The Members of the Chamber of Deputies are elected for 6 years, half are renewed every 3 years (Article 56), they receive a salary which may not surpass 4,000 francs per annum, they are also entitled to receive a travelling allowance (Article 75).

The Chamber of Deputies consists of 54 members. The state of the parties (1931) is as follows —Catholics, 26, Radical Socialists, 5, Labour Party, 14, Radicals, 4, Independents, 5.

The head of the State takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The Constitution leaves to the sovereign the right to organise the Government, which consists of a Minister of State, who is President of the Government, and of at least three Directors General. The Cabinet, appointed July, 1926, is composed as follows —

Minister of State and President of Government.—M. Bech
Director General of Justice and Home Affairs —M. Dumont
Director-General of Public Works, Trade and Industry —M. Schmit.
Director-General of Finance and Social Welfare —M. Dupong

Besides the Government there is a Council of State. It deliberates on proposed laws and Bills on amendments that might be proposed, it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or by the Law. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president among them each year.

Area and Population.—Luxemburg has an area of 999 square miles, and a population (December 31, 1930) of 299,782. The population is Catholic, save 4,651 Protestants, 2,242 Jews, and 509 belonging to other sects. The chief town, Luxemburg, has 53,791 (1930, December 31) inhabitants. Other towns are Esch Alzette, the centre of the mining district, 29,429 inhabitants, Differdange, 17,567 inhabitants, Dudelange, 14,657 inhabitants and Pétange, 11,008 inhabitants.

In 1931 there were 6,377 births, 3,876 deaths, and 2,704 marriages.

Education—Education is compulsory for all children between the ages of 6 and 13. In 1929 the primary schools had 987 teachers (483 women), there are 25 higher elementary schools, 3 classical schools, 2 commercial and industrial colleges, 2 girls' colleges, 4 technical schools, 2 teachers' training colleges (male and female), a mining school, a college of agriculture, and an academy of music.

Finance—Revenue and expenditure (including extraordinary) for six years (in francs) —

	1927	1928	1929	1930	1931	1932 ¹
Revenue	299,193,851	365,767,891	400,716,640	440,102,254	530,000,921	391,120,507
Expenditure	286,068,968	290,400,550	362,497,779	433,032,640	479,586,709	388,248,608

¹ Estimate.

The debt on December 31, 1931, amounted to 551,827,967 francs.

The armed forces of the State number 250 men, and the police 180 men.

Production and Industry—Agriculture is carried on by about 90,000 of the population (about 32 per cent), 450,000 acres were under cultivation in 1930. The principal crops are oats and potatoes.

According to the latest census (December 1, 1931), the country possesses 16,967 horses, 98,901 head of cattle, 148,958 pigs, 7,733 sheep, and 5,046 goats.

The mining and metallurgical industries are the most important. The following table shows production and value for five years —

Year	Iron ore	Pig iron	Steel	Value of iron ore	Value of cast iron	Value of steel
	metric tons	metric tons	metric tons	francs	francs	francs
1928	7,026,882	2,770,061	2,567,084	14,841,943	1,800,602,687	1,511,750,612
1929	7,571,208	2,906,098	2,702,257	16,161,842	1,601,840,328	1,758,847,212
1930	6,008,259	2,412,918	2,269,892	15,615,796	1,200,416,048	1,411,87,148
1931	4,764,926	2,058,158	2,084,952	109,926,743	781,498,272	910,104,104
1932	—	1,958,980	1,151,606	—	—	—

The number of blast furnaces in 1931 was 46, employing 5,063 workers, the wages paid being 73,195,957 francs. There were 7 steelworks, and the

number of workers was 2,446 in 1931, who received in wages 84,403,919 francs.

Communications.—In 1930, there were 1,297 miles of State roads and 1,330 miles of local roads. In 1930 there were 337 miles of railway (246 miles normal gauge and 91 miles secondary gauge), and 787 miles of telegraph line with 1,946 miles of wire, and 452 telegraph offices. There were also 52 telephone systems with 1,426 miles of line and 30,923 miles of wire. In 1930 there were 142 post-offices through which there passed inland mail 5,707,000 letters and post cards, 24,433,000 pieces of printed matter and newspapers, foreign mail 19,189,000 pieces of mail matter.

Currency—According to a law of December 19, 1929, official currency is the Luxemburg franc containing the same weight of fine gold as the Belgian franc. Belgian banknotes are received in payment in the Grand-Duchy at par with Luxemburg notes. On January 1, 1931, there were 163,619 depositors in the State Savings Bank, with a total of 466,943,077 francs to their credit.

MEXICO.

(REPÚBLICA MEXICANA)

Constitution and Government.

Mexico's history falls into three epochs. She was annexed to the Spanish Crown by conquest in 1521, and for three centuries was governed by

Spain through 62 Viceroy, from Antonio de Mendoza (1535-1550) to Juan O'Donojú (1821-1822). From 1822 to 1911 was the second epoch, covering nearly a century of national existence and abounding in movements and events shaping the national life. After three quarters of a century marked by stormy events (*see STATESMAN'S YEAR BOOK*, 1928, p. 1099) the country settled down in 1876 to a long and quiet regime under the presidency of General Porfirio Díaz (died July 2, 1915), who ruled the country with the exception of four years (1880-4, General Manuel Gonzalez) until May 25, 1911, when he presented his resignation to Congress. Then began the third or revolutionary epoch, commencing with *coups d'état* and civil war and culminating in bold social and economic experiments. The names of the Presidents are shown in the following table —

Gen. Don Porfirio Díaz	Dec. 1, 1894—May 20, 1911 ¹
Don Francisco de la Barra (Provisional)	May 26, 1911—Nov. 1, 1911
Don Francisco Indalecio Maido	Nov. 1, 1911—Feb. 19, 1913 ¹
Don Pedro Lascurain (Provisional)	Feb. 19, 1913—Feb. 19, 1913 ¹
Gen. Don Victoriano Huerta (Provisional)	Feb. 19, 1913—July 15, 1913 ¹
Don Francisco Carbajal (Provisional)	July 15, 1914—Aug. 13, 1914 ¹
(Period of disputed succession)	
Don Venustiano Carranza ('First Chief')	Aug. 20, 1914—Nov. 24, 1914
Don Eulalio Martín Gutiérrez (Provisional)	Nov. 10, 1914—Jan. 16, 1915
Gen. Don Roque González Garza (Provisional)	Jan. 16, 1915—June 9, 1915
Don Francisco Lagos Chazaro (Provisional)	July 31, 1915—Oct. 1915
Don Venustiano Carranza (Provisional)	Oct. 1915—Mar. 11, 1917
Don Venustiano Carranza	Nov. 11, 1917—May 21, 1920 ²
Don Adolfo de la Huerta (Provisional)	May 21, 1920—Nov. 30, 1920
Gen. Don Alvaro Obregón	Dec. 1, 1920—Nov. 30, 1924
Gen. Don Plutarco Elías Calles	Dec. 1, 1924—Nov. 30, 1928
Owing to the assassination, on July 17, 1928, of General Obregón, the President-elect, a Provisional President took office	
Don Emilio Portes Gil (Provisional)	Dec. 1, 1928—Feb. 4, 1930
Don Pascual Ortiz Rubio	Feb. 5, 1930—Sept. 3, 1932 ¹
Gen. Don Abelardo Rodríguez	Sept. 4, 1932

¹ Resigned

² Assassinated

President — General Abelardo Rodríguez. Elected by the unanimous vote of Congress, September 4, 1932. Assumed office September 4, 1932, to serve until November 30, 1934.

A new Constitution, amending the Constitution of 1857, was promulgated on February 5, 1917. By its terms Mexico is declared a federative republic, divided into States, each of which has a right to manage its own local affairs, while the whole is bound together in the usual federal system. The Constitution was amended in 1929.

Congress consists of a Chamber of Deputies (185 members) and a Senate. Deputies are elected for two years by universal suffrage at the rate of one member for 100,000 inhabitants. The Senate consists of fifty-eight members, two for each State and the Federal District, returned in the same manner as the deputies. Congress sits from September 1 to December 31. During the recess there is a Permanent Committee consisting of fourteen Senators and fifteen Representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for four years. Failing the President, Congress acts as an electoral college for the election of a successor. The administration is carried on, under the direction of the President and a Council, by eight Secretaries of State (Foreign Affairs, Interior, Finance and Public Credit, War and Marine, Communications and Public Works, Agriculture and Development, Education and Industry, and Commerce and Labour), and four Departments of State (Manufacture of State Supplies, Public Accounts, Statistics, and Public Health).

LOCAL GOVERNMENT

Mexico is divided into twenty eight States, one Federal District (comprising Mexico City and 11 surrounding villages), and two Territories, occupying the peninsula of Lower California. Each State has its own constitution, government, taxes, and laws, but inter State customs duties are not permitted. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation. All the States must publish and enforce laws issued by the Federal Government. The Federal District is governed by a Chief of the Department of the Federal District appointed by the President who also appoints the Governors of the Territories.

Area and Population.

Mexico is situated between the parallels of 14°33' and 32°43' north, and 86°48' and 117°8' west, and comprises, according to Mexican estimates, 757,907 square miles, though English geographers compute it as 767,198 square miles, and German authorities as 767,290 square miles.

The population at the census of May 15, 1930, was 16,404,030, an increase of 2,069,250 or 14.4 per cent since 1921, density was 21.36 persons per square mile, census results are shown in the following table. The capitals of the States and territories are in brackets.

States and Territories	Area, in square miles	Census Population, 1930		
		Males	Females	Total
Aguaascalientes (Aguascalientes)	2,969	64,692	67,800	132,492
Baja California (La Paz)	58,338	50,716	43,753	94,469
Campeche (Campeche)	18,089	42,629	42,442	84,971
Chiapas (Tuxtla Gutierrez)	27,527	261,760	259,558	521,318
Chihuahua (Chihuahua)	90,036	246,914	244,979	491,893
Coahuila (Saltillo)	63,786	217,410	216,903	434,313
Colima (Colima)	2,272	29,417	31,428	60,845
Distrito Federal (Mexico City)	578	553,871	663,792	1,217,663
Durango (Durango)	42,272	199,678	186,129	385,807
Guanajuato (Guanajuato)	10,950	462,423	499,540	961,963
Guerrero (Chilpancingo)	25,279	218,290	324,240	637,530
Hidalgo (Pachuca)	8,637	332,776	311,898	674,674
Jalisco (Guadalajara)	33,492	597,730	641,754	1,239,484
México (Toluca)	9,280	487,397	491,116	978,512
Michoacán (Morelia)	22,621	497,599	516,421	1,014,020
Morelos (Guernavaca)	1,895	66,800	65,722	132,522
Nayarit (Tepic)	10,953	84,039	86,015	170,054
Nuevo León (Monterrey)	25,082	207,013	209,160	416,173
Oaxaca (Oaxaca)	35,689	528,011	547,841	1,070,852
Puebla (Puebla)	12,992	559,819	538,467	1,148,286
Querétaro (Querétaro)	4,493	115,275	119,111	234,386
Quintana Roo (Payo Obispo)	19,370	6,851	5,299	12,150
San Luis Potosí (San Luis Potosí)	24,004	276,113	282,903	559,106
Sinaloa (Culliacan)	27,557	190,675	194,837	385,512
Sonora (Hermosillo)	76,685	160,928	154,884	315,812
Tabasco (Villa Hermosa)	10,374	111,451	112,387	223,838
Tamaulipas (Ciudad Victoria)	30,831	178,272	170,405	348,677
Tlaxcala (Tlaxcala)	1,534	102,557	101,867	204,424
Vera Cruz (Jalapa)	27,880	685,500	691,365	1,376,865
Yucatán (Mérida)	15,989	198,540	191,250	384,790
Zacatecas (Zacatecas)	24,471	329,711	235,810	465,021
Islands	1,675	978	170	1,148
Grand Total	767,198	8,065,695	8,338,335	16,404,030

Of the population in 1930, 4,620,880 were Indian, 9,040,590 of mixed race, 2,444,466 pure white, 140,094 of unknown racial origin, and 158,000 foreigners. The language is Spanish.

The chief cities, with population at the census of 1930, are —Mexico City (capital), 960,905, Puebla, 111,791, Guadalajara, 150,000, San Luis Potosí, 73,205, Tampico, 76,000, Leon, 53,639, Monterey, 129,748, Pachuca, 40,293, Mérida, 91,139, Querétaro, 82,002, Morelia, 84,000, Oaxaca, 24,000, Aguascalientes, 48,100, Saltillo, 43,235, Durango, 32,719, Chihuahua, 43,680, Vera Cruz, 70,000, Toluca, 36,459, Jalapa, 37,623, Torreon, 65,000, Ciudad Juárez, 39,375. In 1931 Mexico City annexed several suburbs, raising its population to more than 1,000,000.

Religion, Education, and Justice.

The prevailing religion is the Roman Catholic (7 archbishops and 23 bishops), but by the Constitution of 1857, the Church was separated from the State, and the Constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property. Since 1917 the property of the Church has been held to belong to the State. In 1926 all foreign priests were expelled. Disputes between the Government and the Churches were settled in July 1929, but revived in June, 1931, culminating in the expulsion of the Papal Delegate. In 1921, there were 13,921,226 Roman Catholics, 73,951 Protestants, 22,718 of other faiths, 208,836 of unknown faith.

Primary education is free and compulsory, and, according to the Constitution of 1917, secular in all official educational establishments. Clergy are forbidden to set up primary schools. In the Federal District and in the Territories education is controlled by the National Government, elsewhere by the State authorities. The census of 1921 showed 65 per cent. of those over 10 years old to be illiterate, in the Federal District, 26.90 per cent., reduced in 1930 to 23.06 per cent. The National University at Mexico City, re-organised in 1910, had 7,273 students in 1929. The National University of the South east, established at Mérida (Yucatan) in 1922, had 1,011 students, University of Guadalajara (founded in 1792, closed 1860, and reopened in 1925), 602. Total number of students in seven universities on July 31, 1930, 9,472. Schools of all grades supported by the Federal Government, in 1930, had 663,170 pupils, State and municipal schools, 824,349 pupils. Private schools, 174,852. Total enrolment, 1,662,371. Total expenditures by the Federal Government, States and municipalities, 1928, were 52,686,053 pesos. Ranches, mills, mines and other concerns maintained 6,073 schools in 1929, for employees and their children, 14,578. Federal rural schools in 1929 had 14,578 teachers, and 670,379 pupils. There are also 58 normal schools, 60 professional schools, 76 preparatory schools, 32 fine arts schools, 13 commercial schools, and 169 technical schools, with 72,079 students and 6,192 teachers.

The judicial power consists of various Courts the magistrates of which are appointed by Congress for life. They include the Supreme Court with 16 judges, nine Circuit Courts with 3 judges, and District Courts with 44 judges. The Federal District has a Higher Court of Justice composed of 22 magistrates and 4 supernumeraries. Popular juries are part of the judicial system. The new Penal Code of January 1, 1930, abolished the death penalty, except for the Army.

Federal Finance.

The ordinary receipts and expenditure for four years (1 gold peso = 50 cents, U.S.) —

	1929 ¹	1930 ¹	1931 ¹	1932 ²
Revenue	gold pesos 288,428,600	gold pesos 270,796,883	gold pesos 298,500,000	gold pesos 213,074,225
Expenditure	288,018,392	286,289,785	209,490,480	212,987,421

¹ Estimates

² Adopted by Congress, but Ministry estimates revenues, 207,774,000 pesos, expenditure, 215,287,000 pesos.

The funded debt (in default since 1914 and allowing for payments of 75,000,000 pesos between 1923 and 1927) stood in July, 1930, at 1,185,598,808 pesos, of which the Republic owed 946,598,808 and the National Railways, guaranteed by the Government, owed about 239,000,000 pesos

Congress in January, 1932, ratified an agreement reached December 22, 1931, with the International Committee of Bankers by which 'the foreign debt totalling 274,000,000 dollars, the principal covering 15 bond issues since 1885, will be refunded by a single issue totalling 267,419,241 dollars at 5 per cent interest, which will be guaranteed by import and export duties'. Revenues from these will be deposited in the bank of Mexico which will handle the debt service. Payments will begin not later than January 1, 1934

Defence.

Every citizen is compelled to serve in the active army or in the National Guard. Supreme command is vested in the President, exercised through the Secretary for War. The active army on July 31, 1931, consisted of 50 battalions of infantry, 70 regiments of cavalry, 2 regiments of military police, 2 marine corps, 4 regiments of artillery and 3 detached companies. Infantry strength, 2,538 officers and 23,608 men, cavalry, 4,074 officers and 19,235 men, artillery, 454 officers and 1,372 men. Total strength in 1931 was 55,260 officers and other ranks. Military education is provided at a military college and in officers' training schools, and is compulsory in the colleges. To combat illiteracy in the Army, 165 regimental schools have been established. The air force on July 31, 1931, consisted of 470 men with 45 aeroplanes and 2 aerodromes.

The Navy, which is little more than a police force, consists of a coast defence vessel *El Andhuac* of 3,162 tons, purchased from Brazil in 1924, the gunboats *Bravo* and *Agua Prieta*, the armed transport *Progreso*, and some smaller vessels.

Production and Industry.

Mexico is well suited for agriculture. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue. About 3,500,000 acres have been placed under irrigation, this is equal to 45 per cent of the area occupied by the nine principal crops. Wheat, cotton, garbanzos, sugar, tomatoes and vegetables are grown principally on irrigated land. Five large irrigation projects in Nuevo Leon, Tecomachalco and Aguascalientes were completed by 1931, nine other projects are under way.

Cultivated lands, 24,000,000 acres (about 5 per cent. of the total area); available for cultivation, 78,000,000 acres, pastoral lands, 146,000,000 acres, forest lands, 48,933,200 acres. Number of farms, 1931, about 600,000. Up to June 30, 1931, public and confiscated lands, exceeding 16,000,000 acres, had been distributed to families in accordance with the agrarian laws, which makes the rural village the unit for holding land in

common Estates in excess of 2,000 acres are being broken up Principal products in 1931 were maize (1,929,502 metric tons), rice (80,000 tons), sugar (215,000 metric tons), sugar cane (4 049,000 tons in 1930), henequen (88,000 tons), wheat (420,000 tons), coffee beans (800,000 bags), chickpeas (49,795 tons), tomatoes (78,000 tons), tobacco, alfalfa The Yucatan peninsula produces about 50 per cent of the world's supply of henequen, plantations are almost wholly Mexican-owned Banana production started in 1928 in the Gulf Coast region near Tampico. The west coast grows vegetables for the United States and Canada. The cotton production, 1931, was 135,000 bales

Timber lands are estimated to extend over 25,000,000 acres and to contain pine, spruce, cedar, mahogany, logwood, and rosewood

Live stock is declining, in 1926 Cattle, 5,584,892, horses, 1,035,782, mules, 686,213, donkeys, 850,041, sheep, 2,697,688, goats, 5,423,959, and pigs, 2,902,949

The chief Mexican oil fields may be grouped in five districts, fields covered by 1,186 concessions on January 1, 1930, occupied 30,866,894 acres. Total output since first well was sunk in 1901, 1,689,040,000 barrels

Petroleum output follows In 1930, 39,529,913 barrels, in 1931, 33,038,680 barrels, in 1932, 32,400,000 barrels Of the 1930 output, 25,478,000 barrels were exported, against 33,262,066 barrels in 1928 There are 2,005 storage tanks with a total capacity of 83,806,356 barrels. Mexico has the two largest petroleum refineries in the world, with capacities of 113,220 and 140,000 barrels respectively Domestic consumption is increasing rapidly.

Mining is the principal industry in Mexico, but practically 97 per cent. of the 31,000 mining properties are foreign-owned Of the annual output, measured in pesos, probably less than 10 per cent is Mexican-owned Concessions operated in 1928 numbered 17,355 Nearly all the mines yield silver, output is about 40 per cent of world production.

Coal is produced only in the State of Coahuila (about 1,000,000 tons per annum) Opals are mined in Querétaro

The following table shows the quantities of mineral products for three years —

Metals	1929	1930	1931
	Kilos	Kilos	Kilos
Gold	20,274	20,808	19,378
Silver	3 880,999	3 272,288	2,676,966
Copper	86 491,280	78,411,608	54,212,000
Lead	248,500,815	332,930 825	226,780,000
Zinc	174,030,172	124,083,519	120,289,000
Antimony	2,709,865	3,032,211	5,443,000
Mercury	82,636	166,241	251,400
Arsenic	9,664,587	9,976,791	6,508 000
Amorphous graphite	5,720,743	5,852,507	8,122,000

The industrial census of 1929 showed 44,216 manufacturing establishments with capital of 971,135,633 pesos, number of employees, 307,581, raw material used, domestic, 260,088,154, foreign, 68,426,749 pesos, value of output, 890,394,188 pesos Food products led in importance, with 14,911 establishments, employing 108,315 persons, with a capital of 239,276,007 pesos, consuming raw materials worth 141,055,123 pesos There were 236 tobacco factories, 145 cotton textile factories, 26 woollen mills, and 79 small iron and steel works, producing for local consumption about 50,000 tons annually There are 588 electric power plants, with combined capacity of 630,000 horse power.

Commerce.

The trade of Mexico for 5 years is shown as follows (1 gold peso = 50 cents, U S.) —

	1928	1929	1930	1931	1932
	Gold pesos	Gold pesos	Gold pesos	Gold pesos	Gold pesos
Imports	857,762,358	982,247,637	850,173,416	216,585,416	180,307,895
Exports	594,444,048	590,658,603	458,674,489	399,711,314	304,190,000

In 1930 mineral exports totalled 323,206,002 pesos, or 70 per cent of the total

The principal articles of commerce between the United Kingdom and Mexico for 1931 (according to Board of Trade Returns) were as follows — Imports from Mexico petroleum spirit, 543,923 $\frac{1}{2}$, fuel oil, 520,721 $\frac{1}{2}$; lamp oil, 279,123 $\frac{1}{2}$, lubricating oil, 211,649 $\frac{1}{2}$ Exports to Mexico cotton goods, 236,831 $\frac{1}{2}$, sodium compounds, 39,020 $\frac{1}{2}$, machinery, 172,390 $\frac{1}{2}$, iron and steel, 152,879 $\frac{1}{2}$

Total trade between Mexico and the United Kingdom for 5 years (according to Board of Trade Returns) —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Mexico to U Kingdom	2,369,188	2,689,866	2,856,360	2,397,008	2,180,510
Exports to Mexico from U Kingdom	2,800,486	2,587,652	2,433,312	943,004	1,088,648
Re exports to Mexico from U Kingdom	54,067	39,302	29,803	35,346	18,776

Shipping and Communications.

The most important ports are Vera Cruz and Tampico, both on the Gulf of Mexico In 1930, 20,316 vessels entered at all the ports, and 20,869 vessels cleared A system of subsidies to encourage the national merchant marine was established in 1930

In 1909 the main railway lines of Mexico were united in a Government corporation —The National Railways of Mexico—which owned (1931) 14,680 miles There were also 3,139 miles operated by the various States Road-building is being pushed in order to invite tourist traffic, especially on the new highway (770 miles) between Mexico City and Laredo, on the American border Total mileage, of uneven character, is 62,137 miles, of which 380 miles are surfaced. Motor cars, 1930, 84,791

On December 31, 1930, the Federal telegraph and telephone system had 727 offices and 23,441 miles of line Systems belonging to individual States and private companies had 1,119 offices and 14,554 miles of line Number of telephone instruments, 57,563 Mexican Telephone and Telegraph Corporation operates about 50 per cent of all telephones in the country, and serves Mexico City and the central section of the republic Mexico City has telephone connections with London and the Continent. There are about 3,003 post offices

There is a State mail, express, and passenger airplane service between Mexico City and Tampico and Tuxpan, as well as over other routes Airplane service to South and Central America was established in 1930 Passengers carried (1930), 20,920 ; mail, 74 metric tons There were two large companies operating, 1931, against five in 1930

Banking and Credit

On January 1, 1931, the 38 banks of the Republic (mostly national) had total capital of 203,053,000 pesos and reserves of 25,198,000 pesos

On September 1, 1925, the Bank of Mexico was established with an authorised capital of 100,000,000 gold pesos, of which 67,770 852 pesos were paid up by December 31, 1930. It succeeded a number of former banks of issue now being slowly liquidated, and under Article 28 of the Constitution it has the sole right to issue notes. It has 26 branches scattered over the country, but discontinued commercial banking in April, 1932, becoming solely a central reserve and issue bank, with capital reduced to 50,000,000 pesos, wholly paid. The Government holds 51 per cent of the capital stock. The Bank is now closely modelled on the Federal Reserve system, with large powers to 'manage' the currency. On January 1, 1931, current deposits were 45,450,985 pesos, assets included 8,038,868 pesos in gold, 10,011,074 in silver and 3,552,230 in foreign banks. The Bank's note circulation was negligible, 1,218,250 pesos on that date. The Monetary Law of July 1931, however, authorizes it to issue notes to double the amount of its gold and foreign currency reserves. Notes may be accepted voluntarily but are not legal tender. Ex president Calles of Mexico became President of the Bank in July, 1931.

Money, Weights, and Measures.

By a decree of April 29, 1925, the monetary unit was the gold peso or dollar, the legal value of which was fixed at 75 grammes of pure gold. At par it equalled 24 58*d.* or 50 cents (U.S.). But the excessive premium (30 to 40 per cent) commanded by the gold peso in 1930 and 1931 led to a decree on July 26, 1931, setting up the silver peso as the monetary unit at a fixed value of 75 grammes of gold. Further minting of gold coins was suspended and restrictions upon export removed. The silver coins are in denominations of 1 peso, 50, 20 and 10 centavos, with a fineness of 720, except the 2-peso, which is 900 fine. Silver pesos are legal tender for all debts and contracts, banks may repay gold deposits up to 30 per cent in gold, the balance in silver. Control of the issue of silver pesos is now lodged with the Bank of Mexico. Exchange value of the silver peso in New York, 1932, ranged between 39 88 cents and 25 80 cents, U.S., in London between 20 70 and 8 25 to the £. The bronze coins are in denominations of 20, 10, 5, 2 and 1 centavos. There are 5 centavo nickel coins.

The weights and measures of the metric system were introduced in 1884 and their use is enjoined by law of June 19, 1895, though the old Spanish measures are still in use.

Diplomatic and Consular Representatives.

1 OF MEXICO IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary — Alberto Mascareñas.

Second Secretary — Dr Esteban Manzanares del Campo.

Military Attaché — José Rendón y Ponce.

Commercial Attaché — Eduardo Flores.

Consul-General (London) — A. Lúders De Negri.

There are Mexican consulates at Liverpool, Glasgow, Hull, Newcastle-on-Tyne, Cardiff and Birmingham.

2. OF GREAT BRITAIN IN MEXICO

Envoy and Minister — Edmund St. J. Monson. (Appointed Dec 11, 1929.)

Second Secretary — H. L. Farquhar, M.C.

Naval Attaché—Captain Patrick MacNamara, R N
Military Attaché—Lt Col M F Day, M C
Consul-General—T I Rees

MONACO.

Prince Louis II, born July 12, 1870, succeeded his father, Prince Albert, June 26, 1922

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorgny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I, who also succeeded Antony I as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Roccabruna revolted, and declared themselves free towns, in 1861 Charles III ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

On January 5, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. On December 26, 1930, the Prince by decree dissolved the elected bodies of the Principality and suspended some of the constitutional guarantees.

The territory of the Principality is divided into three communes—Monaco Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women do not vote.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 42 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is 149 hectares, or 370 acres. Population (census January 9, 1928), 24,927. Towns Monaco, 2,085, La Condamine, 11,787, Monte Carlo, 11,055.

There has been since 1887 a Roman Catholic bishop. A semi military police force has taken the place of the 'guard of honour' and troops formerly maintained. The value of the commerce of the Principality is not stated. The revenue is mainly derived from the gaming tables. The annual grant for the concession was 80,000*l* in 1917, 90,000*l* in 1927, and in 1937 it will be 100,000*l*.

Consul-General for Monaco in London — Mr Charles Nuthall Foreman.

British Consul — W J Keogh, O B E (residing at Nice)

British Vice Consul — M L Ainslie (residing at Monte Carlo)

MOROCCO.

(MOGHREB-EL-AKSA, i e The Farthest West)

Reigning Sultan

THE introduction of Islam into Morocco about the end of the 7th century was followed by an exceedingly confused period, to the latter part of which belongs the great Arab influx of the 11th century known as the Hilalian invasion. This period witnessed the rise and fall of various Arab and Berber dynasties, notably the Idrissids, under whom Fez was founded or refounded early in the 9th century, and the Almoravids, the first of whom, Youssef Ben Tashfin, founded Marrakesh in 1062, and later extended his power over the north of Morocco and into Spain. His dynasty was followed by the Almohads (12th and 13th centuries), and the Merinids (13th to 16th centuries), whose decline led up to the establishment of the Sherifian dynasties, the Saadians (16th and 17th centuries) and the Alaouis. The latter claim descent from Ali, the son-in-law of the Prophet, through the Filali Sherifs of Tafilalet. The present Sultan is the 18th of this dynasty.

Sidi Mohammed, third son of Moulay Youssef (reigned 1912-1927), was proclaimed Sultan on November 18, 1927, on the death of his father.

Government

The Empire of Morocco is in principle an absolute monarchy, in which the Sultan exercises supreme civil and religious authority, the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. The majority of his subjects are Sunni Moslems of the Malekite school, the teachings of which formerly constituted the common law of Morocco. The country is now, however, divided into three Zones, in each of which a different system of government prevails as the outcome of the Protectorate Treaty concluded between France and the Sultan at Fez on March 30, 1912, the subsequent Convention between France and Spain of November 27, 1912, and the

Convention between Great Britain, France and Spain of December 18, 1923 (modified July 25, 1928), providing for a special Statute in the Tangier Zone.

The Sultan resides in the French Zone, usually at Rabat, but occasionally in one of the other traditional capitals, Fez, Marrakesh, and Meknes. His government, known as the Makhzen, consists of the Grand Vizier, the Vizier of Justice, the Vizier of 'Habous' or Pious Foundations, the Grand Vizier's Delegate for Public Instruction and the Presidents of the Sherifian High Court and the Religious Court of Appeal. All effective authority is exercised by the Protecting Power, which is represented by a Resident General. The latter is Minister of Foreign Affairs to the Sultan and head of an elaborate French administration which has its headquarters at Rabat and which is divided into departments for Finance, Economic Affairs, Public Instruction, etc. The French have created a large body of modern law in the form of Imperial Edicts or 'Dahirs' issued by the Sultan but promulgated and made executory by the Resident General, and decrees of minor importance, all of which similarly require French approval. Local administration is in the hands of native Pashas or Caids and French Controllers. The French civil administration has been made independent of military authority in the coastal regions and the Oudjda district adjoining Algeria. In other districts it is still subordinate to military authority. In the less settled districts in the south east of the Zone the French control is less direct than elsewhere, although the system of governing through the 'Grand Caids' or tribal overlords is on the decline.

In the Spanish Zone the Sultan's powers are entirely delegated to a Khalifa, whom he chooses from a list of two candidates presented by the Spanish Government, and whose administration is controlled by a Spanish High Commissioner resident at Tetuan. Spanish authority in the Zone was consolidated by successful military operations terminating in the spring of 1927. Spain also has treaty rights in a narrow coastal strip at Ifni as well as in an area extending south from the river Dra and some distance inland from the coast about Cape Juby. She has never established herself effectively in the Ifni enclave. The connection of the area south of the Dra with the rest of Morocco is tenuous and it merges into the Spanish Rio de Oro further south.

The 1923 Tangier Statute came into force on June 1, 1925, but did not receive the adhesion of all the Powers signatory of the Act of Algeciras of April 7, 1906. It was modified by a Protocol signed at Paris on July 25, 1928, to which Italy, one of the previously non-adhering Powers, was a party. The Zone is permanently neutralised and demilitarised. The regime is one of autonomy, and legislative power is vested in an international Assembly of 27 members, but the parties to the Statute agreed on certain regulations and fiscal enactments which were not to be modified for two years, as well as on a special code of law. A Committee of Control, composed of the Consuls of the Powers signatory of the Act of Algeciras, is invested with a right of veto and certain other powers. The administration of the Zone is entrusted to an administrator, with assistant administrators for finance, health, etc., and justice. These officials are at present (March 1933) French, British, Spanish, and Italian respectively. The Sultan is represented by a Mendoub, who is ex officio President of the Assembly and who deals more particularly with native affairs.

French Resident General — M. Lucien Saint (appointed January 2, 1929)

Spanish High Commissioner — Luciano Lopez Ferrer (June 20, 1931).

Khalifa for Spanish Zone — Sidi Muley Hassan Ben el Mehedi.

Mendoub of Tangier — Si Mehemed Et Tazi

Administrator of Tangier Zone — M. Le Fur.

Area and Population.

The French Zone comprises the whole of Morocco (except the Ifni enclave and the Cape Juby area) from the Atlantic to the Algerian frontier, and from the confines of the Sahara to the boundary of the Spanish Zone as agreed to in 1912. The Franco-Spanish boundary has not been fully delimited. It follows a generally eastern direction from a point on the Atlantic about 16 miles south of Larache to the river Moulouya, which completes the boundary to the Mediterranean. The Spanish Zone comprises the area between this line and the sea, with the exception of the small territory around Tangier which is included in the international zone. The southern and eastern boundaries of Morocco being largely indeterminate, no exact estimate can be made of the total area, but it may be estimated as follows —

French Zone	approximately	200,000 square miles
Spanish Zone	"	13,125 " "
Tangier Zone	"	225 " "
Total	.	213,350

The native population consists mainly of Islamised Berbers and Arabs dating from the great invasions of the Middle Ages. These elements have to some extent intermixed with each other and with negro stocks. There is a large native Jewish population, mostly in the towns. Since 1912 the European element has greatly increased, especially owing to the influx of French into the towns of the French Zone and of a fair number of agricultural settlers, also mostly French. A census of the French Zone taken in March, 1931, puts the population at about 4,230,000 native Moslems, 120,000 native Jews and 150,000 foreigners, total 5,000,000. That of the Spanish Zone may be put at something under 1,000,000 (about 38,000 Europeans and 11,000 Jews), and that of the Tangier Zone at about 51,000 (35,000 native Moslems, 11,000 Europeans and 5,000 native Jews).

The following table shows the estimated population of the principal towns of the French Zone on the results of an urban census in 1931 —

	Europeans	Natives	Total
<i>French Zone —</i>			
Casablanca	55,986	100,127	161,113
Fes	9,638	98,205	107,843
Kenitra	5,946	13,251	19,197
Marrakesh	8,025	183,557	193,582
Mazagan	1,902	17,699	19,601
Meknes	12,559	44,211	56,770
Mogador	889	13,584	14,473
Oudjda	14,126	15,054	29,180
Ouezzan	1,168	14,706	15,874
Rabat	20,802	32,304	53,106
Safi	1,640	24,598	26,238
Salé	1,289	24,642	25,931
Taza	3,111	9,296	12,407

The principal towns in the *Spanish Zone* are Alcazar (population in 1926, 12,750), Arzila (3,100), Larache (15,500), Tetuan (38,000).

There are important British colonies at Casablanca (about 1,000), and Tangier (about 500). Spaniards form an important element in the European population of the coast towns.

The principal languages are Moorish, Arabic, and numerous Berber dialects. The use of French for official and business purposes is very widespread, except in the Spanish Zone, where Spanish is chiefly used.

In the Tangier Zone, French, Spanish and Arabic are recognised as the official languages.

Education.

The bulk of the native population is illiterate. There are numerous Koranic schools imparting a very elementary education, and a number of higher schools attached to mosques. The most notable is the Karoween University at Fez, which is highly reputed in the Islamic world. In the French Zone education on European lines is given in the French schools, and schools provided by the Protectorate for Moslem natives. There were in 1930 for European boys and girls 140 primary public schools and 28 primary private schools, and a total of 25,576 primary pupils, 3 primary technical schools with 227 pupils, 3 secondary schools with 624 pupils in all, including an industrial and commercial school at Casablanca. The system is correlated with the French system, and pupils can take their baccalauréat in the French zone. The Institut des Hautes Études Marocaines at Rabat had 1,017 students in 1930, and has a faculty of French law. The boys' and girls' high schools at Rabat have sections for training teachers. For Moslems there were in the French zone, in 1930, 87 primary schools attended by 9,776 boys and girls, 6 schools attended by 1,027 sons of notables, 15 technical schools with 500 boy pupils, 2 Moslem colleges with 400 students at Rabat and Fez. The Italian Government maintains schools at Rabat and Casablanca. Jewish education has made great progress since 1912 under the joint auspices of the Protectorate and the Alliance Israélite. There were in 1930, 40 Franco Jewish schools with 10,151 pupils and 3 schools for domestic economy. Research work is done at the Institut Scientifique Chénien at Rabat.

There are State schools in the chief towns of the Spanish Zone, also certain Hispano-Arabic schools for education of natives. The Alliance Israélite has schools in Tetuan and Larache, and a native school of Arts and Industries exists in Tetuan, and a carpet weaving school at Sheshuan.

In the Tangier Zone the education of native Moslems is mainly confined to the elementary Koranic schools. The Government of the French Protectorate and the Spanish Government, however, maintain several primary and elementary schools for natives, and there are French technical schools for boys and girls. There are several primary and secondary schools for Jews maintained by the Jewish community but connected with the Alliance Israélite. The French Protectorate and Spanish Governments also maintain a number of primary and secondary schools for European boys and girls, to some of which natives are admitted, and there is an Italian school with primary and secondary classes for Europeans as well as natives.

Justice.

French Zone—Native justice is administered by religious courts and in a large range of criminal and civil cases by the Pashas and Caid. Under the Protectorate two Courts of Appeal corresponding to these jurisdictions have been set up at Rabat. French Courts modelled on those in France were created in 1913, and deal with cases brought by or against French and other foreigners, except cases against British and United States citizens, who retain capitulatory rights and are justiciable in their own Consular courts. The French Courts are the Court of Appeal at Rabat, Courts of First Instance at Rabat, Casablanca, Oudjda, Marrakesh and Fez, and twelve *tribunaux de paix*. They administer specially drawn-up codes, which *inter alia* provide for the application of the national law in matters affecting the personal status of foreigners. Rabbinical Courts deal with matters affecting the personal status of Jews.

Spanish Zone—Native and Jewish justice is similar to that in the French Zone, except that all criminal cases are tried in the Spanish Courts. These consist of Audiencia, or Supreme Court, Court of First Instance, and Tribunaux de Paix. As in the French Zone, British subjects and American citizens are justiciable in their own Consular Courts.

Tangier Zone—Native justice is administered as in the French Zone, the Moudoub having a jurisdiction similar to that of Pashas and Caid. The Statute provides for a Mixed Tribunal which deals with all cases involving foreigners, except the subjects of the U S A which have not adhered to the Convention and still claim capitulatory rights.

Finance.

Revenue and Expenditure of the French Zone for five years (ordinary budget) —

—	1929	1930 ¹	1931-32 ²	1932 ²	1933 ¹
	Francs	Francs	Francs	Francs	Francs
Revenue	688,120,970	802,571,620	921,725,410	734,467,100	842,205,000
Expenditure	688,092,827	802,288,294	921,811,722	734,145,790	916,000,455

¹ Estimates.

² April-December

The chief items of the budgets for the past two financial years are as follows:—

Revenue			Expenditure		
	Year ending March 31, 1932	Year ending Dec 31, 1932 (9 months)		Year ending March 31, 1932	Year ending Dec 31, 1932 (9 months)
	Francs	Francs		Francs	Francs
<i>Ordinary receipts —</i>			<i>Ordinary expenditure —</i>		
Direct taxes (tertib, etc.)	166,028,000	168,396,000	Debt charges	215,777,545	191,949,410
Indirect taxes (consums, etc.)	214,500,000	149,050,000	Expenditure other than debt charges	705,534,177	552,196,890
Consumption duties and other indirect taxes.	220,190,000	191,800,000			
Monopolies (P T T, etc.)	184,495,100	110,896,350			
Various receipts	186,612,310	108,324,750			
	—	—	Total of ordinary expenditure	921,811,722	734,145,790
Total of ordinary receipts	921,725,410	734,467,100	<i>Extraordinary Expenditure —</i>		
<i>Extraordinary receipts —</i>			Expenditure chargeable to proceeds of loans	200,056,700	546,015,000
Proceeds of loans	200,056,700	546,015,000	Expenses chargeable to reserve fund	186,173,000	93,202,660
Reserve fund and various receipts.	186,173,000	44,872,100			
Other receipts	—	48,380,600			
	—	—			
Grand total of receipts	1,257,955,110	1,873,684,760	Grand total of expenditure	1,257,541,422	1,373,363,450

The Moroccan debt consists of French loans (1904, 1910, 1914, 1918, and 1920). The 1904 loan amounted to 62,500,000 francs and bears interest at 5 per cent. The 1910 loan was for 101,124,000 francs and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 170,250,000 francs. By a law dated March 25, 1916, the 1914 loan was increased to 242,000,000 francs. The first issue of 70,250,000 in July, 1914, was at 4 per cent, and the second issue 171,750,000 in March, 1918, was at 5 per cent. By the law of August 19, 1920, a further loan, also guaranteed by the Government, was authorised for 744,140,000 francs. Of this amount 300 million francs had been issued by 1923 after which no further issue was made. Provision was made in 1928 for a new loan of 819,822 000 francs in which was to be merged the balance of the 1920 loan not already earmarked for expenditure. A first issue of Fr 325,000 000 at $4\frac{1}{2}$ per cent (price of issue Fr 925 for Fr 1,000) was made in May 1929. The second issue of Fr 425,000,000 at 4 per cent, price Fr 977 50, followed in July 1930. Until recent years the finance of the French Zone has been facilitated by the accumulation of a considerable reserve fund, the ordinary budget having yielded large surpluses. In the last two years it has been necessary to increase taxation and to use the reserve fund and loans in order to balance the budget.

The budget of the Spanish Zone for 1932 balanced at 51,841,200 pesetas by the help of a subvention from the Spanish Treasury of 26,600,000 pesetas.

The principal revenue of the Tangier Zone is from Customs and Consumption duties. The net revenue for 1931 amounted to 21 880,000 francs and the expenditure to 21,879,000. The budget for 1932 provides for a revenue of 22,460,000 francs and an expenditure of 22,447,000.

Defence

The Sherifian army as such no longer exists, except for the Black Guard or Sultan's bodyguard. The military forces in the French Zone are made up of drafts (consisting largely of African troops) from the French Metropolitan and Colonial armies, a portion of the Foreign Legion and native levies of various kinds. Following on the termination of the Rif war a Presidential decree of October 3, 1926, placed the army under the control of the Resident General for all purposes except actual operations, and directed that the regular land forces should be organised in three divisions and two mixed brigades. The French budget for 1931-32 provided for 2,650 officers and 58,614 N C O's and men of the regular army to be employed in Morocco, as well as the following irregulars—8 auxiliary native officers, 228 French non-commissioned officers, 140 French brigadiers, 12,122 native rank and file. The composition of the Spanish forces in the Spanish Zone in 1932 numbered 49,000 all ranks. The Tangier Zone is demilitarised. The 1923 Statute as revised in 1928 provided ultimately for a native gendarmerie of 250 men, under a Spanish commanding officer and a French second-in-command. In July 1932, the strength of the force was 150.

Production and Industry

French Zone—Agriculture is by far the most important industry. The total agricultural area is estimated at about 23,800,000 acres, not including forests. Forest land is estimated at about 3,700,000 acres, of which one third lies within the agricultural area. The principal crops are cereals, especially wheat and barley, beans, chickpeas, fenugreek and other legumens; canary-seed, cummin and coriander, linseed, olives; vines

and other fruits, especially almonds. The approximate yield of the principal crops in 1931 was as follows in metric quintals (220 4 lbs) —barley, 12 762,445 (3,220,912 acres), wheat, 7,559,431 (2,476,325 acres), beans, 258,334 (102,811 acres), oats, 240,905 (60,169 acres), maize, 1,352,798 (863,581 acres), chickpeas, 180,143 (107,662 acres), linseed, 236,651 (88,680 acres). Endeavours are being made to stimulate the production of other crops *eg* cotton. Market gardening for export has become important in the neighbourhood of Casablanca. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal*. The trees grown include cork, cedar, arar, argan, oak, and various conifers. In 1930 there were 5,264,758 olive trees, 318,919 orange and lemon trees, 508,453 palm trees (dates), 1,805,955 almond trees, 5,060,756 fig and other trees. Tizra wood is exported for tanning purposes. Gums are produced in considerable quantities. Stock-raising is an important industry. The estimate of the animals in the Zone in 1930 was —cattle (bovine), 2,092,002 sheep, 7,795,936, goats, 3,356,694, pigs, 59,083, horses, 686,139, mules, 99,504, asses, 576,413; camels, 129,528.

The bulk of the land is held by natives, who cling to primitive methods. There are now, however, a fair number of European settlers. The number of exploitations was estimated at the end of 1929 at 2 595, representing 1,729,756 acres. Work was started in 1927 on a considerable programme of irrigation works, which is to include barrages in the rivers Beth, Moulouya, Mellah, Nebs, Oum er-Rebia, Derna, Tessaout and El-Akhdar.

The principal mineral exploited is phosphate, the output of which (under a State monopoly) has grown rapidly from 8,232 tons in 1921 to 885,720 tons in 1926, 1,779,008 tons in 1930, 900,731 tons in 1931, and 987,317 tons in 1932. Lead ore and manganese are produced in exportable quantities principally in Eastern Morocco. Prospecting for other minerals including gold, silver, iron, tin, copper, antimony, zinc, petroleum and coal is active in many parts of the zone. The output has hitherto been small. The Protectorate has recently embarked on a policy of stimulating mining enterprise by State participation.

The coasts abound in fish. The chief fishing centres are near Casablanca and at Fedhala, which possesses an important preserving industry.

The scheme for providing a central supply of electrical energy for practically the whole zone by harnessing the water power of the Oum-Er-Rebia is expected shortly to yield 18,000 h.p. and to supply all the coast towns and Mariakush. A large barrage on the Oued Beth, near Meknes, is to supply further power for electrification schemes. At present there is a large power station at Casablanca and local supplies exist in various other towns.

A number of miscellaneous industries designed partly to supply local requirements of goods previously imported have grown up in recent years. Among them are flour mills, breweries, soap and candle factories, cement factories, etc., etc. The total number of European industrial establishments in 1930 was estimated at 1,000, employing 35,000 persons.

Spanish Zone —Agriculture is potentially important, but is carried on by natives in primitive fashion. Principal crops harvested by the natives under the colonisation plan in 1930 were, in metric tons: wheat, 26,200; barley, 41,800; straw, 137,600; aldora, 18,000; beans, 6,000; olives, 5,600; maize, 4,600; flax, 4,400; chickpeas, 1,100; rye, 900; peas, 700; and sorghum, 600. The 1930 livestock census showed there were 636,000 goats, 545,000 sheep, 252,000 cattle, 62,000 mules and asses, 17,500 horses, 5,000 swine, and 1,000 camels. European colonisation is at present almost entirely confined to the towns, but is spreading from the new Rifian town-

ship of Villa Sanjarjo into the fertile Guis valley, which was once Abdel Kerim's headquarters. Iron ore is mined and exported from the Melilla district. The Jebala and Ghomara areas are reputed to be rich in mineral wealth, but the disturbed state of the country has in the past prevented any systematic exploitation. Prospecting is now being undertaken in these areas. Fishing, largely tunny, is an important industry. No other considerable industries exist.

Tanger Zone — The agricultural output, consisting principally of wheat, barley and chickpea, is insufficient for the needs of the population. The most important single industry is the manufacture by a Régie of cigarettes for the whole of Morocco. This employs 700 persons. There are also fisheries and preserving factories and a certain amount of market gardening for local requirements.

Commerce

French Zone — Imports and exports for five years were —

	1927	1928	1929	1930	1931
	Francs	Francs	Francs	Francs	Francs
Imports	1,798,597,755	1,999,545,102	2,547,430,115	2,208,473,548	2,083,292,004

¹ Provisional

Spanish Zone—The principal imports are wines, textiles, tea, sugar, candles. Supplies for military purposes form a large proportion of the total. The principal exports are eggs, live-stock, iron ore and agricultural products. Imports in 1929 totalled 131,141,613 kilos, valued at 91,687,021 pesetas, and exports, 1,267,726,166 kilos, valued at 24,100,813 pesetas.

Tangier Zone—Imports and exports for five years —

	1927	1928	1929	1930	1931
	Francs	Francs	Francs	Francs	Francs
Imports	129,445,005	128,625,802	134,408,452	115,509,688	93,229,030
Exports	33,543,30	57,782,253	28,586,911	16,818,497	22,370,775

The principal imports are flour, sugar, candles, cottons and other fabrics, coffee, tea, tobacco, soap, oils, cereals and wines. The principal exports are skins, eggs and tinned fish.

Total trade between Morocco and the United Kingdom for 5 years (Board of Trade Returns) —

	1928	1929	1930	1931	1932

Re-exports to Morocco from U K	86,815	109,092	130,910	63,803	48,323

Shipping and Communications

In 1931, 3,740 vessels of 4,761,705 tons entered and 3,734 of 4,747,179 tons cleared the ports of the French zone. Of those entering 1,547 vessels of 2,567,111 tons and of those clearing, 1,550 of 2,558,813 tons were French. Of the total 2,050 vessels of 3,352,472 tons entered and 2,055 of 3,316,430 tons cleared the port Casablanca.

Casablanca possesses a fully equipped port, and Port Lyautey (Kenitra) a smaller up river one. Modern ports are under construction at Rabat and Tangier. Fedhala can accommodate vessels up to 4,000 tons which supply important oil storage stations. Mazagan and Mogador have lighter ports and another is under construction at Saffi. Agadir was opened to commerce on January 1, 1930, and a port is projected.

The ports in the Spanish Zone are relatively unimportant, the bulk of the

trade being done through Tangier, Ceuta and French Zone ports. In 1930, 1,426 vessels of 1,666,062 tons entered the port of Tangier. Of these 828 (244,488 tons) were Spanish, 241 (531,081 tons) French, and 124 (346,873 tons) British.

Normal gauge (1 44) railways connect — Fez Petitjean (112 km), Petitjean-Arbaoua (88 km), Petitjean Rabat (123 km), Rabat Casablanca (89 km), Casablanca Marrakesh (133 km), with a branch from Ber Rchid to Kourigha for phosphates, Oudjda-Taza (238 km). The first two form part of the Tangier Fez railway, which was completed and opened to traffic in July 1927, and the total length of which is 314 km. The narrow-gauge (60 cm) railway has a total length of 1,210 km of main line and 187 km of sidings, and connects — Oudjda-Taza-Fez (401 km), Guercif Midelt (288 km), Bir Tamtam-Ahermoumou (40 km), Kenitra-Ouezzan (157 km), Rabat Khemisset (94 km), Ain Defah Fes El Bahi (65 km), El Tleta Meshra El Hader (54 km), Boïskoïra Caid Tounsi-Mazagan (227 km). In 1929, 397,725 metric tons of freight and 529,997 passengers were carried.

The existing railways in the Spanish Zone are Ceuta Tetuan (41 km), Nador Tistutin (36 km), and Larache-Alcazar (40 km), besides the portion of the Tangier Fez railway which crosses the zone.

On December 31, 1931, there were 2,235 miles of main roads and 1,264 miles of secondary roads in the French Zone, about 1,242 miles of road are tarred. The Spanish Zone has about 350 miles of good roads suitable for traffic. The roads in the Tangier Zone have been considerably improved since the coming into force of the Statute. There are now about 65 miles of urban and rural roads.

There are a daily aeroplane service between Toulouse and Casablanca via Tangier and Rabat, and a weekly service between Casablanca and Dakar.

A Sherifian postal service under French management exists in the French and Tangier zones. European mails are conveyed by steamer services from Marseilles and Bordeaux, overland through Spain, and by daily steamers between Algeiras and Tangier and increasingly by air from Toulouse. The Sherifian service in 1930 received 34,017,017 letters, 1,782,405 registered letters, also (1929) 699,784 parcels, and 8,181,464 printed papers and samples, and despatched 32,595,820 letters, 2,132,199 registered letters, 53,518 parcels and 4,291,783 printed papers and samples. The Spanish authorities maintain the ordinary postal service in the Spanish Zone. Spain retains a post-office in Tangier, and Great Britain maintains the only foreign postal service still existing in Morocco as a whole, with offices at Rabat, Casablanca, Mazagan, Saffi, Mogador, Marrakesh, Fez, Tetuan, Larache, and head office at Tangier.

The total length of telegraph lines open to the public in the French Zone on December 31, 1931, was 2,347 miles, length of wire 3,119 miles. In 1931, 1,258,760 telegrams were received and 1,144,917 despatched, exclusive of 167,821 received and 129,972 despatched free of charge (official, etc). All important centres in the Spanish Zone are connected by land lines. Communication between Morocco and Europe is maintained by cables between Casablanca and Brest, Tangier Oran Marseilles, Tangier-Gibraltar, Tangier-Cadiz, Larache-Cadiz via Algeiras. The French Protectorate administration maintains wireless stations at various places in the French Zone and also at Tangier.

Telephone systems exist in all the principal towns of the French Zone and there is a complete inter-urban connection. In 1929 there were in the Zone 8,764 subscribers and 11,084,102 messages sent. Urban services exist in the principal towns of the Spanish Zone and at Tangier. An inter zonal system is being studied. Ceuta is now connected with the European system.

Currency, Weights, and Measures.

Since the withdrawal of the Hassani currency in 1920 the *franc* has been the sole currency in the French Zone. Measures were taken later to protect the note issue of the Moroccan State Bank from the competition of Algerian and French notes, and steps were taken at the end of 1924 to make those measures really effective. The Moroccan franc (State Bank notes of all denominations from frs 5 upwards) was in 1928 placed on the same gold basis as the French franc. It is also proposed to mint silver coins of frs 10 and frs 20 for use in the hinterland, where paper money is still not very popular.

On December 31, 1930, the value of State bank notes in circulation was 581,421,495 francs as compared with 603,833,395 francs at the end of 1929.

Spanish currency circulates in the Spanish Zone together with the old Hassani silver currency. The latter has undergone many vicissitudes since it was the legal currency (concurrently under the Act of Algeiras of 1906 with Spanish money) for the whole of Morocco. It is now relatively stable at an exchange of Pesetas Hassani 50 to the £ stg.

Moroccan francs and Spanish money are legal tender in the Tangier Zone. The *Peseta Hassani* continues to circulate freely.

The metric system of weights and measures became in 1923 the sole legal system in the French Zone.

The principal native measures still in current use are:—

Weight —1 Kantar = 100 Rotls. 1 Rotl = 16 ookeyas. The Rotl varies widely round about 2 lbs. *Capacity* —The *mudd*, which varies by locality. *Length* —1 Kama = 50 inches. 1 Dra = 20 inches. 1 Kala = 22 inches.

Diplomatic and Consular Representatives of Great Britain in Morocco

Under the Tangier Convention of December 18, 1923, the diplomatic agencies maintained by the signatory Powers were suppressed.

Consul-General at Tangier —Ernest Frederick Gye

Consul-General at Rabat —W. S. Edmunds, C M G , O B E

Consul at Tetuan —R. E. W. Chaly

Consul at Casablanca —F. H. W. Stonehewer Bird, O B E

There are also *Vice Consuls* at Casablanca, Mazagan, Saffi, Mogador, Marrakesh, Fez and Larache.

NEPÁL.

AN independent kingdom in the Himálayas, between $26^{\circ} 25'$ and $30^{\circ} 17' N.$ at, and between $80^{\circ} 6'$ and $88^{\circ} 14'$ of E long, its greatest length 500 miles; its greatest breadth about 150, bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Majesty Mahárajadhirája Tribhubana Bir Bikram Jung Bahádur Shah Bahádur Shumshere Jung, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The Prince Royal and Heir apparent was born on June 11, 1920. The government of Nepal is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárajadhirája Surendra Bikram Shah under pressure of the Bharadars or nobles of the State in 1867. The present Prime Minister is General Joodha Shum Shere Jung Bahádur Raná, Hon. K. C. I. E. (born April, 1875), who was appointed on September 1, 1932. The office of Prime Minister is always held by a member of his family, the succession being determined by special rules.

The Gurkhas, a Rajpút race originally from Udaipur in Rajputana, who had settled in the province of Gorkha in Nepal, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. A commercial treaty between India and Nepal was signed in 1792, and a British Resident was sent to reside at Kathmándu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war, and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Sagauli signed in December 1815. Since then the relations of the British with Nepal have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves to pay an annual sum of Rs 10,000 to Nepal, to encourage trade between the two countries and that the Nepalese Representative at Lhasa should be of high rank. Besides, trade agents are maintained at Gyantse, Kuti, Kerrong, and other trade marts in Tibet.

In accordance with the treaty of Sagauli, which amongst other things provides that accredited ministers of each shall reside at the Court of the other, a British Envoy, with a small escort of Indian sepoy's lives at the capital, but he does not interfere in the internal affairs of the State.

A fresh treaty was signed on December 21, 1923. By it all previous treaties, agreements and engagements since and including the Treaty of Sagauli were confirmed, and the British and Nepalese Governments acknowledged one another's independence, internal and external.

Area and Population.—Area about 54,000 square miles, population estimated at about 5,600,000. The estimated gross revenue is 15,000,000 rupees. The races of Nepal, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurungs, and Bhotias. The Newars, who came from Southern India, live in the valley or adjacent to it.

Capital, Kathmándu, 75 miles from the Indian frontier, population about 80,000, and of the surrounding valley 300,000.

Religion.—Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants.

Defence.—The Army consists of about 45,000 men, mainly infantry, of whom about 20,000 are regulars. The armament comprises about 15,000 magazine 303 rifles, 25,000 Martini Henry rifles, 110 machine or Lewis guns, 30 modern, 12 fairly modern and about 240 old-fashioned guns.

Trade.—The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods. Nepal possesses very valuable forests in the southern part of the country.

Slavery was entirely abolished in the country by the Maharaja in 1924-6.

A telephone connects the capital with Birganj near the southern frontier. In February, 1927, the first railway into Nepál (metre gauge), from Raxaul on the Bengal & North-Western Railway to Amlekhganj, a distance of 25 miles, was opened. A ropeway was opened at about the same time for the carriage of goods over the last 14 miles of the road from Raxaul into the Kathmandu valley. A topographical survey of the country by Indian personnel of the Government of India was completed in 1927.

The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepál.

British Envoy at the Court of Nepál, Kathmandu—Lt Col C T Daukes, C I E

NETHERLANDS (THE).

(KONINKRIJK DER NEDERLANDEN)

Reigning Sovereign.

Wilhelmina Helena Pauline Maria, born August 31, 1880, daughter of the late King Willem III, and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck, succeeded to the throne on the death of her father, November 23, 1890, came of age August 31, 1898, and was crowned September 6 of that year, married to Prince Henry of Mecklenburg Schwerin, February 7, 1901. Offspring Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France, and a third matrimonial union, that of Prince Willem III of Orange with a daughter of King James II, led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the name of 'stadhouders,' or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV, but his successor, Willem V, had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the United Provinces were freed from French domination. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress of Vienna to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadhouder, Willem V, as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at The Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to his son Willem II, who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 1,200,000 guilders. There is also a large revenue from domains, and in addition an allowance of 100,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

Government and Constitution.**I. CENTRAL GOVERNMENT.**

The first Constitution of the Netherlands after its reconstruction as a Sovereign State was promulgated in 1814, and was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the

Sovereign of the title of King), in 1840 (after the secession of the Belgian provinces), in 1848, 1884, 1887, 1917, and 1922. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture; in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s 8d) a day during the Session of the States General. The Second Chamber of the States General numbers 100 deputies, who are elected directly. Members are allowed 5,000 florins (420l) annually, with travelling expenses. Members of the States General must be Dutch subjects, men or women, and recognised as such.

First chamber (elected July 26, 1929) 16 Catholics, 6 Anti Revolutionists, 7 Protestant Party, 6 Liberty Union, 4 Democrats and 11 Social Democrats.

Second chamber (elected July 3, 1929) Catholics, 30, Social Democrats, 24, Anti Revolutionists, 12, Christian Historicals, 11, Liberty Union, 8, Democrats, 7, other parties, 8.

The Electoral Reform Act, passed December 12, 1917, provides for universal suffrage and proportional representation. The Members of the Second Chamber are, according to the Electoral Reform Act, directly elected by citizens of both sexes who are Dutch subjects not under 25 years. Criminals, lunatics, and certain others are excluded, for certain crimes and misdemeanours there may be temporary exclusion. The electoral body numbered April 1, 1931, 3,957,530 voters, i.e. 98.0 per cent of the number of citizens of 25 years and older.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 6 years, and every 3 years one half retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new Bills, the functions of the Upper Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a Bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The Ministry, appointed August 10, 1929, is composed as follows —

President of the Council of Ministers, Minister of Foreign Affairs and Minister of the Interior and of Agriculture—Jonkheer Dr Ch J M Ruys de Beerenbrouck.

Minister of Finance—Jonkheer Dr D. J. de Geer

Minister of Justice—Dr J. Donner

Minister of the Colonies—S. de Graaf

Minister of Defence—Dr L. N. Deckers

Minister of Public Works (Waterstaat)—Dr P. J. Reymer

Minister of Labour and Economic Affairs—Dr T. J. Verschuur

Minister of Instruction, Science, and Arts—Dr J. Terpstra

Each of the above Ministers has an annual salary of 16,000 guilders, or 1,332l. The Minister of Foreign Affairs enjoys besides 10,000 guilders for representation

There is a State Council—'Raad van State'—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters

II LOCAL GOVERNMENT

The territory is divided into 11 provinces and 1,076 communes (January 1, 1933). Each province has its own representative body, 'the Provincial States'. The members are elected for 4 years, directly from among the Dutch inhabitants of the province who are 25 years of age. Except that they must be inhabitants of the province, the electors are the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drenthe 4) of their members called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

Each of the communes forms a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for four years directly, by the same voters as for the Provincial States, provided they inhabit the commune. All the Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing bye-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law, besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All bye-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power

is vested in a college formed by the Mayor and 2—6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council, he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Area and Population.

I. PROGRESS AND PRESENT CONDITION

Population at various census periods —

1829	2,618,487	18-9	4,511,415	1920	6,865,314
1869	3,579,529	1909	5,858,175	1980	7,935,565

Area (excluding water) and the population, according to the results of the Census of December 31, 1930, and the estimated population on December 31, 1931 —

Provinces	Area English square miles (Dec 31, 1930)	Population		
		Dec. 31, 1930	Dec 31 1931	Per sq mile (Dec 31, 1930)
North Brabant	1,921	898,386	908,681	467.8
Guelders	1,941	829,293	848,233	427.2
South Holland	1,180	1,957,578	1,989,946	1,732.6
North Holland	1,359	1,501,587	1,587,580	1,425.7
Zealand	690	247,606	247,938	358.9
Utrecht	526	406,960	415,545	778.4
Friesland	1,251	299,659	402,241	319.5
Overysel	1,801	520,788	528,477	400.8
Groningen	886	392,436	393,423	442.7
Drente	1,029	222,432	225,591	216.2
Limburg	846	550,840	566,016	650.9
Total	12,579	7,985,565	8,061,571	680.9

Of the total on December 31, 1930, 3,942,676 were males and 3,992,889 females.

The area, including the interior waters, amounted in 1930 to 13,203 square miles, whilst the total area, including gulfs and bays, amounted in 1930 to 15,771 square miles.

On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the Zuiderzee to the extent of 523,000 acres. The work, which was commenced in 1924, is expected to take 15 years, and the total outlay for the first stage is calculated at 66,250,000 florins.

Urban and rural populations were as follows. —

Year	Population of the principal Towns ¹	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889	1,699,012	37.66	2,812,408	62.34
" " 1899	2,178,931	43.69	2,925,048	57.31
" " 1909	2,614,908	44.64	3,243,046	55.36
" " 1920	3,206,055	46.70	3,659,091	53.30
" " 1930	3,865,535	48.71	4,070,030	51.29

¹ The towns with a population of more than 20,000 inhabitants at the census of 1930.

II MOVEMENT OF THE POPULATION

Years	Total Births Registered as Living	Illegiti- mate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
1928	179,028	3,326	78,816	59,128	105,212	4,617
1929	177,216	3,181	83,224	61,472	93,992	4,490
1930	182,310	3,245	71,682	62,911	110,628	4,600
1931	177,387	3,071	77,048	59,436	100,339	4,540

The emigration has been as follows, mostly to North America 1928, 2,804, 1929, 2,970, 1930, 2,756, 1931, 365, 1932, 158

The total number of emigrants, Dutch and foreigners, who sailed from Dutch ports was, in 1928, 18,586, in 1929, 17,151, in 1930, 11,196, in 1931, 2,959, and in 1932, 1,940

III PRINCIPAL TOWNS

Population on January 1, 1932 —

Amsterdam	766,263	Enschede	51,343	Lonneker	33,156
Rotterdam	587,316	Delft	51,286	Ede	31,294
The Hague	449,614	Leeuwarden	48,901	Heider	31,112
Utrecht	156,194	Heerlen	48,865	Gouda	29,832
Haarlem	122,886	Breda	45,464	Alkmaar	28,751
Groningen	107,158	Hertogenbosch	43,090	Vlaardingen	28,194
Eindhoven	93,234	Velsen	42,553	Haarlemmermeer	27,472
Nijmegen	84,034	Emmen	42,003	Helmond	25,837
Tilburg	80,890	Zwolle	41,043	Bussum	25,718
Arnhem	79,329	Amersfoort	39,705	Zeist	25,337
Leiden	71,598	Kerkrade	37,521	Rheden	25,189
Maastricht	61,768	Deventer	36,930	Venlo	25,052
Apeldoorn	62,044	Hengelo	34,737	Roosendaal	23,863
Hilversum	59,632	Zaandam	33,772	Bergen op Zoom	22,167
Dordrecht	57,059	Almelo	31,084	Flushing	21,755
Schiedam	56,490				

Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and a great part of the inhabitants belong to the Reformed Church. The State Budget (1933) contains allowances for the different churches: for Protestant Churches, about 1,721,000 guilders; for Roman Catholics, about 705,000, for Jansenists, about 17,500, and for Jews, about 16,200.

The number of adherents of the different Churches in the various provinces according to the census of 1920 was: Dutch Reformed Church, 2,826,633; Other Protestants, 832,164, Catholics, 2,444,583, Jansenists, 10,461, Jews, 115,223, and other creeds or those of none, 685,240; unknown, 1,010.

The government of the Reformed Church is Presbyterian. At the end of 1930 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,424 parishes. Their clergy numbered 1,676. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,352 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had 144 communities.

Education

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction was made obligatory by the Act of 1900; the school age is from 7-13.

By a modification of the Act of 1887 public instruction is diminished and a greater share in education is left to private instruction, if approved as efficient by the State, in which case it is paid for out of public funds. The cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for 25 per cent of the costs of founding or purchasing schools.

Secondary Education is given in the larger communities in public or private schools. Private schools may be endowed by the State, private professional schools also by the province and the community. Higher education is given at Universities, in high schools, and grammar schools, either public or private. Private institutions may be endowed by the State. Tuition in Kindergartens has not been regulated by law.

The following table is taken from the Government returns for 1931-32 —

Institutions	Number	Teaching Staff	Pupils or Students	
			Total	Female
Universities (public) ¹	4	493 ⁴	8,920	1,982
Technical University	1	91 ⁴	1,863	86
Agricultural University	1	50 ⁴	499	16
Private Universities	2	65 ⁴	956	95
High Schools of Commerce ²	2	50 ⁴	487	27
Classical schools	56	1,041 ⁴	8,046	2,460
Schools for the working people ³	618	4,972	114,060	55,432
Navigation schools ³	12	164	1,243	—
Middle class schools	280	4,042 ⁴	53,796	16,880
Elementary Schools				
Public	3,510	15,781	470,712	223,212

Infant Schools ⁴				
Public	288	1,269	39,043	18,577
Private	1,562	4,105	139,644	68,640

¹ Leiden (founded 1575) Utrecht (1636) Groningen (1614), Amsterdam (1632). In 1918 the Veterinary School at Utrecht and the Agricultural School at Wageningen were created Universities.

² One at Rotterdam and the other at Tilburg (Roman Catholic High School of Commerce, founded October 8, 1927).

³ Figures for the year 1928-29.

⁴ Figures for the year 1930-31.

Besides the schools named in the table, there is a great number of special schools, mostly technical. Since 1908 there is also a Government school to train officials of the colonial service for superior posts.

Expenditure for education in guilders in 1928 — by the State, 117,867,000, by the Provinces, 200,000, by the Municipalities, 56,867,000.

Of the conscripts called out in 1931, 0.12 per cent could neither read nor write, the percentage being highest in Drenthe, 0.64. Of the persons married in 1918, 0.22 per cent of the males and 0.41 per cent of the females could not sign the marriage certificate. Of the convicts in 1911, 4 per cent could neither read nor write. Of the total number of children from 7 to 13 years (school age) on January 1, 1922, 4.29 per cent received no elementary instruction.

Justice and Crime.

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 21 district tribunals, and by 101 cantonal courts, trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge, the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of

3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

Juvenile courts were called into existence in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless imprisonment of six months or more ought to be inflicted, in which case the judge of the juvenile court acts as judge-examiner.

The number of persons convicted was —

Year	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1929	165,190	14,761	17,644	1,975
1930	178,160	13,639	18,322	1,961
1931	1 0 544	12 118	19,022	1,978

The number of inmates in the prisons during the years 1929, 1930, and 1931 was respectively, 6,055, 5,977, and 6,078 males, and 232, 195, and 231 females, in the houses of detention, 12,646, 14,109, and 15,528 males, and 553, 401, and 518 females. There are also 4 State-work establishments, the numbers of inmates of these establishments were respectively in the years 1929, 1930, and 1931, 2,556, 2,577, and 2,603 males, and 19, 15, and 14 females.

In 1901 an Act was passed reforming State reformatories for the education of juvenile criminals and establishing disciplinary schools for juvenile criminals. The number of inmates during the years 1929, 1930, and 1931 in the State reformatories was 667, 650, and 768 boys, 100, 117, and 110 girls, in the disciplinary schools 366, 432, and 517 boys, 82, 91, and 97 girls.

There are both State and municipal police. The State police consists of field constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (*maréchaussée*) numbers about 22 officers and 1,150 men. There are about 1,339 field-constables—appointed and paid by the Government—divided into numerous brigades. Besides each commune has its own field constables or police force.

Pauperism and Social Insurance.

The statistics of the poor relief in the Netherlands have been reorganised and now cover all forms of relief. The following data for the year 1930 relate exclusively to what may be called normal poor relief (not including relief of any kind to the unemployed).

Kind of relief	Number of Persons	Net cost (guilders)
Outdoor relief (heads of families) .	129,930	26,025,367
„ „ (other persons) .	45,637	
„ „ (gifts)	107,835	
Casuals	88,955	76,511
Refuges to homeless persons	74,407	
Boarding out in families	13,147	2 263,968
„ „ homes, etc.	22,232	4 060,850
		0 0 2

Kind of relief	Number of Persons	Net cost (guilders)
Nursing in hospitals	160,884	20,114,099
Lunatics and idiots . . .	24,368	14,747,947
Homes for the aged, children, etc	33,911	12,472,582
Alms-houses	13,007	1,465,585
Workshops and workhouses . . .	4,832	955,562
Total (1930) including other data		96,895,797

On September 19, 1916, a Government scheme for unemployment insurance was set up in Holland

Finance.

The revenue and expenditure in five years (ordinary and extraordinary) were, in thousands of guilders.—

	1929	1930	1931 ¹	1932 ¹	1933 ¹
Revenue	1,000 guilders 751,897	1,000 guilders 704,990	1,000 guilders 695,996	1,000 guilders 819,927	1,000 guilders 540,227
Expenditure	810,462	720,618	842,085	1,000,571	642,233

¹ Estimates.

Budget estimates for the years 1932 and 1933 were as follows —

Branches of expenditure (Ordinary service)	1932	1933	Sources of Revenue (Taxes only)	1932	1933
	1,000 Guilders	1,000 Guilders		1,000 Guilders	1,000 Guilders
Civil list	1,850	1,850	Land tax	10,467	9,316
Legislative body and Royal cabinet . . .	2,018	1,966	Tax on dividends . . .	20,000	14,010
Department of Foreign Affairs . . .	4,136	3,799	Tax on incomes	89,900	60,000
Department of Justice	29,104	27,157	Tax on capital	27,700	25,600
Department of Interior	32,791	33,804	Tax on successions . . .	45,000	36,000
Department of Instruction, etc . . .	166,483	159,617	Import duties	63,700	102,200
Department of Finance	62,628	60,997	Excise duties	169,620	168,980
Department of Defence	96,068	88,669	Tax on gold & silver . . .	900	800
Department of Public Works, etc . . .	52,940	68,127	Tax on Bicycles	7,000	7,000
Department of Economic Affairs and Labour . . .	60,952	44,868	Tax on motor cars, etc.	12,000	12,000
Department of Colonies	6,159	5,965	Stamp duty	26,140	18,300
Public Debt	75,903	81,687	Registration duty	15,000	10,000
Unforeseen expenditure	50	50	Total	487,327	459,346
Total expenditure	5,8078	572,857	Of which for the—		
			General budget	4,9015	387,842
			Loan Fund	59,812	52,504
			Road Fund	19,000	19,000

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a

separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1933 are distributed between the colonies and the mother country in the following proportions —

	Guilders		Guilders
Expenditure in the colonies	464,583,766	Revenues in the mother country	26,301,820
Home Government expenditure	195,227,846	Revenues in the colonies	534,847,079
Total expenditure	<u>659,811,612</u>	Total revenue	<u>561,148,899</u>

In the Budget for 1932 and 1933 the national debt is given as follows in thousands of guilders —

	Jan 1, 1932	Jan. 1, 1933
Funded Debt ¹ —		
2½ per cent. debt	524,078	522,091
3 " " "	417,118	394,526
3½ " " "	89,805	39,383
4 " " "	417,080	408,004
4½ " " "	36,028	45,006
4½ " " "	585,830	559,390
5 " " "	80,073	446,578
6 " " "	299,472	—
Total	<u>2,348,499</u>	<u>2,470,838</u>
Interest, 1932 and 1933	66,916	94,029
Redemption, 1932 and 1933 (ordinary and extraordinary)	366,211	63,942
Floating Debt —		
Assets, January 1, 1932 and 1933	326,916	426,841
Liabilities	528,553	616,850
Interest, 1932 and 1933	12,201	9,547

¹ Including the amounts and the interest and redemption of the Loan fund loans

² Estimates.

Defence.

I FRONTIER

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly, the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplated the concentration of the defensive forces in a restricted area, known as the 'Holland Fortress'. This comprises the provinces of North and South Holland, with parts of Zealand and Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side, except the position of Amsterdam, have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but a plan has been adopted to augment them by entirely new works at Flushing.

II. ARMY.

According to an Act of 1922, service in the army is partly voluntary and partly compulsory, the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, every other resident in the Netherlands, is liable to personal service in the army (or navy) from the age of 19 up to 40. The maximum strength of the annual contingent is fixed at 19,500 (including 1,000 for the sea service). The average effective strength of the home army in 1932 was 1,428 officers and 18,184 other ranks. Budget for Army and Navy, 1933, 88,569,145 florins.

The first training lasts for (a) 5½ months at the longest for men not belonging to the mounted corps, with the exception of those under (b) and (c), (b) 9 months at the longest for men not belonging to the mounted corps who after enlistment are being trained as subalterns, (c) 12 months at the longest for men not belonging to the mounted corps who after enlistment are being trained as officers, for infirm men, for conscripts of the air service, and for men of the mounted artillery troops, (d) 15 months at the longest for the cavalry, (e) 8 months at the longest for the navy. The time for further training is at the lowest 40 days for all conscripts, with the exception of infirm men and air service men, who are exempted.

The Dutch garrison of the East Indies is organised in 2 divisions with a strength, in 1932, of 1,130 officers and 39,083 other ranks.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, is armed with a shielded Q F Krupp gun of 7.5 cm.

III. NAVY

The Navy is maintained for a double purpose—viz the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine. The majority of the vessels recently added to the Navy are intended mainly for the defence of the Dutch East Indies.

Following is a list of the principal ships of the Royal Netherlands Navy

Name	Displacement, Tons	Armour water line	Max Armour on guns	Principal Armament	Torpedo Tubes	Indicated Horse-power	Nominal Speed Knots	Laid down
COAST DEFENCE SHIPS								
		Inches	inches					
Jacob van Heemskerck	4,445	6	7½	29.4-in, 6.6-in	—	6,400	17	'05
Hertog Hendrik	4,560	6	9½	19.4-in, 4.6 in	—	6,300	17	'00
Tromp	4,871	6	7½	29.4-in, 4.6-in	—	6,400	17	'03
Zeven Provinciën	5,644	6	9½	21.1-in, 4.6-in	—	8,500	16	'08
CRUISERS								
Java	6,070	8	shields	10.6-in, 4.2-in A.A	—	65,000	31	'16
Sumatra								

There are also 2 armoured gunboats; 2 sloops, 8 destroyers of 1,316 tons; 6 seagoing torpedo boats; 25 submarines; 2 submarine depot ships and 13 mine layers. The construction of a new cruiser of 6,000 tons for service in the East Indies was begun in 1932. Five submarines are also under con-

struction The *Zeven Provinciën* and the cruisers *Java* and *Sumatra* are assigned to the East Indies Fleet, as are the destroyers, 3 older torpedo-boats, 12 of the submarines, and many of the other vessels mentioned.

Production and Industry.

I AGRICULTURE

The surface of the Netherlands was divided in 1931 as follows (in hectares 1 hectare=2.47 acres) —Uncultivated land heath, 369,590, water and morass, 129,015; dykes and roads, 66,830, untaxed land, 84,866, building land, houses, &c., 67,619 Total, 717,420 Cultivated land arable land, 868,345, pasture, 1,922,042, gardens and orchards, 115,694, forest, 254,402 Total, 2,560,483

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland, small estates in North Brabant, Guelders, Limburg, and Overijssel

The areas under the principal crops, in hectares, were as follows —

Products	1929	1930	1931	Products	1929	1930	1931
	hectrs	hectrs	hectrs		hectrs	hectrs	hectrs
Winter wheat	38,089	52,184	57,635	Beans	7,363	8,700	9,563
Summer wheat	7,346	5,334	20,145	Brown mustard seed	233	301	457
Winter rye	197,846	192,374	180,052	White mustard seed	1,618	1,173	2,350
Summer rye				Caraway seed	3,988	5,976	7,487
Winter barley	5,053	10,189	8,496	Flax	19,184	15,002	6,550
Summer barley	26,419	20,545	20,233	Tobacco	70	99	75
Oats	160,829	160,722	149,209	Potatoes	182,220	160,712	164,116
Buckwheat	722	490	489	Sugar beets	55,002	57,544	87,477
Horse beans	10,982	9,113	11,452	Chicory	642	613	542
Pears	43,869	40,366	42,776	Onions	5,151	4,476	3,948

The yield of the more important products for 3 years was as follows —

Crop	Produce			Crop	Produce		
	1929	1930	1931		1929	1930	1931
	hectolitres	hectolitres	hectolitres		Tons	Tons	Tons
Wheat	1,957,755	2,168,604	2,417,439	Sugar beet.	2,060,393	2,187,652	1,020,183
Barley	1,715,146	1,848,782	1,180,866	Flax	94,038	63,499	27,101
Oats	8,193,612	6,454,142	6,242,789				
Rye	6,547,060	6,327,848	6,068,343				

According to the live-stock census of May-June, 1930, Holland possessed 299,152 horses, 2,366,066 cattle, 484,937 sheep, and 2,017,781 pigs

II. MINING AND MANUFACTURES.

A few coal-mines are found in the province of Limburg, some of them belong to the State The quantity of coal extracted in 1931 was 12,901,391 metric tons and in 1932, 12,756,447 metric tons In 1931 the private mines produced 5,653,763 tons, and the State mines, 7,247,628 tons. There is one salt mine at Boekelo, production 1929, 44,914 tons; 1930, 49,807 tons, 1931, 56,414 tons.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1930 280 distilleries, 10 sugar refineries, 7 beet-sugar factories, 11 salt works, 148 breweries, and 2,919 tobacco factories.

III FISHERIES.

In 1931, 4,895 vessels of all kinds were engaged in the fisheries. The produce of the herring fishery in the North Sea was valued at 9,706,798 guilders in 1931, the weight of the catch of herring was 85,208 tons. The quantity of oysters produced in 1931 amounted to 2,034,490 kilos.

Commerce.

The following are the returns of the imports (exclusive of gold and silver coins and bullion) for home consumption and the export of home produce for six years (in thousands of guilders) —

Year	Imports	Exports	Year	Imports	Exports
1927	2,548,856	1,809,711	1930	2,418,255	1,718,880
1928	2,683,904	1,986,185	1931	1,892,783	1,311,814
1929	2,752,298	1,989,481	1932	1,299,466	846,135

The values of the leading articles of import and export in the last two years were (in thousands of guilders) —

	Imports		Exports	
	1931	1932	1931	1932
Iron and steel of all kinds	123,662	74,772	81,108	19,848
Textiles, raw and manufactured	259,194	189,024	180,142	69,104
Cereals and flour	171,150	142,232	12,865	7,432
Coal	107,077	68,978	89,214	60,893
Rice and flour thereof	22,012	9,745	16,804	9,801
Mineral oil	58,066	42,455	1,914	1,677
Coffee	27,781	26,561	5,246	8,244
Butter	8,883	3,268	40,955	18,025
Margarine (raw and eatable)	1,485	800	25,766	5,592
Sugar	8,543	8,784	4,061	8,085
Cheese	501	838	52,037	25,926
Gold and silver	608,066	647,786	114,988	355,259
Wood	87,891	45,518	5,582	2,436
Skins	21,871	12,660	12,144	8,158
Copper	11,255	6,116	1,709	1,158
Paper	89,227	28,381	29,204	26,500
Soot, grease, tallow, suet	12,828	5,854	11,954	6,002
Zinc	3,192	1,816	8,033	2,895
Tobacco (unmanufactured)	34,196	25,640	1,858	1,012
Tin	1,417	1,155	8,851	3,701
Colours (painters' wares)	13,815	10,270	14,908	9,678
Seeds (colza, linseed, &c)	47,233	36,904	11,878	8,698
Manures (all sorts)	84,289	23,861	81,516	31,066

Value of the trade (excluding gold and silver coins and bullion) with the leading countries for two years in thousands of guilders. —

Imports	1931	1932	Exports	1931	1932
Germany	619,567	399,788	Germany	261,663	176,572
Great Britain	159,927	117,654	Great Britain	317,979	159,984
Belgium and Luxemburg	197,507	135,022	Belgium and Luxemburg	174,081	118,008
United States	143,123	85,720	United States	84,152	32,308
Dutch East Indies	71,861	59,633	Dutch East Indies	59,029	46,867
France	76,391	54,998	France	115,908	85,697

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were —

Imports into U K from Netherlands	1930	1931	Exports of produce and manuf of U K to Netherlands	1930	1931
	£	£		£	£
Flax	111,017	33,545	Cottons	1,033,043	705,158
Fish	348,432	345,436	Cotton yarn	1,678 7-8	992,121
Cheese	673,741	578 934	Coal	2,082,175	1,553,242
Butter	659,401	598,849	Iron and Steel	1,426 536	1 034 378
Margarine	2,323,505	1,836,890	Machinery	1,958 437	1,258,412
Paper, Strawboard	1,913,191	1,374,892	Clothing	317,485	316,903
Sugar	160,523	78,398	Woollens	709,831	603,192
Eggs	2,634,118	2 270 312	Motor cars & motor cycles	396,491	400 062
Condensed milk	2,591,628	2,717,833	Chemicals	302,755	189,225

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Netherlands to U K	42,944	42 372	39,523	35 198	22,090
Exports to Netherlands from U K	21 802	21 118	18,860	13,701	12,167
Re exports to Netherlands from U K	4,843	5,212	4,149	2,998	2,378

Shipping and Navigation.

The number of vessels in the mercantile navy at the end of 1931 was — Sailing vessels 25, of 13,479 cubic metres, steamers, etc., 901, of 4,138,578 cubic metres.

The following table gives the number and capacity of vessels which entered and cleared the ports of the Netherlands. —

Year	Entered					
	With Cargoes		In Ballast		Total	
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
1928	19,541	81 973 000	5,069	13,581,000	24,610	95,554 000
1929	19,608	82,647,000	3,464	9,105 000	23,072	91,752,000
1930	19,009	81,438,000	3,466	7,766,000	22,475	89,204,000
1931	17,087	71,558,000	4,010	8,725,000	21,097	80,283,000
Year	Cleared.					
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
	No.	Cubic Metres	No.	Cubic Metres	No.	Cubic Metres
1928	18,189	68,567,000	6,701	20,745,000	24,890	89,312,000
1929	16,144	61,931,000	6,914	20 049,000	23,058	81,980,000
1930	16,330	61,702,000	5,953	26,645 000	22,283	88 407,000
1931	16 728	58,483,000	4,448	23,407,000	21,176	78,596,000

Of the total number in 1931, 6,319 Dutch vessels entered with a capacity of 19,975,075 cubic metres, and 14,478 foreign vessels with a capacity of 60,307,880 cubic metres; 6,203 Dutch vessels cleared, with a capacity of 18,657,318 cubic metres, and 14,973 foreign vessels with a capacity of 60,238,218 cubic metres.

The vessels with cargoes which entered at the chief ports were as follows —

Port	Entered					
	1930			1931		
	Number	Cubic Metres	per cent.	Number	Cubic Metres	per cent.

Internal Communications.

I CANALS AND RAILWAYS.

The total extent of rivers and navigable canals is about 4,660 miles, of roads about 3,000 miles.

In 1929 the total length of the principal tramway lines was 1,916 miles, 362,845,000 passengers were carried, and 3,279,407,000 kilogrammes of goods. Their revenue amounted to 47,229,000 guilders.

In 1931 the 2 principal railways had a length of 2,278 miles. The breadth of the railway gauge is 1.50 metres, or 4 ft 11 in. In 1931 56,174,000 passengers were carried on the railways. The total revenue was 160,861,000 guilders. All railway companies are private, there is a State railway company, only so named because the road is owned by the State. A project is on foot for bringing the railway companies under one control.

II POST AND TELEGRAPHS

The postal traffic was as follows in 2 years —

—	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1930					
Internal	240,235,000	105,398,735	560,151,000	8,130,452	211,467
Foreign	87,343,000	19,205,250	61,815,000	2,027,434	208,903
1931					
Internal	246,367,000	98,507,513	579,049,000	7,172,376	218,580
Foreign	85,757,000	15,690,179	48,706,000	1,817,903	209,889

The receipts of the Post Office in 1931 were 50,057,000 guilders, the expenditure in 1931, 48,911,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Jan. 1, 1932, was 848 miles, the length of wires on Jan. 1, 1932, 12,380 miles. The number of State offices was, on Jan. 1, 1932, 2,036. The number of paid messages by State

and private lines in 1931 was 6,520,800. The receipts of the State amounted in the same year to 12,099,000 guilders, and the ordinary expenses in 1931 to 13,864,000 guilders.

In 1921 the interurban and international telephone system had 2,512 miles of line and on December 31, 1931, 317,816 miles of wire, and is administered by the State, 27,813,945 interurban and 2,314,251 international conversations were held in 1931. The receipts were in the same year for interurban and international intercourse 17,143,000 guilders, and the total expenses 13,179,000 guilders.

II AIR TRAFFIC

There is a regular civil aeroplane service subsidised by the Government between Amsterdam and London, Amsterdam, Brussels and Paris, Amsterdam and Hamburg, Rotterdam and Berlin, and between Amsterdam and Malmö. In 1929, 75 tons of postal matter, 695 tons of goods and 14,269 passengers were carried, in 1930, resp. 65 tons, 684 tons and 10,152 passengers, in 1931, resp. 85 tons, 909 tons and 12,677 passengers.

Banking and Credit

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard, but a Bill which passed the States General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

Value of money minted during the following years (in thousands of guilders) —

Year	Gold	Silver	Copper and Nickel	For the East and West India Colonies	Total value	Total number of pieces
1881-1900	8,564	13,710	1,810	10,834	34,418	452,342,090
1901-1920	95,123	108,370	4,362	58,152	265,907	1,370,652,000
1921-1930	55,000	148,220	2,296	23,462	228,978	686,420,000
1931	—	46,100	2	—	46,102	41,900,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right, granted in 1863 for 25 years, was prolonged in 1888 for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions, e.g. all the paper money is to be issued by the Bank. In 1918 the Charter was once more prolonged for a further 15 years. The Bank does the same business as other banks, only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Some recent figures are as follows (in thousands of florins) —

	February 20, 1932	February 18, 1933		February 20, 1932	February 18, 1933
Gold	112,521	} 156,880	Notes in circulation Deposits	227,324	203,040
Silver	45,139			31,544	36,900
Discounts & advances	103,188	97,540			

The capital amounts to 20,000,000 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. The Bank receives $3\frac{1}{2}$ per cent of the capital, the remainder, with deduction of some reserves, is divided between the State and the Bank in proportion of 8 1.

There are many savings-banks, all private. Besides these there is a State postal savings-bank, established in 1881. The following table gives some particulars —

Year	Number of Savings Banks	Amount deposited (in 1,000 gldrs)	Amount withdrawn (in 1,000 gldrs)	Total Deposits at end of year (in 1,000 gldrs)	Number of Depositors at end of year	Amount per inhabitant Gldrs
1929						
State P S B	—	186,489	134,541	351,115	2,069,222	44 83

Money, Weights, and Measures

MONEY

The standard coin is the 10 florin piece weighing 6 720 grammes, 900 fine, and thus containing 6 048 grammes of fine gold. The unit of the silver coinage is the gulden or florin, weighing 10 grammes, 945 fine and containing 9 45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875

The principal coins are —

The *gulden*, *guilder* or *florin* of 100 cents = 1s 8d ; or 12 g = £1

The *ryksdaalder* = $2\frac{1}{2}$ guilders

Coins in circulation silver, of 10, 25, 50, 100 and 250 cents, bronze, $\frac{1}{2}$ cent, 1 cent and $2\frac{1}{2}$ cents, nickel, 5 cents

Treasury notes of $2\frac{1}{2}$ florins are also in circulation

WEIGHTS AND MEASURES.

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands

Diplomatic and Consular Representatives.

1. OF THE NETHERLANDS IN GREAT BRITAIN.

Envoy and Minister.—Jonkheer Dr. R. de Marées van Swinderen, G.C.V.O. (October 1, 1913)

First Secretary—Dr. J. J. B. Bosch ridder von Rosenthal

Commercial Attaché—F. B. 's Jacob

Agricultural Adviser—B. Gerritzen

Consul-General in London.—T. H. de Meester.

2 OF GREAT BRITAIN IN THE NETHERLANDS

Envoy and Minister —The Hon. Sir Odo Russell, K C M G , K C V O ,
C B Appointed August 9, 1928.

First Secretary —W H Roberts, M C

Military Attaché —Major the Hon W Fraser, D S O , M C

Naval Attaché —Capt. J. U P. Fitzgerald, R N

Air Attaché —Group-Capt R J Bone, C.B.E., D.S.O.

Commercial Secretary —R V. Laming, C B E

Consul General at Rotterdam —L E Keyser

There are consular representatives at Amsterdam (C G), Dordrecht, Flushing, The Hague, and Ymuiden

Colonies.

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 788,000 English square miles, with a total population of 60,958,371 in 1931

NETHERLANDS EAST INDIES

The Dutch possessions in Asia, forming the territory of Netherlands India (Nederlandsch Indie), are situated between 6° N and 11° S latitude, and between 95° and 141° E longitude

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Dutch possessions were governed by the mother-country

Government and Constitution.

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government, (2) Subject native States.

The administration and executive authority of the East Indies rest in the hands of a Governor-General. He is assisted by a Council of seven members of an advisory character. The members of the Council, however, have no share in the executive. The Governor General and the members of the Council are nominated by the Queen. In 1918 a 'Volksraad' was installed to discuss the budget, and to advise the Government on matters of general importance as a first step towards the development of self-government in the colony. Some of the members are appointed by the Government, some are elected by the local councils, and the Chairman is appointed by the Crown. It includes Europeans, natives and foreign Orientals (Chinese, Arabs). By the Netherlands India Constitution of 1925, Netherlands India is granted a measure of self government in internal affairs under supervision of the Home Government, the legislative powers being shared between the Volksraad and the Governor General.

The provinces, divided into residencies, are governed by Governors; the residencies by Residents, assisted by Assistant-Residents and a member of subordinate European officials. Local government is almost entirely exercised by native civil servants, headed by Regents. The Resident, however, remains responsible for governing in his division.

Governor-General.—Jhr. Dr. B. C. de Jonge, appointed May 8, 1931.

Area and Population.

¹ Including New Guinée

The population of Java and Madura on October 7, 1930 (Census), consisted of 20,428,932 males and 21,290,592 females, 193,618 were Europeans, 40,890,244 natives, and 635,662 other Orientals, chiefly Chinese and Arabs (583,360 Chinese). The population of the outer provinces (census 1930) was 19,011,501 (included an estimate of 135,350), with 9,581,893 males and 9,294,258 females, 48,754 were Europeans, 13,253,531 Natives, 650,496 Chinese, and 58,720 other Asiatics.

The whole population of the colony is legally divided into Europeans, Natives and foreign Orientals. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are considered. The Governor General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Religion.

Religious liberty is granted to all denominations. The Protestant Church counted, at the end of 1931, 42 ministers, 32 preachers and assistant preachers and 347 native preachers paid by the Government, the Roman Catholic 87 curates and 14 native preachers paid by the Government, 254 priests and 126 native preachers not salaried out of the public funds. During 1931, 45 missionaries of 15 societies were allowed to practise their missionary work.

The bulk of the natives are Mohammedans; there are also some millions of converted Christians and Animists, and a small number of Buddhists.

Education.

There are public (Government and municipal) primary schools, where instruction is given through the medium of the Dutch language for (1) Europeans and persons assimilated with them (a 7 years' course), (2) Chinese (Dutch-Chinese schools, with a 7 years' course), (3) Natives (Dutch Native schools, with a 7 years' course), and (4) link schools (with a 5 years' course). Public schools where instruction is given through the medium of a native tongue are (1) the 'second class' schools (with a 5 or 6 years' course), and (2) village schools (with a 3 years' course of extremely elementary instruction). Besides, there are schools with an extended primary instruction (in the Dutch language) with a 3 years' course (Mulo schools) open to all certificated pupils of the primary schools with a 7 years' course, without distinction of race. Side by side with the public schools, there are various private schools.

For secondary education there are public secondary schools with 5 and 3 year courses in connection with the primary schools, and also with 3 year courses in connection with the extended primary school. In addition to the Government institutions there are 6 private secondary schools for girls with a 3 years' course and 1 with a 5 years' course. Higher education is given at the Technical High School at Bandoeng, erected in 1920. Furthermore, a High School for Law opened in 1924, and a Medical High School, erected in 1927, both at Batavia.

The following table shows the number of schools, the school attendance, the teaching staff and the expenditure on education in 1931 —

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public European primary schools	196	914	24,409	17,991,900
Private " "	104	669	19,898

Private " "	11	203	1,326	
Government High Schools	8	55	527	1,111,800

¹ Inclusive linkschools

Furthermore, there were in 1931 the following training schools — Four public schools for training in engineering, architecture, electrical engineering, and mining (4 years' course) and two similar private schools (1 four years' course and 1 three years' course), with 134 teachers and 1,502 pupils, forty public and nineteen private technical schools for natives (51 two years' course, 6 three years' course and 2 four years' course), with 339 teachers and 4,766 pupils. Five trade schools (8 years' course), and one school for higher commercial education with 488 pupils, 4 agricultural schools with 39 teachers and 429 pupils, one veterinary school with 14 teachers and 49 pupils, 11 training schools for civil, judicial, and administrative functions, with 107 teachers and 751 pupils, and one training school for police with 81 students, three public medical schools with 56 teachers and 407 students, one public and one private nautical school for Europeans and one for natives.

For native teachers there are 12 schools with instruction in the Dutch language with 105 teachers and 1,090 pupils with instruction in the native tongue, 809 schools and courses with 646 teachers and 8,573 pupils. Furthermore, there are 19 schools and courses for European teachers with 228 teachers.

For Chinese teachers there is a school with instruction in the Dutch language with 13 teachers and 145 pupils.

For kindergarten teachers (Fröbel) there are 6 training schools with 48 teachers and 467 pupils.

Justice and Crime.

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at Batavia, Samarang, Soerabaya, Padang, Medan and Makassar—Resident courts and police courts for Europeans; native courts, magistrate courts, police courts, Regent courts, district courts, and courts of priests for natives.

Finance.**Revenue and expenditure —**

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1931 ¹	598,150,966	766,719,324	— 168,568,358
1932 ²	710,716,909	808,125,786	— 97,408,827
1933 ²	561,119,931	660,449,223	— 99,329,292

¹ Provisional results² Estimates

The sources of revenue in 1933 are stated as follows (in guilders): From direct and indirect taxes, 260,325,000, salt monopoly, 9,451,000, opiumrégie, 13,268,000, railway service, 9,524,000, harbour service, 6,577,000, forestry, 649,000, rubber, 48,000, dredging service, 851,000, electric enterprises, 2,574,000, Government printing office, 427,000, all other sources, 20,049,000, net surplus of State business enterprises (as opium factory, pawnshops, cinchona- and tea estate, tin, harbour of Makassar, Emmaharbour, harbour of Belawan, post, telegraph and telephone services, military grass lands and reproduction shop of the topographical services), 8,020,000. Gross receipts of pawnshops are 19,813,000, cinchona and tea estate, 1,011,000, tin, 24,454,000, three harbours, 2,806,000, post, telegraph and telephone services, 31,274,000, other objects, 3,925,000. Public funded debt on December 31, 1932, was 1,219,731,000 guilders.

Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army in 1932 comprised 6 regiments of field infantry, each regiment consisting of 3 battalions and 1 machine-gun company, 2 battalions of light infantry, 13 garrison battalions and 1 garrison company, and the light infantry corps at Atchin. There were further 3 dépôt battalions of infantry, 1 position machine-gun company, 1 company of cyclist-soldiers, 6 squadrons, 1 dépôt squadron of cavalry, 3 field batteries, 8 mountain batteries, 2 motor batteries, 1 company of position artillery, 1 dépôt battery of artillery, 2 field companies of sappers and miners, 1 motor-car company, 1 technical company and 1 dépôt company of engineering troops and a flying corps consisting of 1 wing (3 flights of 6 aeroplanes). In 1918 compulsory service was introduced in the militia for Europeans between 19 and 32 years of age, and in the landstorm between the ages of 31 and 45. On December 31, 1931, there were 15,396 militia-men.

In most battalions there are 3 companies composed either of Europeans or of Natives, the greater part of the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European and Native gunners and Native drivers. The Europeans (except the militia) and Natives are recruited by volunteers. The strength of the colonial army in 1931 was 1,247 officers, 86,679 volunteers, of whom 7,350 were Europeans and 29,320 Natives. Besides the Army there are different armed troops, viz: (1) The Legion of the Native Prince Mangkoe Negara, consisting of infantry, numbering about 960 men. In case of war this Legion would be placed at the disposal of the Commander-in-Chief. (2) The Barisan, being a native infantry of Madura, consisting of 3 battalions, numbering 1,647 men, designed to maintain peace in the island and to participate in campaigns in case of war.

The expenditure for defence (army and navy) estimated for 1933 amounts to about 91,000,000 guilders.

The Royal Navy in the East Indies numbers 334 officers and 1,750 European and 2,500 Native non-commissioned officers and sailors and 114 militia, and consists of 36 men-of-war, including 2 light cruisers, 8 destroyers, 12 submarines, 2 gunboats, 6 minelayers, 4 torpedo motor-boats, 1 old battleship serving as gunnery-schoolship, 2 surveying vessels, and 1 submarine-depôtship, and some old torpedo-boats for local service. There is, besides, a Naval Air Service with 62 hydroplanes, and the Colonial Navy, consisting of 17 smaller ships of no naval value, with 164 Europeans and 810 natives, employed for civil service duties.

Production and Industry.

Scattered all over the isle of Java are many agricultural estates chiefly owned by agricultural companies, Europeans and Chinese. Yet the greater part of the soil of Java belongs to and is cultivated by the natives.

The harvested area under various 'native' cultures in Java and Madura was in 1931 as follows, in acres — Irrigated rice, 7,593,298, non irrigated rice, 1,087,327, maize, 4,779,148, cassava, 1,720,464; sweet potatoes, 350,202; groundnuts, 473,532, soya beans, 478,323, other pulses, 550,485; tobacco (native), 423,857, other secondary crops, 1,442,899, total, 18,899,535.

In 1931, the harvested areas of the principal 'other secondary crops' were potatoes, 43,762 acres, native sugar-cane, 29,331 acres; indigo, 4,968 acres, and capsicum, 160,721 acres. Separate from this area native tea was planted on 102,205 acres, native rubber on 16,183 acres, and native coffee on 43,578 acres.

The total area in use for agriculture in Netherlands-India in 1931 was 7,031,032 acres, of which 101,933 acres were Government-estates, 806,335 acres were private lands, and 170,931 acres lands hired from native princes in Java and Madura. 5,503,911 acres lands hired on long lease from the Government (erfpacht), from self governing communities, or the Government in the Outer Provinces only (landbouwconcessie) 497,922 acres lands hired on short lease from natives. Of the total only 3,084,254 acres were planted.

The following table gives a comparison of the production of sugar for 5 years —

—		1927	1928	1929	1930	1931
Harvested area	acres	458,948	482,873	486,199	489,295	496,278

In 1930 the Netherland East Indies had about 35,900 miles of highways, of which 24,850 were macadam (2,500 miles with bituminous surface), 50 concrete and brick, and 11,050 low type, earth, sand-clay, or gravel, graded and drained. The road mileages of some of the larger islands are reported as follows: Java, 15,800, Sumatra, 11,400, Borneo, 1,400, Moluccas, Bali, Lombok, and Timor, 3,060.

At the end of 1931 the total length of rail and tramways (State and private) was about 4,636 miles (3,464 in Java and 1,172 in Sumatra), the State lines in Celebes were closed down in 1930, the gross receipts (1931) about 88,286,000 guilders, working expenses (1931), 67,715,000 guilders, number of passengers (1931) about 106,981,000.

The Government telegraph lines extended in 1931 over 5,478 miles, the Government telegraph cables over 4,906 miles, making a total of 10,384 miles. The number of post and telegraph offices (combined), post offices (simple), telegraph offices (simple) and stations in 1931 were respectively 239, 86, and 571 for Java and Madura, and 164, 127, and 281 for the other islands, a total of 1,468 offices and stations. Moreover, there were 1,498 rural postal agencies and 169 rural telegraph agencies. The number of telegraph offices includes 34 government radio telegraph stations for public service (including 10 coast stations and 1 station for wireless traffic with other countries), 6 private radio telegraph stations for coastal public service, and 23 radio posts erected in isolated regions for the purpose of connecting the Government Civil Service officials of these outstations with more populated centres. The numbers of telegrams were 1,069,000 (internal) and 810,000 (foreign). Internal ordinary letters and postcards carried in 1931 34,337,000, while there were 39,832,000 printed packets, newspapers, 1,975,000 paid registered articles, 12,424,000 official letters and 2,093,000 official registered articles for the interior. The international correspondence dealt with was 12,031,060 letters and postcards, 11,469,000 other articles, and 1,014,000 registered articles.

The Government telephone aerial lines extended in 1931 over 15,266 miles, the Government telephone cables over 1,239 miles. At the end of 1931 there were 355 telephone exchanges and 46,100 telephones.

The Royal N I Airlines Cy (K N I L M) maintains internal subsidised airlines between the principal towns of Java, Sumatra, and Singapore. In 1931 about 900,000 kilometres were covered on the regular lines, 13,430 passengers and 18,815 kilograms of mail were carried.

Since October 15, 1931, the Royal Dutch Airlines Cy, the Hague (K L M), maintains a weekly service, carrying mail and passengers, between Amsterdam and Java.

Banking and Credit.

The Java Bank, established in 1828, has a capital of 9,000,000 guilders. On February 18, 1933, its position (in thousands of guilders) was as follows: gold and silver, 156,880; discounts and advances, 53,300; notes in circulation, 203,080; deposits and bills payable, 36,960. The other large Dutch banking institutions are the Netherlands Trading Company, the N E I Commercial Bank, and the N E I Escompto Company, besides which there are branches of British and Japanese banks.

In the Postal savings-bank there were in 1931 about 381,990 depositors, with a deposited amount of 27,289,259 guilders.

Weights and Measures

The <i>Pikul</i>	= 133½ lbs avoirdupois
„ <i>Catty</i>	= 1½ „ „
„ <i>Tjengkal</i>	= 4 yards
„ <i>Paal</i> (Java)	= 1,507 metres
„ <i>Paal</i> (Sumatra)	= 1,852 metres
„ <i>Square Paal</i>	= 227 hectares = 561.18 acres
„ <i>Bouw</i>	= 1.7537 acres

The legal coins of 10, 5, 2½, 1 and ½ guilders, as well as the weights and measures, of Dutch India, are those of the Netherlands. But the country has coins of its own, viz., 25, 10, 5, 2½, and 1 cent pieces.

Consular Representatives

British Consul-General at Batavia—H. Fitzmaurice, M. B. E.

There are also consular officers at Samarang, Sourabaya, Makasser, Medan, and Padang.

DUTCH WEST INDIES

The Dutch possessions in the West Indies are (a) *Surinam*, or *Dutch Guiana*, and (b) *Curaçao*.

Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2 and 6° N. latitude, and 53° 50' and 58° 20' W. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantijn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumac Humac Mountains, which separates it from Brazil.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the possession of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The administration and executive authority are in the hands of a governor assisted by an advisory council consisting of the governor as president, a vice-president and three members, all nominated by the Queen of the

Netherlands. The Colonial States form the representative body of the colony. The members (13) are elected for 6 years.

Governor.—Dr. A. A. L. Rutgers. Appointed April 1, 1928.

Dutch Guiana is divided into six districts.

Area, 54,291 English square miles, population (December 31, 1931) 155,888 inclusive of the negroes and Indians living in the forests. Capital, Paramaribo, 48,389 inhabitants.

Births and deaths for 3 years —

	Births			Deaths		
	1929	1930	1931	1929	1930	1931
Males	2,151	2,149	2,069	1,182	988	1,082
Females	2,180	2,010	2,097	900	872	884
Total	4,331	4,159	4,166	2,082	1,855	1,966

Number of marriages in 1929, 460, in 1930, 480, in 1931, 386.

There is entire religious liberty. At the end of 1931 the numbers of the different religious bodies were: Reformed and Lutheran, 11,469; Moravian Brethren, 30,799; Roman Catholic, 26,326; Jews, 640; Mohammedans, 36,649; Hindus, 28,301.

There were, in 1931, 42 public schools with 7,673 pupils, and 78 private schools with 12,033 pupils.

There is a court of justice, whose members are nominated by the Sovereign. There are four cantonal courts and two circuit courts.

For relieving pauperism the Government not only subsidises orphan-houses and other religious or philanthropical institutions, but itself maintains an almshouse.

The expenditure, the local revenue (derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes), and the State subvention are shown as follows for 4 years in thousands of guilders —

—	Expen- diture	Local Revenue	Sub- vention	Loans	—	Expen- diture	Local Revenue	Sub- vention	Loans
1930	7,694	4,588	2,919	118	1932	7,690	4,679	3,011	—
1931	7,801	4,125	2,996	—	1933	6,767	3,860	2,907	—

The Dutch forces in Surinam consist of a civic guard and infantry, the latter containing, in 1931, 10 officers and 183 non-commissioned officers and men.

Principal products for 2 years:—

	1930	1931		1930	1931
Sugar (kilos)	18,896,975	22,540,500	Rice (kilos)	20,703,290	24,894,700
Cacao (kilos)	254,748	210,300	Maize (kilos)	935,700	1,121,900
Bananas (bunch)	491,368	489,700	Rum (litres)	692,218	623,300
Coffee (kilos)	3,450,880	2,720,800	Molasses (litres)	3,619,868	3,803,900

Gold production in 1931 was 148,000 grammes, that of balata 429,036 kilos, and of bauxite 178,154 metric tons.

In 1931 there were 15,612 head of cattle, 3,209 goats and 7,197 pigs.

Imports and exports for 6 years —

Year	Imports	Exports	Year	Imports	Exports
	Guilders	Guilders		Guilders	Guilders
1926	10,020,516	7,689,685	1929	8,638,900	7,946,629
1927	9,288,858	11,834,361	1930	9,188,476	8,889,808
1928	9,194,989	11,684,859	1931	6,626,645	6,017,885

Principal exports in 1931: Sugar, 20,414,437 kilos, rum, 236,807 litres, cacao, 17,043 kilos, coffee, 2,861,018 kilos

Board of Trade figures show U K imports from Dutch Guiana in 1932, 26,147½, and U K exports to Dutch Guiana, 134,284½, U K re exports to Guiana, 3,671½

In 1931 there entered 248 vessels of 10,221,170 register tons, and cleared 250 vessels of 10,376,040 register tons

The communication between several districts of the colony is carried on by vessels and small steamers. A Colonial steamship service extends to British Guiana. The capital, Paramaribo, has a harbour open to ships of 20 feet draught, regular connections in both directions exist with Europe and the United States by different steamship companies (Royal Dutch Steamship Company, Compagnie Générale Transatlantique, Ocean Dominion Steamship Corporation, Munson Line and Aluminium Line). In September, 1929, a weekly air service was established between Paramaribo and the United States. In February, 1930, air services were further increased when Paramaribo was made a regular stop of a weekly service between the United States and Buenos Aires. Both these services are by the Pan American Airways, Inc.

Curaçao.

The colony of *Curaçao* consists of two groups of islands about 500 miles apart. One group is made up of the first three islands in the following list, the other of the last three —

	Square Miles	Population Dec. 31, 1931
—	—	—
Curaçao	210	45,191
Bonaire	95	5,505
Aruba	69	15,689
St. Martin ¹	17	2,568
St. Eustatius	7	1,004
Saba	5	1,512
	408	71,769

¹ Only the southern part belongs to the Netherlands, the northern to France

Governor —B W T van Slobbe Appointed January 1, 1930

The Governor is assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The city of Willemstad, on Curaçao, is the seat of government. The different islands, except Curaçao, are under officials called 'Gezaghebbers,' nominated by the Governor. Schools in 1931 numbered 44 with 10,432 pupils. In 1931, 2,405 births were registered, 502 marriages and 1,266 deaths.

The revenue is derived from import, export, and excise duties, taxes on income, on land, and some other taxes. In the Budget for 1933 the revenue is estimated at 7,293,250 guilders, and the expenditure at 5,727,702 guilders.

The garrison of Curaçao consisted at the end of 1931 of 2 officers and 120 men, with 1 man of war

The imports of Curaçao and the other islands in 1931, were valued at 248,101,115 guilders; the exports of Curaçao and the other islands at 342,861,330 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime. The chief industry is oil-refining.

There entered the ports of the different islands in 1931, 10,959 vessels of 45,961,170 tons net.

Vice-Consul at Curaçao — B. L. Maduro

NICARAGUA.

(REPUBLICA DE NICARAGUA.)

Constitution and Government.

THE Constitution of the Republic of Nicaragua came into operation on April 5th, 1913. It vests the legislative power in a Congress of two houses consisting of 43 deputies, elected for 4 years by universal suffrage, and 24 Senators elected for 6 years. The President is elected for 4 years.

President — Don Juan B. Sacasa (elected November 4, 1932; assumed office January 1, 1933).

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments. He may form, when occasion requires, a Council of State to advise on public contracts and other matters.

The Republic is divided into 13 'departments' and 2 'comarcas,' each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Bluefields.

By an agreement reached in 1911 between the Government and the British bondholders, modified and extended in 1917 and 1920, customs receipts and certain other revenues are collected by the Collector-General of Customs (who must be an American) and applied by a High Commission of

3 members (2 of whom must be Americans) to the payment of the external debt, the balance being turned over to the Government

On February 18, 1916, the Bryan-Chamorro treaty between Nicaragua and the United States was signed, under which the United States in return for \$ million dollars acquired the option for a canal route through Nicaragua and also a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on April 7, 1916, and by the United States on June 24, 1926. American Army engineers reported to the U S Congress in 1931 that a Nicaraguan canal would cost 700,000,000 dollars, whereas a third set of locks on the Panama Canal could be constructed for 140,000,000 dollars

Area and Population.

Area estimated at 51,660 English square miles, with a coastline of about 300 miles on the Atlantic and 200 miles on the Pacific. The population according to the census of 1920 was 638,119. Estimated population in 1930, based on registration of voters, 750,000. This is the most thinly populated of the Central American republics. At least 75 per cent of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being slow and difficult.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, though there are a considerable number of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambos Indians and Negroes from Jamaica and other islands of the Caribbean, with some Americans and a comparatively small number of Nicaraguans from the western part of the Republic.

There are 105 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital is Managua, situated on the lake of the same name, with (1926) 32,536 inhabitants, it was almost totally destroyed by earthquake on March 31, 1931, but is being rebuilt. Leon, formerly the capital, had a population of 23,565, Granada, 18,066, Matagalpa, 10,271, Masaya, 13,763, Jinotega, 6,990, Chinandega, 10,307, Rivas, 4,081, Esteli, 4,583, Matapa, 4,561, Somoto, 6,182, Boaco, 4,342, Jinotepa, 6,317, Diriamba, 6,151, Bluefields, 4,706. Other towns are Corinto, 2,307, Cabo Gracias, and San Juan del Sur on the Pacific.

Religion, Education and Justice

The prevailing form of religion is Roman Catholic. The Republic constitutes one archbishopric and ecclesiastical province (Nicaragua). The Seat of the Archbishop is Managua. There are three bishoprics, León, Granada and Matagalpa.

There were (1931) 187 state elementary schools, 12 secondary schools, 5 professional schools, 408 mixed (urban and rural) schools and 233 other schools. The total number of teachers is 1,856. After the earthquake in March 1931, all schools were closed, to be opened (1933) as financial conditions permit. The number of illiterate persons, of all ages, is about 60 per cent. of the population. Secondary education is neither obligatory nor free, the secondary schools being carried on by private individuals. Nicaragua has three universities, in the cities of Managua, León, and Granada.

The judicial power is vested in a supreme Court of Justice at Managua, three chambers of second instance, and judges of inferior tribunals.

Finance.

Revenue and expenditure for 5 years in córdobas (4 86 córdobas = £1, 1 córdoba = 1 U S dollar).—

—	1927	1928	1929	1930 ¹	1931 ¹
	Córdobas	Córdobas	Córdobas	Córdobas	Córdobas
Revenue	4,871,427	5,987,583	6,553,094	4,623,419	3,934,184
Expenditure	4,918,295	5,845,826	6,450,711	5 000,000	3,984,286

¹ Estimates.

Customs duties provide from 50 to 60 per cent of total revenues

Total public debt on February 29, 1932, was estimated at 19,573,697 córdobas, divided into Sterling bonds of 1909 outstanding, £490,230, equal at par to 2,385,947 córdobas, guaranteed customs bonds of 1918, 1,187,750 córdobas, claims arising out of the revolution, 16,000,000 córdobas. But last-named will be considerably scaled down, probably, it is stated, to 2,000,000 córdobas. Service of internal and external debt took 608,626 córdobas in 1931

Defence.

The army was disbanded on May 10, 1927, when, theoretically, all arms, etc., were delivered into the custody of the National Guard, which numbers about 2,000 men. Period of enlistment, 3 years, during period of enlistment, soldiers cannot vote. American marines were withdrawn in January, 1933

A coastguard boat patrols the east coast to prevent smuggling

Production and Industry.

Agriculture, timber and mining are the principal sources of national wealth. The banana is the principal agricultural product of the eastern part of the Republic, output is shipped to New Orleans, exports, 1931, 2,973,446 stems. Coconuts are also of some importance, and plantains, oranges, pineapples, and yucca are raised for home consumption. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn, and beans. Sugar producers have a combine, under government control, which fixes the price for internal sales, profits are now made solely on domestic consumption, exports, 1931, 1,652 metric tons. Rice is grown to a small extent, and some wheat in the hilly Nueva Segovia district, while tobacco is cultivated round Masaya. The annual average coffee crop, from 104,000 acres, is estimated at 36,000,000 lbs. Exports (in pounds) were, in 1931, 34,860,986, 1930, 15,302,708, in value, coffee exports constitute from 45 to 65 per cent of total exports. With the exception of bananas, plantains, and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food.

The forests contain mahogany and cedar, which were formerly largely exported, three varieties of rose-woods, guayacan (*legnum vuze*), dye-woods, gums, and medicinal plants. Wild rubber is abundant in the virgin forests on the Atlantic water-shed, but there are very few rubber plantations owing to the labour shortage. Exports of dyewoods, 1931, 1,912,411 board feet.

There are several gold mines, worked by American and British companies, one having also silver. Exports of gold, 1931, 411,709 dollars. Copper and precious stones are also found.

Commerce.

The foreign trade of Nicaragua, in córdobas, was as follows in 5 years (1 córdoba = 1 U S dollar) —

	1927	1928	1929	1930	1931
	Córdobas	Córdobas	Córdobas	Córdobas	Córdobas
Imports .	10 308,242	18,850 431	11 797,440	8 172 360	6,015,481
Exports .	9,025,677	11,698,212	10,872,526	8,843,358	6,575,758

The customs receipts in 1931 were 1,562,140 córdobas, in 1930, 2,014,295 córdobas

In 1931 the value of the principal imports (in córdobas or dollars) was — Cotton goods, 1,162,676, iron and steel, 458,839; chemicals, drugs, and medicines, 347,292; flour, 316,207. The principal countries of import in 1931 were (values in dollars) — United States, 3,684,213 (61 per cent.); Great Britain, 544,283 (9 per cent.), and Germany, 565,202 (9 per cent.).

In 1931 the value of the principal exports (in córdobas or dollars) was:— Coffee, 3,319,211, bananas, 1,981,327; timber, 153,849. The principal countries of export, in values exported (in córdobas or dollars), were United States, 3 506,370 (53 per cent.), France, 812,756 (12 per cent.), Germany, 843,446 (13 per cent.), Holland, 439,796, and Great Britain, 461,111 (7 per cent.).

Total trade between Nicaragua and United Kingdom (Board of Trade Returns) for 5 years:—

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Nicaragua to U K	73,625	81,060	104,614	178,134	151,760
Exports to Nicaragua from U K	250 071	208,582	145 709	107 607	86,818
Re-Exports to Nicaragua from U K	2,715	4,007	1,152	1,204	584

Shipping and Communications.

Western Nicaragua has two seaports, Corinto (the larger) and San Juan del Sur, through which pass approximately 80 per cent of the imports and exports of the Republic. The eastern ports are Bluefields (the chief), Ocho Gracias Puerto Cabezas, and San Juan del Norte (Greytown). In 1930, approximately 2,400 vessels entered and cleared the ports of Nicaragua.

Most of the roads of the country are mere tracks over which ox-carts alone can travel in the wet season, but highways have been or are being constructed between the following places: Managua-Matagalpa-Jinotega, 104 miles; León-Matagalpa, 80 miles, Puerto Diaz Juigalpa La Libertad, 50 miles; Masaya to Tipitapa, 25 miles. There is a fairly good road from Managua to Granada via Masaya, with a branch to Diriamba. There are 150 miles of motor roads and 200 miles of cart roads, but the east coast is practically shut off from the west coast.

The Pacific Railroad of Nicaragua, owned by the Government and the principal line in the republic, has a total length of 159 miles, all single-track. The line runs from Corinto to León, Managua, Granada, and Diriamba. Extensions are under construction from León to El Sauce, about 55 miles, and from San Jorge to San Juan del Sur in the district of Rivas. There is a regular bi-weekly air service (Pan-American Airways) connecting Managua with the Central America republics and the United States.

There are 2,819 miles of telegraph wire, and 100 offices; also 3,190 miles

of telephone wire and 64 telephone stations serving 1,242 instruments. Telephone service is good along the line of the Pacific Railway, but unreliable elsewhere. There are 116 post offices, and good service between the chief towns of the western section, but service into the interior and to the east coast is irregular and inadequate. All America Cable Co connects with New York.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Cabo Gracias. Other companies maintain stations at Bragman's Bluff, El Gallo and Rio Grande.

Money and Banking

Since 1912 the monetary unit has been the gold *córdoba*, equivalent to the American dollar, containing 1 672 gr of gold nine-tenths fine, and divided into 100 equal parts. Banknotes based on the *córdoba* are issued by the National Bank of Nicaragua, which maintains deposits in New York equal to 60 per cent of the circulation. Other gold coins provided for by law are 10, 5 and 2½ *córdobas*, but no gold coins have ever been struck. National banknotes, of which there were on August 31, 1931, 2,585,796 *córdobas* in circulation, form the great part of the currency. Silver, nickel, and copper coins in circulation July 31, 1931, amounted to 419,362 *córdobas*. United States notes and silver also circulate.

The National Bank of Nicaragua at Managua was incorporated under the laws of the State of Connecticut, it is now owned by the Government and is the sole bank of issue. It has a capital of 300,000 dollars. On December 29, 1930, 130,000 *córdobas* were withdrawn from undivided profits of the National Bank to form part of the initial capital of the Mortgage Bank of Nicaragua, which has branches at Bluefields, León and Granada. Other banks are the Anglo South American Bank, Ltd, and the Anglo-Central American Commercial Bank, Ltd.

Since January 7, 1898, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives

1 OF NICARAGUA IN GREAT BRITAIN

Minister Resident — Eduardo Perez-Triana

Vice-Consul, in charge at London. — F V Cock

There are Consular representatives in Liverpool, Manchester, Cardiff, and Nottingham.

2 OF GREAT BRITAIN IN NICARAGUA

Minister Plenipotentiary, Envoy Extraordinary and Consul-General — John Henry Stopford Birch. Appointed March 13, 1933. (Resident at Guatemala City.)

Charge d'Affaires and Consul — Leonard H. Leach (resident at Managua).

There are Vice Consuls at Managua, Matagalpa, Corinto, León, and Puerto Cabezas.

NORWAY.

(NORGE)

Reigning King

Haakon VII, born August 3, 1872, the second son, Carl, of Frederik VIII, King of Denmark, elected King of Norway by the Storting, November 18, 1905, accepted the crown through his grandfather, the late King Christian of Denmark, November 18, 1905, landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII, King of Great Britain and Ireland

Son.—Prince *Olaf*, Crown Prince, born July 2, 1903, married on March 21, 1929, to Princess Martha of Sweden *Offspring* Princess *Ragnhild Alexandra*, born June 9, 1930, Princess *Astrid Maud Ingeborg*, born February 12, 1932

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primo geniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By the Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plébiscite*, Prince Carl of Denmark was formally elected King. In November, 1907, a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania (Oslo) by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting. The treaty was denounced January 8, 1924.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Baardssen	1204	Erik af Bommern	1889
Haakon Haakonsson	1217	Kristofer af Bayern	1442
Magnus Lagabeter	1268	Karl Knutsson	1449
Erik Magnusson	1280	Same Sovereigns as in Denmark	
Haakon V Magnusson	1290		1450-1814
Magnus Eriksson	1819	Kristian Fredrik	1814
Haakon VI Magnusson	1855	Same Sovereigns as in Sweden	
Olav Haakonsson	1881		1814-1905
Margreta	1888	Haakon VII	1905

The King has a civil list of 700,000 kroner, the Crown Prince 100,000 kroner.

Constitution and Government.

The Constitution of Norway, called the Grundlov, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. Only the Storting can vote supplies and has the power of the purse. The royal veto may be exercised twice, but if the same Bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and the Storting remains assembled as long as it may find it necessary. Every Norwegian subject of twenty-three years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct, and the method of election is proportional. Every third year the people choose their representatives, the total number being 150. The country is divided into districts, each electing from three to eight representatives. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the Kingdom without regard to their residence.

At the elections for the Storting held in November, 1930, the following parties were elected for the period 1931-1933: Labour Party 47, Conservatives and Moderate Liberals 44, Liberals 34, Agricultural Party 25.

The Storting, when assembled, divides itself into two sections, the 'Lagting' and the 'Odelsting'. The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. The inspection of public accounts and the revision of the Government, and impeachment before the Rigsret, belong exclusively to the Odelsting. All other matters are settled by both sections in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Højesteret*) form a High Court of the Realm (the *Rigsret*) for the impeachment and trial of Ministers, members of the

Hoiesteret, and members of the Storting Every member of the Storting has a salary of six thousand kroner per annum, besides travelling expenses.

The executive is represented by the King, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*), and at least seven ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The following are the members of the Cabinet, appointed March 2, 1933 —

Prime Minister and Minister for Foreign Affairs — M. Mouninckel

Minister of Justice. — M. Sundt

Minister for Defence — M. Kobro

Minister for Education and Ecclesiastical Affairs — M. Iivestorl

Minister of Finance — M. Lund

Minister for Public Works — M. Mjelds

Minister for Commerce and Industry — M. Meling

Minister of Agriculture — M. Fyve

Minister for Social Affairs — M. Stroeemme

II LOCAL GOVERNMENT

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Fylkesmann*), viz, the town of Oslo and Bergen, and 18 *Fylker* (counties). There are 43 towns, 24 'Ladesteder' (ports), and 682 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Firmannskap*), elected by and from among the representatives, who are four times the number of the 'Formannskap'. The representatives elect conjointly every third year from among the 'Formannskap' a chairman and a deputy chairman. All the chairmen of the rural communes of a Fylke form with the Fylkesmann the Fylkesting (county diet), which meets yearly to settle the budget of the Fylke. The towns and the ports form 65 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

Area and Population.

Total	124,588.1	2,649,775	2,814,194	22.59

In 1930, 2,013,680 were domiciled in rural districts, and 800,514 in towns, there were 1,371,919 males, and 1,442,275 females.

Conjugal condition of the domiciled population, 1930 —

—	Unmarried	Married	Widowed and Divorced
Males	841,551	473,650	56,718
Females	847,088	476,248	118,939

II MOVEMENT OF THE POPULATION

Births, Deaths, and Marriages

Year	Marriages	Births (exc still born)	Stillborn	Illegitimate, living	Deaths (exc. still born)	Excess of Births
1927	15,808	50,175	1,225	3,451	31,141	19,033
1928	16,603	49,881	1,300	3,573	30,901	19,580
1929	17,795	48,372	1,293	3,459	32,023	16,949
1930	18,064	47,844	1,274	3,397	29,616	18,228
1931 ¹	17,756	47,236	1,161	3,344	30,308	16,928

¹ Provisional figures.

Number of emigrants in 1931 — 825 (708 to the United States and 62 to Canada)

III. PRINCIPAL TOWNS

At the census taken December 1, 1930, the number of towns with a population of above 100,000 was one, above 20,000 five, above 10,000 eighteen, above 5,000—twenty eight in all. The population of the principal towns was:—

Oslo	255,134	Alesund	18,850	Tonsberg	11,997
Bergen	98,308	Haugesund	17,166	Horten	10,778
Trondheim	64,468	Skien	16,696	Larvik	10,471
Stavanger	46,780	Fredrikstad	14,646	Arendal	10,651
Drammen	25,493	Kristiansund	14,053	Halden	10,337
Kristiansand	18,781	Sarpsborg	12,592	Tromsø	10,326

As from January 1, 1925, the name of the capital, Kristiania, was changed to Oslo.

Religion and Education.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 7 *Bispedømmer* (bishoprics), 91 *Prostier* (provostships or archdeaconries), and 520 *Prestegjeld* (clerical districts). In 1920 there were 71,062 dissenters, including 2,612 Roman Catholics, 11,455 Methodists, 7,214 Baptists, 464 Mormons, 73 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Oslo.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1929-30 (the latest date for which there are statistics) there were in the country 5,802 public elementary schools with 304,462 pupils, and in towns 97,378 pupils, the amount expended on both being 67,155,000 kroner, of which 29,900,000 kroner were granted by the State, the rest being provided locally. The 11 normal schools (Teachers' Seminaries) had in 1930-31 392 students. There were in 1929-30, 138 secondary schools—17 public, 91 communal, and 11 private entitled to give certificates and 19 private not having this right, with respectively 5,179, 16,529, 1,402, and 539 pupils in April, 1930. Most of the secondary schools are mixed. Norway has one University, viz at Oslo (founded 1811), attended in 1931 by 3,615 students. There is a technical high school at Nidaros (Trondhjem), attended in 1931 by 713 students, one agricultural high school in Aas, with 112 students, a Teachers' Training College at Lade with 60 students, a military high school with no students in 1931, a dentist high school with 150 students, and the State academy of arts with 49 students. There are also several special schools, particularly continuation schools for young people between 15 and 18, and industrial, crafts, technical, and arts schools for both sexes.

There are 25 schools for defective children, deaf, blind, feeble minded children with defect of speech, and crippled, also 10 reformatory schools for neglected children. The number of children in reformatories in 1929-30 was 351 boys and 121 girls, in the schools for defective children in 1930-31, 917 boys and 929 girls. There are, besides, 6 communal compulsory schools, established mainly for children neglecting the ordinary school (84 boys, 32 girls in 1929-30).

Norwegian is an independent language side by side with Danish and Swedish. As to the written language, there exist two idioms ('bokmaal' and 'landsmaal') and both may be officially used.

Justice and Crime

For civil justice Norway is divided into 109 districts, each with an inferior court. There are 8 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Højesteret*), consisting of 1 president and 22 other justices. There is a court of mediation (*Forlikssaad*) in each town and *Herred* (district), consisting of three men chosen by the representatives (see above under *Local Government*), before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigset*—the court for impeachments) shall be tried either by jury (*Lagmandsret*), or by the lower court. The *Lagmandsret* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdømmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The lower courts consist of the judge and 2 assistant judges (not professional) summoned

for each case. The *Lagmaderet* takes cognizance of the more serious classes of offences, and is also a court of appeal. The lower courts are for the trial of other offences as courts of first instance.

There are three convict prisons, inmates, June 30, 1932, 457 males and 11 females. There are 38 local prisons, in which were detained, June 30, 1932, 688 males and 52 females.

Pauperism.

The relief of the poor is mostly provided for by local taxation by the Communes. The number of persons receiving relief amounted to 125,104 in 1930.

Finance.

Revenue and expenditure for five years —

Year ending June 30	Revenue		Expenditure	
	Total	Current	Total	Current
1929-30	1,000 kr 596,102	1,000 kr 555,742	1,000 kr 576,072	1,000 kr 524,931

		Other capital items	5,356
Total	18,736	Total	53,229
Grand Total	852,634	Grand Total	852,634

The public debt of Norway has been incurred for the main part by railway undertakings and construction of telegraph lines and water-power developments. The following gives the national liabilities for six years :—

Year ending June 30	Total debt ¹	Year ending June 30	Total debt ¹
	Kroner		Kroner
1927	1,568,419,982	1930	1,565,037,000
1928	1,634,825,236	1931	1,518,064,000
1929	1,578,897,518	1932	1,526,060,000 ²

¹ At the rate of par on foreign loans.

² Provisional figure.

Of the total on June 30, 1931, 757,625,000 kr were foreign debt, 760,429,000 kr internal debt.

Defence

The most important fortresses of Norway are Oscarsborg, Tonsberg, Bergen, and Agdenes (The fortress of Kristiansand is in reserve.) The old fortresses, Karljohansvaern, Akershus in Oslo, Bergenhus in Bergen, Munkholmen near Trondhjem, and Vardøyhus, are of no importance.

ARMY

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 21, and for the first 12 years belong to the line. Men from 18 to 21 and from 45 to 55 belong to the *landstorm*, which can be called out in a national emergency, and from 33 to 43 to the *landvaern*. The initial training is carried out in recruits' schools, it lasts for 60 days in the infantry and in the garrison artillery, 60 in the mountain artillery, 60 in the engineers, 90 days in the field artillery, and 90 in the cavalry. Further, the men have to go through 'regimentsamlinger' or other similar training courses lasting at least 48 days and carried out in two periods of 24 days each. These are to be served either in the 1st and 3rd or in the 2nd and 4th years of service. The strength of the permanent forces in 1932 was 893 officers and 4,573 other ranks, the numbers trained in that year were approximately 10,000.

The Norwegian infantry is armed with the Krag Jörgensen rifle of 6.5 mm. The field artillery has Erhardt Q F guns of 7.5 cm.

The budget proposal for the army for 1932-33 is 26,112,000 kroner.

NAVY.

The principal vessels are —

Laid down	Name	Displacement	Armour		Principal Armament	H P	Max Speed
			Belt	Big Guns			
1896	Harald Haarfagre	8,900	7	8	2 8in, 6 4.7in	4,500	17
	Tordenskjold						
1899	Norge	4,200	6	8	2 8in; 6 6in	5,200	17
	Blidsvold						

None of the above possesses any other than local value. The whole navy is designed for coast defence duties.

There are also 3 destroyers, 8 first class torpedo boats and 14 others, 9 submarines and 3 mine-layers. A mine-layer of 1,600 tons is approaching completion. There are now about 36 seaplanes and 20 other planes

The navy numbers over 900 officers, warrant officers and men, on the permanent establishment, and about 700 men conscripted annually. All seafaring men between the ages of 20 and 44 are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts have to go through a training of at least 6 months.

The budget proposal for naval expenditure, 1932-33, amounted to 12,296,000 kroner

Production and Industry.

I. AGRICULTURE.

Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 72.2 per cent. is unproductive, 24.2 per cent. forest, and 3.6 per cent. under cultivation and other used soils.

The acreage and products of the principal crops for 3 years were as follows

Crops	Acreage			Produce (quarters)		
	1930	1931	1932	1930	1931	1932
Wheat	80,467	28,688	27,881	87,476	71,898	95,382
Barley	184,495	138,327	186,810	566,658	484,808	642,176
Oats	289,191	286,811	284,677	1,415,767	986,769	1,380,505
Rye	10,099	15,252	16,313	67,365	45,861	65,309
Mixed Corn	18,605	19,507	18,772	73,641	51,564	60,422
Potatoes	116,688	116,412	121,928	81,052 065 ¹	31,891,872 ¹	41,959,747 ¹
Hay	1,640,674	1,648,792	1,651,389	2,650,581 ²	2,540,479 ²	2,458,161 ²

¹ Bushels.

² Tons

In 1932 the country possessed live stock as follows —Horses, 179,068, cattle, 1,341,787, sheep, 1,735,932, goats, 342,525, swine, 303,966.

II. FORESTRY

The forests are one of the chief natural sources of wealth. The total area covered with forests is estimated at 28,956 square miles, of which 70 per cent. is under pine trees. The State forests occupy about 4,100 square miles. The value of unwrought or partly wrought timber exported from Norway in 1930 and 1931 was respectively 32,767,000 and 19,512,000 kroner, and of wood pulp and paper 172,645,000 kroner in 1930 and 100,103,000 kroner in 1931.

III. MINERALS AND METALS

Pyrites is the most important mineral product for both its sulphur and copper content. Iron-ore deposits occur in many places. The total value of mineral products in 1931 was 16,934,000 kroner.

The production and value of the chief ores, metals and alloys in 1931 are shown in the following table.—

Ores and Minerals	Tons	1,000 Kroner	Metals and Alloys	Tons	1,000 Kroner
Silver ore . . .	14,803	182	Silver	96	422
Copper ore . . .	14,604	1,484	Copper	4,352	2,945
Iron pyrites . . .	359,951	5,067	Nickel	2,969	8,600
Nickel ore . . .	15,399	494	Aluminium . . .	31,420	28,741

Magnetite (burnt and bricks)	752	83	Other products	—	5,398
Molybdenum ore	223	535			
	999,138	16,984		—	80,689

IV FISHERIES

The number of persons in 1930 engaged in cod fishery was 73,830 . in 1929, in summer-herring fishery, 26,315 . and in mackerel fishery, 4,938

The value of the sea fisheries (based on the prices paid at the fishing places) in kroner in 1930 was Cod, 34,188,355, herring, 30,812,519, mackerel, 2,907,372, salmon and sea trout, 2,100,977, other fisheries, 18,582,700, lobsters, 1,322,614, total, 89,914,536

Other fisheries are the whale, walrus, seal, and shark fisheries, which in 1930 produced a total of 135,277,000 kroner

Whale-oil production 656,000 barrels in 1926 . 689,000 barrels in 1927, 845,800 barrels in 1928, 1,210,000 barrels in 1929, 1,796,000 barrels in 1930, and 2,317,000 barrels in 1931

V. MANUFACTURES

Industry is chiefly based on raw materials produced within the country (wood, fish, etc.), and on water power of which the country possesses an enormous amount. The pulp and paper industry, the wood industry, the canning industry and the electro chemical industries are the most important export manufactures. In the following table are given figures for all industrial establishments in 1930 occupying more than 5 workers. Electrical plants, constructions and building industry are not included.

Industries	Estab-lish-ments ¹	Number of		Gross value of produc-tion (1,000 kroner)	Value added by manufac-ture (1,000 kroner)
		Salaryed Staff	Workers ²		
Quarries and ceramics	317	576	7,503	44,902	34,169
Machinery and metal work	559	3,648	27,019	230,643	148,355
Chemical and electro-chemical in-dustry	71	862	4,301	116,545	64,702
Oils, soaps, etc	192	532	2,082	94,585	20,099
Gas works	15	221	682	8,523	5,987
Wood	490	739	9,909	105,148	35,819
Paper and pulp	184	1,259	15,083	252,941	92,373
Leather and rubber	58	258	2,230	27,537	10,598
Textiles	171	1,054	19,536	99,592	41,337
Clothing, etc.	238	1,099	9,513	33,480	38,176
Food products	541	2,520	12,691	327,887	186,711
Printing	248	469	4,900	43,957	30,356
Total	3,074	13,232	106,449	1,435,407	701,622

¹ Employing 5 workers or more.

² Average number employed in the year

The gross value of the production at the electrical plants was 134 million kroner, the value added 107 million kroner. The total power installed in manufacturing industry was 2,310,645 h.p., of which water power to an amount of 2,164,172 h.p.

Commerce.

Total imports and exports in five years —

	1928	1929	1930	1931	1932
	Kroner	Kroner	Kroner	Kroner	Kroner
Imports (foreign)	1,028,861,000	1,072,638,000	1,045,012,000	861,370,000	689,258,000

Length of telegraph and inter-urban telephone lines and wires, June 30, 1931: 35,625 miles of line, 580,400 miles of wires (State, 22,320 and 425,250 miles respectively) Number of paid messages on the State lines, 4,094,000. Number of telephone conversations on trunk lines, 14,057,000 State telegraph offices, 2,642; receipts, 32,063,000 kroner; expenses, 22,098,000 kroner.

The Government possesses 30 wireless telegraph and telephone stations in Norway, of which 3 are at Svalbard and Fan Mayn

Currency, Credit and Banking.

On December 31, 1931, the nominal value of the coin minted was, 18,600,000 Gold coin which is not in circulation excluded. Gold coin, 18,563,270 kroner; total, 37,163,270 kroner.

There is no Government paper money.

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the pres-

dent and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for December 7, 1932, show the following figures: bullion, 118,240,000 kroner, gold abroad, 26,017,000 kroner, notes in circulation, 299,832,000 kroner (the issue of notes allowed was 368,240,000 kroner), deposits, 82,282,000 kroner, loans and discounts 254,172,000 kroner, balances held abroad, 22,762,000 kroner, foreign bonds, 751,000 kroner, domestic bonds, 26,487,000 kroner.

The 'Kongeriget Norges Hypothekbank' was established in 1852 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounted to 67,000,000 kroner in 1931, and of reserve 2,065,000 kroner. At the end of 1931 the total amount of bonds issued was 465,172,000 kroner. The loans on mortgage amounted to 476,602,000 kroner.

The Norwegian 'Arbeiderbruk og Boligbank' was established in 1903 by the State to meet the demand for loans on mortgage from labourers and small proprietors. The capital of the bank is furnished by the State, and amounted to 7,200,000 kroner in 1931. On June 30, 1931, the total amount of bonds issued was 29,549,000 kroner. The loans on mortgage amounted to 26,385,000 kroner. This bank is in liquidation, its business is little by little being taken over by the 'Norske Stats Smaabruk og Boligbank,' which was established in 1917. Its capital amounted to 23,000,000 kroner in 1931, on June 30, 1931, the total amount of bonds issued was 114,539,000 kroner. The loans on mortgage amounted to 193,156,000 kroner.

Further, several private credit associations are authorised to meet the demand for loans on mortgage. In 1931, there were 6 such associations in operation. The total amount of bonds issued by these credit associations at the end of 1931 was 95,549,000 kroner, and the total amount of loans on mortgage was 93,290,000 kroner.

In the year 1922, Den Norske Stats Fisherbank (established by law 1919) started with the purpose of making loans to fishermen for fishing vessels and fishing outfits, etc. The capital of the bank is furnished by the State and amounted to 6,500,000 kroner in 1931. On June 30, 1931, the total amount of bonds issued was 10,120,000 kroner, and the total amount of loans was 7,128,000 kroner.

In the year 1926, the Norges Kommunalbank was established by law for the purpose of making loans to communities. The bank began its operations on September 1, 1927. On Dec. 31, 1931, the capital and reserve of the bank was 30,444,000 kroner, of which 25,893,000 were furnished by the State. The total amount of bonds issued was 167,332,000 kroner, and the total amount of loans was 155,885,000 kroner.

At the end of 1931, there were 145 private joint-stock banks reported, of which, however, 33 were in liquidation. The severe deflation period of 1921-23 caused several joint-stock banks to suspend their payments. In 1923, therefore, a new law was passed whereby banks in difficulties could continue their operations under administration by the State. The total amount of capital and funds possessed by joint stock banks was 238,980,000 kroner (capital 182,649,000, funds 56,331,000), of which 276,700,000 kroner belonged to banks in free operation. Deposits amounted to 1,372,680,000 kroner, of which 116,016,000 kroner were deposits on demand, and 1,256,614,000 kroner deposits on time, 948,119,000 kroner of the total amount of deposits were deposited at banks in free operation.

The number of savings-banks at the end of 1931 was 622, of which 11 were in liquidation. The total amount of the funds of the savings banks

amounted to 205,773,000 kroner, and total deposits 2,150,268,000 kroner, of which 18,300,000 kroner were on demand, and 2,131,968,000 kroner on time. The number of depositors was 2,144,376.

As from January 1, 1925, all private joint-stock banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance.

Money, Weights, and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 ore, is of the value of 1s 1½d at par, or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8.960572 grammes, .900 fine containing 8.0645 grammes of fine gold. The standard of value is gold. National Bank notes of 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is ordinarily bound to exchange them for gold on presentation.

The metric system of weights and measures is obligatory.

SPITZBERGEN, BEAR ISLAND, AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° longitude east of Greenwich and between 74° and 81° latitude north. The distance from Norway to Bear Island is 240 miles, and to Spitzbergen (South Cape) 360 miles.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitzbergen in 1607. In the 17th century a very lucrative whale-hunting was started and for some time there were Dutch, British, and Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Spitzbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a Treaty, signed on February 9, 1920, at Paris, in which Norway's sovereignty over the archipelago was recognised. On August 14, 1925, the archipelago was officially taken possession of by Norway.

Total area about 24,294 square miles. The chief islands are West Spitzbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island, and Bear Island. The climate is essentially arctic, tempered by the Gulf Stream.

Coal is the principal product. There are six mining camps inhabited all the year round. The largest is Longyearbyen in Advent Bay, 550 inhabitants on December 1, 1930. In 1929, 239,719, in 1930, 195,530, in 1931, 206,345 tons of coal were exported.

JAN MAYEN ISLAND.

This is a bleak and desolate island between Greenland and Northern Norway, and about 300 miles north of Iceland. It is 34 miles long and its greatest breadth is 9 miles. It is of volcanic origin and is mountainous, Beerenberg in the north reaching a height of 8,850 ft. It is uninhabited, but is occasionally visited by seal hunters, whalers, and fishermen. In 1921 the Norwegian Meteorological Institute established a weather forecast station.

there, and the decision of the Norwegian Government to annex the island was largely due to this action.

The island was discovered by Henry Hudson in 1607, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name was taken from that of a Dutch navigator of the early 17th century, whose claim to have visited the island cannot be substantiated. For the period of a year (1882-83) an Austrian station for scientific observations was maintained there. On May 8, 1929, Jan Mayen Island was officially proclaimed as incorporated in the Norwegian State, and at the same time the manager of the meteorological station on the island was invested with magisterial authority. The final relation to Norway was settled by law of February 27, 1930. Norwegian sovereignty over the island has been officially recognised by the British Government.

BOUVET ISLAND.

This uninhabited island in the Southern Atlantic was discovered in 1789 by a Frenchman, Pierre Bouvet, but no flag was hoisted till, in 1825, Captain Norris raised the Union Jack. A neighbouring island, Thompson Island, has been reported but its existence is seriously doubted. In 1928 a diplomatic dispute arose between Great Britain and Norway as to the claim to Bouvet, particularly in connection with the occupation since December 1927, by a Norwegian whaling expedition, and the Norwegian decision to erect a wireless station on the island, and Great Britain decided in November 1928 to waive its claim. By law of February 27, 1930, it is stated that Bouvet Island belongs to Norway as a dependency.

Diplomatic Representatives.

1 OF NORWAY IN GREAT BRITAIN

Envoy and Minister in London.—P. Benjamin Vogt, G C V O. (Appointed May 7, 1910.)

Counsellor—Daniel Steen

Secretary—R. Andersen

Agricultural Adviser—Albert Riple

Consul General—G. K. Conradi.

2. OF GREAT BRITAIN IN NORWAY.

Envoy and Minister—Sir Charles John FitzRoy Rhys Wingfield, K C M G. (Appointed October 16, 1929.)

First Secretary—G. D. H. Fullerton-Carnegie, M C.

Military Attaché—Col. A. F. A. N. Thorne, C M G., D.S.O.

Naval Attaché—Commander M. A. Hawes, R N.

Air Attaché—Wing-Commander J. H. Herring, D S.O., M C.

Commercial Secretary—C. L. Paus, C B E.

Consul at Oslo.—N. Vorley, O B E.

There are consular representatives at Bergen, Skien, Stavanger, Tromsø, Larvik, and other places.

PANAMA.

(REPÚBLICA DE PANAMA)

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 18 recognised by the Government of the United States, and soon afterwards by the other Powers. In 1914 Colombia, in the Treaty of Bogota entered into with the United States, agreed to recognize the independence of Panama. This Treaty was ratified by the United States and Colombia in 1921. On May 8, 1924, a Protocol was signed at Washington by the Panama and Colombian Plenipotentiaries by which diplomatic relations between the two countries were established.

The Constitution, adopted February 13, 1904, and amended in 1918 and again in 1928, provides for a National Assembly of 32 members elected for four years (one for every 15,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected by direct vote for 4 years, and not eligible for the succeeding term.

President of the Republic—Dr Harmodio Arias. Elected June 5, 1932. Assumed office, October 1, 1932.

There are three Vice-Presidents, chosen by the National Assembly, and a Cabinet of five Ministers.

Area and Population.—Extreme length is about 480 miles, breadth between 37 and 110 miles, coast line, 477 miles on the Atlantic and 767 on the Pacific, total area is 32,380 square miles; population according to the census of 1930 (excluding the Canal Zone), 467,459, of whom 18,813 were white, 69,588 Negroes, 42,897 Indians, 4,188 Orientals and 249,583 mestizos or mixed. There are approximately 40,000 British subjects on the Isthmus, chiefly coloured, from the West Indies. There are 9 provinces with populations (1930) as follows (the capitals in brackets)—Bocas del Toro (Bocas del Toro), 15,851, Coclé (Penonomé), 48,244; Colón (Colón), 57,161, Chiriquí (David), 76,918, Los Santos (Las Tablas), 41,218, Panama (Panama City), 114,103, and Veraguas (Santiago), 69,548, Herrera (Chitré), 31,030; Darien (La Palma), 13,391. The capital, Panama City, founded in 1518, on the Pacific coast, had (1930) 82,827 inhabitants, and Colón on the Atlantic coast (1930), 33,460. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis, and Puerto Armuelles, on the Atlantic, Bocas del Toro, Portobello, and Mandinga.

Religion.—The religion of the country is Catholicism, but other denominations are represented and have a fair following. In the Canal Zone Protestantism chiefly prevails.

Education.—Elementary education is obligatory for all children from 7 to 15 years of age. The Government maintains 598 primary schools through out the nine provinces and 57,592 children (excluding children enrolled in the Canal Zone public schools) received free instruction in 1929–30 from 1,688 teachers. Only 65 primary schools are in cities; the remaining 533 are in rural districts. The co-educational system has been adopted in all the

schools of the Republic Panama has a University (Instituto Nacional), with 626 students in 1930, a normal school for girls (576), and a school of arts and crafts or trades for boys from 14 years of age. Secondary, vocational and normal schools enrolled 2,175 students in 1929-30. In addition there are about 71 private institutions. Panama City is to be the site of the Bolivarian University, the formation of which was agreed upon in June 22, 1926, as an expression of Pan-American solidarity; it is to be supported by contributions from Colombia, Ecuador, Panama, Peru, and others.

Justice.—The laws were codified and promulgated in 1917 and 1918. These codes—civil, penal, commercial, judicial, administrative, fiscal, and mining—are designed to meet modern conditions, and replace the old Colombian laws formerly in use. The death penalty has been abolished. The Supreme Court consists of 5 justices appointed for 10 years.

Finance.—All the revenue collected on importations into the Republic belongs to the Panama Government, but the United States reserve the right to import supplies of all descriptions required for canal construction and for the use of their employees free of all taxes.

Expenditures and revenues are on a biennial basis, for two years ending June 30 through 1929-31, thereafter ending February 28. For recent years budget estimates have been as follows (1 balboa = 1 dollar U.S.)—

	1923-25	1925-27	1927-29	1929-31	1931-33
	Balboas	Balboas	Balboas	Balboas	Balboas
Revenue	16,475,400 ¹	12,258,700	14,302,488	17,081,908	19,961,353
Expenditure	15,991,120	12,258,700	14,302,488	17,081,908	18,600,934

¹ Including 3 loans totalling 9,200,000 dollars.

The revenue includes an annual subsidy of 250,000 dollars from the United States so long as the latter maintains and operates the canal.

The Public Debt on April 30, 1932, amounted to 18,076,706 balboas or dollars. The foreign debt consists of bonds to the value of 15,617,000 dollars issued in the United States (about 2,000,000 dollars in Canada) for railway, road construction, and public works. The internal debt amounted to 2,459,706 dollars. In addition the Government has a contingent liability for about 4,000,000 dollars borrowed in the United States and Canada by the Banco Nacional and lent out on the security of real property in the Republic. Debt service in 1931-33 will take 3,840,000 dollars.

The Republic has no army or navy to support. The National Police Force numbers 60 officers and 630 men.

Production.—Of the whole area about five eighths are unoccupied, and of the remainder only a small part is properly cultivated. Immigration of European settlers is discouraged. The most important product is bananas, the exports of which, chiefly to the United States, account for two-thirds of total exports, in 1931, 2,113,971 stems were exported. Other products are cocoa, coconuts, and ivory nuts. Caoutchouc (about 180 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriquí, near the Costa Rican frontier. Exports, 1930, 600,000 pounds. Other products of the soil of Panama are mahogany and other woods, copaiba, sarsaparilla and ipecacuanha. The country has great timber

resources. Sugar (about 90,000 bags of 100 lbs. each produced annually) and tobacco growing are assuming importance. Cattle rearing (about 350,000 head in 1930) is carried on successfully, and hides form an important article of export. In the province of Coclé (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama. Turtle-shell is also exported to a considerable amount.

Commerce, Shipping, Communications.—The imports and exports (excluding the Canal Zone) for 5 fiscal years ending June 30 and for the calendar year 1931 are shown as follows (1 balboa = 1 dollar, U S).—

Year	Imports	Exports	Year	Imports	Exports
	Balboas	Balboas		Balboas	Balboas
1925-26	14,269,000	3,438,936	1928-29	19,277,988	4,262,124
1926-27	14,514,000	3,785,660	1929-30	18,847,478	3,408,201
1927-28	16,182,000	4,380,129	1931	15,492,469	2,721,435

Of the total imports about 50 per cent. come from the United States (exclusive of canal materials) and 8 per cent. from Great Britain. The principal exports in 1931 were bananas (1,782,646 dollars), cacao (631,931 dollars), coconuts (113,485 dollars), hides, mother of pearl, ivory, nuts, gum, and tortoise shell.

Total trade between Panama and the United Kingdom (Board of Trade Returns) for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Panama to U K	66,814	41,924	89,818	255,489	77,637
Exports to Panama from U K	412,100	481,959	614,200	300,605	271,923
Re-exports to Panama from U K	22,741	26,327	14,029	13,891	12,728

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. All the maritime traffic (international commerce) for Colón and Panama now runs through the Canal Zone ports of Cristobal and Balboa, Bocas del Toro remains for the provincial trade. The Government (1920) appointed a commission to study the possibility of establishing free commercial zones, making Panama a general distribution centre for pan-American trade. The port of Puerto Armuelles, opened in 1928, provides an outlet for bananas from plantations in the neighbourhood. Shipping under Panamanian registry totalled (1928) 50 vessels of about 50,000 net tons.

The Panama Railroad, which connects Panama City on the Pacific with Colón on the Atlantic, is the principal railway in the country. It is 47.61 miles long and, with the exception of the termini at Panama and Colón, passes through Canal Zone territory. As there is no road across the Isthmus, and as most vessels unload their cargo at Cristobal (Colón), the greater portion of the merchandise destined for Panama City is brought by the Panama Railroad. In the Province of Chiriquí there is a narrow gauge railway, 32 miles long, connecting the port of Pedregal with Boquete, and passing through David, the capital. Between David and Concepcion there is a line 18 miles long, which has now been extended to the Port of Puerto Armuelles.

A central highway system from the capital, Panama City, west to the Costa Rican frontier is under construction, the 815-mile section connecting Panama City with David, the capital of the Province of Chiriquí, was opened in March, 1931. Road building is handicapped by the extraordinary number of bridges required by the contour of the country.

Commercial aviation rapidly developed in Panama during 1929. Daily air service, in both directions, connects Colón and Panama, while air mail and passenger services exist between the Isthmus and countries of South, Central and North America.

There are telegraph cables from Panama to North American and South American ports, and from Colón to the United States and Europe. There are 189 Government telephone stations, 38 telegraph offices, and ten radio stations, seven of which are operated by the Navy Department of the United States.

Money and Credit.—In 1930, the old Panamanian silver currency to a value of approximately 272,000 dollars was withdrawn from circulation. A portion of these coins was used in minting new coins of half the weight and size of the old ones, but of twice the value. The present monetary unit is the *Balboa* which is of the same size and fineness as the United States silver dollar and is equivalent in value to that coin. 200,000 of these coins were minted and placed in circulation in 1931. Other silver coins are the half-balboa (of 12.5 grammes 900 fine, and equal to 50 cents, U.S.), the quarter and tenth of a balboa pieces; and nickel coins of 5 and 2½ cents. There is no paper currency other than U.S. notes. Altogether 500,000 balboas of the new Panamanian silver currency have (1932) been placed in circulation.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States, particularly in New York real estate.

English weights and measures are in general use as well as those of the metric system.

The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use of a zone (Canal Zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For the needs of the Panama Canal other territory was ceded and, for defence, the coastline of the zone and the islands in Panama Bay were also ceded. The cities of Panama and Colón remain under the authority of Panama, but complete jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars and is paying 250,000 dollars yearly, beginning in 1913. The treaty was ratified on February 26, 1904, and in July, 1904, the agreement for the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. A treaty to cede further territory, particularly in Colón, to the Canal Zone, and to bind Panama to consider herself joint-belligerent with the United States in the event of war, was rejected by the National Assembly in 1927, but discussion of it has revived.

Governor of Canal Zone—Brigadier-General H. Burgess. Appointed October 16, 1928.

The area of the Canal Zone, including land and water, but not including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 552 8 square miles. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 163 4 square miles.

The Canal has a summit elevation of 85 feet above the sea. It is 50 72 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 5 miles, and from the Pacific shore line to deep water is about 5½ miles, hence the length of the Canal from shore to shore is approximately 40½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The average time of passage through the Canal is from 7 to 8 hours. The record passage is 4 hours 10 minutes. The maximum traffic capacity of the Canal is estimated at 48 ships of usual size in a day or about 17,000 in a year.

The Gatun dam along the crest is 8,400 feet long, including the spillway, or over 1½ miles, and ½ mile wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, i. e., 85 feet above sea level, is about 388 feet. The length of the cut through the Continental divide (Culebra, now Gaillard Cut) is 8 statute miles. The minimum bottom width of the cut is 300 feet. The bottom is 40 feet above sea level, giving a normal depth of 45 feet.

The civil population of the Canal Zone in June, 1932, was 30,980, of whom 8,416 were Americans. Of this population, 2,458 Americans and 4,714 of other nationalities (chiefly British West Indian negroes) were employed by The Panama Canal and Railroad. The total force employed July 1, 1932, was 3,148 Americans and 9,120 coloured aliens, many of whom did not reside in the Canal Zone. No land in the Zone is privately owned and the Zone is, in effect, a Government owned reservation dedicated to the operation, maintenance and protection of the Canal and its appurtenances. However, building sites and agricultural lands are licensed to responsible companies and individuals.

The total capital investment for the construction, operation and maintenance of the Canal to June 30, 1932, totalled 533,106,009 dollars, and the net revenues from tolls and other sources since it was opened to navigation have totalled 160,888,376 dollars. The current expenses of operation and maintenance, inclusive of depreciation and amortisations during the fiscal year 1931-32 were 9,839,212 dollars, and the gross Canal revenue was 21,034,013 dollars, gross business receipts, 17,580,215 dollars. Computing interest at 3 per cent on the capital investment of 530,479,286 (on July 1, 1931), there was a deficit of 4,162,482 dollars for Canal operations during the fiscal year ending June 30, 1932.

The Canal was informally opened to commerce by the passage of the 9,000 ton steamer *Ancon* on August 15, 1914, with specially invited guests. The journey was made without mishap in ten hours. It was formally opened to commerce by proclamation of the President of the United States on July 12, 1920. The Canal has been in use since 1914, except for various short periods in 1915, and from September 18, 1915, to April 15, 1916, when the channel was entirely blocked by slides in the banks of Gaillard Cut. There has been no interruption since January 11, 1917.

Particulars of the traffic through the Canal for the last 6 fiscal years are given as follows —

Fiscal year ending June 30	Northbound (Pacific to Atlantic)		Southbound (Atlantic to Pacific)		Total		Tolls levied (in dollars)
	Vessels ¹	Cargo, tons	Vessels	Cargo, tons	Vessels	Cargo, tons	
1927	2,587	19,164,888	2,888	8,588,827	5,475	27,748,215	24,228,830
1928	3,072	21,820,575	3,384	8,310,184	6,456	20,630,709	26,944,500
1929	3,065	20,780,466	3,348	9,882,520	6,413	30,663,006	27,127,877
1930	3,050	20,554,507	3,135	9,475,725	6,185	30,030,232	27,076,890
1931	2,725	18,402,371	2,804	6,681,439	5,529	25,082,800	24,645,457
1932	2,162	14,172,640	2,344	5,685,358	4,506	19,807,998	20,707,877

¹ U. S. Ocean going commercial vessels, excluding Canal vessels and launches, and U S Government vessels

Of the total number of commercial transits of the Canal during the year ended June 30, 1932, 1,917 were American, 1,054 British, 311 Norwegian, 338 German, 179 Japanese, 81 French, 114 Swedish, 117 Dutch, 105 Danish, and the remaining 290 of 13 other nationalities. Total commercial transit, 4,506.

The postal address of the Canal administration is The Panama Canal, Balboa Heights, Canal Zone.

Diplomatic and Consular Representatives.

1 OF PANAMA IN GREAT BRITAIN

Envoy and Minister —Dr Narciso Garay. Appointed 1931 (Resident in Paris)

Secretary —Raul A. Amador

Attachés —Dr Alfonso Picciado, Alfredo de St. Malo and Pedro de Obarrio

Consul-General (in London) —I. de J. Valdes, Jr

2 OF GREAT BRITAIN IN PANAMA

Envoy Extraordinary and Minister Plenipotentiary —Sir Josiah Crosby, K B E, C I E (Appointed July 16, 1931)

Naval Attaché —Capt P. Macnamara, R N

Military Attaché —Lt Colonel M. F. Day, M C

Consul for the Republic —G. L. Rogers, Colón

Vice-Consuls at Panama —C. H. A. Marriott and E. S. Humber, M B E

Vice Consul at Colón —F. B. A. Rundall

There is also a Vice Consul at Bocas del Toro

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840 Subsequently, in 1844, a new Constitution was adopted providing for the election of a President President Lopez, in 1864, began a dispute with the Government of Brazil, which resulted in the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, Lopez was killed at Cerro Corá, March 1, 1870, in the last battle of the war

The Constitution of 1870 provides for a Congress of two Houses, a Senate (now of 20 members) elected for six years (one-third every two years),

and a Chamber of Deputies (now of 40), elected for four years (one-half every two years). Both are elected directly by the people, the former in the ratio of one representative per 8,000 to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. Voters are all males 18 years of age or older. A Permanent Committee of two senators and four deputies sits when Congress is not in session.

The President is elected for four years; he has a cabinet of five ministers, presiding over the departments of the Interior; of Finance, of Justice, Worship and Public Instruction, of War and Marine, and of Foreign Affairs. The President receives a salary of 30,000 pesos per month, and each of the ministers 15,000 pesos.

Provisional President of the Republic—Dr Eusebio Ayala. Elected June 12, 1932; assumed office, August 15, 1932.

The country is divided into 2 sections: the 'Oriental,' east of Paraguay river, and the 'Occidental,' west of the same river. The Oriental section is divided into 12 departments, subdivided into 104 'partidos', the Occidental section (the Chaco) is divided into 8 'comandancias militares'.

The 12 departments are Concepción, San Pedro, Caraguatay, Villarrica, Yhú, Caazapa, Encarnación, San Ignacio, Quiindy, Villeta, Paraguari and Pilar. The civil authority is exercised by a *comisario de policía* in each of the departments, who is subject to the control of Government *jefes de policía*, or *delegados civiles*, 9 in number. The capital, Asunción, forms a district subdivided into 'secciones policiales.'

Area and Population.

The approximate area of Paraguay proper or 'oriental section,' which is situated between the rivers Paraguay and Alto Paraná, is estimated at 159,884 square kilometres, or 61,647 square miles. An area officially stated to be 100,000 square miles in extent, lying between the rivers Paraguay and Pilcomayo, known as the Chaco, is claimed by Paraguay, whose rights, however, are disputed by Bolivia. Serious friction developed in December, 1923, and the two countries broke off diplomatic relations, which were not fully resumed until May, 1930, only to be broken off again in July, 1931. Despite efforts of neutral countries to induce the parties to sign a pact of non aggression, skirmishes occurred in the Chaco in the summer of 1932, leading to a state of open warfare in September.

In 1930 the total population was estimated at 857,337 (including 67,500 in the Chaco, of whom Indians are roughly estimated at 15,000), with a density of 5 per square mile. The population of Paraguay (oriental section) consists of people of *meztizo* (mixed white and Indian), Indian, and European (chiefly Spanish), blood, the latter largely predominating. There are practically no negroes in Paraguay. On December 31, 1931, the urban population of the capital, Asunción (founded 1537), was 91,156, or about one ninth of the total population, including the surrounding district, it was 228,600 or over one fourth; other towns, as estimated in 1926, are Villarrica, 26,000, Concepción, 11,000; Encarnación, 7,500. San Pedro, 8,700, Luque, 13,000, Carapegua, 12,000; Paraguari, 10,000, Villa del Pilar, 6,000. These figures include the surrounding districts in each case, and are estimated.

Paraguayans are bi-lingual, speaking both Spanish and Guaraní, the language of the now extinct Guaraní Indians, who held the country at the time of the Spanish conquest.

Immigration from 1905 up to January, 1932, totals 19,274, including

3,491 Mennonite farmers from Canada, Russia and Poland. Most of the immigrants settle in the 27 state-aided colonies. Only 663 immigrants arrived in 1931. Very little land is now national property, most of it having been transferred to private ownership, much of it in very large tracts.

Religion, Education, and Justice.

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. The seat of the Paraguayan Archbishopric is Asunción, there are Bishoprics at Villarrica and Concepcion. Roman Catholic and other religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage.

Education is free and nominally compulsory, but schools are not everywhere available. In 1931 there were 1,572 Government and private primary schools with 108,741 pupils and 1,911 teachers, 48 private schools had (1931) 178 teachers and 4,372 pupils. The National College (*i.e.*, high school) at Asunción had (1931) 1,121 students. There is also a University which had in 1931, 349 students and 36 professors, complete autonomy in appropriate spheres of university affairs was granted in 1929 to a body including students, alumni and faculties. The 6 normal schools had (1932) 736 students.

Justice is administered by a Supreme Court, two courts of appeal (one for civil causes and another for commercial and criminal causes), a court of jurymen, 17 judges of First Instance, and (at the capital) 3 police magistrates. The functions of magistrates are exercised in the provinces by 139 *juces de paz* (all laymen), who are at the same time registrars of births, deaths, and marriages.

Finance.

The estimated revenue and expenditure for six fiscal years, ending August 31, are given as follows (the gold peso, like the Argentine gold peso, equals 96.5 cents (U.S.), roughly 5 gold pesos or 213 paper pesos = £1, but the average rate in 1931 was 6.83 gold pesos or 291 paper pesos = £1) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Gold pesos	Gold pesos		Gold pesos	Gold pesos
1926-27	6,108,888	6,108,758	1929-30	6,306,227	7,082,944
1927-28	5,187,469	5,147,668	1930-31	6,458,240	6,445,945
1928-29	6,950,181	6,950,185	1931-32	5,704,080	5,703,004

Internal revenue, 1930-31, amounted to 1,633,005 gold pesos (239,093½), customs, 2,974,225 gold pesos (485,465½).

On November 30, 1931, the external debt of Paraguay was 3,540,774 gold pesos, the consolidated internal debt was 3,161,787 gold pesos, the floating debt was 627,770 gold pesos. By an agreement reached September, 1924, Paraguay has resumed payment of interest on her sterling loan of 1871-72 (476,290½ in 1931), and of 4,315½ annually in reduction of the principal, and on that of 1915 (209,900½), on which she pays annually 10,861½ in reduction of the principal.

Defence.

The small army of Paraguay is entrusted to an Argentine military commission. Establishment is about 100 officers and 2,800 men, distributed at 5 centres. The permanent organisations comprise 4 regiments of infantry,

1 regiment of cavalry, and 2 batteries of artillery. In the event of war service is compulsory in the active army for 2 years between the ages of 18 and 20, between 20 and 29 in the reserve of active army, between 29 and 39 with national guard, and between 39 and 45 in the territorial guard.

The navy consists at present of a flotilla of 2 new armoured river gun-boats of 835 tons (built in Italy) and 3 small converted merchant vessels, river craft armed with modern guns. The largest of the latter is about 200 tons gross register. The budget expenditure on national defence in 1930-31 amounted to 67,978,222 paper pesos.

Production and Industry.

The soil of Paraguay is productive and the climatic conditions favourable to the cultivation of many sub tropical products. Much of the country is admirably suited to pastoral purposes. It is estimated that there are about 4,000,000 head of cattle in the country. There are four packing plants, encouraged by the Government; hides, jerked beef, corned beef and other animal products are exported. *Yerba mate*, or strong-flavoured Paraguay tea, which is a natural product of the virgin forests (covering from 25,000 to 30,000 square miles) as well as a plantation product, is one of the chief articles of export (6,843 metric tons in 1931). Tobacco is also grown (14,142 metric tons in 1932). Timber resources of excellent quality are enormous. Paraguay produces in the Chaco region quebracho logs, of which 552 tons were exported in 1931 and quebracho extract, exports, 35,834 tons in 1931. Fruit growing, especially oranges, is general, exports in 1932, 62,410,000 oranges and 11,738,000 tangerines. Yaguaron is the chief source of petit-grain oil, distilled from the leaves of a bitter orange tree and used in the manufacture of many perfumes. It is exported chiefly to France and Germany. The total area devoted to sugar cultivation (largely for the manufacture of spirit) is about 35,000 acres, sugar production in 1932, 8,318 tons. There are 10 sugar factories in Paraguay, the most important of which is at Tebicuari. Some rice is grown—3,500 tons in 1931. Banana growing has started. Roots (chiefly mandioca, sweet potatoes, and ground-nuts), &c., are grown for local consumption, but agriculture is primitive. About 87,450 acres are planted to maize, output (1932) 63,075 tons. The cultivation of cotton of the American uplands type is encouraged by the authorities, it matures early and reaches the market when the American crop is scarce. Labour shortage is the main difficulty. In 1931-32 the acreage under cotton was 27,264 acres, production, 8,141 metric tons, ginned cotton, 2,423 metric tons. Lace-making, of the 'spider-web' variety, is a thriving industry.

Iron, manganese, copper, and other minerals are encountered in abundance. The Ibicui iron mines were worked as early as 1863. The Quiquí and Ibicui manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel and Quiquí.

Commerce.

The following is the value, in gold pesos, of the imports and exports (5 gold pesos = £1, but in 1931, average rate was 6.83 gold pesos = £1) —

	1927	1928	1929	1930	1931
	Gold pesos	Gold pesos	Gold pesos	Gold pesos	Gold pesos
Imports	11,977,766	14,305,119	13,850,095	15,189,859	10,080,732
Exports	14,282,040	15,686,208	18,450,766	14,176,433	12,836,525

Exports in 1931 included hides (347,207), corned beef (4,825 tons), meat extract (470 tons), and cotton (2,746 tons). The most important imports are cotton and woollen textiles, wheat, flour, and petrol. Of the total exports in 1931, goods to the value of 11,804,821 gold pesos, or about 92 per cent. of the total, went to Argentina, whence goods to the value of 5,406,107 gold pesos were re-exported. Imports from Argentina, 1931, 2,956,693 gold pesos; United States, 1,628,069; British Empire, 1,461,069.

The trade between Paraguay and the United Kingdom (Board of Trade Returns) for 5 years —

Re exports to Paraguay from U K	3,845	1,960	2,655	934	524

Communications.

Asunción, the chief port, is 950 miles from the sea, the Paraguay river is navigable up to Villa Concepción for vessels of 12-foot draft. Smaller vessels navigate its 1,800 miles. In 1931, 3,585 vessels, with an aggregate tonnage of 892,333 tons, entered at the port of Asunción, and 3,864 with a tonnage of 386,054 cleared. The principal company engaged in the river service on the Paraguay and the Alto Paraná is the Argentine Navigation Company, Ltd., the controlling interest in which is British.

There is a British-owned railway (the Paraguay Central Railway) from Asunción to Encarnación, on the Rio Alto Paraná. This railway has a total main track length of 232 miles. There is now a through train service without break of bulk from Asunción to Buenos Aires. El Ferrocarril del Norte, owned by a Paraguayan company, runs from Concepción as far as Horqueta, a distance of 33 miles. This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. The Azucarera Paraguaya, in the Department of Ibytymi, has 15 miles of its line open to the public. Total length of railways, 669 miles. The country roads are in general mere bullock tracks, and transport is difficult.

The national telegraph (110 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world, total, 2,944 miles. Telephone lines, 1932, 4,636 miles. Long-distance telephone communication with Posadas was established in 1932. Wireless telegraph stations have been erected at Asunción, Concepción, Paraguari, Bahía Negra, and Puerto Casado. Paraguay joined the postal union in 1881; the number of post offices is 257.

Money and Credit.

The unit of value is the gold peso, which is based on the Argentine gold peso, at par, it is equal to 96 5 cents (U S). Actually there is no gold or silver current, and the paper peso, which is roughly equivalent to one English penny, is the only circulating medium with the exception of nickel coins which, in the shape of one peso, two pesos and fifty cents pieces, form a small part of the currency. One gold peso = 42 61 paper pesos. Business and governmental transactions are frequently stated in both gold and paper pesos. The total paper and nickel currency in circulation on December 31, 1931, was 202,114,230 paper pesos, guaranteed by Conversion Fund and deposits in other banks.

From 1923, when finances were reorganized on the lines suggested by an

American financial adviser, the State Bank's Exchange Office, with its separate capital of 1 000,000 gold pesos (Oficina de Cambios) maintained the exchange at 18 75 Paraguayan paper pesos to the Argentine paper peso and 42 61 Paraguayan pesos to the Argentine gold peso, the world wide exchange difficulties of 1932 led to joint control with Argentine of the country's foreign exchange resources

The principal banks in Paraguay are a branch of the Bank of London and South America, Ltd., the Banco Germanico de la America del Sud, the Banco del Hogar Argentino, and the Banco Agricola. The last mentioned is practically a department of the Government, charged with agricultural development. Some contraction in banking facilities is taking place, commercial banks which reported on December 31, 1930, combined capital and reserves of 1,019,481 gold pesos, had on March 31, 1932, capital and reserves of 946,467 gold pesos

Weights and Measures.

The metric system was officially adopted on January 1, 1901

Diplomatic and Consular Representatives.

1 OF PARAGUAY IN GREAT BRITAIN

Chargé d'Affaires.—Rogelio Espinoza

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, Bradford, and Southampton

2. OF GREAT BRITAIN IN PARAGUAY

Consul and Chargé d'Affaires—R. H. Tottenham Smith

PERSIA.

(IRÂN)

Reigning King (Shah).

On October 31, 1925, the Majlis, 'in the name of the national welfare,' proclaimed the deposition of the Shah, Sultan Ahmad, and the overthrow of the Kajar dynasty. On December 13 the Constituent Assembly elected **Riza Khan Pahlevi** Shah of Persia, and made the Crown of Darius hereditary in his family. On December 15 the new Shah took the oath to defend the Constitution, and on December 16 he was publicly proclaimed. On Feb. 25, 1926, he appointed his eldest son, Shahpur Mohammed Riza, Valiahd (Crown Prince) of Persia. Riza Shah was crowned on April 25, 1926

Constitution and Government

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shah, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahids*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious standing. In 1905, the Persian people demanded representative institutions, and in January, 1906, the Shah gave his consent to the establishment of a National Assembly, or 'Majlis,' which sat from October, 1906, to June, 1908, and drew up a 'Constitution' which received the Shah's approval on December 30, 1906. Each term of the Majlis lasts 2 years. The new Majlis was opened by the Shah on March 15, 1933.

The government of the country is in the hands of the Cabinet, composed as follows (March 1933):—

Prime Minister — Mehdi Quli Khan *Hedayat* (Mokhber es Saltaneh)

Minister for Foreign Affairs — Mirza Mohamed Ali Khan *Foroughi* (Zoka-ul Mulk).

Minister of Interior — Mirza Ali Khan *Mansur*

Minister of Finance — Mirza Seyed Hassan Khan *Taqizadeh*

Minister of Roads and Communications — General Abdul Majid Mirza *Firooz*

Minister of War. — Jassaf Gholi Khan *Assad*.

Minister of Justice — Mirza Ali Akbar Khan *Davar*.

Minister of Education — Yahya Khan *Qaragozlov*

Minister of Post and Telegraphs. — Mirza Farajullah Khan *Bohramy*.

Ministry of National Economy (directed by Directors General) —

Commerce. — Abdullah Khan *Yessai*

Industry and Agriculture. — Seyed Mehdi Khan *Farrukh*.

The country is divided into twenty-six provinces, which are governed by governors-general, who are directly responsible to the central Government. Governors-general and governors are generally called Hâkim, but the former usually have the title of Wâli. Each quarter of a town or parish, and every village, has a chief who is called Katkhuda. These officers are generally appointed by the governors, but sometimes elected by the citizens. The chiefs of nomad tribes are called Ilkhâni, Ilbegi, Wâli, Sirdâr, Sheikh.

Towns generally have a municipality, the director of which is nominated by the Central Government.

Area and Population.

Persia, which has an area of about 628,000 square miles, lies between 25° and 40° north latitude and between 44° and 63°30' east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as to approximate, on the average, 16 inhabitants to the square mile.

The population is estimated at 10 millions, but all figures are largely conjectural. It is estimated that the country contains some three million nomads. Of these, 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Baluchis and Gypsies, 234,000 Lurs. These figures, however, are merely round numbers, and estimates vary.

The principal cities of Persia are — Teheran and district, with about 350,000 inhabitants, Tabriz, 180,000, Isfahan, 100,000, Meshed, 85,000, Resht, 80,000, Kerman, 80,000, Kermanshah, 40,000, Shiraz, 35,000, Yezd, 30,000, Barfurush, 30,000, Hamadan, 30,000, Kazvin, 30,000, Kum, 25,000, Sultanabad, 20,000, Kashan, 15,000, Mohammerah, 10,000, and Abadan, 40,000.

Religion.

Of the population about 7½ millions are Moslems of the Shi'a sect, and of that branch of it known as the *Ikhtlâ' Ashariyya*, who recognize twelve Imâms or spiritual successors of the Prophet Mahomet, 850,000 are of the Sunni sect, 10,000 are Parsis (Gabras), 40,000 Jews, 50,000 Armenians, and 80,000 Nestorians, there are also many 'Bahais' and some Christians, whose number cannot, however, be estimated.

The Moslems of the sect called Shi'a differ to some extent in religious doctrine (especially in their rejection of the *Sunna* or traditional body of rules, as distinct from the actual text of the Koran), from the Moslems of the Turkish Empire, who are called Sunni. The Persian priesthood (ulemâ) is still powerful. The highest authority, the chief priest of all, is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the vicegerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Imâm-i-Jama, chief of the great mosque (Masjid-i-Jama) of a city, are appointed by Government. Under the Imâm-i-Jama are the push namâz or khatib (leader of public prayers and reader of the Khutba, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavali (guardian of the mosque), this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakfs), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and dependants.

The Gregorian National Armenians form two dioceses, each under a bishop, the one residing at Tabriz, and the other at Isfahan. There are also

a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urumia. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside

Education

In recent years Public Instruction has made rapid strides, the old system of instruction, which was generally religious, has been practically entirely changed, and at present a tolerably adequate education can be obtained in general knowledge from native professors who have studied abroad, although, of course, the purely religious schools are still maintained in the Mosques, and the old 'Maktab'—street schools for the very young at which the mere rudiments of reading and writing are taught—still abound. In 1930 there were 127,000 children at school (18,170 girls), of these 25,000 attended Middle Schools and 4,600 High Schools.

The Government pays the whole budget of Government Schools and grants are paid to the public, private and foreign schools. Religious Schools are maintained from endowments. During 1929–30 more schools were opened and the total budget of the Ministry of Education for 1930–31 was 20,906,430 rials and 97,399 pahlavis, of which 50,000 rials and 82,778 pahlavis was set aside for students abroad.

The Foreign Schools are maintained by funds from abroad supplied by The American Presbyterian Mission, The Church Missionary Society, The Alliance Israélite, and The French Roman Catholics Mission, and there are also schools run by the German and Soviet Governments, all the above have schools for boys and for girls.

Justice.

The judicial system of Persia is modelled on that of France. There are justices of the peace in villages and small towns, higher courts in the larger towns, police magistrates in all important places, courts of appeal in Teheran, Tabriz, Shiraz, Kermanshah, Isfahan, Meshed, Kerinan and Ahwaz, and a court of cassation, or supreme court, in Teheran. The courts are supervised by the Ministry of Justice. New Civil, Criminal and Commercial codes based on French and Swiss codes have been introduced into the Courts of Justice.

Finance.

The most productive items of revenue in order of importance are usually Customs Receipts, Anglo-Persian Oil Co. royalties, Sugar and Tea monopoly, and Land Tax and Road Tax. The incidence of taxation, which is mainly indirect, weighs most heavily on the labouring classes.

Approximate gross Customs receipts for three years were — 1928–29, £2,325,565, 1929–30, £2,119,917, and 1930–31, £1,466,934.

The budget estimates for 1932–33 are — revenue, 421,400,000 rials and 787,000^l, exclusive of the royalty of the Anglo-Persian Oil Co., the revenue from the sugar and tea monopolies and part of the proceeds of the road tax, expenditure, 421,399,870 rials and 407,176 pahlavis, exclusive of certain expenditure on railways and roads. The royalties from the Anglo-Persian Oil Co. are deposited in London and regarded as a treasury reserve. According to the Persian Ministry of Finance, the sum of 2,700,000^l was held by the Persian Government in London on March 20, 1932, most of this amount having come from the royalties.

On March 20, 1931, the recognised foreign debts of Persia were —

Loans	Original Amount			Outstanding		
	£	s	d	£	s	d
1911 Loan	1,250,000	0	4	1,111,250	4	0
British Advances 1912-14	490,000	0	0	490,000	0	0

The debt incurred to Great Britain during and immediately after the war, which has been placed at 2,000,000*l*, has not yet been funded. The total floating debt at the same date was 6,661,428 rials

Defence

The army consists of 46,000 men, exclusive of the Amnieh (Gendarmerie). The latter number 8,000 and are used for the surveillance of roads and other armed police duties

The army, air force and navy cost some 2,000,000*l* annually. The organisation is a Central Garrison at Tehran, numbering some 12,000 men, two weak divisions based on Tabriz and Meshed, and nine independent brigades, of varying strength, based on Khureemabad, Senneh, Ahwaz, Kermanshah, Asterabad, Resht, Shiraz, Isfahan and Kerman

The army has recently been re armed and equipped at a cost of about 1,000,000*l* with material bought in Czechoslovakia

Military service became compulsory under the Conscription Act passed in 1924. This Law is now being generally enforced, except in certain tribal areas, and the supply of conscripts exceeds the numbers required

The air force has seven or eight serviceable aircraft and about the same number capable of short flights only. The aircraft are of several types, chiefly De Havilland pattern aeroplanes manufactured in Russia with Liberty engines

The Persian navy consists of 2 gunboats armed with 2 naval guns of 102 mm and 2 anti aircraft guns of 76 mm, and 4 motor patrol vessels built in Italy in 1931-32. In addition they also possess 2 obsolete gunboats stationed in the Persian Gulf. Some 250 officers and ratings have been trained in Italy, and an Italian naval mission is at present on commission with the Persian navy

Production and Industry.

Persia produces oil, wool, skins, casings, drugs, fruits, gums, rice, cotton, wheat, &c. special attention is being paid to the textile industry. Production in 1930-31 was estimated by the Department of Agriculture as follows (in tons)—rice, 360,000, cotton, 46,000, tobacco, 30,000; and wheat, 1,420,000. The wool of Khurasan is famous. Persian carpets, of which there are many kinds, are all made by hand. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman

The mineral deposits of Persia are considerable but undeveloped. They include iron, coal, copper, lead, manganese, marble, borax, nickel, and cobalt. Oil is being developed with much success. The turquoise mines of Nishapur are worked in a most primitive fashion but with profit, as also are the iron oxide and rock salt in the Persian Gulf

The production of the Anglo-Persian Oil Company, which holds a concession for the whole of the country except the five northern provinces, was 1930, 5,989,802 tons; 1931, 5,780,000 tons; 1932, 6,600,000 tons.

Commerce.

On February 25, 1931, the Government established a monopoly of foreign trade, operating through a system of Government permits.

The principal centres of commerce are Tabriz, Teheran, Hamadan, Meshed, and Isfahan, the principal ports, Bandar Abbas, Mohamerah, and Bushire on the Persian Gulf, and Astara, Enzeli, Meshed i-sar, and Bandar Gaz on the Caspian.

According to the statistics published by the Minister of Finance the values of the imports and exports for six years were as follows —

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1925-26	20,253,448	24,353,793	1925-29	17,069,861	31,596,960
1926-27	16,189,800	22,716,049	1929-30	15,859,534	27,152,868
1927-28	16,450,193	21,617,164	1930-31	12,784,868	23,088,643

The following table shows (in thousands of krans 63·40 krans = 1l in 1930-31, and 58 krans = 1l in 1929-30) the values of the chief imports into, and exports from Persia —

Imports	1929-30	1930-31	Exports	1929-30	1930-31
	1000 Krans	1000 Krans		1000 Krans	1000 Krans
Cotton textiles	166,878	142,820	Mineral oils	1,087,586	1,006,190
Sugar	115,578	104,917	Carpets and rugs, wool	146,438	124,715
Machinery, etc	46,087	88,078	Fruits, fresh and dried	46,999	57,861
Tea	70,139	65,713	Opium	70,218	49,180
Mineral oils and greases	43,765	45,101	Rice	33,167	32,011
Vehicles of all sorts	46,087	55,012	Cotton, raw	39,852	81,252
Hardware, etc	22,734	26,853	Wool, raw	15,774	23,264
Boils, pipes etc.	22,694	26,353	Gum tragacanth	17,989	16,176
Arms and munitions	221	21,501	Silk cocoons	13,327	14,714
Iron and steel bars, etc	22,775	20,821	Silver	4,337	12,824
Cotton yarn	19,626	19,109	Sheep casings	13,603	10,673
Haberdashery & house			Lambskins, raw	9,146	9,050
hold utensils	27,163	18,474	Hides, prepared	10,551	6,788
Textiles, woollen	19,808	11,776	Livestock	2,258	6,630
Total (including all others)	919,658	810,579	Total (including all others)	1,574,837	1,468,819

In the years ending March 20, 1930 and 1931, the distribution of the trade of Persia was as follows —

From or to	Imports		Exports	
	1929-30	1930-31	1929-30	1930-31
	1000 Krans	1000 Krans	1000 Krans	1000 Krans
British Empire	356,429	368,021	768,638	653,006
Belgium	41,671	23,317	29,176	35,268
France	61,860	27,185	118,334	91,477
Germany	60,066	66,777	60,180	75,991
Iraq	6,511	8,885	29,176	30,244
Italy	21,139	22,410	13,642	52,056
Japan	6,096	9,268	4,361	31,785
Netherlands	9,190	16,171	118	4,901
Russia	274,716	234,242	148,586	153,327
Turkey	527	1,595	28,316	22,532
United States	72,093	36,091	66,534	66,265

The chief imports from Persia to United Kingdom in 1931 were, according to Board of Trade returns: Motor spirit, 1,216,156*l.*, and crude petroleum, 2,288,009*l.* The chief exports to Persia were iron and steel, 182,615*l.*, machinery, 117,793*l.*, and cotton piece goods, 129,054*l.*

Total trade between Persia and United Kingdom (Board of Trade returns) for 5 years:—

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Persia to U K	9,044,869	9,147,918	8,776,807	5,791,868	6,979,205
Exports to Persia from U K	1,628,649	2,260,727	2,694,514	727,443	826,967

Banking and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title 'The Imperial Bank of Persia,' and incorporated by Royal Charter, dated September 2, 1889. The bank has recently conceded its sole right of note issue to the Persian Government. There is also established at Teheran the Russian 'Banque d'Escompte,' formerly 'Banque des Prets de Perse.' This Bank, with all its Concessions, was in March, 1921, handed over to the Persian Government by the Soviet authorities, and is now 'The Bank of Iran,' and forms part of the Ministry of Finance. The Ottoman Bank has also established branches in Teheran, Hamadan, and Kermanshah. Latterly the Russians started a bank, under the auspices of the Soviet Government, which has branches in both the northern and southern provinces. A Government Pawnbroking Establishment was founded in January, 1927, and a 'National Bank' in September, 1928. During the year 1929, the National Bank of which Dr F. Lindenblatt, a German, is director, opened branches in all the chief provincial towns. There is also the Bank-i Pahlavi with branches in the important towns in the north.

Communications.

Tonnage entered at Bushire, Lingah, Bandar Abbas, Mohammerah, and several smaller ports was in 1930-31, 6,201,530 tons, of which 5,848,423 were British, 258,549 German and 93,488 Russian, the Persian total was 206,325 tons, at Caspian ports 456,016 tons, of which 357,925 (steam) were Russian and 4,168 (steam) Persian, and 21,478 tons (sail) Russian, and 67,600 tons (sail) Persian. The total number of vessels entered and cleared at Persian ports in 1930-31 was 15,853 compared with 16,319 in 1929-30.

During recent years the opening up of Persia by further road construction has been the policy of the Central Government. Whilst a good road, according to European standards, does not exist in Persia, except in the Anglo-Persian Oil Co.'s area, roads passable for motor traffic are general throughout the country. The traveller, however, has still much discomfort to contend with.

Taking Teheran, the capital, as the centre, the following main routes are available for all forms of motor traffic.—(i) Teheran to the Caspian Sea (Port Pahlavi) via Kasvin and Rasht, (ii) Teheran to Tabriz, (iii) Teheran to Baghdad via Kasvin, Hamadan and Kermanshah, (iv) Teheran to Basra via Sultanabad, Burujird-Khurrumabad-Dizful-Ahwaz and Mohammerah; (v) Teheran to Bushire via Isfahan and Shiraz, (vi) Teheran to Bandar Abbas via Isfahan and Kerman, (vii) Teheran to Meshed, (viii) Teheran to the

Caspian Sea (Port Bander-i-Gaz) via Barfarush; (ix) Teheran to Duzdap. Two routes (a) via Meshed, (b) via Kerman. Several subsidiary roads exist, the most important being — (i) The coastal road on the southern shore of the Caspian Sea from Port Pahlevi to Port Bander-i-Gaz, (ii) Hamadan to Isfahan via Sultanabad, (iii) Kermanshah to Burujird, (iv) Shiraz to Kerman via Niriz, and (v) Meshed to Askabad. A road was opened in 1932 to connect Tabriz with Nisibin via Rowanduz. Several of the above roads are blocked by snow for 3 or 4 days at a time between December 15 and April 1.

Total length of railways 467 miles, as follows — Tabriz-Julfa, 85 miles, Sofian-Sharifkhareh, 30 miles, Mirjawa-Duzdap, 104 miles, Resht-Pir i Bazaar, 7 miles, Teheran-Shah Abdul Azim, 5 miles, Bandar Shahpur-Dizful, 156 miles, Ahabad-Bandar Shah, 80 miles. These last two sections are at the southern and northern ends respectively of the line which is projected between the Persian Gulf and the Caspian. Work is continuing at each end, but progress is slow owing largely to the difficulty of the country which has now to be traversed.

Navigation on the Lake of Urumiah, from Sharafkhaneh to Golmankhaneh is served by some five tugs and 15 barges for the transport of goods and passengers. The service runs twice a week. On the River Karun like wise, from Mohammerah to Ahwaz (Nasseri), a fortnightly service both ways is run by the Mesopotamia Persia Corp., Ltd., and some native firms run daily trips by motor boat, for passengers and merchandise. By changing into lighter draught boats at Nasseri both can be taken up to Shalili near Shushtar.

The telegraph system attains a length of 7,964 miles with 13,829 miles of wire. In virtue of several conventions, dating from 1863, between the British and Persian Governments, the Indian Government constructed, and until March, 1931, maintained and worked with its own staffs the Indo-European Telegraph Department line from Teheran-Kum-Kashan-Isfahan-Shiraz to Bushire, and thence to Fao and also Karachi, this line is 669 miles in length with 2,292 miles of wire and 7 stations, and the Central Persia Telegraphs from Teheran via Kashan-Yezd-Kerman-Bam to the Beluchistan frontier and thence to India with a mileage of 1,467 line and 4,183 wire and 10 stations. The Indo-European Telegraph Co. maintained communication between Teheran and Tabriz and on to Julfa, which connects with the European systems. Number of telegrams in 1929, 735,737 internal, 104,559 foreign.

The Indo-European Telegraph Company, as well as the Indo-European Telegraph Department, relinquished all their telegraph lines in Persia on February 28, 1931, thenceforward all these lines came under the direct control of the Persian Telegraph Administration with the exception of the land-line between Jaok and the Indian frontier near Gwadur, which is exploited by the Imperial and International Communications Company.

Wireless has been installed at Teheran, Tabriz, Meshed, Kermanshah, and Shiraz, and wireless stations are being completed in Kerman and Ahwaz. Teheran is in wireless communication with Europe via Tiflis and Beyrout.

In 1932 the Government purchased the telephone system from the lessees, the "Société Anonyme des Téléphones Persans" for one million toman, and it is now generally under Government control.

In 1929, 6,199,800 letters and 256,700 post-cards were handled in the internal service; in the foreign service, 1,518,400 letters and 22,600 post-cards were received, and 1,197,400 letters and 124,200 post cards despatched.

Money, Weights, and Measures.

Persia has a gold standard, the unit of which is the *rial*, containing 0.07322382 grammes of gold. One hundred *rials* make one *pahlavi*.

The gold standard is not, however, in force, for, by a law passed on March 13, 1932, there is no obligation to pay out gold pending a return to more normal economic conditions.

The actual unit of currency is a *rial*, which contains 4.14 grammes of silver and is the equivalent of the *kran*, which is now obsolete, but which has not been altogether withdrawn from circulation. For Accounts the cent, an imaginary coin the equivalent of 1/100 *rial*, is usually employed.

Weights and measures based on the metric system are to be introduced, and arrangements are being made.

The actual unit of weight is the *miskâl* (71.6 grains), subdivided into 24 *nakhods* (2.96 grains) of 4 *gandum* (74 grain) each. Sixteen *miskâls* make a *sir*, and 40 *sir*=1 *batman* (Tabriz). Most articles are bought and sold by a weight called *batman* or *man*. The *mans* most frequently in use are—

<i>Man-i-Tabriz</i>	= 8 <i>Abdâst</i>	= 640 <i>Miskâls</i>	= 6 546.41b
<i>Man-i-Noh Abdâst</i>	= 9 <i>Abdâst</i>	= 720 „	= 7 30 „
<i>Man-i-Kohneh</i> (the old man)		= 1,000 „	= 10 14 „
<i>Man-i-Shâh</i>	= 2 <i>Tabriz Mans</i>	= 1,280 „	= 12 98 „
<i>Man-i-Rey</i>	= 4 <i>Tabriz Mans</i>	= 2,560 „	= 25 96 „
<i>Man-i-Bandar Abdâst</i>		= 840 „	= 8 52 „
<i>Man-i-Hâshemi</i>	= 16 <i>Mans</i> of	720 „	= 116 80 „
Corn, straw, coal, &c., are sold by <i>Kharvâr</i> =100 <i>Tabriz Mans</i> = 654.64 „			
3½ <i>Kharvâr</i> =1963.92 lbs = 1 short ton (very nearly)			

The unit of measure is the *zar* or *gaz*, of this standard several are in use. The most common is the one of 40.95 inches, another, used in Azerbaijan, equals 44.09 inches. A *farsakh* theoretically=6,000 *zar* of 40.95 inches=3.87 miles. Some calculate the *farsakh* at 6,000 *zar* of 44.09 inches=4.17 miles. It is about 3½ miles in South Persia and about 4 miles in the North. On some of the main roads distances in kilometres have been marked.

The present measure of surface is *jerib*=1,000 to 1,066 square *zar* of 40.95 inches=1,294 to 1,379 square yards.

Diplomatic Representatives

1 OF PERSIA IN GREAT BRITAIN

Chargé d'Affaires—Fathollah Khan Noury Esfandiary

Second Secretary—Mirza Hossein Khan Ghodse

Attaché—Abdol Abad Khan Yekta

Honorary Commercial Attaché—Nubar Sarkis Gulbenkian

Consul General in London—Mirza M. Garvini

2 OF GREAT BRITAIN IN PERSIA

Envoy Extraordinary, Minister Plenipotentiary and Consul General—Reginald Hervey Hoare, O.M.G. (Appointed October 12, 1931)

Second Secretary—H. L. Baggallay

Third Secretary—D. L. Busk

Military Attaché—Lieut.-Col. P. O. R. Dodd, D.S.O., M.V.O., I.A.

Commercial Secretary—E. R. Lingeman

There are Consular representatives at Teheran, Tabriz (C), Bushire (C G), Bandar Abbas, Meshed (C G), Istahan (C-G), Seistan, (re named in 1931, Zabol), Kerman, Mohammerah, Shiraz, Kermanshah, Hamadan, Ahwaz, Sultanabad, Birjand and Duzdab (re-named in 1931, Zahedan)

PERU

(REPUBLICA DEL Perú)

Constitution and Government.

The Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence on July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule.

The following table gives a list of Presidents from 1899 to 1982 —

Don Eduardo Lopez de Romaña, Sept 8, 1899—Sept 8, 1903	Don José Pardo y Barrera, Sept 24, 1915—Oct. 12, 1919 ^a
Don Manuel Candamo, Sept 8, 1903—May 7, 1904 ^a	Don Augusto Bernardino Leguía, Oct. 12, 1919—Aug 24, 1930 ^a
Don Serapi Calderón (Acting), May 7, 1904—Sept 24, 1904	General Don Manuel Ponce (Acting), Aug 24, 1930—Aug 28, 1930 ^a
Don José Pardo y Barrera, Sept. 24, 1904—Sept 24, 1908	Colonel Don L. Is. Sánchez Cerro (Acting), Aug 28, 1930—March 1, 1931 ^a
Don Augusto Bernadino Leguía, Sept. 24, 1908—Sept 24, 1912	Don Ricardo Leuclio Elías (Acting), March 1, 1931—March 5, 1931 ^a
Dr. Don Guillermo Enrique Billinghurst, Sept 24 1912—Feb 4, 1914 ^a	Colonel Don Gustavo Jiménez (Acting), March 5 1931—March 10, 1931 ^a
General Don Osmar Raimundo Benarides (Acting), Feb 4, 1914—Sept 24, 1915	Colonel Don David Samanez Ocampo (Acting), March 10, 1931—Dec 8, 1931

^a Died

^a Deposed

^a Resigned

According to the Constitution of January 18, 1920, the legislative power is vested in a Senate (35 members) and a House of Representatives (110 members), and renewed totally every five years. Both senators and deputies are elected by a direct vote. Congress normally meets annually on July 28, and sits for 90 to 120 days, a new Congress was elected October 11, 1931, to recast the Constitution. Voters are males, at least 21 years old, who are able to read and write.

The executive power is entrusted to a President, elected for 5 years and eligible for re-election indefinitely (under a change in the constitution authorized in 1927). He receives 25,500 soles a year.

President—General Luiz M. Sanchez Cerro. Elected October 11, 1931, assumed office, for 5 years, December 8, 1931.

The President exercises his executive functions through a Cabinet of seven ministers, holding office at his pleasure. The ministers are those of the Interior, War, Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 14,280 soles a year.

The 20 departments are divided into provinces (113 in all), and these are subdivided into 983 districts. Each department is administered by a Prefect, and each province by a Sub-Prefect. Municipal councillors are elected by direct vote, and foreigners are eligible.

Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1862 showed a total population of 2,487,916, that of 1876 put the number at 2,699,106, of whom about 13.8 per cent were white, 1.9 per cent negroes, 57.6 per cent Indian, 24.8 per cent mestizos (Cholos and Zambos), and 1.9 per cent Asiatic, chiefly Chinese. It is estimated (1930) that the population exceeds 4,500,000 of which 600,000 are white. The language is Spanish, but the Indian population has its own language, either Quechua or Aymara.

To promote the assimilation of the Indian population, estimated at 4,000,000, the Government in 1930 declared June 24 of each year to be a national holiday, 'day of the indigene,' to be celebrated with appropriate ceremonies. By a decree issued in 1927, the Indians were freed from the peonage system which existed in some regions.

The population of the province of Lima, containing the capital, according to the official census in November, 1931, was 373,875, and of the province of Callao 70,141. Lima city had 272,742 inhabitants. The estimated population in 1928 of other cities was Arequipa 46,000; Cusco 40,000,

Chiclayo 35,000, Ica 20,000, Trujillo 30,000, Chinchu 20,000, Huancayo 20,000, Ayacucho 20,000, Iquitos 10,000, Huaráz 20,000, Piura 15,000

Revised estimates, allowing for the cession of 43,970 square miles to Colombia (Salomon-Lozano Treaty, 1927), and of 8,103 square miles to Chile in 1928 put the present area at 481,698 square miles. The areas of the 20 departments and 3 provinces (Callao, Tumbes and Moquegua), according to estimates supplied by the Lima Geographical Society (1915), are given below with the population, according to the census returns of 1876 (the latest official one) and an official estimate for 1927. The chief towns are shown in brackets —

Departments and Provinces	Area English square miles	Population		Pop per square mile, 1927
		1876 (census)	1927 (estimated)	
Departments				
Amazonas (Chachapoyas)	13,943	34,284	80,000	5.7

Grand Total	532,047	2,609,106	6,147,000	11.1

¹ Created in 1912

² No longer a Department of Peru

Efforts to encourage immigration of Europeans, including Germans, Austrians, Poles and Cossacks by opening up to them some 8,000,000 acres have been only partially successful, and considerable land has been repatriated since 1929.

The long standing dispute with Chile over the provinces of Tacna and Arica (see STATESMAN'S YEAR BOOK for 1928, page 1198) reached an amicable stage in July, 1928, when the two countries resumed diplomatic relations and made a fresh attempt to settle the question by direct and friendly negotiations. On February 21, 1929, it was announced that a settlement had been reached, Tacna going to Peru and Arica to Chile. Demarcation and joint policing of the boundary were accomplished in August, 1930.

As to the boundary dispute with Bolivia an arrangement has been come to by direct negotiations between Bolivia and Peru. The frontier line between them was fixed from the mouth of the Heath to that of the Yaverija (1912), and is being finally demarcated by a joint commission. Those with Colombia and Ecuador (for the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold, lying about the head waters of the Amazon) were referred to the mediation of the United States, Argentina, and Brazil. Direct negotiations may possibly be initiated between Peru and Ecuador. The Salomon-Lozano Treaty, establishing the boundary between Peru and Colombia, was ratified by the former in 1927, and by Colombia in 1928, but on September 6, 1932, Peruvian civilians from Iquitos seized the Colombian town of Leticia, east of Iquitos, and demanded a revision of the treaty. A definite arrangement has been made with Brazil as to boundary favourable, on the whole, to Peru, and this was finally demarcated in 1927 by a joint commission.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador, Colombia and Peru.

Religion

By the terms of the new Constitution there exists absolute political and religious liberty, but the Roman Catholic religion is the religion of the State, and in 1929, a decree was issued permitting only Roman Catholic religious instruction in schools, State or private. There is a Roman Catholic archbishopric (Lima, dating from 1545) 16 bishops and vicars-general, 4 Apostolic Prefects, 641 intermediate officials, 1,123 priests and 1,790 monks. The 1,109 churches, 51 convents and 72 religious houses are the property of the State. The Junta of Government in October, 1930, decreed that all marriages must be civil, regardless of religion and preceded by medical examination. Liberal divorce regulations, including divorce for 'absence without just cause for 50 days,' were also established. Divorcees may re marry immediately.

Education and Justice.

Elementary education is compulsory for both sexes between the ages of 7 and 14, and is free. The system is highly centralized, all teaching appointments are made by the Ministry of Education. In 1930, there were in Peru 3,562 primary schools with about 6,200 teachers and 342,016 pupils, 36 secondary schools (excluding private schools under supervision) with 697 teachers and 11,826 pupils and 4 normal schools with a registration of 1,610. Budget appropriations for education in 1932, 9 469,848 soles. Special schools for the Indians enroll about 1,780. There are also 30 travelling schools. Higher education is normally provided at the central university in Lima, called 'Universidad de San Marcos,' founded by Charles V in 1551, its autonomy, previously limited in 1928, was restored by the Junta in 1930, but it was closed in 1932, it had in 1929, 169 professors and 1,531 students in five faculties and two institutes. There are small universities at Arequipa (founded in 1827), with (1932) 223 students, Cuzco with 106 students, Trujillo, 104 students, and the Catholic University (Lima) with 153 students. There are State Colleges of Agriculture, Arts and Trades, and Engineering in Lima.

Justice is administered in the Supreme Court at Lima composed of 10 judges and 4 fiscals, and in 13 Superior Courts throughout the Republic. There are 151 Minor Courts of First Instance. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Govern-

ment; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

Finance

The revenue and expenditure for 5 years were as follows in soles (10 soles = the old Peruvian pound; 1 sol = 28 cents U S) :—

	1928	1929	1930	1931	1932 ¹
	Soles	Soles	Soles	Soles	Soles
Revenue	121,981,080	140,358,820	117,888,192	90,755,105	96,928,296
Expenditure	120,611,640	140,204,550	129,672,755	102,689,247	96,928,296

¹ Budget estimates

For account of the old foreign debt of Peru and the arrangements reached regarding it with the Peruvian Corporation, see THE STATESMAN'S YEAR BOOK for 1931, p. 1183

The total debt of Peru (December 31, 1931) amounted to 503,214,464 soles, of which the internal debt amounted to 139,485,698 soles, and the foreign debt to 363,728,766 soles (at par). The latter included 90,000,000 dollars (U.S.), calculated at the old par value of the sol, 40 cents, U.S., and 3,500,000¹ sterling, at par. External debt service in 1930 took Lp 1,449,780, of which guano exploitation, railroads and docks furnished 85 per cent. Internal debt service took Lp 354,919. But in May, 1931, Peru suspended interest and sinking fund payments on external debt until economic conditions improve. British investments (1930) amounted to 26,828,300¹ of which about 75 per cent (20,209,400¹) was represented by the Peruvian Corporation. American investments total 200,000,000 dollars, of which (1931) holdings of Government bonds represented 76,000,000 dollars and direct interest in railways and industries represented 124,742,000 dollars.

Defence.

ARMY

Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours, the remainder being formed into local battalions, who receive instruction one day in the week (Sundays). The term of service is 2 years in the active army, 5 years in the first reserve, 5 in the second reserve, and 20 years in the National Guard.

The country is divided into 5 military districts, each furnishing a complete division. The division is made up of 2 regiments of infantry of 2 battalions each, with 1 machine gun company; 1 topographical section, 1 medical section, 1 commissariat section, 1 or 2 regiments of cavalry (2 squadrons), 1 regiment of mountain artillery.

The army at present is organized as follows: of infantry there are 20 regiments, of artillery 5 regiments, 5 mounted infantry companies, 5 battalions of engineers, 1 aviation squadron, and an independent commissariat corps.

The peace establishment of the army in 1931 was 1,165 officers and 7,880 other ranks. Police and gendarmerie amount also to about 8,000 including civil guards and mounted police. The civil guard has been reorganised into 11 cavalry regiments, 1 infantry regiment of 4 battalions, 1 independent battalion and 1 machine gun battalion. Rifle instruction is also given in Peruvian schools. There is a military academy and war college at Chorillos,

near Lima. In May, 1927, the Peruvian army which for some years prior to 1924 had been in the hands of a French Military Mission, was entrusted to the technical direction of an ex-German general, who resigned in 1929.

The infantry is armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of the same type and model, artillery with the Schneider Canet gun and machine gun battalion with Danish light machine guns, 'Maatsan'.

Aviation, both military and civil, is controlled by a Director-General of Aviation, under the Ministry of Marine and Aviation.

Army, Navy and Aviation appropriations in the 1932 budget were Army, 14,358,142 soles, Navy and Aviation, 6,586,786 soles, total, 20,944,929 soles.

NAVY

The Peruvian Navy consists of the following units—2 obsolete cruisers, *Almirante Grau* and *Coronel Bolognesi*, 3,200 tons, 24 knots speed, each with 2 6 inch and 12 lighter guns, built in 1906, and re-boilered and adapted for oil fuel in 1923-25, 4 submarines, 1 submarine tender, *La Lima*, 1 destroyer and a sailing training ship. In addition there are 3 river gun-boats on the Amazon. There is a naval school for cadets at La Punta, near Callao, and a submarine base on San Lorenzo Island, opposite Callao.

Agriculture and Industry.

The country may be divided into three zones—the coast strip, with an average width of 30 miles, the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper, and the forest or wooded region, called the Montaña. In the arid coast region the government has brought under irrigation 62,400 acres during the last few years, large irrigation projects have been started in the Olmos desert near Pimentel in northern Peru, and near Arequipa in southern Peru.

About 80 per cent of the population is dependent on agriculture, mainly with the help of irrigation. The chief agricultural productions of Peru are, in the order named—cotton, sugar, coffee, wool, hides, and skins. Cotton production from 304,536 acres in 1930-31 reached 141,280 metric tons or 50,700 tons of ginned cotton, of which 46,896 tons, valued at 30,869,348 soles, were exported. Output of cotton seed, 90,530 metric tons. The sugar industry is carried on chiefly by irrigation in the river valleys of the coast region and by sinking wells (1 lb of sugar is estimated to require 500 gallons of water). Peru is a low cost producer. About 50 large estates covering 132,000 acres raise 95 per cent of the crop. In 1930-31, the production was 389,848 tons of which 330,211 tons were exported in 1931. The chief coffee growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work on about 2,750,000 acres. Exports in 1931, 2,069,199 kilos. Cocoa cultivation is extending, especially in the Perené region. Wheat growing on the plateaus of the Andes is encouraged. Total area under wheat in 1931, 280,188 acres, production, 94,835 metric tons. Rice is extensively grown; the quality is excellent, but the quantity (101,752 tons in 1930-31) is insufficient to meet local wants. The gathering of wild rubber, once the most important industry in the Amazon region of Peru, where it was shipped from Iquitos, 2,000 miles down the Amazon to the Atlantic, has declined in importance with the competition of plantation rubber. Exports of balata from this region have taken its place, but as the trees are felled, not tapped, this too is declining. Tobacco

(in Northern Peru), wines and spirits, olives, ramie, and maize are also produced. The manufacture, importation and sale of tobacco is a Government monopoly, it can only be grown under licence. Silk culture is being tried in the coast region. Coca is grown for the Indian population which chews the leaf, but cocaine is manufactured in Lima, Otuzco, and several other towns, principally for export to Japan, exports about 3,000 pounds. In addition there are dyes, cinchona, and other medicinal plants. Alpaca, sheep, and llama wool are exported. Peru produced (1931) 1,904 metric tons of wool and 2,308 metric tons of alpaca.

The guano deposits on Huanillos, Punta Lobos, and Pabellon de Pica, amounting to 40 or 50 thousand tons, which had been granted to the Peruvian Corporation, reverted to the Peruvian Government on February 2, 1901, remaining deposits reverted to the Government in 1928. Output in 1931-32, 94,7000 metric tons.

Copper and petroleum are the chief minerals exploited. The chief mine, the Cerro de Pasco, has been operated for three centuries. Peru is the world's largest source of vanadium (furnishing 80 per cent of world consumption) and perhaps the only country where vanadium is mined for itself alone. Gold is widely found, even in the rivers, but transport and labour difficulties hinder mining, present gold output is chiefly a by product of copper and other mining. A decree of October 20, 1930, nationalized all gold deposits not already allocated. Nationals have priority in concessions. Iron deposits are large, the Government-owned field at Marcona has about 500,000,000 tons, it is estimated.

The following table shows the mineral production for two years (in soles, the new unit, 10 soles = the former Peruvian pound) —

		1930		1931 ¹	
		Quantity	Value	Quantity	Value
			Soles		Soles
Copper	Metric tons	48,205	39,084,663	44,880	28,474,176
Petroleum	Barrels	12,167,057	92,548,811	9,926,938	73,742,968
Silver	Kilos	478,664	16,633,335	278,601	9,228,690
Gold	"	2,766	5,207,604	2,470	5,892,720
Coal	Metric tons	201,641	2,706,199	180,000	2,250,000
Vanadium	"	479	9,949,840	—	—
Lead	"	19,774	6,814,227	8,482	1,169,272
Zinc	"	11,278	8,207,851	103	20,886

¹ Preliminary

Total mineral production, which is largely controlled by foreign interests, in 1931 was valued at 128,039,275 soles. Mine concessions, 1931, numbered 6,672. Mine workers number, 1930, 25,791. Two smelters, both American owned, and 2 petroleum refineries, 1 American and 1 Italian, are the largest industrial plants in Peru.

Commerce.

The "official" value of the trade of Peru in five years (including the Department of Loreto) has been as follows (1 sol = 28 cents, U S) —

	1927	1928	1929	1930	1931
	Soles	Soles	Soles	Soles	Soles
Imports	198,641,980	176,266,440	189,452,460	140,261,247	97,989,494
Exports	811,977,250	815,187,760	835,081,460	241,138,250	197,417,166

SHIPPING AND NAVIGATION—COMMUNICATIONS 1199

The values of the principal imports and exports for 2 years are shown by the following table —

Imports	1929	1930	Exports	1930	1931
	Soles	Soles		Soles	Soles
Cotton goods	18,787,740	18,200,720	Sugar	25,640,102	27,764,062
Wool goods	6,912,730	5,049,863	Cotton	41,684,418	30,849,848
Silk goods	1,267,820	986,786	Copper	45,008,568	39,333,729
Jute	5,209,010	4,876,714	Petroleum	70,116,551	53,108,062
Food and drink	35,011,450	23,782,989	Wool	7,077,984	6,176,922
Electrical			Leather	2,864,242	—
machinery	4,710,610	4,085,530			
Chemicals	8,022,770	6,292,465			
Total machinery	38,906,830	28,644,085			

The distribution of the trade was mainly as follows —

From	Imports		To	Exports	
	1930	1931		1930	1931
	Soles	Soles		Soles	Soles
United States	51,800,858	40,009,025	United States	94,815,479	71,932,838
United Kingdom	22,816,748	14,199,463	United Kingdom	44,705,955	43,188,677
Germany	16,113,602	8,591,845	Chile	16,892,469	13,882,924
Sweden	4,312,807	3,457,015	Argentina	19,688,147	11,995,891
Italy	4,749,496	3,050,476	Canada	13,463,841	14,945,474
Argentina	3,667,086	4,743,759	Germany	18,237,140	17,100,071
France	5,154,724	3,261,700	Brazil	7,466,794	5,648,289

In 1931 the principal articles imported by the United Kingdom from Peru were (according to Board of Trade Returns) Sugar (unrefined), 1,284,147l., cotton, 1,977,748l., alpaca, 242,186l., and the principal exports to Peru were Cotton piece goods, 125,257l., woollen piece goods, 29,534l., and iron and steel manufactures, 84,746l.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years (Board of Trade returns) —

	1928	1929	1930	1931	1932
Imports from Peru to U K	6,710	6,462	4,494	3,513	4,388
Exports to Peru from U K	1,053	2,006	1,442	664	727
Re Exports to Peru from U K	85	86	56	41	36

Shipping and Navigation.

In 1931, 1,699 vessels of 5,789,659 tons entered, and 1,692 of 5,785,920 tons cleared, the four principal ports of the Republic. Since December, 1928, the coasting trade has been largely reserved for Peruvian owned vessels with Peruvian crews, they number 181 of 47,727 registered tons.

Internal Communications

There are 11,200 miles of road suitable for motor traffic, including 53 miles of concrete, and 1,116 miles of macadam. There are now two paved concrete highways between Lima and the port of Callao, and others between Lima and Chosica, and Lima and Chorrillos.

In 1931 the total working length of the Peruvian railways was 2,075 miles, including 2,378 miles privately owned and 702 miles retained by the State. These are standard gauge (4 ft 8½ in.), with the exception of three small lines totalling 213 miles, which are 3 ft. gauge.

By an agreement (March, 1921) between the Peruvian Government and the Marconi Company, the latter undertook the administration of the posts, telegraphs, and wireless services for a period of 25 years. In 1931, the Company through 1,104 offices handled 82,421,142 pieces of inland correspondence and 11,212,413 pieces of foreign mail. There were 383 telegraph and telephone stations in 1931, and about 11,813 miles of telegraph lines, number of telegraphic and wireless messages 3,601,306. The telephone system includes about 11,000 instruments. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. There are numerous wireless stations in Peru, broadcasting stations are at Lima and Arequipa. In 1928 an air mail and passenger service between Lima and different points in the Republic was introduced, bi-weekly mail and passenger service between Lima, New York and Buenos Aires has been established.

Money and Credit.

Peru's currency unit is the Peruvian gold *sol* (by law of April 18, 1931), equal to one-tenth of the old Peruvian *libra* or pound, the gold *sol* will not be minted but will contain, theoretically, 42 1264 centigrams of fine gold. Debts contracted in the old Peruvian *libra*, or pound, are payable in *soles* at the rate of 10 *soles* to the pound. The *sol*, formerly worth 40 cents, U S currency, was thus stabilized at 28 cents. But Peru abandoned the gold standard on May 18, 1932. Eventually gold 10-*soles* and 50 *soles* pieces will be minted. Silver is legal tender up to 20 *soles*. Silver coins are the *sol*, and half *sol*, 5/10ths fine. Copper coins are 2 and 1 cent, and nickel coins 20, 10, and 5 cents. Peru has a paper currency issued by the Government of Lp 10, Lp 5, Lp 1 and 5 *sol* denomination. Stock of money on December 31, 1930, included gold coin, 51,075,601 *soles*, silver, 17,748,416 *soles*, notes, 64,084,680 *soles*.

The Government bank of issue, known as the Banco de Reserva del Perú, was established March 9, 1922, and in September, 1931, was reorganized, on the advice of the Kemmerer Financial Mission, as the Central Reserve Bank with a thirty year charter and authorised capital of 30,000,000 *soles* (reduced to 10,000,000 *soles* in May, 1932). In July, 1932, a decree modified considerably the Bank's original statutes. Normally it is bound to hold not less than 50 per cent of cover in gold, first class bankers' acceptances and silver for deposits and notes in circulation. Note circulation, including residue of war time issue of 'cheques circulaires,' on November 30, 1932, was 48,858,210 *soles*, reserves, 48,976,354 *soles*.

Three mortgage banks had on October 31, 1932, a combined capital of 8,750,000 *soles*, loans of 55,843,000 *soles* and bonds of 44,628,000 *soles*. Banks, domestic and foreign, are supervised by the Superintendent of Banks. On September 30, 1932, the paid-up capital of all banks amounted to 25,905,583 *soles*, the reserves to 13,782,711 *soles*, savings deposits on the same date amounted to 17,390,980 *soles*.

Weights and Measures.

The metric system of weights and measures was established by law in 1869, and is coming into general use, except for the customs tariff. It

DIPLOMATIC REPRESENTATIVES—BOOKS OF REFERENCE 1201

came into force in Lima and Callao on September 1, 1916 Spanish measures are still in use.

Diplomatic Representatives.

1 OF PERU IN GREAT BRITAIN

- Envoy Extraordinary and Minister Plenipotentiary*—General Don Oscar R Benavides
First Secretary—Carlos Holguín de Laval
Second Secretary—Pedro Torres Calderón
Military Attaché—Lieut Colonel Don José F V Benavides
Naval Attaché—Manuel D Faura
Commercial Counsellers—Clemente de Althaus and Jorge Chamot
Consul General in London—Carlos A Mackehenie

There are Consular representatives at Belfast, Cardiff, Edinburgh, Glasgow, Liverpool, Manchester, Southampton, and other places.

2 OF GREAT BRITAIN IN PERU

- Envoy Extraordinary and Minister Plenipotentiary*—Charles Henry Bentinck, C M G (Appointed January 17, 1929)
Naval Attaché—Capt Edward de Faye Renouf, C V O, R N
Military Attaché—Major L H G Andrews

There is also a Consul at Iquitos, and Vice-Consuls at Callao, Arequipa, Lima, Mollendo, Trujillo and Paita

POLAND.

(RZECZPOSPOLITA POLSKA)

POLAND was an independent State until the end of the eighteenth century
 The Poles are Slavonic in race and Roman Catholic in religion

During the seventeenth century the position of Poland rapidly declined,
 and eventually, by the three partitions of 1772, 1793, and 1795, the Polish
 Commonwealth, as it was then called, was divided between Prussia, Russia
 and Austria

In 1807, Napoleon formed a part of the Old Commonwealth into a semi-
 independent State under the title of the Duchy of Warsaw and endowed it
 with a very liberal constitution, but in 1815, at the Congress of Vienna, this
 was undone, and Poland was re partitioned between Prussia, Austria and
 Russia, except the small district of Cracow, which was constituted an indepen-
 dent republic and remained such until 1835, when it was annexed by Austria,
 despite a guarantee of neutrality by Prussia, Austria and Russia

During the war Russian-Poland was invaded by the Germans and
 Austrians, and by the end of 1915 the whole country was occupied by the
 Austro-German forces

On November 5, 1916, the German and Austrian Emperors, in a joint
 manifesto, proclaimed the independence of Poland, but neither the boundaries
 nor the constitution of the State were defined. Shortly afterwards a
 Provisional Council of State, consisting of 25 members, all Poles, was
 summoned in order to draft the constitution of the new State, but this body
 did not exist for long In September, 1917, a new Supreme Authority, the
 Regency Council, consisting of three members, was appointed, and under their

auspices a Ministry was formed and a new Council of State summoned. It was composed partly of elected and partly of appointed members, 110 in all. In October, 1918, this Council of State was dissolved by the Regency Council and the convocation proclaimed a Constituent Assembly to determine the constitution of the Polish State and take over the supreme authority.

On November 9, 1918, the Independence of Poland was solemnly proclaimed. On November 14, General Pilsudski returned to Poland, assumed Supreme Power and convoked the Constituent Assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On June 28, 1919, the Treaty of Versailles recognised the Independence of Poland. The same Treaty determined the western frontier of Poland from the sea to Upper Silesia. The fixing of the Polish-German frontier took place after the plebiscite in Upper Silesia and the territory east of the Vistula, according to the resolution of the Council of Ambassadors of August 12, 1920, and October 20, 1921. A resolution of the Council of Ambassadors has also fixed the Polish-Czechoslovakian frontier. Poland's eastern frontiers were determined by the Treaty of Riga, of March 18, 1921, the Allied Powers have acknowledged those frontiers, as also the frontiers with Lithuania fixed by the resolution of the Council of Ambassadors of March 15, 1923.

Presidents since the establishment of the Republic were —

Marshal Joseph Pilsudski, Nov. 14, 1918— Dec. 11, 1922	Stanislas Wojciechowski, Dec. 20, 1922— May 15, 1926
Gabriel Narutowicz, Dec. 11—Dec. 16, 1922 ¹	

¹ Assassinated

President—Ignace *Moscicki*, born on December 1, 1867, in Mierzanów, near Plock, elected President of the Polish Republic on June 1, 1926.

Constitution and Government.

The Constitution of the Polish Republic adopted by the Sejm (Parliament) on March 17, 1921, contains the following fundamental principles. The franchise is universal for both sexes, the voting age being 21 for the Sejm and 30 for the Senate. There are two chambers, a Diet (Sejm) and a Senate, both elected by general suffrage on the system of proportional representation. The President (*Prezydent Rzeczypospolitej*) convenes, opens, prorogues and closes the Sejm. By an amendment to the Constitution introduced in July 1926, the President is empowered to dissolve the Sejm on the advice of the Cabinet, and to issue decrees with the force of law between the dissolution of one Parliament and the meeting of the next, the elections for which must be held within ninety days. It is the President's duty to convene the Sejm for an ordinary session each year before the month of November. By the revised Constitution of July 1926, the Budget can only be discussed in the Sejm from September to January, and if it is not passed by the latter date, the proposals of the Government come automatically into force. The President is the Supreme Commander of the army, except in time of war. He is elected for a term of seven years by the Diet and Senate united in a National Assembly. He can make treaties with foreign Powers. In the case of the President's death, his duties are to be assumed by the Speaker of the House. Any Polish citizen of 41 years of age may be elected President. The President is not responsible either politically or personally, and therefore all his acts must be countersigned by a Minister. Freedom of conscience is granted to all citizens; and all citizens are equal before the law. Every citizen also has the right of preserving his nationality and developing his mother tongue.

The law of July 28, 1922, divides Poland into 64 electoral districts for the Sejm and 17 for the Senate, returning 444 deputies and 111 Senators. At the elections held on November 16 and 23, 1930, the following parties were returned:—Lower House: Government bloc, 247, National Club, 62, Peasants, 48; Socialists, 24; Christian Democrats, 15, National Workmen's Party, 10, Ukrainians, 18, Jews, 6, Germans, 5, Communists, 5, Lesser Groups, 5.

Senate. Government bloc, 74; National Club, 12, Peasants, 6, Socialists, 5; National Workmen's Party, 6, Ukrainians, 4, Germans, 3, Unclassified, 1.

The Executive, called the Council of Ministers (*Rada Ministrów*), was appointed on May 27, 1931, and re-constituted on March 21, 1932, as follows —

President of the Council of Ministers (Premier) — Alexander Prystor
Minister of Military Affairs — Joseph Piłsudski
Minister of Foreign Affairs — Joseph Beck (November 2, 1932)
Minister of Finance — Ladislas Zajączkowski (September 7, 1932)
Minister of Justice — Czesław Michałowski
Minister of the Interior — Bronisław Pieracki
Minister of Industry and Commerce — Dr Ferdynand Zarzycki
Minister of Agriculture and Minister of Agrarian Reforms — Seweryn Ludkiewicz
Minister of Communications and Minister of Public Works — Michał Budkiewicz (September 7, 1932)
Minister of Social Welfare — Dr Stefan Hubicki
Minister of Religion and Education — Janusz Jędrzejewicz
Minister of Posts and Telegraphs — Ing Ignacy Borkner

LOCAL GOVERNMENT

The Polish Constitution provides for the granting of a wide measure of autonomy to County Councils. The County of Silesia received a large measure of autonomy by the constitutional law of July 15, 1920. The Silesian Sejm (Diet), elected in November, 1930, consists of 48 deputies, 41 Polish and 7 German. The autonomous rights of the Counties of Lwów, Tarnopol and Stanisławów, were formulated in the law of September 26, 1922. A uniform system for all the remaining Counties of Poland is in course of elaboration.

By a law of July 31, 1924, the language rights of the Ruthenian, White Ruthenian and Lithuanian minorities were guaranteed.

Area and Population.

The territory of Poland is made up of territories which after the three partitions of Poland in 1772, 1793 and 1795 belonged to Russia (262,166 sq kilometres, or 101,196 sq miles), to Prussia (17,808 sq kilometres, or 6,878 sq miles), and to Austria (80,089 sq kilometres or 30,914 sq miles).

The Republic is divided into the City of Warsaw and 16 counties (*województwo*), subdivided into 264 districts (*powiaty*), and self-governing cities (*miasta wydzielone*). It comprises an area of 149,960 sq miles, and a total population of 32,132,936 (December 9, 1931).¹

The second census was taken in Poland on December 9, 1931, and the following table shows the area and population of the counties —

¹ Without Military in barracks.

County	Area in sq miles	Population (Census 1931)	County	Area in sq miles	Population (Census 1931)
City of Warsaw	48	1,178,211	Poznan	10,248	2,112,871
Warsaw	11,328	2,532,528	Pomorze	6,327	1,086,144
Lodz	7,349	2,632,444	Silesia	1,633	1,298,851

Nowogródek	8,946	1,054,846			
Polesie	14,218	1,183,898			
Wolyn	13,795	2,081,501	Total	149,960	21,927,773 ¹

¹ With military in barracks

Population of principal towns (Census, December 9, 1931) —

Warsaw	1,178,211	Czestochowa	117,692	Kielce	58,397
Lodz	605,257	Bydgoszcz	117,519	Wlodek	56,877
Lwow	816,177	Lublin	112,522	Kalisz	55,118
Poznan	246,574	Sosnowiec	109,454	Piotrkow	51,251
Cracow	221,260	Bialystok	91,835	Grudziadz	50,405
Wilno	197,049	Krolewska Huta	81,287	Dabrowa Gornicza	46,987
Katowice	127,841	Radom	78,072	Kolomyja	33,385
				Gdania	30,210

The urban population at the census of December 9, 1931, represented 27.2 per cent of the total population. Of the total population, 22,052,000 spoke Polish (69 per cent) and 9,890,000 other languages as their mother tongue (31 per cent).

Births, deaths and marriages for three years —

Year	Marriages	Births (excluding still born)	Deaths	Excess of Births
1929	518,929	994,101	290,463	475,178
1930	300,421	1,015,834	490,970	525,404
1931	278,332	765,795	494,893	470,902

Total emigration, 1930, 218,387, 1931, 76,005

Religion

The great majority of the population profess the Roman Catholic faith, but there is no established church in Poland and all denominations enjoy equal rights, though Article 114 of the Constitution declares Roman Catholicism to be the dominant religion.

According to estimates on January 1, 1932, there were in Poland 23,688,123 (74.9 per cent) Catholics, 3,954,529 (12.5 per cent) Russian Orthodox; 3,028,837 (9.6 per cent) Jews, 851,973 (2.7 per cent) Protestants, and other religions, 95,056 (0.3 per cent).

According to the Concordat between Poland and the Vatican, concluded in 1924, Poland is divided into 20 Dioceses with 2 cardinals, 5 archbishops, 20 bishops, and 19 suffragan bishops. The Archbishop of Gnesen is the first ecclesiastic in Poland. The Greek Catholic Church has an Archbishopric in Lemberg and two Bishopsrics, Przemyśl and Stanislawow. Since 1922 there is an Exarchate of the Russian Orthodox Church in Warsaw. The Armenian Catholic Church has an Archbishopric in Lwow.

The Roman Catholic Church has 5,965 churches and 8,373 priests, the Greek Catholic Church, 3,275 churches and 2,144 priests, the Greek Orthodox Church, 494 churches, the Armenian Church, 12 churches and 27 priests; the Protestants, 604 churches and 590 ministers

Education.

All education is free, while elementary education is compulsory. The figures for the whole of the Republic for the year 1931-32, are as follows — 26,939 Elementary schools, with 75,639 teachers and 4,245,626 pupils, 742 Secondary schools, with 13,625 teachers and 201,548 pupils, 224 Teachers' Colleges with 32,736 pupils, and 754 professional schools with 1,238 departments and 70,035 pupils

The following table gives particulars as to the various Polish universities and high schools during the year 1931-32 —

University & year of foundation	Number of Teachers (1928-29)	Number of Students (1931-32)		
		Men	Women	Total
University of Warsaw (1817)	285	5,061	3,446	8,607

Justice and Crime.

By a decree of the President of the Polish Republic of November 6, 1928, providing for the organisation of general courts of justice as from January 1, 1929, unification of all judiciary organisations was introduced for the whole territory of Poland. This decree was subsequently modified by the Law of March 1929, and the decree of the President of the Polish Republic of November 1930. A uniform penal code for the whole of Poland came into operation on September 1, 1932.

The highest judiciary instance in Poland, with 3 judges sitting, is the

Supreme Court in Warsaw, divided into 3 chambers (1) Civil for former Russian Poland, (2) Criminal, (3) Civil for both former Prussian Poland and Austrian Poland

Minor cases are tried before County Courts. More serious cases are dealt with by the Circuit Courts which also act as instances of appeal for cases tried before County Courts. Courts of Appeal are instances for appeal for cases tried before Circuit Courts, and act as instances of cassation for cases tried before County Courts.

The Supreme Court is a Court of Cassation for cases dealt with by Circuit Court.

In 1930 there were 8 jurisdictions of Courts of Appeal, Warsaw, Lublin, Wilno, Cracow, Lwow, Poznan, Torun and Katowice.

In the Supreme Court, in 1930, were 87 judges and 43 public prosecutors, in the 51 jurisdictions of District Courts, 961 judges, 231 examining magistrates, 351 public prosecutors, and in the 568 Courts of Peace, 1,770 judges.

Social Insurance

The types of Social Insurance in Poland are as follows —

(1) Health Insurance (maternity included) for all industrial and office workers, and also for a large proportion of agricultural labourers, (2) Insurance against disablement (inability to work), of the aged and of widows and orphans, for manual workers (only in certain provinces), (3) Similar special insurance for miners and railwaymen, (4) Insurance of office workers against disability to work, of widows and orphans and of unemployment, (5) Insurance against accidents whilst at work, compulsory for all office, industrial and agricultural workers, (6) Insurance against unemployment of industrial workers.

Social Insurance in Poland has, with a few exceptions, been realised on the basis of the following principles: Compulsion, Territorial limitation, Autonomy, Universality and Centralisation, under the Ministry of Labour and Social Welfare.

Most institutions dealing with long term insurance apply various systems of capitalisation guaranteeing to these institutions on the one hand, financial equilibrium for a considerable number of years and, on the other, allowing large reserves to be invested economically and to social advantage.

The dues paid to social insurance institutions, under the supervision of the Ministry of Social Welfare amounted in 1929 to about 579 million zlotys, the total revenue to about 650 million zlotys, and the costs of benefits and allowances—to about 419 million zlotys.

The excess of assets over liabilities amounted to 600 million zlotys at the end of 1928.

In accordance with the existing legislation in Poland dealing with social welfare and assistance, social assistance is obligatory for all those who are temporarily or permanently unable to provide themselves with the means of subsistence and the obligation of administering and defraying the costs of social assistance rests on the local government institutions. The State provides for such persons as War veterans and disabled ex-soldiers, in addition, it exercises a general supervision over the administration of social assistance by public institutions and gives subsidies to existing communal and private institutions. Over 20 million zlotys were assigned for this purpose in the budget of 1930-31.

Apart from public action in the domain of social welfare, the action of private charitable organisations exists and continues to develop. These

consist of boards of guardians and of associations and foundations, some of which conduct quite large institutions.

Finance.

Budget estimates for five years, in millions of zlotys

—	1929-30 ¹	1930-31 ¹	1931-32 ¹	1932-33 ²	1933-34 ²
Revenue	8,029 0	2,747 8	2,262 1	2 377 4	2,088 0
Expenditure	2,992 7	2,809 7	2,467 5	2,451 9	2,499 0

¹ Actual

² Estimates.

The principal items of expenditure for 1932-33 are (in thousand zlotys) Ministry of War, 832,650, education, 348,033, debt service 275,737

The national indebtedness of Poland consists of internal and external debts. On Dec 31, 1931, the total internal debt amounted to 458,646,000 zlotys, and the external debt to 4,569,838,000 zlotys. The external debt comprised (in zlotys) United States, 2,701,390,000, France, 802,998,000, England, 214,812,000. At the same date obligations due to the execution of the Protocol of Innsbruck amounted to 324,799,000 zlotys.

Defence.

Every able-bodied Polish subject is, according to the law of May 23, 1924, liable to serve in the army between the ages of 21 and 40. The duration of service is twenty years. Service in the active army is for two years. The men then pass to the reserve, in which they remain for 18 years. At the age of forty they join the territorial army, in which they remain for 10 years.

In times of peace the Chief Command of the armed forces is exercised by the President of the Republic through the Minister of Military Affairs. The permanent collaborator of the latter is, in conformity with the Law of August 6, 1926, the Inspector General of the armed forces, who in case of war takes over the Chief Command. General questions relating to preparations for the defence of the country are examined by the Committee of National Defence, which, in virtue of the Law of October 25, 1926, is presided over by the President of the Republic. Members of this Committee are, the Prime Minister, the Minister of Military Affairs, the Minister of the Interior, the Minister of Foreign Affairs, the Minister of Finances and the Inspector General of the armed force.

The country is divided into 10 General Military Districts: Warsaw, Lublin, Terun, Lódz, Cracow, Lemberg, Posen, Grodno, Brzesc, and Przemyśl. The strength of the army in 1932 was 17,905 officers and 265,871 other ranks, organised in 30 infantry divisions, 1 cavalry division and 12 independent cavalry brigades.

The air personnel consists of 7,919 officers and men, and comprises 6 aviation regiments, 1 naval aviation group, 1 balloon battalion, 1 meteorological company, 1 air service group. There are, in addition, police and customs forces amounting to 52,640 men. The mobilisable strength of the army is approximately 1,200,000 men.

There are the following fortresses in Poland: in the west, Thorn and Posen; in the south, Cracow and Przemyśl and armed camps; in the east, Brest Litovsk, Grodno, Osowiec; in the interior, Warsaw, Modlin, Dablin.

Poland maintains on the Vistula 12 small gunboats, and two sea going gunboats, *Pilsudski* and *Haller*, 500 tons, have been built in Finland. There are also 1 surveying vessel, 1 armed transport, 4 mine-sweepers, and 5 ex-German torpedo-boats for police service. Two destroyers and 3 submarines were recently completed in French yards. The defence estimates 1932-33 amounted to for land forces, 943,200,000 zlotys for naval forces, 34,300,000 zlotys, for air forces, 78,006 507 zlotys. Total, 1,055,500,000 zlotys. Total for land forces for 1933-34, 822 million zlotys.

Production and Industry

Agriculture — Poland is essentially an agricultural country. The following table shows the area and yield of the principal crops for two years. —

Crops	Area (acres)		Yield (metric tons)	
	1930-31	1931-32	1930-31	1931-32
Wheat	4,495,164	4,265,482	2,264,914	1,846,428
Rye	14,268,033	13,951,060	5,702,681	6,110,461
Barley	3,144,215	2,911,874	1,475,793	1,400,837
Oats	5,307,035	5,450,843	2,399,469	2,390,881
Potatoes	6,715,500	6,709,172	30,988,985	29,974,529
Sugar Beet	567,300	286,792	2,761,248	2,378,389

Other important crops are hemp, hops and chicory.

On July 16, 1920, a law was passed by the Sejm limiting the size of the larger estates and of holdings situated in the neighbourhood of large towns. The maximum has been fixed at 60 hectares (about 150 acres) for estates situated in industrial districts, at 300 hectares (about 1,000 acres) for Posen, Podolia, Volhynia, &c., and at 180 hectares (about 450 acres) for the other parts of the Polish Republic. Since the beginning of parcellation, i.e. during the years 1919-31, 2,027,600 hectares (5,027,304 acres) were parcelled out and 519,300 new farm holdings created.

The forest area of Poland (1931) is 8,322,433 hectares (20,563,853 acres), of which 3,033,174 hectares (7,494,973 acres) belong to the State, and 5,289,259 hectares (13,068,148 acres) to private owners.

On June 30, 1932, Poland possessed 3,938,455 horses, 9,457,265 cattle, 2,784,820 sheep, and 5,840,655 pigs.

Industry — There are eight industrial centres in Poland, viz., Warsaw, Lodz, Cracow, Dabrowa, Katowice, Bialystock, Czeretochowa and Drohobycz.

In the textile industry on December 1, 1931, there were 1,821,285 spindles and 47,666 looms in the manufacture of cotton, and 805,392 spindles and 15,483 looms in the manufacture of wool. Other important industries are paper manufactures of various kinds, chemicals, timber, iron and oil refining. This latter industry is of increasing importance. In December, 1931, there were 30 refineries employing 3,793 workmen, and producing 559,648 tons of refined products, of which kerosene amounted to 175,440 tons, and lubricating oils, to 103,230 tons. In 1932 the output of refineries was 541,140 metric tons. There were in 1930-31, 69 sugar refineries in Poland, producing 775,600 tons of sugar.

The output of the iron and steel industry in 1932 was as follows in metric tons (1931 figures in parentheses) — pig iron, 190,000 (347,000), raw steel, 530,000 (1,037,000), rolled steel, 370,000 (753,000)

Mining — The following table shows the output of the more important minerals for three years (in metric tons) —

Product	1930	1931	1932
Bituminous coal	37,505 649	38,265,010	28,835,000
Lignite	54,962	41,100	33,400

Austria	74,904	37,719	174,699	86,174
Czechoslovakia	100,242	46,047	143,869	89,728
France	109,726	59,384	103,357	61,559
Italy	50,479	29,005	36,200	33,453
Belgium	46,157	28,543	66,716	49,897
Netherlands	40,614	31,560	68,284	52,135
Rumania	13,526	7,916	30,570	29,360

Total trade between Poland (including Danzig) and the United Kingdom for five years (according to Board of Trade Returns) was —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Poland into the United Kingdom	5,781,343	6,908,415	7,948,583	8,612,175	6,185,145
Imports to Poland from the United Kingdom	5,253,329	4,504,771	3,564,177	2,003,774	1,997,281
Re exports to Poland	—	778,821	616,528	573,577	672,073

Internal Communications

In December, 1930, Poland had 28,582 miles of road and 1,701 miles of navigable waterways, of which 298 miles are accessible for vessels of over 400 tons. On December 31, 1932, there were 12,417 miles of railways open for traffic in the Republic. Of this total, 10,976 miles were main line, and 1,441 miles narrow gauge lines. Operating revenue (1931-32) was 1,293,998,000 zloty, and expenses 1,187,036,000 zloty. All the lines are property of the State.

At the end of 1931 there were in Poland 4,066 post offices, including 1,821 postal agencies, 4,972 telegraph stations, and 4,408 telephone exchanges with 194,148 instruments. The length of telegraph lines was 15,590 miles, of local telephone lines 16,691 miles, and of inter urban telephone lines 34,134 miles.

In 1931 there were dispatched 847,317,480 letters, 12,230,242 parcels, 172,154,020 newspapers, and 31,656,315 money orders issued and paid. 4,438,213 telegrams were sent out, and 726,629,722 telephone calls recorded.

Shipping and Navigation.

In 1932, 3,610 vessels with a tonnage of 2,831,600 net registered tons and a cargo of 432,900 tons entered, and 3,604 vessels with a tonnage of 2,838,600 net registered tons and a cargo of 4,761,400 tons cleared at the port of Gdynia, 4,637 vessels with a tonnage of 2,750,204 net registered tons and a cargo of 728,103 tons entered, and 4,654 vessels with a tonnage of 2,773,146 net registered tons and a cargo of 5,047,949 tons cleared at the port of Danzig.

On January 1, 1932, the Polish mercantile marine numbered 33 vessels with a tonnage of 67,834 gross tons, and the Danzig mercantile marine, 51 vessels with a tonnage of 212,890 gross tons.

Currency and Banking.

The Polish national currency is the *zloty*, subdivided into 100 *groas*. This currency was put into circulation on May 1, 1924, being then equivalent to the gold franc. The monetary reform of October 13, 1927, changed the

gold contents, defining 1 klg fine gold = 5,924 44 zlotys Silver coins of 10, 5 and 2 zloty, nickel coins of 1 zloty, 50, 20 and 10 grosz, and bronze coins of 5, 2 and 1 grosz

The Bank of Poland, created by Act of Parliament, opened its doors on April 28, 1924. The Bank is a joint stock company with a capital of 150,000,000 zlotys The Bank enjoys for a period, to Dec 31 1944, the sole privilege of note issue. Bank notes in denominations of 10, 20, 50, 100 and 500 zlotys are in circulation The notes issued by the Bank, and the deposits must be covered by 40 per cent In case of a lower cover, the Bank has to pay a special tax, which rises in proportion as the cover falls At present the Bank is obliged to redeem banknotes in gold coin or in foreign currencies convertible into gold, where the sum presented for exchange exceeds 20,000 zlotys The Post Office Savings Bank on November 1, 1932, had 915,960 depositors with 407,338,792 zlotys to their credit On the same date, 379 other Savings Banks had deposits totalling 567,338,000 zlotys

The amount of money in circulation (October 31, 1932) was 1,369,096,568 zlotys, consisting of 1,062,544,010 zlotys in the Bank of Poland notes, 306,552,558 zlotys in metallic currency

On October 31, 1932, there were 60 principal banks in Poland, with a capital of 243,328,000 zlotys, and deposits amounting to 466,654,000 zloty

The weights and measures are those of the metric system

Diplomatic and Consular Representatives

1 OF POLAND IN GREAT BRITAIN

Ambassador — Constantin Skirmunt (Appointed November 19, 1929)

Counsellor — Leon Orlowski

First Secretary — Jan W. zelaki

Second Secretary — Josef Zaianski

Commercial Counsellor — Thaddée Geppert

Consul-General — Casimir Komierowski.]

Consul — Wilold Hulanicki

2 OF GREAT BRITAIN IN POLAND

Ambassador — The Rt Hon Sir William A F Erskine, G C M G, M V O (Appointed October 15, 1929)

First Secretary — G G M Vereker, M C

Third Secretary — P N Loxley

Naval Attaché — Commander M A Hawes, R N

Military Attaché — Lt -Col G. F Connal Rowan

Commercial Secretary — Richard Kimens, C M G

Consul at Warsaw — F Savery, O B E

There are consular representatives at Lemberg, Katowice, Lodz, Posen and Gdynia.

PORTUGAL.

(REPÚBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century; until 1910 it was a monarchy The last King was Manoel II. of the house of

Braganza-Coburg, born November 15, 1889, younger son of King Carlos I and Queen Mary Amélie, daughter of Philippe Count of Paris, he died July 2, 1932. **Manoel II** succeeded to the throne on the assassination of his father and elder brother, Prince Luiz Philip, February 1, 1908. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). Thereafter there were duly elected Presidents, as follows —

Dr Manoel de Arriaga, 24 Aug, 1911— 29 May, 1915 ¹	Senhor João de Canto e Castro Silva Antunes, 16 Dec, 1919—5 Oct, 1919
Dr Joaquim Theophilo Braga, 29 May, 1915—5 Oct, 1915	Dr Antonio José de Almeida, 5 Oct, 1919 5 Oct, 1923
Dr Bernardino Luiz Machado Guimarães, 5 Oct, 1915—11 Dec, 1917 ²	Senhor Manoel Teixeira Gomes, 5 Oct 1923—11 Dec, 1925 ¹
Dr Sidonio Bernardino Cardoso da Silva Pres, 11 Dec, 1917—14 Dec, 1919 ³	Dr Bernardino Luiz Machado Guimarães, 11 Dec, 1925—1 June 1926 ¹

A Provisional Government was in office from June 1—Nov 29, 1926

¹ Resigned

² Deposed

³ Assassinated

On August 20th, 1911, the present constitution was adopted. This provides that there shall be two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second Chamber or Senate (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at a time every three years. The President of the Republic is elected by both Chambers with a mandate for four years, but he cannot be re-elected. The President must be at least 35 years of age. He appoints Ministers, but these are responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 4,000*l*, with 1,800*l* for allowances, or a total of 5,800*l* yearly. The Constitution may be revised every ten years.

A new constitution was promulgated on May 28, 1932, providing for a President, to be elected for 7 years by direct suffrage by the heads of families, and for a National Assembly (one chamber) of 90 Deputies elected for 4 years—45 by the Administrative and Colonial Corporations and 45 by direct suffrage. A Privy Council of 10 members assists the President. Capital punishment is abolished. On March 19, 1933, the new constitution was voted upon by the people and adopted.

The Powers formally recognised the Republic on September 11, 1911.

President of the Republic —General Antonio Oscar de Fragoso Carmona (Elected November 29, 1926, re elected, March 25, 1928)

State of Parties at the elections held on November 8, 1925 —

Senate —41 Democrats, 9 Nationalists; 20 others, total 70

Deputies —84 Democrats; 23 Nationalists, 53 others, total 160

The Cabinet, which was formed on July 5, 1932, is as follows —

Prime Minister and Minister of Finance.—Dr Antonio de Oliveira Salazar

Minister of the Interior —Dr Albino Soares Pinto dos Reis, junior

Minister of Public Works and Communications —Dr Duarte Pacheco

Minister of Foreign Affairs —Dr César de Souza Mendes

Minister of Marine —Commander Anibal Mesquita Guimarães

Minister of Justice —Dr Manuel Rodrigues, Junior

Minister of War.—General Daniel Rodrigues de Souza

Minister of Commerce, Industry and Agriculture —Ing Sebastiao Garcia Ramares

Minister of Education —Dr Gustavo Cordeiro Ramos

Minister of Colonies —Dr. Armindo Rodrigues Pacheco

Area and Population.

Area and population at the Census of December 1, 1930 (provisional figures) and the census of 1920 are as follows (the Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic) —

Provinces and Districts	Area in sq miles	Population		Per sq mile 1930
		1920 (Census)	1930 (Census)	
Entre Minho-e-Douro —				
Viana do Castelo	857	226,046	223,142	260 3

Grand total	35,490	6,032,991	6,693,345	188 7

In 1920 the population consisted of 2,855,818 males and 3,177,173 females, or 111 females to every hundred males Of the total population

in 1920, 29,070 were foreigners. In 1931, the movement of the population was: births, 189,003 (97,373 males and 91,630 females), marriages, 41,489, deaths, 107,276 (54,461 males and 52,815 females), still born, 8,323. Divorces in 1931, 828 (958 in 1930).

At a special census on Dec. 1, 1930, the population of Lisbon was 594,390 and that of Oporto 232,380. Other principal towns with their population in 1930 (census) were: Coimbra, 27,333, Évora, 22,061, Covilhã, 15,640, Castelo Branco, 9,820.

The number of emigrants in 1931 was 6,083, of whom 2,541 went to Brazil, 694 to North America, 645 to Argentina, and 2,153 to other countries.

Religion

There is freedom of worship in Portugal, the predominant faith is the Roman Catholic. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Évora. The Archbishop of Lisbon (Patriarch since 1716) has seven suffragans, of whom only two are on the European mainland, while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Évora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

Education.

According to the census of 1920, 54.7 per cent of the Portuguese nation are still unable to read or write. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1930-31 there were 66 infant schools with 91 teachers and 3,800 pupils, 8,295 public elementary schools with 422,624 pupils and 9,340 teachers, 37 secondary schools with 14,970 pupils and 766 teachers, and 5 primary normal schools with 1,243 pupils and 82 teachers. For higher education there are 3 Universities at Lisbon (founded in 1858 and reorganised in 1911), Coimbra (founded 1290), and Oporto. In 1930-31 the number of students at the universities was: Lisbon, 2,544, Coimbra, 1,822, and Oporto, 1,275. There are also special colleges for music and art (Lisbon and Oporto), commercial, agricultural and veterinary schools, a military academy at Lisbon, and a naval school.

In 1931 there were 564 newspapers and periodicals published in Portugal—28 daily, 250 publications once or more than once weekly, and 286 other periodicals.

Justice and Crime.

The Republic is divided for judicial purposes into 157 comarcas, in every comarca there is a court of first instance. There are three courts of appeal (Tribunaes de Relação) at Lisbon, Coimbra, and Oporto, and a Supreme Court in Lisbon. There are also 7 municipal and 986 district courts.

Finance.

The estimated revenue and expenditure for five years, ended June 30, are shown as follows (in escudos) —

	1928-29	1929-30	1930-31	1931-32	1932-33
Revenue	1,919,388,379	2,033,483,246	2,104,242,000	1,947,460,289	2,185,097,000
Expenditure	1,917,811,677	2,024,854,995	2,098,465,000	1,946,047,425	2,138,424,000

The main items of revenue and expenditure for 1931-32 and 1932-33 were as follows —

Revenue	1931-32	1932-33	Expenditure	1931-32	1932-33
	1,000 Escudos	1,000 Escudos		1,000 Escudos	1,000 Escudos
Ordinary			Ordinary		
Direct taxes	598,618	594,595	General charges—		
Indirect taxes	766,033	761,030	Public debt	336,331	353,723
Industries under special tax régime	79,749	72,579	Presidency, legislative bodies, and pensions	108,462	110,699
Yields of various services	78,666	90,826	Ministries—

Yield of capital, shares, etc.	3,708	8,145	Interior	180,777	185,589
Reimbursements, etc.	62,680	74,900	Justice	42,666	40,095
Consignment of receipts	99,767	91,969	War	320,457	318,456
Total ordinary	1,800,960	1,795,198	Navy	161,498	152,998
Extraordinary	147,000	839,899	Foreign affairs	35,058	35,618
			Trade and communications	169,447	168,817
			Colonies	26,394	26,570
			Education	179,777	188,581
			Agriculture	37,880	36,582
			Total ordinary	1,764,297	1,792,294
			Extraordinary (trade and communications)	181,750	341,200
Grand total	1,947,960	2,185,097	Grand total	1,946,047	2,138,424

On May 31, 1932, the external funded debt of Portugal was as follows:— External 3 per cent converted debt of 1902, 27,338,443*l*, non interest bearing debt, 2,404,719*l*, total external funded debt, 30,143,162*l*. Internal funded debt at the same date was 800,337,901 escudos paper (7,275,799*l*), of which 333,203,456 escudos paper were consolidated and 467,134,445 escudos paper redeemable. Internal funded debt (in gold escudos) consisted of 8,000,000*l* 6½ per cent 1913 consolidated, 4½ per cent 1912, 598,240*l*, 7 per cent Timor, 93,700*l*, 4 per cent Municipal Loan 1886, 2,196,667*l*, all redeemable, total internal funded debt, 18,169,408*l*. The State debt to the Bank of Portugal was 9,618,444*l*, while the floating debt as at April 30, 1932, was 6,158,970*l*, making the total public debt 64,089,982*l*.

Defence.

ARMY

Military service is compulsory for every citizen from 17 years of age to 45. The terms of service are 4 years in the Active Service, 16 years in the Active Reserve, 5 years in the Territorial Reserve and 8 years in the recruiting Reserve. The recruits are enlisted from March 1 to March 5.

Portugal and the adjacent islands are divided into 4 Military Regions.

Porto, Coimbra, Tomar and Evora, and 3 Military Governments Lisbon, Azores and Madeira, including 22 recruiting and reserve districts

The total peace strength in June, 1931, was 4,901 officers and 50,475 other ranks The overseas garrisons comprise 382 officers and 10,286 other ranks

The Republican Guard consists of 8 Infantry Battalions and 1 Cavalry Regiment, with a total of 215 officers and 5,412 other ranks

The Fiscal Guard consists of 3 Battalions in the Continent and 4 Companies in the Islands, and its strength at the end of March 1931 was 5,285 officers and men

The Portuguese Army is armed with rifles, Mauser Vergueiro, 6.5 mm and Lee-Enfield, Cavalry, Mannelicher, 6.5 mm carbine, Artillery, 7.5 cm. Schneider Canet gun, 7.5 cm Krupps gun, 7 cm Mountain Schneider Canet gun, 11.4 cm English howitzer, 15.2 cm Vickers howitzer and 15 cm Schneider-Canet du Bocage, 7.5 cm anti aircraft guns, 303 Berthier machine guns, 303 Vickers machine guns, and medium tanks The military flying service had in 1931, 129 machines

The military estimates for 1932-3 amounted to 318,435,000 escudos

NAVY

The navy of Portugal comprises —4 cruisers, *Vasco da Gama* (ex coast defence ironclad of 3,000 tons), *Adamastor* (1,757 tons), *Republica* and *Carvalho Araújo* (1,200 tons—ex British sloops), a variety of gunboats (mainly employed in Colonial waters), a mine layer, the surveying vessel, *5 de Outubro* (1,365 tons), 2 destroyers, 4 torpedo boats, 3 submarines, 1 steamer for torpedo and mine service, a salvage vessel, and a sailing training ship A programme for replacement of the older units of the fleet was approved in 1930, and orders for 11 of the new ships were placed in 1931-32, the contracts for nearly all being ultimately placed with British ship builders In eight years it is proposed to construct two cruisers, twelve sloops, twelve destroyers, twelve submarines, two gunboats, an aircraft carrier, and a submarine depot ship A naval flying service was established in September 1917, on December 31, 1929, there were 30 machines The naval personnel includes 1,609 officers and N C O's, and 4,150 other ranks

Production and Industry

According to an estimate of the Ministry of Agriculture the cultivated area of Portugal (not including the islands) in 1931 was 15,917,654 acres (70 per cent) Of the whole area of continental Portugal 37.4 per cent is annually cultivated under cereals, pulse, pasture, etc., 5.4 per cent is under vineyards, 6.2 per cent under fruit trees, 26 per cent under forest, 25 per cent is waste

In 1931 the wheat crop was 353,800 metric tons, maize, 417,100 tons, oats, 93,900 tons, barley, 43,600 tons, broad beans and French beans are also cultivated Other products in 1931 were rice (26,000 metric tons) and potatoes Wine (162,350,000 gallons in 1931) and olive oil (715,527 hectolitres or 15,741,600 gallons in 1931) are also produced

The live stock in continental Portugal in 1925 consisted of 30,078 horses, 286,300 asses, 88,410 mules, 767,904 cattle, 3,683,828 sheep, 1,557,743 goats, and 1,117,354 pigs Wool production in 1930 was 2,739 metric tons

The forests cover 26 per cent of the total area of the country, pine extending to 2,795,020 acres, oak, 1,205,148 acres, cork, 1,382,373 acres, chestnut, 210,513 acres; other trees, 165,532 acres total, 5,758,586 acres Cork is an important product, production was 130,948 metric tons in 1929,

and 84,283 tons in 1930. Most of the product is exported in the crude condition, in 1931 exports were 78,437 metric tons of unmanufactured cork and 20,591 tons of cork stoppers.

Portugal possesses considerable mineral wealth, but for want of fuel and cheap transport, valuable mines remain unworked. The total mineral production in 1931 amounted to 524,263 metric tons, of which coal accounted for 74,183 tons, cupriforous pyrites for 280,176 tons, lead, 107 tons, copper (precipitated), 1,277 tons, tin, 585 tons, and wolfram 249 tons.

The fishing industry is of importance. In 1931 there were 53,999 men and boys employed, with 14,153 boats of 68,751 tons. In 1931, the sardine catch was 117,626 metric tons, valued at 59,930,947 escudos. Exports of tinned sardines amounted to 45,416 tons in 1931, valued at 185,070,200 escudos. The centre of the sardine industry is at Setubal, about 10 miles south of Lisbon. It is the second principal industry in the country.

The principal manufacturing industry is the production of textiles, which employs some 45,000 operatives—25,000 in cottons, and the remainder in woollens, silks and linen goods.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and chinaware. In Peniche, an old fishing village on the north coast of Lisbon, there is a local pillow lace industry, and at Guimaraes famous embroidery is made.

Commerce

Imports for consumption and exports (exclusive of coin and bullion and re exports) for six years —

Year	Imports	Exports	Year	Imports	Exports
	Escudos	Escudos		Escudos	Escudos
1926	2,942,219,200	786,353,000	1929	2,528,606,600	1,079,239,600
1927	2,662,107,700	722,569,900	1930	2,405,722,100	945,274,200
1928	2,679,069,600	1,029,405,035	1931	1,734,099,500	811,739,400

The principal articles of import and export in 1930 and 1931 were —

Article	Imports		Article	Exports	
	1930	1931		1930	1931
	Escudos	Escudos		Escudos	Escudos
Fish	130,325,658	105,785,447	Fish	213,807,421	212,886,581
Wheat	102,479,626	56,378,524	Fruits	30,512,968	43,022,787

Shipping, Navigation, and Internal Communications

In 1931, 7,217 vessels of 24,688,340 tons entered, and 7,037 vessels of 23,384,152 tons cleared the ports of Portugal (continental and islands). Of those entering, 3,048 (4,535,432 tons) were Portuguese, 1,354 (8,486,085 tons) British, and 739 (8,889,160 tons) German. In 1929 the merchant marine of Portugal consisted of 666 steam vessels and 19,437 sailing vessels of 28,792 tons and 143,827 tons respectively.

Portugal has 824 miles of State owned railway, 735 miles being normal gauge and 89 miles narrow gauge. According to an agreement dated March 11, 1927, the Companhia dos Caminhos de Ferro Portugueses, to which a number of private lines already belong, took over two sections of the State railways in return for an annual contribution of a fixed percentage of earnings. There are also six privately owned lines 1,177 miles in length, 882 miles normal and 295 miles narrow gauge. On January 1, 1931, total railway mileage was 2,125 miles. In 1931, 23,577,090 passengers were carried, and 8,864,722 tons of merchandise transported. There were in 1930, 14,045 km (9,122 miles) of road. Length of telegraph lines in 1931 was 9,022 km (5,603 miles). Number of offices, 744, of telegrams, 2,217,062 sent and 2,590,136 received. There are 13 wireless stations. The State owned 263 km. (163 miles) of telephone line in 1931, and the Anglo-Portuguese Telephone Co. Ltd owned 137,329 km (85,281 miles) of inter-

urban lines, and 100,690 km. (62,523 miles) in Lisbon, and 43,128 km (26,782 miles) in Oporto

Banking, Money, Weights and Measures

The Government financial institution is the Bank of Portugal, with a capital of 100,000,000 escudos. By a Decree of June 29, 1931, the term of the Bank as the bank of emission was extended for a period of thirty years as from July 1, 1931. The privilege of note issue then ceases. The limit of fiduciary circulation is 2,200,000 contos. The cash on hand of the bank on December 28, 1932 was gold, 442,378,000 escudos. The notes in circulation amounted to 1,995,202,000 escudos.

There are 37 other banks registered on the mainland and 19 in the Islands with a capital of 2,409,728,878 and 58,758,472 escudos respectively, and total deposits on October 31, 1932, of 3,545,240,530 and 261,958,358 escudos respectively.

The Decree of the Provisional Government of May 22, 1911, which established a new monetary system, was altered in the middle of 1931. The unit is the gold *escudo*, of 100 *centavos*, which is the standard coin with the weight of 0.0739 grams, and the fineness of 900/1000. The British sovereign and half sovereign of 7.98505 and 3.99402 grams of gold respectively and fineness of 916-2/3 per 1,000 will continue to be a legal coin in the country with the value of 110 and 55 gold escudos respectively. 1,000 escudos are called a *conto*. The Bank of Portugal paper notes of 2.5, 5 and 10 escudos will be taken out of circulation before the 31 December, 1933, and they will be replaced by silver coins of the same denominations. The gold coins are of 250, 100 and 50 escudos, the silver coins, 10, 5 and 2½ escudos, Alpaca coins, 1 escudo and ½ escudo, bronze coins, 20, 10 and 5 centavos.

The metric system of weights and measures is the legal standard. The chief old measures still in use are —

The <i>Almude</i>	{	of Lisbon	=	3 7	imperial gallons
		„ Oporto	=	5 6	„ „
„ <i>Alqueire</i>			=	0 36	„ bushel
„ <i>Moin</i>			=	2 78	„ quarters

Diplomatic Representatives

1 OF PORTUGAL IN GREAT BRITAIN

Ambassador Extraordinary and Plenipotentiary — General Thomaz Antonio Garcia Rosado, K C M G (appointed July, 1926)

First Secretary — João de Lebre e Lima

Second Secretary — João de Barros Ferreira da Fonseca

Attaché — Antonio Potier

Commercial Counsellor and Consul-General — Francisco de Paula Brito

There are Consular representatives at London, Cardiff, Newcastle, Liverpool, Aberdeen, Dundee, Leith, Glasgow, Hull, Southampton, Bristol, Dartmouth, Falmouth, Plymouth, Port Talbot, Swansea, Barrow in Furness, Manchester, Birmingham, Dover, Middlesbrough, and Leeds.

2. OF GREAT BRITAIN IN PORTUGAL

Ambassador — Sir Claud Russell, K C M G. (appointed February 11, 1931)

Counsellor — F. E. F. Adam

Second Secretary. — R. A. Gallop.

Military Attaché. — Major M. M. Parry Jones, M C.

Naval Attaché—Capt J U P Fitzgerald, R N

Air Attaché—Group Captain R J Bone, C B E, D S O

Commercial Secretary and Consul at Lisbon—A H W King, O B E

There are Consular representatives at Lisbon (C), Portimao, Villa Real, Faro, Setubal, Oporto, &c, Funchal (Madeira), St Michael's (Azores), St Vincent (Cape Verde)

Consul-General at Lourenço Marques—H A Ford

There are Consuls or Vice Consuls at Mozambique and Lobito, Consul at Marmagao (Gôa)

Dependencies

The colonial possessions of Portugal, situated in Africa and Asia, are as follows—

Colonial Possessions	Area English sq miles	Popula- tion	Colonial Possessions	Area English sq miles	Popula- tion
Possessions in Africa			Possessions in Asia		
Cape Verde Islands (1931)	1,511	153,700	In India (1931)	1,460	569,187

Total Africa	799,506	8,755,245	Total, Colonies	908,301	9,938,211

¹ Natives, 4,141,730, Europeans, 40,000

² Natives (1930), 3,960,261, non natives, 35,570

On August 15, 1914, partial autonomy was granted by the Home Government to all Portuguese colonies, giving each the right to establish its own code of laws for civil and financial Government

The **Cape Verde Islands** consist of ten islands and four islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into two groups, named Barlavento (windward) and Sotavento (leeward), the prevailing wind being north east. The former is constituted by the islands of São Vicente, Santo Antão, São Nicolau, Santa Luzia, Sal and Boa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Sant'Iago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is a coaling station which supplies all navigation to South America. The total area is 3,915 square kilometres (1,511 square miles). The population is estimated at 153,700. There are 157 primary schools, one secondary school and one Lycée in the Island of São Vicente. Military force consists of 4 officers and 84 men. The chief products are sisal, castor oil, coffee, mustard, brandy, oranges and hides. Other products are maize, manioc, beans, tobacco, cane sugar, sweet potatoes. The coffee is of excellent quality, exports in 1931 were 28,345 kilos. The total number of animals in 1930 was 135,356. The estimated public revenue in 1932-33 is 19,417,650 escudos, and the expenditure 19,399,873 escudos (17,883,873 ordinary and 1,516,000 extraordinary). The imports in 1931, 63,386,878 escudos; exports, 2,313,499 escudos. The metric system of weights and measures is

used The currency is Portuguese In 1931, 972 ships, including 483 British, entered the Porto Grande of São Vicente, the capital, which is a naturally-favoured coaling station 146,923 tons of coal were imported in 1931

Portuguese Guinea, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1886, with France, and is entirely enclosed on the land side by French possessions It includes the adjacent archipelago of Bijagoz, with the island of Bolama, in which the capital of the same name is situated Area is 36,125 square km (13,944 square miles) Population (1930), 364,929 There are 14 schools, 2 central, 2 mixed, and 10 rural The chief commercial products are rice, wax, oil, seeds, hides Estimated public revenue in 1932-33 is 21,583,863 escudos, and expenditure 21,417,962 escudos Military force 287 (8 officers and 279 other ranks, including 264 natives) Imports in 1931, 18,360,651 escudos, exports, 29,467,670 escudos The chief port is Bissau Other ports Bolama, Cacheu and Bubaque There are 592 miles of telegraph lines and 1,740 miles of roads

The islands of **S Tomé and Príncipe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor Area of the islands 315 square miles According to the census of 1921 the population of the two islands was 59,055, 52,150 in S Tomé and 6,905 in Príncipe, and the distribution was as follows whites, 1,115, natives, 57,123, others, 817 The chief commercial products are cacao, coffee, coconut and copra, palm oil and cinchona On January 1, 1930, there were 17,953 animals in the colony Revenue, 1931-32, 10,729,842 escudos, expenditure, 10,700,698 escudos Military force consists of 145 men (135 natives) Imports at S Tomé and Príncipe (1931), 20,449,188 escudos, exports, 54,466,290 escudos On S Tomé a railway of 10 miles is open for traffic There are 28 miles in course of construction There are 124 miles of roads

Angola (Portuguese West Africa), with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886, from the Belgian Congo by those fixed by the convention of July 27, 1927, from British South Africa in accordance with the convention of June 11, 1891, and from South-west Africa in accordance with that of December 30, 1886 The area is 1,259,272 square km (486,079 square miles) The colony has belonged to the Portuguese since 1575, with the exception of the years 1641 to 1648, when it was held by the Dutch It is under a High Commissioner, who resides at Luanda, and is vested with large powers By a decree of July 24, 1930, and a ministerial order of June 28, 1932, it is divided into 8 administrative districts and 1 Intendencia The important towns are S Paulo de Loanda (capital), Benguela, Mossamedes, Lobito, Sa da Bandeira, Malange and Huambo (Nova Lisboa), the future capital The indigenous population numbered 4,141,730 in 1931, and the population is now estimated to include 40,000 Europeans, of whom 90 per cent are Portuguese

For primary education there are 70 schools (2 infant schools and 68 elementary schools), for secondary education, 3 schools, viz 1 higher grade school, a Central College at Loanda and a National College at Lubango (Huila) There are also 106 professional schools

The military force is composed of 122 officers and 4,497 other ranks (4,200 natives and 297 Europeans).

The ordinary budget for 1932-33 balanced at 142,960,000 angolaros and

the extraordinary budget at 2,738,266 angolares. The sums due by the Colony to the Portuguese Government have been agreed at 5,000,000, on which 8 per cent interest is payable, and about 1,000,000, on which 6 per cent is to be paid. The capital sums are to be repaid in 50 years, starting in 1932.

The chief products are coffee, rubber, wax, sugar, maize, vegetable oils, coconuts, ivory, oxen and fish. Cotton-growing, formerly remunerative, has been neglected, but is now increasing, tobacco is grown and manufactured for local consumption, petroleum and asphalt are worked by a British syndicate. The province contains large quantities of malachite and copper, iron, petroleum, and salt. Gold and diamonds have also been found.

Imports, 1931, 146,966,123 angolares, exports, 204,310,014 angolares. The chief imports of the province are textiles (20,091,298 angolares in 1931), and the chief exports in 1931 were coffee (11,838 metric tons), maize (55,335 metric tons), diamonds (357,525 carats), sugar (21,799 metric tons), wax (1,396 metric tons), and coconut (5,563 metric tons). The trade is largely with Portugal. Exports to United Kingdom (Board of Trade figures), 23,328 in 1932, 36,587 in 1931, imports from United Kingdom, 226,085 in 1932, 323,708 in 1931. Re exports to Angola from U.K. were 14,600 in 1931 and 8,244 in 1932.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe, the steamers of 8 British lines and one German line visit ports of the Colony regularly. The length of railways open for traffic is 1,425 miles, made up as follows: Loanda-Malanje line, 261 miles (metre gauge), Canhuca-Golungo Alto, 19 miles, Bengo-Cunga branch 56 miles, Calumbo branch, 32 miles, Amboim line, 66 miles, Mossamedes-Chela Mountains, 155 miles, and the Benguela railway from Lobito to the Luena River, the new Angola-Belgian Congo frontier, 836 miles. In July, 1918, the Government purchased the Trans African railway. There are 17,215 miles of good roads, and 20,713 miles of secondary roads. Angola is connected by cable with East, West, and South African telegraph systems. There are 5,790 miles of telegraph lines, 259 miles of telephone line, and 19 wireless stations.

As from July 1, 1928, the Angolan escudo has been superseded by a new unit the 'angolar,' 80 angolares being the equivalent of 100 Angolan escudos. A new coin has also been introduced, called a 'macuta,' equal to 5 centavos.

Governor General — Colonel Eduardo Ferreira Viana

Mozambique (Portuguese East Africa) is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from Tanganyika Territory, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40' S lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. In accordance with the Treaty of Versailles the Peace Conference on September 23, 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Portuguese East Africa, with an area of 297,657 square miles, comprises two distinct entities: (1) the territory administered by the State (245,776 square miles), and (2) the territory of Manica and Sofala under the *Companhia de Moçambique* (51,881 square miles). The first is divided into 7 districts: Lourenço Marques, Inhambane, Quelimane, Tete, Mozambique,

Cabo Delgado and Nyassa, each with its own Governor. The district of Cabo Delgado and Nyassa was formed from the former territories of the Companhia do Niassa (Nyassa Company) when its contract expired on October 27, 1929. Lourenço Marques (population 42,779 in 1931) is the capital of the Province. There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and also an Executive Council. The existing organization of the Province is that which was established by decree of May 23, 1907, with some modifications introduced by the Law of October 9, 1922. The population of the colony (1930), including the chartered company, was 3,995,831 (35,570 Europeans). Elementary education is provided by 28 primary schools, 60 intermediate schools, and 6 private schools in the area administered by the state, and by 8 primary schools, and 43 intermediate schools in the company's area. There is also 1 central high school, and 7 state professional schools. There are also 240 missionary schools.

The military force of the Colony consists of 177 officers and 2,637 other ranks (395 Europeans and 2,242 natives).

Revenue and expenditure for 1932-33 were estimated at 356,402,149 escudos paper, and 340,933,897 escudos paper respectively. The chief products of the Province are sugar, maize, cotton, copra, sisal and mining products. In 1929 there were 490,749 oxen, 277,504 goats, 100,614 sheep, and 105,157 pigs. The principal ports are Mozambique, Beira, Porto Amelia, Quelimane, Chinde, Inhambane and Lourenço Marques. Imports in 1931 amounted to 50,951,922 escudos gold, and exports to 44,022,586 escudos gold. At the port of Lourenço Marques there entered, in 1931, 763 vessels of 3,898,058 tons, and cleared 771 vessels of 3,925,408 tons. Trade with United Kingdom (Board of Trade figures) exports to United Kingdom, 174,848t in 1932, 328,956t in 1931, imports from United Kingdom, 1,707,586t in 1932, 2,367,848t in 1931, re exports from U K., 45,519t in 1932, 58,308t in 1931. There are in the area administered by the Government 516 miles of 3ft 6in gauge railway owned by the State.

The Manica and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. The seat of the administration is Beira (population 23,694). Under the Company's administration the country on either side of the Beira Railway has become settled, there is convenient transport by rail and river, and facilities are granted for securing titles and working mines. The census population of the Mozambique Company's territory (1928-29) was 3,616 Europeans, 3,552 non natives, and 306,759 natives, total 313,927. On August 1, 1931, there were 3,960,261 natives (1,896,981 males and 2,063,280 females). Imports into this territory amounted in 1930 to 80,250,344 escudos, exports, to 75,209,406 escudos. Exports in 1928 included maize (19,162 metric tons), sugar (33,697 metric tons), and gold and silver (184,738 escudos in 1927). There entered at Beira in 1930, 644 vessels with a tonnage of 3,172,592, and cleared, 643 vessels with a tonnage of 3,180,695. 2,500 miles of roads are now available for motor traffic in the Company's territory.

The Delagoa Bay Railway has a length of 57 miles in Portuguese territory, and is continued for 290 miles to Pretoria. Till recently the commercial relations and transit of goods by this railway between the Portuguese and British possessions were regulated by the agreement signed April 1, 1909. A new agreement has been negotiated recently. A railway was constructed before the war to a point near the Swaziland border, 40 miles being open for traffic, but the linking up of this section with the South African Railways to provide a direct route from Lourenço Marques to Johannesburg has

not yet been arranged The Gaza Railway (2 ft 6 in gauge) from João Belo to Chikomo has 61 miles open for traffic

The Beira Railway has a length of 200 miles in the territory administered by the Mozambique Co., and links up at the frontier with the Rhodesian Railway system The Trans-Zambesia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambesi, was opened for traffic on July 1, 1922 On the northern bank of the Zambesi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory) connects at Port Herald with the Shiré Highlands Railway When a bridge is constructed over the Zambesi these three railways will give a continuous connection between British Nyasaland and the port of Beira

The Government has been working on a definite plan, and the finished scheme for the Province south of parallel 22, the southern boundary of the Mozambique Co.'s territories, embraces the following lines Moamba to Xinavane, 55 miles (completed), Xinavane via Chissane to Chai Chai, or via Chibuto to Chigomo, 70 miles (not yet begun), Chai Chai via Manjacasse to Chigomo, 51 miles (completed), Chigomo via Jinagai to Inharrime, 51 miles (projected), Inharrime to Inhambane, 55 miles (completed) Activities north of the Mozambique Co. are represented by two lines of penetration, one from the port of Quelimane, which taps what is said to be the richest region on the whole coast and now extends to Mocuba on the river Lujella, and the other from Lumbo, on the mainland opposite the island and port of Mozambique, capital of the district of that name and formerly capital of the Province, to Moouta

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system Quelimane has telegraphic communication with Chiromo In 1925 there were 7,452 miles of telegraph line There are 12,400 miles of roads

Since September 1, 1922, the escudo currency has been in vogue in Portuguese East Africa, but at Lourenço Marques and Beira, *libra esterlina* (sterling) notes used still to be issued by the local banks This right was rescinded in 1926, and the sterling notes are to be withdrawn from circulation within ten years

The metric system is used Certain English weights and measures are also in current use

Governor General—Colonel José Ricardo Pereira Cabral

Governor of Mozambique Company's Territory—Captain Carlos de Almeida Pereira

Portuguese India consists of **Gôa**, containing the capital, Pangin, or Nova-Gôa, on the Malabar coast, Damão, on the coast about 100 miles north of Bombay, and Diu, a small island about 140 miles west of Damão The total area of the colony is 3,783 square km (1,460 square miles), with a population in 1931 of 569,187 (273,092 males and 296,095 females) In 1930-31 there were 90 elementary schools, 3 secondary schools, also a medical school and a teachers' training college In Gôa there are 501 salt works employing 1,968 men, the annual production amounting to about 12,200 tons In Damão there are 11 salt works, and in Diu 5 In 1906 deposits of manganese were discovered near Mormugão and 6 concerns with 21 mines are at work The military force consists of 41 officers and 1,391 other ranks The Mormugão railway (51 miles) connects this port with the lines of British India The estimated revenue of Gôa, &c., in 1931-32 balanced at 6,991,281 rupees The trade is largely transit In 1931 the imports by sea and land amounted to 56,362,227 rupees, the exports to 4,668,175 rupees.

Chief exports are coconuts, fish (fresh and salted), spices, caju nuts, salt, and copra. There are in Portuguese India 46 telegraph offices and 262 miles of telegraph line and 75 miles of telephone line.

Governor-General — General Graveiro Lopes.

Macao, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Colôane a province, the city being divided into two wards, one inhabited by Chinese and the other by non Chinese, each having its own administrator. The population, according to the census of 1927, is 157,175 (3,846 Portuguese, 152,738 Chinese and 591 of various nationalities). Estimated revenue in 1932-33, 5,254,040 patacas, and expenditure 5,222,413 patacas. The military force consists of 30 officers and 854 men. For education there are the Seminary of S. José, the Central College of Macao, and about 200 elementary schools. The trade, mostly transit, is in the hands of Chinese. Imports in 1930, 20,571,497 patacas (approximate value of the pataca is 2s), exports, 11,014,782 patacas. The colony has 118 miles of telephone line and a wireless station. It is served by various British, Japanese and Dutch steamship lines.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 7,300 square miles. By treaty of April 1859, ratified August 18, 1860, the island was divided between Portugal and Holland, by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896, confirmed in 1926, made an independent province. Population in 1927, 451,604. There are 12 schools, and 5 colleges directed by the Missions. In 1929, there were 1,022 students. Estimated public revenue and expenditure for 1931-32 were 1,310,769 and 1,309,531 escudos respectively. Military force not less than 323 men (212 natives). Imports (1931) 859,697 patacas, exports, 2,090,778 patacas. Chief exports are coffee, sandal wood, sandal root, copra, and wax. The port is Dilly, the capital. There is a good road system of 250 miles, telephone lines of 1,656 miles and a wireless station at Dilly.

ROME, SEE AND CHURCH OF.

(CITTÀ DEL VATICANO)

For many ages until Pius IX's reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, but this allowance remained unclaimed and unpaid until February 11, 1929, when a settlement of the 'Roman question' was arrived at by three treaties between the Italian Government and the Vatican. On that day there was signed (1) a Political Treaty, which recognized the full and independent sovereignty of the Holy See in the city of the Vatican, (2) a Concordat, to regulate the condition of religion and of the Church in Italy, and (3) a Financial Convention, in accordance with which the Holy See shall receive 750,000,000 lire in cash and 1,000,000,000 lire in Italian 5 per cent. State bonds. This sum is to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaties were ratified and the sum of 750,000,000 lire paid on June 7, 1929.

The Pope exercises the Sovereignty and has full legal, executive and judicial powers. A Governor, directly and exclusively responsible to the Pope, exercises executive powers. The Judicial power is delegated to a tribunal in first instance, to the *Sacra Romana Rota* in appeal and to the Supreme Tribunal of the *Segnatura*, which is the ultimate authority where there is an appeal.

In its diplomatic relations with foreign countries, Citta del Vaticano is represented by the Segreteria di Stato del Sommo Pontefice.

The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St. Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened November, 1932), postal facilities, coins and radio. The official journal is the *Acta Apostolicae Sedis*. Thirteen buildings in Rome, although outside the Vatican City, enjoy extra-territorial rights. The new building of the Pontifical Gregorian University in Rome, under the direction of the Jesuits, was formally opened in November, 1930.

The census of the population of the Vatican City on December 31, 1932, showed 1,025 inhabitants, including Italians, 853 (578 men and 275 women), Swiss, 121 (4 women).

Supreme Pontiff — Pius XI (Achilles Ratti), born at Desio, May 31, 1857, Archbishop of Milan and Cardinal, June 13, 1921, elected Supreme Pontiff, as successor of Benedict XV, February 6, 1922.

Secretary of State — Cardinal Pacelli (Appointed February 10, 1930)

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar, and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body, the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

From the accession of Innocent IX, 232nd in the usual list of Roman Pontiffs, to Pius XI, 261st, the Popes (all Italian) have been as follows:—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX (<i>Facchinetti</i>)	1591	Benedict XIII (<i>Orsini</i>)	1724
Clement VIII (<i>Aldobrandini</i>)	1592	Clement XII (<i>Corsini</i>)	1730
Leo XI (<i>Medici</i>)	1605	Benedict XIV. (<i>Lambertini</i>)	1740
Paul V. (<i>Borghese</i>)	1605	Clement XIII. (<i>Rezzonico</i>)	1758
Gregory XV. (<i>Ludovisi</i>)	1621	Clement XIV (<i>Ganganelli</i>)	1769
Urban VIII (<i>Barberini</i>)	1623	Pius VI (<i>Braschi</i>)	1775
Innocent X (<i>Pamphily</i>)	1644	Pius VII (<i>Charamonti</i>)	1800
Alexander VII (<i>Chigi</i>)	1655	Leo XII (<i>della Genga</i>)	1823
Clement IX (<i>Rospigliosi</i>)	1667	Pius VIII (<i>Castiglioni</i>)	1829
Clement X (<i>Aliberti</i>)	1670	Gregory XVI (<i>Cappellari</i>)	1831
Innocent XI (<i>Odescalchi</i>)	1676	Pius IX (<i>Mastai-Ferretti</i>)	1846
Alexander VIII (<i>Ottoboni</i>)	1689	Leo XIII (<i>Pacci</i>)	1878
Innocent XII (<i>Pignatelli</i>)	1691	Pius X (<i>Sarto</i>)	1903
Clement XI. (<i>Albani</i>)	1700	Benedict XV (<i>della Chiesa</i>)	1914
Innocent XIII (<i>Conti</i>)	1721	Pius XI (<i>Ratti</i>)	1922

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons. In practice, however, while the total number of Cardinals is never allowed to exceed 70, the number of Cardinal-Priests frequently exceeds 50, while there are usually many vacancies among the Cardinal-Deacons. In March, 1933, the Sacred College consisted of 6 Cardinal-Bishops, 48 Cardinal-Priests, and 4 Cardinal-Deacons.¹ The following list gives the names, dates, and offices of these 58 Cardinals —

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal Bishops —</i>				
Gennaro Granito Pignatelli di Belmonte	Bishop of Albano	Italian	1851	1911
Michele Lega	Bishop of Frascati Prefect of the Holy Congregation of the Sacraments	"	1860	1914
Donato Sbarretti	Bishop of Sabina Secretary of the Holy Office	"	1856	1916
Tommaso Pio Boggiani	Bishop of Porto	"	1863	1916
Luigi Sincero	Secretary of the Holy Congregation for the Oriental Church	"	1870	1923
Bonaventura Cerretti	—	"	1872	1925
<i>Cardinal-Priests —</i>				
Leo von Skrbenschky	—	Austrian	1863	1901
Pietro Gasparri	Camerlengo of the Holy Roman Church Prefect of the Congregation of Extraordinary Ecclesiastical Affairs	Italian	1852	1907
Paulin Pierre Andrieu	Archbishop of Bordeaux	French	1840	1907
Francis Bourne	Archbishop of Westminster	English	1861	1911
William O Connell	" Boston	American	1859	1911
Gaetano Bisleti	Commandatory Grand Prior of the Sovereign Order of Malta in Rome and Prefect of the Holy Congregation of the Seminaries and of the University degli Studi	Italian	1856	1911
Raphael Scapinelli di Leguigno	—	"	1858	1915
Pietro Lafontaine	Patriarch of Venice	"	1860	1916
Alessio Ascalesi	Archbishop of Naples	"	1872	1916
Louis Joseph Maurin	Archbishop of Lyons	French	1859	1916
Adolph Bertram	Bishop of Breslau	German	1859	1919
Alexander Kakowski	Archbishop of Warsaw	Polish	1863	1919
Michael Faulhaber	Archbishop of Munich	German	1869	1921
Dennis Dougherty	Archbishop of Philadelphia	American	1865	1921
Francisco de Assis Vidal y Barraquer	Archbishop of Tarragona	Spanish	1868	1921
Karl Josef Schulte	Archbishop of Cologne	German	1871	1921
Achille Locatelli	—	Italian	1856	1922
Giovanni Baptist Nasalli Rocca	Archbishop of Bologna	"	1872	1923

¹ The terms Cardinal-Priest and Cardinal Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyteral title is freely given to one in episcopal or diaconal orders, and a deaconry to a priest or even to a simple clerk.

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal Priests—cont</i>				
George William Mundelein	Archbishop of Chicago	American	1872	1924
Patrick Joseph Hayes	Archbishop of New York	"	1867	1924
Eustachio Mundain y Esteban	Archbishop of Seville	Spanish	1862	1925
Enrico Gasparri	—	Italian	1871	1925
Luigi Cajotosti	—	"	1863	1926
Lorenzo Lauri	Penitenziere Maggiore	"	1864	1926
Giuseppe Enrico van Roey	Archbishop of Malines	Belgian	1874	1927
Auguste Hlond Brzeckowice	Archbishop of Poznań and Gniezno	Polish	1881	1927
Alexis Henri Lepicier	Prefect of Religions	French	1863	1927
Pedro Segura y Saenz	Archbishop of Toledo and Primate of Spain	Spanish	1880	1927
Charles J H Binet	Archbishop of Besancon	French	1869	1927
Justinian Szeregyi	Archbishop of Esztergom (Gau) and Primate of Hungary	Hungarian	1884	1927
Dom Ildefonso Schuster	Archbishop of Milan	Italian	1880	1929
Emannele Gonçalves Cerejeira	Patriarch of Lisbon	Portuguese	1888	1929
Eugenio Pacelli	Pontifical Secretary of State	Italian	1876	1929
Luigi Lavitrano	Archbishop of Palermo	"	1874	1929
Carlo Dalmaschi Minoretto	Archbishop of Genoa	"	1861	1929
Joseph MacRory	Archbishop of Armagh and Primate of Ireland	Irish	1861	1929
Jean Verdier	Archbishop of Paris	French	1864	1929
Sebastiano Leme da Silveira Cintra	Archbishop of Rio de Janeiro	Brazil	1882	1930
Francesco Marchetti Selvaggiani	Archbishop of Selesia in Esania and Secretary of the Congregation de Propaganda Fide	Italian	1871	1930
Raffaele Carlo Rossi	Archbishop of Thessalonica and Assessor of the Consistorial Congregation	"	1870	1930
Giulio Beralini	Bishop of Lampasas, Secretary of the Congregation of the Council	"	1867	1930
Achille Liénart	Bishop of Lille	French	1884	1930
Angelo Maria Dolci	Papal Nuncio in Rumania	Italian	1867	1933
Pietro Fumasoni Biondi	Apostolic Delegate in the United States	"	1872	1933
Maurilio Fossati	Archbishop of Turin	"	1876	1933
Rodrigue Villeneuve	Archbishop of Quebec	Canadian	1883	1933
Elio della Costa	Archbishop of Florence	Italian	1872	1933
Theodor Innitzer	Archbishop of Vienna	Austrian	1875	1933
<i>Cardinal-Deacons —</i>				
Camillo Laurenti	Prefect of the Holy Congregation of the Religiosi	Italian	1862	1921
Giuseppe Mori	—	"	1850	1922
Franz Ehrle	Librarian of the Vatican and Keeper of the Archives of the Holy Roman Church	German	1845	1922
Alessandro Verde	—	Italian	1865	1925

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome,

or the deacons of Roman deaconries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor. They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246, and the title of Eminence from Urban VIII., in 1630. In 1930 all Archbishops and Bishops of the Catholic Church had conferred upon them by the Pope the title of 'Excellency'.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now twelve Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fidei, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, the Basilica of St. Peter's, and for the Oriental Church. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota, and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria, Bavaria, Belgium, Czechoslovakia, France, Germany, Hungary, Yugoslavia, Monaco, the Netherlands, Poland, Portugal, Rumania, Russia, Spain, and the United Kingdom (1914), together with most of the American Republics, except the United States and Mexico.

In December, 1930, the issue of Papal coinage was resumed, after a lapse of 60 years. The new coins are eight in number, and will have the same fineness and value as the corresponding Italian coins. Two are of bronze and worth 5 and 10 centesimi respectively. There are two other coins in nickel, worth 20 and 50 centesimi, and three silver coins worth respectively 1, 5 and 10 lire. In addition, there is a gold piece of 100 lire. In virtue of a special convention between the Vatican City and the Italian Government (to remain in force for 10 years), each State allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of the bronze, nickel and silver coins issued by it in any year will not exceed 1,000,000 lire.

Within the British Empire the present number of Roman Catholic residential sees is 254, viz., 40 archbishoprics and 125 bishoprics, besides 60 apostolic vicariates (mostly held by Bishops of titular sees), and 91 apostolic prefectures, while the Roman Catholic population subject to King George V. is estimated at 16,071,618 souls, of whom 4,255,188 are in Europe, 3,300,951 in Asia, 1,784,760 in Africa, 3,846,238 in British America, and 1,434,511 in Australasia. In the United States (including possessions) there were in 1931 29,608,538 Roman Catholics. Throughout the world the Roman Catholic population is reckoned (1929) at 334,604,791 souls, of whom 328,158,020 are of the Latin Rite (*Catholic Directory*, London).

Envoy and Minister — Sir Robert Henry Clive (Appointed March 6, 1933)

RUMANIA.

(ROMÂNIA)

Reigning King

Carol II, born October 16, 1893, son of the late King Ferdinand and Queen Marie married March 10, 1921, Princess Helen daughter of the late Constantine, king of the Hellenes (this marriage was dissolved June 21, 1928, when the Princess received the title of Princess of Rumania)

On December 28, 1925, Prince Carol renounced his right of succession to the Throne, this was confirmed by Act of Parliament on January 4, 1926, when his son, Prince Mihai, was declared Heir to the Throne On June 7, 1930 he returned to Rumania and was proclaimed King in virtue of an Act of Parliament on June 8, 1930.

Son of the King — Prince Mihai (Michael), born October 25, 1921, proclaimed King in virtue of his father's renunciation of the succession on the death of his grandfather, King Ferdinand, July 30, 1927, under a Regency Ceased to be King on his father's accession, June 8, 1930, when he received the title of Prince of Alba Julia

Sisters and brother of the King — (1) Elisabeth, born October 11, 1894, married February 27, 1921, to the Diadoch, afterwards George II, King of the Hellenes, (2) Marie, born January 8, 1900, married to Alexander, King of the Serb, Croat, and Slovene State, June 8, 1922. (3) Nicholas, born August 18, 1903, (4) Ileana, born January 5, 1909, married July 26, 1931, to the Archduke Anton of Austria Tuscany

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec 23, 1861, the present name being given to the united provinces The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Ioan I A Palace conspiracy in February 1866 forced Prince Alexandru Ioan to abdicate, and led to the election of Prince Carol I The representatives of the people, assembled at Bucharest, proclaimed

Rumania's independence from Turkey, May 21, 1877, which was confirmed by Art 43 of the Congress of Berlin, signed July 13, 1878. King Carol I of Hohenzollern-Sigmaringen reigned as Prince from 1866 to 1881, and as King from 1881 to 1914. On April 11, 1918, Bessarabia was joined to Rumania, the Bukovina on November 28, 1918, and Transylvania on December 1, 1918.

Constitution and Government

The Constitution of Rumania was adopted on March 28, 1923. According to this the subsoil and the forests are nationalized. The Senate consists of 170 members (Old Kingdom, 82, Transylvania, 45, Bessarabia, 24, and Bukovina, 19), including 4 for the Universities and 19 Bishops. The Heir to the Crown is also a Senator. There are also life senators—former Premiers who held office for at least 4 years, former Presidents of the High Court of Justice who held office for at least 5 years, former Commanders in Chief of the army who have held office (in peace time) for at least 4 years. The Chamber of Deputies consists of 387 members. A Senator must be 40 years of age, and a Deputy 25. Members of either House must be Rumanians by birth or naturalisation, in full enjoyment of civil and political rights, and domiciled in the country. All citizens of 21 years, paying taxes, are electors. Both Senators and Deputies receive 500 lei per each day of actual attendance, besides 2000 lei per month and free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of Ministers.

The elections held on July 17, 1932, resulted in the return of the following parties—Lower House: National Peasant Party, 277, Old Liberals, 28, Young Liberals, 13, Peasant Party, 12, Social Democrats, 8, other parties, 51, total, 387. Senate: National Peasant Party, 193, other parties, 71, total, 264.

The Cabinet (appointed January 14, 1933), is now composed as follows—

Prime Minister—Dr Vaida Voevod

Minister of Interior—M. George Mironescu

Minister of Foreign Affairs—M. Nicholas Titulescu

Minister of Finance—Dr Virgil Madgearu

Minister of Industry and Commerce—M. I. Lugoshanu

Minister of Justice—M. Mihai Popovici

Minister of Domains and Agriculture—M. Demetre Ioanitzescu

Minister of Education—Professor Gusty

Minister of Communications—M. Mirlo

Minister of Defence—General Nicholas Samsonovici

Minister for Bessarabia—M. Pantaleimon Halippa

Minister for Transylvania—M. Crisban

Minister for Bukovina—M. Sauciac Saveanu

LOCAL GOVERNMENT

For purposes of local government Wallachia is divided into 17 districts, Moldavia into 13, the Dobruja into 4, Bessarabia into 9, the Bukovina into 5, and Transylvania (with the Banat, Crisana and Maramuresh) into 23 districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. In Rumania (1919) there are 71 districts and 8,854 communes, 165 urban and 8,689 rural. In the rural communes there are 11,522 villages and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but are given by law.

Area and Population.

As a result of the Treaties of Peace of 1919 Rumania was enlarged, and the area and population of the New Kingdom are shown as follows:—

Country	Area in sq miles	Population		
		Males	Females	Total
Old Rumania (the 'Regat')	58,489	8,980,606	8,914,498	7,904,104 ¹
Bessarabia	17,146	1,198,900	1,145,900	2,344,800
The Bukovina	4,080	395,963	404,135	800,098
Transylvania (Ardeal)	22,812	1,350,480	1,327,887	2,678,367
Crisana	8,088	669,886	667,145	1,337,031
Maramuresh	6,258	878,205	388,461	1,266,666
The Banat	11,009	789,102	798,031	1,587,133
Total	122,282	8,762,092	8,631,057	17,393,149

¹ Estimate for 1915

According to the census taken on December 29, 1930, the population of Rumania was 18,025,037, distributed as follows:—Old Kingdom, 8,766,932, Transylvania and Banat, 5,546,696, Bessarabia, 2,865,506, Bukovina, 845,903

By the Treaty of Bucharest (August 7, 1918) between Bulgaria and Rumania, the former ceded to the latter 2,969 sq miles of territory, with a population of 273,090, mostly Turks. The new land was formed into two departments, Durostor and Caliacra

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows for three years:—

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1926	607,864	372,948	159,642	234,916
1927	608,284	392,850	171,984	216,434
1928	623,860	361,726	158,891	262,134

The populations of the principal towns in Rumania in 1930 (according to the census of December 29) were as follows:—

Bucharest	681,988	Ploesti	77,325
Chisinau	117,016	Arad	77,225
Cernautzi	111,122	Ivaili	68,310
Iasi	102,595	Oradea	63,008
Galatz	101,148	Constantza	58,358
Cluj	96,066	Brasov	56,284
Timisoara	91,806	Satu Mare	49,914
Oradea Mare	82,355	Sibiu	43,013

Religion, Education, Justice, &c.

Of the total population of Rumania (in 1918) 9,695,714 belonged to the Orthodox Church, 1,456,147 were Greek Catholics, 1,483,929 were Roman Catholics, 1,844,979 Protestants, 17,596 Armenians, 884,344 Jews and 44,087 Moslems. The National Orthodox Church of Rumania in the Regat and Bessarabia (that is, the pre-war kingdom and the territory acquired from Russia) is administered by a Holy Synod under the presidency of Mgr. Miron Cristea, who was enthroned as first Patriarch of Rumania on November

1, 1925 This is composed of two Metropolitans, six diocesan bishops, and eight assistant bishops, in addition to His Beatitude. There are separate ecclesiastical administrative bodies for Ardeal (Transylvania) and the rest of the territory acquired from Hungary, and for the Bukovina, or territory acquired from Austria. In the first of these jurisdictions there are, apart from the Patriarchal See, Metropolitans at Yassy and Chishinau, and diocesan bishops at Buzau, Curtea de Argesh, Galatz, Hushi, Ramaicu Valcea, and Roman. In the second there is a Metropolitan at Sibiu, and diocesan bishops at Arad, Caransebes, and Oradea Mare, in the third an archbishop at Cernautzi.

There is a Unit Rumanian Metropolitan at Blaj, with diocesan bishops at Gherla Lugosh and Oradea Mare. There is a Latin archbishop in Bucharest, with diocesan bishops at Alba Julia, Oradea Mare, Temisoara, and Yassy. There are Reformed bishops at Cluj and Oradea Mare, a Lutheran bishop at Sibiu, and a Unitarian bishop at Cluj. The clergy of the National Orthodox Church are paid by the State. The clergy of the other denominations receive subventions from the State. Full liberty of religion is assured to every creed or sect.

Education is free and compulsory 'wherever there are schools,' and it is improving from year to year. In 1927-28 there were 14,123 elementary schools with 35,284 teachers and 1,600,098 pupils.

There were in 1927-28, 924 secondary schools with 185,780 pupils and 12,297 teachers and 15 higher educational institutions with 30,892 pupils and 1,623 teachers.

There are 4 universities at Bucharest, founded in 1864 (499 professors and 7,532 students), Iasi (Yassy), founded in 1860 (172 professors and 3,584 students), Cluj (Kolozsvár), in Transylvania, founded in 1919 (1,980 students in 1920), and Cernautzi (Czenowitz), in Bukovina, founded in 1920.

Justice is administered by a court of cassation, 11 appeal courts, 64 tribunals, and 494 justices of the peace. Assistance is given to the sick in 168 hospitals and hospices (departmental, communal, rural, and private).

Finance.

The following table shows (in thousands of lei) the estimated ordinary revenue and expenditure for years ending March 31 (old style) —

	1929	1930	1931	1932	1933
	1000 Lei	1000 Lei	1000 Lei	1000 Lei	1000 Lei
Revenue	38,300,000	38,867,877	35,305,954	25,429,406	23,437,000
Expenditure	38,300,000	38,867,877	35,305,954	25,429,406	23,437,000

The main items of the budget for 1932 were as follows —

Ordinary Revenue	Lei	Ordinary Expenditure	Lei
Direct taxes	7,800,000,000	Ministry of Finance	12,064,868,557
Indirect taxes—		the Interior	1,875,877,785

" " Foreign Affairs	56,000,000	cations	72,062,920

Ordinary Revenue	Lei	Ordinary Expenditure	Lei
Ministry of Agriculture	192,400,000	Ministry of Education	4,260,358 716
" " Labour and Public Health	20,250,000	" " Presidency of the Council of Ministers	20,597,000
" " Commerce and Industry	158,800,000		
" " Army	202,700,000		
" " Public Works and Communications	9,420,000		
" " Education	25,325,000		
Total ordinary	25,429,406 038	Total ordinary	25,122,388 038
Total extraordinary	3,009,880,000	Supplementary credits	807,018 000
		Extraordinary Expenditure	11,169,339,521
Total	28,518,786,038	Total	36,598,845,559

The public debt of Rumania amounted on January 1, 1931, to 185,526,481,269 lei, of which 12,978,613,190 lei were payable in lei and the balance in various currencies, including — 189,594,521 dollars, 373,844 942 lire, 82,556,393 pounds sterling, 1,229,900,662 gold francs and 581,121,818 French francs, 47,482,009 gold florins, 17,566,666 Belgian francs. On January 1, 1932, total debt stood at 141,000,000,000 lei, including 39,500,000,000 lei for War debt.

Defence.

Military service in Rumania is compulsory and universal from the ages of 21 to 50. The normal terms of service are 2 years in the active army, 18 years in the regular army reserve, and 9 years in the militia. Young men exempted from service in the ranks, and those surplus to the annual contingent, are posted to a supplementary reserve.

The peace establishment of the army in 1931 was 14,185 officers and 226,316 other ranks organised in 21 divisions, 1 corps of light infantry of 2 divisions, 3 cavalry divisions, and 1 independent cavalry brigade. The air personnel amounted 11,836 all ranks, with 773 aeroplanes.

The infantry is armed with the Mannlicher rifle, the Rumanian artillery is still largely armed with guns of the Krupp type, but a considerable number of batteries have the French type of 75 mm field guns and French medium and light howitzers.

In the Black Sea are 4 destroyers, 3 ex-Austrian torpedo boats and 4 motor gunboats, a submarine and a depot ship. The Danube force comprises 7 monitors (600 tons), armed with 4 7 in guns, 7 vedettes and some small craft. There is a naval base at Sulina, on the Black Sea. In 1930 Rear Admiral R. G. H. Henderson, C.B., presented a report to the Government on the construction of a new base on the Black Sea coast. The naval school is in Galatz. The expenditure for 1931 amounted to land forces, 10,238,320^l, naval forces, 439,207^l, air forces, 1,819,754^l.

Production and Industry.

According to a statistical estimate, the distribution of the soil of Rumania with respect to agriculture in 1931 was as follows — Ploughed land, 83,812,144 acres; meadows and pasture, 10,014,553 acres, vineyards, 670,968 acres; forests, 17,843 455 acres.

For 2 years the chief agricultural crops for Greater Rumania were as follows —

Crop	Area cultivated		Production	
	1930	1931	1930	1931
	Acres	Acres	Metric Tons	Metric Tons
Wheat	7,548 0 3	8,562,049	8,559 038	3,682 292
Rye	967,291	1,005,507	464 529	854,648
Barley	4,874 722	4,740,287	2,371 306	1,414,395
Oats	2,685 091	2,152,600	1,156,536	670,237
Maize	10,933,922	11,743,778	4,519 920	6 063,333

In 1931, Rumania had 1,988 126 horses, 4,079,467 cattle, 12,356,015 sheep, 424,855 goats, and 3,221,472 swine

The catch of fish in 1930 from State properties amounted to 13,169 metric tons, private properties yielded about 10,000 metric tons

The principal minerals are salt, lignite, iron and copper ores, petroleum and natural gas. Petroleum wells, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output of crude oil in 1929 was 4,836,974 metric tons, in 1930, 5,792,311 metric tons, in 1931, 6,657,803 metric tons, and in 1932, 7,336,364 metric tons. The salt mines are situated in the region of the lower Carpathians, from Bukovina to the west of Oltenic, an area of over 250 square miles. Salt mining has been a state monopoly since 1863 (production in 1931 was 254,808 metric tons, as compared with 306,932 metric tons in 1930). Output of lignite, 1929, 2,675,080 metric tons, in 1930, 2,071,057 metric tons, in 1931, 1,631,861 metric tons. The output of natural gas in 1930 was 1,206,123,742 cubic metres, in 1931, 1,383,071,961 cubic metres, iron ore, 92,517 metric tons in 1930, 61,907 metric tons in 1931.

Industries of some importance are flour milling, brewing, and distilling. In 1930 the industrial establishments employed 151,458 workmen, and produced goods to the value of 48,353,864,000 lei.

Commerce.

The values of the imports into and exports from Rumania exclusive of gold and silver (in 1000 lei) were —

Years	Imports	Exports	Years	Imports	Exports
1928	32 145 101	26,019,254	1930	23,044 163	28,522,028
1929	29,628,038	23,960,005	1931	15,754,569	22,196,944

The principal items in the Rumanian foreign trade in 1930 and 1931 were as follows (in million lei) —

Imports	1930	1931	Exports	1930	1931
	Million Lei	Million Lei		Million Lei	Million Lei
Wool, hair and manufactures of	1,360	853	Cereals	9,989	8,764
Textile materials, etc	6,679	4,662	Petroleum products	10 437	6,883
Iron and steel	8,700	2,311	Live animals	1,879	1,650
Leather goods	1,367	335	Wood products	3,096	2,375
Non ferrous metals	869	897	Animal products (edible)	1,068	880
Machinery	2,851	1,650	Seeds, etc	740	433
Automobiles	873	685			

The chief imports into the United Kingdom from Rumania in 1931 were (according to the Board of Trade Returns) Barley, 220,8017, maize,

125,780 $\frac{1}{2}$, petroleum, 2,172,508 $\frac{1}{2}$ The chief exports from the United Kingdom to Rumania were, cotton piece goods, 282,816 $\frac{1}{2}$, iron, wrought and unwrought, 54 359 $\frac{1}{2}$, woollen piece goods, 38,666 $\frac{1}{2}$.

Total trade between Rumania and United Kingdom for five years (Board of Trade Returns) in sterling —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Rumania to U Kingdom	1,763,061	2,965,199	4,726,165	3,412,441	3,464,646
Exports to Rumania from U Kingdom	2,989,817	2,316,681	1,946,963	1,333,942	1,757,084
Re-exports to Rumania from U K	72,186	57,635	38,767	29,066	82,316

Shipping and Communications.

The European Commission of the Danube, called into being in 1856, consisted before the war of 8 delegates, one representing each of the following Powers Austria Hungary, France, Germany, Great Britain, Italy, Rumania, Russia, and Turkey By Article 846 of the Treaty of Versailles, only representatives of Great Britain, France, Italy and Rumania constitute the Commission at present. It has its seat at Galatz. Since November 24, 1904 it has existed, or will exist, for successive periods of 3 years unless denounced by one of the contracting Powers a year before the conclusion of any such period By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected, so that at Sulina the depth has been increased from 9 ft to 24 ft, and of the Sulina branch the minimum depth has been increased from 8 ft to 18 $\frac{1}{2}$ ft, while by canalisation and other works the navigation has been shortened from 45 $\frac{1}{2}$ to 38 $\frac{1}{2}$ nautical miles The income of the Commission is derived entirely from taxes levied on shipping leaving the river Receipts in 1929, 4,652,556 gold francs, expenditure 3,807,584 gold francs The Commission has its own flag

The tonnage cleared from the Danube ports in 1931 was 1,553,211 tons, as against 1,999,875 tons in 1930, and at Constanza, 1,626 vessels of 4,382,431 tons, as against 1,565 vessels of 3,841,555 tons in 1930

Railway history in Rumania commenced in 1860 All the main railway lines are owned and operated by the State, but there are also several privately owned lines, mainly in Transylvania The length of Rumanian State Railways in 1932 was 6,902 miles The quantity of freight carried in 1931 was 16,454,000 metric tons, number of passengers, 30,944,000, gross receipts, 8,577,000,000 lei The State has, besides, under the general railway direction, a commercial navigation service on the Danube and Black Sea

Within Rumania there were 66,212 miles of roads in 1931 of which 36,453 miles are of macadam, 5,912 miles gravel roads, and the remainder are classified as natural dirt roads

The Compagnie Internationale de Navigation Aerienne runs a daily air service from April to October between Paris, Bucharest and Constantinople.

The reorganisation of the post office under an autonomous regime took place on August 3, 1929, in accordance with the Law for the Commercialisation of State Enterprises In 1929, 428,000,000 ordinary letters were handled by the post office, of which 371,000,000 were inland letters and 57 000,000 foreign In 1929 there were 33,506 miles of telegraph wire and cable for internal use and 3 863 miles for international connections The number of telegrams sent was 2,100,000 In 1927 the telephone systems had 22,766 miles of line and 174,323 miles of wire. Number of conversations, 92,299,458 A concession of the public telephone system for a minimum period of 20 years was granted to the International Telephone and Telegraph Corporation of New York in July, 1930, and a Rumanian company called S. A. de Telefoane was formed and took over the whole of the system on January 1, 1931.

A radio station at Baneasa was completed in 1929.

Banking, Money, Weights, and Measures

The National Bank of Rumania on January 21, 1933, had, gold and gold exchange 10,174,520,000 lei, notes in circulation, 20,888,452,000 lei, discounts 9,819,205,000 lei. The privilege of the National Bank to issue currency notes was prolonged to December 31, 1960, according to a convention signed in May 1925. The capital of the bank was at the same time raised to 100 million lei. Other public credit institutions are a Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, a Rural *Crédit Foncier*, 2 Urban *Crédit Fonciers* (at Bucharest and Jassi), an Agricultural Bank, and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions. On December 31, 1929, there were 1,087 banks in Rumania with a paid up capital of 11,180,000,000 lei, their assets and liabilities balanced at 122,835,000,000 lei.

A unified paper currency came into use for the whole of Rumania on August 1, 1920.

The metric system for weights and measures was introduced into Rumania in 1876. The unit of the monetary system was made the *Leu* (of 100 *bani*), equivalent to the franc. Silver is legal tender up to 50 lei only. The gold coins of 20, 10, and 5 lei which were formerly in circulation have been withdrawn since the stabilization of the currency on February 8, 1929. The value of the leu was fixed at 10 milligrammes gold (.900 fine), which is equal to 813.588 to the £ sterling. Nickel is coined in 5-, 10, and 20 centime (*bani*) pieces.

Diplomatic and Consular Representatives

1 OF RUMANIA IN GREAT BRITAIN

Envoy and Minister —(Vacant)

Minister Plenipotentiary —C. M. Laptew

Counsellor —D. N. Ciotori

First Secretaries —Grégoire G. Constantinescu and D. Buzdugan

Commercial Attaché —Arthur Nolban

Military and Naval Attaché —Commander Gheorghe Niculescu

Air Attaché —Major Ernil Gheorghiu

2 OF GREAT BRITAIN IN RUMANIA

Envoy and Minister —C. M. Palaret, C. M. G. (Appointed December 2, 1929)

First Secretary —A. W. G. Randall, O. B. E.

Second Secretary —A. V. Coverley Price

Military Attaché —Lt.-Col. G. F. Connel Rowan

Naval Attaché —Capt. R. B. Ram-ay, M. V. O., R. N.

Commercial Secretary —R. J. E. Humphreys

Consul-General at Galatz —T. B. Wildman

There are consular representatives at Galatz (Consul-General), Cluj and Timisoara (Consuls), Bucharest, Braila, Galatz, Sulina and Constanza (Vice Consuls).

UNION OF SOCIALIST SOVIET REPUBLICS

(RUSSIA.)

ON March 12, 1917, a revolution broke out in Russia, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvoff was set up by the Duma, which held office until May 16, 1917, when it was reorganised. On August 6, 1917, a new Cabinet under M'

Alexander Kerensky was formed. This too was reorganised on October 8, 1917, and maintained itself until November 7, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All Russian Congress of Soviets.

The Constitution of the new State was adopted at the fifth All-Russian Congress of Soviets, on July 10, 1918, and additions or alterations were made at subsequent Soviet Congresses (December, 1920-23). On December 30, 1922, delegates from the four principal Soviet Republics met at Moscow and concluded a Treaty of Union, setting up a Union of Socialist Soviet Republics, covering Russia (R S F S R), Ukraine (U S S R.), White Russia (W R S S R), and the Transcaucasian Federation (T S F S R). In September, 1924, the Uzbek S S R and the Turkoman S S R were formed and joined the Union. On December 5, 1929, the seventh Republic, that of Tazhikistan was formed. The Constitution of the Union was ratified by the Second Union Congress of Soviets, which met in January and February, 1924.

The Government of the Union consists of a Union Central Executive Committee and a Union Council of People's Commissaries. The former is elected by the Union Congress of Soviets, the supreme authority of the Union, and between Congresses is the sovereign legislative, administrative, and judicial authority of the Union. It is convened three times a year, and consists of two chambers—the Union Council, since March, 1931, consisting of 472 members elected on the principle of proportional representation of the seven constituent Republics, and the Council of Nationalities, since March, 1931, of 138 members, elected on the basis of 5 members for every independent and autonomous republic, and 1 member for every autonomous region. All legislation must be adopted by both chambers. The Presidium, or Standing Committee, which transacts current business, is composed of 27 members, 9 from each chamber and 9 elected at a joint meeting.

Chairmen of the Union Central Executive Committee—M. M. Kalinin (R S F S R), Petrovsky (Ukraine), Chervyakov (White Russia), Musabekov (Transcaucasia), Aitakov (Turkoman S S R), Faizula-Khodzhaev (Uzbek S S R), Nusratula (Tazhik S S R).

Subordinate legislative and executive authority is vested in the Union Council of People's Commissaries, or Cabinet. Each People's Commissary is the head of a 'collegium' or Board responsible for the work of the People's Commissariat or ministry under its care. Decisions of the Union Council of People's Commissaries may be revised by the Presidium of the Union Central Executive Committee. During the periods between the Sessions of the Central Executive Committee and those of the Congresses of the Soviets, the Presidium of the Central Executive Committee is the sovereign authority of the Union and, in accordance with Article 1 of the Constitution, it has among other rights the prerogative of carrying on diplomatic negotiations, of concluding political and other treaties with other Powers, of altering the external frontiers of the Union, of declaring war and concluding peace, and of ratifying international treaties. The Council of People's Commissaries is also responsible to the full Central Executive Committee and to the Union Congress of Soviets, to which it makes a report as a whole, in addition to the departmental reports.

The following is the constitution of the Union Council of People's Commissaries (January, 1933) —

President.—V. M. Molotov.

Vice-Presidents—J. E. Rudzutak, V. V. Kuybyshev.

Foreign Affairs.—M. M. Litvinov.

War and Marine —K E Voroshilov
Home Supplies —A I Mikoyan.
Foreign Trade —A. Rosenholz.
Agriculture —J A Yakovlev.
Land Transport —A A. Andreev
Water Transport.—N. Yanson.
Posts and Telegraphs —A I Rykov
Workers' and Peasants' Inspection —J E Rudzutak
Heavy Industry —G K Orjonikidze
Light Industry —I E. Ljubimov
Timber Industry —S. Lobov
Labour —A M Tsikhon
State Farms —T A Furkin
Finance —G F Grinko
President of the State Planning Commission. —V V Kuybyshev

In addition, the Procurer General of the Republic enters the Council with a consultative voice, as does also the chairman of the State Political Department (G P U)

A Commission of Execution under the presidency of Molotov (established December 25, 1930) has been charged with the task of verifying the actual carrying out of Government directions for Socialist construction by State institutions, and with the perfecting of the work of the Government machinery. As a step towards decentralization the Supreme Economic Council was reorganized in January, 1932, into the three commissariats of Heavy Industry, Light Industry, and Timber Industry

Each of the seven constituent States of the Union—R S F S R , Ukraine, White Russia, Transcaucasia, Uzbekistan, Turkmenistan and Tazhikistan—retains its own Central Executive Committee and Council of People's Commissaries. Certain of the departments mentioned above are the exclusive prerogative of the Union Government. Others exist both in the Union Government and in the individual Republics, and a number exist only in the individual Republics

The British Government recognised the Government of the U S S R *de jure* on February 1, 1924. Similar recognition has been given by Afghanistan, Austria, Czechoslovakia, Denmark, Estonia, Finland, Germany, Greece, Hungary, Italy, Latvia, Lithuania, Norway, Persia, Poland, Sweden, Turkey, France, Japan, Mexico, and China

Constitution and Government of the R.S.F.S.R. (Russia Proper).

The greater part of the former Russian Empire is under the rule of the Soviet Government. But a number of States have gradually evolved and are maintaining themselves on the borders of the old Empire. Five have received formal recognition by the Western Powers, viz., Finland, Poland, Estonia, Latvia, and Lithuania. A number of other independent Republics, which have adopted the Soviet form of Government, are federated with the Government of Russia. These include: White Russia, the Ukraine, the Uzbek, Turcoman and Tajik S.S. Republics, Armenia, Georgia, Azerbaijan. (The last three constitute the Transcaucasian Federated Soviet Republic.) All the remaining territory of the former Russian Empire constitutes the Russian Socialist Federal Soviet Republic (R.S.F.S.R.). This contains the provinces of Russia proper, autonomous republics (Kirghiz, Tartar, Bashkir, Dagestan, Yakutsk, Crimean, Karelian, German on the Volga, Chuvash, Buriat Mongol, Kazak), and autonomous regions or areas (Komi, Marielkaiia, Votjak, Kalmyk, Karatchayev, Chechenian, Kabardino-Balkarak, Northern

Osetian, Ingushetian, Adygeisk, Oiratsk, Kara-Kalpak, Mordvinian, etc.) The autonomous republics are governed by their own Central Executive Committee and Council of People's Commissaries; the regions and areas are governed by executive committees elected by the local Congress of Soviets.

So far as the Russian Socialist Federal Soviet Republic is concerned, a Constitution was adopted by the fifth All-Russian Soviet Congress, the text of which was published on July 19, 1918, and subsequently amplified, 1919-1925, and this remains the constitutional model for the other States of the Union. According to the Constitution, which has been declared a 'fundamental law' of the Republic, Russia is a Republic of Soviets (Councils) of Workers', Soldiers', and Peasants' Deputies, and all central and local authority is vested in these Soviets. Private property in land is abolished, all land being the common property of the people, all forests, mines, waters having a national importance and all live-stock and fixtures, model estates and agricultural concerns are all national property. The State owns all factories, mines, railways, and other means of production and transport, but may lease them to private individuals, corporations, or State trusts.

The RSFSR is a free Socialist community of all the labouring masses of Russia. Freedom of conscience, of opinion, of the Press, and of meeting is provided by the Constitution. In order to protect the conquests of the Revolution, universal military service is incumbent on all citizens. The privilege of defending the Revolution with arms is, however, reserved for the labouring classes only, the non labouring sections of the population will discharge other military duties. The political rights of Russian citizenship will be granted without any formalities to foreigners residing on the territory of the Russian Republic for purposes of labour.

The highest authority in the State is the All-Russian Congress of Soviets, which consists of representatives of town Soviets on the basis of one delegate for every 25,000 electors, and of Provincial Congresses of Soviets on the basis of one delegate for every 125,000 inhabitants. The Congress elects an All Russian Central Executive Committee, consisting of 400 members, which constitute the supreme legislative, administrative, and controlling body in the Republic, and meets not less frequently than once in four months, current affairs being administered by a Standing Committee (Presidium). The Central Executive Committee also forms a Council of People's Commissaries for the general administration of the affairs of the Republic, to consist of 11 People's Commissariats and the Chairman of the Council of People's Commissars.

The franchise is enjoyed irrespective of religion, nationality, residence, sex, etc., by all citizens over 18 years of age who earn their livelihood by productive labour, and soldiers and sailors (including the commanders) in the Red Army and Navy.

The following classes are deprived of the franchise. Those employing others for profit, or living on unearned income, monks and priests of all religions, agents and employees of the former police, secret service, etc., members of the former reigning dynasty, imbeciles and wards, and persons deprived of civic rights by the criminal courts.

In accordance with the latest decrees, however, persons employing hired labour, or enjoying unearned incomes or engaged in trade, may be granted the right to vote by the provincial election commissions, providing they can present a certificate from the local factory workshop committee, a local working peasant organisation, or local trade union committee, testifying that at the time of the election the given individual lives on an income derived from his own labour and does not exploit the labour of others.

Individuals engaged in agriculture and employing hired labour within

the limits specified in the agricultural codes of the Constituent Republics of the Union are not deprived of their vote if they are otherwise eligible. Similarly the vote is enjoyed by people who are in receipt of interest from deposits in workers' savings banks, or from Government or municipal loan scrip, providing they are otherwise eligible.

Provision is also made in the Constitution for local government by means of local Soviets in villages and towns, with district and regional Congresses, which meet annually. Each Congress elects an Executive Committee, which administers the territory under its control until the next Congress.

Chairman of A R C E C —M. Kalinin

Secretary —A. Kiselev

R S F S R Council of People's Commissaries

Chairman —D. Sulimov

Agriculture —A. I. Muralov

Finance —V. N. Yakovleva

Labour —M. M. Romanov

Justice —N. Krylenko

Education —A. S. Bubnov

Health —M. F. Vladimirovsky

Social Welfare —I. A. Nadvornyy

Workers' and Peasants' Inspection —
N. I. Il'in

Light Industry —K. K. Stryevsky

Communal Economy —N. P. Komarov

State Planning Commission —M. I. Rogoff

The People's Commissariat for the Interior was liquidated on January 1, 1931. Its functions were transferred to the Executive Committees of the Soviets and the organs of the People's Commissariat for Justice.

Area and Population

PROGRESS AND PRESENT CONDITION

The total area of the Soviet Union in 1927 was given as 21,352,572 sq. kilometres, or 8,241,921 square miles. On April 1, 1931, the population of the U S S R was estimated at 161,006,200. In December, 1932, it was estimated at 163,000,000. Figures of population and area are as follows (capitals in brackets) —

Constituent Republics of the Union	Area in Sq. Miles (Jan 1, 1927)	Total Population (April 1, 1931)
R S F S R (Moscow)	7,626,717	110,932,500
Ukrainian S S R (Harkoff)	174,201	31,403,200
White Russian S S R (Minsk)	48,751	5,246,400
Transcaucasian S F S R (Tiflis)	71,255	6,426,700
Uzbek S S R (Tashkent)	74,786	4,685,400
Turkoman S S R (Ashkhabad)	189,608	1,187,900
Tazhik S S R (Stalinabad)	56,608	1,174,100
Total	8,241,921	161,006,200

On April 1, 1932, the populations of Transcaucasia were estimated as follows:—Georgia, 2,883,200, Armenia, 1,032,700, and Azerbaijan, 2,510,800.

The following table shows the growth of the population in the U S S R during the last 35 years —

Year	Population	Year	Population
1897	106,482,300	1918	150,426,800
1914	139,812,700	1931	160,430,300
1918	144,579,900	1932	163,166,100
1926	147,027,900		

The R S F S R contains 11 autonomous Republics and 15 autonomous regions. The Ukraine contains 1 autonomous Republic (Moldavia). The 11 autonomous Republics of the R S F S R are shown as follows (the capitals are in brackets) —

Autonomous Republics

Bashkir (Ufa), March 24, 1919	Crimean (Simferopol), October 18, 1921	German Republic on the Volga (Pskrovsk), July 19, 1923
Tartar (Kazan), May 27, 1920	Yakutsk (Yakutsk), April 20, 1922	Buriat Mongol (Verkhneu di ski), June 4, 1923
Kirghiz (Frunze), February, 1926	Karelian (Petrosavodsk), July 27, 1923	Kazak (Kzyl Orda), October 14, 1924
Dagestan (Makhach Kala), Jan 20, 1921	Chuvash (Cheboksara), April 21, 1925	

The principal towns of the U S S R with their population (on December 17, 1926) are —

Moscow (1930)	2,761,300	Grozny	148,900	Krasnoyarsk	72,888

³ Formerly Tver

Religion.

By decree of Jan. 23, 1918, the Soviet Government disestablished the Church and appropriated certain categories of its property. From the time of the Revolution of March, 1917, till May, 1929, all religions might be freely

professed in the Union. In May, 1929, a decree was issued which altered several paragraphs of the Constitution of the R.S.F.S.R. The new text raises atheism to the status of a State dogma by deleting from the Constitution the phrases hitherto granting all religions and atheism equal freedom, and by formally granting to atheists a monopoly of the right to teach their beliefs. The Soviet Government has instructed the Commissariat for Education to organize a special new 'Inspectorate of Anti-Religious Propaganda,' with branches in all district centres, to superintend the enforcement of the new law restricting the liberties of the Church and forbidding all religious propaganda. Before the revolution the prevailing religion of the country was the Græco Russian, officially called the Orthodox Faith.

It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. Roman Catholics are most numerous in the former Polish Provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south western provinces. The Soviet authorities are now endeavouring to settle Jews who have lost their business or occupation as a result of the wars and revolution on the land—particularly in the Crimea. For colonizing Jews in the Far East the Soviet Government in 1928 allotted an area of 20,000 sq kilometres in the district of Byro-Brdjan. In 1924, 76,000 Jews were engaged in agriculture, in 1927, 165,000, in 1931, 300,000.

Education.

Education in the Union of Soviet Socialist Republics is conducted by the Commissariats for Education of the constituent and autonomous Republics of the Union. With regard to the autonomous republics, the higher educational institutions and also the scientific institutions situated in their territory are subordinated to the Commissariat for Education of the Union Republic of which they form an autonomous part.

The State Publishing Company, the Music Trust, the Sovkino, and the Trust for the Supply of School Equipment are independent economic units, over which the Commissariat for Education exercises only an ideological and methodological control.

Education is obligatory, and certain classes of private schools (under State control) are permitted. In the teaching year 1930-31, 82.5 per cent. of the whole juvenile population of the U.S.S.R. (from age 8 to 17) were included in the primary schools. Co-education has been adopted in all schools. The principle of 'labour' education is applied differently in the schools of each grade, in taking part in the self government of the schools, the pupils are taught the art of self government as citizens. Technical work is conducted as a part of the general industrial life of the country. School education is becoming increasingly technical in the U.S.S.R.

The following table shows the number of educational institutions and pupils in the Soviet Union on January 1, 1931 —

Type of Institution	Number of Institutions	No of Pupils
I Institutions for Social Training —		
Primary schools	187,799	18,112,497
Seven year schools	7,970	8,549,970
Secondary schools	673	895,126
Schools for peasant youth	4,414	614,770
Schools for youths above school age	3,472	161,401
Auxiliary schools for mentally deficient	185	21,482

Type of Institution	Number of Institutions	No. of Pupils
II Institutions for professional and technical education —		
Higher schools	536	272,125
Workers' faculties	694	150,423
Technical high schools	2,998	609,064
Vocational schools	949	100,782
Training work-shops	217	15,242
Schools for factory training	1,728	421,723
Courses and schools for workers' education	1,999	191,484
Other vocational courses and schools	3,515	381,194
III Institutions for pre-school education		
Kindergartens	6,786	371,774
Children's homes, communes, and colonies (for normal children)	1,437	114,437
Children's playgrounds	28,761	1,079,938
Homes and colonies for defectives	397	27,509
Medico-pedagogic isolation institutions	42	2,434
Receiving stations for 'bezprisoni'	126	7,009

In 1929 there were also the following politico-educational institutions: courses for the education of workmen, 594, courses for juvenile workers, 82; courses for the peasants, 346, schools of an advanced type, 639, preparatory courses for the educational institutions of the higher type, 67, workmen's universities, 77, Soviet party schools, 934, schools for those who are in the first stages of literacy, 8,272, schools for the liquidation of illiteracy, 42,097, all kinds of politico-educational institutions, etc., 29,770

In the beginning of 1929 there were in the U.S.S.R. 29,006 libraries, 5,585 clubs, 21,941 cottage reading rooms, 1,219 people's homes, 1,062 peasants' homes, 1,201 theatres, 37 concert halls, 38 circuses, 4,093 cinemas, 719 music halls, 44,774 red cosy corners

Previous to the Revolution universities existed in the following places in the territory now included in the R.S.F.S.R. and administered by the People's Commissariat for Education: Moscow (2), Leningrad, Kazan, Saratov, Tomsk, Perm, Irkutsk. The Universities of Dorpat and Warsaw, evacuated during the war, were reorganised in 1918 as the Voronezh and Don Universities, and in the same year another was set up at Nizhni-Novgorod. In 1919 universities were established at Yaroslavl, Smolensk, Kostroma, Tambov, Astrakhan, Tashkent, Samara, Simbirsk, Orel, in 1920, at Ekaterinburg, Ekaterinodar, and Veliki Ustiug, and in 1929 four new Communist Universities were proposed at Voronezh, Samara, Gorky (formerly Nizhni Novgorod) and Ivanovo-Voznesensk, for the training of Marxist propagandists

Owing to the urgent need of specialists, a reorganization of the system of higher education was begun in 1929-30. Existing universities and institutes, which formerly had a more general character, were classified and given over to the control of corresponding economic institutions. Thus all institutions for higher education which prepared specialists for industry were taken over by the Supreme Economic Council (now divided into 3 Commissariats), those preparing agronomists to the Commissariat for Agriculture, and so on.

In 1932 there were 500 higher educational establishments in the Soviet Union

Justice and Crime.

The basis of the Judiciary System is the same throughout the whole of the Soviet Union, but the Constituent Republics have the right to introduce

modifications and to make their own rules for the application of the code of laws. The Supreme Court of the U S S R is the chief Court and supervising organ for all Union Republics.

In accordance with the declaration by the Central Executive Committee of the U S S R on October 29, 1924, the fundamental objects of the judiciary system of the U S S R are to safeguard the conquest of the proletarian revolution and to protect the workers' and peasants' government and the laws laid down by the latter.

In the main, there is very little difference between the code of laws and their application in the separate republics. The legal system of the R S F S R, therefore, can be taken as an example of that in force in all the other Republics of the Union.

The Law Courts of the R S F S R. are divided into People's Courts and Special Courts. The People's Courts consist of the People's Judge and two Assessors, and their function is to examine as the First Instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Provincial Court, and those of the highest importance at the Supreme Court. The Provincial Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. The Supreme Court exercises supervision over all the Courts of the Republic, and forms an Appeal Court from the Provincial Court.

The Judges of the People's Courts and the Presidents and Members of the Provincial Courts are selected for one year by the Provincial Executive Committee, from individuals who enjoy electoral rights and who have the necessary qualifications with regard to their public or legal work.

The People's Assessors are called upon for duty for six days in a year from lists of electors drawn up in the rural districts, industrial enterprises and army corps. The People's Assessors for the Provincial Court must have had at least two years' experience in public or trade union work. The list of Assessors for the Supreme Court is drawn up by the Central Executive Committee of the Republic.

In addition to the People's Courts there are the following Special Courts — (1) the Labour Section of the People's Court, whose duty it is to supervise the regulations relating to the working conditions and the protection of labour as well as to give decisions on conflicts arising between employers and employees, the violation of regulations, (2) Rural Commissions, which settle disputes concerning agrarian matters, such as claims relating to the use of the land, etc., (3) Arbitration Committees, which settle disputes arising between separate State organs concerning property rights, with certain exceptions, (4) Military Tribunals, which deal with military offences, espionage, and other classes of crime, when there is no other Law Court on the spot but a military tribunal, (5) Disciplinary Courts, which deal with offences and neglect of official duties committed by members of the Central Executive Committee and similar State organs.

The People's Commissary for Justice is the State Chief Prosecutor, and in every province and district there is a Provincial Prosecutor who is immediately subordinate to the Chief Public Prosecutor of the Republics. The duties of the Public Prosecutors are the supervision of the correct application of the law by all State organs.

Finance.

The revenue and expenditure for five years are shown as follows (in millions of roubles) —

	1928-29	1929-30 ¹	1930-31 ²	1931-32 ²	1932-33 ²
Revenue	8112 4	12,799 7	23,053 1	27,416 6	35,010 9
Expenditure	8021 1	12,385 3	23,068 8	27,542 0	33,230 9
Surplus	+ 91 3	+ 464 4	- 15 7	- 125 4	+ 1,780 0

¹ Estimates

² The Soviet financial year coincides as from 1931 with the calendar year, instead of covering the period from October 1 to September 30 as before.

The budget estimates for 1933 were as follows:—

Revenue	Millions of roubles	Expenditure	Millions of roubles
I Resources of Socialised Economy —		National Economy	23,912 0
Turn over Tax	21,796 2	Education	2,153 0
Special Merchandise Fund	1,700 0	Health	123 4
Taxes on operations not relating to Merchandise	162 0	Physical Culture	8 7
Taxes on collective Property	168 0	Protection of Labour	103 6
„ on profits from State undertakings	1,105 9	National Defence	2,264 4
Railways, Posts and Telegraphs, etc	2,775 4	Service of Loans	1,330 0
Internal Loan	800 0	Local Budgets	1,949 4
Silver Currency	50 0	Other Expenses	1,291 9
Other Taxes on various undertakings	191 4		
Total.	28,748 9	Total	33,230 9
II Resources of the Population —			
Loans	3,212 0		
Direct Taxes, Customs, etc	2,152 4		
	897 6		
Grand Total	35,010 9		

The budget plan for 1932 provides for an increase in expenditure on the financing of national economy to 20,060,900,000 roubles, and in the total expenditure to 27,429,000,000 roubles.

On September 1, 1917, the total indebtedness of Russia amounted to 32,300 million roubles, made up as follows —Pre-war debt, 8,800 million roubles, seven internal war loans, 10,500 million roubles, loans contracted abroad, 8,000 million roubles, short dated loans, 5,000 million roubles. According to an estimate made in 1924 the foreign loan was then reckoned at 15,853 million roubles. On March 31, 1921, the indebtedness of Russia to Great Britain was £561,402,000 (excluding interest since December 31, 1918). All these debts were cancelled by decree of January 23, 1918. The debt to the United States is 800 million dollars—250 million for war purchases, 150 million for former private loans, and 400 million advances by private American industrialists to the Soviet Government.

On October 1, 1932, the State debt was 8,504,500,000 roubles.

Defence.

I. ARMY

The military system of the Union of Soviet Socialist Republics was reorganized in 1925

The Red Army is now organized on a basis of universal military service. Service is divided into (a) preparatory, (b) service with the colours; (c) reserve service. Preparatory training is on a militia basis and begins at the age of 19. It consists of a preliminary course of 96 hours, lasting 1½ months, and a supplementary course of 280 hours, lasting 28 days, the whole spread over 2 years. The average number of men called up each year is 1,200,000. Of these 400,000 are freed from military service. Of the remaining 800,000, 260,000 go to regimental cadres, 200,000 are trained for territorial formations, and 340,000 are given extra military training. The strength of the active army is about 562,000.

The whole territory of the U S S R is divided, for the purposes of the Army, into 10 military districts.

The Red Army is organized as follows: Infantry, consisting of 21 Rifle Corps, 26 Rifle Divisions, 45 Territorial Divisions, and 213 Regiments, or 639 Battalions in all; Cavalry, consisting of 13 Cavalry Divisions (including 4 territorial divisions), and 7 separate Cavalry Brigades; Artillery, 21 Regiments and 71 Light Artillery Regiments; Engineers, 29 Battalions.

On January 1, 1931, the total number of effectives was given as 562,000 (including 37,700 commanding personnel of middle and higher rank). Of these, 504,303 (including 30,864 of middle and higher rank) belonged to the land forces, 28,658 (including 4,946 of middle and higher rank) to the air forces, and 29,039 (including 2,397 of middle and higher rank) to the naval forces.

The formations organized on a military basis consisted of 28,150 OGPU frontier guards, 17,240 OGPU troops stationed in the home country, and 13,200 escort troops. The land, sea and air forces possessed 750 aeroplanes.

Those on active service both in the Standing Army and the Territorial Forces, in the Navy, etc., whilst subject to the Rules and Regulations and Military Discipline, at the same time enjoy all the civic rights of Soviet citizens.

II. NAVY

The proposed reconstruction of the Soviet Navy proceeds slowly, though it has been officially stated on more than one occasion that a complete reconstitution of the forces is contemplated. There are four battleships, the *Parizhskaia Kommuna*, *Oktiabrskaya Revoliutsiia*, *Marat*, and *Mikhail Frunze*, of which only the first named appears to have undergone any considerable refit.

Part of the Black Sea Fleet taken over by General Wrangel, and comprising one battleship, 10 destroyers, 4 submarines and other vessels are still at Bizerta under French protection, and have ceased to have any effective value as fighting units.

State dockyards were at Nevsky, New Admiralty and Galernyi Ostrov, Leningrad; Kronstadt, Sevastopol, and Vladivostok. Guns were made at the Putiloff steel works, 3 or 4 submarines are reported to be under construction at Leningrad, but otherwise very little work appears to be in hand.

The following table gives the principal ships at present in service. The former division into Baltic and Black Sea fleets may be considered to have lapsed, as ships now pass freely through the Dardanelles from one station to the other.

Date of Launch	Name	Displacement	Horse power	Speed	Officers and Men	Main armament
<i>Battleships</i>						
1911	<i>Oktiabrskaya Revoliutsia Parizhskaia Kommuna Marat Mikhail Frunze</i>	28,000	42,000	23	59—1,000	12 12in, 16 4 7in.
These ships are the former <i>Gangut, Sevastopol, Petropavlovsk, and Poltava.</i>						
<i>Cruisers.</i>						
1900	<i>Aurora</i>	6,830	11,600	20	590	10 5 1in
1905	<i>Komintern</i>	6,750	19,500	23	573	14 5 1 in, 4 3in AA
1915	<i>Prointern</i>	6,800				
1915	<i>Tcheronaya Ukraina.</i>	7,600	50,000	29 5	624	15 5 1in, 4 4in AA
1916	<i>Krasny Kavkaz</i>					

There remain not more than 24 destroyers of any fighting value. The modern submarines are about 8 in number. There are also 3 gunboats, several mine layers and mine sweeping trawlers, motor boats, and surveying and training ships. The flying service includes 50 or 60 planes. A small force is at Vladivostok. There is a flotilla on the Dnieper, and a small force is in the Caspian. There are no naval vessels of any importance in the White Sea.

The total budgetary expenditure for the Red Forces (land, naval, and air) in 1931 was estimated at 1,290,000,000 roubles. Naval personnel numbers 29,039 officers and men.

Production and Industry.

The Soviet Union, not long since predominantly agricultural in character, is becoming an industrial agricultural country. In 1913 industrial production was 42 1% of the total, and agricultural production 57 9%. In 1929-30 industrial production was 58%, and agricultural production 42%.

The total area under cultivation (including single owner peasant farms, Soviet farms and collective farms) was 118,500,000 hectares in 1929, 128,000,000 hectares in 1930, and 138,000,000 hectares in 1931. The total area of the single owner peasant farms (excluding the Soviet farms and collective farms) was, for the years mentioned, in hectares, as follows — 1927, 112,452,400, 1928, 113,859,500, 1929, 112,000,000, 1930, 86,000,000, 1931, 45,800,000.

The area cultivated by the collective farms in 1929-30 was over 86,000,000 hectares, and in 1930-31, 80,900,000 hectares. On November 1, 1931, about fifteen million peasant farms, i.e., 60% of all peasant holdings, had been collectivized.

The following table shows the acreage and yield of the principal crops for three years —

Crop	Area (thousand hectares)			Harvest (decatons ¹)		
	1929	1930	1931	1928	1929	1930
Rye	24,935	28,859	27,672 3	1,919,919	2,035,914	2,800,284
Wheat	29,728	83,784	37,200 6	2,181,608	1,837,782	2,692,034
Barley	8,085	7,481	6,820 4	523,458	721,853	677,768
Oats	18,881	17,913	17,197 5	1,584,329	1,573,926	1,662,492

¹ Decation = 10 metric tons.

Crop	Area (thousand hectares)			Harvest (decaton ^s *)		
	1929	1930	1931	1928	1929	1930
Buckwheat	2,816	1,987	1,903 1	166,078	151,380	128,658
Millet	5,610	5,068	5,254 9	294,596	311,267	317,362
Maize	3,548	3,919	3,942 4	337,895	301,866	266,758
Other grains	2,414	3,037	4,489 5	186,292	190,663	249,630
Total ¹	96,012	102,041	104,490 6	7,154,170	7,174,151	8,354,498
Potatoes ¹	5,692	5,816	6,111,4	3,990,430	4,562,970	4,718,140

¹ Excluding perished crops.² Decaton = 10 metric tons

Industrial crops were as follows —

Crop	Area (thousand hectares)			Harvest (decaton ^s ²)					
	1929	1930	1931	1928		1929		1930	
				Seeds	Fibres	Seeds	Fibres	Seeds	Fibres
Flax	2,053 6	2,246 5	3,138 1	57,754	34,572	71,276	38,063	70,096	42,857

The following table shows the area under cultivation and the harvest of tobacco —

—	1928	1929	1930	1931
Tobacco				
Area in acres	97,200	46,900	55,200	93,000
Output in tons	30,110	31,700	41,030	—
Makhorka (coarse tobacco)				
Area in acres	120,000	42,800	45,300	107,900
Output in tons	131,000	37,830	37,400	—

Figures of yield of the crops in the above tables are not available for 1931

The number of animals (million heads) in the Soviet Union is shown as follows for four years :—

—	1927	1928	1929	1930
Horses, of all kinds . . .	31 3	} 32 8	34 0	31 2
Horses, working farm, alone	23 1			
Cattle . . .	67 8			
Sheep and Goats . . .	134 3	141·0	147 2	118 2
Pigs . . .	20·0	25 6	30 9	13 3

Of the whole of the forest land of the U S S R , a large portion is administered and worked, or let out as concessions, by the State, and the other is granted for use to the peasantry free of charge, the latter being 72,900,000 acres in extent.

The Forest Lands of the U S S R are estimated to cover 2,310,000,000 acres, of which 1,984,547,500 acres are situated in the R S F S R. and 55,782,500 in the other constituent Republics of the Union. Of the total forested area, however, some 780,000,000 acres are in swamps or marshes. In European Russia there are 405 million acres of forest land, most of it being in the North, some in the Centre, but very little in the South.

A large proportion of the forest lands of the U S S R. lies in Asiatic Russia (some 300,000,000 acres in extent) where, owing to the absence of roads, it is not accessible for working. The forests of the Caucasus, on the other hand, are capable of furnishing the world's market with an inexhaustible supply of many valuable varieties of timber. A total of 18,600,000 acres in the Caucasus is covered by forest lands.

The Soviet Union is rich in minerals. The output of some of the principal ores was as follows —

Ores	1927-28	1928-29	1929-30	1931
	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Iron	5,857,000	7,265,000	10,012,000	10,731,000
Manganese	787,000	1,256,800	1,550,000	900,000
Copper	647,000	772,600	1,080,000	1,168,400

The total gross output of coal in 1929-30 was 46,700,000 metric tons, in 1931, 55,860,000 tons. The output of pig iron in 1932 was estimated at 6,250,000 metric tons (4,885,000 metric tons in 1931), of steel, 5,800,000 metric tons (5,300,000 metric tons in 1931).

The output of the State oil industry was as follows (in metric tons) — 1928-29, 13,700,000, 1929-30, 17,100,000, 1931, 22,322,000. The quantities of oil refined in the country were (in metric tons) — 1931, 19,918,600; 1932, 20,213,400, and exports, 1931, 5,224,802, 1932, 6,010,000.

The organization of industry in Soviet Russia is based on State ownership and control, and is administered in accordance with the Decree of April 10, 1923, and subsequent slight modifications, by State Trusts and Combines. The Trusts in the large scale and middle sized State industries number over 600, but there are 291 big Trusts and these cover about 80 per cent of the total State industries. A small number of Trusts, called Monopoly Trusts, combine all the enterprises of a given branch of industry in the whole Union. Such are, for instance, the Rubber Trust, Silk Trust, Urals Asbestos Trust, etc. In some industries there are several trusts. Thus the Oil, Cement and a few other industries have four trusts each, but in the vast majority of industries in the Soviet Union there are a number of separate Trusts in the various parts of the Union.

The number of employees in the U S S R in 1927-28 was 11,456,000; in 1928-29, 12,150,000, in 1929-30, 13,684,000; in 1931, 18,600,000.

The following table shows the output programme according to the five-year plan, and the realizations in 1929-30 and 1931, in the principal industries:—

Branch of Industry	Unit	1929-30		1931	
		Estimates	Realiza- tion	Estimates (1930-31)	Realiza- tion (1931)

Commerce.

The foreign trade of the U S S R. is organized as a state monopoly. Importation and exportation of goods are effected by special licences issued by the Commissariat for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Russian exports abroad is vested in the Trade Delegations of the U S S R in foreign countries. By special decrees respective Government Departments select those State and co-operative organizations which are authorized, under the control of the Trade Delegation, to engage in foreign trade.

For the purpose of encouraging the participation of foreign capital in the foreign trade of the country there have been formed in the U S S R. 'Mixed Companies' in which shares are held by the Soviet Government and foreign concerns. There are 18 export organizations, 12 import organizations, and 7 export and import organizations. The Co-operative Organizations which are granted the right of 'exit to the foreign markets' are Centrosoyus (Central Union of Co-operative Societies), Selakosoyus and several other organizations.

The following table gives the value of imports and exports for five years —

Fiscal year ¹	Imports		Exports	
	Quantity (thousands of metric tons)	Value (millions of roubles) ²	Quantity (thousands of metric tons)	Value (millions of roubles)

Great Britain . . .	266,071	73,381	United States . . .	22,690	229,915

The chief articles of import from Russia into the United Kingdom and of export (domestic produce and manufactures) from the United Kingdom to Russia in 1931 were, according to the Board of Trade Returns — Imports: Hides and skins, 505,869 $\frac{1}{2}$; butter, 1,969,244 $\frac{1}{2}$; flax, 184,785 $\frac{1}{2}$; wheat, 6,596,856 $\frac{1}{2}$; petroleum, 4,099,740 $\frac{1}{2}$; sawn timber, 5,688,592 $\frac{1}{2}$; pit props, 1,063,864 $\frac{1}{2}$; fish, 2,051,363 $\frac{1}{2}$; bacon, 67,058 $\frac{1}{2}$. Exports: Machinery, 4,417,907 $\frac{1}{2}$; chemicals, 186,513 $\frac{1}{2}$; electrical goods, 61,112 $\frac{1}{2}$; iron and steel, 807,493 $\frac{1}{2}$; arms and ammunition, etc., 208,567 $\frac{1}{2}$.

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
Imports from Russia into U Kingdom	21,576	26,487	84,235	82,285	19,697
Exports to Russia from U Kingdom	2,716	3,743	6,772	7,291	9,274
Re-exports to Russia from U Kingdom	2,085	2,799	2,519	1,911	1,221

Shipping

On January 1, 1928, the mercantile marine consisted of 1,377 steamers of 227,449 net tons, and 809 sailing ships of 26,679 net tons. Seventeen new ships were ordered in 1932, ten of them to be built in Russia. Sixteen old ships, totalling 69,984 tons, have been bought from foreign countries. A regular weekly passenger and cargo service is maintained by Soviet steamers between Leningrad and London.

There were also in 1927 on the inland waterways 3,337 steam vessels of 526,000 h p, of which 2,810 vessels of 515,000 h p were State owned. In addition there were 10,261 vessels not driven by steam of 4,128,000 tons.

Internal Communications.

There are 106,000 kilometres of navigable inland waterway in the Soviet Union. In 1931 a People's Commissariat of Water Transport was established to control sea and river transport.

The length of railroads in use, wide and narrow gauge (in miles) was, in 1913, 36,871, in 1925-26, 46,255, in 1926-27, 47,022, in 1927-28, 48,023, in 1928-29, 48,286. The goods transport of the railways in 1929-30 amounted to 234.9 million tons, the number of passengers carried by the railways was 510.2 million.

An agreement was reached in June, 1930, regarding a through railway freight service connecting Europe and Asia via the railways of the Soviet Union.

Civil Aviation only started in the U S S R in 1922. The following are some statistics of the activities of the air lines —

	Distance of air lines	Distance flown	Passengers carried	Goods carried
	kilometres	kilometres		kilos
1926	6,392	1,818,130	4,085	84,561
1927	7,022	1,817,952	7,079	170,381
1928	11,971	2,387,930	8,966	228,661
1929	18,342	3,378,452	11,283	238,725
1930	25,632	5,014,648	14,237	417,000

In 1929 the post offices handled 542,391,483 letters and 111,821,070 post-cards in the internal service; and in the foreign service there were received 10,852,555 letters and 1,981,346 post cards, and despatched 12,711,861 letters and 1,972,460 post-cards.

The length of the telegraph lines was 249,356 kilometres as on October 1, 1929. Number of offices, 8,081; of telegrams, 84,537,268 internal and 452,418 international. The length of all telephone wires was 346,203 kilometres. Number of conversations, 39,181,199.

Banking.

The State Bank began operations on November 16, 1921. The following is the statement of accounts of the Note Issuing Department of the State Bank on February 1, 1933 —

ASSETS.		LIABILITIES.	
	Chervontsi		Chervontsi
Metallie securities —		Notes transferred to State	333,196,163
Gold (coin and bullion)	69,476,691	Balance to which notes can	
Other precious metals (coin		still be issued	5,303,837
and bullion)	1,732,408		
Foreign currency	2,987,615		
Foreign drafts	386,247		
State Bank short-term bills	268,915,044		
Total	<u>343,500,000</u>	Total	<u>343,500,000</u>

Money, Weights and Measures

MONEY

The monetary unit is the *Chervontsi*, equal to 10 roubles of the pre-revolution gold coinage. It contains 7 74234 grammes of fine gold. Up to November, 1931, the par of exchange with the pound sterling was officially fixed at 9 458 roubles. Thereafter, owing to the abandonment of the gold standard by Great Britain, it was fixed at from 7 r 30 k to 7 r 40 k.

The currency in circulation are (1) Chervontsi notes in denominations of 1, 2, 3, 5, 10, 25 and 50, issued by the State Bank against gold cover, but inconvertible at present, (2) Treasury Notes in denominations of 1, 3, and 5 gold roubles, (3) silver coins either bank silver (90 per cent silver and 10 per cent copper) in denominations of 1 rouble and 50 kopecks, or change silver (50 per cent silver and 50 per cent copper) in denominations of 20, 15, and 10 kopecks, (4) copper coins in denominations of 1, 2, 3 and 5 kopecks and half kopecks, (5) bronze coins in denominations of 1, 2, 3, and 5 kopecks. Owing to the scarcity of silver a nickel coinage for certain denominations (the first ever to be used in Russia) was introduced in 1932.

WEIGHTS AND MEASURES

The metric system of weights and measures has been in use since January 1, 1927.

The old Russian weights and measures were as follows —

1 <i>Verst</i> (500 <i>sazhens</i>)	= 3,500 ft, or two thirds of a statute mile (0 662879)
1 <i>Sazhen</i> (3 <i>arshins</i>)	= 7 feet English
1 <i>Arshin</i> (16 <i>vershoks</i>)	= 28 inches
1 <i>Square verst</i>	= 0 439408 square mile = 281·221 acres
1 <i>Desiatina</i>	= 2 69972 English acres
1 <i>Pound</i> (96 <i>zolotniks</i> = 32 <i>lots</i>)	= $\frac{1}{16}$ of a pound English (0 90283 lb).
	{ = 36 lbs English
1 <i>Pood</i> (40 <i>pounds</i>)	{ = 0 32243578 cwt.
	{ = 0 016121789 ton.
1 <i>Vedro</i> (10 <i>shloffs</i>)	= 2½ imperial gallons (2 7056)
1 <i>Chelvert</i> (8 <i>chelveriks</i>)	= 5 7719 imperial bushels.

The Soviet Government issued a decree adopting the Gregorian Calendar as from February 14, 1918. A six-day week (five working days and one holiday for all) was adopted at the end of 1931

Diplomatic Representatives.

1 OF SOVIET RUSSIA IN GREAT BRITAIN.

Ambassador —Jean Maisky (appointed November 8, 1932).

First Secretary —Samuel B. Cahan

Second Secretary —Efim Gollibzov

Press Attaché —Leonid Tolokonski

Trade Representative and Chairman of the Trade Delegation of the U.S.S.R. —Alexander Ozersky

2 OF GREAT BRITAIN IN SOVIET RUSSIA.

Ambassador.—Sir Esmond Ovey, K.C.M.G., M.V.O. (appointed Dec 7, 1929)

Counsellor —W. Strang, C.M.G.

Secretaries —A. H. Hamilton-Gordon and J. M. K. Vylyan

Commercial Secretary (First Grade) —G. P. Paton, C.B.E.

SOVIET CENTRAL ASIA

Soviet Central Asia embraces the Uzbek Socialist Soviet Republic, the Turkoman Socialist Soviet Republic, the Tashik Socialist Soviet Republic, the Autonomous Regions of Kara-Kalpakia and Kirghizia (Kara Kirghizia) as well as the regions to the north of Tashkent, which are now included in the Autonomous Kazak Republic.

Turkestan was conquered by the Russians about 60 years ago. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the '70's Bokhara was subjugated, the Emir, by the agreement of 1873 recognizing the

suzerainty of Russia. In the same year Khiva became a Vassal State to Russia. Until 1917, Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara, and the Governor-Generalship of Turkestan.

After the outbreak of the Revolution various political parties contended for power in Turkestan. In the summer of 1919 the authority of the Soviet Government became definitely established in these regions, and subsequently the native dynasties in Khiva and Bokhara were expelled. The Khan of Khiva was deposed in February 1920, and a People's Soviet Republic was set up, the mediæval name of Khorezm being revived. In August 1920 the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was formally constituted an Autonomous Socialist Soviet Republic within the R S F S R on April 11, 1921.

In the autumn, 1924, a decision was accepted by the Congresses of the Soviets of Turkestan, Bokhara and Khiva Republics to redistribute the territories of these Republics on a national basis, at the same time Bokhara and Khiva became Socialist Republics. As a result of the redistribution completed in May, 1925, the New States of Uzbekistan, Turkmenistan and Tadjikistan and several Autonomous Regions were established. The remaining districts of Turkestan populated by Kazaks (Kirghiz) were reunited to Kazakhstan.

The Autonomous Kazak Socialist Soviet Republic, comprising the Governments of Uralsk, Turgai, Akmolinsk and Semipalatinsk, had already been created within the R S F S R (August 26, 1920). To this Republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kirghiz, and comprising the greater parts of the old Provinces of Sir Darya and Semirechinsk, together with the eastern part of Ferghana and the foothills of the Pamirs. Area, 94,956 sq miles. Within this Autonomous Kirghiz Republic, two Autonomous Regions were established, in the interests of distinct sub groups of Kirghiz tribesmen, that of Kara Kalpakia, extending south-east of the Sea of Aral, and Kirghizia, covering most of the old Semirechinsk Province. On March 7, 1927, Kirghizia was reorganized into an Autonomous Republic, formerly part of the R S F S R. The remaining parts of Russian Turkestan, with the territories of the old native states of Khiva and Bokhara and the Trans-Caspian Province, constitute the two Socialist Soviet Republics of Uzbekistan and Turkmenistan. In October 1924, the Central Executive Committee of the U S S R decided to admit these two Republics to membership of the Union, a decision which was confirmed by the Third Union Congress of Soviets in May 1925.

On May 1, 1930, the completed line of the Turkestan Siberian railway was opened. The railway is 906 miles long.

TURKMENISTAN

(TURKOMAN SOVIET SOCIALIST REPUBLIC)

The Turkoman Soviet Socialist Republic was formed on October 27, 1924, and covers the territory of the former Trans Caspian Region of Turkestan, the Chirchik vilayet of Bokhara, and a part of Khiva situated on the right bank of the Oxus. In May 1925 the Turkoman Republic entered the Soviet Union as one of its Constituent Republics. It is bounded on the north by the Autonomous Kazak Republic (Kazakhstan), by Persia and Afghanistan on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

Area and Population.—The principal Turkoman tribes are the Tekkés of Merv, and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the South-Western group of Turkish), and they are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gok-Tépé.

The area of Turkmenistan is 491,216 square kilometres (189,603 sq miles), and its population on January 1, 1931, was 1,137,900. The nationalities of the population are as follows: Turkoman, 72 per cent, Uzbeks, 10.5 per cent, Russians, 7.5 per cent, others, 10 per cent.

The capital is Ashkhabad (Polterask), and other large towns are Merv, Leninsk, Kerki, Tashauz.

Production.—The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakan fur, etc. It is also famous for its carpets, and produces a certain special breed of Turkoman horses. It is fairly rich in mineral resources, producing ozokerite, oil, sulphates, common salt, sulphur, etc.

Motor communication has been established between Ashkhabad and Meshed (Persia), and an air line runs between Leninsk and Tashauz. Turkmenistan (particularly the territory along the railway line) is connected by telegraph with the rest of the Union.

In 1931 the total area under cultivation was 415,000 hectares, of which 187,500 hectares were under cotton. On August 1, 1931, 59.7 per cent of the total agricultural population had been collectivized.

The gross production of Turkoman State and cooperative industry in 1931 was valued at 90,500,000 roubles.

Education.—In 1930–31 the public educational system comprised 1,264 primary schools with 91,260 pupils, 77 middle and higher schools with 9,740 pupils, 4,088 political enlightenment institutions with 212,860 pupils, and 3,549 institutions for the liquidation of illiteracy with 109,000 pupils. The new alphabet, based on Latin characters, has been made compulsory in all schools and government offices.

UZBEKISTAN

(UZBEK SOVIET SOCIALIST REPUBLIC)

The Uzbek Soviet Socialist Republic was formed on December 5, 1924, from lands formerly included in Turkestan, Bokhara and Khorezm. It includes a large part of the Samarkand region, the southern part of the Sir-Darya, Western Fergana, the Western Plains of Bokhara and the Uzbek regions of Khorezm. In May 1925, Uzbekistan, by the decision of the Congress of Soviets of the U S S R, was accepted as an equal member into the Soviet Union.

Uzbekistan lies between 36° 40' N latitude and 59° 50'–75° E longitude. It is bordered on the north by the Kazak Autonomous Republic, on the east by the Kirghiz Autonomous Republic and Chinese Turkestan, on the south by Afghanistan, and on the west by the Turkoman Soviet Socialist Republic.

Area and Population.—The Uzbeks, who form the majority of the population over the area of the old States of Khiva and Bokhara, and the Provinces of Samarkand and Ferghana, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the nineteenth century. The several native States over which Uzbek dynasties formerly ruled were founded in the fifteenth century upon the ruins of Tamerlane's

empire. The Uzbeks speak Jagatai Turkish, which is clearly related to Osmanli and Azerbaijan Turkish, and are Sunni Mohammedans.

The area of Uzbekistan is 176,100 square kilometres. The population on January 1, 1931, of Uzbekistan (excluding Tajikistan) was 4,685,400, of whom about one-fifth lived in towns. The population is composed of: Uzbeks, 76 per cent., Russians, 5.6 per cent., Tajiks, 5.5 per cent., others, 12.9 per cent. The capital of the Republic is Tashkent, other important cities are Bokhara, Khiva, Andijan, Kokand, Namangan, Samarkand.

Production.—Uzbekistan is a land of intensive farming, based on artificial irrigation. By the middle of 1932, 72.6 per cent of the peasant farms had been collectivized. Cotton growing has been developed. In 1932 the area under cotton was 945,900 hectares. Uzbekistan also produces fruits, wool, and silk. Its industry consists of cotton spinning (51 factories), oil and coal mining. In 1928–29 the gross production of large industries amounted to 70 million roubles. The gross production of all industry in 1929–30 was valued at 276,000,000 roubles.

Education.—In 1932 there was in elementary schools 531,000 pupils, in middle schools 130,000 pupils, in six-year schools 25,300 pupils, in schools for peasant youth 11,300 pupils, and in institutions for the liquidation of illiteracy 710,000 pupils. There are also higher educational establishments and technical schools.

The total length of railway in 1930 was 1,789 kilometres, of which 734 kilometres (455 miles) form that part of the line which connects central Asia with Russia. From this main line branches lead to Karshe Kitab, Kerki-Termez, Jalalabad, Namangan, Andijan and other centres. On the territory of the Republic there are 113 postal telegraph institutions, an air line which serves all of Central Asia, and this air-line is most developed in Uzbekistan.

TAZHIKISTAN.

(TAZHIK SOCIALIST SOVIET REPUBLIC)

The Tazhik Socialist Soviet Republic was formed from the former regions of Bokhara and Turkestan where the population consisted mainly of Tazhiks. Its equality with the other six republics of the Soviet Union was established on October 17, 1929.

Tazhikistan is situated between 39°40 and 36°40 N latitude and 67°20 and 75° E longitude, north of the Oxus. On the west and north it is bordered by Uzbekistan and by the autonomous Republic of the Kirghiz, on the east by Chinese Turkestan and on the south by Afghanistan.

Area and Population.—The Tazhiks speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tazhiks are mostly Sunnis.

The area of the territory is 145,100 square kilometres (56,608 sq miles), and the population on January 1, 1931, was 1,174,100, divided according to nationality as follows: Tazhiks, 78.4 per cent., Uzbeks, 17.9 per cent.; Russians, 0.8 per cent., others, 2.9 per cent. The capital is Stalinabad (formerly Dushambe).

Production.—The occupations of the population are mainly farming and cattle-breeding. Gold, oil and coal are being produced, but by very primitive methods. Irrigation is being developed and cotton growing extended by the latest technical methods. In 1932 the area under cultivation was 1,008,000

hectares, of which 135,000 hectares were under cotton. By May 1, 1932, 41.2 per cent. of the peasant population had been collectivized, and of these 68.9 per cent. were engaged in the cultivation of cotton.

In regard to roads, it is the poorest region in Central Asia. The only means of communication up to the time of the formation of the Republic were camel-tracks. A railway line has been completed between Termez and Stalinabad (about 200 kilometres—124 miles). Automobile transport roads are also being built, 2,500 kilometres (1,550 miles) of roads having already been completed. A steamship line on the Oxus runs between Termez, Saraya and Jilikulam on the river Vakhsh. Stalinabad is connected by an air line with Termez and Kagan.

In 1932 there were 114,000 pupils in elementary and middle schools. There are 12 post and telegraph offices.

OTHER ASIATIC TERRITORY OF THE SOVIET UNION

The remainder of the Asiatic territory of the U.S.S.R. is divided as follows —

Region	Area in sq km	Population, Jan 1931	Region	Area in sq km.	Population, Jan 1931
Far Eastern Region	2,333,500	1,598,400	Western Siberian Region	1,804,800	8,767,200
Yakutsk Autonomous Republic			Eastern Siberian Region (exc the Buriat-Mongol Republic)	3,179,400	2,568,400
Buriat-Mongol Autonomous Republic	4,028,300	808,400			
	389,100	575,000			

Khabarovsk is the principal city of the Far Eastern Region. The Kamchatka Peninsula occupies 40 per cent. of the area of the whole region. The population of Kamchatka, which is very sparse, derives its income mainly from fishing and hunting. Agriculture and cattle-breeding are being developed in Kamchatka. There are three big State farms, with over a thousand head of cattle, and of an area of some hundreds of hectares, and collective farms are being organized. The majority of the population in the Vladivostok area is engaged in agriculture, industry and transport. The forests constitute one of the most important of the natural

resources The total forested area is 900,000 square kilometres, of which at least one-half can be exploited. Nearly three million acres are under cultivation and many diverse crops are raised. The country is rich in fur-bearing animals of many varieties, and is an important fish-producing centre, being practically the only one in Siberia. Of the other industries of importance are wood-working and flour-milling. In addition to the vast mineral, timber, fur and fish resources, there is a comparatively good transport system, with a fairly well-developed railway system, and navigable rivers flowing into ice-free waters.

YAKUTSK REPUBLIC

The two principal industries of the Yakutsk Republic are hunting and gold mining. The gold mining industry of the republic has shown steady development. The Soviet Trust Soyus-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores are worked, and coal. There is also some trade in salt. Over 70,000 hectares of land are now under cultivation. A severe climate and lack of railways are serious obstacles to the economic development of the republic. There is an air service between Irkutsk and the town Yakutsk, the capital of the republic, which is being used to an increasing extent for the transportation of gold and valuable furs.

In 1932 there were 442 schools, with 29,000 pupils or 86 per cent. of the children of school age. There were also 50 higher schools, with about 9,000 pupils.

BURIAT-MONGOL REPUBLIC

The Buriat Mongol Republic is situated to the south of the Yakutsk Republic. There are a number of enterprises, principally in the leather and glass industries. Cattle breeding is, however, the principal occupation of the population. In 1930 there were the following head of cattle in the republic: horses, 309,600; sheep and goats, 1,387,000; pigs, 99,800.

SIBERIAN REGIONS

Siberia is now divided into the Western Siberian Region, with capital at Novo-Sibirsk, and the Eastern Siberian Region, with capital at Irkutsk. Other large cities in this area are Omsk 161,475, Tomsk and Irkutsk with a population of approximately 100,000 each, Barnaul and Krasnoyarsk of 75,000 persons each, and Buisk 46,000 persons. The Siberian Region extends from the Arctic Ocean to the Mongolian border, and includes fertile agricultural districts and industrial sections in the south while most of the northern territory is an unsettled forest and similar to the Yakutsk Republic. In 1930 the total area under cultivation in the whole of Siberia (including the Buriat-Mongol Republic) was 8,546,000 hectares. In 1931 the area under grain was 8,815,800 hectares. It produces a relatively high percentage of wheat, and its output is considerably above its own requirements, thus allowing a large proportion for export. The Siberian Region possesses some of the largest coal resources known. The Kuznetek Basin is estimated to contain 400,000 million metric tons. There are other rich coal areas in Siberia, particularly the Cheremkhov and Minusinsk Basins. Within the Kuznetek Basin lie also the extensive iron ore deposits of Telbes. Siberia is rich in non-ferrous metal ores, especially copper, the resources of which are estimated to exceed 100 million metric tons. Many big industrial plants (such as those of the Kuznetek Metal Combine), have been or are being built.

THE TRANS-CAUCASIAN SOCIALIST FEDERATED SOVIET REPUBLIC

The natural boundaries of Trans-Caucasia are—on the north, the Caucasian Mountains, separating it from Northern Caucasia, on the west, the Black Sea; on the south, mountains, steppes and rivers which divide it from Persia, and on the east the Caspian Sea. The area of the Trans-Caucasian Republic is 184,492 square kilometres (71,255 sq miles), or 0·8 per cent of the whole Soviet territory. After the November revolution Trans-Caucasia became separated from the rest of Russia and split up into three separate Republics—Georgia, Armenia and Azerbaijan. In April 1920, Azerbaijan became a Soviet Republic. Towards the end of the same year, Armenia also became a Soviet Republic, and in 1921 a Soviet Government was established in Georgia. The three Republics, on March 12, 1922, concluded an agreement whereby they formed a Trans Caucasian Federation, thus establishing the Trans-Caucasian Socialist Federated Soviet Republic. Its population on January 1, 1931, was 6,426,700, made up as follows: Georgians, 31 per cent, Turko Tartars, 28·5 per cent, Armenians, 23 per cent, Russians, 5·8 per cent, others 11·7 per cent.

In 1930 the total length of railway lines (not counting lines building) was over 2,300 kilometres. The main lines run from Batoum, through Tiflis to Baku and along the Caspian Sea through Derbent to the R S F S R. There is also a railway running from Tiflis to the south in Armenia. This line passes through the Allaverd copper mines and through Leninakan and Erivan to Persia. The railways in Trans-Caucasia, as in the rest of the Union, belong to the State.

The area under cotton in Trans-Caucasia in 1931 was 244,600 hectares.

The production of Trans-Caucasian industry in 1931 was valued at 1,270,400,000 roubles.

ARMENIA.

(ARMENIAN SOCIALIST SOVIET REPUBLIC)

On April 2, 1921, Armenia was proclaimed a Soviet Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March 1921) which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Erivan.

Area and Population.—Armenia (capital Erivan), which covers an area of 30,948 square kilometres (11,945 sq miles), adopted the Soviet Constitution in November 1920. On January 1, 1931, the population was 1,032,700, made up as follows: Armenians, 84.7 per cent, Turko-Tatars, 8.8 per cent, Russians, 2.2 per cent, others, 4.3 per cent. The population of Erivan on October 1, 1929, was about 75,000.

Agriculture.—Armenia is essentially an agricultural country; in 1929-30 the aggregate cultivated area of Armenia amounted to about 1,000,000 acres, in 1932 over 30,000 hectares were under cotton. At the beginning of 1932, over 40 per cent of peasant farms had been collectivized. Irrigation works have been constructed to a total length of 850 kilometres (187 miles). The principal of these is the Shirak Lenin Canal, 22 kilometres (13 miles) long, commenced in 1922 and completed in 1925. During the ten years of the existence of Soviet Armenia 6 large canals have been constructed, which have given to the peasants 40,000 hectares of new arable land.

The production of Armenian industry in 1932 was valued at 216,700 roubles.

In 1926 a new electric station was erected at Erivan and the construction of a number of powerful electric stations was started. In November 1928 work was started on another powerful electric station in Leninakan. There are now hydro electric stations in Armenia, the latest of which, Dzorages, was opened in November, 1932.

Apart from schools for general education, with a total of 120,800 pupils, there are in Armenia 7 Educational Institutes of a higher type, 48 Technical Schools, and 9 Workers' Faculties.

AZERBAIJAN

(AZERBAIJAN SOCIALIST SOVIET REPUBLIC)

The 'Mussavet' (Nationalist) party who dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on May 28, 1918, with a capital, first at Ganja (Elizabetopol) and later at Baku. A Government of 12 ministers was formed, which the British Government recognized as a *de facto* administration in February 1920. On April 28, 1920, the 'Hummet' or Bolshevik Party overthrew the existing Government. On September 30, 1920, a military and economic treaty was concluded between Azerbaijan and Russia, and in the following year Azerbaijan was declared a Soviet Republic.

Area and Population—Azerbaijan covers an area of 84,679 square kilometres (32,686 sq miles) and has a population (1926) of 2,313,172. Its capital is Baku, population 452,000. Azerbaijan includes the Nakhichevan Socialist Soviet Republic and the Nagorni Karabakh Autonomous Region. It has a temperate climate throughout the year. On January 1, 1931, the population of Azerbaijan was 2,510,800, made up as follows: Turko-Tartars, 63·3 per cent, Armenians, 12·4 per cent, Russians, 9·7 per cent, others, 14·6 per cent. 77·6 per cent of the total population live in the country districts.

Agriculture and Industry.—Azerbaijan is in the main an agricultural country, the chief products being grain, cotton, vine, kitchen and garden produce, and to some extent also tobacco and silk. In the mountain regions the occupation of the people is cattle-breeding. The area under cultivation in 1929-30 was over 1,100,000 hectares (as compared to 961,000 hectares in 1913). In 1932 the area under cotton was 229,000 hectares. On August 1, 1931, 41·4 per cent of peasant farms had been collectivized.

The most important industry is the oil industry, especially in the Baku Region. The total output of oil was in 1927-28, 7,560,000 tons, in 1928-29, 8,802,000 tons, in 1929-30, 10,900,000, in 1931, 13,443,000 tons. The number of men employed was (September 1, 1929), 46,700. All the oilfields have been electrified and are now connected with the town of Baku and, for the most part, with the new workers' settlements which have been constructed more or less on the American type. Amongst the other industries in Azerbaijan are copper, salt, textiles, and fishing industries. The total production of State industries other than oil in 1929-30 was valued at 75,900,000,000 roubles.

In 1932 there were 335,000 pupils in elementary and secondary schools.

GEORGIA.

(GEORGIAN SOCIALIST SOVIET REPUBLIC)

The independence of the Georgian Social Democratic Republic was declared at Tiflis on May 26, 1918, by the representative body, the National Council, elected by the National Assembly of Georgia on November 22, 1917. The Act of Independence of Georgia was confirmed on March 12, 1919, by the Constituent Assembly, which had been elected on a basis of universal suffrage.

The Government, which was controlled by the Menshevik Party, received *de jure* recognition by the Allies on January 27, 1921. In February, 1921, however, a Soviet Government was set up.

Area and Population.—Georgia occupies the whole of the western part of Trans-Caucasia and covers an area of 69,900 square kilometres. Its population on January 1, 1931, was 2,883,200, made up as follows: Georgians, 67·7 per cent., Armenians, 11·6 per cent., Turko-Tartars, 5·2 per cent., Ossetians, 4·3 per cent., Russians, 3·6 per cent., others, 7·6 per cent. Georgia embraces the Abkhassian Socialist Soviet Republic, the Ajaristan Autonomous Soviet Republic and the Autonomous Region of Southern Ossetia.

Education.—In 1932 there were 440,800 children in elementary schools, 126,900 children in secondary schools, and 16,180 pupils in industrial, agricultural and social-economic high schools. There is a State University, a polytechnic institute, a Trans-Caucasian Communist University, an Academy of Art and a Conservatoire.

Tiflis (population 293,000) is not only the capital of Georgia, it is also the capital of Trans-Caucasia. It is one of the oldest towns of Georgia, but it is now being to a certain extent rebuilt and modernised.

Agriculture and Industry.—Agriculture is important, much work has been done in the drainage of land, and in the construction of irrigation works. On August 1, 1931, 38·8 per cent. of peasant farms had been collectivized. The gross production of Georgian industry in 1929–30 was valued at 159,600 million roubles. Georgia is very rich in forest lands where fine varieties of timber are grown. The most important mining industry of Georgia is the exploitation of the manganese deposits, the richest of which lie in the Chiatura region. Manganese deposits in Georgia are calculated at 250,000,000 tons, distributed over an area of 140 square kilometres. There are also coal seams, the most important of which are at Tkvargelskoe (deposits estimated at 250,000,000 tons), and Tkvilulskoe (deposits of 80,000,000 tons). The most powerful electric station in Trans-Caucasia is in Georgia on the River Kura, the Zemo-Avchal hydro-electric station of 36,000 horse power. The second most powerful station is the Abash Hydro Electrical Station; a number of other

stations are either in the course of construction or are to be constructed shortly

The railway system of Georgia extends to 570 miles. The trunk line leading from Batum through Tiflis to Baku on the Caspian Sea has several narrow gauge branches on Georgian territory to the coal mines of Tkhibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjomi and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia. All the railway lines on the territory of Georgia belong to the State.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, is being constructed.

UKRAINE

(UKRAINIAN SOVIET SOCIALIST REPUBLIC)

The Ukrainian Soviet Socialist Republic was proclaimed on December 27, 1917, that is, soon after the Soviet Revolution of November 7, 1917, and was finally established in December 1919. In December 1920, the Ukrainian Soviet Socialist Republic concluded a military and economic alliance with the Russian Socialist Federal Soviet Republic and the following united People's Commissariats were formed — For military and naval affairs, the Supreme Economic Council, Foreign Trade, Finance, Labour, Transport and Posts and Telegraphs.

On July 6, 1923, the Ukrainian Socialist Soviet Republic formed, together with the other Soviet Socialist Republics in Russia, the Union of Soviet Socialist Republics.

Area and Population — The Ukrainian S.S.R. covers an area of 451,731 sq. kilometres (166,368 sq. miles), i.e. 2.3 per cent. of the whole Soviet Union, and includes the Autonomous Moldavian Republic (see below).

The population of the Ukraine on January 1, 1931, was 31,403,200, of whom 80 per cent. were Ukrainians, 9.2 per cent. Russians, 5.4 per cent. Jews, and 5.4 per cent. of other origins.

The principal towns are the capital, Kharkov (population 417,186), Kiev (513,789), Odessa (420,888), Dnepropetrovsk (233,801), Stalingrad (148,370), and Nikolaev (104,945). In accordance with the Government decision to erect fourteen Socialist towns in the Donets basin, the construction of the first town, to be known as 'Gorlowka,' was commenced in April 1930. The total cost of construction of these towns will amount to 634 million roubles.

The population of the Ukraine belongs to a variety of churches, the chief being the Orthodox Greek Church, and the Catholic church. There

are also some Protestants, and adherents of other Christian Sects, as well as Jews and others

Education.—In 1932 there were 4,426,200 pupils in schools, of whom 98 per cent were between 8 and 12 years old. There were 172 higher schools, with 92,500 pupils, 684 technical high schools with 152,300 pupils, and 545 workers' faculties, with 80,900 pupils. There was also a very large number of persons enrolled in institutions for the liquidation of illiteracy. There is an Ukrainian Academy of Sciences.

Finance.—The budget of the Ukrainian S S R in 1931 was 880,000,000 roubles.

Agriculture.—Before the war nine tenths of the grain exported from Russia came from the Ukraine. The area under cultivation in 1931 was 28,400,000 hectares. The area under sugar-beet in 1931 was 960,000 hectares.

Out of the whole cultivated area in 1931, 18,268,000 hectares was in collective farms and over 2,000,000 hectares in State farms. On August 1, 1931, 66·3 per cent. of peasant farms had been collectivized.

Industry.—Some of the industries of the Ukraine are amongst the most important in the whole of the U S S R. The Ukraine accounts for 80 per cent of the coal output of the Union, 70 per cent of the pig iron, 50 per cent. steel, 60 per cent. of the iron ores, 85 per cent of sugar, 66 per cent to 70 per cent of agricultural machinery, 95 per cent of manganese ores. In 1929–30 the value of State industrial production in the Ukraine was 3,319 million roubles, and in 1930 the number of workers employed in census industry was 798,700. Big electrification works are being carried on in the Ukraine. In 1930 the total of electricity supplied was 686,500 kilowatts, and in 1932 the hydro-electric station of Dneprostroy is due to enter into service. It will supply 810,000 horse power. The most important industries are metal, sugar, and flour-milling.

Railways.—The total length of railways of the Ukrainian S S R on January 1, 1931, was 13,780 kilometres (over 7,000 miles), and the navigable rivers 2,851 kilometres (1,782 miles).

MOLDAVIA.

(MOLDAVIAN AUTONOMOUS SOCIALIST SOVIET REPUBLIC)

Moldavia was formed as a separate republic on October 12, 1924, from an area of 8,288 square km on the left bank of the Dnestr River. On January 1, 1931, the population of Moldavia was 613,900, of whom 30 per cent were Moldavians, 48.5 per cent Ukrainians, 8.5 per cent Russians, 8.5 per cent Jews, and 4.4 per cent of other origin. The capital is Tiraspol. Agriculture is the principal industry. There are 240 km. of railways and about 1,600 km of roads.

In 1931 the total area under cultivation was 509,000 hectares. By the end of 1931 over 70 per cent of peasant farms had been collectivized. Industrial production in 1931 was valued at 67,400,000 roubles.

WHITE RUSSIA.

(WHITE RUSSIAN SOVIET SOCIALIST REPUBLIC)

The White Russian Soviet Socialist Republic was formed on January 1, 1919. At present, its territory covers 126,790 sq kilometres (48,940 sq miles), and includes the former provinces of Minsk, Vitepsk, Mogilov, and a section of the Grodno provinces as well as the Gomel province. The most important towns of White Russia are Minsk, Vitepsk and Gomel. On January 1, 1931, the population numbered 5,246,400, of whom 80.6 per cent were White Russians, 8.2 per cent Jews, 7.9 per cent Russians, and 3.3 per cent of other origin. About 16 per cent of the population live in towns. White Russia forms one of the constituent Republics of the U.S.S.R. Its constitution is similar to that of the R.S.F.S.R.

Education.—In 1931-32 there were 1,002,590 children in schools. There were 32 higher educational institutions, with 15,130 pupils, 130 technical high schools, with 32,200 pupils, 61 workers' faculties, with 15,760 pupils, 1,600 middle schools, with 189,500 pupils, and 7,027 elementary schools, with 750,000 pupils. There are also 21 scientific institutions and an Academy of Sciences. There are 3 institutions of university rank—the White Russian State University, the Communist University, and the Agricultural Academy with 4,418 students.

Finance.—The budget in 1930 amounted to 145,000,000 roubles.

Agriculture.—The area under cultivation (in hectares) in 1928 was about 8,162,000 in peasant farms, including about 138,000 flax, about 455,500 potatoes, and under grain 2,399,000. The total number of heads of farm stock was 9,080,900 in peasant farms, including 1,091,800 horses, 2,096,200 cattle, 3,449,600 sheep and goats, and 2,298,300 pigs. In 1931 the total area under cultivation was 8,754,000 hectares, of which 2,519,000 hectares was under grain. On August 1, 1931, 42.6 per cent of the peasant farms had been collectivized.

Industry.—The gross production of the State census industry of the White Russian Soviet Socialist Republic in 1927-28 was valued at 157,791,000 roubles, in 1928-29, 226,475,000. The number of workers employed in the State industries in 1927-28, according to the census, was 89,886, and in

1928-29, 47,113 In 1932, 82,760 workers were employed in State industries Capital investments in the White Russian industries amounted to 24 8 million roubles in 1928-29, and 43 9 million roubles in 1929-30 Industrial output in these years amounted to 171 and 302 1 million roubles respectively

SALVADOR.

(REPUBLICA DE EL SALVADOR)

Constitution and Government—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became an independent Republic Its Constitution, proclaimed in 1824 under the Federation, and frequently modified down to 1886, vests the legislative power in a single Chamber of 42 Deputies, 3 for each department, elected for one year by universal suffrage

The President is elected for four years He has a Cabinet of four members in charge of the departments of —Foreign Relations, Justice, and Instruction, War and Marine, Interior, Government and Agriculture, Finance, Charities, and Public Credit

President —General Maximiliano Herúndo Martínez Appointed December 4, 1931, confirmed by Congress February 7, 1932, to serve until February 28, 1935

Area and Population—Salvador is the smallest and most densely populated of the Central American States Its area is 34,126 square kilometres, or 13,176 square miles, divided into 14 departments, each under a governor appointed for 4 years Population, based on the census of May 1, 1930, was 1,459,578 Aboriginal and mixed races, Ladinos or Mestizos, constitute the bulk of the population The language of the country is Spanish The capital is San Salvador, with (1930) 95,447 inhabitants Other towns are Santa Ana, population 75,860, San Miguel, 40,349, Zatatocuca, 23,631, Ahuachapán, 28,438, San Vicente, 24,863, Sonsonate, 20,348

The number of births in 1930 was 66,402, of which 41 3 per cent. were legitimate and 58 7 per cent were illegitimate, the number of deaths, 31,490.

Religion, Education and Justice.—The dominant religion is Roman Catholicism There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively Education is free and obligatory, in 1929 the State took over control of all schools, public and private There were in 1931 924 primary schools, with 1,698 teachers and 56,826 enrolled pupils There are 10 travelling teachers for the rural districts Secondary education is given (1931) at the National Institute (363 pupils) and at 17 recognized private Lyceums, of whom 11 furnish commercial instruction Two normal schools, one for men and one for women, have a total enrolment of 119 There is a National University with 411 students in 1930 Expenditure on public instruction in 1929, 2,728,213 colones

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period.

Finance.—Revenue and expenditure for five years (2 colones = 1 dollar U.S. ; 9.72 colones = 1£ sterling at par) —

	1928	1929	1930	1931 ¹ (Estimates)	1932 ¹ (Estimates)
	Colones	Colones	Colones	Colones	Colones
Revenue	25,546,291	26,147,159	21,964,881	24,793,000	20,986,800
Expenditure	25,867,254	27,219,288	23,048,451	25,189,146	20,977,084

¹ Revenue and expenditure are reported for the calendar year, but the budget is for the fiscal year ending June 30.

Of revenues in 1930, import duties furnished 9,914,711 colones, export duties, 3,922,325 colones, liquor taxes, 3,550,742 colones. Of expenditures in 1930, debt service took 7,096,402 colones, education, 2,138,458 colones, and war, navy and aviation, 3,780,168 colones.

The total outstanding debt on December 31, 1930, was 43,626,921 colones, of which 36,015,393 colones were external debt, and 7,611,528 colones internal debt. A loan of 2,000,000 colones from local banks was obtained in July, 1931. Debt service in 1932 required 11,206,136 colones or 53 per cent of total estimated revenues, on March 1, 1932, the Government temporarily suspended payments on the foreign debt.

Defence.—The army is organized in 3 divisions of 12 infantry, 1 cavalry and 3 artillery regiments. In case of war, military service is compulsory from 18 to 50 years of age. The permanent armed force for 1932 was 8,000 men.

Production.—Salvador is predominantly agricultural. Eighty per cent. of its total area is under cultivation, probably the highest percentage in the world. But it is a one crop country, coffee alone furnishing, in value, 88 per cent. of its exports in 1930. Total area devoted to coffee is about 208,600 acres, with some 118,800,000 trees, average output is 1,435,000 quintals, though the output varies considerably from year to year. Germany is the principal buyer. Exports in 1931, 75,000 metric tons. Other agricultural products are maize (averaging about 4,400,000 quintals), cacao, balsam (89,840 kilos exported in 1930), tobacco, indigo, henequén (913 metric tons exported in 1930), and sugar (exports, 1930, 5,762 tons). Livestock census of May, 1930, showed 43,133 horses, 23,236 asses and mules, 328,052 cattle, and 355,157 pigs. A little rubber is exported. In the national forests are found dye woods and such hard woods as mahogany, cedar, and walnut. Balsam trees also abound. The mineral wealth of the Republic includes gold, silver, coal, copper, iron, lead, zinc, sulphur and mercury, but mining operations languish.

Commerce.—The imports (subject to duty) and the exports have been as follows in five years (2 colones = 1 dollar, U.S. , 9.72 colones = 1£) —

	1927	1928	1929	1930	1931 ¹
	Colones	Colones	Colones	Colones	Colones
Imports	29,570,090	37,804,000	34,681,600	28,905,803	16,535,272
Exports	28,804,837	44,927,719	36,881,000	27,314,591	24,121,488

¹ Fiscal year ending June 30

The trade is chiefly with the United States, the United Kingdom, and France. Import figures include usually about 2,000,000 colones in coined

gold from the United States. The chief imports are cottons, hardware, flour, drugs and chemical products. The chief exports are coffee, henequén, and balsam.

Total trade between Salvador and the U K (Board of Trade Returns) for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Salvador to U K.	28,166	31,802	12,231	14,784	9,347
Exports to Salvador from U K.	502,332	480,294	840,578	226,857	154,051
Re-exports to Salvador from U K.	4,129	8,409	3,044	1,428	918

Shipping and Communications.—Cutuco is the principal port, handling 57 per cent of imports and 31 per cent of the exports.

A British-owned railway connects the port of Acajutla with Santa Ana and La Ceiba, with this system San Salvador, the capital, is connected—a distance of 65 miles. Another line (the American-owned International Railways of Central America) runs from the eastern to the western boundary of Salvador, and extends into Guatemala to Guatemala City and Puerto Barrios on the north coast. The line from Mega to the capital with its extension has a total length of 156 miles. Another short railway connects the capital with Santa Tecla. Total length of railway open, about 330 miles, all of narrow gauge. There are 1,476 miles of national road in the Republic, including a fine highway completed in 1926 between San Salvador and La Libertad and one from Santa Ana to the Guatemalan frontier. Of these, 353 miles are suitable for motors. In 1923 an airplane service was established between San Salvador, Guatemala City and other Central American points.

In 1929, there were 202 post offices, which handled 1,525,593 letters and 148,372 post cards in the internal service, and received from abroad 1,700,029 letters and 255,530 post cards, and 256 telegraph offices, 275 telephone exchanges and 3,701 instruments. A radio transmitting and receiving station at San Salvador maintains communications with Latin America. The All America Cables maintain a station at San Salvador.

Money, Weights and Measures.

MONEY

There are 3 banks of issue, the Banco Salvadoreño (paid-up capital, 4,000 000 colones), Banco Occidental (paid up capital, 6,000,000 colones), and Banco Agricola Commercial (paid-up capital, 1,560,000 colones), making a total of 11,560,000 colones. On March 31, 1931, they had notes in circulation to the value of 11,633,694 colones, with a gold cover amounting to 3,573,563 colones. Under the law of July 30, 1928, their note circulation may be increased up to 25,631,000 colones, providing it is backed by 40 per cent. in gold and 60 per cent. in commercial paper approved by the Government.

According to the law of July 16, 1920, the monetary unit of Salvador is the *colon*, a coin containing 886 milligrams of gold 900 fine, and equal in value to 50 cents (United States currency). The colon, which represents 100 centavos, is issued in denominations of 5, 10, 20, and 40 colones. Auxiliary silver coins are minted in small denominations up to 12½, 30, 50, and 100 centavos each; the popular 12½ centavo piece is known as the 'real', nickel coins in denominations of 1, 3, 5, and 10 centavos each.

are also issued The coinage of silver is limited to 10 per cent of the total fiduciary circulation, and that of nickel to 5 per cent.

National gold coins and gold coins of the United States of all denominations are unlimited legal tender, the United States coins having a fixed value of 2 colones to the dollar Other foreign money is not legal tender National and United States silver coins are legal tender up to 10 per cent of each payment, and national nickel coins in amounts up to 2 per cent. of each payment

WEIGHTS AND MEASURES

On January 1, 1886, the metric system of weights and measures was made obligatory But other units are still commonly in use, of which the principal are as follows:—

<i>Libra</i>	= 1 043 lbs av	<i>Arroba</i>	= 25 35 lbs av
<i>Quintal</i>	= 104 3 lbs av	<i>Fanega</i>	= 1 5745 bushels

Diplomatic Representatives

1. OF SALVADOR IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary—Vacant (March, 1933)

Consul General in London—Samuel G Dawson

There are consular agents at London, Liverpool, Glasgow, Southampton, Newport, Brighton, Birmingham, and Aberdeen

2 OF GREAT BRITAIN IN SALVADOR

Minister Plenipotentiary—John Henry Stopford Birch (appointed March 13, 1933) *Resident in Guatemala*

Consul—R G Goldie

SAN MARINO.

THE independent Republic of San Marino, which claims to be the oldest State in Europe, is embraced in the area of Italy. A new treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1908 and in 1914 The Republic has extradition treaties with England, Belgium, Holland, and United States. The legislative power of the Republic is vested in the Grand Council of 60 members elected by popular vote, a third

of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (Capitani reggenti). The regents exercise executive power, assisted by various nominated congresses, viz., *Congresso Economico di Stato*, *Congresso dei Legali*, *Congresso degli Studi*, *Congresso militare*. The administration of justice is under magistrates, who are Italian citizens. There are several elementary schools and one high school, the diplomas of which are recognized by Italian universities.

The frontier line is 24 miles in length, area is 38 square miles, and population (September 1932) 13,948.

The revenue and expenditure for 1931-32 balanced at 3,888,714 lire, and the Financial Estimates for 1932-33 at 5,134,880 lire. There is no public debt. The militia consists of all able bodied citizens between the ages of 16 and 55, with the exception of teachers and students. The chief exports are wine, cattle, and the building stone quarried on Mount Titano. Italian and Vatican City currency is in general use, but the Republic issues silver coinage, values 5, 10 and 20 lire, and separate postage stamps. An electric railway from Rimini to the city of San Marino was completed in June, 1932. Length, 20 miles.

Consul-General of San Marino in London — Commendatore Melvill Allan Jamieson, F.R.G.S., 42 Pall Mall, S.W. 1.

Consul General of Great Britain in San Marino — D. F. S. Filiter (Resides at Leghorn).

SIAM.

(SAYAM, OR MUANG-THAI.)

SIAM is called by its inhabitants Thai, which means 'free,' or Muang-Thai, 'the land of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

Reigning King.

Frajadhipok, born November 8, 1898, succeeded to the throne on the death of his brother, Rama VI., on November 26, 1925, being the seventh monarch of the present reigning dynasty.

Government.

Until June 24, 1932, the Constitution of Siam was an absolute monarchy. On the date mentioned a *coup d'état* was effected and, the King accepting an invitation to rule as a constitutional monarch, a Siam Temporary Constitution Act was promulgated on June 27. Under the temporary constitution supreme power belongs to the nation, the King is the Head of the State, and the executive power is in the hands of a Committee of the 'People's Party,' consisting of fifteen members. The members of this Committee are chosen from a deliberative and legislative body known as the 'People's Senate.' A new and permanent Constitution is being drafted. Under this new Constitution one half of the members of the Assembly (total 70) will be nominated and the other half elected by popular vote. This system of election will last for ten years, after which all the members will be elected by the people.

The Supreme Council of State and the Privy Council were abolished in July, 1932, and there have been no meetings of the Cabinet since the *coup d'état*. There are, however, Ministers in charge of the various Ministries, their names being as follows —

Minister of the Interior —Phya Chasaenyapati

Minister of Agriculture and Commerce —Chao Phya Wongsa Nuprabad

Minister of Defence.—Vice Admiral Phya Rajawangsan

Minister of Foreign Affairs —Phya Srivisar Vacha

Minister of Justice —Phya Deb Vidura

Minister of Finance —Phya Manopakarana.

Minister of Public Instruction —Chao Phya Dharmasakdi Montri

The Kingdom of Siam is divided (April, 1932) into 10 circles (Monthon), of which 9 have each a Lord-Lieutenant, who has under him subordinate governors in charge of the various provinces (Changwats) of his circle. The Circle of Krungdeb (Bangkok) is under the control of a Lord Prefect. The 10 circles are subdivided into 69 provinces (Changwats), 406 districts (Ampurs), 57 subdistricts (King Ampurs), and 4,978 communes (Tambons).

A treaty for a modification of British extra territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Kedah to Great Britain was signed at Bangkok on March 10, 1909. All the old commercial treaties which granted extra-territorial rights and imposed limitations upon customs tariffs have been revised. Siam now possesses full jurisdictional and fiscal autonomy, subject to certain temporary limitations. The list of these new treaties and the date of the ratifications are as follows: United States of America, September 1, 1921; Japan, December 29, 1924; France, January 12, 1926; Denmark, March 28, 1926; Great Britain, March 30, 1926; Spain, July 28, 1926; The Netherlands, August 24, 1926; Portugal, August 30, 1926; Sweden, October 25, 1926; Norway, February 9, 1927; Italy, March 18, 1927; Belgium-Luxemburg, March 25, 1927; Switzerland, December 16, 1931. A treaty of friendship and commerce between Germany and Siam was ratified on October 24, 1928.

Area and Population.

The area of Siam is 200,234 square miles, about 45,000 being in the Malay Peninsula. The first detailed census in Siam was taken in 1905, but included only 12 of the circles or Monthon. The first census of the whole country was taken in 1909.

The census taken on July 15, 1929, gave a population of 11,506,207 (as compared with 9,207,355 at the census taken on April 1, 1919), of whom 5,795,065 were males, and 5,711,142 females. Of the former, 2,909,750 were under 21 years of age. The estimated population on March 31, 1930, was 11,684,000 (5,888,000 males and 5,796,000 females). The following table gives the details of the last census for each circle —

Circle	Area of Circle in Sq. miles	Population Census July 15, 1929	Population per Sq. mile
Krung Deb	1,194	921,617	772
Avudhya	5,971	889,775	141
Chandaburi	4,866	169,626	35
Nagor Chaisri	3,157	474,542	150
Nagor Rajasima	36,366	2,322,710	78
Nagor Svarga	16,660	512,971	31
Nagor Sridharmaraj	16,841	909,175	54
Patani	5,500	335,148	61
Prachinburi	9,277	508,339	55
Bianulok	15,918	576,951	36
Bayab	36,263	1,549,890	43
Bhuket	6,482	242,041	37
Rajaburi	14,568	579,357	40
Udon	27,181	1,064,565	55
Total	200,234	11,506,207	57

The population of Siam, according to the census for 1929, was made up as follows: Siamese, 10,493,304; Chinese, 445,274; Indians and Malays, 379,618; Cambodians, 60,668; Annamites, 5,321; Shans, 27,505; Burmese, 4,880; Europeans and Americans, 1,920; Japanese, 295; others, 87,422.

Religion and Education.

The prevailing religion is Buddhism. In 1929-30 there were 10,958,426 Buddhists, 498,311 Mohammedans, and 49,462 Christians. On March 31, 1930, there were 16,571 Buddhist temples, and 127,057 priests.

The Minister of Public Instruction is responsible for education throughout the country, with the exception of certain Departmental Schools, such as the Military, Naval, Law Colleges, and the Police School.

Elementary education is compulsory, except in the capital, and in the majority of schools, free.

On March 31, 1930, Government schools numbered 267, with 39,401 pupils and 1,862 teachers. There were also 31 Government Provincial Teachers' Training Schools, with 1,354 pupils and 91 teachers. Local elementary schools numbered in 1930, 5,201, with 571,304 pupils (of whom over 39 per cent. were girls), and 11,683 teachers. Private schools numbered 969 with 43,541 pupils, and 1,956 teachers, including schools connected with American, French, and English Missions. Over 86 per cent. of local schools and 50 per cent. of the Government Schools are situated in the monasteries.

The Chulalankarans University, founded at Bangkok in 1917, is composed of three Faculties (Medicine, Arts and Science, and Engineering), and of the Civil Service School.

In 1929-30 the Education Department spent 157,9777. on education.

Finance.

Revenue and Expenditure for four years (£1 = 11 ticals).—

Year ¹	Revenue	Expenditure.	Year ¹	Revenue	Expenditure
	£	£		£	£
1929-30 ²	9,511,000 ⁴	9,787,000	1931-32 ³	8,618,974	8,576,998 ⁷
1930-31 ²	8,095,000 ⁴	8,470,000 ⁴	1932-33 ³	6,805,818	6,768,651 ⁸

¹ Years end on March 31st ² Actual figures ³ Budget estimates ⁴ In the year 1929-30 227 278/ were deducted from the savings of the Ministry of War and Ministry of Marine and added to the revenue in order to balance the budget ⁵ Excluding extra ordinary receipt (861 880/ , unspent money and savings of Ministry of War) ⁶ Includes a provision of 90,909/ for redemption of debt ⁷ Includes provision of 375,962/ for redemption and avoidance of debt ⁸ Includes provision of 563,636/ for redemption and avoidance of debt.

The principal sources of revenue were as follows —

—	1931-32 ¹	1932-33 ¹	—	1931-32 ¹	1932-33 ¹
	£	£		£	£
Land Revenue .	1,057,109	845,336	Mines and Forests	529,591	446,558
Capitation Tax	837,818	754,545	Telegraphs and		
Opium	1 0-2,698	772,727	Telephones	243,182	227,273
Customs .	1,891,891	1,551,864	Miscellaneous Fees		
Excise	890,708	609,778	Fines and		
Railways	658 181	272 727	Licences	999 523	—

¹ Estimates

On March 31, 1932, the National Debt amounted to 10,785,345/ (11,091,733/ on March 31, 1931), made up as follows —

£554,580 of the £1,000,000	stg	4½% loan 1905
£1,845,180 „	£2,000,000	stg 4½% loan 1907
£1,524,235 „	£4,630,000	'F M S.' 4½% loan 1909
£1,916 800 „	£2,000,000	stg 7% loan 1922
£2 944,550 „	£3,000,000	stg 6% loan 1924

Up to March 31, 1931, the capital expenditure on works of development was construction of railways, 14,718,780/ , irrigation, 2,931,560/ ; Bangkok waterworks, 540,782/

For the last five years, i.e. from 1927-28 to 1931-32, capital expenditure on the above objects has been financed from ordinary revenue by means of a lump provision for the 'Avoidance of Debt'

Defence.

Under the Military Service Act of 1917 every able-bodied man is liable to serve two years with the colours; seven years in the first reserve, with a maximum service of two months per annum; ten years in the second reserve, with a maximum service of 30 days per annum, six years in the third reserve

The army is organized in 18 battalions of infantry, 12 squadrons of cavalry, 8 groups of artillery, 2 battalions of engineers, and 2 battalions of signallers.

Aviation schools were started in 1914, and a Flying Corps has been formed. Ten military tanks have recently been added to the military forces

There are 16,000 officers and men on the active list, besides a reserve of 71,000

Siam maintains a small naval force, which consists of five gunboats, three destroyers, four torpedo-boats, the Royal yacht *Maha Chakri*, and various small craft, including 5 modern coastal motor-boats, the ex British sloop *Havant*, renamed *Chow Phryya*, serves as a sea going training ship. There are 4,800 officers and men on the active list, besides a reserve of 20,000

At the mouth of the Menam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

Expenditure on Defence for 1932-33 is estimated at 8,400,000 ticals for the army, 2,700,000 ticals for the navy, 1,800,000 ticals for the air services, total, 12,900,000 ticals.

Production and Industry.

According to the 1929 census 83.05 per cent of the occupied persons (7,519,757) were engaged in agriculture, 1.10 per cent in fishery, 2.19 per cent in industrial pursuits.

In the year 1916, the Government started work on that portion of the comprehensive scheme for the irrigation of the Central Plain, known as the South Prasak Canal Project. The works were completed in 1922. A conservation and drainage scheme which is complementary to the Prasak South Canal Project, known as the Jengrak and Bang Hia Drainage Project, was completed in 1931. Work on the scheme which lies to the west of the Menam Chao Phya, the Suphan River Inundation Scheme has also been started. The scheme is being completed by sections, and in the year 1927 irrigation was commenced from the 3rd or lowest regulator.

The chief produce of the country is rice, which forms the national food and the staple article of export. The figures of the rice crop for the past three years are as follows: 1929-30, area, 6,112,084 acres, yield, 3,844,082 tons; 1930-31, area, 7,273,796 acres, yield, 4,787,997 tons; 1931-32, area, 6,453,040 acres, yield, 4,036,238 tons. In Bangkok and district there are some 75 rice mills, and about 700 in the Provinces.

The harvested area and yield of certain other crops in 1931-32 was as follows: — para-rubber, 104,680 acres, 132,798 piculs; coconuts, 91,379 acres, 152,837,870 nuts, tobacco, 22,653 acres, 118,937 piculs; pepper, 4,848 acres, 52,827 piculs.

The live stock on March 31, 1932, consisted of 9,820 elephants, 313,994 horses and ponies, 4,972,178 bullocks, and 4,895,177 buffaloes.

Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. Siam teak wood is mainly produced in the north of Siam, the dry logs being floated by river to Bangkok during the rainy months of the year. In 1930-31 the exports of teak amounted to 66,087 tons, valued at 885,347. Planting of rubber trees is proceeding in the Malay Peninsula, exports of rubber and rubber waste for the year 1930-31 being 4,410,674 kilogrammes valued at 118,899.

The mineral resources of Siam are extensive and varied, including tin, tungsten, coal and iron, zinc, manganese, antimony, lead, copper, molybdenum, rubies, sapphires and silver. Tin mining is carried on in all the Southern or Peninsula circles of the Siamese portion of the Malay Peninsula and in the Rajaburi circle. The total output of metallic tin in 1926-27 was 123,275 piculs; in 1927-28, 181,823 piculs; in 1928-29, 143,165 piculs; in 1929-30, 184,948 piculs; in 1930-31, 262,583 piculs.

Commerce.

The foreign trade of the Kingdom for the past four years is as follows —

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1923-29	17,255,682	22,952,258	1930-31	14,091,717	14,688,586
1929-30	18,792,098	19,979,854	1931-32	9,082,622	12,200,672

The distribution of trade by principal countries was as follows —

Countries	Imports		Exports	
	1930-31	1931-32	1930-31	1931-32
	£	£	£	£
Belgium	135,940	139,076	14,437	8,609
China	939,598	581,009	180,175	182,482
France	838,175	135,286	15,478	6,959
Germany	691,250	362,979	246,777	814,718
Hong Kong	2,783,675	1,642,634	2,782,143	3,241,438
India, British	706,457	566,982	104,942	100,576
India, Netherlands	1,385,440	1,150,550	574,994	579,992
Italy	115,354	64,336	59,987	14,783
Japan	1,040,682	530,158	744,304	728,152
Netherlands	235,424	142,856	78,540	63,065
Singapore, Penang, British } Malay States }	2,329,262	1,607,857	7,936,524	4,907,135
United Kingdom	2,129,282	1,160,357	268,224	1,038,271
United States of America	505,650	288,672	67,437	38,501
West Indies (other than British)	72	49	889,918	470,508
Burma	137,098	64,406	2,925	1,007
Australia	98,019	58,947	3,561	1,339

The principal imports in 1931-32 were cotton goods, 1,053,809*l*, gunny bags, 327,748*l*, food stuffs, 1,620,055*l*, metal manufactures, 646,322*l*; tobacco, cigars and cigarettes, 416,375*l*, kerosene oil, 445,814*l*, machinery, 223,183*l*, treasure, 248,200*l*. The principal exports were rice, 7,045,487*l*, tin and tin ore, 1,221,206*l*, and teak, 450,016*l*.

There is a considerable trade on the northern frontiers with the British Shan States and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years (Board of Trade Returns) —

	1923	1929	1930	1931	1932
	£	£	£	£	£
Imports from Siam into U Kingdom	304,727	260,915	244,980	151,202	48,550
Exports to Siam from U Kingdom	2,033,908	2,365,340	2,000,314	1,004,591	1,140,706
Re-exports to Siam from U Kingdom	24,286	23,355	18,981	18,282	7,963

Shipping and Communications.

In 1931-32, 897 vessels of 1,055,526 tons entered, and 899 of 1,055,581 tons cleared the port of Bangkok. Of those entering 223 of 287,794 tons and of those clearing 223 of 287,021 tons were British.

On March 31, 1932, there were 2,967 kilometres (1,842 miles) of State Railways open to traffic and 167 kilometres (104 miles) were under con-

struction The Northern Line runs from Ban Paj to Chiangmai (410 miles), the extreme northern terminus The Southern Line (748 miles) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Federated Malay States Railway from Penang, and to Singapore Another line branching off from Haad Yai runs along the East Coast of the Peninsula to Sungai Golok, where it connects with the Federated Malay States Line There are branches to Singora, Nakorn, Sritamaraj and Kantang The North Eastern Line (164 miles) is being extended from Korat to Khonkaen, the first section, from Korat to Bua-Vai (51 km), being already open to traffic The Korat-Ubol Line has now been completed and opened to traffic to Warindra, the station for Ubol The line to Khon Kaen is expected to be ready in 1933 The extension from Krabinburi, the present terminus of the Eastern Line, to Aranya Pradesa on the Cambodian frontier was completed in 1927 Since January 1922, a through express service (using Diesel electric locomotives) between Bangkok and Penang has been introduced, the distance being traversed in 27 hours A similar service between Bangkok and Chiangmai on the Northern Line was inaugurated in November, 1922, the journey being accomplished in 26 hours The Northern and Southern Railway systems are linked together by means of a railway bridge over the Menam Chao Phya (opened January 1, 1927), and both systems terminate in the central railway station of Hua Lampong All State Railways are under one management Gross earnings of the State Railways in 1930-31 were 16,182,726 ticals, working expenses, 8,731,004 ticals, and net receipts, 7,451,722 ticals. The number of passengers carried was 5,284,637, and total goods carried 1,185,291 tons

Private lines of an aggregate length of 66 miles include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, also from Thonburi to Bang Bua Thong, together with a tramway connecting the Northern Line (Northern branch) with Phrabat

According to the report of Department of Ways for the year 1930-31, the length of state highways on March 31, 1929, was 1,423 miles, of which 871 miles were under maintenance, 54 miles under improvement, and 498 miles under construction In addition there were 731 miles of provincial highways, particularly in the North Eastern provinces Of the above state highways, only 66 miles were classified as first class road, the bulk being third class road

The following figures relate to civil aviation in 1931-32 length of routes opened, 384 miles, miles flown, 44,415; passengers transported, 26, merchandise transported, 16,802 metric tons Carrying of mails by military planes was superseded on August 24, 1931, by a civil air transport company with a route 384 miles long

In 1931-32 there were 766 post offices of which 314 were licensed or contract post offices, and 332 railway station offices The volume of mail matter dealt with during the year aggregated 12,634,201 pieces The value of Inland Money Orders issued was 8,090,216 baht, foreign money orders issued, 96,584 baht, foreign money orders paid, 40,752 baht; postal savings bank deposits, 3,884,559 baht.

There were (1931-32) 688 telegraph offices Number of inland telegrams was 225,694, foreign messages sent, 50,980, foreign messages received, 120,935, length of line, 5,858 miles

In 1931-32 there were 21 telephone exchanges, 17 of which were in the provinces. Subscribers numbered 3,145 Number of calls was 10,009,635 (1930-31)

Three wireless stations on the Telefunken system have been erected, one at Bangkok, one at Singora, and one at Koh-Khan. The two former are under the control of the Siamese naval authorities, the third under that of the Post and Telegraph Department.

A new high powered station, also on the Telefunken system, has been erected at Bangkok, and was opened on Jan 15, 1929.

Direct wireless communication on a commercial basis was established with Germany, England, France, Java, Philippine Islands, Hong Kong, Japan and India. The growth of the radio traffic since its transfer to the Ministry of Commerce and Communications was as follows: 798,465 words handled in 1929-30; 799,853 in 1930-31; 879,209 in 1931-32.

Additional radio facilities for direct traffic with Europe consist of a beam transmitting station in Bangkok with a receiving station in Lake.

Money, Weights and Measures

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, Australia and China, the Banque de l'Indo Chine, the Mercantile Bank of India, and the Bank of Canton. A number of Chinese Banks have established branches here during recent years. There is also a branch of the Chartered Bank of India, Australia and China at Bhuket. A Siamese bank, with a British manager, was established under Royal Charter in 1906, with the name of the Siam Commercial Bank, Limited. It now has branches at Tungson in the south of Siam.

On April 1, 1913, the Siamese Treasury Savings Bank was opened with 529 depositors. By March 31, 1930, the number was 18,652, with a total deposit of 245,787.

Under the Currency Act of May, 1928, the unit of currency is the *baht*, divided into one hundred *satang*. The *baht* is a silver coin like the *tical* (a word of foreign origin) which it replaces. It weighs 15 grammes 900 fine, and is equivalent to 0.66567 grammes of fine gold, corresponding to a rate of 11 *bahts* for 11 sterling. Siam departed from the gold standard on May 11, 1932, and the circulation medium is almost entirely paper. Other silver coins are 50 *satang* and 25 *satang* pieces. The 10 and 5 *satang* pieces are nickel, and the 1 *satang* piece, bronze. Notes and *baht* coins are legal tender without limit as to amount; 5 and 25 *satang* pieces legal tender up to 5 *baht*, and nickel and bronze coins legal tender up to 1 *baht*.

The Government in 1902 began to issue currency notes (5, 10, 20, 100 and 1,000 *bahts*, and since October, 1918, 1 *baht* notes). On March 31, 1932, there were 10,306,517.1 worth of currency notes in circulation, against these there was a reserve of 9,602,657.1, two fifths in *baht* coins, and the remainder in short term securities or cash, in London, New York, and Paris.

On December 17, 1923, a law was passed for the introduction of the metric system as optional in 1925. The metric system has already been adopted in many of the Government departments and on State Railways. The actual weights and measures prescribed by law are: units of weight:—1 *Standard Picul* = 60 kilograms, 1 *Standard Catty* (1/100 *Picul*) = 600 grammes, 1 *Standard Carat* = 20 centigrammes. Units of length:—1 *Sen* = 40 metres, 1 *Wah* (1/20 *Sen*) = 2 metres, 1 *Sauk* (1/4 *Wah*) = 0.50 metre, 1 *Keup* (1/2 *Sauk*) = 0.25 metre. Units of square measure:—1 *Rai* (1 square *Sen*) = 1,600 sq metres, 1 *Ngan* (1/4 *Rai*) = 400 sq metres, 1 *Sq. Wah* (1/100 *Ngan*) = 4 sq metres. Units of capacity:—1 *Standard Kwien* = 2,000 litres; 1 *Standard Ban* (1/2 *Kwien*) = 1,000 litres, 1 *Standard Sat* (1/50 *Ban*) = 20 litres, 1 *Standard Tanan* (1/20 *Sat*) = 1 litre.

Diplomatic and Consular Representatives.

1. OF SIAM IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary —H S H. Prince Damras Damrong Devakula (appointed 1930)

First Secretaries —Phra Sundara Vachana, Phra Bahidda Nukara

Third Secretaries —Luang Sundra Nuiaksh, Luang Chamnong Dithakar, and Luang Bhadravadi

Attachés —Luang Bairaj Bagayabhakdi and Luang Dithakar Bhakdi

Consul General. —R D Craig

2 OF GREAT BRITAIN IN SIAM.

Envoy Extraordinary and Minister Plenipotentiary —Cecil Francis Joseph Dormer, M.V O. (appointed December 23, 1929)

Consul-General at Bangkok —J F Johns, O M G

There are consular representatives at Chiangmai, Singora, and Nakawn-Lampang

SPAIN.

(ESPAÑA.)

A REPUBLIC was proclaimed in Spain on April 14, 1931 (The first Republic continued from 1873 to 1875)

General elections took place on June 28, 1931, to summon 'a Consti-

tuent Cortes' for the drafting of a Constitution and electing a President. The one Chamber Parliament (Congress) sat for the first time on July 14, 1931. It is composed of 470 members, including three women, divided among the following parties—Socialists, 117, Radical-Socialists, 59, Republicans of different branches, 184, Catalonians under Maciá, 32, Agrarians and Basques (Catholics), 40, Independents, 16, Unclassified, 22.

The Constitution of the Republic was voted on December 9, 1931

President of the Republic—Niceto Alcalá Zamora y Torres, born July 6, 1877, elected December 10, 1931. Salary and allowance, 2,250,000 pesetas per annum

For a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile, see the STATESMAN'S YEAR BOOK, 1932, p. 1286

Government and Constitution.

I CENTRAL GOVERNMENT

The Constitution of the second Spanish Republic contains the following fundamental principles—That Spain is a democratic Republic of workers of all classes, organized in a régime of Liberty and Justice, that the Republic constitutes an integral State consistent with the autonomy of the Municipalities and Regions, that it has no official religion, and that freedom of conscience is granted to all citizens, that all citizens are equal before the law, that Castilian (Spanish) is the official language, and that no citizen can be compelled to know or make use of a provincial language, except with the limitations set forth on the Statutes of the Regions. Spain renounces warfare as an instrument of national politics. The colours of the Republic are red, yellow and purple. The capital of the Republic is Madrid.

The legislative power rests with the people who exercise it by means of the Cortes (single chamber) or Congress of Deputies, who are elected for 4 years by universal suffrage, equal, direct and secret, on the system of proportional representation. All citizens over 23, without distinction of sex or civil status are eligible. Deputies, who are re-eligible indefinitely, are paid a salary of 1,000 pesetas per month besides travelling expenses. Electors, male or female, must be over 23.

Sixty days after the expiration of the mandate of the Cortes, or of its dissolution, new elections must take place, and the new Cortes shall sit thirty days as a maximum after the general elections are held. The Cortes will assemble without previous notification on the first law day of February and October each year, and will sit at least during three months in the first period and two months in the latter. The Government and the Cortes have the initiative to make laws. The Cortes may authorize the Government to enact laws by decrees, on the recommendation of the Council of Ministers, on matters pertaining to the legislative power, with the limitation that such decrees can in no way refer to an increase of expenditures. The Cortes appoints from its own body a Permanent Committee, composed of 21 representatives elected proportionately from the different parties and presided over by the Speaker, which is entrusted with the suspension of public guarantees, the enacting of laws by decrees and the prosecution of members. The Cortes may propose a vote of censure on the Government or any of its Ministers, on the request of fifty of its members, but the Cabinet or the Minister in question is not obliged to resign in consequence unless the vote of censure is passed by an absolute majority of the Chamber. International agreements sanctioned by Spain and filed in the League of Nations, bearing

on international law, are to be considered as constituting part of Spanish legislation, the government to produce before the Cortes in such cases the proper law for its adoption. The sanctioning of the laws voted by the Cortes can be submitted to a referendum, constituted by not less than 15 per cent of the electors, but a referendum cannot affect the Constitution, the complementary laws, the ratification of International Agreements filed in the League of Nations, the Statutes of the Regions and the taxation laws. The people may also exercise their right of initiative in proposing laws to the Cortes, provided that the petition is made by 15 per cent. of the electors.

The President of the Republic is the Head of the State and personifies the Nation. He is elected conjointly by the Cortes and a number of 'compromisers' equal to that of Deputies. The 'compromisers' are elected by universal suffrage, equal, direct and secret. An additional clause in the Constitution prescribes that the Constituent Cortes shall elect the first President of the Republic by secret voting, an absolute majority of votes of all the Deputies in office being required for the proclamation.

The President of the Republic must be a Spanish citizen, over forty years, in full possession of his civil and political rights, the exceptions being military men in active service or on the retired list for not less than ten years, clergymen and ministers of the various churches and religions, members of reigning or ex-reigning families of any country whatsoever no matter how related to the head of such family. The President holds office for six years, and he cannot be re-elected until six years after the termination of his last mandate. The elections take place thirty days previous to the expiration of the presidential mandate. In case of absence or other causes his duties are to be assumed by the Speaker of the House, who in turn will be substituted in his duties by the Deputy-Speaker. Likewise, the Speaker of the House assumes office as President of the Republic in case of vacancy, and the election of the new President is to be convoked not beyond eight days, the elections to take place within the thirty succeeding days. The Cortes will maintain its powers, even if dissolved, for the exclusive purpose of the election of President.

The President appoints and dismisses the Premier and, upon the latter's recommendation, his Ministers. The President is empowered to declare War, but he can only sign the declaration under the conditions prescribed in the Covenant of the League of Nations, and after being authorised by a special law. He also issues decrees countersigned by his Ministers, ordains measures of urgency to safeguard the integrity of the Nation, upon immediate notification of his action to the Cortes, negotiates, signs and ratifies International Agreements, political and commercial treaties, as well as those bearing on the public treasury. In general, any Agreement calling for legislation unless sanctioned by the Cortes shall not bind the Nation in any way. The agreements entered with the International Labour Bureau are to be submitted to the Cortes within limited time, and after approval the President's ratification is to be communicated to the League of Nations for its proper filing. Other International Treaties and Covenants ratified by Spain shall also be filed in the League of Nations. Secret Treaties and clauses of a similar nature are not binding. In case of Spain's withdrawal from the League of Nations the President must be authorised by the Cortes before passing the notification of retirement. The President has the faculty of enacting laws by decree when the Cortes are not assembled, on the recommendation and by unanimous accord of the government and with the approval of two-thirds of the Permanent Committee, on momentous matters in defence of the Republic, such decrees to be only of a provisional character until such time as the Cortes have sanctioned them. The President may at

all times convoke extraordinary Cortes. He can suspend the ordinary sessions during one month in the first period (February) and fifteen days in the second period (October). He can dissolve the Cortes not more than twice during his tenure of office, either by a justified decree or by convoking new elections within sixty days; a second dissolution must be examined by the new Cortes in its first sitting and an adverse voting by an absolute majority implies dismissal of the President.

The President can be dismissed at any time, sixty per cent of the members constituting the Cortes are required for filing the demand, and from that moment the President ceases his functions until after the demand has been examined and voted upon.

The Constitution allows to all citizens freedom of opinions and ideas, but may hold these rights in suspense by a government decree in cases of impending danger to the Nation. If the Cortes are not assembled at the time, they are to be convoked within eight days. The suspension of constitutional rights cannot exceed thirty days, any extension of time must be previously authorized by the Cortes or the Permanent Committee.

A Tribunal of Constitutional Guaranty is created with jurisdiction over the entire Nation, whose duty it will be to decide on the unconstitutionality of the laws; the protection of individual rights, discrepancies arising in legislation between the State and the autonomous regions and among one another, the examination and approval of powers of the 'compromisers' chosen for the election of President; the responsibility incurred by the President of the Republic, the Premier and Ministers, the President and Magistrates of the Supreme Court and the Attorney General. The Cortes will appoint the President of the Guaranty Tribunal, whether a deputy or not, and among other members there will be a representative for each region.

The Constitution may be reformed either on the recommendation of the Government, or when proposed by a quarter of the members of the Chamber; in both cases the proposal must determine the changes at issue, and to take in consideration the reform requires the vote of two-thirds of the Deputies during the first four years of constitutional régime and an absolute majority hereafter; the Cortes then automatically become dissolved and new elections must be convoked within sixty days. The new Parliament thus elected will act as Constituent Cortes to decide on the reform, and thereafter as ordinary Cortes.

Other main points incorporated in the new Constitution is the establishment of divorce; the legitimacy of the off-spring of unmarried couples, and the rural problem affecting land and property.

The Government was constituted as follows on December 16, 1931:—

Prime Minister and Minister of War.—Don Manuel Azaña y Díaz.

Minister of Foreign Affairs—Don Luis Zulueta Escolano.

Minister of Justice—Don Alvaro de Albornoz y Limniana.

Minister of Marine.—Don José Giral Pereira.

Minister of Finance—Don Jaime Carner Remeu.

Minister of the Interior—Don Santiago Casares Quiroga.

Minister of Education—Don Fernando De Los Rios Urrutl.

Minister of Public Works.—Don Indalecio Prieto y Tuero.

Minister of Labour—Don Francisco Largo Caballero.

Minister of Agriculture—Don Marcelino Domingo Sanfuan.

Minister of Communications.—Don Santiago Casares Quiroga (pro tem.)

II. LOCAL GOVERNMENT

The provinces are constituted by the association of Municipalities; Spanish dominions in Northern Africa will be organized under the autono-

mous principle in direct relation with the central government. All Municipalities will be autonomous in their respective spheres, and they will elect their *Ayuntamientos*, by universal suffrage, equal, direct and secret, which will be presided over by the *Alcalde*, elected from its own body, at whose side stand, in the larger towns, several *Tenientes de Alcalde*. Each island of the Canaries will have a corporation known as *Cabildo Insular*, to rule their special interests, the Balearic Islands may adopt a similar régime. Each province of Spain has its own Assembly, the *Diputacion Provincial*, the members of which are elected by the constituencies, the administration of the *Diputaciones Provinciales* is being radically reformed with the Republic.

The different regions in Spain have submitted to the Republican Government the autonomous principle, which the Constitution has embodied as follows. If one or more neighbouring provinces possessing similar historical and economical characteristics decide to form an autonomous region, consistent with the Spanish Nation, they will file their petition to the central government by means of a Statute, which must be passed for its proposal by the majority of Municipalities in the area. The approval of a Regional Statute requires the votes of at least two thirds of the electors inscribed in the Census, in case of an adverse plebiscite five years must elapse before renewing the proposal of autonomy. The Statute can only come in force when approved by the Cortes. The federation of autonomous regions is in no way admitted. The Constitution excludes from the domain of the autonomous regions the following matters which the Central Government alone may deal with: the nationalisation of citizens and adherence to constitutional rights, Church legislation, diplomatic and consular representation; declaration of war, treaties of peace and in general international intercourse; defence of public surety, national debt, army, navy and national defence, tariff reform and commercial treaties, nationalisation of ships; extradition laws, jurisdiction of the Supreme Tribunal; finance laws regulated by the State; system of communications controlled by the State, post and telegraphs, airways, etc.

Any province forming part of an autonomous region may renounce its autonomous régime and return to the provincial regime by a similar plebiscite as that required when soliciting the autonomy.

CATALONIA

The Catalan Statute was approved by the Cortes on Sept. 15, 1932, thus granting the autonomy to the region of Catalonia, composed of the four provinces of Barcelona, Gerona, Lerida and Tarragona, with an area of 12,000 square miles and inhabited by a population of approximately 3,000,000. The representative organ is vested on the *Generalitat*, which will be integrated by a Parliament, a President and the Executive Council. The President of the *Generalitat* is elected by the Catalonian Parliament, which consists of 85 members.

The official language is both Castilian (Spanish) and Catalan, but for official intercourse of Catalonia with the rest of Spain, and communication between the State authorities and those of Catalonia, Spanish is to be the only official language. The first elections to Parliament were held on November 20, 1932, and Parliament was opened on December 6, 1932.

President of Catalonia — Colonel Francisco Macia. Elected December 14, 1932.

Two other regions—the Basques and Galicia—have announced their statutes to the Cortes.

Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands, the total area is 196,607 square miles. The growth of the population has been as follows —

Census year	Population	Increase	Rate of annual increase
1857	15,464,340	—	—
1860	15,673,481	209,141	0 44
1877	16,634,345	960,864	0 36
1887	17,565,632	931,287	0 56
1897	18,132,475	566,843	0 32
1900	18,618,086	485,611	0 89
1910	19,995,446	1,377,360	0 74
1920	21,338,381	1,342,935	0 67
1930	23,560,975	2,222,594	1 04

Area and population of the fifty provinces —

Province	Area in square miles	Estimated Population, Dec 31, 1931	Pop per sq mile	Province	Area in square miles	Estimated Population, Dec 31, 1931	Pop per sq mile

Lérida	4,690	314,350	67 0				
Logroño	1,946	204,873	105 2				

The population of Ceuta (37,728) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop 745), the Chafarinas (286), Melilla (61,096), Peñon de la Gomera (296), Rio de Oro (304), and Nador (2,130). The North African possessions are no longer used as convict stations.

By Decree of September 21, 1927, the islands which form the Canary Archipelago were divided into two provinces, under the name of

their respective capitals Santa Cruz de Tenerife and Las Palmas. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro, and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara y Lobos.

The following were the estimated populations of the principal towns on December 31, 1931, viz —

Town	Pop	Town	Pop	Town	Pop
Barcelona	991,262	San Sebastian	80,119	Huelva	45,915
Madrid	896,511	Las Palmas	79,444	Badajoz	44,301
Valencia	327,068	Oviedo	76,071	Pamplona	43,221
Sevilla	231,049	Cádiz	75,675	Albacete	42,877
Málaga	191,611	Coruña	75,508	Vitoria	40,942
Zaragoza	177,250	Lorca ¹	74,696	Mieres ¹	40,560
Bilbao	166,758	Alicante	73,987	Jaén	40,421
Murcia	160,476	Jerez ¹	67,076	Linares ¹	40,168
Granada	118,905	La Línea ¹	63,236	Burgos	40,161
Córdoba	106,045	S. Cruz (Canaries)	63,052	Lerida	38,005
Cartagena ¹	96,981	Gijón ¹	57,573	Sabadell ¹	37,629
Palma	89,946	Almeira	54,355	Castellón	37,013
Valladolid	89,342	Vigo ¹	53,091	Alcoy ¹	36,463
Santander	86,831	Salamanca	48,235	Logroño	35,081

¹ Population Census 1920

The movement of population for 3 years was as follows —

Years	Marriages	Births	Deaths	Surplus of births
1929	168,805	658,668	407,486	246,182
1930	173,908	660,735	394,355	266,380
1931	175,016	649,066	408,581	240,485

Emigration figures for 4 years as follows —

Year	Male	Female	Total	Year	Male	Female	Total
1928	54,016	32,998	87,014	1930	59,415	35,538	94,943
1929	64,709	38,279	100,988	1931	42,617	24,372	66,989

Emigration from Spain is chiefly to Argentina, Cuba, Brazil, Uruguay, and Mexico.

Religion.

The new Republican Constitution in force (Dec 9, 1931) declares that Spain has no official religion. The great majority of the population adhere to the Roman Catholic Faith. The Constitution guarantees liberty of worship and freedom of conscience. Religious bodies are now treated as Associations, to be governed by a special law. Cemeteries are placed under exclusive civil jurisdiction. The State will no longer support the clergy and the buildings, etc. of the Church. Religious orders who take the papal vote become dissolved and their properties and estates subject to nationalisation. The remaining orders are to be inscribed in a special register in charge of the Ministry of Justice, they are prohibited from buying property other than that intended for living and the practice of religion, prohibition of

exercising industry, commerce or education; submission to taxation, obligation to render an annual account of their investments

Within the Peninsula, apart from Portugal, there are 9 metropolitan sees, and 61 suffragan sees, the chief being Toledo, where the Primate resides. In 1930 there were in Spain 66 cathedrals, 22 collegiate churches, 20,612 parish churches, and 17,157 chapels and sanctuaries

Education

The latest census returns (1930) show that 47.22 per cent of the population could read and write, of which 0.94 could read only, and 45.46 per cent. could neither read nor write. The remaining 7.32 per cent corresponds to the infant population under 6 years.

The Constitution of the Republic ordains that primary education is to be compulsory and free. Education is to be lay, but the churches are authorized, under State inspection, to teach their respective doctrines in their own schools

The country is divided into eleven educational districts, with the universities as centres. The total sum spent in 1930 was 123,983,934 pesetas.

In 1930, there were 35,989 public schools, and about 5,600 private schools, the total number of pupils being about 3,600,000. Secondary education is conducted in 'institutions,' or middle-class schools, and there must be at least one of them in every province. There were in the year 1930, 69 institutions with 66,431 pupils (9,912 girls). These institutions prepare for the universities, of which there are eleven, attended by 47,108 students (6,210 women). The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. There are, besides, a medical and science faculty at Cadiz in connection with the University of Seville, and in the Canary Islands an educational establishment dependent on the University of Seville. In 1930 the total sum expended on education and the fine arts was 188,114,366 pesetas.

Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts), 50 *Audiencias Provinciales* (Provincial High Courts), 526 *Juzgados de Primera Instancia* (Courts of First Instance), and 9,267 *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (the new Constitution enacts that the appointment is to be made by the President of the Republic), three Courts of Justice, one for administrative purposes, and one for trying military cases (formerly under military jurisdiction), it is empowered with disciplinary faculties, is Court of Cassation in civil and criminal trials, decides in first and second instance disputes arising between private individuals and the State.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in first instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. The Republic has reinstated the jury system, which was suppressed during the Dictatorship.

OLD AGE PENSIONS AND SOCIAL INSURANCE—FINANCE 1295

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 20,000 pesetas (£800) in value, and petty offences.

On July 1, 1925, the 'Court of Minors' (*Tribunal de Niños*) was established for trying cases of delinquency of boys and girls from 9 to 18 years of age. There is also the '*Tribunal Industrial*,' for deciding labour disputes. The new penal code, approved by the Cortes on September 6, 1932, abolishes the death penalty and also imprisonment for life. The maximum penalty for any offence is 30 years' imprisonment.

Old Age Pensions and Social Insurance.

By a law dated February 27th, 1908, the 'Instituto Nacional de Prevision' was created for the purpose of granting Old Age Pensions, and administering a system of social insurance. The funds of the Institution are made up of an endowment, annual State subsidy, and private and public donations. The maximum annual pension obtainable is 1,500 pesetas (£60). The number of old age pensions available up to December 31, 1929, was 628,178.

Finance.

Revenue and expenditure for five years, in thousands of pesetas —

	1929	1930	1931	1932 ¹	1933 ¹
	1,000	1,000	1,000	1,000	1,000
	Pesetas	Pesetas	Pesetas	Pesetas	Pesetas
Revenue	8,724,366	8,735,484	8,696,094	4,550,248	4,722,157
Expenditure	8,546,848	8,681,919	8,856,069	4,461,067	4,727,283

¹ Estimates.

The budget for the fiscal year 1933 is made up as follows —

Revenue	Pesetas	Expenditure	Pesetas
Direct taxes	1,463,828,300	President of the Republic	2,250,000
Indirect Taxes	1,383,708,750	Legislature	10,000,000
Monopolies	1,062,875,000	Public Debt	973,013,935
State properties—		Pensions	264,320,671

Defence.

ARMY

Military service in Spain is compulsory. The total term of service is for 18 years. The law in force (Decree of February 20, 1925) provides for active service in the army to be normally for 2 years. At present the term of service with the Regular Army is 1 year, and 5 years in the First Reserve. Conscripts are called up in two contingents.

The army has undergone a radical change under the Republic. Thirty-seven infantry regiments have been suppressed, the rank of captain general has been abolished and all lieutenant-generals, with one or two exceptions, have been placed on the retired list.

The new organization consists of three High Inspections, under Major Generals, stationed at Madrid. The army in times of peace will comprise eight divisions distributed over the different provinces, a division of Cavalry in Madrid, and the forces in the Balearic and Canary Islands, besides the Military Command in Africa.

A division consists of two infantry brigades, each comprising two regiments of two battalions, a squadron of cavalry, a brigade of artillery, with two regiments, a battalion of engineers (sappers), with two technical sections, a squadron of aviation with an observation unit; artillery park, sanitary, veterinary and administrative groups.

A division of cavalry consists of three cavalry brigades, each of three regiments, a regiment of artillery, an aviation squadron for observation, cyclist and automobile groups, sanitary and veterinary sections.

The forces in Balears are composed of 2 infantry regiments, a regiment of coast artillery and a mixed group, two mixed groups of sappers and telegraphy, sanitary and administrative sections.

In the Canary Islands there are two regiments of infantry, two mixed groups of artillery; two mixed groups of sappers and telegraphy, sanitary and administrative sections.

Morocco is divided into two military districts, each formed of two infantry regiments, two sections of cyclists, the Foreign Legion; two sections of

cavalry, a battalion of engineers, with radiotelegraphy and automobile groups, two groups of aviation, two marine companies, three groups of native troops with three infantry 'tabors,' and one of cavalry

The total number of generals in active service is 84, chiefs and officers, 9,661, non-commissioned officers, 1,338, sergeants, 5,811; corporals, 12,262, musicians, 1,275, soldiers, 105,367. In Africa there are 3 generals; 2,125 chiefs and officers, and 45,186 of other ranks and soldiers, of which 9,080 are natives and 6,000 belong to the Foreign Legion

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on the frontier. Both are recruited from the army and under military discipline. The actual strength of the Guardia Civil is 21,466, cavalry, 5,198 Carabineros infantry, 14,526, cavalry, 350

In 1932-33, 151,000 recruits were called to the colours

Spain has several fortresses which guard the frontiers and the coast. On the Western Pyrenees, Oyarzun and Pamplona, on the central Pyrenees, Jaca, and on the eastern Pyrenees, Gerona, on the Portuguese side, Badajoz (an old fortification), and finally on the coast, Ferrol, Cádiz, Cartagena, Mahon (Balearic Islands) and Ceuta (Africa). The military estimates for 1933 amounted to 433,594,361 pesetas

NAVY

1925	Libertad	7,850	3	—	8 6 in 4 4 in	12	80,000	33
1926	Almirante Cer vera							
1928	Miguel de Cer- vantes							

There are 10 flotilla leaders, 4 destroyers, 12 modern torpedo boats, 4 gunboats, and 13 submarines

The dockyard at Ferrol is worked by a British syndicate, employing Spanish workmen. At this yard two 10,000 ton cruisers (*Baleares* and *Canarias*) are approaching completion. Each will be armed with eight 8-inch and six 4.7 inch guns. In addition, the construction of 12 more submarines and 4 more flotilla leaders has been authorized. Of these, 4 flotilla leaders and 2 submarines are in hand.

A naval wireless telegraphic station, Telefunken system, with a range of 800 miles, is situated at San Fernando (Cadiz). There are also wireless stations at Cartagena and Ferrol. A naval flying service is at work.

For 1933 the strength of the navy was fixed at 14,000 sailors. Total number of officers in active service in the navy, including all departmental corps: 1,720. Reserve 374

Production and Industry.

Spain is a preponderatingly agricultural country. The General Land Reform Bill, voted by the Republican Cortes on September 15, 1932, provides for expropriation of land on a large scale. Uncultivated land and other land capable of a better yield under proper cultivation are to be expropriated, likewise, estates belonging to the extinguished aristocracy not made productive for agriculture and only used for hunting and pleasure. Lands within 2 kilometres of villages having less than 25,000 inhabitants are also liable to expropriation if the proprietors own estates in the village producing an income over 1,000 pesetas and are not directly cultivating them. The indemnity agreed ranges from 5 per cent on lands producing a revenue of 15,000 pesetas to 20 per cent for revenues of 200,000 pesetas and over.

The productive area was calculated (1931) at 44,072,401 hectares (108,858,830 acres) or 87.3 per cent, and the remainder, 6,379,287 hectares (15,756,839 acres) or 12.7 per cent, as being unproductive. A large part of the productive area is not under direct cultivation, but modern methods and up to date machinery are now being employed.

Of the total area of Spain (50,451,688 hectares, or 124,615,669 acres), in 1931, 1,911,199 hectares (4,720,661 acres) were devoted to olive culture (3.7 per cent), 1,539,826 hectares (3,803,370 acres) to vineyards (3.05 per cent), 497,909 hectares (1,229,835 acres) to fruit (0.98 per cent), 16,147,435 hectares (39,884,164 acres) to agriculture and gardens (32.05 per cent), and 23,976,032 hectares (59,220,800 acres) to pasture and mountains (47.5 per cent). The value of the agricultural production in 1931 was estimated at 9,616,000,000 pesetas.

In 1921 Spain started the cultivation of tobacco, in 1931, 8,346 acres planted yielded 112,024 cwts., of a total value of 9,140,029 pesetas (Canary Islands not included).

The area under the principal crops and the yield (for 3 years) were as follows —

	Area			Yield		
	1929	1930	1931	1929	1930	1931
	Acres	Acres	Acres	Cwts	Cwts	Cwts
Wheat	10,617,725	11,128,980	11,240,113	88,958,144	70,851,150	73,170,660
Barley	4,486,555	4,540,991	4,641,450	42,884,630	45,253,836	59,505,966
Oats	1,888,780	1,989,612	1,984,781	18,299,810	14,518,594	12,096,904
Rye	1,518,830	1,550,108	1,515,296	11,661,698	10,944,534	10,720,566

In 1931, 3,524,443 acres were under vines (3,558,974 acres in 1930) and produced 6,331,249,205 pounds of grapes (6,188,442,492 pounds in 1930), yielding ordinary red and white wines to the extent of 508,555,580 gallons (481,219,992 gallons in 1931). In 1931 there were 25,777,884 orange trees planted and 820,557 lemon trees, yielding 24,084,728 cwts. of oranges and 1,060,862 cwts. of lemons, showing an aggregate value of 306,209,472 pesetas (oranges) and 18,854,145 pesetas (lemons). In 1931, 276,924 acres of beet root sugar planted yielded 57,124,168 cwts., and 9,492 acres of cane sugar planted yielded 5,178,752 cwts. In 1931, 1,023,763 acres of potatoes planted yielded 93,539,394 cwts., producing a value of 1,070,939,060 pesetas. In 1931, 62,135 acres of onions planted yielded 11,544,666 cwts., producing a value of 92,841,860 pesetas. In 1931-32, olive trees planted covered an area of 4,720,661 acres, yielding 35,680,298 cwts. of olives and 7,022,792 cwts. of oil. 29,584,247 almond trees planted

in 1931, covering an area of 348,265 acres, produced 2,046,786 cwts. of almonds of a total value of 100,852,572 pesetas. Hazel nut trees planted in 1931 amounted to 2,313,056 covering an area of 19,419 acres, and produced 226,914 cwts. of nuts of a total value of 15,072,326 pesetas. Other products are esparto, flax, hemp, pulse, and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Valencia, Murcia, and other provinces (512,621 kilos were produced in 1931). Spain produces yearly some 3,000 tons of honey and 750 tons of beeswax. The number of hives is approximately 619,000. There are 27 cane sugar factories and 49 beet-sugar factories in Spain, in 1930, 15,756,331 kilos were produced of the former and 223,555,934 kilos of the latter. In 1930, the total number of resinous pine trees amounted to 8,215,618. The total number of alcohol factories in 1930 was 3,379, producing brandy and spirituous liquors to the extent of 111,452,240 litres. Beer factories in operation amounted to 44, yielding 79,427,074 litres.

The number of farm animals in 1931 was estimated as follows —Horses, 562,877, mules, 1,174,508, asses, 1,002,578, cows, 3,653,667, sheep, 20,046,582; goats, 4,607,946; pigs, 5,102,165, camels (Canary Islands), 4,327.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Navarra, Huelva, and Seville, copper in the provinces of Seville, Córdoba, and Huelva, coal is found in Oviedo, Leon, Gerona, Valencia, and Córdoba, zinc in Santander, Murcia, Guipúzcoa, and Vizcaya, cobalt in Oviedo, lead in Murcia, Jaen, and Almería, manganese in Oviedo, Huelva, and Seville, quicksilver in Ciudad Real and Oviedo, silver in Guadalajara, sulphate of soda in Burgos, salt in Guadalajara, sulphur in Murcia and Almería, phosphates in Cáceres and Huelva. Vanadium was reported to have been discovered in Asturias in 1929.

In 1930 workers employed in connection with the mining industries were as follows: 152,459 men, 4,359 women, and 15,887 boys and girls under 18. The total value of the mineral output in 1930 was 477,741,262 pesetas at the pit mouth, there being 2,323 productive mining concessions covering an area of 297,473 hectares. Mining accidents caused 211 deaths. The number of factories engaged in the mining and metallurgical industries amounted to 1,124 in 1930 (1,067 in 1929), with a total output of 1,095,572,438 pesetas (1,176,783,738 in 1929). The quantities and values of the more important minerals in 1930 were as follows —

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite	523,575	18,795,889	Iron pyrites	19,710	850,450
Asphalt	9,480	203,780	Coal	6,590,332	204,249,169
Mercury	19,740	3,175,440	Lignite	888,032	10,435,868
Sulphur	100,888	1,518,094	Manganese	16,819	374,771
Zinc	160,895	17,828,021	Silver	—	—
Copper	3,903,578	80,115,324	Lead Ore	166,808	61,636,906
Tin	277	442,740	Salt	164,532	2,600,106
Phosphorite	5,400	161,200	Wolfram	235	377,920
Iron	5,624,775	67,451,745			

In 1932 the pig iron production was 288,000 metric tons, and steel 455,000 metric tons, compared with 475,000 metric tons and 603,750 metric tons in 1931 respectively.

The total production of cement in 1929 amounted to 1,513,967 metric tons. There are 25 important cement factories. The superphosphate output was 973,108 metric tons in 1929. Potash deposits are being developed.

Spain has considerable manufactures of cotton goods, principally in

Catalonia. In 1930 there were 60,083 looms, including 5,820 automatic, and 19,489 lace and knitting looms. In woollen manufactures there are 6,700 looms with 274,800 spindles. There are in Spain about 165 paper mills, making writing, printing, packing and cigarette paper. There are 29 glass-making factories.

In the Spanish fisheries the most important catches are those of sardines, tunny fish, and cod. The total production of the fishing industry amounted in 1930 to 285,949,589 kilos, representing a value of 296,405,994 pesetas.

Commerce.

Imports and exports (in thousands of pesetas, gold) —

Year	Imports	Exports	Year	Imports	Exports
1924	2,947,181	1,790,775	1928	8,004,991	2,183,478
1925	2,249,550	1,634,736	1929	2,737,048	2,112,949
1926	2,153,521	1,605,588	1930	2,447,533	2,456,754
1927	2,585,521	1,893,281	1931	1,175,899	990,809

The foreign trade was distributed as follows in regard to classes of commodities —

	Imports		Exports	
	1930	1931	1930	1931
	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)
Raw material	851,558,003	442,000,407	370,783,200	161,817,589
Manufactured goods	1,207,764,985	559,706,193	525,847,465	186,580,478
Foodstuffs	379,672,524	170,879,524	1,385,999,322	658,959,065
All other	8,537,186	3,222,794	168,124,125	32,952,056
Total	2,447,532,648	1,175,898,918	2,456,754,112	990,809,188

The following table shows the various classes of imports and exports for two years —

Description	Imports		Exports	
	1930	1931	1930	1931
	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)	Pesetas (gold)
Stone, minerals, glassware and pottery	359,443,270	158,480,691	151,092,183	69,699,579
Metals and their manufactures	155,086,657	70,528,667	189,046,529	54,252,741
Drugs and chemical products	293,422,897	164,150,902	97,955,195	41,014,323
Cotton and its manufactures	201,817,086	143,820,179	131,582,388	20,917,122
Other vegetable fibres and manufactures (including Packing)	58,623,180	26,941,936	18,474,806	4,383,968
Wool & hair & their manufactures	27,959,620	15,929,827	33,592,448	6,175,706
Silk and its manufactures	94,067,019	28,851,795	25,571,181	3,419,181
Paper and its applications	58,212,815	87,724,745	30,824,362	7,572,622
Timber and its manufactures	148,790,107	61,624,159	151,624,488	45,999,952
Animals and their products	78,809,928	3,840,096	105,143,093	81,444,596
Machinery, vehicles and vessels	425,481,415	188,960,934	17,480,480	4,079,168
Alimentary substances, including grain, sugar, wine, &c.	379,672,524	170,879,524	1,385,999,322	658,959,065
Various	98,067,030	33,388,596	10,662,341	3,523,142
Gold (bar and coin)	30,180	108,299	151,320,000	25,333,490
Silver	208,374	816,581	5,767,463	3,032,867
Tobacco (special)	62,543,146	87,800,187	1,483	1,591
Totals	2,447,532,648	1,175,898,918	2,456,754,112	990,809,188

In 1931 the total value of wine exported was Pts (gold) 94,385,000

The following table shows the distribution of the commerce of Spain (general and special imports, and general exports) in 1930 and 1931, in thousands of pesetas —

Country	Imports from		Exports to	
	1930	1931	1930	1931
	1,000 Pesetas (gold)	1,000 Pesetas (gold)	1,000 Pesetas (gold)	1,000 Pesetas (gold)
United States	411,884	201,285	227,146	75,947

Sweden	71,983	33,535	14,478	7,707
Morocco	66,109	28,494	31,892	13,217
Portugal	15,749	6,850	49,389	8,886
Cuba	19,947	11,667	64,965	20,073
Other countries	706,005	354,628	381,723	140,567

The customs receipts and post dues in 1930 amounted to 754,835,119 pesetas, and in 1931 to 686,713,429

The quantity and value of wine imported into the United Kingdom from Spain were as follows for five years (Board of Trade Returns) —

—	1927	1928	1929	1930	1931
Quantity (gallons)	3,113,561	2,514,518	2,684,160	2,604,113	2,976,949
Value (£)	825,760	709,186	786,617	777,165	925,255

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years (Board of Trade Returns) —

—	1930	1931	—	1930	1931
	£	£		£	£
Iron ore	1,780,852	785,459	Oranges	5,656,737	4,612,963
Zinc, crude	10,905	9,775	Raisins	260,181	274,565
Pyrites	424,429	265,185	Esparto, &c.	175,802	176,721
Copper ore	613,279	319,344	Onions	524,595	844,736
Quicksilver	230,520	125,682	Grapes	642,373	684,191
Lead, pig and sheet	217,756	184,492	Rice	365,266	293,430

The chief British exports to Spain in 1931 were machinery, of the value of 510,120£, iron and steel manufactures, 513,987£, coal, 1,126,393£, ammonium sulphate, 707,629£, cotton piece goods, 56,880£, woollen goods, 22,372£

Total trade between Spain and the United Kingdom in thousands of pounds for five years (Board of Trade Returns) —

	1923	1929	1930	1931	1932
Imports from Spain into U Kingdom	18,270	19,074	16,638	14,246	12,755
Exports to Spain from U Kingdom	9,804	12,055	9,335	5,294	5,224
Re-exports to Spain from U Kingdom	645	486	527	222	364

Shipping and Navigation.

The merchant navy of the Republic contained on July 1, 1932, 675 steamers of 1,032,037 tons gross, 118 motorships of 218,041 tons gross, and 68 sailing vessels of 15,193 tons gross—a total of 1,265,321 tons gross

Barcelona, Bilbao and Cadiz are the chief maritime centres

The shipping entered and cleared at Spanish ports in two years was as follows —

	1929		1930	
	No	Tons	No	Tons
Entered				
With cargoes	14,254	18,343,646	13,833	17,758,458
In ballast	7,510	15,283,378	7,064	12,846,489
Total	22,094	33,627,024	20,897	30,604,947
Cleared				
With cargoes	17,570	27,321,241	18,517	27,922,688
In ballast	1,964	5,431,004	1,531	3,997,479
Total	20,584	32,752,245	20,048	31,920,167

Of the vessels entered in 1930, 9,432 vessels of 10,926,703 tons (entered) were Spanish and 9,196 vessels of 12,315,372 tons (cleared) were Spanish

Internal Communications.

In 1930 the total length of highways and roads in Spain was 87,318 kilometres (54,224 miles) In 1930 2,600 kilometres of new motor roads were completed

The total length of the railways in Spain in 1930 was 15,895 kilometres (9,871 miles), of which 11,833 kilometres (7,348 miles) are of normal gauge (1.67 metres, or 5 48 feet), and 4,062 kilometres (2,523 miles) are of varying gauges, chiefly 1 metre (3 28 feet) The official gauge of the principal Spanish railways has hitherto, for strategic reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations The attempt made in 1882 to remedy this state of affairs was not successful

In 1930 the total length of tramways in Spain was 1,350 kilometres (838 miles)

The whole of the Spanish railways belongs to private companies, but nearly all have obtained guarantees or subventions from the Government The State tax on tickets and merchandise for the year 1930 amounted to 66,002,139 pesetas There are 22 companies of normal gauge and 55 of narrow gauge, the most important being those in the North, with 8,801 kilometres (2,360 miles); Madrid Saragossa Alicante (system Antigua and Catalana), 3,670 kilometres (2,279 miles), Andaluces, 1,644 kilometres (1,021 miles); Madrid Caceres Portugal and West, 1,687 kilometres (985 miles). South of Spain, 397 kilometres (246 miles), La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (194 miles), and Calatayud Ternel Valencia (Central de Aragon), 299 kilometres (186 miles) A scheme was approved by the Government in July, 1929, for the electrification of the main lines of Spanish railways.

The Post Office carried in 1930, in the inland service, 593,540,903 correspondence of all classes, in the international service, 180,846,489 correspondence in general. There were 9,912 post-offices. Receipts, 97,697,800 pesetas; expenses, 62,353,700 pesetas.

The length of lines of telegraphs in Spain in 1930 was 53,135 kms.,

the total number of interior messages sent and received (1930) was 29,766,897. International messages sent 1,782,408, received 1,639,996, transit 379,480. The number of telegraph offices was 2,902.

In October, 1924, the entire telephone system of Spain was taken over by the 'International Telephone and Telegraph Corporation' of New York, and a Spanish Company constituted 'Compañía Telefónica Nacional de España,' whose purpose will be to provide an automatic service throughout the urban system. On December 29, 1926, this service was inaugurated in Madrid, and the system is being rapidly installed all over the country. In 1931 there were in service 2,699 exchanges, with 242,153 telephones. Number of interurban and international calls, 14,187,784, number of telephone messages, 5,428,979.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria, France, Switzerland, America and Germany, as well as various special Press Services. They have 10 wireless stations of the Marconi system.

The republican Government has cancelled the airway concession, and the State operates at present the two lines Madrid-Barcelona and Madrid-Seville. In 1931, 1,309 flights were made, carrying 6,800 passengers and 32 tons of goods. Barcelona-Cádiz or Huelva-Canaries Air Mail Service is in course of inauguration. From the Canary Islands the mails will be taken by steamer to Pernambuco and thence to Rio and Buenos Aires by aeroplane. In addition to this, there is the 'Unión Aérea Española,' who operates between Madrid-Lisbon-Seville, but the service is at present suspended. The formation of a new company is also announced, called Líneas Aéreas Interinsulares Canarias, which will run a service between Las Palmas and Santa Cruz de Tenerife. Two services will run daily in each direction. The capacity will be 12 passengers and 2 tons of cargo. There is also the French line from Toulouse to Casa-blanca, which touches Spain at Alicante.

Banking and Credit.

On January 1, 1922, a contract between the Bank of Spain and the Government came into force, according to which the Government participates in the net profits of the Bank, up to certain limits. The note issue was prorogued for another 25 years, up to December 31, 1946. The capital of the Bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. The Bank is now authorized further to increase the capital, up to the limit of 250,000,000 pesetas.

On February 10, 1933, the position of the Bank was as follows —

	1,000 Pesetas		1,000 Pesetas
Cash in hand	2,258,856	Property	49,782
{ gold	606,090	Capital and reserve	245,800
{ silver	2,421	Notes in circulation	4,871,040
{ bronze	4,525,527	Deposits and Accounts current	930,333
Portfolio	126,317	Discounts	900,087
Public Treasury	150,000		
Advances to Treasury			

Savings bank deposits (Post Office and Ordinary) in Spain, December 31, 1930, amounted to 1,551,640,219 pesetas, distributed over 2,023,591 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. On December 31, 1930, there were 906,542 current accounts, representing 265,016,327 pesetas. Including the figures of the banks and such credit institutes as have Savings Departments, the total number of depositors on December 31, 1929, was 8,565,909, and the amount standing to their credit, 3,412,473,157 pesetas.

The nominal value of the money coined in Spain from 1868 to 1907 was : gold, 920,613,935 pesetas ; silver, 1,330,589,807 pesetas. In 1905-07 no gold was coined ; in 1906-07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centimo pieces (silver) to replace money retired from circulation. In 1911, 286,843 pesetas of 50 centimo pieces were coined, as well as 60,286 pesetas of bronze centimo pieces. In 1913, 1,429,149 pieces of 1 centimo and 1,639,500 pieces of 2 centimos were coined. A new coin was put into circulation in 1925, consisting of a nickel piece representing 25 centimos, 2,000,000 pesetas were struck, and 2,000,000 pesetas in 50 centimo pieces (silver) to replace money withdrawn from circulation. In 1927 the 2 pesetas coin was withdrawn from circulation.

Money, Weights, and Measures.

The *Peseta* of 100 *Centesimos* is of the nominal value of a pre-war franc, 9½d, or 25 22 pesetas to the pound sterling. The exchange value of the peseta has not been restored to parity since the war.

Gold coins in use are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50-centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding pre-war French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5 peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being 15½ to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are —The *Quintal* = 220 4 lbs avoirdupois, the *Libra* = 1 014 lbs avoirdupois, the *Arroba*, for wine = 3½ imperial gallons, for oil = 2½ imperial gallons, the *Square Vara* = 1 09 vara = 1 yard, the *fanega* = 1½ imperial bushel.

Diplomatic and Consular Representatives

1 OF SPAIN IN GREAT BRITAIN

Ambassador —Señor Don Ramón Pérez de Ayala (appointed April 16, 1931)

Counsellor —Don Bernardo Rolland

First Secretary.—Don Fernando Valdés

Second Secretary —Don Xavier de Bermejillo

Military Attaché —Lieutenant Colonel Don Felix Riaño

Naval Attaché —Captain Don Adolfo Hércules de Solás

Agricultural Attaché —Don José Da Casa Calzada

Commercial Counsellor —Don Roman de Oyarzun

There are Consular representatives at Cardiff, Glasgow, Liverpool, New castle, and Southampton, and Consular agents in all the principal towns.

2. OF GREAT BRITAIN IN SPAIN.

Ambassador —The Rt Hon Sir George Dixon Grahame, G C M.G., G C V.O. (appointed July 31, 1928)

Counsellor.—V C W Forbe

Secretaries.—J H Leche, O B E, and P J Dixon.

Military Attaché —Major M. M. Parry-Jones, M C.

Naval Attaché —Capt. J U. P. Fitzgerald, R N.

Commercial Secretary — A A Adams

Consul-General (at Barcelona) — N King, C M G

There are Consular representatives at Bilbao, Cadiz, Coruña, Madrid, Seville, Malaga, Almeria, Valencia, and other places

Colonies

The area and population of the colonial possessions of Spain are approximately as follows —

Colonial Possessions	Area English square miles	Population
Possessions in Africa		
Rio de Oro and Adrar	109,200	495
Ifni	965	20,000
Spanish Guinea	10,080	140,000
Fernando Po, Annobon, Corisco, Great Elobey, Little Elobey	795	23,346
Spanish Morocco ¹	7,700	600 000
Total, Africa	128,696	784,341

¹ See Morocco

For administrative purposes the Canary Islands are considered part of Spain. The area of the islands is 2,807 square miles, and their population (1931) 564,873

Rio de Oro and Adrar stretch from the Wadi Draa 29° N and 11° 4' W to Cape Blanco 20° 46' N and 17° 3' W. Politically there are three zones — (1) Colony of Rio de Oro, 26° N to 20° 46' N, an area of 65,500 square miles, (2) the Protectorate, between 27° 40' N and 26° N bordered on the east by 8° 40' W, an area of 34,700 square miles, (3) the occupied territory, between 27° 40' N and the Wadi Draa, an area of about 9,000 square miles, settled by various treaties, 1900 to 1912. The Colonies are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The capital of this colony is Villa Cisneros. There is no town called Rio de Oro, the name being applied to the arm of the sea and the colony generally. The budget for 1929 amounted to 6,947,274 pesetas. There is little or no agriculture. Fishing is the principal occupation of the inhabitants.

Ifni was ceded to Spain by Morocco in 1860. By the Franco-Spanish agreement of 1912 it extends along the West Coast of Morocco to the north of Wadi Draa, from Wad Nun on the south to Wad Bu Sedra on the north, and a distance of 15 miles inland from the coast. The occupation is purely nominal. Area, 965 square miles, population, 20,000. There are several small harbours and villages; the population is engaged in fishing, and in cultivating dates and garden produce.

The Spanish territory on the Gulf of Guinea extends from the Muni to the Campo river and the Cameroons, its eastern boundary being on the meridian of 11° 20' E of Greenwich. The capital is Santa Isabel, in the Island of Fernando Po, with a population of 8,345. The principal mountain is known as the Pico de Santa Isabel, or Clarence Peak (9,185 feet). The island is considered one of the most fertile spots on the West Coast of Africa. The other possessions of Spain in the Gulf of Guinea comprise the Islands of Annobon (7½ square miles), Little Elobey (22 acres), Great Elobey (½ square mile) and Corisco (5½ square miles), and the district of Rio Muni on the mainland (9,470 square miles), the principal town of which is Bata. The coast region is low and marshy and

contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French, and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population of Fernando Poo is 20,873. There are about 250 to 300 Europeans in the island, about 30 of these being British. The population of Little Elobey is 222. Great Elobey is covered with bush, its population is 123. Corisco has a population of 1,438 and Annobon of 1,204, while the population of Rio Muni territory is estimated at 130 whites and 89,000 natives. All the colonies are under the control of a Governor-General, resident at Santa Isabel. A Sub-Governor is appointed to the district of Bata and another to the district of Elobey, which includes the Islands of Corisco and Annobon. The aborigines of Fernando Poo are called Bubi. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives.

SWEDEN.

(SVERIGE)

Reigning King.

Gustaf V, born June 16, 1858 Succeeded to the throne on the death of his father, Oscar II, December 8, 1907 Married, Sept 20, 1881, to Princess Victoria, born August 7, 1862, died April 4, 1930, daughter of Friedrich, Grand Duke of Baden.

Children of the King

I The Crown Prince **Gustaf Adolf**, Duke of Skåne, born Nov 11, 1882, married 1 June 15, 1905, to Princess Margaret Victoria, born January 15, 1882, died May 1, 1920, daughter of Prince Arthur, Duke of Connaught; 2 November 3, 1923, to Louise, Princess of Battenberg, born July 13, 1889 Offspring (of the 1st marriage): Prince Gustaf Adolf, born April 22, 1906, married, October 19, 1932, to Sibylle, Princess of Saxe-Coburg-and-Gotha, born January 18, 1908; Prince Sigvard, born June 7, 1907, Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb 28, 1912; Prince Carl Johan, born October 31, 1916

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 8, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced

March 17, 1914. Issue, Lennart Bernadotte, born May 8, 1909 (has lost his right to succession to the throne), married, March 11, 1932, to Karin Nissavandt

Brothers of the King

I Prince *Oscar* Bernadotte, Count of Wisborg, born Nov 15, 1859 Renounced his succession to the throne and married, March 15, 1888, Ebba Murek of Fulkila, born Oct. 24, 1858

II Prince *Carl*, Duke of Västergötland, born Feb 27, 1861 Married August 27, 1897, to Princess Ingeborg, born Aug 2, 1878, daughter of King Frederik VIII of Denmark Issue, Princess Margaretha, born June 25, 1899, married May 22, 1919, to Prince Axel of Denmark, Princess Martha, born March 28, 1901, married March 21, 1929, to the Crown Prince Olaf, of Norway Princess Astrid, born Nov 17, 1903, married Nov 4, 1926, to the Crown Prince Leopold of Belgium, and Prince Carl, born Jan 10, 1911

III Prince *Eugen*, Duke of Närke, born Aug 1, 1865

King Gustaf V is the fifth sovereign of the House of Ponte Corvo and great grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir apparent of the crown of Sweden by the Parliament of the Kingdom, Aug 21, 1810, and ascended the throne Feb 5, 1818, under the name of Carl XIV Johan He was succeeded at his death, March 8, 1844, by his only son Oscar The latter died July 8, 1859, and was succeeded by his eldest son Carl XV, at whose premature death without male children, the crown fell to his next surviving brother, the late King

The royal family of Sweden have a civil list of 1,382,650 kronor The sovereign, besides, has an annuity of 300,000 kronor, voted to King Carl XIV Johan and his successors on the throne of Sweden

As to the dissolution of the Union with Norway, *see under Norway*

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa —

<i>House of Vasa</i>		<i>House of Hesse</i>	
Gustaf I	1521	Fredrik I	1720
Eric XIV	1560	<i>House of Holstein-Gottorp</i>	
Johan III	1568	Adolf Fredrik	1751
Sigismund	1592	Gustaf III	1771
Carl IX	1599	Gustaf IV Adolf	1792
Gustaf II Adolf	1611	Carl XIII	1809
Christina	1632	<i>House of Bernadotte</i>	
<i>House of Pfaltz</i>		Carl XIV Johan	1818
Carl X	1654	Oscar I	1844
Carl XI	1660	Carl XV	1859
Carl XII	1697	Oscar II	1872
Ulrika Eleonora	1718	Gustaf V	1907

Constitution and Government

The fundamental laws of the Kingdom of Sweden are —1 The Constitution or *Regerings-formen* of June 6, 1809, 2 The amended regulations for the formation of the Diet of June 22, 1866 (modified by Acts passed in 1909–1933); 3 The law of royal succession of September 26, 1810; and 4 The law on the liberty of the Press of July 16, 1812. The King must be a member of the Lutheran Church His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet.

This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and electors of six towns, not represented in the 'Landstings.' The constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. All members of the First Chamber must be above 35 years of age, and must have the right to vote in municipal affairs. They are elected for the term of eight years. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 23 years of age, and not under legal disability, having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains. All men and women who are entitled to vote have the right to stand for election, but only in their own election areas. The manner of election to both Chambers is proportional, and regulated by a special election law. The places to be given to the different groups of voting papers are decided according to the d'Hondt rule. The members of both Chambers obtain salaries for their services, at the rate of 3,000 kr and 4,000 kr for members living in or outside the capital, for each ordinary session, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Prime Minister. The Ministry (Socialist), appointed on September 24, 1932, is composed as follows.—

Prime Minister—P. A. Hansson

Minister of Foreign Affairs—Richard J. Sandler

Minister of Justice—Justice Karl J. D. Schlyter

Minister of Defence—Ivar T. Vennerström

Minister for Social Affairs—F. Gustav Møller

Minister of Communications—Henning V. Leo

Minister of Finance—Dr. Ernst J. Wigforss

Minister of Education and Ecclesiastical Affairs—J. Arthur Engberg

Minister of Agriculture—P. Edvin Sköld

Minister of Commerce—J. Fritiof Ekman

Ministers without Portfolio—Thorsten K. V. Nothn, Professor B. Östen Undén

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected September, 1932: 58 Moderates, 36 of the Agrarian Party, 24 Liberals and members of the Liberal Democratic Party, 104 Socialists and 8 Communists. The upper chamber: 50 Moderates, 18 of the Agrarian Party, 23 Liberals and members of the Liberal Democratic Party, 58 Socialists, and 1 Communist.

The provincial administration is entrusted in Stockholm to a Governor, and in each of the 24 counties to a prefect, who is nominated by the King. As executive officers of the prefects there are 489 sub-bailiffs. The right of the people to regulate their own local affairs is based on the municipal laws of June 6, 1930. Each rural parish, and each town, forms a commune or municipality in which all men and women over 23 years of age, and not under legal disability, who have paid the local taxes for at least one of the preceding three years, are voters. In small communes and towns the parish or town assembly

may itself decide on all questions of administration, police and communal economy. It may, however, elect a parish or town council to decide on the questions, and all communes with more than 1,500 inhabitants have to do so. These councils are named *Kommunalfullmaktige* in the country, and *Stadsfullmaktige* in the towns. Ecclesiastical affairs are in all communes with more than 5,000 inhabitants, dealt with by councils, named '*Kyrkofullmäktige*'. Each county has a county council (*Lands-ting*) elected by men and women who enjoy municipal suffrage, and have completed their 27th year. Towns having a population of at least 50,000 are in their right to separate from the '*Landstings*'. Towns which are administered separately by their municipal councils are Stockholm, Göteborg, Malmö, Norrköping, Helsingborg and Gävle. As in elections for the Diet, so in the elections of municipal representatives, of members of the '*Landstings*,' &c, the method of election is proportional. Women are eligible for communal offices.

Area and Population.

I PROGRESS AND PRESENT CONDITION

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual calculations of the people.

The area and population of Sweden, according to a preliminary report of the census taken on December 31, 1930, and estimate for December 31, 1931, are as follows —

Governments (Län)	Area English square miles	Population Dec 31, 1930	Population Dec 31, 1931	Pop per square mile 1931
Stockholm (city)	55	502,207	514,833	9,704.4
Stockholm (rural district)	2,986	264,909	265,906	93.3
Uppsala	2,052	188,090	187,582	69.6
Södermanland	2,680	189,182	187,877	78.0
Östergötland	4,266	809,995	809,888	80.4
Jönköping	4,449	231,557	232,121	66.6
Kronoberg	3,826	155,585	155,078	45.1
Kalmar	4,456	281,551	281,266	54.7
Gotland	1,220	57,448	57,450	47.7
Blekinge	1,173	144,841	144,942	129.1
Kristianstad	2,498	245,912	246,185	102.2
Malmöhus	1,871	510,664	512,866	280.8
Halland	1,901	150,128	150,548	82.2
Göteborg and Bohus	1,951	457,087	460,064	243.2
Älvsborg	4,919	318,199	318,868	69.0
Skaraborg	3,269	242,329	242,214	77.8
Värmland	7,427	269,945	270,414	40.1
Örebro	8,561	219,280	218,598	67.2
Västmanland	2,609	161,708	161,297	64.9
Kopparberg	11,649	249,647	249,491	22.9
Gävleborg	7,616	279,588	279,471	89.8
Västernorrland	9,924	278,503	279,590	80.0
Jämtland	19,968	184,500	185,121	7.8
Västerbotten	22,888	204,085	205,454	9.0
Norrbotten	40,742	199,825	201,642	5.8
Läke Väner, Vättern, Mälaren, Hjälmaren	8,505	—	—	—
Total	178,356	6,141,571	6,162,446	88.9

In 1931 there were 3,037,064 males and 3,125,382 females.

The growth of the population has been as follows :—

Census year	Population	Increase per ct. per annum	Census year	Population	Increase per ct. per annum
1880	4,565,668	0.91	1920	5,904,489	0.67
1910	5,622,408	0.72	1930	6,141,671	0.89

With the exception of 80,247 Finns, 7,162 Lapps, and some thousands others, the Swedish population (1920) is entirely of the Scandinavian branch of the Aryan family

On December 31, 1920, there were 22,811 foreigners in Sweden, including subjects of Finland 5,897, Germany 4,532, Norway 2,996, Denmark 2,730, Russia 1,885, the United States 1,072, the United Kingdom and Ireland 487, other states 3,212

For occupational census, see THE STATESMAN'S YEAR BOOK, 1928, p 1819

MOVEMENT OF THE POPULATION

1 Births, Deaths, and Marriages

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths

1927	5,678	12,847	8,735	1931	8,390	2,971	919

II PRINCIPAL TOWNS

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and at the beginning of 1932, 2,038,774, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 33 per cent. (in 1932)

Towns over 10,000 inhabitants at the beginning of 1932 —

Stockholm	514,333	Karlskrona	25,684	Falun	13,382
Göteborg	247,911	Lund	25,138	Trälleborg	13,121
Malmö	129,927	Halmstad	24,197	Kristinehamn	12,627
Norrköping	61,799	Karlstad	21,158	Västervik	12,550
Hälsingborg	56,890	Kalmar	20,177	Nyköping	11,900
Gävle	38,992	Landskrona	18,056	Härnösand	11,769

Örebro	37,068	Mölnådal	17,900	Umeå	11,454
Ekshäradna	32,734	Uddevalla	15,326	Ystad	11,425
Jönköping	31,290	Trollhättan	15,009	Luleå	11,341
Uppsala	30,741	Österund	14,587	Lidingö	11,285
Västerås	30,649	Södertälje	14,301	Riköda	10,967
Linköping	30,377	Kristianstad	13,906	Visby	10,595

Religion and Education.

The mass of the population belong to the Lutheran Protestant Church, recognized as the State religion. There are 12 bishoprics (Uppsala being the metropolitan see) and 2,573 parishes at the beginning of 1932. At the census of 1920, the number of 'Evangelical Lutherans' was returned at 5,880,941, the Protestant Dissenters numbering, Baptists, 7,265, and Methodists, 5,452. Of other creeds, there were 3,425 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,469 Jews, and 937 others. A few civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 3,239 and the latter 2,706 students in the autumn of 1932. There are also a State faculty of medicine in Stockholm (founded in 1810), with 802 students, and private universities in Stockholm (founded in 1877), philosophical and law faculties, with 1,413 students, and Goteborg (founded in 1889), philosophical faculty, with 387 students. In Stockholm and Goteborg there are also academies of commerce. In 1931 there were 127 public secondary schools, with 35,316 pupils, 54 people's high schools, 4,620 pupils, 2 high and 8 elementary technical schools, about 3,800 pupils, military schools, navigation schools, agricultural schools, veterinary and other special schools, besides institutions and schools for the deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. The school age is 7 to 14 years. In 1931 there were in the elementary schools, 28,199 teachers and 671,606 pupils.

Justice and Crime

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown, while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. Since 1915 there is a Militie-Ombudsman, also appointed by the Diet, exercising a control over the military laws. The Kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1932) into 3 high court districts and 207 district courts divisions, of which 88 are urban districts and 119 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors, in the country by a judge and 12 jurors—mostly peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the liberty of the Press.

Finance.

Revenue and Expenditure for six years are shown as follows (18 16 kronor = 17) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1928/29	43,867,809	43,590,110	1931/32	48,887,098	49,886,662
1929/30	45,047,709	44,662,532	1932/33	49,843,976	49,343,976
1930/31	46,278,991	45,072,116	1933/34	57,000,000	57,000,000

¹ Estimates

The budget of revenue and expenditure for the budget year July 1, 1932-June 30, 1933, was as follows —

REVENUE		EXPENDITURE			
			Ordinary expenses	Extra ordinary expenses	Total
(a) State revenues	Kronor	(a) Actual Expenses	Kronor	Kronor	Kronor
Taxes		Royal Household	1,382,650	329,350	1,712,000
Capitation tax	1,050,000	Justice	9,464,004	3,182,796	12,646,800

" " 1930 " 4½ "	278,266,100	Total (Jan 1, 1932)	1,851,418,738

Defence.

ARMY

The military forces are recruited on the principle of universal service, but aided by a voluntarily enlisted *personnel* which forms the permanent cadres for training purposes. In June 1925 the latest defence scheme was accepted by the Diet.

Liability to service commences at the age of 20, and lasts till the end of the 42nd year. The men belong to the active army or *Beväring* for 15 years, and then for 8 years to the *Landstorm*. The initial period of training for the main part of the infantry is 90 days (150 days for 20 per cent of the annual quota), 140 days for cavalry, artillery, and engineers. The infantry is called up for regimental training periods twice for 25 days each time (3 times for 20 per cent of the annual quota). The cavalry, artillery and engineers have 2 training periods of 30 days.

The army is organized in 4 divisions, 1 brigade, the troops of Upper Norrland and of Gotland. There are 22 infantry, 4 cavalry and 9 artillery regiments (corps). The establishment in 1932 was 2,340 officers and 24,809 other ranks.

The total number on the rolls of the "*Beväring*" amounts to about 575,000.

The strength of the reserve of officers and N C O of the reserve were 3,023 and about 800 respectively.

The *Landstorm* amounts to about 240,000 of all ranks.

The infantry is armed with the Mauser rifle (calibre 6.5 mm.), heavy machine-gun, model 14 (calibre 6.5 mm.), light machine-gun, model 21 (calibre 6.5 mm.) and mortar m/29 (calibre 8 cm.); the cavalry is armed with short rifle (Mauser, calibre 6.5 mm.), sword, heavy machine gun, model 14 (calibre 6.5 mm.), and light machine-gun, model 21 (calibre 6.5 mm.) the field artillery have the Krupp 7.5 cm. Q F gun. The field artillery has also 10.5 cm. and 15 cm. howitzers. The heavy artillery is armed with 10 cm. gun and 15 resp. 21 cm. howitzers.

The military budget for 1931-32 amounts to 72,542,693, kronor for the army.

AIR FORCE

The Swedish Air Force consists of a chief, an air staff, four flying corps, and several aviation training schools, bases, depôts, and factories. The Air Force, in 1931, numbered 991 all ranks, with 91 active and 76 instructional aeroplanes.

NAVY.

The Swedish Navy is maintained principally as a coast-defence force.

The following is a list of the principal ships:—

Laid down	Name	Displacement tons	Maximum armour		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1894 1896	Oden Thor	3,700	10	8	2 10 in , 6 4 7-in	—	5,000	16
	Aran							
1900	Vasa	3,800	7	7½	2 8 2-in , 6 6-in	2	7,400	17
	Tapperheten							
1902	Manligheten	4,660	6	7½	2 8 2-in 8 6 in	2	9,000	18
1904	Oscar II							
1930	Gotland	4,750	—	1	6 6-in , 4 3 in A A	6	33,000	27
1908	Fylgia	5,000	4	5	8 6 in	2	13,000	22
1913	Sverige	7,600	8	8	4 11 in , 8 6-in.		20,000	22 5
1915	Gustaf V Drottning Victoria	7,900	8	8	4 11 in , 8 6-in		22,000	22 5

There are 13 destroyers, 3 old torpedo gunboats, 39 torpedo and vedette boats, one mining vessel, and 16 submarines, besides sundry depot ships and small craft. The 1927 programme provided for the construction during 1928-32 of 2 destroyers, an aircraft carrying cruiser (the *Gotland* above, laid down 1930), 3 submarines and 4 vedette boats, all of which have been completed with the exception of the *Gotland* and 2 submarines, the progress of which has been slowed up for financial reasons.

The personnel of the Royal Navy is divided into three classes, viz 1 The Active List, 2 The Reserve, 3 The *Bevärning* (Conscripts). On the active list are 5 flag-officers, 8 commodores, 35 captains, 115 commanders and lt-commanders, 108 lieutenants, 55 sub-lieutenants, 528 warrant officers, and 3,239 petty officers and men, while about 360 officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 4 lieutenant-colonels, 7 majors, 32 captains, 34 lieutenants, 16 sub lieutenants, 107 warrant officers, and 624 petty officers and men.

Production and Industry.

I AGRICULTURE.

Sweden has always been an agricultural country. In 1751 only 9.5 per cent of the population depended for a livelihood on the various industries and commerce. In 1870 the percentage had advanced to 12.5, in 1900 to 29.1, in 1910 to 37.8, and in 1920 to about 44.2 per cent, so that to day the population of Sweden is about equally divided in the pursuit of agriculture on the one hand and commerce and industries on the other.

According to the census of agriculture taken in the autumn of 1927, the number of farms in cultivation was 427,152, of these there were of 2 hectares and under, 119,757, 2 to 20 hectares, 271,804, 20 to 100 hectares, 33,122, above 100, 2,469. Of the total land area of Sweden (41,054,000 hectares), 3,755,000 hectares were under cultivation, 1,269,000 hectares under natural meadows, and 21,747,000 hectares under forests, the products of which form a staple export. The estimated forest area is given as 23,181,200 hectares, and the total amount of wood as 1,417 million cubic metres.

The following table shows the area and yield of the chief crops for 2 years —

Crop	Area (hectares)		Produce (tons)	
	1931	1932	1931	1932
Wheat	276,326	301,794	463,573	721,213
Rye	207,246	208,849	283,126	434,215
Barley	125,691	118,488	222,903	237,402
Oats	642,799	638,857	987,850	1,187,982
Mixed corn	268,525	261,849	500,073	580,373
Leguminous crops ¹	31,516	29,876	44,027	49,915
Potatoes	132,361	186,720	1,481,895	2,133,649
Sugar beet	35,276	40,760	876,129	1,554,039
Fodder roots	100,633	99,456	3,185,551	4,062,597
Hay	1,643,033	1,643,397	5,769,198	5,774,866

¹ Peas, beans, and vetches

The value of all crops was estimated in 1930 at 949 million kronor, in 1931 at 851 million kronor, and in 1932 at 920 million kronor. In 1932, the live-stock was estimated as follows: Horses, 659,600, head of cattle, 3,120,500, sheep and lambs, 607,700, pigs, 1,542,000

II MINES and MINERALS

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lappland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. There were raised in 1931, throughout the Kingdom, 7,070,868 tons of iron ore. The pig-iron produced amounted in 1931 to 389,236 tons, and the ingot iron to 538,965 tons. Of iron ore, in 1931, 4,496,275 tons, and of pig-iron 40,475 tons were exported. There were also raised in 1931, 14,844 tons of silver and lead ore, 3,609 tons of copper ore, 58,972 tons of zinc ore, 8,364 tons of manganese ore, 53,668 tons of auriferous arsenic ore, and 57,609 tons of sulphur pyrites. The lead produced amounted to 24,000 kilograms, the copper to 3,005,000, the zinc to 93,000, the tin to 10,000. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 343,197 tons of coal in 1931. The most important produce of the Swedish quarries is paving stone, the amount produced for sale in 1931 had a value of 7,698,800 kronor. In 1931 there were 52,679 persons (1,866 young people under 18) engaged in the mining and metallurgical industries.

III INDUSTRIES.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest development north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history, pig iron is produced chiefly in Sandviken, Domnarvret, Uddeholm, and Fagersta. Cream separators, ball-bearings, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly specialised products of the metallurgical industries. The porcelain factory of Gustavsberg and the glass factories of Kosta and Orrefors produce wares that

have achieved a high reputation in the markets of the world. Innumerable factories for the production of finished products are scattered all over the countryside.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 7,846,499 hectares, of which crown and ecclesiastical forests extend to 6,095,000 hectares. The latter yielded, in 1931, 6,051,313 cubic metres of timber. In 1931 there were in Sweden 1,337 sawmills and planing mills with 37,297 workers who turned out sawn or planed timber to the value of 223,458,000 kronor, 1,117 factories for joinery and furniture with 16,674 workers, the output for the year being valued at 94,666,000 kronor, 106 factories for wood pulp with 18,711 workers, output 227,940,000 kronor, and 78 paper and pasteboard mills with 17,096 workers, output 183,366,000 kronor.

The following are some data for the most important Swedish industries —

Branch of Industry	No of establishments		Average No of workers		Value of output (1,000 Kronor)	
	1930	1931	1930	1931	1930	1931
Wood and paper industry	3,091	3,069	104,532	99,319	985,535	509,415
Iron and steel works	73	64	20,853	19,854	163,530	145,695
Iron, steel, and metal goods factories	608	851	25,749	27,393	220,245	192,822
Mechanical workshops	1,425	1,530	56,045	52,210	580,746	465,259
Brick, porcelain, & glass factories	365	364	17,123	16,224	74,727	65,692
Flour and grain mills	1,021	1,040	3,423	3,414	154,781	140,251
Sugar refineries	5	5	2,493	2,050	72,447	65,005
Tobacco factories	10	10	2,516	2,358	120,745	120,516
Dairies	1,442	1,414	4,903	4,914	153,496	145,992
Textiles	742	766	61,178	61,311	506,267	438,917
Tanneries and shoe factories	304	395	13,226	18,247	143,446	125,540
Match factories	14	13	5,785	4,985	38,523	31,980
Other chemicals	367	368	9,325	8,668	193,255	176,265
Electric power and gas works	656	677	5,099	5,902	163,291	169,517

The total number of industrial factories (including mines and quarries) was in 1930, 14,610, and in 1931, 14,722. The total power used in industry amounted to 4,257,000 effective h p in 1931 and 3,973,000 effective h p in 1930.

In 1931, 323,444 men, 72,845 women, 24,469 boys, and 9,312 girls (under 18 years of age) were employed in factories.

IV FISHFRIES

The total value of the Göteborg and Bohus fishing industry in 1931 was estimated at 14,351,000 kronor.

Commerce.

The total customs duties levied in 1929 amounted to 161,189,000 kronor, in 1930 to 156,843,000 kronor, and in 1931 to 153,346,000 kronor.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (18 16 kronor = £1) —

	1927	1928	1929	1930	1931
	£	£	£	£	£
Imports	87,214,719	94,050,354	98,268,109	91,529,457	78,609,086
Exports	89,018,865	80,710,556	99,906,684	86,371,725	61,806,608

The following were the values of the leading imports and exports for two years (in thousands of kronor), unwrought gold and silver and coin not included —

	Imports 1930	Exports 1930	Imports 1931	Exports 1931
	1000 Kronor	1000 Kronor	1000 Kronor	1000 Kronor
Live animals and animal substances	46,396	140,267	37,734	58,582
Veg-table products	232,414	10,050	209,576	5,152
Fats, oils and waxes of animal or vegetable origin	37,730	6,407	20,388	4,789
Products of the foodstuffs industry				
beverages, tobacco, fodder	98,056	8,014	92,269	7,677
Mineral and mineral manufactures	250 256	196 094	205,173	93,980
Chemical products, colours, etc	109,447	61,303	102,928	52,250
Hides, skins and fur skins, also manufactures thereof	53,388	24,547	46,752	17,243
Wood and cork also manufactures of such materials	27,085	277,241	22,063	172,849
Paper pulp, cardboard and paper, also manufactures thereof	18,093	404,240	16,411	346,722
Textile materials and manufactures thereof	298,717	24,016	256,833	14,836
Non precious metals, and manufactures thereof	178,160	176,093	147,761	142 501

Means of conveyance	61,536	34,157	70,378	27,688
Other articles	106 666	30,546	88,466	25,466
Total	1 662,175	1,550,351	1,427,541	1,122,408

A national Swedish trade mark was introduced (1911) by Sveriges Allmänna Handelsforening (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns, on a light-blue ground and the words 'Svensk Tillverkning' (Swedish manufacture) are shown on a light yellow ground below

The following table shows the value of the trade with the principal countries with which Sweden deals —

Country	Imports from (1930)	Exports to (1930)	Imports from (1931)	Exports to (1931)
	1000 Kronor	1000 Kronor	1000 Kronor	1000 Kronor
Great Britain and Ireland	263,153	401,691	200 833	304,697
Germany	532,056	224,598	472,464	114,042
Denmark	107,744	109,489	67,145	81 500
Norway	52,157	95,181	40,057	72 065
Finland	13,845	85,999	12,053	25,544
Russia	12,584	80,981	19,752	30,654
France	66 470	93,151	48,718	69 185
Spain	12,273	37,123	11,990	21 637
Italy	19,968	23,979	29,681	23,834
Netherlands	66,341	56 877	60,561	33,656
Belgium	31,885	43,093	31,769	30 860
United States	229,250	161,215	178,126	132,964
Argentina	85 203	21,342	41,465	9,763
Brazil	33,117	9,309	29,710	7,545
Japan	4,281	10,992	2,912	14,086
Australia	3,961	17,571	3,491	13,418
Other countries	187,517	177,766	166,122	135,418
Total	1 662 175	1,550 351	1,427 541	1 122,408

The following table shows (according to the Board of Trade Returns) the

chief articles of import and export in the trade of the United Kingdom and Sweden for 2 years.

Imports	1930	1931	Exports	1930	1931
	£	£		£	£
Sawn wood and timber	2,675,051	1,787,659	Coal	1,371,470	797,096
Planed or dressed wood	1,882,902	1,409,908	Coke	412,692	376,529
Butter	1,970,773	1,272,517	Cotton piece goods	679,699	667,412
Bacon	2,418,478	1,706,589	Machinery	587,145	439,260
Steel ingots	270,758	283,812	Woolens	318,251	328,588
Iron ore	390,214	338,008	Iron and steel	467,447	365,980
Packing paper	1,655,865	1,788,253	Leather	154,489	128,086
Wood pulp	3,847,276	2,746,968	Tin	195,818	99,678

Total trade between Sweden and U K (in thousands of pounds sterling) for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
Imports from Sweden to U K	22,049	25,709	22,581	17,842	13,424
Exports to Sweden from U K	9,711	10,547	10,048	7,744	6,867
Re exports to Sweden from U K	1,239	1,156	868	719	669

Shipping and Navigation.

The Swedish mercantile marine engaged both in the home and foreign trade on January 1, 1932, was as follows —

January 1, 1932	Sailing		Steam and Motor		Total	
	No	Gross Tonnage	No	Gross Tonnage	No	Gross Tonnage
20/200 tons	935	69,943	566	57,566	1,501	127,509
200/2 000 „	52	14,892	720	701,168	772	715,860
2,000 „ and above	3	6,591	220	948,887	223	955,478
Total Jan 1, 1932	990	91,226	1,506	1,707,621	2,496	1,798,847

The port of Goteborg had the largest tonnage in the beginning of 1932, namely, 315 vessels of 670,853 gross tons, and next to it came Stockholm, possessing 394 vessels of a total burthen of 436,971 gross tons.

Vessels entered from and cleared for foreign countries, with cargoes and in ballast, in 1931, as follows —

1931	With Cargoes		In Ballast		Total	
	No	Net Tonnage	No	Net Tonnage	No	Net Tonnage
Entered						
Swedish	11,125	6,918,114	4,020	912,788	15,145	7,830,902
Foreign	14,647	6,882,963	3,750	1,593,030	18,397	8,475,933
Total entered	25,772	13,801,077	7,770	2,505,818	33,542	16,306,895
Cleared						
Swedish	11,591	6,030,873	3,545	1,775,116	15,136	7,805,989
Foreign	13,719	6,529,348	4,091	1,996,341	18,410	8,526,684
Total cleared	25,310	12,560,216	8,236	3,771,457	33,546	16,331,673
Total entered & cleared 1931	51,082	26,361,293	16,006	6,277,275	67,088	32,638,568

Internal Communications.

On January 1, 1931, there were 47,139 miles of roads in Sweden

At the end of 1931 the total length of railways in Sweden was 16,770 kilometres, of which 6,753 kilometres belonged to the State. The receipts of the State railways in 1931 were 181 million kronor, and expenses 157 million kronor. The total cost of construction for the State railways to the end of 1931 was 1,142 million kronor, and for private railways, 748 million kronor. The total number of passengers on the State railways was, in 1930, 31,371,000, and, in 1931, 31,405,000, weight of goods, 18,431,000 tons and 14,257,000 tons, (private railways, 38,734,000 passengers in 1930 and 36,202,000 in 1931, goods, 23,547,000 tons and 16,504,000 tons). The line between Luleå and Riksgransen (the Lapland iron ore line) is run by electric power, as is also, since summer, 1926, the line between Göteborg and Stockholm.

The length of the wires of the telegraph at the end of 1931 was 64,341 km, 31,694 km of which belonged to the railways. The wires of the State telephone had a length of 1,064,238 km, the wires of the private telephone lines a length of only 12,718 km. The number of taxed telegraph messages sent in the year 1931 was 5,910,847, including 994,913 in transit. In 1931 there were 560,605 instruments (in Stockholm 171,855) employed in the telephone service, including only 6,044 private telephones.

The Swedish Post Office carried 841,543,000 letters, post-cards, journals, &c., in the year 1931. The number of post-offices at the end of the year was 3,899. The total receipts of the Post Office in 1931 amounted to 78,764,601 kronor, and the total expenditure to 64,141,342 kronor.

Commercial aviation is carried on by the A/B Aerotransport with the help of a government subsidy (650,000 kronor annually). A daily service is maintained in each direction, jointly with foreign companies, between Malmö and Amsterdam, and between Stockholm and Helsingfors. In 1931, planes of the company flew 495,258 kilometres and carried 19,623 passengers.

Banking and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad, but its actual circulation is kept far within this limit.

There are 9 conjointly responsible private banks and 21 joint stock banks (December 1932). Since December 31, 1903, only the Riksbank has the right to issue notes.

The following table gives statistics of the National Bank, and private banks (joint-stock banks included) in Sweden for December 31, 1932 —

Assets	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Real estate and furniture	—	93,767,088	93,767,088
Cash ¹	211,851,571	183,211,421	345,062,992
Bills, etc., payable at sight	12,799,812	46,702,322	59,502,134
Bonds and Government securities	238,565,688	297,222,160	535,585,848
Shares	—	128,704,447	128,704,447

¹ Gold, silver, and for the private banks notes of the Riksbank, etc. (Gold in coin and bullion. Riksbank 205,979,096, other banks 720,968, total, 206,700,064 kronor.)

Assets	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Claims on Swedish banks	—	172,211,774	172,211,774
Claims on Foreign banks	189,622,891	93,681,122	283,304,018
Bills payable in Sweden	134,284,733	1,168,688,408	1,302,973,141
Bills payable Abroad	24,848,181	69,850,618	94,698,744
Outstanding loans	68,779,178	2,381,360,909	2,450,140,087
Cash credits and overdrawn current accounts	1,513,833	650,331,989	651,845,822
Sundries	22,037,010	453,543,988	475,580,998
Total	904,100,842	5,689,276,241	6,593,377,083

Liabilities	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Original subscribed capital	50,000,000	524,607,050	574,607,050
Other funds	20,000,000	293,477,250	313,477,250
Notes in circulation	598,214,839	—	598,214,839
Bank post bills in circulation	98,723	61,816,104	62,804,827
Current accounts	201,582,500	624,811,392	826,393,892
Deposit accounts	—	2,282,766,704	2,282,766,704
Deposits in savings bank accounts	—	648,161,986	648,161,986
Liabilities to Swedish banks	—	287,155,849	287,155,849
Liabilities to foreign banks	896,000	47,309,157	48,205,157
Loans raised	—	581,986,840	581,986,840
Sundries	32,418,780	387,684,909	420,103,689
Total	904,100,842	5,689,276,241	6,593,377,083

The savings banks statistics (exclusive of Post Office) are as follows —

—	1928	1929	1930	1931
Number of depositors at end of year	2,763,799	2,889,160	2,987,221	3,090,533
Deposits at end of year, kronor	2,793,440,060	2,883,948,310	2,961,406,100	3,051,029,234
Capital and reserve funds, kronor	214,644,415	229,985,187	247,810,918	260,910,069

At the end of 1931 the Post Office Savings Bank had 1,402,072 depositors and 881,606,488 kronor of deposits, and at the end of 1932, 1,595,182 depositors and 451,179,409 kronor of deposits

The Private and Joint-Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows —

—	1929	1930	1931	1932
Number of depositors at end of year	2,012,237	2,036,723	2,039,179	2,005,667
Deposits at end of year, kronor	687,942,083	709,870,243	686,158,475	648,161,986

Money, Weights, and Measures.

The Swedish Krona, of 100 ore, is of the value of 1s 1½d, or about 18 kronor 16 ore to the pound sterling

The gold 20-kronor piece weighs 8.960572 grammes, 900 fine, containing 8.0645 grammes of fine gold, and the silver krona weighs 7.5 grammes, 800 fine, containing 6 grammes of fine silver. Nickel coins have been issued since 1920.

The standard of value is gold. Gold coins, however, practically do not exist as a currency. National Bank notes for 5, 10, 50, 100, and 1000 kronor are legal means of payment, and the Bank is bound to exchange them for gold on presentation, but the obligation to redemption is for the present suspended.

The metric system of weights and measures is obligatory.

Diplomatic Representatives

1 OF SWEDEN IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Baron E. K. Palmstierna, G. C. V. O. (appointed November, 1920)

Counsellor — Baron A. W. C. E. son Leijonhufvud

Attaché — M. J. H. Pripp

Military Attaché — Lieut. Colonel A. R. de Ugglå

Naval Attaché — Commander E. A. Öberg

Air Attaché — Col. E. Mossberg, C. B. E.

Secretary (specially attached) — O. Thorsing

Agricultural Counsellor — M. W. F. von Wachenfelt.

Consul-General in London — E. G. Sahlén

There are Consular representatives at the following places — Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Sunderland, and many other places.

2 OF GREAT BRITAIN IN SWEDEN

Envoy and Minister — Archibald John Clark Kerr (appointed April 25, 1931)

First Secretary — Noel Charles, M. C.

Naval Attaché — Commander M. A. Hawes, R. N. (lives in Berlin)

Military Attaché — Col. A. F. A. N. Thorne, C. M. G., D. S. O. (lives in Berlin)

Air Attaché — Wing Commander J. H. Herring, D. S. O., M. C.

Commercial Counsellor — W. J. Glenny, O. B. E.

Consul at Stockholm — W. H. Oxley

There are also Consular representatives at Borås, Gävle, Helsingborg, Kalmar, Karlskrona, Luleå, Malmö, Norrköping, Sundsvall, Visby, &c.

SWITZERLAND.

(SCHWEIZ — SUISSE — SVIZZERA)

Constitution and Government.

I CENTRAL.

ON August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League In 1353 the League included eight members, and in 1513 thirteen Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798 In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen In 1815 the perpetual neutrality of Switzerland and the inviolability

of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact which had been drawn up at Zurich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum*, or by direct popular vote (*popular initiative*) a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand of 50,000 citizens with the right to vote. The Federal Government (*ie*, the Parliament and the Federal Council) is supreme in matters of peace, war, and treaties, it regulates the army, the railway, postal and telegraph systems, the coming of money, the issue and repayment of bank notes, and the weights and measures of the Republic. The Federal Parliament legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zurich, a Federal University and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative authority is vested in a parliament of two chambers, a 'Standerat,' or Council of States, and a 'Nationalrat,' or National Council. The first is composed of forty four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs per day, representatives from the canton of Geneva receive 30 francs, from Uri and from Unterwalden 15 francs per day. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Ausser Rhoden and Inner Rhoden, and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrat' consists (according to a law passed in August of 1930) of 187 representatives of the Swiss people, chosen in direct election for 4 years, at the rate of one deputy for every 22,000 souls. The members are paid from Federal funds at the rate of 40 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. The members are distributed amongst the various cantons as follows —

Canton ¹	Number of Representatives	Canton ¹	Number of Representatives
Zurich (Zurich)	28	Schwyz	3
Bern (Berne)	31	Unterwald—Upper and	
Luzern (Lucerne)	9	Lower	2
Uri	1	Glarus (Glaris)	2

¹ The name of the canton is given in German, French or Italian according to the language most spoken in it, and the name in the other language is given in brackets.

Canton ¹	Number of Representatives	Canton ¹	Number of Representatives
Zug (Zoug)	2	Aargau (Argovie)	12
Fribourg (Freiburg)	7	Thurgau (Thurgovie)	6
Solothurn (Soleure)	7	Ticino (Tessin)	7
Basel (Bâle)—town and country	11	Vaud (Waadt)	15
Schaffhausen (Schaffhouse)	2	Valais (Wallis)	6
Appenzell—Outer and Inner	3	Neuchâtel (Neuenburg)	6
St Gallen (St Gall)	13	Genève (Genf)	8
Graubunden (Grisons)	6	Total	187

¹ The name of the canton is given in German, French or Italian, according to the language most spoken in it, and the name in the other language is given in brackets

At the elections held on October 25, 1931, the following parties were returned —National Council Radicals, 52, Catholics, 44, Social Democrats, 49, Agrarians, 30, Liberal Conservatives, 6, Communists, 3, other parties, 3, Council of States Radicals, 19, Catholic Conservatives, 18, Liberal Conservative, 1, Peasant Party, 3, Socialist, 1

A general election of representatives takes place by ballot every four years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme government of the Republic. Laws passed by the Federal Assembly may be vetoed by the popular voice, which means in effect that 30,000 citizens or eight cantons may demand that the law in question should be submitted to the direct vote of the nation, which can only say 'Yes' or 'No'. For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to a 'Bundesrat,' or Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1933 —Dr Edmund Schulthess (Aargau)

Vice President of the Federal Council for 1933 —Dr Marcel Pilet (Waadt)

The seven members of the Federal Council—each of whom has a salary of 1,280l. per annum, while the President has 1,400l.—act as ministers, or chiefs

of the seven administrative departments of the Republic. These departments are :—1. Foreign Affairs 2 Interior 3 Justice and Police 4 Military 5. Finance and Customs 6 Agriculture and Industry (Économie publique) 7 Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

II LOCAL GOVERNMENT

Each of the cantons and demi cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution, each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus and Unterwald. In all the larger cantons there is a body chosen by universal suffrage, usually called the *Grosse Rat*, or *Kantons Rat*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In all the cantons, the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the cantonal government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, *maire* or *syndic*, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I PROGRESS AND PRESENT CONDITION

Area and population, according to the census held on December 1, 1920, and the census held on December 1, 1930, are shown in the following table. The cantons are given in the official order and the year of the entrance of each into the league or confederation is stated —

Canton	Area sq miles	Population		Pop per square mile, 1930
		Dec 1 1920 (census)	Dec 1, 1930 (census)	
Zürich (Zurich) (1351)	667	588,602	617,706	926
Bern (Berne) (1353)	2,657	674,394	688,774	259
Luzern (Lucerne) (1332)	575	177,073	189,391	329
Uri (1291)	415	23,973	22,968	55
Schwyz (1291)	348	59,731	62,337	179
Obwalden (Obwald) (1291)	189	17,567	19,401	103
Nidwalden (Nidwald) (1291)	106	13,956	15,056	142

Canton	Area sq miles	Population		Pop per square mile, 1930
		Dec 1, 1920 (census)	Dec 1, 1930 (census)	
Glarus (Glaris) (1352)	264	33,834	35,653	135
Zug (Zoug) (1352)	92	31,569	34,395	374
Fribourg (Freiburg) (1481)	644	143,055	143,230	222
Solothurn (Soleure) (1481)	305	130,617	144,198	473
Basel-Stadt (Bâle V) (1501)	14	140,708	155,030	11,014
Basel Land (Bâle C) (1501)	163	82,390	92,541	568
Schaffhausen (Schaffhouse) (1501)	114	50,428	51,187	449
Appenzell A Rh (Ext) (1513)	93	55,354	48,977	527
Appenzell I -Rh (Int) (1513)	72	14,614	13,988	194
St. Gallen (St Gall) (1803)	785	295,543	286,362	365
Graubunden (Grisons) (1803)	2,746	119,854	126,340	46
Aargau (Argovie) (1803)	548	240,776	259,644	474
Thurgau (Thurgovie) (1803)	386	135,933	136,063	352
Ticino (Tessin) (1803)	1,085	152,256	159,223	147
Vaud (Waadt) (1803)	1,238	317,498	331,853	268
Valais (Wallis) (1815)	2,020	128,246	136,394	68
Neuchâtel (Neuenburg) (1815)	305	131,349	124,324	408
Genève (Genf) (1815)	108	171,000	171,366	1,587
Total	15,940	3,880,320	4,066,400	255

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in five—Fribourg, Vaud, Valais, Neuchâtel and Genève—for which the German names are given in brackets), the Italian in one (Ticino). In 1920, 2,750,622 spoke German, 824,320 French, 238,544 Italian, 42,940 Romansch, and 23,594 other languages.

The number of foreigners resident in Switzerland in 1920 was 402,385

II MOVEMENT OF POPULATION

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1927	71,388	1,750	38,585	50,952	20,331
1928	71,832	1,738	30,050	49,801	21,531
1929	70,715	1,709	31,238	52,147	18,568
1930	71,550	1,695	32,132	48,634	22,916
1931	69,851	1,602	32,269	51,016	18,835

In 1931 the illegitimate births numbered 3,006. The number of divorces was 2,857 in 1931.

The number of emigrants in five years was 1926, 4,947; 1927, 5,272; 1928, 4,800; 1929, 4,608; 1930, 3,636.

III PRINCIPAL TOWNS

On December 1, 1930, the population of the principal towns was as follows (census figures)—Zürich, 249,820; Bâle, 148,063; Geneva, 142,812; Bern, 111,783; Lausanne, 75,915; St. Gallen, 63,947; Winterthur, 53,925; Luzern, 47,066; Biel, 37,726; La Chaux-de-Fonds, 35,252; Neuchâtel, 22,668; Fribourg, 21,557; Schaffhausen, 21,118; Montreux, 18,506;

Thun, 16,524, Chur, 15,574, Lugano, 15,184, Solothurn, 13,734, Herisau, 13,599, Olten, 13,484, Vevey, 13,036, Le Locle, 12,001, Aarau, 11,666, Rorschach, 11,005, Bellinzona, 10,706

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland, all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1920, the number of Protestants amounted to 2,280,597 (57 per cent of the population), of Roman Catholics to 1,585,311 (41 per cent), and of Jews to 20,979 (0.5 per cent). Protestants are in a majority in twelve of the cantons, and Catholics in ten. Of the more populous cantons, Zurich, Bern, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See.

Education

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organised a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen.

The following are the statistics of the various classes of educational institutions for 1930-31—primary schools 4,363, with 16,637 teachers (8,253 men and 8,384 women), and 471,708 pupils (238,069 boys and 233,639 girls), the 653 secondary schools and lower middle schools had 29,964 boys and 27,029 girls, with 2,428 men and 596 women teachers. There are also cantonal schools, gymnasia, higher schools for girls, complementary schools, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects, agricultural schools, schools for horticulture, for viticulture, for arboriculture, and for dairy management. There are also institutions for the blind, the deaf and dumb, and the feeble-minded.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy, and medicine. There is a Technical High School, maintained by the Federal Government, at Zurich, with 1,576 matriculated students in 1929-30.

The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1931-32 —

—	Theology	Law	Medicine	Philosophy and Science	Total	Teaching Staff
Basel (1460)	52	135	874	576	1,187	170
Zürich (1832)	90	582	688	558	1,858	207
Bern (1834)	43	648	393	556	1,540	200
Genève (1559 ¹ & 1878 ²)	40	391	371	276	1,078	177
Lausanne (1537 ¹ & 1890 ²)	27	247	203	374	851	145
Fribourg (1889)	290	128	—	244	657	75
Neuchâtel (1866 ¹ & 1909 ²)	24	105	—	146	275	61

¹ As an Academy

² As a University

These numbers are exclusive of 'visitors,' but inclusive of 1,130 women students

In the winter of 1930-31 there were 2,426 foreign students, *i.e.* 28.5 per cent of the matriculated students in Switzerland

A University Institute for International Studies was opened at Geneva in October, 1927

Justice and Crime.

The 'Bundes Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 24 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election, the President and Vice President, as such, for two years and cannot be re-elected. The President has a salary of 27,000 francs a year, and the other members 25,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons, between cantons and cantons, between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs, between parties who refer their case to it, the value in dispute being at least 3,000 francs, and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1928, the prison population of Switzerland consisted of 3,734.

Capital punishment exists in Appenzell-I-Rh, Obwalden, Uri, Schwyz, Zug, St. Gallen, Luzern, Valais, Schaffhausen, and Fribourg.

Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 18, 1911, was accepted by the electors of the Republic

with a small majority. The total number of votes cast was 529,001, of which 287,583 were for and 241,418 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation). The Swiss Accident Insurance Institution commenced operations on April 1, 1918. In 1929 the 1,140 societies insuring against illness had 1,561,162 members.

A proposal for a scheme of old age and dependents' insurance came before the assembly in Sept., 1929. The system will be compulsory and applicable to all between the ages of 19 and 65.

Finance.

The entire proceeds of the Federal alcohol monopoly (amounting to 7,359,161 francs in 1932) are divided among the cantons, and they have to expend one tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1928	888,121,887	359,358,404	1931	428,899,848	426,145,085
1929	395,956,833	371,966,066	1932 ¹	409,088,000	417,988,000
1930	433,106,283	426,374,014	1933 ¹	371,000,000	441,000,000

¹ Estimates

The following table gives the budget estimates for 1932 —

Source of Revenue	Francs	Branch of Expenditure	Francs
Capital invested	29,884,400	Debt, Total Charge	106,466,875
General administration	618,160	General administration	5,940,900
Departments —		Departments —	
Political	359,000	Political	8,884,000
Interior	1,292,880	Interior	46,543,849
Justice and Police	2,683,500	Justice and Police	7,540,691
Military	399,818	Military	96,877,375
Finance and Customs	860,471,467	Finance and Customs	24,453,685
Commerce, Industry, and Agriculture	2,303,100	Commerce, Industry, and Agriculture	79,986,488
Posts and Railways	10,508,700	Posts and Railways	7,186,866
Miscellaneous	572,480	Miscellaneous	84,657,871
Total	409,088,000	Total	417,988,000

The public debt of the Confederation (exclusive of the railway debt) amounted, on January 1, 1932, to 1,710,585,000 francs. The floating debt (January 1, 1932) was 252,701,000 francs. The total debt was thus 1,963,286,000 francs, or including the railway debt, 4,885,585,000 francs.

Defence.

There are fortifications on the south frontier for the defence of the St Gothard pass, others have been constructed at St Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 48th year. The first 12 years are spent in the first line, called the 'Auszug,' or 'Elite', the next 8 in the Landwehr, and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry, engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*, but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The Landwehr men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. There is a staff organisation for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, and an air force of 10 squadrons with 125 aeroplanes. The peace establishment normally under training is 46,200.

The fortress troops, mostly Landwehr, man the fortifications which close the St Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 56 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery is armed with a Q F shielded Krupp 7.5 cm calibre. The 'position' artillery has batteries of 8.4 and 12 cm guns.

Military expenditure, 1933, 92,600,000 francs.

Production and Industry.

About 28 per cent of the population are engaged in agricultural pursuits. Of the total area 926,897 hectares, or 2,317,242 acres, being 22.4 per cent, is unproductive, of the productive area 926,193 hectares, or 2,315,482 acres, being 23.9 per cent, is forest, and of the rest about 1,210,000 hectares, or 3,025,000 acres (53.2 per cent) is under grass, and about 800,000 hectares, or 2,000,000 acres (35.7 per cent) is pasturage. In 1929, there were 129,215 acres under wheat and 46,945 acres under rye.

The chief agricultural industries are the manufacture of cheese and condensed milk. The total production of cow's and goat's milk in 1931 was 2,598,800 metric tons, of hard cheese 50,500 tons, of butter 17,000 tons, and of condensed milk and milk powder 40,000 tons, of which 28,773 were exported. Wine is produced in eighteen of the cantons. In 1931 Swiss

vineyards yielded 11,542,290 gallons of wine, valued at 37,320,000 francs, as compared with 12,575,924 gallons valued at 45,192,000 francs in 1930 Tobacco is produced in three cantons On April 21, 1931 (last census), there were in Switzerland, 140,023 horses, 3,689 mules, 795 donkeys, 1,609,073 cattle, 866,922 cows, 183,838 sheep, 924,271 pigs, 235,827 goats

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance The entire forest area of Switzerland on January 1, 1931, was 2,427,844 acres in extent (comprising 112,705 acres of cantonal forest, 1,632,271 acres belonging to municipalities and other corporations, and 682,868 acres of private forests) The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance It comprises about 1,828,382 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences In 1876 it was enacted that this forest area should never be reduced, servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up, public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned In the year 1930, 15,471,000 trees (chiefly coniferous) were planted

There were, in 1930-31, 246 establishments for pisciculture with 168,274,000 fry of various species, produced from the incubation of 222,913,000 eggs

Many industries flourish in Switzerland There are 2 salt mining districts, that at Bex (Vaud) belongs to the Canton, but is worked by a private company, and those at Schweizerhalle, Rheinfelden and Ryburg are worked by a joint stock company formed by the Cantons interested The output of salt of all kinds in 1931 reached 850,164 quintals (808,802 in 1930) In the province of St Gall (Gonzen mine) iron ore and manganese ore are mined In 1931, the output was 20,000 tons of hematite and 10,000 tons of manganese ore In 1929 there were 8,514 factories in Switzerland Watch and clock making is an important branch of manufacture, number of clocks exported in 1931, 13,177,000, in 1930, 18,266,579, in 1929, 23,182,544 The number of persons employed in factories (1929) was 409,083, the motive machinery had 688,610 horse power In 1931, 59 breweries produced 57,656,860 gallons (57,410,770 gallons in 1930)

In 1932 the Swiss embroidery establishments operated 1,872 shuttle machines as against 3,489 in 1929, and 2,450 hand embroidery machines as compared with 3,670 in 1929

In 1929 there were 7,772 hotels, employing 63,258 persons (41,610 women and 21,648 men) In 1931, 2,202,467 visitors came to Switzerland (2,569,646 in 1930)

Commerce

The special commerce, not including precious metals, was as follows in five years —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports	109,787,213	111,853,982	106,568,065	90,048,162	70,507,152
Exports	85,877,431	84,178,185	70,700,064	58,951,962	80,040,329

The following table (in thousands of francs) shows the value of special commerce in 1931 and 1932.—

Merchandise	Imports		Exports	
	1931	1932	1931	1932
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Cereals	191,841	160,713	5,360	2,702
Fruits and vegetables	96,477	83,643	5,767	2,605
Colonial produce	86,761	77,808	20,484	8,890
Animal food substances	127,337	77,929	103,862	63,867
Beverages	56,197	49,609	1,089	694
Animals, living	84,925	11,117	1,310	2,534
Hides and skins	74,837	48,729	46,582	22,186
Timber	81,136	54,484	5,568	2,814
Cotton goods	87,956	61,531	135,085	72,860
Linen, hemp, &c, goods	23,919	19,367	11,563	8,810
Silk goods	111,250	57,997	192,806	86,269
Woollen goods	104,371	90,947	34,099	19,361
Clothing, ready made	80,082	56,586	32,343	12,901
Mineral substances	171,908	147,790	13,813	8,175
Iron work	142,801	102,775	35,428	21,791
Copper work	42,115	26,367	18,561	10,653
Machinery	85,346	65,986	150,355	86,922
Clocks and Watches	4,925	2,865	143,642	86,803
Chemicals	87,602	74,484	30,616	22,970
Dyes	18,499	15,369	72,914	58,119
Grease, oils, &c	32,705	28,241	8,606	1,938
Total (incl other merchandise)	2,251,204	1,762,679	1,348,798	801,008

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade —

	Imports		Exports	
	1931	1932	1931	1932
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Germany	659,029	499,477	198,430	111,417
France	862,179	272,332	156,137	122,958
Italy	179,966	148,045	94,352	81,835
Austria	43,274	28,345	44,884	23,773
United Kingdom	96,423	75,427	235,736	86,366
United States	163,557	114,943	92,173	55,100
Denmark	21,275	7,288	19,049	9,193

According to Board of Trade returns the staple articles of import into the United Kingdom from Switzerland in 1931 were —Silk goods, 2,043,437*l*, watches, 988,558*l*, embroidery, 521,895*l*, artificial silk goods, 1,306,834*l*, coal tar dyes, 477,413*l*, condensed milk, 107,685*l*. Exports to Switzerland were chiefly cotton piece goods, 839,334*l*, cotton yarns, 642,956*l*, woollen and worsted tissues, 428,038*l*.

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns) —

	1928	1929	1930	1931	1932
Imports from Switzerland into U K	14,360	13,740	12,640	11,865	5,157
Exports to Switzerland from U K	7,921	6,425	5,187	4,138	3,710
Re exports to Switzerland from U k	1,311	1,168	1,096	854	737

Internal Communications.

The railways of Switzerland (excluding tramways and funiculars) have a length of 3,367 miles. The net operating receipts from traffic of the Swiss Federal railways in 1932 amounted to 342,457,566 francs, compared with 389,449,503 francs in 1931. Operating expenses amounted to 259,202,869 francs (267,574,891 francs in 1931). The State railways are gradually being electrified, by the beginning of 1932, 1,107 miles of electrified normal gauge lines were being operated by the Federal Railways. The traffic on the Swiss waters (not including Lago Maggiore) in 1930 was carried on by 124 boats or barges belonging to 13 companies. There are about 9,300 miles of main road.

State aërial service is being gradually developed. In 1931 there were 11,689 flights, and 28,649 passengers were carried.

In 1931 there were in Switzerland 4,004 post offices. By the internal service there were forwarded 281,900,000 letters, 75,600,000 post-cards, 196,900,000 packets of printed matter and samples, 385,144,000 newspapers. In the international service there were forwarded 40,900,000 letters, 15,200,000 post-cards, 23,700,000 packets of printed matter and samples, 3,720,000 newspapers. Internal post-office orders were sent to the value of 372,250,000 francs. Receipts, 1931, 160,143,000 francs, expenditure, 145,048,000 francs.

Switzerland has a very complete system of telegraphs, consisting (1931) of 265 miles of line with 14,203 miles of wire. There were transmitted 776,000 inland telegrams, 3,226,000 international (of which 1,620,000 were despatched and 1,606,000 were received), and 941,000 transit through Switzerland. Number of offices, 3,067. There were 317,677 telephones installed, and 20,918 miles of line and 1,038,652 miles of wire, conversations, 248,036,000. The telegraph and telephone receipts in 1931 amounted to 103,554,000 francs, the expenditure to 103,054,000 francs.

The Marconi Company under a concession from the Federal Government has erected a wireless telegraphy station at Munchenbuchsee near Bern.

Banking and Credit

On December 31, 1931, the coin minted in Switzerland was as follows — 23,655,442 gold coins of the nominal value of 447,008,840 francs, 91,490,079 silver coins of the nominal value of 158,979,505 francs, 177,580,100 nickel coins of the nominal value of 12,400,035 francs, and 142,880,320 copper coins of the nominal value of 1,844,595 francs, total (including other token coins), 483,641,441 coins of the nominal value of 629,840,125 francs.

The National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue bank-notes in Switzerland. On February 15, 1933, the condition of the bank was as follows —

	Francs		Francs
Gold	2,517,727,557	Advances	85,587,451
Gold exchange	40,786,875	Notes in circulation	1,442,888,745
Discounts	18,202,150	Deposits	1,192,614,135

Money, Weights, and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the

Federal law of July 3, 1875, and since January 1, 1887, no other units than the metric units have been legal. By the Federal law of June 24, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sèvres (France), were adopted as the legal standards for Switzerland.

The *Franc* of 100 *Rappen* or *Centimes*, is the monetary unit and is equal to 0.2903225 gramme of fine gold. The par rate of exchange is 25.2215 francs = £1 sterling. Gold coins are the 20 and 10 franc pieces. Silver coins in circulation are 5, 2, 1 and $\frac{1}{2}$ franc, nickel coins, 20, 10 and 5 centimes, bronze, 2 and 1 centime.

As a result of the dissolution of the Latin Monetary Union in 1926, the gold currencies of other countries of the Union are, after April 1, 1927, no longer legal tender in Switzerland, where they have circulated since 1860.

National Bank 20-franc notes are also in circulation (by law of July 30, 1914), 5 franc notes (August 3, 1914), and 25 franc notes (September 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs avoirdupois. The *Arpent* (Land) = $\frac{8}{9}$ ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund* and *Viertelpfund*.

Diplomatic and Consular Representatives

1 OF SWITZERLAND IN GREAT BRITAIN

Envoy and Minister — Charles R. Paravicini, appointed October 13, 1919

Counsellor — Charles de Jenner

Secrétaire — Walter de Bourg, and Walter H. Rüfenacht

Consul General in London — Henri Martin

2 OF GREAT BRITAIN IN SWITZERLAND

Envoy and Minister — Sir Howard W. Kennard, K.C.M.G., C.V.O.
Appointed April 30, 1931

Second Secretary — C. B. P. Peake, M.C.

Military Attaché — Major & Brevet Lt.-Col. F. N. Mason-Macfarlane, M.C.

Consul General at Zurich — R. Erskine

There are Consuls at Bâle, Berne, Geneva, Lausanne, Davos, Vice-Consuls at Zurich, Montreux, Lugano, St. Moritz and Neuchâtel.

TURKEY

(TÜRKİYE CÜMHURİYETİ)

In November, 1922, a change of capital importance took place in the internal economy of Turkey. Up to that time Constantinople (now called Istanbul) continued to be the residence of the Sultan, and a Government deriving its authority from him still existed there. This Government, however, exerted no effective power outside Constantinople, together with a small adjacent area and another small area adjoining Çanakkale on the Dardanelles. Except for the small areas mentioned above, the whole of Asia Minor was under the authority of the *de facto* Government set up at Angora (now called Ankara) in April, 1920, under the name of the 'Government of the Grand National Assembly of Turkey'. On November 1, 1922, the Grand National Assembly voted a resolution declaring that the office of Sultan had ceased to exist and providing that the office of Caliph, which had hitherto been vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. Previous to this the Angora Government had made preparations not only to take delivery of Eastern Thrace from the Greek occupying authorities in accordance with the military Convention concluded at Mudanya on October 11, 1922, but also to take over the administration of Constantinople whenever an opportunity offered. On November 4, 1922, the administration of

Constantinople passed into the hands of the Angora Government. The same day the Grand Vizier, Tewfik Pasha, presented the resignation of the Constantinople Cabinet to the Sultan. The Sultan himself, on November 17, left Constantinople in secret. Nearly a whole year was, however, to elapse before the decisive step of proclaiming a Republic was taken. On October 29, 1923, the national leader, Gazi Mustafa Kemal Pasha, who had been born at Salonica in 1881, was elected first President of the Turkish Republic, and the revolution was complete when, on March 2, 1924, the Grand National Assembly decided upon the abolition of the Turkish Caliphate, a decision which was immediately followed by the expulsion from Turkey of all the members of the House of Osman, at the same time depriving them of their Turkish citizenship. On November 1, 1927, Mustafa Kemal Pasha was re-elected President of the Republic by the unanimous vote of the new Assembly which met on that day.

President of the Republic—Gazi Mustafa Kemal Pasha, re-elected May 4, 1931.

By a decision of the Grand National Assembly on October 13, 1923, Angora was declared to be the capital of Turkey. All central departments of state are now established there.

Constitution and Government

For a list of the former sovereigns of Turkey and an account of the older constitutions of the country, see *THE STATESMAN'S YEAR-BOOK* for 1923, page 1380.

The Grand National Assembly of Angora voted, on January 20, 1921, a Fundamental Law which introduced constitutional changes of the most radical kind. It declared that all sovereignty belonged to the people, and that all power, both executive and legislative, was vested in the Grand National Assembly as being the sole representative of the people. The old name 'Ottoman Empire' was discarded in favour of the designation 'Turkey'. No provision was made for a Senate. It was laid down that the members of the Grand National Assembly should be elected for a period of two years, and that the Assembly should delegate its executive powers to a certain number of Vekils or Commissioners. The mode of effecting this delegation of power varied somewhat, and ultimately at the beginning of 1924 circumstances necessitated a further revision of the Constitution. This was effected by the law of April 20, 1924, in the first articles of which the Turkish State was declared to be a Republic, the religion of which was Islam, the official language Turkish and the capital Angora. The new law provided for the election of the Assembly every four years, while according to article 7 'the Assembly exercises the executive power through the President of the Republic elected by itself and through the Council of Ministers chosen by him,' with the proviso that the Assembly may at any time control the actions of the Government and at any time dismiss it.

The new law also provided that the President of the Republic should be chosen from among the deputies constituting the National Assembly, and that his term of office should be identical with the life of each Assembly.

The present Cabinet, which was formed on September 28, 1930, and reconstructed on December 26, 1930, is constituted as follows:—

President of the Council—General Ismet Pasha.
Minister of Interior—Shukri (Şukrî) Kaya Bey.
Minister of Finance.—Mustafa Abdulhalik Bey.
Minister of Public Works.—Hilmi Bey.

Minister of Foreign Affairs — Dr Tevfik Rushdî (Ruştu) Bey

Minister of Justice — Yusuf Kemal Bey

Minister of Education — Reshid Galip Bey (appointed Sept, 1932)

Minister of Public Health — Dr Refik Bey

Minister of National Economy — Mahmut Jelal Bey (appointed Sept, 1932)

Minister of National Defence — Zekâî Bey.

Minister of Agriculture — Muhlis Bey

Minister of Customs and Monopolies — Ali Rana Bey

The fourth Grand National Assembly which was elected in April, 1932, and consisted of 317 deputies, met on May 4, 1932, and is the fourth assembly to meet at Angora

LOCAL GOVERNMENT

The Fundamental Law, voted at Angora in January, 1921 (see above), altered the system in force up to 1920 by providing that the country should be divided into Vilâyets (now sixty three in number) divided into Kazas, subdivided in their turn into Nahiyes. At the head of each Vilâyet is a Vali representing the Government. The system aimed at is one of centralisation. Each Vilâyet has an elective council of its own. The *Kaza* is regarded as a mere grouping of Nahiyes for certain purposes of general administration. The Nahiye or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930 Turkish women have the right to be electors and to be elected at municipal elections. This right has not yet been extended to elections for the Grand National Assembly.

Area and Population.

The Treaty of Peace between the Allied Powers and Turkey which was signed at Lausanne on July 24, 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This Treaty was ratified by the Grand National Assembly on August 23, 1923, and entered into force August 6, 1924, on its ratification by three of the four Allied Powers.

For the delimitation of the present territories of Turkey, see THE STATESMAN'S YEAR-BOOK for 1930, pp 1923-4.

The Treaty of Lausanne and the Conventions attached to it provided for the demilitarisation of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at Constantinople, for the demilitarisation of the Islands named above as well as the islands in the Sea of Marmara with one exception, and for a special administrative régime in Imbros and Tenedos. Otherwise Turkey holds unrestricted sovereignty.

The area of the Republic of Turkey is estimated at 762,736 square kilometres or 294,416 square miles excluding marshes (1,170 square km.) and lakes (8,484 square km.) About 9,257 square miles are in Europe.

For the first time in its history a general census was taken in Turkey on October 28, 1927, and showed the total population of the Republic to be 13,648,270, of whom 6,563,879 were men (48.1 per cent) and 7,084,391 women (51.9 per cent). Of the total population, 12,607,601 or 92.4 per cent lived in Asiatic Turkey and 1,004,669 or 7.6 per cent in European Turkey.

The population of the vilayets according to revised figures was given as follows —

Adana	227,718	Erzincan (Erzinjan)	132,325	Malatya	306,882
Afyonkarahisar	259,377	Erzurum	270,426	Manisa	374,013
Aksaray	127,031	Eskişehir	154,382	Maras (Marash)	186,555
Amasya	114,884	Gazi Antep (Antab)	215,762	Mardin	188,471
Ankara (Angora)	404,720	Giresun (Kiresun)	165,033	Mersin	119,107
Antalya	204,872	Gümüşane (Gümü)		Mugla	175,890
Artvin	90,066	shané)	122,231	Niğde	166,056
Aydın	212,541	Hakarı	24,980	Ordu	202,354
Balıkesir	421,066	Icel	90,940	Rize	171,657
Bayazıt	104,589	İsparta	144,437	Samsun	274,065
Bilecik (Bilejik)	113,660	Istanbul (Constanti-		Siirt	102,433
Bolu	218,246	nople)	794,444	Sinop	169,965
Burdur	83,614	Izmir (Smyrna)	526,005	Sivas	329,551
Bursa (Brusa)	401,595	Kars	204,846	Sebinkarahisar	108,735
Canakkale	181,735	kastamonu	336,501	Tekirdağ	131,446
Çankırı (Chankiri)	157,219	kayseri	251,370	Tokat	263,063
Çorum (Chorum)	247,926	Kırklareli	108,989	Trabzon (Trebizond)	290,303
Denizli	245,048	Kırşehir	126,901	Urfa	203,505
Diyarbakır	194,316	Kocaeli (Hoja ili)	256,600	Van	21,605
Edirne (Adrianople)	157,840	Konya	504,384	Yozgat	209,497
Elaâziz	213,777	Kütahya	302,426	Zonguldak	268,909

The populations of the principal towns was given as follows —

Constantinople ¹ (Istanbul)	690,857	Gazi Antep	39,998	Samsun	30,372
Smyrna (Izmir)	153,924	Caesarea (Kavaseri)	39,134	Urfa	29,098
Angora (Ankara)	74,558	Adrianople (Edirne)	34,528	Manisa	28,684
Adana	72,577	Eskişehir (Eskişehir)		Sivas	28,498
Brusa (Bursa)	61,690	Erzurum	31,457	Maras	25,982
Konia (Konja)	47,495	Diyarbakır	30,709	Balıkesir	25,740

¹ Scutari, 124,356, Pera, 294,790, Stambul, 245,982, Princes Islands, 12,310, Bakırköy, 13,419

According to the census of 1927, the foreign population was as follows — German, 2,306, Albanian, 1,652, British, 3,413, Austrian, 1,435, Belgian, 258, Bulgarian, 7,448, French, 3,427, Greek, 26,431, Hungarian, 1,830, Italian, 11,573, Polish, 613, Rumanian, 1,530, Russian, 6,206, Serbian, 3,883

The events of recent years have caused an enormous reduction in the Christian population of the territory still remaining to Turkey. A very large proportion of the Armenian population of Asia Minor disappeared after the war, owing to the fact that large numbers migrated to the Republic of Erivan. The Greek population has practically ceased to exist in Asia Minor and in European Turkey outside the vilayet of Constantinople, which includes both shores of the Bosphorus and Princes Islands in the Marmara. A Turco-Greek agreement signed at Lausanne on January 30, 1923, provided for the compulsory exchange of the Greeks of Turkey, not including the vilayet of Constantinople, against the Turks of Greece, not including Western Thrace, as from May, 1923. The Moslem population of Turkey has also suffered greatly from the effects of the war. It comprises besides the Turks of Asia Minor a considerable number of Kurds in the Eastern provinces, Lazes in the Eastern section of the Pontic coast, and a few Circassians. There is a fairly considerable but diminishing Jewish element in the towns.

Religion.

Moslems now form the vast majority of the population of the new Turkey, and Turkish is now being substituted for Arabic as the liturgical

language in all mosques Under the old imperial system the non-Moslem communities were recognised as organised communities or *milletts*, the heads of which exercised not only spiritual but civil functions The scope of these civil functions varied They were in some cases, and more especially in that of the Œcumenical Patriarch, of considerable importance The whole position is now fairly well defined The Treaty of Lausanne has deprived the spiritual heads of the communities of their administrative prerogatives, and their authority is now purely ecclesiastical

Constantinople is the seat of the Œcumenical Patriarchate The Holy Synod at the Phanar which assists the Patriarch, His All Holiness Mgr Photios II Maniatis (elected October 7, 1929), to administer the affairs of the Patriarchate consists of 12 Metropolitans with a thirteenth as chief secretary Of the Sees subject to the spiritual jurisdiction of the Œcumenical Patriarch 47 have been attached for administrative convenience to the jurisdiction of the Holy Synod of the Church of Greece, as they are in territories now forming part of the Hellenic Republic 41 other Sees have become titular as, in consequence of the exchange of populations, there are now no Orthodox residents in the territory formerly covered by them in the Turkish Republic the three Sees subject to the Œcumenical jurisdiction in Albania are vacant Thus there are five residential Sees subject to the Patriarch in Turkey—Chalcedon, Derkos, Princes' Islands, Imbros and Tenedos, Thyateira and Amasia, four in the Italian Dodecanese, Rhodes, Cos, Karpathos (Scarpanto) and Leros, one in Finland and Carelia, one in Tallinn for Estonia, one in Prague for Czechoslovakia, one in Sydney for Australia, and one in New York for North and South America This Archbishop Mgr Athenagoras has suffragans in Boston, Chicago and San Francisco There are also 11 Titular Bishops subject to the Œcumenical Patriarch, and recently the Russian Metropolitan Evlogii in Paris, at one time Supreme Bishop of the Russian Church outside Russia, accepted the Patriarch's appointment as Exarch of the Russian Church in West, although neither he nor his adherents had previously been subject to the Œcumenical jurisdiction, but to that of the Patriarchate of Moscow

The Armenian Church (Gregorian) in Turkey is ruled by the Katholikos of Sis, Mgr Sahag Kabayian, with two Bishops and three Vartabets, and the Patriarch of Constantinople, Mgr Mesrop Maroyian, with three Bishops and four Vartabets The Throne of the Katholikos of Agthamar is vacant Before the War the Katholikat of Sis had 15 eparchies (dioceses ruled either by a Bishop or a Vartabet), that of Agthamar two and the Patriarchate of Constantinople 51

The Uniat Armenian Church in Turkey is ruled by the Patriarch of Cilicia, Mgr Boulos Boutros XIII Terzian, with an Archbishop at Mardin and a Bishop at Adana Before the War there was another Uniat Archbishop at Sivas and 10 other Bishops

The Chaldaeans (Nestorian Uniates) have one Bishop at Mardin, who administers the Archiepiscopal See of Amida The Syrian Uniates have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch, whose incumbent resides in Damascus The Greek Uniates (Byzantine Rite) have as their Ordinary in Constantinople the Titular Bishop of Theodoropolis The Latins have an Archbishop in Smyrna, but their Patriarch of Constantinople is titular and non resident The Nestorians have a Katholikos and Patriarch Mār Shim'ūn XXI, temporarily resident in Mosul, whose See is normally at Qudshanes (near Çolemerk) in the Hakkârî There is a Grand Rabbi (Hahambaşı) in Constantinople for the Jews, who are nearly all Sephardim

According to the census of October 28, 1927, there were in Turkey

13,269,606 Moslems, 39,511 Roman Catholics, 6,658 Protestants, 109,905 Orthodox, 77,433 Armenian, 24,307 other Christians, 81,872 Jews, 17,494 other religious, and 2,702 undeclared

On April 10, 1928, the Grand National Assembly passed a law amending the Organic Statute in such a way that Islam ceased to be the State religion of the Republic. An oath of allegiance to the Republic, taken by the President and Deputies, took the place of the former religious formula.

Education

According to the census of October 28, 1927, only 1,111,496 of the population were literate in Arabic characters.

In Turkey, elementary education is nominally obligatory for all children of both sexes. According to the Provisional Law of October 6, 1913, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction. They include not only primary schools, but also secondary schools, 'preparatory' schools (for students intending to enter higher schools), and a certain number of lycées or secondary schools of a superior kind. There are also training schools for male and female teachers, and a certain number of higher technical schools, besides the University of Istanbul, founded in 1900. Number of students, 1931: men, 1,805; women, 507. Towards the end of 1925 a School of Law was founded at Ankara. The important non Moslem communities in Istanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Public Instruction.

The following table gives statistics of Education for 1930-31 —

—	Number	Teachers		Students	
		Male	Female	Male	Female
Primary Schools	6,629	11,443	4,892	820,371	177,059
Secondary Schools	148	1,927	484	23,996	8,540
Professional Schools	23	690	8	1,176	105
Higher Education Institutions	19	515	—	3,705	724
Schools of Fine Arts . . .	1	85	—	137	54

Total expenditure on education in 1930-31, was £T23,810,300, in 1931-32, £T6,593,749.

A general tendency has been manifested since 1926 to introduce the use of the Latin alphabet in Turkey. A Commission was formed to study the question, and on November 1, 1928, the Grand National Assembly voted a law for the adoption of Latin characters in Turkey. This law decreed the use of Latin characters obligatory in the case of all correspondence in Public Departments as well as all companies, societies and private offices, newspapers, cinemas and advertisements as from December 1, 1928. The publication of books in Arabic characters was forbidden after January 1, 1929, and the employment of the new alphabet became general throughout Turkey in 1930.

Previous to this important reform the Grand National Assembly had

also adopted the bill introducing the numeral system as used in European countries

Justice.

Since the beginning of the work of secularisation two years ago, nothing now remains of the old Ottoman laws based on the religious principles. The Turkish Government began by suppressing the religious Courts (Sheri) in 1924, in order to obtain this result. The system which was thus unified consists of (1) *juges de paix* (single judges with limited but summary penal and civil jurisdiction), (2) *tribunaux de base* (a president and two assistant judges with wider powers), (3) *assize courts* (a president and four assistant judges who hear serious penal cases). Appeal has been abolished. The Court of Cassation sits at Eskişehir.

The laws applied by these Courts have been recently drawn up and adopted. The Turkish Civil Code is, with the exception of a few modifications, a reproduction of the Swiss Civil Code, as also the Code of Obligations, and both entered into force towards the end of 1926. The new Penal Code is based in great measure upon the Italian Penal Code, and the Code of Civil Procedure, without being identical, nevertheless closely resembles that of the Canton of Neuchâtel. The new Commercial Code is based on the German.

On January 1, 1931, the prison population consisted of 42,463 men and 1,414 women awaiting trial, and 40,039 men and 3,806 women under sentence, a total of 87,722.

Finance.

The revenue is derived from land, property, income and profits taxes, Customs, consumption taxes, sheep and cattle tax, monopolies, and other sources. The principal monopolies in 1930 were, tobacco, alcohol, matches, explosives, cartridges and salt.

Estimates of revenue and expenditure for five financial years were as follows —

—	1929-30	1930-31	1931-32	1932-33	1933-34
	£T	£T	£T	£T	£T
Revenue	220,546,000	222,782,000	186,705,549	169,354,800	175,000,000
Expenditure	220,408,481	222,646,523	186,582,005	169,146,747	175,000,000

The approved Budget Estimates for the financial year ending May 31, 1933, are as follows —

Revenue	£T	Expenditure	£T
Direct taxes	33,775,000	Grand National Assembly	2,417,985
Indirect taxes	63,868,000	Customs and Monopolies	4,658,565
Monopolies	33,675,000	Bureau of cadastre (title deeds)	997,000
State operated organizations	2,825,000	Presidency of religious affairs	607,196
Government share of re-venues of companies (rail way concession, reinsurance, Central Bank)	6,436,800	Public debt	49,705,693
		Ministry of finance	12,305,965

Revenue	£T	Expenditure	£T
Miscellaneous receipts	4,575,000	Ministry of interior	3,785,925
Arrears of abolished taxes	250,000	Ministry of foreign affairs	2,623,000
Extraordinary revenues	24,450,000	Ministry of public health and social assistance	3,501,884
Total	109,354,800	Ministry of justice	7,645,986
		Ministry of public education	6,064,875
		Ministry of economy	252,610
		Ministry of public works	10,046,998
		Bureau of public security	3,944,000
		Gendarmerie	8,308,379
		Ministry of national defence	
		Army	32,173,640
		Air Force	943,000
		Navy	3,605,560
		Military factories	2,956,800
		Bureau of posts, telegraph, and telephone	4,845,820
		Ministry of Agriculture	3,978,691
		Total (all items)	169,146,747

By the Treaty of Lausanne the foreign debt of Turkey was to be distributed among the succession States, of which the new Turkey is one. The Turkish debt has been apportioned as follows (the first figure refers to the loans prior to October 17, 1912, the second to those between October 17, 1912 and November 1, 1924): Turkey, 62.25 per cent and 76.54 per cent; Greece, 10.57 per cent and 0.55 per cent; Yugoslavia, 5.25 per cent; Bulgaria, 1.63 per cent and 0.16 per cent; Albania, 1.57 per cent; Syria, 8.15 per cent and 10.02 per cent; Iraq, 3.96 per cent and 4.87 per cent; Palestine, 2.49 per cent and 3.06 per cent; and the Arab States, 4.13 per cent and 4.80 per cent. (Palestine has paid off the whole of her share.) The total debt of Turkey is £T87,316,000.

The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public debt was ratified by the Grand National Assembly on November 30, 1928. Negotiations are now taking place with a view to the reduction of the annuities to be paid by the Turkish Government.

Defence.

ARMY

Under the law of June 21, 1927, military service is for 18 months in the infantry and for two years in the cavalry, artillery and air service, while naval service is for 3 years. Men are called up at the age of 21, and liability for service lasts 26 years. The number of men liable to service in any given year is approximately 170,000, but the annual contingent does not at present exceed 60,000. The strength of the active army in 1931 was approximately 20,000 officers and 120,000 men, organised in 3 armies of 9 army corps, each army corps comprises 2 divisions, and there are 5 cavalry divisions, 3 active and 2 reserve.

The infantry is equipped with Mauser rifles. The artillery with 75 mm Krupp field guns and 10.5 and 12 cm Schneider howitzers. The army estimates for 1932-33 amount to 32,173,640 pounds Turkish.

NAVY

The Turkish Navy has for some time past been undergoing reorganisation, all vessels of any fighting value being taken in hand for refit as money for this purpose can be spared. The effective fleet at present includes the battle cruiser *Yavuz*, formerly the German *Goeben*, launched in 1911, displacing 22,500 tons, and armed with ten 11-inch guns, the light cruisers *Hamidieh*, 3,830 tons, and *Medydhieh*, 3,300 tons, both dating from 1903, 2 gunboats, 3 minesweepers, 4 new destroyers, 3 old destroyers, 4 submarines, and a surveying vessel.

The *Yavuz* has undergone an extensive refit at Izmit under a contract made with a group of French shipbuilding yards. The repairs were completed in 1930.

A new naval base at Izmit has replaced the former dockyard in the Golden Horn.

The future strength of the personnel does not appear to have been fixed, but no difficulty is anticipated in manning the ships at present ready for sea. Effective strength at present is about 860 officers and 4,000 men.

AIR FORCE

There is an Air Regiment, stationed at Eski Şehir, and trained under French advisers.

Naval estimates for 1932-3 amount to 3,605,560 pounds Turkish, and air force estimates to 943,000 pounds Turkish.

Production and Industry.

Agriculture—Agriculture is most primitive, but modern methods are now being adopted. In 1929 the sum of £T100,000 000 was voted for irrigation work. Number of people engaged in agriculture (census of 1927) was 4,368,061, being 81·6 per cent of total of those engaged in economic activities. The soil for the most part is very fertile, the principal products are tobacco, mohair, cereals, figs, silk, olives and olive oil, dried fruits, nuts and almonds, skins and hides, furs, licorice root, wool, gums, canary seed, linseed, sesame and cotton. Opium is an important crop in Konya and Afyon Karahisar. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun (the most important), Bafra, Izmit, Charshamba and Izmir (Smyrna). In 1929, tobacco was grown by 79,965 cultivators on 19,520 acres. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the Vilayet of Aydın, is very important. The following table gives the estimated yields of the principal products for two years.—

Product	1930	1931
Tobacco (Tons)	47,000	51,000
Olive Oil " "	36,000	10,000
Figs " "	25,000	28,000
Raisins " "	35,000	31,000
Cotton (Bales ¹)	185 000	168,000
Opium (Cases ²)	6,500	8,750
Valonea (Tons).	32,480	—

¹ Of 500 lbs.

² Of 75 kilograms

The forest laws of the empire are modelled on those of France, but restrictive regulations are not enforced, and the country is being rapidly

deprived of its timber About 8,816,299 hectares (21,776,261 acres) are under forest The most-wooded vilâyets are Kastamonu, Aydın, Bursa, Bolu, Trabzon, Konya and Karesi Of the forest land, about 88 per cent belongs to the State, 6 per cent to private persons, and the rest to communes and wakfs (pious foundations)

In 1932 there were in Turkey 11,768,109 sheep, 9,510,344 ordinary goats, 3,315,036 mohair goats, 5,315,329 cattle, 908,474 asses, 510,965 horses, 85,000 camels, 36,522 mules, 555,100 buffaloes

The wool clip in 1930 was 9,920,000 lbs, and the mohair clip, 4,480 metric tons

Mining.—The Turkish provinces, especially those in Asia, are reported rich in minerals, which are little worked Production of principal minerals in 1930 and 1931 was as follows —

Mineral	1930	1931	Mineral	1930	1931
	Metric tons	Metric tons		Metric tons	Metric tons
Chrome	28,195	28,325	Emery	3,267	3,488
Silver lead	15,508	15,508	Coal	1,595,000	1,574,000
Zinc ore	14,726	3,476	Lignite	9,383	7,775
Manganese ore	900	1,000	Mercury ¹	540	230
Antimony	32	42	Arsenic	56	53
Borax	6,930	—	Clay	7,710	6,019
Meerschaum ²	380	—			

¹ Flasks

² Cases

Fisheries —The fisheries of Turkey are important, the total value of marine produce for Istanbul and dependencies was in 1921–22, £T2,400,778 15 as against £T2,922,332 21 in 1920–21 The total weight of marine produce in 1922–23 attained 22,000 tons No later statistics are available

Industry —Industries are relatively unimportant, but under cover of the new protective tariffs, which came into force on October 1, 1929, it is probable that an impetus will be given to industrial development The vilayet of Aydın was before the war one of Turkey's industrial centres An attempt is being made by the Government to revive industry in Smyrna, and a fair amount of machinery has been imported Carpet weaving represents approximately 60 per cent of pre war capacity The textile industry is being developed under Government auspices The number of fig packing establishments has been reduced Cotton ginneries are being rebuilt, and in June, 1926, an oilcake factory was established at Adana A further recent development has been the opening in December, 1926, of sugar factories at Uşak, near Izmir (Smyrna), and at Alpallu in Thrace, their total production in 1931 was 22,777 tons The total production of the sugar factory in Thrace, in 1931, was 14,106 tons Many small factories have been established in recent years, including saw mills constructed near Bozüyük, and cement works at Ankara and Kartal The latter was lected in 1929 by a Belgian group on the Anatolian railway, a few miles from Istanbul, and will produce 70,000 tons annually A German group has constructed a factory at Bakirkoy, which will have a similar capacity The number of electricity undertakings is said to be 48 In 1929, the Ford Company established important assembly works at Tophané in Istanbul The plant can assemble 80 cars per 8-hour day. There are also a number of cement factories In 1927 there were 65,245 manufacturing establishments with 256,855 employees, but the number has now increased.

Commerce

Imports and exports for five years —

	1928	1929	1930	1931	1932
	£T	£T	£T	£T	£T
Imports	228,581,775	256,296,379	147,550,516	126,659,893	85,983,723
Exports	173,537,489	155,214,071	151,454,971	127,274,807	101,303,355

Turkish trade for 2 years was distributed among the principal countries as follows —

Country	Imports		Exports	
	1931	1932	1931	1932
	£T	£T	£T	£T
United Kingdom	14,861,401	10,640,466	10,850,161	9,974,613
Italy	18,450,042	11,074,200	30,752,262	16,958,814
Germany	27,048,541	19,982,621	13,649,038	13,732,974
France	12,787,611	7,189,840	12,156,188	7,820,185
United States	4,117,612	2,266,546	12,678,299	12,092,927
Russia	7,243,326	5,942,269	4,688,045	5,437,163

The principal articles of import in 1930 and 1931 and of export in 1931 and 1932 were as follows —

Imports	1930	1931	Exports	1931	1932
	£T	£T		£T	£T
Cotton piece goods	27,201,225	27,740,702	Tobacco (leaf)	28,752,180	26,939,906
Iron & steel manu- factures	20,202,819	16,298,897	Cotton (raw)	6,320,737	2,747,172
Machinery	11,689,780	10,951,799	Hazelnuts (shelled)	8,691,434	6,549,873
Woollen goods	8,835,099	6,557,764	Raisins (dried)	10,788,706	10,574,305
Mineral oils & coal	6,991,005	4,989,439	Fig* (dried)	5,354,930	3,510,142
Sugar	9,289,373	4,572,608	Olive oil	6,111,476	772,477
Cotton yarns and thread	3,760,755	4,298,954	Barley	3,472,258	3,456,328
Hides and skins	4,224,404	3,948,607	Eggs	9,651,555	8,026,093
Paper and paper manufactures	5,243,106	3,694,048	Wool	1,814,946	1,284,132
Tea, coffee & cocoa	5,100,104	3,641,591	Mohair	1,979,046	1,634,480
Rubber manufac- tures	3,325,300	2,478,499	Coal	1,661,026	3,788,959
Chemicals	2,411,746	2,405,612	Carpets	2,408,607	1,137,438
Woollen yarns	2,133,221	2,320,775	Opium	2,817,924	1,616,506

The principal imports from Turkey into the United Kingdom and exports to Turkey from the United Kingdom (according to Board of Trade Returns) in two years were —

Imports from Turkey	1930	1931	Exports to Turkey	1930	1931
	£	£		£	£
Figs and fig cake	152,989	220,289	Coal	53,953	87,209
Nuts	86,157	164,025	Iron and Steel	127,326	102,332
Wool (Mohair)	361,972	172,817	Cottons	549,475	573,888
Carpets	240,275	207,006	Woollens	190,216	192,774
Tobacco	55,506	16,504	Iron and steel	127,326	102,332
Raisins	287,207	264,604	Machinery	88,102	90,138

The value of the commercial intercourse between Turkey and Great Britain during the last five years according to the Board of Trade Returns is shown in the following table :—

—	1928	1929	1930	1931	1932
Imports into U K from Turkey	£ 2,655,594	£ 2,244,713	£ 1,869,725	£ 1,475,144	£ 1,619,676
Exports of British produce to Turkey	2,738,018	2,824,840	1,868,285	1,714,922	1,484,010
Re exports to Turkey from U K	144,364	120,576	72 585	66,348	51,304

Shipping and Navigation.

At the beginning of 1931, 215 vessels under the Turkish flag had a tonnage of 132,704 tons. The coasting privileges in Turkish waters which certain foreign companies enjoyed by virtue of the Treaty of Lausanne came to an end in July, 1926. The most important Turkish company engaged in the coastal service is the "Seyriselain". This company increased its tonnage to 63,256 in 1930. Other craft flying the Turkish flag included 29 tugs, 12 power barges, 300 ordinary barges and 42 motor launches. Three thousand seamen were employed in the Turkish merchant service.

In 1930 a total of 2,161 vessels of an aggregate tonnage of 1,893,598 tons called at the port of Izmir (Smyrna), in 1931, 6,306 vessels of 16,222,709 tons called at the port of Istanbul, inclusive of those in transit.

Air routes—Compagnie Internationale de Navigation Aérienne from Paris to Istanbul. Paris, Strasburg, Nuremberg, Prague, Warsaw, Vienna, Budapest, Belgrade, Bucharest, Sofia, Istanbul, and *vice versa*. Routes by hydroplane, The Società Anonima Aero Espresso Italiana to Istanbul from Brindisi, Athens, Istanbul, and *vice versa*. An air service between Istanbul and Ankara is about to be established.

Internal Communications.

Turkey has approximately 9,867 miles of roads and about 9,300 miles of unsurveyed tracks, but the roads are, on the whole, in a bad state of repair.

The length of railway line in Turkey in May, 1931, was 3,619 miles broad gauge and 359½ kilometres (225 miles) narrow gauge.

In 1929 58,493,622 letters, 1,367,756 postcards, 10,906,704 printed papers were handled internally, 2,211,673 letters were received from and 631,786 letters sent abroad. In 1929 there were 31,551 kilometres of telegraph lines with 61,886 kilometres of wire, 641 offices, 7,407,491 internal telegrams and 1,024,033 foreign telegrams sent.

Banking and Credit

In January, 1917, the Turkish Government issued a Charter for a new National Bank, to be styled the Central Bank of the Turkish Republic. Its capital is 15 million Turkish pounds, which has been fully subscribed, and up to the present 7,300,000 Turkish pounds has been called up. The future status of this bank was determined by a law passed by the Grand National Assembly on June 11, 1930. It began its activities on October 3, 1931, following the approval of the Statutes by the Government. The

bank has a concession for thirty years, renewable during the last five years of this period, and is the sole bank of issue in the country. Amongst the more important Turkish banks may be mentioned the Banque Agricole (Ziraat Bankası), the oldest of the Turkish institutions, with a paid-up capital of 27,000,000 Turkish pounds. The other banks are the Banque d'Affaires (İş Bankası), the business of which is increasing rapidly, Banque Industrielle et Minière (Sanayi ve Maadin Bankası), Emlâk ve Eytam Bankası (Crédit Foncier) and Esnaf Bankası (Craftsmen's Bank). The principal foreign bank in Turkey is the Ottoman Bank, founded in 1863. It has a branch in every important town of Turkey. The concession of the Ottoman Bank was extended in August 1925, by the Turkish Government, for a further period of 10 years.

The total amount of paper currency in circulation at the present time is £T158,748,563.

Money, Weights, and Measures

On April 17, 1916, an order was issued reforming the currency. A gold standard, with the piastre as the unit, was thenceforth to be general all over Turkey, and the piastre to equal 40 para. The piastre, as well as the half piastre (20 para), quarter piastre (10 para) and eighth piastre (5 para) pieces were to be of nickel. Silver coins were 2, 5, 10, and 20 piastres, and gold coins 25, 50, 100, 250, and 500 piastres. Silver was legal tender up to 300 piastres, and nickel up to 50 piastres.

The only money in general circulation, apart from nickel coins for 10 and 20 paras and for 1 piastre and coins for 2½, 5, 10 and 25 piastres, is paper money issued during the war. This forced currency is very depreciated, the Turkish paper lira being worth about one tenth of the gold coin of the same denomination. At the beginning of 1929 the Government stabilized the exchange at about 1,030 piastres to the £1.

Weights and measures are as follows —

1 <i>Oke</i>	= 400 drams	= 2 8264 lbs
1 <i>Batman</i>	= 6 <i>Okes</i>	= 16 958 lbs
39 6263 <i>Okes</i>		= 1 cwt
1 <i>Canlar</i>	= 44 <i>Okes</i>	= 124 3616 lbs
1 <i>Cheke</i>	= 195 <i>Okes</i>	= 551 148 lbs
1 <i>Kileh</i>		= 0 9120 bushel
1 <i>Muscal</i> (Ess of rose)	1½ drams	= 74 171 grains
1 <i>Arshin</i> (cloth)		= 26 96 inches
1 <i>Endaze</i>		= 25 555 inches
1 <i>Arshin</i> (land)		= 29 830 inches
1 <i>Deunum</i>		= 1098 765 sq yards or 0 2270 acres
1 <i>Djerib</i> (hectare)		= 2 47 acres

The metric system of weights and measures was to have come into force on January 1, 1933. The introduction has, however, been postponed and it is understood it will come into force at the beginning of 1934. On May 24, 1928, the Grand National Assembly passed a law making the employment of European numerals obligatory as from June 1, 1929.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar, while as from January 1, 1926, it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN

Ambassador — Mehmet Münir Bey (July 22, 1932)

Counsellor — Nurettin Ferruh Bey

First Secretary — Muzafer Kâmil Bey

Third Secretary — Cemil Vafi Bey

Commercial Counsellor — Kurtoglu Faik Bey.

Archivist — Ali Rıza Bey

Consul — Dürri Mazhar Bey (30th July, 1931)

2 OF GREAT BRITAIN IN TURKEY

Ambassador — The Right Hon Sir George R Clerk, G C M G, C B
(appointed November 12, 1926)

Counsellor — J Morgan

Naval Attaché — Capt R B Ramsay, M V O, R N

Military Attaché — Major B O'Leary, R A

First Secretary — W L C Knight

Commercial Secretary — Col H Woods, O B E

Second Secretaries — H E L Montgomery, M C, C Bramwell

Third Secretary — T C Ravensdale

Archivist — H W Gunningham, O B E

Consul General — W Hough

There are Consuls-General at Istanbul and Smyrna, and a Consul at Trebizond and Mersina (joint post)

URUGUAY.

(REPÚBLICA ORIENTAL DEL URUGUAY)

Constitution and Government

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The first Constitution was adopted July 18, 1830.

Uruguay is unique among South American Republics in its elaborate precautions to prevent the conversion of the presidency into a dictatorship. Borrowing the idea from the Venetian Council of Ten, the executive power is divided between the President of the Republic and a National Administrative Council, consisting of nine members (with nine alternates), elected for six years, six are of the majority party, and three of the largest minority, three retire every two years. The President is elected for four years, and may be re-elected after an interval of 8 years. Both the President and the Council are chosen by direct popular vote. The President appoints the Ministers of Foreign Affairs, of War and Marine, and of the Interior, and has supreme control of these departments. The other ministers—of Finance, Public Works, Industry and Education—are appointed by the Council, which is the controlling power of these departments. It proposes the annual budget and recommends to the President such fiscal measures as it deems expedient.

The new Constitution of the Republic, adopted in 1919, separated Church and State, and introduced universal male suffrage for all, over 18 years of age, who are able to read and write. In 1921 the Constitution was amended, granting votes to women. Voting is secret, and the principle of proportional representation operates. Voters participating in the National Election of 1931 numbered 317,294.

Parliament consists of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from March 15 to December 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House divides with the President control of that part of the executive power which is vested in him, thus diluting still further his authority. The representatives are chosen for three years, in the proportion of 1 to every 12,000 qualified voters, who must be able to read and write, and over 18 years of age. The senators are directly elected by the people, there is one senator for each department, chosen for six years, one third retiring every two years. There are 124 representatives and 19 senators. Diplomatic relations with Argentine were broken off on July 9, 1932, due to an incident on the occasion of a courtesy visit by a Uruguayan cruiser to Buenos Aires.

President of the Republic—Señor Dr. Gabriel Terra (March 1, 1931, to February 28, 1935). Salary, 24,000 pesos per annum.

Area and Population.

The following table shows the area and the estimated population of the 19 departments (capitals in brackets) on January 1, 1932 —

Departments	Area, square miles	Population Jan 1, 1932	Pop per square mile
Artigas (Artigas)	4,394	48,177	10.9
Canelones (Canelones)	1,834	179,070	97.6
Cerro-Largo (Melo)	5,763	85,080	14.7
Colonia (Colonia)	2,198	113,456	51.7
Durazno (Durazno)	5,525	82,675	14.9
Flores (Trinidad)	1,744	31,248	17.9
Florida (Florida)	4,673	98,907	20.0
Lavalleja (Minas)	4,819	103,228	21.4
Maldonado (Maldonado)	1,587	58,745	37.0
Montevideo (Montevideo City)	256	489,685	1,912.8
Paysandú (Paysandú)	5,115	72,267	14.1
Rio Negro (Fray Bentos)	8,269	30,719	12.4
Rivera (Rivera)	8,793	65,475	17.2
Rocha (Rocha)	4,280	61,731	16.5
Salto (Salto)	4,865	87,127	17.9
San José (San José)	2,688	88,306	32.8
Soriano (Mercedes)	3,561	79,631	22.3
Tacuarembó (Tacuarembó)	8,112	91,897	11.2
Treinta y Tres (Treinta y Tres)	3,682	59,539	16.1
Total	72,153	1,941,398	26.9

The last census was taken in 1908, when the total population was 1,042,688, divided into 861,464 native born and 181,222 immigrants, including 62,357 Italians, 54,885 Spaniards, 27,789 Brazilians and 18,600 Argentinians.

The census population of Montevideo City (the capital) on July 31, 1932, was 655,972. Of the other cities, Paysandú had 26,000 inhabitants, Salto, 30,000, Mercedes, 23,000.

Births, deaths, and marriages for three years:—

Years	Living Births	Still-Births	Marriages	Deaths	Surplus of Living Births over Deaths
1929	44,286	1,587	11,731	19,660	24,576
1930	45,718	1,599	11,799	20,049	25,669
1931	44,854	1,560	11,108	21,108	23,691

Of the living births in 1931, 12,221 were illegitimate. Divorces 712 in 1931, 633 in 1930. Immigration 1931, 157,418, emigration, 142,794. The language of the country is Spanish.

Religion and Education.

State and church are separated, and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, 45,470 unspecified and 126,425 Liberals.

Primary education is obligatory, both primary and superior education are free. In 1931 there were 1,533 public and private schools with 177,774 enrolled pupils and 4,780 teachers, of these 1,337 schools had 4,053 teachers and 153,180 pupils were public. Secondary schools had 4,413 pupils. There were also 63 evening courses for adults with 6,333 pupils and 235 teachers. State expenditures on education in 1931 amounted to 6,015,793 pesos.

The University of the Republic at Montevideo, inaugurated in 1849, had

12,327 students in 1931. There are four normal schools for males and females, and a school of arts and trades supported by the State where 1,100 pupils receive instruction gratuitously. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, two for the deaf and dumb, and a school of domestic science.

Justice.

The High Court of Justice consists of 5 judges elected by the two Chambers sitting as a National Assembly. The President is chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 3 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 2 for commercial cases, 1 for Government (*Juzgado de Hacienda*), as well as criminal and correctional courts. Each departmental capital has a departmental court, and each of the 220 judicial sections into which the Republic is divided has a justice of peace court, further, each section is divided into districts, in which deputy judges (*alcaldes*) try cases involving small amounts.

In September, 1907, the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

Finance.

The receipts and expenditure for recent fiscal years (ending June 30) are stated as follows (at par 4 7 gold pesos = £1, 1 gold peso = 1 03 dollars U.S.) —

—	Receipts	Expenditure	—	Receipts	Expenditure
	Gold pesos	Gold pesos		Gold pesos	Gold pesos
1926-27	54,863,856	51,706,064	1929-30	58,916,879	59,702,824
1927-28	58,801,347	58,556,386	1930-31	57,311,712	62,021,407
1928-29	58,576,428	57,565,207	1931-32 ¹	63,699,968	63,140,178

¹ Budget estimate

The public debt of Uruguay on June 30, 1932, stood at 245,788,918 pesos, of which 141,670,152 was external, and the remainder internal, including 4,980,000 pesos for the debt contracted jointly with Brazil for the construction of an international bridge over the Yaguaron River (completed in 1930).

Defence.

The army of Uruguay consists of a small standing army, and the National Guard. Service in the standing army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 19 line battalions, 4 rifle companies, 9 cavalry regiments, 3 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, 1 engineers' battalion, and 1 bearer company with a peace strength in 1932 of 5,751, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory in the event of war. It is divided into three classes, or 'bans'. The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, who would take the field with the standing army. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move

out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000, and a force of mounted police ('Guardia Republicana') of 400. The Fire Brigade, which also undertakes police duties, numbers 360.

The infantry of the active army is armed with the Mauser rifle, the field batteries have either Schneider or Krupp 7.5 cm guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The Military Aviation School possessed, at the end of 1930, some 47 machines. The School has its own workshops and staff of mechanics, and an establishment of 8 instructors and 320 officers and men. A naval aeronautical service is also in process of being organized, 3 flying boats were bought in Italy in 1930.

The fleet consists of the torpedo gunboat *Uruguay*, 1,400 tons, speed 23 knots, a surveying vessel of 500 tons, built in Spain in 1930, and a few smaller craft.

Production and Industry.

Uruguay is primarily a pastoral country, 60 per cent (27,573,919 acres) of the total area being devoted to the stock raising industry, 20 per cent (10,002,126 acres) to mixed farms and ranches, and only 7 per cent (3,120,000 acres) to agriculture. The remaining 13 per cent of the country's area is unproductive. Animals and animal products constitute 95 per cent of the country's exports. Four leading frigorificos have a daily capacity of 4,000 cattle and 7,000 sheep carcasses. Total 'kill' in 1930, 1,285,246 cattle and 2,725,989 sheep. Total meat exports (1931), 141,853 tons. Wool shipments for recent seasons have been 1929-30, 148,977 bales, 1930-31, 150,490 bales, 1931-32, 92,656 bales. Nutria skins are exported at the rate of 50,000 a year. A livestock census, 1930, showed 7,127,912 cattle, 20,558,124 sheep, 600,000 horses, and 307,924 pigs.

Agricultural products are raised chiefly in the Departments of Canelones, Colonia, San José, Minas, and Florida. The average farm is about 250 acres. The principal crops and their yield for two years were as follows:—1931-32 wheat, 306,434 tons, maize, 146,282 tons, linseed, 122,967 tons; oats, 45,159 tons. 1930-31 wheat, 217,648 tons, linseed, 143,885 tons, oats, 55,797 tons. Total value of cereals, 1929-30 was 25,647,321 pesos.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, Colonia, and Paysandú. In 1931 there were 4,960 properties of 31,293 acres, producing 61,070,244 kilos of grapes, and 10,002,564 gallons of wine. Annual fruit crop, exclusive of grapes, about 153,000 tons, principally peaches, oranges and pears. Tobacco (552,620 kilos in 1931) and olives are also cultivated.

In the northern departments several gold mines are worked, and silver, copper, lead, manganese, and lignite coal are found. The supply of electricity for light, power, and traction has been a State monopoly since 1912, as 20 per cent of total imports, in value, consists of coal and other fuels, exploitation of hydro-electric resources is considered important.

Commerce.

The foreign trade (imports in 'official values' and exports in 'real values') was as follows (at par 1 gold peso = 1.03 dollars, U.S., 4.7 gold pesos = £1).—

—	1927	1928	1929	1930	1931
Imports ¹	Gold pesos 81,829,873	Gold pesos 93,954,951	Gold pesos 93,284,012	Gold pesos 91,800,846	Gold pesos 88,639,885
Exports	96,418,695	100,802,800	92,952,246	100,984,583	78,242,035

¹ Comparison of import figures for different years is difficult, because the system of calculating "official values" of imports has been several times modified since 1923. Furthermore, as "official values" are stated to be, in many cases, below real values, the balance of trade is not as favourable as the figures suggest. Real value of 1930 imports was 93,893,763 pesos, and of 1931 imports, 114,127,575 pesos.

The principal exports in 1931 were as follows — Live animals, 57,521, meat and extracts, 95,841,881 kilos, wool, 65,577,523 kilos, sheepskins, 9,725,122 kilos, hides, 24,678,993 kilos, flax, 132,995 metric tons. The cattle industry furnished, in value, 82.85 per cent of total exports.

The imports (official values) and exports (real values) for 1930 and 1931 were distributed as follows (in gold pesos) —

Countries	Imports from		Exports to	
	1930	1931	1930	1931
Argentina	Gold pesos 8,976,707	Gold pesos 11,349,111	Gold pesos 12,778,742	Gold pesos 9,065,251
Brazil	7,123,879	8,352,587	3,167,783	706,760
France	3,410,805	2,958,397	12,202,287	9,150,491
Germany	8,904,323	9,664,328	12,031,566	11,592,761
Italy	3,781,121	3,227,922	7,821,643	5,799,679
Spain	3,686,558	3,571,378	4,099,994	491,501
Great Britain	15,742,819	16,904,322	34,070,916	27,913,839
United States	23,476,829	16,910,849	7,600,523	3,503,501

In 1931 the principal articles imported into the United Kingdom from Uruguay (according to Board of Trade Returns) were chilled beef, 1,589,591 $\frac{1}{2}$, frozen beef, 541,819 $\frac{1}{2}$, tinned beef, etc., 851,274 $\frac{1}{2}$, frozen mutton, 707,282 $\frac{1}{2}$, wool, 1,141,360 $\frac{1}{2}$. The principal articles exported to Uruguay were cotton piece goods, 304,365 $\frac{1}{2}$, and iron and steel manufactures, 178,836 $\frac{1}{2}$, coal, 229,896 $\frac{1}{2}$.

Total trade between Uruguay and the U K for 5 years (Board of Trade Returns) —

—	1928	1929	1930	1931	1932
Imports from Uruguay into U K	£ 7,025,960	£ 5,651,023	£ 7,387,283	£ 5,229,628	£ 3,042,330
Exports to Uruguay from U K	3,105,832	3,723,330	3,578,035	1,984,604	1,500,669
Re-exports to Uruguay from U K	54,608	52,266	55,771	32,937	26,250

Shipping and Communications.

In 1931, 11,140 vessels of 12,971,411 tons entered the ports of Uruguay.

The National roads of Uruguay have a total length of 2,760 miles, and there are about 5,903 miles of departmental roads, of which about 323 miles are macadamised. River transport is also very extensive.

The four principal railway systems are the Central (Combined System, 980 miles), the Midland (320 miles), North Western (113 miles), Northern (73 miles), all British owned. The East Coast Railway (78 miles) and 3 minor lines are controlled by the State. The total railway system open

for traffic is about 1,729 miles of standard gauge, of which 205 miles are State lines

The telegraph lines in operation have a total length of 7,508 miles, in 1931, 249 offices through which 1,160,121 telegrams passed. Two telephone companies of Montevideo had 36,570 miles of wire, and in the Republic, 25 companies in 1931 had 55,698 miles of wire. Number of subscribers, 27,474 on December 31, 1931. Wireless telephone communications with Spain and Argentine were established in 1929, followed by connections with United States, France and Great Britain in 1930. Four cable companies connect Montevideo with the United States and Europe.

There are 995 post offices. The movement of mail in 1931 (internal) comprised 125,841,071 letters, packets, &c., and external, 9,711,955. Air mail and passenger service connects Montevideo with Buenos Aires, Venezuela and the United States.

Banking and Credit

The Bank of the Republic, whose president and directors are appointed by the Government, had a paid-up capital on June 30, 1932, of 27,689,515 gold pesos. This bank has the exclusive right to issue notes, but the privilege is unprofitable owing to the heavy gold reserves required. On October 31, 1932, notes to the value of 83,915,560 pesos, including 72,974,530 of large denominations (convertible into gold whenever the gold standard is resumed) and 10,941,030 pesos (convertible to silver) were in circulation, and its stock of gold amounted to 46,722,796 pesos. This was well in excess of the statutory cover for the note issue, which was 37,000,000 pesos.

In 1912 the Government created a National Insurance Bank (*Banco de Seguros del Estado*) with a monopoly of new insurance business of all kinds. No new insurance companies may now be established. In 1930 the premiums collected amounted to 6,776,585 pesos. This bank's capital and reserves on June 30, 1931, amounted to 18,605,969 pesos. The Post Office Savings Bank reported December 31, 1930, deposits of 7,949,192 gold pesos.

Of the 21 banks in Uruguay two are British: Bank of London and South America, and Royal Bank of Canada. All the banks reported June 30, 1931, paid-up capital and reserves of 90,888,149 pesos, deposits of 189,147,499 pesos and loans of 245,721,530 pesos.

Money, Weights, and Measures.

Save for a small issue of gold coins, weighing 8 grammes, 485 fine, issued in 1930 in commemoration of the centenary of the Uruguayan constitution, there is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, weighing 1.697 grammes, 917 fine. It is equal to 100 *centesimos*. The actual circulating medium consists of paper notes issued by the Bank of the Republic in denominations of 500, 100, 50, 10, 5, and 1 pesos. Silver coins of 50 and 20 *centesimos*, and nickel coins of 5, 2, and 1 *centesimos* are also in circulation.

At par, 1 gold peso = 1.03 dollars U.S. = 51d. sterling, £1 = 4.7 gold pesos. The exchange value of the peso in London in 1932 ranged between 32d. and 28d., in New York, between 47.5 cents and 45.0 cents.

The metric system of weights and measures was adopted in 1862.

Diplomatic and Consular Representatives

1. OF URUGUAY IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary.—Señor Pedro Cosío
First Secretary.—Roberto E. MacEachen.

Second Secretary —Gustavo Alberto Ray Alvarez
Consul-General —A R O'Shanahan.

2 OF GREAT BRITAIN IN URUGUAY

Envoy Extraordinary and Minister Plenipotentiary — Robert Carminowe
 Michell Appointed October 26, 1930
Naval Attaché —Capt E de F Renouf, C V O , R N
Air Attaché —Wing Commander R B Maycock, O B E
Consul —A Murray Simpson
Vice-Consul at Paysandu and Salto.—G W. Teague

VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA)

Constitution and Government

THE Republic of Venezuela was formed in 1830 after amicable secession from the other members of the Republic of Colombia The vigorous efforts of General Juan Vicente Gomez have given Venezuela considerable freedom from factional strife He was President from 1909 to 1915 and again from 1922 to 1929, when he retired, but, as Commander in-Chief of the Army, retained a firm control A military uprising in April, 1931, led General Gómez to resume the reins, Congress demanded the resignation of President Pérez on June 14, 1931, and unanimously elected General Gómez President and Commander-in-Chief of the Army The Constitution in force is that of May 29, 1929, modified July 7, 1931

Congress consists of two chambers, the Senate of 40 members, and the Chamber of Deputies of 77 members Senators, who are elected for 3 years, 2 for each State, must be Venezuelans by birth and over 30 years of age Deputies must be native Venezuelans over 21 years of age They are elected for three years, there is one for every 35,000 inhabitants, and one more for an excess of 15,000 A State with fewer than 35,000 of population has one deputy The Territories, on reaching the population fixed by law, also elect deputies

The President is elected by Congress for 7 years, must be a Venezuelan

by birth and over 30 years of age. He exercises executive power in conjunction with the Cabinet Ministers through whom he acts.

President of the Republic—General Juan Vicente Gómez, elected June 19, 1931

The seat of Government is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions, and a President. The States are divided into districts and municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors.

Area and Population.

Venezuela has an area of 393,874 square miles, according to English geographers, though local estimates put it at 393,976 square miles. It has more than 1,000 rivers, with total navigable length of more than 6,000 miles. According to the census of January, 1926, the population was 3,026,878, not including 10,520 Venezuelans known to be residing abroad. Estimated population on December 31, 1930, was 3,216,000. The language of the country is Spanish.

The country is now divided into a Federal District, 20 States and two Territories, as follows—

State	Capital	Pop January, 1926	State	Capital	Pop January, 1926
Anzoátegui	Barcelona	129,791	Portuguesa	Guanare	58,721
Apure	San Fernando de Apure	58,499	Sucre	Cumana	216,476
Aragua	Maracay	105,839	Táchira	San Cristobal	172,900
Bolívar	Ciudad Bolívar	98,258	Trujillo	Trujillo	218,780
Carabobo	Valencia	147,204	Yaracuy	San Felipe	122,886
Cojedes	San Carlos	82,152	Zamora	Barinas	57,341
Falcón	Coro	178,642	Zulia	Maracaibo	222,613
Guárico	Calabozo	125,282	Ter Amazonas	San Fernando de Atabapo	60,276
Jara	Barquisimeto	271,369	" Delta-	Tucupita	26,582
Merida	Merida	150,128	Amacuro		
Miranda	Ucumare	189,572	Federal Dist	Caracas	195,460
Monagas	Maturín	68,765			
Nueva Esparta	La Asunción	69,392		Total	3,026,878

Some of the more important cities with their population according to the census of 1926, are

Caracas	185,253	San Cristobal	15,295	Maracay	11,108
Maracaibo	74,767	Ciudad Bolívar	16,762	La Guaira	8,323
Valencia	36,804	Cumana	18,737		
Barquisimeto	28,109	Coro	10,932		

Maracaibo now (1931) has a population of about 105,000

Religion and Education.

The Roman Catholic is the State religion, but there is toleration of all others. There are two archbishops, one at Caracas, who is Primate of Venezuela and one at Merida. There are seven suffragan bishops.

Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1931 Venezuela had 2,154 public primary schools with 3,816 teachers and, including a few private schools, with a total enrolment of 113,781 pupils, there are 18 public secondary schools with 215 teachers and 1,029 pupils. Superior instruction is divided into schools, viz Philosophy and Letters; Physical, Mathematical, and Natural Sciences, Medical Science, Political Science, and Ecclesiastical Science. These schools can be established separately or can unite to form Universities. There are at present in activity, the University of Los Andes at Merida, eight schools of Political Science and of Ecclesiastical Science, and in Caracas the Central University with 500 students in 1927-28, besides private schools of Political Science. The Government supports also various Institutes for special instruction.

Justice.

The supreme tribunal is the 'Federal and Cassation Court,' whose 7 members are elected by Congress for 7 years, one for each of seven groups of States into which the Republic is divided for this purpose. They select their own President, Vice-President, and Chancellor. The Federal Procurator-General is appointed for 3 years. There are lower Federal courts.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The States' judicial officers hold their posts for 3 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipios.

Finance.

The revenue and expenditure for five fiscal years ending June 30 were as follows (25 25 bolivars = £1, 1 bolivar = 19 cents, U S) —

—	1928-29	1929-30	1930-31	1931-32 ¹	1932-33 ¹
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Revenue	156,752,017	198,189,750	210,258,839	150,000,000	150,000,000
Expenditure	155,709,643	192,450,000	260,900,838	144,800,000	142,968,514

¹ Budget estimates

The following table shows (in bolivars) the principal items of the budget for the fiscal year ending June 30, 1933 —

Revenue	Bolivars	Expenditure	Bolivars
Import duties	59,250,000	Department of Interior	81,090,882
Cigarette revenue	12,000,000	Department of Foreign Affairs	4,699,067
Liquors	12,000,000	Department of Finance	16,968,025
Revenue stamps	10,800,000	Ministry of War and Marine	30,451,788
Minerals	40,200,000	Department of Internal Development	12,281,190
		Ministry of Public Works	30,000,000
		" " Education	9,223,045
Total (all items)	150,000,000	Total (all items)	142,968,517

On June 30, 1930, as a token of homage to Simon Bolívar, the Liberator, the external debt of 23,757,634 bolívars was completely paid off in gold. The internal debt stood on June 30, 1932, at 26,487,741 bolívars.

Under the Constitution 12½ per cent of the Federal Revenue is assigned to the States and Territories from the appropriation of the Ministry of the Interior, 1929-30, 24,521,515 bolívars.

Defence.

In 1920 a law was promulgated according to which all Venezuelans have to serve two years with the active forces of the army, and to remain in the reserve until the age of 45. The active army consists of infantry, 20 battalions, each of 400 men, artillery, 8 batteries, each of 200 men, and 1 naval battalion. The naval force contains one battalion distributed among the vessels of the navy, which consists of 3 gunboats and a training ship acquired in 1912.

Production and Industry

The surface of Venezuela is divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar cane, maize, cotton, beans, &c., the second affords runs for cattle, and in the third, which covers nearly half the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, copaiba, vanilla, growing wild, are worked by the inhabitants. Forest resources have been barely tapped. 600 species of wood have been identified. The coffee plantations number about 30,000, covering 548,400 acres with 135,000,000 bushes. Output, 1929-30, 650,000 bags, 1930-31, 1,000,000 bags. Exports of coffee, chiefly to Europe, 1930, were 135,105,200 pounds, of cocoa, 35,484,400 pounds. There are about 5,000 cocoa plantations and 600 sugar plantations. The annual production of sugar may be estimated at 60,000 tons (of which 6,000 tons are exported), and of cotton at 7,500,000 kilos, all locally consumed. Silkworm cultivation has begun.

One fifth of the population is engaged in agriculture. The live-stock in Venezuela is estimated as follows—2,077,684 oxen, 113,439 sheep, 2,154,716 goats, 167,708 horses, 54,565 mules, 200,439 asses, 512,086 pigs. Shipments of hides amount to about 3,000 metric tons.

Venezuela is rich in metals and other minerals and is to-day the second petroleum producing country in the world, the production in 1932 amounted to 115,319,859 barrels (1931, 116,130,816 barrels). The only difficulty lies in transport, oil tankers able to cross the sand bar into Lake Maracaibo have to be specially built. Asphalt from Lake Bermúdez (output, 1931, 28,985 tons) is exported to the United States. There are important gold mines in the region to the south east of Ciudad Bolívar. Output, 1931, amounted to 42,309 ounces. Copper ore is also produced (output, 1930, 3,294 metric tons). An American company is exploiting the magnesite deposits on Margarita Island. Coal is worked at Coro, in Falcon State, and at Naricual. Salt mines in various States are now worked by the Government. Round the island of Margarita and neighbouring islets off the north coast of Venezuela, pearl fishing is carried on by the government. Margarita pearls are distinguished by their delicate rose tints.

Venezuela has few industries, most manufactured materials required being imported. There are cotton mills at Valencia, Caracas, Maracay, and Cumana, producing textiles which compete with imported Manchester goods in the cheaper qualities. There is also a cement and a glass factory at Caracas. Electric power is available in most of the larger towns.

Commerce.

The value of the imports into and exports from Venezuela for 5 years was (1 bolivar = 19 cents, U S , 25 25 bolivars = £1) —

—	1926	1927	1928	1929	1930
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Imports	413,683,683	363,421,052	415,612,000	457,424,932	363,858,456
Exports	396,652,631	443,621,052	609,554,000	735,214,163	762,494,232

Petroleum (crude) furnishes about 74 per cent of total exports, coffee, 17 per cent

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Venezuela to U K	315,583	462,332	798,312	641,857	380,963
Exports to Venezuela from U K	2,168,221	2,509,795	1,648,930	942,801	968,560
Re exports to Venezuela from U K	35,047	57,470	24,831	14,556	11,802

Shipping and Communications

Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. La Guaira is the chief port, but facilities for ocean going vessels are inadequate.

There are about 4,064 miles of road fit for motor traffic. Motor vehicles, 1929, totalled 15,000, of which 98 per cent were of American manufacture.

In Venezuela there are 12 lines of railway (7 national and 5 foreign—the latter, by far the most important, including 4 British and 1 German) with a total length of (January 1st, 1931) 644 miles. The Great Railway of Venezuela, 113 miles in extent, is one of the longest lines in the Republic, running between Caracas and Valencia. The Bolivar Railway, 143 miles, the oldest line in operation in the country, runs from the port of Tucucas to Barquisimeto. In Caracas electric tramways are worked by a British Company.

There are about 11,160 miles of navigable water in Venezuela. The Compañia Venezolana de Navegacion has a virtual monopoly of the navigation of the river and its tributaries and the Lake of Maracaibo.

The telegraph system, though still inadequate, has a network of 8,000 miles with 239 telegraph offices. The principal towns have telephone systems, but not all are interconnected. There were 359 post offices in 1929, mail handled—internal 26,989,678 letters, 2,132,891 post cards, 14,669,418 printed packets, sent abroad, 7,267,237 letters, 1,337,712 post cards. Weekly air mail services, domestic and international, were established in 1930.

There are wireless stations at Aragua, Caracas, Maracay, Maiquetia, San Cristobal, Porlamar, La Guaira, and Barquisimeto, the one at Maracay reaches New York and Berlin.

Banking and Currency.

The official monetary unit is the *Bolmar* (equivalent to 0.290323 gramme fine gold). It is divided into 100 céntimos. The bolivar equals at

par 9½d or 19 3 cents (U S) at par £1 = 25 25 bolivars But prohibition of the export of gold in 1930 has depreciated the bolivar from 5 17 to the dollar (U S) to 7 (1932) The following are the coins in current circulation Gold, 100 (morocotas) and 20 bolivars silver, 5, 2 50, 2, 1, 0 50 (real) bolivars, and 0 25 (medio) bolivars, nickel, 0 125 (locha), 0 05 (centavo) bolivars

The bank notes in circulation are as follows (the figures in brackets showing their values at par) 1,000 bolivars (£39 11s 8d), 800 bolivars (£31 13s 4d), 500 bolivars (£19 15s 10d), 400 bolivars (£15 16s 8d), 100 bolivars (£3 19s 2d), 50 bolivars (£1 19s 7d), 20 bolivars (15s 10d), and 10 bolivars (7s 11d) The circulation of foreign banknotes is forbidden

The Bank of Venezuela (paid up capital 18,000,000 bolivars) had on June 30, 1932, surplus and undivided profits of 13,330,697 bolivars, it is the sole depository of government funds Power to control the circulation of the currency was granted in 1930 The Bank of Caracas has a paid-up capital of 4,500,000 bolivars and (June 30, 1929) surplus and undivided profits of 2,919,549 bolivars. There are four other national banks, including the Bank of Maracaibo with a capital of 1,250,000 bolivars, and the Commercial Bank of Maracaibo with a capital of 400,000 bolivars, as well as local branches of 4 British, American and Dutch banks Issuance of notes is restricted to the six national banks which have power to issue notes to bearer convertible on presentation up to twice their paid up capital They must publish monthly balance sheets, and keep 30 per cent of their reserves against note issues in gold Two small mortgage banks under quasi-governmental auspices were started in 1929

A decree of May 18, 1912, provided that the official system of weights and measures shall be the metric system

Diplomatic and Consular Representatives.

1 OF VENEZUELA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Dr Diógenes Escalante

Secretary — Dr Oscar Aguilar

Commercial Attaché — Alirio Parra Márquez

Attaché — Rafael José Cayama

Consul in London — A M Delgado

There are Consular representatives at Cardiff, Liverpool, Manchester, Glasgow, Newport, Birmingham and Southampton

2 OF GREAT BRITAIN IN VENEZUELA.

Envoy Extraordinary and Minister Plenipotentiary — E A Keeling.
(Appointed September 7, 1932)

Consul at Caracas — H E Beard

Consul at Maracaibo — A B Hutcheon

There are Vice Consuls at Caracas, Bolivar, La Guaira, Puerto Cabello, Irapa, and Carupano.

YUGOSLAVIA.

(KRALJEVINA YUGOSLAVIJA)

Reigning King.

Alexander I, born December 17, 1888, son of King Peter I and Princess Zorka, daughter of the late Nicholas I, King of Montenegro, married on June 8, 1922, to Princess Marie, born January 9, 1899, daughter of King Ferdinand I of Rumania: Prince Regent from June 24, 1914 to August 16, 1921, when his father died

Sons of the King—Prince Peter, born September 6, 1923 Prince Tomislav, born January 19, 1928, Prince Andrey, born June 28, 1929

Brother of the King—Prince George, born September 8, 1887, on March 27, 1909, he renounced his right of succession to the Throne

Sister of the King—Princess Hélène, born November 4, 1884, married, September 9, 1911 to Prince Ivan Constantinovitch (died July 18, 1918), son of the Grand Duke Constantine Constantinovitch of Russia

The founder of the dynasty was Kara-George (a.e Black George) Petrovitch, who, in 1804, raised the first Serbian revolt against Turkish rule He was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806 In 1842 Alexander was chosen reigning Prince by the Skupshtina or National Assembly, and the title was confirmed by the Porte, but the dignity was not hereditary In 1858 Alexander had to abdicate and was

banished, and in 1885 he died in exile. King Peter Karageorgevitch was the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty, was elected King by the Skupshtina June 15, and assumed royal rights and duties June 2, 1903.

The independence of Serbia from Turkey was established by Article 34 of the Treaty of Berlin, signed July 13, 1878, and was proclaimed by Prince Milan Obrenovitch in Belgrade. On March 6, 1882, the same Prince proclaimed himself King.

After the Revolution in Austria Hungary, Slovenia, Croatia, Dalmatia, and Bosnia declared their independence, and their union with Serbia, together with that of Montenegro, which had been voted on November 13, 1918, was proclaimed on December 1, 1918, when the official name of the State was announced as being the Triune kingdom of the Serbs, Croats and Slovenes.

By the Treaty of Rapallo the boundaries of the new State on the side of Italy were definitely determined, except as regards Fiume, an agreement on which was not reached till January 1924, when Fiume was awarded to Italy and Barosh to Yugoslavia. On December 6, 1923, Yugoslavia obtained from Greece a free zone in the harbour of Salonika, which by the end of 1928 covered an area of 351,000 square metres (193,000 square metres land and 158,000 square metres water). During 1931, the total traffic handled consisted of 443,209 tons of imports and 355,765 tons of exports.

By the law of October 3, 1929, the name of the State was changed to Kingdom of Yugoslavia. It consists of nine *banovinas* (counties) and Belgrade (see map in THE STATESMAN'S YEAR BOOK for 1931).

The King's civil list amounts to 24,000,000 dinars, plus 24,886,328 as difference for payment in foreign exchange.

Constitution and Government

Yugoslavia is a constitutional parliamentary and hereditary monarchy according to the provisions of the Constitution of September 3, 1931, when the non parliamentary régime introduced as an emergency in January 1929 was ended. The legislative power is vested in the King, the Senate, and the Chamber of Deputies. The royal succession is in the direct male line in the order of primogeniture. In default of male heirs the King may nominate his successor. If he does not the Senate and the Chamber meet together to elect the king from among the members of the ruling house. If the successor be under eighteen years of age the King will make nominations in his testament or in a special document. Failing this provision both Houses meet together for the purpose of nominating a regent during the minority.

The Senate consists of members elected for six years, half of whom is re-elected every three years. The King may nominate as many senators as the number elected. The minimum age of electors is fixed at twenty one years. The right of election to the Senate is reserved to the members of the Chamber of Deputies and to Provincial Chambers and burgomasters. The right of presentation for election is reserved to citizens of over 40 years of age. One senator is elected to every 300,000 inhabitants. Senators receive from the State an indemnity of 200 dinars per day while the session lasts.

The members of the Chamber of Deputies (*Skupshtina*) are elected directly by the electoral body which votes publicly and verbally. All the male inhabitants over 21 years of age have the right to vote. All the electors over 30 years of age have the right of presenting themselves for election.

The number of deputies is fixed at present at 305, corresponding to one member to every 50,000 inhabitants. Deputies are elected for a period of four years. Each deputy receives an indemnity of 200 dinars per day and a free pass over the State rail and waterways.

The Senate and the Chamber meet annually on October 20 and are obliged to sit till the new budget is passed. The King has the power of convoking, proroguing and dissolving the Parliament.

The electoral law provides that all candidates for election to Parliament must attach themselves to a national list with representatives in each single electoral division. At the elections held on November 8, 1931, only one list was in the field, and consequently there are no party groups in the present parliament. All the elected deputies decided however to organise themselves into a political party on the basis of the electoral manifesto of the existing Government.

The Cabinet, appointed on November 5, 1932, is composed as follows —

Prime Minister — Dr Milan Srshkitch

Minister of Foreign Affairs — Bogoljub Yertitch

Minister of the Interior — Zhivoyin Laritch

Minister of Transport and Communications — Lazar Radivoyevitch

Minister of Defence — General Dragomir Stoyanovitch

Minister of Finance — Dr Milorad Georgevitch

Minister of Commerce and Industry — Dr Iliya Shumenkovitch

Minister of Education — Dr Radenko Stankovitch

Minister of Justice — Bozhidar Maximovitch

Minister of Social Affairs and Health — Ivan Poutsel

Minister of Mines and Forests — Father Matitsa

Minister of Agriculture — Yuray Demetrovitch

Minister of Public Works — Dr Stjepan Srkulj

Minister of Physical Education — Lavoslav Yanzhek

Area and Population.

According to the census taken March 31, 1931, the area and population of Yugoslavia are shown as follows —

Banovinas	Capital	Area in sq km	Males	Females	Total	Per sq km
Dravska	Lyublyana	15,986	540,162	580,867	1,120,549	70.82
Savska	Zagreb	87,110	1,266,856	1,387,277	2,608,688	70.16
Vrbaska	Banyaluka	20,486	514,818	498,872	1,008,190	49.83
Primorska	Split	19,368	435,677	447,243	882,920	45.59
Drinaka	Sarajevo	29,577	850,959	848,044	1,694,008	57.27
Zetska	Cetynie	80,741	452,928	457,422	910,350	39.61
Dunavska	Novi Sad	80,158	1,182,318	1,177,907	2,310,220	76.60
Moravska	Nish	26,218	716,775	786,192	1,452,967	55.42
Vardarska	Skoplje	88,879	827,838	829,010	1,656,848	42.60
Belgrade	—	242	157,785	184,008	291,788	1,205.53
Total		248,665	6,894,561	7,086,857	13,980,918	56.02

The principal towns with their latest census figures (March 31, 1931) are as follows —

Town	Population	Town	Population
Belgrade (capital)	241,542	Zagreb	185,581
Soubotitza	100,068	Skoplye	64,807
Sarayevo	78,182	Ljubljana	59,768
Novi Sad	65,966	Nich	55,384
Bitolye	52,982	Ossek	40,889
Sombor	32,256	Senta	32,044
Maribor	33,149	Split	48,808
Vel Betchkerék	32,888	Vrchatz	29,423
Vel Kikinda	28,011	Zemoun	28,083
Kragouyevatz	27,249	Leskovatz	17,615

Religion.

All religions recognised by law enjoy the same rights. According to the preliminary results of the census of March 31, 1931, there were of the total population —Serbian Orthodox, 6,793,201 (48.75 per cent), Roman Catholics, 5,220,363 (37.46 per cent), Greek Catholics, 45,960, Protestants, 239,116 (1.72 per cent), Moslem, 1,558,279 (11.12 per cent), Jews, 67,722 (0.49 per cent), others, 9,849.

The Serbian Orthodox, or Serb Pravoslav, Church is ruled by a Patriarch and a Holy Synod. On September 12, 1920 the Patriarchate of the Serbs, originally established by King Stephen VII Dushan on April 9, 1346, and suppressed by Sultan Mustafa III on September 13, 1766, was reconstituted. The Serbian Orthodox Church is organised in 6 Metropolitan Sees, Petch, Belgrade, and Karlovce (held by the Patriarch), and Skoplye, Cetinye and Dalmatia-Bosnia (Shibenik), and 20 other dioceses. There are 2,866 Parishes and 166 Monasteries. According to the provisions of the Constitution of the Serbian Church, which was published in November 1931, the Church is to be governed in the future on an autonomous basis and have the right to organise its own life according to its needs. The Government will transfer to the Church the sums in the Budget which they have allotted to ecclesiastical affairs.

The Latin Church in Yugoslavia is governed in its relations with the State by the Concordats of 1855 in the territories which used to form part of Austria or Hungary, of 1866 for Montenegro, of 1881 for Bosnia and the Herzegovina, and of 1914 for Serbia. It is divided into two complete Provinces, of Sarayevo with 4 Suffragan Sees, and Zagreb with 4 Suffragan Sees and jurisdiction over the Byzantine Uniat Bishop of Krizhevce. In addition to these there are 2 Archbishoprics, Belgrade and Antivari, and 2 Bishoprics which depend immediately upon the Holy See in Rome, and 7 other Bishoprics under the metropolitan jurisdiction of Archbishops outside the kingdom. There is an Apostolic Administrator for those parts of the diocese of Zara which are in Yugoslavia. The Church is organised in 1,971 Parishes, and there are 349 Monasteries and Convents.

The Protestants are chiefly in the territories which used to form part of Hungary. Their principal communities are the Evangelical Church (Helvetian and Augsburg Confessions), and the Evangelical Brotherhood. The Mennonites, and the Baptist and Methodist Churches are less numerously represented.

The Moslems who were under two autonomous jurisdictions, that of the Grand Mufti of Belgrade, and that of the Reis-ul-Ulema of Sarayevo for Bosnia and the Herzegovina, are now joined together.

The Jews, who are divided between the Sephardim and the Ashkenazim, have a Grand Rabbi in Belgrade for Serbia, and Rabbinate for Croatia and

Slavonia, for Bosnia and the Herzegovina, for Dalmatia, and for the Vojvodina.

Education.

Elementary education is compulsory, and, in all the primary schools under the Ministry of Education, it is free. It lasts 8 years and the schools are divided into elementary and continuation. Children intending to continue their education in secondary or technical schools are exempted from attendance in continuation schools. In the year 1929-30 there were 7,712 elementary schools with 21,308 teachers and 913,974 pupils. There were 1,823 teachers and 21,100 pupils in the continuation schools. There were 531 primary professional and industrial schools with 3,859 teachers and 63,735 pupils, and 36 secondary professional schools with 494 teachers and 6,165 pupils, 28 agricultural schools with 106 teachers and 865 pupils, 3 higher art schools and 15 theological colleges. The latter had 1,478 students in 1929-30.

There are three Universities in the Kingdom: At Belgrade, founded in 1838, at Zagreb (Agram), and at Lyublyana, founded in 1920. In 1930 the total number of students attending the Universities was 14,693, with 684 professors. There is a Law School at Subotitsa with 15 professors and 369 students, a Philosophical Faculty at Skoplye with 24 professors and 176 students; and an Economic commercial Academy at Zagreb with 30 professors and 245 students.

According to the preliminary figures of the census of 1931, 10,776,115 of the inhabitants spoke Serbo-Croatian, 1,155,950 Slovenian, 214,261 other Slav languages, 184,514 Rumanian, 495,509 German, 465,800 Hungarian, 478,640 Albanian, and 3,360 Italian.

Justice and Crime.

Justice is administered by independent State courts. Courts of first instance are county and district courts. There are 8 courts of appeal as courts of second instance. The highest court is the court of cassation.

There are special courts for administrative legislature. The State Council is the supreme administrative court.

Finance

Estimates of receipts and expenditure for 6 years were as follows —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	1000 dinars	1000 dinars		1000 dinars	1000 dinars
1928-29	14,198,845	11,580,119	1931-32	13,892,021	10,210,308
1929-30	15,416,544	12,194,972	1932-33	11,823,200	11,824,200
1930-31	13,848,013	13,776,468	1933-34	10,438,126	10,438,326

The principal items of the budget estimates for 1932-33 are shown as follows in thousands of dinars —

Revenue.	Dinars (thousands)	Expenditure	Dinars (thousands)
Direct taxes	1,662,400	Department of Education	815,229
Indirect taxes	8,085,000	Finance	818,057
State undertakings	4,601,674	Army and Navy	2,132,294
Monopolies	1,811,044	Public works	197,741
Government enterprise sur- plus	752,955	Communications	125,731
Miscellaneous	168,120	Agriculture	51,937
		Pensions	873,159
		Public health	1,008,554

On July 1, 1932, the public external debt of Yugoslavia amounted to 32,763,242,636 dinars, internal to 6,020,315,000 dinars, making a total of 38,783,557,636 dinars

Defence.

ARMY.

The organisation of the army of the Kingdom of Yugoslavia is based on the law of 1923. Compulsory service is in force for men between the ages of 21 and 45, and, as a last defence, men can be taken as fit to carry arms from the ages of 18 to 21 years and from 45 to 50 years. Service in the active army is for 10 years, of which 18 months are with the colours, the remainder of the service being spent on leave subject to recall for training. From 31 to 38, service is with the 2nd base of the reserve, from 38 to 45 with the 3rd base.

The kingdom is divided into five army commands which comprises 2 cavalry divisions, 16 infantry and 16 artillery brigades.

In 1931-32, the peace strength of the active army was 6,741 officers and 184,448 men. The Gendarmerie consists of 19,848 officers and men. The military air force numbers 10,810 all ranks with 568 aeroplanes, organised in 6 air regiments of 18 flights.

The strength on mobilisation is approximately 1,000,000. Military education is provided by the Military Academy at Belgrade for the training of cadets for officers of all arms and by the superior course of the Academy for the training of staff officers and commanders.

The infantry is armed with quick firing rifles of French pattern and those taken as booty from Austria Hungary, the artillery with French quick firing guns (Schneider-Canet system) and those taken as booty from Austria Hungary, which are of various models.

NAVY.

The Royal Yugoslav Navy is under the command of a Vice-Admiral, a special Naval Department being maintained at the War Office for technical and administrative purposes. The organisation comprises the seagoing squadron, the river flotilla, the air service. The seagoing squadron, composed of the flotilla leader *Dubrovnik*, of 1,880 tons and mounting four 5.5 inch guns, built in Great Britain in 1931-32, 8 torpedo boats, 6 mine-layers, 6 mine sweepers, 4 submarines, an aircraft tender, and a number of smaller vessels, is used mainly for training purposes. A small ex-German Cruiser, *Dalmacija*, has been refitted and re armed to serve as a training ship. A new programme of naval construction, to include 2 flotilla leaders, 6 destroyers, 2 submarines, and 6 coastal motor boats, has been approved. The main base is at Kotor (Cattaro), where there are facilities for repairs and docking, and a naval engineering college. There are training establishments at Gruz (Gravosa) (for officers) and Shibenik (Sebenico) (for warrant and petty officers). The river flotilla includes 4 monitors, armed with 4.7 inch guns, besides patrol vessels, motor boats, mining launches, and other small craft. The air service consists of sea-plane detachments attached to the seagoing squadron and to the river flotilla. The total active service personnel of the navy comprises 487 officers and 5,500 men, with a further 700 in reserve.

Production and Industry.

Yugoslavia, with a total area of 24,866,500 hectares, has a cultivated area of 13,792,995 hectares (1931).

The area and production of the principal crops for 2 years were —

Crop	Acreage		Yield	
	1930	1931	1930	1931
			tons	tons
Wheat	5,244,133	5,287,047	2,186,150	2,688,627
Barley	1,006,759	1,064,155	404,393	301,891
Rye	609,902	603,050	198,756	193,396
Oats	1,008,955	985,379	284,987	264,782
Maize	5,923,838	5,808,668	3,464,574	3,208,393
Vines	453,310	491,767	—	—

On January, 1, 1932, there were in Yugoslavia 1,168,768 horses, 16,353 mules, 115,270 asses, 3,871,556 head of cattle, 8,425,634 sheep, 3,129,164 pigs, and 1,928,224 goats

The forest area of Yugoslavia is 19,068,637 acres (1931). The largest forest area is in Bosnia and the Herzegovina (9,388,944 acres). The forests consist largely of beech, oak, and fir, but are less profitable than, with proper management, they might be. The normal timber cut is about 530 million cubic feet per annum. Hemp is an important crop. The area under cultivation in 1930, was 119,319 acres (106,084 in 1929), and the yield 35,152 metric tons (27,725 metric tons in 1929).

Yugoslavia has considerable mineral resources, including coal (chiefly lignite), iron, copper ore, gold, lead, chrome, antimony and cement. The total output of coal and lignite was 4,986,629 metric tons in 1931, 5,271,866 metric tons in 1930, and 5,658,394 metric tons in 1929. The most important iron mines are at Vares and Lyubija in Bosnia and there are also considerable siderite and limonite iron ores between Prizhedor and Sanski Most. In 1930 the output of iron ore was 431,188 metric tons, 133,188 metric tons in 1931. Copper ore is exploited chiefly at Bor (Serbia), output in 1930, 493,465 metric tons, in 1931, 456,966 metric tons. The principal lead mines are at Mezhitza (Slovenia), production of lead ore in 1930, 181,029 metric tons, in 1931, 371,156 metric tons. Chrome mines are found in the southern part of Serbia and more especially in the neighbourhood of Skoplje (Uskub); output of chrome ore in 1930, 51,395 metric tons, in 1931, 57,872 metric tons. There are 2 antimony mines in western Serbia (Podrinje) which produced 926 metric tons in 1929, and 284 metric tons in 1931. Production of salt, 1931, 52,745 metric tons, 1930, 54,636 metric tons, 44,564 metric tons in 1929. Bauxite in 1929, 103,366 metric tons; in 1930, 94,700 metric tons, in 1931, 62,018 metric tons, manganese, 3,072 metric tons in 1929, in 1930, 1,539 metric tons, and in 1931, 2,454 metric tons, pyrites, 60,153 metric tons in 1929, in 1930, 50,345 metric tons, in 1931, 29,495 metric tons.

Of the industries, flour milling is one of the most important, especially in Batchka, there are 50 large flour mills in the country, brewing and distilling are extensively carried on, as are also cotton spinning and weaving, tanning, boot making, pottery, and iron-working. Carpet weaving is one of the oldest industries in Serbia. The product is manufactured principally at Pirot, in south-eastern Serbia, and the carpets are named after that place. The chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son, and is known only to the inhabitants of Pirot. Meat-packing is also becoming

important, and there is also an important cardboard and paper making industry

Commerce.

Commerce for 5 years —

	1928	1929	1930	1931	1932
	Dinars	Dinars	Dinars	Dinars	Dinars
Imports	7,885,326,036	7,594,750,829	6,960,118,191	4,800,281,032	2,859,669,220
Exports	6,444,699,695	7,921,707,922	6,780,054,206	4,800,965,997	3,055,576,088

Principal Imports and Exports for 2 years (in thousands of dinars):—

	Imports			Exports	
	1930	1931		1930	1931
Food products	219,380	396,254	Eggs	511,769	399,725
Silks and silk goods	205,658	163,144	Wheat	474,110	475,053
Iron and iron goods	776,523	583,157	Cattle	808,498	205,896
Machinery	465,974	296,381	Maize	547,696	206,156
Coal	198,061	136,875	Swine	284,571	285,013
Mineral oils	239,699	76,223	Fresh Meat	229,075	196,542
Cotton and cotton goods	1,861,519	878,487	Timber	1,156,908	664,768
Wool and woollen goods	564,419	377,501	Cement	152,240	189,193

In 1930 and 1931 the trade was distributed as follows —

Imports	Thousands of Dinars 1930	Thousands of Dinars 1931	Exports	Thousands of Dinars 1930	Thousands of Dinars 1931
Austria	1,170,584	729,894	Italy	1,919,355	1,198,688
Czechoslovakia	1,224,668	872,426	Austria	1,198,791	727,816
Italy	782,847	498,900	Czechoslovakia	556,115	743,800
Germany	1,221,408	925,428	Rumania	200,065	90,459
Great Britain	411,826	315,524	Germany	790,726	548,305
Hungary	405,475	251,850	Greece	400,959	256,802
France	269,107	210,565	Hungary	486,815	317,746
Rumania	222,739	78,423	Switzerland	178,475	198,405
United States	285,420	199,793	France	283,095	192,667
Greece	52,081	41,577	Great Britain	104,484	96,898

In 1931 the chief imports from Yugoslavia into the United Kingdom (according to Board of Trade Returns) were chemicals, 101,804*l*, oak wood, 114,032*l*., sawn soft wood, 23,452*l*. The chief exports from the United Kingdom to Yugoslavia were cotton piece goods, 150,421*l*., cotton yarns 147,372*l*.

Total trade between Yugoslavia and the United Kingdom for five years (Board of Trade Returns) —

	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Yugoslavia into U K	612,988	615,487	707,715	564,020	455,825
Exports to Yugoslavia from U K	1,209,005	1,524,482	1,158,557	940,185	1,219,904
Re exports to Yugoslavia from U K	53,584	49,941	80,481	82,749	18,035

Shipping and Communications.

Yugoslavia in 1931 possessed 182 steamers of 333,582 (gross) tons, besides 113 motor ships of 3,097 (net) tons, 4,757 sailing vessels of 13,923 (net) tons and 5,872 fishing vessels of 10,676 (net) tons

In 1931, 101,495 vessels of 16,729,618 net tons entered the ports of the kingdom, of these, 94,720 vessels of 13,430,983 tons were Yugoslav

Yugoslavia has (1931) 5,728 miles of railway, of which 4,263 miles are of normal gauge, and 1,465 miles of narrow gauge Of the whole length of railway 3,624 miles are under the State's administration

The first Yugoslav air-line for passengers between Belgrade and Zagreb was opened in February, 1928 There is now a service between Belgrade and Skoplje. Regular international services connect Belgrade with Paris, Sofia, Bucharest, and Constantinople

Of highways there are (1931) 24,695 miles A five-year programme of road construction was formulated in 1931 It is intended to build a further 450 miles of roads at a cost of 600,000,000 dinars Total length of waterways, principally the Danube, the Save, the Drave, the Tisa, the Kupa, the Tamish and 3 canals is 1,314 miles On these waterways there were in 1930, 838 steamships and motorships engaged in river navigation, of which 66 per cent are State owned, the remainder belonging to private companies Passenger traffic amounted to 3,796,475 and freights to 2,648,793 tons

There were (1929) 13,293 miles of telegraph line and 2,704 miles of telephone line

In 1930 there were 4,012 post-offices, 1,667 telegraph offices, 1,110 central telephone stations, 4 central automatic telephone stations with a total number of telephone subscribers of 38,274 There were also 1,218 public telephone call-offices

Banking and Credit.

The principal bank is the National Bank of Yugoslavia, in Belgrade, with a capital of dinars 180,000,000 paid up To cover the issue of new bank notes the State has pledged with the Bank its domains estimated at 2,000,000,000 dinars Notes in circulation on January 31, 1933, 4,587,634,000 dinars, note cover in gold and foreign exchange, 1,765,814,000 dinars, foreign credits, 175,421,000 dinars The Export Bank, with agencies abroad, assists in the exportation of Yugoslav produce The Drzavna Hipotekarna Banka or State Mortgage Bank, the only large State institution of the kind in Yugoslavia, makes advances to a large amount for agricultural operations The Privileged Agrarian Bank was founded in 1929 with a capital of 700 million dinars for the benefit of farmers Savings deposits at the banks totalled 12,170,000,000 dinars at the end of 1931, as compared with 13,880,000,000 dinars at the end of 1930, and 11,790,000,000 dinars at the end of 1929 Postal savings accounts numbered 177,252 with 334,141,000 dinars balance at the end of 1931, as against 127,196 with 209,613,000 dinars balance at the end of 1930, and 59,362 with 106,625,000 dinars balance at the end of 1929

Money, Weights and Measures.

Yugoslavia has the decimal system for its weights and measures On May 8, 1931, a stabilisation loan was concluded in Paris to the amount of 1,025,000,000 francs for the purposes of the legal stabilisation of the dinar On May 12 a law for the stabilisation of the dinar was promulgated to take effect on June 28. The dinar was stabilised at a value corresponding to 26.5 milligrams of pure gold, i.e., 11 dinars equals one gold dinar, or 100 dinars equal 9.13 Swiss francs (approximately 276 to the pound sterling) The

National Bank as the bank of issue is bound by law to maintain a cover of gold or foreign currencies of equivalent value, amounting to not less than 35 per cent, and at least 25 per cent only in gold, of the total amount of the Bank's outstanding obligations. In circulation are bank-notes of 5, 10, 100, and 1000 dinars, 100 paras = 1 dinar, metallic coins of 0.25, and 0.50 dinar, 1 dinar, and 2 dinars, and silver coins of 10 and 20 dinars with a 50 per cent silver content and weighing 7 and 14 grammes respectively. According to a law published on August 13, 1932, there is to be an issue of new silver coins of 50 dinars with 75 per cent silver content and weighing 22 grammes, the value of the issue of all silver coins is to be 350,000,000 dinars. In the course of 1932 all pre-war nickel coins—5, 10, and 20 paras are to be withdrawn.

The metric weights and measures have been in practical use since the commencement of 1883. The *wagon* of 10 metric tons is frequently used as a unit of measure for coal, roots and corn.

Diplomatic and Consular Representatives

1 OF YUGOSLAVIA IN GREAT BRITAIN

Envoy and Minister — Georges Diouritch

Counsellor — Karovitch Pavle

Secretary — Dr. Dragoslav Protitch

Military, Naval and Air Attaché (resident in Paris) — Brigadier-General Mihailo Nenadovitch

Consul General in London — Y. V. Yovanovitch

There are Consular representatives in Manchester, Bristol, Bradford, and Glasgow.

2 OF GREAT BRITAIN IN YUGOSLAVIA

Envoy and Minister — Sir Nevile Meyrick Henderson, K C M G, appointed November 21, 1929.

First Secretaries — D. J. Cowan, O B E, M C, and W. H. Montagu-Pollock.

Military Attaché — Lt.-Col. T. D. Daly, M C.

Naval Attaché — Capt. R. B. Ramsay, M V O, R N.

Commercial Secretary — H. N. Sturrock.

There are consular officers at Belgrade, Zagreb, Sarajevo, Dubrovnik (Ragusa), Split, Vis (Lissa), and Sushak.

GREAT BRITAIN AND THE LAW OF NATIONS A Selection of Documents Illustrating the Views of the Government in the United Kingdom upon Matters of International Law Volume One

Edited by HERBERT ARTHUR SMITH, M A , Professor of International Law in the University of London

16s

BRITISH PUBLIC EXPENDITURE, 1921-31

By JOSEPH SYKES, M A , Head of the Department of Economics, University College, Exeter

15s

The many changes which have occurred in the British system of taxation in the post war period have received a fair measure of attention from domestic economists. Until recently, however, not so much attention has been given to changes in expenditure. Questions of expenditure have come to assume large importance and this volume records the more important changes that occurred during the decade 1921-31 (March) and to trace their more obvious economic and social consequences.

UNEMPLOYMENT IN GERMANY SINCE THE WAR

By K I WIGGS, Ph D , with an Introduction by Professor HENRY CLAY

10s 6d

This book deals with the causes of unemployment in Germany, distinguishing between those which were operative before the war and those peculiar to the post war years. As far as possible a distinction is also made between specifically German and general world causes. At a time of political disturbance, when the average person is overwhelmed by the magnitude of the problem, this dispassionate analysis should prove particularly valuable.

STATE SOCIALISM IN VICTORIA

By Hon F W EGGLESTON, formerly Attorney-General, State of Victoria

15s

CONTENTS Introduction—Origin and development of State Socialism in Victoria—The Statutory Corporation in Victoria—State Development—Victorian Railways The Tragi-Comedy of State Interference—Four Central Undertakings Country Roads Boards, State Electricity Commission, State Savings Banks, Forests Commission—Four Metropolitan Undertakings Melbourne Harbour Trust, Melbourne and Metropolitan Board of Works, Metropolitan Fire Brigades Board, Melbourne and Metropolitan Tramways Board—Finance and Economics of State Socialism—Summary and Appraisal—The Problem of Progress
