PREFACE

SEVENTY years have passed since the appearance of the first issue of the STATESMAN'S YEAR-BOOK. How different the world looks in 1933 when contrasted with the world of 1864. The population of England and Wales at the earlier date was 23 millions, whereas to-day it is 39 millions. The imports of the United Kingdom in 1862 amounted to 226 millions sterling, as against 703 millions in 1932, and the exports in 1862 totalled 167 millions as compared with 416 millions last year. The face of Europe also has changed considerably. In 1864 there were in that continent 18 Monarchies and 1 Republic, to-day there are in the same area 11 Republics and only 8 Monarchies.

Throughout these three score years and ten the YEAR-BOOK has been, in the words of its first Editor, "a book of reference giving an account, so to speak a portrait, of countries and states." That has been its aim in this, the seventieth issue. It has striven to furnish "a portrait" of all the states on the face of the globe. The latest available information has been included either in the text itself, or in the "Additions and Corrections." In obtaining the most up-to-date facts and figures the Editor has had the advantage of the co-operation of many friends all over the world. To one and all he desires to express his warmest thanks.

INTRODUCTORY TABLES

I.—THE BRITISH EMPIRE, 1931-32.

N B.—The following table gives the latest figures available, but they do not all relate to the same period. The populations given are according to the 1931 census, where available, and in other cases estimates have been given.

IX.—THE LEAGUE OF NATIONS.

Secretary-General { Sir James Eric Drummond, K C M G, C B (to July 1933)
 { M Joseph Avenol (from July 1933) Elected Dec 9, 1932

The League of Nations is an association of States which have pledged themselves, through signing the Covenant (i.e., the constitution of the League) [For the text of the Covenant, see THE STATESMAN'S YEAR BOOK for 1921, page xxviii], not to go to war before submitting their disputes with each other or States not members of the League to arbitration or enquiry and a delay of from three to nine months. Furthermore, any State violating this pledge is automatically in a state of outlawry with the other States, which are bound to sever all economic and political relations with the defaulting member. The States Members of the League have pledged themselves to co-operate over a wide range of economic, social, humanitarian and labour questions.

The League of Nations formally came into existence on January 10, 1920, through the coming into force at that date of the Treaty of Versailles. The two official languages of the League are English and French. The seat of the League is Geneva, Switzerland.

¹ Made declarations putting the protection of their national minorities under League auspices as a condition of their entry into the League.

² The delegation of the Argentine Republic did not attend the second Assembly and withdrew from the first Assembly upon the latter's decision to refer the amendment to Article 1 of the Covenant proposed by the Argentine, for study by a committee that was to report to the second Assembly. The Argentine Government has not given notice of an intention to leave the League, and appears to regard itself as in a state of suspended or passive membership, to continue until some measure regarded as a satisfactory equivalent to the amendment proposed by the Argentine has been adopted by the League.

Brazil on June 12, 1926, Spain on September 8, 1926, Mexico on December 3, 1932, and Japan on March 27, 1933, announced their withdrawal from the League, according to Art. 1, par. 3, of the Covenant, the notice of withdrawal only comes into force two years after it has been given. On March 22, 1928 Spain resolved to continue a member of the League. Brazil's withdrawal became effective on June 12, 1928.

The following 8 States are not members of the League:—United States, Brazil (see above), the Union of Soviet Socialist Republics, Egypt, Ecuador, Afghanistan, Costa Rica, and Saudi Arabia. Costa Rica became a member of the League on December 16,

1920, but on December 24, 1924, she gave notice of her intention to withdraw, on the ground of the expense involved. The notice became effective on December 24 1926. She has since announced to the League her intention to bring the question of her return before the Constitutional Congress. Egypt is to apply for admission on the ratification of the treaty settling the 'reserved issues' between herself and Great Britain.

II THE ORGANS OF THE LEAGUE

The primary organs of the League are —

- 1 The Council
- 2 The Assembly
- 3 The Secretariat
- 4 The International Labour Organisation
- 5 The Permanent Court of International Justice (at the Hague)

1 THE COUNCIL

The Council was originally composed of four permanent Members (the British Empire, France, Italy, and Japan) and four non permanent Members to be elected every year by a majority of the Assembly. The first non permanent Members, appointed by the Peace Conference and named in the Covenant before the first Assembly met, were Belgium, Brazil, Greece, and Spain. With the approval of the majority of the Assembly, the Council may appoint new permanent and non permanent Members. At the Assembly of September 1926, Germany was admitted to the League and given a permanent seat on the Council. At the same time the number of non permanent seats, already increased to six in 1922, was further increased to nine, the period of office to be three years. In order to institute the new system of rotation three were elected for one year, three for two years, and three for three years, so that at all subsequent Assemblies three members retire instead of nine at once. In 1928 (Sept.) China, Colombia, and Holland were replaced by Spain, Persia, and Venezuela. Spain was specially accorded the privilege of re eligibility on the expiration of her three years period of office. Poland was accorded the same privilege on her election for three years in 1926, and was re elected in 1929. Belgium and China both failed to get the necessary majority required for re eligibility. Any Member of the League not represented on the Council shall be invited to send a representative to sit on it at any meetings at which matters especially affecting it are being discussed. A similar invitation may be extended to States not Members of the League.

The Council meets on the 3rd Monday in January, the 2nd Monday in May, and just before and after the Assembly in September.

At its session of January, 1932, the Council was composed as follows

PERMANENT MEMBERS

United Kingdom and Northern Ireland—The Right Hon. Sir John Simon, Secretary of State for Foreign Affairs
 France—M. Paul Boncour, Minister of Foreign Affairs
 Germany—Herr von Keller
 Italy—Baron Aloisi
 Japan—M. Nagaoaka

NON PERMANENT MEMBERS

China—M. Yen
 Guatemala—M. Matos
 Irish Free State—Mr. Sean Lester
 Mexico—M. A. Pani
 Norway—M. Braadland
 Panama—M. Garay
 Poland—M. J. Beck, Minister of Foreign Affairs
 Spain—M. de Zulueta
 Czechoslovakia—M. E. Benes, Minister of Foreign Affairs

2 THE ASSEMBLY

Every State Member of the League is entitled to be represented by a delegation to the Assembly composed of not more than three delegates and three substitute delegates, but it has only one vote. It meets at the seat of the League (Geneva) on the first Monday in September. It may meet at other places than Geneva, but hitherto it has never done so, extraordinary sessions may be called to deal with urgent matters.

The President is elected at the first meeting of the session, and holds office for the duration of the session.

The Assembly divides itself into the following six principal committees, on each of which every State Member of the League has the right to be represented by one delegate

- I Juridical
- II Technical Organisations
- III Disarmament
- IV Budget and Staff
- V Social Questions
- VI Political Questions and admission of new Members

The decisions of the Assembly must be voted unanimously, except where the Covenant or the Peace Treaties provide otherwise. As a general principle decisions on questions of procedure are voted by majority or in some cases by a two thirds majority

8. THE SECRETARIAT

The Secretariat is a permanent organ composed of the Secretary General and a number of officials selected from among citizens of all Member States and from the United States of America. The Secretary General, appointed by the Peace Conference (see Annex to the Covenant), is the Hon Sir James Eric Drummond, K C M G, C B, British Foreign Office Official, hereafter the Secretary General will be appointed by the Council with the approval of the majority of the Assembly. The other officials are appointed by the Secretary General with the approval of the Council

The Under Secretaries General are (as from July 1, 1933) —

- M P Azcarate (Spanish), 1st Deputy Secretary General,
Dr A Piotti (Italian), 2nd Deputy Secretary General,
Dr Ernst Trendelenburg (German),
Mr F Walter (British)

4 THE INTERNATIONAL LABOUR ORGANISATION [See below]

5 PERMANENT COURT OF INTERNATIONAL JUSTICE

The revised Statutes adopted at the 10th Assembly provide for 15 judges for the Court, and stipulate that the Court shall remain permanently in Session except for such holidays as it may decide. The judges are elected jointly by the Council and the Assembly of the League for a term of 9 years

V MANDATES

The African and Pacific possessions of Germany and certain territories of the Ottoman Empire were ceded by these countries at the end of the war to the Allied and Associated Powers. The latter had inserted an article (Art. 22) in the Covenant of the League according to which the inhabitants of these territories should be put under the tutelage of "advanced nations who by reason of their resources, their experience, or their geographical position, can best undertake this responsibility." These nations should act as mandatories of the League, and exercise their powers on behalf of the League. They should act on the principle that the well being and development of the peoples under their tutelage formed a "sacred trust of civilisation," and should render the Council an annual report on the territory committed to their charge.

Article 22 furthermore divides the mandated territories into three classes, according to the degree of civilisation of their inhabitants, economic and geographic circumstances, and so forth. Class A is composed of the communities detached from the Ottoman Empire, declared to have "reached a stage of development where their existence as independent nations can be provisionally recognised subject to the rendering of administrative advice and assistance by a Mandatory until such time as they are able to stand alone."

Class B, consisting of the former German colonies in Central and East Africa, should be administered by the Mandatory under conditions which will "guarantee freedom of conscience or religion, subject only to the maintenance of public order and morals, the prohibition of abuses such as the slave trade, the arms traffic and the liquor traffic, and the prevention of the establishment of fortifications or military or naval bases and of military training of the natives for other than police purposes and the defence of territory, and will also secure equal opportunities for the trade and commerce of other members of the League."

Class C (German South West Africa and Pacific Islands possessions) is composed of territories which, owing to sparseness of population, small size, remoteness from centres of civilisation, or geographical contiguity to the territory of the Mandatory Power, "can best be administered under the laws of the Mandatory as integral portions of its territory, subject to the safeguards above mentioned in the interests of the indigenous population."

The Supreme Council, as the organ of the Allied and Associated Powers, allocated the mandates for the territories ceded by Germany and Turkey, subject to the approval of the Council of the League. The mandates and mandatory powers, as determined by the Supreme Council, are —

A Mandates — Palestine, attributed to Great Britain. Syria (including Lebanon), attributed to France.

B Mandates — Togoland and Cameroon, attributed in part to Great Britain and in part to France.

The North Western portion of former German East Africa, attributed to Belgium.

The remainder of former German East Africa (now Tanganyika Colony), attributed to Great Britain.

C Mandates — Former German South Pacific possessions (except Nauru and Samoa), attributed to Australia.

Samoa, attributed to New Zealand, and Nauru, attributed to the British Empire and administered by Australia, New Zealand, and Great Britain.

Former German North Pacific possessions (Yap, etc.), attributed to Japan.

Former German South-West Africa, attributed to the Union of South Africa.

VI. INTERNATIONAL LABOUR ORGANISATION

Director of the International Labour Office — Mr. Harold Butler (Great Britain)

The International Labour Organisation was constituted by Part XIII of the Treaty of Versailles, as an autonomous organisation of the League of Nations. Its object is the establishment of social justice since "the failure of any nation to adopt humane conditions of labour is an obstacle in the way of other nations which desire to improve the conditions in their own countries." Membership of the League of Nations carries with it membership of the Organisation. The Organisation consists of the International Labour Conference, which meets at least once a year, and the International Labour Office controlled by a Governing Body. The Conference and the Governing Body are composed of representatives of Government, employers and workers. The decisions of the Conference take

the form of Draft Conventions or Recommendations, which each State is required by the Treaty to submit to the authorities within whose competence the matter lies or the enactment of legislation or other action. If a Draft Convention obtains the assent of the competent authorities, the Member must communicate the formal ratification of it to the Secretary General of the League of Nations. If the competent authority does not consent, no further obligation rests on the Member. The Members report annually to the International Labour Office on the measures which they have taken to give effect to the Conventions which they have ratified. Machinery also exists for the case of complaints made against a Member that fails to give proper application to a Convention.

The functions of the International Labour Office are the preparation of the agenda of the Conference, the collection and distribution of information on all subjects relating to the international adjustment of industrial life and labour, the publication in various languages and periodicals and reports dealing with problems of industry and employment and any other duties assigned to it by the Conference.

Constitution and Government.

I IMPERIAL AND CENTRAL.

The supreme legislative power of the British Empire is vested in Parliament. Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least twenty days previous to its assembling.

Since 1914 the sittings of Parliament have been interrupted only by comparatively short intervals. Every session must end with a prorogation, and all Bills which have not been passed during the session then lapse. A dissolution may occur by the will of the sovereign, or, as is most usual, during the recess, by proclamation, or finally by lapse of time, the statutory limit of the duration of any Parliament being five years.

Under the Parliament Act, 1911 (1 and 2 Geo V, ch 13), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment, may become law without their concurrence on the royal assent being signified. Public Bills, other than Money Bills or a Bill extending the maximum duration of Parliament, if passed by the House of Commons in three successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the royal assent being signified, provided that two years have elapsed between the second reading in the first session of the House of Commons and the third reading in the third session. All Bills coming under this Act must reach the House of Lords at least one month before the end of the session. Finally, the Parliament Act limited the maximum duration of Parliament to five years.

The present form of Parliament, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the fourteenth century.

The House of Lords consists of peers who hold their seats—(i) by hereditary right, (ii) by creation of the sovereign, (iii) by virtue of office—Law Lords, and English archbishops (2) and bishops (24), (iv) by election for life—Irish peers (28), (v) by election for duration of Parliament—Scottish peers (16). The full house would consist of about 740 members, but the voting strength is about 720.

The House of Commons consists of members representing County, Borough, and University constituencies. No one under 21 years of age can be a member of Parliament. Clergymen of the Church of England, ministers of the Church of Scotland, and Roman Catholic clergymen are disqualified from sitting as members, Government contractors, and sheriffs, and returning officers for the localities for which they act, are also among those disqualified. No English or Scottish peer can be elected to the House of Commons, but non-representative Irish peers are eligible. Under the Parliament (Qualification of Women) Act, 1918, women are also eligible, and the first woman member took her seat in December, 1919.

In August, 1911, by resolution of the House of Commons, provision was first made for the payment of a salary of 400*l*. per year to members, other than those already in receipt of salaries as officers of the House, as Ministers, or as officers of His Majesty's household. Payment began as from April 1, 1911. This provision does not extend to the House of Lords.

Under the Representation of the People (Equal Franchise) Act, 1928, the qualifications for the franchise are the same for men and women. Electors, for inclusion in the register, must be of full age (twenty-one years), and

have resided, or occupied business premises of an annual value of not less than ten pounds, in the same parliamentary borough or county, or one contiguous thereto, for the qualifying period of three months ending on December 1, 1928, and in Scotland, on December 15, 1928. There is also a University franchise, to be qualified for which a person must be twenty-one years of age, and must have taken a degree, or in the case of a woman, have fulfilled the conditions which would entitle a man to a degree.

Every registered elector is entitled to vote at an election, but no person may vote at a general election for more than two constituencies, for one of which there must be a residential qualification. The second vote must rest on a different qualification, and each vote must be recorded in a different constituency.

Disqualified for registration are (among others) peers, infants, aliens, bankrupts, lunatics and idiots. Receipt of poor relief or other alms does not count as a disqualification.

Two registers of electors must be prepared each year, one in the spring, and the other in the autumn, except in Ireland, where only one is required, and the authorised expenses are met by local and State funds in equal parts. University registers may be made up as the governing bodies decide, and a registration fee not exceeding 1¹/₂ may be charged.

In university constituencies returning two or more members the elections must be according to the principle of proportional representation, each elector having one transferable vote. At a general election all polls must be held on the same day, except in the case of Orkney and Shetland, and of university elections. Provision is made for absent electors to vote, in certain cases by proxy.

Under the same Act the seats in Great Britain were redistributed on the basis of one member of the House of Commons for every 70,000 of the population. By a separate Act, redistribution in Ireland was made on the basis of one for every 43,000 of the population. The total membership of the House of Commons was thereby raised from 670 (as established in 1885) to 707. In 1922 the number was reduced to 615 (including 13 from Northern Ireland), owing to the establishment of separate parliaments in Ireland.

The electorate in 1930, in England and Wales, numbered 25,730,507 (12,101,108 males, 13,629,399 females). Under the provisions of the Representation of the People Act, 1928, it is estimated that about 5,000,000 new voters were added to the register in 1929.

The following is a table of the duration of Parliaments called since the accession of King Edward VII (for heads of the Administrations see p. 8).

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, whose existence is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitu-

tionally recognised, and special precedence accorded to the holder, in 1905 No salary is attached to the office of Prime Minister, as such, and it is usually held in conjunction with some other high office of State, generally that of First Lord of the Treasury His colleagues in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown

The present Government (appointed Nov 5, 1931, reconstructed Nov 1931 and Oct 1932) consists of the following members

II. LOCAL GOVERNMENT

England and Wales—In each county the Crown is represented by H M Lieutenant There is also a sheriff, who represents the executive of the Crown, an under-sheriff, a clerk of the peace and a clerk of the County Council, coroners, who are appointed and paid by the County Councils, and other officers The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with some of the graver offences—are in the hands of the magistrates

For the purposes of local government England and Wales are divided primarily into sixty-two administrative counties, including the county of London, and eighty-three County Boroughs The counties are administered by the justices and by a popularly-elected Council, called a County Council, who co-opt a prescribed number of aldermen, either from their own body or from outside it Aldermen are elected for six years, half of them retiring every third year A councillor is elected for three years The jurisdiction of the County Councils covers the administration of higher and (outside certain Boroughs and Urban Districts) elementary education, maintenance of main roads and bridges, work in relation to agriculture (diseases of animals, destructive insects and pests, land drainage, fertilisers and feeding

stuffs, small holdings and allotments); provision of mental hospitals and other public health work (schemes for treatment of tuberculosis and venereal diseases, for maternity and child welfare, and for the welfare of the blind, accommodation and care of mental defectives, prevention of pollution of rivers, and supervision of milk and other food supplies) The control of the county police is vested in a standing joint committee composed of equal numbers of magistrates and of members of the County Council The Metropolitan police are, however, under the control of the Home Secretary

Secondly, the administrative counties, with the exception of the County of London, are subdivided into 'County Districts' which are either 'Urban Districts' or 'Rural Districts' Generally speaking, an urban district comprises a town or a small area more or less densely populated, and a rural district takes in several country parishes County District Councils administer the Public Health and Highway Acts, and exercise powers under the Housing Acts Urban Authorities may also take over the maintenance and repair of main roads from County Councils, provide burial grounds, allotments, baths and washhouses, libraries, open spaces, museums, isolation hospitals, &c, establish and manage trading services (gas, electricity, water, trams, &c). Councils of Boroughs which had over 10,000, and of Urban Districts which had over 20,000 people in 1901 are also usually the local authorities for elementary education. Rural District Councils may also make arrangements for an adequate water supply, and exercise any 'urban powers' conferred on them by the Minister of Health

Under the Local Government Act, 1929, the functions of the Poor Law authorities were transferred to county and county borough councils These functions include the organisation and management of indoor and outdoor relief, responsibility for collection of fundamental vital statistics and responsibility for the provision, maintenance and management of all public institutions for the cure of diseases Provision is also made under the Act to secure for every county district council the services of a medical officer of health Industrial and freight transport hereditaments were derated to the extent of three-fourths and agricultural lands are completely derated. The Act provides for the abolition of most of the assigned revenue grants, of the grants under the Agricultural Rates Acts, and of the percentage grants paid in respect of health services and certain roads In place of these a grant comprising the equivalent of the total loss to local authorities both of rates and of grants under the Act, together with a substantial amount of new money, are distributed as a 'block grant' fixed for five years at a time on a basis of local need and ascertained by means of a formula. To avoid the difficulties created by a sudden change in the revenues of local authorities the allocation of grant will not be entirely by the formula until 1947.

The main central authority in London is the County Council, created by the Local Government Act of 1888 It has considerable powers in regard to public health, housing, bridges and ferries, asylums, street improvements, parks, main drainage, fire brigade, sanitary control, education, and numerous other matters. It is also the tramway authority for the county. The City Corporation has powers respecting sanitation, police, bridges, justice, &c., in the City of London London comprises the ancient city with an area of one square mile, and an area of 118 square miles beyond the city, which is divided into 28 metropolitan boroughs, under the London Government Act, 1899, each with a mayor, aldermen, and councillors (women are eligible) The Councils have powers in regard to public health, highways, rating, housing, education, &c, but they are not municipal boroughs in the

statutory sense as in the rest of the Kingdom. The County Council has certain powers of control over them.

In all incorporated towns, local business is administered by a municipal Corporation. There are two kinds of municipal boroughs, County Boroughs and Non County Boroughs. A number of the latter are small boroughs of special and generally ancient jurisdiction. Most of the County Boroughs and a number of the Non County Boroughs have a separate Court of Quarter Sessions. The County Boroughs are outside the jurisdiction of the County Councils. A municipal Corporation consists of the mayor, aldermen, and burgesses, and acts through a Council elected by the burgesses—practically by the ratepayers. The councillors serve for three years (women are eligible), one-third retiring annually, the aldermen are elected by the Council, and the mayor, who serves for one year, also by the Council. A Town Council as an Urban Authority is invested with all the normal powers of an Urban District Council, and in addition certain powers, such as making byelaws or maintaining a separate police force, are conferred either upon all Town Councils or upon Councils of towns of certain sizes, or complying with other conditions, in virtue of their status as Councils of incorporated towns.

Scotland—A Local Government Act was passed for Scotland in 1889 and followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply, the Justices and Road Trustees were either wholly or in part transferred to County Councils, which took over their duties and responsibilities in 1890. By the Local Government (Scotland) Act, 1894, a Local Government Board for Scotland was constituted, consisting of the Secretary for Scotland as President, the Solicitor General for Scotland, the Under-Secretary for Scotland, and three other members nominated by the Crown. The latter Act provided that a Parish Council should be established in every parish to take the place of the Parochial Boards. Their principal function was the administration of the Poor Laws, and in addition they exercised powers similar to those of the Parish Councils in England. There were 869 civil parishes in 1921. The powers and duties of the Local Government Board were by the Scottish Board of Health Act, 1919, transferred to the Scottish Board of Health, constituted as in that Act provided. Municipal bodies exist in the towns of Scotland, as in those of England. Each burgh has a Town Council consisting of a Provost or Lord Provost, Bailies and Councillors. The Provost is the head of the Scottish municipality and holds office for three years. Bailies are selected by the Councillors from among their own number, they act as magistrates and sit as such in police courts. There are in Scotland three principal kinds of burghs, numbering altogether 201 (1921 census) (1) Royal Burghs, *i.e.* burghs created by a Charter of the Crown, (2) Parliamentary Burghs, which possess statutory constitutions almost identical with those of the Royal Burghs, (3) Police Burghs, constituted under a general Police Act. All burghs of whatever class have new Town Councils and their administration is regulated by the Burgh Police (Scotland) and Town Councils (Scotland) Acts or corresponding local Acts. The Local Government (Scotland) Bill, 1929, made many drastic changes in the local government machinery so as to bring it in line as far as possible with that set up for England and Wales. The new units of local government are the county councils and burghs with a population of over 20,000. Only the four great cities are Poor Law authorities and parish councils are abolished.

2 Emigration and Immigration

In the thirty-eight years 1815-1852, the total number of emigrants from the United Kingdom was 3,483,592. Up to 1852 the emigration returns made no distinction between British subjects and foreigners. From 1853 to 1931 inclusive, the number of passengers of British origin, *to places out of Europe*, was 15,876,000. Figures of the *passenger traffic* to and from non-European countries in recent years are given as follows —

Year	Outward			Inward			Balance outward
	British subjects	Allens	Total	British subjects	Allens	Total	Total

Religion.

1 England and Wales

The Established Church of England is Protestant, Episcopal. Civil disabilities on account of religion do not attach to any class of British subjects. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from March 31, 1920, and

Wales was formed into a separate Archbishopric. Property belonging to the Church in Wales, and a sum of 1,000,000*l* provided by Parliament, were assigned to a temporary body not exceeding three persons, called the Welsh Commissioners, for distribution to a body representing the Church (called the Representative Body), and to certain other authorities including the University of Wales.

The King is by law the supreme governor of the Church in England, possessing the right, regulated by statute, to nominate to the vacant archbishoprics and bishoprics. The King, and the First Lord of the Treasury in his name, also appoint to such deaneries, prebendaries, and canonries as are in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 3 archbishops (at the head of the three 'provinces' of Canterbury, York and Wales) and 46 bishops, and 29 suffragan bishops in England and Wales. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his province he exercises archiepiscopal jurisdiction. Under the bishops are 32 deans and 110 archdeacons. Under the Church of England Assembly (Powers) Act, 1919, there is a National Assembly, called 'the Church Assembly,' in England, consisting of a House of Bishops, a House of Clergy, and a House of Laymen, which has power to legislate regarding Church matters. The first two Houses consist of the Convocations of Canterbury and York, which in turn consist of the bishops (forming an Upper House), archdeacons, and deans, and a certain number of proctors, as the representatives of the inferior clergy (forming the Lower House). The House of Laymen is elected by the lay members of the Diocesan Conference. Parochial affairs are managed by a Parochial Church Meeting and Church Council. Every measure passed by the Church Assembly must be submitted to an Ecclesiastical Committee, consisting of fifteen members of the House of Lords nominated by the Lord Chancellor, and fifteen members of the House of Commons nominated by the Speaker. This Committee reports on each measure to Parliament, and the measure becomes law if each House of Parliament passes a resolution to that effect.

The number of civil parishes (districts for which a separate poor rate is or can be made) at the census of 1921 was 14,483. These, however, in most cases, do not coincide with ecclesiastical parishes, which have, from the civil point of view, lost their old importance. Of such parishes there were (1931) 13,174, inclusive of the Isle of Man and the Channel Islands, but excluding Wales. Each parish has its church, presided over by an incumbent or minister, who must be in priest's orders, and who is known as rector, vicar, or perpetual curate, according to his relation to the temporalities of his parish. Private persons possess the right of presentation to about 7,000 benefices, the patronage of the others belongs mainly to the King, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In 1931 there were about 12,773 beneficed clergy, and 4,083 assistant curacies. Voluntary offerings raised and administered parochially amounted in 1931 to 6,529,160*l*, exclusive of very large sums contributed to central and diocesan societies and institutions and administered by such organisations.

Of 86,196 churches and chapels registered for the solemnisation of marriage at the end of 1929, 16,377 belonged to the Established Church and the Church in Wales and 19,819 to other religious denominations. Of the marriages celebrated in 1929, 56·2 per cent were in the Established Church and the Church in Wales, 6·0 per cent in the Roman Catholic Church, 11·4 per cent were Nonconformist marriages, 0·03 per cent. were Quaker

marriages, 0·7 per cent Jewish, and 25·7 per cent. civil marriages in a Registrar's Office

The following is a summary of recent statistics of certain churches in England and Wales, Channel Islands, and Isle of Man —

The Unitarians have about 350 places of worship, the Catholic Apostolic Church over 80, the New Jerusalem Church about 75. The Salvation Army, a religious body with a semi-military organisation, carries on both spiritual and social work at home and abroad, and had (December, 1928) about 35,074 officers and *employees*, 15,163 corps and outposts, and 252,912 local officers, their places of worship in the United Kingdom have about 560,339 sittings. There are about 300,000 Jews in the United Kingdom with about 200 synagogues.

Roman Catholics in England and Wales are estimated at 2,235,237 in 1931. There were (1931) four archbishops (of whom one is a cardinal), fourteen bishops, and one bishop auxiliary, about 4,000 priests (not all officiating), and over 1,900 churches, chapels, and stations.

2 Scotland

The Church of Scotland (established in 1560 and confirmed in 1688) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session, consisting of the minister, and of several laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries. The supreme court is the General Assembly, which now consists of over 1,730 members, partly clerical and partly lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being represented by a Lord High Commissioner, appointed by the King on the nomination of the Government of the day), and sits for ten days. Any matters not decided during this period may be left to a Commission.

On October 2, 1929, the Church of Scotland and the United Free Church were reunited and the two bodies met in Edinburgh as one, known as the General Assembly of the Church of Scotland. The United Church had, in Scotland, on December 31, 1931, 2,720 congregations, 1,280,620 members, besides adherents, 3,758 Sunday schools, with 47,796 teachers and 366 115 scholars in attendance. The Church courts are the General Assembly, 14 synods, 66 presbyteries in Scotland, 3 in England and 3 on the Continent, in addition to presbyteries in India and elsewhere in the British Colonies or Dependencies, and 13 foreign mission presbyteries. Income in 1931 was 1,792,587*l*. The Church has Divinity Faculties in the four Scottish Universities of Edinburgh, Glasgow, Aberdeen and St. Andrews, and also Theological Colleges in the three first named cities, with 37 professors and lecturers. The United Church's foreign mission agents (including natives) exceed 9,000, and income 700,000*l*. There are in Scotland some small outstanding Presbyterian bodies and also Baptists, Congregationalists, Methodists, and Unitarians. The Episcopal Church in Scotland had in 1932, 7 bishoprics, 417 churches and missions, 327 clergy, and 60,797 communicants.

The Roman Catholic Church had in Scotland (1930) two archbishops, four bishops, 638 priests, about 450 churches, chapels, and stations, and about 600,000 adherents.

The proportion of marriages in Scotland according to the rites of the various Churches in 1930 was: Church of Scotland, 64.0 per cent., United Free (continuing), 0.6, Roman Catholic, 12.5, Episcopal, 2.7, others, 8.0, irregular, 12.2.

Education

University Education

In *England* the highest education is given at the ancient universities of Oxford and Cambridge, the former having 22 colleges and 3 private halls, and the latter 17 colleges and 1 hall, the university of Durham, with a college of medicine and of science at Newcastle, the university of London, with 2 Incorporated Colleges, 34 "Schools," and 28 Institutions giving instruction in 8 faculties, the Victoria University (Manchester), the Birmingham University, the Liverpool University, the Leeds University, the Sheffield University, the Bristol University, and the University of Reading, which started in 1860 as a college for art classes. There are also University Colleges at Exeter, 68 lecturers, &c., 558 students, 1932-33, Nottingham (founded 1881), 113 lecturers, and 1,018 students, 1932-33, Southampton (founded 1850), 68 lecturers, &c., 650 students, 1931-32, Leicester (opened in 1923), 31 lecturers, &c., 201 students, 1932-33. A University College was founded at Hull in 1928 with 40 lecturers and tutors, and 201 students in 1932-33. There are special Agricultural Colleges at Carlisle, Cirencester, Glasgow Newport (Shropshire), Kingston-on-Soar (Derby), Wye (Kent), Uckfield (Sussex), and Ripley (Surrey). The university of *Wales* has 4 colleges (Cardiff, 103 lecturers, 1,391 students, Aberystwyth, 122 lecturers, 844 students, Bangor, 97 lecturers, &c., 602 students, and Swansea, 54 lecturers, &c., 675 students). In *Scotland* there are 4 universities, viz., at St. Andrews, Glasgow, Aberdeen, Edinburgh. The Carnegie Trust, founded in 1901 with a capital of 2,000,000*l*, has an annual income of 100,000*l*, of which half is devoted to the equipment and expansion of the Scottish Universities and half to assisting students. The following table gives the approximate number of professors, lecturers, &c., and students of the Universities for 1931-1932. (The dates of foundation are given in brackets.)

Justice and Crime.

England and Wales

The Supreme Court of Judicature is the ultimate authority in most cases, civil and criminal, in England and Wales, and in others, where there is an appeal to the House of Lords, the penultimate It exercises its power through the High Court of Justice, the Courts of Appeal, and (in a sense) a variety of subordinate local courts The principal courts having criminal jurisdiction are the petty sessional courts, the general or quarter sessions, the courts of oyer and terminer and gaol delivery, more popularly known as 'assizes,' and the Central Criminal Court, which is the Assize Court for London in the widest sense, including 'the City' and other neighbouring counties, and is also the Quarter Sessions for the City Two or more justices of the peace, the Lord Mayor or any alderman of the City of London, or any stipendiary magistrate, sitting in a court house, constitute a petty sessional court The courts of quarter sessions are held four times a year by the justices of the county Two justices constitute a court, but usually a larger number attend Women may be justices Certain cities and boroughs have a court of quarter sessions, with similar jurisdiction to that of the county justices in quarter sessions, in which the recorder of the borough is the judge The assize courts are constituted by Judges of the High Court (or in some cases by King's Counsel having His Majesty's special commission) These go on circuit twice or four times a year, visiting every county in turn, and hearing and determining all civil cases entered for trial and all criminal cases presented by the Grand Jury of the County or Riding, city or borough Except in cases of treason when the trial is 'at bar' before the Lord Chief Justice and two or more judges of the King's Bench Division, criminal cases are tried by a jury, and the jury, subject to the direction of the Judge on points of law, are the sole judges of the facts of the case Women serve on juries The sessions of the Central Criminal Court are held at least twelve times a year and more often if necessary The Recorder and the Common Serjeant, and, if the number of the prisoners makes it necessary, the judge of the City of London Court, sit on the first two days, after which they are joined by one or more of the judges of the High Court on the rota, for whom capital and certain other cases are reserved Criminal cases of special importance or complexity arising in any part of the country may, by direction of at least two High Court judges, be brought for trial in the King's Bench Division A petty sessional court deals summarily with minor offences, some of which are practically civil and can be reviewed by the judges All offences are usually investigated by a petty sessional court before being tried at the sessions or the assizes, but with the consent of the accused, justices can dispose of many felonies To every sessions, assize, and to every sitting of the Central Criminal Court, the sheriff summons a number of the chief inhabitants of the approximate district, of whom not less than 12 and not more than 28 are sworn and constitute a grand jury, which examines the bill of indictment against the accused person, hears the evidence of witnesses

for the prosecution, and if it thinks a *prima facie* case for trial is made out, endorses the bill 'a true bill,' which is then tried by the petit jury. All criminal trials, except those which come before a court of summary jurisdiction or the House of Lords, take place before a judge and such a jury (twelve persons). Appeal is allowed in criminal cases (i) on a point of law, (ii) on a question of fact, or other sufficient ground if the judge certifies the case as fit for appeal, or the Court of Criminal Appeal grants leave to appeal, and (iii) against the sentence (if not fixed by law) with the leave of the Court of Criminal Appeal. This Court can reverse, amend, or affirm the judgment in a few cases its decision may be reconsidered by the House of Lords. The only other method of securing the revision of a sentence is through the Royal prerogative, exercised on the advice of the Home Secretary, by which a sentence can be modified or annulled. No man can be tried again for the same crime after a petit jury has found him 'not guilty.' Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a minister, a member of the Cabinet, ex-officio president of the House of Lords, and goes out with the ministry), the Lord Chief Justice, the Lords of Appeal in Ordinary, who sit in the House of Lords and on the Judicial Committee of the Privy Council, and the Lords Justices of Appeal who sit in the Court of Appeal, are appointed on the recommendation of the Prime Minister, and all the other judges on the recommendation of the Lord Chancellor.

The courts chiefly having jurisdiction in civil cases are the modern County Courts, created in 1846, Assizes, and the High Court, Quarter Sessions and old local courts also have this jurisdiction to a certain extent.

The authorised strength of the police force in England and Wales on September 29, 1932, was 58,529 (including 20,073 Metropolitan police). Total Police Expenditure in England and Wales for 1930-31 was 21,379,187.

Scotland

The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges of the Court of Session, and sits more or less frequently, as the number of cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, deforcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted, and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

The Court of Session exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

The police force in Scotland at the end of 1931 had an authorised strength of 6,626. The estimated expenditure on police is 1,039,449*l.* for 1933-34.

National Insurance. Pensions.

Under the National Health Insurance Act 1924, the Unemployment Insurance Acts 1920-25, the Old Age Pensions Act 1908-24, and the Widows, Orphans and Old Age Contributory Pensions Act 1925, provision is made for insurance against loss of health, for prevention and cure of sickness, compulsory insurance against unemployment, and pensions for widows and orphans and aged persons

National Health Insurance—This is administered by the Ministry of Health in England and Wales, and the Department of Health for Scotland in Scotland, by specially constituted authorities, Approved Societies, including friendly societies and Insurance Committees and trade unions

Subject to specific exceptions, persons who are compulsorily brought under the National Health Insurance Act, known as *employed contributors*, comprise all persons of the age of 16 years or over who are employed under contract of service, written or implied, whether by time or piece. Aliens are subject to compulsory insurance equally with British subjects. Among persons

excluded are those employed in non-manual labour at a rate of remuneration exceeding £250 a year. Insured persons who are not members of an approved society must, within a certain time, become *deposit contributors*, their benefits are limited. Certain persons not compulsorily insured may become *voluntary contributors*. The rates of contributions are given below. The ordinary benefits are (a) free medical treatment, (b) payments during sickness (not exceeding 26 weeks), amounting to 15s a week for men and 12s for women, after 104 contributions, 9s (men), 7s 6d (women) after 26 contributions, (c) disablement benefit after 26 weeks sickness benefit, 7s 6d a week, (d) maternity benefit of 40s payable to wife on confinement. Approved societies may also give additional benefits. Deposit contributors receive sickness and disablement benefits at rates slightly less than the above.

The National Health Scheme covered about 17 million persons in England in 1931. The total expenditure on benefits for England and Wales was estimated for 1931 at 27,800,000*l*, including 9,000,000*l* for medical benefit. The number of persons entitled to benefits was 15,182,100 in 1930. The cost of administration was 4,778,000*l* in 1931.

Widows, Orphans and Old Age Pensions—Provision is made in the Widows', Orphans' and Old Age Contributory Pensions Acts of 1925 and 1929 for a contributory pensions scheme under which pensions are provided for widows, children and elderly persons. This scheme is interlocked with the National Health Insurance Scheme, and in general, an inclusive weekly insurance contribution is payable for both services together. Subject to certain conditions, the following pensions are payable, free from any restriction as to means.—*Widows' pensions* of 10s a week to the widows of insured men, together with allowances for children at 5s a week for the eldest and 3s for younger children. The children's allowances continue payable up to age 14 (or so long as school instruction continues but not beyond 31st July following the 16th birthday). On remarriage, the widow's pension of 10s ceases but children's allowances continue. The widow of a man who died or reached the age of 70 before the scheme began on January 4, 1926, but who would have been insured for pensions purposes had the Acts been in operation earlier may receive a similar pension when she reaches the age of 55. *Orphans' pensions* are 7s 6d a week, the period of the continuance being the same as for children's allowances. *Contributory old age pensions* of 10s a week at age 65 for insured persons, including wives of insured men who have themselves qualified.

Widows and contributory old age pensions normally continue to age 70 and are then replaced by pensions under the Old Age Pensions Acts, 1908 to 1924, free from the means and other restrictions which those Acts impose.

The normal weekly contribution for National Health and Pensions Insurance is 1s 6d for men and 1s 1d for women, of which 9d and 6d respectively may ordinarily be recovered from the worker. In the case of workers aged over 65 contributions of 9d (men) and 7d (women) are paid by the employer only.

The total amount paid in Great Britain in respect of widows' and orphans' pensions for the year ending March 31, 1931, was approximately 16,848,000*l*, the beneficiaries were 619,119 widows and 313,902 children (including orphans). The total number and cost of pensions awarded under the contributory old age pensions scheme (persons between ages 65 and 70) for the year ending March 31, 1931, was 637,879 (16,398,000*l*). The total number of non-contributory old-age pensions paid in 1929-30 was 926,735*l*.

Unemployment Insurance—This is administered by the Ministry of Labour through the Employment Exchanges, Trade Unions, and by certain associations of employed persons. There are also special schemes in operation for

the Banking and Insurance Industries The scheme is compulsory in its operation, and with the main exceptions of domestic servants in private service and persons employed in agriculture, substantially all persons covered by the Health Insurance Scheme are required to be insured against unemployment The minimum insurable age is 16 years Certain employees of Government Departments, public or local authorities, railways and public utility undertakings, and persons with rights under statutory superannuation schemes may also be excepted where the Minister of Labour certifies that their employment is permanent in character, that they have completed three years' continuous service in that employment, and that the other circumstances of the employment are such as to make it unnecessary that they should be insured under the Unemployed Insurance Acts. A certificate of exemption, relieving him from liability to pay the unemployed person's share of the contributions, may be claimed by an employee who can prove that he is (a) in receipt of a pension or income of not less than 26*l* a year; or (b) ordinarily and mainly dependent upon some other person, or (c) ordinarily and mainly dependent on his earnings from an uninsurable occupation or (d) employed in a seasonal occupation which does not ordinarily last for more than 18 weeks in any year and not ordinarily employed in any other insurable employment The rates of weekly contributions are as follows (a) contributions at ordinary rates. man (aged 21 but under 65), from employer 10*d*, from employee 10*d*, woman (over 21 but under 65), from employer 9*d*., from employee 9*d*, young man (aged 18 but under 21), from employer 9*d*, from employee 9*d*, young woman (aged 18 but under 21), from employer 8*d*., from employee 8*d*, boy (aged 16 but under 18), from employer 5*d*, from employee 5*d* girl (aged 16 but under 18), from employer 4½*d*, from employee 4½*d* (b) In the case of an exempt person, the employer's share only of a contribution is payable No part of this contribution can be recovered from the exempt person (c) Contributions in respect of persons of the age of 65 and over are payable by employers only, at the following rates man, 10*d*, woman, 9*d* The ordinary State contribution is a sum equivalent to one-half of the joint contributions of employers and employed persons. Under the Unemployment Insurance (National Economy) Order, 1931, the standard rates of benefit payable as from week commencing 12th October, 1931, are — men (aged 21 and under 65), 15*s*. 3*d*, women (aged 21 and under 65), 13*s*. 6*d*, young men (aged 18 and under 21), 12*s*. 6*d*, young women (aged 18 and under 21), 10*s* 9*d*, boys (aged 17 and under 18), 8*s*., girls (aged 17 and under 18), 6*s* 9*d*.; boys (aged 16 and under 17), 5*s*. 6*d*., girls (aged 16 and under 17), 4*s*. 6*d* Additional benefits at the rate of 8*s* a week in respect of an adult dependant and 2*s* a week in respect of each dependent child are payable in respect of certain classes of dependents Under the Unemployment Insurance (National Economy) (No 2) Order, 1931, payment of benefit is limited to 156 days in a benefit year Under the same Order a scheme of Transitional Payments replaced the Transitional Benefit scheme. These payments are made only on proof of need, and the amount is determined by the Public Assistance Authorities with the appropriate benefit rate as a maximum limit. The whole cost (including the cost of administration) is borne by the Exchequer as in the case of transitional benefit after 1st April, 1929 *Approximate* particulars of receipts and payments for the financial year 1932-33 are as follows:—Contributions: employers and employees, 38,450,000*l*; Exchequer 'equal thirds,' 19,200,000*l*; deficiency grant, 6,450,000*l*; total receipts, 64,100,000*l* Insurance benefit: direct, 50,850,000*l*; indirect, 3,400,000*l*; administration, 4,200,000*l*; interest, 5,400,000*l*. miscellaneous (refunds, grants towards approved courses of instruction, etc.), 250,000*l*; total payments, 54,100,000*l* Transitional payments and cost of administration (the total is repaid in full to the fund

by the Exchequer, and is not included in the Insurance Account above) amounted to 53,750,000*l*

War Pensions—The number of war pensions or allowances in payment as at March 31, 1932, was 1,181,000 approximately, and the estimated expenditure of the Ministry of Pensions for 1932-33 was 49,243,800*l*, and the estimated expenditure for 1933-34 is 45,200,000*l* (inclusive of administration expenses)

Income Tax—The gross amount of income brought under the review of the Inland Revenue Department in the year ended April 5, 1930, in Gt Britain and Northern Ireland, was 3,183,476,146/ ; in 1930-31 it was estimated to be approximately 3,160,000,000/ The income on which tax was actually received in 1929-30, after allowing for exemptions and reliefs, was 1,347,406,709/ , and the estimated amount for 1930-31 was 1,300,000,000/ . The estimated number of incomes in Great Britain and Northern Ireland above the effective exemption limit in 1930-31 was 4,950,000 the number actually chargeable with tax was estimated at 2,200,000.

Prior to April 5, 1915, incomes not exceeding 160/ were exempt from Income Tax, and from April, 1915, to April, 1920, incomes not exceeding 130/ were exempt. The graduation of the tax on incomes in excess of these

limits was effected by means of differential rates and by various abatements and reliefs (for wife, children, etc.) granted in the lower ranges of incomes only

Under the new system of graduation introduced by the Finance Act, 1920, personal allowances of 135*l* assessable income (= 150*l* earned income) for unmarried persons and 225*l* (= 250*l* earned income) for married persons, and allowances for children, dependent relatives, etc., were granted to all taxpayers irrespective of the amount of their total income. The effect of the increase in the earned income relief (from one tenth to one-sixth) by the Finance Act, 1925, was to increase the personal allowances, *in the case of earned incomes*, to 162*l* and 270*l* respectively. The Finance (No. 2) Act, 1931, reduced the personal allowances, in terms of assessable income, to 100*l* for unmarried persons, and 150*l* for married persons. At the same time the earned income relief was increased to one fifth, so that in the case of earned income the allowances became 125*l* and 187*l* 10*s* respectively. Tax is charged on the first 175*l* of taxable income at half of the standard rate,¹ and on the remainder at the standard rate of tax, which has varied as follows.—

Sur-tax, as a deferred instalment of Income Tax on the 1st January in the year following the year of assessment. The Sur-tax was payable for the first time in respect of the year 1928-29 on January 1, 1930. Net receipt from Sur-tax in 1930-31, was 67,657,195*l*.

Local Taxation Grant—In accordance with various Acts passed between 1888 and 1911, there are paid out of the Consolidated Fund to the Local Taxation Accounts of England and Scotland, sums equivalent to the proceeds (in some cases of the year 1908-9, and in other cases of the current year) of certain excise licence duties, part of the beer and spirit duties, and part of the probate and estate duties. Certain other grants are also payable.

The total payments made to the Local Taxation Account for England and Wales in 1930-31 was 326,736*l*, including 265,821*l* in relief of rates and 49,799*l* under the Agricultural Rates Act, 1923. Scotland received a total of 30,898*l*.

It was estimated that national taxation per head of population amounted in 1930-31 to 16*l* 6*s* 5*d* (14*l* 15*s* 10*d* in 1929-30). In 1930-31 direct taxation amounted to 462,781,000*l*, and indirect taxation to 240,907,000*l*.

III NATIONAL DEBT

Borrowing by the State on the security of taxes was practised in Norman times, but the National Debt really dates from the time of William III. The acknowledged debt in 1689 was about 664,000*l*, on which the annual charge for interest and management was only 40,000*l*. IV LOCAL TAXATION

The estimated rates collected by local authorities in 1931-32 are — England and Wales 148,000,000/ , Scotland, 16,915,000/ . For 1930-31 the amounts collected were England and Wales, 149,000,000/ , Scotland, 18,152,000/ . Exchequer contributions to local revenues amounted in 1930-31 to 39,340,000/ for England and Wales, and 4,147,362/ for Scotland. Grants to rating authorities issued from the Exchequer amounted to 1,000,000/ for Scotland.

The approximate allocation of amounts raised by rates and Exchequer grant during 1928-29 and 1929-30 was as follows —

	England and Wales		Scotland		Total

In England and Wales the average amount of the rates per pound of assessable value was 6s 8½d in 1913-14, 11s 7d in 1930-31, and 11s 1½d in 1931-32.

The aggregate net debt of the County of London on March 31, 1930, amounted to 149,007,484/ (144,967,164/ in 1929). The proposed rate for 1932-33 was 6s 6½d. The estimated total of expenditure for 1932-33 was 6,824,955/ , and the estimated gross expenditure on rate accounts was 29,219,009/.

Defence.

The Committee of Imperial Defence is responsible for the co ordination of naval, military, and air policy. Of this Committee the Prime Minister is *ex-officio* President, and he has power to call for the attendance at its meetings of any naval or military officers, or of other persons, with administrative experience, whether they are in official positions or not. The usual members are the Secretaries of State for Foreign Affairs, for War and Air, the Colonies, India, the Chancellor of the Exchequer, the First Lord of the Admiralty, the First Sea Lord, the Chief of the Imperial General Staff, the Chief of the Air Staff, Directors of the Intelligence Departments of the War Office and the Admiralty. During 1923 a Cabinet Committee inquired into the co ordination of the policy and administration of defence. As the result of its report a standing sub-committee of the Committee of Imperial Defence has been appointed, with a Cabinet Minister as Chairman, the heads of the three services and representatives of the Foreign Office and Treasury as members, for the purpose of correlating defensive policy. Three further sub-committees have since been appointed, one composed of the Chiefs of Staff of the three services of Navy, Army and Air, to furnish the Cabinet or the main committee with expert advice on problems of defence, the second sub-committee deals with man power, and the third, the principal supply officers' sub-committee, with the provision of munitions and supplies in time of war. At the beginning of 1927 an Imperial Defence College was founded to educate selected officers of the three services in working together in the solution of problems of Imperial Defence and to carry out detailed studies for the main committee.

I. ARMY.

The land forces of the United Kingdom consist of the Regular Army, the Territorial Army, and the Reserve Forces. The British troops of the Regular Army serve both at home and overseas and are commonly referred to as the British Army in contradistinction to the Indian Army or Native Army, and to the Local Forces in certain British Colonies and Dependencies, the personnel of which is native with a proportion of British officers.

The Regular Army, whether at home or abroad, except India, is paid for by the Imperial Exchequer (although certain Dominions pay contributions towards its upkeep), India pays a contribution towards the cost of troops at home owing to these serving as a *dépôt* for the regular troops in India. The Imperial Exchequer pays for Indian and Colonial troops serving outside their own countries. The Territorial Army serves only at home in peace time, but as the supreme position of the British Navy in Home Waters has practically eliminated all risk of invasion, members of the Territorial Army are now asked to accept liability for service overseas in time of war, subject to the consent of Parliament. As from October 1, 1932, the entire responsibility for manning the Coast Defences at home has been entrusted to the Territorial Army. The rank and file for both Regular Army and Territorial Army are obtained by voluntary enlistment. The Reserve Forces consist of the Army Reserve, the Supplementary Reserve of Officers and the Supplementary Reserve, the Militia and the Channel Islands and Colonial Militia, and the Territorial Reserve. The Army Reserve is composed of men who have completed their period of colour service with the Regular Army, its strength on January 1, 1933, was 125,000. The Supplementary Reserve of Officers and the Supplementary Reserve were created in August 1924, with establishments

of 2,489 and 20,639 respectively, for the purpose of supplying officers and technicians to the army on mobilisation. The strength of the Supplementary Reserve on January 1, 1933, was 19,600. The Militia, which is intended to serve as a supply source to the Regular Army after the Army Reserve is exhausted, is in process of reconstruction. The Channel Islands and Colonial Militia consist of the Channel Islands Militia, the Malta Militia, the Bermuda Militia, and the Isle of Man Volunteers. The Territorial Reserve is in process of formation.

Service is for 12 years, with permission to extend to 21 years in certain circumstances. Of the original 12 years, from 3 to 9 are spent 'with the colours,' i.e., on permanent service, and the remainder of the time in the Army Reserve, the majority of the men serve for 7 years with the colours and 5 years in the Army Reserve, which is the rule for infantry other than the Foot Guards. Men enlist between 18 and 25 years of age.

For purposes of training and command the fighting troops are for the most part organised in divisions, which consist of 3 infantry brigades, divisional artillery and engineers, together with the necessary auxiliary services. The cavalry is organised in brigades. The infantry brigades are composed of 4 battalions, the cavalry brigades of 3 regiments. Each infantry battalion has 1 machine gun company of 16 guns, and the battalion is provided with anti tank guns. The organisation of the Territorial Army is analogous to that of the Regular Army, and it consists of 14 divisions, composed of infantry, artillery, engineers, and auxiliary services, and of the mounted brigades, chiefly composed of yeomanry. During 1932 further experiments were made in the process of mechanising the Army. The experimental mechanised brigades, composed of artillery, infantry and tanks carried out extensive tests.

For purposes of command Great Britain is divided up into six 'commands' and the London and Northern Ireland Districts. The commands are (1) Aldershot, of very limited area, (2) Eastern, including the eastern and southern counties, (3) Northern, including the northern midlands and north-eastern counties, (4) Scottish, (5) Southern, including the southern midlands and south western counties, (6) Western, including Wales, Lancashire and north western counties. These commands (except the Aldershot command) are divided up into Territorial Recruiting districts for the Regular Army. The Eastern, Northern, Scottish, Southern, and Western commands and the London District each include from 1 to 4 Territorial mounted brigades, and 2 or 3 Territorial divisions. There are normally two Regular divisions in the Aldershot, one Regular division in the Eastern, one in the Southern command and one in the Northern command. At the head of each command is a general officer (styled the General Officer Commanding in Chief). He is assisted by a general officer of lower rank who is responsible for questions of administration apart from training and defence questions.

The land forces are administered by an Army Council which is composed of the Secretary of State for War, who is its President; the heads of the departments into which the War Office is primarily divided, and the permanent Secretary of the War Office. The Territorial Army is to a large extent administered by County Associations over which the War Office merely maintains a general control as regards expenditure.

The principal military educational establishments are the Royal Military Academy, educating youths to be officers in the artillery and the engineers, the Royal Military College whence officers are obtained for cavalry and infantry, the Senior Officers' School, which trains officers for command, and the Staff College, which trains officers for the staff. The Officers' Training Corps

in two divisions representing respectively the universities and public schools, is intended to provide officers for the Territorial Army, and for the Regular Army on expansion

The estimated expenditure for the army for the year 1933-34 amounted (March, 1932) to 37,950,000*l*

The total personnel charged to British votes for 1932-33 was 140,241, of whom 138,023 were British troops, 2,218 were Colonial and Native Indian troops. There were in India 58,098 British troops, so that the total establishment of the Regular Army in 1933-34 was 140,241 + 58,093 = 198,334. The strength of the Territorial Force on January 1, 1933, was 6,901 officers and 120,167 other ranks

The distribution of Regular troops, except in India, was as follows

II. NAVY

The British Navy is a permanent establishment, governed by the Board of Admiralty. The First Lord of the Admiralty is the Cabinet Minister responsible for the Navy.

The duties of the Admiralty are grouped under the two headings of Operations and Maintenance. The First Sea Lord and Chief of the Naval Staff and the Deputy Chief of the Naval Staff, have charge and direction of the Operations Division. This Division is concerned with Naval policy and the general direction of operations, war operations in Home waters and elsewhere, strategy, tactics, the development and use of material, including types of vessels and weapons, and with trade protection and anti-submarine considerations. The four members of the Board who are in charge of the Maintenance Division are the Second Sea Lord and Chief of the Personnel, the Third Sea Lord and Controller of the Navy, the Fourth Sea Lord and Chief of Supplies and Transport, and the Civil Lord. The Parliamentary Secretary and the Permanent Secretary are concerned with Finance and Admiralty business.

The Washington Treaty of 1922, which relates to the British Navy and the Navies of the United States, France, Italy, and Japan, so far as it concerns capital ships, defines for each Power what her replacement tonnage shall be, fixing the maximum displacement of such ships at 35,000 tons, and their heaviest armaments at the 16 in gun.

By the London Treaty of 1930 it was agreed to defer replacement of capital ships until after 1936. In the meantime, certain ships were dis-

carded without replacement. In the British fleet, the ships so discarded include four battleships (*Benbow*, *Emperor of India*, *Iron Duke*, *Marlborough*) and the battle cruiser *Tiger*. Though withdrawn from the effective list, the *Iron Duke*, which it will be recalled was flagship of the Grand Fleet at Jutland, has been partially disarmed and retained for use as a gunnery training ship.

Cruisers, which the Washington Treaty had restricted to a standard displacement of 10,000 tons and guns not above 8 inches in calibre, are dealt with in Part III of the Treaty, to which only the British Empire, the United States and Japan subscribed. Definite limits are assigned to the cruiser tonnage which may be maintained by these three countries during 1931-36 in two categories, (a) cruisers armed with guns of more than 6 1 inch calibre, and (b) those armed with guns of 6 1 inch calibre or less. Destroyer and submarine tonnage, which had remained unaffected by the Washington Treaty, is also restricted by the same section of the Treaty. In the period 1931-36, each of the three fleets concerned is allowed 52,700 tons of submarines.

Washington Treaty restrictions concerning aircraft carriers remain in force, but the construction of any such vessels of 10,000 tons or less displacement mounting a gun above 6 1 inch calibre is forbidden to all five of the signatory powers.

Under the 1930-31 Estimates there are completing 3 cruisers of 7,000 tons (*Neptune*, *Orion*, *Achilles*), the netlayer *Guardian*, and 2 submarines.

Under the 1931-32 Estimates there are under construction 2 cruisers of 7,000 tons (*Amphion*, *Ajax*), 1 of 5,200 tons (*Arethusa*), 1 flotilla leader, 8 destroyers, 4 sloops and 3 submarines.

Under the 1932-33 Estimates there have been laid down 2 cruisers of 7,000 tons (*Apollo*, *Phaeton*), 1 of 5,200 tons (*Galatea*), 1 flotilla leader, 8 destroyers, 4 sloops, 3 submarines, 1 river gunboat, 1 destroyer depot ship, 1 boom defence vessel, and 2 tenders.

Under the 1933-34 Estimates there are to be built 1 cruiser of 7,000 tons and 3 of 5,200 tons, 1 flotilla leader, 8 destroyers, 3 submarines, 5 sloops, and some smaller craft.

The Navy Estimates amounted to 51,605,000*l* net for 1930-31, to 50,476,300*l* net for 1931-32, and for 1932-33 to 53,570,000*l*.

The number of officers, seamen and marines borne on January 1, 1914, was 144,871. The estimates for 1932-33 provide for a total personnel of 90,300. In five years personnel has been reduced by 11,000 officers and men.

SUMMARY OF THE BRITISH FLEET

With the disappearance from the lists of all capital ships armed with guns of less than 15 inch calibre, the general tendency is to classify them as pre-Jutland and post-Jutland types. Of the last-named the only representatives at present are the *Nelson* and *Rodney*, though the *Hood* embodies in her design certain modifications based on war experience.

The following summary of the more important units will illustrate the present position.

Ships and vessels of the Dominions are included in the above table and in the following paragraph See notes following the ship lists

Of the 37 monitors which existed in 1919, three still survive There are 11 seagoing depôt and repair ships, 31 sloops, 28 minesweepers (mostly laid up in reserve), 12 surveying vessels, and a large number of smaller craft, such as gunboats, patrol boats, drifters and trawlers

In the following tables the ships are grouped in classes according to type The dates of the Naval Estimates under which they were sanctioned are given in certain cases, but, with reference to the capital ships affected by the Washington and London Treaties, the years are substituted in which they are due for replacement if desired

The destroyers of the British Fleet are of the following classes flotilla leaders, 1330-1800 tons, 34-36 5 knots, 17 (including 1 Australian), R class, 900 tons, 10, S class, 930-1075 tons, 36 (including 5 Australian and 2 Canadian), V class, 1300-1325 tons, 26, W class, 1300-1350 tons, 37, A class (1170-1350 tons), 12 (including 2 Canadian), B class (1360 tons), 8, C and D classes (1,375 tons), 12

The submarines are of eight successive classes H class (410 tons surface displacement) 14, L class (760-845 tons), 18, X class (2425 tons) 1, O class (1311-1475 tons), 9, *Parthian* and *Rainbow* class (1475 tons), 9, *Swordfish* class (640 tons), 2, *Thames* class (1805 tons), 1, *Porpoise* class (minelaying, 1500 tons), 1

Dominion Navies — When Admiral of the Fleet Earl Jellicoe made a tour of the Dominions with the object of arriving at an understanding with the Governments on the naval defence of the Empire, his report to the Government of Australia emphasized the desirability of the Commonwealth becoming self contained in regard to shipbuilding and the manufacture of guns, mountings, explosives, and aircraft, but no action of much importance has been taken on the proposals. The Imperial Cabinet (July, 1921) left on record its view that co-operation among the constituent parts of the Empire was necessary, but that the details must be left to the Dominion Parliaments. So far the only one of Lord Jellicoe's main recommendations to be carried into effect has been the reorganisation of the Royal Indian Marine on a naval basis. Its effective strength at present is limited to 4 sloops, 2 patrol vessels, a surveying vessel and a trawler for target towing.

The Royal Australian Navy, in addition to the 4 cruisers and 1 aircraft

tender named in the list above, has 1 flotilla leader, 5 destroyers of the S class, and a few other vessels.

New Zealand, in addition to the *Drumede* and *Dunedin*, has the obsolete light cruiser *Phylomel* as a training ship, and a mine sweeping trawler for instructional purposes

The Royal Canadian Navy has 3 mine-sweeping trawlers, 2 destroyers of the A class (*Skeena* and *Saguenay*), which were delivered from England in 1930-31, and 2 older destroyers of the 'S' type (*Champlain* and *Vancouver*)

The South African Naval Service has 2 mine sweeping trawlers and a surveying vessel. It has recently been proposed to dispense with these vessels on grounds of economy

Newfoundland has a transport built in 1925, the *Caribou*, which is employed under the Railways Department

III AIR FORCE

In May, 1912, the Royal Flying Corps first came into existence. On January 2, 1918, an Air Ministry was formed, and the control of the Royal Air Force was vested in an Air Council analogous to the Army Council. The Air Minister was given the status of a Secretary of State and became President of the Council. In April, 1918, the naval and military wings were amalgamated, under the Ministry of the Air, as the Royal Air Force.

The Force consists of the Royal Air Force, the Air Force Reserve, the Air Force Special Reserve, the Auxiliary Air Force, the Auxiliary Air Force Reserve, and the Territorial Air Force. The establishment of the Royal Air Force for the year 1932-33 is 31,000 exclusive of those serving in India, who are paid for by the Government of India. In January, 1932, the strength of the Air Force Reserve was 1,229 officers and 8,704 other ranks, of the Special Reserve 43 officers and 376 other ranks, of the Auxiliary Air Force 124 officers and 802 other ranks. During 1922 the Air Ministry took over control of Iraq and Palestine, and in January 1928 of Aden.

The Air Force is organised into commands as follows —

I United Kingdom (a) Inland Area, (b) Coastal Area, (c) Irish Wing, (d) Cranwell, (e) Halton

II Overseas (a) Middle East Area, (b) Iraq, (c) India, (d) Mediterranean, (e) Palestine

Areas are subdivided into groups and wings, a certain number of squadrons being allotted to each group or wing. Squadrons are subdivided into flights. In March 1933 the establishment of the Royal Air Force was 88½ squadrons, 75½ of which were regular squadrons and 8 Special Reserve or Auxiliary Air Force squadrons, while 5 are organised on a cadre basis. Each squadron is of 12 aeroplanes. 40 squadrons were in Great Britain and 22 abroad, while 28 flights, the equivalent of 13½ squadrons, were provided for the fleet air arm. During 1923 a scheme for the expansion of the Air Force primarily for Home Defence was sanctioned. This scheme provides for an establishment of 52 squadrons for home defence, 39 of these being squadrons of the Royal Air Force, 6 being non-regular squadrons formed from the Auxiliary Air Force, and 7 being formed of the Special Reserve. During 1933 29 regular and 8 Auxiliary Air Force squadrons and 5 cadre squadrons will have been formed for Home Defence. In November 1924 an Air Officer, commanding in chief Air Defences of Great Britain, was appointed to organise and command the Air Forces allotted for Home Defence. These are now divided into 3 sub commands: the Fighting Area, with headquarters at Uxbridge, the Wessex Bombing Area, with headquarters at Andover, and the Special Reserve and Auxiliary Air Force

The chief educational establishments of the Air Force are the Cadet College at Cranwell and the Staff College at Andover. The chief training dépôt is at Halton. There are also 3 flying training schools, 1 central flying school, and schools of gunnery, ballooning, army co operation, photography and wireless

The net Air Estimates for 1933-34 amounted to 17,426,000/

For 1933-34 the net sum allotted to Civil Aviation was 490,000/ The air routes maintained were London-Manchester, London-Amsterdam, London-Brussels-Cologne, London-Paris and Cairo Karachi In January, 1932, a London-Cape Town service was opened In February, 1933, a Royal Air Force machine established a long distance record of 5,340 miles on this route between Cranwell and Walvis Bay Owing to the disaster to the airship R 101, which was destroyed with all on board on its first flight to India, experiments on airships are in abeyance

¹ Figures for Scotland relate only to beans harvested as corn.

The production of meat in Great Britain in 1923-24 was estimated at 1,023,000 tons, of milk, 1,350 million gallons. The value of produce sold off

the farms in 1923 (excluding produce consumed in farmers' households) was estimated at 258,750,000*l*, namely: farm crops, 54,000,000*l*, live stock, 95,000,000*l*, dairy produce, 79,000,000*l*, wool, 4,250,000*l*, poultry and eggs, 13,500,000*l*, miscellaneous crops, 13,000,000*l*

For the quantities of cereals and live stock imported, see under *Commerce*

The number of holdings in Great Britain (from 1 acre upwards) is given as follows —

In *England and Wales*, the Ministry of Agriculture make grants for, and, to some extent, supervise vocational education and scientific research in agriculture. The Board of Agriculture for *Scotland* dispenses certain grants for the development and improvement of agriculture, including agricultural education and research, in that country. Grants are also made, in respect of agricultural education and research, from the Development Fund set up by the Development and Road Improvement Acts, 1909, and, as regards research, from the Empire Marketing Fund. In 1931–32, the grant voted to the Development Fund was 625,000*l*

The total number of persons (including clerks and salaried persons) ordinarily employed at all mines in Great Britain under the Coal and Metalliferous Mines Regulation Acts during 1931 was 886,914. The number of mines at work was 2,520, 698,799 persons (males) worked underground, and 184,316 males and 3,799 females (including clerks and salaried persons) above ground. The number employed at quarries under the Quarries Act was 73,112, of whom 45,936 worked inside the quarries, and 27,176 outside. The number of quarries at work was 5,085.

Professor H. S. Jevons estimated the resources of British coal in 1915, within 4,000 feet of the surface, at 197,000 million tons.

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance, and freight) up to the landing, on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. This is ascertained from the declaration made by the importers, and is checked by the expert knowledge available in the Customs Department, with the help of current price lists and market reports. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the United Kingdom, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

³ The expenditure on railway working was in 1931, 136,858,604l, 1932, 129,800,000 l. The net receipts on Railway and Ancillary businesses in 1931 were 53,632,047l (38,044,598l in 1930)

The number of passengers carried, in 1932, excluding season ticket holders, was 1,119,198,000

Tramways —In 1931 there were in Great Britain 2,163 miles of tramways and light railways open for public traffic. The paid-up capital amounted to 109,908,000/ , gross receipts 25,281,000/ , working expenses 20,467,000/ , and net receipts 4,814,000/ . The total number of passengers carried in 1931 was 4,394,531,000.

Civil Aviation —In 1931 the number of aircraft miles flown was 1,604,000 , number of passengers carried, 25,211 , weight of cargo, 774 tons.

Highways —The public highways in Great Britain in December 1931 had a total length of 177,256 miles (England and Wales, 151,807 miles, Scotland, 25,449 miles)

II —CANALS AND NAVIGATIONS

The total length of canals in the United Kingdom in 1905 was 4,673 miles, of which 3,641 miles were in England and Wales, 184 in Scotland, and 848 in Ireland.

The total tonnages originating on the principal canals¹ in Great Britain in 1930 were: Railway-owned canals, 1,693,905 tons, other than railway-owned, 11,541,879 tons, including Birmingham, 3,160,291 tons, Grand Junction, 1,376,723 tons, Leeds and Liverpool, 1,511,323 tons, and Bridgewater, 1,089,257 tons, Aire and Calder, 2,393,965 tons. Tonnage carried on the River Thames (above Teddington) was 372,808.

There is a scheme for modernisation of the Grand Union Canal. Work is in progress on the branch from Napton (Warwick) to Birmingham, a distance of 24 miles. The canal is to be made suitable for motor driven barges of large size.

Manchester, fourth port in the United Kingdom, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal which is 35½ miles in length, 30 ft in depth to Stanlow Oil Port, thence to Manchester it is 28 ft deep. The bottom width of the canal is 120 ft except for ½ mile near Latchford, where it is 90 ft. The maximum width of the locks is 65 ft, with the exception of the entrance lock, which is 80 feet wide. The canal is in direct communication with all the principal railway systems and barge canals of the Kingdom. The total issued capital of the Company at December 31, 1932, was 20,068,525/ . The gross revenue of the canal in 1932, including the Bridgewater department and the railways, amounted to 1,641,386/ , and the net revenue, including miscellaneous receipts, to 569,916/ . (643,244/ in 1931). The traffic receipts in 1932 amounted to 1,203,657/ . The merchandise traffic paying toll in 1932 amounted to 5,818,935 tons.

Money, Weights, and Measures.

The sovereign weighs 123 274 grains, or 7 98805 grammes, 91666 (or eleven-twelfthth) fine, and consequently it contains 113 001 grains or 7 3224 grammes of fine gold. The shilling weighs 87 27 grains or 5 6552 grammes, and down to 1920 was 925 (or thirty-seven fortieths) fine, thus containing 80 727 grains or 5 231 grammes of fine silver, but under the Coinage Act, 1920, the fineness was reduced to 500 (one half). Bronze coins consist of a mixture of copper, tin, and zinc. The penny weighs 145 83 grains, or 9 45 grammes. The standard of value is gold. Silver is legal tender up to 40 shillings, bronze up to 12*d*, but farthings only up to 6*d*. Bank of England notes are legal tender in England and Wales, except at the Bank itself (8 and 4 Will 4, cap 98). Under the Currency and Bank Notes Act, 1928, the Bank was empowered to issue 1*l* and 10*s* notes, which became legal tender for all payments. Under the Gold Standard Act, 1925, the issue of gold coin is suspended and the Gold Standard (Amendment) Act, 1931, suspended the right of purchase of gold bullion. The note circulation at March 8, 1933, was 434,954,080*l*., of which 71,626,757*l*. was held by the Bank of England and 363,327,323*l*. was in the hands of the public.

Standard units are of length the standard yard, of weight the standard pound of 7,000 grains (the pound troy having 5,760 grains), of capacity the standard gallon containing 10 pounds avoirdupois of distilled water at 62° F, the barometer at 30 inches. On these units all other legal weights and measures are based.

NORTHERN IRELAND

Constitution.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922 (13 Geo V. Ch 2, Session 2), a separate parliament and executive government were established for Northern Ireland, which comprises the parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry, and Tyrone, and the parliamentary boroughs of Belfast and Londonderry. The Parliament consists of a Senate of 2 *ex officio* and 24 elected persons and a House of Commons of 52 elected members. An allowance for expenses is made in the case of those members of both Houses who are not in receipt of salaries as members of the Government or as officers of Parliament, amounting to (a) 1*l.* 16*s.* a day to members of the Senate for attendance at meetings of the Senate or committees, but the total allowance to each may not exceed 72*l.* in any one year, unless under a declaration of insufficiency of means when an additional 100*l.* per annum is paid irrespective of attendance, and to (b) 170*l.* a year to members of the House of Commons. The Parliament has power to legislate for its own area except in regard to (1) matters of Imperial concern (the Crown, making of peace or war, military, naval, and air forces, treaties, titles of honour, treason, naturalisation, domicile, external trade, submarine cables, wireless telegraphy, aerial navigation, lighthouses, etc., coinage, etc., trade marks, etc.), and (2) certain matters 'reserved' to the Imperial Parliament (postal service, Post Office and Trustee savings banks, designs for stamps, registration of deeds, land purchase). The executive power is vested in the Governor on behalf of His Majesty the King: he holds office for six years and is advised by ministers responsible to Parliament. Senators hold office for a fixed term of years: the House of Commons is to continue for five years, unless sooner dissolved. The qualifications for membership of the Parliament are similar to those for membership of the Imperial House of Commons. Power was given to the Northern Ireland Parliament by the Act of 1920 to alter the qualification and registration of electors, the election laws and the distribution of Parliamentary representation after June 1924. This power was exercised by the passing—(a) of the Representation of the People Act (Northern Ireland), 1928, whereby the franchise was conferred upon women upon the same terms as it had hitherto been enjoyed by men, and (b) of the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, whereby the system of Proportional Representation, under which the Parliament which met in 1921 and in 1925 had been elected, was abolished, and Parliamentary Representation, except for the constituency of Queen's University of Belfast, was based upon single-member constituencies.

Northern Ireland continues to return 13 members to the Imperial House of Commons.

An Act of the Imperial Parliament, passed in 1928, modified certain restrictions placed on the powers of the Northern Irish Parliament by the Act of 1920, principally by extending the powers of the latter Parliament to legislate on matters relating to trade in live stock and agricultural produce to consolidate branches of the statute law enacted by the Imperial Parliament whose general subject matter is within the jurisdiction.

The legislative and administrative powers relating to Railways, Fisheries, and the Contagious Diseases of Animals were, under the Ireland (Confirmation of Agreement) Act, 1925, transferred to, and became, as from April 1, 1926, powers of the Parliament and Government of Northern Ireland.

The Northern Irish Parliament met for the first time, in June, 1921. At the election in May, 1929, there were returned 37 Unionists, 11 Nationalists, 3 Independent Unionists, 1 Labour

Governor—The Duke of Abercorn, appointed for a term of 6 years from December 8, 1922, the appointment was extended to December 8, 1934. Salary, 8,000*l* per year, payable from Imperial Revenue (2,000*l* being recoverable from Northern Ireland Revenues)

The Ministry is composed as follows —

Prime Minister—Rt Hon Viscount Craigavon (salary, 2,720*l*).

Finance—Rt Hon H M Pollock (salary, 1,700*l*).

Home Affairs—Rt Hon Sir R Dawson Bates (salary, 1,700*l*).

Labour—Rt Hon J M Andrews (salary, 1,700*l*).

Education—Rt Hon Viscount Charlemont (salary, 1,700*l*).

Agriculture—Rt Hon Sir E M Archdale, Bart (salary, 1,700*l*).

Commerce—Rt Hon J Milne Barbour

The usual channel of communication between the Government of Northern Ireland and the Imperial Government is the Home Office

Local Government.

In the two chief cities, the County Boroughs of Belfast and Londonderry, local administration is vested in Corporations, who are responsible for roads, public health, rating, housing, lighting, etc

In each of the six counties there is a County Council responsible for the construction and maintenance of roads and other public works, collection of rates, supervision of the arrangements for dealing with tuberculosis and special diseases, also of lunatic asylums, county infirmaries and county fever hospitals

The counties are divided into thirty two rural districts, in each of which is a Rural District Council, which is the sanitary authority for the district, and is also responsible for such matters as provision of labourers' cottages, burial grounds etc. There are also under Municipal Government two Boroughs and thirty Urban Districts, as well as three towns which are not Urban Districts

The administration of poor relief and dispensary medical relief is vested in Boards of Guardians, which, in the majority of cases, are the Rural District Councils, but in a few cases their area extends over two Rural Districts

Area and Population

A census of Northern Ireland was taken on April 18, 1926. The area and population of the country at that date were as follows —

Counties and County Boroughs	Area in statute acres (exclusive of water)	Males	Females	Total
Antrim	702,851	92,596	99,047	191,643
Armagh	312,767	58,609	56,461	115,070

Northern Ireland	2,851,444	608,988	648,478	1,256,561

The provisional estimated population of Northern Ireland at June 30, 1932, was 1,256 000.

Vital statistics for 4 years —

Year	Marriages	Births	Deaths	Year	Marriages	Births	Deaths
1928	7,284	25,968	18,004	1930	7,547	25,879	17,148
1929	7,426	25,410	19,823	1931	7,369	25,678	18,049

Religion

The religious professions in Northern Ireland, as recorded at the census of 1926, were Roman Catholics, 420,428, Presbyterians, 393,374, Protestant Episcopalians, 838,724, Methodists, 49,554, Other professions, 54,481, Total, 1,256,561

Education.

The following are the latest available statistics —

University The Queen's University of Belfast (founded in 1849 as a College of the Queen's University of Ireland, and reconstituted a separate University in 1909), 127 Professors, Lecturers and Demonstrators, and 1,475 students in the session 1932-33

Secondary Education 73 schools with 12,267 pupils *Technical Instruction* 62 technical schools and 63 other centres with 24,073 students

Elementary Education 1,868 public elementary schools with 204,399 pupils on rolls

Justice

Under the Government of Ireland Act, 1920, a Supreme Court of Judicature of Northern Ireland has been established, consisting of the Court of Appeal in Northern Ireland and the High Court of Justice in Northern Ireland. An appeal lies direct, in certain conditions, from the former to the House of Lords. A Court of Criminal Appeal was established in 1930.

A system of County or Civil Bill Courts deals with civil disputes generally where the sum at issue does not exceed 50/ , but possesses wider jurisdiction in certain cases. Courts of summary jurisdiction generally attended by permanent judicial officers—known as resident magistrates—determine summarily minor criminal and quasi-criminal cases and certain minor civil disputes. Some cases are tried by resident magistrates sitting alone.

The Police Force consists of (a) the Royal Ulster Constabulary, with a statutory maximum strength of 3,000; and (b) the Special Constabulary, a part time force.

Finance.

The bulk of the taxation of Northern Ireland is imposed and collected by the Imperial authorities, who make certain deductions and remit the balance to the Northern Irish Exchequer. The exact share of the latter in the proceeds of such taxation is determined by the Joint Exchequer Board, a special body consisting of one representative of the Imperial Treasury, one of the Northern Irish Treasury, and a chairman appointed by the King. The deductions made by the Imperial Treasury represent a contribution towards Imperial liabilities and expenditure, and the net cost to the Imperial Exchequer of Northern Irish services 'reserved' to the Imperial Parliament.

During recent years the cost of these 'reserved' services, together with the Imperial contribution, has represented over 20 per cent. of the total expenditure of Northern Ireland, while the cost of administration in the Province, including education, widows and orphans, old age and blind persons' pensions, health and unemployment insurance, police, prisons, public works, agricultural development, commercial services, finance, etc., has approximated to 80 per cent. The Northern Irish Parliament has independent powers of taxation, except as regards customs duties, excise duties on articles manufactured and produced, excess profits duty, corporation profits tax, any tax on profits or a general tax on capital, or any tax substantially the same in character as any of these duties or taxes. It has no power to impose, charge or collect income tax, including super tax, but it can grant relief from these taxes to individuals resident and domiciled in Northern Ireland. The Government of Northern Ireland also raises money from time to time by means of Ulster Savings Certificates and Treasury Bills, for temporary requirements of the Exchequer. In October, 1925, a Government Loans Fund was established from which loans are made to local authorities and others for public utility services. This has been financed by issues amounting to 4,000,000*l* Ulster Loans 4½% Stock, 1945-1975, and 2,000,000*l* Ulster Loans 5% Stock, 1950-60.

The revenue and expenditure of the Northern Irish Exchequer for the last four years were as follows:—

	1930-31 ¹	1931-32 ¹	1932-33 ¹ (estimated)	1933-34 (estimated)
	£	£	£	£
Revenue	9,615,000	9,751,446	9,945,000	8,820,595
Expenditure	9,611,000	9,744,741	9,945,000	8,820,595

			Total under Crops	1,013,261	952,183

The yield in 1931 was (in tons) oats, 226,104; potatoes, 697,973; turnips, 542,979; flax, 1,380; hay, 901,363.

The livestock as at June, 1931, was cattle, 680,649, sheep, 793,834; pigs, 285,672, goats, 44,986; horses used in agriculture, 86,486, mules and jennets, 224; asses, 7,846, poultry, 8,690,768.

There were 98,446 agricultural holdings exceeding one acre in area in 1931 in the hands of 97,235 separate occupiers

Mining.—The mineral output in 1930 and 1931 for Northern Ireland was —

	1930	1931 (Pro visional)		1930	1931 (Pro visional)
	Tons	Tons		Tons	Tons
Bauxite, Iron Ore and Lignite	2,037	3,340	Gypsum	190	—

Gravel and Sand	74,465	67,140	Sandstone	186,688	208,227
			Diatomite	3,604	3,401

The number of persons employed, inclusive of those employed at coal mines, was 1930, 2,559, 1931, 2,430

Manufactures—The two principal industries are linen and ship-building, both centred in Belfast. The former provides employment for approximately 85,000 persons, excluding those engaged in growing the fibre, 874,000 spindles, and 28,000 looms. The value of linens exported from the United Kingdom during 1931 was 5,431,515*l.*, practically the whole of which came from Northern Ireland. The Belfast shipyards employ approximately 11,000 persons, and possess an output capacity exceeding 250,000 tons a year. Other important manufactures are ropes and twines, tobacco, soaps, aerated waters, biscuits, spirits, hosiery and underwear.

National Insurance

Sickness and Unemployment Insurance and Pensions—Schemes of compulsory insurance on similar lines to those in force in Great Britain are in operation in Northern Ireland, and make provision for benefits during unemployment and sickness, including medical attention, and for pensions to persons over 65 years of age and to widows and orphans.

A general outline of the provisions of these schemes is set out in the paragraph dealing with 'National Insurance' in Great Britain. The number of persons in Northern Ireland insured under the various schemes is approximately: Health Insurance and Contributory Pensions, 359,000, Unemployment Insurance, 270,000.

Agreements (confirmed by Acts of both Parliaments) were entered into in 1926 and in 1928 between the Imperial and the Provincial Governments which had as their objects the maintenance of the Unemployment Funds of Great Britain and of Northern Ireland in a state of parity on the basis of their respective insured populations. Under these agreements the Northern Ireland Government has undertaken to extinguish a deficit on the Northern Ireland Fund of over three million pounds over a period of thirty years, and the Northern Ireland Fund has received contributions from the Imperial Exchequer towards the yearly deficit on the Northern Ireland Fund. Should conditions alter whereby the proportion of the unemployed portion of the Northern Ireland population falls below that in Great Britain, there is a liability on the Northern Ireland Government to make a corresponding contribution to the Imperial Fund.

Non contributory Pensions—Old Age Pensions (non contributory) and Blind Persons' Pensions are granted to individuals who are not eligible for Contributory Pensions provided they have reached the age of 70 (50 in case of blind persons), and comply with certain conditions as regards British nationality and residence in the U.K.

The number of persons in Northern Ireland in receipt of non-contributory Pensions is approximately 39,000.

Communications.

The total first track railway mileage of Northern Ireland amounts to 754 miles. The area is also well served by inland waterways, and possesses 180 miles of canals. Total length of roads is 12,996 miles, road budget for year ending March 31, 1933, was 1,500,000.

ISLE OF MAN.¹

The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the Crown, the Legislative Council, composed of the Lord Bishop of Sodor and Man, two Deemsters, the Attorney General, two members appointed by the Governor, and four members elected by the House of Keys, total 11 members, including the Governor, and the House of Keys, a representative assembly of 24 members chosen on adult suffrage with six months residence for 5 years by the 6 'sheadings' or local subdivisions, and the 4 municipalities. Women have the franchise as well as men. Number of voters 1930-31, 38,679. The island is not bound by Acts of the Imperial Parliament unless specially mentioned in them.

Lieut. Governor — Sir Claude H. A. Hill, K.C.S.I., C.I.E.

The population (census, 1931) numbered 49,308 (22,459 males, 26,849 females).

The principal towns are Douglas (population, census 1931, 19,265), Ramsey (4,198), Peel (2,462), Castletown (1,712). Births (1931), 679, deaths, 743. In 1932 there were 38 elementary schools, 35 being provided schools. The enrolled pupils numbered 5,718, and the average attendance 5,064. The gross expenditure of the Education Authority on elementary education for the year 1931-32 amounted to 68,491. There are 4 secondary schools (957 registered pupils), and 5 evening institutes (424 registered pupils). The gross expenditure on higher education for 1931-32 was 27,742. In 1929 the police force numbered 65, in the year 1928 there were 816 persons convicted.

Revenue is derived mostly from Customs. In 1931-32 the revenue amounted to 401,381, and expenditure to 390,503.

The principal agricultural produce of the island consists of oats, barley, turnips and potatoes, and grasses. The total area of the island, excluding water, is 140,986 acres, the total area of arable land in 1932 was 80,785 acres and of permanent grass, 22,163 acres. The total acreage under corn crops in 1932 was 16,281 acres, including 15,682 under oats, 201 under wheat, and 398 under barley or bere. There were also 5,446 acres under turnips and swedes, 1,910 under potatoes, and 34,441 under clover, sainfoin and grasses under rotation. The number of agricultural holdings in 1932 was 1,865. The live stock in 1932 consisted of 3,564 horses; 20,169 cattle, 101,995 sheep, and 4,379 pigs. Total value of minerals raised in 1928, 47,496. Persons employed in mining numbered 414. In 1929 there were belonging to the Isle of Man 104 fishing boats.

The registered shipping (1932) comprised 5 sailing vessels (495 gross and 315 net tons) and 37 steamers (30,245 gross and 12,380 net tons) and 17 motor vessels (558 gross and 383 net tons), total net tonnage 18,078 net tons. The tonnage of vessels arrived at ports of the island in 1931 was 1,053,412 tons (960,847 tons coastwise), and departed 1,055,020 net tons (981,456 tons coastwise). The railways have a length of 40½ miles, and there are 25 miles of electric railway.

CHANNEL ISLANDS.¹

The Channel Islands are situated off the north west coast of France, and are the only portions of the 'Dukedom of Normandy' now belonging to England, to which they have been attached since the Conquest. The islands are administered according to their own laws and customs. Jersey has a separate legal existence, it is administered by a Lieutenant Governor appointed by the Crown, and a Bailiff also appointed by the Crown. The Lieutenant-Governor has a veto on certain forms of legislation. He and the Crown officers may address the States but not vote. The qualification for a vote is the possession of a minimum value of 80*l.* real or 120*l.* personal property. The Royal Court consists of a tribunal of first instance and an appeal court. The States for deliberation and legislation consist of 12 Jurats, 12 rectors, 12 constables (who are the mayors of the parishes), 17 deputies, and 2 Crown officers. Guernsey, Alderney, and Sark are under one Lieutenant Governor, but Guernsey and Alderney have a government of their own, and Sark is a dependency of Guernsey and under its jurisdiction. On May 10, 1905, a law was passed for the Island of Guernsey requiring the approval of the Lieut.-Governor and of the Royal Court of the Island previously to the acquisition, or leasing, or occupation of immovable property by aliens or alien companies, registration and liability to local rates, &c., being also provided for. The Channel Islands are not bound by Acts of the Imperial Parliament unless specially named in them.

INDIA, THE DOMINIONS, COLONIES, PROTECTORATES, AND DEPENDENCIES OF THE BRITISH EMPIRE

In the following pages the various sections of the British Empire outside Great Britain and Northern Ireland are arranged in alphabetical order under the divisions of the world to which they belong—1 Europe, 2 Asia, 3 Africa, 4 America, 5 Australasia and Oceania.

The term 'Dominion' is used officially as a convenient abbreviation of the complete designation 'self governing Dominion'. The Dominions are Australia, Canada, Irish Free State, Newfoundland, New Zealand, and South Africa.

The Imperial Conference of 1926 defined the Dominions as 'autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations'. The Conference further laid down that, as a consequence of this equality of status, the Governor-General of a Dominion 'is the representative of the Crown, holding in all essential respects the same position in relation to the administration of public affairs in the Dominion as is held by His Majesty the King in Great Britain,' and that 'it is the right of the Government of each Dominion to advise the Crown in all matters relating to its own affairs'. The Conference also recognised certain treaty-making rights as appertaining to the Dominions.

On December 11, 1931, the Statute of Westminster, which by legal enactment recognises the status of the Dominions, defined at the Imperial Conference of 1926, became law. The Dominions had in their turn also passed the Statute of Westminster in 1931.

The term 'Colony' is an abbreviation of the official designation 'Colony not possessing responsible Government,' and includes all such Colonies whether or not they possess an elective Legislature, but does not include Protectorates or Protected States. The term 'Crown Colonies' is properly applicable only to those Colonies in which the Crown retains control of legislation.

Under the recent Peace Treaties certain ex-German and ex-Turkish territories are administered by parts of the British Empire under mandates approved by the League of Nations. These territories include Samoa, New Guinea, Iraq, Palestine, and parts of the former German Colonies in Africa.

Up to July, 1925, all sections of the British Empire outside of Great

Britain and Ireland were dealt with by the Colonial Office. In that month a new Secretaryship of State, for Dominion Affairs, was created, and as a result the Dominions Office was set up, to take over from the Colonial Office business connected with the self-governing Dominions, the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate, and Swaziland), including business relating to the Imperial Conference.

The Colonial Office now deals with the administrative work of the Colonies, Protectorates, and Mandated Territories other than those for which the Dominions Office is responsible. It contains seven Departments—the West Indian, Far Eastern, Ceylon and Mauritius, East African, Tanganyika and Somaliland, Nigeria, Gold Coast and Mediterranean—dealing with the affairs of various groups of Dependencies, a Middle Eastern Division, which was established in March, 1921, to conduct business relating to Iraq, Palestine, Aden, and Arab areas under British influence, and a General Department, which is concerned with correspondence of a general and miscellaneous character including questions of promotion, postal, telegraph, and copyright matters, international conventions and commercial treaties, Letters Patent and Commissions, etc.

EUROPE.

THE IRISH FREE STATE (SAORSTAT EIREANN)

AN Act was passed in 1920 under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Ulster Unionists accepted this scheme, and the Northern Parliament was duly elected on May 24, 1921. The rest of Ireland, however, having proclaimed a Republic in January 1919, ignored the Act. On December 6, 1921, a Treaty was signed with the British Government which was embodied in the Irish Free State (Agreement) Act, 1922. The Treaty contains the following provisions among others—

Ireland to have the same constitutional status 'in the community of nations known as the British Empire' as the Self-Governing Dominions, and to be called the Irish Free State.

Its position in relation to the Imperial Parliament and Government to be that of the Dominion of Canada, and the representative of the Crown in Ireland to be appointed in like manner as the Governor-General of Canada.

The Irish Free State to undertake its own coastal defence, the defence by sea of Great Britain and Ireland being undertaken by the Imperial forces. These provisions to be reviewed at the expiration of five years. The Free State to afford, in time of 'war or strained relations' with other powers, such harbour and other facilities as the British Government may require. The establishments of the Irish defence force not to exceed such proportion to the British military establishment as the population of Ireland bears to the population of Great Britain.

The ports of Great Britain and of Ireland to be freely open to the ships of 'the other country' on payment of the customary dues

By the Treaty 'Northern Ireland' was given the option of continuing its separate existence under the Act of 1920, subject to the award of a 'Boundary Commission'. On December 3, 1925, the British Government and the two Irish Governments signed an agreement by the terms of which the partition of 1920 continues in force as determined in that Act, the Boundary Commission being discharged from the duty of delivering an Award.

By the same agreement the provisions of the Treaty relating to a Council of Ireland and that stipulating the liability of the Irish Free State for a share of the National Debt of the United Kingdom were cancelled.

Constitution.

Under the Treaty of December 6, 1921, a Provisional Government was constituted on January 14, 1922, to carry on for a period not exceeding twelve months from the date of the Treaty. In September 1922 the Provisional Parliament met as a Constituent Assembly to adopt a Constitution for the Irish Free State. The Constitution was enacted by the Provisional Parliament on October 25, 1922, and by the British Parliament on December 5 (in the Irish Free State Constitution Act, 1922 [Session 2], 13 Geo V ch 1d), and came into effect by Royal Proclamation on December 6, 1922.

The Constitution declares the Irish Free State to be a co-equal member of the Community of Nations forming the British Commonwealth of Nations, and that 'all powers of Government, and all authority, legislative executive, and judicial, in Ireland are derived from the people of Ireland'. Every person domiciled within the area of the Free State on December 6, 1922, who was born in Ireland, or either of whose parents was born in Ireland, or who had been ordinarily resident within the area of the Free State for at least seven years, automatically became a citizen of the new State unless he or she elected not to accept such citizenship. The Irish language is declared to be the national language, but English is equally recognized as an official language. Liberty of person and the dwelling of the citizen are inviolable. There is to be no endowment of any religion. Freedom of conscience and the free profession and practice of religion are guaranteed to each citizen, as well as the right of free expression of opinion and the right to assemble peacefully and to form associations or unions for purposes not opposed to public morality. Elementary education is free.

The Legislature, known as the Oireachtas, consists of the King, a Chamber of Deputies (Dáil Éireann), and a Senate (Seanad Éireann). There must be at least one Session each year. Provision is made for payment of members. Legislative authority in respect of money Bills is reserved to the Chamber alone, but the Senate may make recommendations. Every Bill (other than a money Bill) initiated in and passed by the Chamber of Deputies is sent to the Senate, and if amended there the Chamber shall consider the amendments. An elaborate machinery of procedure is established by the Constitution (Amendment No 18) Act, 1928, to prevent the exercise of a veto by the Senate or a protracted deadlock between the Senate and the Chamber.

The Representative of the Crown signifies the King's assent to Bills passed or deemed to have been passed by both Houses of the Oireachtas. He cannot signify or withhold such assent save upon the advice of the Executive Council.

Two articles, namely Articles 47 and 48, containing respectively pro-

visions relating to a Referendum of the people and the initiation of proposals for legislation by the people have been removed from the Constitution by the Constitution (Amendment No 10) Act, 1928

The Constitution provided that all members of the Oireachtas must take the prescribed oath of allegiance to the Constitution. This provision was removed by the Constitution (Removal of Oath) Bill, 1933, which became law in April 1933

Citizens of 21 years of age or over, without distinction of sex, who comply with the prevailing electoral laws, can vote for members of Dáil Éireann, each voter has only one vote, and voting is by secret ballot.

Every citizen of 21 years of age or over, not otherwise disqualified, is eligible for election to Dáil Éireann. Election is upon principles of Proportional Representation. The number of Deputies is fixed on a popular basis, and is at present 153. Each of the Universities existing in the year 1922 (the year in which the Constitution was enacted) is entitled to elect three Deputies. The General Election is to be held on the same day throughout the country, and Dáil Éireann, unless the Oireachtas is sooner dissolved, continues for 'six years or such shorter period as may be fixed by legislation'. The period fixed by legislation is at present five years.

The Senate consists of 60 members. The first Senate consisted of 30 members elected by Dáil Éireann, and 30 nominated by the President of the Executive Council. Of the latter, 15 hold office for 12 years and 15 hold office for 6 years.

To be eligible for membership a citizen must be at least 30 years of age and eligible for election to Dáil Éireann. The members must be citizens who 'have done honour to the nation by reason of useful public service' or who represent important aspects of the nation's life. The term of office of a member of Seanad Éireann is normally nine years. One-third of the members retire every three years, and their places are filled by an election 'at which the electors are the members of Dáil Éireann and the members of Seanad Éireann voting together on principles of proportional representation'. A panel of candidates is prepared before each election in the manner prescribed by law.

A person may not be a member of both Houses.

The executive consists of a Council of not more than twelve nor less than five ministers. They are responsible to the Dáil, and must include the President and Vice President of the Council, and the Minister for Finance. The President of the Council, the Vice President of the Council, the Minister in charge of the Department of Finance and the other members of the Executive Council must be members of the Dáil, save that one of such other members may be a member of the Senate. The President is nominated by the Dáil. He nominates the Vice President and other members of the Council, who must be approved by the Dáil. Every minister may speak in the Dáil and Senate.

The Chairman of the Dáil (Ceann Comhairle) receives a salary of 1,000*l* a year, the Deputy Chairman 750*l*, the Chairman of the Senate (Cathaoirleach) receives 1,200*l* and the Deputy Chairman 750*l* a year, members, except ministers and officials, 30*l* a month, and free first-class railway facilities between Dublin and their constituencies. Ministers receive a salary of 1,000*l* a year, and the President a salary of 1,500*l* a year.

The representative of the King is the Governor-General of the Irish Free State (Saorstát Éireann).

The Free State Parliament met for the first time, as such, on December 6, 1922. At the Election held in January, 1933, the state of the parties was Fianna Fáil, 77, Cumann na nGaedheal, 48, Labour, 8, Farmers,

11, Independent, 9, Total, 153 The Ceann Comhairle (Speaker) is not required by law to vacate his seat at a General Election

Governor General — Donal Buckley (Domhnall Ua Buachalla), appointed November 26, 1932 Salary, 10,000*l*

The Executive Council, appointed February 8, 1933, is as follows —

President and Minister for External Affairs — Éamon de Valéra (Éamon de Valera)

Vice President and Minister for Local Government and Public Health — Seán T. Ó Ceallaigh (Sean T. O'Kelly)

Minister for Lands and Fisheries — An Seanadóir Seosamh Ó Conghaile (Senator Joseph Connolly)

Minister for Industry and Commerce — Seán F. Lemass (Sean F. Lemass)

Minister for Finance — Seán Mac an tSaoi (Sean MacEntee)

Minister for Agriculture — An Dochtúir Séamus Ó Riain (Dr. James Ryan).

Minister for Defence — Proinsias Ó hAodhagáin (Frank Aiken)

Minister for Education — Tomás Ó Deirg (Thomas Derrig)

Minister for Justice — Pádraig Ruithléis (Patrick Rutledge)

Minister for Posts and Telegraphs — Gerald Boland

Attorney General — Conchubhar Alasdair MagUidhir (Conor Alexander Maguire, K.C.)

Ceann Chomhairle (Chairman of Dail Eireann) — Proinsias Ó Fáthaigh (Frank Fahy)

Cathaoirleach (Chairman of Seanad Eireann) — T. Westropp Bennett

Local Government

The Irish Free State is divided into twenty-seven administrative counties and four county boroughs governed by councils which, with a few exceptions, are elected triennially. The county councils administer county affairs generally, can hold property, levy rates, borrow money and must meet the demands of other authorities, such as the boards of health and public assistance and mental hospital committees, whom they are required by law to subsidise. The county borough council possesses with certain exceptions the powers of a county council, and is also a sanitary authority under the Public Health Acts.

The administrative counties include the urban county districts which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to public health, housing, libraries, maternity, and child welfare, etc., and is the sole rating authority within its area. There are sixty-five urban sanitary districts, comprising the four county boroughs, six municipal boroughs, two towns constituted under special Acts and fifty-three towns under the Towns Improvement Act, 1854. There are twenty-three towns constituted under the Towns Improvement Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers and can levy a limited rate. There are, therefore, altogether eighty-eight areas under municipal government.

An enlarged rural sanitary district, called the county health district, was created by the Local Government Act, 1925. This district generally extends over the county with the urban districts excluded. The county council performs its duties as a health authority through a board composed of ten members of the council, and is required to appoint a county medical officer of health for the effective administration of the sanitary code.

The health authority is also, with certain exceptions, the public assistance authority, and is called the board of health and public assistance. Public assistance is organised on a county basis, the poor law unions within each county have been amalgamated, boards of guardians have been abolished and workhouses closed as such. County homes have been established for the aged and infirm and chronic invalids, and county and district hospitals for the sick. Home assistance has become the normal method of poor relief. Old age pensions are a charge on State funds, but local authorities assist in the administration. The insane poor are under the care of statutory committees of the county and county borough councils who maintain nineteen mental hospitals. Industrial and reformatory schools are managed by religious communities, but maintained principally out of capitation grants from State and Local funds. Religious communities and voluntary associations also maintain schools for the deaf and dumb, the blind, the mentally deficient and other afflicted classes which local authorities have power to utilise and subsidise.

The county boroughs of Dublin and Cork, and the borough of Dun Laoghaire, have a system of government which combines an elected council with a manager. These councils have certain specified functions, including the making of a rate, raising loans, and making bye laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for a contribution towards travelling expenses.

Elections to public bodies are held according to the principle of proportional representation. The franchise extends practically to all persons of either sex who are of full age and have during a qualifying period occupied as owners or tenants any land or premises in the area, except premises let as furnished lodgings. Any married woman of 30 years or over residing with her husband in premises in respect of which the husband is entitled to be registered as a local government elector is also qualified for the franchise. Women are eligible for election as members of all local government bodies in the same manner and on the same conditions as men. Five members of the Dublin County Borough Council of 35 are elected by the commercial electors.

In order to abolish patronage and to ensure that only qualified persons are appointed to local offices a central body called the Local Appointments Commissioners is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, to professional and technical offices and to other prescribed offices. Before making an appointment to a prescribed office which cannot be filled by promotion the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners select persons for appointment by means of competitive examinations or by the machinery of selection committees.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. The central authority appoints official contractors after obtaining competitive tenders.

Justice

Justice is administered by Courts set up by the Courts of Justice Act, 1924, pursuant to the Constitution. They consist of a Supreme Court, a High Court, a Court of Criminal Appeal, a Central Criminal Court, a Circuit Court and a District Court.

The Supreme Court, which consists of the Chief Justice (who is *ex officio* an additional Judge of the High Court) and two other Judges, has appellate jurisdiction from all decisions of the High Court. The High Court, which consists of a President (who is *ex officio* an additional Judge of the Supreme Court of Appeal) and five ordinary Judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the Constitution, the High Court alone exercises original jurisdiction. The Court of Criminal Appeal consists of the Chief Justice or some other Judge of the Supreme Court and two ordinary Judges of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial Judge that the case is a fit one for appeal, or, in case such certificate is refused, where the Court itself, on appeal from such refusal, grants leave. Where leave to appeal is granted, the appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the Court to hear further evidence or to refer any matter back for report by the trial Judge. The decisions of the Court of Criminal Appeal are final, unless that Court or the Attorney General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court of Appeal. The Central Criminal Court consists of a Judge of the High Court, to whom is assigned, for the time being, the duty of acting as such Court. It is held at such times and in such places as the President of the High Court may direct, and at it are tried criminal cases which are outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court.

The Saorstát is divided into eight Circuits, each of which is presided over by a Judge of the Circuit Court. There are also two 'unattached' or additional Circuit Judges who assist in the various Circuits as required. The jurisdiction of this Court in civil proceedings is limited as to amount, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters, it has jurisdiction in all cases save murder, attempt to murder, conspiracy to murder, high treason, treason felony, treasonable conspiracy or piracy.

The District Court consists of thirty three Justices of the District Court and three Assistant Justices. Three of such Justices are assigned to the Dublin Metropolitan area, the remainder of the country is divided into

thirty districts, to each of which a Justice of the District Court is assigned. The District Court is a Court of summary jurisdiction with a small civil jurisdiction—in contract cases up to 25*l*, and in cases of tort, with certain exceptions, up to 10*l*.

All Judges and Justices of the District Court are appointed by the Governor-General on the advice of the Executive Council.

Defence.

Article 46 of the Constitution of the Irish Free State enacts that the exclusive right to the raising, maintenance and control of the armed forces in the Irish Free State is vested solely in the Oireachtas. The Executive Council is authorised by the Defence Forces (Temporary Provisions) Acts, 1923, as continued annually, to raise, train, equip, arm, pay and maintain

an armed force consisting of such number of officers and men of the Regular Forces and the Reserve as may from time to time be provided by the Oireachtas

The command in chief of, and all executive and administrative powers in relation to, the forces is by the Acts mentioned vested in the Executive Council and exercised through and in the name of the Minister for Defence. A Council of Defence is constituted by the 'Ministers and Secretaries Act, 1924' to assist the Minister for Defence in the administration of the business of his Department. It consists of the Minister (Chairman), a Civil Member (a member of Dail Eireann), and three military members, each responsible for so much of the work of the Department as may be assigned to him by the Minister, being the Chief of Staff, the Adjutant-General and the Quartermaster General, the Secretary of the Department acting as Secretary.

Enlistment is voluntary. The terms of engagement are — With the exception of small classes (*e.g.* School of Music, etc.), 2 years in Army Service and 10 years in the Reserve, short term enlistments are for 3 months in Army Service and 6 years in the Reserve.

The Irish Free State is divided into nine military districts: the Curragh, Dublin, Duncalk, Cork, Waterford, Limerick, Athlone, Galway and Sligo Military Districts. As a temporary measure, one District Commander and Staff may be detailed to administer two or more Military Districts. The District Commanders at Dublin, Curragh and Cork at present administer the whole area. The Infantry is organised in five regular battalions with nine Reserve Units. The remaining services include Air Artillery, Armoured Car, Engineer, Signal, Military Police, Medical, Supply and Transport and Ordnance Services, a School of Music, and a Military College with reserves for each of the services other than the Military Police. In addition to the above, there are also a Chaplain's Department and an Army Nursing Service.

The strength provided for (1932-33) is 519 commissioned officers and 5,500 non-commissioned officers and men with a Reserve Force of 220 officers and 8,200 non commissioned officers and men, a Volunteer Reserve of 26 officers and 734 non commissioned officers and men, and a Universities Officers Training Corps of 600 Cadets. The Reserve consists of officers of the Forces who have retired therefrom and have been commissioned in the Reserve and non commissioned officers and men who, having served in the Forces, have been transferred to the Reserve on expiration of Army Service. Reservists may be called out for training for a period not exceeding 30 days in any year, or, at any time, in aid of the civil power or in a national emergency. The Air Corps consists of 190 of all ranks with 24 aeroplanes.

Coastal Defence — Pending the Free State being in a position to undertake her own coastal defence, the coastal defence is, by arrangement, undertaken by Great Britain.

The estimated total expenditure for the financial year ending March, 1932, is 1,442,041*l.*

ASIA.

ADEN, PERIM, SOKOTRA, AND KURIA MURIA ISLANDS

Aden is a volcanic peninsula on the Arabian coast, about 100 miles east of Bab el Mandeb. It forms an important bunkering station on the highway to the East, and is fortified. The settlement includes Little Aden, a peninsula very similar to Aden itself, and the settlement and town of Shaikh Othmán on the mainland, with the villages of Imad and Hiswa.

Aden has been separated from the Bombay Presidency and formed into a separate province under a Chief Commissioner under the direct control of the Government of India from April 1, 1932.

Area 75 square miles, including the Protectorate and the Hadhramaut about 42,000 square miles, of Perim, 5 square miles. Population of Aden and Perim in 1931, 48,338 (29,358 males and 18,980 females), against 54,923 in 1921.

The only Government revenue is from duties on liquor, opium, and salt, and from income tax, court fees and judicial fines. Local taxes go to the Aden Settlement Fund. There is a Port Trust. The total receipts during the year 1931-32 amounted to Rs. 9,79,642, and the expenditure to Rs. 5,16,203. Imports (1931-32), by sea, Rs. 4,96,72,320, by land, Rs. 14,40,165, treasure (sea and land), Rs. 51,82,329, total imports, Rs. 5,62,94,814 (total, 1930-31, Rs. 6,25,71,901). Chief imports: Fuel oil, petrol, kerosene, cotton piece goods, grain, hides and skins, tobacco, coal, coffee, sugar, fruits, vegetables and other provisions. Exports, by sea, Rs. 3,24,30,454, by land, Rs. 5,89,044, treasure (sea and land), Rs. 46,43,331, total exports, Rs. 3,76,62,829 (total, 1930-31, Rs. 4,31,26,841). Chief exports: Salt, coffee, gums, hides and skins, cotton goods, tobacco, grains, provisions and sugar. These statistics are exclusive of government stores and treasure. In 1931-32, 1,483 merchant vessels of 5,813,623 tons (net) entered the port of Aden, of which 762 were British, in the same year 1,074 country (local) craft of 34,873 tons entered. At Perim 298 vessels entered, of which 15 were Government vessels. Aden itself produces little, its chief industries being the manufacture of salt and cigarettes, and building of dhows. The trade is largely a transshipment. There is a branch of the National Bank of India, Limited, and there is also one firm of private bankers.

Aden Protectorate (area about 42,000 square miles) comprises the territories and dependencies of the hinterland Chiefs who are in treaty relations with His Majesty's Government. In April, 1905, after demarcation of the frontier, Turkish and British Commissioners signed an agreement that determined the boundary between the Aden Protectorate and the (then) Turkish Yemen, from Sheikh Murad, opposite Perim Island, to Bana river, and thence north-east to the Great Desert (Rub' al Khali). This frontier is still in effect the boundary of the Aden Protectorate from the territories of the Imam Yehya bin Muhammad Hamid ud Din, of Sanaa', who after the Great War succeeded the Turks in the governance of their possession in the Yemen. The eastern limit of the Aden Protectorate is the boundary between Oman and the territories of the Sultan of Qishn, who is also Sultan of Sokotra Island, which lies off Cape Guardafui on the African coast. Sokotra is 1,400 square miles in extent, population said to be about 12,000, mostly pastoral inland, fishing on the coast. Religion

formerly Christian, but Moslem since the end of the seventeenth century. Chief products, dates and various gums, sheep, cattle (hump-less) and goats are plentiful, butter is exported. The Sultan entered into protectorate treaty relations with His Majesty's Government in 1886. Principal village, Tamaida.

The Aden Protectorate, which is not directly administered, is under the control of the Resident and Commander-in-Chief, Aden, on behalf of the Colonial Office.

Chief Commissioner and Resident and Commander in Chief —Lieut. Colonel B R Reilly, C I E, O B E. Appointed April 18, 1931.

The **Kuria Muria** islands, which were formerly attached to Aden, were transferred to the control of the Persian Gulf Residency in 1931.

The island of Kamaran in the Red Sea, about 200 miles north of Perim, was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Chief Commissioner of Aden. It has an area of 22 square miles and a population of about 2,200. A Quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator —Captain G V Wickham.

BAHRAIN ISLANDS.

The Bahrain islands form an archipelago in the Persian Gulf 20 miles off al Hasa on the Arabian coast. Bahrain, the largest island, is 27 miles long and 10 miles wide. About a twentieth part of its area is cultivated. Other islands are Muharraq, to the north east of Bahrain, 4 miles long and $\frac{1}{2}$ mile wide, Sitra, to the east, 3 miles long and 1 mile wide, Nebi Saleh, about 2 miles in circumference, and several uninhabited islets. The islands are low lying, the highest ground being a hill in the centre of Bahrain 400 feet high.

The Ruling Family, the Al Khalifa, came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The present chief, Shaikh Hamad bin Isa al Khalifa, C S I, became the Ruling Shaikh on December 9, 1932. The Ruler is in treaty relations with the Government of India, who are represented by a Political Agent.

The total population is estimated at about 120,000, of which three-quarters are the original inhabitants of the islands, of the Shia sect, the remainder, including the Ruling Family, being Sunnis. The Sunnis live mainly in the towns of Manama and Muharraq. There is a wealthy Persian community in Manama and a number of Indian merchants.

Manama, the capital and commercial centre, extends for $1\frac{1}{2}$ miles along the shore. Manama contains two hospitals, schools, a branch of the Eastern Bank, Post Office, wireless station, and the official residence of the Ruler. Wide roads connect the various quarters of the town. There is a municipal council in Manama and also in the town of Muharraq, on the adjacent island. The two islands are connected by a service of motor launches, which also ply to the mainland. The population of Manama is about 25,000 and that of Muharraq is about the same. There is a community of some 20 Europeans in Manama, including members of the Dutch Reformed Church Mission. Water in the two towns is supplied by artesian wells and nearly 200 fresh-water springs on the various islands are used for irrigation. Motor traffic is in use and roads exist between the towns and villages, which number about 100. An electric power station has been installed at Manama, the power is carried over on a causeway to Muharraq.

In the centre of Bahrain island there are many thousands of ancient tumuli whose origin is still uncertain.

Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf. Over 500 boats and 15,000 divers from Bahrain are engaged in fishing during four months of the summer. During the season Bahrain is visited by numerous Arab and continental pearl buyers from Europe. Other industries are boat-building, manufacture of sailcloth and reed mats, date cultivation and breeding of particularly fine white donkeys.

The Bahrain Petroleum Company, an offshoot of the Standard Oil Company of California, have commenced boring operations and have met with a considerable degree of success.

The greater part of the trade of Nejd and Hasa passes through Bahrain. The revenue of the State is obtained from the 5 per cent *ad valorem* Customs Duty.

In 1931-32, the total imports amounted to 821,824*l*, and exports to 547,896*l*. The chief imports were rice, 143,951*l*, wheat, 5,320*l*, wheat flour, 15,893*l*, sugar, 50,256*l*, loaf sugar, 25,441*l*, coffee, 32,352*l*, tea, 309,651*l*, ghee, 15,409*l*, piece goods, 159,069*l*. The chief exports were rice, 83,934*l*, wheat, 260*l*, wheat flour, 1,107*l*, sugar, 32,297*l*, loaf sugar, 18,530*l*, coffee, 15,014*l*, tea, 17,661*l*, ghee, 1,923*l*, pearls, 51,904*l*, piece goods, 80,535*l*.

There is a weekly mail service from and to India. Import of arms and ammunition is subject to special permission.

The principal coins in use are Indian rupees, but Austrian (Maria Theresa) dollars (worth 1*s* 11*d*) and Turkish liras (worth about 18*s*) are current. The measures employed are *dhaia* (= 19 inches). The weights are *roba* (4 lbs), *maund* (56 lbs) and *ruffa* (560 lbs).

BORNEO (BRITISH).

British North Borneo —Governor —A F Richards, C.M.G (March, 1930)

British North Borneo occupies the northern part of the island of Borneo. The interior is mountainous, Mount Kinabalu being 13,455 feet high.

Area, about 31,106 square miles, with a coast-line of over 900 miles. Population (1931 census) 270,223, consisting mainly of Mohammedan settlers on the coast and aboriginal tribes inland. The Europeans numbered 340, Eurasians, 236, Chinese, 47,799, natives of Malay Archipelago, 11,494. The number of natives of Borneo was 205,218. The most numerous are the Dusuns, 97,862, the Bajaus, 31,640, and the Muruts, 14,959. Chief towns, Sandakan (population 13,826), on the east coast, and Jesselton, on the west coast.

The territory is under the jurisdiction of the British North Borneo Company, being held under grants from the Sultans of Brunei and Sulu (Royal Charter in 1881). It is administered by a Governor (appointed with the approval of the Secretary of State) in Borneo, and a Court of Directors in London, appointed under the Charter. On May 12, 1888, the British Government proclaimed a formal protectorate over the State of North Borneo. In 1898 certain border lands were acquired from the Sultan of Brunei, and more recently certain inland territories have been occupied. For administrative purposes the whole country is divided into four Residencies, which are sub-divided into Districts. In December 1904, an area of about 200 square miles was transferred to Sarawak in exchange for rights over coal mines on Brunei Bay.

There are Protestant and Catholic missions. The laws are based on the Indian Penal, Criminal, and Civil Procedure Codes, and local Ordinances. There is an Imam's Court for Mohammedan law. Native and Indian constabulary, 500 men under European officers.

A railway, 127 miles, runs from Jesselton on Gaya Bay to Melalap in the interior, with a branch from Beaufort to Weston on Brunei Bay. There is communication by telegraphy, telephone, and wireless telegraphy.

At Jesselton and Sandakan there are agencies of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China, and the Bank of Taiwan. A State Bank has been established, with Head Office in Sandakan and a branch at Jesselton.

The Government issues its own copper coinage (cents and half-cents), nickel coinage of 1, 2½ and 5 cents, and silver coinage of 25 cents, also notes of one, five, ten, and twenty five dollars, and of 25 and 50 cents. Accounts are kept in dollar currency.

Brunei—In 1888 the neighbouring territories on the north-west coast of Borneo, Brunei and Sarawak, were placed under British protection. On January 2, 1906, by treaty, the Sultan of Brunei handed over the general administration of his State to a British Resident. The present Sultan Ahmed Tajudin Akhazul Khairi Wad-din succeeded, at the age of eleven years, to the throne on the death of his father in September 1924. The Pengiran Bendahara and Pengiran Pemancha were appointed Joint Regents during his minority. On September 19, 1931, His Highness the Sultan assumed full power and the Regency terminated. The Sultan receives an allowance of 1,400*l* a year from State funds, and his two principal ministers 700*l* a year each. Area about 2,500 square miles, and population, 1931 Census, 30,135 (Europeans, 60, Malays and Bornean races, 26,972, Chinese, 2,683, Indians, 377, others, 33). The chief town is Brunei (pop. 10,453). The old town is built over the water on the Brunei river, and a new town has developed on the mainland since 1910. There were ten vernacular schools in 1931, with 598 pupils. Police force, 1931, 1 Chief Inspector, and 67 non-commissioned officers and men. The climate is hot and moist, with cool nights. Average annual rainfall is a little over 100 inches. The native industries in Brunei town include boat building, cloth weaving, brass foundries, and manufacture of silver ware. The principal products are cutch (mangrove extract), rubber, jelutong, and sago. Most of the interior is under jungle, comprising numerous kinds of serviceable timber. Oil has been found in commercial quantity at Seria on the coast and the field is being explored and developed.

Revenue 1931, 39,901*l* (Customs, 15,695*l*, monopolies, 5,786*l*, licences, 2,130*l*, lands and forests, 9,518*l*, cession moneys, 1,773*l*), expenditure, 37,659*l*. Public debt, Dec. 31, 1931, 46,083*l*.

Sarawak.—Area about 50,000 square miles, coast line 500 miles, many rivers navigable. The government of part of the present territory was obtained

in 1842 by Sir James Brooke from the Sultan of Brunei. Various accessions were made between 1861 and 1905. Under an agreement of 1888 Sarawak is recognised as an independent State under the protection of Great Britain. The present Rajah, H. H. Sir Charles Vyner Brooke, G. C. M. G., appointed May 17, 1917. Population estimated at about 475,000, Malays, Dyaks, Kayans, Kenyahs, and Muruts, with Chinese and other settlers. The chief towns are the capital, Kuching, about 23 miles inland, on the Sarawak River, Sibü, 60 miles up the Rejang River, which is navigable by large steamers, and Miri, the headquarters of the Sarawak Oilfields, Ltd. At Kuching are Church of England and Catholic missions with schools. The revenue is derived chiefly from Customs, the Govt. opium monopoly, gambling, arrack and pawn farms, royalty on oil, land revenue, timber royalty, exemption tax payable by Malays, and from Dyak and Kayan revenue. The revenue in 1931 was 4,342,909 dollars, expenditure, 5,466,366 dollars. Public debt, *nil*. Coal exists in large quantities, and a syndicate has been formed for developing the coal fields at Selantik. A considerable oil field is being developed at Miri and Bakong in the Baram district. Foreign trade, 1931 imports, 10,385,056 dollars, exports, 17,414,672 dollars. The chief exports (1931) included (in dollars) sago flour, 534,124, pepper, 1,162,960, plantation rubber, 1,907,870, gutta jelutong, 534,084, gutta percha, 383, cutch, 2,367, benzene, 4,904,921, kerosene, 747,652, liquid oil fuel, 1,769,044, crude oil, 797,065, fish, 117,197, damar, 34,963, rattans, 10,661. The trade is mostly with Singapore. Shipping entered and cleared in the foreign trade, 1931, 1,377,076 tons. There is a constabulary consisting of about 900 men, principally Dyaks and Malays, under British army officers. Round Kuching are about 45 miles of roads, besides bridle paths. There are 30 post offices. The Government offices have a telephone system extending over Kuching and Upper Sarawak, and there is communication by wireless with Singapore, &c. There are also wireless stations at Kuching, Kuching (6th mile), Miri, Sibü, Lundu, Mukah, Simanggang, Bintulu, Binatang, Kapit, Limbang, Baram, Saratok, Matu, Belangian, Tatau, Lawas, Rejang and Kanowit. Distance from London, 8,700 miles, transit, 25 to 30 days. Telegrams are sent by wireless from Singapore.

Sarawak and Straits Settlements currency, 1 dollar = 2s 4d.

There is a Special Commissioner for Sarawak as well as a Government Agent in England whose offices are at Millbank House, Westminster, London, S. W. 1. There is also a Sarawak Pilgrim Officer at Jeddah.

CEYLON.

Constitution and Government, &c.

Ceylon, the ancient Taprobane (Tamraparni, the island of 'dusky leaves'), is an island in the Indian Ocean, by the south of India, lying

between 5° 55' and 9° 50' N. lat, and 79° 42' and 81° 53' E long Its area is 25,332 square miles

In 1505 the Portuguese formed settlements on the west and south, which were taken from them about the middle of the next century by the Dutch In 1796 the British Government annexed the foreign settlements to the Presidency of Madras, in 1802 Ceylon was separated from India and formed into a Crown colony

According to the terms of the Constitution established in 1833, modified on various occasions, and now embodied in the Order in Council dated March 20, 1931, the administration is in the hands of a Governor, aided by a State Council which deals with administrative as well as legislative matters and therefore sits in executive as well as legislative session, the control of departments is decentralised and the old Colonial Secretariat is replaced by groups of departments in charge of ten Ministers, of whom seven are elected members of the Council, the remaining three, called Officers of State, being the Chief (formerly Colonial) Secretary, the Legal Secretary, and the Financial Secretary In the administration of his departments each of the seven elected Ministers is associated with a Standing Executive Committee of the State Council, communal representation has been abolished, and the territorial franchise, which was limited to adult males possessing certain literary and property qualifications, has been extended—subject to certain specified qualifications—to adults of both sexes The State Council is now composed of 46 members elected on a territorial basis, with 8 Nominated Unofficial Members, and the 3 Officers of State Of the 50 electoral districts the 4 in Jaffna Revenue District remain unrepresented, as no candidates came forward for election

Governor—Sir Graeme Thomson, G C M G, K C B (appointed December 1, 1930) Salary 8,000*l* (including entertainment allowance of 1,500*l*)

Colonial Secretary—F G Tyrrell, C M G

For purposes of general administration, the island is divided into nine provinces, presided over by Government Agents, with assistants and subordinate headmen There are three municipalities, with eleven Urban District Councils, eleven local boards and one Board of Improvement, mainly for sanitary purposes

Area and Population.

The population of Ceylon (exclusive of the military and the shipping) at the partial Census held on February 26, 1931, showed an increase of 17·97 per cent since 1921 The distribution by Provinces, and the average number of persons per square mile in each Province, are shown in the following table—

The population on the principal estates, mainly consisting of immigrant Tamils from Southern India, numbered, at the census of 1931, 790,376, and formed 13.05 per cent of the total population. The Indian Tamils on Estates numbered 692,540.

Marriages registered, 1931, 24,544¹, births registered, 199,170 (101,399 males and 97,771 females), deaths registered, 117,453 (58,859 males and 58,594 females).

The urban population is 13.2 per cent of the total population. The principal towns and their population (exclusive of the military, shipping, and estates), according to the census of 1931, are —Colombo, 284,155, Galle, 38,424, Jaffna, 45,708; Kandy, 36,541.

Religion and Education

At the census of 1921 the numbers of adherents to the principal religions were —Buddhists, 2,769,805, Hindus, 982,073, Muslims, 302,532, Christians, 443,400, exclusive of the military and the shipping.

Buddhism was introduced from India in the third century B.C., and is still the religion of the majority of the inhabitants, especially in the southern part of the island. It is (unlike Buddhism in Tibet, China, and Japan) materialistic and atheistic, and in popular usage has a large admixture of the doctrines and practices of popular Hinduism and of the aboriginal wild tribes.

Education is free in vernacular schools, but fees are charged in English schools.

The number of vernacular schools in 1931 was: Government schools, 1,395 (attendance, 131,998 boys and 69,913 girls), Aided schools, 2,248 (attendance, 159,730 boys and 116,396 girls), Unaided schools, 1,185 (attendance, 21,079 boys and 9,864 girls). There were also 343 English and Bilingual schools, attended by 59,124 boys and 18,943 girls.

The total sum spent by Government on vernacular education in 1930-31 was 8,493,025 rupees.

The Royal College and the Government Training College with the English school attached to it are Government institutions. The other English schools are grant-in-aid schools, the total grants to which in 1930-31 amounted to 1,935,603 rupees. A University College opened in January, 1921, has (1930-31) 393 students on the 1011 Technical education is given in the 'Technical Schools' (607 students in 1931). There are 74 industrial schools.

Justice, Crime, and Pauperism.

The law is Roman-Dutch, modified by colonial ordinances. Kandyan Law is to a certain extent in force in the Kandyan Provinces, and special systems of personal law are recognised for the Muslim community, and for the Tamils of the Jaffna District. The criminal law has been codified on the principle of the Indian Penal Code. There are a Supreme Court, police courts and courts of requests, and district courts, intermediate between the latter and the Supreme Court. Village councils deal with petty offences. In 1931 the number of cases instituted in the police courts and municipal magistrates' courts was 128,466. Offences against the Penal Code dealt with during the year 1931 numbered 19,095, of these, the number disposed of by the courts as true cases was 10,141, and the convictions 5,175², 21,027.

¹ This is exclusive of Muslim marriages, which are seldom registered.

² For cognizable offences exclusive of theft cases under Rs. 20 and simple assault cases.

convicted persons were sent to prison Police force, December 31, 1931, 3,125 of all ranks

There is no poor law, though a few old persons receive a charitable allowance from the Government varying from Rs. 1 to Rs 12 50 each per mensem

HONG KONG.

Constitution and Government.

THE Crown Colony of Hong Kong was ceded by China to Great Britain in January, 1841, the cession was confirmed by the treaty of Nanking, in August, 1842, and the charter bears date April 5, 1843. Hong Kong is the great centre for British commerce with China and Japan, and a military and naval station of first class importance.

The administration is in the hands of a Governor, aided by an Executive Council, composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, and the Director of Public Works (the last being a special appointment), and three unofficial members. There is also a Legislative Council, presided over by the Governor, and composed of the General Officer Commanding the Troops, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Treasurer, the Director of Public Works, the Inspector General of Police, the Harbour Master, and the Director

of Medical and Sanitary Services (the last four being special appointments), and eight unofficial members, viz, six nominated by the Crown (three of whom are Chinese), one nominated by the Chamber of Commerce, and one by the Justices of the Peace

Governor—Sir William Peel, K.C.M.G., K.B.E. Appointed February, 1930 Salary 7,000*l*, including 2,200*l* allowance

Colonial Secretary—W. T. Southorn, C.M.G.

Area and Population.

Hong Kong is situated at the mouth of the Canton River, about 90 miles south of Canton. The island is an irregular and broken ridge, stretching nearly east and west about 11 miles, its breadth from 2 to 5 miles, and its area rather more than 32 square miles, separated from the mainland by a narrow strait, the Lyeemoon Pass, about half a mile in width. The opposite peninsula of Kowloon, on the mainland, was ceded to Great Britain by treaty in Oct. 1860, and now forms part of Hong Kong. The city of Victoria extends for upwards of five miles along the southern shore of the beautiful harbour. By a convention signed at Peking on June 9, 1898, there was leased to Great Britain for 99 years a portion of Chinese territory mainly agricultural, together with the waters of Mirs Bay and Deep Bay and the island of Lan tao. Its area is about 356 square miles, including islands, with about 94,000 inhabitants, exclusively Chinese. Area of Old Kowloon is 3 square miles. Large areas have also recently been reclaimed at Kowloon Bay, Wanchai, and North Point. Total area of colony, 391 square miles.

The population of Hong Kong, excluding the Military and Naval establishments, according to the 1931 census returns was as follows—Non Chinese civil population, 19,369, Chinese civil population City of Victoria (including Peak), 358,851, villages of Hong Kong, 41,156, Kowloon (including New Kowloon), 255,095, New Territories (land), 97,781, population afloat, 68,721, total Chinese population, 821,104, total civil population, 840,473.

The registered births and deaths for five years were as follows—

Year	Births	Deaths	Births per 1,000 ¹	Deaths per 1,000 ¹
1926	4,041	12,516	4.5	15.90
1927	7,500	14,761	8.4	16.50
1928	9,309	14,757	9.5	15.1
1929	10,223	17,565	9.8	16.8
1930	11,184	19,260	9.7	14.2

¹ Birth and death rates are calculated only on the population of Hong Kong and Kowloon, there being no jurisdiction by the sanitary authorities over the New Territories (except New Kowloon).

In 1928 the number of Chinese emigrants was 257,162, and the number of immigrants 187,847, in 1929, 227,523 and 185,390, in 1930, 183,900 and 223,186, and in 1931, 100,869 and 283,890 respectively.

Education.

Education is not compulsory, but all schools are State-inspected, and required to maintain a certain standard of efficiency. There are 5 Government schools, including 1 first class secondary school, for children of British parentage, with an average attendance of 423 (1931), and 13 Government

schools for Chinese boys and two for Chinese girls, with a total average attendance of 3,519. There is one school for Indians, with an average attendance of 131 (1931). There are also numerous schools in receipt of grants. The total number of pupils in all schools in 1931 was 68,593. The total expenditure on education in 1931 was 1,479,279 dollars, net.

The Hong Kong University in 1931 had 268 students, of whom 14 were women. The majority of the students are Chinese. The University is a residential teaching University with six halls of residence.

Justice and Crime.

There are a Supreme Court, the second court or Court of Summary Jurisdiction, and a third court or Appeal Court, three police magistrates' courts, and a marine magistrate's court. In 1931, 2,813 were committed to Victoria gaol for criminal offences, in 1930, 2,384. The daily average of prisoners in gaol was 1,125 in 1930, and 1,122 in 1931. There is a police force in the colony numbering (1932) 2,110 men, of whom 263 are Europeans, 726 Indians, and 1,121 Chinese.

Finance

The public revenue and expenditure of the colony were as follows in recent years —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	dollars	dollars		dollars	dollars
1928	24,968,399	21,280,242	1930	27,818,473	28,119,646
1929	24,544,475	21,983,257	1931	83,146,724	31,160,774

The revenue is derived chiefly from land taxes, licences, quarry rent, liquor, tobacco and motor spirit duties, and an opium monopoly.

Public debt, 341,800*l*, raised in 1887 and 1893 for public works. Another loan, 1,143,933*l* in Inscribed Stock at 3½ per cent, was raised in 1906 for purposes of railway construction, also a 6 per cent Public Works (1927) Loan of 5,000,000 dollars was authorised. On December 31, 1931, the balance of assets over liabilities was 11,347,629 dollars.

Defence

The military expenditure for 1931 was 5,029,681 dollars. The Defence Corps cost 97,083 dollars for 1931. Hong Kong is the headquarters of the China Squadron.

Industry, Commerce, Shipping, and Communications

The chief industries are sugar reining, ship-building and repairing, rope-making, tin refining, tobacco manufacture, the manufacture of cement, and the manufacture of knit goods. Deep-sea fishing is important, especially for the New Territories.

The commerce of Hong Kong is chiefly with Great Britain, India, Burma, and Ceylon, Straits Settlements and F.M.S., Australia, United States, China, Japan, Indo China, and Siam. Hong Kong is a free port (except as regards the importation of intoxicating liquor, and other spirituous liquor, tobacco and motor spirit). Principal articles of trade are sugar and flour, rice, cotton yarn and thread, and cotton and woollen piece goods, silk and silk piece goods, hemp, leather, tin, wolframite, mild

steel, bulk and case oil (kerosene), oils and fats, peanuts, Chinese medicines, fertilisers, fish and fishery products, tea, coal, cement, condensed milk, matches

INDIA AND DEPENDENCIES.

INDIA, as defined by Parliament (52 and 53 Vict c 63, s 18), comprises all that part of the great Indian Peninsula which is directly or indirectly under British rule or protection In a popular sense it includes also certain countries such as Nepal, which are beyond that area, but whose relations with India are a concern of the Foreign and Political Department of the Government, whose envoy resides in the country concerned These countries will be found included in the third part of the YEAR BOOK among Foreign Countries The term British India includes only the districts subject to British law, and does not include Indian States The term is so used, unless otherwise stated, in the tables, &c, that follow

Government and Constitution.

The present form of government of the Indian Empire is established by various Parliamentary Statutes which are now consolidated in the Government of India Act, 1915, as amended by the Government of India (Amendment) Act, 1916, the Government of India Act, 1919, the Government of India (Leave of Absence) Act, 1924, the Government of India (Aden) Act, 1929, and other amending Acts of no great intrinsic importance All the territories originally under the government of the East India Company are vested in His Majesty, and all its powers are exercised in his name Under the Royal Titles Act, 1876, the King of Great Britain and Ireland has the additional title of Emperor of India

It is the declared policy of Parliament, as stated in the preamble of the Act of 1919, implementing the Declaration of August 20, 1917, to

provide for 'the increasing association of Indians in every branch of the administration and the gradual development of self governing institutions with a view to the progressive realisation of responsible government in British India as an integral part of the British Empire' The Royal Statutory Commission (the Simon Commission) which was appointed on November 8, 1927, made two visits to India in 1928-29, and its report was published in June 1930

In October, 1929, it was agreed between the Commission and H M G. that the Commission's terms of reference covered consideration of the relations of the Indian States with British India, and that after the Commission had reported a tripartite conference of representatives of the British Government, British India and the Indian States should be held to formulate proposals for the new Constitution of India. The decision to hold this Conference was announced by the Viceroy in India in a Gazette Extraordinary on October 31, 1929, together with the statement that 'it is implicit in the Declaration of 1917 that the natural issue of India's constitutional progress, as there contemplated, is the attainment of Dominion Status'. The Conference met in London for a first session (November 12, 1930, to January 19, 1931), a second session (September 7, 1931, to December 1, 1931), and a third session (November 17, 1932, to December 24, 1932)

Government in England—The administration of the Indian Empire in England is entrusted to a Secretary of State for India, assisted by a Council of not less than eight and not more than twelve members, appointed for five years by the Secretary of State. At least one half of the members must be persons who have served or resided ten years in India, and have not left India more than five years previous to their appointment. No member can sit in Parliament. The duties of the Council, which has no initiative authority, are to conduct the business transacted in the United Kingdom in relation to the government of India. Subject to the Government of India Act and rules made thereunder, the expenditure of the revenues of India, both in India and elsewhere, is subject to the control of the Secretary of State in Council, and no appropriation can be made without the concurrence of a majority of votes of the Council. The Secretary of State regulates the transaction of business.

In exercise of the power given by the Government of India Act, a High Commissioner for India in the United Kingdom was in 1920 appointed to act as agent of the Governor General of India in Council, and on behalf of provincial governments in prescribed cases, and to conduct any business assigned to him by the Secretary of State in Council.

The salary of the Secretary of State, and the cost of the India Office for other than agency services are borne by the British, and not, as formerly, by the Indian Exchequer. The cost of the High Commissioner and his staff is charged to Indian Revenues.

Central Indian Government—The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Council, commonly styled the Government of India. The Governor-General, or Viceroy (so called since 1858), is appointed by the Crown, and usually holds office for five years. The Capital of India and the seat of government were moved from Calcutta to Delhi in 1912, the latter being formed into a separate territory under a Chief Commissioner. The creation of the new Capital at New Delhi was completed in December 1929 by the entry of the Viceroy into his new residence 'The Viceroy's House,' planned by Sir Edwin Lutyens, R.A. The formal opening took place in

February 1931. The summer seat of the Government is at Simla [April to October]

There is an Indian Legislature consisting of the Governor General and two Chambers, the Council of State and the Legislative Assembly (opened 1921). The Council of State consists of 60 members, of whom 33 are elected and 27 nominated; not more than 20 may be officials, but not more than 17 officials are at present (1929) nominated. The Legislative Assembly contains 145 members, 41 nominated, of whom 26 are to be official members, and 104 elected. The life of the Council of State is five years, and of the Assembly three years, but dissolution may occur sooner, or the period may be specially extended by the Governor General. Joint sittings of the two Chambers may be held for the settlement of differences between them. The Legislative Assembly was presided over for the first four years by a President appointed by the Governor General, thereafter he is to be elected. This Legislature has power, subject to certain restrictions, to make laws for all persons within British India, for all British subjects within other parts of India, and for all native Indian subjects of the King in any part of the world. The Governor General, with the assent of His Majesty signified, after copies of the proposed enactment have been laid before both Houses of the British Parliament, may enact measures essential for the safety, tranquillity, or interests of British India or any part thereof, against the wish of the Council or Assembly.

The Members of the Governor General's Executive Council are appointed by the Crown: three must have had ten years' service in India, and one must be a barrister or pleader of not less than ten years' standing. They have charge of the following Portfolios —

Home—Mr Harry Graham Haig, C S I, C I E, I C S. (March 31, 1932)

Finance—Sir George Schuster, K C S I, K C M G, C B E, M C (November 4, 1928)

Education, Health and Lands—Khan Bahadur Mian, Sir Fazl-i-Husain, K C S I, K C I E, K t. (April 1, 1930)

Law—Sir Brojendra Lal Mitter, K C S I, Barrister at Law (December 5, 1928)

Railways and Commerce.—Sir Joseph Bhoré, K C I E, C B E, I C S. (April 30, 1930)

Industries and Labour—Sir Frank Noyce, K C S I, C B E, I C S.
(April 8, 1932)

The salary of each member is Rs 80,000 a year

The *Foreign and Political* Department is directly under the Governor-General. The Commander-in-Chief is also the *Army* Member of the Executive Council. At the head of each Department (except the Railway Department which is under the Chief Commissioner of Railways) is one of the Secretaries of the Government of India.

British India is now divided into fifteen administrations. Madras, Bombay, Bengal, the United Provinces of Agra and Oudh, the N W Frontier Province, the Punjab, Burma, Bihar and Orissa, the Central Provinces and Berar, and Assam are each under a *Governor*, and Ajmer-Merwara, Coorg, Baluchistan, Delhi, and Andaman and Nicobar Islands are each under a *Chief Commissioner* as far as British territory is concerned.

High Commissioner for India in the United Kingdom—Sir Bhupendra Nath Mitra, K C S I, K C I E, C B E (appointed 1931), India House, Aldwych, London.

Provincial Government—According to the Government of India Act, 1919, which came into operation in December, 1920, and January, 1921, the various functions of government are classified as Central and Provincial subjects, the latter being practically definitely committed to the Provincial Governments, while for purposes of convenience certain Central subjects, such as the collection of income tax, may be dealt with by the Provincial Governments as the agents of the Central Government. The Governor General in Council retains unimpaired powers of control over the Provincial Governments in their administration of 'reserved' subjects, but in 'transferred' subjects is only competent to intervene where it is necessary to safeguard Central subjects or to decide questions where two or more Provinces are concerned, or to safeguard the due exercise and performance of any powers and duties possessed by or imposed on the Governor General in Council in regard to the High Commissioner, to the raising of loans by local Governments, or under rules made by the Secretary of State in Council. The list of subjects transferred to Indian Ministers, with certain reservations, includes local self government, medical administration, public health and sanitation, education, public works, agriculture, fisheries, co-operative societies, excise, registration, development of industries, adulteration, weights and measures, and religious and charitable endowments. Certain sources of revenue are definitely allocated to the Provinces, which are required to contribute to the Central Government certain annual sums which are to be the first charge on their revenues.

The Provincial Governments are based upon a scheme of dyarchy, or dualised form of government, and consist of the Governor in Council and the Governor acting with Ministers. The Ministers, who are elected members of the Legislative Council, have charge of certain Departments of Government known as 'transferred subjects,' while others, the 'reserved subjects,' are administered by the Governor in Council. Thus each side has its share in the conduct of the Government, with responsibility for its own work, while co-ordination is achieved by the influence of the Governor, who is associated with both sections.

The Governor's Executive Council consists of not more than four members, to be appointed by the Crown, one being qualified by twelve years' public service in India. The Legislative Council contains not more than 20 per cent of official members and at least 70 per cent (in Burma 60 per cent) elected members, and, in addition to its legislative functions, votes all

expenditure, subject to certain specified exceptions and to the power of the Local Government to incur expenditure, on reserved subjects without the Council's assent if the Governor certifies such expenditure to be necessary. The normal duration of the Legislative Council is three years, but it may be dissolved sooner by the Governor, or its term specially extended for one year. The Ministers are appointed by the Governor to administer the transferred subjects, and are not to be officials. The Governor may not be a member of the Legislative Council, but may address the Council.

The Provinces to which this new form of government has been applied are Bengal, Madras, Bombay, Bihar and Orissa, United Provinces, Punjab, Central Provinces, Coorg, Assam, the N W Frontier Province, and Burma. The minimum number of members in each Legislative Council is: Madras, 118, Bombay, 111, Bengal, 125, United Provinces, 118, Punjab, 83, Bihar and Orissa, 98, Central Provinces, 70, Coorg, 17, Assam, 53, Burma, 92. The numbers may be increased. There are 7.8 million voters out of the population of 247 millions in British India, including Burma. In Madras, Bombay, Bengal, United Provinces, Punjab, Central Provinces, Assam, Burma, and Bihar and Orissa the franchise has been extended to women; and women are eligible as candidates for the Madras, Bombay, United Provinces, Central Provinces, and Punjab Councils and for these constituencies in the Legislative Assembly.

The provinces are usually formed into divisions under Commissioners, and then divided into districts, which are the units of administration. At the head of each district is an executive officer (collector and magistrate, or deputy commissioner), who has entire control of the district, subject to the control of his official superior. Subordinate to the magistrate (in most districts) there are a joint magistrate, an assistant magistrate, and one or more deputy-collectors and other officials. There are 273 of such districts in British India.

Relations with Indian States — The control which the Supreme Government exercises over the Indian States varies considerably in degree. Except in matters which affect India as a whole, such as Posts and Telegraphs, Customs and in nearly all cases Currency, the Government of India does not ordinarily interfere with the administration of the States. The Princes have no right to make war or peace, or to send ambassadors to each other or to external States; they maintain military forces within certain limits, the sanction of the Government of India is required before Europeans of certain classes can be employed, and the Supreme Government can exercise control in case of misgovernment. Some of the States, but not all, make fixed annual payments to the Supreme Government.

The total area is 598,138 square miles, with a population of nearly 70 millions.

LOCAL SELF GOVERNMENT

There were at the end of 1929-30, 777 municipalities, with a population of 19 millions. The total number of members of the municipal bodies was 12,781, of whom 11,964 were non official. The municipal bodies have the care and lighting of the roads, water supply, drainage, sanitation, medical relief, vaccination, and education, particularly primary education; they impose taxes, enact bye laws, make improvements, and spend money, with the sanction of the Provincial Government. Their aggregate income in 1929-30 was Rs 17,88,52,934, exclusive of loans, sales of securities, and other extraordinary receipts amounting to Rs. 19,89,38,056. The aggregate expenditure was Rs 18,99,28,506, excluding extraordinary and debt expenditure of Rs 18,71,02,795. By the Local Self Government Acts

of 1883-84, the elective principle was introduced, in a large or small measure, all over India, and has since been further extended by recent legislation. In all larger towns, and in many of the smaller towns, the majority of members of committees are elected by the ratepayers, everywhere the majority of town committees consists of Indians, and in many committees all the members are Indians. In many municipalities women have the right to vote, and in a few they are eligible for election. For rural tracts, except in Burma, there were 789 district and sub district Boards or Councils, and 457 Union Panchayats in Madras, with 21,355 members in 1929-30, 15,820 being elected. These Boards are in charge of roads, district schools, markets, public health institutions, &c. Their aggregate income in 1929-30 was Rs 16,36,58,453, and expenditure Rs 16,32,33,541.

Educational institutions in India are of two classes —(a) those in which the course of study conforms to the standards prescribed by the Department of Public Instruction or by the Universities or Boards of Secondary and Intermediate Education, and either undergo inspection by the Department, or regularly present pupils at the public examinations held by the Department, Universities or the Boards. These institutions are called 'Recognised,' but may be under public or private management (b) Those that do not fulfil these conditions. These are called 'Unrecognised'. As regards recognised institutions, the system of education operates, in general, through (i) the Primary Schools, which aim at teaching, through the vernacular languages, reading, writing, and other elementary knowledge, (ii) the Secondary Schools, in which the instruction does not go beyond the matriculation or school leaving certificate standard. The schools are divided into English or vernacular, and also into high and middle schools, (iii) the Intermediate Colleges, and (iv) the Colleges. The colleges are affiliated to eight federal universities—Calcutta (1857), Madras (1857), Bombay (1857), Punjab (1882), Patna (1917), Nagpur (1923), Andhra (1926), and Agra (1927). There are also six unitary teaching and residential universities—Allahabad (1887), Lucknow (1920), Rangoon (1920), Dacca (1921), Delhi (1922), and Annamalai (1929), two denominational universities—the Hindu University at Benares (1916), and the Muslim University at Aligarh (1920), and two universities in Indian States—Mysore (1916) and Hyderabad (Osmania) (1918). In some provinces, secondary or secondary and intermediate education is controlled by Boards. The number of Boards operating in 1930-31 was six.

There are in addition, various institutions of a special character, such as technical schools teaching arts and industries, agriculture, engineering, &c., law schools, medical schools and colleges, and training colleges and normal schools for the training of teachers, schools for adults, defectives, criminal and hill tribes, labourers and factory children, and reformatory schools for juvenile offenders.

The following table gives the number of institutions and scholars in 1930-31 in British India, including Ajmer-Merwara, British Baluchistan, the Civil and Military Station of Bangalore, and the administered areas in Indian States —

A system of State Scholarships exists by which it is possible for a boy to pass from the village school to the University. There are also State Scholarships, awarded by local Governments and the Government of India, to enable the holders to study in the United Kingdom for two or more years

During 1930-31 the following newspapers and periodicals were published in Madras, 285, Bombay, 290, Bengal, 704, United Provinces, 632, Punjab, 439, Burma, 177, Bihar and Orissa, 139, Central Provinces and Berar, 58, Assam, 46, Delhi, 104, N W F P, 18. The percentage of newspapers and weekly and monthly publications published in various languages is as follows —English, 17.8, Urdu, 23.2, Gurmukhi, 2.2, Hindi, 14.7, Bengali, 13.8, Tamil, 3.9, Assamese, 0.34, Gujarati, 2.5, Oriya, 0.89, Marhati, 4.2, Kanarese, 0.92, Sindhi, 1.4, Telugu, 1.5, others, 12.05. The number of printing presses was 5,919, and 2,332 books in English or other European languages and 14,815 in Indian languages were published

Justice and Crime

The Presidencies of Madras, Bombay, and Bengal, and also the Province of Agra, the province of Bihar and Orissa, the province of the Punjab and the Province of Burma, have each a supreme high court, with 14, 11, 16, 12, 11, 12 and 10 judges, respectively, in 1931. There is appeal to the Privy Council in England. Oudh has a chief court. The Central Provinces and Berar, North West Frontier Province, Coorg, Sind, and Chota Nagpur have judicial commissioners. For Assam the high court of Calcutta is the highest judicial authority. Below these courts are, for criminal cases, Courts of Session, and below these, Courts of Magistrates (first, second, and third class). The inferior civil courts are determined by special acts or regulations in each province. The most extensive system consists of the sessions judge acting as a 'District Judge', subordinate judges, and below them 'Munsifs'. There are also numerous special courts to try small causes. Side by side with the civil courts there are revenue courts, presided over by officers charged with the duty of settling and collecting the land revenue. The number of civil suits instituted in 1930 was 2,513,844, and of persons under trial in criminal cases 2,485,870.

Nearly all the civil judges, and the great majority of the magistrates, in the courts of original jurisdiction are Indians, in Bengal, Madras, and Bombay the proportion of Indians in the appellate court is considerable.

The civil police in 1930 were 197,973 in strength, varying from 4.2 per 10,000 of the population in Bihar and Orissa to 37.27 per 10,000 in the North-West Frontier Province.

¹ Since the introduction of the Reforms from April 1, 1921, definite sources of revenue are now allocated to Provincial Governments. Hence the accounts and estimates of the Government of India now embrace only the transactions of the Central Government. The 1932 estimates include the provision for the North West Frontier Province which has, as from April 18, 1932, been constituted into a Governor's province. The estimates for 1933 therefore exclude the provision for the new North West Frontier Province. Provincial Governments used to pay annual contributions to the Central Government. The contributions in the first year were Rs 983 lakhs. These were reduced to Rs 608 lakhs in 1926-27. In 1927-28 there was a permanent remission of 350 lakhs, and a non recurring remission of the balance Rs 258 lakhs. There was complete and final remission of Provincial contributions from 1928-29.

¹ Exclusive of Portion of Land Revenue due to irrigation

² The salt duty was raised in 1928, and reduced to previous level in 1924

³ The Excise revenue is derived from intoxicating liquors, hemp drugs, and opium consumed in the country. The bulk of the revenue comes from spirits. The excise systems and rates of duty vary from province to province

⁴ Liquors, oils, motor cars and cycles, sugar, tobacco, cotton manufactures, metals (including silver bullion, coin, etc.), manufactured articles and articles of food and drink are the chief items from which the customs revenue is derived. Under this head are also included the proceeds of export duties on rice, on jute (imposed in 1916), on tea (imposed in 1916, abolished in 1927) and on hides (imposed in 1919) and of excise duties on motor spirit (imposed in 1917), on silver (imposed in March, 1930), and on kerosene (imposed in 1922). The import of silver bullion and coin except under licence was prohibited in July, 1917, but the prohibition was withdrawn during 1920-21

⁵ Includes the proceeds of a super tax imposed in 1917

⁶ The figures for 1928-27 have been converted at the rate of Rs 10 to the £, and those from 1927-28 at the rate of Rs 13½ to the £

⁷ Includes the proceeds of an excess profits duty imposed in April, 1919

⁸ Estimates

Land Revenue — This is levied according to an assessment on estates or holdings. In the greater part of Bengal, and Bihar and Orissa, about one-fourth of Madras, and some districts of the United Provinces of Agra and Oudh the assessment was fixed permanently at the end of the 18th century, while it is fixed periodically at intervals of from twelve to forty years over the rest of India. For details as to the nature of the different tenures of land that prevail in India see the YEAR-BOOK for 1886 p. 799. See also under AGRICULTURE.

130 THE BRITISH EMPIRE.—INDIA AND DEPENDENCIES

The land revenue was contributed in 1931-32 (revised estimate) as follows —

Administrations	Rs	Administrations	Rs
India, General	6,88,000	Punjab	2,01,71,000
Baluchistan	7,71,000	Burma	6,49,21,000
N W Frontier Province	17,91,000	Shan States Federation	4,04,000
Madras	5,23,88,000	Bihar and Orissa	1,77,70,000
Bombay	4,86,92,000	Central Provinces and Berar	2,07,18,000
Bengal	3,10,24,000	Assam	1,18,10,000
United Provinces of Agra and Oudh	5,92,78,000	Coorg	4,04,000

Opium —In British territory the cultivation of the poppy for the production of opium is practically confined to the United Provinces, and the area under cultivation in that Province is being gradually reduced. Opium is also grown in many of the Indian States of Central and Northern India. The question of suppressing poppy cultivation in these States has been investigated by a Committee, which started work in November, 1927. After giving careful consideration to the report submitted by the Committee, the Government of India have formulated a scheme which forms at present the basis of negotiations with the States. Public auctions at Calcutta were discontinued from April 1926. Export to China was prohibited in 1913, and in June 1926 the Government of India decided to reduce progressively exports of opium from India, except for strictly medical and scientific purposes, so as to extinguish them altogether at the end of 1935. The maximum for each country is fixed, and a reduction of 10 per cent of the 1926 exports is made each year.

Army Expenditure —The net expenditure in recent years on military services is given as follows —

Year ended March 31	—	Year ended March 31	—
	Rs Crores		Rs Crores
1926	56 00	1930	55 10
1927	55 97	1931	54 80

Local Funds —The above excludes the revenue and expenditure of municipalities and of district and local boards. The income of the former is

derived mainly from rates, octroi, taxes on houses, lands, vehicles and animals, tolls, and assessed taxes, and of the latter from cesses on land. The gross income for 1929-30 of all municipalities was Rs 37,77,90,990. The gross expenditure was Rs 37,70,26,301. The income of district and local boards was Rs 16,86,58,453, and the expenditure Rs 16,32,33,541.

Defence

The defence forces of India consist of units of the Royal Air Force, units of the British Regular Army, the Indian Army, the Auxiliary and Territorial Forces, the Indian Army Reserve and the Indian State Forces. With the exception of the last, these forces are administered by the Air Vice-Marshal and the headquarters staff of the Army in India respectively, under the supreme control of the Commander-in-Chief, who is the Army Member of the Viceroy's Executive Council. The military forces are organised into the Northern, Southern, Eastern and Western Commands, and the Burma Independent district, each Command contains a number of districts and independent brigades. The garrison of Aden was transferred in 1927 from the Indian to the Home Command.

The British regular forces in India are paid by the Indian exchequer. They are organised in brigades and divisions with the Indian Army, the normal proportion being 1 British battalion to 3 Indian. There are 19½ Indian Pack Batteries. The personnel of the remaining batteries of Horse, Field and Garrison Artillery is wholly British except for a proportion of Indian drivers. The Tank Corps and Royal Air Force are wholly British.

The Auxiliary Force, organised under the Indian Auxiliary Force Act, 1920, is confined to persons of British extraction. Enrolment is voluntary, but entails periodical training extending to 64 hours annually for infantry and 80 hours for other arms. The force, which comprises all arms, is liable to be called out or embodied for local service within strictly defined limits, and acts as a second line to the permanent garrison of India. Its strength in 1932 was about 30,200.

The Indian Territorial Force was brought into existence in 1920, and is organised on the lines of a militia, with an annual training of 28 days. It is intended to form a second line to the regular Indian Army in time of war, the whole of its personnel being liable to general service. Its strength in 1930 was 18 provincial, 4 urban, and 11 university training corps units. Strength, 15,400.

The Army in India Reserve has been recently constituted, in 2 classes: class A, of men who have completed from 5 to 7 years' army service with less than 15 years' combined service, class B, of men up to 15 years' combined service. Strength in 1932 was 36,000.

The Indian State Forces are raised and maintained by Indian States, and are trained under the supervision of British officers, who act in an advisory capacity. Strength, in 1932, about 38,000.

The composition of the forces in India was, in 1932, except for Indian State Forces, as follows —

	Cavalry Regiments	R. H. A. Batteries	R. F. A. Batteries	Medium Batteries	Pack Batteries	S. & M. Field Troops	S. & M. Field Companies	Infantry Battalions	Pioneer Battalions	Armoured Car Companies

Territorial Force	—	—	—	—	26	—	—	11

The strength of the British army in India in 1932 was 59,773, and of the Indian Army 162,600. The Field Army is organised in 4 divisions and 5 cavalry brigades.

The supply and transport services are provided by the Indian Army Service Corps. The medical services of the British troops are provided by the Royal Army Medical Corps, and those of the Indian Army by the Indian Medical Service.

There are 2 battalions of the Indian Army serving in China and Malaya. These are paid by the British exchequer.

The 7th Light Cavalry, the 16th Light Cavalry, the 2/1st Madras Pioneers, the 4/19th Hyderabad Regt, the 5th Royal Bttn, 5th Mahratta Light Infantry, the 1/7th Rajput Regt, the 1/14th Punjab Regt, and the 2/1st Punjab Regt have been selected for Indianisation. Ten Indian gentlemen are now nominated annually to the Royal Military College, Sandhurst, to enable them to qualify for commissions in the Indian Army. The preliminary education is given at the Prince of Wales' Royal Indian Military College at Dehra Dun. Plans for the creation of an Indian Sandhurst are in preparation.

The Royal Air Force in India comprises 6 squadrons organised in 3 wings of 2 squadrons each, the Aircraft Depot and Aircraft Parks are directly under R.A.F. Headquarters, India. Its establishment is 260 officers and 1,912 British and 148 Indian other ranks. The military estimates for 1931-32 amounted to 52 crores of rupees.

The Government of India has proceeded with the reconstruction of the Royal Indian Marine in accordance with the recommendations of the Departmental Committee of 1925, though the force has retained its original name. It has now, however, become a combatant force serving under conditions similar to those originally proposed for the Royal Indian Navy. At present the seagoing units of the R I M comprise the 4 sloops *Hindustan* (completed 1930), *Cornwallis*, *Clive* and *Lawrence*, 2 surveying vessels and 2 patrol vessels.

Agriculture and Industry.

Agriculture, Land Tenure, &c — The chief industry of India has always been agriculture. The total number of the population supported by agriculture, including forestry and raising of livestock, was, according to the census of 1921, a little more than 229 millions out of a total population of 318 millions. In most of the provinces there is a Department of Land Records, and in every province a Department of Agriculture. There are staffs of experts in the provinces, an Imperial staff of experts with a fully equipped central station, Research Institute and College for post graduate training of private students and of those who have completed the Agricultural Course in provincial colleges; a Civil Veterinary Department for the prevention and cure of cattle diseases, an Imperial Institute for veterinary

research for the preparation of sera and antitoxins, and an Imperial Institute of Animal Husbandry and Dairying. Following the recommendations made by the Royal Commission on Agriculture, an Imperial Council of Agricultural Research has been established by the Government of India with the object of promoting, guiding and co-ordinating agriculture and veterinary research throughout India. Improved varieties of crops had been introduced in 1929-30 in about 14 million acres, the average increased value of the produce being some Rs. 15 crores.

In provinces where the *zamindāri* tenure prevails (i.e., where single proprietors or proprietary brotherhoods possess large estates of several hundreds or thousands of acres), the State land revenue is assessed at an aliquot part (usually about one half) of the ascertained or assumed rental, this aliquot part being itself the land tax. The revenue is payable on each estate as a whole, the assessment remaining unchanged for the period of settlement. In the greater part of Bengal, and Bihar and Orissa, and in parts of the United Provinces and Madras the settlement is a permanent one and not liable to revision. In provinces where the *rayatwāri* (or *ryotwari*) tenure prevails (i.e., where each petty proprietor holds directly from the State, and has no landlord between himself and the Government), the revenue is separately assessed on each holding, and land revenue becomes payable at once (or after a short term of grace in the case of uncleared lands) on all extensions of cultivation. The *rayatwāri* proprietor may throw up his holding, or any portion of it, at the beginning of any year after reasonable notice, whereas the *zamindār* or large proprietor engages to pay the revenue assessed upon him throughout the term of the settlement.

The following table shows in 1929-30 the latest available returns of the land surveyed under the two types of tenure, and the land revenue assessed —

The net area actually sown in British India in 1930-31 was 229,087,103 acres

Of the total area under irrigation in 1930-31, 25,874,981 acres were irrigated by canals, 6,762,984 acres by tanks, 11,742,777 acres by wells, and 5,309,785 acres by other sources. The average area irrigated by Government Works during the triennium 1927-30 was about 30 million acres, as compared with 27.8 million acres, the average of the previous triennium. The net return on capital outlay was 5.4 per cent in 1929-30.

Livestock Census, in British India (exclusive of Baluchistan), 1930-31: oxen, 121,459,000; buffaloes, 31,418,000; sheep, 25,295,000; goats, 35,743,000; horses and ponies, 1,683,000; mules, 75,000; donkeys, 1,371,000; camels, 526,000.

Forests—The lands under the direct control of the State Forest Department are classified as 'Reserved Forests' (forests intended to be permanently maintained for the supply of timber, &c, or for the protection of water supply, &c), 'Protected Forests,' and 'Unclassed' forest land. 136 THE BRITISH EMPIRE:—INDIA AND DEPENDENCIES

The net revenue from the State forests in 1929-30 was about Rs 2,49,86,848

Industries—The most important indigenous industry, after agriculture, is the weaving of cotton cloths. Other important indigenous industries are silk rearing and weaving, shawl and carpet weaving, wood carving and metal working. One of the most important industries connected with agriculture is the tea industry, the average number of persons employed being about 922,700. The area under tea in 1930 was about 805,800 acres, distributed as follows: Assam, 433,800; Bengal, 199,200; Bihar and Orissa, 4,200; United Provinces, 6,100; Punjab, 9,700; Madras, 70,600; Coorg, 400; Tripura (Bengal), 8,400; Travancore, 69,200; Mysore, 3,700; and the Cochin State, 500. The production was, in 1930, 391 million lb. The exports of Indian tea from British India (including the State of Travancore) in 1931-32 were to United Kingdom, 292,011,000 lb; Canada, 14,128,000 lb; United States, 9,761,000 lb; Persia, 2,015,000 lb; and to Australasia, 3,539,000 lb. The total exports were 377,142,000 lb in 1929-30, 356,918,000 lb in 1930-31; and 342,385,000 lb in 1931-32.

Some statistics for 1930 of mills, factories, &c, subject to the Indian Factories Act, are given as follows for British India (*excluding* Indian States and Government factories)

BRITISH PROVINCES

Information concerning the Provinces in British India is given below, in alphabetical order

AJMER MERWARA.

An agency subordinate to the factory at Surat was established at Ajmer early in the 17th century. The British received the tract by cession after the Pindari War in 1818. This small province of Ajmer-Merwara consists of one district with three sub-divisions, Ajmer, Kekri, and Merwara, with an area of 2,711 sq miles and a population of 560,292 (1931 census). The administration is under a Chief Commissioner, who in the capacity of Agent to the Governor General in Rajputana resides at Ajmer and has a hill residence at Mount Abu. The local administration is under a Commissioner. The city of Ajmer has a population of 119,524. The income of the province was Rs 17 59 lakhs in 1930-31, and the expenditure Rs 36 37 lakhs. In

1931 there were 15,969 scholars in 244 recognised educational institutions for males, and 3,253 in 50 similar institutions for females. The Government College at Ajmer had 217 students in 1931.

Chief Commissioner—The Hon. Sir Leonard W. Reynolds, K C I E, C S I, M C (appointed March 14, 1927), salary, Rs. 48,000 per year.

ANDAMAN AND NICOBAR ISLANDS

The **Andaman Islands** lie in the Bay of Bengal, 120 miles from Cape Negrais in Burma, the nearest point on the mainland. Five large islands closely grouped together are called the Great Andaman, and to the south is the island of Little Andaman. There are some 200 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. The total area is 2,508 square miles. The Great Andaman group is about 219 miles long and, at the widest, 32 miles broad. The group, densely wooded, contains many valuable trees, the best known of which is the *padak* or Andaman red wood. The islands possess a number of harbours and safe anchorages, notably Port Blair, Port Cornwallis, and Bonington, the last being most favourably situated for forest trade. The aborigines, 474 (255 males and 219 females) in 1931, live in small groups over the islands, some are savages of a low Negrito type. The total population of the Andaman Islands (excluding the aborigines) in 1932 was 16,381 (12,456 males and 3,925 females). In 1930–31 the forest receipts amounted to Rs. 19,38,810. The coconut, rubber, Manila hemp, and Bahamas aloe are successfully cultivated. In 1932 there were 10,835 head of cattle and 3,137 goats. There is wireless telegraphy with Burma and Madras. Mail steamers connect Port Blair with Calcutta, Rangoon, and Madras. The islands have been used since 1858 by the Government of India as a penal settlement for life and long term convicts, but the practice is being discontinued, the island being left to develop on free lines. The settlement possesses about 72,362 acres of cleared land. There were, in 1932, 7,672 convicts (including 123 women) in the place, of whom 7,052 (including 122 women) were on ticket of leave in the settlement supporting themselves. The Andaman Islands are under the Government of India, and the Officer in Charge is the Chief Commissioner. The Civil, Military and convict population of Port Blair in March 1932 was 16,381.

Man (E. H.), On the Aboriginal Inhabitants of the Andaman Islands (Reprinted from the Journal of the Anthropological Institute), 1931.

The **Nicobar Islands** are situated to the South of the Andamans, 75 miles from Little Andaman. The British formally took possession in 1869. There are twenty-one islands, nine uninhabited, total area, 635 square miles. The islands are usually divided into three groups, Southern, Central, and Northern, the chief islands in each being respectively, Great Nicobar, Camorta with Nankauri, and Car Nicobar. There is a fine land-locked harbour between the islands of Camorta and Nankauri, known as Nankauri Harbour. The Nicobarese inhabitants numbered 9,481 (4,889 males and 4,592 females) in 1931. The islanders are known to have pursued the coconut trade for at least 1,500 years. The coconut production is estimated at 15 million nuts per annum, of which some 8 million are sold by barter and exported in small native craft and Chinese junks in the form of copra. The Government is represented by a permanent Assistant Commissioner at Car Nicobar and a

Tahsildar at Nankauri. The islands are attached to the Chief Commissionership of the Andamans and Nicobars

Chief Commissioner at Port Blair—J W Smyth, Esq, C I E, I C S. salary, Rs 36,000 per year

BALUCHISTAN

Government.—After the Afghan War, 1878-81, the districts of Pishin, Shorárud, Duki, Sibi, and Sháhrig were assigned to the British and in November, 1887, were formally constituted as British Balúchistán. In 1888, the districts of Quetta and Bolán were made over by the Khán to the British on an annual quit-rent of Rs. 25,000 and Rs. 30,000 respectively. In 1886, the Bori valley, in which is now the cantonment of Loralai, was occupied. In 1887, the Khetran country, now known as the Bárkhan tahsil, was brought under British control, in 1889 British authority was established in the Zhob valley and Kakar Khurásán, in 1896 Chágai and Western Sinjrání were included in administered territory, in 1899, the Nuskhí Niabat was made over by the Khán of Kalát on an annual quit-rent of Rs. 9,000, and in 1903 the Nasirábád tahsil was acquired from the Khán on an annual quit rent of Rs. 117,500. The area of British and administered territory, including tribal areas, is 54,228 sq. miles, and the population (1931) 463,508. The chief town is Quetta, with a population (1931) of 60,272 (town proper 34,881, and cantonment 25,391). It is the only municipality. The head of the civil administration is the Agent to the Governor-General and Chief Commissioner in Balúchistán. The area under his direct administration is

divided as follows Quetta Pishin, Sibi, Zhob, Loralai, Chagai districts and Bolan Sub division The revenue administration of the Province is entrusted to an officer who is styled the Revenue and Judicial Commissioner

Regular troops are cantoned at Quetta, Chaman, Fort Sandeman, and Loralai, and detachments are stationed at different places, principally in the Zhob and Loralai Districts, for the preservation of law and order There is also a police force, supplemented by levies The Indian Staff College was opened in Quetta in 1907

BENGAL PRESIDENCY

Constitution and Government.—The British first came to the shores of Bengal in 1633, when the first factories were established. A new centre of trade was fixed by Job Charnock at Calcutta in 1690. In 1699 Bengal was constituted a separate Presidency, and there were Presidents and Governors of Fort William from 1700 to 1774, the last being Warren Hastings. There were Governors General of Fort William from 1774 to 1834. In 1834 the Bengal Presidency was divided into two Presidencies, 'Agra' and 'Fort William in Bengal'. In 1854 the Government of Bengal was entrusted to a Lieutenant Governor, the offices of Governor General of India and Governor of Bengal having previously been united in one person. In 1874 the Bengal Province was reduced to Bengal proper, Bihar and Orissa. In 1905 a portion of Bengal proper together with Assam went to form a new Province, Eastern Bengal and Assam. In 1910 the Government of the remainder of Bengal with Bihar and Orissa was constituted into a Lieutenant-Governorship with an Executive Council consisting of three Members. A new Presidency of Bengal, reuniting all the Bengali-speaking districts, was established in 1912 under a Governor in Council (three Members). Finally, from 1921, in accordance with the Government of India Act of 1919, the administration consisted of the Governor with four Executive Councillors (two being Indians) for the 'reserved' subjects and of the Governor with three Indian Ministers for the 'transferred' subjects. The hot weather capital is Darjeeling. There is a Legislative Council of 140 Members consisting of 114 elected and 26 nominated and *ex officio* Members (not more than 20 may be officials). For administrative purposes there are five divisions, under which there are 27 districts, exclusive of Calcutta. For the purposes of Local Self-Government there are 26 District Boards, all except two with non official Chairmen, 82 Local Boards, and 2,217 smaller units called Union Boards. There are 115 Municipalities. The Calcutta Corporation was reconstituted by an Act of 1923 with a Mayor, Chief Executive Officer and other officials, all of whom are to be elected by the Corporation, there are 85 Councillors and 5 Aldermen.

BURMA

Constitution and Government—As far back as 1612 the East India Company had agents and factories at Syriam (near Rangoon), Prome and Ava From 1796 there was a Resident at Rangoon The first Burma War gave in 1826 Arakan and Tenasserim to the British, in 1852 Pegu was annexed by Lord Dalhousie, in 1862 the Provinces in Burma were amalgamated under a Chief Commissioner, and in 1886 Upper Burma was annexed In 1897 the charge was changed to a Lieut.-Governorship From 1923 the Province has been constituted a Governor's Province under the Government of India Act of 1919 In the hot weather season the Government moves from Rangoon to Maymyo The Governor and two Members of the Executive Council (one a Burman) are in charge of the 'reserved' subjects, and the Governor and two non-official Ministers are in charge of the 'transferred' subjects There are seven administrative Divisions, exclusive of the Shan States (four Lower Burma, three Upper Burma) under Commissioners, and under these again 37 Deputy Commissioners of Districts The Northern and Southern Shan States, which form part of British India, are administered by their Chiefs under the supervision of the Commissioner of the Federated Shan States These groups were federated in 1922, and since 1923 there has been a Council of Chiefs In 1930 the unadministered area between the Lushai Hills District, the Chin Hills District, the Akyab District, and the Hill District of Arakan, was absorbed into the Chin Hills District and the newly constituted Arakan Hill Tracts, and also taken under administration, the

Chin Hills Regulation being applied to it. The newly constituted Arakan Hill Tracts are administered by a Superintendent who corresponds with the Commissioner, Arakan Division, but he is drawn from the inferior cadre of the Burma Frontier Service. Since 1930, direct administration was begun in the Triangle and Hukawng Valley by the application of the Kachin Hill Tribes Regulation, with slight modifications.

The Legislative Council of Burma consists of 103 Members, of whom 80 are elected and 23 nominated and *ex officio*. Not more than 14 may be officials.

Governor—H E Sir Hugh Lansdown Stephenson, K C S I, K C I E, I C S appointed December 22, 1932 salary, Rs 1,00,000 per year.

Area, Population and Religion—The area of the Province is 262,732 sq miles. Burma proper, inclusive of the Chin Hills and Kachin Hill Tracts, covers 184,102 sq miles. The Shan States cover 62,305 sq miles, and there are 16,325 sq miles of unadministered territory. The total population (1931) was 14,667,146. The leading towns are Rangoon, the capital (400,415), and Mandalay (147,932). The proportion of religions per 1,000 in 1931 was: Buddhists, 843, Animists, 52, Hindus, 39, Mohammedans, 40, Christians, 23, and others, 3. The Burmans belong to the Tibetan group. CENTRAL PROVINCES AND BERAR

Constitution and Government—From 1853 the territories of the Kingdom of Nagpur were declared by Lord Dalhousie to have lapsed to the Paramount Power, and were then administered as the Nagpur Province by a Commissioner under the Government of India. With some additions this area was constituted the Central Provinces in 1861. The seat of Government is at Nagpur, but in April and September for two periods of three months and one and a half months respectively, it is transferred to Pachmarhi. Owing to the bankruptcy of Berar and the debts owing to the British Government, a treaty with the Nizam of Hyderabad in 1853 allotted to the British certain districts known as the Hyderabad 'Assigned Districts' for the payment of the Hyderabad Contingent. In 1902 the rights of the Nizam over Berar were leased in perpetuity to the Government of India at an annual rental of Rs 25 lakhs, and Berar was transferred to the administration of the Chief Commissioner of the Central Provinces. In 1920 a Governorship was created. Associated with the Governor are two Executive Councillors (one an Indian) for the 'reserved' subjects, and two Ministers for the 'transferred' subjects. There are four main administrative divisions with 19 districts, each under a Deputy Commissioner. All the Central Provinces States are under a Political Agent. The Legislative Council of 78 has 55 elected Members and 18 nominated and *ex-officio* Members.

(not more than 10 may be officials) For Local Self Government there are 15 District Councils and 2 Independent Local Boards in the Central Provinces, and 4 District Councils and one Independent Local Board in Berar, also 74 Municipalities

Governor—His Excellency Sir Montagu Butler, K C S I, C.B., C I E, C.V.O., C B E appointed 1925 salary Rs 72,000 per year

Area, Population and Religion—The British Districts of the Central Province have an area of 82,149 sq miles and a population (1931) of 12,065,885, Berar an area of 17,789 sq miles and a population of 3,441,838, and the States an area of 33,112 sq miles and a population of 2,483,214. The urban population is only 97 per mille. The leading towns are Nagpur, the capital, 215,165, and Jubbulpore, 124,382. The Hindus in 1931 numbered 15.1 millions (nearly five sixths of the total population), the Animists 1.96 millions, Mohammedans 0.7 million, and Christians 0.1 million.

Education—The Nagpur University was established in 1923 to this the Colleges at Nagpur, Jubbulpore and Amraoti are affiliated. There were 2,079 collegiate students in 1930-31. There is a High School Board for regulating and supervising high school education. There were 109,873 pupils in secondary schools in 1930-31. Under the head of primary education there were 4,150 recognised Institutions (with 290,356 pupils) for boys, and 397 similar Institutions (with 28,187 pupils) for girls. For Technical Education there is an Engineering School with 160 students at Nagpur. There are 49 pupils at the Rajkumar College, Raipur.

Justice and Crime.—The Court of the Judicial Commissioner at Nagpur, with a Judicial Commissioner and four Additional Judicial Commissioners, is the highest Criminal and Civil Court. There were in 1931 9 District and Sessions Judges, with 791 Magistrates for criminal cases, and 108 Subordinate Judges for civil cases. There were 41,741 criminal cases tried, and 133,201 civil suits were instituted.

Finance.—The revenue (revised estimates) for 1931-32 was Rs 422 lakhs. Towards this total Land Revenue was estimated to contribute 207 lakhs, Excise Rs 67 lakhs, Stamp Duties Rs 56 lakhs, and Forests Rs 48 lakhs. On the expenditure side the total was Rs 465 lakhs, General Administration cost Rs 68 lakhs, Police Rs 61 lakhs, Education Rs 52 lakhs, Civil Works Rs 53 lakhs, and Forests Rs 37 lakhs. The contribution of Rs 22 lakhs hitherto payable by the Provincial Government of the Central Provinces and Berar to the Central Government of India was remitted permanently with effect from the year 1928-29.

Production and Industry.—The Agricultural College at Nagpur had 112 students in 1929-30. The result of the distribution of improved seeds by the Department of Agriculture was an increased out-turn valued at about 120 lakhs. The area irrigated from State Works in 1930-31 was 423,231 acres. The number of Co-operative Societies of all kinds in 1929-30 was 4,137. Berar and the Western Districts of the Nagpur Provinces grow cotton. Nagpur is the centre of a cotton-spinning and weaving industry. The Forest Department controls 19,618 sq miles of Forests. The Forests gave in 1930-31 a surplus of Rs 11.5 lakhs. The coal output in 1930 was 952,371 tons, and the manganese output was 552,344 tons. There were 911 factories of all kinds, in 1931, with a daily average of 64,386 employees.

Communications—In 1931-32 there were 5,135 miles of metalled roads, and 3,506 unmetalled. The railway mileage is 2,572, of which 1,734 miles are broad gauge and 838 narrow and metre gauge.

MADRAS PRESIDENCY

Constitution and Government—The first trading establishment made by the British in the Madras Presidency was at Peddapali (now Nizampatam) in 1611 and then at Masulipatam. In 1639 the English were permitted to make a settlement at the place which is now Madras, and Fort St George was founded. By 1801 the whole of the country from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule. The administration is now in the hands of the Governor in Council (four members, two being Indians) for 'reserved' subjects, and of the Governor acting with three Indian Ministers for the 'transferred' subjects. The Legislative Council at present consists of 132 Members, of whom 98 are elected, and 34 nominated and *ex-officio*. The maximum number of officials is 23. There are 26 Districts each under a District Collector and Magistrate. Under the head of Local Self Government there are 25 District Boards (under non official Presidents), 81 Municipal Councils, and the Corporation of Madras. The summer capital is Ootacamund.

Governor—His Excellency the Rt Hon Lieutenant Colonel Sir George Frederick Stanley, P C, G C I E, C M G, appointed October 26, 1929, salary Rs 120,000 per year.

Area, Population and Religion—Area, 142,260 sq miles. There are also five Indian States which are separately described (p 169). Population (1931), 46·7 millions. Principal languages, Tamil, Telugu, Malayalam and Kanarese. The first two account for 78 per cent of the population. The principal towns are, Madras with 617,228 inhabitants, Madura with 182,007, Trichinopoly with 141,640, and Salem with 102,181. Hindus form 89 per cent, Mohammedans 7 per cent, Christians 3 per cent, and Animists 1 per cent.

Education.—There are three Universities, the Madras University, the Andhra University, and the Annamalai University. The first of these, founded in 1857, is an affiliating University and since 1923 has been discharging teaching functions to a limited extent. The Andhra University, founded in 1926, is mainly an affiliating body. The Annamalai University, founded in 1929, is the first attempt in South India at organising a unitary residential type of University. The number of Colleges affiliated to or recognised by the two affiliating Universities in 1930-31 was as follows—Madras 48, of which 15 were maintained by Government, Andhra 12 (3 maintained by Government). On March 31, 1931, male Arts students numbered 11,837, and women Arts students numbered 582. Public educational institutions numbered 56,991, with 2,893,549 scholars. There were 50,121 public elementary and 531 secondary schools for Indian boys, and 5,648 elementary and 72 secondary schools for Indian girls. Public funds contributed 65 per cent of the total expenditure on education in 1929-30.

Justice and Crime.—There is a High Court with a Chief Justice and 13 Judges. There were in 1930 in all 962 Criminal Courts, and 324,843 criminal cases were instituted in 1930. The Police Force in 1931 numbered 29,430, under an Inspector General, while there was a force of 2,209 for Madras City. The total number of civil suits instituted in the Courts, including village and panchayat Courts, was 551,779 in 1930.

Finance.—The revenue (revised estimates) of the Government of Madras was Rs. 1,642 lakhs in 1931-32, the chief contributions being Rs 754

lakhs from Land Revenue, Rs 406 lakhs from Excise, Rs 226 lakhs from Stamps and Rs 45 lakhs from Forests. The expenditure (revised estimates) in 1931-32 was Rs. 1,693 lakhs. General Administration accounted for Rs 274 lakhs, Police for Rs 178 lakhs, and Education for Rs 243 lakhs. The contribution to the Central Government was completely and permanently remitted from 1928-29. The proportion of the expenditure in the 'transferred' departments to the total expenditure (excluding the contribution to the Central Government) was 41 per cent in 1931-32.

Production and Industry—Agriculture engages 71 per cent of the population. There were in 1930-31, 24 cotton mills with 36,254 workers. The total number of factories working in 1931 was 1,470 with 137,377 operatives. The Madras Government in 1930-31 treated at the Government Quinine Factory 483,432 lbs of cinchona bark. The area irrigated in 1930-31 was 7,573,043 acres. Productive irrigation works showed a return of 6.17 per cent on the capital outlay. The output of timber by the Forest Department was 85,580 tons in 1930-31.

Commerce and Communication.—In 1930-31, Madras Presidency had 21,857 miles of metalled roads, and 12,915 miles of unmetalled roads, as well as 1,426 miles of navigable canals. There were 4,886 miles of railway, in addition to 136 miles of District Board lines. The imports of private merchandise under the head of Seaborne Foreign Trade were valued in 1929-30 at Rs 26.88 crores, and the exports at over Rs 45 crores. Trade to the United Kingdom represented 37 per cent of the total trade of the Presidency. In 1929-30 the Madras Port accounted for 70 per cent of the total trade, its imports and exports amounted to Rs 50.62 crores in 1929-30. Cochin is the chief of the other ports.

LACCADIVE ISLANDS

(ATTACHED TO MADRAS PRESIDENCY)

A group of 14 islands (9 inhabited), about 200 miles off the west of Malabar coast of the Madras Presidency. The northern portion is called the Amindivis and is attached to the collectorate of South Kánara, the remainder to the administrative district of Malabar. Population (1931) 16,046 nearly all Mohammedans. The language is Malayalam, but the language in Minicoy, which is considerably to the south of the other islands, is Mahl. NORTH-WEST FRONTIER PROVINCE

In 1849 the territory on the frontier was annexed and placed under a Board of Administration at Lahore in the Punjab. The frontier districts

were separated in 1901 from the Punjab under the name of the North-West Frontier Province: the districts are Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan. The British territory represents one-third of the whole area of 86,356 sq miles now under a Governor appointed on April 18, 1932, the remaining area is tribal territory, partly under Political Agents, and partly under the political control of the Deputy Commissioners of the British districts. The British territory in the five districts has an area of 13,518 sq miles and a population of 2,425,076 (1931). About 91 per cent are Moham medans. Peshawar, the capital, had in 1931 a population of 121,866. The summer seat of the local government is Nathia Gali, in the Hazara district. The chief language is Pashtu, an Iranian tongue with many Punjabi words. The chief Court is that of the Judicial Commissioner and Additional Judicial Commissioner, and there are three Sessions Judges. In 1930-31 the total number of offences reported was 34,268. The total number of civil suits instituted was 19,405. The gross revenue in 1931-32 was Rs 81 40 lakhs, of which Rs. 21 59 lakhs was Land Revenue, and 9 12 lakhs from Stamps. The gross expenditure in 1931-32 was Rs 323 47 lakhs, Rs 24 54 lakhs being Political expenditure, Rs 126 10 lakhs on Frontier Watch and Ward, Rs 34 74 lakhs expenditure on Police, and Rs 38 19 lakhs on Civil Works. In 1931-32 there were 986 recognised educational institutions for males with 75,462 scholars, and 180 similar institutions for females, with 13,007 scholars. The percentage of scholars to the total population is 5 6 for males and 1 2 for females. The expenditure on Education was Rs 27 22 lakhs, of which 68 5 per cent is from Government Funds. Wheat covered 37 per cent of the total acreage sown in 1930-31. The irrigated area in that year was 975,092 acres. The railway line through the Khyber, 27 miles long, with 34 tunnels, from Jamrud to the frontier of Afghanistan, was opened in November 1925.

Governor (and Agent to the Governor-General in respect of tribal area) North West Frontier Province (April 18, 1932) —His Excellency Lieut Col Sir Ralph Griffith, K C S I, C.I.E : appointed 1931, salary, Rs 66,000 per annum

PUNJAB

Government and Constitution —Punjab denotes the land of the five rivers, viz Jhelum, Chenab, Ravi, Beas and Sutlej. British power in the Punjab began with the dissipation by the successors of Ranjit Singh of the power consolidated by him. In 1849 the country was annexed, and placed under a Board of Administration. In 1853 it was placed under a Chief Commissioner, and by 1859 the Punjab and the Delhi Territory constituted the charge of a Lieut-Governor. The N W Frontier area was separated in 1901, and the Delhi province in 1911. Since 1921 the administration has been under the control of a Governor, with an Executive Council of two Members (one an Indian) in charge of 'reserved' subjects, and the Governor with three Indian Ministers in charge of 'transferred' subjects. The Legislative Council consists of 94 Members, 2 *ex officio*, 71 elected, and 21 nominated. of the latter not more than 14 may be officials. There are 29

districts grouped for administrative purposes under five Commissioners. The system of election has been introduced in the membership of all the District Boards, except Simla. There are 107 Municipalities. Lahore is the capital, but from May to October the Government Offices are transferred to Simla, where the Governor's residence is known as Barnes Court.

Governor—His Excellency Sir Herbert William Emerson, K O S I, C I E, C B E appointed January 17, 1933, assumed office, April 1933, salary Rs 1,00,000 per annum.

Area, Population and Religion—The Punjab proper has an area of 99,027 sq miles and a population of 23 58 millions (1931). Its Indian states, 34 in number, have an area of 37,061 sq miles and a population of 4 91 millions. Of the population 56 5 per cent is Mohammedan, 26 8 per cent Hindu and 13 per cent Sikh. The leading towns are: Lahore, the capital (429,747), Amritsar (264,840), Multan (119,457), Rawalpindi (119,284), and Sialkot (100,973).

Education—The University of the Punjab was constituted as an examining University in 1882. It has always maintained an Oriental College and a Law College, and since 1920 various departments of University teaching have been added. A College of Commerce was instituted in 1927. In 1930-31 there were 12,035 male students in Arts Colleges, 652,647 in secondary schools, and 392,929 in primary schools. The total expenditure on education in 1930-31 was Rs 328 lakhs, of which Rs 185 lakhs were provided by Government and Rs 69 lakhs by fees.

Justice and Crime.—The Chief Court of two Judges created in 1866 was converted in 1919 into a High Court at Lahore, which at present consists of a Chief Justice and 10 Puisne Judges, including two additional judges. There are 25 permanent District and Sessions Judges, including one employed at Delhi. In 1931 the number of criminal cases brought to trial was 138,412, and the number of civil suits instituted was 238,557. The Provincial Police force consists of nearly 23,000 officers and men and is under the command of an Inspector General.

Finance—The revenue in 1931-32 was Rs 1,098 lakhs, to which the receipts from Irrigation Works contributed the large proportion of Rs 480 lakhs, Land Revenue Rs 223 lakhs, Stamps Rs 110 lakhs, and Excise Rs 97 lakhs. The expenditure was Rs 1,211 lakhs. The chief items of expenditure were: Education Rs 161 lakhs, Police Rs 124 lakhs, and General Administration Rs 107 lakhs. The entire contribution of the Punjab to the Central Government was permanently remitted in 1928-29. The net profit earned by the Irrigation Department has been —

	Lakhs		Lakhs
1928-24	Rs 807	1927-28	Rs 289
1924-26	Rs 833	1928-29	Rs 254
1926-28	Rs 867	1929-30	Rs 268
1928-27	Rs 270	1930-31	Rs 281

Production and Industry.—Agriculture affords subsistence to 60 5 per cent of the population. In 1932 there were 8,387,243 acres of Forests under the Forest Department. The total receipts of the Department from 1869-1932 amount to Rs. 1,031 lakhs, and the expenditure to Rs. 807 lakhs.

The total surplus during this period was thus Rs 224 lakhs. In 1931-32 there was a deficit of Rs 2 28 lakhs owing to capital expenditure on irrigated plantations. Next to agriculture, hand loom weaving is the most important industry, both as regards the number of workers engaged and the value of the products. It is estimated that over 200,000 rely on weaving as their main occupation. Agricultural prosperity is mainly due to irrigation: the canal irrigated area rose from 3 million acres in 1893 to 13 million acres in 1929-30.

There is a Punjab Arts and Crafts depot at Lahore which serves a dual purpose, the provision of art craftsmen with a market for their wares, and the improvement of design and workmanship. The total number of factories registered under the Indian Factories Act is 647, which provide employment for 44,729 operatives.

Commerce and Communications—The Punjab possesses an extensive system of railway communications. The route mileage (7,092 miles) on the North-Western Railway has been increased by the opening to public traffic of 131 miles of new lines during 1931-32. Apart from these there were no new lines under construction during the year under review. The main source of wealth lies in the export of wheat and cotton. The wheat traffic to Karachi on the North Western Railway fluctuates considerably. In 1931-32 the export of wheat was 17,000 tons, and of cotton, 151,000 tons. The passenger traffic on the North Western Railway was 58.2 millions in 1931-32. There are about 4,700 miles of metalled roads and about 20,000 miles of unmetalled roads in the province, excluding village roads. The Punjab has also 189 miles of navigable canals.

UNITED PROVINCES OF AGRA AND OUDH

This territory grew out of various cessions and acquisitions. In 1833 the then Bengal Presidency was divided into two parts, one of which became the Presidency of Agra. In 1835 the Agra area was styled the North-West Province and placed under a Lieut. Governor. Oudh was annexed in 1856. The two provinces of Agra and Oudh were placed, in 1877, under one administrator, styled Lieut. Governor of the North West Province and Chief Commissioner of Oudh. In 1902 the name was changed to 'United Provinces of Agra and Oudh,' under a Lieut. Governor, and the Lieut. Governorship was altered to a Governorship in 1921. The administration of the 'reserved' subjects is in the hands of the Governor and an Executive

Council of two Members, one of whom is an Indian, and the 'transferred' subjects are under the Governor with two Indian Ministers. The Legislative Council consists of 123 Members. There are 100 elected Members, and 23 nominated and *ex officio* Members of the latter not more than 16 may be officials. There are 10 administrative divisions, covering 48 districts, the average size of which is 2,200 square miles and the average population just over a million. The Municipalities in 1930-31 numbered 85, and the District Boards 48. There are three Indian States, one of which, Benares, came into existence in 1911.

Governor—His Excellency Sir William Malcolm Hailey, G C S I, G C I E, I C S, appointed August 10, 1928, salary Rs 120,000 a year.

Area, Population and Religion—The area of the British districts is 106,248 square miles, population (1931) 48,408,763, 1,206,070 are in the 5,943 square miles of the three Indian States. The population is rural to the extent of 88.8 per cent. Lucknow (274,659 in 1931) is the largest city, but the second place is now taken by Cawnpore (243,755) instead of Benares (205,315). Agra had in 1931 229,764, and Allahabad 183,914 inhabitants, Bareilly 144,031, Meerut 136,709, Moradabad 110,562. Brahmins or orthodox Hindus during the last decade have lost somewhat to Christianity, but still cover 83.8 per cent. Mohammedans form 14 per cent.

Education—The University of Allahabad, first constituted as an affiliating University in 1887, was recognized in 1921 as a unitary teaching and residential University at the same time it exercised control over the affiliated colleges. Since July 1927 these colleges have been transferred to the new Agra University, which is a purely affiliating and examining University. The Benares Hindu University was constituted in 1916, Lucknow University in 1920, and the Aligarh Muslim University in 1920, all being unitary teaching and residential Universities. All four had 5,811 students in 1930-31. Government maintains an Engineering College at Roorkee, an Agricultural College, and a Technological Institute at Cawnpore, and a Medical College at Lucknow, besides three Training Colleges for English Teachers at Allahabad, Lucknow and Agra. Educational Institutions of all kinds numbered 25,959 in 1930-31. For secondary education there were 996 Institutions with 173,832 scholars, and for primary education 19,892 schools with 1,142,256 scholars. There were 2,166 institutions for Indian girls with 99,088 scholars. There was compulsory primary education in 36 Municipalities, Government supplying two thirds of the extra cost involved. The percentage of scholars to the population is 5.34 for males and 0.67 for females. Government contributed 57 per cent of the total cost of education in 1930-31.

Justice and Crime—There is a High Court of the Agra Province with a Chief Justice and 10 Judges, sitting at Allahabad, also a Chief Court of Oudh (constituted November 1925) with a Chief Judge and 4 Judges, at Lucknow. There are 19 Sessions divisions in Agra and 8 in Oudh. The persons brought to trial were 145,694 in the Agra Province and 88,255 in Oudh in the year 1930. The stipendiary Police Force is under an Inspector-General, with a force of nearly 33,800 officers and men. The village chankidars have been reduced in the last few years from 88,000 to 39,416.

Finance.—The revenue (revised estimates) of the United Provinces in 1931-32 was 1,092 lakhs of rupees. To this total the main contributions were 593 lakhs from Land Revenue, 162 lakhs from Stamps, 98 lakhs from Excise, 45 lakhs from Forests, and 97 lakhs from Irrigation. On the

expenditure side the total (revised estimates) for 1931-32 was 1,203 lakhs. On Education were spent 197 lakhs, on Police 172 lakhs, and on General Administration 133 lakhs. No less than 107 lakhs were spent on the interest on debt incurred on Irrigation Works for which Capital Accounts are kept. On the construction of new Irrigation work, 54 lakhs went in capital expenditure in 1931-32.

Produce and Industry—Agriculture absorbs 76 per cent of the population, over 34.9 million acres were under cultivation in 1930-31, and about 4 million acres were irrigated from canals. The productive canals (excluding the Sarda Canal) gave a net revenue of 5.63 per cent on the total capital outlay. The Sarda Kuchha and Sarda Oudh estimates have been combined into one project, which is estimated to cost 950 lakhs and to irrigate 1,350,000 acres. The great centre of industry is Cawnpore. In 1931 there were 461 factories in the United Provinces. The textile factories employ most labour, then follows engineering.

Communications—There were, in 1931-32, 3,288 miles of metalled and 713 of unmetalled roads, maintained by the Public Works Department of Government. In addition there are some 2,000 miles of metalled road and 1,000 miles unmetalled maintained by district boards. On the River Ganges and Gogra 425 miles were kept open for navigation.

INDIAN STATES AND AGENCIES

Within the limitations described on p. 117, the Indian States are governed by their native rulers, with or without the aid of Ministers and Councils. The system of Government is in theory autocracy, but the practice varies greatly. Consequently the administration also varies in kind and in degree from the highly organised Mysore to the backward Hill State of Manipur.

In 1921 a Chamber of Princes was established as a permanent consultative body to discuss matters relating to affairs of Imperial or common concern, so far as they affect the States. In 1929 a Committee under the chairmanship of Sir Harcourt Butler reported on the relations between the Paramount Power and the Indian States. Action on its recommendations is under consideration.

Chancellor (1932)—H. H. the Maharaja of Nawanagar

Information is given below regarding the leading States and Agencies, arranged in alphabetical order.

Assam State (Manipur).—The only feudatory States with which the Assam Administration has political relations are Manipur and the petty States in the Khasi Hills. Manipur has an area of 8,456 square miles and a population (1931) of 445,606. About one-third are animistic tribes. The

revenue is nearly Rs 8 lakhs. There is a tribute of Rs 5,000. The ruler is H H Maharaja Chura Chand Singh, C B E, born 1885, succeeded 1891, salute of 11 guns. Capital, Imphal. The State Administration is under a Darbar consisting of a President (whose services are lent by the Government), three ordinary and three additional Members.

Baluchistan States—There are two States—Kalat and Las Bela—in relation with the Agent of the Governor-General, who is also the Chief Commissioner of Baluchistan and resides at Quetta. There is the Political Agent, Kalat. The leading chief of Kalat is His Highness Nawab Bahadur Mir Azam Jan, Wali of Kalat, who succeeded in 1931, he has a personal salute of 21 guns. He is the head of a confederacy of chiefs. The area of Kalat State is 73,278 square miles, and the population 328,281 (1921). The Khan's revenue, including the subsidies and rents for the leased areas paid by the British Government, amounts to nearly Rs 17 lakhs annually. In 1926 private property in slaves in Kalat was abolished.

The ruling chief of Las Bela is Mir Ghulam Muhammed Khan, Jam of Las Bela, who was born in 1895 and succeeded in 1921. The area of the State is 7,182 square miles, population, 50,696 (1921), the revenue is about Rs 3.8 lakhs. The State is under the immediate control of the Political Agent in Kalat.

Baroda.—The State was carved out of the remains of the Moghul Empire under Sivalji and then under the Peshwa, and is interlaced with territory in Gujarat and Kathiawar. Pilaji Rao Gaekwar acquired portions of Gujarat in 1725. The influence of the British as suzerain dates from 1772. Maharaja Malhar Rao, installed in 1870, was deposed in 1875 for misgovernment, and on May 27, 1875, the widow of Khande Rao adopted as heir the present ruler, a descendant of the founder of the family, who was invested with full ruling powers in 1881. The area of the State is 8,164 square miles, the population, 2,443,007. Baroda City, the capital, has a population of 112,860. The receipts in 1930-31 were Rs 259 lakhs. Education is compulsory. There were 2,736 educational institutions with 243,585 pupils, including Baroda College with 847 students. There is a High Court of Justice with a well organised subordinate service. There were 1,045 Co-operative Societies of all kinds, with 38,638 members and a working capital of Rs 74 lakhs. The ruler is H H Farzand-i-Khas-i-Daulat-i-Inglishia Maharaja Sir Sayaji Rao Gaekwar, Sena Khas Khel Shamsher Bahadur, G C S I, G C I E, born 1863, succeeded 1875, salute of 21 guns. There is an Executive Council of 4 or more members according to the Maharaja's discretion, and a Legislative Council of 27 members, 10 being elected. The Government of India is represented by a Resident, who resides at Baroda.

Jammu and Kashmir.—The State of Kashmir, which had been under Hindu rulers and Mohammedan Sultans, became part of the Moghul Empire under Akbar from 1581. After a period of Afghan rule from 1756 it was overrun by the Sikhs in 1819. Ranjit Singh entrusted in 1820 the territory of Jammu to a feudatory, Gulab Singh, and after the decisive battle of Sobraon in 1846 Kashmir was made over to the latter by Lord Hardinge on payment of the indemnity demanded from the Sikhs. British supremacy was then recognised. The bulk of the population are Mohammedans, though the ruling race is Hindu. The area is 84,258 sq miles, the population 3,880,518. Geographically the State may be divided into (1) the Tibetan and semi-Tibetan tracts which contain the districts of Ladakh and Gilgit, (2) the Jhelum valley, within which is situated the lovely and world famous "Happy valley" of Kashmir, (3) the submontane and semi mountainous tract which includes Jammu, the winter capital of the State, which is connected with the railway system of India, and (4) the outer Hills, in which are comprised the Poonch Ilaga and Bhadarwah a miniature "Happy valley".

The Government of India is represented by a Resident, who resides at Srinagar. In 1927-28 there were in addition to the High Court 128 Criminal Courts and 14,192 offences were tried. There were also 22,597 civil suits instituted in 67 courts. In 1927-28 there were 9,451 sq miles of demarcated forests. The trade in 1928-29 was Imports, 382 lakhs; Exports, 184 lakhs, and the total receipts 251 lakhs. The revenue of the State in 1928-29 was

Rs 251 lakhs. The Civil List amounted to Rs 24,69,060. In 1927-28 there were two Arts Colleges at Srinagar and Jammu with 868 students. There were in all 1,012 educational institutions with 55,914 pupils, including 4,610 girls.

In addition to agriculture the chief industry is sericulture, which dates back to the 15th century. There are considerable mineral resources which have not yet been fully surveyed. A Department of Industry was created in 1922. It is equipped on modern lines and an up to date laboratory has been attached to it. The State has great natural resources and the Department of Industries is intended to help in their scientific development. Industries are being fostered by the Government. In recent years the State has made rapid strides in the field of progress. Primary education for boys has been made compulsory in the cities. A High Court Bench has been constituted. The Agriculturist's Relief Regulation and other legislations have been designed for the protection of the ryots. The marriage of boys below the age of 18 and girls below the age of 14 has been penalised. His Highness Government has done much to protect the interests of the hereditary State subjects. A Board called the Civil Service Recruiting and Scholarship Selection Board has been set up for regulating appointments and selections for training. A Conference of Representatives is summoned twice every year and their representations are carefully considered by His Highness.

The present ruler is Colonel H H Maharajadhiraja Sir Hari Singh Bamadur, G C S I, G C I E, K C V O, Maharaja of Jammu and Kashmir, born 1895, succeeded 1925, salute of 21 guns.

Mysore.—According to tradition the ancestors of the present dynasty came to Mysore in 1399, and established themselves in Hadinad, a few miles from the present capital of the State. By successive conquests, the family extended the kingdom till it reached a position of eminence during the seventeenth century. In the latter part of the eighteenth century, the real power passed into the hands of Hyder Ali. Under him and his son, Tippu Sultan, the territories of Mysore were largely extended. On the defeat of Tippu in 1799,

174 THE BRITISH EMPIRE :—INDIAN STATES AND AGENCIES

the territories were partitioned and the Mysore State, in its present shape, was handed back to the old Hindu dynasty, in the person of H H Krishnaraja Wadiyar III. As a result of an inquiry made by a Committee into the administration, Lord William Bentinck assumed direct administration of the State in 1831, and for fifty years Mysore was administered by Commissioners. In 1865, the father of the present ruler was adopted as heir by the Maharaja, and in 1881 he was placed on the throne of Mysore and invested with powers under an Instrument of Transfer. In 1913 this was replaced by a treaty. In 1927, the Government of India announced the remission from the financial year 1928 in perpetuity Rs 10½ lakhs of the annual subsidy, which had till that time amounted to Rs 35 lakhs.

The area is 29,483 sq miles, and the population (exclusive of the civil and military station of Bangalore) 6,423,189 (1931), a large majority being Hindus. The administration is carried on under the H H Maharaja by the Dewan (Prime Minister), and two Members of Council. There is a Representative Assembly of 273 members and a Legislative Council of 50 members. The Government of India is represented by a Resident at Bangalore. In 1930-31, there were besides the High Court, 84 criminal and 34 civil courts. There were 21,316 offences reported and 38,238 civil cases instituted in that year. There were 2,213 co-operative societies with 137,615 members. The University of Mysore has 5 constituent colleges and 5 intermediate colleges with a total strength of 2,808 students. The number of educational institutions, public and private, on March 31, 1931, was 8,315, with 323,046 scholars. The total revenue in 1930-31 was Rs 3,32,35,290 and the expenditure chargeable to revenue was Rs 3,94,29,343. The State forests cover 4,091 sq miles. The mines in the Kolar Gold Fields area produced 329,133 ounces of fine gold in 1930.

The Ruler is Colonel H H Maharaja Sir Sri Krishnaraja Wadiyar Bahadur, G C S I, G B E, born 1884, succeeded 1895, salute of 21 guns.

North-West Frontier Agencies and Tribal Areas.—Between the border of the British Districts of the N W Frontier Province and the Afghan frontier is the tribal territory. The Government of India exercises the minimum of interference. The region is divided into five Political Agencies: Malakand (Dir, Swat and Chitral), Khyber, Kurram, North Waziristan and South Waziristan. There are, further, areas known as Tribal Areas under the political control of the Deputy Commissioners of the five British Districts. All are under the Governor of the N W Frontier Province in his capacity of Agent to the Governor-General. Chitral is ruled by H H Sir Shuja ul-mulk, K C I E, the Mehtar of Chitral.

The area under tribal territory, including that of the Agencies, beyond the British border is approximately 22,838 sq miles, with a population of 2,259,288. The protective units are the North Waziristan Scouts, South Waziristan Scouts, Kurram Militia and the Chitral Scouts in the Frontier Corps, a Frontier Constabulary, and Levies and Khassadars.

THE STRAITS SETTLEMENTS.

Constitution and Government.

Malaya —The Straits Settlements, a Crown Colony, comprise the Settlement of Singapore (including the Cocos Islands, Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca and Labuan. Malacca, one of the oldest European settlements in the East, was occupied by the Portuguese under Albuquerque in 1511, and held by them till 1641, when it passed into the possession of the Dutch, remaining in the hands of the Dutch till 1795 when it was captured by the English. It was restored (under the Treaty of Vienna) to the Dutch in 1818, being finally retroceded to the East India Company in 1824. Penang (Prince of Wales' Island) was the first British Settlement in the Malay Peninsula, being ceded by the Sultan of Kedah to the East India Company in 1786, Province Wellesley being added in 1800. The early history of Singapore is obscure, in the thirteenth and fourteenth centuries it became a position of independence and importance till destroyed by the Javanese about 1877, after which date it remained almost uninhabited until 1819, when Sir Stamford Raffles founded the trading settlement which is now the port and city of Singapore. The original lease of the site of a factory to Raffles, on behalf of the East India Company, by the Sultan of Johore and Temenggong, Chief of Singapore, was followed in 1824 by a Treaty ceding the entire Island in perpetuity to the Company. In 1826, the three Settlements were incorporated under one Government as an Indian Presidency with headquarters at Penang. In 1880, they were incorporated under the Presidency of Bengal, headquarters being transferred in 1836 to Singapore. On April 1, 1867, the Settlements were transferred from the control of the Indian Government to that of the Secretary of State for the Colonies. The Cocos Islands in 1886, Christmas Island in 1889, and the former Colony of Labuan in 1905, were brought under the control of the Governor of the Straits Settlements, being incorporated in the Colony, in the Settlement of Singapore in 1900, 1903 and 1907 respectively. Labuan was constituted a separate settlement in 1912.

The administration of the Colony is in the hands of a Governor, aided by an Executive Council, composed of the General Officer commanding the

Troops, the Colonial Secretary, the Resident Councillors of Penang and Malacca, the Attorney-General, and the Treasurer, official members nominated by the Governor, at present three in number, and three unofficial members. There is a Legislative Council, consisting of the General Officer commanding the Troops, twelve other official members, and thirteen unofficial, eleven of the latter nominated and two elected by the Chamber of Commerce at Singapore and Penang. The municipalities of Singapore, Georgetown (Penang), and Malacca are administered by Municipal Commissioners appointed by the Governor.

The Governor of the Straits Settlements is also *High Commissioner* for the Malay States and the Bornean State of Brunei, and *British Agent* for the States of North Borneo and Sarawak.

Governor —Sir Cecil Clementi, G C M G (February, 1930)

Colonial Secretary —Sir John Scott, K B E, C M G (February, 1929)

Area and Population

The total area of the colony, with dependencies, is 1,535 sq miles. Singapore is an island about twenty seven miles long by fourteen wide, with an area of 225 square miles, separated from the southern extremity of the Malay Peninsula by a strait three quarters of a mile in width. A number of small islands adjacent form part of the settlement. The seat of government is the town of Singapore, at the south eastern point of the island. Penang is an island of 111 square miles, off the west coast of the Malayan Peninsula, and at the northern entrance of the Straits of Malacca. On the opposite shore of the mainland, distant about two miles, is Province Wellesley, a strip of territory forming part of the Settlement of Penang, averaging eight miles in width, and extending forty five miles along the coast, including ten miles of territory to the south of the Krian, total area 282 square miles. The chief town of Penang is George Town. Off the coast of Perak is the small island of Pangkor, which, together with a strip of the mainland, is British territory, the whole being known as the Dindings. Malacca is on the western coast of the peninsula between Singapore and Penang—about 110 miles from the former and 240 from the latter, it is a strip of territory 42 miles in length, and from eight to 25 miles in breadth, with an area of 637 square miles.

The population, according to the census of 1931, inclusive of the garrison, was 1,114,012 (671,216 males and 442,796 females).

The population of the principal Settlements on June 30, 1932, was estimated to be as follows —

Shipping and Navigation.

The total tonnage of merchant vessels which arrived at and departed from the ports of the Colony during 1931 was 43,640,442, of which 19,387,071 tons was British.

Communications.

The Straits Settlements at the end of 1929 had 1,049 miles of roads, and 15,500,000 dollars were expended on maintenance and construction in 1929. There is a railway from Singapore to Woodlands on the Johore Straits and thence across the Johore Causeway to Johore Bahru. The Federated Malay States Railway extends from Parit Buntar in Negeri Sembilan to Kuala Prai in Province Wellesley, whence are steam ferries to Penang. There is a railway from Malacca to Tampin in Negeri Sembilan. All the railways have a gauge of one metre, and form a part of the Federated Malay States Railway system, a continuation of which through Johore was opened in 1909. The last trade route connecting Pahang with Kelantan and Siam was opened in August 1932. There are cables connecting Singapore and Penang, and land lines from Singapore to Johore, Malacca, Kuala Lumpur, Ipoh, and Penang, from Penang to Alor Star (Kedah), Tung Song and Bangkok (Siam), Taiping, Ipoh, Kuala Lumpur and Singapore, and from Malacca to Tampin, Seremban and Kuala Lumpur. There are 2,812 miles of overhead and 6,258 miles of underground telephone line in Penang and Province Wellesley, and 1,377 miles of overhead and 1,417 miles of underground telephone line in Malacca.

In 1931, 21,709,146 letters and other articles of correspondence were posted, and 19,573,802 delivered. The number of letters sent to China in clubbed packets was 1,572,236. Parcels posted numbered 180,834, and delivered 143,548.

From Labuan there are telegraph cables connecting with Hong Kong, Singapore and Sandakan.

Wireless stations exist at Paya Lebar on Singapore Island and at Penaga in Province Wellesley. The wireless station at Paya Lebar transmits messages to and from ships, Christmas Island and Kuching in Sarawak. This station also receives weather reports twice daily from Terempa, and

182 THE BRITISH EMPIRE:—THE STRAITS SETTLEMENTS

maintains communication with the Dutch Air Mail plying between Palembang and Singapore on Tuesdays and Wednesdays

The wireless station at Penang transmits messages to and from ships, and to and from Bangkok (Siam), Kuala Lumpur in Selangor (F M S) and Singapore (Straits Settlements) in case of land line interruption. Rugby press is received at Penang and transmitted by land line to Penang, Kuala Lumpur and Singapore. Penang station also transmits weather reports to the weekly Dutch Air Mail on the Holland-Dutch East Indies route, and carries out daily routine calls with Rangoon and Victoria Point in connection with aircraft services

Money, Weights and Measures

There are twenty-seven banks with establishments in the Colony. The amount of deposits in the Post Office Savings Bank on December 31, 1931, was 5,029,409 dollars

The dollar, value 2s 4d, is the standard coin of the Colony, and with the half-dollar and the British sovereign is legal tender for the payment of any amount. A bill was introduced in 1923 to base the currency on British sterling. Subsidiary silver coins are 20, 10, and 5 cent pieces, nickel five cent pieces, copper cents, half-cents, and quarter cents. On December 31, 1931, Government currency notes to the value of 67,000,000 Straits dollars were in circulation

The measure of length in use in the Settlements is the English yard, with its divisions and multiples, and land is measured by the English acre. The native terms are, however, still in use. Commercial weights are —

1 Katl	= 16 Tahl	= 14 lbs	avoirdupois
1 Pikul	= 100 Katl	= 133½	„ „
1 Koyan	= 40 Pikul	= 5,333½	„ „

The katl of 1½ lbs is known as the Chinese katl. Another weight, known as the Malay katl, and still in partial use in Penang, is equal to the weight of 24 Spanish dollars, or 9,984 grains. This gives 142 628 lbs as the weight of the pikul, and 5,705 143 lbs as the weight of the koyan. The measures of capacity throughout the Colony are the gantang or gallon, and chupak or quart

The **Cocos or Keeling Islands**, a group of about twenty small coral islands. Latitude 12° 5' S and Longitude 96° 53' E, 581 miles distant from Java Head (S 56° W), and 1,161 miles from Singapore (S 30° W). The largest is 5 miles by ½ mile. They were declared a British Possession in 1857, were placed by Letter Patent of October 13th, 1878, under the control of the Governor of Ceylon, and by Letters Patent of February 1st, 1886, under the Governor of the Straits Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. Population on April 1, 1931, 1142 (males, 608, females, 534). There are large coconut plantations, and copra oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island in the north eastern part of the group

THE FEDERATED MALAY STATES.

Constitution and Government—The Federated Malay States of Perak, Selangor, Negri Sembilan, and Pahang, in the Malay Peninsula, are under British protection The Governor of the Straits Settlements is *ex officio* H M.'s High Commissioner for these States and the other Malay States in the British sphere

High Commissioner—Sir Cecil Clementi, G C M G

Chief Secretary to Government—A Caldecott, C M G, O B E, M C S (Acting)

The following are the Rulers and Residents of the four States —

Ruler of Perak—H H Paduka Sri Sultan Iskandar Shah, K C M G, K C V O, ibni Idris *Resident*—M B She'ley, M C S

Ruler of Selangor—H H Sultan Ala'udin Sulaiman Shah, G C M G, ibni Al Marhum Raja Muda Musa *Resident*—G E Cator, M C S

Ruler of Negri Sembilan—H H Muhammad, K C M G, K C V O, ibni Al Marhum Antah, Yang Di Pertuan Besar, Negri Sembilan *Resident*—J W W Hughes, M C S

Ruler of Pahang—H H Abu Bakar ibni Al Marhum Al-Muktasim Billah Al Sultan Abdullah *Resident*—H G R Leonard, M C S

In Perak, Selangor, and Sungai Ujong, which State was subsequently amalgamated with other States to form the Confederation of Negri Sembilan, Residents were appointed in 1874, with a staff of European officers whose duty was to aid the native rulers by advice, and to exercise executive functions. The supreme authority in each State is vested in the State Council, consisting of the Sultan, the Resident, the Secretary to the Resident, and some of the principal Malay chiefs and Chinese merchants. The Residents are under the control of the Chief Secretary and the High Commissioner.

In 1883 the relations of the Straits Settlements with the small Native States on the frontier of Malacca were consolidated. These States were confederated in 1889, under the name of Negri Sembilan (signifying Nine States). In January, 1895, Sungai Ujong (including Jelebu, which had been administered by a Collector and Magistrate under the Resident of Sungai Ujong since 1888) and Negri Sembilan were placed under one Resident, and in July, 1895, a treaty was signed by which the administrations were amalgamated. The new federation, which retains the ancient name of Negri Sembilan, comprises the States of Sungai Ujong, Johol, Jelebu, Rembau and five smaller States. In 1887, by agreement with the Raja of Pahang, the control of his foreign relations, &c., was surrendered to the British Government. This was followed by a further agreement in 1888 with the Raja (now styled Sultan), under which Pahang was taken under British protection, on the same terms as the Protected Native States on the west coast of the peninsula. Pahang is situated on the east coast, within 200 miles by sea from Singapore. In July, 1896, the treaty between the four Protected Native States, Perak, Selangor, Pahang, and Negri Sembilan, and the British Government came into force by which the administrative federation of these States under a Chief Secretary to Government is provided for, and the States agree to furnish a contingent of troops for service in the Colony should His Majesty's Government be at war with any foreign nation.

The laws of each State are contained in enactments passed by the State Councils, up to December, 1909, and from that date, in matters common to the four States, by the Federal Council; the State Councils may still legislate in purely State matters.

The Federal Council was created in 1909 in order to give effect to a desire for the joint arrangement of all matters of common interest to the Federation or affecting more than one State, and for the proper enactment of all laws intended to have force throughout the Federation or more than one State. The Federal Council, as now constituted, consists of the High Commissioner for the Malay States (an appointment held *ex officio* by the Governor of the Straits Settlements) as President, the Chief Secretary to Government, Federated Malay States, the four British Residents, the Legal Adviser, the Financial Adviser, the Principal Medical Officer, the Controller of Labour, Malaya, the Director of Education, S.S. and F.M.S., the Commissioner of Trade and Customs, the Secretary for Chinese Affairs, the General Manager for Railways, one additional official member, and twelve unofficial members, who are nominated by the High Commissioner with the approval of His Majesty the King. The Federal Council generally meets at least three times a year. All Federal legislation is passed by it, and the estimates of expenditure and revenue require its approval.

Area—The areas of these States are approximately—Perak, 7,800 sq. miles, Selangor, 3,150 sq. miles, Negri Sembilan, 2,550 sq. miles, Pahang, 14,000 square miles, total, 27,500 sq. miles.

Population—Census 1931 Perak, 765,989 (464,751 males and 301,238 females), Selangor, 533,197 (327,414 males and 205,783 females), Negri Sembilan, 233,799 (148,381 males and 85,418 females), Pahang, 180,111 (105,508 males and 74,603 females), total 1,713,096 (1,046,054 males and 667,042 females) The population contained 6,350 Europeans, 4,251 Eurasians, 443,618 Malays, 150,113 other Malasians, 711,540 Chinese, 379,996 Indians, 17,228 others The preponderance of males over females is due to the number of Chinese and Indian immigrants The largest town is Kuala Lumpur (in Selangor) with about 111,738 inhabitants Births, 1931, 57,457, deaths, 32,871

Education.—In 1931, there were 48 English schools (35 for boys, 13 for girls), with an average enrolment of 13,646 boys and 4,663 girls, and an average attendance of 13,033 and 4,405 respectively, maintained or assisted by the Government, also 1,191 vernacular schools (Malay, Tamil, and Chinese), with an average enrolment of 69,946, and an average attendance of 62,857, which are under the control of the Education Department The total number of schools (1931) was 1,249 with an average attendance of 80,295 There are many Chinese vernacular schools, of which 118 having an enrolment of 9,536 pupils were assisted by the Education Department Expenditure on education (excluding buildings) in 1931 was 391,783*l*

Production.—The staple products are coconuts, rice, rubber, tapioca, oil palms and pineapples The chief industrial enterprises are the cultivation of rubber, and the mining of tin The Krian irrigation works in Perak irrigate 70,000 acres of rice (padi) land and supply drinking water to the district. The canal is 21 miles long with 16½ miles of branches and 188½

miles of distributory channels. The forests produce many excellent timbers, besides gutta percha, gums, oils, resins, and canes. In 1930 the total quantity of timber of all kinds taken from the forests, on which payment was made, was 587,497 tons, in addition to a large quantity used free of royalty by the native Malay population. In 1931 the tin export amounted to 51,250 tons, and in 1930 to 62,065 tons. In 1931, 29,462 ounces of gold, and in 1930, 29,597 ounces were produced in the Federated Malay States. Besides gold and tin, many minerals are found, including lead, iron, copper, arsenic, manganese, wolfram, scheelite, plumbago, silver, zinc, and coal, of which only the latter with iron, arsenic, wolfram and scheelite have been found in workable form. The exports of tungsten ore in 1931 were 368 tons. The labour force engaged in mining at the end of 1931 was 57,038.

Commerce—The trade (excluding bullion and specie) was as follows in 1931, with total for 1930 —

Shipping, 1931 The total number of vessels, exclusive of native craft, entered and cleared at the various ports of the Federated Malay States was 12,175 with a tonnage of 7,791,757. The number of native craft entered and cleared during the year was 24,122 with an aggregate tonnage of 462,869.

Communications—There were in 1931, 2,840 miles of metalled cart roads, 150 miles of unmetalled roads, and 1,771 miles of bridle roads and paths, also more than 1,202 miles of paths maintained by the Forest Department.

The Government has made, purchased, or leased, the railway systems of the whole peninsula south of the Siamese boundary, including the railway on Singapore Island. It has leased the Johore State Railway (121 miles) extending from Johore Bahru at the southern extremity of the Peninsula and opposite Singapore, to Gemas on the boundary between Johore and the

Federated Malay States. At Gemas the line branches into the West Coast and the East Coast Lines, the West Coast Line runs north-north west through Negri Sembilan, Malacca, Selangor, Perak and Province Wellesley to Prai—the port opposite Penang Harbour—488 miles from Singapore. From Bukit Mertajam near Prai the line proceeds northwards through the Unfederated States of Kedah and Perlis, to the Siamese frontier station of Padang Besar, 580 miles from Singapore. Through traffic with the Royal State Railways of Siam was opened on July 1, 1918, the distance between Singapore and Bangkok being 1,195 miles. Through services are in operation between Penang and Bangkok, the journey occupying 27 hours.

The East Coast Line proceeds northward from Gemas through Negri Sembilan, Pahang and Kelantan to Tumpat on the north east coast of the Unfederated Malay State of Kelantan, 327 miles from Gemas.

Through working between the Federated Malay States and Kelantan via the Royal State Railways of Siam commenced on November 1, 1921, and via the East Coast Railway on September 6, 1931.

An extension from Pasir Mas in Kelantan runs in a westerly direction for 13 miles to the Golok River at the Siamese boundary, where it joins the Siamese line running to Haad Yai Junction, on the main Bangkok-Penang line. Branch lines connect the main line with the ports on the west coast at Malacca, Port Dickson, Port Swettenham, Teluk Anson Wharf and Port Weld.

A causeway carrying two lines of rails and a roadway has been built across the Johore Strait, connecting the island of Singapore with the Peninsula.

The line is of metre gauge. On the mail trains on the West Coast main line there are sleeping saloons and restaurant cars, and on the East Coast Line sleeping saloons run from Tumpat to Singapore and vice-versa on the through weekly express.

The total route mileage open for traffic is 1,073 miles.

There were, in 1931, 104 post offices and 70 other places for postal business. In that year 36,445,162 postal packets (registered letters, 1,888,265, and parcels, 258,453) were received and delivered. In 1931 there were 2,915 miles of telegraph and telephone lines, and 24,199 miles of overhead wire, of which 20,847 were telephone wires. In addition there were 210 miles of underground cables containing 16,093 miles of wire single line. The net revenue collected by the department amounted to 321,924, and expenditure 402,701. Savings Banks 45,915 depositors and 500,649 deposits on December 31, 1931.

Money, &c—The current money consists of Straits Settlements dollars with subsidiary silver and copper coins. In February, 1906, the value of the dollar was fixed at 2s 4d or 60 dollars = 7l. Currency notes and bank notes also circulate, and the sovereign is legal tender for any amount at the above rate. Weights and measures (as well as currency) are as in the Straits Settlements.

THE MALAY STATES NOT INCLUDED IN THE FEDERATION.

The Malay States not included in the Federation are five in number namely, Johore, Kedah, Perlis, Kelantan, and Trengganu.

The relations of Johore with Great Britain are defined by a Treaty date

188 THE BRITISH EMPIRE:—UNFEDERATED MALAY STATES

December 11, 1885, and, by an amendment to this treaty made on May 12, 1914, the Sultan agreed to accept, and to act upon the advice of, a British officer called the General Adviser. The Sultan is assisted in the administration of the State by an Executive Council, and by a Legislative Council consisting of official and unofficial members.

The rights of suzerainty, protection, administration and control of the other four States were transferred from Siam to Great Britain by the Anglo-Siamese treaty of March 10, 1909. In all four States the Rulers are assisted in the administration by State Councils, and by British Advisers appointed by the British Government.

In these States the currency, weights and measures are the same as in the Straits Settlements and the Federated Malay States. Their trade is almost entirely carried on with the Straits Settlements.

The religion of the Malays is Mohammedanism.

Johore (area 7,678 square miles, population in 1931, 505,809, of whom 285,019 were Malays, 214,401 Chinese, and 51,077 Indians) lies at the southern extremity of the Malay Peninsula. Births registered (1931), 19,250, deaths, 10,840. There were (1931) 6 English schools and 113 vernacular schools.

Revenue (1931), 12,102,704 dollars (from Customs, 3,173,381 dollars, land 2,251,830, licences 2,671,152), expenditure, 14,778,518 dollars. Imports (1931), 29,449,254 dollars (animals, food, drink and tobacco, 15,809,829, raw materials and articles mainly unmanufactured, 1,301,544, articles wholly or mainly manufactured 11,922,051, coin and bullion, 2,500, sundries 413,330). Exports, 34,995,441 dollars (rubber, 20,319,138 dollars). Rubber output, 1,525,193 pikuls.

At the end of 1931, 791 miles of metalled road had been constructed. The railway from Penang to Singapore traverses Johore for a distance of 120 miles. The Johore section has been leased to the Federated Malay States Government for a term of years. Rubber estates are situated on either side along practically the whole length, and thus, with the help of roads and navigable rivers, good communication is available. A causeway across the Straits of Johore and connecting Johore with the island of Singapore was opened to railway traffic in October, 1923, and to vehicular traffic in June, 1924.

An efficient medical service and thirteen public hospitals are maintained by the Government. Police force, end of 1931, 1,896.

The Postal revenue (1931) was 268,994 dollars. Letters, papers and parcels dealt with, 3,779,569.

Ruler—His Highness Sultan Ibrahim, G C M G, K B E

General Adviser—R O Winstedt, C M G

Kedah, on the west coast of the Peninsula, and north of Province Wellesley and Perak, has an area of 3,648 square miles. The population (census 1931) is 420,645, of whom 286,722 are Malays, 78,881 Chinese, 51,027 Indians, 413 Europeans, 101 Eurasians, and 13,001 other races. The capital is Alor Star on the Kedah River, about 70 miles from Penang by sea, and 59 by rail or road. Owing to the Sultan's ill health, the head of the Government is the Regent. There are (1932) 49 Europeans in the Government service. The police force had a strength (May, 1932) of 768 men (principally Malays). There were in May, 1932, 89 Government schools (about 11,648 pupils), 15 telegraph offices, and 20 post offices. A telephone system extends throughout the State, the wire mileage in 1932 being 2,268. The railway connecting the Federated Malay States and Siam passes through the State. A metalled road (26 miles) connects Alor Star with Perlis, and (29 miles) with the Senggora frontier (Siam), and a metalled road (44 miles) connects it with Province Wellesley. Another metalled road (7 miles) connects Baling with Upper Perak in one direction and with Province Wellesley in the opposite direction. The total mileage of metalled road (1932) is 892. 225 miles of canal were maintained in May, 1932. The revenue of the State for the year 1931-32 (Mohammedan year A H 1350) was 5,180,244 dollars, including Customs, 1,666,212, lands, 851,875, and land sales, 83,475 dollars, and the expenditure, 5,722,757 dollars. Public debt, May, 1932, nil. The principal produce of North Kedah is rice. There are rubber (export, 1932, 89,924 tons), coconut, and tapioca estates in South Kedah. Several steamers ply between Penang and the various ports of Kedah. Kedah internal trade (1931-32) imports, 7,106,622 dollars, exports, 11,922,837 dollars. Postal and telegraph revenue, 1931-32, 123,425 dollars, expenditure, 222,155 dollars. Postal articles dealt with 2,678,455.

Ruler—H H Sultan Sir Abdul Hamid Halim Shah, K C M G, ibni Almerhum Sultan Ahmad Tajudin Mukarram Shah (succeeded in 1891)

Regent—H H Tunku Ibrahim, C M G, C V O

British Adviser—J D Hall, M C S (A C Baker, M C S, acting)

Perlis, on the west coast of the Peninsula and north of Kedah, has an area of about 816 square miles and a population (1931 census) of 49,297. Malays numbered 40,021 of the population, Chinese 6,500, Indians 972, and other races 1,804. Police force (1930) 79. N O O's and men 19 boys' and 4 girls' schools were maintained in 1930 with about 1,998 pupils. The principal products are rice, tin, and coconuts. There are guano deposits. There are 36½ miles of metalled roads and 26½ miles of paths and gravelled roads in the State. The revenue for A H 1349 (1930-31) was \$49,180 dollars (customs 126,655), and the expenditure 471,011 dollars. Public debt, 1931, nil.

Ruler—H H Raja Syed Alwi, C B E, C M G

British Adviser—O E Venables M C S

Kelantan, on the east coast of the Peninsula, has an area estimated at 5,713 square miles and a population (1931 census) of 862,517, including 17,612 Chinese. Kota Bharu, the capital, has a population of about 14,843. There are 62 Government elementary schools in the State. The High Court, the Central Court, and the Small Court are at Kota Bharu, and there are District Courts at Kuala Krai, Pasir Puteh, Pasir Mas, and Tumpat respectively. Police force, 1931, 368. The revenue of the State in 1931 amounted to 1,524,140 dollars (licences, &c., 130,317 dollars, customs and excise, 701,947 dollars, land revenue, 892,053 dollars), and the expenditure to 1,961,124 dollars. Public debt (1931) 5,430,684 dollars.

The chief industry is agriculture. About 297,109 acres were under cultivation in 1931. Chief products: rice (120,000 acres), coconuts (57,271 acres), rubber (92,789 acres). Pepper, tapioca, sugar cane, and maize are grown in smaller quantities for local consumption. The jungle which covers a large part of the State produces some serviceable timber, resin and rattans and bamboos. The State supports cattle (112,801 in 1931), buffaloes (84,177 in 1931), sheep, goats, and poultry. Numerous estates are owned by British companies. Mineral resources are said to comprise gold, galena, and tin, but the existence of these metals in payable quantities has not been proved. The principal manufacturing industries are silk weaving, boat building, and brick making. In 1931, total exports, 2,854,079 dollars; total imports, 2,977,168 dollars (1930, 4,189,374 and 6,276,226 dollars respectively). Chief exports, 1931: betel nuts, 268,341 dollars, fish, 98,136 dollars, copra, 449,857 dollars, para rubber, 1,157,803 dollars. Chief imports 1931: fish 16,840 dollars, rice, 528,388 dollars, wheat and flour, 49,788 dollars, milk 127,925 dollars, sugar 75,458 dollars, tobacco, 311,892 dollars, petroleum, 109,001 dollars, textiles (all kinds), 418,470 dollars, timber, 26,205 dollars, cement, 25,256 dollars, machinery and metal goods, 13,910 dollars, motor vehicles, 25,865 dollars, drugs and medicines, 52,832 dollars, benzine, 115,863 dollars.

Tonnage of steamships inwards and outwards, 1931, 122,838 tons. 93,168 fishing and other boats are registered. There is regular steamship communication with Bangkok and Singapore. The principal roads are the Kota Bharu-Pasir Puteh road and the trunk road from Kota Bharu to Kuala Krai, and there are others extending a few miles from Kota Bharu. Through road communication has now been established between Kota Bharu and Kuala Trengganu, the capital of that State, a distance of about 103 miles. The metalling of these roads is not yet completed. Communication inland is by the rivers. There is railway communication between Tumpat (on the coast) and Kuala Giris (81 miles inland). There is also a line to the Siamese border, on which a daily service is run in connection with the Siamese trains to the Kedah boundary, and thence with the Kedah service to Penang and the Federated Malay States. Kota Bharu is in direct telegraphic communication with Bangkok and Penang (via Siam) and possesses a limited telephone service. There were (1931) 5 post offices and 10 sub-post offices in the State.

Trengganu, with an area of about 5,500 square miles, and a population, at the census 1931, of 179,664, lies on the east coast between Pahang and Kelantan. The capital is Kuala Trengganu, with a population of 13,972. There are 20 vernacular schools (2,212 pupils enrolled in 1931, average attendance 1,745, teachers 62), 1 Government English school (104 pupils) and 3 Chinese schools (256 pupils, teachers 11). Police force 285 in 1931. There are 145 miles of road in use, and a 66 mile trunk road connecting Kuala Trengganu with Kelantan has been completed and opened to traffic. There are telephone exchanges at Kuala Trengganu, Kemaman and Besut. There is telegraphic communication with other parts of Malaya. There are no railways, except 3 light railways on mines, and communication with the interior is by rivers and good native paths. Steamers connect regularly with Singapore and Bangkok, and locally-built motor-boats maintain passenger services along the Trengganu coast. The industries are similar to those of Kelantan and the country is of the same general character.

Revenue (1931), 988,675 dollars, and expenditure, 1,168,690 dollars. Exports in 1931 totalled 3,689,970 dollars. Imports in 1931 totalled 3,028,906 dollars. Debt (1931), 3,714,000 dollars. Chief exports: Dried fish, 779,994 dollars, para rubber, 415,667 dollars, tin ore, 472,191 dollars, hematite, 870,995 dollars, copra, 182,608 dollars; arecanuts,

MANDATED TERRITORY IN ASIA.

PALESTINE

THE natural and historic boundaries of Palestine run from the desert on the east, along the slopes of Mount Hermon over to the Litani on the west, where the Lebanon and Anti Lebanon first break into a series of elevated plateaux, and thence over to the Mediterranean coast, and on the south from the Gulf of Akaba across the Desert of Sinai

For the present political boundaries, see THE STATESMAN'S YEAR BOOK, 1928, p 185

Government.—After its conquest in 1917-18, by the British Forces, the country remained under British Military Administration till July 1, 1920, when a Civil Administration was set up

High Commissioner and Commander in Chief—Lieut.-General Sir Arthur Grenfell Wauchope, K C B, C M G, C I E, D S O (Appointed Nov 1, 1931)

Chief Secretary—Mark Aitchison Young, C M G (appointed July 17, 1930)

The country is administered by Great Britain under a Mandate, which was passed by the Council of the League of Nations on July 24, 1922,

and came officially into force on September 29, 1923. This provides for the Balfour Declaration of November 2, 1917, to the effect that 'His Majesty's Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country.'

Constitution—On September 1, 1922 a new constitution was promulgated. It provides for the appointment of a High Commissioner and Commander in Chief and an Executive Council.

A Legislative Council will replace the Advisory Council and have authority to pass such Ordinances as may be necessary for the peace, order, and good government of Palestine, provided (1) that no Ordinance shall restrict complete freedom of conscience and the free exercise of all forms of worship, save in so far as is required for the maintenance of public order and morals, or tend to discriminate in any way between the inhabitants of Palestine on the ground of race, religion, or language, (2) that no Ordinance shall take effect until either the High Commissioner or His Majesty has assented thereto, (3) that the High Commissioner may reserve any Ordinance for the signification of His Majesty's pleasure, and shall so reserve any Ordinance which concerns matters dealt with specifically by the provisions of the Mandate, and (4) that His Majesty may disallow any Ordinance to which the High Commissioner may have assented within one year of the date of the High Commissioner's assent.

In exercise of the powers vested in him by the Palestine (Amendment) Order in Council 1923, the High Commissioner has appointed an official Advisory Council composed of the heads of the principal Government Departments and the District Commissioners of the three Districts. Owing to the abstention from the elections of considerable numbers of the Arab inhabitants, the Legislative Council under the new constitution has not yet been formed, and the Advisory Council will remain in being until such time as the election of a Legislative Council becomes possible.

All Ordinances are laid before the official Advisory Council and made public, as Bills, in the Official Gazette, for one month, before promulgation.

Regulations were made by the High Commissioner in 1927 for the organisation of the Jewish population of Palestine as a religious community and its recognition as such by the Government. The Jewish community thus enjoys autonomy for its internal affairs, religious, cultural and communal, and has power to levy rates on its members. The organs of the community are a Chief Rabbinate and local rabbinical offices, an Elected Assembly, a General Council, which is elected by the Assembly and which represents the community in its dealings with the Government, and local committees. A number of Jews have opted out of this community.

The British Government and Palestine Administration recognise the Jewish Agency (consisting both of Zionists and non Zionists), which in Palestine is represented by the Palestine Jewish Agency, as the Agency of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home.

There is a Moslem Supreme Council to control Moslem religious affairs. English, Arabic, and Hebrew are the official languages of the country.

Area and Population—Palestine under British Mandate is about 10,000 square miles in extent. The population, taken by official census on November 18, 1931, was 1,035,154, of whom 759,952 were Moslems (73 per cent), 175,006 Jews (17 per cent), 90,607 Christians (8 per cent), and 9,589 others.

The country is at present divided into three districts. Southern (Jaffa), Northern (Haifa) and Jerusalem.

The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered on December 9, 1917. Its population in 1931 was 90,407. The population figures for the other principal towns were (1931): Jaffa, 51,866, Tel-Aviv, 46,116, Haifa, 50,533,

Gaza, 17,069, Nazareth, 8,719; Nablus, 17,171, Safed, 9,446, Tiberias, 8,633, Hebron, 17,532, Ramleh, 10,417, Bethlehem, 6,817; Lydda, 11,249, Acre, 7,893. Total immigrants (1931), 5,533, of whom 4,075 were Jews and 197 British police. Total recorded emigrants (1931), 1,846, of whom 666 were Jews.

There are some 750 Arab villages and a considerable number of Arab tribes, and three German Templar (Christian) settlements, Wilhelma, Sarona and Neuhardtthof, apart from those in the three principal towns.

The Jewish Settlements are grouped in four districts, namely, in Judea 37, in Samaria 13, in Lower Galilee 49, in Upper Galilee 9. The total population of these settlements is now about 46,000. More than 30 of them are built on land belonging to the Jewish National Fund, which was established by the Zionist Organisation for the purpose of acquiring land to remain the property of the Jewish people, and were founded with the assistance of the *Keren Hayesod* (Foundation Fund), also created by the Zionist Organisation. The total area of the Jewish settlements exceeds 1,200,000 dunums (4½ dunums equal one acre). The local affairs of the smaller Jewish settlements are controlled by *Vaadim* or Councils elected by the male and female residents who own registered holdings or pay taxes. The larger villages, Arab and Jewish, are, for internal order and rates, administered by Local Councils, constituted under Ordinance, which exercise modified municipal powers. Satisfactory progress is being maintained in cadastral survey and in land settlement.

Births and deaths for recent years are given in the following table —

Year	Estimated ¹ Population (mid year)	No of Births	No of Deaths	Infantile Mortality (per 1,000 births)
1928	794,516	42,895	28,170	188.3
1929	816,064	41,742	21,694	146.6
1930	843,132	44,587	19,513	154.8
1931	872,165	46,011	21,149	170.1

¹ Excludes nomad population, estimated at 103,000 in 1922.

Religion.—Jerusalem, being a Holy City for three Faiths, is the seat of a number of Prelates and religious bodies. There are three Christian Patriarchs, Orthodox, Latin and Armenian having the style of 'Beatitude,' and, in addition to the Anglican Bishop in Jerusalem, a Jacobite and a Coptic Bishop.

The Moslems have the Mufti of Jerusalem, who is President of the Moslem Supreme Council, and the Jews have two joint Chief Rabbis, one for the Sephardim, the other for the Ashkenazim. These three dignitaries have the style of 'Eminence.' In Nablus there is a Samaritan High Priest.

Education.—The schools maintained in 1931 by the Government numbered 308, of which 12 had secondary sections, and contained 24,288 scholars, the great majority of whom were Moslems. In the Government Training Colleges for teachers there were 71 men and 64 women students. Technical education is being carried out in some of the Government town schools. A Law School exists in Jerusalem, in which lectures are given in the three official languages.

The Christian and Jewish Communities provide, the former to a very large extent, and the latter almost entirely, for the education of their own children.

The Jewish Agency controlled, in 1932, 256 schools attended by 22,486

pupils with 1 233 teachers (these were transferred to the General Council of the Jews of Palestine at the end of 1932), and other Jewish bodies controlled 111 schools attended by 11,970 pupils, making a total of 369 Jewish schools attended by 34,456 pupils. These institutions include secondary schools in Jerusalem, Tel-Aviv and Haifa, Teachers' Training Colleges (General, Orthodox, Women's and Kindergarten), Schools of Music in Jerusalem, Jaffa, and Haifa, Agricultural Schools, an Arts and Crafts Institute (Bezalel), Evening Classes, and a Technical College at Haifa.

There were 156 Christian Schools, including Orthodox, 27 schools with 2,504 pupils, Catholic, excluding the Latin and Greek Patriarchates, 77 schools with 9,229 pupils, Protestant, 50 schools with 4,281 pupils; miscellaneous, 2 schools with 85 pupils.

There are also 137 private Moslem schools mainly maintained by local committees, these provide for about 7,319 children. Two of these schools include secondary classes.

Non-Government schools receive a capitation grant in aid from the Department of Education. The schools of the Jewish General Council receive a block grant of £P19,190 a year.

The Hebrew University on Mount Scopus, Jerusalem, was inaugurated on April 1, 1925, and has 171 students. The new library building houses 256,279 volumes.

Antiquities —A new Antiquities Ordinance was passed in 1929 to give better effect to the provisions of the Mandate as regards excavation and preservation of antiquities. During the year 20 expeditions conducted excavations under licences issued by the Government. The new Museum presented by Mr John D Rockefeller, Jun., is nearing completion.

Justice —The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and *Waqfs* or charitable endowments, and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate's Court in every sub district, and in the larger towns such as Jerusalem, Jaffa, and Haifa, two such courts.

There are four District Courts, each composed of a British President and two Palestinian judges seated at Jerusalem, Jaffa, Haifa and Nablus respectively. They go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance over all crimes except those punishable with death, and civil cases outside the jurisdiction of a magistrate; it also hears appeals from the decisions of magistrates both in civil and in criminal cases. Crimes punishable with death are tried by the Court of Criminal Assize, which consists of the Chief Justice or senior British Judge of the Supreme Court sitting with the District Court.

The highest Court in Palestine is the Supreme Court, which is composed of a British Chief Justice and one other British judge and four Palestinian judges. The Court sits in two forms: (1) as a Court of Appeal, in which capacity it has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, the Land Courts and the Court of Criminal Assize, (2) as a High Court of Justice, in which capacity it hears applications of the nature of *habeas corpus* and of *mandamus* proceedings.

The Court of Appeal is composed normally of three judges, while the High Court may sit with two judges. In either case a British judge presides.

A Bench of honorary magistrates has been established in Jerusalem, Jaffa, and other towns, who try contraventions for which the maximum penalty does not exceed £P5 fine and 15 days imprisonment. In addition to the bench of honorary magistrates, a stipendiary magistrate has been appointed to try such contraventions in the Municipal Areas of Jerusalem and Jaffa.

Special arrangements exist in the Beersheba sub district, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. The District Court of Jerusalem visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases. Liaison Boards have recently been established for the settlement of disputes between Beduin tribes of Palestine and those of adjacent countries.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Qadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Palestinian and other Eastern Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

The different Christian communities (such as the Orthodox and the Latin), have similar jurisdiction to that of the Jewish courts.

Questions of jurisdiction as between the Civil and Religious Courts are decided by a Special Tribunal composed of two British judges of the Supreme Court and the President of the Highest Court of the Religious Community concerned.

The police establishment (including municipal police) at December 31st, 1931, was 129 officers and 1,392 other ranks, in addition to the British Police, consisting of 3 British officers and 645 other ranks stationed at Jerusalem, Jaffa, Haifa and Nablus.

4,815 heinous crimes were reported in 1931, and 6 death sentences were carried out.

Finance.—Revenue and expenditure for 5 years —

—	1927	1928	1929	1930	1931
	£P	£P	£P	£P	£P
Revenue	1,728,181	2,322,935	2,323,572	2,389,546	2,398,805
Expenditure	1,875,824	2,448,677	2,140,082	2,586,505	2,374,867

The main heads of revenue for 1931 were customs, £P922,080, port and marine, £P10,531, licences, taxes, etc., £P604,771, fees of court or office, etc., £P248,631, posts and telegraphs, £P207,758, revenue from Government property, £P13,591, interest, £P52,793, grants in aid, miscellaneous, £P42,001. Public debt amounted to £P4,475,000 in 1931.

Defence—Palestine falls under the Middle East Command of the R.A.F. Two squadrons of aircraft and four sections of armoured cars are available for Palestine and Transjordan. Two battalions of infantry are distributed over various centres in Palestine. The Transjordan Frontier Force, the cost of which is borne by the Imperial Treasury and Palestine

Government, has its headquarters at Zerka, Transjordan, and detachments at Samakh, Beisan, and at certain other stations in Palestine. Its actual strength (excluding reserve of 149 other ranks) on December 31, 1932, was 58 officers (31 British) and 809 other ranks. The force is partly mechanised and partly mounted on horses and camels.

Production and Industry.—Palestine comprises four zones of country. On the west, along the shores of the Mediterranean, which are deficient here in good natural harbours, is the maritime plain, which varies in width from 15 to 20 miles at Gaza to about 2 miles at Acre, and at the Plain of Esdraelon stretches for a considerable distance into the interior, and separates the highlands of Galilee from those of Samaria and Judæa. From the coastal plain the country rises into a plateau intersected by deep wadis or valleys, which drop steeply to the east to the third zone, formed by the great depression down which the river Jordan runs to the Dead Sea, and which is prolonged for another 100 miles to the Red Sea as the Wadi Araba. This depression reaches a depth below sea level of 2,600 feet in the deepest portion of the Dead Sea, the surface of which is about 1,300 feet below sea-level. The Dead Sea is 46 miles long and has an average width of $8\frac{1}{2}$ miles, it receives the waters of the Jordan and of six other rivers and has no outlet, the surplus being carried off by evaporation. It is intensely salt, with a specific gravity one sixth greater than water, and with 24 per cent of salt. East of the Jordan Valley the country rises again steeply to a plateau and merges into the Arabian desert.

Palestine is essentially an agricultural country. In 1931 the area under British Administration, exclusive of Trans Jordan, produced — Wheat, 79,650 tons, barley, 41,200 tons, durra, 16,862 tons, olives, 33,906 tons, lentils, 3,758 tons. The tobacco crop in 1931 amounted to 504,202 kilos. In 1930 there were in the country 146,397 cattle, 252,773 sheep, 440,132 goats, 25,321 camels, 13,825 horses, 76,853 donkeys, and 5,247 buffaloes.

Limestone is found all over the country, sandstone abounds on the coast, gypsum of good quality is found at Mount Usdum and at Mount Gipsia near Melhama (Galilee). Rock salt abounds in the Jordan Valley and on the shores of the Dead Sea, where also sulphur is obtainable. The Dead Sea contains cooking salt, carnallite, and bromide. A concession for the exploitation of these minerals was granted in 1929. There are medicinal springs near Tiberias and also at El Hamme, for both of which leases have been granted.

The principal industries of export importance are those of wine making, especially in the Jewish villages Zichron Jacob, Rishon le Zion, and Petach Tikvah, soap-boiling in Nablus, Jaffa and Haifa, olive oil in Nablus, Acre, and the district round Jaffa and cement at Haifa. Oranges, grown chiefly in the coastal plain, are exported to England and Europe. The orange crop exported in 1931 was 2,616,451 cases. The wine export was 1,014,565 litres. Bananas are being successfully grown in the Jordan Valley.

Further progress has been made in the reservation of state forests, nearly 821,262 dunums have been reserved out of a total area of 1,500,000 dunums of natural forest land. Extensive planting of timber, fruit and shade trees has been effected by Government and private agency. Approximately three million trees were planted during 1929—both timber trees and fruit trees, including vines, oranges and olives, 21 nurseries have been maintained during 1929 for the free issue and sale of stock to the public and the provision of material to Government plantations.

The principal articles of import in 1931 were rice, £P117,092, wheat, £P165,684, barley, £P676,800, wheat flour, £P151,643, sugar, £P105,366, cattle, £P206,452, fish, £P62,490, coal, £P51,748, wood prepared for orange cases, £P100,196, wood and timber for building, £P153,381, iron bars, angles and rods, £P57,665, iron pipes, tubes and fittings, £P85,012, cotton piece goods, £P358,385, woollen tissues, £P106,895, silk tissues, £P170,789, garments, £P69,897, boots and shoes, £P51,688, kerosene, £P92,427; benzene, £P168,845, motor cars, £P115,118. The principal articles of export were oranges, £P886,356, laundry soap, £P117,893, water melons, £P47,720, durra and maize, £P37,696, wines, £P30,592.

Exports to the United Kingdom (including Transjordan) (Board of Trade returns), 1932, 1,558,680; imports from the United Kingdom, 1932, 1,304,263.

Shipping and Communications.—The most important ports of Palestine are Jaffa and Haifa, the two ports of lesser significance are Acre and Gaza. For the calendar year 1930, 813 steamers, totalling 1,895,540 tons, and 1,794 sailing vessels, totalling 40,454 tons, arrived at Palestinian ports. Palestine possesses no shipping of its own, other than some small sailing vessels and power launches. A modern harbour at Haifa will be open to shipping in the autumn of 1933.

A regular passenger service to Palestinian ports is provided by some 30 shipping lines.

The total length of the Palestine railways is 529 kilometres, divided as follows: standard gauge (4' 8½")—Rafa-Lydd—Tulkarem—Haifa, 238 kilometres; Jaffa-Lydd—Jerusalem, 87 kilometres, narrow gauge (3' 6") Haifa—Samakh, 88 kilometres, Nassis Haifa—Acre, 18 kilometres; Afule Jenin—

Nablus Tulkarem, 98 kilometres. The section Kantara to Rafa, known as the 'Sinai Military Railway' (203 kilometres), is being worked by the Palestine Railways on behalf of the Air Ministry. There is through communication with Egypt, and trains connect at Kantara West daily with Cairo, Alexandria, Port Said, and Suez and other parts of Egypt, railway vehicles being sent across the canal by means of a truck transporter.

East of Haifa the Palestine Railways system terminates at Samakh, and the section Samakh-Deraa (Junction of the Hejaz Railway to Medina) is operated by the Hejaz Railway, which in turn is controlled by the Governments of the territories through which it passes. Steam rail cars of the Sentinel Cammell type have been introduced on certain sections of the railway with success. Goods traffic handled during 1932 was 1,098,728 tons, passengers carried, 1,125,439.

There are 445 miles of metalled roads in Palestine extensively used by motor transport, and in addition, many hundreds of miles of tracks passable or wheeled traffic of all kinds during dry weather.

The Imperial Airways, Ltd., have established an aerodrome at Samakh, from which passengers and mails are carried to Egypt and Iraq once weekly in each direction. There is a second service between Egypt and Ramleh. Weekly flying boat services are also operated between Egypt, Gaza and Ramleh.

Posts and Telegraphs—In 1932 there were conveyed 12,389,400 letters, 918,700 postcards, 6,446,700 printed communications and samples, 135,491 parcels, and 252,600 telegrams. Length of telegraph and telephone trunk lines, 13,566 km., local lines, 16,881 km. Number of telephone subscribers, 3,300, number of telephone stations, 5,248.

Banking and Currency—Barclay's Bank has branches at Jerusalem, Jaffa, Haifa, Nazareth, Tel-Aviv, Nablus, and Acre. The Anglo-Palestine Bank has its head office in Tel-Aviv, with branches in Jerusalem, Jaffa, Haifa, Tiberias, and Safad. The Banco di Roma has branches in Jerusalem, Jaffa and Haifa. The Ottoman Bank has branches in Jerusalem, Jaffa, Haifa, Nablus, Tel-Aviv and Amman (Transjordan).

There are also established, in addition, a Jewish Workers' Bank, several Co-operative Credit Institutions, a Building Loan and Saving Association, a Central Bank of Co-operative Institutions and other savings societies.

The standard of currency from November 1, 1927, is the Palestine pound (£P), divided into 1,000 mils, and equivalent in value to the pound sterling. Palestinian notes, consisting of £P½, £P1, £P5, £P10, £P50, £P100 notes, are legal tender for any amount. Silver coins, 720 fine, of 100 and 50 mils, weighing 180 and 90 grains respectively, nickel of 20, 10 and 5 mils, and bronze of 2 and 1 mils are used. The 2 mil coin is about equal in value to the United States cent. Gold coins are not being issued for the time being. About £P2,500,000 is in circulation.

The metric system is followed by the Government and local authorities, but the local weights and measures are still largely employed by the public.

1 Dunam = 1098.76 sq. yards = 0.2270 acre

Transjordan.—This territory, which roughly corresponds to the area of the old Seljuk Kingdom of Kerak and of the Lordship of Montreal or Oultrejordain in the Latin Kingdom of Jerusalem, is governed by a local Arab Administration under His Highness the Amir Abdullah Ibn Hussein, K.O.M.G., G.B.E., born in Mecca, 1882, second son of ex-King

Hussein of the Hijaz and elder brother of King Faisal of Iraq, who became its ruler in April 1921 and is assisted by an Executive Council. The country is covered by the Palestine Mandate, but the clauses relating to the establishment of a national home for the Jews are expressly excluded from operation therein. In April 1923 a Declaration was made that, subject to the approval of the League of Nations, His Majesty's Government will recognise the existence of an Independent Government in Transjordan, under the rule of His Highness the Amir Abdullah, provided such government is constitutional and places His Britannic Majesty's Government in a position to fulfil its international obligations in respect of the territory by means of an Agreement to be concluded between the two Governments. This agreement was signed in Jerusalem on February 20, 1928, and having been accepted by the Legislative Assembly set up under Article 11 was ratified by the High Contracting Parties on October 31, 1929. The Organic Law has been published, and the Legislative Council assembled for the first time in April 1929. In 1928 a separate commission was issued to the High Commissioner for Palestine appointing him High Commissioner for Transjordan, he is thus High Commissioner for both areas.

For the frontiers of Transjordan, see the STATESMAN'S YEAR BOOK, 1929, pp 191-2.

The population is probably about 260,000. Of these, 220,000 are Arab Moslems, 30,000 Arab Christians, the remaining 10,000 are Caucasian elements (chiefly Circassian) settled by the Turks in Transjordan some 45 years ago following the Turco Russian war. Most of the towns and larger villages have schools, and the Budget provision for education in 1929-30 is 22,350/. The Arab Legion, which comprises Gendarmerie, Police and Prisons, and Passport personnel, and a specially recruited Desert Patrol, is a body of 990. Detachments of the Royal Air Force are located at Amman and Maan, and there is a military force of some 700 men raised in Palestine and Transjordan, but officered largely by British Officers stationed in the country. This Force is known as the Transjordan Frontier Force. The country to the east of the Hedjaz Railway line is largely desert, but to the west of this line is potentially of high agricultural value. The resources of the country are agricultural and pastoral products, while several antiquity sites, of which the most notable are Amman, Jerash, Kerak and Petra, are becoming an essential part of the itinerary of Eastern tourists. There are also phosphate deposits (undeveloped, though examined). Potash is found in the Dead Sea, and possibly there is oil in the southern area. A metalled road, fit for motor traffic, connects Amman with Jerusalem while unmetalled roads have been constructed making motor traffic possible from Amman to all the chief towns in the country. The road running from Amman to Maan has been continued to Aqaba, and, from this main road, branches run to Madeba, Kerak, Tafileh and Wady Musa (Petra). The towns of Jerash, Irbid, Ajloun, Kufrinji, Remte and Deraa, the last named being in Syrian territory, are joined by good roads to Amman. From Irbid a branch runs to Jisr Mejamie and Jisr Sheikh Hussein on the Palestine boundary. An alternative route from Amman to Deraa may be taken, the road running via Zerka and Mafrak. From this latter, a branch road runs to Remte, El Hosn and Irbid. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman, and from Azrak cars can pass across the desert via Rutba to Baghdad. The Hedjaz Railway from Deraa to Kalat Mudawara runs, with the exception of the first few miles, through Transjordan territory. South of Maan, however the Railway is in disrepair. The Cairo-Baghdad

air route traverses the country from west to east, and there is an aerodrome with a Royal Air Force detachment at Amman, while at Zizia there is a landing ground used by the Imperial Airways Co as a fuel replenishing station. The estimated revenue of the country in 1931-32 is 348,690/ including reimbursements and an estimated Grant in Aid from the Imperial Government of 119,150/, expenditure, 357,028. Great Britain is represented by a British Resident subordinate to, and the agent of, the High Commissioner for Transjordan. The official language of the country is Arabic.

BRITISH EAST AFRICA

British East Africa consists of a large area on the mainland, together with the Islands of Zanzibar and Pemba For details as to international agreements, &c, with regard to the British sphere in East Africa, *see* the STATESMAN'S YEAR BOOK for 1907, pp 216 and 217

KENYA COLONY AND PROTECTORATE

Government—The Kenya Colony and Protectorate extend, on the Indian Ocean, from the Umba River to Dick's Head, and inland as far as Lake Victoria and Uganda The Protectorate consists of the mainland dominions of the Sultan of Zanzibar, viz, a coastal strip of territory ten miles wide, to the northern branch of the Tana River, also Kau, Kipini, and the Island of Lamu, and all adjacent islands between Rivers Umba and Tana, these territories having been leased to Great Britain in 1895 for an annual rent of 10,000*l* The colony and protectorate were formerly known as the East Africa Protectorate On April 1, 1905, this was transferred from the authority of the Foreign Office to that of the Colonial Office, and in November, 1906, the Protectorate was placed under the control of a Governor and Commander-in-Chief and (except the Sultan of Zanzibar's dominions) was annexed to the Crown as from July 23, 1920, under the name of 'The Colony of Kenya,' thus becoming a 'Crown Colony' The territories on the coast rented from the Sultan of Zanzibar were proclaimed as the Kenya Protectorate

A treaty was signed (July 15, 1924) with Italy under which Great Britain ceded to Italy the Juba River and a strip from 50 to 100 miles wide on the British side of the river Following on ratification of the treaty, cession took place on June 29, 1925

In 1906 Executive and Legislative Councils were constituted, the former consisting of 4 members, in addition to the Governor, the latter of 8 official and 4 unofficial members In 1919 the Legislative Council was enlarged to consist of 11 elected representatives of the European community, three nominated members, two representing the Indian population and one the Arabs, and a sufficient number of official members to give a majority in the Council A new constitution was adopted in December, 1925, under which the Executive Council consists of 11 members, in addition to the Governor, while the Legislative Council consists of 11 elected European members, 5 elected Indian members, 1 member nominated to represent African interests, 1 elected Arab member, and a sufficient number of *ex-officio* and nominated official members to give to these a majority The constituencies for Europeans, Indians and Arabs are separated from one another (*à la* communal franchise) Legislation is by Ordinances made by the Governor with the advice and consent of the Legislative Council. In 1908 foreign consular jurisdiction in the Zanzibar strip of coast was transferred to the British Crown.

There are 9 provinces, which are as follows Coast (capital Mombasa), Ukamba (capital Machakos) Kikuyu (capital Nyeri), Nyanza (capital Kisumu), Northern Frontier Province (capital Isiolo), Nzoia (capital Eldoret), Turkana (capital Kapenguria), Rift Valley (capital Nakuru), and Masai (capital Ngong)

Area and Population.—The territory has an area of 224,960 square miles, population in 1931 estimated at 3,040,940, including 16,800 Europeans, 39,500 Asiatics, and 12,100 Arabs European population, March 6, 1931, was 16,812 On the coast the Arabs and Swahilis predominate, further inland are races speaking Bantu languages, and non Bantu tribes such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Masai, the Somali, and the Gallas Mombasa is the second largest town, population about 57,000, of whom 1,200 are Europeans The harbour is situated on the eastern side of an island of the same name, and is the terminus of the Kenya and Uganda Railway Kilindini harbour on the south western side of the island is the finest land locked and sheltered harbour on the east coast of Africa and is accessible to vessels of deep draught The principal river in the North is the Tana, which flows into the Indian Ocean It is navigable for about 400 miles by shallow draught steamers Nairobi, the capital and the headquarters of the administration, has 85,722 inhabitants, of whom about 7,164 are European There are about 2,882 European farmers in the Colony

Religion, Education, Justice—The prevailing religious beliefs are Pagan, but on the coast Mohammedanism has made great progress There are many Christian mission societies, British, French, Italian, Swedish, and American, several being Roman Catholic There were 65 (including 16 European) Government schools in operation in 1931, and 2,266 mission and native schools The Supreme Court is at Nairobi, and sessions are held at Mombasa, Nakuru, Eldoret, Kisumu, and other places District Courts presided over by magistrates are held in each district In native cases local ideas and customs are considered The legal status of slavery has been abolished throughout East Africa

Estimated net revenue for 1932, 2,289,197l, estimated expenditure, 2,240,260l

Agriculture and Mining.—As the pursuit of agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are

extremely varied, and tropical, sub tropical and temperate crops are grown. The main producing areas are in the highlands where coffee, maize, wheat, sisal, tea and wattle are crops of major importance. At lower altitudes where conditions are tropical, maize, sisal, sugar, coconuts and cotton are crops of principal importance. The dairy and wool industries are increasing their outputs, and considerable quantities of hides are exported annually. In addition to the above, groundnuts, simsim, potatoes, beans, essential oils, barley and other miscellaneous crops are grown accordingly to elevation and rainfall both for export and home consumption. In February 1932 livestock in the possession of Europeans numbered 248,279 cattle of all descriptions, 202,456 wool bearing sheep and 13,760 pigs.

The merchantable forest area extends over 3,300 square miles. At the coast are found mangroves, ebony, copal and other trees, but 95 per cent of the forests are in the Highlands. They are mainly Coniferous (Juniper and Podocarpus), but also contain valuable hardwoods such as Camphor and Olive. Pencil Cedar is abundant, and the export of pencil slats promises to be an important industry, as does also the exploitation of the large bamboo forests for paper pulp.

The mineral resources are not yet fully explored. Production for 1931 was gold, 2,351 ozs (value 13,194/), marble, 410 tons (value 4,100/), lime, 940 tons (value 940/).

Commerce and Shipping—There is a uniform Customs tariff in Kenya, Uganda and Tanganyika. The Colony and Protectorate of Kenya and Uganda Protectorate are one administrative unit for Customs purposes, and complete freedom of trade exists between the two territories and Tanganyika, Customs Revenue being allocated to the consuming territory.

Imports into Kenya and Uganda (excluding Government stores, bullion and specie), the domestic exports of Kenya and Uganda, and the tonnage entered and cleared—Colony and Protectorate of Kenya—were —

Communication between the ports of Kenya is kept up by small steamers owned by the British India S S Co , Messrs Cawasji Dinshaw Brothers, at Aden, and the African Wharfage Co , Ltd , at Mombasa

Communications—The Kenya and Uganda Railways and Harbours are State Owned , the Railway, which is Metre Gauge, consists of Main Line, Mombasa island to Kampala, in Uganda, 886 miles, other lines in Kenya are the Nakuru Kisumu line, 132 miles, the Voi Kahe Branch, 91 miles, with running powers over the Tanga line (Tanganyika Territory) between Kahe Junction and Moshi, the Lake Magadi Branch, 91 miles, the Thika-Nyeri-Nanyuki line, 145 miles, the Lake Solai Branch, 26 miles, the Kitale Branch, 40 miles, the Thomson's Falls Branch, 49 miles, and the Kisumu Butere Branch, 44 miles In Uganda, Mbulamuti-Namasagali line, 18 miles, Port Bell Kampala Railway, 6 miles, Tororo-Soroti Branch, 100 miles Surveys have been made for Kedowa-Sotik-Kericho line, 66 miles, and the Bukonte-Jinja diversion, 53 miles

The Harbours comprise the following the Port of Mombasa, which includes Kilindini Harbour, Mombasa Old Port, Ports Reitz and Tudor, and the Ports of Lamu, Malindi and Kilifi Kilindini Harbour possesses 5 deep-water quay berths, a bulk oil jetty and a lighterage berth The quays are equipped with electric cranes

The Kenya and Uganda Railways and Harbours also operate steamer services on Lakes Victoria, Kioga, Albert, and on the River Nile, and a motor transport service, 75 miles, between Masindi Port on Lake Kioga, and Butiaba, on Lake Albert

During the year ending December 31, 1931, 822,232 tons of goods and 768,224 passengers were carried, revenue, 1,903,726*l* , expenditure, 1,800,895*l* Telegraphic communications exist along all lines of rail Through bookings are in operation between Kenya and Uganda Railways and Harbours and Tanganyika Railways and Harbours via Moshi and Mwanza The country is fairly well provided with roads and tracks There is a motor road from Nairobi, across Uganda, to Mongalla in the Sudan

The Post Office of the Colony and Protectorate (inclusive of the Uganda Post Office, which is worked by the Kenya Post Office) received and

despatched 14,701,800 letters, packets, &c, and 505,991 telegrams during 1930. The telegraph system has 12,480 miles of wire (exclusive of Uganda). A cable connects Mombasa with Zanzibar.

A short-wave wireless station, owned by the British East Africa Broadcasting Company, Ltd, is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain.

Money.—The currency of the Colony and Protectorate, which is the same as that of the Uganda Protectorate and the Tanganyika Territory, is controlled by the East African Currency Board domiciled at 4 Millbank, London, S W 1, who maintain a stable rate of sterling exchange. The standard coin is the East Africa shilling of one hundred cents, introduced as from January 1, 1922, which is legal tender to any amount. Twenty East African shillings equal one East African pound. The subsidiary coins consist of 50 cent (silver), 10 cent, 5 cent and 1 cent (bronze). The paper currency consists of notes of the following denominations: 5, 10, 20, 100, 200, 1,000 and 10,000 shillings. Three banks operate in the colony.

Colonial Secretary—H. M. Moore, C M G.

THE UGANDA PROTECTORATE

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East African Company. In 1894 a British Protectorate was declared over the kingdom of Buganda and some of the adjoining territories. The present limits are approximately as follows.—On the north, the Uganda-Sudan boundary, on the east, a line drawn from Mt. Zulia on the Sudan boundary along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya to the eastern shores of Lake Victoria, on the south by Tanganyika Territory (late German East Africa), and on the west by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area 94,204 square miles, including 13,616 square miles of water. For administrative purposes it is divided into 4 provinces: (1) the Eastern Province, comprising the districts of Busoga, Teso, Karimoja, Bugwere, Bugishu, and Budama; (2) the Northern Province, comprising the districts of Bunyoro, Gulu, Lango, Chua, and West Nile; (3) the Western Province, comprising the districts of Toro, Ankole, and Kigezi; and (4) Buganda Province, with islands in Lake Victoria, comprising the districts of Mengo, Masaka, Mubende, and Entebbe.

The whole Protectorate is now under direct administration, but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a 'Kabaka,' with the title of 'His Highness.' He is assisted in the government by three native ministers and a Lukiko, or native assembly. In Buganda, and in Bunyoro, Ankole and Toro, also ruled over by native 'Kings,' purely native matters are dealt with by the various Lukikos, but in serious cases there is an appeal to British courts. For Europeans and

non-natives justice is administered by His Majesty's courts. The principal British representative is the Governor, who is assisted by a Legislative Council and an Executive Council in carrying out the functions of Government. The headquarters of the British Administration is at Entebbe, the commercial centre is Kampala.

The total population of Uganda (1931 census) was 3,553,534, composed as follows: Native, 3,536,267; Asiatic, 14,150; European, 2,001; others, 1,116. Among the natives approximately 874,000 are Baganda, the tribe from which the Protectorate takes its name, and which was the most powerful and civilised at the time when the first explorers visited the country. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers. Their efforts have now for some years been supplemented by a Government educational scheme, and a University College is established by Government at Makerere (Kampala) for the higher education of natives. 264,177 children attended schools during 1931. About 2,400,000 natives speak Bantu languages, there are a few Congo pygmies living near the Semliki river, the rest of the natives belong to the Hamitic Nilotic, and Sudanese groups.

There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The appeal court consists of Judges of the High Courts of the Colony of Kenya, Uganda, Nyasaland, Zanzibar and Tanganyika territory. In 1931, 6,712 criminal cases were tried. There is an armed constabulary force under a British Commissioner of Police and British officers. A battalion of the King's African Rifles is stationed in the Protectorate.

Cotton is the principal product, and is grown almost entirely by natives. The area under cotton in 1931 was estimated at about 865,259 acres. Other products are coffee, chillies, oil-seeds, tin ore, hides, ivory, sugar and tobacco. There are valuable forests.

Total exports in 1931, 1,978,262*l* (1930, 2,060,453*l*), cotton, 1,503,307*l*, coffee, 161,389*l*, cotton seed, 149,224*l*, ivory, 16,184*l*, hides and skins, 41,964*l*, tin ore, 24,436*l*. The total value of imports for consumption in 1931 was 1,308,726*l*, consisting mainly of cotton fabrics and manufactures, 347,217*l*. Total imports in 1930 amounted to 1,614,164*l*. The trade is chiefly with Great Britain, Japan, the United States, and India. There is a uniform Customs tariff in Kenya, Uganda, and Tanganyika.

In 1931 the poll tax amounted to 531,542*l*, customs to 304,128*l*, and cotton excise to 1,739*l*. Debt, 1,066,986*l*.

There are steamer services on Lakes Victoria, Kioga, and Albert. The steamers on Lake Albert descend the Nile to Nimule, on the Sudan boundary, whence there is a motor road (about 100 miles) round the rapids extending to Rejaf, the terminus of the Nile steamers from Khartum. The

main line of the Kenya and Uganda Railway now extends to Kampala, by way of Nakuru, Eldoret, Turbo, Tororo and Jinja. Lines from Jinja to Namasagali on Lake Kioga, and from Tororo to Soroti serve as feeders to bring in the important cotton crop of the Eastern Province. There is a railway from Port Bell to Kampala, 7½ miles in length. A network of all weather motor roads has been constructed, and a fleet of Government motor vans serves those main routes on which a regular private transport service does not exist.

Mail services by motor and relays of runners radiate from Entebbe, Kampala and Jinja. The Sudan Egyptian telegraph and telephone system is established to Rejaf. The Uganda telegraph line connects with the Belgian Congo via Fort Portal and the Semliki. The length of telegraph and telephone line in the Protectorate is (1931) 3,495 miles. Telephone exchanges are installed at Entebbe, Kampala, Jinja, Iganga and Mbale, with trunk communication between. There is a wireless station, used exclusively for messages in connexion with the aeroplane services and the meteorological service, at Kololo Hill, near Kampala. The weekly air mail service between London and Cape Town connects Uganda with both places.

The currency unit is the shilling, introduced in 1921 and standardized, with subsidiary coinage of silver 50 cent pieces, and bronze 10 cent, 5 cent, and 1 cent pieces. East African Currency Board notes of shillings 10,000, 1,000, 500, 200, 100, 50, 20, 10, and 5 are also in circulation. The Savings Bank had a balance of 38,814½ due to 2,931 depositors on December 31, 1931. The National Bank of India (Limited) has branches at Entebbe, Kampala and Jinja, and the Standard Bank of South Africa and Barclays Bank (Dominions, Colonial and Overseas) have branches at Kampala and Jinja.

ZANZIBAR

The Island of Zanzibar is situated in 6° S latitude, and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is the largest coralline island on the African coast, being 53 miles long by 24 broad, and having an area of 640 square miles. To the north east, at a distance of some 25 miles, lies the Island of Pemba in 5° S latitude, 42 miles long by 14 broad, having an area of 380 square miles.

In the sixteenth century the Arabs of the East Coast sought the assistance of the Imams of Muscat to drive out the Portuguese. The subsequent allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said transferred his capital to Zanzibar in 1832. On his death in 1856 the African possessions were, under an arbitration by Lord Canning (then Governor General of India), declared independent of the parent State. In 1890 the supremacy of the British interests in the Islands of Zanzibar and Pemba was recognised by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions, which extended over the coast from Warsheikh in 3° N latitude to Tunghu Bay in 10° 42' S latitude, were ceded to Italy, Great Britain, and Germany, respectively, Great Britain and Italy paying rent for the territories under their protection, while

Germany acquired the Sultan's rights by the payment of a sum of 200,000*l*. At a later date Italy also acquired similar rights by payment of a sum of 144,000*l*. The British rented territories on the mainland were included in the East Africa Protectorate, and now form the Protectorate of Kenya (see above under Kenya). Thus the Zanzibar Protectorate is confined for administrative purposes to Zanzibar, Pemba, and adjacent small islands. In 1891, a regular Government was formed for the Protectorate with a British representative as first minister. In 1906 the Imperial Government assumed more direct control over the Protectorate and reorganised the Government. On July 1, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change in the following year.

Constitution and Government—The Sultan, Seyyid Sir Khalifa bin Harub, K C M G, K B E (born 1879), succeeded on the abdication of his brother in law, Ali bin Hamoud bin Mahomed, December 9, 1911. The Government is administered by a British Resident, who is appointed by commissions under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Order in Council, 1924, as amended by the Zanzibar Order in Council, 1925.

Legislation consists of Decrees of His Highness the Sultan, which are binding on all persons when countersigned by the British Resident under the Order in Council.

In 1926 Executive and Legislative Councils were established. The former is presided over by His Highness the Sultan, and the latter by the British Resident. The Legislative Council consists of three *ex officio* official members and five others. There are six unofficial members, representing various communities.

Population, Religion, Education, &c—The population of Zanzibar and Pemba, according to the census of 1931, was 235,428 (Zanzibar, 137,741, Pemba, 97,687). The registered birth rate in 1930 was 16.93 per 1,000 for Zanzibar and 16.65 for Pemba, and the death rate 23.37 and 13.01 respectively. The Arabs are the principal landlords and employers of labour. The black population is mostly Swahili, but there are representatives of nearly every African tribe. According to the 1931 census there were 48,962 non-native inhabitants, including 278 Europeans, most of whom are English, and about 14,000 British Indian subjects, through whose hands almost the whole trade of East Africa passes, and 33,400 Arabs. Zanzibar town has a population of 45,276.

Most of the natives are Mohammedans (Sunnis of the Shafi school), the Sultan and the principal Arabs are of the Ibadhi sect. There are 3 Christian Missions: the Universities Mission to Central Africa (Church of England), the Mission of the Holy Ghost (Roman Catholic), and the Friends' Industrial Mission.

Education is free. Subjects of H. H. the Sultan are liable to compulsion, but for others education is voluntary. There are Government schools mainly for Moslems, a number of mission schools, Indian schools supported by different communities for the children of their sects, private schools and a non-sectarian school. The total number of children attending these schools in 1931 was 4,867. There is a Teachers' Training School and a Commercial School. In 1927 education for Arab girls was started under the auspices of Government.

Justice—In cases in which persons subject to the Zanzibar Order in Council, 1924, are concerned, justice is administered by His Britannic

Majesty's High Court and the Courts subordinate to it, and in other cases by H H the Sultan's Court for Zanzibar and the Courts subordinate to that Court. Subordinate Courts are held by Resident Magistrates, Administrative Officers and Arab Kathis, and an appeal lies from those Courts to the British or Zanzibar Court as may be required. In addition, there are District Courts, presided over by Arabs, the members being natives of the Protectorate. An appeal lies from the British Court and from the Zanzibar Court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

Finance—The revenue and expenditure for 6 years were as follows —

Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure	Year	Revenue from Customs	Total Revenue (excluding loans)	Expenditure
	£	£	£		£	£	£
1926	199,053	449,037	649,877	1929	290,865	514,000	561,944

1928	256,842	471,771	598,791	1931	295,299	536,809	580,961

Besides Customs, the chief sources of revenue in 1931 were interest on loan to Kenya and other investments, 44,166*l*, electricity department, 25,611*l*, agriculture, 25,933*l*, court fees, etc., 74,747*l*, rent of Kenya Protectorate, 10,000*l*, rent of Government property, land and houses, 11,598*l*. The chief heads of expenditure in 1931 were public works, 111,214*l*, port and marine, 46,922*l*, police and prisons, 33,425*l*, electricity and wireless department, 41,077*l*, judicial department, 26,874*l*, agricultural department, 31,397*l*, district administration departments, 28,670*l*, medical, 52,881*l*, education, 26,540*l*, pensions, 37,047*l*.

Production and Industry—The clove industry is by far the most important in the Protectorate, the Islands of Zanzibar and Pemba yielding the bulk of the world's supply. It is estimated that there are in both islands about 48,000 acres under cloves and over 3 million trees in bearing, the average output of the last 20 seasons being 19,556,437 lbs. The exports in 1931 were 216,738 cwts, and clove-stems 51,360 cwts. The large plantations are chiefly owned by Arabs, but many natives possess small holdings. The coconut industry ranks next in importance after cloves. It is estimated that there are about 55,000 acres under cultivation and 3½ million trees in both islands. The export of copra amounted in 1931 to 337,786 cwts.

The manufactures are pottery, coir fibre and rope, soap, oil (coconut and sisam), jewellery, and mats. There are no mines in the Protectorate.

Commerce—The total imports, exports, and shipping for 5 years were —

MAURITIUS.

Mauritius was known to Arab navigators at an early date, probably not later than the tenth century. It was no doubt visited by Malays in the fifteenth century, and was discovered by the Portuguese between 1507 and 1512, but the Dutch were the first settlers. In 1710 they abandoned the island and it was occupied by the French under the name of *Isle de France*. The British occupied the island in 1810, and it was formally ceded to Great Britain by the Treaty of Paris of 1814.

Constitution and Government.—Under Letters Patent of 1885, 1901, 1904, and 1913, partially representative institutions have been established. The government of the Colony, with its dependencies, Rodrigues, Diégo Garcia, &c, is vested in a Governor, aided by an Executive Council, consisting of the officer in command of His Majesty's troops, the Colonial Secretary, the Procureur-General, the Treasurer, and such other persons holding office in the service of the Government of the Colony as the Governor, through instructions from the Secretary of State, may from time to time appoint. There is also a Council of Government, consisting of the Governor and twenty-seven members, ten being elected under a moderate franchise, eight *ex officio*, and nine nominated by the Governor. The official councillors comprise the four Executive members, the Collector of Customs, the Protector of Immigrants, the Director of Public Works and Surveys, and the Director of the Medical and Health Department.

Governor of Mauritius —Sir W E Francis Jackson, K.C.M.G. (Appointed March 7, 1930)

NYASALAND PROTECTORATE (BRITISH)

The Nyasaland (until 1907 British Central Africa) Protectorate, constituted on May 14, 1891, lies along the southern and western shores of Lake Nyasa, and extends towards the Zambezi. It is administered under the Colonial Office by the Governor and Commander in Chief, assisted by an Executive and a Legislative Council, both consisting of nominated members, the Governor having the right of veto (Order in Council of September 4, 1907). The Laws consist of local Ordinances duly enacted, with such British Acts as are of general application.

Land area, 37,596 square miles, divided into two Provinces, each in charge of a Provincial Commissioner, and nineteen districts, each administered by a District Commissioner and his assistant. Population on Dec 31, 1931, 1,910 Europeans (mostly in the Shire Highlands), 1,537 Asiatics, and 1,498,836 natives. The chief settlements are Blantyre and Limbe in the Shire Highlands, with about 700 European inhabitants, others are Zomba (the seat of Government), Cholo, Lilongwe, and Mlanje, on Lake Nyasa are Fort Johnston, Kota Kota, Bandawe, Chintechi, Nkata, Likoma, and Karonga. There are good motor roads in all directions, and life and property are safe. Education is controlled by the Education Department. Grants in aid are paid to mission societies for native education and there are three elementary schools for European children, which are maintained as private establishments and receive grants from Government. The Government has established a training centre for native teachers. Eleven Christian missions are at work, in 1931 there were 2,965 native schools with a total roll of 137,472 pupils and an average attendance of 84,638. The total grant in aid paid by Government to missionary societies in 1931 was 11,500*l* in respect of native education. The grant in aid for European education was 810*l*. These grants were distributed in accordance with the provisions of the Education Ordinance, 1930.

Justice is administered in the High Court, which has jurisdiction in civil and criminal matters, and also as a Court of Admiralty. Subordinate courts are held by magistrates and assistant magistrates in the various districts. Appeals from decisions of the High Court are heard in H B M's Court of Appeal for Eastern Africa, sitting at Mombasa.

Resident Magistrate —E A Willmott

Tristan da Cunha, a small group of islands in the Atlantic, half-way between the Cape and S. America, in 37° 6' S lat 12° 1' W long. Besides Tristan da Cunha and Gough's Island, there are Inaccessible and Nightingale

Islands, the former two and the latter one mile long, and a number of rocks. Tristan consists of an extinct volcano rising to a height of 8,000 feet, with a circumference at its base of 21 miles. The habitable area is a small plateau on the north-west side of about 12 square miles, 100 feet above sea-level. Here the struggle for life is great: it is now impossible to grow corn owing to the depredation of rats, which came from a wreck in 1882, and fuel is scarce owing to deforestation. The staple food appears to be the potato. There are apple and peach trees, bullocks, sheep and geese are reared, and fish are plentiful. Besides being inhospitable, the island is extremely lonely. Since 1900 the annual visits of a warship have been discontinued. Despite these disadvantages, the community is a growing one. In 1880 it numbered 109, in 1932, 163. The characteristics of the people are longevity, good health, and a certain shyness of disposition. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St Helena was withdrawn in 1817. Many attempts have been made to induce the inhabitants to leave. The lack of educational facilities for their children was the sole argument which carried weight in the eyes of the inhabitants. In 1932, the Rev A G Partidge who visited the island at the request of the Colonial Office, set up before he left, a Chief of the islanders and 3 officers to work under him. The Chief is chairman of the Island Council. The Chief's mother was also appointed Head Woman and chairman of the Women's Council, a body which is concerned with the welfare of women and children.

SEYCHELLES.

Seychelles and its Dependencies consist of 101 islands and islets with a total estimated area of 156 square miles. The principal island is Mahé (55 square miles), smaller islands of the group being Praslin, Silhouette, La Digue, Curieuse, and Félicité. Among dependent islands are the Amirantes, Alphonse Island, Bijoutier Island, St François, St Pierre, the Cosmoledo Group, Astove Island, Assumption Island, the Aldabra Islands, Providence Island, Coetivy, Farquhar Islands, and Flat Island.

The islands were first colonised by the French in the middle of the eighteenth century, the object being to establish plantations of spices to compete with the lucrative Dutch monopoly. They were captured by the English in 1794 and incorporated as a dependency of Mauritius in 1810. In 1888 the office of Administrator was created, an Executive Council of 2 *ex-officio* members and 1 nominated member was appointed, with a Legislative Council of 3 official and 3 unofficial members, the Administrator being president of both Councils and having an original and casting vote in the

Legislative Council In 1897 the Administrator was given full powers as Governor, and in November, 1903, he was raised to the rank of Governor

Imports, 1930 Rs 1,626,077, 1931 Rs 1,069,958 Exports, 1930 Rs 2,049,967; 1931 Rs 1,102,913 Principal imports, 1931 Rice, 2,438 tons, cotton piece goods, 468,444 yds, sugar, 699 tons, wheat flour, 275½ tons, gunny bags, 50,800, galvanized iron sheets, 75½ tons, kerosene oil, 35,347 litres, dholl and lentils, 77 tons Principal exports, 1931 Copra, 4,882 tons, Rs 667,072, cinnamon oil, 54,795 kilos, Rs 256,872, Patchouli oil, 3,915 kilos, Rs 35,828, guano, 4,780 tons, Rs 64,350 Imports in 1931 from United Kingdom, Rs 326,107, India, Rs 373,247, France, Rs 85,223, Dutch Possessions, Rs 87,654, French Possessions, Rs 7,359, Japan, Rs 44,710, Spain, Rs 25,960 Exports in 1931 to United Kingdom, Rs 520,934, New Zealand, Rs 18,000, Germany, Rs 33,338, France, Rs 50,245, U S A, Rs 255,808

Shipping entered and cleared (1931), 234,414 tons, mainly British, exclusive of coasters trading between Mahé and the dependencies The British India steamers call every four weeks from Bombay on their way to Mombasa, and every eight weeks on their way from Mombasa to Bombay,

and the Royal Dutch Steam Packet Co steamers call every four weeks on their way to Batavia from Mombasa. There is fairly regular communication between the islands.

There is a good road system in Mahé, and further road making is in progress in Mahé and in Praslin. In 1931 the post office despatched and received 171,300 letters and post cards, 91,300 newspapers, &c, and 3,104 parcels. There is direct telegraphic communication with Mauritius, Zanzibar, Aden, and Colombo. The Government Wireless Station at Victoria is open for the exchange of radiotelegrams with ships at sea, but the service between Victoria and the Praslin group of islands is still suspended.

At the end of 1931 the Savings Bank deposits amounted to Rs 203,753 to the credit of 723 depositors.

Current money in the islands consists of rupees and notes.

SOMALILAND PROTECTORATE.

The **Somali Coast** stretches from Loya' Ada, west of Zeilah, to Banda Ziada, 49° E long. After 1884, when Egyptian control ceased, the territory was administered by the Government of India, but was taken over by the Foreign Office on October 1, 1898, and was transferred to the Colonial Office on April 1, 1905.

By an arrangement with Italy in 1894 the limits of the British Protectorate were defined, but in 1897, by an arrangement with Abyssinia, a fresh boundary as required by that country was determined, and about 15,000 square miles were ceded to Abyssinia. An agreement for the regulation of Anglo-Italian relations in Somaliland was concluded on March 19, 1907. The area is about 68,000 square miles, population about 844,700—Mohammedan, and entirely nomadic, except on the coast, where considerable towns have sprung up during the British occupation.

No census of the population other than the non-natives has been taken, but a rough estimate of the main towns of the Protectorate is as follows: Berbera, between 15,000 (hot season) and 30,000 (cold season), Hargeisa, 15,000 to 20,000, Burao, 10,000, Zeilah, 5,000. Police, 559 officers and men on Dec 31, 1931. Convictions in 1931, 923. Revenue in 1931, 101,893*l*, reckoned at 1*s* 6*d* to one rupee. Customs in 1931, 68,347*l*, expenditure, 1931, 185,762*l*. Free Grant-in-aid in respect of military expenditure, 1931, 59,000*l*. Imports, 1931, 311,443*l*, exports, 1931, 205,561*l*. Bullion and specie are included. The imports are chiefly rice (112,034 cwt.), dates (65,276 cwt.), sugar (50,334 cwt.), textiles (3,522,769 yds.), and specie, the exports, skins and hides, gum and resins, ghee, cattle, sheep and goats, and specie. Tonnage entered in 1931, 72,673,

cleared, 70,428 The rupee is the basis of the currency Government of India notes are also in circulation Transport is by camel and motor-car, there are no porters Besides ordinary telegraphs there are wireless telegraph stations at Berbera, Burao, Hargeisa, Ergavo, and Buramo

The Protectorate forces now comprise a Camel Corps of 437 officers and men, with a reserve of 150 men, and 555 Police

SOUTH AFRICA.

BASUTOLAND.

Basutoland, an elevated but rugged plateau, forms an irregular parallelogram on the north-east of the Cape of Good Hope Province The provinces of the Orange Free State, Natal, and the Cape of Good Hope form its boundaries Area, 11,716 square miles The territory, which is well watered and has a fine climate, is stated to be the best grain-producing country in South Africa, and the abundant grass enables the Basutos to rear large herds of cattle

Basutoland has been under the authority of the Crown since 1884, and is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation The country is divided into seven districts, namely Maseru, Leribe, Mohale's Hoek, Berea, Mafeteng, Quthing, and Qacha's Nek Each of the districts is subdivided into wards, mostly presided over by hereditary chiefs allied to the Moshesh family

According to the census of 1921 the population numbered 495,937 natives, 1,608 Europeans, 172 Asiatics, and 1,069 coloured European settlement is in general prohibited, and is more or less limited to the few engaged in trade, Government, and missionary work. Maseru, the capital and largest town, has a population of 1,890 natives and 399 Europeans

There were 590 Government and Government aided schools in the Territory during 1931, of which 10 were Institutions (Normal, Industrial and Agricultural), 39 Intermediate Schools and 541 Elementary Vernacular Schools. The number of pupils on the roll for 1931 was 56,451 and the average attendance was 41,366. The Education vote for the year ending March 31, 1932, was 48,995½ There were 9 small primary schools for European children.

The police force at December 31, 1931, numbered :—12 European officers, 1 chief constable, 30 non-commissioned officers (native) and 289 men (natives)

The revenue arises mainly from the Post Office, native tax, licences, and income tax customs rebate from neighbouring territories Under the Native Tax Law every adult male native pays 1l. 5s per annum, and if he has more than one wife by native custom he pays 1l 5s. per annum for his

wives up to a maximum of 3*l* 16*s*. A levy of 3*s* for educational purposes is paid by every adult native. An Income Tax has been enacted on the lines of that existing in the Union of South Africa, and the collections for the year 1930-31 amounted to 5,929*l*.

BECHUANALAND PROTECTORATE

The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Matabeleland on the east to South-West Africa. Area about 275,000 square miles, population, according to the census of 1921, 152,983, of whom 1,743 were Europeans. The most important tribes are the Bamangwato (35,000), under the Chief Tshikedi (acting as regent during the minority of Seretse, the son of Sekgoma, who died in November, 1925) whose capital is Serowe (population 17,000), 40 miles west of the railway line at Palapye Road; the Bakhatla (11,000), under Chief Molefi Pilane,

222 THE BRITISH EMPIRE — BECHUANALAND PROTECTORATE

the Bakwena (13,000), under Kgari Sechele, the Bangwaketse (18,000), under chief Bathoen, the eldest son of the late chief Gasetsiwe, the Batawana, under Mathibe, and the Bamalete (4,500), under Seboko Mokgosi, who assumed the Chieftainship on July 9, 1917. In 1885, the territory was declared to be within the British sphere, in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company, in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, new arrangements were made for the administration of the Protectorate, and special agreements were made in view of the extension of the railway northwards from Mafeking. Each of the chiefs rules his own people as formerly, under the protection of the King, who is represented by a Resident Commissioner, acting under the High Commissioner. The headquarters of the Administration are in Mafeking, in the Cape Province, where there is a reserve for Imperial purposes, with ample buildings. An assistant Resident Commissioner was appointed in 1923.

The Territory is divided for administrative purposes into 11 districts, each under a Resident Magistrate. There is a tax of 1*l* 8*s* on every male native in the territory, and 5*s* of this sum is placed to the credit of a fund called the Native Fund, for education, &c. Licences for the sale of spirits are, as a rule, granted only at certain railway stations. The police force consists of 32 European officers, warrant officers and sergeants, 50 mounted police, and 215 dismounted constables.

Education is provided (there were 10 European, 2 Coloured, and 107 native schools, 1931-32). The European schools were assisted financially by the Government to the extent of 1,720*l*. The native schools are now mainly financed by the Native Fund, the charge to which for 1931-32 was 7,279*l*. Under the Inspector of Education, the schools are controlled in most of the Reserves by School Committees on which the various missionary bodies are, together with Natives, represented.

Cattle-rearing, and agriculture to a limited extent (production of maize and Kaffir corn), are the chief industries, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. Cattle numbered on May 3, 1921, 495,000 head, sheep and goats, 380,000. During the year 1931, 25,927 head of cattle were exported.

Gold and silver to the total value of 5,507*l* were mined in 1931-32.

Revenue and expenditure for six years —

Year	Revenue	Expenditure	Year	Revenue	Expenditure

Chief items of revenue, 1931-32: income tax and poll tax, 3,985*l*; customs, 26,318*l*; hut tax, 31,921*l*; licences, 6,283*l*; posts, 16,792*l*. Chief items of expenditure, 1931-32: Resident Commissioner, 12,014*l*; district administration, 12,044*l*; posts, 5,928*l*; police, 29,328*l*; administration of justice, 5,729*l*; public works (extraordinary and recurrent), 12,356*l*; medical, 12,648*l*; veterinary, 17,611*l*. There has been no Imperial grant-in-aid since 1911-12, when the grant amounted to 10,000*l*.

There is no public debt. Excess of assets over liabilities on April 1, 1932, 21,775*l*.

When the Union of South Africa was established, an agreement was made with the Union Government under which duty on all dutiable articles imported into the Protectorate is collected by the Union Customs Department and paid into the Union Treasury, a lump sum representing a certain portion of the annual Customs Revenue of the Union being paid over to the Protectorate. Under this arrangement full figures relating to imports and exports of the Protectorate are not available. The export of dairy products was in 1931, 45,053*l*.

The telegraph from the Cape of Good Hope to Rhodesia passes through the Protectorate. Similarly the railway extending northwards from the Cape of Good Hope traverses the Protectorate. It is the property of the Rhodesia Railways, Limited. In the Protectorate are 24 post offices, receipts, in 1931-32, 16,792*l*, expenditure, 5,928*l*. In 1931-32, 2,328*l* was deposited in the Savings Bank and 2,551*l* withdrawn.

The currency is British. There is no bank in the Protectorate.

SOUTHERN RHODESIA

Rhodesia includes the whole of the region extending from the Transvaal Province northwards to the borders of the Belgian Congo and Tanganyika Territory, bounded on the east by Portuguese East Africa, Nyasaland, and the Tanganyika Territory, and on the west by the Belgian Congo, Portuguese West Africa, and Bechuanaland. The region south of the Zambezi (Matabeleland and Mashonaland) is called Southern Rhodesia, that north of the Zambezi is known as Northern Rhodesia.

Prior to October, 1923, Southern Rhodesia, like Northern Rhodesia, was under the administration of the British South Africa Company. In October, 1922, Southern Rhodesia voted in favour of responsible government. On September 12, 1923, the country was formally annexed to His Majesty's Dominions, and on October 1, 1923, the new form of government was established under a Governor, assisted by an Executive Council, and a Legislature. The latter consists at first of a single elected Legislative Assembly, but that body may pass a law constituting a Legislative Council in addition. There must be a session at least once a year, and the duration of the Legislature is five years, unless sooner dissolved. The Legislature may amend, by a two-thirds vote of the total membership, the Letters Patent setting up the Constitution, with certain exceptions (relating to reservation of bills by the Governor, native administration, Crown Letters Patent, and Governor's salary). The Crown reserves the right to disallow laws. The powers of the Legislative Council respecting appropriation and Taxation Bills are limited. In July 1923 the franchise was extended to all British subjects over 21 years of age and to married women, subject to certain qualifications.

A native Council may be established in any native reserve, representative

THE UNION OF SOUTH AFRICA

Constitution and Government.

THE Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw 7, Ch 9), passed by the Parliament of the United Kingdom on September 20, 1909 Under the terms of that Act the self governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony were united on May 31, 1910, in a legislative union under one Government under the name of the Union of South Africa, these Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively There is a Governor General, and an Executive Council in charge of the Departments of State

Legislative power is vested in a Parliament consisting of the King,

a Senate, and a House of Assembly. The Governor General has power to summon, prorogue, and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. There must be a session of Parliament every year.

The Senate consists of forty members, eight (four being selected mainly for their acquaintance with the reasonable wants and wishes of the non-European races) being nominated by the Governor General in Council and thirty two being elected, eight for each Province. Each senator must be a British subject of European descent, at least 30 years of age, qualified as a voter in one of the provinces, and resident for five years within the Union, an elected senator must be a registered owner of property of the value of 500*l*. over any mortgage.

The House of Assembly consists, according to the Fifth Delimitation Commission appointed on July 19, 1927, of 148 members chosen in Electoral Divisions in numbers as follows—The Cape of Good Hope, 58, Natal, 17, Transvaal, 55, Orange Free State, 18. Act No 18 of 1930 introduced female franchise and gave the vote to all women over 21. Act No 41 of 1931 extended the franchise to all males of European, or white, extraction over the age of 21, thus removing the property and wage qualifications existing in the Cape and Natal Provinces. The qualifications in respect of coloured and native (Bantu) voters remains unchanged. Each electoral district in each province returns one member, who must be a British subject of European descent, qualified as a registered voter, and resident five years within the Union. A House of Assembly continues five years from the date of its first meeting unless sooner dissolved.

The House of Assembly, not the Senate, must originate money Bills, but may not pass a Bill for taxation or appropriation unless it has been recommended by message from the Governor General during the Session. Restrictions are placed on the amendment of money Bills by the Senate. Provision is made respecting disagreements between the Houses, the Royal Assent to Bills, and the disallowance of laws assented to by the Governor-General.

Each member of each House must make Oath or Affirmation of Allegiance. A member of one House cannot be elected to the other, but a Minister of State may sit and speak, but not vote in the House of which he is not a member. To hold an office of profit under the Crown (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime, and insanity.

Pretoria is the seat of government of the Union, and Cape Town is the seat of Legislature.

Governor-General and Commander in Chief—Earl of Clarendon, G C M.G. Appointed January 1931 (salary £10,000 per annum)

The Executive Council was constituted (November 1924) as follows—

The Governor-General

Prime Minister and Minister of External Affairs—General The Honourable J B M Hertzog (3,500*l*.)

Minister of the Interior, of Public Health and of Education—The Honourable Dr D F Malan (2,500*l*.)

Minister of Mines and Industries—The Honourable A. P. J. Fourie, (2,500*l*.)

Minister of Railways and Harbours—Vacant (March 1933) (2,500*l*.)

Minister of Finance—The Honourable N C Havenga (2,500*l*.)

Minister of Justice.—The Honourable O. Pirow, K C (2,500*l*.)

Minister of Defence and Labour—Colonel The Honourable F H P. Creswell, D S O (2,500l)

Minister of Agriculture—General The Honourable J C G. Kemp (2,500l)

Minister of Lands—The Honourable P G W Grobler (2,500l)

Minister of Posts and Telegraphs and of Public Works—The Honourable H W Sampson, O B E (2 500l)

Minister of Native Affairs.—Hon E. G. Jansen (2,500l)

Secretary to the Prime Minister and Secretary for External Affairs—H D J Bodenstein, LL D

The result of the elections in June 1929 was: Nationalists, 78, South African Party, 61, Labour (Creswell), 5, Labour (National Council), 3, Independent, 1 total, 148

In each province there is an Administrator appointed by the Governor-General for five years, and a Provincial Council elected for three years, each council having an executive committee of four (either members or not of the council), the administrator presiding at its meetings. Members of the Provincial Council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. The number of members in each Provincial Council is as follows—Cape of Good Hope, 58, Natal, 25, Transvaal 55, Orange Free State, 25. The provincial committees and councils have authority to deal with local matters such as provincial finance, education (primary), charity, municipal institutions, local works, roads and bridges, markets, fish and game, and penalties for breaches of laws respecting such subjects. Other matters may be delegated to these Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor General-in-Council.

There is a provincial Revenue Fund in each province. The old colonial capitals are the capitals of the provinces.

The railways, ports, and harbours are managed by a Harbour and Railway Board, under the chairmanship of a Minister of State. The revenues there from are paid into a special fund. All other moneys received by the Union are paid into a Consolidated Revenue Fund, on which the interest on debts of the colonies forms a first charge. To the Union has been transferred the public property, real and personal, of the colonies.

The English and Dutch languages are both official. The word 'Dutch' has now been expressly declared by Act of Parliament to include Afrikaans, a local variant of the language of Holland.

High Commissioner in London—Hon C te Water (appointed Sept, 1929)

Envoy Extraordinary and Minister Plenipotentiary to the United States—E. H. Louw (1929)

Envoy Extraordinary and Minister Plenipotentiary to Holland—D J de Villiers (1929)

Envoy Extraordinary and Minister Plenipotentiary to Italy—B J Pienaar (1929)

High Commissioner for South Africa and High Commissioner for the United Kingdom in the Union of South Africa.—Sir Herbert Stanley, G C.M.G. (appointed November 21, 1930)

The High Commissioner for South Africa is responsible for the administration of the territories in Basutoland, the Bechuanaland Protectorate, and Swaziland, which are under the regis of the Imperial Government. The administration of native affairs and affairs specially or differentially affecting Asiatics in the Union vests in the Governor General-in-Council.

Area and Population.

The total area of the Union is 472,347¹ square miles divided between the Provinces as follows —Cape of Good Hope, 276,966,¹ Natal, 35,284, Transvaal, 110,450, Orange Free State, 49,647

The census taken in 1904 in each of the four Colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

The following tables give the returns of population at the various censuses, classified according to race and sex —

Year	All Races			European		Non European	
	Total	European	Non-European	Males	Females	Males	Females
1904	5,175,824	1,116,800	4,059,018	635,117	481,689	2,047,118	2,011,900

1931	—	1,828,170	—	930,541	897,634	—	—

The 1926 and 1931 population censuses were quinquennial ones of Europeans only, and were taken under the provisions of the South Africa Act for the delimitation of political constituencies.

On June 30, 1932, the European population was estimated at 1,859,400 and other races at 6,391,500.

Of the non-European population in 1921, 4,697,813 were Bantu, 165,731 Asiatic, and 545,548 of other races.

The increase in the total population, 1911-21, was—Union, 15.99 per cent, Cape, 8.49 per cent, Natal, 19.71 per cent, Transvaal, 23.81 per cent, O.F.S., 19.06 per cent. The increase in the European population in the Union 1926-31 was—Cape, 5.9 per cent, Natal, 11.6 per cent, Transvaal, 14.4 per cent, Orange Free State, 1.2 per cent, and for the Union, 8.9 per cent.

Principal towns (including suburbs) in the Union classified according to the number of inhabitants of European race, 1921, 1926 and 1931 —

1930	47,534	17,415	16,604	56,277	45,211	18,113

¹ Partial Registration only

Owing to wide variation of the laws relating to the registration of births and deaths of natives in the four provinces, and to the entire absence of native registration in one province, the figures of 1923 must be regarded as merely recording registrations and not the total number of actual events. Unifying Act No. 17 of 1923, which came into effect as from January 1, 1924, abolished compulsory registration of native vital events in rural areas, but made registration compulsory in all urban areas throughout the Union.

Education.

Under the *South Africa Act*, for a period of five years after the establishment of the Union and thereafter subject to decree of Parliament, control of education other than higher education was granted to the four Provincial Administrations. This arrangement still obtains. For practical purposes it has been provisionally determined that all post matriculation instruction and vocational education shall be deemed to constitute Higher Education.

Higher Education —By legislation of 1916 three Universities, with teaching and examining functions, were established on April 2, 1918, in place of the University of the Cape of Good Hope, provision being made for the conversion of the South African College into the University of Cape Town, of the Victoria College into the University of Stellenbosch, and of the University of the Cape of Good Hope into a federal University, styled

Justice.

The Common Law of the Union is the Roman Dutch Law, that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The Law of England as such is not recognised as authoritative, though by Statute the principles of English Law relating to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping, insurance, and other modern business developments English Law is followed, and it has also largely influenced civil and criminal procedure. In all other matters, family relations, property, succession, contract, &c., Roman Dutch Law rules, English decisions being valued only so far as they agree therewith. The prerogatives of the Crown are, generally speaking, the same as in England.

The Supreme Court consists of an Appellate Division with a Chief Justice and two ordinary and two additional Judges of Appeal. In each Province of the Union there is a Provincial Division of the Supreme Court, while in the Cape there are two Local Divisions, and in the Transvaal one, exercising the same jurisdiction within limited areas as the Provincial Divisions. The Judges hold office during good behaviour. The Circuit System is fully developed.

Each Province is further divided into Districts with a Magistrate's Court having a prescribed civil and criminal jurisdiction. From this Court there is an appeal to the Provincial and Local Divisions of the Supreme Court, and thence to the Appellate Division. A distinctive feature of the Criminal system is that Magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a Judge.

Persons convicted, all courts, 1930—males, 436,806, females, 53,275

Finance.

Prior to 1913–14 the expenditure of the four Provinces was entirely met from grants by the Union Government. Since then various Financial Relations Acts have been passed defining the conditions upon which subsidies shall be granted to the Provinces, assigning and transferring to them certain revenues and limiting their powers of taxation. Act No 46 of 1925 bases the subsidy on the attendance of pupils receiving education, assigns certain revenues collected by the Union to the Provinces and gives special grants to the two smaller Provinces.

Defence.

The South Africa Defence Act 1912, which became law on June 14, 1912, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising —

1 *The South African Permanent Force*, which consists of:—(i) The South African Staff Corps, (ii) The South African Instructional Corps, (iii) The South African Naval Service, (iv) The South African Field Artillery, (v) The South African Permanent Garrison Artillery, (vi) The South African Engineer Corps, (vii) The South African Air Force, (viii) The South African Service Corps, (ix) The South African Medical Corps, (x) The South African Ordnance Corps, (xi) The South African Veterinary Corps, (xii) The South African Administrative, Pay, and Clerical Corps

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole time service. A surveying vessel of 800 tons and two minesweeping trawlers are maintained in commission

2 *The Active Citizen Force*, 3 *The Citizen Force Reserve*, 4. *The Coast Garrison Force Reserve*, 5 *The Royal Naval Volunteer Reserve*, 6 *The National Reserve*, 7 *Rifle Associations*, and 8 *Cadets*

Every citizen of European descent between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number

The establishment of Rifle Associations is a marked feature of the Act, citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle

The Union is divided into 6 military districts. To each military district have been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted. The active Citizen Force is organised in 1 mounted brigade and 3 infantry brigades, and comprises 5 mounted regiments, 11 battalions and 6 batteries of field artillery

Under the 1922 Act the Permanent Force is relieved of all Police duties in peace time for which they were liable under the Act of 1912, and becomes a purely military force. Its strength on June 30, 1931, was 124 officers and 1,256 other ranks, which included 23 officers and 256 other ranks of the South African Air Force, and 136 officers and 136 other ratings of the South African Naval Service. It has 66 aerodromes, of which 38 are in commission. In addition 23 officers, nursing sisters and nurses, and 13 other ranks of the Active Citizens Forces were employed on whole time employment

In 1930 the live stock in the Union was as follows 10,573 869 cattle 48,358,349 sheep, 7,954,403 goats, 940,904 pigs, 836,003 horses, 129,854 mules, 699 561 donkeys, and 31,618 ostriches

The production of wool in 1930 was 249,442,062 lbs, and of mohair, 7,019,082 lbs The export of ostrich feathers in 1930 was valued at 42,478*l*, hides and skins at 2,150,095*l* and wattle bark and extract at 861,894*l* 1930 wool, scoured and greasy, 275,024,421 lbs, mohair, 6,873,656 lbs.

Cotton growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize Yield in 1930, 16,306,876 lbs Sugar is also cultivated, yield of 1929-30 season, 298,635 tons The area under tea (1930) was 2,823 acres, from which the yield was 2,722,326 lbs (green leaf) It is estimated that some 15,000 acres of land suitable for tea plantations are available

On March 31, 1931, the forest reserve areas comprised 2,446,529 acres demarcated, and 411,018 acres undemarcated total, 2,857,542 acres

Irrigation—Technical and financial assistance is given by the State under the Union Irrigation Law of 1912, which was designed to encourage irrigation The Government expenditure on irrigation in 1929-30 and 1930-31 was 255,576*l* and 226,570*l* respectively from Loan Funds and 215,178*l* and 226,819*l* respectively from revenue.

Manufactures—The report on the industrial census in the Union in 1929-30 gives the value added by process of manufacture, &c, as 55,787,348*l*,

and the value of the gross production of the industries covered at 112,178,613*l*. The total number of factories which made returns was 7,730. Value of land and buildings, 26,661,591*l*; machinery, plant, and tools, 40,450,066*l*; of materials used, 56,391,270*l*; and cost of fuel, light, and power, 3,454,716*l*. Average number of persons employed, 218,585 (Europeans, 91,024). Wages paid, 27,574,484*l*. Mining—The table hereunder gives the total value of the principal minerals produced in the Union to December 31, 1931. The value of gold is calculated at 4 24773*l* per fine ounce up to 1919, when the gold premium came into effect, as from the 24th of July, and from 1925 onwards when the gold premium ceased to operate. Copper, tin, antimony, scheelite, and silver are valued on the estimated pure metal contained in shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

The total value of general merchandise, exclusive of specie, imported into British South Africa in 1930 was 64,558,504*l*, and in 1931, 52,945,175*l*, of which 29,735,707*l* in 1930 and 23,680,081*l* in 1931 came from the United Kingdom, 8,165,986*l* in 1930 and 6,805,894*l* in 1931 from the rest of the British Empire, 9,287,735*l* in 1930 and 7,047,233*l* in 1931 from the United States of America, and 6,894*l* in 1930 and 2,902*l* in 1931 from the Belgian Congo. The imports of Government stores amounted to 4,809,259*l* in 1930 and 2,599,150*l* in 1931

The total exports, excluding specie, in 1930, were 71,243,746*l* and 63,477,654*l* in 1931 (excluding ships' stores value 1,738,003*l* in 1930 and 1,203,411*l* in 1931), of which 50,683,980*l* in 1930 and 48,386,808*l* in 1931 went to the United Kingdom, 7,615,605*l* in 1930 and 6,528,810*l* in 1931 to the rest of the Empire and 1,248,641*l* in 1930 and 798,256*l* in 1931 to the U S A

Shipping and Communications.

Oversea shipping 1931 entered, 1,412 vessels of 4,970,847 tons net, cleared, 1,392 of 4,951,604 tons. Coastwise entered, 3,363 vessels of 10,038,441 tons net, cleared, 3,364 of 10,055,981 tons

Prior to the Union the State Railways of the several colonies were operated by the separate Governments. In May, 1910, the Government lines were merged into one system, the South African Railways, under the control of the Union Government. The total open mileage at the end of March, 1931, was 13,048 (comprising Cape 5,177 miles, Orange Free State 1,638 miles, Transvaal 3,281 miles, Natal 1,495 miles, and South West Africa 1,462 miles), of which 12,152 miles are 3 ft 6 in gauge, and 896 miles 2 ft gauge. Capital expenditure on Government Railways up to March 1931, amounted to 146,076,674*l*. Earnings, 1930-31, 24,321,864*l*, working expenditure, 1930-31, 19,308,444*l*, including depreciation amounting to 1,887,989*l*, passengers, 1930-31, 76,286,588. Mileage of private lines, 1930-31, 411 miles (Cape 249, Natal 84, O F S 4, and South West Africa 74). In April 1932 a two-way passenger-carrying air service was begun between Croydon and Cape Town.

At the end of 1930-31 there were in the Union 3,260 post and 2,849 telegraph offices, 5,644,000 telegrams of all classes were forwarded. The number of money orders issued during the year 1930-31 was 610,266, while 576,972 orders were paid. 4,370,354 postal orders were issued, and 3,884,563 paid. The cash revenue of the Department of Posts and Telegraphs, 1930-31, was 4,029,173*l*, expenditure, 3,203,153*l*. The revenue figures include 505,525*l*, from the telegraph service, and 1,596,921*l* from the telephone service.

At the end of March, 1931, there were 36,075 miles of telegraph wire, and 406,933 miles of telephone wire in use; there were 104,050 telephone instruments and 71,431 subscribers. A station working on the 'beam' system and in direct communication with the United Kingdom was opened for the acceptance of public traffic on July 5, 1927.

The number of depositors in the Government Savings Bank in the Union at the end of March, 1931, was 441,816, and the amount standing to their credit 6,128,225*l*.

¹ In December, 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June, 1921, and began to issue notes in April, 1922. Liability for the outstanding notes of the commercial banks was transferred to it on June 30, 1924, and amounted to 148,568*l* on March 31, 1932. A branch was opened in Johannesburg on September 1, 1925, and further branches at Cape Town, Durban, Port Elizabeth and East London by the end of the year.

Money, Weights, and Measures.

An Act of 1922 provided for the issue of a Union Coinage with denominations identical with those of British Coins, which remain legal tender. A branch of the Royal Mint which was established at Pretoria, was taken over by the Government in January, 1932.

Union of South Africa silver and bronze coins of 2s 6d, 2s, 1s, 6d, 3d, 1d, $\frac{1}{2}$ d, $\frac{1}{4}$ d are being coined and are in circulation. A considerable portion of the gold output is being minted.

An Act (No 22 of 1922) was passed legalizing the optional use of either the metric or the imperial standard weights and measures, but under a proclamation of 1923 the cwt has been replaced by the 'cental' of 100 lbs. The following old Dutch measures are, however, still in use—*Liquid Measure* Leaguer = about 128 imperial gallons, half aum = 15½ imperial gallons, anker = 7½ imperial gallons. *Capacity* Muid = 8 bushels. The customary surface measure is the *Morgen*, equal to 2 1165402 acres, 1,000 Cape lineal feet are equal to 1,033 British imperial feet.

PROVINCE OF THE CAPE OF GOOD HOPE

Constitution and Government.—The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806 and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, August 13, 1814. Letters Patent issued in 1850 declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly. On the 31st May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

Cape Town is the seat of the Provincial Administration.

Administrator—The Hon J H Comadine Appointed 1929 (Salary 2,500*l*.)

The Province is divided into 125 magisterial districts, and the Province proper, including Bechuanaland, but exclusive of the Transkeian territories, into 90 divisions. Each division has a Council of at least 6 members (14 in the Cape Division) elected triennially by the owners or occupiers of immovable property. The duties devolving upon Divisional Councils include the construction and maintenance of roads and bridges, control of

outspans, trekkpaths and public servitudes, destruction of noxious weeds, and preservation of public health

There are 128 Municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are also 70 Village Management Boards.

Area and Population.—The following table gives the population of the Cape of Good Hope at each census —

1930	19,468	7,416	6,529	40,609	26,142	9,752

¹ Partial registration.

Religion.—In 1926 (Europeans only) there were 678,309 Christians—410,227 members of Dutch Churches, 182,703 Anglicans, 25,589 Presby-

tenants, 4,494 Congregationalists, 42,043 Methodists, 10,781 Lutherans, 28,023 Roman Catholics, 10,149 Baptists, and 14,350 other Christian sects. Jews 23,984, others 3,844

Education—Local school administration is conducted by school boards and school committees, the unit of administration being the school district. There are now (1931) 111 such districts, each under the control of a school board, a portion of the members being elected by the ratepayers and a portion nominated partly by the Provincial Administration and partly by the local authorities. Education is compulsory for children of European parentage. Grants in support of education are provided from Provincial Council revenues, education up to the age of fifteen being free.

Provincial expenditure in 1930-31 on education (excluding Higher Education, which is under control of the Central Government) amounted to 2,697,015*l* on European, and 716,697*l* on non-European education.

In 1929 there were 2,349 public and 33 aided private schools for European scholars, and in addition 12 institutions for the training of teachers. There were 142,967 European pupils, mostly under School Boards, and a total of 6,438 teachers. There were 2,366 public and aided private schools for non-European scholars, of which 16 were industrial schools and 21 training institutions for teachers. Altogether, there were 5,552 teachers in non-European schools, and a total of 211,197 pupils, mostly under churches and missionary bodies.

Pauperism—There is no organised system of poor law relief, but in 1929-30, 24,802*l* was distributed in such relief.

An Old Age Pension Act was passed in 1928, and came into force on January 1, 1929. The Act provides for an amount of 30*l* per annum being paid to indigenous European persons who reach the age of 65 and 18*l* per annum to persons of mixed or coloured race—but not Bantus. Up to August 31, 1930, awards had been made to 38,518 Europeans, and 17,865 coloured persons.

Finance.—Since the coming into effect of the Union there is only one financial statement for the four provinces together. Particulars are given above under the Union. Since the passing of the Financial Relations Act, 1913, the Provincial revenue consists of certain revenues assigned to the Province and an amount voted by Parliament by way of subsidy. The following figures show the provincial revenue and expenditure for five years—

Production and Industry.—On the Coast and in Zululand there are vast plantations of sugar (output, 1928-29, 295,934 tons) and tea, while cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima*, the bark of which is so much used for tanning purposes, and other crops are produced

The Province is rich in mineral wealth, particularly coal. Other minerals are asbestos, copper ore, fireclay, gold, graphite, gypsum, iron ore, lead and silver ore, limestone and marble, manganese ore, mica, molybdenum ore, nickel ore, nitre, oil shale, and tin ore. For figures of mineral production, see p. 239.

A Whaling Industry was commenced at Durban in 1908. It is regulated by the Provincial Government, as indiscriminate slaughter was driving the whales away from the South African waters.

Commerce—Since the coming into effect of the Union there are no special records of trade for each of the Provinces.

PROVINCE OF THE TRANSVAAL

Constitution and Government—The territory was colonised by Boers from Cape Colony in 1836-37. In 1852 the independence of the Transvaal Government was recognised by Great Britain, but in 1877, in consequence of financial difficulties and troubles with the natives, and in accordance with representations and petitions from the Boers, the territory was annexed by the British Government. In 1880 the Boers rebelled, and in 1881 a Convention was signed restoring self-government, but with conditions, reservations, and limitations, and subject to the suzerainty of the British Crown. This arrangement was modified by a Convention in 1884, in which the name of the South African Republic was given to the Transvaal State, but the control over external affairs, other than engagements with the Orange Free State, was reserved to the Crown. The discovery of gold and the conditions which followed this discovery occasioned difficulties finally resulting in war. This led to the annexation of both States to the British Crown, the one on September 1, 1900, under the name of The Transvaal, and the other (May 24) as the Orange River Colony. Hostilities continued till May 31, 1902. [See STATESMAN'S YEAR-BOOK for 1906, under *The Transvaal*.]

The administration was thereafter carried on under a Governor and Lieutenant Governor, assisted by an Executive and a Legislative Council. On December 6, 1906, Letters Patent were issued providing for a Constitution of responsible Government in the Colony. The Colony was merged in the Union of South Africa on May 31, 1910, as an original Province of the Union.

The seat of provincial government for the Transvaal is at Pretoria.

Administrator—The Hon. J S Smut. Appointed November 2, 1928 (salary, 2,500*l*.)

Area and Population.—The area of the Province is 110,450 square miles, divided into 39 districts. The following table shows the population at each of the last six censuses —

Education—All education except that of a university and of a vocational type is under the provincial authority. The Province has been divided for the purposes of local control and management into thirty-two school districts. Instruction in Government Schools, both primary and secondary, is free.

The following statistics of education are for the year ending Dec 31, 1930 1,198 primary schools with 123,452 pupils, 41 beyond primary schools, with an enrolment of 11,860 pupils, 640 State and State aided schools for coloured, native and Indian children, with 79,866 pupils. There are four training institutions for European teachers, with 865 students, and five for coloured

and native teachers, with 474 students. During the year 1930, 3,139,515/ was expended for educational purposes

The medium of instruction up to the fourth standard is the home language (English or Afrikaans) of the pupil, but parents may request that the other language be gradually introduced as a second medium. Above the fourth standard both languages may be used at the parents' option or as occasion allows.

Finance—For financial arrangements, *see* p. 235 above

PROVINCE OF THE ORANGE FREE STATE

The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly augmented the number of settlers during and after 1836. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal Rivers as a British Possession and established what was called the Orange River Sovereignty. Great dissatisfaction was caused by this step, as well as by the native policy of the British Government. In 1854, by the Convention of Bloemfontein, British Sovereignty was withdrawn and the independence of the country was recognised.

During the first five years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered. The British Government then stepped in and arranged matters much to the dissatisfaction of the conquering party. By the treaty of Aliwal North, only a part of the territory of the Basutos was incorporated in the Orange Free State.

On account of the Treaty between the Orange Free State and South African Republic, the former State took a prominent part in the South African War (1899–1902), and was annexed on May 28, 1900, as the Orange River Colony. After peace was declared Crown Colony Government was established and continued until 1907, when responsible government was introduced. On May 31, 1910, the Orange River Colony was merged in the Union of South Africa as the Province of the Orange Free State.

The seat of provincial government is at Bloemfontein.

Administrator —The Hon C T Wilcocks (salary, 2,000*l*.)

There are municipalities at Bloemfontein and other centres, 61 in all, local authorities have, so far as possible, the usual local administrative powers.

Area and Population —The area of the Province is 49,647 square miles, it is divided into 31 districts. The census population has varied as follows —

Census Year	All Races			European		Coloured	
	Total	Males	Females	Males	Females	Males	Females

The capital, Bloemfontein, had, in 1921, 19,367 white inhabitants, and 19,667 natives and other coloured persons, total, 39,034. The 1931 Census figures for the European population are 28,496.

Vital statistics are shown as follows —

1930	5,817	1,674	1,709	1,048	2,450	1,994

¹ Partial registration

Religion—The census of 1926 (Europeans only) gave the following results: Dutch Churches, 163,504, Anglican Churches, 13,235, Presbyterians, 3,945, Methodists, 7,478, Lutherans, 893, Roman Catholics, 2,516, Apostolic Faith Mission Church, 1,889, Jews, 5,753, others, 3,772

Education—Higher and vocational education is under the control of the Union Education Department while primary and secondary education and the training of teachers are controlled and financed by the Provincial Administration. The amount spent during year ended March 31, 1931, on European education was 896,249*l*, and on non European education, 39,232*l*. Under the Education Ordinance of 1930 the Province is divided into 61 School Board Districts, for each of which there is a School Board elected by the School Committees in the district. In 1930 there were 727 European public schools and 84 aided private schools in the Province, with a total enrolment of 45,099 pupils. The number of teachers in European schools totalled 2,114. Similarly, there were 216 non-European public and aided private schools with total enrolment of 25,120 and 2 Training Institutions for native teachers, the number of teachers was 568. Education is free in all public schools up to the University Matriculation standard, but certain schools are allowed to charge fees and to expend the proceeds for the advantage of the schools. Attendance is compulsory between the ages of 7 and 16, but exemption may be granted in special cases or when a child has passed Standard VI and is in regular employment. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction and the second language being introduced gradually during the primary school course. In all the towns and villages of the Province there are either secondary or intermediate schools preparing pupils up to the standard of the University Matriculation. The Normal College trains about 120 teachers annually.

Production and Industry.—The Province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country is still mainly devoted to stock farming, although a rapidly increasing quantity of grain is being raised, especially in the Eastern Districts.

For Mineral Statistics *see* p 239

Commerce—Since the coming into effect of the Union there are no special records of trade for each of the Provinces

The money, weights, and measures are English. The land measure, the Morgen, is equal to about 2 1165 acres

WEST AFRICA.

These Possessions are the Colony and Protectorate of Nigeria, the Gambia Colony and Protectorate, the Gold Coast Colony with Ashanti and Northern Territories, and the Sierra Leone Colony and Protectorate

Parts of Togoland and the Cameroons are also included as mandated territories

NIGERIA.

History and Constitution.—This territory comprises a number of areas formerly under separate administrations. Lagos, ceded in August, 1861, from a native king, was placed under the Governor of Sierra Leone in 1866. In 1874 it was detached, together with the Gold Coast Colony, and formed part of the latter until January, 1886, when a separate 'Colony and Protectorate of Lagos' was constituted. Meanwhile the National African Company had established British interests in the Niger valley, and in July, 1886, the company obtained a charter under the name of the Royal Niger Company. This Company surrendered its charter to the Crown in 1899, and on January 1, 1900, its territories were formed into the two Protectorates of Northern and Southern Nigeria. The latter absorbed the 'Niger Coast Protectorate,' which was formed in May, 1893, from the 'Protectorate of the Oil Rivers,' which had been constituted in June, 1885. In February, 1906, Lagos and Southern Nigeria were united into the 'Colony and Protectorate of Southern Nigeria,' and on January 1, 1914, the latter was amalgamated with the Protectorate of Northern Nigeria to form the 'Colony and Protectorate of Nigeria,' under a Governor. Lagos is the seat of the Central Government.

The Colony of Nigeria had its boundaries defined afresh, and the Protectorate was divided into two groups of provinces, the 'Northern Provinces' and the 'Southern Provinces,' each under a Lieutenant-Governor appointed by the King, and subject to the control and authority of the Governor.

The British mandated territory of Cameroon is now attached to Nigeria for administrative purposes.

The Executive Council of the Colony was made, from January 1, 1914, the Executive Council of the Protectorate also. It consists of a few of the senior officials. There is a Legislative Council, created by Order in Council in November 1922, consisting of the Governor, the members of the Executive Council, and other official members (total official membership not exceeding 30), three members elected by the ratepayers of Lagos, one member elected by the ratepayers of Calabar, four members selected respectively by the Chambers of Commerce of Lagos, Port Harcourt and Kano, and the local Chamber of Mines, two members to represent respectively Banking and Shipping interests, and seven members to represent African interests in those parts of the Colony and Southern Provinces which do not return elected representatives. This Council legislates for the Colony and the Southern Provinces of the Protectorate, laws affecting the Northern Provinces being enacted by the Governor as heretofore.

Governor of Nigeria—Sir Donald C. Cameron, GCMG, KBE (appointed December, 1930)

Chief Secretary to the Government—G. Hemmant, CMG

Lieutenant-Governors in the Protectorate—Capt. W. Buchanan-Smith, CMG, MO (Southern Provinces), C. W. Alexander, CMG (Northern Provinces).

There are altogether 22 provinces, including Cameroons, under British Mandate, each under the immediate control of a Resident. In many provinces the administration is in the hands of the paramount chief and his officials.

Area and Population—Area approximately 372,674 square miles, population census 1931, 19,928,171 [Northern Provinces 291,778 square miles, 11,434,924 population (1931) Southern Provinces 89,515 square miles, 8,168,227 population (1931) Colony 325,020 population (1931)] The population of the Northern Provinces consists of several principal racial groups of Sudanese origin, in many of which a state of political organisation had been reached which facilitated and encouraged the policy of administration through native rulers and chiefs and existing native institutions.

Justice—The Chief Justice is the president of the Supreme Court of Nigeria, and three other judges are stationed in Lagos and one in Calabar. Police Magistrates have District Courts at Lagos and Ebute Metta, and Station Magistrates at Port Harcourt, Ibadan, Warri, Onitsha, Enugu, Calabar, Kaduna, Jos, Lokoja, Kano, and Zaria. In other places where the Supreme Court has jurisdiction, District Officers have the same powers as Police and Station Magistrates. In each province is a Provincial Court consisting of the Resident and his assistants, and such Justices of the Peace as may be appointed by the Governor. Native courts exist in Mohammedan localities where there are chiefs and councillors, and amongst pagan tribes. Judicial Councils with limited judicial powers have been established in localities where the intelligence of the natives renders such a policy possible. The number of persons summoned before the District and Divisional Courts in 1931 was 17,026, of whom 13,126 were convicted.

Religion and Education.—*Northern Provinces*—In this area the majority of the population has adopted the religion and social system of Islam. There are, however, regions into which Islam has not penetrated, and where therefore, the social life of the people is still very primitive and their religion

some form of animism In the Mohammedan Emirates education is chiefly in the hands of the Government, while the Missions concentrate upon the Pagans. The main principles underlying the educational policy are the use of vernacular in elementary education, the correlation at every stage of manual and literary subjects, and the provision at the top of more advanced education for the best pupils from the lower grades. The latest figures show that there are 35,452 Koran Schools with 193,234 pupils, 290 Elementary and Primary Schools with 11,318 pupils, 12 Middle Schools with 701 pupils, and 4 Training Institutions having a combined roll of 214 students.

Southern Provinces—Although the vast majority of the inhabitants are wholly pagan, Christianity, presented by the various Christian Missions, and Islam, assimilated by contact with numerous African adherents, are rapidly gaining ground. The lower stages of education are mainly given in Mission schools or schools conducted by the African Churches and similar agencies. More advanced education is given in some Mission and Government institutions. The direction of policy and the supervision and inspection of all schools is undertaken by the Government Department of Education. The latest figures show that there are, in the Elementary or Primary grade, 2,741 schools with 185,083 pupils, and also 21 Middle or Secondary Schools with 844 pupils, and 15 Training Institutions having a total roll of 801 students.

Seven British, three French, one American, and the Basel Missionary Societies are working in the country as well as the Salvation Army and the different African Churches.

Finance.—Revenue, expenditure, and debt of Nigeria as a whole —

Year (ending March 31)	Revenue	Expenditure— Ordinary Recurrent	Total Expenditure	Public Debt

There is established in each native State in the Northern Provinces and in the more advanced communities in the Southern Provinces a Native Administration Treasury, which regulates the expenditure of that portion of

the local revenue which is annually assigned for the maintenance of local government

Production and Industry.—The products (1931) are palm-oil (exports, 118,179 tons), palm kernels (exports, 254,454 tons), cotton lint (exports, 70,301 cwt), cocoa (exports, 52,806 tons), mahogany (exports, 6,498 logs), tin ore (exports, 10,794 tons) Sheep and goat skins are tanned and dyed The natives have worked iron, lead, and tin for centuries There are also deposits of coal, silver, galena, manganese ore, lignite, and monazite (which contains thorium)

Mining rights are vested in the Government, but under an agreement made with the Royal Niger Company at the date of the revocation of the charter, that Company receives half the gross profits derived from royalties on minerals won between the main stream of the Niger on the west and a line running direct from Yola to Zinder on the east, for a period of 99 years with effect from January 1, 1900

Commerce—The principal ports are Lagos, Warri, Burutu, Sapele, Koko, Akassa, Degema, Port Harcourt, Bonny, Opobo, Calabar, Tiko, and Victoria Numerous rivers and creeks form the chief routes for transport, and there are many well made roads

Considerable trade is carried on in the Northern Provinces There is also a large trade by caravans which, coming from Salaga in the west, the Sahara in the north, and Lake Chad and Wadai in the east, make use of Kano as an emporium

The trade and shipping of Nigeria are shown as follows (bullion and specie are included) —

Year	Trade		Shipping entered and cleared	
	Imports	Exports	Total	British only

GAMBIA.

Governor—Herbert R Palmer, O M G., C B E. (2,500*l*, and 750*l* allowances). Appointed February, 1930

Gambia was discovered by the early Portuguese navigators, but they made no settlement During the seventeenth century various companies of merchants obtained trading charters and established a settlement on the

river, which, from 1807, was controlled from Sierra Leone, in 1843 it was made an independent Crown Colony, in 1866 it formed part of the West African Settlements, but in December, 1888, it again became a separate Crown Colony. It is administered under a Governor with an Executive and a nominated Legislative Council containing an unofficial element. With the exception of the Island of St. Mary, on which Bathurst, the capital, stands, the whole Colony is administered under the Protectorate system. Since 1904 both banks of the Gambia have been under direct British control up to the Anglo-French boundary.

Area of Colony proper, 4 square miles, population 10,000. In the Protectorate (area, 4,130 square miles) the population in 1921 was about 200,000.

There were, in 1931, 9 elementary Government-aided schools and Government Mahommedan schools, with 2,084 pupils enrolled, and average attendance of 1,296, Government grant, proportional to result (1931), 1,822*l*. Of the elementary schools 2 are Roman Catholic, 6 Wesleyan and 1 Anglican. The Wesleyans and Roman Catholics each have 2 secondary schools with a total of 87 boys and 92 girls enrolled. In May, 1929, Government opened a Vernacular School in the Protectorate, and this had an average attendance of 31 pupils. In June, 1929, a Government Manual Training Centre was opened, at which boys from the assisted elementary schools attend for one half-day a week. A Teachers' Training School was opened in 1930. Total Government expenditure on education (1931), 8,671*l*.

There is a company of the West African Frontier Force of 142 men. The armed police has a strength of 133 men.

Internal communication is maintained by steamers or launches. There are several post offices, and postal facilities are also afforded to all river towns by means of a weekly travelling post office on the Government river mail steamers. Postal packets and parcels dealt with in 1931, estimated at 186,710. Bathurst is connected with St. Vincent (Cape de Verde) and with Sierra Leone by cable, but there are no local railways. Bathurst is in wireless communication with Georgetown, Kuntaur and Basse in the Protectorate. The Post Office Savings Bank had 678 depositors holding deposits value 1,454*l*. A special West African alloy currency was introduced in 1920 (*see* under Nigeria, p. 258). West African currency notes in circulation December 31, 1931, amounted to 211,932*l*. There is one bank in the Colony, the Bank of British West Africa.

GOLD COAST.

The Gold Coast first became known through Portuguese navigators in the fourteenth century, and English and Dutch traders and companies exploited the district in the seventeenth century, their main object being the slave traffic. The Dutch held settlements on the coast until 1871, when a convention was made transferring them to the English. The Colony stretches for 384 miles along the Gulf of Guinea, between the French Ivory Coast and Togoland. It is administered by a Governor with an Executive and a Legislative Council. Attached to it inland are Ashanti and the Northern Territories. Togoland under British Mandate is also attached to the Gold Coast for administrative purposes.

The area of the Colony, Ashanti, and Protectorate is 78,802 square miles, population, census 1931, 3,121,214, non-Africans, 3,182. Chief towns: Accra, 59,895, Sekondi, 16,742, Cape Coast, 17,685, Keta, 6,392, Winneba, 10,990, Saltpond, 6,396; Koforidua, 19,634.

In the Colony, Ashanti, the Northern Territories and Togoland under British Mandate there were, in 1931-32, 29 Government schools (including 1 kindergarten, 1 technical and 4 junior trade schools), 340 Assisted Schools (including 2 secondary schools and 6 training colleges) which are under the control of the various Missions, and the Prince of Wales' College at Achimota (formally opened on January 28, 1928), including Kindergarten, primary, secondary and university courses and classes for the training of teachers. The total number of pupils on the roll of Government and Assisted Schools was 42,473, of whom 10,092 were girls and 511 were teachers in training. There are in addition a large number of non-assisted schools supported by the various religious bodies. Government expenditure on education in 1931-32 (including the Northern Territories but excluding Achimota) was 189,868*l*.

The strength of the police, which is distributed throughout the Gold Coast Colony, Ashanti, Togoland, under British Mandate, and the Northern Territories is (1931-32) 87 European officers and 2,050 other ranks. Summary convictions (1931-32) 20,743 persons.

Staple products and exports, cocoa, gold, manganese, diamonds, kola nuts, mahogany, palm kernels, rubber, copra, and palm oil; in 1931 there were 200 horses, 160 donkeys, 220,000 sheep and goats, 60,000 pigs and 40,000 cattle. Many of the coast inhabitants are fishermen, and there is considerable traffic in dried fish by rail into the interior.

The shipping entered and cleared in the foreign trade in 1931 was 4,475,430 tons, of which 2,153,450 tons were British. The harbour Takoradi, opened in March 1928, and appointed as a port on December 1928, is the only complete shelter for ships of over 30 ft. draught between Sierra Leone and Nigeria.

Communications.—Railway communication consists of a main line running from Sekondi to Kumasi thence to Accra, a distance of 361 miles, with branches, Takoradi Junction to Takoradi (7 miles), Inchaban Junction to Inchaban (4 miles), Tarkwa to Prestea (18 miles), and Humi Valley to Kade (99 miles). The main line and branches are 3 ft 6 in gauge. There is a branch line Accra to Weshiang (Accra Water Works) 10 miles in length, which is 2 ft 6 in gauge. The railway gross earnings for the year 1931-32 were 761,396*l*, and the working expenditure, excluding provision for renewals but including pensions, was 491,065*l*. The total number of miles open for traffic on the 31st March, 1932, was 500, and the capital cost, 9,307,953*l*.

There are 6,264 miles of motorable roads in the Gold Coast, Ashanti, and the Northern Territories. There were in the Colony, March 31, 1932, 4,713 miles of telegraph trunks and 7,911 miles of telephone trunks and 281 offices, and there are 51 telephone exchanges with over 2,046 telephones in use, and over 3,633 miles of wire in the exchange areas. The telephone trunk system connects up all the main towns in the Colony. Telegrams in 1931-32 304,474. There is a wireless telegraph station at Takoradi. The number of letters, packets, &c, handled in the postal service in 1931-32 was 5,345,640. In 1931-32 the savings bank had 14,595 depositors with 94,183*l* to their credit.

The Bank of British West Africa, Ltd and Barclay's Bank (Dominion, Colonial and Overseas) operate in the Colony and Ashanti. For currency, see p. 256. West African currency notes in circulation at March 31, 1930, amounted to 1,935,379*l*, March 31, 1931, 1,963,573*l*, March 31, 1932, 2,000,070*l*.

Ashanti was placed under British protection on August 27, 1896. Under Orders in Council of September 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though only some of the laws and ordinances of the Gold Coast apply to the annexed territory. The area is 24,379 square miles and the population (census 1931) was 578,702, Europeans (1931), 447. Kumasi, the chief town, had (1931) 36,284 inhabitants. For purposes of education, Ashanti is considered as part of the Gold Coast. The number of children in the Government schools was (1931) 1,253, and in the mission schools, 3,906. At the Agricultural and Forestry Training Centre 41 students were in residence during 1931-32. Police force (1931-32), 4 European officers and 250 other ranks. Prosecutions, 1931-32, 3,922, but there is little serious crime. There are 1,284 miles of motor roads. Agriculture is the staple industry. 63,192 tons of cocoa were exported by rail in 1931-32. Gold output (1931-32), 174,118 oz (739,654*l*). Average number employed in mining industry, 2,882 in 1931-32.

In the western parts of the Colony are rich forests of mahogany, cedar, &c, and trees yielding fruits, oil, rubber, and gum copal. This district has been opened up by a trunk motor road from Kumasi to Pamu on the western frontier, via Sunyani, with the accompanying branch roads. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful, the products there are chiefly maize, yams, coco-yams, bananas, ground nuts, and cocoa, the plantations of which are rapidly extending.

In 1931 there were 1,500 cattle, 10,000 sheep and goats, 20,000 pigs, 400 horses, and 500 donkeys.

The Northern Territories lying to the north of the parallel of 8° N lat., bounded on the west and north by the French possessions and on

the east by Togoland, were placed under British protection in 1901. They are administered, under the Governor, by a Chief Commissioner, an Assistant Chief Commissioner and 15 Political officers. The country is divided into two provinces, Northern and Southern, comprising Mamprusi, Laura-Tumu, Wa, Dagomba, Gonja and Kete Krachi Districts, with the headquarters of the Protectorate at Tamale in the Southern Province, 237 miles north of Kumasi. Estimated population (1931), 717,275, non-Africans (1931), 107. Chief towns, Tamale, 12,941, Wa, 5,223, Salaga, 4,826, Bawku, 3,752. Area of the Protectorate, 30,486 square miles. Mandated Territory is about 13,041 square miles in addition. Police force (1931-32), 2 European officers and 263 other ranks. The Mohammedans have substantial mosques, there are Roman Catholic and other missions. For the purposes of education the Northern Territories are regarded as a part of the Gold Coast under the administration of the Director of Education, but having a separate Ordinance and Rules. Government schools exist at Tamale, Gambaga, Salaga, and Wa. Pupils in 1931-32, 832. There is now a veterinary school at Pong-Tamale, some 25 miles north of Tamale. There are also Mohammedan schools. There are 2,158 miles of permanent motorable roads in the dry season. The chief crops grown are yams, guinea corn, millet, maize, rice, and tobacco. Livestock, 1931: cattle, 145,000, sheep and goats, 648,200, donkeys, 16,030, horses, 4,340. There are 5 quarantine stations through which foreign cattle and sheep enter the Protectorate. Gold-bearing quartz and alluvial deposits, and mica, exist.

SIERRA LEONE

The Colony of Sierra Leone originated in the sale and cession, in 1788, by a native King to English settlers, of a piece of land intended as a home for natives of Africa who were waifs in London, and later it was used as a settlement for Africans rescued from slave ships. It lies between French Guinea on the north and the Republic of Liberia on the east and south east. Sierra Leone proper consists of a peninsula about 26 miles long, and 12 miles broad, terminating in Cape Sierra Leone. The Colony of Sierra Leone extends from the Scarcies River on the north, to the border of Liberia on the south, 180 miles. Inland it extends to a distance varying from 8 to 20 miles and includes the Yellaboi and other islands towards the north, as well as Sherbro and several smaller islands to the south, but the Isles de Los were ceded to France under the Convention of 1904. There are for the Colony and Protectorate a nominated Executive Council and a Legislative Council consisting of the Governor, eleven official members, three elected unofficial members, and not more than seven nominated unofficial members, of whom three are paramount chiefs of the Protectorate. Elected members must be 25 years of age, and hold their seats for five years. The franchise is confined to males.

Those portions of Sierra Leone which are administered strictly as Colony (*viz* the Sierra Leone Peninsula, Tasso Island, Banana Islands, and the

township of Bonthe on Sherbro Island) cover an area of approximately 256 square miles. Area of the Colony 4,000 square miles approximately; population (census 1921), 85,163. Europeans, 1921, numbered 1,161. The birth-rate (1931) was 22.73 per thousand, and the death-rate 24.84, infantile mortality-rate 289 per 1,000 registered births. Owing to the fact that many births escape registration, the birth-rate appears lower and the infantile mortality-rate higher than they really are. Chief town, Freetown, 55,359 inhabitants (1931). The battalion of the Royal West African Frontier Force has its headquarters at Wilberforce, Freetown. Freetown, the greatest seaport in West Africa, is a second class Imperial coaling-station, with an excellent harbour.

In 1930, there were 48 primary schools, belonging to missionary societies and assisted from public funds, and 1 Government primary school. The average attendance in these 49 schools was 5,010. Salaries paid by Government, under amalgamation scheme, to African teachers in mission schools, including grants to European teachers at Roman Catholic schools, amounted to 11,948*l*. There were 8 assisted secondary schools with an average attendance of 848. The grant awarded these secondary schools amounted to 1,541*l*. One of these (the Albert Academy) includes industrial work in its curriculum. There were also 2 assisted industrial schools with an average attendance of 83, and one (The Sir Alfred Jones' Trades School) controlled by Government with an average of 23 boys. The assisted industrial schools received grants amounting to 244*l*. Besides these there were 1 secondary, 1 preparatory to secondary, and 2 primary unassisted schools.

The Government conducts in Freetown a Model School for primary and post-primary education with an average attendance of 291, and a secondary school for boys with an average attendance of 78. Fourah Bay College which is under the management of the Church Missionary and Wesleyan Missionary Societies is affiliated to the University of Durham.

Police force at end of 1930 had an authorised strength of 304, including 5 European officers. In 1930, 31 persons were convicted in the Supreme Court, and 48 in the Circuit court.

A Government railway, a single line of 2ft 6in gauge, is open from Freetown to Pendembu, near the Liberian frontier, a length of 227½ miles. From Bauya Junction, 64½ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. Total line open, 1931, was 310 miles, excluding sidings. Total receipts 1931, 146,500*l* , gross expenditure 1931, 220,988*l* . There are over 1,929 miles of telegraph and telephone, including electric-train staff lines. In 1931, 1,858,572 postal packets were dealt with in the Colony, money order transactions amounted to 30,502*l* . There were (1931) 1,163½ miles of combined telegraph and telephone wires in operation. There are 70 post offices and postal agencies. At the end of 1931 there were 8,550 depositors in the savings bank with 65,658*l* (inclusive of interest) to their credit. The West African Silver Currency was introduced in 1913 (*see* under Nigeria, p 251), and in 1920 West African Alloy Coinage was put into circulation, but British coins are still used. Currency notes of the West African Currency Board are in circulation (150,000*l* at the end of 1928). The Bank of British West Africa and the Colonial Bank have their headquarters at Freetown.

The Protectorate.—The Protectorate was proclaimed August 21, 1896. On March 7, 1913, an Order in Council was issued providing for its administration, this was revoked and replaced by an Order in Council of January 16, 1924. The Order applies to the territories, not being portions of the Colony of Sierra Leone, lying between the sixth and tenth degrees of north latitude and the tenth and fourteenth degrees of west longitude, and beginning at the extreme southerly point of the Colony on the Anglo-Liberian boundary, as delimited under the provisions of the Anglo-Liberian Conventions, November 11, 1885, and January 21, 1911. The Protectorate extends inland about 180 miles.

The Governor and Commander in Chief for the time being of the Colony of Sierra Leone is also the Governor of the Protectorate. Authority is given to the Legislative Council of Sierra Leone, by ordinance, to exercise and provide for giving effect to the powers and jurisdiction acquired by the Crown.

The Protectorate has an area of 27,670 square miles, and a population, according to the census of 1921, of 1,456,148 (natives, 1,450,903). The whole territory has been divided into two Provinces, each of which is placed under a European commissioner. Circuit courts are held at the chief centres of population. There are also district commissioners' courts, chiefs' courts for purely native cases (not serious crime), and combined courts (a chief and a non-native) for small debts and trivial misdemeanours (assaults, abusive language) arising between native and non native. The chief articles of imports are cotton goods, spirits, hardware and tobacco, the chief exports are palm kernels, kola nuts, palm oil, and ginger. A platinum-bearing area of about 40 square miles has been discovered. Platinum and gold are now being mined in small quantities. Two large hematite deposits have been discovered and exploitation of one deposit is being proceeded with. Deposits of chromite of commercial value have been found at a short distance from the Government Railway. There were, in 1930, 159 mission primary schools, 81 of which received assistance from the Government. The average attendance at the assisted schools was 4,285 and the grant paid

them was 3,028½, 6 assisted secondary schools with an average attendance of 391, and which received grants amounting to 955½, one industrial school with an average attendance of 73, and which received a grant of 132½, a Government School for the sons and nominees of chiefs at Bo, with 101 pupils at the end of 1930, in 1929, Government opened a Central School at Koyeima, the 136 pupils from the old school at Njala being transferred there. There were also 8 smaller Government Rural Schools, with a total of 215 pupils, 20 apprentices were in training at the Agricultural College at Njala.

ANGLO-EGYPTIAN SUDAN.

Government.

The rule of Egypt in the Sudan, after having gradually extended during the course of 60 years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country from 1885 for about 13 years under a desolating tyranny. In 1896 an Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on September 2, 1898, the overthrow of the Khalifa was completed. In November, 1899, he was killed by the Egyptian forces near Gedid.

A convention between the British and Egyptian Governments, signed at Cairo, January 19, 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. The British and Egyptian flags shall be used together, laws shall be made by proclamation, no duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt, the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition, and spirits.

The Sudan is divided into thirteen Provinces under Governors. Administration is carried out through British District Commissioners one or more of whom are appointed to each of the districts into which the provinces are subdivided. Native administrative officers are employed under the District Commissioners. Courts of Sheikhs and Chiefs have varying powers of limited jurisdiction over their tribesmen in accordance with native custom throughout the country.

In 1910 a Governor General's Council was created to assist the Governor-General in the discharge of his executive and legislative powers. All ordinances, laws and regulations are now made by the Governor-General in Council.

Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N lat 5°), a distance of about 1,650 miles, and stretching from the Red Sea to the confines of Wadai in Central Africa, the subject territory has an area of 1,008,100 square miles. The population of the Sudan, according to the most recent estimates, is 5,605,848, including natives of the Sudan, 1,432,606 men, 1,782,903 women, 2,330,431 children, total 5,545,940, non natives, 59,908. (As so great a proportion of the people are nomads, the numbers are difficult to assess with any degree of accuracy, and the figures of the native population must be taken as approximations only.) The Gambela Enclave, situated within the boundaries of Abyssinia, is leased by the Sudan Government from the Abyssinian Government as a Trading Post. The Eritrea-Sudan frontier and the frontier with French Equatorial Africa have been delimited and demarcated, as also has the greater part of the frontier with Abyssinia (see under *Abyssinia*). The chief towns are Khartoum, population 50,463, the capital, Omdurman (the old Dervish capital), population 103,669, Khartoum North and Rural District, population 107,720, Wadi Halfa, Merowe, El Damer, Atbara, Port Sudan, Suakin, Kassala, Ed Duiem, Kosti, El Obeid, En Nahud, Wadi Medani, Singa, and El Fasher.

Education.

The schools under the Central Authority are classified as follows — (1) The elementary vernacular schools (Kuttab), 90 in number (January, 1932), situated in all parts of the country, and with a total number of about 9,340 pupils. Instruction is given to boys from 7 to 12 years of age. (2) The primary schools, of which there are now 11—at Khartoum, Omdurman, Khartoum North, Wadi Medani, Atbara, El Obeid, Halfa, Rufaa, Berber, El Duiem and Port Sudan. The number of boys in attendance is 1,310. The school at Gordon College is attended by 475 pupils, 6 of whom are being trained as teachers for the primary schools, and for the College itself.

There is also in the Gordon College buildings a training college for students who are eventually drafted out as Kadis in district courts. Also in Khartoum, but separate from the Gordon College, is the Elementary Teachers' Training School, attended by 34 students who are being trained as teachers for the Kuttabs. The industrial workshops, of which there are three, at Khartoum, Omdurman and Atbara, are attended by 268 boy apprentices. There is a training college for girls in Omdurman attended by 60 students, and 20 other girls' schools, attended by 1,886 girls altogether. Affiliated to the Gordon College are the Wellcome Tropical Research Laboratories, where investigations are carried on in connection with diseases and with the economic products of the country. In addition to the above the Central authority aids 768 native schools (Khalwas) attended in 1931 by about 28,000 boys.

Justice.

The Courts of Justice as well as the Registry of Lands, the Department of Government Lands, and the offices which deal with the legal business of the Government, are administered by the Legal Secretary, who has a permanent seat *ex officio* on the Governor General's Council. There is also an Advocate-General.

The High Court of Justice for the trial of civil suits comprises the Court of Appeal and Courts of original jurisdiction. Judges of the High Court sitting singly have general original jurisdiction. The Court of Appeal is constituted by any two or more Judges of the High Court sitting together.

The general superintendence of the High Court is vested in the Chief Justice. In addition to the Chief Justice there are three Judges of the High Court.

Subordinate to the High Court in every province is the Province Court. This comprises a Province Judge, except in Khartoum Province, and District Judges of three grades. An Appeal lies to the Court of Appeal from a decree made in a suit of value more than £E50 if the value of the relief claimed in the appeal is more than £E50. There are wide powers of revision exercised by the Court of Appeal or the Province Judge in matters where there is no right of appeal.

In Provinces where there is neither a High Court Judge nor a specially appointed Province Judge the Governor acts as Province Judge, and in any District where there is no specially appointed District Judge, the district commissioners and assistant district commissioners act as District Judges. There are five specially appointed British District Judges, and six specially appointed District Judges of the second grade.

The Mohammedan Law Courts administer the Moslem religious law in cases between Mohammedans relating to succession on death, marriage, divorce, and family relations generally, and also Mohammedan charitable endowments.

In some districts there are native courts presided over by sheikhs, chiefs, or village elders. This system is being developed and extended.

Criminal justice is administered either by single magistrates, or courts of three magistrates. Judges of the High Court, and District Judges of the first and second grades, governors of provinces, district and assistant district commissioners, and some subordinate administrative officials are magistrates, there are also native notables appointed as magistrates to sit as members of courts. Decisions of courts in the more serious cases require confirmation either by the Governor of the province or by the Governor-General, both of whom have extensive powers of revision. Rights of appeal exist.

The Sudan penal code is an adaptation of the Indian penal code.

Defence.

Egyptian troops were evacuated in 1924, and a new Sudan Defence Force, owing allegiance to the Governor-General, has been created

Finance.

The revenue and expenditure of the Sudan are as follows (£E1 = £1 0s 6d) —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£E	£E		£E	£E
1926	5,857,989	5,482,388	1929	6,981,590	6,610,274

1928	6,646,883	6,045,286	1931 ¹	4,398,618	4,398,618

¹ Including net receipts only from Railways and Steamers

The main sources of revenue in 1931 were Land Tax (£E20,952), Animal Tax (£E127,985), Royalties (£E162,520), Customs (£E455,701), Railways net profit (£E361,000), Posts and Telegraphs (£E134,558)

These figures do not include the revenue and expenditure of Local Provincial Services, which amounted in 1927, to £E157,174 and £E143,673, 1928, to £E133,577 and £E116,743, 1929, to £E126,584 and £E108,719, 1930, to £E90,132 and £E79,536, 1931, to £E74,963 and £E67,139

Production and Commerce.

The Sudan is the chief source of the world's supply of gum arabic, exports of which in 1931 amounted to 20,086 tons, valued at £E602,753. Egyptian cotton has been well established, and increasing quantities, which compare favourably with corresponding varieties grown in Egypt, are being produced annually. In 1931–32 the area of cotton on the Gezira Irrigation Scheme (put into operation in 1925) was increased to 193,979 acres and produced a crop of 805,051 kantars of 815 lbs seed cotton. The areas of cotton grown on the Gash and Baraka Deltas were 17,000 and 38,000 acres respectively and produced 30,614 and 52,618 kantars of 815 lbs seed cotton. In addition, increasing quantities of high grade, long staple American cotton are produced in the Northern Provinces of Berber and Dongolla under irrigation, and as a rain crop in the Kordofan, Upper Nile, and Mongalla Provinces. The total area under cotton in the 1931–32 season is recorded as 823,563 acres, and the crop of 1931–32 amounted to 995,893 kantars of 315 lbs. of seed cotton.

Other products of the Sudan include sesamé, senna leaves and pods, ground nuts, dates, hides and skins, salt, ivory and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). The cattle and sheep trade of the Sudan is capable of great development. For some years Egypt has depended to a great extent on the Sudan for her meat supply.

In 1931 there were in the Sudan approximately 22,750 horses; 352,000 asses, 1,000 mules, 1,200,000 cattle, 2,250,000 sheep, 2,000,000 goats, and 400,000 camels. Pigs are kept by the Nubas only—about 5,000.

270 THE BRITISH EMPIRE.—ANGLO-EGYPTIAN SUDAN

The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. The forests of the Southern Sudan contain valuable trees, the mahogany and the shea butter tree being the most important. The finest gum forests are in Kordofan, Fung and Kassala. The sudd area in the upper reaches of the White Nile is composed of an inexhaustible quantity of papyrus.

Gold is being successfully exploited in the Sudan, a mine being worked at Gabait in the Red Sea Province. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country, and considerable quantities are exported annually to Abyssinia. In 1931 the output from the salt fields totalled 11,436 tons.

BRITISH MANDATED TERRITORIES IN AFRICA (TANGANYIKA, SOUTH-WEST AFRICA, CAMEROONS, AND TOGOLAND).**TANGANYIKA TERRITORY (LATE GERMAN EAST AFRICA)**

Government.—German East Africa was conquered in 1918, and was subsequently divided between the British and Belgians. In March 1921 the district of Ujiji and part of Bukoba, formerly administered by the Belgians, were handed over to British jurisdiction. The country is administered under mandates approved by the League of Nations. The mandates lay down conditions directed against slavery, forced labour (except for essential public works and services), abuses in connection with the arms traffic, the trade in spirits, usury, and security of labour. The interests of natives are safeguarded.

Under an Order in Council, dated July 22, 1920, the Territory is administered by a Governor, who is assisted by an Executive Council, all of whose members are nominated. A Legislative Council has been constituted as from Oct. 1, 1926, consisting of 18 official members and not more than 10 non-official members. Rights in or in relation to any public lands vest in the Governor, but the Secretary of State for the Colonies may appoint, if he sees fit, another trustee or trustees to exercise such right. A Native Affairs Department was established in 1926.

Area and Population.—The Territory extends from the Uмба River on the north to the Rovuma River on the south, the coast line being about 500 miles in length, and includes the adjacent islands. The northern boundary runs approximately north-west to Lake Victoria at the intersection of the first parallel of southern latitude with the eastern shore (Mohuru Point). The boundary on the west follows the Kagera River (the eastern frontier of Ruanda), thence the eastern boundary of Urundi to Lake Tanganyika. The western boundary then follows the middle of Lake Tanganyika to its southern end at Kasanga (formerly Bismarckburg), whence it goes south-east to the northern end of Lake Nyasa. Rather less than half way down the lake the boundary turns east and joins the Rovuma River, whose course it follows to the sea. The total area is about 374,000 square miles, which includes about 20,000 square miles of water. Dar-es-Salaam is the capital, population, 33,147.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated (April 1921) at 4,107,000. In 1930 the European population was estimated at 6,876 and the native population at 4,852,244. European population, 1931 census: 5,236 males, 2,981 females, total, 8,217. Asiatic population, 1931 census: 20,462 males, 12,225 females, total, 32,687. Native population, 1931 census: 2,428,216 males, 2,594,424 females, total 5,022,640. According to German law every native born after 1905 was free, but a mild serfdom was continued under German rule. Legislation for the abolition of slavery was enacted in 1922.

Education.—There were in 1931, some 99 Government schools with an average attendance of 6,560 pupils, and 3,845 Mission schools with an average attendance of 105,797 pupils. The amount allotted to education in 1930-31 was 124,893*l*. There are 3 schools for the children of Dutch settlers in the Arusha District and another European school at Engare Nairobi in the Moshi District. There are also 4 German schools, 2 in the Lushoto and 1 in the Moshi and Sringa Districts. Three kindergarten schools at Dodima,

274 THE BRITISH EMPIRE—TANGANYIKA TERRITORY

Tanga and Tabora, receive grants from Government. A school for young European children was established in Dar-es-Salaam in 1929, and a correspondence course exists for children in outlying districts who are unable to attend school.

There is a monthly paper published by the Government in Swahili.

Finance.—The revenue in 1931-32 was 1,522,368*l*, expenditure 1,820,928*l*. The chief items of revenue were licences, taxes, etc., 698,327*l*, customs, 414,024*l*, fees of court or office, 127,579*l*, posts and telegraphs, 69,573*l*, miscellaneous, 98,594*l*. The chief items of expenditure were public works, 181,073*l*, provincial administration, 351,213*l*, medical and sanitation, 222,348*l*, military, 102,520*l*, police and prisons, 136,774*l*. Education, 122,666*l*. Estimates 1932-33 revenue, 1,624,918*l*, expenditure, 1,736,802*l*.

Loans were received from the Imperial Government in the years 1920-21 to 1925-26, amounting to 3,135,446*l* for capital improvements and developments and were expended upon railway works, 1,293,614*l*, other works, 766,324*l*, restoration of war damage, 177,909*l*, and to meet deficit upon recurrent account, 897,599*l*. Interest at 5 per cent and sinking fund at 1 per cent is being paid on the loan for railway and other works, while the balance is temporarily free of interest, but repayment is to be considered in 1933. Other loans raised have been, Guaranteed Loan, 1948-68, 2,070,000*l*, of which 1,731,838*l* are allocated to railway works, Guaranteed Loan, 1951-71, 3,000,000*l*, of which 1,667,356*l* are allocated to railway work. The first instalment of sinking fund is payable in 1934.

Defence.—The Southern Brigade Headquarters, the Brigade Signal Section, the Brigade Supply and Transport Corps, the 2nd and 6th Battalions and a company of the 1st Battalion (Nyasaland) of the King's African Rifles are stationed in the Territory. The police force consisted (1930) of 1,864 all ranks.

Production and Industry.—The total area under forest other than savannah forest is approximately 4,149 square miles of which 96.5 per cent is Government forest reserves, 1.9 per cent awaits reservation, and 1.6 per cent is valuable forest in private ownership. These forests contain some good merchantable timbers in large quantity, among which Pencil Cedar, Yellow-Wood and Mvule are the most important. In addition, valuable species of hard woods occur as single trees or in groups widely scattered throughout large areas of savannah forest. Ebony is plentiful near the coast, and the creeks and river mouths support extensive mangrove woods valuable as a source of tanning bark and poles. The possible output of the Territory's forests far exceeds the present local consumption. The approximate production of timber and fuel wood in 1931 was 117,900 and 5,686,000 cubic feet respectively.

The chief export product of the territory is sisal fibre, the export of which in 1931 reached 55,939 tons, valued at 707,177*l*, as compared with 49,962 tons, valued at 1,172,315*l* in 1930. Other major export crops are coffee, cotton, groundnuts, copra, sisim, grains and beeswax. The area under tea and tobacco (Turkish) in the South-western highlands is being extended and the exporting stage has now been attained.

In 1931 there were 5,099,000 cattle, 2,238,000 sheep and 3,250,000 goats in the territory.

The value of minerals produced in 1931 was: diamonds, 9,698*l*, gold, 60,183*l*, salt, 36,524*l*, mica, 2,600*l*, tin, 1,987*l*, red ochre, 273*l*, build

ing minerals, 2,600*l* Companies desiring to investigate the mineral resources can obtain information and assistance from the Mine Dept, Dar es-Salaam

Trade and Shipping.—There is a uniform Customs tariff in Tanga nyika, Kenya, and Uganda Total imports, 1931, 2,495,596*l*, 1930, 3,982,605*l*, total exports, 1931, 1,890,722*l*, 1930, 2,897,938*l*, total transit, 1930, 2,552,113*l*

Chief exports, 1931 Sisal (55,939 tons), 707,177*l*, cotton (54,349 centals), 119,752*l*, coffee (185,020 cwts), 247,037*l*, ground-nuts (3,070 tons), 28,706*l*, hides and skins (42,220 cwts), 83,915*l*, copra (7,234 tons), 62,209*l*, grain (260,099 cwts), 85,756*l*, simsim (3,825 tons), 36,715*l*, beeswax (12,143 cwts), 47,010*l*, ghee (5,862 cwts), 11,549*l*, diamonds (7,790 carats), 9,698*l*, gold (15,200 ozs troy), 60,183*l* Chief imports, 1931 Cotton piece goods, 494,066*l*, iron and steel manufactures, 106,861*l*, food-stuffs, 148,670*l*, machinery, 92,799*l*, building materials (including cement and galvanised iron sheets), 139,862*l*, kerosene and motor spirits, 212,412*l*, sugar, 70,661*l*, rice, 18,184*l*, spirits, 38,345*l*, cigarettes, 65,772*l*

In 1931, 478 steamers (exclusive of coastal boats) of 2,078,815 tons, and 3,906 dhows of 98,429 tons, entered and cleared the various coast ports from places beyond the Territory

The chief seaports are Dar es Salaam, Tanga, Lindi, and Mikindani

Communications—Light motor traffic is now possible over 13,996 miles of road during the dry season

There are two railways of metre gauge in the territory The Tanga Railway from Tanga to Arusha via Moshi (272 miles), and the Central Railway from Dar es Salaam to Kigoma (772 miles), with a branch line from Tabora to Mwanza (235 miles) A branch line from Manyoni to Kinyangiri (93 miles) via Singida is under construction A 60 cm tram line from Mingoyo near Lindi to Ndanda (57 miles) is worked by hand during certain periods of the year only There are steamers on Lakes Victoria, Nyasa and Tanganyika

Dar es-Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia Cable communication exists between Dar-es-Salaam and Zanzibar and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville A wireless station exists at Dar es-Salaam for communication with shipping, and stations for dealing with aircraft are installed at Mbeya, Dodoma and Moshi, which are ports of call for Imperial Airways Mail Service, London to Capetown There are 131 Post Offices and Postal Agencies (101 of which have telegraphic facilities), and 142 Telegraph Offices Telegraph Money Order and Savings Bank business is conducted at 23 Head Offices, and Postal Order and ordinary Money Order business at 21 Sub Offices Telephone Exchanges are established and Trunk Telephone communication is in operation between 30 inland centres and also with Mombasa

East African currency is in use consisting of a silver shilling, the equivalent of 100 cents, a 50 cent silver piece, copper and bronze 10 cent, 5 cent, and 1 cent pieces There are currency notes in denominations ranging from 5 to 1000 shillings Four banks, the National Bank of India, the Standard Bank of South Africa, Barclays Bank (Dominion, Colonial and Overseas) and the Banque du Congo Béige, have branches in the country

Governor—Lt-Colonel Sir G Stewart Symes, K C M G, K B E, D S O Appointed January, 1931

SOUTH-WEST AFRICA.

Situation and Physical Features.—This country is bounded on the north by Portuguese West Africa and North Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province of the Union, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and North Rhodesia. On the western coast, a strip varying from 60 to 100 miles in width and extending from the Orange River in the south to the Ugab River, which borders on what is known as the Kaokoveld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing land.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi Strip, the Kwando or Mashi, which flows through the Caprivi Strip from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great sandy dry river beds throughout the country, in which water can generally be obtained by sinking shallow wells, these are the Kuiseb, Swakop, Omaruru and Ugab on the west, the Fish River in the south, the Nosob, the Auob and the Elephant Rivers in the south east, and a series of what are known as Omuramba in the north-east, with numerous smaller stream beds. In the Grootfontein area, which geologists describe as a "karst" region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

Government and Administration—The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on July 9, 1915, at Khorab. It is now administered by the Union under a Mandate from the League of Nations, dated December 17, 1920. The laws of the Union, subject to local modifications, if required, may be applied to the country and are gradually being introduced.

The Administration is conducted from Windhoek, and the country is divided into 17 Districts controlled by Magistrates. In addition there is a Chief Native Commissioner at Windhoek who has charge of all Native Affairs in the Territory. Under him are officers at the larger labour centres and Superintendents of Reserves in the Districts where there are large Native Reserves. The Native Commissioner in Ovamboland keeps in touch with the Ovambos living there. There is also an officer stationed at Kuring Kuru on the Okavango River, who keeps close touch with the natives living along the North-Eastern border of the territory.

Windhoek, the capital, is situated in the centre of the territory, and with

its surrounding district contains a population of 4,602 Europeans (1926 Census) and 12,806 (estimated) Natives.

The administration has been vested by the Union Parliament in the Governor-General of the Union, who has delegated his powers to an Administrator with full authority to legislate. By Act No. 42 of 1925 the Union Parliament conferred a Constitution on South-West Africa, providing for an Executive Committee, an Advisory Council, and a Legislative Assembly with such powers, authorities and functions severally as are in the Act defined.

Administrator.—A J Werth (April 1926)

Area and Population.—The total area of the country including the Caprivi Zipfel is 322,394 square miles, that of Walvis Bay, administered by S W A, 374 square miles

The European population according to the figures of the 1926 Census amounted to 24,115, and in 1930 was estimated at 31,586. The Native population is estimated at 237,647. As large areas of the country, particularly along the coast and in the north, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the numbers of the Bushmen, who still exist in considerable numbers in the north eastern portion of the country.

The principal native races are the Ovambos, Hereros, Bergdamaras or Khipkaffirs, Hottentots and Bushmen

The Ovambos are a Bantu race and follow agriculture. They still possess to its full extent tribal organisation

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans oppressed them; their tribal organisation completely disappeared and they were scattered throughout the country on farms and in the different towns, where they formed the ordinary source of labour. The Herero makes an excellent herd. Since the British occupation of the country Reserves have been set apart for them and they have considerably increased in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race whose language they now speak. They are an inferior tribe and were alternately the slaves of the Hereros and the Hottentots in pre European days, as the former or the latter were in the ascendant.

The Hottentots, so called, consist of two distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, the source of which is but little understood, the other is composed of tribes resulting from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, which, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are the oldest inhabitants of South-West Africa and are found in considerable numbers in its eastern portion from Lat 26° to the Northern boundary.

In the centre of the country just south of the Windhoek district is the Bastard Gebiet occupied by a race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, except that the admixture of European blood is much greater and their ordinary language is Cape Dutch. These people have a measure of self-government under a council of which the local Magistrate is Chairman. They number about 5,000.

Education.—*European.*—There are (1931) 71 Government schools with 4,564 pupils, and 74 registered private schools with 1,030 pupils. Of the

children in Government schools 1,078 are accommodated in hostels which are conducted by the Administration in conjunction with 21 of the Government schools. The general policy has hitherto been to bring the country children into these hostels and so obviate the necessity of single teacher country schools. In consequence of the expenditure involved, however, this policy is now being modified, and wherever possible Government farm schools and aided private farm schools are being established. There are 9 Government farm schools and 63 aided private farm schools.

Native—The education of the Natives is under the direct supervision of the various Missions. There are (1931) 70 Government aided mission schools with 4,677 pupils. There are 2 Training Schools for Native Teachers, subsidised by the Government, with 48 student teachers in training, and 2 industrial schools in which 29 pupils are enrolled.

Finance—In 1931-32 the revenue amounted to 523,345*l* and the expenditure to 1,166,589*l* (including 413,703*l* loan expenditure). The Estimates for 1932-33 are revenue 500,000*l*, expenditure 700,372*l* (including 82,000*l* loan expenditure).

For the purposes of Customs and Excise revenue the territory is included in the South African Customs Union, and a lump sum based on the customs and excise duties on goods consumed in the territory is paid over to the Administration. The total annual revenue from this source is now approximately 110,000*l*.

Production and Industry.—South West Africa is essentially a stock-raising country, the absence of water rendering agriculture, except in the Northern and North eastern portions, almost impossible. Generally speaking the southern half of the Territory is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. The stock census for the year 1931 was as follows: 645,274 head of cattle, 2,659,568 head of small stock, 20,399 horses, 64,159 donkeys and 1,749 mules. Considerable attention is now being paid to the production of butter, the quantity manufactured during the year being 2,319,743 lbs, of which 1,629,825 lbs were exported. A limited quantity of cheese is also produced, the total amount manufactured being 109,933 lbs.

More and more attention is being centred on the production of Karakul pelts. The number exported during the year was 97,000.

Minerals constitute 70 to 80 per cent of the total value of exports from the Territory. Diamonds, which constitute the principal production, are recovered from alluvial sources on a 275 mile stretch along the coast line from the Orange River northward. Exports in 1930 415,047 carats, valued at 1,184,217*l*, in 1931 71,532 carats, valued at 208,080*l*.

Copper, lead, vanadium and tin are at present being worked in the north of the Territory. Exports: copper lead ore, copper lead matte and pig lead, valued, in 1930, at 462,000*l*, in 1931, at 210,100*l*. Vanadium, as concentrates, valued, in 1930, at 150,700*l*, in 1931, at 130,700*l*. Tin, as concentrates, valued, in 1930, at 20,200*l*, in 1931, at 8,500*l*.

The bulk of the direct imports into the country is landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

Communications—The railway line between De Aar Junction and Prieska has been extended through Upington across the Orange River and joined up with the line from Kalkfontein to Windhoek

The total length of the line inside South West Africa is 1,128 miles of 3ft 6in gauge, and 353 miles of 2ft gauge There are also 98 miles of private line, most of which have been constructed for the service of the diamond fields south of Luderitz

At the 31st March, 1932, there were 101 Post Offices and 385 Private Bag Services distributed by rail or road transport The number of articles posted was 3,760,952 and 5,213,000 were received

On 31st March, 1932, there were 5,408 miles of trunk lines, 533 miles of telegraphs, 2,272 miles of super-imposed telegraphs and telephones, 467 miles of rural telephones and 1,784 miles of farm telephone lines, 80 telegraph offices, 36 telephone exchanges, and 7,366 telephone subscribers

A Post Office Savings Bank was established in 1916 The number of accounts open at 31st March, 1932, was 6,199, with a credit of 134,908*l* Savings certificates of a value of 50*l* are also issued The balance due to holders as at March 31, 1932, amounted to 14,450*l*

At Walvis Bay there is a 3½ kw Coastal Wireless Station for long-wave working and a 1 kw set for short wave working

BRITISH CAMEROONS.

The Cameroons, lying between British Nigeria and the French Congo, marches with the eastern boundary of Nigeria north-eastwards from the coast to Lake Chad It was captured from the Germans in February, 1916, and was divided between the British and French under a Declaration signed at London July 10, 1919 The British portion is a strip stretching the whole length, save for one short break, of the Nigerian boundary Area 34,236 square miles and population estimated at 774,586 Bantu negroes live near the coast, Sudan negroes inland The country is administered under a mandate conferred on July 20, 1922, containing provisions directed against slavery, forced labour (except for essential public services) and abuses of the traffic in arms and spirituous liquors. The northern part is attached to the Pro-

vinces of Bornu and Yola in Nigeria, and the southern part, known as the Cameroons Province, to the Southern Provinces of Nigeria. There are 6 Government schools in the Cameroons Province and a number of schools controlled by Native Administrations and Missions

There are graduated direct taxes for natives and Europeans. The revenue and expenditure are incorporated in the accounts for Nigeria. Government revenue for 1930-31, 81,945*l*, expenditure, 149,952*l*

The soil in the coast region is fertile, and this area is heavily forested. Near the coast are a number of plantations controlled by European firms. Their chief products are palm oil, palm kernels, cocoa, rubber and bananas.

Imports into the British Cameroons in 1931, 107,767*l*. exports, 155,432*l*. Chief exports: bananas (dried and fresh), 23,860,214 lbs., palm kernels, 1,100 tons, palm oil, 1,233 tons, cocoa, 60,031 cwt., and rubber, 1,744,562 lbs. Chief imports: textiles, salt, iron wares, flour, kerosene, fish, rice, tobacco, cigarettes and motor spirit. In 1931, 118 vessels, having a total tonnage of 203,744, entered and cleared the port of Victoria, and 102 vessels (70,329 tons) entered the port of Tiko.

The currency is British, similar to that in use in Nigeria.

TOGOLAND

Togoland, between the Gold Coast Colony on the west and French Dahomey on the east, was surrendered unconditionally by the Germans to British and French forces in August, 1914. On September 30th, 1920, the country was divided between France and Britain in accordance with the Franco-British declaration of July 10th, 1919. The boundary between the two spheres extends from the north west corner in a general direction south east and south, terminating not far from the port of Lome, but so that no part of the British sphere reaches the coast. (See map in the YEAR BOOK for 1920.) The area allotted to Great Britain is 13,041 square miles, and for administrative purposes it is attached to adjacent provinces of the Gold Coast Colony and Northern Territories. The population, according to the 1931 census, is 275,925 (excluding 43 non Africans).

For purposes of education Togoland under British mandate is considered as part of the Gold Coast.

In the British mandated area the Ewe Mission has 60 schools with 2,749 pupils, average daily attendance 2,656, the Roman Catholic Mission has 14 schools with 954 pupils, average daily attendance 921, and the First Century Gospel Mission has 2 schools with 104 pupils, average daily attendance 95.

The revenue and expenditure of the area are now included in the figures for the Gold Coast. Expenditure still greatly exceeds revenue.

Separate figures for imports and exports are no longer available, being included in the general total for the Gold Coast

The principal imports are cotton goods, salt, and tobacco Principal exports are palm oil, palm kernels, cocoa, kola nuts, and raw cotton.

BERMUDA.

A Colony, with representative government, consisting of a group of 360 small islands (about 20 inhabited), 580 miles east of North Carolina, and 677 miles from New York, noted for its climate and scenery, favourite winter resort for Americans, who number some 30,000 annually

The Spaniards visited the islands in 1515, but they had previously been discovered (the exact date is unknown) by Juan de Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609 A company was formed for the 'Plantation of the Somers' Islands, as they were called at first, and in 1684 the Crown took over the Government

CANADA

(DOMINION OF CANADA)

Constitution and Government.

The territories which now constitute the Dominion of Canada came under British power at various times by settlement, conquest, or cession. Nova Scotia was temporarily occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632, and was finally ceded by France in 1713, by the Treaty of Utrecht, the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670, Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763, Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, the Dominion was composed of the provinces of Canada—Upper and Lower Canada, now Ontario and Quebec—Nova Scotia, and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament known as 'The British North America Act, 1867, which came into operation on July 1, 1867, by royal proclamation. The Act provides that the Constitution of the Dominion shall be 'similar in principle to that of the United Kingdom', that the executive authority shall be vested in the Sovereign of Great Britain and Ireland, and carried on in his name by a Governor-General and Privy Council, and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons'. The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926. 'The self governing Dominions are autonomous Communities within the British Empire, equal in status, though united by a common allegiance to the Crown'. The Dominion has its own representatives in the United States, Great Britain, France and Japan, and was elected a member of the Council of the League of Nations in 1927. Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, the North West Territories, and Newfoundland into the Dominion, Newfoundland alone has not availed itself of such provision. In 1869 Rupert's Land, or the North West Territories, were purchased from the Hudson's Bay Company, the province of Manitoba was erected from this territory, and admitted into the confederation on July 15, 1870. On July 20, 1871, the province of British Columbia was admitted, and Prince Edward Island on July 1, 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabasca, Assiniboia, and Saskatchewan, and admitted on September 1, 1905.

In February 1931 the Government of Norway formally recognised the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

On July 10, 1931, the House of Commons approved the enactment of the proposed Statute of Westminster emancipating the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. The Statute received the Royal Assent on December 12, 1931.

The members of the Senate are nominated for life, by summons of the Governor General under the Great Seal of Canada. By the Amendment of the British North America Act, 1867 (May, 1916), which came into effect

in 1917, the Senate consists of 96 senators—namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, and 6 from Saskatchewan. The total number may not exceed 104. Each senator must be 30 years of age, a born or naturalised British subject, and must reside in, and be possessed of property, real or personal, to the value of 4,000 dollars within, the province for which he is appointed. The House of Commons is elected by the people, for five years, unless sooner dissolved, the province of Quebec always having 65 members (one for each 36,283 persons at the 1921 census), and the other provinces proportionally, according to their populations at each decennial census. The seventeenth Parliament, elected on July 28, 1930, comprised 245 members, in accordance with the Representation Act of 1924 which, as the result of the census of 1921, fixed the representation as follows: 82 for Ontario, 65 for Quebec, 14 for Nova Scotia, 11 for New Brunswick, 17 for Manitoba, 14 for British Columbia, 4 for Prince Edward Island, 21 for Saskatchewan, 16 for Alberta, and 1 for the Yukon Territory. Voting is by ballot. Women have the vote and are eligible for election to the Dominion Parliament.

State of the Parties in the seventeenth Parliament, elected on July 28, 1930: Conservatives, 138; Liberals, 87; Liberal Progressives, 3; United Farmers of Alberta, 10; Progressives, 2; Labour, 3; and Independent, 2.

The Speaker in the House of Commons has a salary of 6,000 dollars per annum, the Deputy Speaker an allowance of 1,500 dollars and each member an allowance of 4,000 dollars for the session, subject to deductions for non-attendance and a deduction of 10 per cent for 1932.

The Speaker and members of the Senate have the same sessional indemnity as the Speaker and members of the House of Commons, with no extra allowances.

Governor General—The Right Hon. Lord Bessborough, G C M G. Appointed February 9, 1931. Salary, 10,000l per annum.

He is assisted in his functions, under the provisions of the Act of 1867, by a Privy Council composed of Cabinet Ministers and other persons.

The following is the list of the Cabinet, which was sworn in on August 7, 1930, in order of precedence, which in Canada attaches generally rather to the person than to the office.

PROVINCIAL GOVERNMENT

The nine provinces have each a separate parliament and administration, with a Lieutenant Governor appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are the amendment of the provincial constitution, except as regards the office of the Lieutenant-Governor, direct taxation for revenue purposes; borrowing, management and sale of crown lands, provincial hospitals, reformatories, &c, shop, saloon, tavern, auctioneer, and other licences for local or provincial purposes, local works and undertakings, except lines of ships, railways, canals, telegraphs, &c, extending beyond the province or connecting with other provinces, and excepting also such works as the Dominion Parlia-

ment declares are for the general good, marriages, administration of justice within the province, education. Quebec has two Chambers and the other Provinces one Chamber. The North West Territories and the Yukon Territory are governed by Commissioners assisted by Councils.

Area and Population.

The following is the population of the area now included in the Dominion —

Education.

By the British North America Act the Provincial Governments have control in educational matters. In all provinces except Quebec the number of private schools is small, so that elementary and secondary education in Canada is almost entirely State controlled. In Quebec primary education is only partly State controlled. Roman Catholic secondary education is given by independent institutions, mainly consisting of State subsidised classical colleges for boys and convents for girls. Except for a few independent schools, Protestant education, primary and secondary, is State controlled. Primary schools—i.e. elementary schools, and in all provinces, except Ontario, continuation schools other than regular secondary schools—are free, and the same is true of secondary education in most provinces. In Quebec (except in certain municipalities) a fee is collected for primary education for every child of school age without reference to school attendance. In the same province Catholic and Protestant schools are under one Department of Public Instruction and are supported by a common system of taxation, but are administered independently. In Alberta, Ontario, and Saskatchewan minority elementary schools, whether Protestant or Catholic, are called Separate Schools, and are under the same provincial administration as majority schools. Secondary education in these three provinces is non-sectarian.

There are 6 State-controlled universities in Canada, and 17 independent of provincial control, making 23 in all. These, together with colleges of higher education, had an enrolment of 77,618 students in 1931, and employed 6,211 professors, lecturers, etc.

¹ Where possible the number of school houses is given, and elsewhere the number of school districts with schools in operation

The census of 1931 showed that more than 92 per cent of the population in Canada over 5 years of age could read and write, as compared with 90 per cent in 1921, and 83 per cent in 1901. These percentages would be lighter if the aboriginal Indian population, numbering over 100,000 and living on the Indian Reserves were excluded. The Dominion Government provides a special school system for the Indian youth, of whom 16,415 were enrolled in its schools in 1931.

In 1932 there were in Canada 1,641 periodical publications, classified as follows: Dailies, 112, tri-weeklies, 8, weeklies, 965, semi-weeklies, 18, bi-weeklies, 22, bi-monthlies, 8, quarterlies, 28, monthlies, 425, semi-monthlies, 31, miscellaneous, 24.

Justice and Crime.

There is a Supreme Court in Ottawa, having appellate, civil and criminal jurisdiction in and throughout Canada. There is an exchequer court, which is also a colonial court of admiralty, with powers as provided in the Imperial 'Colonial Courts of Admiralty Act, 1890'. There is a Superior Court in each province, county courts, with limited jurisdiction, in most of the provinces, all the judges in these courts being appointed by the Governor-General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

For the year ended September 30, 1931, total convictions for indictable offences were 31,542, total convictions for all offences amounted to 359,320.

Defence.

'The National Defence Act, 1922,' which came into force January 1, 1923, provides for a Department of National Defence presided over by the Minister of National Defence

Militia—Canada is organised in 11 military districts, each under a Commander and his District Staff

The militia of Canada is classified as active and reserve, and the active is sub divided into permanent and non-permanent forces. The permanent force consists of 11 units of all arms of the service, with an authorised establishment limited to 10,000, but at present the strength is about 8,800. The non-permanent active militia is made up of cavalry, artillery, engineers, machine gun, signalling, infantry and other corps. The total establishment of the Canadian non permanent militia totals 9,071 officers and 118,500 other ranks, organised as follows —

	Regiments	Batteries		Battalions	Companies	Troops	Units or Detachments

¹ Machine Gun Companies

² Anti Aircraft Sections

The reserve militia consists of such units as are named by the Governor in Council and of all able bodied citizens between the ages of 18 and 60, with certain exemptions

The reserve of the active militia consists of (1) reserve units of city and rural corps, (2) reserve depôts, (3) reserve of officers

The above organisations are supplemented by numerous cadet corps and rifle associations. The Royal Military College at Kingston, Ontario, provides both a military and a general education for about 200 cadets. The course extends over four years. Each year there are available for graduates a number of commissions in the Canadian Permanent Force and the Royal Canadian Air Force, also in the British Army and the Royal Air Force. R M C. graduates are given one year's seniority in the British or Indian armies because their course is longer than that given at Woolwich or Sandhurst

The estimated expenditure for the militia for the year ending March 31, 1933, is 10,972,549 dollars.

Navy—The Royal Canadian Navy was established in 1910. Its authorised complements are: 104 officers and 792 men of the permanent force (Royal Canadian Navy), 70 officers and 430 men of the Royal Canadian Naval Reserve, and 70 officers and 930 men of the Royal Canadian Naval Volunteer Reserve. The vessels at present maintained in commission are the

destroyers *Champlain* and *Saguenay* and the mine-sweeping trawlers *Festubert* and *Ypres*, based on Halifax, N S, the destroyers *Vancouver* and *Skeena* and mine-sweeping trawler *Armentières*, based on Esquimalt, B C. There are several small craft, some armed, used for fisheries protection and patrol duty on the eastern and western coasts and on the Great Lakes, but these are attached to the Department of Marine and Fisheries or to the Customs Department, and do not normally form part of the naval forces. H.M.C. dockyards are at Halifax and Esquimalt, having been taken over from the Imperial Government in 1910. Naval depots are maintained at both bases, and are used as training headquarters for the personnel of the R.C.N., R.C.N.R., and R.C.N.V.R.

The appropriations for naval services for 1931-32 amounted to 3,875,000 dollars. The estimated expenditure for the year ending March 31, 1933, is 2,462,000 dollars.

Aeronautics—The direction and control of aeronautics in Canada, both civil and military, come under the jurisdiction of the Department of National Defence. The powers and duties involved are exercised, under the direction of the Minister, by four separate branches of the Air Services, namely.—(a) the Royal Canadian Air Force, (b) the Directorate of Civil Government Air Operations, (c) The Controller of Civil Aviation, (d) The Aeronautical Engineering Division. The Royal Canadian Air Force administers and controls all military air operations. Its strength on August 1, 1932, was 99 officers and 601 airmen. There are air bases at Camp Borden, Trenton, Ontario, Vancouver, and British Columbia.

The Directorate of Civil Government Air Operations administers and controls all air operations carried out by State aircraft other than those operations of a military nature. The personnel consists of R.C.A.F. officers and other ranks who are posted to this branch for various periods of duty. The work of this branch consists of carrying out operations for other Dominion Government Departments such as air photography for the Department of the Interior, Topographical Surveys Branch, forest fire patrol and suppression for the Forest Service of the Department of the Interior, experimental dusting operations for the Department of Agriculture, transportation for the Department of Indian Affairs, air mail investigation for the Post Office Department, and any other operation which is requested by a Dominion Government Department. Air bases are established at Ottawa and Winnipeg.

The Controller of Civil Aviation is responsible for the administration of the Air Regulations and Airways, and the supervision of flying clubs. On August 1, 1932, there were in force 303 private and 459 commercial pilot's licences, and 349 air engineer's licences and 16 private and 313 commercial aircraft were registered, 86 air harbours were licensed and 23 light aeroplane clubs established.

Royal Canadian Mounted Police—The Royal Canadian Mounted Police is an armed police force organised in 13 divisions under a Commissioner whose headquarters are at Ottawa, on September 30, 1932, its strength was 91 officers and 2,260 other ranks. The training depot is at Regina, Saskatchewan.

The duties of the Police are to enforce Dominion Statutes (except the Criminal Code, which is enforced by the Provincial authorities), to assist the other Departments of the Dominion Government, and to enforce the observance of law in the Yukon, in the Northwest Territories, in the islands of the Arctic Ocean, and in Indian Reserves and the National Parks. By an agreement which came into effect on June 1, 1928, under the terms of

the R C M Police Act, the Force enforces criminal and Provincial laws in the Province of Saskatchewan. Similar agreements were made in 1932 in the provinces of Alberta, Manitoba, Nova Scotia, New Brunswick, and Prince Edward Island. The force was enlarged in April 1932 to enable it to assume the duties of the Preventive Service for the customs authorities.

Production and Industry.

Agriculture—Though the manufacturing industries now predominate, Canada is largely agricultural, and among her natural resources arable lands stand unrivalled. Present information permits only a rough estimate of their actual extent, but it is believed that about 369 million acres are physically suitable for agriculture. Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. The following table shows the estimated agricultural wealth and production for 1931—

Values in dollars		Production in dollars	
Land	3,316,061,000	Field crops	425,065,000

The total value of field crops for 1931 was estimated at 425,065,100 dollars and for 1930, 662,040,900 dollars.

The estimated yield in 1932 of wheat is 467,150,000 bushels, of oats, 422,529,000 bushels, and of barley, 88,050,000 bushels.

Dairying—The dairying industry of the Dominion is carried on most extensively in Ontario and Quebec, although there are dairy factories in all of the provinces. The total number of creameries in Canada in 1931 was 1,344, of cheese factories, 1,142, of combined butter and cheese factories, 184, of condenseries, 26, and the total value of all products of dairy factories, 104,639,650 dollars.

Fruit Farming—The value of fruit production by provinces in 1931 was (in dollars) British Columbia, 4,894,143, Ontario, 5 894,017, Nova Scotia, 2,851,881, Quebec, 911,545, and New Brunswick, 206,050, total, 14,756,636 dollars. The production of apples in 1931 was (in barrels) Nova Scotia 1,875,000, Ontario 975,750, British Columbia 1,140,300, Quebec 200,900, New Brunswick 40,000, total, 3,731,950 (total 1930, 3,419,327 barrels). The commercial crop of apples in 1931 was estimated at 3,731,950 barrels, valued at 11,082,796 dollars.

Miscellaneous—The wool clip of Canada for 1931 was estimated at 20,365,000 lbs., valued at 1,644,000 dollars. The production in 1931 of tobacco, which is practically confined to Ontario and Quebec, was estimated at 51,300,000 lbs. from 55,060 acres. The total production of eggs (for 1931), 286,882,447 dozens, valued at 49,206,845 dollars, and the 1931 value of maple products 3,537,700 dollars.

Forestry.—The total area of land covered by forests is officially estimated at 1,151,454 square miles. Of this 865,880 square miles are productive and accessible, a little over a third of this area bears timber of merchantable size. The Crown forests belong to the Provincial Governments, those of Manitoba, Alberta, Saskatchewan and the Railway Belt and Peace River

Block of British Columbia having been transferred in 1930 to the provinces concerned by the Dominion Government

Fisheries—In the calendar year 1931 the capital invested in vessels, gear, canneries, etc (including working capital and stocks on hand) was 45,351,356 dollars. The total value of the produce of the fisheries of Canada in 1931 was 30,682,631 dollars. The principal kinds of fish marketed in 1931 were salmon, 17,972,017 dollars, halibut, 1,780,044 dollars, lobsters, 5,087,028 dollars, codfish, 2,827,350 dollars, herrings, 2,330,044 dollars, haddock, 1,362,359 dollars, sardines, 837,560 dollars, whitefish, 1,444,127 dollars, trout, 850,077 dollars, pickerel, 762,215 dollars, pulchards, 807,842 dollars, smelts, 652,837 dollars. The exports in calendar year 1931 were valued at 25,848,585 dollars (dry-salted codfish, 2,422,723 dollars, canned lobsters, 3,113,392 dollars, fresh lobsters, 1,875,817 dollars, canned salmon, 5,909,948 dollars). The number of persons employed in 1931 was 69,370, including those in shore work and canneries. The number of factories and canneries in operation in 1931 was 662.

Mining—Nova Scotia, British Columbia, Quebec, N and W Ontario, Alberta, and Yukon Territory are the chief mining districts. The total value of the mineral produce in 1930 was 279,873,578 dollars, and in 1931, 228,029,018 dollars. The principal metals and minerals produced in 1931 were as follows —

¹ The metals copper, lead, and silver are, for statistical and comparative purposes, valued at the final average value of the refined metal. Pig-iron is valued at the furnace. Non-metallic products are valued at the mine or point of shipment, and structural material and clay products at the point of shipment.

Production of pig-iron in 1931 was 420,088 tons, and steel, 672,109

The Fur Trade.—In 1930-31 (year ended June 30), 4,060,356 pelts, valued at 11,681,221 dollars, were taken. Exports in 1930-31 were valued at 13,544,088 dollars, imports at 5,455,483 dollars. Exports to the United States amounted to 4,706,663 dollars, to the United Kingdom, 7,456,594 dollars. Fur auctions are now held on a large scale at Montreal and Winnipeg. The more important animals raised on fur farms are fox, muskrat, beaver, mink, racoon, marten, and fisher. The value of animals and pelts sold from the farms during the year 1930 was 4,924,315 dollars. There were in 1930, 5,070 fox farms and 1,454 other fur farms in Canada.

Water Power.—Canada is richly endowed with water power resources; on January 1, 1932, the available horse-power was 20,347,400, on January 1, 1932, turbine installation amounted to 6,666,337 horse power. The Central Electric Station industry, of which over 96 p c of the total main plant is

hydro equipment which generates 99 p.c of the total electrical output, ranked fourth among the industries of Canada with a gross production of power valued at 126,038,145 dollars in 1930. The number of establishments was then 1,034 and the capital invested 1,138,200,016 dollars.

Commerce.

The customs tariff of Canada is protective, but there is a preferential tariff in favour of the United Kingdom and of the Dominions, and of a number of the Crown Colonies. At the Imperial Economic Conference of 1932, held in Ottawa, the United Kingdom definitely adopted the policy of preferential tariffs to the Dominions and on the part of the latter there was a general lowering of the existing tariffs against certain lines of United Kingdom manufactures. The Conference provided an opportunity for the revision of the trade agreements recently made with Australia and New Zealand, as well as the conclusion of one with the Union of South Africa.

Total	69,875	44,912,972	70,112	45,311,899

During the fiscal year 1931, the vessels entered and cleared at Canadian ports on inland waters between Canada and the United States were Canadian, 16,012 of 17,834,715 tons, United States, 65,477 of 18,477,012 tons

During the fiscal year 1931, 294 vessels, with a tonnage of 45,162 tons, were built in Canadian shipyards

Internal Communications.

Canada has a system of canal, river, and lake navigation over 2,700 miles in length, and vessels from the lake ports reach the Atlantic without breaking bulk Up to March 31, 1931, 236,216,461 dollars had been spent on canals for construction and enlargement alone (capital expenditure) The heavy expenditures in recent years have been due to the construction of the Welland Ship Canal on which 122,385,409 dollars had been spent to March 31, 1931 The canal was opened on April 20, 1931 In 1931, 27,651 vessels, of 17,618,784 tons, passed through the Canadian canals, carrying 16,189,074 tons of freight, chiefly grain, lumber, iron ore and coal

On January 11, 1909, a treaty was signed at Washington between the United Kingdom and the United States relating to the use of the boundary waters between Canada and the United States The treaty provides for the establishment and maintenance of an international joint commission, consisting of three representatives appointed by the King on the recommendation of the Dominion, and three appointed by the President of the United States This commission, subject to the conditions of the treaty, has jurisdiction in all cases involving the use or obstruction or diversion of the boundary waters Precedence is given by the treaty to uses of the waters in the following order, viz, (1) for domestic and sanitary purposes, (2) for navigation, (3) for power and irrigation

A treaty was consummated between the Canadian and United States Governments in July, 1932, directed towards the development of the St Lawrence Seaway According to the agreement, Canada is to be credited with her expenditures on the Welland Ship canal The treaty has yet to be ratified by the Canadian Parliament and the United States Congress and Senate

The total single track mileage of steam railways in Canada on December 31, 1931, was 43,173 The total mileage, including second track, yard track and sidings was 58,602

The lines built or acquired by the Canadian Government are now consolidated in one system, known as the Canadian National Railways, covering about one half of the single track mileage, including two transcontinental lines with termini in Canada at Saint John, Halifax, Vancouver and Prince Rupert, and the Grand Trunk with termini at Portland, Maine, U S A, and Chicago

The mileage in private ownership is mainly that of the Canadian Pacific Railway, 15,636 in 1931 The main line of this road from Vancouver, B C., to Saint John, New Brunswick, is 3,867 miles

Statistics of the Canadian steam railways for 1931 passengers, 26 5 millions, freight, 88 1 million short tons, gross receipts, 358,549,382 dollars, net receipts, 37 523,794 dollars

Electric railways in 1931, 52, mileage 1,409, passengers during the year, 720,468,361, tons of freight carried, 1,977,441 The gross earnings in 1931 reached an aggregate of 49,038,310 dollars Operating expenses amounted to 35,367,067 dollars Paid-up capital, 216 778,095 dollars

On March 31, 1931, there were 12,427 post offices Net revenue, 30,416,106 dollars, expenditure, 36,292,603 dollars At the end of the fiscal

year 1931 there were 4,210 rural mail delivery routes, on which were erected 287,351 boxes

Money order offices on March 31, 1931, 6,401, orders issued, 16,813,134, value 167,749,651 dollars The Ocean Mail subsidies and steamship subventions paid by the Government amounted to 1,322,745 dollars in the fiscal year 1931

There were 52,824 miles (9,851 being Government) of telegraph lines in Canada in 1930, and 371,747 miles of wire (including 11,399 miles of Government lines), with 4,661 offices, 4,880,224 miles of telephone wire on December 31, 1930, and 1,402,861 telephones (14.1 per 100 population).

Wireless Telegraphy —On March 31, 1931, there were 1,075 coast and land wireless stations, 319 ship wireless stations, 88 broadcasting stations, and 523,100 private receiving stations for the reception of broadcast programmes

The ship and shore wireless traffic for the twelve months ended March 31, 1931, amounted to 396,727 messages and 8,534,982 words

Wireless 'beam' stations are operated at Montreal for direct communication with Great Britain and Australia, and a station at Louisburg, N S, provides a long distance service to ships

Money and Credit.

The Bank Acts of Canada impose stringent conditions as to capital, notes in circulation, limit of dividend, returns to the Dominion Government, and other points, on all chartered banks On December 31, 1930, there were 11 incorporated banks making returns to the Government, with 4,083 branches, including sub-agencies The following are some particulars (in dollars) of the banks for 1931, the figures being an average of the twelve monthly returns: capital paid up, 144,674,853, notes in circulation, 141,969,350, total on deposit, 2,422,834,828, liabilities to the public, 2,741,554,219, assets, 3,066,018,472, percentage of liabilities to assets, 89.41

In addition to the capital there was in 1931 the sum of 162,075,000 of rest or reserve funds belonging to the banks

Bank debits in the clearing house centres of Canada for 1931 amounted to 31,586,68,262 dollars, against 37,491,301,766 dollars in 1930 Of the transactions of 1931, Montreal had nearly 31 per cent, Toronto 30 per cent, Winnipeg 10 per cent, Ottawa about 6 per cent, and Vancouver 4.5 per cent

Government post-office savings-banks have been in operation in Canada since 1868 The post-office savings-banks had on March 31, 1932, deposits amounting to 23,919,677 dollars.

The deposits in special savings banks amounted on July 31, 1932, to 67,508,896 dollars

Currency, Weights, and Measures.

The denominations of money in the currency of Canada are dollars, cents and mills The cent is one hundredth part of a dollar, and the mill one-tenth part of a cent A five cent nickel coin has been issued The standard of fineness for gold coins is nine tenths fine, and British and United States gold coins are legal tender The privilege of issuing notes is restricted to the Dominion Government and the chartered banks. The legal equivalent of the British sovereign is 4.86½ dollars

The Dominion Government issues Dominion notes, which are legal tender, in denominations of \$1, \$2, \$5 and certain other larger denomi-

nations used chiefly in clearing-house transactions between banks. They may be issued in any amount. Prior to the war, the security behind Dominion notes consisted of 25 per cent gold for the first fifty million dollars of such notes and dollar for dollar in gold for amounts in excess of fifty million. They were redeemable in gold. The war necessitated the suspension of redemption in gold, and by special legislation the Government was given power to issue Dominion notes to the banks upon the pledge of satisfactory securities and interest at not less than 5 per cent per annum was charged the banks. At the same time banknotes were made legal tender, and an issue of twenty-six million dollars of Dominion notes without security as formerly prescribed by law, largely to implement railway guarantees, was legalised. Redemption in gold was resumed on July 1, 1925. After the suspension of gold payments by Great Britain, on Sept. 21, 1931, Canadian currency declined in sympathy with the pound sterling on the gold exchanges. After October, 1931, exports of gold were allowed only under license, so that redemption rights under the Dominion Notes Act were maintained and gold was made available for meeting all obligations abroad promptly.

Dominion notes in circulation on July 31, 1932, amounted to 166,198,551 dollars.

The Ottawa Branch of the Royal Mint was established in pursuance of The Ottawa Mint Act, 1901 and in December, 1931, control of the Mint was passed over to the Canadian Government. The Mint issues gold, silver and copper coins for circulation in Canada, and sovereigns and half sovereigns coined will be legal tender in every country under the British flag. Gold refining is one of the principal activities of the Mint. In 1931 an Act was passed transferring the administration of the Royal Mint to the Canadian Government.

In 1931 gold bullion to the value of 35,581,117 dollars was received for treatment, and bullion to the value of 35,867,937 dollars was issued. No gold was struck. Coin issued: bronze, 51,400 dollars, nickel, 281,000 dollars, silver, 475,400 dollars.

The legal weights and measures are the Imperial yard, pound avoirdupois, gallon, and bushel, but the hundredweight is declared to be 100 pounds and the ton 2,000 pounds avoirdupois, as in the United States.

CANADIAN PROVINCES.

ALBERTA.

Constitution and Government.—The Constitution of Alberta is contained in the British North America Act of 1867, and amending Acts, also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, creating the province. In the British North America Act, provision was made for the admission of the new provinces from time to time, including the then North-West Territories, of which the present province of Alberta formed a large portion. Upon the granting of autonomy to the North-West Territories, Alberta and Saskatchewan were erected into provinces, and all the provisions of the British North America

Act, except those with respect to schools, lands, and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On October 1, 1930, the natural resources were transferred from the Dominion to Provincial Government control. The province is represented by 6 members in the Senate and 16 in the House of Commons of Canada.

The executive is vested nominally in the Lieutenant Governor, who is appointed by the Federal Government, but actually in the Executive Council or the Cabinet of the Legislature. Legislative power is vested in the Assembly in the name of the King.

Members of the Legislative Assembly are elected by the direct vote of the people. Woman suffrage has been established in the province.

There are 63 members in the Legislature (1930)—39 United Farmers of Alberta, 11 Liberals, 4 Labour, 6 Conservatives, and 3 Independents.

Lieutenant-Governor—His Honour W. L. Walsh.

The members of the Ministry are as follows—

Premier and Provincial Secretary—Hon. John E. Brownlee.

Attorney General—Hon. J. F. Lymburn.

Minister of Agriculture and Public Health—Hon. Geo. Hoadley.

Minister of Public Works—Hon. O. L. McPherson.

Minister of Railways and Telephones—Hon. Geo. Hoadley (Acting).

Minister of Education—Hon. Perren E. Baker.

Minister of Lands and Mines, Minister of Municipal Affairs and Provincial Treasurer—Hon. Richard Gavin Reid.

Minister without Portfolio—Hon. Mrs. Irene Parlbry.

Local Government.—Municipal Districts, formerly known as Local Improvement Districts, comprise the area within the limits of nine townships, i. e. 36 square miles (324 square miles), or as near to this as natural features will allow. Each Municipal District is a body corporate and governed in most cases by an elected council of six members, the chairman of whom is called the Reeve. The councillors are elected by a vote of all persons who are assessed for property within the Municipal District, together with the vote of the wife, husband, son, daughter, father or mother of such assessed persons, provided these relatives reside on the land of the assessed person.

Towns operate under the Town Act, 1927, except one which carries on under special charter. Villages are erected by Order of the Minister of Municipal Affairs, and are governed by the Village Act. The town council consists of a Mayor and six councillors elected by those whose names appear on the last revised assessment roll. These must be twenty-one years of age, and assessed for property of the value of one hundred dollars and upwards. The village council consists of three members elected annually, the Chairman being Mayor of the village.

There are seven cities in Alberta, namely Edmonton, Calgary, Lethbridge, Wetaskiwin, Red Deer, Medicine Hat, and Drumheller. These cities operate under special charters granted by the North-West Territorial Assembly, and later confirmed by the Legislative Assembly of the Province of Alberta. The governing body consists of a Mayor and a council of from six to ten members, according to the size of the city.

Area and Population.—The area of the province is 255,285 square miles, 262,925 sq. miles being land area and 2,360 sq. miles water area. The population (Census, 1931) was 781,605, in 1921, 588,454, in 1916, 496,442, in 1906, 185,195, and in 1901, 78,022. In 1921 the rural population numbered 365,550 (54,489 in 1901), and the urban 222,904 (18,538 in

1901) There were 8,745 Indians in 1921, or 1.49 per cent of the total population. Population of the principal cities (1931)—Calgary, 3,761, Edmonton, 79,197, (1926) Lethbridge, 13,489. Medicine Hat, 10,300, Drumheller, 2,987, Red Deer, 2,344, Wetaskiwin, 2,125.

The vital statistics for 5 years are given as follows —

—	Births	Marriages	Deaths	Excess of Births
1927	14,897	4,707	5,059	9,838
1928	15,692	5,776	5,699	9,998
1929	16,924	6,004	6,239	10,685
1930	17,649	5,834	5,496	12,153
1931	17,265	5,142	5,325	11,940

Education—Schools of all grades are included under the term of public school. The same boards of trustees control the schools from the kindergarten to entrance to the university. All schools are supported by taxes levied by the local board, supplemented by Government grants, which are distributed to encourage elementary, secondary, and technical education and agricultural training. In 1931 there were 3,762 schools, 64 being consolidated schools and 16 being rural high schools, with 168,730 pupils. There are Normal schools at Calgary, Camrose and Edmonton for the training of teachers. The attendance during 1931 was 1,250. The University of Alberta, organised in 1907, had, in 1931–32, 1,938 students.

Justice and Crime.—Judicial power of the province is vested in the Supreme Court, consisting of two divisions, the appellate and trial divisions. The judges are appointed by the Dominion Government, and hold office for life unless impeached by Parliament. There are also minor Courts of Civil and Criminal Jurisdiction. The district courts have full jurisdiction over all matters up to 600 dollars. By the Small Debts Act of 1918, as amended in 1924, magistrates have jurisdiction over matters up to 100 dollars. There are also Juvenile Courts having power to try boys under 16 and girls under 18 years of age.

The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

Finance.—The revenue of the province is derived from the following sources —(1) Dominion subsidies, (2) School lands, and (3) Provincial sources.

—	1927	1928 ¹	1929	1930	1931
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue	12,263,400	16,149,896	15,265,084	15,829,865	15,710,962
Expenditure	12,479,380	15,870,113	13,686,261	15,402,884	18,017,543

¹ Fifteen months ending March 31, 1928.

The gross bonded debt of the province March 31 1931, amounted to 116,802,000 dollars, including Sinking Funds, 5,293,000 dollars. The net bonded debt was 111,509,000 dollars. Of this amount 39,604,000 dollars represent assets which are self supporting, leaving net general bonded debt of 71,905,000 dollars.

Production and Industry.—Alberta is pre-eminently an agricultural province. Within the surveyed area of the province, which comprises about

85,000,000 acres, there are over 60,000,000 acres which may be classed as lands capable of agricultural development. Up to the present, however, little more than one-fourth of this area has been brought under cultivation

For particulars of agricultural production and live-stock, *see* under Canada above The wool clip for 1930 was 3,500,000 lbs

Grain elevators (1931-32), 1,775, with a capacity of 75,860,900 bushels.

A coal survey of Alberta by the Geological Survey of Canada places the coal area at 16,588 square miles containing 1,035,629 million tons (approx), 80,000 million being lignite The output in 1931 was 4,564,290 tons, valued at 13,415,745 dollars Natural gas is found abundantly in numerous localities In 1931, 18,327,139 cubic feet, valued at 4,398,513 dollars, were consumed High grade gasoline is profitably extracted from the gas in Turner Valley 1,455,195 barrels of oil were produced in the Province in 1931 Immense deposits of bituminous sand containing on an average 15 to 18 per cent bitumen are situated in the McMurray district in northern Alberta Value of total mineral production in 1931, 24,267,826 dollars

Alberta has 12,393,500 acres of forest reserves

The lakes of the province abound in whitefish, pickerel, pike and trout, but the industry is not developed to any great extent Value of fish marketed, 1931, 184,859 dollars

Manufacturing in the province Flour, oatmeal, cement, and linseed oil mills, pork and beef packing houses, clay, brass and iron, glass, wood, clothing, canning, biscuit and macaroni factories, large railway repair shops and oil refineries

Statistics of manufactures for 1930 number of industrial establishments, 845, capital, 109,930,271 dollars, number of employees, 14,099, salaries and wages, 17,092,033 dollars, cost of materials, 53,621,884 dollars, value of products, 94,314,782 dollars

Commerce and Communications.—The principal exports of the province consist of grain, live-stock, meat and meat products, wool, fish, butter, eggs, mining and timber products

Length of railway lines 5,709 miles in the year 1931 Alberta's modern telephone system is owned and operated by the Provincial Government except in the town of Banff and city of Edmonton Automatic exchanges are operated at Calgary, Edmonton, Lethbridge, and Medicine Hat and Drumheller 220,938 miles of wire serve 320 exchanges and 274 toll stations There are 70,578 rural and urban subscribers, and first-class long distance service is available to all points in the Province and to every other Province in the Dominion and every State in the United States as well as to Mexico, Cuba and many points in Europe

BRITISH COLUMBIA.

Constitution and Government —British Columbia (then known as New Caledonia) and Vancouver Island originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island, and in 1858 British Columbia, were constituted Crown Colonies, and in 1866 the two Colonies were united. On July 20th, 1871, British Columbia entered the Canadian Confederation, and is represented by 6 members in the Senate, and 14 in the House of Commons of Canada.

The Provincial Government is administered by a Lieutenant Governor and Legislative Assembly of 48 members on the system of executive administration known as a 'responsible government'. The Assembly is elected for five years, every adult, male or female (British subjects), having resided six months in the Province, duly registered, being entitled to vote.

Lieutenant Governor —His Honour John W. Fordham-Johnson (1931)

The members of the Ministry are as follows —

Premier and Minister of Railways —Hon S F Tolmie, P C

Provincial Secretary and Commissioner of Fisheries —Hon S L Howe

Attorney General —Hon R H Poolev, K C

Minister of Lands —Hon N S Loughheed

Minister of Finance and Minister of Industries —Hon J W Jones

Minister of Agriculture —Hon William Atkinson

Minister of Mines and Minister of Labour —Hon W A McKenzie

Minister of Public Works —Hon R W Bruhn

Minister of Education —Hon J Hinchliffe

President of the Council —Hon W C Shelly

Minister without Portfolio —Hon R L Martland, K C

Agent General in London —Hon F P Burden, British Columbia House, 1/3, Regent Street, S W 1

Area and Population —British Columbia, Canada's Maritime Province on the Pacific Ocean, has an area of 372,630 square miles, of which 369,191 square miles are land area, and 2,439 square miles water area, but exclusive of territorial seas. It lies between latitudes 49 degrees and 60 degrees north.

The subdivisions of the Province are as follows: Kootenays, east and west, 26,346 square miles, Yale, 10,462, Lillooet, 16,100, Vancouver and Westminster, 7,066, Cariboo, 148,594, Skeena, 123,896, Vancouver Island and Comox, 20,952.

The last census (1931) places the population at 689,210, in 1921 the population was 524,582, and in 1911 it was 392,480.

Some of the principal cities and towns and their approximate populations are: Greater Victoria (the capital), population 60,000, Greater Vancouver, 300,000, New Westminster, 18,000, Nanaimo, 10,000, Prince Rupert, 8,000, Nelson, 7,000.

The movement of the population for five years was as follows —

Funded debt, October 31, 1929, 39,525,603 dollars.

Production and Industry—New Brunswick is productive in agricultural manufacture, mining, fishing, and forest products. The total area under field crops in 1927 was 849,276 acres. For particulars of agricultural production and live-stock see under Canada, pp 291, 292. The wool clip for 1930 was 875,000 lbs.

The Government owns over 10,600 square miles of forests and a similar area is owned privately. In 1926 the total timber cut in New Brunswick from both Crown and Private Lands, including sawn lumber, lath, shingles, railway ties, pulpwood, etc., was in excess of 730 million feet, board measure. Of this amount sawn lumber formed 405 million feet and pulpwood was equivalent to 239 million feet. The total value of forest products, including sawn lumber, lath, shingles, pulp and paper, etc., and also pulpwood exported totals over 30,000,000 dollars. The capital invested in sawmills, pulp mills, logging and driving equipment, etc., is placed at 42,000,000 dollars, and wages amount to over 7,500,000 dollars annually.

A considerable variety of minerals is known to exist in the Province, such as iron, copper, antimony, lead, zinc, tungsten, manganese, bituminous coal, gypsum, oil shale, salt, diatomite. The only active mining in the year 1929 was in coal, copper, antimony, and gypsum. Quantities of good limestone exist in the southern part of the Province, and are quarried for lime, the pulp industry and as a fertilizing agent. Various granites are quarried and manufactured at St. George, and there is an active industry in pulpstones at Quarryville. Natural gas and oil are produced near Moncton. Coal output, 1930, 209,349 short tons.

In 1930 there were 924 industrial establishments, with a capital of 140,611,530 dollars, employing 18,422 persons, salaries and wages, 14,988,441

dollars; cost of materials, 83,897,264 dollars, gross value of products, 63,468,262 dollars

At the elections for the Provincial Legislature held on October 30, 1929, the following parties were returned—Conservatives, 90, Progressives, 5, Liberals, 12, United Farmers of Ontario, 1, Labour, 4, total 112

Area and Population.—The greatest extent of the Province from east to west is 1,000 miles and from north to south 1,075 miles. The area is 412,262 square miles (370,880 sq miles land area and 41,382 water). The Province is roughly divided into two sections by a line running westward from Mattawa on the Ottawa River to Georgian Bay—southern (or old) Ontario, the older settled portion, with an area of about 77,000 square miles, and northern (or new) Ontario, with an area of about 330,000 square miles, of which 146,400 square miles, the district of Patricia, was added in 1912. Population of the principal cities (Census, 1931)—Toronto (capital), 627,582, Ottawa, 124,988, Hamilton, 159,914, London, 71,022.

The population of the Province (Census, 1931) was 3,426,488. The Indian population of the Province in 1921 was 26,436.

Education.—There is a complete State system of elementary and secondary schools. The University of Toronto, founded in 1827, has (1930) 725 professors and lecturers, and 7,178 students (4,382 men and 2,796 women). The other Universities are Queen's at Kingston, Western Ontario at London, McMaster at Hamilton, and Ottawa in Ottawa, which are private foundations. The first two are now undenominational and are aided by the State. The Royal Military College at Kingston is maintained by the Dominion Government. There were, in 1930, 7,706 schools of all grades with over 747,000 pupils. There are 20,000 certificated teachers engaged in these elementary and secondary schools. The total expenditure by the Government of Ontario on education in 1929 was 10,278,187 dollars.

Finance.—The revenues of the Province are derived from the sale of Crown lands, timber, mining, liquor sales, amusement, gasoline and betting taxes, succession duties and other fees, supplemented by a subsidy from the Dominion. The revenue and expenditure in recent years were as follow—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1926-27	56,806,224	55,947,001	1929-30	57,543,291	57,980,352
1927-28	58,426,982	58,198,746	1930-31	54,390,002	54,846,994
1928-29	64,549,777	61,906,824	1931-32	54,186,000	56,161,000

Production and Industry.—The Province is rich in agricultural and mineral resources. The land under cultivation is about 14,000,000 acres, more than 1,000,000 additional acres are cleared, and 25,358,000 acres are assessed.

Of the total land surface of the Province, which is 284,000,000 acres, the amount of arable land is much larger than the portion now under cultivation. Beyond the cultivated portion it is estimated that northern Ontario alone contains some 20,000,000 acres of alluvial soil, not including the vast stretches of agricultural land south and west of James Bay. The farm values for 1931 were—Land, 954,869,758 dollars, buildings, 537,279,170 dollars, implements, 175,178,334 dollars, and live stock, 171,732,345 dollars. For particulars of agricultural production and live stock see under Canada above. The wool clip for 1930 was 6,325,000 lbs.

The mineral production in 1931 included gold, 2,085,818 ozs., value \$3,117,688 dollars, silver, 6,603,034 ozs., 1,926,978 dollars, nickel in matte exported, 16,846 short tons, nickel, metallic, 28,972,201 lbs., nickel oxide, 3,920,181 lbs., copper in matte exported, 6,420 short tons, copper, metallic, 99,652,706 lbs., platinum metals, 91,643 ozs., Portland cement, 3,470,056 barrels, crude petroleum, 122,065 barrels; natural gas, 7,395,000 m. cubic feet. Total value of metallic minerals in 1931, \$2,950,799 dollars, in 1930, 83,356,365 dollars, and in 1929, 83,967,446 dollars. Non metallic minerals and structural materials in 1931 were worth \$8,882,171 dollars, in 1930, 25,063,889 dollars, and in 1929, 27,163,114 dollars. The total value of the mineral production of Ontario in 1931 was \$5,272,332 dollars.

Total area of forests 240,000 square miles, chief timber is spruce, pine and poplar.

In 1930 Ontario had 9,888 manufacturing establishments, with a capital of 2,431,369,848 dollars, employing 307,477 wage-earners, wages and salaries, 370,781,452 dollars, cost of materials, 1,836,666,780 dollars, gross value of products, 1,713,026,322 dollars.

Communications—There were in 1929, 66,102 miles of public road with an expenditure during 1930 of 1,908,412 dollars. In 1930 there were 10,938 miles of steam railway in Ontario, as compared with 7,368 in 1907. There were 1,991,378 miles of telephone wires and 636,118 telephones in 1930.

Hydro electric power.—At January 1, 1932, there were turbine installations representing 2,100,000 h.p. of which 1,300,000 h.p. were being developed in central stations owned mainly by the Hydro Electric Power Commission of Ontario.

PRINCE EDWARD ISLAND.

This island was discovered by Sebastian Cabot in 1497, it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, and constituted a separate colony in 1769.

Constitution and Government.—Prince Edward Island entered the Confederation on July 1, 1873. The Provincial Government is administered by a Lieutenant Governor and a Legislative Assembly of 30 members, who are elected for 4 years, half by real property holders and the remainder by universal male and female suffrage. Women can also be elected to the Assembly. State of Parties (elected August, 1931): Conservatives, 18; Liberals, 11, one vacancy.

Lieutenant Governor.—Hon. Charles Dalton.

320 THE BRITISH EMPIRE:—PRINCE EDWARD ISLAND

The members of the Ministry are as follows (August 29, 1931) —

Premier and Attorney and Advocate General and Provincial Secretary—
Treasurer —Hon J D Stewart, K C

Minister of Public Works and Highways —Hon G Shelton Sharp

Minister of Agriculture —Hon Thomas Macnutt

Minister of Education and Public Health —Hon William J P MacMillan, M.D

Ministers without Portfolio —Hon H Francis McPhee, Hon Adrian F Arsenault, Hon Harry D McLean, Hon Walter G McKenzie and Hon Matthew W Wood

Area and Population.—The province, which is the smallest in the Dominion, lies at the mouth of the Gulf of St Lawrence, and is separated from the mainland of New Brunswick and Nova Scotia by Northumberland Strait. The area of the island is 2,184 sq miles. The total population (Census, 1931) was 88,040. Population of the principal cities (1931) — Charlottetown (capital), 12,357, Summerside, 3,914.

Religion and Education.—The population of the Province at the census of 1921 was divided among the different creeds as follows, —Roman Catholic, 39,312, Presbyterian, 25,945, Methodist, 11,408, Baptist, 5,316, Anglican, 5,057. There were (1930) 472 schools, 618 teachers, 17,277 pupils. This is exclusive of 3 Roman Catholic convent schools at Tignish, Summerside and Charlottetown, with 551 pupils. There are two colleges, Prince of Wales College, head of the Provincial school system, and St Dunstan's, a Roman Catholic institution, both in Charlottetown. Total expenditure on public education in 1929 was 496,059 dollars.

Total sinking funds on December 31, 1931, amounted to 498,351 dollars.

The total liabilities of the Province amounted on 31st December, 1931, to 3,342,241 dollars.

Production and Industry.—The farm land occupied in 1921 was 1,216,483 acres. Field crops in 1931, covered about 494,351 acres, and were valued at 6,828,700 dollars. The land in natural forest covers 356,996 acres, and in pasture 293,454. For particulars of agricultural production and livestock see under Canada above. The wool clip for 1930 was 496,000 lbs.

Silver fox breeding is extensively carried on, and pelts are shipped to United States and European markets, breeding foxes are exported to all northern countries. The value of fur-bearing animals on the 719 farms in 1930 was estimated at 2,288,523 dollars.

The total value of the fisheries in 1930 was 1,141,279 dollars. Of the total, lobsters make up 894,227 dollars, smelts, cod, herring and oysters being, in the order named, the largest other items.

The fishing season of 1930 showed a considerable falling off in production

as compared with the previous year, notably in lobsters. Oysters abound in Richmond Bay, where the beds extend to 15,000 acres. The Dominion Government has possession and control of the oyster areas surrounding the Province. It is believed that the industry will soon be of major importance.

In 1930 there were 267 industrial establishments, with a capital of 3,441,958 dollars, employing 2,055 persons, salaries and wages, 788,106 dollars, cost of materials, 2,546,837 dollars, gross value of products, 4,254,966 dollars.

Commerce and Communications—The trade of Prince Edward Island is chiefly with the other provinces of Canada and thus inter-provincial trade does not appear in the trade statistics. In 1928-29 the exports to other countries amounted to 956,045 dollars, the imports entered for consumption to 1,808,713 dollars. In 1930 the province had 286 miles of railway. A railway and automobile ferry steamer of great power is in operation, connecting the lines of the Canadian National Railway in Prince Edward Island with those on the mainland. Daily steamship communication with the mainland was successfully maintained for the first time during the winter of 1917-18, and has since continued without interruption. In 1930 there were 7,028 miles of telephone wires and 5,753 telephones.

THE NORTHWEST TERRITORIES

Constitution and Government.—The Northwest Territories comprise the Territories formerly known as Rupert's Land and the Northwestern Territory, except such portions thereof as form the Provinces of Manitoba, Saskatchewan and Alberta, and the Yukon Territory, together with all British territories and possessions in North America and all islands adjacent thereto, not included within any province, except the Dominion of Newfoundland and its dependencies. The Territories were reconstituted September 1, 1905, and for administrative purposes were divided into three Provisional Districts, namely, Mackenzie (527,490 sq miles), Keewatin (228,160 sq miles), Franklin (554,032 sq miles) this division having come into effect on January 1, 1920.

The seat of Government is located at Ottawa. By Order in Council of March 16, 1918, the Northwest Territories are governed by the Commissioner, the Deputy Commissioner and five Councillors appointed by the Governor General in Council. The Commissioner in Council has power to make ordinances for the Government of the Territories under instructions from the Governor General in Council or the Minister of the Interior respecting direct taxation within the territories in order to raise revenue, etc., establishment and tenure of territorial offices, and the appointment and payment of officers, maintenance, etc., of prisons, municipal institutions, licenses, solemnization of marriage, property and civil rights, administration of justice and generally all matters of local nature.

Commissioner —Hugh Howard Rowatt

Deputy Commissioner —Roy Alexander Gibson

Area and Population.—The area of the Territories is 1,309,682 sq. miles. The population (estimated) is 12,000, including 7,100 Eskimos and 3,800 Indians.

This territory, including the counties of Demerara, Essequibo, and Berbice, named from the three rivers, was first partially settled by the Dutch West India Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English, and was finally ceded to Great Britain in 1814.

Constitution and Government.—The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, and ten Official Members and nineteen Unofficial Members. Executive and administrative functions are exercised by the Governor and Executive Council. The law of the Colony, both civil and criminal, is based on the common and statute law of England, except that the English law of personal property applies to both movable and immovable property, with certain exceptions, and the Roman Dutch legitimatisation *per subsequens matrimonium* is preserved. There is absolute equality of males and females before the law as regards divorce, property, succession and all other matters. Appeals lie to the Full Court of the Supreme Court and to the West Indian Court of Appeal, and from each of these Courts to the Judicial Committee of the Privy Council.

British Honduras is a Crown Colony on the Caribbean Sea, south of Yucatan, and 600 miles west from Jamaica. Its early settlement was probably effected by woodcutters from Jamaica about 1638, and from that date to 1798, in spite of opposition from the Spaniards, settlers held their own and prospered. In 1786 the Home Government appointed a Superintendent, and in 1862 the settlement was declared a Colony, subordinate to Jamaica. It became an independent colony in 1884.

NEWFOUNDLAND AND LABRADOR.

Newfoundland was discovered by John Cabot in 1497. It was soon frequented by the Portuguese, Spanish and French for its fisheries. Guy, Calvert and others made unsuccessful attempts to colonise the island, but in the 17th century English colonists established themselves there. A French station also existed on the island, and there were constant disputes as to fishing rights. Although exclusive British sovereignty was ceded in 1713 by the Treaty of Utrecht, these disputes were not finally settled till 1904.

The coast is rugged, especially on the south-west, where the coast range reaches an elevation of nearly 2,000 feet. The hills attain their summit within a few miles of the salt water, and then spread out into an undulating country, consisting largely of barrens and marshes, and intersected by numerous rivers and lakes. On the borders of the lakes and water-courses good land is generally found, and in some cases, as about the Exploits, the Gander and the Humber, it is heavily timbered.

Constitution and Government.—The Governor is assisted by an Executive Council (not exceeding 10 members), a Legislative Council (not exceeding 24 members), and an elected House of Assembly consisting of 27 representatives. Members of the Legislative Council receive 250 dollars per session, members of the Legislative Assembly receive 1,000 dollars per session. For electoral purposes the whole colony is divided into 24 districts or constituencies. Women were enfranchised by an Act of the Legislature passed in 1925.

After the general election of October, 1932, the Government supporters in the House of Assembly numbered 24, Opposition 2, Independent 1.

Governor and Commander in Chief.—Sir John Middleton, K C M G, K B E, appointed August, 1928, salary 15,000 dollars, with travelling allowance of 2,500 dollars.

The Ministry (October, 1932) is as follows —

Prime Minister and Minister of Finance and Customs.—Hon. F. C. Alderdice

Minister of Justice.—Hon. L. F. Emerson, K C

Secretary of State.—Hon. J. C. Puddister

Minister of Posts and Telegraphs.—W. C. Winsor

The ministers with departments receive salaries of 4,000 dollars each.

Area and Population.—Area, 42,734 square miles. Population in 1931, 277,285 (140,400 males and 136,885 females). Dependent on Newfoundland is Labrador, the most easterly part of the American continent. The boundary between the said Dependency and the Province of Quebec, which had, for many years, been in dispute, was defined by the Judicial

Committee of the Privy Council in March 1927, as being, in effect, the watershed of the rivers flowing into the Atlantic Ocean, the coastal boundaries being from Blanc Sablon, on the South, to Cape Chidley, on the North. As a result of this decision an estimated area of some 110,000 sq miles, formerly in dispute, was confirmed as under the jurisdiction of Newfoundland. The population of Labrador in 1931 was 4,264 (2,194 males, 2,070 females). Of the total Newfoundland population in 1921, 65,448 were engaged in the fisheries, 3,227 were farmers, 4,862 mechanics, and 1,117 miners. Capital, St John's, 42,645 inhabitants (1931), other towns (1921), Harbour Grace, 3,825, Bonavista, 4,052, Carbonear, 3,320, Twillingate, 3,217, and Grand Falls, 3,769. Production, &c.—The total value of all crops harvested in 1921 was 4,824,090 dollars. In 1921 (census figures) there were in Newfoundland 16,340 horses, 27,721 cattle, 86,782 sheep, and 14,573 swine. Pine forests exist to the north, and large saw mills have been established. The mineral resources of Newfoundland are considerable. Large beds of iron ore have been found on Bell Island in Conception Bay, on the east coast, and other rich deposits have been discovered on the west coast. The total deposits are estimated at about 3,600 million tons. Copper ore and pyrites are worked. Coal is found near St George's Bay on the west coast, and in the Grand Lake district. In the eastern part of the island gold-bearing quartz rock and extensive deposits of silver and lead ore have been found. Extensive paper and pulp mills have been erected at Grand Falls, Bishop's Falls, Corner Brook, Lomond in Bonne Bay, and Alexander Bay.

Of the imports (1930-31) the value of 4,192,300 dollars came from the United Kingdom, 10,675,848 from Canada, 9,266,133 from the United States. Of the exports the value of 9,491,661 dollars went to the United Kingdom, 2,021,582 to Canada, 10,986,135 to United States, 991,711 to Portugal, 1,506,789 to Spain, 845,422 to Italy, 1,849,383 to Brazil.

Shipping.—Total tonnage of vessels entered and cleared in 1930-31, 2,503,243 tons, of which 1,563,110 tons were British. Vessels registered December 31, 1931, 2,333 sailing vessels of 94,317 tons, 83 steam vessels of 31,446 tons, and 200 motor vessels of 9,171 tons, total, 2,616 vessels of 134,934 tons.

Fishing is the principal occupation of the population. The principal fish are cod, salmon, halibut, lobster, caplin, and seal. The value of the fishing products is about four millions sterling annually.

By the Anglo French Convention of 1904, France renounced her exclusive fishing rights under the treaty of Utrecht, but retained the right to fish in territorial waters from St John's Cape northwards to Cape Ray for all sorts of fish, including bait and crustacea. An award of the Hague court in 1910 secured the right of Great Britain to make fishing regulations without the consent of the United States, subject to any limitations imposed by treaty. It also confirmed Great Britain's contention that the whole extent of a bay from headland to headland is comprised within territorial waters.

There were engaged in the Bank cod fishery during 1931, 1,150 men, and 62 Newfoundland sailing vessels, aggregating 4,981 net tons. The catch in 1931 totalled 95,763 quintals of dry fish. In 1931 the output of the cod-fishery is estimated at 1,147,108 quintals of dry fish, valued at 7,724,830 dollars. There were about 12,981 small sailing vessels, boats (including motor boats), &c, utilised, and 27,500 men employed in this fishery. In 1930 exports of fresh lobsters amounted to 28,583 lbs., valued at 8,500 dollars, and preserved, 9,562 cases, valued at 198,472 dollars.

During 1931, 87,866 seals, valued at 121,115 dollars, were caught; 10

vessels and 1,324 men were engaged in the seal fishery. In 1930 the catch was 241,236 seals.

Communications, &c—Railways open 1926 907 miles of Government line with a gauge of 3ft 6in, and 56 miles of private line. Communication between various points on the coast and between the island and the continent is maintained by a fleet of 17 first class steamers; 13 owned by Government Railway, each of which connects with some central point on the railway. There were in 1930 (including 53 Labrador stations) 893 post offices, 161 of which were telegraph offices, there were 79 telegraph offices which were not post offices. There were about 800 Government postal telephone stations, most of them being in post and telegraph offices. Letters and cards sent in 1930, 7,386,400, newspapers, books, parcels, &c, 225,460 sent abroad, received, 3,000,000. The postal and telegraph revenue, 1930, was 853,738 dollars, and the expenditure, 1,496,779 dollars. Telegraph line open (1930), 4,830 miles of wire, about 1,200 miles of telephone wire.

In December, 1931, the Newfoundland Savings Bank held 1,530,833 dollars standing to the credit of 3,028 depositors, this is in addition to the amount of 24,207,391 dollars held by the Savings Departments of the four banks doing business in St John's.

The legal coin of the colony is the gold dollar, normally equivalent to 4s 1½d. of British money.

AUSTRALASIA AND OCEANIA.

THE British Territories in Australasia comprise the Commonwealth of Australia, the Australian Dependencies of Papua and Norfolk Island, the Dominion of New Zealand and adjacent islands, and the Crown Colony of Fiji. The British possessions in Oceania include the Solomon and Tonga Islands, and many other groups of islands and islets scattered over the Pacific. There are also the mandatory territories of New Guinea, Western Samoa, and Nauru.

THE COMMONWEALTH OF AUSTRALIA.

The Commonwealth of Australia, consisting of the six colonies (now denominated Original States) of New South Wales, Victoria, Queensland, South Australia, Western Australia, and Tasmania, was proclaimed on January 1, 1901.

On September 1, 1906, the administration of Papua was transferred to the Commonwealth (*see* Papua).

Legislative power is vested in a Federal Parliament, consisting of the King, represented by a Governor-General, a Senate, and a House of Representatives. There must be a session of Parliament at least once every year. The Senate consists of 36 Senators (at least six for each of the Original States voting as one electorate) chosen for six years. In general, the Senate is renewed to the extent of one-half every three years, but in case of prolonged disagreement with the House of Representatives, it may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as may be, of twice as many members as there are Senators, the numbers chosen in the several States being in proportion to population (excluding aborigines) as shown by the latest statistics, but not less than five for any original State. Number in 1932, 76. The Northern Territory, by virtue of an Act passed in 1922, elects a member who is not entitled to vote, but may take part in any debate in the House. The House of Representatives continues for three years from the date of its first meeting, unless sooner dissolved. Every Senator or Member of the House of Representatives must be a natural-born subject of the King, or have been for five years a naturalised subject under a law of the United Kingdom or of a State of the Commonwealth. He or she must be of full age, must possess electoral qualification, and have resided for three years within the Commonwealth. The franchise for both Chambers is the same and is based on universal adult (male and female) suffrage.

The legislative powers of the Federal Parliament embrace commerce, shipping, &c; finance, banking, currency, &c; defence; external affairs; postal, telegraph, and like services, census and statistics, weights and measures, copyright, railways, conciliation and arbitration in industrial

disputes extending beyond the limits of any one State, and other matters. The Senate may not originate or amend money bills, and disagreement with the House of Representatives may result in dissolution, or, in the last resort, a joint sitting of the two Houses. No religion may be established. The Federal Parliament is a government of limited and enumerated powers, the several State Parliaments retaining the residuary power of government over their respective territories. If a State law is inconsistent with a Commonwealth law, the latter prevails.

At the election for the Lower House held on December 20, 1931, the following parties were returned: United Australia Party, 39, Country Party, 16, Federal Labour Party, 14, Lang Labour Party, 4, Independent, 2.

The Executive power, vested in the King, is exercised by the Governor-General, assisted by an Executive Council of thirteen responsible Ministers of State. These Ministers are, or must become within three months, members of the Federal Parliament.

Governor General—His Excellency the Rt Hon Sir Isaac Alfred Isaacs, P C, G C M G, Commander in-Chief of the Commonwealth of Australia and its Dependencies (salary, £10,000). Assumed office on January 22, 1931.

The Cabinet (December 1932), is as follows—

Prime Minister and Treasurer—Rt Hon J A Lyons, P C

Attorney-General, Minister for External Affairs and Minister for Industry—Hon J G Latham, C M G, K C

Minister without Portfolio—Rt Hon S M Bruce, C H, P C, M C

Resident Minister in London.—Rt Hon S M Bruce, C H, P C, M C (Appointed Feb 10, 1932)

Official Secretary for the Commonwealth in London and Financial Adviser—G McLaren, C M G (February 16, 1933)

Representative in the Commonwealth of H M Government in the United Kingdom—W C Hankinson, M C (Acting)

Commonwealth Trade Representative in France—C H. Voss.

Commissioner-General for Australia in the United States of America.—Vacant

Official Secretary for the Commonwealth in America.—D McK. Dow.

Australian Trade Commissioner in Canada—L R McGregor

The Constitution provides for a Federal Judicature and an Inter-State Commission on Trade and Commerce, and for the admission or creation of new States. The Inter-State Commission was brought into existence in 1913 and the Commissioners were appointed for a term of seven years. At the expiration of this period no fresh appointments were made. In 1911

the Commonwealth acquired from the State of New South Wales the Yass-Canberra site for the Federal Capital, with an area of 912 square miles. Building operations were begun in 1923 and Parliament was opened at Canberra on 9th May, 1927, by H R H the Duke of York. A further area of 28 square miles at Jervis Bay was acquired in 1917 for purposes of a Naval College, with the right to construct a railway from the Capital thereto.

Proposed laws for the alteration of the Constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the States and also a majority of all the electors voting.

Pensions and Maternity Allowances.

The Invalid and Old Age Pension Acts provide for the payment of invalid and old age pensions at such rates as the Commissioner deciding the

question deems sufficient, but so that the amount shall not exceed 52*l* a year, nor the pensioner's whole income (including the pension) exceed 84*l* 10*s* a year. By special provision, made in 1920, a permanently blind person may receive an amount of pension (not exceeding £52) as will make his total income equal to £221 per annum, or such other amount as is declared to be a basic wage. Old age pensions are granted upon application to persons who are at least 65 years of age and have lived in Australia or Australian territory at least 20 years. In the case of women, however, and of men subject to certain disability, the pension may be paid from age 60. Invalid pensions are granted to persons who have lived at least 5 years in Australia, have there become incapacitated, and have no other sufficient means of support. The Financial Emergency Act, 1931, reduced the amount of old age and invalid pensions by 2*s* 6*d* per week and the income limit to 78*l* per annum. In the case of blind pensioners the pension has been reduced to an amount not exceeding 45*l* 10*s*, but at present the limitation on total income has not been altered. The estimated savings were assessed at approximately 1,825,000*l* per annum. Owing to the increase in the number of pensioners during the year 1931-32, the reductions in the rate resulted in a reduced expenditure of 571,000*l*. only. At June 30, 1932, there were 183,317 old age and 72,292 invalid pensioners, the payments to whom for 1931-32 amounted to 11,125 596*l*.

On October 9, 1912, a Maternity Act was passed providing for the payment of an allowance of 5*l*. in respect of every viable child born (alive or dead) in Australia. The mother must be a native of the Commonwealth or intend to settle permanently therein. No payment is made in the case of an aboriginal or an Asiatic. The amount of maternity allowance which, under the provisions of the Financial Emergency Act, 1931, is only payable where the total income of claimant and her husband did not exceed 260*l* for the preceding 12 months, has been reduced to 4*l*, thus effecting a saving of 230,000*l* per annum. (Actual savings in 1931-32 were 252,000*l*.) To June 30, 1932, 2,567,885 claims were paid—92,410 in 1931-32—and the aggregate expenditure totalled 12,755,032*l*, of which 378,022*l* was paid in 1931-32. War pensions are subject to a reduction of 22½ per cent under the same Act. The Returned Soldiers' organizations have submitted a scheme satisfactory to Parliament to enable this reduction to be given effect to and reduce the annual war pension bill by 1,300,000*l*. At June 30, 1932, War pensioners numbered 274,111, to whom 7,449,180*l* was paid in 1931-32.

Justice.

The judicial power of the Commonwealth is vested in a Federal Supreme Court (the High Court of Australia), consisting of a Chief Justice and five Justices, appointed by the Governor-General in Council. The High Court has original jurisdiction in all matters arising under treaties, between States of the Commonwealth, or affecting representatives of other countries, as well as in other matters as empowered by the Parliament. It may also hear and determine appeals from judgments of its own Justices exercising original jurisdiction, and from judgments of any other Federal Court, or of the Supreme Court of any State, subject to certain rights of final appeal to the King in Council. The Commonwealth Court of Conciliation and Arbitration consists of a Chief Judge and two other Judges. The Federal Court of Bankruptcy is presided over by a Judge.

Finance.

Actual revenue and expenditure for 1927-28 to 1931-32 are given in the following table. Under the 'Surplus Revenue Act, 1910,' the amount

payable by the Commonwealth to each State was a sum equivalent to 25 shillings per head of the population as estimated by the Commonwealth Statistician at 31st December in each year. In 1927 the States Grants Act abolished the *per capita* payments as from 30th June, 1927. In 1929 in accordance with a Commonwealth Referendum, the Commonwealth took over all State Debts existing on 30th June, 1927, and will pay 7,584,912¹ a year for 58 years towards the interest charges thereon, and will make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 58 years. The Commonwealth Government will arrange all future borrowing for both Commonwealth and States through a Loan Council consisting of representatives of Commonwealth and State Governments.

Defence.

ARMY

The principle of the defence policy of Australia from 1911 to 1929 was the universal compulsory training of a Citizen Army, but from the 1st November, 1929, the constitution of the forces on a voluntary basis was adopted. Permanent troops are maintained only in such numbers as are necessary to administer and instruct the Militia Forces. The administrative organisation consists of a central administration and 6 districts, corresponding to the 6 States. The Military Board, under the presidency of the Minister of Defence, has responsibility for control and administration. The Council of Defence, under the presidency of the Prime Minister, deals with policy and insures its continuity, and co-ordinates the requirements of the sea, air and land. The Militia Force is organised in 2 cavalry divisions and 5 infantry divisions. Each cavalry division comprises 3 cavalry brigades and divisional troops. Each cavalry brigade comprises 3 regiments. The divisional troops are comprised of 5 field artillery batteries, 2 engineer squadrons, 8 train companies, 6 field ambulances, 2 sanitary sections and 6 veterinary sections.

Each of the first 4 infantry divisions is composed of 3 infantry brigades each of 4 battalions and divisional troops, which include for each division 9 field artillery batteries, 4 engineer companies, 3 signal companies, 4 train companies, 3 field ambulances, 1 sanitary section and 1 veterinary section. The 5th division comprises 3 mixed brigades. The garrison troops of the permanent and militia forces are organised in 6 district bases. The garrison artillery of permanent troops consists of 10 garrison and 1 field batteries. The garrison artillery of militia forces consists of 12 batteries, and there are 6 fortress companies.

There is a Senior Cadet Force for boys between the ages of 16 and 18, with an annual training of 60 hours. Enlistment in the Militia is for 3 years between the ages of 18 and 40, with annual training for 16 days, 8 at home and 8 in camp.

An arsenal has been established, which insures the supply of war needs through Australian trade. Mobilisation stores are provided.

Military education is provided at the Royal Military College, Duntroon, Sydney, from which cadets may obtain permanent commissions.

Rifle clubs receive a subsidy and a free grant of ammunition.

On March 31, 1932, the strength of the permanent force was 1,536, and of the militia forces, 28,285.

NAVY.

Since the establishment in 1911 of the Royal Australian Navy, a squadron commanded by a Rear-Admiral has been provided and maintained by the Commonwealth. The policy has been to maintain a force as an active unit in the scheme of Empire Naval Defence. The Naval Board, which is responsible for administration and control, consists of the Minister for Defence with two Naval Members and one Finance Member, the seat of administration being at Melbourne. The personnel is now almost entirely Australian recruited and trained, but in order to ensure close co-operation with the Royal Navy a system of exchange of ships and officers is normally followed. The exchange of ships has been temporarily suspended since 1930 owing to financial stringency. Fleet units in December, 1932, included the 10,000 ton cruisers *Canberra* (Flagship) and *Australia*, the older cruisers *Adelaide* (5,100 tons) and *Brisbane* (5,120 tons), the seaplane carrier *Albatross* (5,000 tons, with accommodation for 9 seaplanes), the flotilla

leader *Anzac*, 5 destroyers, 1 surveying sloop, a depot ship and a fleet oiler. The only sea-going ships in full commission in December, 1932, were the *Canberra*, *Australia*, *Albatross* and *Tattoo*. The main repair base and store depot are at Sydney, while training establishments are centred at Westernport, near Melbourne. The R A N College, for the training of Naval Cadets, is also at Westernport. The authorised total Active Service personnel for 1932-33 is 3,123, which includes 351 officers. Period of first engagement for ratings is 12 years.

The Reserve Forces comprise — R A N R (Seagoing), 45 officers; R A N R (Citizen Naval Forces), 244 officers, 4,910 ratings, R A N V R. 38 officers.

AIR FORCE.

There is a Royal Australian Air Force, administered by the Air Board, consisting of two Air Force members and a finance member. To this force is entrusted the air defence of Australia, the training of personnel for co-operation with the naval and military forces, and the refresher training of pilots engaging in civil aviation. The present establishment of the force includes the following units:—(a) Headquarters, Royal Australian Air Force, with representation in London, (b) a Flying Training School, (c) an aircraft depot, (d) two service landplane squadrons, and (e) one service amphibian flight. The approved establishment of the Permanent Air Force in June, 1932, was 102 officers and 788 airmen, and of the Citizen Air Force 48 officers and 260 airmen. The Air Force expenditure (excluding war services) for the year 1930-31 was 369,334/.

Production.

In 1930, 769,066,467 acres, representing 40.40 per cent. of the total area of Australia, were either unoccupied or occupied by the Crown, only 6.39 per cent. had been actually alienated (121,615,105 acres), 3.37 per cent. (64,112,227 acres) was in process of alienation, and 49.84 per cent. (948,917,301 acres) was held under the various forms of leases and licences.

The area under crops (distinguishing the principal crops) in Australia and the yield in 1930-31 were as follows —

The total area under all crops in 1930-31 was 25,168,816 acres. The total value of agricultural production in the same year was 70,500,000/.

For the year 1931-32 the estimated area under wheat was set down as 14,724,830 acres, and the estimated yield as 189,652,654 bushels. Of Australia's total forest area of 24,500,000 acres, 16,224,485 acres have been permanently dedicated for timber.

At the end of 1930 there were in Australia 1,792,734 horses, 11,720,916 cattle, 110,568,279 sheep, and 1,071,679 pigs. At the end of 1931, according to official estimates, there were 108,000,000 sheep.

The production of wool in 1930-31 amounted to 912,141,253 lbs., and the exports (Australian produce) to 768,949,256 lbs. greasy, valued at 29,377,197*l*., and 44,751,940 lbs. scoured and tops, valued at 2,584,262*l*.. Of the total production of 912,000,000 lbs. of wool in 1930-31, about 817,000,000 lbs. consisted of wool shorn, 88,000,000 lbs. were made up of dead and fell mongered wool, while 57,000,000 lbs. were contained on skins exported. The butter produced in the year 1930-31 amounted to 350,405,104 lbs., cheese, 38,099,781 lbs., bacon and hams, 71,050,133 lbs.

The mineral output was valued as follows in 1929 and 1930 —

³ The actual recorded value for 1930-31 was 102,108,896¹ and the estimated Australian currency value 104,354,638¹., and for 1931-32 the recorded value in Australian currency was 107,885,791¹.

The value of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. The value of goods exported is generally the value in the principal markets of the Commonwealth in the usual and ordinary commercial acceptance of the term.

The Customs Tariff Act of 1921-31 provides for preference to goods produced in and shipped from the United Kingdom to Australia, and for reciprocal tariff agreements with other countries. A reciprocal customs tariff which had been in operation between Australia and the Union of South Africa since 1906 was repealed by Customs Tariff 1926. The repeal came into force on 1st July, 1926. On September 1, 1922, a reciprocal tariff agreement, modified in 1922, 1926, and 1928, came into operation between Australia and New Zealand. The agreement made with Canada in 1925 was considerably extended by the new treaty which came into operation on August 1931.

The Customs Tariff (Papua and New Guinea Preference) 1926 came into force on April 1st, 1926, and provides that imports of certain goods specified in the schedule to the Act, and being the produce of the Territory from which they were imported, shall be free of duty.

Private railways in Australia, open for general traffic, 1931, 859 miles

A trans-continental railway from north to south is under construction. The terminus of the Northern Territory line has been carried down from Mataranka to Birdum (316 miles from Darwin), while the existing line from Port Augusta to Oodnadatta has been extended as far north as Alice Springs.

In Victoria a scheme for the electrification of the railways in the Metropolitan area has been carried out. Electric railways are also under construction in Sydney.

The State railway gauge is: In New South Wales, 4ft 8½in (40 miles, 3ft 6in.), in Victoria, 5ft 3in (122 miles, 2ft 6in.), in Queensland, 3ft 6in (49 miles, 4ft. 8½in and 30 miles, 2ft 0in.), in South Australia, 5ft 3in for 1,461 miles, the rest, 3ft 6in., in W. Australia, 3ft 6in.; and in Tasmania, 3ft 6in (11 miles, 2ft 0in.) Of the Federal lines, the gauge of the Trans-Australian and Federal Territory is 4ft 8½in., and that of the Oodnadatta and Northern Territory is 3ft 6in. A commission has recommended a uniform 4ft 8½in gauge, and this has been accepted in principle. The unification is estimated to cost 20,851,000/.

CIVIL AVIATION

Civil flying in the Commonwealth and Territories is subject to legislative control by the Commonwealth Government The administration of the Air Navigation Act and Regulations is a function of the Department of Defence, the Minister being assisted by a separate Branch under a Controller of Civil Aviation

In addition to his administrative duties, the Controller advises the Minister in matters of policy involving the expenditure of the annual appropriation in aid of civil aviation This vote is utilised mainly for (a) subsidising regular air transport services over selected routes, (b) subsidising approved Aero Clubs for the maintenance of flying training activities, and (c) acquiring, preparing and maintaining aerodromes and emergency landing grounds on approved aerial routes, erection of hangars and other buildings, and the provision of power, water, lighting and other aerodrome services

At June 30, 1932, subsidised air mail services were in operation over the following routes:—Perth-Derby-Wyndham (2,067 miles), Perth-Adelaide (1,453 miles); Brisbane-Camooeweal (1,269 miles); Camooeweal-Daly Waters (475 miles); Daly Waters-Birdum (50 miles), and Cloncurry-Normanton (215 miles) Total air line distance of subsidised services, 5,529 miles. Total mileage flown annually by subsidised services, 551,216 miles. In addition, unsubsidised services are maintained regularly over the Sydney-Brisbane and Launceston-Flinders Island routes, carrying air mails under contract to the Postmaster-General's Department

Civil Aviation expenditure for the year 1931-1932 was 131,623/

At June 30, 1932, there were 97 public aerodromes, 184 Government aerodromes and emergency landing grounds

Extensive use is made of air transport in the Mandated Territory of New Guinea, where several companies operate daily services for the conveyance of passengers, mails and heavy freight between the coast of Salamaua and the goldfields, some 80 miles inland, the only alternative method of transportation being the native carrier. The freight conveyed by air during the year 1931 approximated 2,987 tons, the major proportion comprising hydro electric power plant and dredging machinery for the Bulolo goldfields

MOTOR VEHICLES

At June 30, 1931, 604,105 motor vehicles, including 429,206 motor cars, 76,966 motor cycles, and 97,933 commercial vehicles were registered in Australia. The Revenue derived from Registration fees and Motor Tax was 4,072,633/ for the year. The registrations were equivalent to 92.9 vehicles per 1,000 of population.

WIRELESS TELEGRAPHY

Wireless telegraphy stations are in operation in all the State Capitals, and in certain other places. 831,128 wireless Broadcast Listeners' licences had been issued at June 30, 1931, and 869,092 at June 30, 1932. The National Broadcasting Service controlled by the Postmaster General's Department now operates twelve broadcasting stations. In addition fifty other stations were licensed at 30th June, 1932. Two beam stations have been erected, one for direct communication with London, and the other for direct communication with Canada, United States, and Mexico, direct beam wireless service with London was established on April 8, 1927, and with Canada, etc., on June 16, 1928

Money and Credit.

On January 20, 1913, the Commonwealth Bank was opened at Sydney. Average deposits for June 1932 quarter (General Bank) were 35,216,389/, of which 8,606,629/ represented non-interest bearing deposits. The deposits of the savings bank which was created a separate department on 9th June, 1928, aggregated 115,900,084/ at June 30 1932. The large increase in the year was due to the amalgamation of the Government Savings Banks of New South Wales and Western Australia with the Commonwealth Savings Bank. The bank started without capital, and began to make profits in 1913-14. At June, 1930, the capital was 4,000,000/, which was transferred from the reserve and redemption funds. Aggregate net profits to June 30, 1931, amounted to 9,290,683/, and the Reserve Fund to 1,185,718/.

There are, besides, 17 other banks, including 2 State Government institutions, trading in Australia. Their paid up capital on June 30, 1932, was 79,090,805/., and the amount of reserved profits and balances carried forward, 52,600,000/.

The total liabilities of all cheque paying banks trading in the Commonwealth, in the quarter ended June 30, 1932, were 352,537,702/, and the deposits, excluding Savings Bank deposits in the Commonwealth Bank were 319,241,338/. Assets amounted to 415,310,082/., of which advances totalled 260,917,515/., and Government and Municipal securities 80,898,798/.

The total Savings Banks deposits in the Commonwealth on June 30, 1932, was 197,925,927/ (50.45/., per head of population)

There are 2 mints in the Commonwealth, at Melbourne (opened 1872), and Perth (1899). Besides issuing gold coin (sovereigns and

half sovereigns) they also issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export. Since 1916 silver and bronze coins have been minted at the Sydney and Melbourne Mints on behalf of the Commonwealth Treasury. The Sydney Mint was closed at the end of 1926.

The gold issues during 1930 are shown in the following table —

Mint	Coin			Bullion	Total
	Sovereigns	Half Sovereigns	Total		
	£	£	£	£	£
Melbourne	57,779	—	57,779	637,785	695,564
Perth	1,173,088	—	1,173,568	981,219	2,154,787
Total	1,231,347	—	1,231,347	1,619,004	2,850,351

Silver coinage to the value of 237,000*l* was issued during the year ended June 30, 1931. The total issues of gold coin and bullion to the end of 1931 were 404,197,946*l* and 33,897,904*l* respectively.

On June 30, 1932, notes issued by the Commonwealth and unredeemed amounted to 51,303,426*l*. The amount of gold held in reserve on that date was 10,500,455*l*, representing 20·47 per cent of the liability. Bank notes ceased to circulate after 1911.

During 1932 an amendment to the Commonwealth Bank Act permitted the purchase of "English sterling" for note issue reserve purposes, "English sterling" being defined as "currency which is legal tender in the United Kingdom," and includes *inter alia* Bills of Exchange, and secured advances maturing in not more than three months. At 25th July, 1932, 2,000,000*l* of sterling had been purchased for note issue reserve purposes.

NORFOLK ISLAND 29° S latitude, 168° E longitude, area 18 square miles, population (June 30, 1931) 992 (545 males and 447 females). The island was formerly part of the Colony of New South Wales and then of Van Diemen's Land. It has been a distinct settlement since 1856 and under an Order-in-Council of 1900 was governed by the Governor of New South Wales, but from July 1, 1914, the affairs of the island have been administered by the Commonwealth Government. The island, which is very picturesque and possesses a delightful climate, coupled with a fertile soil, is especially suitable for the cultivation of citrus fruits, bananas, and coffee. In 1930-31 the imports (mostly from the Commonwealth) were valued at 48,870*l*, and the exports, 21,903*l*.

NEW SOUTH WALES.

Constitution and Government.

New South Wales became a British Possession in 1788, a partially elective Legislative Council was established in 1843, and responsible government in 1856. New South Wales federated with the other Australian States to form the Commonwealth of Australia in 1901. The legislative power of the State is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council consists of not less than twenty one members (123 in September, 1932), appointed by the Crown for life. Members travel free on the State railways and tramways. The President receives an annual salary of 945*l*, and the Chairman of Committees, 573*l*. The Legislative Assembly has 90 members. Postal voting is permissible. Every man or woman, being a natural born or naturalised British subject above 21 years of age, having resided six months in the Commonwealth, three months in the State, and one month in the electorate, is qualified to be enrolled as an elector, and enrolment is compulsory. Members of the Legislative Assembly are paid an annual salary at the rate of 706*l* per annum, and they are allowed to travel free on Government railways and tramways in the State. The leader of the Opposition receives an additional allowance of 175*l* per annum. The duration of a Parliament is not more than three years. The Women's Legal Status Act, 1918, gives women the same political rights as men.

The Legislative Assembly, elected on June 11, 1932, consists of the following Parties: United Australia, 66, Labour, 24.

The executive is in the hands of a Governor, appointed by the Imperial Government.

Governor — Air Vice-Marshal Sir Philip Woolcott *Game*, G B E, K C B, D S O (Appointed January, 1930).

Lieut. Governor — The Honourable Sir Philip Whistler *Street*, K C M G.

In the exercise of the executive the Governor is advised by a Cabinet consisting of the following members (June 17, 1932) —

Premier and Colonial Treasurer — The Hon B S B *Stevens*, M L A.

Deputy Premier and Minister for Transport — Lieut.-Col the Hon M F *Brunner*, M L A.

Secretary for Public Works and Minister for Health — The Hon R. W. D *Weaver*, M L A.

Attorney General and Vice President of the Executive Council — The Hon H E *Manning*, K O, M L C.

LOCAL GOVERNMENT

A system of Local Government extends over the whole of the State, except the Western Land Division, where, however, seven municipalities are incorporated. There are 181 boroughs and municipal districts under the title of municipalities, and in addition 138 corporate bodies called shires. The central Government of the State affords financial assistance to the municipalities and shires in the form of endowment or of grants for special purposes, *e g* road-making. The total Government Assistance in 1930 was for Municipalities 632,722¹, and for Shires 1,722,591¹.

Area and Population.

The area of New South Wales, inclusive of Lord Howe Island, but exclusive of the Federal Capital Territory (912 sq miles at Canberra and 28 at Jervis Bay), is 309,432 square miles.

The population (including aboriginals) at six consecutive censuses was —

Religion.

There is no established church in New South Wales, and freedom of worship is accorded to all. An Act abolishing State aid to religion was passed in 1862

The following table shows the statistics of the religious denominations in New South Wales at the census of 1921 and of ministers of religion in 1932 —

Education.

The State maintains a system of national education, and instruction is compulsory between the ages of 7 and 14 years. In all State schools education is free. There is a large number of private schools subject to State inspection.

There were at the end of 1931, 3,240 Government schools, classified as follows: High schools 38, public primary schools 2,029, provisional schools 599; half-time schools 33, travelling schools 1, evening continuation schools 45; correspondence schools 1, subsidised schools 486, industrial and reformatory schools 8, total 3,240 schools. During December quarter, 1931, there were 387,381 children enrolled. The average attendance during the year was 322,816. The number of teachers at the end of the year was 13,126. The pupils receiving kindergarten instruction at Government schools (1931) numbered 14,618. The total Government expenditure on education during the year ending June 1931 was 5,007,213¹.

At the end of 1931 there were 751 private schools (with 94,088 pupils

and 4,804 teachers), of which 533 were Roman Catholic Denominational Schools, having 3,316 teachers and 78,765 scholars. The Church of England Denominational Schools numbered 56 with 546 teachers and 5,458 scholars, other denominational schools 23, teachers 252, pupils 2,579. The undenominational private schools numbered 139, the teachers 690, and scholars 6,286.

The University of Sydney, founded in 1850, had (1931) 3,119 individual students (including 850 women) with 287 professors, lecturers and demonstrators. There are 5 denominational colleges, Church of England, Roman Catholic (one for men and one for women), Presbyterian, and Methodist, and an undenominational college for women, affiliated to the University. A Government training college for teachers is situated in the University grounds. The Technical College, with branch schools, had a total enrolment of 33,345 in 1931.

Widows' Pensions and Family Allowances.

For particulars of old age and invalidity pensions see under *Australia*. The numbers current in New South Wales on June 30, 1932, were: old age, 69,867 (Males, 30,098, Females, 39,769), invalidity, 29,955 (Males, 13,025, Females, 16,930).

The Widows Pensions Act of New South Wales, 1925-29, provides for pensions to widows with dependent children under fourteen years of age, also to other widows in special cases. The maximum pension is 1*l* per week with 10*s* for each child under 14 years. The amount of each pension is ascertained by deducting from the maximum annual amount 1*l* for each 1*l* by which the widow's net income exceeds 26*l*. Pensions became payable on March 10, 1926. On July 1, 1931, pensions were being paid to 6,661 widows, the amount paid during the year was 620,258*l*.

The Family Endowment Act, 1927, as amended by later legislation, provides for the payment of endowment in respect of each dependent child, except one, under 14 years of age in cases where the 'family income,' during the twelve months preceding the date of claim, is less than the appropriate living wage (fixed by the Industrial Commission to cover the maintenance of a man, wife and one child). The Endowment, at a maximum rate of 5*s* per week, is payable to the mothers. A residence qualification of two years in New South Wales is prescribed in respect of the mothers and of the children except when a child is under 2 years and was born in the State. At June 30, 1931, endowment was payable to about 38,948 families, and at June 30, 1932, to 59,293 families. The amount of endowment paid during the year ended June 30, 1932, was 1,805,685*l*, as compared with 1,196,484*l* in 1930-31. State relief is also given to neglected and destitute children.

Justice and Crime.

In New South Wales legal processes may be grouped within the Lower or Magistrates Courts, or the Higher Courts presided over by Judges. There is also an appellate jurisdiction. Prisoners charged with capital crimes must be tried before the Supreme Court.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. There are also a number of tribunals exercising special jurisdiction, e.g. the Industrial Commission and the Workers' Compensation Commission.

In 1931 there were 101,675 convictions before magistrates at Courts of Petty Sessions and Children's Courts and 1,208 distinct persons were con-

victed at the Higher Courts On June 30, 1931, there were 1,691 convicted prisoners in gaol

Finance

The finances of the State of New South Wales cover a wide range of activities by reason of the State ownership of railways and tramways, water and sewerage works, harbour works, etc., which are administered by statutory bodies. The bulk of the loan funds raised by the State have been expended on these works. The following statement shows the receipts and expenditure of the principal revenue accounts for each of the five years ended July 30, 1927, to 1931 —

There is some duplication in the foregoing statement because items, such as an annual contribution (in 1928-29 and later years) from Consolidated Revenue towards loss on developmental railways have been included as receipts and expenditure in both groups, 'governmental' and 'business undertakings'

Since 1927 there is in operation an agreement between the States and the Commonwealth which provides for the transfer to the Commonwealth of the debts of the States, annual contributions by the Commonwealth towards the payment of interest on such debts, the establishment of sinking funds in respect of these debts and new loans, and joint borrowing and management of loans through an Australian Loan Council. In terms of the agree-

ment the Commonwealth took over the debts of the States on July 1, 1929, and assumed the liabilities of the States to bond holders

The amount of the Public Debt of New South Wales on June 30, 1931, was 288,108,753*l*, viz 165,978,441*l* repayable in London, 13,825,624*l* repayable in New York, and 108,804,688*l* repayable in Australia.

For 1931-32, revenue was 42,416,790*l*; expenditure, 56,644,634*l*. For 1932-33, revenue was estimated at 45,185,082*l*, expenditure 49,535,082*l*.

Production and Industry

I. LAND SETTLEMENT.

The total area of land alienated or in process of alienation from the Crown on June 30, 1931, was 67,860,000 acres, exclusive of Federal Capital Territory, 5,829,000 acres were held under perpetual lease, 107,283,000 acres under other leasehold tenures, and the total area of land neither alienated nor leased (including roads, reserves for public purposes, etc.) was 17,065,000 acres

II AGRICULTURE.

In 1930-31 there were 6,809,510 acres under crops (exclusive of areas double cropped)

The area under cultivation in New South Wales during four years and the principal crops produced were as follows —

The area sown for wheat during the season 1931-32 was 3,923,100 acres, of which 3,529,200 acres were harvested for grain, and 232,600 acres were reaped for 364,600 tons of hay. The total yield of wheat grain exceeded 54,000,000 bushels.

In 1930-31, the area planted with cane-sugar was 15,624 acres, of which 7,617 acres were cut for crushing, the yield being 160,209 tons; grapes, total area, 15,863 (including 2,018 not bearing) acres, wines, 1,335,882 gallons, dried grapes, 55,793 cwt, and 3,680 tons of table grapes

The principal fruit-culture of the State is that of the orange. There were in June, 1931, 33,464 acres under citrus fruit, the production from 27,161 acres was 2,935,728 bushels. The total area under fruits was 78,176 acres, and the total production (from 62,015 acres) was 3,791,058 bushels. During 1930-31 the production of bananas was 216,756 cases from an area of 2,621 acres

At June 30, 1931, the State had approximately 53,866,000 sheep and lambs, 2,840,473 cattle, 524,512 horses, and 334,331 pigs. The production of wool in the year 1930-31 was 427,220,000 lbs (greasy), and in 1931-32, according to a preliminary estimate, was 497,200,000 lbs (greasy). In the year ended June 30, 1931, production of butter was 114,201,709 lbs, cheese, 6,516,065 lbs, bacon and ham, 21,901,194 lbs

There were 124,532 persons engaged permanently in rural holdings during the year ended June 30, 1931

The estimated forest area is 11,000,000 acres. The total area of State forests amounts to 5,152,462 acres, and 1,523,715 acres have been set apart tentatively as timber reserves. The revenue from royalties, licences, &c., amounted in the year ended June 30, 1931, to 88,548*l*. There were 372 saw-mills in the year ended 30th June, 1931, the employees numbering 1,738, the value of plant and machinery was 628,662*l*, and land and buildings 785,938*l*. The estimated value of production from Forestry in 1930-31 was 1,131,000*l*

III MINES AND MINERALS.

The aggregate value of all minerals won in N S W to the end of 1931 was 459,498,613*l*. The following table gives details for the year 1931 —

¹ Preliminary

The chief exports are wool, wool tops, butter, wheat, flour, fruits, timber, meats (frozen and preserved), hides and skins, tallow, leather, pig-lead, tin, copper, coal, and gold.

Of the total value of trade of New South Wales in 1931-32, an amount of 6,790,720l. was imported from Great Britain and Northern Ireland and 13,616,358l. exported thereto.

The vessels engaged in the interstate and overseas trade which entered

the ports of New South Wales in 1930-31 numbered 2,547, net tonnage 7,938,164 tons, the clearances were 2,568 vessels, 8,008,827 tons. Of the total net tonnage in the year 1930-31, 29.1 per cent. was owned in Australia, 44 per cent. in Great Britain, 5.7 per cent. elsewhere in the Empire, and 21.2 per cent. was foreign. Sydney Harbour is the principal port of Australia. The number of vessels, coastal, inter-State, and overseas, which entered in 1930-31 was 5,982, and the net tonnage 8,468,282.

On June 31, 1931, 6,044 miles of Government railway were open and the capital expended on lines open was 132,565,362*l*. The revenue in 1931-32 was 15,001,022*l*, the working expenses, 12,532,869*l*. The number of passengers carried, 128,359,419. There are 7 private railways having a total mileage of 109 miles (mainly colliery lines). The tramways, with the exception of one short line, are the property of the Government. There were 200 miles of tramways open for traffic on June 30, 1932, the capital cost being about 8,486,000*l*. VICTORIA.

Constitution and Government.

Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective Legislative Council, and in 1855 responsible self-government was conferred. The legislative authority is vested in a Parliament of two Chambers. The Upper House consists of 34 members, elected for six years, and the Lower of 65, elected for three years (unless sooner dissolved). Members of the Council must be in possession of an estate of the net annual value of 50*l* for one year prior to their election, and electors must be in the possession or occupancy of property of the rateable value of 10*l* per annum if derived from freehold, or of 15*l* if derived from leasehold or the occupation of rented property. No electoral property qualification is required for graduates of British or Colonial universities, matriculated students of the Melbourne University, ministers of religion of any denomination, certificated teachers, lawyers, medical practitioners, and officers of the army and navy active and retired. One-half of the members of the Legislative Council retire every three years. The members of the Legislative Assembly require no property qualification, and are elected by universal male and (since 1908) female suffrage, and no person may vote in more than one district, nor twice in the same district. Clergymen of any religious denomination are not allowed to hold seats in either the Legislative Council or the Legislative Assembly.

Members of the Legislative Assembly are entitled to reimbursement for expenses at the rate of 500*l* per annum, and members of the Legislative Council at the rate of 200*l* per annum. Members of both Houses have free passes over all the railways.

The Legislative Assembly, elected on May 14, 1932, consists of the following parties—United Australia Party, 32, Labour, 18, United Country Party, 14; Independents, 1. Total, 65.

Governor (Temporary)—Hon. Sir William H. Irvine, K.C.M.G.

In the exercise of the executive the Governor is assisted by a Cabinet of responsible ministers.

Ministers without Portfolio —Hon A E Chandler, M.L.C, Hon H Cohen, C M G, M L C, Hon W S. Kent Hughes, M.L.A., and Hon T C. Mansfold, M L A

The Constitution Act Amendment Act, 1928, limits the number of salaried ministers to eight, and their total salaries to 10,000/ This Act also provides that not more than two members of the Legislative Council and not more than six members of the Legislative Assembly shall occupy salaried office at any one time In addition to the salaried ministers it has been customary to appoint two members of each House as honorary ministers without portfolios

Agent-General for Victoria in Great Britain —Richard Linton (appointed February 7, 1933)

LOCAL GOVERNMENT.

The State is divided into urban and rural municipal districts The basis of the constitution of the former, called cities, towns, and boroughs, is statutory requirements in respect of area, the number of inhabitant householders and annual value of rateable property, and of the latter, called shires, and not limited in area by statute, rateable property capable of yielding upon a rate not exceeding one shilling in the £ on the annual value thereof, a sum of 1,500/ In 1931 there were 56 urban and 140 rural municipalities, in the State

Area and Population.

The State has an area of 87,884 square miles, or 56,245,760 acres, about $\frac{1}{4}$ part of the whole area of Australia The State is divided into 37 counties, varying in area from 920 to 5,933 square miles.

The growth of the population, as shown by census returns, is exhibited in the following table —

Date of Enumeration	Males	Females	Total	Annual rate of increase per cent.
March 29, 1857 . . .	264,334	146,432	410,766	—
April 7, 1861 . . .	328,651	211,671	540,322	7.88

1928	78,158	72,968	1931	49,396	51,595

Of the immigrants in 1931, 23,753 were females, and of the emigrants 23,820 were females

Religion.

There is no State Church in Victoria, and no State assistance has been given to religion since 1875. At the date of the census of 1921 77 per cent of the population were Protestants, 21 per cent were Roman Catholics, and a half per cent were Jews. The following were the enumerated numbers of each of the principal religions in 1921 —Episcopalians 620,445 (including 'Protestant,' so stated, 18,686), Presbyterians, 257,072, Methodists, 183,829; other Protestants, 100,097, Roman Catholics, 322,565, Jews, 7,677, Buddhists, Confucians, &c, 1,367; others (including unspecified), 38,228

Education.

Educational establishments in Victoria are of four kinds, viz., the University, established under a special Act and opened in 1855, with its four affiliated colleges, State schools (primary and secondary), technical schools or colleges, and registered schools.

Affiliated to the University are four colleges—Trinity, Ormond, Queen's and Newman—in connection with the Church of England, Presbyterian, Methodist and Roman Catholic Churches respectively. In 1931 the students who matriculated numbered 686, the direct graduates numbered 471, and there were 4,101 students attending lectures.

Public instruction is strictly secular, it is compulsory for children between the ages of 6 and 14, and is free. In 1930 there were 2,598 State schools with 8,109 teachers, a total enrolment of 260,319 scholars, and an average attendance of 184,228, or 70 per cent of the numbers on the roll. Amongst persons aged 15 years and upwards at the census of 1921, about 98 per cent were able to read and write. The total cost of public instruction, including grants to the University, was 3,014,632*l* in 1930–31 (exclusive of interest on loans)—all paid by the State. Secondary education is for the most part under the control either of private persons or proprietary bodies, usually connected with some religious denomination. There were, in 1930, 502 registered schools in Victoria, with 2,400 teachers, and a net enrolment of 68,556 scholars. A large proportion of these were in connection with the Roman Catholic denomination, the members of which do not as a rule avail themselves of the free education afforded by the State.

Under the auspices of the Education Department are 29 technical schools, 26 junior technical schools, 37 high schools (including agricultural high schools), 47 higher elementary schools, and 12 schools of domestic arts. In 1930 there were 912 teachers attached to the technical schools, irrespective of agricultural and horticultural colleges, the gross enrolment of pupils at senior technical schools being 18,479. The attendance at junior technical schools numbered 6,043 in 1930.

Pensions, &c.

On July 1, 1909, the Federal Old Age Pensions Act came into operation, and the State pensioners were taken over by the Federal authorities. The number in Victoria on June 30, 1932, was 52,795. Pensions are also granted to invalids, 20,785 being on the register on June 30, 1932. The amount paid in old age and invalid pensions during 1931–32 was 3,218,011*l*.

The number of war pensions in force in Victoria on June 30, 1932, was 92,487 and the amount paid during 1931–32 by the Commonwealth Government in connexion therewith was 2,253,005*l*.

An Act was passed by the Commonwealth Parliament in October, 1912, providing for the payment, on application, of a maternity allowance of 5*l*. to the mother of every child born in the Commonwealth, no additional sum to be paid for twins. During the year ended June 30, 1932, the allowance was granted to 23,988 mothers in the State of Victoria, the total payment being 98,800*l*.

Under the provisions of the Commonwealth Financial Emergency Act 1931, old age and invalid pensions have been reduced by 12½ per cent, and certain war pensions by 22½ per cent, whilst the amount of maternity allowance has been reduced to 4*l*., and is not payable unless the total

income of the claimant and her husband for the twelve months preceding the date of the birth did not exceed 260/

Justice and Crime.

There is a Supreme Court with a Chief Justice and six puisne judges. There are courts of general and petty sessions, county courts, courts of insolvency, courts of mines, and courts of licensing.

The following are the criminal statistics for 1931 — Arrested, 16,191, summarily convicted, 11,771, committed for trial, 1,015, and sentenced after committed, 678.

There are 6 gaols and 6 reformatory prisons in Victoria, besides 3 police gaols. At the end of 1931 there were confined in these prisons and police gaols 1,432 males and 45 females.

Finance.

The revenue and expenditure of the State in the years shown were —

Year ended June 30	Revenue	Expenditure	Year ended June 30	Revenue	Expenditure
	£	£		£	£
1928	27,857,917	27,521,370	1931	25,575,504	28,029,702

QUEENSLAND

Constitution and Government.

Queensland, formerly a portion of New South Wales, was formed into a separate colony in 1859, and responsible government was conferred. The power of making laws and imposing taxes is vested in a Parliament of one House—the Legislative Assembly, which comprises 62 members, returned from 62 electoral districts for three years, elected by ballot. Members of the Assembly are entitled to payment of 500*l* per annum, with travelling expenses, and an allowance for stationery and postage. At the General Election of June, 1932, there were 525,944 persons registered as qualified to vote under the 'Electors Act Amendment Act of 1914'. This provides for male and female adult franchise, a twelve months' continuous residence in the State being the only proviso.

Prior to 1922 there was also a Legislative Council, but this has been abolished.

The Legislative Assembly, elected on June 11, 1932, is composed of the following parties: Ministerialists (Labour), 33, National and Country Progressive, 28, Independent, 1.

Governor of Queensland.—Lieut.-Col. Sir Leslie Orme Wilson, P.C., G.C.I.E., C.M.G., D.S.O. (appointed April, 1932) (Salary, 3,000*l*.)

The Executive Council of Ministers, elected June 17, 1932, consists of the following members.—

Premier, Chief Secretary, Treasurer, and Vice-President of the Executive Council.—Hon. Wm. Forgan Smith
Secretary for Public Lands.—Hon. P. Pease.
Attorney-General.—Hon. John Mullan.

Home Secretary—Hon E M Hanlon.

Secretary for Labour and Industry—Hon. M P Hynes.

Secretary for Transport—Hon John Dash

Secretary for Mines—Hon J Stopford

Secretary for Public Instruction—Hon F A Cooper

Secretary for Agriculture and Stock—Hon F W Bulcock.

Secretary for Public Works—Hon H A Bruce

Each Minister has a salary of 1,000*l*, the Vice-President of the Executive Council receives 800*l* in addition

Acting Agent-General for Queensland in Great Britain—L H Pike (Salary, 1,500*l*.) Office—409 Strand, London Acting Secretary, T J Whittington

Provision is made for Local Government by the subdivision of the State into areas denominated respectively cities, towns and shires. These are under the management of aldermen and councillors, who are elected by the Parliamentary electors and are charged with the control of all matters of a parochial nature, more especially the construction and maintenance of roads and bridges within their allotted areas. Shires for the most part consist of purely rural districts.

The number and area of these subdivisions, together with the receipts and expenditure for the year 1931, were —

	No	Area in square miles	Receipts	Expenditure	Rateable Values
			£	£	£
City of Brisbane ¹	1	385	1,437,808	1,493,536	22,548,249

Area and Population.

Queensland comprises the whole north-eastern portion of the Australian continent, including the adjacent islands in the Pacific Ocean and in the Gulf of Carpentaria. Estimated area 670,500 English square miles, with a seaboard of 2,250 miles. In 1825 a branch penal settlement was made at Moreton Bay; in 1842 free settlers were admitted to the country, and during the next twenty years great progress was apparent.

The increase in the population at different periods since 1846 has been as follows —

Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum	Years	Population	Equivalent increase per cent. per annum
1846	2,357	—	1871	120,104	6·74	1901	498,129	2·78

¹ Estimated at December 31.

At the census of April, 1921, the population consisted of 398,969 males, and 357,003 females. The estimated population on June 30, 1932, was 978,017 (516,417 males, 456,600 females). In 1921 there were 3,502 male and 80 female Chinese, 873 male and 142 female 'Polynesians', 1,086 male and 43 female Japanese, 2,080 persons of other Asiatic, &c., races. The total number of aborigines according to the census June 30, 1931, was 13,654 full bloods, and 4,052 half castes.

For occupational census, 1921, see THE STATESMAN'S YEAR BOOK, 1928, p. 374.

Of the total population, 1921, 592,295 persons (exclusive of aborigines) were born in Australia, 128,082 in the British Isles, 148,163 in Europe, 6,741 in Asia, 740 in Africa, 1,764 in America, 1,015 in Polynesia.

The following table shows the births, deaths, and marriages for five years —

Years	Total Births	Illegitimate	Deaths	Marriages	Excess of Births
1927	19,830	1,041	8,079	6,278	11,751

The immigration and emigration, including arrivals and departures by sea and by rail across the border — Immigration, 1929, 63,829, 1930, 58,008, 1931, 53,400. Emigration, 1929, 61,658, 1930, 53,995, 1931, 50,099.

Brisbane, the capital, with an area of 385 square miles, had in 1931 an estimated population of 317,150. The estimated population of the chief towns at the same date was Rockhampton, 30,000; Townsville, 32,050; Maryborough, 12,000; Gympie, 9,592; Ipswich, 26,253; Toowoomba, 26,439; Charters Towers, 9,200; Bundaberg, 11,250; Cairns, 10,500; Warwick, 7,500; Mackay, 9,230; Southport, 5,800.

Religion.

There is no State Church. Previous to 1861 valuable grants of land had been made to the principal religious denominations, which they still retain. The following were the numbers in 1921 — Church of England, 309,788; Church of Rome, 172,662; Presbyterian, 91,610; Methodist, 77,566; Lutheran, 17,891; Baptist, 14,735; other Christian sects, 44,132; Hebrew, 1,003; other non Christians, 3,264; no religion, 3,926; unspecified, &c., 19,397.

Education.

Primary secular education is free and compulsory. According to the marriage statistics, 99.92 per cent. of persons married during 1931 were able to read and write. The Public Expenditure on account of education, science and art for the year 1931 was 1,493,525*l*. During the year 1931 there were 1,730 State schools (including 13 high schools and 106 provisional schools, also 19 'Rural Schools,' 5 Intermediate, and 6 'Special' schools) in operation, with 4,299 teachers, and an average daily attendance of 116,097 pupils. Secondary education is provided for by 10 grammar schools, 6 for boys and 4 for girls, with, in 1930, 114 teachers and an average attendance of 2,222 pupils; 13 'High Schools' with (1931) 112 teachers and 2,094

scholars. There were besides (1931) 194 private schools, with 1,180 teachers, and an average daily attendance of 25,138 pupils. The Government grants annually a considerable number of scholarships (2,552 in 1931-32), tenable for two years, to the various secondary schools. There were 15 technical schools in 1930 with 12,422 enrolled students. The Queensland University (established in 1911) in Brisbane had, at the end of 1930, 14 professors, 21 full-time lecturers, and 23 other members of staff, with 778 students on the roll.

Justice and Crime.

Justice is administered by Supreme Courts, Magistrates' Courts, and Courts of Petty Sessions. In these last Justices of the Peace sit, presided over in the more important centres by Police magistrates. The Supreme Court consists of a Chief Justice and six puisne judges. The total number of persons convicted of serious offences by the Superior Courts in 1930-31 was 198, and the summary convictions at petty sessions in the same year numbered 22,081 (including cases of bail estreated). Including penal establishments, there were, at the end of 1931, 7 prisons, with 335 male and 6 female prisoners. The total police force, including native troopers, averages about 1,304 men.

Pauperism, Pensions, etc

Charitable institutions and hospitals are maintained by public subscription, supplemented by State endowment, benevolent asylums, an institution for the blind, deaf, and dumb, refugees and homes are also maintained by the Government or receive State assistance. Old Age and Invalid Pensions are payable by the Commonwealth. The number of Old Age Pensioners in the State at June 30, 1932, was 23,736, and of Invalid Pensioners, 10,237. The number of War Pensioners at the same date was 28,830 (including dependants). Maternity allowance was paid to 13,240 mothers during 1931-32.

Finance.

The following table shows the net revenue and expenditure of Queensland during five years ending June 30, 1933 —

	1928-29	1929-30	1930-31	1931-32	1932-33

This includes lands leased from the Crown for agricultural and pastoral purposes, as Runs and Grazing Farms, etc., the lessees' interest in which has been capitalised for assessment purposes at 23,027,764*l*, but is exclusive of unoccupied Crown lands the property of local bodies, reserves for public purposes, and lands upon which are erected buildings for public worship.

The gross public debt of the State amounted, on June 30, 1932, to 111,911,785*l*.

Defence.

For Defence, see under *Commonwealth of Australia*.

Production and Industry.

Of the total area of the State, 18,947,974 acres (1931) have been alienated in process of alienation, under deferred payment system, are 7,765,825, leaving 402,406,201 acres still the property of the Crown, or about 93.77 per cent of the total area. The receipts from the sale of land up to the end of 1931 amounted to 11,702,425*l*.

A large proportion of the area is leased in squatting runs for pastoral purposes, amounting to 222,415,280 acres in 1931, besides 75,811,100 acres in grazing selections, and 11,271,120 acres under occupation licence Perpetual Leases, 3,578,884 acres; Prickly Pear Leases, 12,286,120. The live-stock in 1931 numbered 469,474 horses, 5,550,399 cattle, 22,324,278 sheep, and 222,686 pigs. The total area under cultivation in 1931 was 1,401,932 acres, and of this 1,216,402 acres were under crops, and 185,530 acres lying fallow, idle, etc., also 718,700 acres laid down with permanent artificial pasture. In addition, 10,140 acres were cleared and prepared for ploughing. The wool production, expressed as greasy, was in 1927-28, 126,429,988 lbs., valued at 10,635,919*l*., 1928-29, 138,988,930 lbs., valued at 9,948,600*l*., 1929-30, 161,087,873 lbs., valued at 7,779,202*l*., 1930-31, 182,061,407 lbs., valued at 7,479,689*l*.

A considerable area consists of natural forest, eucalyptus, pine and cedar being the timbers mostly in demand, although a considerable quantity of more ornamental woods are utilised by cabinet makers. The amount of wood cut in the various saw mills in 1930-31 was (in superficial feet)—pine, 28,891,922, cedar, 177,421, hardwood, 22,186,383, other, mostly cabinet timber, 7,608,712; number of railway sleepers, 413,125; total value, 1,189,600*l*. This value is inclusive of planing work valued at 137,998*l*., but not of 1,456,518 super feet of Oregon pine (value 29,222*l*) sawn from imported flitches. The quantity actually cut for all purposes is nearly double these quantities. The plywood industry is important, 12,942,476 sq. ft. of plywood were produced, the value being set down at 87,808*l*. Forest reservations total 5,328,152 acres (1931), areas for National Parks 161,251 acres.

THURSDAY ISLAND (longitude 142°, latitude 11°), with an area of 900 acres, is the smallest of the Prince of Wales group of Islands. It is situated in Torres Straits, about 30 miles to the north-west of Cape York, on the northernmost point of the Queensland coast, and is some 1,430 miles by sea from Brisbane, the capital city. The island was constituted a municipality in 1912, and is part of the State of Queensland. The town of Port Kennedy is situated on the south side of the island, and is the centre of local government and the residential area for Commonwealth and State officials.

Thursday Island is the headquarters of the pearl shell, bêche de mer and other fisheries of the Torres Straits, and is in regular and frequent communication by steamer with the other Australian States. The picturesque Albany Passage is passed through on the way from Cooktown to Thursday Island.

The climate during the south-east monsoon period from March to October is ideal, but during the north east monsoon period from November to March it is rather humid.

The population is a mixed one and numbers under 2,000.

SOUTH AUSTRALIA.

Constitution and Government

South Australia was formed into a British Province by Letters Patent of February, 1836, and a partially elective Legislative Council was established in 1851. The present Constitution bears date October 24, 1856. It vests the legislative power in a Parliament elected by the people. The Parliament consists of a Legislative Council and a House of Assembly. The former is composed of twenty members. Every three years half the members retire, and their places are supplied by new members elected from each of the five districts into which the State is divided for this purpose. The executive has no power to dissolve this body. The qualifications of an elector to the Legislative Council are, to be twenty-one years of age, a natural born or naturalised subject of His Majesty, and have been on the electoral roll six months, besides having a freehold of 50*l* value, or a leasehold of 20*l* annual value, or occupying a dwelling-house the rent of which is not less than 17*l* per annum, or a registered proprietor of a Crown lease with improvements to the value of at least 50*l*, the property of the elector, head teacher of a college or school residing on premises; postmaster or postmistress residing in the building, railway stationmaster resident on premises, member of police force in charge of a station, officiating minister of religion. By the Constitution Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the General Election of April 25, 1896. There were 133,409 registered electors in 1931. The qualification for a member of Council is merely that he be thirty years of age, a natural born or naturalised subject, and a resident in the State for three years. Each member of the Council and also of the House of Assembly receives 400*l* per annum and a free pass over Government railways. The salary of members was increased from 300*l* per annum on December 1, 1921, but reduced by 5 per cent. for one year from December 1, 1930, and by 10 per cent. for one year from December 1, 1931.

The House of Assembly consists of 46 members elected for 3 years, representing 19 electoral districts. The qualifications for an elector are that of having been on the electoral roll for 6 months, and of having arrived at 21 years of age, and the qualifications for a member are the same. There were 329,396 registered electors in 1931. Judges and ministers of religion are ineligible for election as members. The election of members of both houses takes place by ballot.

The House of Assembly, elected on April 5, 1930, consists of the following parties: Labour, 30; Liberals, 13, Country Party, 2, Independent, 1.

The executive is vested in a Governor appointed by the Crown and an Executive Council, consisting of 6 responsible Ministers and the Chief Justice of the Supreme Court

Governor of South Australia—Brigadier-General the Hon Sir Alexander G A Hore Ruthven, V C, K O M G, C.B., D S.O., May, 1928 (Salary, 5,000l per annum)

The Chief Justice (Hon Sir George J R Murray, K C.M.G., 2,000l), being also Lieutenant-Governor, acts during the absence of the Governor

The departments of the Public Service are controlled by the following Ministers (appointed February 13, 1933) —

Premier, Treasurer, and Minister of Education—Hon. R S Richards, M P.

Chief Secretary, Minister of Agriculture, and Commissioner of Forest Lands—Hon. S R Whitford, M L C

Commissioner of Public Works, and Minister of Industry—Hon. J McInnes, M P

Minister of Local Government, Minister of Immigration, Minister of Repatriation, and Minister of Irrigation.—Hon. J Staniford, M L C

The provision for the payment of Ministers was increased from 5,000l to 7,750l to date from December 1, 1921, but reduced by 15 per cent for one year from December 1, 1930, and by 20 per cent for one year from December 1, 1931. They are jointly and individually responsible to the Legislature for all their official acts, as in the United Kingdom

Agent-General for South Australia in London—Hon. L L Hill (appointed February 9, 1933)

Area

The total area of South Australia is 380,070 square miles. The settled part of the State is divided into counties, hundreds, municipalities, and district councils, the last being the most general, as they cover most of the settled districts. There are 48 counties proclaimed, covering 54,195,200 acres. This area covers the settled portion of the State, 45,020,347 acres being in occupation. Outside this area there are three extensive pastoral districts—the western, northern, and north-eastern, covering 189,049,600 acres, 88,806,660 being under pastoral leases, with a population of less than 5,000. There are 39 municipalities and 157 district councils

WESTERN AUSTRALIA

Constitution and Government

In 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain (afterwards Sir Charles) Fremantle, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle and was appointed Lieutenant Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the State was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on March 31, 1886.

In 1870 partially representative government was instituted, and in 1890 the administration was vested in the Governor, a Legislative Council, and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the Colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, as set forth in a proclamation dated July 18, of that year, the Colonial Parliament passed an Act (57 Vict. No. 14) amending the constitution.

By the Constitution Acts Amendment Act, 1899, further amended by the Constitution Acts Amendment Act, 1911, it is provided that the Legislative Council shall consist of 30 members representing 10 electoral provinces and holding their seats for six years. Members must be 30 years of age, resident in the State for two years, and either be natural-born British subjects or naturalized for 5 years and resident in the State for 5 years. Every elector must have resided in the State for 6 months, and must possess within the province freehold estate of the clear value of £50, or be a householder occupying a dwelling house of the clear annual value of £17, or holder of a lease of the value of £17 per annum, or the holder of a lease or licence from the Crown of the annual rental of £10, or have his name on the electoral list of a Municipality or Roads Board in respect of property in the province of the annual rateable value of £17. The Legislative Assembly consists of 50 members, each representing one electorate, and elected for 3 years. Members must be 21 years of age, be either natural-born subjects of the Crown and have resided in Western Australia for twelve months, or naturalized for 5 years and have resided therein for 2 years. Electors must

be 21 years of age, natural-born or naturalized subjects of the Crown, and must have resided in the State for 6 months, and must be resident in the district for at least one month when making their claims. Members of and electors for both Houses may be of either sex. Enrolment for the Legislative Assembly is compulsory. No person can be registered as a voter in more than one district or more than once in each Province for which he holds a sufficient qualification. Members of the Legislature are paid 600*l* a year, and travel free on all Government railways. The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the Legislature of the State.

There is a movement for West Australian secession from the Commonwealth, and a Secession Referendum Bill passed its second reading on December 3, 1931.

Education

Of the total white population of 15 years and upwards in 1921, 3.97 per cent were stated to be unable to read. Primary education is compulsory.

There were in the State in the 2 years ending June 31, 1930, 861 public schools, with 54,354 pupils, 1931, 877 schools, with 56,199 pupils. Private schools, 1930, 122 with 11,828 pupils, 1931, 128 with 11,534 pupils.

Education is free throughout from the kindergarten to the University and comprises ample provision also for secondary education, technical schools, continuation classes, scholarships, etc. During the financial year ended June 30, 1932, the total sum spent on education and schools, from consolidated revenue, exclusive of a grant of 25,121½ to the University of Western Australia, was 549,116½.

Justice and Crime.

The following table gives the number of apprehensions and convictions for five years —

	1927	1928	1929	1930	1931
Apprehended or summoned	13,345	15,499	16,972	15,724	14,030
Summary convictions	12,114	14,107	15,565	14,358	13,441
Convictions in superior courts	79	64	88	112	86

The total number of persons committed to prison in the year ended June 30, 1932, was 1,788, the number of commitments totalled 3,185—viz: adult males, 2,967, adult females, 218

All the above figures are exclusive of aboriginal crime

Pauperism and Old Age Pensions.

There are two charitable institutions, one situated at Claremont, and one at Fremantle, both supported by public funds, with 669 inmates on June 30, 1932. Seventeen Government hospitals, a Government sanatorium for consumptive patients, 4 hospitals for the insane, and 2 depôts for diseased natives at Port Hedland and Derby and a Leper Lazarette at Cossack, are maintained by public funds, whilst 3 public and 66 other assisted hospitals exist, in addition to numerous private hospitals situated in Perth and other centres of population. Ten Protestant and 5 Roman Catholic orphanage industrial schools are supported partly by private subscriptions and partly out of public money. There are 11 native and half-caste institutions, including 3 Government native settlements. There is also a Government receiving depôt for all State children who are afterwards sent to the various Institutions. On June 30, 1932, a total of 1,797 adults and 3,355 children, total, 5,152 persons, in the State received monetary assistance from the public funds for widows and others.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Western Australia at June 30, 1932, was: Old Age, 11,458, Invalid, 3,790, War Pensioners, 26,345

Finance.

The revenue and expenditure of Western Australia in six years, ended June 30, are given as follows —

Years ended June 30	Revenue	Expenditure	Years ended June 30	Revenue	Expenditure
1928	9,807,949	9,834,415	1931	8,686,756	10,107,295
1929	9,947,950	10,223,919	1932	8,035,316	9,598,212
1930	9,750,615	10,268,618	1933	8,417,577	9,181,243

Approximately two-fifths of the public income is derived from railways and tramways (£1,183,877) for the year ended June 30, 1932, and the rest mainly from various forms of taxation (£1,006,915), lands, timber, and mining (£382,623), business and trading concerns (£1,321,568), from Commonwealth Funds (£773,482), and from other sources (£1,456,801). Western Australia had a net public debt of 78,399,047*l.* on June 30,

1932, the annual charge for which was 3,507,379l. The amount of accrued sinking fund on June 30, 1932, was 1,308,906l.

Production and Industry.

Up to June 30, 1932, of the entire acreage of the State, 15,484,758 acres had been alienated, on that date 20,384,552 acres were in process of alienation the area alienated and in process of alienation thus amounting to 35,869,310 acres. At the same date there were in force leases comprising an area of 206,162,116 acres, of which 203,930,853 acres were pastoral, and 1,239,490 acres were timber, while 53,503 acres were under mining leases, and 31,356 acres were Miners' Homestead leases.

The chief crops for two recent years were as follows —

Crops	1930-31	1931-32	1930-31	1931-32
	Acres	Acres	Bushels	Bushels
Wheat	2,955,763	3,158,888	53,504,149	41,521,245
Oats	274,874	267,894	3,291,560	3,546,636
Barley	17,230	14,683	185,816	164,680
			Tons	Tons
Hay	398,411	381,447	401,505	452,843
Potatoes	6,306	4,892	20,318	20,253
Orchards	19,354	19,580	—	—
			Gallons Wine	Gallons Wine
Vines	4,900	5,189	807,788	805,438

The estimated acreages sown with wheat, oats and barley for the season 1932-33, for grain, hay and green food, are respectively 3,547,216, 563,237, and 17,844 acres.

The total forest area is 4,804,000 acres, the greater proportion of the State is carrying trees of some description providing timber for development, the number of superficial feet cut was (1930-31) 112,583,555 (including jarrah, 62,390,584 superficial feet).

The live-stock at the end of 1931 consisted of 156,489 horses, 826,532 cattle, 10,093,104 sheep, 120,521 pigs, 18,828 goats, 2,880 camels, and 9,716 mules and donkeys.

The wool clip in 1931 was 71,614,145 lb., the exports (expressed as greasy wool) 60,252,463 lb (excluding 6,371,596 lb on skins), valued at 1,905,207l.

Gold was first obtained in Western Australia in 1836. The sensational gold finds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian gold mining, which, in a few years time, placed this State at the head of all the Australian Colonies as regards gold output. The aggregate output to the end of 1931 was 38,814,388 fine oz., valued (nominal price) at 164,873,039l. There were in the State, in 1931, 410 leases of gold mines; men employed in the mines, 5,961, viz., 2,936 above and 3,025 underground; output of gold, 510,572 fine oz., value 2,168,771l.

The total value of the mineral output of the State in 1930 was 2,191,557l., and in 1931, 2,524,557l. Principal minerals in 1931 were coal, 484,400 tons, value 336,178l.; gold, 510,572 ozs., value 2,168,771l.; silver, 46,789 ozs., value 2,833l.

There were, on June 30, 1931, a total of 1,455 industrial establishments in the State, employing either machinery or at least four hands. The average number of persons employed by them over the year was 14,619, as against 19,643 in 1930. The gross output of these establishments for the year ended

June 30, 1931, was computed at 12,353 353*l*. The total estimated value of Western Australian production during 1930-31 was 23,971,694*l*, distributed as follows: agricultural, 8,834,128*l*; pastoral, 4,550,428*l*; dairy, poultry, and bee farming, 1,996,310*l*; forestry and fisheries, 1,511,088*l*; mining, 2,256,636*l*; manufacturing, 4,823,104*l*.

Commerce and Communications.

The external commerce of Western Australia, exclusive of inter-State trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

The total value of the imports and exports, including inter-State trade, in 5 years is as follows —

June	1927-28	1928-29	1929-30	1930-31	1931-32
	£	£	£	£	£
Imports	18,287,876	20,053,772	18,781,656	10,879,854	10,656,404
Exports	18,240,775	17,185,954	17,799,529	17,026,654	16,287,191

The most important of the exports for 1931-32 were wheat (5,323,740*l*) and flour (580,729*l*), wool (2,345,570*l*), gold specie (1,239 418*l*), gold, uncoined (3,673,297*l*), timber (358,361*l*), pearl shell (97,237*l*), pearls (6,657*l*), hides and skins (197,559*l*), meats, (173,867*l*), fresh fruit, (430,738*l*).

There were on the West Australian register on December 31, 1931, 59 steamers of 6,424 tons, and 322 sailing vessels of 9 254 tons, total, 381 vessels of 15,678 tons. Tonnage inwards and outwards, 1930-31, from and to ports outside the State, 7,373,586.

For the year ending June 30, 1932 the State had 4,235 miles of State Government railway, 277 miles of privately owned line and 450 miles of Commonwealth line, the latter being the western portion of the Trans-Australian line (Kalgoorlie Port Augusta), which links the State Railway System to those of the other States of the Commonwealth.

Money and Credit.

A branch mint was opened at Perth in 1899. The issues of Imperial coin to the end of June 1932 were: gold, 106,751,535*l*; silver, 15 600*l*; bronze, 2,000*l*. The issue in 1931-32 was: gold, 362,661*l*; silver and bronze, nil.

There are seven banks in Western Australia besides the Commonwealth Bank of Australia and Savings Bank. The State Savings Bank was taken over by the Commonwealth Bank on November 1, 1931. The total paid up capital of the cheque paying banks in the quarter ended June 30, 1932, was 38,867,350*l*, of which 4,000,000*l* is profit transferred to Capital Account by the Commonwealth Bank; deposits, 14,863,760*l*; total average liabilities, 16,678,049*l*; total assets, 25,591,112*l*.

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913. On June 30, 1932, 10,217,739*l* stood to the credit of 206,997 depositors.

TASMANIA

Constitution and Government

Abel Jans Tasman discovered Van Diemen's Land (Tasmania) on November 24, 1642. The island became a British settlement in 1803 as a dependency of New South Wales, in 1825 its connection with New South Wales was terminated, in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On January 1, 1901, Tasmania was federated with the other Australian States into the Commonwealth of Australia.

Parliament consists of a Legislative Council and a House of Assembly. The Council has 18 members, elected on a property qualification of 10*l* freehold or 30*l* a year leasehold. Certain professional men and all 'returned soldiers' are also electors. Members sit for 6 years, and retire in rotation. There is no power to dissolve the Council. The House of Assembly has 30 members, elected for 3 years by adults with six months' residence in the State. Members of both Houses are paid according to the district represented. The amounts vary from 370*l* (Buckingham) to 500*l* (Darwin) a year. Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method being the single transferable vote in 6 member constituencies. By-elections are superseded (from 1919) by a recount of the votes at the preceding General Election. At the election in 1931 for the House of Assembly 18 Nationalist, 11 Labour, and 1 Independent members were returned.

Lieutenant Governor — Sir Hubert Nicholls, K C M G

The Cabinet (appointed June, 1928) is composed as follows —

Premier and Treasurer — Hon J C McPhee

Chief Secretary and Minister of Railways and Mines — Hon. C E. W. James

Attorney General and Minister of Education — Hon H S Baker

Minister of Lands and Works — Hon Sir Walter Lee, K C M G

Minister of Agriculture — Hon A L Wardlaw, M L C

Ministers without Portfolio — Hon Edward Hobbs

A minister must have a seat in one of the two Houses.

Each of the ministers has a salary of 1250*l* per annum. The Premier has an additional 250*l* a year.

Members of Parliament and Ministers of the Crown suffered a reduction from July 25, 1931, of 25 per cent of their official salaries as given above.

Agent-General in London — (Acting) H. W. Ely, I S O

Official Secretary — H. W. Ely, I S O, Australia House, Strand, London, W C 2

Area and Population.

Area, with Macquarie (170 square miles), 26,215 square miles or about 16,778,000 acres, of which 15,571,500 acres form the area of Tasmania.

Proper, the rest constituting that of a number of small islands, in two main groups, the north-east and north-west.

The population has increased as follows (census returns about April 1) —

Year	Population	Increase per Ct. per Annum	Year	Population	Increase per Ct. per Annum
1861	89,977	2 44	1901	172,475	1 64
1871	99,328	1 13	1911	191,211	1 04
1881	115,705	1 38	1921	213,780	1 12
1891	146,667	2 36	1931	219,694	0 27

In 1921 there were 107,743 males and 106,037 females. The average density is 8.15 persons to a square mile. Of the total population in 1921, 5.96 per cent were natives of the British Isles, 0.44 per cent natives of other European countries, and 92.44 per cent natives of the Commonwealth and New Zealand. There were 371 Hindus, 234 Chinese, and 106 other coloured Asiatics. The pure aboriginal is extinct.

The births, deaths, and marriages for five years were as follows —

Education.

Primary education is free and secular, and compulsory between the ages of 7 and 14. Nine-tenths of the primary teaching is at State schools. Secondary education is about equally divided between the new State High Schools and the older endowed schools. The 5 State High Schools in 1930 had an average attendance of 1,510. There are 4 Technical Schools, and 3 junior Technical Schools, with an average attendance of 1,277.

The University of Tasmania, established 1890, had 383 students taking courses for degrees in 1930. University expenditure in 1930 (exclusive of capital expenditure) was about 19,784/. In 1930, 299 effective students were attending Tutorial Classes provided by the University at different centres for the Workers' Educational Association.

Justice and Crime.

There are a Supreme Court, courts of petty sessions and general sessions, the latter presided over by a stipendiary magistrate, assisted by justices of

the peace The Supreme Court is both a court of first instance and a Court of Appeal in all jurisdiction, civil and criminal The State is also divided into four districts with local civil courts presided over by Commissioners who are also police magistrates, and petty sessions have all the powers of two justices of the peace Petty offences and a limited number of civil claims are dealt with in petty sessions and in general sessions by justices of the peace. During the year 1930, 6,743 persons were summarily convicted, and 76 persons were committed for trial. The total police force on December 31, 1931, was 252 There was 1 gaol, with 115 male and 1 female inmates, at the end of June, 1931

Old Age Pensions

Old Age and Invalidity Pensions are paid by the Commonwealth Government The number of pensioners in Tasmania on June 30, 1931, was Old Age, 8,161, Invalid 2,607, War, 12,731

Revenue and Expenditure.

The revenue is derived chiefly from taxation (income, land, death duties and taxation of betting), and from the rental and sale of Crown lands The customs and excise duties are in the hands of the Commonwealth, which Government makes a special grant to Tasmania and contributes a fixed amount per annum towards interest on the State's Public Debt

THE NORTHERN TERRITORY OF AUSTRALIA.

Government.

The Northern Territory, after forming part of New South Wales, was annexed in 1863 to South Australia, and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any State, and under this provision an agreement was entered into on December 7, 1907, for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on January 1, 1911.

On the 1st March, 1927, the Northern Territory was divided for administrative purposes into two Territories, North Australia and Central Australia, the dividing line between the two Territories being the twentieth parallel of south latitude. Each Territory was under a Government Resident, with headquarters at Darwin and Stuart respectively. This division was effected under the authority of the Northern Australia Act, 1926, which also provided for the appointment of a North Australia Commission the powers of which extended to matters relating to the development of North Australia, and also to the administration of Crown Lands throughout North Australia and Central Australia. The Northern Australia Act, 1926 was repealed as from June 12, 1931, by the Northern Territory (Administration) Act, 1931, and the whole of the Northern Territory was placed under the control of an administrator.

The North Australia Commission was abolished and the administration of Crown Lands vested in a Land Board.

Administrator (Darwin) — Lieut. Col. R. H. Weddell, V.D.

Deputy Administrator (Stuart) — V. G. Carrington.

Area and Population.

The Northern Territory is bounded by the 26th parallel of south latitude, and the 129th and 138th degrees of east longitude. Its area is 523,620 square miles. The area alienated on December 31, 1931, amounted to 746 square miles absolutely, 226,562 square miles were held under leases and licences, and the remainder, 296,312 square miles, was unoccupied. The coast line is about 1,040 miles in length. The Territory possesses many

fine rivers and several good harbours, the principal being Port Darwin. The greater part of the interior consists of a table-land rising gradually from the coast to a height of about 1,700 feet. On this tableland there are large areas of excellent pasturage. The southern part of the territory is generally sandy with a small rainfall, but it can be watered by means of sub artesian bores. The climate is tropical, but varies considerably over the whole Territory. The proximity of the sea in the north keeps it fairly equable in the coastal region, but further south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The population, excluding aborigines, has varied as follows —

Year	Europeans	Others	Totals
1881	667	2,751	3,418
1901	782	3,112	3,894
1911 (Census)	1,418	1,892	3,310
1921 (Census)	2,459	1,408	3,867
1930 (30th June)	3,030	884	3,914
1931 (30th June)	3,416	777	4,193

Of the 1921 Census total 1,046 were females. Chinese in the Territory numbered 722.

The estimated number of aborigines (including half castes) on the 30th June, 1931, was 21,242.

Finance.

The revenue and expenditure for 6 years were as follows —

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1925-26	97,298	982,268	1928-29	125,830	454,259
1926-27	122,062	431,512	1929-30	121,885	482,562
1927-28	142,902	459,756	1930-31	108,777	440,624

The chief sources of revenue for the year ending June 30, 1931, were Customs and Excise, 11,060/ , Railways, 28,985/ ¹, North Australia Commission, 25,991/ , and Postal revenue, 11,039/ . Land and Income Tax. Territorial, 4,095/ , Federal, 3,422/ . The chief items of expenditure (excluding interest, loans, &c.) were Administrative Staff, 87,089/ , North Australia Commission, 49,605/ , and Railways, 55,606/ ¹. The public debt (outstanding indebtedness in respect of securities taken over from South Australia on account of Northern Territory and Central Australia Railways plus Loan Monies used for (a) redemption of such securities as have matured and (b) for development) on June 30, 1931, was 9,670,278/ .

Production and Industry.

The soils of the Territory differ greatly, but most products suitable to the tropical and semi-tropical zones can be grown successfully. At present, however, agriculture is insignificant. In most parts the natural grasses are extremely rich in nutriment, and provide food for cattle, horses, sheep, and other stock. The numbers of stock on December 31, 1930, were:—Cattle, 719,611; horses, 83,363; goats, 16,757; pigs, 327; sheep, 15,828; camels, 562; mules, 523; donkeys, 831.

The Territory is rich in mineral resources, though these are very little developed. The value of the minerals produced in the year ended June 30,

¹ The figures in respect of Railways are for North Australia Railways only.

1931, was as follows:—Gold bullion, 2,445*l.*, Tin ore, 2,331*l.*; Silverlead ore, 160*l.*, Tantalite ore, 450*l.*, Mica, 5,581*l.*, Wolfram, 384*l.*, Copper, 25*l.*; grand total, 11,326*l.*

Commerce.

The oversea imports and exports are given as follows —

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1925-26	34,168	85,902	1928-29	82,069	53,780

TERRITORIES OF THE AUSTRALIAN COMMONWEALTH TERRITORY OF PAPUA (BRITISH NEW GUINEA).

Papua is the south-eastern part of the island of New Guinea, with the islands of the d'Entrecasteaux and Louisiade groups and all islands between 8° and 12° S latitude, and 141° and 155° E longitude. Area 90,540 square miles, of which about 87,786 are on the mainland of New Guinea, and 2,754 on the islands above mentioned. On June 30, 1932, the population was as follows:—European, 1,144, Papuans (estimated), 275,000. (For the part of New Guinea lately possessed by Germany and now administered by Australia, see below.)

To prevent that portion of the island of New Guinea not claimed by Holland from passing into the hands of a foreign power, the Government of Queensland annexed it in 1883. This step was not sanctioned by the Imperial Government, but on November 6, 1884, a British Protectorate was proclaimed over the Southern portion of the Eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The Federal Government took over the control in 1901, the political transfer was completed by the *Papua Act* of the Federal Parliament in November, 1905, and on September 1, 1906, a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua. There is an executive council composed of 8 official members and 1 non-official member, and a legislative council composed of the executive councillors and 5 non-official members, 4 being nominated by the Lieutenant Governor and appointed by the Governor General of Australia, and the fifth being

nominated by the Lieutenant-Governor of Papua as representing the interests of the Christian Missions of the Territory

Lieut.-Governor and Judge—Sir J. H. P. Murray, K. C. M. G.
Government Secretary—Herbert William Champion

Tribes have in large areas settled down to peaceful habits. Five missionary bodies are at work, many hundreds of natives are being taught by these bodies. 191,748 acres of land have been leased, chiefly by planters, the principal cultures being coconuts (49,413 acres at December 31, 1931), rubber (10,320 acres), sisal hemp (150 acres). On December 31, 1931 there were 61,219 acres of plantations. A preferential tariff is granted by the Commonwealth on certain raw material from Papua, and a bonus for 10 years on other products imported into Australia. Freehold alienation is prohibited, but leases may be obtained at low rentals for long terms. Indigenous sago is plentiful in the western portion of the Territory, and there are considerable numbers of native owned coconut trees. A regulation, which is strictly enforced, requires that each native shall plant coconut trees or other economic trees or plants if his land is suitable, or the natives may, in lieu of paying a tax in money, establish communal plantations under the direction of European instructors.

The ports of entry are—Port Moresby, Samarai, Kulumadai, Woodlark Island and Daru.

There are 8 magisterial districts, each in charge of a resident magistrate. There are also 20 assistant resident magistrates, and 9 patrol officers. There is a Central Court at Port Moresby, but it holds sittings wherever and whenever necessary. For native government some simple regulations have been passed. There were (1932) 1,124 village policemen, armed constabulary, 250 (exclusive of Europeans who are officers of armed constabulary).

Throughout the Territory there are numerous schools belonging to the various Christian missions, the attendance of native children is compulsory if English is taught. There is a tax not exceeding 10s. per head on indentured native labourers, and not exceeding 20s. per head on other natives. After expenses of collection are paid the balance is devoted, first, to native education, and, secondly, to other purposes having for their object the direct benefit of the natives. The education is chiefly undertaken by the missions aided by grants from the taxation fund. 4,548*l.* was spent on education in 1931–32. The expenses of the plantation instructors to develop native agriculture are borne by the Education Fund, 1,433*l.* being expended in 1931–32.

A Government Anthropologist is supported from this fund with a view to assisting the Government to understand the native point of view. A Family Bonus is paid to native mothers of four or more children under 16 years of age at the rate of 5s. for four and 1s. for each child over the four. In 1931–32, 6,239*l.* was spent from the fund on medical work among the natives, besides 343*l.* on native hospital buildings.

1932	130,116	128,682	221,843	269,254	335,858

Revenue is mainly from customs duties. An annual subsidy is given by the Australian Government. The subsidy for 1932-33 has been reduced from 40,000*l* to 34,000*l*.

Gold, silver and osmiridium are the only minerals exported. There are 9 proclaimed mineral fields, seven of which are gold fields, and 2 copper. Gold is obtained in the Lounisade Islands, on the mainland, and on Woodlark Island. A large area near Port Moresby with promising copper deposits has been proclaimed a mineral field, and was being vigorously developed. A railway from the field to the coast was constructed and smelters erected. The whole field was abandoned in 1927 owing to the low price of copper, but the machinery remains in the hope of a rise in the price of copper sufficient to justify a renewal of operations. Indications of petroleum have been found over an area of 1,000 sq miles. Prospecting licences have been issued to a number of private companies. In 1931-32 the gold output was valued at 34,118*l*. The trade is principally with Queensland and New South Wales. The chief imports are food stuffs, tobacco, drapery and hardware, exports 1931-32, copra (10,011 tons, 100,404*l*), gold (8,574 ozs, 34,338*l*), rubber (806 tons, 49,262*l*), desiccated coconut (228 tons, 59,826*l*). Number of horses (1931), 423, cattle, 5,432, mules, 123.

A steamer trades between Sydney, Port Moresby and Samarai every 3 weeks, and small coastal vessels run at frequent intervals between the various inter territorial ports. Ocean going shipping entered and cleared 1931-32, British, 250,994 tons, foreign, 84,864 tons. There are wireless telegraph stations at Port Moresby and Samarai.

There are branches of the Bank of New South Wales at Port Moresby and Samarai. The currency and its legal tender are the same as in the Commonwealth of Australia.

NEW ZEALAND.

New Zealand was first discovered in 1642 by Tasman, and the coast was explored by Captain Cook in 1769, and in subsequent years. It became a resort for whalers and traders, chiefly from Australia. In 1840 the native chiefs ceded the sovereignty to the British Crown and the islands became a British Colony.

The aborigines, called Maoris, are a branch of the Polynesian race. They are divided into about twenty clans, analogous to those of the Scottish Highlands. Between 1845 and 1848, and again between 1860 and 1870, about half of these clans were in revolt against British rule, but peace was permanently established in 1871.

Government and Constitution.

By Order in Council, the designation of the Colony of New Zealand was changed to the Dominion of New Zealand, on and from September 26, 1907. The present form of government was established by Statute 15 & 16 Vict., cap. 72, passed in 1852. The Colony was divided into six provinces and later into nine. By an Act of the Colonial Legislature, 39 Vict., No. XXI, passed in 1875, the provinces and the provincial system of government were abolished, and the powers previously exercised by superintendents and provincial officers were exercised by the Governor (Governor General from June 1917) or by local boards. The legislative power is vested in the Governor General and a 'General Assembly' consisting of two Chambers—a Legislative Council and a House of Representatives. The Governor General has the power of assenting to or withholding consent from bills, or he may reserve them for His Majesty's pleasure. He summons, prorogues, and dissolves the Parliament. He can send drafts of bills to either House for consideration, but in case of appropriations of public money must first recommend the House of Representatives to make provision accordingly before any appropriations can become law. He can return bills for amendment to either House.

The Legislative Council consists of twenty-two members, who are paid at the rate of 255/ 3s per annum. Members hold their seats for seven years only, unless reappointed.

The House of Representatives consists of eighty members, including four Maoris, elected by the people for three years. They are paid at the rate of 364/ 10s per annum. Every man or woman registered as an elector is eligible as a member of the House of Representatives. For European representation every adult person (of either sex), other than aliens, if resident one year in the Dominion and three months in an electoral district, is required to be registered as an elector for such Electoral District. No person may be registered on more than one electoral roll. Every adult Maori resident in any of the four Maori electoral districts can vote, provided he (or she) be not registered on any European roll. Registration is not required in Native districts.

Governor-General and Commander in Chief—His Excellency Rt. Hon. Lord Bledisloe, G. O. M. G., K. B. E. (appointed December 1, 1929). Salary 5,000/., and 2,500/ allowances. (For the year 1932-33 subject to a voluntary reduction of 2,250/.)

The (Coalition of Reform and United Parties) Cabinet (Assumed office September 22, 1931) was composed (January, 1933) as follows:—

Prime Minister, Attorney-General, Minister of Railways and Minister of External Affairs.—Rt. Hon. G. W. Forbes, P.O.

Minister of Finance and Customs.—Rt. Hon. J. G. Coates, P.O.

Minister of Lands and Commissioner of State Forests.—Hon. E. A. Ransom.

Minister of Native Affairs and Cook Islands —Hon Sir Apirana Ngata, Kt
Minister of Health, Minister of Internal Affairs —Hon J A Young
Minister of Education, Minister of Industries and Commerce.—Hon R Masters, M L C
Minister of Defence and Justice, Minister of Marine —Hon J G Cobbe
Postmaster General, Minister of Telegraphs, Minister of Labour, and Minister of Unemployment —Hon A Hamillon
Minister of Agriculture and Mines —Hon C E Macmillan

Each Minister has a salary of 895*l* 1*s* (with the exception of the Prime Minister, who has 1,377*l*), with House Allowance of 153*l* if no Government residence is provided

High Commissioner —Sir T M Wilford, K C M G , K C (appointed January 1, 1930), 415 Strand, London, W C 2

LOCAL GOVERNMENT

For purposes of local government New Zealand is divided into counties, boroughs and town districts. The counties are subdivided into ridings.

Area and Population

There are two principal islands, the North and South Islands, besides Stewart Island, and small outlying islands, including (since 1901) the Cook and some other islands in the Pacific Ocean. The group is 1,000 miles long, and 180 miles across at the broadest part, coast line 8,000 miles. New Zealand is about 1,200 miles east of Australia. Area, excluding annexed islands, 103,722 square miles. North Island, 44,281 square miles, South Island 58,092, Stewart Island 670 square miles, Chatham Islands 372 square miles, outlying islands 307 square miles. Acreage 66,390,262 acres, exclusive of the Cook and other islands (179,200 acres), and up to March, 1932, 21,525,850 acres had been alienated, and 15,218,139 acres reserved and set apart by the State for special purposes. The area of Native lands at March 31, 1932, was 4,550,518 acres. The estimated population June 30, 1932, was 1,524,921, inclusive of Maoris, 69,893, but exclusive of residents of Cook and other annexed Islands, 15,307, of the Tokelau Islands, 1,048, and of Western Samoa (mandated territory), 46,271. Education

The University of New Zealand consists of the Otago University at Dunedin, with 56 professors and lecturers, the Canterbury University College at Christchurch, with 31 professors and lecturers, the Auckland University College, with 37 professors and lecturers, and the Victoria University College at Wellington, with 26 professors and lecturers. Students on registers of the four constituent colleges (1931), 4,869. The University colleges are all endowed with lands. The Canterbury Agricultural College and the Massey Agricultural College (at Palmerston North) are recognised schools of agriculture.

At the end of 1931 there were 46 incorporated or endowed secondary schools, with 655 (excluding part time) teachers and 16,000 pupils. There are also 82 District High Schools with 4,672 scholars in the secondary division. Two Junior High Schools with 272 pupils and 22 Technical High and Technical Day Schools with 7,397 pupils. Of private secondary schools there were 49 registered, with 4,245 pupils. Eleven secondary schools for Maoris had 503 pupils.

For primary schools there is an Education Department (which also exercises certain functions in regard to both university and secondary schools). There are 9 Local Education Boards. At the end of 1931 there were 2,524 public primary schools, 6,643 teachers (including 452 probationers), 223,105 scholars on the rolls, average attendance (1931), 201,789. Education is compulsory between the ages of 7 and 14. The instruction given at the public schools is secular only, and for the ordinary standard course entirely free.

There are 6 schools of mines in addition to the Otago University School of Mines, 4 normal schools, 15 child welfare institutions, a school for the deaf (at Sumner), an institute for the blind (at Auckland), a special school for mentally backward boys at Otekahe, Otago, and a similar school for girls at Richmond, Nelson. There were also, at the end of 1931, 305 registered primary private schools, with 26,726 pupils.

There were 189 native village schools, with 323 teachers and 7,499 scholars,

including 1,011 Europeans. Total net expenditure by the State on Native schools in 1931-32 was 93,745*l*. Total expenditure out of public funds in 1931-32 upon education of all kinds 3,409,877*l*

Justice and Crime

There are nine supreme court judges, and thirty one stipendiary magistrates. There are numerous magistrates' courts and justices of the peace.

In 1931 there were 42,092 summary convictions, and 1,624 sentences in supreme courts, including 1,119 cases sent up from lower courts for sentence. At the end of 1931 the gaols and Borstal institutions contained 1,614 prisoners undergoing sentence.

Pauperism, Pensions, etc.

The Dominion is divided into districts, with elective boards for the administration of the public hospitals and charitable relief. The Government subsidises bequests and voluntary contributions at the rate of 20*s* in the pound, and contributions by local authorities, according to a sliding scale, ranging from 14*s* in the pound to 26*s* in the pound and averaging throughout the Dominion 20*s* in the pound. The apportionments are made according to the value of rateable property within the district. The total expenditure on Charitable Aid during the year ended March 31, 1931, was 311,847*l*, and on hospital maintenance, 1,262,798*l*. During 1931 the benevolent and orphan asylums accommodated 14,036 inmates, and 4,633 children were wholly or partly maintained by the State in various institutions in 1930.

An Act, passed in 1898 and amended on several occasions since, provided for old-age pensions. Every person, not an alien or an Asiatic, who fulfils certain conditions is entitled to a pension of 40*l* 19*s* a year, reducible by 1*l* for every 1*l*. by which income exceeds 39*l*. The joint annual income of a married couple in receipt of pensions must not exceed 121*l* (including pensions). Pensions are also granted to widows, to miners incapacitated as a result of miners' phthisis, to veterans of the Maori war, to dependents of those who died in the influenza epidemic of 1918, and to certain classes of blind persons. In addition are those pensions granted in respect of the recent war.

There is a system of family allowances at the rate of 2*s* per week for each child after the second, in cases where income excluding family allowance is under 3*l* 5*s* per week.

² The total shown for interest covers interest on the Public Debt Redemption Fund and on other public moneys together with interest on railway capital liability (since 1925-26) and on post and telegraph capital liability (since 1925-29). From the years stated, railway and post and telegraph revenue and expenditure have been removed from the operations of the consolidated Fund, these two undertakings, however, paying interest on their capital liability. In 1931-32 profits of the Post and Telegraph Department were included in the Consolidated Fund. Railway revenue in 1931-32 was 6,227,488¹, and post and telegraph revenue, 3,715,229².

³ Excludes unemployment taxation

Budget estimates for fiscal year 1932-33 are, Revenue, 21,630,000¹, Expenditure, 22,507,000²

The number of income tax payers in 1931-32 was 80,245, and land-tax payers, numbered 51,391 in 1929-30

The total expenditure out of the Public Works Fund from 1870 to March 31, 1932, was 120,940,314¹, including charges and expenses for raising loans

The average taxation per head of the population in 1931-32 was 11¹ 9s 6d

The gross public debt at March 31, 1932, was 281,942,800¹, of which indebtedness on account of the war of 1914-19 represented 66,876,165¹. Most of the rest of the debt represents reproductive expenditure or investments.

Defence.

The New Zealand military forces are under a general officer commanding, who has at his disposal a general headquarters divided into the general staff and administrative services and departments. He is responsible to the Ministry of Defence. New Zealand is organised into 3 military commands, the Northern, Central, and Southern, each command being under an officer commanding.

The Air Force consists of 20 machines. The personnel is 124, including 54 permanent officers and men.

The system of compulsory Territorial and Cadet training is now in abeyance. It has been replaced by a voluntary Territorial system upon a lesser scale. Strength of Territorial Force at March 31, 1932, 1,020 officers (including 405 on Supernumerary List) and 6,613, other ranks.

Civil Aviation.—There are 21 aerodromes, 258 licensed pilots and 64 aircraft.

The Naval Defence Act, 1913, provided for the establishment of a New

Zealand Naval Force, to be raised and maintained by voluntary enlistment only, enlistment being for a prescribed period not more than twelve years. In time of war the Naval Force (including vessels acquired for defence purposes) is at the disposal of the British Government. The Naval force consists of the cruisers *Dunedin* and *Diomedé*, loaned free of charge (other than maintenance) by the Imperial Government, and the sloops *Laburnum* and *Veronica*. In addition there are the harbour training ship *Philomet* (ex cruiser of 2,500 tons), the oil tank vessel *Nucula*, the trawler *Wakakura* and the tug *Toia*. The establishment of a New Zealand Royal Naval Reserve is also provided for under the Act. Expenditure on naval defence in 1931-32 amounted to 344,674*l*, not including interest on loan moneys. In addition 100,000*l* was paid as the fifth of eight annual instalments towards the cost of the Singapore Naval Base.

Production and Industry.

I AGRICULTURE.

Two-thirds of the surface of New Zealand is suitable for agriculture and grazing. About 12,500,000 acres are still under forest. The total area under cultivation (including 17,254,280 acres in sown grasses and 108,415 in fallow) in 1931 was 19,006,878 acres. The area of Crown lands (other than reserves) leased under various tenures at March 31, 1932, was 17,777,547 acres, and 2,121,086 acres were available for future disposal.

The largest freehold estates are held in the South Island. The extent of occupied holdings of or over one acre in 1930 (exclusive of holdings within borough boundaries) was as follows:—

Sizes of Holdings (Acres)	Number of Holdings	Acres	Sizes of Holdings (Acres)	Number of Holdings	Acres

FIJI.

Constitution and Government

The Fiji Islands were discovered by Tasman in 1643 and visited by Captain Cook in 1769. The sovereignty was ceded to Great Britain on October 10, 1874

Governor of Fiji and High Commissioner for the Western Pacific—Sir Murchison Fletcher, K O M G., C B E (appointed, 1929) Salary 3,000l as Governor of Fiji, and 1,200l as High Commissioner for the Western Pacific.

The Constitution is regulated by Letters Patent of February 9, 1929. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney General, the Colonial Treasurer, the Secretary for Indian Affairs, the Secretary for Native Affairs, and two unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and not more than thirteen nominated members, six European elected members, three native members and three Indian elected members.

The natives retain a large share of self government. Their system of village and district councils has been recognised and improved, and supplemented by a triennial meeting of the high chiefs and representatives from each province, presided over by the Governor. There is a Native Regulation Board, constituted under the 'Native Affairs Ordinance, 1876,' which has power to make regulations with regard to the marriage and divorce of natives, succession to property, the jurisdiction and powers of native courts and magistrates in matters of civil and criminal procedure, and also in regard to other matters having reference to the good government and well being of the native population. All such regulations have to receive the sanction of the Legislative Council.

There is a constabulary force consisting of Fijians and Indians, with European officers, and a Defence Force (Europeans, half castes, and Fijians). Strength of constabulary force in 1931, 218.

Agent and Consul — J S Neill

The High Commissioner of the Western Pacific, assisted by deputies, has jurisdiction, in accordance with an Order in Council of 1893, for the purpose of carrying out the provisions of the Pacific Islanders' Protection Acts of 1872 and 1875, and to settle disputes between British subjects living in these islands. The jurisdiction of the High Commissioner extends over all the Western Pacific not within the limits of Fiji, Queensland, or New South Wales, or the jurisdiction of any civilised Power, and includes the Southern Solomon Islands, and the various small groups in Melanesia.

In the sections devoted to New South Wales and New Zealand mention is made of various annexed Pacific Islands. The following summary (omitting islands described elsewhere) gives the names and positions of islands which are unattached —

Ducie Island, 24° 40' S lat, 124° 48' W long

Pitcairn Island, 25° 5' S, 130° 5' W, area 2 sq m, pop in 1914, 140 (35 adult males, 39 adult females, 66 children). The affairs of the island are conducted by a Council of 7 members, with a President, who acts also as Chief Magistrate, and a Vice President, who is also Government Secretary, subject to the control of the High Commissioner for the Western Pacific. In religion the islanders (descendants of the mutineers of the *Bounty*) are 'Seventh Day Adventists'. The products of the island are sweet potatoes, beans, sugar cane, yams, taro, melons, pumpkins, oranges, bananas, pineapples, and arrowroot, which is prepared in limited quantities with antiquated appliances. Excellent coffee also grows. The island is well stocked with goats and poultry.

Phoenix Group, between 2° 30' and 4° 30' S lat, and 171° and 174° 30' W long. Eight islands: Mary, Enderbury, Phoenix, Birney, Gardner, McKean, Hull, Sydney, area of group, 16 sq m, pop 59.

Gilbert and Ellice Islands Colony. The islands in this group were proclaimed as Protectorates in 1892 and annexed (at the request of the native Governments) as Gilbert and Ellice Islands Colony, on November 10, 1915. The Colony includes several groups of islands: (1) **The Ellice Islands**, between 5° 30' and 11° 20' S lat, and 176° and 180° E long (population June 30, 1930, 3,969). The principal islands are Funafuti, Nukufetau, Vaitupu, Nui (or Netherland), Niutao (or Lynx or Speiden), Nanumaga (or Hudson), Nanumea (or St Augustine), Nukulaeae (or Mitchell), Nukunono, area of group, 14 sq m. (2) **Fanning Island**, 3° 50' N, 159° W, area 15 sq m, **Washington Island**, 4° 40' N, 160° 20' W, area 6 sq m, population of the two islands, June 30, 1927, 517, including 87

Europeans, and **Ocean Island** (population June 30, 1927, 2,467, including 113 Europeans and 456 Asiatics). The last named island is the Colony headquarters. It is situated $0^{\circ} 52' S$, and $169^{\circ} 35' E$, is six miles in circumference, and was annexed by Great Britain in 1901. The island is exceedingly rich in high-grade phosphate, which is worked by the British Phosphate Commission, who purchased the rights of the Pacific Phosphate Company in 1921. A wireless station on the island maintains telegraphic communication via Fiji and Australia. (3) **Christmas Island**, situated roughly $2^{\circ} N$ lat, and $157^{\circ} W$ long, discovered by Cook in 1777, annexed by Great Britain in 1888, and included in the Colony in November, 1919, is the largest atoll in the Pacific, being over 100 miles in circumference. It is leased to the Central Pacific Coconut Plantations, Ltd, for a term of 87 years from January 1, 1914. Population 1927, European, 5, natives, 18. The **Gilbert Islands**, on the equator (population 1930, 24,800, including 92 Europeans). The principal islands are Butaritari, Makin, Tarawa, Abaiang, Marakei, Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nukunau, Onotoa, Tamana, and Arorae. Area, 166 sq m, population at 1921 census 264 Europeans, 29,285 Pacific Island natives, and 348 Asiatics, total, 29,897 (including 14,205 females). The Administration maintains two native boys' schools—the King George V School at Tarawa, Gilbert Islands, with 90 pupils, and a school at Vaitupu, Ellice Islands, with 60 pupils. A school for native boys on Ocean Island has been maintained since 1920 out of Banaban phosphate royalties. Village schools for native boys and girls throughout the Gilbert and Ellice Groups are kept up by the London Missionary Society and the Society of the Sacred Heart. Revenue of the Colony for the year ended June 30, 1930, 67,106*l*, of which the principal items were Customs, 28,717*l*, native taxes, 7,661*l*, licences, &c, 14,561*l*, fees of court, &c, 4,531*l*, royalty on phosphates, 4,989*l*, interest on investments, 3,614*l*, post office and telegraphs, 807*l*, miscellaneous, 1,288*l*, Imperial grant, 938*l*. The expenditure for the same period amounted to 59,324*l*. Principal crops pandanus fruit and coconuts. The trade in 1929–30 amounted to 148,779*l* for imports (machinery, 27,620*l*, provisions, 28,786*l*), and 218,828*l* for exports (phosphate, 207,863 tons, 259,829*l*, copra, 5,465 tons, 83,691*l*). The Colony is administered by the High Commissioner through a Resident Commissioner, whose headquarters are at Ocean Island.

Resident Commissioner—A F Grumble

British Solomon Islands, about $8^{\circ} S$ and $160^{\circ} W$, are Guadalcanar, Malaita, Ysabel, San Cristoval, New Georgia, Choiseul, Shortland, Mono (or Treasury), Vella Lavella, Ronongo, Gizo, Rendova, Russell, Florida, Rennell, and numerous small islands (the Lord Howe Group or Ontong Java, the Santa Cruz Islands, Tucopia and Mitre Islands, and the Duff, or Wilson Group, are also included in the Solomon Islands Protectorate). The total area of land and sea included in the B S I. Protectorate boundaries is approximately 375,000 square nautical miles. Population (census 1931), Europeans, 497, Aliens, 193, native population, 93,415. They are under British Protection. Education is entirely in the hands of missions. Revenue, for the year ended March 31, 1932, 56,744*l*, expenditure, 55,323*l*. Coconuts, rubber, sweet potatoes, pine-apples, bananas are grown. The value of imports in 1931–32 was 157,491*l*, and of exports, 176,554*l* (mainly copra, 21,209 tons, 137,843*l*, trocas shell, 462 tons, 19,103*l*, ivory nuts, 1,108 tons, 8,818*l*, timber logs, 1,098,340 square ft, 4,943*l*). Vessels entered, 1930–31, 60,463 tons (42,739 British), cleared, 62,387 tons (British 44,663 tons). A paper currency was issued in 1917–18. Little gold is in circulation, and

only 4,600*l* Protectorate paper money The chief medium of exchange is money orders There is a Resident Commissioner, whose headquarters are at Tulagi, a small island off the south coast of Florida. A nominated Advisory Council assists in the administration (For part of the Solomon Islands lately owned by Germany and now administered by Australia, see section on late German New Guinea below)

Resident Commissioner — F N Ashley

Starbuck Island, 5° 30' S lat, 155° W long, area 1 sq m, uninhabited
Malden Island, 4° S lat, 155° W long, area 35 sq m, contains a considerable deposit of guano
Jarvis Island, on the equator, 159° W, area 1½ sq m, pop 30
Palmyra, 6° N, 162° 30' W, area 1½ sq m
Baker Islands, on the equator

These islands are mostly of coral formation, most of them grow coconut trees, and some of them are valuable for their guano

The **New Hebrides Group** lies roughly 500 miles west of Fiji and 250 miles NE of New Caledonia Estimated area 5,700 square miles The group is under joint administration of English and French officials, as provided for by Anglo-French Convention of February 1906, ratified October 1906, and a Protocol signed at London on August 6, 1914, and ratified on March 18, 1922 The interests of British, French, and natives, respectively, are guaranteed, the conditions of land-holding in the islands fixed, and the regulation of the recruitment of native labour provided for. Within the islands Great Britain is represented by a High Commissioner, who delegates his powers to a Resident Commissioner stationed in the group

The larger islands of the group are Espiritu Santo, Malekula, Epi, Ambrym, Efate or Sandwich, Erromanga, Tanna and Aneityúm There are three active volcanoes, on Tanna, Ambrym and Lopevi, respectively Earthquake shocks are of common occurrence The native population of the group is about 50,000 On Malekula, Santo and Pentecost cannibalism is still practised White population 1930 British 219, French 931 Foreigners, including Asiatics, who have opted for British regime 51, and for French regime 5,030 With the latter are included 40 Javanese, 500 Chinese, and 5,396 Tonkinese coolies under indenture to the French There are numerous Presbyterian and Catholic mission native schools, one French Government school and two Catholic mission schools for whites Public revenue Condominium service, 1930 20,152*l*, public expenditure British service, 1929-30 (to March 31), 9,506*l*, Condominium service, 1930, 28,140*l*

Area under cultivation: British, 3,000 acres, French, 40,000 acres British acreage under cultivation is composed principally of coconuts and a few hundred acres under cotton French acreage under cultivation includes coconuts, about 20,000 acres, cocoa, 8,000 acres, cotton, 5,500 acres, coffee, 2,000 acres

Bananas, sugarcane, oranges and all tropical fruits grow well. A small saw mill has been established on Efate Kauri pine is found on Aneityúm, but is no longer worked There are several British and French trading companies operating in the group Settlers and speculating companies have acquired large areas of land within the islands, the ownership of which is generally disputed, and which in consequence remains undeveloped pending adjudication by the mixed tribunal Imports, Condominium, 1930 value in French currency, 19,535,138 francs, value in British currency, 157,541*l* Exports, Condominium value in French currency, 31,064,480 francs, value in British currency, 250,520*l* The trade is mostly with Australia, New Caledonia and France. Principal imports are:

Provisions and foodstuffs, clothing, metal work and furniture; exports Copra (11,888 tons in 1930, value 130,573*l*), coffee (125 tons, 7,892*l*), cocoa (2,265 tons, 73,444*l*), cotton, (480 tons, 26,880*l*), maize (155 tons, 3,670*l*) Import of arms, ammunition, wines and spirits is prohibited except under special permit There is frequent communication between New Caledonia and Australia, a six-weekly mail service being maintained by the Burns, Philip Line and a five weekly service by Messageries Maritimes, while a two monthly service is also maintained by the last named company with France and the New Hebrides via Tahiti and Panama The shipping entered and cleared from the Port of Vila during 1930 was *Entered* —British, 12,300 tons (18 vessels), French, 104,000 tons (35 vessels), other, 22,900 tons (11 vessels) *Cleared* —British, 13,000 tons (18 vessels), French, 104,200 tons (37 vessels), other, 22,900 tons (11 vessels).

MANDATED TERRITORIES IN THE PACIFIC: NEW GUINEA, WESTERN SAMOA, AND NAURU ISLAND

THE former German possessions in the Western Pacific included: Kaiser Wilhelm's Land, Bismarck Archipelago, the German Solomon Islands, Nauru, the Caroline Islands, the Marshall Islands, and the Marianne or Ladrone Islands (excepting the Island of Guam) The islands north of the Equator, namely, the Marshall, Caroline, Pelew, and Ladrone (Marianne) Islands, are now administered by Japan as mandatory Those south of the Equator, namely, the Bismarck Archipelago, those of the Solomon Islands

formerly owned by Germany, and (late) German New Guinea (Kaiser Wilhelm's Land), are assigned to Australia, German Samoa to New Zealand, and Nauru, a small islet just south of the Equator, to the British Empire

THE MANDATED TERRITORY OF NEW GUINEA

The Territory has an area of 93,000 square miles, extending from the Equator as far as 8° south latitude, and from 141° east longitude as far as 160° east longitude. An Australian force occupied these Possessions on September 12, 1914. The mandate from the League of Nations (see p. xxvii, *THE STATESMAN'S YEAR BOOK*, 1929) is dated December 17, 1920, and on May 9, 1921, the Australian Government established its civil administration in the Territory. The laws of the Commonwealth, subject to local modifications as necessary, may be applied to the mandated territories. The military training of the natives, except for local police purposes, is prohibited, and no naval or military base or any fortifications may be established.

The estimated non-indigenous population at June 30, 1932, was 4,362, of which the British numbered 2,139, Chinese 1,214, Dutch 209, German 399, Japanese 33, and United States of America 152. The number of persons engaged in agricultural pursuits was 506, and in mining pursuits 200 (approximately). The counted native population was 390,000.

Inter island trade is carried on by small steamships and motor schooners. There is a three weekly service from Australia to Rabaul, and a monthly service from Yokohama, Hong Kong and Manila.

The total area under cultivation in the Mandated Territory at June 30, 1931, was 212,500 acres. The greater part of this area was planted with coconuts (about 204,100 acres). Coffee, cocoa and kapok are also grown. Tropical fruits grow very abundantly. The staple articles of food of the natives are yams, taro, sago, and bananas. There is very little land used for pasture. The land is rich in mineral wealth, but no minerals, except gold at Bulolo, are worked on account of the difficulty of transporting mining machinery. Native labour is used to work the plantations, and the natives are recruited either from the adjacent villages or from other parts of the Territory. There are some 17,800 native labourers so recruited for plantation purposes. The total indentured labour in the territory on June 30, 1931, was 27,765.

Administrator of the Territory of New Guinea — Brigadier General Thomas Griffiths, C M G, C B E, D S O (Acting) (appointed July 11, 1932).

The seat of Administration is at Rabaul, New Britain (non indigenous population, white 765, asiatic 948).

1 North Eastern New Guinea. This territory, the northern section of south-east New Guinea, lies between 2° 35' and 8° south latitude, and 141° and 148° east longitude. The area, including Manam, Karkar, Long, Bagabag, Schouten, Kairiru (D'Urville), and some smaller islands, is 69,700 square miles. The native population in 1931 for areas explored was, counted, 207,000. It was declared a German Protectorate in 1884, and was under the control and development of the New Guinea Company from 1885 to 1899. The principal station on the mainland is at Salamaua. The coast line is very little broken, and there are few good harbours. There are high ranges running parallel with the coast plain, which is from 20 to 100 miles wide and broken with steep spurs in some places extending to the actual coast line. The ranges in the interior have been little explored, and some of their summits are known to exceed 12,000 feet. The principal rivers are the Sepik, which is navigable for over 250 miles, the Ramu or Ottlien, and the Markham. The climate is hot and the rainfall large. There are

three missionary societies at work, these missions are also planters and traders

The chief towns are Wau and the goldfields (non-indigenous population, 420), Salamaua and Lae (non-indigenous population, 190), and Madang (non-indigenous population, 100)

2 Bismarck Archipelago—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, and in May, 1885, they were renamed the Bismarck Archipelago. The Archipelago lies between $140^{\circ} 30'$ and 156° east longitude, and the Equator and 8° south latitude. The chief islands are New Britain, area 14,600 square miles, New Ireland, area 2,800 square miles, Lavongai (late New Hanover), 460 square miles, Duke of York Islands, area 22 square miles, the Admiralty Islands (principal island, Manus), area 663 square miles. The other groups included in this Archipelago are Mussau Islands, Gardner Islands, Nuguria, Nissan Island, the Vitu Islands, Umboi Islands, Hermit Islands, Ninigo Group, Kaniet and Sae Islands. In these various groups there are upwards of 100 small islands, having a total area of 1,115 square miles. The native population of the Archipelago in 1931 of areas patrolled was 143,000

New Britain, the largest island of this group, is a long island of crescent shape lying east and west. It has a mean breadth of 50 miles and a length of 300 miles. The island is practically undeveloped except for 67,000 acres under cultivation chiefly on the Gazelle Peninsula in the north, four plantations on the northern coast, and six plantations on the southern coast, west of Henry Reid Bay. A Government station, named Gasmata (non indigenous population 16), has been established about midway along the southern coast. Talasea (non indigenous population 34) is situated on the north coast. The interior of the island is little known. The native population of areas patrolled in 1931 was 88,000. A mountain chain traverses the entire length of the island, and in the centre consists of several irregular ranges. There are several active volcanoes. The highest known peak is the Father, about 7,500 feet high, which is an active volcano. The island has very fine harbours. The only one visited regularly by oversea shipping is Simpson Harbour, in Blanche Bay. The principal settlement is around the shores of this bay. The chief product is copra, but cocoa and coffee are now being extensively planted. There are four missionary societies at work. The chief town is Rabaul (non indigenous population, 1,716), which is the seat of the Government. The old capital was at Kokopo (non indigenous population, 350), which is situated 14 miles south east of Rabaul. At Rabaul there is an anchorage for all ships and a fine wharf has been built. Rabaul is well laid out and has a fine public garden. New Britain and the adjacent islands, including Duke of York Island, have an area of 14,600 square miles.

New Ireland (non indigenous population, 422), the second in size and importance of the Bismarck Archipelago, is situated north of New Britain, from which it is separated by St George's Channel. The chief town is Kavieng (non-indigenous population, 179), at the north west extremity of the island. The only other town is Namatanai (non-indigenous population, about 15), on the south east coast. The island has a long range of mountains running through it. It is of older formation than New Britain, and does not show any signs of recent volcanic activity. The principal harbour is Nusa, on the north coast of which Kavieng, the seat of the local administration, is situated. The interior of the island, with the exception of the extreme southern end, is fairly well known. The native population in 1931 was 41,000, including

adjacent islands. The soil is fertile and the climate similar to that of New Britain. The chief industry is coconut growing, the area under cultivation in New Ireland on June 30, 1931, was 56,200 acres, 55,800 being planted with coconuts. There are numerous plantations around the coast near Kavieng, New Ireland and adjacent islands, including Lavongai, Tabar, Lutui, Tanga, Feni, Musau and Emirau Groups have an area of 3,800 square miles.

The Admiralty Islands are the most important of the small groups. The chief island is Manus, sometimes called Great Admiralty Island. The chief town is Lorengau (population, including district, 91) on the north east coast. The native population of the group in 1931 was 14,500. Coconuts are the chief article of cultivation, and there are valuable pearl and other shell fisheries. There were 21,200 acres planted with coconuts on June 30, 1931.

3 Solomon Islands — The portion of the Solomon Islands within the area of the territory of New Guinea consists of the islands of Bougainville, Buka, and adjacent islands, including Nuguria, Nissan, Kilnailau, Tauu (Mortlock), and Nukumanu (Tasman) Islands. Bougainville has an area of 3,880 square miles, and a native population (of areas patrolled in 1931) of 30,400, and Buka an area of 190 square miles, and a native population, including adjacent islands, 1931, 7,550. Smaller islands in this group have a total area of 30 square miles and a native population in 1931 of 2,050. The islands are very mountainous. Of the several volcanic cones, Bagana (in the Crown Prince range) is the only active volcano. The principal harbour is Kista, situated on the east coast of Bougainville, where there is a Government station. Other good harbours are Rawa and Tinputz on the north east coast of Bougainville. There is a good harbour on the west side of Buka, named Carola Hafen. Missionary work amongst the natives is carried on by three missionary societies. The area planted with coconuts on June 30, 1931, was 26,000 hectares. The natives grow bananas, coconuts, taro, and sweet potatoes. The non indigenous population is 176.

TERRITORY OF WESTERN SAMOA.

The former German Samoan Islands, now the Territory of Western Samoa, include Savai and Upolu, the largest of the Samoan or Navigators' Islands. Samoa is a group of islands in the Western Pacific, lying in $13\frac{1}{2}$ deg to $14\frac{1}{2}$ deg lat, and 168 deg to 173 deg W long. The islands are some 130 miles N of Tonga and between 400 and 500 miles N E of Fiji. The group consists of nine islands, in addition to rocks and islets. They are all, with the exception of Upolu Island, of volcanic formation, and are, for the most part, surrounded by coral reefs. The four largest islands are Savai, Upolu, Tutuila and Apia, in the Manu'a Group. By the Anglo German Agreement of November 1, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savai, Upolu, Apolonia and Manono, and in favour of the United States as regards Tutuila and other islands.

On August 29, 1914, the British occupied German Samoa. By the Treaty of Peace, 1919, Germany surrendered her possessions abroad, and Samoa is now governed under a mandate dated December 17, 1920, from the League of Nations to His Majesty the King in right of his Dominion of New Zealand, which has been empowered to govern Western Samoa. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established.

The civil administration was inaugurated on May 1, 1920. There is a Legislative Council, consisting of six official members, two elected European official members, and two nominated native members representing the Samoan race. The Administrator is entitled to preside over every meeting of the Council. No person is qualified for appointment to the Legislative Council unless he is either a natural born British subject or was born in Samoa. There is also an elective Native Council which advises the Administrator on native affairs.

Savai has an area of about 700 square miles, Upolu has an area of approximately 430 square miles. Both islands are mountainous, fertile, and well watered. Several adjacent islets were included in the German Mandate. The port of Apia is in Upolu. The inhabitants of the islands are Polynesians, professing Christianity (Protestants, Catholics, and Mormons). The population of Western Samoa, as recorded at December 31, 1931, was — Europeans and half-castes, 2,883; Samoan natives, 42,296; Chinese labourers under contract, 714; other islanders, 130; total, 46,023. There are five

Government schools, thirty six schools conducted jointly by Government and Missions, and also schools conducted by various Missions alone—the number of scholars recorded being over 14,000. There are 60 miles of good roads. The chief products are copra, cacao, and bananas. Rubber is cultivated but not exported at present. The revenue collected in Western Samoa for the year ended March 31, 1932, was 109,040/ , the expenditure was 128,936/. Imports for 1931, 164,950/ (from United Kingdom, 29,286/ , New Zealand, 56,450/ , Australia, 35,468/ , Canada, 5,442/ , Fiji, 6,269/ , U S A , 23,805/), exports, 194,447/ (to United Kingdom, 15,668/ , New Zealand, 45,169/ , U S A , 59,687/ , Holland, 5,470/ , European ports (exact destination unknown), 64,299/). The exports are mainly copra (11,062 tons, 109,220/), cacao beans (620 tons, 35,284/), and bananas (85,225 cases, 39,022/). In 1931, 138 vessels (113,006 tons, of which 89 vessels of 66,419 tons were British) entered at and cleared from the port of Apia.

There is regular steam communication from New Zealand and Fiji, and the products of the territory are transported to overseas markets by steam and oil vessels which call at Apia every few weeks. A high power wireless station is erected at Apia.

The German currency has been replaced by sterling in the form of Samoan Treasury notes issued under the authority of the New Zealand Government. A branch of the Bank of New Zealand was opened at Apia in April, 1915.

The Minister of External Affairs for New Zealand is in charge of Samoa.

Administrator — Brigadier Gen H E Hart, C B , C M G , D S O , V. D , (appointed April, 1931).

NAURU ISLAND.

The island lies 26 miles south of the Equator, in longitude 166 degrees east. Area, 5,396 acres approximately. It is an oval shaped atoll of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide. There is no anchorage adjacent to the island. On the seaward side the reef dips abruptly into the deep waters of the Pacific. On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 200 to 800 yards and completely encircling the island. On the inner side of the fertile section there is a coral cliff which rises to a height of from 40 to 60 feet. Above the cliff there is an extensive plateau bearing phosphate of a high grade, the mining rights of which are vested in the British Phosphate Commissioners subject to the rights of the native landowners. It is chiefly on the fertile section of land between the sandy beach and the plateau that the natives have established themselves, and from which they obtain the necessary food for themselves and families. With the exception of a small fringe round a shallow lagoon, about one mile inland, the plateau, which contains the phosphate deposits, has few food-bearing trees and is not utilized for the purposes of native villages.

The island was discovered by Captain Fearn in 1798, annexed by Germany in October, 1888, and surrendered to the Australian forces in 1914. It is administered under a mandate, dated December 17, 1920, conferred on the British Empire and approved by the League of Nations. The military training of the natives, except for local police or defence purposes, is prohibited, and no naval or military base or any fortifications may be established. Great Britain, Australia and New Zealand agreed in July, 1919, that Australia should appoint the first Administrator for a term of five years, and thereafter the administrator was to be appointed as the three Governments should decide. The administrator has all the powers of government, administrative, legislative and judicial. The expenses of administration are met out of local revenue.

Population, April 1, 1932: 141 Europeans, 1,475 Nauruans, 4 other Pacific islanders, and 696 Chinese, total, 2,316.

Education.—Attendance at school both for European and Native children is compulsory until children reach the age of 16 years, then, until they reach the age of 17 years, the native children are required to attend at specified periods for technical training in the case of boys and home craft training in the case of girls.

Finance.—The revenue and expenditure of the island have been as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1926	16,424	18,963	1929	19,936	17,859
1927	17,041	17,242	1930	18,992	15,532
1928	19,903	18,267	1931	16,440	16,903

Excess of assets over liabilities as at December 31, 1931, 20,868*s*.

The interests in the phosphatic deposits were purchased in 1919 from the Pacific Phosphate Company by the Governments of the United Kingdom, the Commonwealth of Australia and New Zealand, at a cost of 3,500,000*l*, and a Commission was appointed to ensure that the deposits were worked on business lines. An amount at the rate of 6*d* per ton, in effect an export duty, is charged on phosphate exported. A Capitation Tax of 2*l* for Europeans, 1*l* for Chinese, 15*s* for natives is collected from all physically fit adult males under the age of 60 years. A royalty of 7½*d* per ton as from July 1, 1932, is paid by the British Phosphate Commissioners for every ton of phosphate shipped, of which 4½*d*. per ton is paid to the native landowner, 1½*d* per ton is paid to the Administrator to be used solely for the benefit of the Nauruan people, and 2*d* per ton is paid to the Administrator in trust and invested for the benefit of the landowner or his assigns, to whom the interest will be paid after the principal has been invested for a period of 20 years. The British Phosphate Commissioners also contribute 1,000*l* per annum towards the cost of maintaining the Nauruan Police.

Commerce.—The export trade of the island consists, with the exception of a small quantity of copra, almost entirely of phosphate, shipped mainly to Australia and New Zealand. Phosphate exported (tons): 1928, 318,845; 1929, 326,125; 1930, 271,255; 1931, 245,165; Copra exported (tons) 1927, 263; 1928, 181; 1929, nil.; 1930, 3; 1931, 74.

The imports consist almost entirely of food supplies, and machinery for the British Phosphate Commissioners, for use in connection with their works. Value of imports 1928, 240,229*l*.,¹ 1929, 101,691*l* , 1930, 143,416*l* , 1931, 108,729*l*

Shipping.—Practically the whole of the shipping coming to the island consists of steamers under charter to the British Phosphate Commission. Numbers of vessels entered and cleared in 1927, 75 of 321,126 gross tons , 1928, 73 of 322,551 gross tons , 1929, 64 of 288,393 gross tons , 1930, 57 of 247,422 gross tons , 1931, 51 of 220,430 gross tons

Communications —The outstanding feature of Nauru, apart from the phosphate operations, is the Wireless Station, erected by the German Government to link up the island with their other Pacific possessions and Tsingtau. It was opened in December 1913, and though partially dismantled shortly after the outbreak of war, was soon restored, and has been in use ever since, although rapidly becoming more or less obsolete. Constant renewals of parts have been made in recent years.

Administrator —W A Newman (appointed June, 11, 1927).

PART THE SECOND

THE UNITED STATES

UNITED STATES.

(UNITED STATES OF AMERICA.)

Constitution and Government.

THE Declaration of Independence of the thirteen States of which the American Union then consisted was adopted by Congress July 4, 1776. On November 30, 1782, Great Britain acknowledged the independence of the United States, and on September 3, 1783, the treaty of peace was concluded.

The form of government of the United States is based on the Constitution of Sept 17, 1787, to which ten amendments were added Dec 15, 1791, an eleventh amendment, Jan 8, 1798, a twelfth amendment, Sept. 25, 1804, a thirteenth amendment, Dec 18, 1865 (slavery abolished) a fourteenth amendment, July 28, 1868, a fifteenth amendment, March 30, 1870 (equal rights for white and coloured citizens), a sixteenth amendment, February 25, 1913 (income tax authorised), a seventeenth amendment, May 31, 1913, an eighteenth amendment, January 29, 1919 (liquor prohibition amendment), a nineteenth amendment, August 26, 1920 (woman suffrage), and a twentieth amendment, October 15, 1933 (advancing the date of the President's and Vice-President's inauguration and abolishing the 'lame ducks' sessions of Congress). On February 20, 1933, Congress by two thirds votes, submitted to conventions to be called in the various States an amendment repealing the eighteenth (prohibition) amendment though preserving to the 'dry States' power to forbid imports of alcoholic liquors, this must be ratified within seven years by three-fourths of the States.

By the Constitution, the government of the nation is entrusted to three separate authorities, the Executive, the Legislative, and the Judicial. The executive power is vested in a President, who holds his office during the term of four years, and is elected, together with a Vice President chosen for the same term, in the mode prescribed as follows — 'Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the State may be entitled in the Congress but no senator or representative, or person holding an office of trust or profit under the United States, shall be appointed an elector'. In every State the electors, chosen by the various political parties and pledged to the party's candidates for President and Vice-President, are in turn chosen by direct vote of the citizens on a general ticket, on the system known in France as *scrutin de liste*. The Constitution enacts that 'the Congress may determine the time of choosing the electors, and the day on which they shall give their votes, which day shall be the same throughout the United States', and further, that 'no person except a natural-born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President, neither shall any person be eligible to that office who shall not have attained to the age of thirty five years, and been fourteen years a resident within the United States.'

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November, the electors thus chosen met and, in accordance with an amendment to the Statutes adopted by the 70th Congress, gave their votes at their respective State capitals on the first Wednesday in January next following their appointment, and the votes of the electors of all the States were opened and counted in the presence of both Houses of Congress on the second Wednesday in February. But the twentieth amendment, which advances the President's term from March 4 to January 20, will require legislation modifying this arrangement. The total electoral vote is 531 (1 each for 96 Senators and 435 Representa-

tives) and a majority—266—is necessary to elect. If no candidate has a majority, or if the successful candidate dies before taking office, the Vice-President-elect becomes President, if the latter fails to qualify or dies, then Congress, by the twentieth amendment, designates the Acting President and Acting Vice President until their successors can be elected. It is possible for a candidate to have a majority in the 'electoral college' although receiving fewer popular votes than his chief opponent, this occurred in 1824, 1876 and 1881. The presidential term formerly began at noon on March 4, in the year following leap years, but the twentieth amendment to the Constitution ratified January 23, 1933, and in effect October 15, 1933, advances the date for the inauguration of the President from March 4 to January 20 of the inaugural year. This amendment will also instal the newly elected Congress in office on January 3, instead of—as at present—in the following December.

The President is commander-in-chief of the army and navy, and of the militia when in the service of the Union. The Vice President is *ex officio* President of the Senate, and in the case of the death or resignation of the President, he becomes the President for the remainder of the term.

President of the United States—Franklin Delano Roosevelt, of New York, born in New York on January 30, 1882, educated at Harvard University and Columbia University Law School, lawyer, member of State Senate, 1910-13, Assistant Secretary of the Navy, 1913-20. Democratic candidate for Vice-President of the United States, 1920, elected Governor of New York State, 1928, re elected, 1930. Present term of office began on March 4, 1933, and expires January 20, 1937.

The offices of President and Vice-President have been occupied as follows —

The administrative business of the nation is conducted by ten chief officers, or heads of departments, who form what is called the 'Cabinet.' They are chosen by the President, but must be confirmed by the Senate. Each of them presides over a separate department, and acts under the immediate authority of the President. The Cabinet, appointed March 4, 1933, is composed as follows —

1. *Secretary of State* — Cordell Hull, U S Senator from Tennessee, born 1871

2. *Secretary of the Treasury* — William H. Woodin, of Pennsylvania, manufacturer, born 1868

3. *Secretary of War* —George H. *Dern*, Governor of Utah, born 1872
4. *Attorney-General* —Homer S. *Cummings*, of Connecticut, lawyer and politician, born 1870 (Acting)
5. *Postmaster-General* —James A. *Farley*, of New York, business man and politician; born 1888
6. *Secretary of the Navy* —Claude A. *Swanson*, U S Senator from Virginia; born 1862
7. *Secretary of the Interior* —Harold L. *Ickes*, of Illinois, lawyer, born 1874
8. *Secretary of Agriculture* —Henry A. *Wallace*, of Iowa, editor of farm paper, born 1888
9. *Secretary of Commerce* —Daniel C. *Roper*, of Washington, D C; publicist and lawyer, born 1867
10. *Secretary of Labour* —Miss Frances *Perkins*, of New York, State Industrial Commissioner, born 1882

Each of the above ministers has an annual salary of 15,000 dollars, and holds office during the pleasure of the President

The whole legislative power is vested by the Constitution in a Congress, consisting of a Senate and House of Representatives. The Senate consists of two members from each State, chosen by popular vote for six years. Senators must be not less than thirty years of age, must have been citizens of the United States for nine years, and be residents in the States for which they are chosen. Besides its legislative functions, the Senate is entrusted with the power of ratifying or rejecting all treaties made by the President with foreign Powers, a two-thirds majority of senators present being required for ratification. The Senate is also invested with the power of confirming or rejecting all appointments to office made by the President, and its members constitute a High Court of Impeachment. The judgment in the latter case extends only to removal from office and disqualification. The House of Representatives has the sole power of impeachment.

The House of Representatives is composed of members elected every second year by the vote of citizens who, according to the laws of their respective States, are qualified to vote for members of the State legislature. By amendments of the Constitution, disqualification on the ground of race, colour, or sex, is forbidden. Accordingly the electorate consists practically of all citizens of both sexes over 21 years of age. But the franchise is not universal. There are requirements of residence varying in the several States as to length from three months to two years, differing requirements as to registration, in some States the payment of taxes is necessary to qualify for the suffrage, in others the ability to read—in Massachusetts the ability to read English. In some Southern States they are required to give a reasonable explanation of what they read. Some of the Western States admit to the franchise unnaturalised persons who have formally declared their intention to become citizens. Several of the Southern States have adopted methods—which differ from one another—too complicated for explanation here, with the frankly avowed purpose of excluding the negroes from the franchise and yet avoiding the constitutional consequences of discriminating 'on account of race, colour, or previous condition of servitude'. Untaxed Indians are excluded from the franchise, in most States convicts, in some States duellists and fraudulent voters. Women by the 19th amendment to the Federal Constitution, passed in 1920, have the vote and eligibility for both the Federal and the State Legislatures on the same terms as men.

The number of Representatives to which each State is entitled is determined by the decennial census, in the absence of specific Congressional

legislation affecting the basis By the Apportionment Act following the census of 1910 the number of representatives was 433 (one for every 210,415 inhabitants), but in 1912, with the admission of Arizona and New Mexico, it became 435 According to the census of 1920, the number should be 460, but no change has been made by Congress since 1912 The census of 1930, while leaving the total membership at 435, suggested an alteration, due to population shifts, in the representation of 36 out of the 48 States, this redistribution, as determined by the Census, became effective in 1933, by virtue of legislation passed by Congress in 1929 The States now have the following Representatives —

Alabama	9	Maryland	6	Oregon	3
Arizona	1	Massachusetts	15	Pennsylvania	34
Arkansas	7	Michigan	17	Rhode Island	2
California	20	Minnesota	9	South Carolina	6
Colorado	4	Mississippi	7	South Dakota	2
Connecticut	6	Missouri	13	Tennessee	9
Delaware	1	Montana	2	Texas	21
Florida	5	Nebraska	5	Utah	2
Georgia	10	Nevada	1	Vermont	1
Idaho	2	New Hampshire	2	Virginia	9
Illinois	27	New Jersey	14	Washington	6
Indiana	12	New Mexico	1	West Virginia	6
Iowa	9	New York	45	Wisconsin	10
Kansas	7	North Carolina	11	Wyoming	1
Kentucky	9	North Dakota	2		
Louisiana	8	Ohio	24		
Maine	3	Oklahoma	9	Total	435

According to the terms of the Constitution, representatives must be not less than twenty-five years of age, must have been citizens of the United States for seven years, and be residents in the States from which they are chosen In addition to the representatives from the States, the House admits a 'delegate' from each organised Territory, who has the right to speak on any subject and to make motions, but not to vote The delegates are elected in the same manner as the representatives

Each of the two Houses of Congress is made by the Constitution the 'judge of the elections, returns, and qualifications of its own members', and each of the Houses may, with the concurrence of two-thirds, expel a member

The Congress of the United States has the power to propose alterations in the Constitution, by the 5th article of the same The article orders that the Congress, whenever two thirds of both Houses shall deem it necessary, shall propose amendments to the Constitution, or, on the application of the Legislatures of two thirds of all the States, shall call a convention for proposing the amendments, which in either case shall be valid to all intents and purposes as part of the Constitution when ratified by the Legislatures of three-fourths of the several States, or by conventions in three fourths thereof, as the one or other mode of ratification may be proposed by Congress.

The salary of a senator, representative, or delegate in Congress is 10,000 dollars per annum, with an allowance, based on distance, for travelling expenses. The salary of the Speaker of the House of Representatives is 12,000 dollars per annum

No senator or representative can, during the time for which he is elected, be appointed to any civil office under authority of the United States which shall have been created or the emoluments of which shall have been in-

creased during such time ; and no person holding *any* office under the United States can be a member of either House during his continuance in office. No religious test is required as a qualification to any office or public trust under the United States, or in any State.

The period usually termed 'a Congress' in legislative language continues for two years, by the twentieth amendment, that of the 73rd Congress will last from noon, March 4, 1933, until noon, January 3, 1935, at which latter time the term of the new House of Representatives will begin. The term of one third of the Senators expires at the same time.

The 73rd Congress (1933-35), elected November, 1932, is constituted as follows: Senate, 59 Democrats, 36 Republicans, 1 Farmer Labour, House of Representatives, 312 Democrats, 117 Republicans, 5 Farmer Labour, 1 vacant. There are 5 women members of the Lower House.

The National Government has authority in matters of general taxation, treaties and other dealings with foreign powers, army, navy, and (to a certain extent) militia, commerce, foreign and inter State postal service, coinage, weights and measures, and the trial and punishment of crime against the United States.

Slavery was abolished throughout the whole of the United States by the thirteenth amendment of the Constitution, passed December 18, 1865. The vast change in the political and social organisation of the Republic made by this new fundamental law was completed by the fourteenth and fifteenth amendments of the Constitution, passed in 1868 and 1870, which gave to the former slaves all the rights and privileges of citizenship.

STATE AND LOCAL GOVERNMENT

The Union comprises 13 original States, 7 States which were admitted without having been previously organised as Territories, and 28 States which had been Territories—48 States in all. Each State has its own constitution, which must be republican in form, and each constitution derives its authority, not from Congress, but from the people of the State. Admission of States into the Union is granted by special Acts of Congress, either (1) in the form of 'enabling Acts,' providing for the drafting and ratification of a State constitution by the people, in which case the Territory becomes a State as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each State is provided with a Legislature of two Houses, a Governor, and other executive officials, and a judicial system. Both Houses of the Legislature are elective, but the Senators (having larger electoral districts) are less numerous than the members of the House of Representatives, while in some States their terms are longer and, in a few, the Senate is only partially renewed at each election. Members of both Houses are paid at the same rate, which varies from 150 to 1,500 dollars per session, or from 1 to 8 dollars per day during session. The duties of the two Houses are similar, but in many States money Bills must be introduced first in the House of Representatives. The Senate has to sit as a court for the trial of officials impeached by the other House, and, besides, has often the power to confirm or reject appointments made by the Governor. In most of the States the sessions are biennial, the Governor having power to summon an extraordinary session, but not to dissolve or adjourn. State Legislatures are competent to deal with all matters not reserved for the Federal Government by the Federal constitution, or falling within restrictions imposed by the State constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members

of Congress and electors of President and Vice-President, the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons, the civil law, including all matters pertaining to the possession and transfer of, and succession to, property, marriage and divorce, and all other civil relations, the chartering and control of all manufacturing, trading, transportation, and other corporations, subject only to the right of Congress to regulate commerce passing from one State to another, the regulation of labour, education, charities, licensing, fisheries within State waters, and game laws. The revenues of the States are derived chiefly from a direct tax upon property, in some cases both real and personal, in others on land and buildings only. The prohibition upon Congress to levy direct taxes save in proportion to population, contained originally in the national constitution, left this source of revenue to the States exclusively until 1913, when an amendment was adopted authorising the imposition of an income tax by Congress. In 1929, cost of government of the 48 States was 2,061,016,833 dollars, revenue, 2,059,327,008 dollars, total net indebtedness, 1,661,686,056 dollars. *Per capita* cost was 10.75 dollars compared with 4.19 dollars in 1917. *Per capita* revenue receipts, 1929, were 17.06 dollars.

The Governor is chosen by direct vote of the people over the whole State. His term of office varies in the several States from 2 years to 4 years and his salary from 3,000 to 25,000 dollars. His duty is to see to the faithful administration of the law, and he has command of the military forces of the State. His power of appointment to State offices is usually unimportant. He may recommend measures, but does not present Bills to the legislature. In some States he presents estimates. In all but two of the States the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some States by a simple majority, in others by a three-fifths or two thirds majority.

The chief officials by whom the administration of State affairs is carried on (secretaries, treasurers, members of boards of commissioners, &c.) are usually chosen by the people at the General State elections for terms similar to those for which governors hold office.

In the Territories of Hawaii and Alaska there is a local legislature, but any of their Acts may be modified or annulled by Congress. The Governor of a Territory is appointed for 4 years by the President who also appoints the Territorial secretaries and other officials, together with the Territorial judges. Puerto Rico, although not designated as a 'territory' in the technical sense, is self governing. Its government is organised on a system almost identical with that of the Territories. The Philippine Islands are governed by a civil Governor and elected Upper and Lower Legislative Chambers.

The District of Columbia is the seat of the United States Government provided by the State of Maryland for the purposes of government in 1791. It is co-extensive with the city of Washington, and embraces an area of 62 square miles. The district has no municipal legislative body, and its citizens have no right to vote either in national or municipal concerns. By an Act of Congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

The unit of local government in the North, especially in the New England States, is the rural township, governed directly by the voters who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations, and appoint and instruct the local officials (selectmen, clerk, school-committee, &c.) Where cities exist the township government is superseded by the city government. Townships are grouped to form counties,

each with its commissioners and other paid officials who have charge of public buildings, lay out highways, grant licences, and estimate and apportion the taxation necessary for county purposes. In the South the counties are themselves the units, though subdivided for educational or other special purposes. Their officials have in general additional functions, as the care of the poor and the superintendence of schools. In the Middle and North-Western States the two systems of local government are mixed. In the West all the public land is already divided into townships six miles square.

Area and Population.

I PROGRESS AND PRESENT CONDITION

Population of the United States at each census from 1790. Residents of Hawaii, Alaska, Puerto Rico, the Philippine Islands, Guam, Samoa, Virgin Islands, and Panama Canal Zone, and persons in the military and naval service stationed abroad are not included in the figures of this table. The residents of Indian reservations are not included prior to 1890.

In 1930 a separate classification was provided for Mexicans who, previously, had been counted with the white population. The 1920 figure for the white population included 700,541 who would have been counted as Mexicans, and included in 'other races' in 1930.

² Enumeration in 1870 incomplete. Figures in italics represent estimated corrected population.

³ Between the 1910 census (April 15, 1910) and the 1920 census (January 1, 1920), the period covered was 116½ months (less than a full decade). Adjusting for this the exact rate of increase for the decade was 15.4 per cent. Similarly correcting for the 123 months between the 1920 and 1930 censuses, the true rate of increase was 15.7 per cent.

Total population in 1930 comprised 62,137,080 males, and 60,637,966 females, 68,954,823, or 56.2 per cent., were urban, and 53,820,223, or 43.8 per cent., rural.

In the following table of population statistics for 1920 and 1930, the dates indicate the year in which the constitution was ratified by each of the original thirteen States, the year of the admission of each of the other States into the Union, and the years of organization of Territories —

II MOVEMENT OF POPULATION

The registration area for births was established in 1915, and the birth rates are computed from returns for certain areas for which the registration of births is accepted by the Bureau of the Census as approximately complete. In 1930 these areas included the District of Columbia, Virgin Islands, the territory of Hawaii and all the 48 States except South Dakota and Texas. The estimated population of this area (exclusive of the Virgin Islands and Hawaii) was 116,644,606, or 94.7 per cent of the total estimated population of the Continental United States, and the number of births (exclusive of still births) returned was 2,293,953 or 18.9 per 1,000 population.

The annual collection of statistics for the registration area for deaths began in 1900. Death rates are computed from returns for States and cities

which were admitted to the registration area for deaths on the basis of approximately complete registration. In 1930 these areas included the District of Columbia, Territory of Hawaii, Virgin Islands, and all the 48 States except Texas (8 cities in Texas are included). The estimated population for the registration area (exclusive of Hawaii and the Virgin Islands) was 118,560,800 or 96.2 per cent. of the total estimated population of Continental United States; and the number of deaths returned from this area was 1,843,356, corresponding to a death rate of 11.3 per 1,000 population.

The number of marriages in 1931 was 1,060,554 against 1,126,856 in 1930. There were 183,664 divorces, against 191,591 in 1930.

Total number of immigrants admitted in year ending June 30, 1931, was 97,189 against 241,700 in 1930. Of the total number in 1931, 40,621 were males, and 56,518 were females.

Total alien arrivals in 1931 (June 30) was 280,679, total alien departures, 290,916, an excess of departures over admissions of 10,237.

The total number of alien immigrants from 1820 to 1931 (June 30) arriving for permanent residence was 37,859,151. In the following statement, immigrants from Canada and Mexico are included in the total —

Year ending June 30	British Isles	Germany	Sweden, Norway, and Denmark	Austria and Hungary	Italy	Russia and Finland	France	Total Im-migrants

The total number of immigrants from China between 1820 and 1931 was 378,695, the total number from Japan, from 1861, the earliest year of record, was 276,296. In 1929, the number of Chinese admitted, from all countries, was 1,071, in 1930, 970, and in 1931, 748. In 1929 there were 716 Japanese admitted, in 1930, 796, and in 1931, 626. Of recent years, departures have far exceeded arrivals.

Education

Each State of the Union has a system of free public schools established by law, comprising elementary schools, junior high schools and high schools, with courses covering from 11 to 18 years. In 1930 illiterates comprised 1.5 per cent. of native-born whites, 9.9 per cent. of foreign-born whites, 16.3 per cent. of Negroes, and 25 per cent. of other races, rate for entire population above 10 years of age, 4.3 per cent.

Since 1803, the United States Government, upon the organization of all

new States, has set aside from the public domain for the benefit of the public schools therein from one to four 'sections' (square miles) of land in each township of six miles square. The proceeds of the sale of this land make the principal part of the permanent school funds of such States. The income of permanent school funds and unsold school lands constitutes about 13 per cent of the revenue receipts of the schools of the country. Taxation and appropriations yield about 94.6 per cent of total revenue receipts, and other sources yield about 4.1 per cent. In 1930 the amount expended on public schools of elementary and secondary grades was 2,816,790,384 dollars. In 1930 the 1,078 universities, colleges, and professional schools had an income of 567,618,169 dollars from productive funds, and from all other sources.

Justice and Crime.

The judicial system, like the executive and legislative systems, is dual. The Federal or National Government maintains courts for the trial of crimes against the United States and of civil suits which are brought by the Government or its officers, or which arise under the Constitution, treaties and laws of the United States. These laws relate to such subjects, among others, as Admiralty, Patents, Taxation, Banking and Bankruptcy. The Federal Courts also have jurisdiction of cases between citizens of the different States and between citizens of a State and foreign States, citizens or subjects. In this class of cases, as well as in cases arising under the Constitution, treaties and laws of the United States, the amount in controversy must exceed \$3,000 dollars, besides interest and costs. The State Courts have jurisdiction over all civil and criminal cases arising under State laws; the decisions of the Courts of last resort of the States as to the validity of treaties or of laws of the United States, or on various questions arising under the Constitution, are subject to review by the Supreme Court of the United States. The State Courts also have jurisdiction of proceedings in probate and divorce.

In the separate States the lowest courts are usually those of Justices of the Peace, but many towns and cities have inferior courts, called by various names, with power to commit for trial in criminal matters and to hear and determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving usually not more than \$300 dollars.

The highest court in each State is usually called the Supreme or Appellate Court with a Chief Justice and Associate Justices and, in some States, commissioners who hear and determine cases under assignment of the Chief Justice and the Associate Justices. The Chief Justice and Associate Justices are usually elected by the people, but sometimes are appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from \$5,000 to 22,500 dollars.

The Judges of the Courts of the United States, which include the District

Courts, the Court of Claims, the United States Customs Court, the Court of Customs and Patent Appeals, the Circuit Courts of Appeals, and the Supreme Court of the United States, hold office during good behaviour. They may, however, retire with full pay at the age of 70 years, if they so desire, and if they have served a period of ten years.

The United States District Courts are the lowest of the Federal Courts, being the courts of original jurisdiction. There are 88 of these, each State and territory forming one or more districts. These Courts appoint Commissioners, who have the power of Examining Magistrates, but may not finally adjudge and determine, except in the Territory of Alaska, where they have jurisdiction equivalent to that of the Justices of the Peace and Probate Courts of the counties of the States. The United States District Courts try all criminal cases arising under the laws of the United States, as indicated above, including capital offences.

The Supreme Court consists of the Chief Justice and 8 Associate Justices, appointed by the President, with the advice and consent of the Senate. The United States is divided into 10 circuits, to each of which the Chief Justice or an Associate Justice is assigned. In each circuit there is a Circuit Court of Appeals. Cases from inferior courts are taken to the Circuit Courts of Appeals by appeal or to the Supreme Court either on appeal or writ of certiorari. That Court has also original jurisdiction in cases affecting foreign Ministers and those between the different States. The salary of the Chief Justice is 20,500 dollars, and that of each of the Associate Justices, 20,000 dollars.

The Court of Claims has jurisdiction of suits based on claims against the Government founded on the Constitution and laws of the United States or arising out of contracts entered into with the Government and not sounding in tort. The United States Customs Court (formerly the Board of General Appraisers) has jurisdiction in customs cases. The Court of Customs and Patent Appeals passes upon appeals from decisions of the United States Customs Court involving questions as to the classification of merchandise under tariff Acts and the rates of duty to which various articles are liable, as well as appeals from decisions of the Patent Office.

The District of Columbia, in which the seat of the National Government is located, has a Juvenile Court, a Municipal Court, a Police Court, a Supreme Court with a general jurisdiction which includes that of a United States District Court, and a Court of Appeals.

Most of the more important territorial and insular possessions of the United States, except the Philippines, have two systems of Courts, one corresponding to the Courts of the States to adjudicate cases arising under laws enacted by the territorial or insular legislatures, and the other, the United States Courts, to pass on cases involving Federal Law. The Philippine Islands have no Federal District Court.

Finance.

FEDERAL.

The following table gives what the Treasury terms 'Ordinary receipts' and 'expenditures chargeable against ordinary receipts'. 'Ordinary receipts' include receipts from customs, internal revenue, and 'Miscellaneous,' but do not include receipts from loans, premiums, or Treasury notes, or revenues of Post-Office Department. 'Ordinary expenses' include disbursements for War, Navy, Indians, pensions, payments for interest, and 'Miscellaneous,' but do not include principal of public debt, or disbursements for postal service paid from revenues thereof. 'Expenditures chargeable against

ordinary receipts' include 'ordinary expenditures' and retirements of the public debt from the sinking fund and from certain special receipts

On June 10, 1921, the President approved an Act to provide a National Budget System and an independent Audit of Government Accounts. This provided for an annual budget system for the first time in the history of the United States.

The gross debt on June 30, 1932, was made up as follows:—Debt bearing no interest, 265,649,541 dollars, matured debt on which interest has ceased 60,086,685 dollars, and interest bearing debt (discount rates on Treasury bills range from .289 to 1.049 per cent., and interest rates on other obligations from 1.125 to 4.25 per cent.), 19,161,273,540 dollars. The net debt, including matured interest obligations, etc.—that is, what remains after deducting the cash in the Treasury from the gross debt plus matured interest obligations, etc., was 19,225,531,854 dollars.

STATE FINANCE.

The revenues required for the administration of the separate States are derived from direct taxation, chiefly in the form of a tax on property, real and personal; and the greater part of such revenue is collected and expended by the local authorities, county, township, or school district.

For details see the separate States.

Defence.

I. ARMY.

The Army of the United States, as authorised under the Act of Congress of June 4, 1920, consists of the Regular Army, the National Guard while in the service of the United States, and the Organised Reserves, including the Officers' Reserve Corps and the Enlisted Reserve Corps.

Original or first enlistments in the Regular Army are for one or three years at the option of the soldier, but all re-enlistments are for three-year periods. Enlisted men are classified in seven grades. The pay of the lowest grade, or private, is 21 dollars per month (about 4 shillings a day at normal exchange rates), and that of the highest grade, or master sergeant, is 128 dollars per month. In addition enlisted men receive an increase of 5 per cent of their base pay for each 4 years of service in the army, the total increase not to exceed 25 per cent. Certain enlisted men also receive additional pay as specialists, the maximum addition under this head being 30 dollars per month.

The strength of the Regular Army, as authorised by Congress for the year 1932, was 12,402 officers and 118,750 enlisted men exclusive of Philippine Scouts for whom the appropriations allow of 6,445. The authorised number of warrant officers is 973.

The actual strength at the end of June, 1932, was 133,200 all ranks.

The war organisation and establishments of the Regular Army on mobilisation are as follows:—

Army Corps . . .	88,102	Infantry Brigade . . .	6,116
Infantry Division . .	21,435	Artillery Brigade . .	5,642
Cavalry Division . . .	9,762		

For plans of mobilisation, war and demobilisation the United States is divided into 3 Army areas, which for administration and training are subdivided into 8 Corps areas.

At the end of June, 1932, the United States Army troops stationed abroad were as follows:—

Philippines . . .	11,799	Alaska . . .	320
Hawaii . . .	14,275	Miscellaneous . . .	891 ¹
Panama . . .	9,908		
China . . .	766	Total . . .	39,099
Puerto Rico . . .	994		

¹ Including troops en route, military attachés, etc.

¹ Includes batteries, troops, sections, and similar separate units, and hospitals.

² Includes units which are partially inactive

The Officers' Reserve Corps consists of officers of all grades, including general officers, organised into sections corresponding to the various branches of the Regular Army. In the higher grades it is at present composed principally of men who served as officers during the World War, and on June 30, 1932, had a strength of 128,003. These officers may be called for training not exceeding 15 days each year, and with their own consent may be ordered to active service at any time and for any period, provided that the appropriations for the purpose are not exceeded.

The Reserve Officers' Training Corps, maintained for the purpose of keeping up the strength of the Officers' Reserve Corps, is organised into units at civil educational establishments. It is divided into a Senior Division, formed mainly at the universities, and a Junior Division, formed mainly at the secondary schools. On June 30, 1932, 114,545 students were enrolled in the Reserve Officers' Training Corps, of whom 73,989 were enrolled in senior units and 40,556 in junior units. Students of the Reserve Officers' Training Corps before being commissioned in the Officers' Reserve Corps must complete the four years' military training prescribed, which includes one summer training camp of a period of six weeks each.

The Enlisted Reserve Corps consists of men voluntarily enlisted therein who have qualifications making them eligible for enlistment in the Regular Army. On June 30, 1932, the Enlisted Reserve Corps had a strength of 4,872. Provided the appropriations for the purpose are not exceeded, enlisted reservists may be called up for training not exceeding fifteen days each year, and with their own consent may be ordered to active service at any time and for any period.

The National Guard, or organised militia, is maintained by the several States and Territories (including the District of Columbia, the Hawaiian Islands and Puerto Rico) with the aid of grants from the Federal Government. It is organised into the same arms of the service as the Regular Army, and is supplied by the Federal Government with uniforms, arms, and equipment of the same type as issued to the Regular Army. Service in the National Guard is purely voluntary. When Congress shall have authorised the use of the armed land forces of the United States for any purpose requiring the use of troops in excess of those of the Regular Army, the President may draft into

the military service of the United States any or all members of the National Guard, to serve for the period of the war or emergency. In certain emergencies the President may also call forth the National Guard, for service within the continental limits of the United States, without reference to Congress. The strength of the National Guard as authorised by law in enlisted men is 800 men for each Senator and Representative in Congress with such strength as the President may decide for the District of Columbia, the Territories of Puerto Rico and Hawaii, Alaska and the Canal Zone. The maximum strength of the National Guard for the present as fixed by the Secretary of War is 190,211 officers, warrant officers, and enlisted men. The actual strength on June 30, 1932, was 13,345 officers, 204 warrant officers, and 173,863 enlisted men. Enlistment is for three years, with re-enlistments for one year or three years. Minimum training required includes 48 drill periods yearly, each of not less than one and one half hours' duration, in addition to fifteen days' training in encampments or manoeuvres. Pay is provided for the 15 days' training in encampments at the same rate as for the Regular Army, while each drill period is considered approximately equal to a day's service for pay purposes.

Citizens' military training camps are operated during the summer months, at which thousands of young men acquire military training each year, without cost to themselves. Four courses are provided, the highest of which has as its object the training of non-commissioned officers and specialists of the Regular Army, National Guard, and Organised Reserves with a view to qualifying them for service as officers in the Officers' Reserve Corps. Civilians attending the highest course must have had prior military training equal to that obtainable in the three lower courses.

The President is Commander in Chief of both the Army and the Navy. The Secretary of War controls the Army with the aid of two Assistant Secretaries and a Chief of Staff. The former have supervision of the procurement of all military supplies, and are charged with the mobilisation of industrial establishments for wartime needs, while the latter is entrusted with the general supervision of the Army.

Although the infantry during the war were chiefly armed with a modified Enfield rifle, the Springfield rifle, of American design, remains the standard shoulder arm. Machine guns of all calibres are of the Browning type. The approved calibres of mobile artillery are as follows:—

for the light	75 mm gun and 105 mm howitzer
for the medium	155 mm. howitzer and 8 inch howitzer
for the heavy	155 mm. gun and 240 mm. howitzer

The 155 mm. howitzer is now issued in lieu of the 105 mm. howitzer for a portion of the light mobile artillery, pending production of a sufficient quantity of 105 mm. howitzers. The most powerful mobile gun is a 14-inch gun on railway carriage. The most powerful gun is a 16-inch gun on barbette carriage.

In the Budget for 1932-33, 289,500,024 dollars were voted for the army including 25,439,131 dollars for the air corps.

II. NAVY.

As provided under the terms of the Washington Treaty of August 17, 1923, and the London Treaty of October 29, 1930, the United States will have 15 capital ships. The replacement tonnage allowed for capital ships is the same as for the British Navy, viz. 525,000 tons. As authorised by Congress, the Navy Department has completed important alterations to

the seven oldest battleships, and has begun modernising three more. These alterations consist of, first, the installation of additional protection against submarine attack; second, the installation of anti-aircraft deck protection; third, the substitution of tripod masts for the cage type, and various other improvements of less importance. Increased angle of elevation has been given to the last four battleships modernised, and is proposed for the five next in age. No increase in elevation has been made in the case of the three oldest battleships of the 15 retained on the effective list. Ten 10,000-ton cruisers have been completed, and five more are in process of construction. An aircraft carrier of 13,800 tons, the *Ranger*, is in progress, the cost of which will approach 20,000,000 dollars.

The Air Service is an integral part of the Fleet. For the fiscal year 1932-33, the appropriation for the Bureau of Aeronautics is 25,245,420 dollars. This sum is exclusive of personnel and certain establishment charges. The appropriation for the fiscal year 1931-32 was 31,145,000 dollars. The five year building programme authorised in 1926 has been completed.

The gross naval expenditures have recently been as follows: 1929-30, 375,291,828 dollars; 1930-31, 357,806,219 dollars. The appropriation for the fiscal year 1931-32 was 360,111,406 dollars, and for the current year, 1932-33, it is 318,906,141 dollars. Provision is made in the current appropriations for continuing construction of seven cruisers (Nos. 32-38), one aircraft carrier, three submarines and five destroyers. Three additional cruisers are authorized by Congress, but no funds appropriated, their building is restricted as to date of commencement by Art. 18 of the London Treaty.

The total number of enlisted men, according to the current appropriation, was 79,700. Naval officers number 9,423. The Marine Corps, which is largely employed as an expeditionary force, consists of 1,197 officers and 15,355 men.

The American Navy is administered by the Secretary of the Navy, as the head of the executive department, known as the Department of the Navy. The Secretary has an Advisory Council, the most important Naval member of which is the Chief of Operations, who is charged by law with the operations of the Fleet and with the preparations and readiness of plans for its use in war. The other members of the Council are the Assistant Secretary of the Navy, the Chief of the Bureau of Navigation, handling principally the officer and enlisted personnel of the Navy and the Chiefs of the following bureaux: Construction and Repair; Engineering, Aeronautics (constituted 1921-22), Supplies and Accounts, Yards and Docks, Ordnance; and Medicine and Surgery, also the Commandant of the Marine Corps and the Judge Advocate General. The Chief of Operations is also President of the Naval General Board, which is an advisory body of senior officers, and is consulted on important questions of policy, including the number, types and characteristics of ships that should constitute the Fleet.

The Government navy yards are at Portsmouth, N.H.; Boston, Mass.; Brooklyn, N.Y.; Philadelphia, Pa.; Washington, D.C.; Norfolk, Va.; Charleston, S.C.; Mare Island, Cal.; Puget Sound, Wash.; and Pearl Harbour, Hawaii, all of which yards are equipped for certain types of new construction as well as for handling repairs to units of the fleet. In addition there are naval stations at Newport, R.I.; New London, Conn.; Key West, Fla.; Pensacola, Fla.; New Orleans, La.; San Diego, Cal.; Guantanamo, Cuba; Tutuila, Samoa; Cavite, P.I.; Guam, Balboa, C.Z. The naval training stations are at Hampton Roads, Va.; San Diego, Cal.; Newport, R.I.; and Great Lakes, Ill. A 20-year development programme for navy yards

and naval bases has been approved by the Secretary, but no considerable appropriations have been granted to further the programme.

The Atlantic and Pacific Fleets have been united in a single command as the United States Fleet.

The following is a classified statement of the strength of the United States Navy on October 31, 1930, 1931 and 1932, based on data furnished by the U.S. Navy Department:—

	As at October 31		
	1930	1931	1932

In 1930 there were 6,288,648 farms, of which 3,568,394 were operated by owners, 55,889 by managers, and 2,664,365 by tenants, farm population on January 1, 1931, was estimated at 27,430,000, 1930, 27,222,000, 1929, 27,491,000

Gross income from farm production, 1932, was estimated at 5,240,000,000 dollars; in 1931, 6,965,000,000 dollars, in 1930, at 9,406,000,000 dollars, in 1929, 11,950,000,000 dollars. The gross income from all crops was, in 1932, 2,282,000,000 dollars, in 1931, 2,766,406,000 dollars, in 1930, 3,813,519,000 dollars, in 1929, 5,433,343,000 dollars. From animals and products, gross income in 1932 was 2,958,000,000 dollars, in 1931, 4,178,795,000 dollars, in 1930, 5,582,520,000 dollars, in 1929, 6,503,667,000 dollars.

Total estimated value of all farm animals on farms in the United States on January 1 was, for 1930, 5,994,970,000 dollars; for 1931, 4,450,708,000 dollars; and for 1932, 3,195,748,000 dollars

In 1931, 1,667,452,000 lbs. of butter, 492,379,000 lbs of cheese, and 1,970,007,000 lbs. of condensed and evaporated milk were produced

In 1930 the estimated production of wool was 851,521,000 pounds from 44,433,000 sheep; in 1931, 369,815,000 pounds from 46,401,000 sheep

The census reports for 1930 show that the value of canned vegetables and soups was 321,004,289 dollars, of canned fruits, 136,265,894 dollars, of dried fruits, 75,176,173 dollars. The total value of canned fruit and vegetable products, in 1930, was 709,361,875 dollars

II. FORESTS AND FORESTRY

The United States forest lands cover 495,879,000 acres, or about one-fifth of the whole country. The classification is as follows — Old growth, 98,855,000 acres, second growth of saw timber size, 89,790,000 acres; second growth of cordwood size or smaller, 120,881,000 acres; fair restocking land, 102,078,000 acres, and non-restocking land, 84,280,000 acres. Ownership of forest land is distributed as follows: Federal Government, 88,629,000 acres, State, county, and municipal, 16,633,000 acres, privately owned, 391,217,000 acres

The net area of the 148 national forests administered by the U.S. Forest Service was on July 1, 1932, 161,860,691 acres

Fire takes a heavy annual toll in the forests, total area burned over in 1931 was 51,678,310 acres. About two thirds of total forest area is now under organized fire protection service.

III. MINING.

The following are the statistics of the metallic products of the United States in 1931, and 1930 (long tons, 2,240 lbs.; short tons, 2,000 lbs.). The values are: For iron, at point of production; for platinum, the value at New York City; for copper, lead and zinc, the values are those of sales; for quicksilver, the value at New York.

The approximate total value of the mineral products in 1931 was 3,180,000,000 dollars; in 1930, 4,764,800,000 dollars.

Oil production in 1931 included 851,081,000 barrels of crude petroleum, 43,617,000 barrels of natural gasoline, and 1,326,000 barrels of benzol. Total value at wells of crude petroleum was 550,630,000 dollars; average price, 0.65 dollar. Number of new oil wells, 1931, was 6,788, number of old wells abandoned, 22,000; number of producing wells, December 31, 1931, 815,850, a loss of 15,220 from 1930. Refinery consumption in 1931 totalled 894,608,000 barrels, of which 847,671,000 barrels were domestic crude, and 46,937,000 barrels were foreign crude petroleum. Production of motor fuel

in 1931 was 18,384,870,000 gallons or 437,735,000 barrels. Output of natural gas, 1931, was 1,637,000 *M* cubic feet, 77 per cent of the domestic consumption was for industrial purposes.

The precious metals in 1930 and 1931 were mined mainly in California, Alaska, South Dakota, Colorado and Utah for gold, and Utah, Idaho, Montana, Arizona, Colorado, and Nevada for silver. The production of gold and silver in the United States from 1792 to 1931 was as follows —

Year	Gold		Silver

Precious stones are found in considerable varieties in the United States, including sapphires (in Montana), turquoise, tourmaline, garnets, beryl, agates, amethyst, ruby, topaz, &c

IV MANUFACTURES.

The following table shows the condition of manufacturing industries in the United States as reported at each census from 1904 to 1929. All figures for 1904 and 1909 and those for wages and horse-power for 1914 and 1919 include data for all establishments reporting products valued at 500 dollars or more, whereas at the censuses for 1921 and subsequent years the corresponding limit was 5,000 dollars. The change affects very slightly the statistics except for the number of establishments, this class in 1919 (65,485 establishments with products valued at less than 5,000 dollars), while representing 22.6 per cent of the total number of establishments, reported only five-tenths of one per cent of the total number of wage earners and three-tenths of one per cent of the total value of products.

¹ Does not include millinery, gloves, footwear, underwear and outerwear made in knitting mills, and corsets.

² Embraces the manufacture of products of boiler shops, foundries, and machine shops, exclusive of products of establishments specializing in specific classes of products such as locomotives, stoves and furnaces, cast-iron pipe, engines and power pumps, machine tools, and textile machinery, which are placed in other classifications.

³ Does not include fur and fur line garments, hats, gloves, boots and shoes, shirts, hosiery, underwear and outerwear made in knitting mills.

⁴ The principal products, in a broad sense classified as chemicals, which are treated as separate industries and not here included are explosives, fertilizers, soap, and wood distillation products.

In certain textile industries the average number of active spindles and looms in the years 1926 to 1931 was as follows¹

Year	Spindles in operation			Wool looms in operation

The production of tin plates and terne plates was, in 1920, 1,445,545 gross tons, in 1928, 1,839,205 gross tons; in 1929, 1,968,280 gross tons; in 1930, 1,763,443 gross tons; and in 1931, 1,458,943 gross tons

According to the Bureau of the Census, there were in 1931¹ 233 blast furnaces (in active plants) with a daily capacity of 141,917 gross tons, in 1929, 273 blast furnaces with a daily capacity of 148,274 tons. In 1931 the output of pig-iron (including blast-furnace ferro alloys) was 18,288,715 gross tons, value 296,212,000 dollars; and in 1929, 42,486,758 tons, value 744,588,193 dollars. Active Bessemer, or modified Bessemer, steel plants in 1931, had 79 converters with a total daily capacity (24 hours) of 47,491 gross tons of ingots or direct steel castings, in 1929, 76 converters with total daily capacity (24 hours) of 43,007 gross tons of ingots or direct steel castings. Active open-hearth steel plants in 1931 had 1,123 basic and acid furnaces with daily capacity (24 hours) 180,861 gross tons, in 1929, 1,140 basic and acid furnaces with daily capacity (24 hours) of 172,338 gross tons. The crucible steel furnaces in active steel plants in 1931 were 36 of 174 gross tons daily capacity (24 hours), in 1929, 46 of 288 gross tons daily capacity (24 hours); and the electric steel furnaces numbered 271 of 6,407 tons in 1931, and 265 of 6,572 tons in 1929

The total value of products of the steel works and rolling mills in 1931 was 1,402,843,188 dollars, compared with 3,365,788,805 dollars in 1929, and in 1927, 2,779,840,238 dollars. The values of the principal products, excluding the values of amounts consumed in the same works, were for 1929 and 1931 as follows —

Products	1929	1931
	Dollars	Dollars
Direct steel castings	191,393,000	59,557,000

In the United States the values are fixed not according to average prices, but according to invoices or shipping papers, which the importers and exporters have to produce. For imports the invoices are signed by an American Consul, for exports the shipping papers are signed by the exporter or agents at the port of shipment. The quantities and values are determined by declarations.

The 'most favoured nation' treatment in commerce between Great Britain and the United States was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1837.

Currency and Credit.

The monetary system has been monometallic since 1878, gold being the standard. There are a number of different types of currency in circulation, the issuance of which are governed by various laws. Gold coin, gold certificates, silver dollars, Treasury notes of 1890, and United States notes are legal tender to any amount. Subsidiary silver coins are legal tender to an amount of Ten Dollars in one payment.

Gold certificates and silver certificates are always backed dollar for dollar by gold or silver, respectively, held in the Treasury. They are receivable for all public dues and may be held by banks as lawful reserve. Treasury notes of 1890 are redeemable in either gold coin or silver dollars. They are being cancelled when received by the Treasury of the United States and are being replaced by silver certificates. United States notes are legal tender for all debts, public and private, except duties on imports and interest on public debt. Federal Reserve Notes, though not legal tender, are receivable by the

government for all public dues and are receivable on all accounts by all Federal Reserve Banks, National Banks, and other member banks of the Federal Reserve System. They are redeemable in gold coin at the Treasury, and in gold or lawful money at any Federal Reserve Bank. National bank notes and Federal Reserve Bank notes are also not legal tender but are receivable for all public dues except duties on imports, and may be used by the Government in all payments except interest on a public debt. They are redeemable in lawful money at the Treasury and at the various banks of issue.

The following statement shows the stock of United States money, including paper currency in circulation in foreign countries and the amount held by the Cuban agency of the Federal reserve banks, on September 30, 1932 —

¹ Does not include gold bullion or foreign coin other than that held by the Treasury, Federal reserve banks, and Federal reserve agents. Gold held by Federal reserve banks under earmark for foreign account is excluded, and gold held abroad for Federal reserve banks is included.

² Includes 1,411,202,000 dollars held for Federal reserve banks and agents.

³ Not included in the total since the money held in trust against gold and silver certificates and Treasury notes of 1890 is included under gold coin and bullion and standard silver dollars, respectively.

⁴ The amount of money held in trust against gold and silver certificates and Treasury notes of 1890, which is equal to the total amount of these certificates and notes outstanding (1,846,441,000 dollars), must be deducted from this total before combining it with money outside of the Treasury to arrive at the stock of money in the United States.

⁵ Money in circulation, December 31, 1932, was 5,676,183,214 dollars, equal to 45 34 dollars per capita.

The coinage of the United States mints in five calendar years was as follows, in thousands of dollars —

Banking.

The banking system of the United States includes (1) National banks supervised by the Federal Government, under the National Bank Act of 1863 and subsequent amendments; (2) State chartered banking institutions,

State banks, trust companies and savings banks organized under the banking laws of the various States, and private banks; (3) Federal Reserve banks operating under the general supervision of the Federal Reserve Board as provided in the Federal Reserve Act of December 23, 1913, and (4) banks for extending agricultural credits operating under supervision of the Federal Farm Loan Board

National banks are required to have a minimum capital of 25,000 dollars. Under certain limitations they are permitted to establish branches within the cities in which they are located. They are authorized to issue circulating notes not in excess of paid-in capital, secured by United States bonds of certain issues deposited with the Treasurer of the United States. On June 30, 1932, 674,625,630 dollars of such bonds were outstanding and 669,570,346 dollars of these were on deposit with the Treasurer to secure circulation. By an act approved July 22, 1932, the eligible list of bonds was, for the next three years, extended by 3,088,813,000 dollars, permitting National banks to issue notes up to their capital (1,568,983,000 dollars on June 30, 1932). National banks (including those in Alaska and Hawaii) on June 30, 1932, numbered 6,150, and reported resources and liabilities as follows:—

Resources	Thousands of dollars	Liabilities	Thousands of dollars
Loans and discounts (including rediscounts and overdrafts)	10,286,377	Capital stock paid in	1,568,983

¹ Including items with Federal reserve banks in process of collection, exchanges for clearing, and other checks on local banks.

² Includes certified and cashiers' checks, and cash letters of credit and travellers' checks outstanding.

For State-chartered banking institutions, minimum capital and other requirements imposed by state banking codes vary from state to state. These institutions (including mutual and stock savings banks and all private banks under state supervision) numbered 19,046 on June 30, 1932 and reported loans of 27,834,837,000 dollars, investments of 18,237,043,000 dollars, deposits (excluding inter bank items) of 41,962,950,000 dollars, and rediscounts and bills payable of 1,238,467,000 dollars.

There is no central bank in the United States. The Federal reserve system, established by Act of December 23, 1913, comprises the Federal Reserve Board of eight members sitting in Washington, and 12 Federal Reserve banks located one in each of the Federal Reserve districts into which the country is divided. Of the Board members, six are appointed for ten-year terms by the President, who designates one to serve as Governor and one as Vice-Governor.

of the Board. The Secretary of the Treasury and Controller of the Currency are members *ex officio* and the Secretary of the Treasury serves *ex officio* as Chairman of the Board. This Board prescribes administrative regulations and exercises general supervisory powers. In each Federal Reserve district the capital of the reserve bank is subscribed by member banks of the district in proportion to their capital and surplus. Member banks include all National banks, except in Hawaii and Alaska, since these banks are required by law to join the system, and such eligible state banks and trust companies as elect to accept the conditions of membership. On June 30, 1932, the number of state members was 835. Total resources of member banks—national and state—amounted on this date to \$35,911,061,000 dollars, being equal to nearly two thirds of the resources of all banks in the country. Member banks are required to deposit their reserves in the reserve banks and only deposit credits in the reserve banks count as legal reserve for the member banks. The reserve banks are authorized to issue Federal Reserve notes secured by gold or eligible paper, with a minimum gold reserve of 40 per cent, to discount eligible paper for member banks, to fix the rate of discount on advances to member banks subject to review and determination of the Federal Reserve Board, to engage in certain open market operations, principally to buy and sell U. S. securities and bankers' acceptances, to function as collection agencies and clearing houses for member banks, and to act as fiscal agents of the United States Government. These banks make no loans to individuals and carry no deposits, except for other banks and for governments. On September 30, 1932, the capital funds and total resources of these banks were as follows:

District	Federal Reserve Bank	Capital paid in and Surplus (in thousands of dollars)	Total Resources (in thousands of dollars)	District	Federal Reserve Bank	Capital paid in and Surplus (in thousands of dollars)	Total Resources (in thousands of dollars)

Banks operating under the supervision of the Federal Farm Loan Board include the Federal Land Banks (12 in number) and the Joint-Stock Land Banks (49 in number) which extend to farmers mortgage loans for terms of 5 to 40 years, and the Federal Intermediate Credit Banks (12 in number) which extend agricultural credits for periods of not more than 3 years. Loans outstanding of the Federal and Joint-Stock Land Banks amounted on September 30, 1932, to 1,582,721,000 dollars, and of the Federal Intermediate Credit Banks to 101,671,000 dollars.

Savings banks and trust companies reported for the fiscal year ending June 30, 1931, total savings deposits of 24,281,846,000 dollars belonging to 44,352,106 depositors, a decrease of 3,925,898,000 dollars and 7,047,340 depositors from the previous year.

Money, Weights, and Measures.

The *dollar* of 100 cents is of the par value of 49.322, or 4.8665 dollars to the pound sterling.

The monetary unit, in accordance with the monetary law of March 14, 1900, is the gold dollar of 25.8 grains (or 1.6718 gramme) 900 fine. The Government undertakes to maintain parity between gold and silver coin, and in 1890 established a fund of 150,000,000 dollars in gold for the repayment of United States notes and Treasury notes in gold at sight. This fund has been increased to 156,089,000 dollars.

Gold coins are 20, 10, 5 and 2½-dollar pieces called *double eagles*, *eagles*, *half-eagles*, and *quarter-eagles*. The eagle weighs 258 grains or 16.71818 grammes .900 fine, and therefore contains 232.2 grains or 15.0464 grammes of fine gold.

The silver dollar weighs 412.5 grains or 26.780 grammes 900 fine, and

therefore contains 371 25 grains or 24 057 grammes of fine silver. Subsidiary silver coins contain 347 22 grains of fine silver per dollar. These are the half-dollar, quarter dollar and dime (one-tenth). There is a 5 cent piece of nickel and a one cent piece of bronze.

Seven kinds of Notes are in circulation in the United States. (1) United States Notes, in denominations of 1, 2, 5, 10, 20, 50, 100, 500, 1,000 and 10,000 dollars (so-called 'Greenbacks') which are covered by a gold reserve of 156 million dollars in the Treasury. (2) Gold Certificates, in denominations of 10, 20, 50, 100, 500, 1,000, 5,000, and 10,000 dollars. (3) Silver Certificates in denominations of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars. (4) Treasury Notes of 1890. (5) Federal Reserve notes in denominations of 5, 10, 20, 50, 100, 500, 1,000, 5,000 and 10,000 dollars. (6) National Bank Notes in denominations of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 dollars. (7) Federal Reserve Bank Notes. Of the note issues only United States Notes, Treasury Notes of 1890, and gold certificates are legal tender. The Treasury notes of 1890 and the Federal reserve bank notes, of which about 4,000,000 dollars were outstanding on September 30, 1931, are being withdrawn from circulation.

British weights and measures are usually employed, but the old Winchester gallon and bushel are used instead of the new or imperial standards. They are —

Wine Gallon = 0 83267 gallon

Bushel = 0 9689 imperial bushel

Instead of the British cwt a *Cental*, of 100 pounds, is used, the *short ton* contains 2,000 lbs, the *long ton*, 2,240 lbs.

CALIFORNIA.

Constitution and Government.—California, first settled in 1769, was from its discovery down to 1846 politically associated with Mexico. On July 5, 1846, the American flag was hoisted at Monterey, and a proclamation was issued declaring California to be a portion of the United States, and on February 2, 1848, by the treaty of Guadalupe-Hidalgo, the territory was formally ceded by Mexico to the United States, and was admitted to the Union September 9, 1850.

The Senate is composed of 40 members elected for four years—half being elected each two years—and the Assembly, of 80 members, elected for two years. Regular sessions are held biennially. The State capital is Sacramento.

California is represented in Congress by 2 Senators and 20 Representatives.

Governor—James Rolph, Jr., 1931–35 (10,000 dollars).

Secretary of State.—F. C. Jordan

California is divided into fifty-eight counties, one of which—San Francisco—has a combined county and city government. The legislative

authority is vested in a board of 15 supervisors elected from the city and county at large. Each of the other counties is governed by a board of 5 supervisors elected from districts.

Area and Population.—Area, 158,297 square miles (2,645 square miles being water). Public lands, unappropriated on June 30, 1932, totalled 15,712,567 acres, practically all either mountains or deserts.

DISTRICT OF COLUMBIA.

Government.—The District of Columbia, first settled in 1790, is the seat of Government of the United States, and consists of an area of approximately sixty-nine and one-quarter square miles, which was ceded by the State of Maryland to the United States as a site for the National Capital. It was established under Acts of Congress in 1790 and 1791, which were passed to give effect to a clause in the Constitution of the United States providing for the seat of the Government. Congress first met in it in 1800 and Federal authority over it became vested in 1801.

The present form of local government, which dates from July 1, 1878, is a municipal corporation administered by a board of three Commissioners. Two of these are appointed from civil life by the President of the United States, and confirmed by the Senate, for a term of three years each. The other Commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone has authority to enact legislation and appropriate money for the municipal expenses.

Secretary to the Board of Commissioners —Daniel E. Garges

Area and Population —The area of the District of Columbia is 39 245 square miles, approximately 62 of which are land.

The population at the Federal Census of 1930 was 486,869, including 353,914 white, 887 Chinese, Japanese, Filipinos, Mexicans, and Indians, the remainder (132 068) Negroes, population in 1920, 487,571, including 326,860 whites and 109,966 Negroes.

In 1930, 27 1 per cent of the total population was Negro or of Negro descent, 50 1 per cent of the population (154,882 men and 88,977 women) were gainfully employed. Of the foreign-born white population, representing 6 1 per cent of the total population 9 5 per cent were English, 11 7 per cent Irish, 11 4 per cent German, 16 4 per cent Russian, 14 5 per cent Italian, and 5 6 per cent Canadian.

In 1930 census, 1,803 men and 2,992 women were reported divorced.

A portion of the District of Columbia embracing 6,654 acres is known in law as the City of Washington, 'The Federal Capital'. But that name is a geographical distinction only, as the territory it includes is not a municipal government separate from the rest of the District of Columbia, but is subject to the same national and municipal control in every respect.

Religion and Education.—The most numerous religious bodies are Roman Catholic with 67,348 adherents (1926), Negro Baptists (41,262), Protestant-Episcopal (28,347), Methodist, Presbyterian, and Lutheran. Total membership, all denominations, 238,871.

In 1930, illiterates 10 years of age or older numbered 6,611 (4,591 Negroes), which was 1 6 per cent of the total in that age group, 74 per cent (83,701) of the persons between the ages of 5 and 20 were attending school. The 172 public school buildings of the District in 1931 housed 1,921 white teachers and 60,021 white pupils, and 924 coloured teachers and 30,810 coloured pupils. In addition, night schools accommodated 9,128 white and 4,480 coloured students. There were, included in the above, junior high schools with 518 teachers and 14,105 pupils; senior high schools with 589 teachers and 15,449 students; 2 teachers' colleges with 45 teachers and 744 pupils. There were also 12,335 students in private elementary and secondary schools in 1931. Total expenditure on public education (1931), 13,109,464 dollars.

Superior education is given in Georgetown University, an institution under

the management of the Jesuit Order, founded in 1795 ; it has 371 professors and 2,633 students, the George Washington University, non sectarian, founded in 1821, has 450 professors and instructors, and 8,631 students, the Howard University, principally engaged in the higher education of coloured students, was founded in 1867, and has 271 professors and 2,464 students, the Catholic University of America, a post graduate institution, was founded in 1884, and has 135 professors and 952 students, the American University has 95 professors and 610 students

Finance and Defence.—The revenues of the District are derived from a general real and personal property tax, taxes on corporations and companies, licences for conducting various businesses, and from appropriations out of the Treasury of the United States

In 1931-32 the finance of the District of Columbia was as follows —

	Dollars
Balance, July 1, 1931	13,303,824

On June 30, 1932, the National Guard consisted of 178 officers, 3 warrant officers and 2,363 enlisted men.

Production and Industry.—Florida is largely a peninsula stretching from north to south, between the Atlantic Ocean and the Gulf of Mexico. Agriculture is pursued generally in all parts of the State. In 1930 there were 58,966 farms with a total acreage of 5,026,617, of which 1,969,000 acres were crop land. Total value of all farm property in 1930, 488,792,738 dollars. Gross income, 1931, from crops, 81,505,000 dollars, from live-stock, 20,120,000 dollars. Florida leads in production of grape fruit (9,200,000 boxes in 1932). Other crops are oranges (14,300,000 boxes in 1932), truck products, tobacco (2,961,000 pounds in 1932), rice, maize, oats and peas. In 1932 the cotton area was 96,000 acres, and the yield 15,000 bales. On January 1, 1932, the State had 19,000 horses, 42,000 mules, 43,000 sheep, 508,000 pigs, 103,000 milch cows, and 441,000 all cattle. The total national forest area in June, 1930, was 843,180 acres.

Chief mineral products are phosphate rock (8,248,071 long tons in 1930), stone (1,796,670 short tons); fuller's earth, lime, kaolin, and mineral waters. Mineral output, 1930, was valued at 15,484,206 dollars.

Florida, with its long coast line, has extensive fisheries; the industry yields 20,000,000 dollars annually. The chief fishery products are oysters, shad, red snappers, mullet, turtles, and sponges, of which Florida has almost a monopoly.

Manufacturing industries in 1929 had 2,214 establishments with 64,936 wage earners, earning 54,661,968 dollars, using raw material, fuel and power valued at 97,102,524 dollars; output was valued at 232,912,261 dollars. The tobacco industries are important.

The State has facilities for transportation both by land and water. In 1931 there were 5,628 miles of steam and 226 miles of electric railway. The Atlantic Coast Line, the Seaboard Air Line, and the Florida East Coast are the leading railroads. State maintained highways total 8,338 miles, of which 4,866 miles are surfaced.

On September 30, 1932, Florida had 49 national banks with deposits of 120,718,000 dollars and loans and investments of 125,245,000 dollars, and 135 State banks and trust companies with deposits of 49,663,000 dollars and loans and investments of 47,585,000 dollars.

ILLINOIS.

Government.—Illinois was first discovered by Joliet and Marquette, two French explorers, in 1673, and settled in 1720. In 1763, the country was ceded by the French to the British. In 1783, Great Britain recognised the title of the United States to Illinois, which was organised as a territory in 1809 and admitted into the Union on December 3, 1818. The Legislature consists of a Senate of 51 members elected for four years (about half of whom retire every two years), and a House of Representatives of 153 members elected for two years. Sessions are biennial. Qualified electors are all citizens 21 years of age, subject to the usual residential qualification.

The State is divided into districts, in each of which one Senator and three Representatives are chosen, for the election of the latter each elector has three votes, of which he may cast one for each of three candidates, or one and a half for each of two, or all three for one candidate. The State is represented in Congress by two Senators and twenty-seven Representatives.

MASSACHUSETTS.

Constitution and Government—In 1615 the Plymouth Company undertook exploring expeditions to New England, and in 1620 obtained a Royal Charter granting sovereign powers over the region lying to the north of Virginia. The first permanent settlement within the borders of the present state was made at Plymouth in December, 1620, by the Pilgrims from Holland, who were separatists from the English Church. This was the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, and from that beginning the Massachusetts Bay Colony was formed. In 1630 Boston was settled. In 1629 the whole region called New England was formed into a province. By a special Charter the Government was divided between the colony of Plymouth and that of Massachusetts Bay, but in 1692 they were re-united, and thenceforward acted together both in peace and war. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part and became one of the thirteen original States of the Union.

The legislative body, consisting of a Senate and a House of Representatives, is styled the General Court of Massachusetts. The Senate consists of 40 members elected biennially by popular vote. The House of Representatives consists of 240 members, elected in 159 districts, each of which returns one, two, or three representatives according to the number of legal voters. There is an annual session of the Legislature.

All citizens of the United States, 21 years of age and over, who can read and write the English language may vote in all State, city or town elections, provided they are not paupers or under guardianship, and provided they have lived one year in the State and six months in the city or town.

The State sends 2 Senators and 15 Representatives to the Federal Congress.

Governor—Joseph B Ely, 1933-34 (salary, 10,000 dollars)

NEW HAMPSHIRE.

Government.—New Hampshire, first settled in 1623, was one of the thirteen original States of the Union. The sense of the people as to the calling of a convention for the revision of the Constitution must be taken every seven years. If a convention is held, the amendments to the Constitution which it proposes must be laid before the people, and approved by two-thirds of the qualified voters present and voting on the subject. The Legislature consists of a Senate of 24 members, elected for two years, and a House of Representatives, of from 418 to 427 members, the number depending on the population. Electors are all citizens 21 years of age, resident six months in the place to be represented, able to read and write, duly registered and not paupers or under sentence for crime.

NEW MEXICO.

Constitution and Government.—New Mexico from the time of its discovery by Europeans was politically associated with Mexico. Its first settlement dates from 1664. When the war with Mexico was concluded on February 2, 1848, New Mexico was recognised as belonging to the United States, and on September 9, 1850, it was made a Territory. Part of the Territory was assigned to Texas. Later Utah was formed into a separate

Territory; in 1861 part of New Mexico was transferred to Colorado, and in 1863 Arizona was disjoined, leaving to New Mexico its present area. In January, 1912, New Mexico was admitted to Statehood. It sends to the National Congress two Senators and one Representative.

The State legislature consists of 24 members of the Senate and 49 members of the House of Representatives, meeting biennially.

NEW YORK STATE

Constitution and Government.—From 1609 to 1664, the region now called New York was claimed by the Dutch, then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. Between July 9, 1776, and April 20, 1777, a Convention framed a Constitution under which New York was transformed into an independent State, afterwards, in 1788, entering the Union as one of the 13 original States.

The Senate consists of 51 members elected every two years, and the Assembly of 150 members elected annually. The State capital is Albany.

The right of suffrage resides in every citizen 21 years of age, who has been a citizen for 90 days, and has resided for a year in the State, four months in the county, and 30 days in the election district preceding election.

The question whether there shall be a Convention to revise the Constitution has to be submitted to the people every 20 years, beginning with 1916, 'and also at such times as the Legislature may by law provide'.

The State is represented in Congress by 2 Senators and 45 Representatives.

Governor.—Herbert H. Lehman, 1933-37 (25,000 dollars)

Secretary of State.—Edward J. Flynn

For local government the State is divided into 62 counties.

Cities are in 3 classes, the first class having each over 175,000 inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in a board of Aldermen, elected for 2 years. Its members are the President, elected by the city, the presidents of the 5 city boroughs (Bronx, Manhattan, Brooklyn, Queens, and Richmond), 67 aldermen, one elected in each of the 67 districts; constituting a board of 73 members. The chief executive officer is the Mayor, elected for 4 years; he appoints all the heads of departments, except the Comptroller, who is elected by the city.

OKLAHOMA.

Government—The Territory of Oklahoma was organized in 1890 from the western part of Indian Territory and was thrown open to white settlers. In 1893 its boundaries were extended and on November 16, 1907, it was combined with the Indian Territory and admitted as a State. The constitution provides for the *initiative* and the *referendum*, 8 per cent. of the legal voters having the right to propose any legislative measure and 15 per cent to propose amendments to the constitution by petition.

The Legislature consists of a Senate of 44 members who are elected for 4 years, and a House of Representatives elected for 2 years, and consisting of not less than 115 nor more than 120 members (118 in 1932-33). Qualified as electors are (with necessary exceptions) all citizens resident one year in the State, six months in the county, 30 days in the precinct. Indians, to be qualified as voters, must have severed tribal relations.

Governor—William H. Murray, 1931-35 (7,500 dollars)

Secretary of State—R. A. Sneed

The State is represented in Congress by 2 Senators and 9 members of the House of Representatives. The State capital is Oklahoma City.

Area and Population.—Area, 70,057 square miles, of which 643 square miles are water. Census population on April 1, 1930, 2,396,040, an increase of 367,757, or 18.1 per cent., since 1920. Indian reservations in 1932 had an area of 60 square miles with a population of 92,725, including the Five Civilized Tribes.

The population at the date of recent Federal censuses was —

Year	White	Coloured ¹	Total	Per square mile

OREGON

Government—Oregon, first settled in 1838 and organized as a Territory in 1848, was admitted into the Union on February 14, 1859. The Legislative Assembly consists of a Senate of 30 members, chosen for four years (half their number retiring every two years), and a House of 60 Representatives, elected for two years.

The Constitution was amended in 1902, to reserve to the voters the power to propose laws and amendments to the Constitution and to enact or reject the same at the polls independently of the Legislative Assembly, and also to give them the power at their own option to approve or reject at the polls any Act of the Legislative Assembly. This is known as the initiative and referendum. The Legislature in 1927 adopted an official State song entitled 'My Oregon'.

At the General Election held November, 1912, suffrage was extended to women and 'every citizen of the United States of the age of 21 years and upwards who shall have resided in the State during the 6 months immediately preceding such election shall be entitled to vote'.

The State is represented in Congress by two Senators and three Representatives.

Governor—Julius L. Meier, 1931-1935 (7,500 dollars)

In 1930 census, 10,126 men and 8,783 women were reported divorced.

The Indian reservations in 1931 comprised 1,756 square miles with a population of 4,260 Indians.

The largest towns, according to the 1930 census, are Portland, with a population of 301,815; Salem, 26,266; Eugene, 18,901; Klamath Falls, 16,098; Medford, 11,007; Astoria, 10,849.

The chief religious bodies in the State are (in order of strength) Catholic (55,574 members in 1926), Methodist (32,135), Presbyterian (21,545), Disciples of Christ, Baptist, and Jewish. Total membership, all denominations, 232,731. Marriages in 1931, 7,346; divorces, 2,417; annulments, 27.

In 1930, illiterates 10 years of age or older numbered 7,814 (1.0 per cent. of that age group), of whom 3,743 were foreign-born whites, of persons between the ages of 5 and 20, 197,719 (75 per cent.) were attending school. School attendance is compulsory for all children from 8 to 16 years of age; children between the ages of 16 and 18 years, if legally employed, must attend part-time or evening schools unless they have already acquired the ordinary branches of learning. For school year ending June 30, 1931, the 2,081 public elementary schools had 5,629 teachers and 152,950 enrolled pupils; 274 four-year high schools had 2,870 teachers and 49,034 pupils; and the three Normal Schools at Monmouth, Ashland, and La Grande had (1931-32) 104 teachers, 1,378 regular students and 1,122 summer students. Total expenditure on education (1930-31), 19,028,501 dollars. Beginning July, 1932, higher education was placed under a single board administering the three normal schools, the State University, the State Agricultural College and the Medical School. The Oregon State Agricultural College at Corvallis, has an agricultural experiment station, with nine branch stations, an engineer-

ing experimental station, an extension service in agriculture and home economics, and 7 schools of instruction. In 1932 the instructional staff numbered 233 engaged in instruction, and the student enrollment, 5,024, of whom 3,388 were in regular full-year degree courses. The University of Oregon, organized at Eugene in 1876, had in 1931-32, 178 professors and 4,837 students. There are also Methodist, Presbyterian, Catholic, Congregational, and Baptist Colleges.

On January 1, 1932, the amount of the State bonded indebtedness was 58,054,510 dollars. In 1931 the assessed value of real and personal property was 1,092,807,215 dollars.

On June 30, 1932, the National Guard of the State of Oregon consisted of 212 officers, 3 warrant officers and 2,854 men.

Production and Industry.—Oregon is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown. East of the Range lack of rainfall has been to some extent compensated for by irrigation by private companies as well as by State and Federal enterprise. Stock raising is the principal industry of eastern Oregon. With a stand of 400 billion feet Oregon has now one fifth of the standing timber of the United States, about four billion feet are cut annually. In 1929, the forest area was 24,000,000 acres. National forest lands on June 30, 1932, amounted to 11,939,400 acres.

In 1930 there were 55,153 farms with an acreage of 16,548,678, total value, land and buildings, was 630,847,927 dollars. In 1930 only 4,172,519 acres out of total area of 61,118,480 acres were devoted to general farm crops, 13,227,141 acres of Government land were still open to entry. Gross income, 1931, from crops, was 32,131,000 dollars, from live stock, 48,051,000 dollars. Oregon leads in the production of hops (13,020,000 pounds in 1932). Leading crops are winter wheat (15,020,000 bushels in 1932), oats (6,802,000 bushels), fresh prunes (36,000 tons), hay (1,705,000 tons), and potatoes (5,040,000 bushels). Rye, barley, flax-seed, and hops are important crops. Fruits are grown, especially plums, apples, pears, peaches, strawberries, cherries, and loganberries. Dairying is an important industry, and there is an active live-stock industry. Horses on January 1, 1932, numbered 185,000; milch cows, 214,000, all cattle, 790,000, sheep, 3,000,000, swine, 280,000. Range land for grazing cattle and sheep, 45,000,000 acres. In 1931 the wool-clip yielded 23,750,000 pounds from 2,900,000 sheep, mohair, 392,500 pounds from 115,000 goats. The salmon, sturgeon, halibut, and oyster fisheries are abundant. During 1931 the fish caught in the Columbia river—of which two-thirds was canned on the Oregon side—totalled 353,699 cases. The total canned salmon pack on the Oregon coast, 1931, was 12,834 cases.

Oregon's mineral resources include gold, silver, mercury and platinum as well as useful earths, but output is not large. Output of mercury was 5,011 flasks in 1931, valued at 437,716 dollars, output of gold in 1931, 15,301 ounces, valued at 316,300 dollars, silver, 7,487 ounces, copper, 9,332 pounds. Value of mineral products, 1930, was 6,169,898 dollars.

In 1929 Oregon had 2,466 industrial establishments employing 65,521 wage earners who received in wages 86,865,165 dollars, the cost of the materials, fuel and power used was 205,547,630 dollars, and the value of the product 412,330,623 dollars.

Oregon has good water facilities in the Pacific Ocean, and the Columbia, Willamette, and Snake rivers. The Dalles and Celilo Canal, completed in 1915, opens the Columbia and Snake rivers to navigation to a length of 570 miles from the ocean. Large ocean going vessels can navigate the Columbia and Willamette rivers to Portland, 100 miles inland, through a channel 35 feet in depth. The State had (1931) a total steam railway mileage of 5,150 besides 540 miles of electric railway track. The State maintains 4,468 miles of primary highways, of which 3,765 are surfaced and 2,031 miles of secondary highways (1,452 miles surfaced), the counties maintain 43,650 miles of highway of which 11,130 miles are surfaced.

On June 30, 1932, 79 National banks had capital of 13,280,000 dollars and total resources of 202,716,000 dollars, the 91 State banks, capital of 5,413,500 dollars, total resources of 49,090,000 dollars.

PENNSYLVANIA.

Government.—Pennsylvania, first settled in 1682, is one of the thirteen original States in the Union. The General Assembly consists of a Senate and a House of Representatives. Every citizen 21 years of age, resident in the State for one year, and in the election district for two months preceding the election, is entitled to vote, provided that he has paid a State or County tax within two years and at least one month before the election. The Senate consists of 50 members chosen for four years, 25 Senators being elected at each General Assembly election bi-annually. The House of Representatives consists of 208 members chosen for two years. The State is represented in Congress by two Senators and 84 Representatives.

Governor.—Gifford Pinchot, 1931-1935 (18,000 dollars)

Secretary of State—Richard J. Beamish.

For local administration the State is organised in counties, cities, boroughs, townships, and school districts. There are 67 counties. The State Capital is Harrisburg.

Area, Population, Education.—Area, 45,126 square miles, of which 294 square miles are water area (excluding 891 square miles of Lake Erie) Census population April 1, 1930, 9,631,350, an increase of 911,383, or 10.5 per cent, since 1920. Population at various Federal censuses

The chief religious bodies in the State are the Roman Catholic with 2,124,382 members in 1926, United Lutheran (551,202), Methodist, (452,145), Presbyterian, Dutch Reformed and Baptist. In 1926 a total of 135 denominations reported 13,843 churches and 5,218,023 members.

In 1930, illiterates 10 years of age or older numbered 240,323 (3.1 per cent of that age group), of whom 187,942 were foreign born whites, of persons between the ages of 5 and 20, 2,135,688 (69.4 per cent) were attending school. School attendance is compulsory for children 8 to 14 years of age for the full school term; children employed who have passed the sixth grade are required to attend a continuation school. In the year 1929-30, the 12,000 public elementary schools had 48,206 teachers and 1,495,919 enrolled pupils. The 1,188 high schools had 17,840 teachers and 406,454 pupils. Public kindergartens numbered 502. Enrolment in all day, part time and evening vocational classes offered by the public schools of the Commonwealth averages 17,550. In the 14 State normal schools there were (1929-30) 614 teachers and 10,284 students. Total expenditure on public school education

(1929-30) was 254,989,289 dollars, including normal schools, colleges and universities.

The more important academic institutions (1932) within the State are as follows:—

Begun	Institutions	Professors	Students
1740	University of Pennsylvania, Philadelphia (non-sect.)	1,215	8,285

Finance and Defence.—For the biennium ending May 31, 1931, the statement on finance, including general and special funds, is as follows —

	Dollars
Balance in Treasury, June 1, 1929	75,504,102
Receipts, all funds, June 1, 1929, to May 31, 1931	398,184,839
Total	473,688,941
Expenditures, all funds, June 1, 1929, to May 31, 1931	392,483,289
Balance in Treasury, May 31, 1931.	80,795,652

On May 31, 1931, the outstanding bonds of the State amounted to 89,362,320 dollars. The assessed value of taxable real property in 1929 amounted to 9,365,418,071 dollars, and of personal property to 3,279,432,186 dollars.

The National Guard on June 30, 1932, consisted of 856 officers, 12 warrant officers and 11,270 men.

Production and Industry.—Agriculture, market-gardening, fruit-growing, horticulture and forestry are pursued within the State. In 1930, there were 172,419 farms; the farm area was 15,309,485 acres, of which 7,813,826 were crop land and 4,576,192 pasture land, the remainder being woodland. The total value of farm land and buildings in 1930 was 1,203,017,645 dollars, implements and machinery, 154,756,206 dollars. Gross income from crops, 1931, was 75,717,000 dollars, from livestock, 181,435,000 dollars. Pennsylvania leads, usually, in the production of buckwheat (2,070,000 bushels in 1932). In 1932, production of winter wheat was 13,335,000 bushels, rye, 1,550,000 bushels, oats, 24,072,000 bushels; corn, 46,435,000 bushels, potatoes, 21,450,000 bushels, tobacco, 43,888,000 pounds, tame hay, 2,606,000 tons, total crop of apples, 2,527,000 bushels, commercial apples, 1,250,000 barrels, peaches, 1,676,000 bushels, pears, 384,000 bushels, and grapes, 22,970 tons. On January 1, 1932, farm animals in Pennsylvania were: 297,000 horses, 50,000 mules, 1,041,000 dairy cows, two year old and over, 1,398,000 all cattle, 491,000 sheep, 655,000 swine. Wool-clip, 1931, was 3,248,000 pounds. National forest lands, total 317,833 acres, State forests, 1,429,133 acres.

Pennsylvania so far exceeds all the rest of the States in the value of its mineral products as to stand almost alone. This is due principally to the State's leadership in the production of coal. Mineral products in 1930 reached a value of 778,523,421 dollars, of which 69,384,837 tons of anthracite coal represented 354,574,191 dollars and 124,462,787 short tons of bituminous, 213,584,000 dollars, the two accounting for 73 per cent. of the total. In 1931 anthracite coal output reached 59,581,000 tons and bituminous, 97,276,000 tons. Other minerals that year were petroleum (11,892,000 barrels), natural gasoline or petrol (14,399,000 gallons), iron ore (magnetite and hematite, 436,920 long tons), pig-iron, 5,099,016 long tons, natural gas (88,706 million cubic feet in 1930). Pennsylvania has important quarries, cement works, and brick and tile works. The output of coke in 1931 was 8,380,249 short tons, cement, 28,510,231 barrels.

The Pennsylvania Department of Internal Affairs, 1930, reported 20,065 industrial establishments, with an aggregate capital of 5,498,843,100 dollars, employing 165,728 salaried officials and 1,191,983 wage-earners, salaries amounted to 425,822,400 dollars, and the wages to 1,462,942,206 dollars. The value of the output was 6,531,113,200 dollars. Metals and metal products had the largest value, 2,701,954,800 dollars. Then came textiles, 986,756,000 dollars, mines and quarries, 605,336,200 dollars, food products, 627,222,200 dollars, chemicals, 425,915,800 dollars, paper and printing, 380,248,700 dollars, clay, glass and stone products, 188,089,500 dollars, leather and rubber products 175,454,800 dollars, lumber products, 102,219,600 dollars, tobacco products, 93,200,900 dollars. Pennsylvania has 34.5 per cent of the country's blast furnace capacity, 36.4 per cent of its iron and steel manufactures, 40.9 per cent of its silk manufactures. In 1929 Federal census showed 16,870 manufacturing establishments employing 1,006,946 (wages, 1,390,782,260 dollars), using raw materials, fuel and power valued at 4,000,673,484 dollars, and with output valued at 7,387,856,808 dollars.

The total value of imports at the port of Philadelphia for the fiscal year ending June 30, 1932, was 96,488,283 dollars, and of exports, 55,101,557 dollars. In 1932, the aggregate length of steam railroads within the State was 11,155 miles, and the total of all tracks operated by electric railways, 3,621 miles.

Roads The State road system, not including township, city and borough roads and streets, has a mileage of 13,384 miles of which 10,270 miles have been hard surfaced.

On September 30, 1932, 752 national banks had deposits of 1,818,068,000 dollars, 488 State banks and trust companies had deposits of 1,927,322,000 dollars.

RHODE ISLAND

Constitution and Government—The earliest settlers in the region which now forms the State of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non acceptance of the prevailing religious beliefs. The first of the settlements was made in 1636, and their numbers and importance quickly increased, settlers of every creed being welcomed. In 1647, a patent was granted for the government of the settlements, and on July 8, 1663, a charter was executed recognising the settlers as forming a body corporate and politic by the name of the English Colony of Rhode Island and Providence Plantations. On May 29, 1790, the State accepted the Federal Constitution and entered the Union as one of the 13 original States. The General Assembly consists of a Senate and a House of Representatives. The Senate has 42 members, besides the Lieutenant Governor who is *ex officio* President of the Senate. The House of Representatives consists of 100 members. Every citizen, 21 years of age, who has resided in the State for 2 years, and is duly registered, is qualified to vote. The State is divided into 5 counties and 39 cities and towns. The Capital is Providence.

Governor—T F Green, 1933-35 (8,000 dollars)

Secretary of State—Louis W Cappelli

Rhode Island is represented in the Federal Congress by 2 Senators and 2 Representatives.

In 1930, it had 495,489 farms covering 124,707,130 acres, value of farm lands and buildings was 3,597,407,000 dollars. There are 1,567,642 acres of irrigable lands in Texas, of which 797,695 acres are irrigated. Gross income, 1931, from crops, was 265,559,000 dollars, from live stock, 176,485,000 dollars. Texas leads in the production of cotton (4,445,000 bales from 13,922,000 acres in 1932), of grain sorghum (34,815,000 bushels), of onions (4,826,000 bushels) and of pecans (19,500,000 pounds). Other important crops in 1932 were (in bushels) maize, 102,726,000; wheat, 29,580,000, oats, 41,976,000; rice, 8,880,000, potatoes, 4,154,000, sweet potatoes, 7,600,000. Other products are peanuts (125,950,000 pounds), vegetables, and fruits (especially peaches, oranges, and grape-fruit). The State has a very great live stock industry, leading in the number of all cattle (6,127,000 on January 1, 1932), of sheep (7,312,000), and of mules (260,000), it also had on that date 704,000 horses, 1,283,000 milch cows, and 2,033,000 swine. It leads in wool and mohair production, the clip in 1931 amounting to 59,860,000 pounds of wool from 6,838,000 sheep and of 16,400,000 pounds of mohair from 3,570,000 goats.

The chief mineral products are petroleum, sulphur, natural gas, cement, and quicksilver. In 1931, 170,950,000 barrels of petroleum were produced, natural gasoline or petrol, 426,695,000 gallons. Some quicksilver is produced. Texas leads in production of petroleum (with California a close second) and in natural gas, output in 1930, 517,880,000 *M* cubic feet. Output in 1931, coal, 850 000 short tons, cement, 6,189,137 barrels. Salt, sulphur (2,129,594 tons in 1931), gypsum, granite, sandstone, and limestone are also produced. Western Texas has extensive undeveloped potash fields. Total value of mineral products in 1930, 450,373,151 dollars.

In 1929, there were in the State 5,187 manufacturing establishments with 131,503 wage earners earning 147,888,053 dollars. The cost of material, fuel and power used was 997,932,276 dollars, and the value of the output was 1,449,801,916 dollars.

A large trade passes through the port of Galveston, which is by far the most important outlet for the cotton grown in the United States, and as a commercial port is now second only to New York. Imports in the fiscal year ending June 30, 1932, 13,680,446 dollars, exports, 274,032 963 dollars. A permanent causeway over 2 miles in length now connects Galveston with the mainland. The steam railways in the State (January 1, 1931) had a total mileage of 17,203 miles (main lines). There are 518 miles of electric inter-urban railway in active operation in Texas. The State maintains 18,868 miles of highways, of which 11,585 miles are surfaced.

There are 1,047 miles of navigable water in the rivers of Texas. The long coast line with its good harbour facilitates traffic by sea. The Houston Ship Channel (50 miles long), connecting Houston with the Gulf of Mexico, makes that city the largest inland cotton market of the world.

Texas had on June 30, 1932, 493 national banks with capital of 71,682,000 dollars and total resources of 809,613,000 dollars, 557 State banks and trust companies had deposits of 145,033,060 dollars.

West Virginia has extensive mining and quarrying industries, ranking fifth for mineral production in the United States. In 1931, output of petroleum was 4,472,000 barrels, natural gasoline, 52,844,000 gallons, natural gas output (1930), 144,180 million cu ft. The coal area extends over 17,280 square miles, and 99,769,000 short tons were produced in 1931. The quarries yield sandstone and limestone. Salt production in 1931 was 35,480 tons. The total value of the mineral output in 1930 was 290,118,914 dollars.

In the State there are important leather industries. The census of manufactures of 1929 showed 1,487 manufacturing establishments employing 84,460 wage earners who earned 114,130,578 dollars. The cost of the raw material, fuel and power used was 253,609,031 dollars, and the value of the output was 500,393,174 dollars.

In 1932, there were within the State 4,125 miles of steam railway, besides 381 miles of electric railway track. The State has a new system of improved highways totalling 4,315 miles, of which 3,275 miles are surfaced.

On September 30, 1932, West Virginia had 83 national banks with deposits of 100,660,000 dollars, 130 State banks and trust companies had deposits 111,120,000 dollars.

WISCONSIN

Government—Wisconsin, first settled in 1670, became part of the Territory of Michigan and was admitted into the Union on May 29, 1848. The legislative power is vested in a Senate and Assembly. The Senate consists of 33 members elected for a term of four years, one half (16 or 17 alternately) of the members being elected each two years. The Assembly consists of 100 members, elected for a term of two years, all of the members being elected at the same time.

All qualified electors in the district to be represented who have resided one year within the State, except members of Congress and office holders under the United States, are eligible to the Legislature. Wisconsin has universal suffrage for all citizens over 21 years of age. There is no property or educational qualification.

Wisconsin is represented in Congress by 2 Senators and 10 Representatives.

Governor—A. G. Schmedeman, 1933-35 (7,500 dollars).

Secretary of State—Theodore Dammann.

The State Capital is Madison, 1930 census population, 57,899.

WYOMING

Government—Wyoming, first settled in 1834, was admitted into the Union on July 10, 1890. The Legislature consists of a Senate of 27 members, elected for four years (about one half retiring every two years), and a House of Representatives of 62 members elected for two years.

The suffrage extends to all citizens, male and female, who can read, and who have the usual residential qualifications.

Governor—Leslie A. Miller, 1933-1935 (8,000 dollars)

Secretary of State—A. M. Clark

The capital is Cheyenne. The State sends to Congress 2 Senators and 1 Representative.

Area and Population.—Area, 97,914 square miles, of which 320 square miles are water. Of the total, about 3,300 square miles are comprised within the Yellowstone National Park, which since 1872 has been reserved for public uses. Public lands unappropriated on June 30, 1932, totalled 14,728,953 acres.

Census population on April 1, 1930, 225,565, an increase of 31,163, or 16 per cent since 1920.

The Federal census results since 1900 were as follows —

Years	White	Coloured ¹	Total	Per Sq Mile	Years	White	Coloured ¹	Total	Per Sq Mile
1900	89,051	3,480	92,531	0.9	1920	190,146	4,256	194,402	2.0

¹ Including Negroes, Asiatics and Indians

² Including Mexicans, previously counted as 'white'

In 1930, the population according to sex and race was —

—	White	Mexican	Negro	Asiatic	Indian	Total
Male	117,703	4,582	690	819	982	124,785
Female	96,364	2,702	551	410	668	100,760
Total	214,067	7,174	1,250	1,229	1,845	225,565

In 1930, the foreign born white population numbered 19,658 (8.7 per cent of the total), of whom 2,105 (10.7 per cent) were English, 1,783 (9.1 per cent) Swedes, 1,714 Germans, 1,653 Italians, 1,424 Scotch, 1,375 Russians, 1,322 Yugoslavs, and 1,136 Canadians. Of the total population in 1930, 31.1 per cent were urban, 0.6 per cent Negro, and 41 per cent (79,690 males and 12,761 females) gainfully employed. The 1930 census showed 1,611 men and 1,057 women divorced.

The Indian reservation within the State has (1930) an area of 3,120 square miles, and a population of 2,014.

The largest towns are Cheyenne (capital), with census population in 1930 of 17,361, Casper, 16,619, Laramie, 8,609, Sheridan, 8,536, Rock Springs, 8,440.

Education —In 1930, illiterates 10 years of age or older numbered 2,895 (1.6 per cent of that age group), of persons between the ages of 5 and 20, 51,671 (73.7 per cent) were attending school.

The religious bodies with the most numerous membership are the Roman Catholic, with 18,772 members in 1926, Mormon (11,610), Methodist (6,923), and Presbyterian. Total, all denominations, 62,975.

In 1932, the 1,467 public schools had 2,084 teachers, and 56,670 enrolled pupils, there were 138 accredited high schools with 689 teachers and 13,482 pupils. The University of Wyoming, founded at Laramie in 1887, had in 1932, 125 professors and instructors and 1,225 students. There is also a State Agricultural College at Laramie. Expenditure on elementary and secondary schools in the school year 1931-32 was 5,911,205 dollars.

Finance and Defence.—The cash receipts and disbursements of the State (exclusive of trust funds) for the year ending September 30, 1929, are given as follows —

	Dollars
Balance, October 1, 1928 .	4,435,175
Receipts for 1928-29 .	10,834,276
Total .	15,269,451
Disbursements 1928-29 .	11,319,277
Balance, Sept 30, 1929	3,950,174

On September 30, 1929, the bonded debt amounted to 1,790,000 dollars, and the assessed value of property in the State in 1929 to 447,954,091 dollars.

The National Guard on July 31, 1932, consisted of 51 officers, 1 warrant officer and 589 enlisted men.

Production and Industry.—Wyoming is semi arid and agriculture is carried on by irrigation and by 'dry farming'. In 1930, there were 16,011 farms, with a total area of 23,525,234 acres, of which 2,293,000 acres were crop land, total value of farm land and buildings, 206,852,000 dollars. Gross income, 1931, from crops was 7,697,000 dollars, from livestock, 25,677,000 dollars. Crops include alfalfa (561,000 tons in 1932), sugar beets (512,000 tons), potatoes (1,650,000 bushels), as well as cereals. The wool clip (1931) yielded 34,560,000 pounds of wool. The domestic animals on January 1, 1932, were 166,000 horses, 87,000 milch cows, 863,000 all cattle, 4,128,000 sheep, and 123,000 swine.

In 1932, 4,765,854 acres in the State were national forest land. The State has numerous fish hatcheries which stock the streams with trout, and also possesses the largest elk herds in the world.

Wyoming is largely a coal producing State. In 1931 the output of coal was 5,006,000 short tons, petroleum, 11,120,000 barrels, of natural gasoline, 51,523,000 gallons, iron ore production, 180,771 long tons, natural gas (1930), 43,219 million cubic feet. The quarries yield limestone and sandstone, besides phosphate rock (1,339 tons in 1930). Total value of mineral products in 1930 was 46,735,184 dollars.

Manufactures are mostly confined to production for local consumption. The 1929 Federal census showed 251 industrial establishments, the wage-earners numbered 6,288, wages paid amounted to 10,306,294 dollars, the materials, fuel and power used cost 63,516,935 dollars, and the output amounted to 96,466,461 dollars.

In 1932, the steam railways in the State had a length of 2,037 miles.

The State highway system comprises 3,231 miles, of which 1,971 miles are surfaced. The system of motor stage route transportation is still common.

On September 30, 1932, Wyoming had 25 national banks with deposits of 24,664,000 dollars, 47 State banks and trust companies had deposits of 14,422,000 dollars.

OUTLYING TERRITORIES.

ALASKA.

Government.—Alaska was purchased by the United States from Russia under the treaty of March 30, 1867, for 7,200,000 dollars, but was not organized until 1884, when it became a "District" governed by the laws of the State of Oregon. By Act of Congress approved August 24, 1912, Alaska became a Territory,* with a legislative assembly consisting of 8 senators, elected for 4 years, and 16 representatives, elected for 2 years. Congress reserved to itself the right to legislate on certain subjects, so that the

Territory is now governed conjointly by Congress at Washington and by its local legislative assembly. Regular sessions are held biennially and last for 60 days. Special sessions may be called by the Governor. The latter is appointed for four years by the President.

To facilitate administration, Congress in 1927 authorized the appointment of 3 ex officio Commissioners who enjoy large powers. The Territory is represented in Congress by one Delegate, elected biennially, who sits in the House of Representatives, but has no vote.

Governor.—Geo A Parks, 1929-33 (10,000 dollars)

Secretary of Alaska —Karl Theile

Area and Population—The gross area (land and water) of the territory is 586,400 square miles. The census population from 1900 to 1930 is shown as follows —

Year	Population	Per Sq. Mile	Year	Population	Per Sq. Mile
1900	63,592	0.1	1920	55,096	0.1
1910	64,356	0.1	1930	59,278	0.1

Of the population in 1930, 35,764 were males and 23,514 females, 28,640 were whites and 29,983 were Indians, 26 Chinese, 278 Japanese, and 136 Negroes. 46.8 per cent of the population was gainfully employed. About 20,000 people, employed in mines, canneries, and railway construction, spend a few months a year in Alaska, but these are not included in the enumeration, of the 28,640 whites, 10,180 are foreign born.

The largest town is Juneau, the seat of Government, which had (census of 1930) a population of 4,043, the second largest is Ketchikan with a population of 3,796, other towns are Anchorage, 2,277, Fairbanks, 2,101, Petersburg, 1,252, Nome, 1,213, Sitka, 1,056, Cordova, 980, Wrangell, 948, Seward, 835, and Douglas, 693. There are altogether 17 incorporated towns.

Education, Justice—In Alaska many religious missions are at work, representing very diverse denominations. Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist, Baptist, Congregational and others.

In 1931 there were 88 territorial white schools with 5,304 enrolled pupils and 259 teachers. 15 four-year high schools are maintained. Total cost of instruction, 595,193 dollars. Percentage of illiterates, 1930, was 20.1, in 1920, 24.8 per cent, 13.8 per cent was unable to speak English. The Bureau of Education of the Federal government handles the education, hospitalisation and general care of the native population. There are 98 native schools in operation (210 teachers, 4,206 pupils), 3 industrial schools, and 7 hospitals. The Alaska Agricultural College and School of Mines is the only institution offering advanced instruction. For the administration of justice the territory is a judicial district with 4 subdivisions and 4 courts.

Finance.—Federal receipts and expenditures in the territory, administered by the various Federal Departments in Washington in recent years, have been as follows, in dollars —

	Receipts	Expenditure		Receipts	Expenditure
1927	4,529,403	10,884,513	1929	5,474,883	11,433,967
1928	4,236,832	11,147,773	1930	4,846,276	12,331,647

Territorial receipts (largely from licences to conduct businesses) and expenditures for two bienniums are 1929-31 (actual), receipts, 2,415,893 dollars, expenditures, 2,468,659 dollars, 1931-33 (estimated), receipts, 1,890,390 dollars, expenditures, 2,572,451 dollars

The Territory has no funded debt

Production and Industry—In some parts of the territory the climate during the brief summer is not unsuitable for agricultural operations. There are agricultural experimental stations which are giving valuable demonstrations. In 1930, there were 500 farms with a total area of 525,942 acres, of which 8,825 acres was improved land. Total value of all farm property in 1930 was 3,310,560 dollars. The 1930 census showed 37,287 dogs used as work animals and 463 horses. In Northern and Western Alaska are 200,000 square miles of treeless region worthless for agriculture but capable of furnishing pasturage for 4,000,000 reindeer. There were (in 1931) approximately 712,500 reindeer in the country distributed in 78 herds and valued at 9,000,000 dollars. During 1931, 1,015,645 pounds of reindeer, valued at 100,298 dollars, were shipped from Alaska. The Government owned fur seal herd of the Pribilof Islands, administered by the Department of Commerce, comprises about 85 per cent of the fur seals of the world. This herd contained 1,045,101 animals on January 1, 1931, number of skins shipped to the United States, 1931, 49,984. Proceeds from the sale of these skins are divided among the United States, Great Britain and Japan. About 275 blue fox ranches, stocked with 36,000 blue foxes, represent an investment of 6,850,000 dollars. Value of furs and fur skins (including seal skins) shipped to the United States in 1931, 2,811,067 dollars.

The southern coastal section of Alaska contains large and readily accessible timber resources which maintain a considerable sawmill industry and are capable of supporting an immense pulp and paper development. This timber is largely included in two National Forests aggregating 21,345,925 acres and officially estimated to contain 84,760 million board feet of timber, 74 per cent western hemlock and 20 per cent Sitka spruce.

The chief industries of Alaska are salmon fishing and mining. In 1930, all the fisheries of Alaska employed 29,283 persons, the value of the products was 50,795,819 dollars, exports to United States in 1931, 35,445,446 dollars. Salmon canning in 1931 turned out 5,568,583 cases, valued at 81,000,000 dollars.

Gold is worked in South-East Alaska, where a low-grade ore is found, in the interior on the Yukon river, and at Nome and other places on the west coast. Output of gold in 1931 was 466,006 ounces, valued at 9,633,200 dollars, of silver 397,944 ounces, valued at 115,405 dollars, and of copper 23,238,034 pounds. Tin ore deposits near Cape Prince of Wales are of a high grade, lead, coal, petroleum, marble, gypsum, quicksilver and lode platinum metals are found. Total value of mineral output in 1916, 48,000,000 dollars, in 1931, 12,278,000 dollars.

Commerce and Communications.—The value of the domestic merchandise shipped from the United States to Alaska in the year ending December 31, 1931, amounted to 22,483,601 dollars and from Alaska to the United States, 43,276,364 dollars, shipments of gold and silver to the United States, 9,018,378 dollars. Merchandise from foreign ports amounted to 546,598 dollars and exports to foreign ports, 314,908 dollars, including gold and silver. In the calendar year 1930, 3,654 vessels of 912,656 tons entered the ports of Alaska in domestic and foreign trade, and 3,345 vessels

of 884,590 tons cleared. The chief ports of shipment of the United States to Alaska are on Puget Sound.

There is a railway of 112 miles from Skagway to the town of White Horse (in the Canadian Yukon region), thence transport is by coach or airplane, or, in summer, by steamer. The Copper River and North Western Railway has completed a line (standard gauge) from Cordova to Kennecott, a distance of 197 miles. The Alaska railroad runs from Seward to Fairbanks, a distance of 467 miles (509 miles with branches). Total mileage, 1930, 914. Six aviation companies maintain services between 67 landing places throughout the year. Alaska has 1,589 miles of wagon roads, 1,404 miles of sled roads, and 7,860 miles of trails. The Alaskan towns are connected with the United States and with Canada by telegraph, there are 3 broadcasting stations and wireless telephony is being extended. There are about 180 post offices, and good mail services in the territory.

The territory had, on June 30, 1931, four National Banks with capital of 275,000 dollars and total resources of 5,012,000 dollars, 13 territorial banks had a total capital of 640,000 dollars, and total resources of 8,435,000 dollars.

HAWAII

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 22° 15' north latitude, and 154° 50' and 160° 30' west longitude. They are about 2,020 miles south west of San Francisco, and are in the line of steamer travel between San Francisco and the Orient, Victoria, B C, Australia and New Zealand.

Government—The Hawaiian Islands (formerly known as the Sandwich Islands), celebrated in August, 1928, the 150th anniversary of their discovery by Captain James Cook, the English navigator. The islands formed during the greater part of the nineteenth century an independent kingdom, but in 1893 the reigning Queen, Liliuokalani (died November 11, 1917), was deposed and a provisional government formed, in 1894, a Republic was proclaimed, and in accordance with the request of the people of Hawaii expressed through the Legislature of the Republic, and a resolution of the United States Congress of July 6, 1898 (signed July 7 by President McKinley), the Islands were on August 12, 1898, formally annexed to the United States. On June 14, 1900, they were constituted as the

Territory of Hawaii The Organic Act has since been amended several times. There is a Legislature of two Houses, a Senate of 15 members elected for four years, and a House of Representatives of 30 members elected for two years. Sessions, limited to 60 days, are held biennially. In 1930 the registered voters numbered 52,127, including 19,858 Hawaiian and part Hawaiian, and 10,244 American. The Governor and Secretary are appointed for four years by the President of the United States.

Governor —Lawrence M. Judd, 1929–1933

Secretary of the Territory —Raymond C. Brown

The Territory is represented in Congress by a delegate elected biennially to the House of Representatives.

Area and Population—The area of the 20 islands is 6,407 square miles with population (census of 1930) of 368,336 (222,640 males and 145,696 females). The principal islands of the group are Hawaii, 4,016 square miles (population, 1930, 73,325), Maui, 728 (48,756), Oahu, 598 (202,887), Kauai, 547 (35,806), Molokai, 261 (5,032), Lanai, 140 (2,356), Niihau, 97 (136), Kahoolawe, 69 (2). The Capital, Honolulu on the Island of Oahu, had a population of 137,582, and Hilo, 19,468. The number of Hawaiians was 22,636, and part-Hawaiians, 28,224. There were 27,179 Chinese, 139,631 Japanese, 27,538 Portuguese, 63,052 Filipinos, 6,671 Porto Ricans, 1,219 Spanish, 44,895 Americans, British, Germans, and Russians, 6,461 Koreans, 780 others.

Religion and Education—The Hawaiians are Christians. There is an American Protestant Episcopal bishop at Honolulu, also a Roman Catholic bishop, and ministers of various denominations.

Elementary education is free. The language in the schools is English. In 1931 there were 183 public schools with 2,656 teachers and 76,530 enrolled pupils, also 70 private schools with (1930) 599 teachers and 12,178 enrolled pupils. The pupils in public schools in 1931 were classed by ancestry as follows: Hawaiian, 3,206, part Hawaiian, 8,073, Portuguese, 5,881, other Caucasians, 3,210, Porto Rican, 1,257, Spanish, 253, Filipinos, 3,807, Asiatic, 49,936, others, 907. There are a normal and training school, a reformatory industrial school for boys and one for girls, a territorial trade school, a school for the deaf and blind, a school for feeble minded, also a territorial university (University of Hawaii, Honolulu), founded in 1907, with 92 instructors and 2,372 students in 1930 (including part-time summer session and extension students).

Justice.—Hawaii has a supreme court, circuit courts, a court of domestic relations, district courts, and a land registration court. The circuit judges sit also as juvenile courts. The judges of the supreme and circuit courts are appointed by the United States President, the district magistrates by the Chief Justice of Hawaii. There is also a United States District Court, the judges of which, and the U S Marshal, are appointed by the President.

Finance and Defence.—Revenue is derived mainly from taxation of real and personal property, income and inheritance taxes, licences, land sales and leases, waterworks and road, school and poll taxes. For the year ending June 30, 1931, the receipts were 13,594,170 dollars and disbursements, 11,895,693 dollars.

On June 30, 1931, the bonded debt amounted to 32,000,000 dollars. In 1931 the assessed value of property was 332,198,835 dollars.

On June 30, 1932, the Hawaiian National Guard contained 1,593 men, and

100 officers The Federal Government, with a view to the protection of the Pacific coast and the control of the Panama Canal, has constructed extensive naval works at Pearl Harbour, about 7 miles from Honolulu, and military works at Honolulu and other places on the island of Oahu.

Production and Commerce.—In 1930, there were 5,955 farms with an acreage of 2 815,026, of which 440,579 acres were improved land Total value of all farm property in 1930 was 111,780,432 dollars Sugar and pine apples are the staple industries, while coffee, hides, bananas, and wool are also exported For the year 1930, the raw sugar production amounted to 848,694 short tons, and refined sugar to 17,092 short tons The pineapple crop in 1930 totalled 12,672,296 cases The forest reserves in the Territory now number 63, aggregating 1,021,314 acres, public lands, 1,593,097 acres

For the year ending December 31, 1931, the imports amounted to 91,213,049 dollars, and the exports to 100,915,783 dollars The shipments of merchandise from the United States to Hawaii for the year ending Dec 31, 1931, amounted to 79,092,387 dollars, and those from Hawaii to the United States to 101,548,555 dollars, of which 60,765,276 dollars were for sugar 35,341,062 dollars for pineapples, 1,066,872 dollars for coffee The imports from the United Kingdom (Board of Trade figures) in 1931 totalled £1,792, and the exports to the United Kingdom, £154,873

Shipping and Communications.—Several lines of steamers connect the islands with the mainland of the United States, Canada, Australia, the Philippines, China, and Japan In 1931, 1,283 vessels of 10,355,882 tons entered ports of the islands An inter island steam navigation company with 12 steamers provides communication between the different islands There are about 1,038 miles of railway in the islands, including 667 miles of plantation railways There are telephones on the islands of Oahu, Maui, Hawaii, Kauai, and Molokai Honolulu is lighted by electricity and has lines of electric tramways Wireless telegraphy is in operation between the islands for commercial purposes and for communication with vessels at sea and with the Pacific coast, and also with Japan Hawaii is connected by cable with both shores of the Pacific Commercial air services between the islands carried 14,114 passengers in the year ending June 30, 1931

Twenty nine banks were in operation on June 30, 1931 Total deposits were 83,805,596 dollars There were 176,072 savings bank accounts with total deposits of 41,587,979 dollars, representing 236 dollars to each depositor

PUERTO RICO

Government—Puerto Rico, by the treaty of December 10, 1898 (ratified April 11, 1899), was ceded by Spain to the United States. The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved May 17, 1932. Its constitution is determined by the 'Organic Act' of Congress (1917), known as the 'Jones Act'. Puerto Rico has representative government, the franchise being restricted to citizens twenty one years of age or over, residence (one year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. The executive power resides in a Governor appointed by the President of the United States. The legislative functions are vested in a Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). Puerto Rico is represented in Congress by a Resident Commissioner to the United States elected by the people for a term of four years.

There are seven heads of departments, who form a Council to the Governor, known as the Executive Council. The judiciary comprises an Attorney General and staff and a United States court appointed by the President, a Supreme Court of 5 members also appointed by the President, 8 District Courts with 11 Judges appointed by the Governor, and 36 municipal courts, the judges and officials of which, as well as the 56 justices of the peace, are appointed by the Governor.

Governor.—James R. Beverley, appointed January 20, 1932 (10,000 dollars)

Executive Secretary—E. J. Saldaña

Area, Population and Education.—The Island has an area of 3,435 square miles, and a population, according to the census of April 1, 1930, of 1,543,913, or 449.5 per sq mile. Males numbered 771,761, females, 772,152.

The population in 1930 was distributed as follows—White, 1,141,114, coloured, 397,156, foreign born white, 5,605, other races, 38. During the decade ending 1930 the white population increased by 20.9 per cent, and the coloured population by 13.1 per cent. Of the working population, 52 per cent were engaged in agriculture, fisheries, and mining, 9 per cent in domestic and personal service, 22 per cent in manufacturing industries, 11 per cent in trade and transportation.

Chief towns, San Juan, 114,715 inhabitants (1930), Ponce, 87,604, Mayaguez, 58,270.

Education was made compulsory in 1899. In 1932, there were 4,477 class-rooms in 1,997 school buildings, with 229,169 pupils enrolled, and a well distributed system of night schools and kindergartens. There are also a number of private schools. The University of Puerto Rico, established in

Rio Piedras, 7 miles from San Juan, is open to both men and women. In 1930, the percentage of illiteracy was 41.4 of those 10 years of age or older.

Finance—Receipts and disbursements for the year ending June 30, 1932 —

	Dollars
Balance, July 1, 1931	553,027
Receipts, 1931-32	12,753,399
Total	13,306,426
Disbursements, 1931-32	12,432,004
Balance, July 1, 1932	874,422

The assessed value of property on June 30, 1932, was 324,309,117 dollars. The total outstanding bonded indebtedness is 29,097,000 dollars.

The police force consists of 817 men, and the National Guard (on June 30, 1932) of 89 officers and 1,431 enlisted men.

Production, Industry and Commerce—The cultivated land in 1930 was divided into 52,113 holdings. The chief products of the island are sugar, tobacco, coffee, pineapples, grape fruit, coconuts, honey, oranges, and other tropical fruits, sea island cotton, textile fibres, bat guano, phosphate, and vegetables, and the principal industries are manufactures of cigars, cigarettes, hats, embroideries, Irish linen suits, and the refining of sugar, distilling of alcohol and the canning of fruits and vegetables. The disastrous hurricane of September, 1928, destroyed millions of coffee trees, reducing exports of coffee from 19,354,000 pounds in 1927-28 to 589,402 pounds in 1931-32, valued at 154,903 dollars. It also damaged tobacco seed beds, reducing exports of tobacco and manufactures from 24,884,000 dollars in 1926-27 to 9,189,456 dollars in 1931-32. But sugar production flourishes. Sugar crops for three years: 1929, 586,760 tons, 1930, 787,796 tons, and 1931, 992,432 tons. Raw sugar exported in 1931-32 amounted to 816,604 tons, valued at 47,279,561 dollars. Exports of refined sugar, 1931-32, amounted to 191,629,453 lbs., valued at 7,838,650 dollars. In 1931-32 exports of fresh pineapples amounted to 1,896,728 dollars.

Gold, silver, iron, copper, bismuth, tin, mercury, platinum and nickel are found in the island, but the only established mining industry is that for manganese ore, exports, 1931-32, 2,865 tons valued at 70,929 dollars. There are very productive salt works.

In the fiscal year ending June 30, 1932, imports into Puerto Rico amounted to 61,271,101 dollars (United States merchandise amounting to 52,826,794 dollars), exports were valued at 86,416,938 dollars (83,645,863 dollars to the United States). Imports from the United Kingdom (Board of Trade figures) for calendar year 1932, £98,462, exports to United Kingdom, £70,130.

Shipping and Communications.—In 1931-32, 3,364 American and foreign vessels entered and cleared Puerto Rico from the United States and foreign countries.

There are over 1,080 miles of road in the Island, and about 310 miles of railway. The railway system connects towns on the west coast and now almost encircles the Island, and penetrates the interior. There are 35,419 miles of telephone, and 1,734 miles of telegraph wire. There are 96 post offices, 87 telegraph stations and five wireless stations.

The Puerto Rican island of Vieques, 13 miles to the east, is about 21 miles long and 6 miles broad, and has 10,682 inhabitants, who grow sugar and

rear cattle The island is fertile and healthy The island of Culebra, between Puerto Rico and St. Thomas, has a good harbour.

VIRGIN ISLANDS OF THE UNITED STATES

Government—The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark, for 25,000,000 dollars, in a treaty ratified by both nations and proclaimed January 25, 1917 Under an Act of Congress, approved March 3, 1917, known as the Organic Act, all military, civil, and judicial powers were vested in a Governor, appointed by the President of the United States, with the advice of the Senate, the Danish code of laws, dated April 6, 1906 (along with Tax and Customs laws) was continued in effect except where incompatible with the new sovereignty Danish citizens residing in the islands were permitted to declare their Danish citizenship before a court of record, failing to do that, they were held to have accepted citizenship in the United States. On February 25, 1927, full American citizenship was granted to the natives St Thomas is the capital

The islands comprise two municipalities, viz the Municipality of St. Thomas and St John, and the Municipality of St Croix The legislative functions are vested in the Colonial Council of each Municipality, that of St Croix being composed of 18 members elected by popular elections and of 5 members appointed by the Governor, and that of St Thomas and St John consisting of 11 elected members and 4 appointed by the Governor. The members serve for 4 years. The franchise is vested in every man of unblemished character who has resided in the islands for 5 years, who has attained the age of 25 years, and has an income of at least 1,500 francs a year The Government is now strictly civil, having been transferred in 1931 from the U S Navy Department to the Department of the Interior

There are six heads of Departments, who form the Governor's cabinet There is one Judge of the District Court for the Virgin Islands, and four Police Courts, presided over by magistrates

Governor.—Paul M Pearson, assumed office March 18, 1931

Government Secretary.—Boyd J Brown

Area, Population and Education.—The Virgin Islands group, lying about 60 miles due east of Porto Rico, between the Atlantic Ocean

and Caribbean Sea, comprises the Islands of St. Thomas (32 square miles), St Croix (82 square miles), St John (19 square miles), and about 50 small islets or keys, mostly uninhabited and unnamed. The total area of the three principal islands is 133 square miles.

The population, according to the census of April 1, 1930, is 22,012, compared with 26,051 in 1917, a decrease of 4,039 or 15.5 per cent. Population has slowly declined since 1835 when it stood at 43,178. Lack of employment has caused persistent emigration. Of the present total, 61.3 per cent is urban, 9.1 per cent is white, 78.3 per cent Negro and 12.4 per cent mixed; 16.1 per cent are illiterates. The populations of each of the islands are 9,834, 11,413, and 765. The islands contain 3 towns, St. Thomas (formerly Charlotte Amalie) on the island of St. Thomas, with a population of 7,036, and Christiansted and Frederiksted, on the island of St. Croix, with populations of 3,767 and 2,698 respectively. Education is compulsory. In St. Thomas there are 9 public and 5 private and parochial schools, 1,883 pupils and 54 teachers, and in St. John there are 5 public schools with an enrolment of 164 pupils and 9 teachers. In St. Croix there are 9 public schools and 6 private and parochial schools; total enrolment, 2,091 with 50 teachers. There are churches of the Protestant, Roman Catholic, and Jewish faiths in St. Thomas and St. Croix.

Finance—Revenues are derived from customs, export tax on sugar, income tax, real and personal property tax, trade tax, pilotage charges, &c. Estimated revenue for fiscal year ending June 30, 1932, 1,171,995 francs. Expenditures are estimated at 4,749,897 francs (1 franc = 19½ cents, U.S.). The annual deficit in the operation of the government is met by appropriations by the Congress of the United States.

Production and Industry—The census of 1930 shows 193 farms in St. Croix, 55 in St. Thomas and 81 in St. John, a total of 329. St. Thomas is the leading port in the Virgin Islands with coaling and oil fuelling stations. The island of St. John is noted for its bay oil, extracted from the leaves of the bay tree, and St. Thomas for the finished product of bay rum. Exports in 1931-32, 69,000 gallons compared with the average annual export, 1920-29, of 82,000 gallons. St. Croix is the largest and most fertile of the islands, and its industries are mainly sugar cane (output, 4,500 tons in 1932) and cattle raising, the latter utilising 80 per cent. of the land.

Total exports in the fixed year 1931-32 were 656,532 dollars, imports, foreign and domestic, 1,796,420 dollars. Exports to United Kingdom (Board of Trade figures) for 1932, 2027, imports from United Kingdom, 42,671.

Communication—The Bermuda and West Indies Steamship Co., Ltd., and the Munson Line maintain regular monthly passenger and freight services from New York to St. Thomas, St. Croix and lower islands. The Ocean Dominion Steamship Co. operates a monthly service from New York to St. Thomas, St. Croix and Leeward Islands. Several companies operate regular service from New York to San Juan, Puerto Rico, whence frequent steamer service may be had to ports in the Virgin Islands. There is a weekly air-mail service with Continental United States. There is a powerful radio station at St. Thomas and cable offices in St. Thomas and St. Croix.

Money and Banking—The official money of the islands is that issued by the National Bank of the Danish West Indies, the official unit being the franc valued at 19½ cents United States money. United States currency is

acceptable anywhere on the islands, the dollar being worth 1 04 dollars in Danish West Indian currency. United States money will be legal tender in 1934, at which time the charter of the National Bank of the Danish West Indies expires. The bank has its head office in St. Thomas, with a branch in Christiansted and one in Frederiksted.

PHILIPPINE ISLANDS

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

Governor-General—Theodore Roosevelt, appointed January 20, 1932

Government—The Governor General is appointed by the President of the United States, with the consent of the Senate. Under him are the secretaries of six executive departments, who, with the exception of the Vice Governor (appointed by the President) who acts as Secretary of Public Instruction, must all be Filipinos. The Governor General may veto any appropriation Bill, if passed again over his veto, the bill goes to the President of the United States for final action. Congress has power to annul any Act of the Legislature, but has never exercised it.

The legislature consists of the Senate (24 members) and the House of Representatives (with 96 members). All are elected by popular vote, with the exception of nine representatives and two senators, who are appointed by the Governor General to represent certain districts. Suffrage is enjoyed by all males 21 years of age or older who formerly exercised the right or, failing that, have property of at least 500 pesos value, and can read or write Spanish, English, or a native language. Registered voters (1931) number 1,489,693.

Congress on January 17, 1933, passed over the President's veto the Philippine Independence Bill, submitting to a referendum of the Philippine voters (within 2 years) a proposal for independence, effective 10 years thereafter on lines laid down by Congress. If the referendum is affirmative, the Governor General will be superseded by an American High Commissioner, during the intermediate period, the President will retain some control over Philippine legislation, will supervise foreign affairs and will continue policing the Islands, duty free imports into the United States will be restricted. After Independence, the United States retains the right to military and naval stations, and free trade with the United States ceases.

A Council of State, created by Executive Orders in 1918 and 1928, is composed of the Governor General, the Presidents of both houses of the Legislature, the leaders of the majority parties in both houses and the six Secretaries of the Departments. Its purpose is to advise the Governor-General on matters of public policy.

The provincial and municipal governments are supervised by the Department of the Interior through the Executive Bureau and the Bureau of Non-Christian Tribes. Each province has a provincial governor and a provincial board, usually filled by popular vote. Each town or municipality has a president and a municipal council of from four to eight councillors,

elected by popular vote except in some special instances. On December 31, 1931, there were 446 Americans and 21,720 Filipinos in Government service.

Area and Population.—The group is composed of 7,083 islands and islets, of which only 466 have areas of one square mile or over. Total area, 114,400 square miles. The eleven most important islands with their areas are: Luzon, 40,814 square miles; Mindanao, 36,906; Samar, 5,124; Negros, 4,903; Palawan, 4,500; Panay, 4,448; Mindoro, 3,794; Leyte, 2,799; Cebu, 1,695; Bohol, 1,534; and Masbate, 1,255 square miles.

The total population was estimated in 1931 at 12,420,927 and in 1932 at 12,590,369 or 110 per square mile. Philippine Census of 1918 gave 10,314,310, chiefly of Malay race, 91 per cent of whom are Christians, and only 932,953, or 9 per cent, are Moros and Pagans, though these are fast taking advantage of the all pervading system of public schools. About 1,500,000 have some knowledge of English and about 660,000 some knowledge of Spanish, for Government and commercial purposes these two languages are used. The population of Manila, the capital and the leading commercial and industrial centre, was estimated in June, 1932, at 341,034.

Other towns with their estimated present population, including suburbs, are: Iloilo on Panay, 43,913; Cebu on Cebu, 79,008; Legaspi (formerly Albay), 34,560; Laoag, 42,046; Vigan, 19,285 (all on Luzon); and Zamboanga on Mindanao, 24,548. Baguio, in the Mountain Province, is the summer capital, corresponding to Simla in India, and has a population of 9,472.

Justice and Defence.—The judiciary consists of a supreme court, with a chief justice (a Filipino) and 10 associate justices (4 Filipinos), 31 judicial districts, each with a judge of first instance, except 11 districts which have 2 judges each, and one, covering the city of Manila, which has 7 judges. In addition there are 19 auxiliary judges of first instance. There are justices of the peace for the various municipalities and municipal districts. Manila has a municipal court of 3 judges.

Public order is maintained through the municipal police and the Philippine Constabulary, latter consisting of 401 officers (15 Americans) and 5,617 enlisted men, distributed at 132 stations throughout the Archipelago. Expenditures on the Constabulary totalled 2,595,254 dollars in 1931. The United States maintains a force of about 11,000 troops of the United States Army, including 6 regiments of Filipino soldiers.

Religion.—The dominant religion of the islands is the Roman Catholic (9,925,479 adherents). In 1902, an independent Filipino Church was founded which adheres to modern science, proclaims that science is superior to Biblical tradition, denies the possibility of miracles, and conceives God as an invisible Father with one essence and a single person. The ritual resembles somewhat that of the Roman Church. Latin was originally prescribed, but the Spanish language is now the official tongue, and encouragement is given to the vernacular dialects. Marriage is allowed to its apostles. According to the Government Census of 1918, the Independent Filipino Church had 1,417,448 followers, but in the last Church Census its followers numbered 4,000,000. Several Protestant denominations have extensive organisations and have many communicants, probably more than 200,000. They co-operate in maintaining a Union Theological Seminary, the Philippine Council of Religious Education, and a National Christian Council, which forwards reform movements, evangelistic campaigns, etc. The American missions look forward to withdrawal within the next decade or two, leaving the indigenous Filipino Protestant Churches to carry on. The Buddhist religion

is professed by 24,263 men and women, while the Mahommedans number 443,037, and are chiefly to be found in the districts of Mindanao and Sulu.

Education.—Education in the public schools of the Philippines is free, secular, and co-educational, its principal aim being the spread of literacy on the basis of a common language, English. In 1930-31, there was an enrolment of 1,205,427 pupils (36.9 per cent of those of school age) in the 7,761 public schools, with 260 American and 28,209 Filipino teachers. The expenditure on public school education for 1930 was 15,539,628 dollars (insular only, excluding provincial and municipal). There are a number of special schools, including the Philippine Normal School, and 8 provincial normal schools, the Philippine School of Arts and Trades, and 26 provincial trade schools, the Central Luzon Agricultural School and 29 provincial agricultural schools, together with some 282 farm settlement schools. For higher education there is the State supported University of the Philippines, with 499 professors, 1932, and 7,597 students, and 35 accredited private institutions of higher learning—among them the University of Sto. Tomas, founded in 1611, the oldest university under the American flag—giving collegiate instruction in liberal arts and sciences and in technical courses. There are in all 363 separate private schools of all grades of instruction accredited by the Government. The total enrolment in these approved private schools and colleges in 1931 was over 100,000, and the total number of instructors and teachers was about 3,749.

There are 195 newspapers and periodicals published in English and other languages.

Finance.—The revenues and expenditures of the central government for five fiscal years were —

	Dollars	Dollars	Dollars	Dollars	Dollars

¹ Estimates

The total bonded debt on June 30, 1932, amounted to 81,833,500 dollars, including provinces and municipalities. Sinking fund, 26,219,767 dollars.

Production and Industry.—The areas of uncultivated land are very considerable. The Archipelago has a total area of 73,214,700 acres, of which 39,657,600 acres or 54 per cent, are suitable for cultivation, only 9,318,000 acres, or 23.5 per cent, were cultivated in 1931. The principal products are rough rice ('palay'), Manila hemp ('abacá'), coconut, sugar cane, corn, tobacco and maguey. There are 44 sugar centrals, output in 1931, 790,400 metric tons. Much uneasiness exists over the efforts of American beet sugar producers to have a tariff placed on Philippine sugar. The principal fruit is the banana, there are also mangoes, papaya, anonas, pilinut (*Canarium commune*), and mandarin and oranges. Production of cleaned rice in 1931 was 1,427,200 metric tons. The cultivation of rubber is increasing yearly, especially in the southern provinces where the large plantations are located, output, about 300 tons. About 96 per cent of the total cultivated area is owned by Filipinos whose farms average 3 acres.

In the production of copra and coconut oil the Islands are classed among the foremost countries in the world. During the year 1931, there were produced 419,600 metric tons of copra, 164,970 tons of coconut oil were exported in 1931.

The live stock industry is increasing steadily. On December 31, 1931, there were 2,076,440 carabaos (water buffaloes), 1,257,970 cattle, 344,448 horses and mules, 2,971,267 hogs.

The commercial forests furnish chiefly cabinet and construction timber, but also gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 97.5 per cent of this belongs to the Government. Exports of logs and sawn timber, 1931, totalled 71,333,760 board feet.

Gold is the principal mineral produced in commercial quantities, chiefly from the Baguio district. Output in 1931, 182,003 ounces valued at 3,762,434 dollars. Some silver (97,098 ounces in 1931) and a small amount of platinum are recovered from the gold mining operations. Chromite has been discovered in Zambales and Panguasinan. The small iron production is consumed entirely in the manufacture of native agricultural implements. Two cement factories have a combined output of 600,000 barrels a year. The total value of mineral production in 1930 was 8,141,483 dollars.

Manufacturing is largely carried on in homes or in small factories, the principal exceptions are 45 sugar centrals, 2 sugar refineries, 9 chocolate and coffee factories, 6 coconut oil mills, 4 desiccated cocoa factories and 17 large cigar and cigarette factories.

Commerce—Free trade exists between the United States and the Philippines, but the American Congress has placed a tariff of about 20 per cent on foreign imports into the Philippines. The values of imports and exports for recent calendar years are stated as follows in U S dollars (50 cents U S currency = 1 peso) —

	1926	1927	1928	1929	1930	1931
Imports	119,298,992	115,851,472	134,656,898	147,160,275	128,092,954	99,178,719

Exports to United Kingdom (Board of Trade figures) for calendar year 1932, £1,692,341, imports from United Kingdom, £694,471. These totals include Guam.

Shipping and Communications.—The overseas trade of the Philippine Islands during 1930, was carried mainly by 361 American vessels aggregating 1,782,891 net tons, 481 British with 1,724,920 net tons, 264 Japanese with 820,644 net tons, 150 German with 546,736 net tons, 24 Philippine with 83,765 net tons, in all 1,548 vessels with a net tonnage of 5,949,224 entered direct from foreign countries, cleared, that year, 1,565 vessels of 6,051,720 net tons. The coastwise trade of the Islands is carried exclusively by domestic vessels.

On January 1, 1932, there were in operation, 989 post offices, 635 money-order offices, 8,583 miles of insular telegraph lines, and 642 miles of cable, with 511 telegraph offices, including 78 radio stations, with 354 combined telephone-telegraph stations. At the same time there were 986 postal savings banks in operation, with 333,623 accounts, amounting to 8,529,954 pesos (Philippine currency).

When the United States entered the islands in 1898 there was but a single line of narrow gauge track running between Manila and Dagupan, a distance of about 120 miles. At the end of 1931, the Manila Railroad Co had 705 miles on Luzon, and the Philippine Railroad Co had 132 miles on Panay and Cebu. The Government has taken over the former of these companies. Total railway mileage, about 837. Total length of roads, 8,905 miles of which 4,785 miles are first class, 2,501 second class and remainder third-class. Besides the foregoing roads there were 2,772 miles of foot and horse trails. January 1, 1932, there were 23,373 motor cars and 14,131 trucks registered.

Banking and Coinage.—There are ten banks doing business in the Islands. Four are foreign: the National City Bank of New York, the Hong-Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia, and China and the Yokohama Specie Bank. Combined resources of all banks on June 30, 1932, was 122,341,000 dollars, capital and surplus.

16,676,000 dollars The Philippine National Bank was inaugurated, under a special charter granted by the Philippine Legislature, on May 2, 1916 The Government has now purchased almost all the privately owned shares of stock of the bank and guarantees the final redemption and payment of the circulating notes of the institution Since July 1, 1916, the Bank has been the sole Government depository This bank and the Bank of the Philippine Islands, founded 1852, are the only ones that have the privilege of issuing notes

The Philippines is on the gold exchange standard

The coins used in the Philippine Islands are of the following decimal denominations Peso, one half peso, peseta (20 centavos), media peseta (10 centavos), all in silver, five centavo, in cupro nickel, and one centavo, in bronze Treasury certificates and bank notes are issued in one, two, five, ten, twenty, fifty, one hundred, two hundred, and five hundred peso denominations The Philippine peso is equivalent to fifty cents of the United States money The maintenance of the parity of the peso with gold is provided for by the Gold Standard Fund Act of June 13, 1922 The peso contains twenty grammes of silver, 800 fine The Philippine coins are now coined at the Mint in Manila Gold coins of the United States are legal tender for all debts, public and private, unless otherwise provided in the contract

GUAM

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26' N, longitude 144° 43' E, is the largest island of that group It was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898) It is a Naval Station and saluting port under the jurisdiction of the Navy Department of the United States A garrison of marines and a shore naval force are maintained here

The length of the island is 32 miles, the breadth from 4 to 10 miles, and the area 206 square miles Agaña, the seat of Government, is about eight miles from the anchorage in Apra Harbour The port of entry is Piti The number of inhabitants (including the military establishment and non native residents) on June 30, 1932, was 19,673, of whom 18,297 were classed as 'natives' The census of April 1, 1930, showed a population of 18,509 The native language is Chamorro, but Spanish and English are also spoken English is the official language

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and judicial power of the Government The judiciary system comprises one police court, an Island Court, a Court of Equity, a Higher Court of Equity, and one Court of Appeal The Spanish Colonial laws, modified when necessary by executive general orders of the Governor, are still in force

Elementary education is compulsory. There are 3,676 pupils registered, 2,390 of whom are of school age (7 to 12) English, handicrafts and agriculture are taught

There is a Government radio station on the island, which is also in cable telegraphic communication with all parts of the world There is an irregular mail service per westbound U S army and navy transports, from San Francisco, via Honolulu, and to Manila

A line of commercial steamers, with scheduled sailings from San Francisco

every 90 days, stops at Guam westbound en route to Manila. The station ship makes about four trips a year to Manila, China, and Japan for freight and coal.

The port is closed to foreign vessels of war and commerce except in special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, cocoa, and sugar, besides valuable timber. Copra (exports, 1931-32, 1,426 tons) and coconut oil are the principal exports. There are about 5,000 head of cattle, including 100 water buffaloes. The imports into the island in the year ending June 30, 1932, amounted to 514,431 dollars, and the exports to 53,821 dollars.

The official currency is that of the United States.

Governor—E. S. Root, Captain U. S. Navy (appointed May 15, 1931).

SAMOAN ISLANDS

(AMERICAN SAMOA)

The history of American Samoa commenced in the year 1872, when the harbour of Pago Pago, in Tutuila, was ceded to the United States for a naval and coaling station. In 1878 rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. On June 14, 1889, a treaty between the United States, Germany, and Great Britain proclaimed the Samoan Islands neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes involving foreigners a Supreme Court of Justice, with an American citizen as presiding judge, was established. This arrangement continued till 1899, when owing to disturbances, the kingship was abolished, and, by the Tripartite Treaty of November 14 of that year, Great Britain and Germany renounced in favour of the United States all rights over the islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany.

The total area of American Samoa is 76 square miles and according to the 1930 census, contained 10,055 inhabitants. The Island of Tutuila 70 miles from Apia, has an area of about 40.2 square miles, with a population of 7,809 (including the island of Aunu'u) according to the 1930 census. Ta'u has an area of 14 square miles, and the other islets (Ofu and Olosega) of the Manu'a group have an area of about 4 square miles with a population of 2,147. Swain's Island, annexed in 1925, is from a mile and a half to two miles in diameter. Population (1930) is 99. The harbour at Pago Pago, which penetrates the south coast like a fiord, is the only good harbour in Samoa. It is a United States naval station.

The Commandant is also the Governor of American Samoa by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions corresponding to the old Samoan political units. In each District there is a Native Governor, County Chiefs and Village Chiefs. All of these officials are appointed by governmental authority although the District Governor has indirect control of the County Chiefs, and the County Chiefs of the Village Chiefs. Judicial power is vested in village courts, in six judicial districts.

courts, and in a High Court. There is a native guard (known as the *Fitaftas*) of 70

There are no public lands in American Samoa. Nearly all the land is owned by natives. The soil is fertile, the fruits comprise orange, lime, banana, mangoes and alligator pears. Copra of excellent quality is abundant.

The Government (1932) maintains 24 public schools, giving every child over 6 years of age the opportunity of an elementary English education. 2,135 pupils are enrolled. All private schools must teach English a percentage of the time. There are four parochial schools under missionary auspices having, in all, six white and six Samoan teachers and about 350 children of all ages, instruction is chiefly in Samoan.

The native taxes, both poll and school, are fixed by the Fono, Advisory Council to the Governor, in November, payable before the following June 30. The average annual output of copra is between 1,000 and 1,500 tons. The chief island products, besides copra, are taro, breadfruit, yams, coconuts, pine apples, oranges, and bananas. Copra is the only article exported. Imports 1931, 148,168 dollars. Exports 1931, 60,132 dollars.

About 30 miles of public roads have been constructed. There is a United States Naval high-powered radio station (open to commercial traffic) on Tutuila, which reaches New Zealand, Australia, Honolulu, the United States, and the islands of the Pacific. The fast mail steamers of the Matson Navigation Company touch here on their regular trips between the United States, Hawaii and Australia.

PART THE THIRD

OTHER COUNTRIES

ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the former Kingdoms of Tigré, in the north-east; Amhara and Gojjam, in the centre, and Shoa in the south, together with the modern acquisitions to the south, Harrar, and the Galla, Shankalla and Dankali territories. The following are the principal provinces into which the country is divided: Harrar, Wollo, Gurage, Kaffa, Gore, Sayu, Benishangul, Wogera, Southern Tigré, Adowa and Aksun, Sokota, Lasta, Goffa, Nekemtî (Lekemptî) and the Western Galla countries, Sellale, Wollaga, Gimira, Sidamo, Arussi, Borana, Gojjam, Gondar, Jimma. The whole area is 350,000 sq miles. For treaties relating to the boundaries of Abyssinia see THE STATESMAN'S YEAR-BOOK for 1907, p. 667, and for 1923, p. 677.

By the convention of Addis Ababa of October 26, 1896, between Italy and King Menelik, the independence of Abyssinia was recognized.

Under an Agreement signed December 13, 1906, on behalf of Great Britain, France, and Italy, the three Powers undertake to respect and endeavour to preserve the integrity of Abyssinia, to act so that industrial concessions granted in the interest of one of them may not injure the others, to abstain from intervention in Abyssinian internal affairs, to concert together for the safeguarding of their respective interests in territories bordering on Abyssinia, and they make agreements concerning railway construction in Abyssinia and equal treatment in trade and transit for their nationals. By an exchange of Notes dated December 14-20, 1925, Great Britain and Italy more specifically defined their respective spheres of interest in Abyssinia, as indicated in the above agreement, in particular Italy recognised the exclusive right of Great Britain to deal with the waters of Lake Tsana, while Great Britain agreed not to oppose any Italian scheme for railway development in the hinterland of Eritrea or Italian Somaliland, which may affect Abyssinia.

On August 2, 1928, Italy and Abyssinia signed a treaty of friendship and arbitration (the first of the kind ever made by Abyssinia), providing for arbitration in all disputes for a period of 20 years. A further agreement was signed at the same time whereby Abyssinia was granted a free zone at the port of Assab in Eritrea, provision was also made for the construction of a motor road from that port to Dessie in Abyssinia.

Government.

Emperor—**Haile Selassie I.**, born July 17, 1891, crowned King (Negus) on October 7, 1928, proclaimed Emperor, after the death of the Empress Zauditu, on April 3, 1930, and crowned Emperor, November 2, 1930. Married Walzeru Menen in 1912, and has 3 sons and 3 daughters. On January 25, 1931, the eldest son, Asfaou Wosan was proclaimed Crown Prince and heir to the throne, he was married on May 9, 1932, to the daughter of Ras Sayoum.

After the overthrow of the Emperor Theodore by the British in 1868, the suzerain power passed to Prince Kassai of Tigré, who assumed the old title of *Negusa Nagast* ('King of Kings'), and was crowned in 1872 as John IV, Emperor of Ethiopia. After the death of this potentate in 1889, Menelik II, King of Shoa (born 1844), became the supreme ruler of Abyssinia.

Menelik died in December, 1913, and was succeeded by Lij Yasu, born in 1896, son of his second daughter, Waizeru Shoaragga and Ras Mikael, the chief of the Wollo Gallas

On September 27, 1916, Lij Yasu was deposed by public proclamation, and Zauditu, another daughter of Menelik, was nominated Empress and 'Queen of Kings of Ethiopia,' and Ras Taffari, son of Ras Makonnen, and great-nephew of Menelik, proclaimed heir to the throne

On July 16, 1931, a constitution was proclaimed This provides for a unified state under the government of the Emperor advised by two nominated chambers. All are equal before the law and succession to the Throne is reserved to the present dynasty

Abyssinia was admitted into the League of Nations on September 28, 1923

Population.

No reliable figures of population exist, but recent estimates indicate a figure of about 5,500,000 The Abyssinians, properly so called, number rather less than 3 millions, and inhabit the provinces of Tigré, Amhara, Gojjam, and Shoa (in part), covering an area of over one third of the whole country They are Christians, and are of Hamitic origin, semiticized by waves of Semitic invasion from Arabia and adulterated by intermarriage with Negro and other conquered races The Gallas, some of whom are Christian, some Moslem, and some Pagan, comprise more than two thirds of the entire population, and are a pastoral and agricultural people of Hamitic origin Ogaden, Issa and other Somalis inhabit Harrar, the Somaliland plateau, and the south east The Danakil are Mohammedans, and are still somewhat turbulent There are also Negroes (in the South-West), and the Falashas (of Jewish religion), in the N E centre with a growing number of foreigners (Indians, Arabs, Armenians, Europeans) in the towns

There are few towns in Abyssinia in our sense of the word—Addis Ababa, Dire Dawa and Harrar being the most important Addis Ababa, the capital, has 60,000 to 70,000 inhabitants with a foreign population of several thousands, of whom the majority are British Indian and British Arab subjects, Greeks and Armenians Dire Dawa contains about 30,000 people, of whom about 300 are Europeans, and the old walled city of Harar has a population of about 40,000, with about 100 foreigners, mostly Indians and Arabs Other important towns, politically or commercially, are Debra Markos, capital of Gojjam, 5,000, Gondar, capital of Amhara, 3,000, Adua, capital of Tigré, 5,000, Axum, ancient capital of Ethiopia, 5,000, Antalo, former capital of Tigré, 1,000, Ankober, former capital of Shoa, 2,000, Debra-Tabor and Makallé, Gore, Saiyu Nekemti, Saméré, 3,000-4,000, and Sokoto, 1,500, important trading centres Gambella, in Western Abyssinia, is a trading station leased to the Sudan Government. It is an important outlet for the trade in the West A service of steamers is maintained from June to November with Khartum

Domestic slavery is a recognized institution, but slave trading, by an ancient law renewed by a decree issued in June 1923, is punishable by death A comprehensive edict of 45 clauses was issued in March 1924, providing for the gradual emancipation of slaves, beginning with the children born of slaves In July, 1931, a further edict was published whereby *inter alia* slaves regain their freedom immediately on the death of their master In August, 1932, a new Slavery Department, independent of the Ministry of the Interior, was constituted by decree.

Religion and Education

Since the conversion of the Abyssinians to Christianity in the fourth century they have retained their connection with the Alexandrian Church through the Abuna, or head bishop, who is always a Copt, and who is appointed and consecrated by the Coptic Patriarch of Alexandria. Under the Abuna is the Itchege, a native ecclesiastical dignitary, who presides over the spirituality, numbering about 100,000 ecclesiastics. In addition to the Itchege, who was consecrated bishop in January 1930, there are four other Abyssinian bishops, who were consecrated as such by the Coptic Patriarch in 1929. Their consecration was a great innovation, as hitherto no Abyssinian priest had been consecrated a bishop. The priestly class is very numerous and the Church holds a considerable proportion of the land. Both Copts and Abyssinians are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451).

Education is mostly in the hands of the priests and monks, but a number of secular schools have been founded in recent years. There are 4 at Addis Ababa, 2 at Harar, and others at Jijiga, Gore, Sidamo, and Dessie. In addition, a few foreign missions, Swedish, American, French, Italian and German, carry on a limited amount of educational work. The Greeks and Armenians have their own schools.

Justice

Justice is administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. The *Felha Nagast*, or Code of Laws, deals with ecclesiastical, civil and penal law. The legal system is said to be based on the Justinian Code. The penal code is based on the Mosaic law. Foreigners are subject to the jurisdiction of a special ('mixed') court or to their own consular Courts according to circumstances. Administration of Justice is very defective, but punishments for crimes are less barbarous than formerly.

Defence.

The Abyssinian Army in the field consists of two main parts. The standing army composes the nucleus, and the remainder of the forces are drawn from the chiefs and their retainers summoned in time of war, a sort of militia. Besides the above, a varying number of irregulars join the army on the outbreak of war, every man, except the priests, being an actual or potential soldier. The standing army, instituted by Menelik, forms in effect the paid standing garrison of each province, and amounts altogether to something under 100,000 men. Both they and the militia, amounting to perhaps 300,000-400,000 men, are very loosely organized, and have nothing in the shape of transport, and little modern equipment. A Belgian military mission was engaged in 1929 and is now at work training some 2,500 men of the Royal Bodyguard. The latter is armed with a certain amount of modern armament, including a 5 ton tank given to the king by the Duke of Abruzzi during his visit to Abyssinia in May, 1927. A beginning has been made with the formation of an Air Force, which has been started under French auspices.

Agriculture and Industry.

The chief industries are pastoral and agricultural. Cattle, sheep, and goats are numerous. The horses of the country are small but hardy, and make excellent polo ponies, mules are bred, being used as pack animals, donkeys are also small and serve for baggage animals. Cotton, the sugar cane, date-palm, coffee, and vine thrive well in many districts, but, except coffee, are nowhere

extensively cultivated. The production of Harari coffee (long berry Mocha) is on the increase. Besides this, which is cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, wax, barley, millet (dhurra), wheat, gesho (which serves as a substitute for hops), and tobacco, but, with the exception of hides, skins, wax, grain and coffee, not in sufficient quantities for export. Manufacturing industries are practically non-existent. The forests abound in valuable trees including rubber. Iron is found in some districts and is manufactured into spears, knives, hatchets, &c. Placer gold mining and washing are carried on in the western districts, coal, copper and sulphur have been found, also platinum. There are said to be valuable deposits of potash salts in the Asal salt plains in the north eastern part of the country, and their exploitation has been carried on with the aid of Italian capital.

Foreign enterprise has begun to establish itself in the country, two Belgian companies are working coffee plantations, and a Franco-Belgian company is experimenting on a large scale with cotton.

Commerce.

The total trade of Abyssinia (export and import) in 1931 was valued at 1,275,295*l*, of which nearly 80 per cent. passes through French Somaliland.

The principal artery of trade is the Franco-Ethiopian railroad, but caravans also do a large trade in the interior. The chief trade routes besides the railway are the following — (1) Khartum-Gambella, Khartum-Gallabat, and Sudan, (2) Mombasa-Nairobi-Moyale (British East Africa), (3) Zeila-Jijiga, Hargeisa-Ogaden (British Somaliland), (4) Massawa-Asmara-Gondar-Assab-Dessie (Italian Eritrea), (5) Mogadishu-Lugh-Dolo-Arusi (Italian Somaliland).

The exports consist mainly of hides and skins (including leopard and monkey), coffee, wax, ivory, civet, and native butter. The imports comprise grey sheeting, cotton yarns, artificial silk, corrugated sheets and bars, hardware, cement, kerosene and petrol, glass and salt. The imports are chiefly from England, France, India, Italy, Germany, Japan, and the United States. The value of the leading imports into Abyssinia from and *via* the Sudan in 1931 were — cotton and silk goods, £E 29,625 (£E 29,926 in 1930), salt, £E 3,349 (£E 13,329 in 1930); other goods, £E 18,556 (£E 27,189 in 1930). Exports from Abyssinia to and *via* the Sudan in 1931 were — coffee, £E 97,311 (£E 219,133 in 1930), other goods, £E 15,573 (£E 11,586 in 1930).

The total trade between Abyssinia and Great Britain for 5 years (according to Board of Trade Returns) was as follows —

—	1928	1929	1930	1931	1932
	£	£	£	£	£
Imports from Abyssinia	351,079	166,891	229,032	216,517	188,864
Exports to Abyssinia	19,954	38,785	33,848	22,686	18,796
Re-exports to Abyssinia	752	1,148	958	662	1,065

Communications.

Roads in Abyssinia are mere tracks, and transport is effected by means of mules, pack-horses, donkeys, and, in some places, camels. In the capital and

its vicinity several miles of metalled road were constructed in 1926. In 1896 the Franco Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 486½ miles. Trains run twice weekly in each direction, covering the distance in three days, but running by day only. In the dry season a weekly express is also run, which does the journey in 36 hours. The railway is under French management, and depends financially on a subvention from the French government.

Considerable interest is now being taken in road construction. Chief among the roads now under consideration are the following: Dessie-Assab, Addis Ababa-Jimma, Jijiga-Hargeisa, Gore-Gambeila, Addis Ababa-Lake Tsana. The total road mileage of all kinds is estimated at about 2,615 miles, of which about 1,615 miles are dirt trails, and 1,150 miles earth and gravel. There are also about 65 miles of macadam roads.

There are telegraph lines under Italian control (about 1,229 miles) connecting Addis Ababa with Harrar, with Sidamo, and with Massawa in Eritrea. Telephone lines connect Addis Ababa with Harrar, and Jibuti in French Somaliland, also with Gore and Gambeila (in the west), Jimma and Sharada (south west), Dessie (north), and Debra Tabor and Gojjam, and with Ankober, and Asmara with Adua and Borrombeida. Length of line is estimated at 5,113 miles. In 1929, there were 16 post offices.

Money and Credit

The Bank of Abyssinia, which held a banking monopoly in the country since its institution in 1905, was bought in 1931 and replaced by a State Bank named the Bank of Ethiopia, with an initial nominal capital of 15 million English shillings or their equivalent in a new Ethiopian gold currency, in shares of 500 shillings, 50 per cent paid up. Sixty per cent ('A' shares) were to be subscribed by the Government and represented by six directors, and 40 per cent ('B' shares) by the public and represented by four directors. No other bank is permitted in the country without special Government sanction.

The current coin of Abyssinia is the Maria Theresa dollar (nominally worth about 2s, but greatly depreciated as a result of the fall in the value of silver) weighing 28.0668 grammes, .8333 fine, and the Menelik dollar, weighing 28.075 grammes, .835 fine. It has nominally the same value as the Maria Theresa dollar, but in some places it is not taken at all. Other silver coins are the half, quarter, sixteenth (guercches, makeliks, tamouos, or piastres) of a dollar, and there is also a copper coin, the *besa* (= one thirty second of a dollar). The number of piastres or besa obtainable for a dollar although fixed by law, is in fact liable to constant fluctuation. Various articles, however, are used as medium of exchange, bars of salt are accepted as money in many parts of the country, at a fluctuating rate according to supply and cost of transport. Cartridges are also currency, although to a diminishing extent, and in most places barter prevails.

The Maria Theresa dollar was originally minted in Vienna in the middle of the 18th century.

Weights and Measures.

The metric system of weights and measures is used to a certain extent in the capital and district bordering the railway line. The principal native weights and measures, which are also used in trade with foreigners, are as follows.—

WEIGHTS.

Ookra = weight of Maria Theresa/Menelik dollar = 28·067 grammes, approximately 1 oz avoirdupois

Natr = 80 *ookrat*, approximately 1 lb 14 ozs avoirdupois.

Farasula = approximately 37½ lbs

Kantar = 100 lbs

1 *Waggia* (for ivory) = 480 dollars' weight.

1 „ (for rubber) = 640 dollars' weight

LINEAL MEASURES

Kund = French Coudée (length of forearm and hand) = cubit = 50 centimetres = 19½ inches

Khalad = 130 *kinnds* = 65 metres = 213½ feet, say 71 yards

LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land, and ranges between 15 *khalads* by 25 *khalads*, and 7 *khalads* by 11 *khalads*, the latter equalling roughly 80 acres

GRAIN MEASURES

10 *kounna* = 1 *ladan*

2 *ladan* = 1 *dawala* = 80 kilos

MEASURE FOR HONEY AND CIVET

10 *wanche* (horn cups) = 1 *goundo* = about 3 litres

Diplomatic Representatives

1. OF ABYSSINIA IN GREAT BRITAIN

Envoy Extraordinary and Minister Plenipotentiary — Bajirond Zallaka Agdau (appointed April, 1931)

First Secretary — Ato Ephrem Tewolde Medhen

AFGHANISTÁN.

AFGHANISTÁN is a country of Asia lying between parallels 29° and 38° 20' of north latitude, and 61° and 72° of east longitude, with a long narrow strip extending to 75° east longitude (Wákhán). For the boundaries, see THE STATESMAN'S YEAR BOOK for 1925, pp. 654-55, for the treaty of November 1921, see THE STATESMAN'S YEAR BOOK 1928, p. 642, and for earlier British relations with Afghanistan, see THE STATESMAN'S YEAR-BOOK for 1916, pp. 662-3.

Government.—The government of Afghanistan is a constitutional monarchy with a National Council (under an elected President), and a Cabinet presided over by the Prime Minister. The Council sits permanently at Kábul and consists of 106 deputies, selected from each of the administrative divisions of the country and from the clans. A Great Assembly, purporting to represent the whole Afghan people, is summoned at irregular intervals of about four years to consider major questions of policy referred to it by the King. The title of King instead of Amír was adopted in 1926. The country is divided into five major provinces of Kábul, Mezár, Kandahár, Herat, and Kataghan Badakhshán; and four minor provinces: Simat-i Mashriqí (i.e. Eastern Province), Simat-i Janubí (Southern Province), Farah, and Maimana. Each province is under a governor (called in major provinces *Náib ul Hukumeh* and in minor provinces *Hakim-i A'ala*).

There are separate departments of War, Foreign Affairs, Internal Affairs, Education, Commerce, Justice, and Revenue, each in charge of a Minister and two departments (1) Health, (2) Posts and Telegraphs, under director-generals

Reigning King — Mohammed Nadir Shah Ghazi, born on April 10, 1880, was called to the throne on October 16, 1929, after a successful campaign against Habibullah, who had assumed power on the abdication of ex King Amanullah

Area and Population —The extreme breadth of Afghánistán from north-east to south west is about 700 miles, its length from the Herát frontier to the Kháibar Pass, about 600 miles, the area is given variously as about 245,000 or 270,000 square miles. Population, according to the latest estimate, about eleven millions. The languages spoken are Persian and Pushtoo, and Turkish in Turkistan and parts of Badakhshán. The predominant religion is Islam.

The largest towns are Kábul, the capital (population about 80,000), Kandabár (population with suburbs 60,000), Herát (population 30,000), and Mazar-i Sharif (46,200).

Education.—Elementary and secondary schools exist throughout the country. Both elementary and secondary education are free. There are at present eight primary and secondary schools in Kábul.

Justice —The law is based on the *Shara'* or Islamic law. Lower Courts (*Mahakima i Ibtdara*) are established in each seat of government, and Higher Courts (*Mahakima-i Murafaah*) may have appeals from the former brought before them. A High Court in Kabul is the supreme judicial authority. In many instances efforts are made by litigants to compose their differences by the aid of unofficial juries in each locality.

Finance —The revenue of Afghánistan is subject to considerable fluctuations. The Government share of the produce recoverable is said to vary from one third to one tenth, according to the advantages of irrigation. The total revenue is estimated at about seventy million rupees, a considerable portion of which is found from Customs.

Defence.—The Army, which is being reorganised, will probably consist of 35,000 to 45,000 regular troops of all arms, and in time of war these would be supported by considerable numbers of tribesmen in the form of irregulars. There is also a small air force, officered by Afghans trained in Europe.

Production and Industry.—Although the greater part of Afghánistán is more or less mountainous, and a good deal of the country is too dry and rocky for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables, and cereals. The castor oil plant, madder, and the asafoetida plant abound. Fruit, viz the apple, pear, almond, peach, quince, apricot, plum, cherry, pomegranate, grape, fig, mulberry, is produced in profuse abundance. They form a staple food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition are exported in great quantities. The fat-tailed sheep is native to Afghánistán. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter.

The wool and skins not only provide material for warm apparel, but also furnish the country's main article of export

Northern Afghánistán is reputed to be tolerably rich in copper, and lead and iron are found in many parts Coal is found in the Ghorband Valley and near the Khurd Kábul Pass Gold in small quantities is also brought from the Laghmán Hills and Kunar Badakhshan is said to be the only country in the world to produce first-quality lapis lazuli

At Kábul there are factories for the manufacture in small quantities of matches, buttons, leather and boots There is also a 'Machine Khana' where arms and ammunition, boots and clothing, etc., for the army are manufactured It also includes a mint All these factories are owned and supervised by the State

Commerce—No accurate registration of the trade of Afghánistán has yet been obtained

Of the exports from India to Afghánistán the chief items are cotton goods, indigo and other dyeing materials, sugar, hardware, leather and silver treasure The imports into India include timber, fruits and vegetables, grain and pulse

Imports from Afghanistan into U K in 1932 (Board of Trade figures), 15,535*l*, exports to Afghanistan, 65,935*l*, re exports, 40*l*

Communications—Afghánistán joined the Postal and Telegraphic Unions in 1928

The trade routes of Afghánistán are as follows—From Persia by Meshed to Herát, from Bokhára by Merv to Herát, from Bokhára by Karshi, Balkh, and Khulm to Kábul, from East Turkistán by Badakhshán and Nuristan (formerly Kafiristan) to Kábul, from India by the Khaibar road to Kábul; from India by the Gomál Pass to Ghazni and Kelat-i-Ghilzai, from Chaman, the terminus of the North Western Railway beyond Quetta, to Kandahár and thence to Kábul or Herát, from Parachinar (Kurram) via Peiwar and Shutargardan Passes to Logar and Kábul

There are no railways in the country The following roads are fit for motor traffic, except after snow or heavy rain, but are mostly unmetalled Kháibar-Kábul, Kábul-Kandahár, Kábul-Gardez, Kandahár-Chaman, and Kábul-Bamian In addition there are some 200 miles of minor roads fit for motor traffic, mostly in the vicinity of Kábul. Merchandise, however, is still transported chiefly on camel or pony back There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down stream in rafts Telephones are installed in a few of the larger towns There is telegraphic communication between Peshawar-Kábul, Kábul-Kandahár, Kandahár-Chaman A wireless installation connects Kábul with Eastern Europe and India

Money and Currency—There are two currencies in circulation, the 'Afghani' and the 'Kabuli' Roughly 10 Afghani equals 11 Kabuli Gold coins:—1 Amani = 20 Afghani, $\frac{1}{2}$ amani = 10 Afghani, 2 amania = 30 Kabuli, 1 amania = 15 Kabuli; $\frac{1}{2}$ amania = 7 $\frac{1}{2}$ Kabuli Silver coins:—Afghani, $\frac{1}{2}$ Afghani; 1 Kabuli, Kran or $\frac{1}{2}$ Kabuli Copper coins 25 Pul, 10 Pul, 5 Pul, 2 Pul, 1 Pul (all Afghani) Abbasi equals $\frac{1}{2}$ Kabuli (Kabuli) Afghani currency is gradually replacing the Kabuli

Weights and Measures.—The metric units have now officially replaced the old Afghani units—the Gaz i shah (the Persian Zar), the linear standard equal to 40.95 inches, the Gaz i-zarib, the square standard equal to 1,000 to 1,066 Gaz i shah or 1,294 to 1,379 square yards, about $\frac{1}{2}$ acre; and

the Gaz i nix memar, the cubic standard equal to one cubic Gaz i shah or 1,625 cubic feet All avoirdupois weights, formerly current hitherto under the name nakhud (3 grains), are now in terms of the gramme
