THE

STATESMAN'S YEAR-BOOK

STATISTICAL AND HISTORICAL ANNUAL OF

THE STATES OF THE WORLD

FOR THE YEAR

1951

EDITED BY

S. H. STEINBERG, PH.D.

FELLOW OF THE ROYAL HISTORICAL SOCIETY

EIGHTY-EIGHTH ANNUAL PUBLICATION.
REVISED AFTER OFFICIAL RETURNS

MACMILLAN AND CO., LIMITED

ST. MARTIN'S STREET, LONDON

1951

Man sagt oft : Zahlen regieren die Welt.
Das aber ist gewiss, Zahlen zeigen *wie* sie regiert wird.

GOETHE.

This book is copyright in all countries which are signatories to the Berne Convention

PRINTED IN GREAT BRITAIN

PREFACE

In the present, the 88th, issue of The Statesman's Year-Book information has again been brought up to the latest available date.

A paragraph on the statistical offices and similar agencies has been supplied under each country where obtainable; this new item will, it is hoped, be useful to students, and in a small way acknowledge the debt the editor owes to his most assiduous supporters.

Officials, government departments and members of the diplomatic services of almost every country as well as numerous friends of the Year-Book all over the world have once more helped the editor in his task. To one and all he wishes to express his sincerest thanks for their generous co-operation.

S.H.S.

The Statesman's Year-Book Office,
Macmillan & Co., Ltd.,
St. Martin's Street,
London, W.C.2.

6 May, 1951.

METRIC WEIGHTS AND MEASURES.

Metric measures most commonly found in statistical returns, with equivalents :—

Length.	
Centimetre	0·39 inch
Metre	39·37 inches
Kilometre	0·621 mile
Liquid Measure.	
Litre	1·76 pints
Hectolitre	22 gallons
Surface Measure.	
Square metre	10·26 sq. feet
Hectare	2·47 acres
Square kilometre	0 386 sq. mile
Dry Measure.	
Litre	0·91 quart
Hectolitre	2 75 bushels
Weight—Avoirdupois.	
Gramme	15·42 grains
Kilogramme	2·205 pounds
Quintal	220·46 pounds
Short ton	2000 pounds
Ton	2204·6 pounds
Weight—Troy.	
Gramme	15·42 grains
Kilogramme	32·15 ounces, 2·68 pounds

BRITISH WEIGHTS AND MEASURES.

Length.	
1 foot	0·3048 metre
1 yard	0 91439 metre
1 mile	1·6093 kilometres
Liquid Measure.	
1 pint	0·568 litre
1 gallon	4·5459 litres
1 quarter	2·909 hectolitres
Weight.	
1 ounce	28·350 grammes
1 lb.	0·4535 kilogramme
1 cwt.	50·8022 kilogrammes
1 ton	1,016 kilogrammes
Surface Measure.	
1 sq. foot	9·2903 sq. decimetres
1 sq. yard	0 836 sq. metre
1 acre	0·40468 hectare
1 sq. mile	2·589 sq. kilometres

PART I

INTERNATIONAL ORGANIZATIONS

THE UNITED NATIONS.

The United Nations is an association of states which have pledged themselves, through signing the Charter, to maintain international peace and security and to co-operate in establishing political economic and social conditions under which this task can be securely achieved. Nothing contained in the Charter authorizes the organization to intervene in matters which are essentially within the domestic jurisdiction of any state.

The United Nations Charter originated from proposals agreed upon at a discussion by representatives of the United Kingdom, the U.S.A., the U.S.S.R. and China held at Dumbarton Oaks (Washington, D.C.) from 21 August to 7 October, 1944. These proposals were laid before the United Nations Conference on International Organization, held at San Francisco from 25 April to 26 June, 1945, and (after amendments had been made to the original proposals) the Charter of the United Nations was signed on 26 June, 1945, by the delegates of 50 countries. (The complete text of the Charter is to be found in THE STATESMAN'S YEAR-BOOK, 1946, pp. xxi-xxxii.)

The United Nations formally came into existence on 24 October, 1945, with the deposit of the requisite number of ratifications of the signatures of the Charter with the United States' Department of State. The official languages of the United Nations are Chinese, English, French, Russian and Spanish, the working languages are English, French and (in the General Assembly) Spanish.

The seat of the United Nations is in New York City, N.Y.; temporary offices also at Lake Success, Nassau County, Long Island, N.Y.

I. MEMBERSHIP.

Fifty one states are original members of the United Nations. All except Poland signed the Charter on 26 June, 1945. Poland signed on 15 Oct., 1945. The Polish Provisional Government of National Unity was formed too late for Poland to participate at the San Francisco Conference, but a space was left for her signature as one of the original members of the United Nations. Ratification of all the signatures had been received by 31 Dec., 1945.

Membership in the United Nations is open to all other peace-loving states whose admission will be effected by the General Assembly upon recommendation of the Security Council.

The table on pp. 9-10 shows the member states of the United Nations (those which are not original members with the date of admission) and their participation in the specialized agencies, and those non-member states which have been admitted to certain specialized agencies, as at 1 April, 1951.

II. THE ORGANS OF THE UNITED NATIONS.

The principal organs of the United Nations are —

1. The General Assembly.
2. The Security Council.
3. The Economic and Social Council.
4. The Trusteeship Council.
5. The International Court of Justice.
6. The Secretariat.

1. THE GENERAL ASSEMBLY.

The General Assembly consists of all the Members of the United Nations. Each Member is entitled to be represented at its meetings by five delegates and five alternate delegates but has only one vote. The General Assembly meets regularly once a year, commencing on the third Tuesday in September, at the seat of the organization, special sessions may be convoked by the Secretary-General if requested by the Security Council, by a majority of the Member of the United Nations, or by one member concurred in by the majority of the members.

The General Assembly elects its President for each session. Regular sessions were held as follows: the first part of the first session in London from 10 Jan. to 14 Feb., 1946, the second part in New York from 23 Oct. to 16 Dec., 1946; the second session in New York from 16 Sept. to 29 Nov., 1947; the first part of the third session in Paris from 21 Sept. to 12 Dec., 1948, and the second part in New York from 5 April to 18 May, 1949; the fourth session in New York from 20 Sept. to 10 Dec., 1949, and the fifth session in New York opened 19 Sept. 1950. Special sessions on Palestine were held 28 April to 15 May, 1947, and 16 April to 14 May, 1948.

The work of the General Assembly is divided between six Main Committees, on each of which every Member has the right to be represented by one delegate:—

I. Political and Security (including regulation of armaments)
II. Economic and Financial.
III. Social, Humanitarian and Cultural.
IV. Trusteeship (including non-self-governing territories).
V. Administrative and Budgetary.
VI. Legal.

In addition there is a General Committee charged with the task of co-ordinating the proceedings of the Assembly and its Committees, and a Credentials Committee which verifies the credentials of the delegates. The General Committee consists of fourteen Members, comprising the President of the General Assembly, its seven Vice-Presidents and the Chairmen of the six Main Committees. The Credentials Committee consists of nine members, elected at the beginning of each session of the General Assembly. The Assembly has two standing committees—an Advisory Committee on Administrative and Budgetary Questions, and a Committee on Contributions. The General Assembly establishes subsidiary and *ad hoc* bodies when necessary to deal with specific matters. These include the Interim Committee of the General Assembly, the International Law Commission, Board of Auditors, Investments Committee, Staff Pension Committee, Administrative Tribunal, Commission for the Unification and Rehabilitation of Korea, Special Committee on the Balkans, Conciliation Commission for Palestine, the U.N. Commissioner in Libya and Council, Advisory Council for Somaliland, U.N. Commissioner in Eritrea, Peace Observation Commission, Collective Measures Committee, United Nations Relief and Works Agency for Palestine Refugees in the Near East, High Commissioner's Office for Refugees, Special Committee on Information transmitted under Article 73e of the Charter (relating to non-self-governing territories), Headquarters Advisory Committee.

The General Assembly may discuss any matters within the scope of the Charter, and, with the exception of any situation or dispute on the agenda of the Security Council, may make recommendations on any such questions or matters. For decisions on important questions a two-thirds majority is required, on other questions a simple majority of Members present and voting. In addition, the Assembly at its fifth session decided that if the Security Council, because of lack of unanimity of the permanent members, fails to exercise its primary responsibility for the maintenance of international peace and security in any case where there appears to be a threat to the peace, breach of the peace, or act of aggression, the General Assembly shall consider the matter immediately with a view to making appropriate recommendations to members for collective measures, including in the case of a breach of the peace or act of aggression the use of armed force when necessary, to maintain or restore international peace and security.

The General Assembly receives and considers reports from the other organs of the United Nations, including the Security Council. The Secretary General makes an annual report to it on the work of the Organization.

2. The Security Council.

The Security Council consists of eleven Members, each of which has one representative and one vote. There are five permanent Members (China, France, U.S.S.R., U.K., U.S.A.) and six non-permanent Members elected for a two year term by a two-thirds majority of the General Assembly. Retiring Members are not eligible for immediate re-election. Any Member of the United Nations not a member of the Security Council will be invited to participate without vote in the discussion of questions specially affecting its interests.

The Security Council bears the primary responsibility for the maintenance of peace and security. It is also responsible for the functions of the U.N. in trust territories classed as 'strategic areas.' Decisions on procedural questions are made by an affirmative vote of seven Members. On all other matters the affirmative vote of seven Members must include the concurring votes of all permanent members (in practice, however, an abstention by a permanent member is not considered a veto). Provision that when the Security Council considers methods for the settlement of a dispute, parties to the dispute abstain from voting.

For the maintenance of international peace and security the Security Council can, in accordance with special agreements to be concluded, call on armed forces, assistance and facilities of the Member States. It is assisted by a Military Staff Committee consisting of the Chiefs of Staff of the permanent Members of the Security Council or their representatives.

Under the Security Council there also functions the Atomic Energy Commission, which was established by the General Assembly on 24 Jan., 1946. Its purpose is the exchange of basic scientific information between nations, the control of the use of atomic energy for peaceful ends, the elimination of atomic and other weapons adaptable to mass destruction and the prevention of violations and evasions. It is composed of representatives of the members of the Security Council and of Canada, if this country is not a member of the Security Council.

The Presidency of the Security Council is held for one month in rotation by the member States in the English alphabetical order of their names.

The Security Council is so organized as to be able to function continuously. Its members are permanently represented at the seat of the United Nations, but it may meet at any place that will best facilitate its work.

A Commission for Conventional Armaments, consisting of representatives of the 11 member countries of the Council, submits proposals to the Security Council for the regulation and reduction of armaments, and practical safeguards in this connexion. The two standing committees, the Committee of Experts and the Committee on the Admission of New Members, meet from time to time. It establishes *ad hoc* committees and commissions such as the Commission for Indonesia and the Commission for India and Pakistan.

Permanent Members.—China, France, U.S.S.R., U.K., U.S.A.
Non-Permanent Members.—Ecuador, India, Yugoslavia (1 Jan., 1950–31 Dec., 1951): Brazil, Netherlands, Turkey (1 Jan., 1951–31 Dec., 1952).

3. THE ECONOMIC AND SOCIAL COUNCIL.

This body is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters. By 1 Jan., 1951, 10 specialized inter-governmental agencies working in these fields had been brought into relationship with the United Nations. The Economic and Social Council may also make arrangements for consultation with international non-governmental organizations and, after consultation with the Member concerned, with national organizations; by 1 Jan., 1951, 87 non-governmental organizations had been granted consultative status.

The Economic and Social Council consists of representatives of eighteen Member States elected by a two-thirds majority of the General Assembly. Six are elected each year for a three-year term. Retiring members are eligible for immediate re election. Each member is represented by one delegate and has one vote. Decisions are made by a majority of the members present and voting.

The Council holds at least two sessions a year, and special sessions may be held if required. The President is elected for one year and is eligible for immediate re-election.

The Economic and Social Council has the following functional commissions:—

(1) Economic and Employment Commission;
(2) Transport and Communications Commission;
(3) Statistical Commission; with subcommission on Statistical [illegible]
(4) Commission on Human Rights; with subcommissions on [illegible] of the Press, and on Prevention of Discriminations and Protection of Minorities.
(5) Social Commission;
(6) Commission on the Status of Women;
(7) Commission on Narcotic Drugs;
(8) Fiscal Commission;
(9) Population Commission (with 3 regional subcommissions for Europe, Asia and the Far East, and Latin America).

The Economic and Social Council has the following standing committees:—The Technical Assistance Committee, which is assisted by a Technical Assistance Board (both concerned with under-developed areas), the Interim Committee on Programme of Meetings, the Council Committee on Non-Governmental Organizations, the Committee on Negotiations with Inter-Governmental Agencies. From time to time the Council [illegible] *e.g.* on Implementation of Recommendations on Economic and Social Matters, on Slavery, and on Statelessness and Related Problems.

The United Nations International Children's Emergency Fund, established by the General Assembly on 11 Dec., 1946, also functions under the authority of the Economic and Social Council. As reconstituted, the Executive Board of the Fund from 1 Jan., 1951, consists of the governments of the States represented on the Social Commission and the [illegible] other States, not necessarily members of the United Nations, designated by the Social Council.

Other special bodies are the Permanent Central Opium Board, the Supervisory Body (both of which are concerned with narcotic drugs), the Interim Co-ordinating Committee for International Commodity Arrangements which keeps informed of and facilitates inter-governmental consultation or action with respect of commodity problems, and the Administrative Committee on Co-ordination to ensure (1) the most effective implementation of the [illegible] entered into between the United Nations and the specialized agencies and (2) co-operation of activities.

[illegible] China, France, India, Peru (until 31 Dec., 1951); Canada, Czechoslovakia, Egypt, Persia, U.S.A. (until 31 Dec., 1952); Philippines, Poland, Sweden, U.S.S.R., U.K., Uruguay (until 31 Dec., 1953).

4. THE TRUSTEESHIP COUNCIL.

The Charter provides for an international trusteeship system to safeguard the interests of the inhabitants of territories which are not yet fully self-governing and which may be placed thereunder by individual trusteeship agreements. These are called trust territories. The following categories may be placed under trusteeship: territories held under mandate; territories which have been detached from enemy States as a result of the Second World War; and territories voluntarily placed under the system by States responsible for their administration.

The Trusteeship Council consists of Members administering trust territories: Australia (New Guinea; and Nauru, administered on behalf of Australia, New Zealand and U.K.), Belgium (Ruanda-Urundi), France (Cameroons and Togoland), New Zealand (Western Samoa), U.K. (Tanganyika, Cameroons and Togoland), U.S.A. (Pacific islands formerly under Japanese mandate); the permanent members of the Security Council that are not

[illegible] territories: China, U.S.S.R; and as many other members elected for [illegible] by the General Assembly, to ensure that the total membership of the Trusteeship Council is equally divided between those Members of the United Nations which administer trust territories and those which do not. Additional members:—Argentina, Iraq (till 31 Dec., 1952), Dominican Republic, Thailand (till 31 Dec., 1953). Retiring members are eligible for immediate re-election. Decisions of the Trusteeship Council are made by a majority of the Members present and voting, each Member having one vote.

The Council holds two regular sessions each year, and special sessions may be held, if required. The President is elected for one year and is [illegible] ate re-election.

The responsibility for exercising the functions of the [illegible] to trusteeship in trust territories not classed as 'strategic areas' are vested in the General Assembly, for 'strategic areas' in the Security Council. The Trusteeship Council assists the General Assembly in carrying out these functions, which include the consideration of reports by the administering authority, the acceptance and examination of petitions, and the provision for periodic visits to trust territories. By special arrangement with the Security Council, the Trusteeship Council also carries out these functions in relation to 'strategic areas' under trusteeship, subject to the relevant trusteeship agreements and without prejudice to security considerations.

In addition to the International Trusteeship System, the Charter contains a Declaration in which those Members of the United Nations which administer or may in the future administer non-self-governing territories (whether placed under trusteeship or not) recognize the principle that the interests of the inhabitants of these territories are paramount. Italy is the administering authority for Somalia, though not a member state of the United Nations.

Regular visiting missions have been sent out to East Africa, July–Sept., 1948; to West Africa, Nov., 1949; to trust territories in the Pacific, April–July, 1950; and a special visiting mission was sent to Western Samoa in June–Aug., 1947.

Hall (H. D.), Mandates, Dependencies and Trusteeship. Washington, 1948.

5. THE INTERNATIONAL COURT OF JUSTICE.

The International Court of Justice was created by an international treaty, the Statute of the Court, which forms an integral part of the United Nations Charter. It was drawn up at the San Francisco Conference (25 April to 26 June, 1945) and is based on the Statute of the Permanent Court of International Justice which in its greater part remains unchanged. All Members of the United Nations are *ipso facto* parties to the Statute of the Court.

The Court is composed of a body of independent judges, elected regardless of their nationality from among persons of high moral character, who possess the qualifications required in their respective countries for appointment to the highest judicial offices, or are jurisconsults of recognized competence in international law (Statute of the Court, Art. 2). There are fifteen judges, no two of whom may be nationals of the same State (Art. 3). They are elected by the Security Council and the General Assembly of the United Nations, sitting independently. Candidates are chosen from a list of persons nominated by the national groups in the Permanent Court of Arbitration established by the Hague Conventions of 1899 and 1907. In the case of Members of the United Nations not represented in the Permanent Court of Arbitration, candidates are nominated by national groups appointed for the purpose by their Governments (Art. 4). The judges are elected for a nine-year term and are eligible for immediate re-election. At the first election the terms of office of one third of the number was fixed by lot at three, six and nine years respectively (Art. 13).

The Members of the Court may not exercise any political or administrative function, engage in any other occupation or profession (Art. 16), or act as agent, advocate or counsel in any case (Art. 17). When engaged on business of the Court, they enjoy diplomatic privileges and immunities (Art. 18).

The Court elects its own President and Vice-Presidents for three years (Art. 21) and remains permanently in session, except for judicial vacations (Art. 23). The full court of fifteen judges normally sits, but a quorum of nine [illegible] (Art. 25). It may form chambers of three or more [illegible] (Art. 26), and forms annually a chamber of five [illegible] of the parties, cases by summary procedure (Art. 29).

Competence and Jurisdiction.—Only states may be parties in cases before the Court which is open to the states parties to its Statute. The conditions under which the Court will be open to other states, are laid down by the Security Council (Art. 35). The Court exercises its jurisdiction in all cases which the parties refer to it and in all matters provided for in the Charter, or in treaties and conventions in force. Disputes concerning the jurisdiction of the Court are settled by the Court's own decision (Art. 36). Whenever a treaty or convention in force provides for reference of a matter to a tribunal to have been instituted by the League of Nations, or to the Permanent Court of International Justice, it shall, as between the parties to the Statute, be referred to the International Court of Justice (Art 37).

The Court may apply in its decision:—(*a*) international conventions; (*b*) international custom; (*c*) the general principles of law; and (*d*) as subsidiary means for the determination of the rules of law, judicial decisions and the teachings of highly qualified publicists of the various nations.

If the parties agree, the Court may decide a case *ex aequo et bono* (Art. 38). The Court may also give an advisory opinion on any legal question to the General Assembly or the Security Council, or to other organs of the United N[illegible] authorized by the General Assembly to request adv[illegible] within the scope of their activities (Charter Art. 96).

Procedure.—The official languages of the Court are French and English. At the request of any party the Court will authorize the use of a language other than French or English by this party (Art. 39). When a case is brought before the Court, the Registrar communicates it to all concerned and also notifies the Secretary-General of the United Nations, through the Secretary-General, and any other States entitled to appear before the Court (Art. 40) The hearings are public unless the Court decides otherwise or the parties demand that the public be not admitted (Art. 46). All questions are decided by a majority of the judges present. If the votes are equal, the President has a casting vote (Art 55). The judgment is final and without appeal (Art. 60), but a revision may be applied for on the ground of a new decisive factor. No such application may be made after ten years from the date of the judgment (Art. 61). Unless otherwise decided by the Court, each party bears its own costs (Art. 64).

Judges.—The [illegible] of the Court were elected by the Security Council and the General Assembly in [illegible], their terms of office being determined by lot as follows —

For nine years	For six years
Professor Jules Basdevant (France), *President.*	Lic. I. Fabela Alfaro (Mexico)
Dr J. G. Guerrero (El Salvador), *Vice-President.*	Dr. H. Klaestad (Norway).
Dr. J. Azevedo (Brazil)	Dr. C. de Visscher (Belgium).
Sir Arnold D. McNair (U.K.).	Hon. Green H. Hackworth (U.S.A.).
Dr. A. Alvarez (Chile)	Professor S. B. Krylov (U.S.S.R.).

For three years (re-elected in 1948 for nine years)

Dr. M. Zoričić (Yugoslavia).	H.E. Dr. Abdel Hamid Badawi Pasha (Egypt)
Mr J. E. Read (Canada)	Dr Hsu Mo (China).
Dr. Bohdan Winiarski (Poland)	

'National' Judges.—If there is no judge on the bench of the nationality of a party to the dispute, that party has the right to nominate a 'national' judge, to sit as a member of the Court, on terms of complete equality with his colleagues, for the purpose of the particular dispute (Art. 31).

Seat of the Court.—The Court has its seat at the Hague, but may sit and exercise its functions elsewhere whenever it considers this desirable (Art. 22).

Expenses.—The expenses of the Court are borne by the United Nations (Art. 33)

Activities.—The first case to come before the Court was the Corfu Channel dispute between the U.K. and Albania. On 9 Apr., 1949, the Court ruled that Albania was responsible under international law for the explosions of two British warships which occurred on 22 Oct., 1946, in Albanian waters and for the damage and loss of human life that was the result. It reserved for further consideration the assessment of the amount of compensation. The Court further ruled that by subsequent acts of the British navy in Albanian waters, the U.K. violated the sovereignty of Albania The Court ruled that this declaration constituted in itself appropriate satisfaction. On 15 Dec., 1949, the Court fixed the amount of compensation due from Albania to the United Kingdom at £843,947.

The Court delivered advisory opinions on admission of states to membership of the United Nations (28 May, 1948), on reparation for injuries suffered by U.N agents in course of performance of duties (11 April, 1949), on interpretation of peace treaties with Bulgaria, Hungary and Rumania (30 March, 1950 and 18 July, 1950), and the international status of South-West Africa (11 July, 1950).

Publication.—Year-Book of the International Court of Justice, 1949–50. The Hague, 1950.

6. The Secretariat.

The Secretariat is composed of the Secretary-General, who is the chief administrative officer of the organization, and an international staff appointed by him under regulations established by the General Assembly. The first Secretary-General was appointed for a term of five years, on 31 Oct., 1950, his term was extended for a further period of 3 years.

The Secretary-General acts in that capacity in all [illegible] General Assembly, the Security Council, the Economic and Social Council at [illegible] Council.

Mr. Gladwyn Jebb (U.K.) acted as Executive Secretary to the Preparatory Commission and also [illegible] the first part of the first session of the General Assembly until, on 1 Feb., 1946, Mr. Trygve Lie (Norway) was elected to the post of Secretary-General.

Secretary-General.—Trygve Lie (Norway).

Assistant Secretary-General in charge of the Department of Security Council Affairs.—Constantin Zinchenko (U.S.S.R.).

Assistant Secretary-General in charge of the Department of Economic Affairs.—David Owen (United Kingdom).

Assistant Secretary-General in charge of the Department of Social Affairs.—Henri Laugier (France).

Assistant Secretary-General in charge of the Department of Trusteeship Affairs.—Dr. Victor Chi-tsai Hoo (China).

Assistant Secretary-General in charge of the Department of Public Information.—Benjamin Cohen (Chile).

Assistant Secretary-General in charge of the Legal Department.—Dr. Ivan Kerno (Czechoslovakia).

Assistant Secretary-General in charge of Conference and General Services.—Shamaldharee Lall (India).

Assistant Secretary-General in charge of Administrative and Financial Services.—Byron Price (U.S.A.).

Executive Assistant to the Secretary-General.—Andrew W. Cordier (U.S.A.).

Director-General of the Technical Assistance Administration.—Dr. Hugh L. Keenleyside (Canada).

III. THE BUDGET OF THE UNITED NATIONS.

The financial year coincides with the calendar year. The amount of $49,641,733 was appropriated for the financial year 1950, as follows :—

	$
Sessions of General Assembly, Councils, Commissions and Committees	2,279,160
Special Conferences, Investigations and Enquiries	11,808,300
Headquarters, New York	27,504,850
European Office	4,195,400
Information Centres	839,550
Regional Economic Commissions	1,212,350
Hospitality	20,000
Advisory Social Welfare Functions	1,324,400
League of Nations assets	533,768
International Court of Justice	634,765
Global reduction on provisions for contractual printing and on account of devaluation of currencies	— 710,770

The budget for 1951 is $47,798,600

O M = original member; date quoted = date of admission;
asterisk = membership of the specialized agency indicated at head of column.

The following have the same membership status in UPU and ITU respectively as the countries listed in the chart above.

UPU :—Algeria; Belgian Congo; French Morocco; French overseas territories; Indochina; Netherlands Antilles and Surinam; Portuguese colonies of West Africa, East Africa, Asia and Oceania; Spanish colonies[3]; Spanish Morocco[3]; Tunisia; U.K. overseas colonies, protectorates and territories under trusteeship; U.S.A. possessions.

ITU :—Belgian Congo and territories of Ruanda-Urundi; French protectorates of Morroco and Tunisia; Netherlands West Indies and Surinam; overseas territories of the French Republic and territories administered as such; Portuguese colonies; Southern Rhodesia; colonies, protectorates, overseas territories and territories under mandate or trusteeship of U.K.; territories of U.S.A.

[1] On 13 May, 1947, the ICAO Assembly voted to expel Spain; this action must be ratified by two-thirds of the member states of ICAO.

[2] Germany, Korea, Spain, Spanish Morocco and the whole of the Spanish colonies are, under Article XVII of the Final Protocol of the Universal Postal Convention, temporarily precluded from acceding to the convention and the agreements.

[3] These countries have announced their withdrawal from WHO, although the WHO constitution includes no provision for such action.

SPECIALIZED AGENCIES BROUGHT INTO RELATIONSHIP WITH THE UNITED NATIONS.

1. International Labour Organization (I.L.O.).

Origin.—The I.L.O., established in 1919 as an autonomous institution associated with the League of Nations, is a tripartite organization, in which governments, employers and workers are directly represented, which seeks through international action to improve labour conditions, raise living standards, and promote economic and social stability. In 1946, the United Nations and the I.L.O. concluded an agreement under which the I.L.O. was recognized as the specialized agency responsible for international action in the above fields towards the accomplishment of the purposes set forth in the I.L.O.'s Constitution.

Functions.—One of the I.L.O.'s principal functions is the formulation of international standards in the form of International Labour Conventions and Recommendations. Member countries are required to submit Conventions to their competent national authorities with a view to ratification. If a country ratifies a Convention, it agrees to bring its laws into line with its terms and to report annually how these regulations are being applied. More than 1150 ratifications of 98 Conventions have been deposited by the end of 1950. Machinery is available to ascertain whether Conventions thus ratified are effectively applied.

Recommendations do not require ratification, but member states are obliged to consider them with a view to giving effect to their provisions by legislation or other action. Member states also undertake to report regularly on their position in regard to Recommendations and unratified Conventions.

Organization.—The I.L.O. consists of the International Labour Conference, which meets yearly, the Governing Body, and the International Labour Office.

The Conference is composed of national delegations comprising two government representatives and one delegate each from the most representative worker and employer organizations within each country, together with their advisers.

The 32-member Governing Body is composed of the representatives of 16 governments, eight worker members, and eight employer members who are elected every three years by their respective representatives to the Conference. It selects items for the agenda of the Conference, and supervizes the work of the Office and of the various committees and commission.

Eight governments hold seats on the Governing Body because of their industrial importance. These were, in 1950, Brazil, Canada, China, France, India, Italy, the United Kingdom and the United States. Argentina, Australia, Belgium, Cuba, Denmark, Peru, Poland and Turkey hold the remaining eight government seats by election.

The Office undertakes research on labour, social and economic questions, acts as an advisory service to governments and prepares documents on the items of the agenda of the various conferences and meetings.

Activities.—I.L.O. is carrying out activities on a worldwide scale in the field of manpower, including an operational programme in the realms of employment service organization, training and migration. To carry out the programme, the I.L.O. has set up field offices at Bangalore, India, for Asia, and at São Paulo, Brazil, for Latin America. The first field mission composed of technical experts on manpower questions is operating at Rome.

Various model codes were completed, such as codes of safety regulations for underground work in coal-mines and for industrial establishment. I.L.O.'s work in technical assistance includes the provision of information to governments and organizations on request, advisory missions, and a fellowship programme.

Headquarters.—154, rue de Lausanne, Geneva, Switzerland.
Director General.—David A. Morse (U.S.A.).
Chairman of Gove[illegible] Éli Troclet (Belgium).
Director, London [illegible] S.W.1).—

Publications.—Periodicals: the *International Labour Review*, monthly, in English, French and Spanish editions; *Industry and Labour*, twice monthly; the *Industrial Safety Survey*, bimonthly, in English, French and Spanish editions; the Legislative Series, bimonthly, in English and French editions; the *Year Book of Labour Statistics*, trilingual; the *Official Bulletin*, irregular, in English and French editions; the *Bibliography of Occupational Medicine*, quarterly; the *I.L.O. News Service*, irregular; the *I.L.O. at Work*, irregular. The I.L.O. also publishes the reports prepared for sessions of the conference, the minutes of sessions of the Governing Body, the Final Record of the Proceedings of the Conference, and various studies and reports.

The International [illegible] the I.L.O (Montreal, 1941), contains a systematic arrangement of [illegible] tendations under the following main headings: *Employment and Unemployment* (employment offices, public works policy and national development schemes, provision for unemployment); *General Conditions of Employment* (wages, hours of work, rest periods, annual holidays with pay); *The Employment of Children and Young Persons* (age for admission to employment, vocational training and apprenticeship, employment of children and young persons during the night); *The Employment of Women* (maternity protection, employment during the night or on unhealthy work); *Industrial Health, Safety and Welfare* (protection against accidents and industrial disease); *Social Insurance* (workmen's compensation, sickness insurance and provision for maternity, pension insurance); *Industrial Relations* (rights of association); *The Administration of Social Legislation* (labour inspection); *The International Seamen's Code* (covering most of the subjects listed above, with provisions adapted to the special needs of seamen); *Standards of Colonial Labour Policy* (abolition of forced labour, conditions of employment of natives); *Migration* (protection of rights of migrants); *Action Against Unemployment* (1950); *Conventions and Recommendations, 1919–49* (1949).

2. Food and Agriculture Organization of the United Nations (F.A.O.).

Origin.—The United Nations Conference on Food and Agriculture, which met in May, 1943, at Hot Springs, Virginia, set up an Interim Commission in Washington in July, 1943, to make plans for the Organization. F.A.O. came into being on 16 Oct., 1945, with the signing of its Constitution at the opening meeting of the first conference at Quebec.

Functions.—F.A.O. continually reviews the food and agricultural conditions in the world and supplies member governments with facts and figures relating to nutrition, agriculture, forestry and fisheries; with appraisals and forecasts in relation to the production, distribution and consumption of agricultural products; and with technical assistance. F.A.O. promotes and, where appropriate, recommends national and international action which it considers necessary to attain: (1) the improvement of education and administration relating to the fields in which it works; (2) the improvement of processing, marketing and distribution of the products of agriculture, forestry and fisheries; (3) the conservation of natural resources; (4) the adoption of policies for the provision of adequate agricultural credit; and (5) the adoption of policies with respect to agricultural commodity arrangements.

Organization.—F.A.O. is operated by a Conference (composed of one representative from each member nation), a Council (consisting of eighteen member nations elected by the Conference) and the Director-General and his staff.

Standing advisory committees on agriculture, economics, statistics, fisheries, forestry and forest products, rural welfare, and nutrition advise the Director-General on the work of F.A.O.'s technical divisions National F.A.O. Committees are set up by a number of member governments to serve as primary points of contact between F.A.O. and governmental and non-governmental agencies.

Headquarters.—Viale Terme di Caracalla, Rome, Italy.
Director-General.—Norris E. Dodd (U.S.A.).

Publications.—International Year-Book of Agricultural Statistics, 1941–42 to 1945–46 3 vols. Rome, 1947.
Yearbook of Food and [illegible] Washington and London, from 1947.
World Food Survey.
Soil Conservation: An [illegible] Washington, 1948.
The State of Food and Agriculture, 1948 ff.
Yearbook of Fisheries Statistics, 1947 ff.
Yearbook of Forest Products Statistics, 1948 ff.
World Food Appraisal, 1950; World Outlook and State of Food and Agriculture, 1950.

3. United Nations Educational, Scientific and Cultural Organization (UNESCO).

Origin.—A Conference for the establishment of an Educational, Scientific and Cultural Organization of the United Nations was convened by the Government of the United Kingdom in association with the Government of France, and met in London, 1–16 Nov., 1945. UNESCO came into being on 4 Nov., 1946, when the instrument of acceptance of 20 signatories of its constitution had been deposited with the Government of the United Kingdom.

Functions.—The purpose of UNESCO is to contribute to peace and security by promoting [illegible] order to further [illegible] nd fundamental freedoms which are affirmed for the peoples of the world, without distinction of race, sex, language or religion, by the Charter of the United Nations. To realize this purpose, the United Nations Educational, Scientific and Cultural Organization (*a*) collaborates in the work of advancing the mutual knowledge and understanding of peoples through all means of mass communication, (*b*) gives fresh impulse to popular education and to the spread of culture, and (*c*) maintains, increases and diffuses knowledge.

Organization —The organs of UNESCO are a General Conference (composed of one representative from each member state), an Executive Board (consisting of 18 individuals elected by the General Conference) and a Secretariat.

National commissions, composed chiefly of representatives of non-governmental organizations, are being set up in each of the member states to act as liaison groups between UNESCO and the educational, scientific and cultural life of their own countries.

Headquarters.—Unesco House, 19 Avenue Kléber, Paris (16ème)
Director General—Dr. Jaime Torres Bodet (Mexico).

Periodicals.—Museum (quarterly, English and French); International Social Science Bulletin (quarterly, English and French); Impact of Science on Society (quarterly, English and French); Unesco Courier (monthly, English, French and Spanish); Quarterly Bulletin of Fundamental Edu[illegible] Ile[illegible] English, French); [illegible] for Libraries (monthly, English and French).

4 World Health Organization (WHO).

Origin.—An International Health Conference, convened by the United Nations Economic and Social Council met in New York from 19 June to

22 July, 1946, and drew up a constitution for the World Health Organization. WHO came into being on 7 April, 1948, when its Constitution had been ratified by 26 members of the United Nations.

Functions.—The Constitution of WHO defines health as 'a state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity.' It sets down as the objective of the Organization 'the attainment by all peoples of the highest possible level of health.'

Some of the functions of WHO toward the achievement of this aim are: (1) to act as a co-ordinating authority on international health work; (2) to establish and maintain collaboration with the United Nations, specialized agencies and with governmental, professional and other groups in the health field; (3) to stimulate and advance work to eradicate epidemic, endemic and other diseases; (4) to promote the prevention of accidental injuries; (5) to promote the improvement of nutrition, housing, sanitation, recreation, economic or working conditions, and other aspects of environmental hygiene; (6) to promote maternal and child health and welfare; (7) to promote research in the field of health; (8) to promote improved standards of teaching and training; (9) to foster activities in the field of mental health; (10) to study and report on administrative and social techniques in the health field; (11) to establish and revise international nomenclatures of diseases, causes of death, and public health practices; (12) to standardize diagnostic procedure; and (13) to develop, establish and promote international standards with respect to food, biological, pharmaceutical and similar products.

Organization.—WHO consists of a World Health Assembly, representing all members, an Executive Board, consisting of 18 [illegible] qualified persons designated by 18 member states elected by the World Health Assembly, and a Secretariat. Regional organizations have been established in South East Asia and the eastern Mediterranean. The Pan American Sanitary Bureau acts as the regional organization for the Americas, pending integration with WHO. Temporary offices have been set up in Geneva for Africa and Europe and in Hong Kong for the Western Pacific pending the formation of regional organizations for these areas.

WHO is assisted by expert committees composed of specialists drawn from outside the staff of the Organization.

Headquarters.—Palais des Nations, Geneva.
Director-General.—Dr. Brock Chisholm (Canada).

Publications.—Report of WHO Interim Commission to the First World Health Assembly 1948.
Chronicle of the World Health Organization (monthly, Chinese, English, French, Russian and Spanish).
Bulletin of the World Health Organization (quarterly, English, French).
International Digest of Health Legislation, 1948, 1949 (English, French).
WHO Technical Report Series, 1950.
Epidemiological and Vital Statistics Report (monthly, English, French).

5. International Monetary Fund (FUND).

The International Monetary Fund was established on 27 Dec., 1945, as a result of the United Nations Monetary and Financial Conference held at Bretton Woods, N.H., in July, 1944. The total subscription in gold and national currencies for the 49 nations now members of the Fund is approximately $8 billion; the Fund now holds $1·5 billion in the form of gold and $5·5 billion in the form of national currencies.

[1] A reduction in the quota of Honduras from $2,500,000 to $500,000 became effective 4 Nov., 1948.

Liberia's admission to membership in the Fund was approved by the Board of Governors on 1 Nov., 1948, under certain terms and conditions which Liberia has to accept by 1 Oct., 1950.

Haiti's admission was similarly approved on 16 Sept., 1949, acceptance to be completed by 30 Sept., 1950.

Purposes.—To promote international monetary co-operation and exchange stability, and to assist in the removal of exchange restrictions. The Fund seeks to facilitate expansion of world trade as a means of promoting high levels of employment and income, and of developing the productive resources of its members.

Activities.—The Fund has collaborated with member governments in establishing a pattern of exchange rates fixed in ratio to gold and the U.S. dollar. Changes by more than 10% in these rates must be approved by the Fund's Board of Executive Directors. The Fund also advises member governments on anti-inflation and other measures that may be needed to keep their currencies acceptable in other countries. Members may exchange limited amounts of their own currencies for other national currencies held by the Fund, for purposes approved by its Directors.

Organization.—The Fund's activities are supervised by a Board of Governors on which each member government is represented. The Governors assemble once a year to review the Fund's work, admit new members and determine the conditions of their admission, approve revision of quotas; make arrangements to co-operate with other international organizations; determine the distribution of the net income of the Fund; hold biennial elections to a Board of Executive Directors, and discuss any other business appropriately brought before them.

The Executive Directors, to whom the Governors have in fact, delegated many of their powers, are responsible for the conduct of the general operations of the Fund. Five of them are appointed by nations having the five largest quotas. The others, on a board of not less than 12 and currently 14, are elected by member countries not represented by appointed Directors. Voting power in these elections is governed by the amount of each nation's subscription quota. Each appointed Director has voting power proportionate to the quota of the government he represents. Elected Directors cast the number of votes which counted toward their election.

The Managing Director is selected by the Executive Directors; he presides as chairman at their meetings but may not vote except in case of a tie His term is for 5 years, but may be terminated at the discretion of the Directors. He is responsible for the conduct of the ordinary business of the Fund, under general control of the Directors, and supervises a staff of 448.

Co-ordination with the United Nations.—The Fund, while an independent international organization, has been brought into relationship with the United Nations by an agreement signed on 15 April, 1948. The agreement is similar in form though not identical in substance with those linking the other specialized agencies to the United Nations.

Headquarters.—1818 H Street, N.W., Washington 25, D.C.

Officers.—Ivar Rooth, Managing Director; Andrew N. Overby, Deputy Managing Director; Frank V. Coe, Secretary.

6. International Bank for Reconstruction and Development.—Conceived at the Bretton Woods Conference, July, 1944, the Bank came into existence on 27 Dec., 1945, when its Articles of Agreement were ratified by 28 nations. Its purposes are to assist in the post-war reconstruction and development of its member countries by facilitating productive investment, and to promote the long-range growth of international trade . . . As described

capital stock is the equivalent of approximately $8,000 million. Of this amount 20% was paid in and can be used for loans subject to certain conditions; the remaining 80% constitutes a reserve fund and can be called only to meet the bank's obligations. The bank functions either by making or participating in direct loans out of its own funds, or out of funds raised by it in the private market; or by guaranteeing, in whole or in part, loans made by private investors.

At 31 March, 1951, the Bank had made 44 loans totalling $1,089,875,000 in 20 of its 49 member countries, for projects of general reconstruction and industrial development, electric power, transportation, agriculture, irrigation, flood control or communications. The Bank's lending operations have extended to Latin America, Europe, Africa, Asia, South-east Asia, the South-west Pacific and the Middle East. In addition to financial assistance, the bank furnishes technical assistance to its members in various ways. Most important of these are its missions which have visited the majority of its member countries. Technical assistance of a more comprehensive nature has been rendered through its missions to Colombia, Turkey, Cuba and Guatemala, which have undertaken over-all surveys of the countries' economies with a view to recommending ways to improve their productive facilities and thus to raise their standards of living.

Since it began operations, the Bank's net earnings have amounted to approximately $39 million, which have been allocated to a General Reserve against losses on loans and guarantees. This, together with a statutory Special Reserve, brought total reserves at 31 March, 1951, to approximately $57 million.

Headquarters.—1818 H Street, Washington, D.C.
President.—Eugene R. Black (U.S.A.).

7. International Civil Aviation Organization (ICAO).

Origin.—The Convention for the establishment of the International Civil Aviation [illegible] drawn up by the International Civil Aviation Conference held in Chicago from 1 Nov. to 7 Dec., 1944. A Provisional International Civil Aviation Organization (PICAO) operated from 6 June, 1945, until the formal establishment of ICAO on 4 April, 1947.

The Convention on International Civil Aviation superseded the provisions of the Paris Convention of 1919, which established the International Commission for Air Navigation (ICAN), and the Pan American Convention on Air Navigation drawn up at Havana in 1928.

Functions.—It assists international civil aviation by encouraging use of safety measures, uniform regulations for operation, simpler procedures at borders, etc.; and promotes use of new technical methods and equipment.

Organization.—The principal organs of ICAO are an Assembly, consisting of all members of the Organization, and a Council, which is comprised of 21 states elected by the Assembly, for 3 years, and meets in virtually continuous session. In electing these states, the Assembly must give adequate representation to (1) those member states of major importance in air transport; (2) those member states not otherwise included which make the largest contribution to the provision of facilities for international civil air navigation; (3) those member states not otherwise included whose election will ensure that all major geographical areas of the world are represented. The

12 members elected by the Council; Air Transport Committee, composed of 12 states appointed by the Council from among its members; and the Legal Committee, on which all members of ICAO may be represented.

Headquarters.—International Aviation Building, 1080 University St., Montreal, Quebec, Canada.

Secretary General.—Albert Roper (France).

Publications.—PICAO Journal. ICAO Monthly Bulletin. ICAO regional manuals.

8. Universal Postal Union (UPU).

Origin.—The UPU was formally established on 1 July, 1875, with the coming into force of the Universal Postal Convention adopted by the Postal Congress of Berne on 9 Oct., 1874. The UPU was known at first as the General Postal Union, its name being changed at the Congress of Paris in 1878.

Functions.—The aim of the UPU is to assure the organization and perfection of the various postal services and to promote, in this field, the development of international collaboration. To this end, the members of UPU are united in a single postal territory for the reciprocal exchange of correspondence.

Organization.—The UPU is composed of a Universal Postal Congress, which usually meets every five years, a permanent Executive and Liaison Committee, which consists of 19 members elected on a [illegible] basis by each Congress, and an International Bureau, which functions as the permanent secretariat.

Since 1 July, 1948, the Union has been governed by the revised Convention adopted by the twelfth Congress in Paris on 5 July, 1947, so as to ensure the continuity of its work in the intervals between Congresses.

Headquarters.—Case Berne 14, Switzerland.

Director.—Dr. Fritz Hess (Switzerland).

Publications.—Universal Postal Convention: Paris, 5 July, 1948. (Cmd. 7435.) The Postal Union (monthly, Arabic, Chinese, English, French, Spanish, Russian).

9. International Telecommunications Union (ITU).

Origin.—The International Telegraph Union, founded in Paris in 1865, and the International Radiotelegraph Union, founded in Berlin in 1906, were merged by the Madrid Convention of 1932 to form the International Telecommunications Union. ITU came into being on 1 Jan., 1934. The ITU has been governed since 1 Jan., 1949, by the revised International Telecommunication Convention adopted on 2 Oct., 1947, by the Atlantic City Plenipotentiary Conference.

Functions.—The ITU (1) allocates radio frequencies and registers radio frequency assignments; (2) seeks to establish the lowest rates possible, consistent with efficient service and taking into account the necessity for keeping the independent financial administration of telecommunication on a sound basis; (3) promotes the adoption of measures for ensuring the safety of life through telecommunication; and (4) makes studies and recommendations and collects and publishes information for the benefit of its members.

Organization.—The ITU consists of the Plenipotentiary Conference, administrative conferences, the Administrative Council, the General

Secretariat, the International Frequency Registration Board, and three international consultative committees.

Headquarters.—Palais Wilson, Geneva, Switzerland.
Secretary-General.—Léon Mulatier (France).

International Convention on Telecommunications, 1947. (Cmd. 8124.) H.M.S.O., 1950.

10. International Refugee Organization (IRO).

Origin.—The General Assembly approved constitution, budget and arrangement for the preparatory commission on 15 Dec., 1946, and approved the agreement bringing the organization into relationship with the United Nations on 18 Nov., 1948. The constitution became effective on 20 Aug., 1948.

Functions.—(1) The repatriation of refugees and displaced persons; (2) their identification, registration and classification; (3) their care and assistance, legal and political protection; (4) their transport; and (5) their resettlement and re-establishment in countries able and willing to receive them.

The Constitution of IRO contains a complex set of definitions of 'refugees' and 'displaced persons' who are eligible for assistance. Highly simplified, these definitions list as eligible: (1) persons displaced from their homelands as slave labourers; (2) victims of Nazi racial, religious and political persecution, (3) Spanish Republicans; (4) persons considered refugees before the outbreak of the Second World War; and (5) persons outside their home countries who as a result of events since the Second World War are 'unable or unwilling' to avail themselves of the protection of their countries of origin. Certain groups, such as war criminals, quislings and traitors, ... ancial assistance from their governments, as well as persor . . . . origin, are specifically excluded from IRO aid.

The General Assembly of the United Nations on 3 Dec., 1949, adopted a resolution establishing, as of 1 Jan., 1951, a High Commissioner's Office for Refugees, to continue the international protection of refugees after IRO terminates its activities at the end of 1950.

Headquarters.—Palais des Nations, Geneva, Switzerland.
Commissioner for Refugees.—G. J. van Heuven Goedhart.

An INTERNATIONAL TRADE ORGANIZATION is in process of formation; an Interim Commission is operating until the charter, drawn up by the United Nations Conference on Trade and Employment (21 November, 1947–24 March, 1948), has been signed by 27 or more nations.

INTER-GOVERNMENTAL MARITIME CONSULTATIVE ORGANIZATION.—A U.N. Maritime Conference met during Feb.–March, 1948. 18 nations signed a Maritime Convention which will take effect when ratified by 21 states, of which 7 shall each have no less than 1,000,000 gross tons of shipping. A Preparatory Committee met in March and Nov., 1948.

WORLD METEOROLOGICAL ORGANIZATION.—A meeting in Washington, 1947, revised the original convention of the International . . . . Organization (set up 1878). The new organization came into being on 23 Marc , 1:5 , 11 Etraz 5, Lausanne, Switzerland.)

WORLD COUNCIL OF CHURCHES.

The World Council of Churches was formally constituted on 23 Aug., 1948, at Amsterdam, by an assembly composed of 351 delegates representing 147 churches from 44 countries, which met from 22 Aug. to 2 Sept. The principal trends leading up to the World Council of Churches may be summarized as follows :—

(i) *Co-operation in overseas missionary work* of Protestant churches. The World Conference on Christian Missions, held at Edinburgh in 1910, was followed in 1921 by the establishment of the *International Missionary Council*. This Council held world conferences at Jerusalem in 1928 and at Tambaram (Madras) in 1938–39.

(ii) *The Faith and Order movement*, which seeks to study the outstanding differences of belief and practice separating Christian churches, was founded under the initiative of Charles Brent, Bishop of the Protestant Episcopal Church of the U.S.A. in the Philippines. This movement held world conferences at Lausanne in 1927 and Edinburgh in 1937.

(iii) *The Life and Work movement*, which promoted common Christian study and action with regard to the social, political and economic problems of the time, was founded largely under the leadership of Nathan Söderblom, Archbishop of Uppsala. World conferences were held at Stockholm in 1925 and at Oxford in 1937.

A provisional committee to prepare the setting up of a World Council was appointed at Utrecht, on 13 May, 1938, under the chairmanship of William Temple, then Archbishop of York.

Organization.—The Amsterdam Assembly adopted a budget of $363,000; of this sum $300,000 was basic income to be derived from the participating churches; $60,000 derived for the work of the Ecumenical Institute, from a donation by the Rockefeller Foundation; and a special donation of $3,000 for an enquiry into the work of women in the Church. A separate budget provided $176,660 for the administration of the Department for Inter-Church Aid.

The budget [illegible] whole-time staff of some 37 persons (including 7 whole-time an[illegible]; [illegible] workers in the Inter-Church Aid Department) operating from a main headquarters office at 17 route de Malagnou, Geneva, with regional offices in London (39, Doughty St., W.C.1) and New York (297 Fourth Avenue, New York 10, N.Y.).

The following departments were authorized :—

(*a*) a General Secretariat,

(*b*) the Commission on Faith and Order (which is, in the first instance, composed of the members of the Continuation Committee of the Edinburgh Conference of 1937),

(*c*) a Study Department to promote international and inter-church co-operation in Christian studies,

(*d*) a Department for Inter-Church Aid and Service to Refugees (including displaced persons).

(*e*) a Youth Department,

(*f*) the Churches' Commission on International Affairs (sponsored jointly with the International Missionary Council),

(*g*) the Ecumenical Institute (made possible by the Rockefeller Foundation),

(*h*) a Department of Finance and Business,

(*i*) a Department on Prisoners of War [illegible] existence an important aspect of the work of the Provisional [illegible],

(*j*) a Department of Information (including informative material for the participating churches and general press relations),

(*k*) a Commission on the Work of Women in the Church,

(*l*) a Secretary for Evangelism (to co-ordinate and advise the participating churches in their evangelistic work).

A Central Committee was appointed, in accordance with the Constitution, consisting of 90 members, with power to appoint its own Executive. It met at Chichester in July, 1949, and at Toronto in July, 1950.

The Assembly has no legislative power or authority over the participating churches, so that all its acts are of an advisory character, depending upon their acceptance by the member churches for implementation.

The officers of the World Council of Churches are as follows :—

PRESIDENCY.—*Hon. President :* Dr. John R. Mott. *Presidents :* Pasteur Dr. Marc Boegner; Archbishop of Canterbury (Dr. Geoffrey Fisher); Dr. T. C. Chao; Bishop G. Bromley Oxnam; Archbishop of Uppsala (Dr. Yngve Brilioth).

CENTRAL COMMITTEE.—*Chairman :* Bishop of Chichester (Dr. George Bell). *Vice-Chairman :* Dr. Franklin C. Fry (Lutheran Church in U.S.A.).

GENERAL SECRETARIAT.—*General Secretary :* Rev. W. A. Visser 't Hooft, D.D. *Associate General Secretaries :* Dr. R. Mackie (Reconstruction and Youth); Bishop Stephen Neill (Study and Evangelism); Rev. O. S. Tomkins (Faith and Order and Relations with Orthodox Churches); Dr. H. S. Leiper (Promotion); Dr. O. F. Nolde (International Affairs). *Heads of Departments :* F. Northam (Finance and Business); Rev. N. Ehrenström (Study);

Dr. H. Kraemer (Director of the Ecumenical Institute); Miss Jean Fraser (Youth); Rev. H. Hoekendijk (Evangelism).

MEMBER CHURCHES.—The following is a list of the 160 Member Churches :—

Australasia.—Methodist Church of Australasia.

Australia.—Chur[illegible] tralia and Tasmania; Congregational Union of Australia, Federal [illegible] of Christ in Australia; Presbyterian Church of Australia.

Austria.—Evangelische Kirche A.u.H.B. in Oesterreich (Evangelical Church of the Augsburg and Helvetic Confession).

ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION (O.E.E.C.).

On 5 June, 1947, the U.S. Secretary of State, Marshall, made a speech at Harvard University, in which he outlined the seriousness of the shortage of dollars for the economic situation of Europe, and suggested American assistance in the economic recovery, on the understanding that the European

countries reached some agreement about their requirements and the part they themselves would take in giving proper effect to the action of the U.S.

In consequence of this, a conference of European powers was held in Paris to discuss means for concerted action on these lines. O.E.E.C. was formed as a result of this conference.

At the same time, the U.S. Congress passed, on 2 April, 1948, the Foreign Assistance Act. Title I of the Act, called the Economic Co-operation Act of 1948, provides in Section 104 for the establishment of Economic Co-operation Administration.

Thus O.E.E.C. and E.C.A. are two separate bodies, the former an international and the latter a purely American organization, but they work to a common end and a functional link exists between them.

I. O.E.E.C.

An exploratory conference of the foreign ministers of the United Kingdom, France and the U.S.S.R. was held in Paris from 27 June to 3 July, 1947, when it broke down as M. Molotov maintained that an overall economic programme for Europe would infringe on national sovereignty and interfere with existing economic arrangements. Thereupon the United Kingdom and France invited all the European countries (with the exception of Spain) which desired to participate in a programme on the lines suggested in Mr. Marshall's speech. The invitation, issued on 4 July, was accepted by Austria, Belgium, Denmark, Eire, Greece, Iceland, Italy, Luxemburg, the Netherlands, Norway, Portugal, Sweden, Switzerland and Turkey; it was declined by Bulgaria, Czechoslovakia, Finland, Hungary, Poland, Rumania and Yugoslavia.

The conference of the sixteen nations, willing to work the Marshall plan, began in Paris on 12 July, and set up the Committee of European Economic Co-operation (CEEC). On 22 Sept. the sixteen countries signed a report formulating an economic recovery programme which aimed at restoring European economy by the end of 1951 by (*a*) a strong production programme by each participant, (*b*) creation and maintenance of internal financial stability, (*c*) maximum mutual help between the participating countries, and (*d*) a solution of the problem of the European trading deficit with the American countries. The report calculated the size of the deficit for the 16 countries and their dependent territories at $22,440 million over the 4-year period, 1948–51.

A second report of the Secretary-General of the Committee of European Economic Co-operation issued on the 15 March, 1948, demonstrated the need for a permanent co-ordinating body. For this purpose, the 16 nations and the Anglo-American and French occupation zones of Germany signed a convention for European economic co-operation in Paris on 16 April, 1948; the U.K.–U.S. zone of the Free Territory of Trieste adhered to it in July, 1948. Since 31 Oct., 1949, Germany is represented in O.E.E.C. by the government of the Federal Republic. On 2 June, 1950, Canada and the United States accepted the invitation to associate themselves with the work of the Organization relating to the study of economic problems of common interest to and affecting the immediate future of the countries of Western Europe and North America.

Part I of the Convention deals with the general obligations which the 16 countries and the Anglo-American and French Zones of Germany have undertaken towards each other in the field of economic co-operation. They agree:—

(1) To work in close economic co-operation and to undertake the preparation and execution of the joint recovery programme;

(2) to develop production in overseas and metropolitan territories;
(3) to draw up programmes for production and exchange of commodities and services;
(4) to promote the maximum possible interchange of goods and services, and to continue efforts to achieve a multilateral system of payments, together with co-operation in relaxing restrictions on trade and payments;
(5) to strengthen their economic links and to continue their study of customs unions or analogous arrangements;
(6) to co-operate with other like-minded countries in reducing tariff barriers with a view to achieving a sound and balanced multilateral trading system in accordance with the principles of the Havana charter;
(7) to achieve and maintain stability of currency and internal finance;
(8) to make full use of available man-power and to endeavour to provide full employment for their own people;
(9) to furnish the new organization with all the information it may request of them.

Part II contains the constitution of the permanent organization.

The organization may make decisions for implementation by its members; it may enter into agreements with its members, non-member countries, the United Nations and other international organisations; and it may make recommendations to the United States Government and other governments.

Decisions of the organization will be taken by mutual agreement of all members (unless otherwise decided), and the abstention of any one of them declaring himself not to be interested in any subject under discussion shall not invalidate decisions.

The machinery of organization will consist of :—

A *Council*, on which all the members will be represented and which will be responsible for all policy decisions;

an *Executive Committee* of seven members designated annually by the Council to which the committee will be responsible. Any member state not represented on the Council may take part in its work on any subject of particular interest to it;

the *Secretariat*, which will be selected by the secretary-general, who, in turn, will be appointed by the Council. The secretariat personnel will have international status, owing allegiance to the organization and not to individual governments,

a number of *ad hoc* committees.

The organization will establish relations with the United Nations, its principal organs and specialized agencies, and it may also maintain relations with other international bodies.

Chairman of the Council (1950–51).—Dirk U. Stikker (Netherlands).
Chairman of the Executive Committee.—Sir Edmund Hall Patch (U.K.).
Members of the Executive Committee.—Belgium, Denmark, France, Germany, Irish Republic, Italy, United Kingdom. *Rapporteur Général.*—Turkey.
Consultative Group of Ministers.—This is formed of the members of the Executive Committee meeting at ministerial level under the chairmanship of the President of the Council.
Secretary-General.—M. Marjolin (France).
Headquarters.—Château de la Muette, 2 rue André Pascal, Paris XVI.

The functions of the O.E.E.C. since its inception in 1947 have been essentially twofold: on the one hand to develop co-operation between member countries, and on the other to assist the United States Government in carrying out its programme of aid to Europe. In 1948 the main emphasis was on the increase of production, in 1949 on internal financial stability, and in 1950 on European co-operation in the liberalization of trade and payments. Towards the end of 1950, studies were undertaken with the object of deciding what raw material shortages were likely to occur as a result of the changed world situation, and what action could be taken, jointly or individually, to minimize their effects.

The main activities of O.E.E.C. during the last three years may be summarized as follows:

Annual Programmes and Reports—Distribution of Aid.—Programmes have been drawn up each year with the object of indicating to E.C.A. the require-

ments of Member Countries as a whole and suggesting ways of distributing among them the total aid voted by the United States Congress. Proposals for division of aid were made by O.E.E.C. for the years 1948–49 and 1949–50. For the first part of 1950–51, the aid voted by Congress was divided in [illegible] the same proportions as that for 1949–50. Beginning Jan., 1[illegible] [illegible]ganization has published yearly reports on European Recovery.

Intra-European Payments.—During each of the first two years, agreements for Intra-European Payments were signed under which creditor countries granted certain drawing rights in their own currency to debtor countries. To the extent that these rights were used by the debtors, the creditors received dollars from E.C.A. In July 1950, a further step was taken when the Second Payments Agreement was replaced by the European Payments Union (E.P.U.) providing for a relatively automatic system for the settlement of balances whereby members are able to use their current surpluses in any one currency for settlement of current deficits in any other currency. A general clearing takes place periodically leaving each country in a net position either of creditor or debtor vis-à-vis the Union.

Liberalization of Trade.—During 1949 the Organization decided that member countries should take the necessary steps for the progressive elimination of quantitative import restrictions between one another, in order to achieve as complete a liberalization of intra-European trade as possible by 1951.

Plans for Economic Integration. In July 1950 three plans were submitted to the Organization by the Netherlands, Italy and France. Their object is to achieve integration of Europe in economy, *e.g.*, elimination of quantitative restrictions, tariffs and other impediments to trade. The Organization decided to undertake studies in this respect and to examine implications of integration in the main sectors of European economy (coal, steel, etc.).

Co-ordination of Investments and International Investments.—The Organization has endeavoured to determine how far and by what means it would be possible to influence investments so as to make the best use of the resources of member countries. Furthermore, the Organization is studying the conditions and regulations governing foreign investment in member countries and their overseas territories, particularly ways and means of promoting American investment and intra-European investment.

Internal Financial Stability.—A first report, based on member countries' indications as to their internal financial position, was prepared in 1949 showing that on the whole a fair measure of stability had been attained by all countries. A second report, published in Aug., 1950, analyses particularly the consequences of devaluation and the implications of diminishing American aid.

Dollar Problem.—While less urgent than in 1948, the balance of payments problem vis-à-vis third countries, and especially North America, still remains one of the main problems confronting the Organization. The O.E.E.C. is studying ways and means of earning dollars in the United States and in third countries as well as of reducing dollar expenditure.

Productivity and Manpower.—In view of the importance of increasing productivity in Europe, a number of technical missions of European experts to the United States and of American experts to Europe have been organized. In the field of manpower, special attention is given to free movement of labour in Europe and to overseas emigration.

Raw Materials.—All the problems and activities mentioned above were overshadowed by the end of 1950 by the necessity, arising from the international situation, of taking appropriate measures to forestall rising prices [illegible] raw materials. In Dec., 1950, the O.E.E.C. decided to keep [illegible] review the raw materials situation in order to ensure an equitable distribution in the common interest of those raw materials which are scarce.

II. E.C.A.

The Economic Co-operation Act of 1948 was passed by the United States Congress on 2 April, 1948, and signed by the President on 3 April, 1948. In April, 1949, Congress amended the original Act; and in 1950 further amendments were made. The following sums have been authorized for carrying out activities under the Economic Co-operation Act of 1948, as amended:—$4,003,000, April, 1948–April, 1949; $1,150,000, April, 1949–June, 1949; $4,280,000, June, 1949–June, 1950; $2,700,000, June, 1950–June, 1951.

The purpose of the Economic Co-operation Act of 1948 is to aid the participating countries through their individual efforts to become independent of extraordinary outside economic assistance within the period of operations (under the Act) by:—

(1) Promoting industrial and agricultural production in the participating countries;

(2) furthering the restoration or maintenance of the soundness of European currencies, budgets and finances;

(3) facilitating and stimulating the growth of international trade of participating countries with one another and with other countries by appropriate measures, including reduction of barriers which may hamper such trade.

The programme is to terminate on 30 June, 1952, or upon the date of the passage of a concurrent resolution by the two Houses of Congress.

The Administrator is to terminate the provision of assistance to any participating country when that country is not adhering to the terms of its agreement with the U.S., or is diverting assistance to purposes not specified in the Act or if, because of changed conditions, assistance is no longer consistent with the national interest of the U.S.

An *Economic Co-operation Administration* has been established, which is headed by an Administrator, appointed by the President with the advice and consent of the Senate and responsible to him. He is a member of the National Advisory Council on International Monetary and Financial Problems (set up under the Bretton Woods Agreement Act).

The Administrator was authorized, with the approval of the President, to create a corporation with such powers as he may deem necessary for it to fulfil its functions. However, no such corporation has been formed.

The Administrator was to: (1) review the requirement[illegible] of the countries for assistance; (2) formulate [illegible] projects submitted to him [illegible] of such programmes; (4) terminate provision of assistance in circumstances described above.

A *Public Advisory Board* with the Administrator as chairman, with not more than twelve other members, citizens of the U.S., advise the administrator on general or basic policy matters

A *U.S. Special Representative in Europe*, appointed by the President, is the representative of the Administrator in Europe, and also the chief U.S. representative on any organization which the participating countries may set up to further a joint programme of European recovery.

For assuring within each country the performance of economic recovery measures, special U.S. missions have been established in each participating country under a chief appointed by the President.

The Administrator may furnish to participating countries commodities which he deems to be required; they are to be procured from any available sources including U.S. Government stocks. 50% of gross tonnage of commodities procured within the U.S. are to be transported abroad in U.S. vessels. The Administrator may provide assistance for any [illegible] country, either through grants, or upon cash payments, or on terms of credit, [illegible] terms, including payment by transfer to the U.S. of materials which it needs. The Administrator is to allocate funds for the purpose of extending credits to the Export-Import Bank, which shall adminster the credits on terms he specifies.

Measures for protection of the U.S. economy include the provision that the burden on the American taxpayer shall be minimized by reducing the amount of dollar purchases by the participating countries to the greatest extent possible, consistent with maintaining an adequate supply of the essentials for the functioning of their economies and for their co -

tinued recovery. Export of a commodity to a non-participating country, wholly or partly in Europe, is not to be authorized if the supply of that commodity is not sufficient to fulfil the requirements of the participating countries, unless such export is otherwise in the national interest of the U.S.

Multilateral pledges to use all their efforts to accomplish a joint recovery programme based upon self-help and mutual co-operation were embodied in the O.E.E.C. report signed at Paris on 22 Sept., 1947. The provision of assistance under the Act is contingent upon the continuous effort of the participating countries to accomplish a joint recovery programme through multilateral undertakings and the establishment of a continuing organization for this purpose.

In addition to continued co-operation of the participating countries, each country was required to conclude an agreement with the U.S. under which it agreed to :—

(1) [illegible] to the Administrator, for ap[illegible] [illegible] antial part with assistance furnished under the Act, which projects, whenever practicable, shall include projects for increased production of coal, steel, transportation facilities and food;

(2) take financial and monetary measures necessary to stabilize currency and restore confidence in its monetary system;

(3) co-operate with other participating countries in facilitating and stimulating an increasing exchange of goods and services, and in reducing barriers to trade;

(4) take measures to locate and identify and put to appropriate use in furtherance of the aid programme assets and earnings therefrom which belong to the citizens of such country and which are situated within the U.S. or its territories;

(5) facilitate the transfer to U.S. by sale or exchange, or barter, or otherwise, of materials required by the U.S. for stockpiling, if available, after regard to reasonable requirements for domestic use;

(6) a deposit in the local currency [illegible] account, to be equal in value to the goods and services received [illegible] Act. This special account to be used for purposes of securing internal financial and monetary stability, and the stimulation of production, as agreed by the country and the Administrator;

(7) publish full reports on the operations under the agreement at least every three months,

(8) furnish relevant information which would be of assistance to the U.S. in determining the nature and scope of operations;

(9) negotiate agreements for U.S. purchases of commodities and materials which are required by the U.S. as a result of deficiencies in its own resources,

(10) submit to the International Court of Justice, or other tribunal, cases involving compensation of a U.S. national because of governmental measures affecting his property rights.

The Economic Co-operation Administration, in addition to furnishing aid to European countries, has also furnished economic assistance under the China Aid Acts of 1948 and 1949, and the Far Eastern Economic Assistance Acts, 1949–50 and 1950–51.

Administrator.—William C. Foster, former Under Secretary of Commerce and Deputy to Paul G. Hoffman, the first Administrator (appointed 25 Sept., 1950).

U.S. Special Representative in Europe.—Milton Katz, former Professor of Administrative Law at Harvard University and Deputy to Averell Harriman, the first Special Representative (appointed 1 July, 1950).

BRUSSELS TREATY ORGANIZATION.

The project of a political association of the democracies of Western Europe was put forward by General Smuts, Prime Minister of the Union of South Africa, in an address to the Empire Parliamentary Association on 25 Nov., 1943. It was taken up by Mr. Eden, Secretary of State for Foreign Affairs, in the House of Commons on 2 Aug., 1944. He and, subsequently, his successor, Mr. Bevin, made it clear that the political and economic alignment of the European democracies did not establish a 'western bloc' directed against the Soviet Union, and in Dec., 1945, Marshal Stalin accepted this assurance on behalf of the Soviet Union.

A closer union of the Western European countries has been prepared by the following agreements :—

The *Anglo-French Treaty*, signed at Dunkirk on 4 March, 1947, cemented the long-standing friendship between the two countries in a formal alliance providing for mutual defence against any renewal of German aggression and for consultation on economic matters to promote the prosperity and economic security of both countries.

An *Anglo-French Economic Committee* was set up by agreement between the two governments in Sept., 1946, to hold periodic reviews of the balance of trade and payments between the franc and sterling areas and to co-ordinate the reconstruction plans of the two countries.

The *Benelux Customs Union* between Belgium, the Netherlands and Luxemburg, for which a convention had been concluded in London on 5 Sept., 1944, came formally into existence with the exchange of ratifications on 29 Oct., 1947; a common customs tariff came into force on 1 Jan., 1948.

The *Franco-Italian Customs Union*, the scope of which was defined in a protocol signed at Turin on 20 March, 1948. A treaty foreseeing an eventual customs and economic union between France and Italy, was signed in Paris on 26 March, 1949.

Colonial Co-operation. Following talks between experts of the French Ministry of Colonies and the United Kingdom Colonial Office in Nov., 1945, arrangements were made for exchanges of views on a wide range of administrative and technical problems between the colonial authorities of the two countries in Africa. These discussions were later extended to include Belgium and Portugal. In the spring of 1947 a programme of technical conferences concerned with public health and medical work, labour matters, [illegible] problems and communications, was drawn up covering a period up to 1950.

In the Caribbean area constant co-operation is secured through the work of the *Caribbean Commission*, on which the United Kingdom, France and the Netherlands are represented, together with the U.S.A.

European Economic Co-operation (see above, p. 25).

After the conference of diplomatic representatives of the United Kingdom, France, the Netherlands, Belgium and Luxemburg, which met in Brussels from 4 to 12 March, 1948, a fifty-year treaty 'for collaboration in economic, social and cultural matters and for collective self-defence' was signed by the five Foreign Ministers in Brussels on 17 March (Cmd. 7367).

The general aims of the treaty are defined in the preamble as :—

'To reaffirm their faith in fundamental human rights, in the dignity and worth of the human person and in the other ideals proclaimed in the Charter of the United Nations;

'To fortify and preserve the principles of democracy, personal freedom and political liberty, the constitutional traditions and the rule of law, which are their common heritage:

'To strengthen, with these aims in view, the economic, social and cultural ties by which they are already united;

'To co-operate loyally and to co-ordinate their efforts to create in western Europe a firm basis for European economic recovery;

'To afford assistance to each other, in accordance with the Charter of the United Nations, in maintaining international peace and security and in resisting any policy of aggression;

'To associate progressively, in the pursuance of these aims, other States inspired by the same ideals and animated by the like determination.'

The first three articles provide for united action in the economic, social and cultural domains. Economic policies are to be more closely aligned by the co-ordination of production and the development of commercial exchanges. Combined efforts are to be made to improve social conditions, notably by raising the standard of living, and by developing social services on corresponding lines. Consultations are to take place with the object of achieving the earliest possible application of recommendations of 'immediate practical interest' relating to social matters adopted with their approval in specialized agencies. Cultural exchanges will be promoted. The economic co-operation shall not duplicate or prejudice the work of other economic bodies in which the Parties are interested (*e.g.*, the European Recovery Programme and the U.N. Economic Commission for Europe), but shall on the contrary assist the work of those organizations.

Article IV provides that: 'If any of the [illegible] States should be the object of an armed attack in Europe, the other high [illegible] ll, in accordance with the provisions of Article 51 of the Charter of the [illegible] the party so attacked all the military and other aid and assistance in their power.' (Article 51 of the Charter upholds the right of individual or collective self-defence if an armed attack occurs against a member of the United Nations until the Security Council has taken the measures necessary to restore peace and security.)

Article V states that all such measures shall be immediately reported to the Security Council, and that the Treaty does not prejudice in any way the obligations of the contracting parties under the United Nations Charter.

In Article VI the contracting parties undertake not to conclude any alliance or participate in any coalition directed against any other of the five countries.

Article VII provides for the creation of a Consultative Council, so organized that it can exercise its functions continuously, which will provide means of consultation on all the questions dealt with in the Treaty and which may also be convened immediately at the request of any of the participants 'to permit the high contracting parties to consult with regard to any situation which may constitute a threat to peace, in whatever area this threat should arise; with regard to the attitude to be adopted and the steps to be taken in case of a renewal by Germany of an aggressive policy; or with regard to any situation constituting a danger to economic stability.'

According to Article VIII, all disputes among the five countries are to be settled either by conciliation or by submission to the International Court of Justice.

Article IX provides that any other state may, by agreement between the signatories, be invited to accede to the treaty.

As a result of this treaty the following organization has been set up :—

1. *The Consultative Council,* composed of the five Foreign Ministers, to meet at least once every three months. The Council is the supreme authority of the organization

2. *The Permanent Commission,* composed of the heads of the four diplomatic missions in London and a United Kingdom representative, to meet at least once a week and act for the Consultative Council when this is not in session.

The Consultative Council and the Permanent Commission are assisted by a Secretariat-General.

Headquarters.—2 Eaton Place, London, S.W.1.
Secretary-General.—E. Star Busmann (Netherlands).

3. *Organization of Defence.*—On 20 Dec., 1950, the Consultative Council decided to merge the Western Union defence organization with the unified North Atlantic Treaty command under General Eisenhower.

4. *The Economic and Financial Organization.*—Conferences of the Finance Ministers are held when necessary, and an Economic and Finance Committee has been set up to study the economic and financial

problems which arise between the five countries, especially from the point of view of defence.

5. *The Cultural and Social Organization*, consisting of the Cultural Committee, the Social Committee, the Public Health Committee and the War Pensions Committee. These committees have appointed permanent or temporary sub-committees, to deal, *e.g.*, with social security, man-power, migration, youth questions, etc.

COUNCIL OF EUROPE.

The Consultative Council of the Brussels Treaty Organization [illegible] in Jan., 1949, to establish a Council of Europe, consisting of a *Committee of Ministers* and a *Consultative Assembly*. This was set up on 5 May, 1949, by the Foreign Ministers of Belgium, Denmark, France, the Irish Republic, Italy, Luxemburg, the Netherlands, Norway, Sweden and the United Kingdom. On 9 Aug., 1949, Turkey and Greece joined the Council; on 7 March, 1950, Iceland; on 13 May, 1950, the Saar; on 13 July, 1950, the German Federal Republic, the last two as associate members.

The Statute of the Council of Europe (Cmd. 7686, Misc. No. 7, 1949) consists of a preamble and 42 articles.

Aim of Council.—ARTICLE 1.—(*a*) The aim of the Council of Europe is [illegible] unity between its members [illegible] ideals and [illegible] their [illegible] progress. [illegible] e pursu [illegible] estions of common concern and by [illegible] legal, and administrativ [illegible] rights and fundamental freedoms. (*c*) Participation in the Council of Europe shall not affect the collaboration of its members in the work of the United Nations and of other international [illegible] which they are parties. (*d*) Matters relating to national defence do [illegible] of the Council of Europe.

Membership.—ARTICLE 3.—Every member of the Council of Europe must accept the principles of the rule of law and of the enjoyment by all persons within its jurisdiction of human rights and fundamental freedoms, and collaborate sincerely and effectively in the realization of the aim of the Council. ARTICLE 4.—Any European state, which is deemed to be able and willing to fulfil the provisions of Article 3, may be invited to become a member of the Council of Europe by the Committee of Ministers. ARTICLE 5.—In special circumstances, a European country, which is deemed to be able and willing to fulfil the provisions of Article 3, may be invited by the Committee of Ministers to become an Associate Member of the Council of Europe. An Associate Member shall be entitled to be represented in the Consultative Assembly only.

Members may withdraw (Article 7) or be suspended (Articles 8, 9) from the Council

General.—ARTICLE 10.—The organs of the Council of Europe are: (i) the Committee of Ministers; (ii) the Consultative Assembly. Both these organs shall be served by the Secretariat of the Council of Europe.

ARTICLE 11.—The seat of the Council of Europe [illegible]

ARTICLE 12.—The official languages of the Coun [illegible] e English and French.

Committee of Ministers.—ARTICLE 13.—The Committee of Ministers is the organ which acts on behalf of the Council of Europe. ARTICLE 14.—Each member shall be entitled to one representative on the Committee of Ministers and each representative shall be entitled to one vote. Representatives on the Committee shall be the Ministers for Foreign Affairs.

ARTICLE 20.—(*a*) Resolutions of the Committee of Ministers relating to the following important matters—namely: (i) aims of Council; (ii) reports of activities; (iii) publicity; (iv) meeting place of Assembly; (v) organization; and (vi) any other question which the Committee may, by a resolution passed under (*d*) below, decide should be subject to a unanimous vote on account of [illegible] the unanimous vote of the representatives casting a vote, and of a [illegible] of the representatives entitled to sit on the Committee.

(*b*) Questions arising under the rules of procedure or under the financial and administrative [illegible] e decided by a simple majority vote of the representatives entitled to sit

(*c*) Resolutions of the Committee under Articles 4 and 5 require a two-thirds majority of all the representatives entitled to sit on the Committee.

(*d*) All other resolutions of the Committee, including the adoption of the budget, of rules of procedure and of financial and administrative regulations, of recommendations for the amendment of articles of this Statute, require a two-thirds majority of the representatives casting a vote and of a majority of the representatives entitled to sit on the Committee.

The Consultative Assembly.—ARTICLE 22.—The Consultative Assembly is the deliberative organ of the Council of Europe. It shall debate matters within its competence under this Statute and present its conclusions, in the form of recommendations, to the Committee of Ministers.

ARTICLE 23.—(*a*) The Consultative Assembly shall discuss, and may make recommendations upon, any matter within the aim and scope of the Council of Europe, which (i) is referred to it by the Committee of Ministers with a request for its opinion, or (ii) has been approved by the Committee for inclusion in the agenda of the Assembly on the proposal of the latter. (*b*) [illegible] regard to the work of other European [illegible] in which some or all of the members of the Council are [illegible] shall decide, in case of doubt, whether any question raised in the course of the Session is within the agenda of the Assembly approved under (*a*) above.

ARTICLE 25.—(*a*) The Consultative Assembly shall consist of representatives of each member appointed in such a manner as the government of that member shall decide. Each representative must be a national of the member whom he represents, but shall not at the same time be a member of the Committee of Ministers. (*b*) No representative shall be deprived of his position as such during a session of the Assembly without the agreement of the Assembly. (*c*) Each representative may have a substitute who may, in the absence of the representative, sit, speak, and vote in his place. The provisions of paragraph (*a*) above apply to the appointment of substitutes.

ARTICLE 26.—The following states, on becoming members, shall be entitled to the number of representatives given below:—Belgium 6, Denmark 4, France 18, Irish Republic 4, Italy 18, Luxemburg 3, Netherlands 6, Norway 4, Sweden 6, United Kingdom 18. [On joining the Council Turkey was allotted 8, Greece 6, Iceland 3, the Saar 3, Germany 18 seats.]

ARTICLE 32.—The Consultative Assembly shall meet in ordinary session once a year, the date and duration of which shall be determined by the Assembly so as to avoid so far as possible overlapping with parliamentary sessions of members and with sessions of the General Assembly of the United Nations. In no circumstances shall the duration of an ordinary session exceed one month unless both the Assembly and the Committee of Ministers concur.

ARTICLE 34.—The Committee of Ministers may convoke an extraordinary session of the Consultative Assembly at such time and place as the Committee, with the concurrence of the President of the Assembly, shall decide.

Secretariat.—ARTICLE 36.—(*a*) The Secretariat shall consist of a Secretary-General, a Deputy Secretary-General and such other staff as may be [illegible] The Secretary-General and Deputy Secretary-General shall be appointed by [illegible] Assembly on the recommendation of the Committee of Ministers. (*c*) The remaining staff of the Secretariat shall be appointed by the Secretary-General, in accordance with the administrative regulations. (*d*) No member of the Secretariat shall hold any salaried office from any government or be a member of the Consultative Assembly or of any national legislature or engage in any occupation incompatible with his duties.

The Statute came into force on 3 Aug., 1949.

The first meeting of the Consultative Assembly took place at Strasbourg from 10 Aug. to 8 Sept., 1949; the second session from 7 to 20 Aug. and 17 to 24 Nov., 1950. Both times, Paul-Henri Spaak (Belgium) was elected President of the Assembly. The Assembly has set up 6 committees and a Standing Committee to preserve its existence between sessions. In addition, a Joint Committee was set up in 1950 to facilitate the relations between the two organs of the Council of Europe and to co-ordinate their activities. This is composed of 5 representatives of the Committee of Ministers and 7 representatives of the Consultative Assembly, including its President, who is also chairman of the committee.

Secretariat General.—Place Lenôtre, Strasbourg.
Secretary-General.—Jacques Camillo Paris.

A treaty setting up a European coal and steel community was signed in Paris on 18 April, 1951, by Belgium, France, Germany, Italy, Luxemburg and the Netherlands.

NORTH ATLANTIC TREATY ORGANIZATION (N.A.T.O.).

On 29 April, 1948, the Canadian Secretary of State for External Affairs broached the idea of a 'security league' of the free nations, in extension of the Brussels Treaty, the signing of which had already been accompanied by speeches of President Truman, Mr. Mackenzie King and Mr. Bevin favouring a wider scope of collective security system. The United States Senate, on 11 June, recommended 'the association of the United States with such regional and other collective arrangements as are based on continuous self-help and mutual aid, and as affect its [illegible]' Detailed proposals were subsequently worked out between [illegible] Treaty powers, the United States and Canada.

On 4 April, 1949, the foreign ministers of Belgium, Canada, Denmark, France, Iceland, Italy, [illegible] Netherlands, Norway, Portugal, the United Kingdom and t[illegible] met in Washington and signed the following pact:

Preamble.—The parties to this treaty reaffirm their faith in the purposes and principles of the Charter of the United Nations and their desire to live in peace with all peoples and all [illegible] determined to safeguard the freedom, [illegible], and civilization [illegible] on the principles of democracy, [illegible]; and the rule of law. They seek to promote stability and well-being in the North Atlantic area. They are resolved to unite their efforts for collective defence for the preservation of peace and security. They therefore agree to this North Atlantic Treaty.

Article 1.—The parties undertake, as set forth in the Charter of the United Nations, to settle any international disputes in which they may be involved by peaceful means in such a manner that international peace and security and justice are not endangered, and to refrain in their international relations from the threat or use of force in any manner inconsistent with the purposes of the United Nations.

Article 2.—The parties will contribute toward the further development of peaceful and friendly international relations by strengthening their free institutions, by bringing about a [illegible] ples upon which these institutions are founded, and by [illegible] id well-being. They will seek to eliminate conflict in their [illegible] will encourage economic collaboration between any or all of them.

Article 3.—In order more effectively to achieve the objectives of this treaty, the parties, separately and jointly, by means of continuous and effective self-help and mutual aid, will maintain and develop their individual and collective capacity to resist armed attack.

Article 4.—The parties will consult together whenever, in the opinion of any of them, the territorial integrity, political independence, or security of any of the parties is threatened.

Article 5. [illegible] an armed attack against one or more of them in Europe or North [illegible] an attack against them all and consequently they agree that, if such an armed attack occurs, each of them, in exercise of the right of individual or collective self-defence recognized by Article 51 of the Charter of the United Nations, will assist the party or parties so attacked by taking forthwith, individually and in concert with the other parties, such action as it deems necessary, including the use of armed force, to restore and maintain the security of the North Atlantic area. Any such armed attack and all measures taken as a result thereof shall immediately be reported to the Security Council. Such measures shall be terminated when the Security Council has taken the measures necessary to restore and maintain international peace and security.

Article 6.—For the purpose of Article 5 an armed attack on one or more of the parties is deemed to include an armed attack on the territory of any of the parties in Europe or North America, on the Algerian Departments of France, on the occupation forces of any party in Europe, on the islands under the jurisdiction of any party in the North Atlantic area north of the Tropic of Cancer or on the vessels or aircraft in this area of any of the parties.

Article 7.—This treaty does not affect, and shall not be interpreted as affecting, in any way [illegible] obligations under the Charter of the parties which are members of the United [illegible], or the primary responsibility of the Security Council for the maintenance of international peace and security.

Article 8.—Each party declares that none of the international engagements now in force between it and any other of the parties or any third state is in conflict with the provisions of this treaty, and undertakes not to enter into any international engagement in conflict with this treaty.

Article 9.—The parties hereby establish a Council, on which each of them shall be represented, to consider matters concerning the implementation of this treaty. The

Council shall be so organized as to be able to meet promptly at any time. The Council shall set up subsidiary bodies as may be necessary; in particular it shall establish immediately a defence committee which shall recommend measures for the implementation of Articles 3 and 5.

Article 10.—The parties may, by unanimous agreement, invite any other European state in a position to further the principles of this treaty and to contribute to the security of the North Atlantic area to accede to this treaty. Any state so invited may become a party to the treaty by depositing its instrument of accession with the government of the United States of America. The government of the United States of America will inform each of the parties of the deposit of each such instrument of accession.

Article 11.—This treaty shall be ratified and its provisions carried out by the parties in accordance with their respective constitutional processes. The instruments of ratification shall be deposited as soon as possible with the [illegible] of the United States of America, which will notify all the [illegible] of [illegible]. The treaty shall enter into force between the states which [illegible] as soon as the ratifications of the majority of the signatories [illegible] tifications of Belgium, Canada, France, Luxemburg, the Netherlands, the [illegible] and the United States, have been deposited and shall have come into effect with respect to other states on the date of the deposit of their ratifications.

Article 12.—After the treaty has been in force for 10 years, or at any time thereafter, the parties shall, if any of them so requests, consult together for the purpose of reviewing the treaty, having regard for the factors then affecting peace and security in the North Atlantic area, including the development of universal as well as regional arrangements under the Charter of the United Nations for the maintenance of international peace and security.

Article 13.—After the treaty has been in force for 20 years, any party may cease to be a party one year after its notice [illegible] United States of America, which will inform the [illegible] of each notice of denunciation.

Article 14.—This treaty, of which the English and French texts are equally authentic, shall be deposited in the archives [illegible] of the United States of America. Duly certified copies thereof will be [illegible] government to the governments of the other signatories.

The treaty came into force on 24 Aug., 1949. *See* map in THE STATESMAN'S YEAR-BOOK, 1950.

The North Atlantic Council, at its first meetings at Washington in Sept. and Nov., 1949, set up (1) a Defence Committee, consisting of the Ministers of Defence; (2) a Military Committee of military advisers; (3) a Standing Group, a subcommittee of (2), composed of representatives of Great Britain, France and the U.S.A., functioning continuously in Washington; (4) five regional planning [illegible] North European, West European, South European–Western [illegible] Canadian–U.S., North Atlantic Ocean; (5) a Military Production and Supply Board; (6) a Defence Financial and Economic Committee.

In May, 1950, the Council set up a permanent body of Council Deputies which represents the Council in all its functions and acts as co-ordinating authority between the military, production and financial sides of NATO. It also established a North Atlantic Planning Board for Ocean Shipping. In Dec., 1950, the Council approved the establishment of an integrated force for the defence of Western Europe under a Supreme Headquarters Allied Powers Europe (SHAPE) and General Eisenhower was appointed Supreme Allied Commander Europe. It was stated that SHAPE and such subordinate regional commands as might be established later would gradually take over the functions of the three European Regional Planning Groups. At the same time the Military Production and Supply Board was replaced by a Defence Production Board.

The *Council*, the principal body of the organization, 'charged with the responsibility of considering all matters concerning the implementation of the provisions of the Treaty,' is composed of the 12 Foreign Ministers of the member countries, or their representatives, and meets in ordinary session annually and 'at such other times as may be deemed desirable by the majority of the parties.' Chairmanship goes to each party, in alphabetical order, for one year, beginning with the United States.

The Council Deputies consist of a high-ranking official from each member-

Government, with a permanent chairman (Mr. Charles Spofford, U.S.A.) and a full-time staff. Their functions are to act on behalf of the Council between sessions and to serve as a central co-ordinating body for the work of the various NATO organs. Their headquarters are in London (14 Belgrave Square, S.W.1).

The *Defence Committee*, composed of the 12 Defence Ministers and their representatives, meets annually and at other times as necessary. Its terms of reference are to recommend measures for the implementation of Articles 3 and 5 of the Treaty, in accordance with the general policy guidance given by the Council. Chairmanship rotates annually, beginning with the United States.

The *Military Committee* is composed of the Chiefs of Staff or their representatives. (Iceland, having no military establishment, may be represented by a civilian.) It meets normally in W[illegible] Its terms of reference are: to provide general policy guidance [illegible] nature to its Standing Group; to advise the Defence Committee and other agencies on military matters; and to recommend to the Defence Committee military measures for the unified defence of the North Atlantic area. The *Standing Group*, a sub-committee of the Military Committee which functions continuously in Washington, is composed of one representative each of the United Kingdom, France and the United States. A *Permanent Military* [illegible] in Washington, composed of one representative of each member country, provides the Standing Group with the advice and help of the remaining NATO countries without the necessity of calling frequent meetings of the full Military Committee.

The *Defence Production Board* (which in Dec., 1950, replaced the Military Production and Supply Board) was set up to augment and expedite the production of defence equipment by the NATO Powers. It is composed [illegible] om each member state and has a full-time staff [illegible] of North Atlantic Defence Production (Mr. W[illegible] R. H[illegible], U.S.A.). Its headquarters are in London.

The *Defence Financial and Economic Committee*, which advises the Council on the financial and economic aspects of defence measures, is composed of representatives at a ministerial or similarly high level from each member country. It has equal status with the Defence Committee and reports direct to the Council. Its secretariat and working staff are located in London; the Committee itself meets when and where required.

The *North Atlantic Planning Board for Ocean Shipping*, set up in May, 1950, is concerned with planning the joint control and allocation of merchant shipping for defence purposes.

The Western Union (Brussels Treaty) defence organization, which served as a forerunner of the North Atlantic Treaty Organization, is now being largely absorbed into NATO.

Military aid is provided by the United States to the other North Atlantic Treaty signatories through the U.S. Mutual Defence Assistance Acts of 1949 and 1950. Bilateral mutual defence assistance [illegible] based upon the North Atlantic Treaty were concluded on 27 Jan., 1950, between the United States and Belgium, Denmark, France, Italy, the Netherlands, Luxemburg, Norway and the United Kingdom.

ORGANIZATION OF AMERICAN STATES.

On 14 April, 1890, representatives of the [illegible] Washington at the First International Co[illegible] established an 'International Bureau of the American Republics,' which later became the Pan American Union. This international organization's object was to foster mutual understanding and co-operation between the nations of the Western Hemisphere. Since that time, successive Pan American conferences have greatly broadened the scope of work of the Pan American Union, new specialized inter-American agencies have been created, and it gradually became evident that the effective operation of the full-grown inter-American system called for greater integration.

This led to the adoption on 30 April, 1948, by the Ninth International Conference of American States, at Bogotá, Colombia, of the Charter of the Organization of American States. This co-ordinated the work of all the former independent official entities in the inter-American field and defined their mutual relationships. The Organization of American States serves the cause of the United Nations as a regional agency devoted to the pacific settlement of disputes in the Western Hemisphere and to the promotion of inter-American understanding.

MEMBERSHIP.—The 21 American republics are members of the Organization, on a basis of absolute equality. Each country has one vote in the Council of the Organization. The list of member countries is as follows :—

Argentina	Cuba	Honduras	United States
Bolivia	Dominican Republic	Mexico	Uruguay
Brazil	Ecuador	Nicaragua	Venezuela
Chile	El Salvador	Panama	
Colombia	Guatemala	Paraguay	
Costa Rica	Haiti	Peru	

ORGANS.—The Organization of American States accomplishes its purposes by means of :—

(*a*) The *Inter-American Conference*, meeting every five years, at which representatives of the member governments decide matters pertaining to their relationships and to the general action and policy of the Organization.

(*b*) The *Meeting of Consultation of Ministers of Foreign Affairs*, held to consider problems of an urgent nature and of common interest to the American republics and to adopt decisions in matters covered in the Inter-American Treaty of Reciprocal Assistance; it is assisted by an

Advisory Defence Committee, composed of the highest military authorities in the member countries and meeting whenever it is considered advisable to study questions of collective self-defence.

(*c*) The *Council* of the Organization, with headquarters in Washington, composed of one representative of each member nation especially appointed by the respective government, with the rank of ambassador, its function being to supervise the progress of the Organization, acting either directly or through the following technical organs :—

Inter-American Economic and Social Council, with permanent headquarters at the Pan American Union, in Washington;

Inter-American Council of Jurists; and the

Inter-American Cultural Council, the latter two meeting periodically at places chosen by themselves.

(*d*) The *Pan American Union*, the central and permanent organ of the Organization, with headquarters in Washington.

The P[illegible] Union as the central organ and general secretariat of [illegible] departments deal with: economic and social affairs; international law and organization; cultural affairs; and office services. The directors of the first three of these departments were made, *ex officio*, executive secretaries of the corresponding [illegible] the Inter-American Economic and Social Council, the Inter-America[illegible] the Inter-American Cultural Council. The Pan American Union is also the permanent secretariat of the Inter-American Conferences, the Meetings of Consultation of Foreign Ministers, and the Specialized Conferences. It acts as adviser to the Council and its organs in the preparation of these conferences, offers technical assistance and necessary personnel, acts as custodian of documents and archives of the conferences, as well as deposit[illegible], and submits reports to the C[illegible] by the various organs. In addition to these duties to the member governments and their official agencies, the Pan American Union renders a wide variety of services through its information offices to the citizens of the American republics, and in general serves as a clearing-house for information on all the member countries.

(*e*) The *Specialized Conferences*, meeting to deal with special technical matters or to develop specific aspects of inter-American co-operation.

(*f*) The *Specialized Organizations*, [illegible] organizations established by multilateral agreements t[illegible] functions in their respective fields of action.

OFFICIALS OF THE PAN AMERICAN UNION.

Secretary General.—Alberto Lleras (Colombia).

Assistant Secretary General.—William Manger (United States).

Director, Department of Economic and Social Affairs.—Amos E. Taylor (United States).

Director, Department of International Law and Organization.—Charles G. Fenwick (United States).

Director, Department of Cultural Affairs.—Alceu Amoroso Lima (Brazil).

Director, Department of Administrative Services.—Lowell Curtiss (United States).

The Secretary General and the Assistant Secretary General are elected by the Council of the Organization, for ten-year terms. The Secretary General appoints the Department Directors, as well as the lesser personnel of the Union. The Council approves the annual budget for the Organization, which is financed by quotas contributed by the member governments.

General Secretariat.—Pan American Union, Washington 6, D.C., U.S.A.

THE ARAB LEAGUE.

Origin.—The formation of the League of Arab States in 1945 was largely inspired by the Arab awakening of the 19th century. This movement sought to [illegible] the Arab community which, though for 400 years a part of the Ottoman empire, had preserved its identity as a separate national group held together by memories of a common past, a common religion, and a common language, as well as by the consciousness of being in part at least descended from a common racial stock. The leaders of the Arab movement in the 19th century and of the Arab revolt against Turkey in the first world war sought to achieve these aims through secession from the Ottoman empire into a united and independent Arab state comprising all the Arab countries in Asia. However, the 1919 peace settlement divided the Arab world in Asia (with the exception of Saudi Arabia and the Yemen) into British and French spheres of influence and established in them a number of separate states and administrations (Syria, Lebanon, Iraq, Transjordan and Palestine) under temporary mandatory control.

By 1941, however, all these countries, with the exception of Palestine, had substantially achieved their independence. Consultations between the Arab leaders during the next three years culminated in the convening of a general Arab conference, which met in Alexandria in the autumn of 1944. In addition to the representatives of the governments of Egypt, Iraq, Syria, Lebanon, Transjordan, Saudi Arabia and Yemen, a representative of the Arabs of Palestine took part in the conference on a footing of equality.

The Alexandria Conference formulated what has come to be known as the "Alexandria Protocol," which delineated the outlines of the Arab League. It was found that neither a unitary state nor a federation could now be achieved with one stroke, but only a league of sovereign states banded together for joint action in all matters of common concern. On the basis of the Alexandria Protocol a Covenant was drawn up, establishing such a league, and this was signed in Cairo on 22 March, 1945, by the representative of Egypt, Iraq, Saudi Arabia, Syria, Lebanon, Transjordan and Yemen.

Purposes.—According to article 2 of the Covenant, the object of the League shall be to strengthen the ties between the participant states, to co-ordinate their political programmes in such a way as to effect real collaboration between them, to preserve their independence and sovereignty, and to consider in general the affairs and interests of the Arab countries. Likewise a further object shall be the close collaboration of the participant states, in accordance with the regime and conditions prevailing in each individual state in the following matters:—

(1) Economic and financial affairs comprising trade reciprocity, tariffs, currency, agricultural and industrial matters;
(2) Communications, comprising railways, roads, aviation, navigation, posts and telegraphs;
(3) Cultural affairs;
(4) Matters relating to nationality, passports and visas, execution of judgments and extradition of criminals;
(5) [illegible]
(6) [illegible]

An agreement for collective defence and economic co-operation was signed in Cairo on 13 April, 1950.

Constitution.—Article 9 lays down that "those Arab states desirous of closer collaboration with each other and stronger ties than those specified by this Covenant have a right to conclude such agreements between themselves as towards the realization of these objects as they desire." Thus provision is made in the Covenant for the growth of the Arab League into a closer form

of union than it at present expresses. Similarly, the framers of the Covenant provided for the fitting of the League into the world organization whose formation was being considered when the Covenant was drawn up and which eventually came into being as the United Nations.

Article 1 provides for the later adherence to the League of other Arab countries once these have achieved their independence. With regard to Palestine, the Arab League adopted a special procedure according to which the signatories to the Covenant of the Arab League 'consider it fitting that in view of the special circumstances of Palestine, and until such time as this country shall enjoy *de facto* exercise of independence, the League Council shall take upon itself the responsibility of selecting an Arab delegate from Palestine to participate in its proceedings.'

Organization.—The machinery of the League consists of a Council, a number of Special Committees and a Permanent Secretariat. On the Council each state has one vote. The Council may meet in any of the Arab capitals and is normally convened twice a year in March and October. The Council's functions include mediation in any dispute which threatens the peace between any of the League states or a League state and a country outside the League. The Council has a Political Committee consisting of the Foreign Ministers of the Arab states.

For each subject specified in Article 2 (quoted above) a Special Committee exists representing all the states of the League. These committees are responsible for formulating draft agreements to be laid before the Council for consideration. Members representative of other Arab countries than those forming the League (*i.e.* the countries of North Africa and the Persian Gulf) are permitted to participate in these committees.

The Permanent Secretariat of the League, consisting of a Secretary General (with the status of ambassador), Assistant Secretaries and permanent staff, has its seat in Cairo. The present Secretary General, who has held that office since the foundation of the League, is Abderrahman Azzam Pasha, an Egyptian.

PART II

THE BRITISH COMMONWEALTH AND EMPIRE

THE BRITISH COMMONWEALTH AND EMPIRE.

THE British Commonwealth of Nations consists of the United Kingdom, the Dominions (Canada, Australia, New Zealand, South Africa, India, Pakistan, Ceylon), the Colonies and Protectorates, and the Territories under Trusteeship.

Reigning King.

George VI, born 14 December, 1895, son of King George V and Queen Mary, daughter of the late Duke of Teck; succeeded to the crown on the abdication of his brother, King Edward VIII, 10 December, 1936, and proclaimed King on 12 December, 1936; married Lady Elizabeth Angela Marguerite Bowes-Lyon (born 4 Aug., 1900), 26 April, 1923.

Living Children of the King.

I. Princess Elizabeth Alexandra Mary, born 21 April, 1926 (Heir Presumptive); married on 20 November, 1947, Lieut. Philip Mountbatten (formerly Prince Philip of Greece), created Duke of Edinburgh, Earl of Merioneth and Baron Greenwich on the same day. Offspring:—Prince Charles Philip Arthur George, born 14 Nov., 1948; Princess Anne Elizabeth Alice Louise, born 15 Aug., 1950.

II. Princess Margaret Rose, born 21 Aug., 1930.

The Queen Mother.

H.H. Queen *Mary,* born 26 May, 1867; married on 6 July, 1893, the Duke of York, afterwards King George V (died 20 Jan., 1936).

Living Brothers of the King.

I. Prince *Edward* Albert, created Duke of Windsor 12 December, 1936, born 23 June, 1894; married Mrs. Wallis Warfield on 3 June, 1937. Reigned as Edward VIII from 20 Jan., 1936, to 10 Dec., 1936 (324 days).

II. Prince *Henry* William, born 31 March, 1900; created Baron Culloden, Earl of Ulster and Duke of Gloucester, on 31 March, 1928; married Lady Alice Montagu Douglas Scott (born 25 December, 1901), 6 November, 1935. Offspring:—William Henry Andrew Frederick, born 18 December, 1941; Richard Alexander Walter George, born 26 Aug., 1944.

Widow and Children of the late Duke of Kent.

Duchess of Kent, Princess *Marina* of Greece (born 30 November, 1906); married on 29 November, 1934, to the late Duke of Kent, third brother of the King (born 20 December, 1902; died 25 August, 1942). Offspring:—(1) Edward George Nicholas Patrick, Duke of Kent, born 9 October, 1935; (2) Alexandra Helen Elizabeth Olga Christabel, born 25 December, 1936; (3) Michael George Charles Franklin, born 4 July, 1942.

Living Sister of the King

Princess Victoria Alexandra Alice *Mary,* Princess Royal, born 25 April, 1897; married on 28 February, 1922, Viscount Lascelles (afterwards 6th Earl of Harewood), K.G., D.S.O., who died 24 May, 1947. Offspring:—George Henry Hubert, 7th Earl of Harewood, born 7 February, 1923; Gerald David, born 22 August, 1924.

The King's legal title rests on the statute of 12 and 13 Will. III, c. 3, by which the succession to the Crown of Great Britain and Ireland was settled on the Princess Sophia of Hanover and the 'heirs of her body being

Protestants.' By Act of Parliament, 1927, the title of the late King George V was declared to be 'George V, by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas, King, Defender of the Faith, Emperor of India,' but the Indian Independence Act, 1947, provided for the omission of the words 'Emperor of India.' By proclamation of 17 July, 1917, the royal family became known as the House and Family of Windsor. Under the Abdication Act of 1936, the issue, if any, of King Edward VIII, or the descendants of that issue, have no right, title or interest in or to the succession to the Throne, and the Royal Marriages Act, 1772, ceased to apply to King Edward VIII after his abdication.

By letters patent of 30 Nov., 1917, the titles of Royal Highness and Prince or Princess are (except for existing titles) to be restricted to the Sovereign's children, the children of the Sovereign's sons, and the eldest living son of the eldest son of the Prince of Wales. An exception was made in favour of the children of Princess Elizabeth, on whom the King bestowed the titles of Royal Highness and Prince or Princess.

Provision is made for the support of the royal household by the settlement of the Civil List soon after the commencement of each reign. (For historical details, *see* THE STATESMAN'S YEAR-BOOK, 1908, p. 5, and 1935, p. 4.) According to the Civil List Act of 10 June, 1937, the Civil List of the King, after the usual surrender of hereditary revenues, was fixed at £410,000, of which £110,000 is appropriated to the privy purse of the King, £134,000 for salaries of the royal household and retired allowances, £152,800 for household expenses, and £13,200 for alms and bounty.

The Civil List Act of 1910 provided for an annuity of £70,000 to Queen Mary in the event of her surviving the King, and this annuity continues to be paid. The 1937 Act makes a similar provision for Queen Elizabeth. The provision for other members of the royal family is as follows:—The Princess Elizabeth, £40,000; the Duke of Edinburgh, £10,000; the Duke of Gloucester, £35,000; the Princess Royal, £6,000 (Civil List Acts, 1910 and 1937, and Princess Elizabeth's and Duke of Edinburgh's Annuities Act, 1948).

Sovereigns and sovereign rulers of Great Britain, from the union of the crowns of England and Scotland:—

	Date of Accession.
House of Stewart.	
James I	24 March, 1603
Charles I	27 March, 1625
Commonwealth.	
Council of State	14 Feb., 1649
Protectorate	16 Dec., 1653

Edward VII	22 Jan., 1901
House of Windsor.	
George V	6 May, 1910
Edward VIII	20 Jan., 1936
George VI	11 Dec., 1936

THE BRITISH COMMONWEALTH OF NATIONS.

The various countries of the Commonwealth are arranged under the divisions of the world to which they belong:—1, Europe; 2, Asia; 3, Africa; 4, America; 5, Australasia and Oceania. In each geographical division, the fully self-governing members of the Commonwealth head the list, followed by the Colonies and Protectorates in alphabetical order.

Up to July, 1925, all sections of the British Empire outside of the United Kingdom and India were dealt with by the Colonial Office. In that month a new secretaryship of state, for Dominion Affairs, took over from the Colonial Office business connected with the self-governing Dominions, the self-governing colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate and Swaziland), and business relating to the Imperial Conference.

The Imperial Conference of 1926 defined Great Britain and the Dominions, as they were then called, as 'autonomous communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic [illegible] . though united by a common allegiance to the Crown, and as members of the British Commonwealth of Nations.'

On 11 Dec., 1931, the Statute of Westminster, which by legal enactment recognized the status of the Dominions, defined at the Imperial Conference of 1926, became law. Each of the Dominions also approved the passage of the Statute of Westminster.

In July, 1947, the designations of Secretary of State for Dominion Affairs and the Dominions Office were altered to 'Secretary of State for Commonwealth Relations' and 'Commonwealth Relations Office.' As from 15 Aug., 1947, the Secretary of State for Commonwealth Relations assumed responsibility for relations between the United Kingdom and the two new members of the Commonwealth, India and Pakistan, and, as from 4 Feb., 1948, between the United Kingdom and Ceylon.

On 31 March, 1949, Newfoundland became a Canadian Province and the conduct of business with Newfoundland which had previously been dealt with by the Commonwealth Relations Office became, as in the case of other Canadian Provinces, a matter for the Canadian government.

On 18 April, 1949, when the Republic of Ireland Act, 1948, passed by the Oireachtas, came into force, Southern Ireland ceased to be a member of the Commonwealth. [illegible] the Irish Republic's departure from the Commonwealth, [illegible] and the Republic do not regard one another as foreign countries. The conduct of relations with the Irish Republic continues to be a responsibility of the Secretary of State for Commonwealth Relations.

On 26 Jan., 1950, India became a republic. India remains, however, a member of the Commonwealth and accepts the King as the symbol of the free association of its independent member nations and as such the Head of the Commonwealth.

Colonies.—The term 'colony' is an abbreviation of the official designation 'Colony not possessing responsible Government,' and includes all such colonies whether or not they possess an elective legislature. In addition to the colonies proper, the British Empire includes a number of protectorates, protected states and mandated territories.

The Colonial Office deals with the administrative work of the colonies, protectorates and mandated territories other than those for which Dominion Governments are responsible and those which are dealt with by the Common-

wealth Relations Office. Its departmental organization is as follows:—I. *General Division.* (*a*) General Department:—General questions relating to the colonies other than those dealt with in departments at (*b*) to (*h*) following, and those classed as personnel or economic. The list of subjects dealt with includes international and inter-imperial relations (other than commercial relations), trusteeships, United Nations matters, nationality and naturalization, refugees, surveys, liquor traffic, legal and judicial matters. (*b*) Communications Department:—Aviation (other than military), motor transport, merchant shipping, postal matters, telecommunications, broadcasting, meteorology. (*c*) Defence Department:—Questions of defence, including Colonial Naval, Military and Air Forces, A.R.P. and Civil Defence, censorship, aliens, passports and visas, immigration and [illegible], Prize Court work. (*d*) Prisoners of War, Civilian Internees and Casualties Department:—Prisoners of war and civilian internees; casualties to civilians, officials and members of local forces. (*e*) Research Department:—Colonial research fellowships; colonial research committee; colonial products research; social science research; medicine research committee. (*f*) Social Service Department:—Education, medical and public health, traffic in women and children, films, penal and prison matters, labour, slavery, drugs, census, social security, social hygiene, nutrition. (*g*) Welfare Department:—Welfare of colonial persons in the United Kingdom; colonial students and scholarships. (*h*) Public Relations Department:—Public relations and publicity. II. *Economic Division.* (*a*) Commercial Relations and Supplies Department:—Food and other supplies, commercial relations and treaties, trading with the enemy, customs and excise, tariffs and regulations. (*b*) Production Department:—Food and other products, soil erosion, locusts, enemy property. (*c*) Finance and Development Department:—Questions relating to finance in the Colonial Empire, including income and excess profits taxes, savings banks, currency, loans, etc.; questions relating to schemes prepared under the Colonial Development and Welfare Act. (*d*) Far Eastern Economic Department:—Rehabilitation of industries and public utilities in Far Eastern colonies; oversight of all papers bearing on Eastern supplies and economic matters. III. *Personnel Division.* (*a*) Appointments Department:—Questions of recruitment and training, including courses of instruction for officers before and after entering the Colonial Service. (*b*) Colonial Service Department:—Questions affecting the Colonial Service, *e.g.* general conditions of service, schemes for unification, promotions and transfers, pensions, discipline, honours and ceremonies. (*c*) Establishment Department:—Questions relating to the Colonial Office and Commonwealth Relations Office establishments. IV. *Geographical Departments.* (*a*) Pacific Department, (*b*) East and Central African Department, (*c*) Eastern Department, (*d*) Mediterranean Department, (*e*) Middle East Department, (*f*) West African Department, (*g*) West Indian Department.

GREAT BRITAIN AND NORTHERN IRELAND.

Constitution and Government.

I. Imperial and Central.

The supreme legislative power of the British Empire is vested in Parliament. Parliament is summoned by the writ of the sovereign issued out of Chancery, by advice of the Privy Council, at least 20 days previous to its assembly [illegible]

[illegible] the sittings of Parliament have been interrupted only by comparatively short intervals. Every session must end with a prorogation and all Bills which have not been passed during the session then lapse. A dissolution may occur by the will of [illegible] or, as is most usual, during the recess, by proclamation, or finally by lapse of time, the statutory limit of the duration of any Parliament being 5 years.

Under the Parliament Acts, 1911 (1 and 2 Geo. V, ch. 13) and 1949 (12, 13 and 14 Geo. VI, ch. 103), all Money Bills (so certified by the Speaker of the House of Commons), if not passed by the House of Lords without amendment may become law without their concurrence on the royal assent being signified. Public Bills, other than Money Bills or a Bill [illegible] the maximum duration of Parliament, if passed by the House [illegible] in 2 successive sessions, whether of the same Parliament or not, and rejected each time, or not passed, by the House of Lords, may become law without their concurrence on the royal assent being signified, provided that 1 year has elapsed between the second reading in the first session of the House of Commons and the third reading in the second session. All Bills coming under this Act must reach the House of Lords at least 1 month before the end of the session.

The present form of Parliament, as divided into two Houses of Legislature, the Lords and the Commons, dates from the middle of the 14th century.

The House of Lords consists of peers who hold their seats (i) by

hereditary right; (ii) by creation of the sovereign; (iii) by virtue of office (Law Lords, and English archbishops (2) and bishops (24)); (iv) by election for life (Irish peers) (28; 22 vacancies in 1951); (v) by election for duration of Parliament (Scottish peers) (16). The full house would consist of about 835 members, but the voting strength is about 120.

The House of Commons consists of members representing county and borough constituencies. No one under 21 years of age can be a member of Parliament. Clergymen of the Church of England, ministers of the Church of Scotland and Roman Catholic clergymen are disqualified from sitting as members; government contractors and sheriffs are also among those disqualified. No English or Scottish peer can be elected to the House of Commons, but non-representative Irish peers are eligible. Under the Parliament (Qualification of Women) Act, 1918, women are also eligible.

In Aug., 1911, by resolution of the House of Commons, provision was first made for the payment of a salary of £400 per annum to members, other than those already in receipt of salaries as officers of the House, as Ministers, or as officers of His Majesty's household. As from 1 July, 1937, the salaries of members were increased to £600 per annum. This provision does not extend to the House of Lords. The increase of members' salaries to £1,000 per annum was announced on 30 April, 1946.

The law relating to the registration of electors has been consolidated in the Representation of the People Act, 1949, which incorporated the changes in the law effected by the Representation of the People Act, 1948. Under the present law all persons who are of full age and not subject to any legal incapacity to vote and who are either British subjects or citizens of the Irish Republic are entitled to be included in the register of electors for the constituency containing the address at which they were residing on the qualifying date for the register and are entitled to vote at elections held during the period for which the register remains in force. The Act of 1948 provided for two registers per year, but under the Electoral Registers Act, 1949, the number was reduced to one, to be published on 15 March each year.

Members of the Armed Forces, Crown servants employed abroad, and the wives of members of the Armed Forces or of such Crown servants if residing abroad to be with their husbands, are entitled, if otherwise qualified to be registered as 'service voters' provided they make a 'service declaration.' To be effective for a particular register, the declaration must be made on or before the qualifying date for that register.

The Act of 1948 abolished the business premises and University franchises and the only persons entitled to vote at Parliamentary elections are those registered as residents or as service voters. No person may vote for more than one constituency at a general election.

For local government elections there is also an occupier's qualification, but the names of persons having this qualification are marked in the register to show that the entry does not entitle them to vote at Parliamentary elections.

The second schedule to the Act of 1949 sets out a time-table for the holding of a Parliamentary general election or bye-election and contains the consolidated rules for the proceedings at the election. The act provides that persons on certain grounds may apply to vote by post or by proxy. Absent voters wishing to vote by post must give an address in the United Kingdom to which their ballot paper is to be sent.

The act of 1948 effected a redistribution of the constituencies in the United Kingdom, and a complete list is contained in the first schedule to

the Act. Under the act the number of constituencies in Great Britain must be not substantially greater or less than 613, in Scotland not less than 71, in Wales not less than 35, and in Northern Ireland 12. Every constituency returns a single member.

The House of Commons (Redistribution of Seats) Act, 1944, now consolidated in the House of Commons (Redistribution of Seats) Act, 1949, provided for the setting up of Boundary Commissions for England, Wales, Scotland and Northern Ireland, having a duty to keep under review the representation in the House of Commons of the part of the United Kingdom with which they are concerned. The Commissions are required to make general reports at intervals of not less than 3 and not more than 7 years and to submit reports from time to time with respect to the area comprised in any particular constituency or constituencies where some change appears necessary. Any changes giving effect to reports of the Commissions are to be made by Orders in Council laid before Parliament for approval by resolution of each House. The electorate of the constituencies of the United Kingdom in the register published on 15 Oct., 1949, according to provisional figures in Command Papers 7840 and 7841 of 1949, numbered 34,410,306, of whom 30,175,193 were in England and Wales, 3,370,028 in Scotland, and 865,085 in Northern Ireland. The number of registered service voters included in the three totals was 139,501.

The following is a table of the duration of Parliaments called since the accession of King Edward VII (for heads of the administrations, *see* p. 53).

Reign	When met	When dissolved	Existed		
			Y.	M.	D.
Edward VII	13 Feb. 1906	10 Jan. 1910	3	11	24
Edward VII and George V .	15 Feb. 1910	28 Nov. 1910	0	9	13
George V	31 Jan. 1911	25 Nov. 1918	7	9	25
,, ...	4 Feb. 1919	26 Oct. 1922	3	8	22

George V, Edward VIII and George VI	26 Nov. 1935	15 June 1945	9	6	20
George VI	26 July 1945	3 Feb. 1950	4	6	9

The executive government is vested nominally in the Crown, but practically in a committee of Ministers, called the Cabinet, whose existence is dependent on the support of a majority in the House of Commons.

The head of the Ministry is the Prime Minister, a position first constitu- [illegible] nized, and special precedence accorded to the holder, in 1905. [illegible] in the Ministry are appointed on his recommendation, and he dispenses the greater portion of the patronage of the Crown.

In May 1951, the Government consisted of the following members: —

(*a*) MEMBERS OF THE CABINET.

1. *Prime Minister and First Lord of the Treasury.*—Right Hon. Clement R. Attlee, C.H., born 1883. (Salary £10,000 per annum.)

2. *Secretary of State for Foreign Affairs.*—Right Hon. Herbert Morrison, born 1888. (£5,000.)

3. *Chancellor of the Exchequer.*—Right Hon. H. T. N. Gaitskell, C.B.E., born 1906. (£5,000.)

4. *Minister of Local Government and Planning.*—Right Hon. Hugh Dalton, born 1887. (£5,000.)

5. *Lord President of the Council and Leader of the House of Lords.*—Right Hon. Viscount Addison, K.G., born 1869. (£5,000.)

6. *Chancellor of the Duchy of Lancaster.*—Right Hon. Viscount Alexander of Hillsborough, C.H., born 1885. (£5,000.)

7. *Lord Chancellor.*—Right Hon. Viscount Jowitt, born 1885. (£10,000.)

8. *Secretary of State for the Home Department and Leader of the House of Commons.*—Right Hon. J. Chuter Ede, born 1882. (£5,000.)

9. *Minister of Defence.*—Right Hon. Emanuel Shinwell, born 1884. (£5,000.)

10. *Minister of Agriculture and Fisheries.*—Right Hon. Thomas Williams, born 1888. (£5,000.)

11. *Minister of Education.*—Right Hon. George Tomlinson, born 1890. (£5,000.)

12. *Secretary of State for the Colonies.*—Right Hon. James Griffiths, born 1890. (£5,000.)

13. *Secretary of State for Scotland.*—Right Hon. Hector McNeil, born 1910. (£5,000.)

14. *Secretary of State for Commonwealth Relations.*—Right Hon. P. C. Gordon-Walker, born 1907. (£5,000.)

15. *President of the Board of Trade.*—Right Hon. Sir Hartley Shawcross, K.C., born 1902. (£5,000.)

16. *Minister of Labour and National Service.*—Right Hon. Alfred Robens, born 1910. (£5,000.)

17. *Lord Privy Seal.*—Right Hon. Richard Stokes, M.C., born 1897. (£5,000.)

(*b*) MINISTERS NOT IN THE CABINET.

18. *First Lord of the Admiralty.*—Right Hon. Viscount Hall, born 1891. (£5,000.)

19 *Secretary of State for War.*—Right Hon. John Strachey, born 1901. (£5,000.)

20. *Secretary of State for Air.*—Right Hon. Arthur Henderson, K.C., born 1893. (£5,000.)

21. *Minister of Fuel and Power.*—Right Hon. P. J. Noel-Baker, born 1889. (£5,000.)

22. *Minister of Transport.*—Right Hon. Alfred Barnes, born 1887. (£5,000.)

23. *Minister of Pensions.*—Right Hon. George A. Isaacs, born 1883. (£3,000.)

24. *Minister of Supply.*—Right Hon. George R. Strauss, born 1901. (£5,000.)

25. *Minister of National Insurance.*—Right Hon. Edith Summerskill, born 1901. (£5,000.)

26. *Minister of Food.*—Right Hon. Maurice Webb, born 1904. (£5,000.)

27. *Minister of Civil Aviation.*—Right Hon. Lord Pakenham, born 1905. (£5,000.)

28. *Minister of Health.*—Right Hon. H. A. Marquand, born 1901. (£5,000.)

29. *Postmaster-General.*—Right Hon. Ness Edwards, born 1897. (£5,000.)

30. *Minister of Works.*—Right Hon. G. A. Brown, born 1915. (£5,000.)

31. *Minister of State for Colonial Affairs.*—Right Hon. John Dugdale, born 1905. (£3,000.)

32. *Minister of State.*—The Hon. K. G. Younger, born 1908. (£3,000.)

33. *P* [illegible] Right Hon. Lord Macdonald of Gwaenysgor, K.C.M.G., [illegible]

(*c*) LAW OFFICERS.

34. *Attorney-General.*—Right Hon. Sir Frank Soskice, K.C., born 1902. (£10,000.)

35. *Lord Advocate.*—Right Hon. John Wheatley, K.C., born 1908. (£5,000.)

36. *Solicitor-General.*—Sir Lynn Ungoed-Thomas, K.C., born 1904. (£7,000.)

37. *Solicitor-General for Scotland.*—Douglas Johnston, K.C., born 1907. (£2,000.)

Leader of the Opposition in the House of Commons.—Right Hon. Winston S. Churchill, O.M., C.H., born 1874. (£2,000.)

Leader of the Opposition in the House of Lords.—The Most Hon. The Marquess of Salisbury, K.G., P.C., born 1893.

Heads of the Administrations since 1902 (C. = Conservative, L. = Liberal, Lab. = Labour, Nat. = National).

A. J. Balfour (C.)	14 July, 1902	S. Baldwin (C.)	4 Nov., 1924
Sir H. Campbell-Bannerman (L.)	5 Dec., 1905	J. R. MacDonald (Lab.)	5 June, 1929
H. H. Asquith (L.)	8 April, 1908	J. R. MacDonald (Nat.)	25 Aug., 1931
H. H. Asquith (Coal.)	25 May, 1915	S. Baldwin (Nat.)	7 June, 1935
D. Lloyd George (Coal.)	7 Dec., 1916	S. Baldwin (Nat.)	26 Nov., 1935
A. Bonar Law (C.)	23 Oct., 1922	N. Chamberlain (Nat.)	28 May, 1937
S. Baldwin (C.)	22 May, 1923	W. S. Churchill (Nat.)	10 May, 1940
J. R. MacDonald (Lab.)	22 Jan., 1924	W. S. Churchill (Nat.)	23 May, 1945
		C. R. Attlee (Lab.)	26 July, 1945
		C. R. Attlee (Lab.)	6 March, 1950

The state of the Parties in the House of Commons at the dissolution of Parliament on 3 Feb., 1950, was as follows:—Labour, 390; Liberal, 10; Independent, 14; Communist, 2; Independent Labour Party, 1; Independent Labour, 5; Irish Nationalist, 2; Conservative (including Ulster Unionists), 201; Liberal National, 13; National, 2. Total 640.

The constitution of the House of Commons on 1 April, 1950, was as follows:—Labour, 314; Liberal, 9; Independent Liberal National, 1; Irish National Abstentionist, 2; Conservative (including Ulster Unionists), 286; Liberal National, 9; Speaker (Conservative), 1; Chairmen (1

Labour, 1 Conservative), 2. Labour majority over all other parties, 7. Total, 625.

Aggregate votes cast :—Labour, 13,323,383; Conservative, 11,530,198; Liberal, 2,639,696.

II. Local Government.

England and Wales.—In each county the Crown is represented by the Lord Lieutenant. There is also a sheriff, who represents the ancient executive of the Crown, an under-sheriff, a clerk of the peace, who is normally also clerk of the county council, coroners, who are appointed and paid by the county councils, and other officers. The licensing of persons to sell intoxicating liquors, and the administration of the criminal law—except that which deals with graver offences—are in the hands of the magistrates.

For the purposes of local government, England and Wales are divided primarily into 62 administrative counties, including the County of London and 83 county boroughs. The counties are administered by a popularly elected council, called a county council, which co-opts a prescribed number of aldermen, either from their own body or from outside it. Aldermen are elected for 6 years, half of them retiring every third year. A councillor is elected for 3 years. The jurisdiction of the county councils covers the administration of higher and elementary education, maintenance of main roads and bridges, work in relation to agriculture (diseases of animals, destructive insects and pests, fertilisers and feeding stuffs, small-holdings and allotments), the prevention of pollution of rivers, and supervision of milk and other food supplies. The control of the county police is vested in a Standing Joint Committee comprised of equal numbers of magistrates and of members of the county council. The Metropolitan Police, however, are under the control of the Home Secretary.

Secondly, the administrative counties, except the County of London, are sub-divided into county districts, which are 'non-county boroughs,' 'urban districts' or 'rural districts.' Generally speaking, an urban district comprises a town or small area more or less densely populated, and a rural district takes in several country parishes. County district councils administer the Public Health and Highway Acts, and exercise powers under the Housing Acts. Urban authorities may also take over the maintenance and repair of main roads from county councils, provide water supplies, allotments, baths and wash houses, libraries and museums, and parks and open spaces. Rural district councils may also make arrangements for an adequate water supply, and exercise any 'urban powers' conferred on them by the Minister of Health.

In London, the main central authority is the County Council, created by the Local Government Act of 1888. It has powers in regard to public

health, housing, bridges and ferries, street improvements, parks, main drainage, fire brigades, sanitary control, education and numerous other matters. The City Corporation has powers respecting sanitation, police, bridges, justice, etc., in the City of London. London comprises the ancient city with an area of 1 square mile, and an area of 117 square miles beyond the city, which is divided into 28 metropolitan boroughs, each with a mayor, aldermen and councillors. The councils have powers in regard to public health, highways, rating, housing, etc., but they are not municipal boroughs in the strict sense. The County Council has certain powers of control over them.

In all incorporated towns, local business is administered by a municipal corporation. There are two kinds of municipal boroughs, county boroughs and non-county boroughs. Most of the county boroughs and a number of the non-county boroughs have a separate court of quarter sessions. The county boroughs are outside the jurisdiction of the county councils. A municipal corporation consists of the mayor, aldermen and burgesses, and acts through a [illegible] council. As in the county councils, the councillors serve [illegible] third retiring annually; the aldermen are elected by the council and serve for 6 years, half of them retiring every third year. The mayor, who serves for 1 year, is also elected by the council. A town council as an urban authority is invested with all the normal powers of an urban district council.

Recent legislation has considerably altered the powers and duties of local authorities. The duty of providing a comprehensive health service was placed on the Minister of Health by the National Health Service Act, 1946. From 5 July, 1948, all hospitals in England and Wales are vested in the Minister, and he has delegated the running of hospital services to regional hospital boards and their committees of management. County councils and county borough councils have become under the Act the local health authorities and will administer the local health services (maternity and child welfare, health centres, midwifery, health visiting, home nursing, vaccination and immunisation, ambulances, prevention of illness, and provision of after-care and domestic help).

The National Assistance Act, 1948, repealed the Poor Law legislation and the Blind Persons Act. In this sphere the functions of county and county borough councils now include the provision of residential accommodation for aged and infirm persons in need of care and attention, of temporary accommodation for those in need of it, the registration and supervision of homes for the aged or the physically handicapped. The councils must make arrangements for promoting the welfare of persons who are blind, deaf or dumb, and of persons who are otherwise permanently physically handicapped, and must protect the moveable property belonging to persons who are admitted to hospitals and residential accommodation. The Act also enables local authorities to obtain a court order for the removal to suitable premises of persons in need of care and attention which they cannot otherwise obtain. The responsibility for [illegible] financial need by way of monetary payments is placed upon the National Assistance Board.

The changes in local authorities' expenditure as a result of the transfer to the State of responsibility for hospital and poor law services, together with other factors, necessitated a readjustment of the financial relationship between the Exchequer and local authorities. This was effected by the Local Government Act, 1948, by which the 'block grants' previously payable under the Local Government Acts, 1929–1946, were replaced from 1 April, 1948, by Exchequer equalization grants designed to produce a

measure of equalization of rate burdens by giving a greater measure of Exchequer assistance to the authorities who are financially less well placed. Under the same Act, the function of making valuations for rating purposes is transferred from the local authorities to the Commissioners of Inland Revenue, and appeals against valuations will be made to local valuation courts and from them to county courts. Railway, canal and electricity undertakings make payments which are distributed for the benefit of local authorities in accordance with rateable value.

The Local Government Act, 1948, also makes provision for the payment of allowances to members of local authorities towards travelling and subsistence expenses, and towards loss of earnings, or similar expenses, incurred in their duties as members. There is a wide extension of local authorities' powers to provide entertainments, and expenditure on such entertainments is allowed up to the product of a 6*d.* rate. Local authorities may also arrange for the publication within their areas of information on questions relating to local government; this power includes the giving of lectures, holding of discussions and the preparation and displaying of pictures, cinematograph films and exhibitions.

The total number of local government electors in England and Wales (1945) was 29,223,828 (county boroughs 9,194,107, administrative counties 20,029,721). Women are eligible for all local government offices. Local government electors now include all persons who are qualified to vote at parliamentary elections.

Scotland.—A Local Government Act was passed for Scotland in 1889 and followed in its main outlines the English Act of the previous year. The powers of local administration in counties formerly exercised by the Commissioners of Supply, the Justices and Road Trustees were either wholly or in part transferred to county councils, which took over their duties and responsibilities in 1890. By the Local Government (Scotland) Act, 1894, a local government board for Scotland was constituted, consisting of the Secretary for Scotland as President, the Solicitor-General for Scotland, the Under-Secretary for Scotland, and three other members nominated by the Crown. The latter Act provided that a parish council should be established in every parish to take the place of the parochial boards. Their principal function was the administration of the poor laws, and in addition they exercised powers similar to those of the parish councils in England. There were 869 civil parishes in 1921. The powers and duties of the Local Government Board were by the Scottish Board of Health Act, 1919, transferred to the Scottish Board of Health, constituted as in that Act provided. The Reorganization of Offices (Scotland) Act, 1928, established the Department of the Secretary of Scotland, including the Department of Health for Scotland, which took the place of the Scottish Board of Health. Municipal bodies exist in the towns of Scotland, as in those of England. Each burgh has a town council consisting of a provost or lord provost, bailies and councillors. The provost is the head of the Scottish municipality and holds office for 3 years. Bailies are selected by the councillors from [illegible] their own number; they act as magistrates and sit as such in [illegible]. There are in Scotland three principal kinds of burghs, numbering altogether 196: (1) royal burghs, *i.e.*, burghs created by a charter of the Crown; (2) parliamentary burghs, which possess statutory constitutions almost identical with those of the royal burghs; (3) police burghs, constituted under a general Police Act. Burghs are classified according to functions as counties or cities (4), other large burghs (20) and small burghs (172). All burghs of whatever class have town councils and their administration is

regulated by the Burgh Police (Scotland), Town Councils (Scotland) and Local Government (Scotland) Acts or corresponding local Acts. The Local Government (Scotland) Act, 1929, abolished parish councils and transferred poor law and certain other functions to county councils and large burghs (those with a population of 20,000 or more). The Act established elected district councils for the landward parts of counties. These councils have certain local powers, such as the acquisition of ground for public recreation, and can requisition for expenditure to a limited extent. The National Assistance Act, 1948, repealed the Poor Law. Financial aid to those in need, now a national charge, is provided by the National Assistance Board. County Councils and large burghs have now a duty to provide residential accommodation for the aged and others in need of care and attention, temporary accommodation for persons whose need arises in unforeseeable circumstances and welfare services for the blind and other substantially handicapped persons.

The Local Government (Scotland) Act, 1947, consolidated with amendments the enactments relating to authorities for the purpose of local government in Scotland.

The total number of local government electors in Scotland was 3,516,049 in 1947.

Area and Population.

I. Progress and Present Condition.

The population was thus distributed at the census taken 27 April, 1931 :—

Divisions	Area in square miles	Males	Females	Total population on 27 April, 1931
England (including Monmouthshire)	50,874	18,061,643	19,732,360	37,794,003
Wales	7,466	1,071,367	1,087,007	2,158,374
Scotland	30,405	2,325,523	2,517,457	4,842,980
Isle of Man	221	22,443	26,865	49,308
Channel Islands	75	44,099	49,106	93,205
Total	89,041	21,525,419	23,412,025	44,937,444

Population at each of the four previous decennial censuses :—

Divisions	1891	1901	1911	1921
England	27,489,228	30,813,043	34,045,290	35,681,019
Wales	1,513,297	1,714,800	2,025,202	2,205,680
Scotland	4,025,647	4,472,103	4,760,904	4,882,497
Isle of Man	55,608	54,752	52,016	60,284
Channel Islands	92,234	95,618	96,899	90,230
Army, Navy and Merchant Seamen abroad	224,211	367,736	145,729	256,811
Total	33,400,225	37,518,052	41,126,040	43,176,521

In 1931, in Wales and Monmouthshire 197,932 persons 3 years of age and upwards were able to speak Welsh only, and 811,329 able to speak Welsh and English. In Scotland in 1931, 6,716 persons 3 years of age and upwards could speak Gaelic only, and 129,419 could speak Gaelic and English.

At the census of 1931, in England and Wales, there were 10,233,139 private families (population, 38,042,464), occupying 9,123,279 dwellings, including 7,137,342 dwellings in urban areas and 1,985,937 dwellings in rural areas. The total number of families per occupied dwelling was 1·12 (urban 1·15, rural 1·02).

The age distribution in 1931 of the population of England and Wales and Scotland was as follows :—

Age-group	Numbers in thousands		
	England and Wales	Scotland	Great Britain
Under 5	2,990	423	3,413
5 and under 10	3,323	456	3,779
10 „ 15	3,207	426	3,633
15 „ 20	3,435	439	3,874
20 „ 25	3,494	422	3,916
25 „ 35	6,412	738	7,150
35 „ 45	5,467	608	6,075
45 „ 55	4,936	547	5,483
55 „ 65	3,725	430	4,155
65 „ 70	1,271	149	1,420
70 „ 75	871	106	977
75 „ 85	726	87	813
85 and upwards	96	12	108
Total	39,953	4,843	44,796

Estimated civilian population of Great Britain and its divisions at the end of June :—

Year (30 June)	England and Wales	Scotland	Total of Great Britain
1946	40,759,000	4,933,000	45,692,000
1947	41,786,000	5,139,000	46,925,000
1948 [1]	42,750,000	5,169,000	47,919,000
1949 [2]	43,595,000	5,172,000	48,767,000
1950 [2]	43,830,000	5,174,500	49,004,500

[1] Including merchant seamen at home and overseas.
[2] Including members of the armed forces stationed in Great Britain.

1. England and Wales.

The census population of England and Wales 1801 to 1931 :—

Date of enumeration	Population	Pop. per square mile	Date of enumeration	Population	Pop. per square mile
1801	8,892,536	152	1871	22,712,266	389
1811	10,164,256	174	1881	25,974,439	445
1821	12,000,236	206	1891	29,002,525	497
1831	13,896,797	238	1901	32,527,843	558
1841	15,914,148	273	1911	36,070,492	618
1851	17,927,609	307	1921	37,886,699	649
1861	20,066,224	344	1931	39,952,377	685

Population of England and Wales and of the administrative counties and county boroughs in 1911, 1921 and 1931 (for areas of administrative counties, etc., 1921, *see* THE STATESMAN'S YEAR-BOOK, 1931, p. 12) :—

[1] The boundaries of the administrative counties have changed since the date of the 1921 census. In every case the acreage and the 1921 population shown in the table relate to the area constituted at the date of the 1931 census.

The area and population of the county boroughs, and more important other boroughs, are given in the following table. The county boroughs are designated by the letters C.B.

[1] Home population.

At 30 June, 1950, the estimated age distribution of the population of England and Wales was: between 0 and 14+, 4,918,000 males, 4,712,000 females; 15 and over, 16,251,000 males, 17,949,000 females.

The following table shows the distribution of the urban and rural population of England and Wales in 1911, 1921 and 1931 :—

	Population			Percentage of population	
	England and Wales	Urban districts [1]	Rural districts [1]	Urban [1]	Rural [1]
1911	36,070,492	28,162,936	7,907,556	78 1	21 9
1921	37,886,699	30,035,417	7,851,282	79 8	20 7
1931	39,952,377	31,951,918	8,000,459	80 0	20 0

[1] As existing at each census.

The municipal and parliamentary City of London, coinciding with the registration City of London, has an area of 677 acres. The registration County of London (the London for purposes of the census, the registration of births, deaths and marriages, and for poor law purposes), coinciding with the administrative county, has an area of 74,850 acres, and nearly coincides with the collective area of the London parliamentary boroughs. The population of registration London, of the 'Outer Ring,' and of 'Greater London' (the area covered by the City and Metropolitan police), was :—

	1911	1921	1931	1950 [2]
Registrar-General's London	4,521,685	4,484,523	4,397,003	3,389,620
Outer Ring	2,729,673	2,995,678	3,806,939	5,027,757
'Greater London' [1]	7,251,358	7,480,201	8,203,942	8,417,377

[1] Area 413,455 acres. [2] Estimated home population.

Book of Reference.

Census of England and Wales, 1931. H.M.S.O., 1950.

2. Scotland.

Area 29,796 square miles, including its islands, 186 in number, but excluding inland water 609 square miles.

Population (including military in the barracks and seamen on board vessels in the harbours) at the dates of the several censuses:—

Date of enumeration	Population	Pop. per square mile	Date of enumeration	Population	Pop. per square mile
1801	1,608 420	54	1871	3,360,018	113
1811	1,805,864	60	1881	3,735,573	125
1821	2,091,521	70	1891	4,025,647	135
1831	2,364,386	79	1901	4,472,103	150
1841	2,620,184	88	1911	4,760,904	160
1851	2,888,742	97	1921	4,882,497	164
1861	3,062,294	100	1931	4,842,980	163

The number of married persons in 1931 was 1,762,673 (874,194 males and 888,479 females), and widowed, 297,137 (93,668 males and 203,469 females).

There are 33 civil counties, as follows:—

	Area in statute acres	Census population 1911 total	Census population 1921 total	Census population 1931 total	Estimated population [2] Dec., 1950
1. Aberdeen (includ. Aberdeen)	1,261,521	312,177	301,016	300,130	331,900
2. Angus (Forfar)	559,037	281,417	271,052	270,190	276,500

TOTAL SCOTLAND	19,070,466	4,760,904	4,882,497	4,842,554	5,165,900

[1] Home population.

The birthplaces of the 1931 population were:—Scotland, 4,496,028, England, 164,249; Wales, 4,341; Ireland, 124,296; British colonies, etc., 24,581; foreign countries, 28,116 (including 16,009 aliens).

The 'urban' population of Scotland in 1931 is defined as the population of localities containing over 1,000 persons, and are burghs, special scavenging districts, or special lighting districts. On this basis the 'urban' population was 3,879,970 or 80·1% of the total, and the 'rural' population 963,010 or 19·9%. Population of the principal burghs:—

Burghs	Census population 1921	Census population 1931	Estimated population Dec., 1950	Burghs	Census population 1921	Census population 1931	Estimated population Dec., 1950
Glasgow	1,034,174	1,088,417	1,087,300	Coatbridge	43,909	43,056	48,300
Edinburgh	420,264	438,998	488,000	Dunfermline	39,899	34,954	47,400
Aberdeen	158,963	167,259	187,200	Ayr	35,747	36,784	43,300
Dundee	168,315	175,583	178,200	Kilmarnock	35,763	38,099	42,500
Paisley	84,837	86,441	96,900	Clydebank	46,506	46,963	44,800
Greenock	81,123	78,948	79,800	Hamilton	39,120	37,863	40,500
Motherwell	68,869	64,708	69,600	Perth	33,208	34,807	41,100
Kirkcaldy	39,591	43,874	49,700	Falkirk	33,308	36,565	38,100

In 1949, the estimated age distribution of the population in Scotland was: between 0 and 14 +, 648,600 males, 630,400 females; 15 and over, 1,858,300 males, 2,037,700 females.

For main occupations, according to the census of 1931, *see* THE STATESMAN'S YEAR-BOOK, 1943, p. 19.

3. Isle of Man and Channel Islands.

Islands	Census population 1911	Census population 1921	Census population 1931	Area in statute acres, 1931
Isle of Man	52,016	60,284	49,308	141,263
Jersey	51,898	49,701	50,462	28,717
Guernsey, Herm and Jethou	41,858	38,315	40,643	16,018
Alderney	2,561	1,598	1,521	1,962
Sark, Brechon and Lihou	582	616	579	1,386
Total	148,915	150,514	142,513	189,346

II. Movement of the Population.

1. *Births, Deaths and Marriages.*

England and Wales.

Year	Estimated total population at 30 June	Total live births	Illegitimate births	Deaths	Marriages
1946 . . .	42,737,000	820,719	53,919	492,090	385,606
1947 . . .	43,050,000	881,026	46,603	517,615	401,210
1948 . . .	43,502,000	776,971	41,041	469,898	396,891
1949 . . .	43,785,000	730,518	36,907	510,756	375,041
1950 . . .	44,020,000	692,457 [1]	34,147 [1]	510,309 [1]	357,218 [1]

[1] Provisional.

In 1950 the proportion of male to female births was 1,056 male to 1,000 female, and the live birth rate was 15 7 and the death rate 11 6 per thousand of the population.

Scotland.

Year	Estimated total population at 30 June	Total births	Illegitimate births	Deaths	Marriages
1946 . . .	5,135,100	104,413	6,904	64,605	45,851
1947 . . .	5,138,700	113,147	6,311	66,200	44,406
1948 . . .	5,169,200	100,313	5,773	60,979	43,741
1949 . . .	5,175,000	95,673	5,225	63,488	41,714
1950 . . .	5,174,500 [1]	92,528 [1]	4,833 [1]	63,996 [1]	40,478 [1]

[1] Estimated home population.

In 1950 the proportion of male to female births was 1,070 to 1,000; the birth rate was 17·9, and the death rate 12·4 per 1,000.

2. *Divorces and Annulments.*

Year	England and Wales	Scotland	Total
1946	30,298	2,934	33,232
1947	60,190	2,533	62,723
1948	43,698	2,057	45,755
1949	34,856	2,447	37,303
1950	—	2,204	—

3. *Emigration and Immigration.*

In the thirty-eight years, 1815–52, the total number of emigrants from the United Kingdom was 3,463,592. Up to 1852 the emigration returns made no distinction between British subjects and foreigners. From 1853 to 1938 inclusive, the number of emigrant passengers of British origin, to places out of Europe, was 16,710,072. The passenger traffic by sea to and from non-European countries in recent years was as follows:—

Year	Outward			Inward		
	British subjects	Aliens	Total	British subjects	Aliens	Total
1938	162,074	78,975	241,049	159,913	61,786	221,699
1949	255,618	60,660	316,278	195,733	55,960	251,693
1950	257,658	67,655	325,313	199,823	62,167	261,990

The number of immigrants of British nationality into the United Kingdom was 66,085 in 1950. The number of British immigrants in 1938 was 40,611. The number of emigrants of British nationality from the United Kingdom in 1950 was 130,238. The number of British emigrants in 1938 was 34,144.

The destinations of British subjects leaving the United Kingdom to take up permanent residence in non-European countries in 1950 were mainly Canada and Newfoundland, 13,553 (3,367 in 1938); Australia, 54,184 (5,472 in 1938); New Zealand, 10,562 (2,425 in 1938); Union of South Africa and Southern Rhodesia, 9,320 (6,003 in 1938); United States, 11,400 (1,992 in 1938).

Of a total of 699,000 aliens who arrived in the United Kingdom in 1950, 479,000 were visitors for periods of less than 6 months, 77,000 in transit to other countries, 21,000 returning residents, 13,000 diplomats, 41,000 holding Ministry of Labour permits, 11,000 seamen, and 57,000 intending to stay for over 6 months.

The number of alien visitors for pleasure was 249,000 in 1938, 340,000 in 1949 and 373,000 in 1950.

Passenger movement (including pleasure cruises) totalled:—1950, outward, 3,180,000 (723,000 by air); inward, 3,153,000 (710,000 by air).

Religion.

The Church of England is the centre of the world-wide Anglican Communion, which is one of the great divisions of Christendom, and the expansion of which parallels the expansion of Great Britain into the world-wide British Commonwealth. The autonomy of the Dominions within a kind of family fellowship corresponds to the autonomy of the great Churches in Australia; Canada; China; India, Pakistan, Burma and Ceylon; Ireland; Japan; New Zealand; Scotland; South Africa; the United States; Wales, and the West Indies. The present evolution of the Colonies towards Dominion status in groups parallels somewhat similar tendencies in the dioceses (*e.g.* in East and West Africa) holding mission from the See of Canterbury. There is, however, no earthly head of the Anglican Communion corresponding to the King in the Commonwealth. The Archbishop of Canterbury presides over the decennial Lambeth Conference only as *primus inter pares*.

1. England and Wales.

The Established Church of England is Protestant Episcopal. Civil disabilities on account of religion do not attach to any class of British subjects. Under the Welsh Church Acts, 1914 and 1919, the Church in Wales and Monmouthshire was disestablished as from 31 March, 1920, and Wales was formed into a separate Province. Property belonging to the Church in Wales, and a sum of £1,000,000 provided by Parliament, were assigned to a temporary body not exceeding 3 persons, called the Welsh Commissioners, for distribution to a body representing the Church (called the Representative Body), and to certain other authorities including the University of Wales.

The King is, under God, the supreme governor of the Church of England, with the right, regulated by statute, to nominate to the vacant archbishopries and bishopries. The King, and the First Lord of the Treasury in his name, also appoint to such deaneries, prebendaries and canonries as are

in the gift of the Crown, while a large number of livings and also some canonries are in the gift of the Lord Chancellor.

There are 2 archbishops (at the head of the 2 Provinces of Canterbury and York) and 41 bishops and about 40 suffragan bishops in England. Each archbishop has also his own particular diocese, wherein he exercises episcopal, as in his Province he exercises metropolitical, jurisdiction. In the Church are 29 deans (including Westminster, Windsor, St. Albans and Truro), 103 archdeacons and 15 provosts of parish church cathedrals. There is an Assembly called 'the Church Assembly,' in England, consisting of a House of Bishops, a House of Clergy and a House of Laity, which has power, under the Church of England Assembly (Powers) Act, 1919, to frame legislation [illegible] atters. The first two Houses consist of the members of [illegible] Canterbury and York, each of which consists of the diocesan bishops (forming an Upper House), and the archdeacons, deans and provosts, and a certain number of proctors elected as the representatives of the inferior clergy, together with, in the case of Canterbury Convocation, representatives of the Universities of Oxford, Cambridge and London (forming the Lower House). The House of Laity is elected by the lay members of the Diocesan Conferences. Parochial affairs are managed by annual parochial church meetings and parochial church councils. Every measure passed by the Church Assembly must be submitted to the Ecclesiastical Committee, consisting of 15 members of the House of Lords nominated by the Lord Chancellor and 15 members of the House of Commons nominated by the Speaker. This committee reports on each measure to Parliament, and the measure receives the Royal Assent and becomes law if each House of Parliament resolves that the measure be presented to the King.

The number of civil parishes (districts for which a separate poor rate is or can be made) at the census of 1931 was 14,209. These, however, in many cases, do not coincide with ecclesiastical parishes, which have, from the civil point of view, lost their old importance. Of such parishes there were (1947) about 13,000, inclusive of the Isle of Man and the Channel Islands, but excluding Wales. Each parish has its church, presided over by an incumbent or minister, who must be in priest's orders, and who is known as rector, vicar or perpetual curate, according to his relation to the temporalities of his parish. Private persons possess the right of presentation to about 3,000 benefices; the patronage of the others belongs mainly to the King, the bishops and cathedrals, the Lord Chancellor, and the universities of Oxford and Cambridge. In 1947 there were about 12,165 beneficed clergy, and 2,440 assistant curacies. Voluntary offerings raised parochially amounted in 1947 to £5,944,534, exclusive of very large sums contributed to central and diocesan societies and institutions and administered by such organizations.

In addition to the Provinces of Canterbury and York, the Church of England includes a considerable number of overseas dioceses holding mission from the see of Canterbury, and the Anglican chaplaincies in North and Central Europe form an area of administration under the jurisdiction of the Bishop of London. The Church of England itself is part of the world-wide Anglican Communion which includes the Church of Ireland, the Episcopal Church in Scotland, the Church in Wales, the Protestant Episcopal Church in the United States of America and a number of other [illegible] Churches in the Dominions, India, China, Japan, etc. The [illegible], the Church of the Province of West Africa, was inaugurated in April, 1951.

Of 37,452 churches and chapels registered for the solemnization of marriage at the end of 1934, 16,515 belonged to the Established Church and

the Church in Wales and 20,937 to other religious denominations. Of the marriages celebrated in 1934, [1] 53·5% were in the Established Church and the Church in Wales, 6·5% in the Roman Catholic Church, 10·9% were Nonconformist marriages, 0·04% were Quaker marriages, 0·7% Jewish and 28·4% civil marriages in a Registrar's Office.

The Unitarians have about 340 places of worship, the Catholic Apostolic Church over 80, the New Jerusalem Church about 75. The Salvation Army, a religious body with a semi-military organization, carries on both spiritual and social work at home and abroad, and had (December, 1919) 43,272 officers and employees, 17,119 corps and outposts and 267,069 local officers and corps cadets. There were in 1919, about 1,749 social centres and agencies, 436 shelters, 237 industrial homes, 267 homes for women and children, 945 day and industrial schools, and their places of worship in the United Kingdom have about 560,000 sittings. There are about 450,000 Jews in the United Kingdom, with about 240 synagogues.

Roman Catholics in England and Wales were estimated at 2,808,596 in 1950. There were 4 archbishops and 14 bishops, about 6,000 priests (not all officiating) and 2,196 churches, chapels and stations.

The following is a summary of statistics of certain churches in England and Wales, Channel Islands and Isle of Man:—

Denomination	Sitting accommodation	Full members	Ministers in charge	Local and lay preachers	Sunday school teachers	Sunday school scholars and bible class
Methodist	—	1,147,380	5,220	49,034	130,092	1,068,720
Independent Methodist	48,000	8,939	336	—	3,000	13,486
Wesleyan Reform Union	56,000	6,373	22	351	2,100	11,903
Congregational Union	1,727,000	371,130	2,600	3,299	31,904	262,041
Baptist	1,382,000	343,798	1,962	4,316	41,279	310,687
Presbyterian	184,000	81,715	360	—	7,400	64,000
Calvinistic Methodist	560,000	227,321	932	208	14,003	81,494
Moravian	11,000	6,700	40	2	600	4,000
Lady Huntingdon's Connexion	13,000	1,700	27	46	300	2,700
Churches of Christ	—	14,000	—	2,000	1,700	17,000
Society of Friends	—	20,730	—	—	2,000	15,000
Anglican (in England)	5,400,000	2,294,000	—	—	171,000	1,956,000

2. Scotland.

The Church of Scotland (established in 1560 at the Reformation and re-established in 1688 as part of the Revolution Settlement) is Presbyterian, the ministers all being of equal rank. There is in each parish a kirk session, consisting of the minister and of several laymen called elders. There are presbyteries (formed by groups of parishes), meeting frequently throughout the year, and these are again grouped in synods, which meet half-yearly and can be appealed to against the decisions of the presbyteries. The supreme court is the General Assembly, which now consists of 1,620 members, half clerical and half lay, chosen by the different presbyteries. It meets annually in May (under the presidency of a Moderator appointed by the Assembly, the Sovereign being represented by a Lord High Commissioner, appointed by the King on the nomination of the Government of the day), and sits usually for 8 days. Any matters not decided during this period may be left to a commission which sits at stated intervals until the meeting of the next General Assembly.

[1] No later figures available.

On 2 October, 1929, the Church of Scotland and the United Free Church of Scotland were reunited under the name of The Church of Scotland, and the two bodies met in General Assembly in Edinburgh as one. The united Church had, in Scotland, on 31 December, 1949, 2,357 congregations, 1,268,315 members, besides adherents; 2,897 Sunday schools, with 36,731 teachers and 273,592 scholars in attendance. The Church courts are the General Assembly, 12 synods, 66 presbyteries in Scotland, 1 in England and 3 on the Continent, in addition to foreign mission presbyteries. Income in 1948 was £1,658,793. The Church has divinity faculties in the 4 Scottish universities of Edinburgh, Glasgow, Aberdeen and St. Andrews, with 28 professors and lecturers. The united Church's foreign mission agents (including natives) numbe[illegible] 13,665, income £1,060,062. There are in Scotland some small [illegible] bodies and also Baptists, Congregationalists, Metho[illegible] [illegible]. The Episcopal Church in Scotland had in 1950, 7 bishoprics, 397 churches and missions, over 340 clergy and 110,578 members, of whom 56,958 were communicants.

The Roman Catholic Church had in Scotland (1949) 2 archbishops and 6 bishops; 947 clergy, about 450 churches, chapels and stations, and, in 1950, 721,300 adherents.

The proportion of marriages in Scotland [illegible] to the rites of the various Churches in 1946 was:—Church of [illegible] 60·3%; Roman Catholic, 12·6; Episcopal, 3·0; United Free, 0·9; others, 6·7; Civil, 16·5.

Education.

University Education.

In *England* the highest education is given at the ancient Universities of Oxford and Cambridge, the former having 22 colleges and 3 private halls and the latter 17 colleges and 1 hall; the University of Durham, with a college of medicine and of science at Newcastle; the University of London, with 7 'departments,' 36 'schools' and 22 institutions giving instruction in 8 faculties; the Victoria University (Manchester), the Birmingham University, the Liverpool University, the Leeds University, the Sheffield University, the Bristol University, the University of Reading, which started in 1860 as a college for art classes, and the University of Nottingham, founded as a University College in 1881. There are also, 1950–51, University Colleges at Exeter (founded 1893), 120 lecturers, etc., 950 students; Southampton (founded 1850), 156 lecturers, 951 (full-time) and 1,694 (part-time, technical) students; Leicester (opened in 1923), 73 lecturers, etc., and 730 full-time students; Hull (founded in 1928), 138 professors and lecturers and 900 students; and Newcastle-under-Lyme (opened in 1951), 23 lecturers, etc., 154 students. There are special agricultural colleges at Carlisle, Cirencester, Glasgow, Newport (Shropshire), Kingston-on-Soar (Derby), Wye (Kent), Uckfield (Sussex) and Ripley (Surrey). The University of *Wales* has 4 colleges, Cardiff, Aberystwyth, Bangor and Swansea. In *Scotland*, there are 4 universities, viz., at St. Andrews, Glasgow, Aberdeen, Edinburgh. The Carnegie Trust, founded in 1901 with a capital of £2,000,000, has an annual income of £100,000, of which half is devoted to the equipment and expansion of the Scottish universities and half to assisting students. The following table gives the approxi-

mate number of professors, lecturers, etc., and students of the universities for 1950–51 (the dates of foundation in brackets):—

Universities	Number of professors, etc.	Number of students	Universities	Number of professors, etc.	Number of students
England—			*Scotland*—		
Oxford . .	820	7,194	St Andrews (1411)	300	2,062
Cambridge . .	690	7,865[1]	Glasgow (1450) .	615	6,967
Durham (1831) .	550	4,799	Aberdeen (1494) .	325	2,030
London (1836) .	1,572	26,501[2]	Edinburgh (1582)	579	6,062
Manchester (1880)	547	4,801			
Birmingham (1900)	581	3,796	*Total for Scotland*	1,819	17,121
Liverpool (1903) .	497	3,595			
Leeds (1904) .	562	3,232[3]	*Wales* (1903)—		
Sheffield (1908) .	376	3,596[4]	Cardiff . .	154	1,788
Bristol (1909) .	409	2,606	Aberystwyth .	143	1,232
Reading (1926) .	167	1,201	Bangor . .	135	939
Nottingham (1948)	240	2,197	Swansea . .	99	1,058
Total for England	6,911	71,389	*Total for Wales*	531	5,017

[1] Including 707 women.
[2] Internal students, 1949–50, 27,429.
[3] Not including 369 part-time students.
[4] Including 1,109 evening students.

At most of the universities and university colleges women students are admitted on equal terms with men. There are, however, several colleges exclusively for female students (figures for 1950–51):—

Colleges	Number of professors, etc.	Number of students	Colleges	Number of professors, etc.	Number of students
London—			*Oxford*—		
Bedford . .	97	780	Lady Margaret Hall	17	216
Royal Holloway .	51	358	Somerville . .	23	218
Westfield . .	29	251	St. Hugh's . .	11	161
			St. Hilda's . .	8	182
Cambridge—			Society of Oxford		
Newnham . .	21	306	Home Students (St.		
Girton . .	18	321	Anne's Society) .	11	247

Women were first admitted to membership of Oxford University, and to take degrees in Oct., 1920, and were admitted to full membership of Cambridge University in Oct., 1948.

National System of Education.

England and Wales.

Considerable changes in the organization of education in England and Wales are taking place as a result of the Education Act of 1944, which came into force on 1 April, 1945. These changes, falling as they do immediately after the war when the collection of many educational statistics was suspended, make it impossible to give a full statistical picture of English and Welsh education at the present time. The following notes, however, show some of the salient facts.

Primary and Secondary Education.—The Education Act, 1944, classifies publicly provided education into three distinct and successive stages—primary, secondary and further education. Full-time schooling is being made available free for all children in publicly maintained primary and secondary schools, the secondary stage beginning at about the age of 11.

Fees in all types of secondary schools maintained by local education authorities (including voluntary schools) were abolished on 1 April, 1945. The school leaving age was raised from 14 to 15 on 1 April, 1947, and will be raised to 16 later.

In Jan., 1950, there were 6,009,193 children on the registers between the ages of 2 and 19, made up as follows:—Schools partially or wholly financed by local education authorities, 5,710,468; schools receiving grant direct from the Ministry of Education, 94,634; schools inspected and recognized by the Ministry as efficient, but receiving no grant from public funds, 204,091.

In schools (primary and secondary) partially or wholly financed by local education authorities there were, between the ages of 2 and 19, 2,929,412 boys and 2,781,056 girls in 23,113 primary and 4,765 secondary schools.

Nursery Schools.—In Jan., 1950, there were 21,937 pupils between the ages of 2 and 8 in separate nursery schools. In addition, there were 2,157 nursery classes attached to other schools in England and Wales with 60,554 pupils.

Special Schools.—In Jan., 1950, there were 601 special schools for mentally or physically handicapped children, with 47,119 pupils (26,567 boys and 20,552 girls).

Teachers.—On 1 Oct., 1950, there were 230,846 teachers (91,438 men and 139,408 women) employed by local education authorities.

Training of Teachers.—The large output of trained teachers required in the future is being attained by an expansion of the training facilities at 2- or 3-year colleges and university departments of education.

Details of university training departments and permanent training colleges :—

	Educational year, 1948–49	Educational year, 1949–50	Educational year, 1950–51
Admitted to training . .	3,664 men 7,840 women	4,121 men 8,988 women	3,942 men 9,706 women
Total . . .	11,504	13,109	13,646
Number in training . .	5,824 men 13,954 women	6,359 men 15,928 women	6,362 men 18,410 women
Total . .	19,778	22,287	24,772
Number who successfully completed training . .	3,343 men 6,392 women	3,746 men 7,301 women	— —
Total . . .	9,735	11,047	—

Emergency Training Colleges.—The number of teachers in training at the end of 1950 was 752 (192 men, 560 women) and the number successfully completing training during 1950 was 7,120 (4,148 men, 2,972 women). The scheme is now closed; it is expected that all students will have completed their courses by Sept., 1951.

Further Education.—For the year 1949–50 there were 11,546 further education establishments or courses consisting of: major establishments (other than art), 531; art establishments, 205; evening institutes, 10,809. The number of students attending during 1949–50 was, full-time, 54,046; part-time, 2,175,796.

The number of students released by their employers during working hours in 1949–50 was 241,487, including manufacturing industries, 136,458; building and contracting 37,094; mining, 16,595.

Awards to Students.—State Scholarships awarded in 1950, 900, and the total number of such awards current in 1950–51 was 2,299. The number of University Supplemental Awards offered in 1950 to holders of scholarships and exhibitions awarded by universities or colleges was 1,394, and the total number current in 1950–51, 2,822. In addition 120 Technical State Scholarships were granted, and 30 State Scholarships to mature students over 25 years of age.

Further Education and Training Scheme.—The table shows the number of awards made to ex-service men and women, classified according to the intended occupation of the recipient.

Awards made during the year	Teaching [1]	Medicine	Dentistry	Architecture	Art [2]	Civil Service	Engineering	The Church	Law	Miscellaneous	Total
1947	5,133	1,783	357	1,460	1,725	687	3,812	1,207	731	8,612	25,506
1948	5,362	1,023	258	1,376	1,227	576	3,632	862	558	6,326	21,200
1949	2,776	679	178	377	503	241	1,553	783	285	7,375	10,133
1950	690	184	73	63	79	45	320	185	100	644	2,383

[1] Including university teaching. [2] Including art teaching.

School Meals and Milk.—In primary and secondary schools (excluding residential, special and direct-grant schools) the percentage of pupils taking dinners in Oct., 1950, amounted to 50·2%, and pupils taking milk, 85·2%. Milk became free of payment in all schools on 1 Aug., 1946.

Finance.—Total expenditure on education in England and Wales from public funds (excluding university education) is estimated at £291,873,000 for 1950, as compared with £272,928,000 for 1949, or an increase of 7%. Of the total, £193,006,000 will be met from the Exchequer and £98,867,000 from the rates.

Scotland.

Secondary Education.—In 1949–50 there were 913 secondary schools (711 3-year, 202 5-year), and the average number of scholars on the registers was 417,416 (255,092 3-year, 162,324 5-year). The number of students attending central institutions in 1949–50 was 14,988 day students and 21,163 evening students. The number of teachers in secondary schools at 31 March, 1950, was 17,592. In 1949–50 there were 2,899 students training for the Teacher's General Certificate, including 736 graduates, in 4 training centres and 2 training colleges.

Elementary Education.—In 1949–50 there were 2,084 primary schools, and the average number on the registers was 364,529.

As at 31 March, 1950, there were 11,534 recognized certificated teachers in primary schools.

In 1949–50 there were 20 residential special schools, and 64 day special schools; special classes were attached to 29 ordinary schools. The total number of handicapped children under instruction was 10,439, of which 6,449 were mentally handicapped, 3,017 were physically handicapped, 170 were blind and 803 were deaf. There were 80 nursery schools, and nursery classes attached to 36 ordinary schools, the total enrolment being 4,599.

At 30 June, 1950, there were 25 approved schools with a total enrolment of 1,666 (1,453 boys, 213 girls).

Further Education.—Centres for continuation classes numbered 1,237 in 1949–50 with a total attendance of 237,931 students. In addition short informal courses of instruction in cookery and 'make do and mend' were given at 58 centres with a total attendance of 9,094. Adult education classes were conducted at 207 centres and were attended by 15,023 students.

Finance.—The total ordinary expenditure of education [illegible] 1949–50 was £31,367,821 (subject to correction on audit), an [illegible] for 1950–51 was estimated at £32,629,062.

The British Council.

The British Council was established by His Majesty's Government in November, 1934, and incorporated by Royal Charter in 1940. Its principal purposes are the promotion of a wider knowledge of the United Kingdom and the English language abroad and the development of closer cultural relations between the United Kingdom and other countries.

The council derives its funds from votes of the Foreign Office, Commonwealth Relations Office, Colonial Office and Colonial Development and Welfare Fund. For the year ending 31 March, 1951, grants-in-aid totalled £3,233,700, and for the year ending 31 March, 1952, £2,730,100. The net expenditure for the year ending 31 March, 1950, was £3,045,321.

The principal officers of the council are as follows :—

President.—Sir Henry Dale, O.M., G.B.E., P.R.S.

Vice-President.—Sir Reginald Leeper, G.B.E., K.C.M.G.

Chairman and Director-General.—General Sir Ronald Adam, Bt., G.C.B., D.S.O., O.B.E.

Vice-Chairmen.—Sir Philip Morris, C.B.E., M. Edelman, M.P., and C. Mott-Radclyffe, M.P.

Secretary.—Richard Seymour, C.B.E.

Under the charter the powers of the council are vested in the Executive Committee of 30 members, of whom 9 are nominated by the following :—The Lord President of the Council, the Secretaries of State for Foreign Affairs, the Home Department, Commonwealth Relations, Scotland and the Colonies, the Chancellor of the Exchequer, the President of the Board of Trade and the Minister of Education. There are the following expert advisory committees and panels (the names of chairmen holding office as at April, 1951, in brackets) :—Books and Publishing (Sir Stanley Unwin), Drama (Lord Esher), Fine Arts (Sir Eric Maclagan), Law (Lord Porter), Music (Sir Adrian Boult), Science (Sir Alfred [illegible] panels on Agriculture, General Science, Medicine and a group on [illegible]), Universities (Sir Raymond Priestley), Presentation Media ([illegible] Graham White). There are also advisory panels for Scotland (Dr. James Welsh) and Wales (Lady [illegible] George, M.P.).

The Secretary of State [illegible] Affairs is responsible to Parliament for the council's work in or relating to foreign countries and the Secretaries of State for the Colonies and Commonwealth Relations are responsible to Parliament for its work in the Commonwealth.

In April, 1951, there were representatives of the council in the following Commonwealth countries :—Australia, Ceylon, India, New Zealand, Pakistan, Aden, British East Africa, British Guiana, Gambia, Gold Coast, Nigeria, Sierra Leone, Barbados, Jamaica, Trinidad, Cyprus, Fiji, Gibraltar,

Hong Kong, Malta, Mauritius, Nyasaland, Northern Rhodesia, Singapore and Malaya jointly; and in the following foreign countries:—Argentina, Austria, Belgium, Brazil, Burma, Chile, China, Colombia, Denmark, Egypt, Ethiopia, Finland, France, Greece, Indonesia, Iraq, Israel, Italy, Jordan, Lebanon, Mexico, Netherlands, Norway, Persia, Peru, Poland, Portugal, Spain, Sweden, Switzerland, Syria, Turkey, Uruguay, Venezuela and Yugoslavia. There is a liaison officer in Germany.

In most of these countries, except in Latin America, the British Council maintains British Institutes or similar centres in the capital cities, and in some countries also in other cities.

In Latin America, at April, 1951, the council was co-operating with and assisting cultural associations in the following countries:—Argentina (Buenos Aires, Córdoba, La Plata, Mendoza, Rosario, Santa Fé, Tucumán); Brazil (Belo Horizonte, Curitiba, Rio de Janeiro, Santos, São Paulo); Chile (Santiago, Valparaiso); Colombia (Bogotá, Medellín); Mexico (Mexico City); Peru (Lima); Uruguay (Montevideo); Venezuela (Caracas).

In the United Kingdom, the council has staff stationed in many of the principal towns of England, Scotland, Wales and Northern Ireland. The council provides cultural and welfare facilities for overseas students studying in the U.K. On 1 Jan., 1950, it became responsible for the non-academic welfare of all the 4,000 colonial students in the U.K., funds for this being provided mainly from the Colonial Development and Welfare Fund. It sponsors and arranges visits from overseas of individuals and groups. It also organizes short courses and summer schools in the United Kingdom on technical and social subjects. In April, 1951, there were centres, for which the council was wholly or largely responsible, in Edinburgh, Glasgow, Liverpool, Cardiff, Manchester, Birmingham, Newcastle-upon-Tyne, Bristol, Stratford-on-Avon, Oxford and Cambridge.

The council carries on a great variety of educational activities. Instruction in the English language and literature and in other subjects is given in British Institutes, centres and cultural societies. A number of British schools abroad are supported, notably in Egypt and Latin America, and the council has helped them in the recruitment of British teachers. The council is frequently asked to advise foreign governments and educational authorities on the selection and appointment of British subjects to the staff of foreign universities and sometimes affords financial aid. It awards scholarships to post-graduate students and bursaries to technicians and others wishing to study in Britain. The council acts as overseas agent for many British examining bodies and collaborates with the Cambridge Local Examinations Syndicate in the organization of examinations in English for foreign students.

The council publishes the following periodicals:—*Britain To-day*, *British Medical Bulletin*, *British Agricultural Bulletin*, *British Book News* and *English Language Teaching*. Brochures in English and 17 other languages are published for the council in the following series:—*Arts in Britain*, *Aspects of Britain*, *British Contributions*, *British Life and Thought*, *The British People*, *Science in Britain*.

Headquarters:—65 Davies Street, London, W.1.

The Administration of Justice.

England and Wales.

The legal system of England and Wales has at the head of the superior courts, as the ultimate court of appeal, the House of Lords, which hears each year a number of appeals in civil matters, including a certain number from Scotland and very occasionally an appeal in a criminal case. In order that civil cases may go from the Court of Appeal to the House of Lords, it is

necessary to obtain the leave of either the Court of Appeal or the House itself, and before an appeal can be brought from a decision of the Court of Criminal Appeal a certificate of the Attorney-General is indispensable, certifying that the decision involves a point of law of 'exceptional public importance' and that it is desirable in the public interest that a further appeal should be brought. Since the institution of the Court of Criminal Appeal in 1907, three murder appeals have reached the Lords, the last in 1941. As a judicial body the House of Lords consists of the Lord Chancellor, the Lords of Appeal in Ordinary, commonly called Law Lords, and such other members of the House as have held high judicial office. The final court of appeal for India and certain of the Dominions is the Judicial Committee of the Privy Council, constituted on nearly parallel lines with the House of Lords.

On the civil side there is in England and Wales below the House of Lords the Supreme Court of Judicature, divided into two parts, the Court of Appeal (with the Lord Chancellor as nominal head and the Lords Justices of Appeal), and the High Court of Justice. The High Court has 3 divisions: (1) the Chancery Division, concerned with the construction of wills and settlements, trusts, mortgages, etc.; (2) the King's Bench Division, whose primary function is the administration of the common law, and (3) the Probate, Divorce and Admiralty Division, comprising courts deriving from the old civil law. The King's Bench Division, in addition to original jurisdiction, has certain appellate powers. Thus two or more judges, forming a divisional court, deal with cases stated for their opinion by lay justices or stipendiary or metropolitan magistrates and the Revenue Judge, nominally a divisional court, with cases stated by the Inland Revenue Commissioners. King's Bench judges, in addition to their main work in London, deal on circuit with a large amount of civil business, including the trial of certain categories of divorce causes, at the larger assize towns.

Below the House of Lords on the criminal side is the Court of Criminal Appeal, corresponding to the Court of Appeal on the civil side, and hearing appeals from King's Bench judges exercising criminal jurisdiction at Assizes and from the Central Criminal Court. It is drawn from the Lord Chief Justice and eight King's Bench judges appointed by him for the purpose, with the consent of the Lord Chancellor, the court consisting of an uneven number of such judges, normally three. In greater London, the Central Criminal Court, more commonly known as the Old Bailey, is, in effect, a substitute for both Assizes and Quarter Sessions. In it sit, in addition to King's Bench judges (for whom are reserved the more serious cases, and, in particular, those crimes involving capital punishment), the Recorder of London and the Common Serjeant. Nominally all the judges are appointed by the King, but in practice the Lord Chancellor (who is a Minister, a member of the Cabinet, *ex-officio* president of the House of Lords and goes out with the Ministry), the Lord Chief Justice, the Lords of Appeal in Ordinary and the Lords Justices of Appeal are appointed on the recommendation of the Prime Minister, and the other judges on the recommendation of the Lord Chancellor. The Recorder of London and the Common Serjeant are appointed by the City of London, subject to approval by the Crown.

The superior courts referred to above form only a relatively small part of the legal system so far as number of proceedings is concerned. On the civil side more than half a million cases yearly are in normal times brought before courts less than 100 years old, divided into some 50 circuits covering the whole country and somewhat misleadingly called county courts. These are presided over by legally qualified judges, charged with duties in such responsible and difficult matters as bankruptcy, rent restriction and work-

men's compensation, etc. They have a general jurisdiction, subject to certain rights of transfer to the High Court given to defendants, to determine all actions founded on contract or tort involving sums of not more than £200, but certain matters, such as, *e.g.*, libel and slander, are entirely reserved for the High Court. Each court has one or more registrars, who may hear any proceedings other than actions and, given certain conditions, actions involving not more than £10. From county courts an appeal lies to the Court of Appeal. Finally, there survive a few ancient local courts with civil jurisdiction, and, although the primary function of the justice of the peace is criminal, a not inconsiderable volume of civil work now falls on justices. Part of this work is done in separate courts for domestic proceedings, which determine matrimonial disputes, those relating to bastardy and guardianship of infants, etc. One of the presiding justices in such cases must be a woman.

On the criminal side the position as to the inferior courts is more complicated. At the base are the lay justices, who, outside the large towns, try the great bulk of minor offenders, or, according to fairly recent statistics, 98·9% of persons found guilty of offences of all kinds. Exercising summary jurisdiction in petty sessions, justices have power to pass sentences of imprisonment up to, in general, six months, and to impose fines up to, in general, £50. A number of the so-called crimes with which they deal at the present time are relatively venial, such as traffic offences and breaches of such statutes as those dealing with food and drugs, hours of work, etc. One of their most important functions is to examine prisoners charged with graver categories of offences and to commit them for trial at a higher court, *viz.* Assizes or Quarter Sessions. Certain persons are, *ex-officio*, justices, but the vast majority are placed upon the Commission of the Peace by the Lord Chancellor on the recommendation of the Lords Lieutenants of the counties, who, in turn, are assisted by advisory committees. Women are now eligible to act as justices, and the numbers holding the Commission are estimated to be at the present time in the neighbourhood of 2,500. In certain larger provincial towns and in London the corresponding work is done by legally qualified and remunerated persons, called respectively stipendiary and metropolitan police magistrates, who sit alone. Above the petty sessional courts are courts of Quarter Sessions, having a more extensive original jurisdiction and power also to hear appeals from petty sessions. These consist in general of lay justices, some boroughs, however, have separate Quarter Sessions with a legally qualified and remunerated chairman called a Recorder. Further, since 1938, legally qualified and remunerated chairmen and deputy-chairmen may be appointed with official approval, in which case the court has more extensive jurisdiction than it would otherwise have. From Quarter Sessions appeals lie to the Assize courts presided over by King's Bench judges and thence to the Court of Criminal Appeal and the House of Lords (*see* above). There remains as a last resort an invocation of the Royal Prerogative exercised on the advice of the Home Secretary after consultation with the judges concerned. By this means a very small number of death sentences are each year commuted for terms of imprisonment or detention.

All criminal trials, except those which come before courts of summary jurisdiction or the House of Lords, are tried by a judge and a jury consisting normally of twelve members, reduced by the Administration of Justice (Emergency Provisions) Act of 1939 to not more than seven, save in murder or treason or in any case where the court, by reason of the gravity of the issues, directs that the full number be empanelled. The same Act prohibits juries in all civil cases, whether in the High Court or inferior courts, unless

the court is of opinion that the question ought to be tried with a jury and so orders; in such case the [illegible] tion to seven applies.

Important features [illegible] legal system are the Poor Persons Procedure, supplemented in the case of the Forces by a special legal aid scheme, and Poor Prisoners' Defence. In the case of the Poor Persons Procedure, under which in 1942 2,791 cases were entered, 96% of them matrimonial, would-be litigants with incomes under certain limits are provided with the services of counsel and solicitor on the payment of the solicitor's out-of-pocket expenses. Under the Poor Prisoners' Defence, any person committed for trial for an indictable offence whose means appear insufficient to enable him to obtain legal assistance in the ordinary way, may, on being granted a 'defence certificate,' have free legal aid and have counsel and solicitor assigned to him for his defence. In charges of murder a defence certificate must in such circumstances be granted. Persons charged before the justices may similarly be granted a 'legal aid certificate,' entitling them to the services of a solicitor.

The authorized strength of the police force in England and Wales in Dec., 1950, was 70,938 men and 1,668 women. The strength was 61,216 men and 1,345 women. In addition there were 204 whole-time auxiliaries of the First Police Reserve [illegible] woman) and 20,113 special constables (including 92 women). The Police War Reserve and Women Auxiliaries were disbanded on 31 Dec., 1948. Total police expenditure (estimated) in England and Wales for 1950–51 was £28,417,000.

Scotland.

The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the [illegible] of the Court of Session, and sits more or less frequently, as the [illegible] cases before it may require, in Edinburgh or in the circuit towns. One judge can, and usually does, try cases, but two or more preside in cases of difficulty or importance. It is the only competent court in cases of treason, murder, robbery, rape, fire-raising, deforcement of messengers, and generally in all cases in which a higher punishment than imprisonment is by statute directed to be inflicted; and it has moreover an inherent jurisdiction to punish all criminal acts, both those already established by common law or statute, and such as have never previously come before the courts and are not within any statute.

The sheriff of each county is the proper criminal judge in all crimes occurring within the county which infer only an arbitrary punishment, and if the case is tried with a jury the High Court has no power of review on the merits. Even in cases indicted to the High Court the accused is, under the Criminal Procedure (Scotland) Act of 1887, regularly asked to plead in the sheriff court, and minor objections to the indictment can be wholly or in part disposed of there. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

The Court of Session, presided over by the Lord President, and divided into an Inner and an Outer House, exercises the highest civil jurisdiction in Scotland, with the House of Lords as a Court of Appeal.

The police forces in Scotland at the end of 1950 had an authorized establishment of 7,568 (including 169 women); the strength was 7,060 men and 139 women. Whole-time 'additional' policemen numbered 121, and there were 9,249 part-time special constables. The estimated expenditure on police, borne by the Government, was £2,177,658 for 1948–49 (general administration £2,154,859; Road Fund grant, £22,799).

Jackson (R. M.), The Machinery of Justice in England. London, 1940.

National Insurance. Old Age Pensions. National Assistance.

The National Insurance Act, 1946, came into operation on 5 July, 1948, and the existing schemes of health, pensions and unemployment insurance were repealed from that date.

This Act applies in general to all persons in Great Britain who are over school leaving age and divides contributors into three classes, *e.g.*:—(*a*) Employed; (*b*) Self-employed; (*c*) Non-employed.

The weekly contributions for employed persons are :—

	Until 30 Sept., 1951		From 1 Oct., 1951	
	Employee	Employer	Employee	Employer
Men	4*s.* 11*d.*	4*s.* 2*d.*	5*s.* 1*d.*	4*s.* 4*d.*
Women	3*s.* 10*d.*	3*s.* 3*d*	4*s.* 0*d.*	3*s.* 5*d.*
Boys (under age 18)	2*s.* 10½*d.*	2*s.* 5½*d.*	2*s.* 11½*d.*	2*s.* 6½*d*
Girls (under age 18)	2*s.* 4*d*	1*s.* 11*d.*	2*s.* 5*d.*	2*s.* 0*d*

The above are the normal rates, but in the case of adult workers, where the wage is at the rate of 30*s.* a week or less, the employer must pay 1*s.* 11*d.* (as from 1 Oct., 1951: 2*s.*) of the employee's contribution (man) in addition to his own, making the employer's total 6*s.* 1*d.* (6*s.* 4*d.*) or, in the case of a woman, 1*s.* 5*d.* (1*s.* 6*d.*), making the total 4*s.* 8*d.* (4*s.* 11*d.*). This does not apply where the employee gets board and lodging in addition to wages.

The above rates include the contributions for Industrial Injuries Insurance. These are 4*d.* from men, 3*d.* from women, 2½*d.* from boys, 2*d.* from girls and equal amounts from the employer.

The weekly contributions for self-employed persons are:—Men, 6*s.* 2*d.* (as from 1 Oct., 1951: 6*s.* 6*d.*); women, 5*s.* 1*d.* (5*s.* 5*d.*); boys (under age 18), 3*s.* 7*d.* (3*s.* 9*d.*); girls (under age 18), 3*s.* 1*d.* (3*s.* 3*d.*).

The weekly contributions for non-employed persons are:—Men, 4*s.* 8*d.* (as from 1 Oct., 1951: 5*s.*); women, 3*s.* 8*d.* (4*s.*); boys (under age 18), 2*s.* 9*d.* (2*s.* 11*d.*); girls (under age 18), 2*s.* 3*d.* (2*s.* 5*d.*).

In every case the above contributions include the contribution for the new National Health Service (medical, hospital, dental, nursing, etc., treatment). The amount of these contributions is :—Men, 10*d.*; women, 8*d.*; boys or girls, 6*d.*

Contributions for a man will be payable up to the age of 65. If, at that age, he retires from work, he pays no more contributions. If he continues working, contributions are payable to the age of 70. Comparable ages for women are 60 and 65.

Special transitional arrangements have been made for persons who have entered the insurance scheme late in life to pay contributions after reaching pension age even though they are no longer employed, to enable them to qualify for pension.

Benefits.—The benefits are :—(1) Unemployment benefit; (2) Sickness benefit; (3) Maternity benefit; (4) Widow's benefit; (5) Guardian's allowance; (6) Retirement pensions; (7) Death grant.

Employed persons qualify for all the benefits; self-employed qualify for

all except unemployment; non-employed qualify for all except unemployment, sickness and maternity allowance.

Qualification for any benefit depends upon the fulfilment of the appropriate contribution conditions laid down in the Act.

Sickness and Unemployment Benefit.—The normal rate is 26*s.* a week, plus 16*s.* a week for an adult dependant, plus 7*s.* 6*d.* for the first dependent child. There is no allowance for children except the first child, as the others are covered by the Family Allowances Act. Under the proposed increases, announced by the Chancellor of the Exchequer in his Budget speech in April, 1951, a beneficiary who has a dependent child or children will be able to receive 10*s.* for the first child and, in addition to any family allowance due, 2*s.* 6*d.* will be paid for each subsequent child.

Maternity Benefit.—For a confinement a woman receives a maternity grant of £4 for each child, and, if she has been gainfully employed, she receives a maternity allowance of 36*s.* a week normally for 13 weeks commencing approximately 6 weeks before her confinement, provided she does no work during this period. For other women there is, instead of the maternity allowance of 36*s.*, an attendance allowance of £1 a week for 4 weeks in addition to the maternity grant.

Widow's Benefits.—On her husband's death a widow qualifies for 13 weeks for an allowance of 36*s.* a week for herself plus 7*s.* 6*d.* a week if she has a child of school age. At the end of the 13 weeks she receives a widowed mother's allowance of 33*s.* 6*d.* for herself and child so long as the child is of school age, and, if she is over 40 when this allowance ceases and 10 years have elapsed since her marriage, she qualifies for a widow's pension of 26*s.* a week. A widow left without any children of school age will receive a widow's pension of 26*s.* a week after her widow's allowance ceases if she is 50 or over and has been married not less than 10 years when she loses her husband. A widow who is incapable of self-support by reason of infirmity when widow's benefit would otherwise cease, may be granted a 26*s.* widow's pension for the duration of the incapacity. If, when the incapacity ends, she is at least 50, and 10 years have elapsed since marriage, the pension continues. If widows entitled to the 33*s.* 6*d.* allowance or the 26*s.* pension are at work, their benefits are reduced by 1*s.* for each shilling they earn above 30*s.* a week.

Under the proposed increases, announced by the Chancellor of the Exchequer in his Budget speech in April, 1951, the 36*s.* allowance will be increased by 10*s.* (instead of 7*s.* 6*d.*) for the first child, and by 2*s.* 6*d.* for each additional child; the 33*s.* 6*d.* allowance will become 40*s.*, with additional increases of 2*s.* 6*d.* for each child after the first. The first 30*s.* of widowed mother's allowance and the whole of a widow's pension will be reduced by 1*s.* for each shilling earned above 40*s.* a week.

Guardian's Allowance.—Anyone who has in his family an orphan, one of whose parents was insured under the new scheme, receives a guardian's allowance of 12*s.* a week.

Retirement Pensions.—In order to receive a retirement pension, 26*s.* for a man or woman on his or her own insurance and 16*s.* for a woman through her husband's insurance, men between 65 and 70 and women between 60 and 65 must, as the name suggests, have retired from work. If, after retirement, they have any earnings, then, for every shilling that they earn over 20*s.*, 1*s.* is deducted from their pension.

If retirement is postponed there is an addition of 2*s.* to the retirement pension for every year a worker continues at work and pays contributions

between the ages of 65 to 70 in the case of a man and 60 to 65 in the case of a woman. A proposed increase of 4*s.* in the weekly rate of retirement pensions for men over 70 and women, including widows, over 65 was announced by the Chancellor of the Exchequer in his Budget speech in April, 1951. He also proposed that the amount which a retirement pensioner could earn without affecting his pension should be raised from 20*s.* to 40*s.* a week; and that the increments for deferred retirement should be 3*s.* instead of 2*s.* for every year a worker continues at work and pays contributions.

Death Grant.—The normal amount of the payment is:—For an adult, £20; for a child aged 6–18, £15; for a child aged 3–6, £10; for a child under 3, £6.

Unemployment benefit is paid through the Employment Exchanges. Retirement pensions are paid through the Post Offices by order books as are maternity and attendance allowances. Other payments are made through local National Insurance Offices either in cash or by means of a postal draft.

National Insurance (Industrial Injuries) Act, 1946.

The Industrial Injuries Act, which also came into operation on 5 July, 1948, provides a system of insurance against 'personal injury by accident arising out of or in the course of employment' and against certain prescribed diseases and injuries due to the nature of the employment. It takes the place of the Workmen's Compensation Acts and covers broadly the persons who are insured as employed persons under the National Insurance Act. The cost of the contribution is included in the employed person's National Insurance stamp but there are no contribution conditions for the payment of benefit. Three types of benefit are provided:—

(1) *Injury benefit*, payable during incapacity for work for a maximum of twenty-six weeks from the date of the accident. The rate of this benefit is 45*s.* a week with increases of 16*s.* for one adult dependant and 7*s.* 6*d.* for a child. If the insured person is under 18 years of age and is not entitled to a dependant's increase, benefit will be payable at a reduced rate—33*s.* 9*d.* for a person between 17 and 18 and 22*s.* 6*d.* for a person under 17. Under the proposals announced by the Chancellor of the Exchequer in his Budget speech in April, 1951, a beneficiary who has a dependent child or children will be able to receive 10*s.* for the first child, and in addition to any family allowance due 2*s.* 6*d.* will be paid for each subsequent child.

(2) *Disablement benefit.*—This is payable where, when injury benefit ceases, there remains some loss of faculty. This loss of faculty will be assessed at a percentage by comparison with a person of the same age and sex whose condition is normal. If the assessment is 20% or more, benefit will be a pension varying according to the assessment, from 45*s.* a week to 9*s.* a week. If the assessment is under 20%, benefit will be a gratuity of an amount not exceeding £150. Increases of benefit may be payable where a disablement causes special hardship or unemployability, where the pensioner is in need of constant attendance, or where the pensioner is in hospital receiving treatment for his injury. In the case of an unemployable pensioner, or a pensioner receiving hospital treatment, an increase of 16*s.* for an adult dependant and 7*s.* 6*d.* for a child will be payable. Pensions for persons under 18 are reduced similarly to injury benefit. Under the new proposals mentioned above, similar changes will be made in the increases of benefit for children.

(3) *Death benefit.*—The Act provides for payment of a pension to the widow of a man whose death has been caused by industrial accident or one of the prescribed diseases, or to the widower of a woman so killed if he is

incapable of self-support. It also makes provision for payment of an allowance of 7*s.* 6*d.* a week to a person who has the care of a child of the family of the deceased; and for other death benefits in the form either of a pension, gratuity or allowance, to parents, certain relatives or (in addition to the 7*s.* 6*d.* mentioned above) a woman caring for the child of the deceased's family, if they were maintained by the deceased and fulfilled certain other conditions. Under the new proposals mentioned above, similar changes will be made in the increases of benefit for children.

National Insurance Funds.—At the beginning of the period 5 July, 1948, to 31 March, 1950, there was a balance of £896,000,000. Income to the Fund, consisting of contributions from insured persons and employers, payments from the Exchequer, and interest, amounted to £879,900,000. Payments of benefits in respect of [illegible] were £26,000,000; sickness, £109,000,000; maternity, [illegible] widows, £37,000,000; others, and administration, £42,200,000. Guardians' allowances accounted for £1,200,000; retirement pensions, £424,400,000; and death grants, £1,600,000. The balance at 31 March, 1950, was £1,120,100,000.

During the period retirement and contributory old age pensions were paid to 1,499,000 men and 2,662,000 women; and 36,000 guardians' allowances and orphans' pensions were paid. The number of widows' allowances were 19,000; of widowed mothers' allowances, 111,000; and of widows' pensions and widows' basic pensions, 338,000.

National Insurance (Industrial Injuries) Fund.—Income during the period 5 July, 1948, to 31 March, 1950, consisting of contributions from insured persons and employers, payments from the Exchequer, interest and miscellaneous receipts, amounted to £61,600,000. Benefits paid for injury totalled £14,600,000; for disablement, £3,000,000; for death, £200,000. Administration and other payments cost £1,600,000. There was a balance at 31 March, 1950, of £22,400,000.

Non-contributory Pensions.—The Old Age Pensions Act, 1936, provides for the payment of non-contributory old age pensions, at the expense of the Exchequer, to persons aged 70 or over (40 or over if they are blind) who satisfy certain conditions of nationality, residence and means and who are not receiving retirement pensions under the National Insurance Act, 1946. The rates of pension range from 26*s.* to 2*s.* a week according to means, with a maximum of 16*s.* for married women. Claims are decided by the National Assistance Board, subject to a right of appeal to the local Appeal Tribunal established under the National Assistance Act, 1948.

National Assistance.—Under the National Assistance Act, 1948, the National Assistance Board is responsible for the grant of financial assistance, at the expense of the Exchequer, to all persons in Great Britain from 16 years of age who are without resources, or whose resources (including national insurance benefits) need to be supplemented in order to meet their requirements. The general standards by reference to which assistance is granted are determined by statutory regulations approved by Parliament. Persons who are dissatisfied with the amount of assistance granted to them may appeal to the local Appeal Tribunal established under the Act.

During 1950, expenditure on non-contributory old age pensions was £25,266,000, and, on national assistance, payments amounted to £57,695,000.

War Pensions.—The number of war (1914–18) pensions or allowances in payment as at 31 March, 1949, was 850,350 approximately (888,800 in 1947–48). The number of war (1939–45) pensions or allowances in payment as at 31 March, 1949, was 1,334,400 approximately (1,334,760 in 1947–48). The expenditure (inclusive of administration expenses) of the Ministry of

Pensions for 1949–50 was £88,283,000), the estimated expenditure for 1950–51 was £88,657,000, and for 1951–52 is £85,167,000.

Labour and Employment.

The distribution of total man-power in Great Britain was at December, 1950 (in thousands): total working population, 23,225 (15,921 males, 7,304 females). Total employed in armed forces and women's services, 752. Total engaged in civil employment, 22,145 (14,964 males, 7,181 females), including agriculture and fishing, 1,174; mining and quarrying, 842; national and local government service, 1,385; transport, 1,776; building and civil engineering, 1,409; distributive trades, 2,654; commerce, finance, professional and personal service, entertainments, etc., 3,924.

Number of registered and [illegible] trade unions at the end of 1949 was 706, with a total membership of [illegible]40 (7,601,950 males, 1,659,590 females); including metal manufacturing and engineering trades, 1,640,400; general labour organizations, 2,110,470; coal-mining, 794,300; railways, 588,150; [illegible] contracting, 496,230; other transport, 438,420. The number [illegible] unions was 417 in 1949 with a membership of 7,883,736.

At [illegible], there were 186 unions affiliated to the Trades Union Congress with 913 delegates and a total membership of 7,883,355.

The following table is a statistical summary relating to trade disputes for 1949 and 1950 :—

	Number of disputes		No. of workers involved		Aggregate duration in working days	
	1949	1950 [1]	1949	1950 [1]	1949	1950 [1]
			1,000's	1,000's	1,000's	1,000's

Relief of the Poor.

On 5 July, 1948, the Poor Law ceased to have effect and was replaced by the provisions of the National Assistance Act, 1948 (*see* p. 82), and of other related social legislation. The total expenditure on poor relief in 1948–49 for the period ended 4 July, 1948, was £15,169,186, to meet which the Poor Law authorities received specific income amounting to £3,296,311. The balance of expenditure, amounting to £11,872,875 was defrayed mainly out of moneys derived from rates and the Exchequer grants under the

Local Government Act, 1948. The total cost, in money and kind, of out-relief included above was £3,049,832.

Accommodation and Welfare under Part III of the National Assistance Act, 1948.

England and Wales.

The number of persons in residential and temporary accommodation provided by local authorities was as follows :—

On the night of 1 Jan. in the year :	Residential accommodation		Temporary accommodation		Total	
	Adults	Children	Adults	Children	Adults	Children
1949 . . .	46,337	1,594	3,074	1,638	49,111	3,232
1950 . . .	50,023	1,099	2,968	2,852	52,991	3,951
1951 . . .	53,633	721	2,776	3,284	56,409	4,005

Expenditure and income given below for the year ended 31 March, 1949, relating to accommodation and welfare services undertaken from 5 July, 1948, include welfare of the blind from 1 April, 1948.

Expenditure (including loan charges)	Specific income		Balance of expenditure not met out of specific income
	Government grants	Other specific income	
£	£	£	£
9,501,000	476,000	3,187,000	5,838,000

Scotland.

The number of persons in residential and temporary accommodation provided by local authorities under Part III of the National Assistance Act, 1948, was as follows :—

30 June	Residential accommodation		Temporary accommodation		Total	
	Adults	Children	Adults	Children	Adults	Children
1949	3,568	34	107	87	3,675	121

The total expenditure was £9,101,569 in 1947-48 and £8,334,169 in 1946–47; the amount received by Poor Law authorities was £1,288,695 in 1947–48. The balance of [illegible] £7,812,894 (1947–48) was defrayed mainly out of [illegible] and the block grants under the Local Government (Scotland) Act, 1929.

Finance.

I. Revenue and Expenditure.

Year ended 31 March	Revenue (in £ sterling)		
	Estimated in the Budgets [1]	Actual receipts into the Exchequer	More (+) or less (−) than estimates
1947	3,161,300,000	3,341,223,358	+ 179,923,358
1948	3,499,000,000	3,844,859,041	+ 345,859,041
1949	3,765,300,000	4,006,591,000	+ 241,291,000
1950	3,943,080,000	4,098,024,000	+ 154,944,000
1951	4,075,650,000	4,157,260,000	+ 81,610,000

The Budget estimate of ordinary revenue for 1951–52 is £4,098,000,000.

[1] On basis of existing taxation.

Year ended 31 March	Expenditure (in £ sterling)		
	Budget and supplementary estimates	Actual payments out of the Exchequer	More (+) or less (−) than estimates
1947	4,102,043,000	3,910,345,955	− 191,697,045
1948	3,443,978,000	3,387,104,000	− 56,874,000
1949	3,285,038,000	3,175,606,000	− 109,432,000
1950	3,643,440,000	3,549,285,000	− 94,155,000
1951	3,700,011,000	3,436,745,000	− 263,269,000

The Budget estimate of ordinary expenditure for 1951-52 is £4,196,921,000.

The total ordinary revenue for 1950–51 was £3,977,825,000; ordinary expenditure, £3,257,310,000; the self-balancing revenue for Post Office and Broadcasting was £171,088,000 and for post-war refunds of income tax and profits tax E.P.T. was £8,347,000.

The imperial revenue in detail for 1949–50 (inclusive of £1,975,922 duties collected for and due to the Isle of Man, and of the proceeds of duties the value of which is assigned under various Acts to local purposes), and the expenditure, are given below, as are also the Exchequer receipts for 1950–51 and the Budget estimate for 1951–52 :—

	59,462,846	47,544	49,000
Total consolidated fund services	550,391,638	544,728	584,000
II. Supply :—			
Army	291,800,000	309,000	418,800
Navy	186,800,000	190,000	278,500
Air Force	201,600,000	225,100	328,750
Ministry of Supply (Defence)	132,741,545	49,300	81,500
Ministry of Defence	700,000	4,027	6,212
Civil votes	1,986,039,455	1,901,808	2,301,836
Customs and excise	9,205,000		
Inland revenue	21,818,000	33,347	37,323
Post Office services	168,186,000		
Total supply services	2,998,893,000	2,712,582	3,612,921
Total expenditure chargeable against revenue	3,549,284,638	3,257,310	4,196,921

The Exchequer issues shown above were supplied to all departments to meet all their requirements, whether original or supplementary.

In addition to the ordinary expenditure above given, there were in 1949-50 issues under the Cotton (Centralized Buying) Act, 1947, amounting to £60,500,000; under the Coal Industry Nationalisation Act, 1946, amounting to £15,000,000; under War Damage (War Damage Commission) amounting to £102,500,000, and under the Local Authorities Loans Act, 1945, amounting to £272,150,000. The money raised by National Savings Certificates in 1949-50 was £102,500,000; by 3½% Terminable Annuities, £50,000,000; by 2½% Defence Bonds, £24,435,000; by Tax Reserve Certificates, £38,620,000; while the principal of National Savings Certificates paid off amounted to £125,850,000. Receipts under [illegible] Co-operation Agreement amounted to £92,000,000. The balance in the Exchequer on 1 April, 1950, was £2,954,835.

The following were the principal items of the original estimates for grant and other services for the years 1950-51 and 1951-52 :—

	1950-51	1951-52
Local Services :	£000's	£000's
Exchequer contributions to local revenues	54,610	56,225
Education (including teachers' pensions)	242,994	251,557
Housing	60,753	60,417
Roads	27,069	29,511
Police	28,417	30,252
National Insurance, Pensions, etc. :		
National Insurance Fund	145,625	149,450
National Assistance, etc.	54,765	68,805
National Health Service	374,354	379,309
Other Services :		
Food services (other than production)	401,944	402,651
Agriculture and Fisheries	61,133	50,782
Works, stationery and information	72,032	65,780

The total national income in 1949 (in £ million) was 10,226 (including 50 net income from abroad).

The gross national expenditure in 1949 (in £ million) was 11,201 (including personal consumption, 8,402; gross domestic capital formation, 2,465; public authorities' current expenditure, 2,037).

II. Taxation.

The net receipts from the principal branches of taxation, Great Britain and Northern Ireland (reserved taxes), were as follows in the years shown :—

Year ended 31 March	Customs [1]	Excise [1]	Estate, etc., duties [1]	Stamps [1]	Income tax	Sur-tax
	£000's	£000's	£000's	£000's	£000's	£000's
1944–45	579,352	496,900	111,039	18,428	1,309,617	73,624
1945–46	569,842	540,800	119,601	25,497	1,371,412	69,469
1946–47	620,741	612,956	148,864	39,210	1,155,585	75,489
1947–48	798,113	678,243	171,059	54,571	1,194,485	91,154
1948–49	823,258	733,500	178,447	56,632	1,360,415	99,593
1949–50	814,222	797,909	188,933	51,481	1,436,716	114,503

[1] The principal items included in these branches of revenue are shown on pages 85–86 above. The excise receipts include receipts from motor vehicle duties.

Income Tax.—The gross amount of income brought under the review of the Inland Revenue Department in the year ended 5 April, 1939, in Great Britain and Northern Ireland, was £4,158,111,482; in 1949–50 it was estimated to be approximately £10,925,000,000. The income on which tax was actually received in 1938–39, after allowing for exemptions and reliefs, was £1,482,564,496, and the estimated amount for 1949–50 was £4,271,000,000. The estimated number of incomes in Great Britain and Northern Ireland above the exemption limit in 1938–39 was 9,800,000 and was 20,750,000 in 1949–50. The estimated number chargeable was 15,000,000 for 1949–50.

The tax is mainly on the income of individuals, but it extends also to income [illegible] retained by corporate bodies, *e.g.*, the undistributed profits [illegible]. It is imposed, for each year of assessment ending 5 April, at a 'standard' rate supplemented in the case of individuals by the sur-tax (*see* p. 89). By the War Budget of Sept., 1939, the standard rate of tax was raised by 1*s.* 6*d.* to 7*s.* in the £. The supplementary Budget of 1940–41 raised the standard rate to 8*s.* 6*d.*, and for 1941–42 to 1945–46 the standard rate was further increased to 10*s.* For 1946–51, the standard rate of tax was reduced to 9*s.*, and for 1951–52 it was increased to 9*s.* 6*d.* Allowances for children, dependent relatives, etc., together with certain other reliefs, are granted to all tax-payers irrespective of the amount of their total income. In 1940–41 incomes not exceeding £120 were exempt from tax and from 1941–42 to 1945–46 the exemption limit was reduced to £110. For the years 1946–48 the exemption limit was £120 and for 1948–51 the limit was raised to £135. The relief for earned income in 1940–41 was one-sixth of such income, with a maximum allowance of £250; for 1941–42 to 1945–46 it was one-tenth of such income, with a maximum allowance of £150. For 1946–47 the amount of earned income freed from tax was raised to one-eighth, with a maximum allowance of £150; for 1947–48 was one-sixth of such income, with a maximum allowance of £250, and for 1948–51 was one-fifth of

such income, with a maximum allowance of £400. For 1940–41 the personal allowance for married persons was £170, and for other persons, £100; from 1941–42 to 1944–45 the allowances were reduced to £140 and £80 respectively. For 1948–51 a married woman in employment receives reduced rate relief on her own earnings as well as on the joint income of husband and wife. For the years 1946–51 the personal allowances were increased to £180 for married couples and £110 for single persons. For the years 1947–51 children's allowances were increased to £60 for each child. For 1946–48 the first £50 of taxable income was taxed at 3*s.*, next £75 at 6*s.* and the remainder at the full rate of 9*s.*, for 1948–50 the first £50 of taxable income was taxed at 3*s.*, the amount charged at 6*s.* was raised to £200, and the remainder at the full rate of 9*s.*, and for 1950–51 the first £50 of taxable income was charged at 2*s.* 6*d.*, the next £200 at 5*s.* and the remainder at the full rate of 9*s.* The Budget for 1951–52 increased all three rates by 6*d.* each, but also raised the marriage and child allowances to £190 and £70 respectively. The Exchequer receipt of income tax was £335,901,000 in 1938–39 and £1,404,364,000 in 1950–51.

Sur-tax.—Sur-tax is payable by persons with incomes exceeding £2,000 per year (prior to 1914–15, £5,000 per year; from 1914–15 to 1917–18, £3,000 per year, and in 1918–19 and 1919–20, £2,500 per year).

As part of a general scheme for the simplification of the Income Tax, the Finance Act, 1927, merged the super-tax into one tax with the income tax having the same basis of assessment and payable, under the name of sur-tax, as a deferred instalment of income tax on 1 Jan. in the year following the year of assessment. The sur-tax was payable for the first time in respect of the year 1928–29 on 1 Jan., 1930. The number of persons assessed for sur-tax for 1937–38 was 102,022, with a total assessed income of £521,471,169, and for 1948–49 the number of persons assessed was 168,718, with a total assessed income of £761,900,000. Exchequer receipt from sur-tax in 1950–51 was £121,100,000.

Profits Tax.—This tax applies, with certain exceptions, to trades or businesses carried on by bodies corporate or by unincorporated societies or other bodies. The profits chargeable are computed on income tax principles, subject to certain modifications. The rates are as follows:—Nationalized undertakings, industrial and provident societies, businesses carried on by persons not resident in the United Kingdom, 10%; other bodies and societies: profits distributed, accounting period (or portion thereof)—up to 30 Sept., 1949, 25%; commencing 1 Oct., 1949, 30%; profits not distributed, 10%.

No tax is payable where the profits do not exceed £2,000. Where the profits exceed £2,000 but do not exceed £12,000, an abatement is allowed.

The number of cases assessed in the year 1949–50 for Great Britain and Northern Ireland was 65,069 (30,856 for 1938–39) and the tax charged amounted to £295,100,000 (£24,838,838 for 1938–39).

The Exchequer receipts were £260,760,000 in 1949–50, and £258,420,000 in 1950–51.

Excess Profits Tax.—This tax was imposed from 1 April, 1939, by the Finance (No. 2) Act, 1939, and is charged on the amount by which the profits arising in the chargeable period exceed the standard profits. It applies generally to trades and businesses carried on in the United Kingdom or carried on abroad by persons ordinarily resident in the United Kingdom. The tax was levied at the rate of 60% on excess profits arising from

1 April, 1939, and later increased to 100% in respect of excess profits arising from 1 April, 1940. This was reduced to 60% as from 1 Jan., 1946. The tax has been removed entirely as from 31 Dec., 1946. The excess profits tax is not additional to the National Defence Contribution, but alternative to it, only the higher of the two taxes being payable.

The standard profits are normally based on the profits of the years 1935, 1936 and 1937, with various options as to the years which the business could select. There was also provision for a minimum standard in certain cases. Profits of the standard period were also adjustable by reference to the variation in the capital employed in the business as between the standard period and the chargeable period.

The Exchequer receipts were £36,200,000 in 1949–50, and £9,350,000 in 1950–51.

The net national income of the United Kingdom was estimated to be £11,201,000,000 in 1949. Private income (before tax) amounted to £10,166,000,000, and income from public property, trading, etc., received by public authorities amounted to £148,000,000.

III. National Debt.

Borrowing by the state on the security of taxes was practised in Norman times, but the National Debt really dates from the time of William III. The acknowledged debt in 1689 was about £664,000, on which the annual charge for interest and management was only £40,000. At various subsequent dates the amounts were as follows (including the Irish debt throughout):—

Year	Debt [1] Million £	Annual charge, including annuities Million £	Annuities only (included in previous column) Million £
1727 Accession of George II	52	2·4	0·2
1756 Beginning of Seven Years' War	75	2·8	0·2
1763 End " " "	133	5·0	0·5
1775 Beginning of American War	127	4·7	0·5
1784 End " "	243	9·5	1·4

Year	Gross debt including terminable annuities Million £	Annual charge [2] Million	*Interest on* Annuities (included in previous column) Million £
1793 Beginning of French Wars		9·7	1·3
1815 End " "		32·6	1·9
1817 Consolidation of English and Irish Exchequers		31·6	2·0
1854 Beginning of Crimean War	802	27·4	3·9
1857 End " " "	837	28·6	4·0
1899 Beginning of Boer War	675	23·2	7·3
1903 End " " "	798	27·0	6·5
1914 Beginning of First World War	708	24·5	3·2
1939 Beginning of Second World War	8,301	230·0	0·4
1945	21,509	465·0	0·4
1946	23,774	465·0	0·5
1947	25,771	515·9	0·4
1948	25,722	525·0	0·4
1949	25,267	500·0	0·4
1950	25,900	518·4	0·4

[1] These amounts do not include the capital value of terminable annuities.
[2] Including interest, management and new sinking fund.

The following statement shows the total amount of the gross liabilities and the assets of the state on 31 March, 1950:—

	Million £
Liabilities:	
Funded debt	3,899·3
Estimated capital liability of terminable annuities	12·6
Unfunded debt	21,987·9
	25,899·8
Deduct bonds tendered for death duties	97·5
	25,802·3
Other capital liabilities	184·0
Total gross liabilities	25,986 3
Assets:	
Suez Canal shares, market value, and other assets	2,858 4
Exchequer balances at the Banks of England and Ireland	3·0

Included among the assets are Exchange Equalization Account, £575 million; Issues to Local Loans Fund, £773 million; under Bretton Woods Agreements Act, £557 million; under Coal Industry Nationalization Act, £[illegible] million.

Advances to Allied Governments (1939–1945 war), [illegible] 31 March, 1950, amounted to:—France, £100,676,581; Po[illegible]; Russia, £36,985,000; Turkey, £28,284,290; Czechoslovakia, £24,633,523; Netherlands, £40,699,295; China, £12,237.395; total, £301,016,084.

IV. Local Taxation.

The amount of rates collected by local authorities in 1950–51 in England and Wales is estimated to have been £294,000,000 (£284,000,000 in 1949–50); in Scotland, £31,913,000 in 1950–51 (£30,254,000 in 1949–50). In addition to the Exchequer grants and moneys receivable under the Local Government Act, 1948, local authorities receive other large government grants, *e.g.*, from the Ministry of Education for purposes of education, from the Home Office for police expenses, from the Ministry of Health for housing, from the Ministry of Transport for highways. They also receive large sums from government departments as reimbursements in respect of expenditure on emergency services. In 1949–50 the Exchequer grants under the Local Government Act, 1948, amounted to £45,021,000 and the moneys receivable by local authorities as recoupment for the loss of rates resulting from the de-rating provisions of Part V of the Act amounted to £12,768,000. In Scotland, Exchequer Grants under Part II of the Local Government Act, 1948, amounted to £5,894,000 (provisional) and payments under Part V to £1,071,548 (provisional) for 1950–51.

The rateable value on which rates were leviable in England and Wales was in 1950–51, £330,978,000, and in 1949–50, £325,262,000, and in Scotland, £46,413,000 in 1950–51, and £45,139,000 in 1949–50.

In England and Wales the average amount of the rates collected per £ of rateable value was 6*s.* 8¾*d.* in 1913–14, and was estimated to be 17*s.* 6*d.* in 1949–50 and 17*s.* 9*d.* in 1950–51. In Scotland the estimated average amount per £ of rateable value of the rates, inclusive of water rates, in 1949–50 was 13*s.* 5*d.*, and in 1950–51 was 13*s.* 9*d.*

The rateable value of the County of London was £55,272,000 in 1949–50 and £55,989,000 in 1950–51. The net debt of the County of London on 31 March, 1949, amounted to £95,205,350. The expenditure for 1948–49 was £79,719,987. Of this £12,532,599 was met from Exchequer grants and £21,275,160 from rates. Education services of the L.C.C. for 1948–49 cost £20,960,705. The expenditure for 1948–49 also included £8,326,935 for housing.

Hicks (U. K.), The Finance of British Government, 1920–36. London, 1938.

Defence.

All problems of defence are considered by the Defence Committee presided over by the Prime Minister and consisting of Ministers of the

Government, amongst whom are the Ministers of Defence, of Supply and of Labour, the Chancellor of the Exchequer and the Secretaries of State for the navy, the army and the air force. This committee is advised by the chiefs-of-staff of the three services sitting in committee. The Minister of Defence is responsible to Parliament for carrying out the decisions of the Defence Committee.

I. Army.

Army estimates, 1947–48, were £388,000,000; 1948–49, £311,966,130, 1949–50, £304,700,00; 1950–51, £299,000,000; 1951–52, £418,800,100.

The control of the British Army is vested in the Army Council. The Secretary of State for War is the President of the Army Council, and is responsible to His Majesty the King and to Parliament for all the business of the Army Council.

The Military Members of the Army Council are the Chief of the Imperial General Staff, the Adjutant-General to the Forces, the Quartermaster-General to the Forces, the Vice-Chief of the Imperial General Staff and the Deputy-Chief of the Imperial General Staff. The Chief of the Imperial General Staff deals, through the Vice-Chief, with military operations, training and intelligence, and through the Deputy-Chief, with war organization, equipment and weapons. The Adjutant-General is responsible for the raising and [illegible] of the Army (including the Auxiliary Territorial Service, now [illegible] Women's Royal Army Corps), for personnel questions, discipline, welfare, military and martial law, education, leave, medical services and the planning of demobilization. The Quartermaster-General is responsible for the feeding and quartering of the Army; all military movement, including the R.A.F.; the holding, issue and repair of equipment and vehicles; the supply and delivery of ammunition; the provision, holding and issue of stores; rehabilitation, upkeep and operation of military ports, railways and inland water transport; supply and delivery of petroleum products; provision and operation of transport; works services (including building, repair and upkeep of buildings, making and repair of roads); barrack services; canteen services; mail; military labour and civil labour in overseas theatres; salvage; fire service; army agricultural scheme; veterinary and remount service; certain services for the R.A.F. in an overseas theatre. The corps under the Quartermaster-General include: Royal Engineers (transportation, movement control and works services), R.A.S.C., R.A.O.C., Army Catering Corps, R.E.M.E., Pioneer Corps, Veterinary Corps.

In 1939 the responsibility for the production of ordnance stores, *e.g.* arms, ammunition, vehicles, [illegible], was transferred from the Master General of the Ordnance to the Ministry of Supply. The responsibility for deciding types and numbers of stores is, however, still retained by the Army Council.

The Army is organized into commands and districts as follows:—Scottish Command (H.Q. Edinburgh), Northern (York), Southern (Salisbury), Eastern (Hounslow) and Western Command (Chester); London District (London) and N. Ireland District (Lisburn). There are three chief commands overseas: Middle East Land Forces, Far East Land Forces and the British Army of the Rhine.

The National Army of Britain consists of a regular or field army and a Territorial Army. The field army comprises (*a*) regular soldiers who have engaged voluntarily for 12 years (which may be extended); or 7 years with the colours and 5 years with the reserve, or 5 years with the colours and 7 years with the reserve; and (*b*) national servicemen who are called up at 18 years of age for 2 years compulsory training.

The Territorial Army is made up of (*a*) experienced men who have engaged for 4 years (and sometimes re-engage for one or more further terms of 4 years) to be leaders and instructors of the force; and, after June, 1950, (*b*) national servicemen who have completed their 2 years' service in the field army and have passed on to do 4 years compulsory Territorial service during which they can be required to undergo training for periods of 20 days in each of the first 3½ years, with no training in the last year provided they have completed their training obligations.

The Supplementary Reserve, consisting mainly of technical or specialized units, came into being again in 1950. It will be maintained by the voluntary enlistment of civilians for periods of 4 years and by National Service men directed to it instead of to the T.A. for their part-time service. About 1 in 4 men will be so directed. This reserve will be composed of two categories; S.R. I with liability for service at home and overseas in a peace-time emergency short of war; and S.R. II with liability to be called up on threat of war. The S.R. will generally do 15 days training supervised by Regulars annually; they will receive bounties of varying amounts together with army pay and allowances during training. Broadly speaking the S.R. is designed to complete units and formations to strength in technical and trade personnel on mobilization.

The Women's Royal Army Corps (late Auxiliary Territorial Service) consists of (*a*) regulars who engage for 4 years (which can be extended by successive re-engagements until pensionable age is reached after 22 years service), (*b*) Territorials, (*c*) a Supplementary Reserve. The W.R.A.C. employments include artillery, searchlight and radar work in anti-aircraft mixed batteries, and signals, motor transport, clerical, catering and other duties.

The Regulars are the hard core of the field army, the main strength of distant overseas garrisons, instructors and trainers of National Servicemen and Territorials, and highly trained troops who master new weapons, translate novel training and tactical doctrines into military fact, and maintain and raise standards of army performance. They also provide the Royal Army Reserve of experienced men who will return to the colours immediately on mobilisation. The National Servicemen are the greater part of the field army and the nearer overseas garrisons and the trained soldiers who will fill the ranks of the Territorial Army after 1 April, 1951.

The Territorial Army on mobilisation will provide most of the anti-aircraft defence of the United Kingdom and specialist and ancillary services for the field army. It is composed of 5 A.A. groups, 1 airborne, 2 armoured, and 6 infantry divisions, certain independent brigades (of which one is in Northern Ireland) and other formations. On 1 Dec., 1950, the total strength of the T.A. (all volunteers) was 77,206 excluding over 12,000 W.R.A.C.).

On 1 April, 1950, the maximum numbers to be maintained for army service (field army, excluding T.A.) are: Garrisons in Europe (including the U.K.) 28,500 officers and 307,700 other ranks; garrisons outside Europe 10,300 officers and 160,500 other ranks. With 10,000 on release leave on 1 April, and 1,000 officers and 9,000 other ranks for possible excesses, these figures give a grand total of 527,000. Of that total 6,700 are members of the W.R.A.C., and 1,700 Q.A.R.A.N.C., and 65,500 are Colonial and Gurkha (*i.e.*, the historic 2nd, 6th, 7th and 10th Gurkha Rifles, each of 2 battalions).

II. Navy.

The Royal Navy is a permanent establishment, [illegible] by the Board of Admiralty. The First Lord of the Admiralty [illegible] Minister responsible for the Navy, the other 10 members of the Board comprising the First Sea Lord and Chief of Naval Staff; the Second Sea Lord and Chief of Naval Personnel; the Third Sea Lord and Controller; the Fourth Sea Lord and Chief of Supplies and Transport; the Fifth Sea Lord and Deputy Chief of Naval Staff (Air); the Vice-Chief of Naval Staff; the Assistant Chief of Naval Staff; the Parliamentary and Financial Secretary; the Civil Lord; the Permanent Secretary. All these are known as 'Commissioners for executing the office of Lord High Admiral of the United Kingdom.' The office was first put into commission by Charles I when the Lord High Admiral, the Duke of Buckingham, was assassinated at Portsmouth in Aug., 1628. James, Duke of York, afterwards James II, was the last Lord High Admiral to command at sea in 1672. The last holder of the office was William, Duke of Clarence, afterwards William IV, since whose time it has been in abeyance, but Letters Patent are still vested in the Crown.

Ships under construction at the end of the financial year 1950–51 included the large fleet aircraft carrier *Ark Royal*, launched 3 May, 1950, displacement 36,800 tons; the light fleet aircraft carriers *Albion*, *Bulwark*, *Centaur* and *Hermes*, all of 18,300 tons, and 8 destroyers of the 'D' class, 2,610 tons. Constructional work is still suspended on 3 other light carriers of 14,000 tons, the *Hercules*, *Leviathan* and *Powerful*, and 3 cruisers of 8,000 tons, the *Blake*, *Defence* and *Tiger*, nominally under construction but all laid up.

The Navy estimates for 1947–48 totalled £196,700,000, for 1948–49, £153,000,000, for 1949–50, £189,250,000, for 1950–51, £203,000,000 (including supplementary estimates), for 1951–52, £278,500,000.

For 1947–48 the total naval personnel provided for was 192,665, for 1948–49, 167,300 (including 8,000 W.R.N.S.), for 1949–50, 153,000, for 1950–51, 143,000, for 1951–52, 143,500 officers and ratings.

The 1951–52 Navy Estimates provided for the building of 4 fast frigates of a new design and 41 minesweepers.

The *Eagle*, the largest aircraft carrier ever built in Great Britain, was completed in 1951, after having been under construction for 8½ years.

Summary of the Royal Navy.

The following is a summary of the more important units :—

Category	Completed by the end of				
	1946	1947	1948	1949	1950
Aircraft carriers	16	14	12	12	12
Battleships	15	10	5	5	5
Cruisers	41	36	28	25	25
Destroyers	186	177	111	106	104
Submarines	99	81	67	62	56

There are also 162 frigates, 2 monitors, 3 fast minelayers, 2 aircraft maintenance ships, 20 sea-going depot and repair ships, 60 fleet minesweepers, 4 midget submarines and a large number of landing craft, motor torpedo boats, surveying vessels, motor minesweepers, trawlers and auxiliaries.

Two destroyers, the *Relentless* and *Rocket* have been converted into fast frigates, and 5 'V' class destroyers are being similarly converted.

The ferry carrier *Campania* is lent to the Festival of Britain for about 2 years as a travelling exhibition ship.

In the following table the principal warships are grouped in classes, in descending order of modernity.

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Turrets				
Year		Tons	Inches	Inches		21-in.		Knots
			Fleet Aircraft Carriers.					
1951	Eagle	36,800	?	—	16 4 5in.	—	152,000	31·5
1944	Implacable	23,000	?	—	16 4 5in.	—	148,000	32
1944	Indefatigable

(There are also the trials cruiser *Cumberland* and the ex-cruiser *Devonshire*, now cadets training ship.)

The destroyers of the Royal Navy are of the following classes:—'Weapon' class, 4; improved 'Battle' class, 8; 'Battle' class, 16; 'C' class, 26; 'Z' class, 8; 'W' class, 7; 'U' class, 8; 'T' class, 8; 'S' class, 1; 'R' class, 2; 'O' class, 4; 'P' class, 2; 'M' class, 5; 'N' class, 5. Displacements range from 1,540 to 2,400 tons.

Submarines are of three classes:—'A' class, 15; 'T' class, 21; 'S' class, 20; surface displacements range from 715 to 1,120 tons.

111 warships of the Royal Navy have been transferred to other navies since 1945. These comprise 2 aircraft carriers, 1 cruiser, 21 destroyers, 32 frigates and 20 submarines to foreign [illegible] aircraft carriers, 3 cruisers, 14 destroyers and 16 frigat[illegible] Governments.

III. Air Force.

In May, 1912, the Royal Flying Corps first came into existence. On 2 Jan., 1918, an Air Ministry was formed, and the control of the air force was vested in an Air Council analogous to the Army Council. The Air Minister was given the status of a Secretary of State and became President of the Council. In April, 1918, the Royal Flying Corps and the Royal Naval Air Service were amalgamated, under the Air Ministry, as the Royal Air Force.

The Royal Air Force is administered by the Air Council, of which the Secretary of State for Air is president. It consists of 6 permanent and 3 additional members. The Air Members include the Chief of Air Staff, the Air Member for Personnel, the Air Member for Supply and Organization and the Air Member for Technical Services. The Chief of the Air Staff is the principal adviser of the Secretary of State in the direction of the Royal Air Force, and is responsible for policy and planning, and [illegible]ciency. The Air Member for Personnel is responsible for manpower, [illegible] of service and welfare. The Air Member for Supply and O[illegible] sponsible for the provision of all technical supplies, barrack [illegible], [illegible]plies and works services. The organization side includes movements, planning of aircraft requirements, aircraft and mechanical transport establishments. The Air Member for Technical Services is responsible for technical training and for the control, co-ordination and direction of the technical services, viz., engineering, armament and the technical aspects of signals.

The major departments of the Air Ministry are each under a member of the Air Council.

The Royal Air Force is organized into commands under the Air Council as follows:—

Home Commands.—Bomber, Fighter, Coastal, Transport, Flying Training, Technical Training, Maintenance, and Home Command.

Overseas Commands.—British Air Forces of Occupation (Germany); the Middle East Air Force (H.Q. Ismailia), and the Far East Air Force (H.Q. Changi).

Home Command includes the Royal Auxiliary Air Force (although the operational control of flying squadrons was transferred to Fighter Command in Nov., 1942), the R.A.F. Reserve (which incorporates the Volunteer Reserve and the University Air Squadrons) and the Air Training Corps with more than 700 squadrons. It is also responsible for training in R.A.F. Sections of the Combined Cadet Corps.

Commands are subdivided into groups and wings, a certain number of squadrons being allotted to each group or wing. Squadrons are subdivided into flights.

In addition to the flying training [illegible] at home, an Air Training Group was established in Southern Rhodesia in Jan., 1947. An R.A.F. Flying College was established in Jan., 1950, to take over certain functions of the Empire Flying School, the Empire Air Navigation School and the Empire Air Armament School, and a R.A.F. [illegible] was established in Oct., 1949, to take over certain functions of the Empire Radio School, the Empire Air Armament School and former Engineering School. In Jan., 1951, the training of R.A.F. pilots and navigators by the Royal Canadian Air Force in Canada was instituted.

At the end of June, 1945, the strength of the Royal Air Force was 963,000 men and 153,000 women. The effective strength by March, 1952, is expected to be 255,000 compared with 230,000 in March, 1951, and 202,000 in March, 1950.

Under the Army and Air Force (Women's Service) Act 1948 the commissioning and enlistment of women in the R.A.F. for non-combatant service, under substantially the same conditions as for men, and with the collective title of Women's Royal Air Force, commenced on 1 Feb., 1949. The entry of women into the Women's Auxiliary Air Force ceased from the same date.

Many measures have been introduced to make the Service an attractive career. There are 5 main branches: General Duties (Flying), Technical, Secretarial (including Accounts), Equipment and the R.A.F. Regiment. Other branches include: Provost, Catering, Marine, [illegible] Airfield Construction, Fighter Control, Education, Legal, Chaplains, Medical and Dental.

Normally, commissions are granted after service in the ranks, but [illegible] from the R.A.F. College and University graduates may be [illegible] to permanent commissions, and professionally qualified [illegible] short service commissions. National Servicemen may elect to be considered for airmen training as pilots and navigators, air signallers, air engineers and air gunners, or train for a commission in a ground branch.

Under a scheme introduced early in 1950, National Service airmen may extend their current service to a total of 3 or 4 years on a regular engagement and National Servicemen may enlist at any time after registration for 3 or 4 years regular service. The minimum regular engagement for airmen in ground branches (other than National Service airmen) is 5 years.

Air estimates for 1951–52 provided for a net total of £328.750,000.

Production and Industry.

I. Agriculture.

General distribution of the surface (1950) :—

Divisions	Total land surface	Rough grazing land	Permanent pasture	Arable land
	Acres	Acres	Acres	Acres
England [1]	32,033,000	2,573,000	9,014,000	12,873,000
Wales [1]	5,099,000	1,396,000	1,482,000	1,077,000
Scotland	19,069,000	10,924,000	1,189,000	3,210,000
Isle of Man	141,000	46,000	13,000	64,000

[1] England excludes and Wales includes Monmouth.

Distribution of the cultivated area in Great Britain :—

	England and Wales		Scotland	
	1949	1950	1949	1950
Cultivated area :	Acres	Acres	Acres	Acres
Corn crops [1]	6,460,217	6,750,711	1,171,385	1,162,209
Green crops [2]	2,362,111	2,296,552	576,241	576,323
Hops	22,240	22,154	—	—
Small fruit [3]	48,418	51,170	9,022	10,071
Orchards [3]	268,523	272,524	1,253	1,428
Bare fallow	300,840	260,335	7,938	8,241
Clover and rotation grasses [4]	3,696,298	3,558,752	1,452,605	1,441,666
Permanent pasture	10,456,464	10,496,120	1,188,232	1,188,972
Total	23,615,111	23,708,318	4,406,679	4,388,910

[1] Includes wheat, barley, oats, mixed corn and rye, for threshing.
[2] Green crops in England and Wales include beans, peas, potatoes, turnips and swedes mangolds, sugar beet, cabbage (for fodder, etc.), vetches or tares, and other crops. For Scotland, beans, peas, potatoes, turnips and swedes, mangolds, sugar beet, cabbage (for fodder etc.), rape, vetches, etc., carrots, onions, flax and other crops, mashlum and kale.
[3] The figures for small fruit in all cases include small fruit in orchards.
[4] Including lucerne.

The number of workers employed in agriculture in Great Britain was, in June, 1949, 855,000 (720,000 males, 136,000 females), and in 1950, 843,000 (716,000 males, 127,000 females).

In 1950, in the United Kingdom, land under the plough amounted to 18·4 million acres (crops and fallow, 12·8 million acres; temporary grassland, 5·6 million acres). Permanent grassland amounted to 12·8 million acres.

Livestock in the United Kingdom as at June in each year shown (in thousands) :—

	1946	1947	1948	1949	1950
Cattle	9,629	9,567	9,806	10,214	10,620
Sheep	20,358	16,713	18,164	19,493	20,130
Pigs	1,955	1,628	2,151	2,823	2,986
Horses	834	778	703	618	519
Poultry	67,117	70,006	85,372	95,499	96,109

Details of the principal crops are given in the following table for the United Kingdom as at June in each year :—

Year	Wheat	Barley	Oats	Beans [1]	Peas [1]	Potatoes	Turnips and swedes	Mangold [1]	Sugar beet
				Acreage (thousands of acres)					
1946	2,062	2,211	3,567	183	36	1,423	757	304	436
1947	2,163	2,060	3,308	87	36	1,330	725	272	395
1948	2,279	2,083	3,335	88	45	1,548	666	281	413
1949	1,963	2,060	3,252	110	56	1,308	644	275	421
1950	2,479	1,778	3,105	117	37	1,235	599	277	429
				Total produce (thousands of tons)					
1946	1,967	1,963	2,903	124	21	10,166	11,011	6,282	4,522
1947	1,667	1,619	2,509	46	19	7,766	9,249	4,342	2,960
1948	2,361	2,027	2,963	70	27	11,798	9,778	5,918	4,319
1949	2,204	2,129	2,995	89	24	9,035	9,190	5,321	3,962
1950 [2]	2,520	1,595	2,617	97	25	9,637	9,126	6,352	5,209

[1] Fodder crops. [2] Provisional figures.

For the quantities of cereals and livestock imported *see* under COMMERCE

II. Fisheries.

Quantity and value of wet fish of British taking landed in Great Britain during 1946-50 (excluding salmon and sea-trout) :—

	1946	1947	1948	1949	1950 [1]
	Tons	Tons	Tons	Tons	Tons
England and Wales . .	632,888	694,687	722,000	708,742	629,911
Scotland . . .	267,462	299,078	320,331	292,947	252,798
G.B. (excluding shell-fish)	900,350	993,765	1,042,331	1,001,689	882,709
	£	£	£	£	£
England and Wales . .	28,639,292	31,005,924	33,809,691	29,481,857	26,299,182
Scotland . . .	9,565,728	10,507,635	11,608,384	10,308,398	9,404,966
G.B. (excluding shell-fish)	38,205,020	41,513,559	45,418,075	39,790,255	35,704,148
Value of shell-fish .	1,350,568	1,251,323	1,409,000	1,275,041	975,991

[1] Preliminary figures.

III. Mining and Metals.

The total number of persons (including clerks and salaried persons) ordinarily employed at all mines in Great Britain under the Coal and Metalliferous Mines Regulation Acts in 1938 was 814,000. The number of mines at work was 2,409; 630,591 persons (males) worked underground, and 181,069 males and 3,240 females (including clerks and salaried persons) above ground. The average number employed at quarries under the Quarries Act in 1938 was 76,128, of whom 49,543 worked inside the quarries and 26,585 outside. The number of quarries at work was 5,099.

	1947	1948	1949	1950
Saleable output of coal :				
Total deep-mined (1,000 tons) . .	186,501	196,722	202,658	204,127
Opencast (1,000 tons)	10,245	11,748	12,110	12,185
Average weekly number of wage-earners on colliery books :				
All workers	711,380	724,030	719,527	697,030
Face workers . . .	287,936	292,759	296,197	288,137
All underground workers . .	549,596	562,101	558,377	538,877
Coal exports :				
Total (1,000 tons) . .	1,057	10,505	13,916	13,552
Foreign bunkers (1,000 tons)	4,391	5,430	5,051	3,982

In the year 1950, inland consumption of coal at home is estimated to have been 202,176,000 tons, some of the principal uses being :—Railways, 14,560,000 tons; gas works, 26,208,000 tons; coke ovens (coal carbonized), 22,516,000 tons; iron works, manufacture of pig-iron and steel, 8,320,000 tons; collieries (engine fuel), 10,712,000 tons; electricity generating stations, 32,916,000 tons; domestic (house coal), 30,212,000 tons; general manufacturing, 36,244,000 tons.

The chief coal tar products obtained in 1949 were road tar, 648,000 tons (742,000 tons in 1948); creosote, 425,000 tons (310,000 tons in 1948); creosote oil, 106,000,000 gallons (103,000,000 gallons in 1948); pitch, 643,000 tons (624,000 tons in 1948).

Production of coal gas (thousand million cu. ft.) in 1950 was 384·8 (372·3 in 1949); water gas, 84·76 in 1950 and 77·48 in 1949.

For the general summary of the mineral production of Great Britain in 1938, *see* The Statesman's Year-Book, 1948, p. 57.

Iron ore produced in 1948 amounted to 13,104,000 tons, in 1949 to 13,416,000 tons and in 1950 to 12,948,000 tons. Iron ore imported

amounted to 8,676,726 tons in 1948, 8,689,921 tons in 1949 and 8,402,038 tons in 1950. The exports of British iron ore are insignificant.

The total number of steel furnaces in existence in 1949 was 732 (including open-hearth, 425; electric, 196, and tropenas, 83); average number of furnaces on blast, 1949, was 101 (102 in 1948).

For statistics of blast furnaces (pre-war), *see* STATESMAN'S YEAR-BOOK, 1946, p. 59.

Pig-iron produced in 1948 amounted to 9,256,000 tons, in 1949 to 9,516,000 tons and in 1950 to 9,620,000 tons.

The total output of steel ingots and castings in 1938 amounted to 10,393,800 tons, in 1949 to 15,548,000 tons and in 1950 to 16,276,000 tons.

The total output of finished steel products in 1938 was 7,491,400 tons. Net deliveries of finished steel in 1949, 11,596,000 tons and in 1950, 12,320,000 tons. Total iron and steel and manufactures thereof exported in 1938 was 1,915,875 tons, valued at £41,692,019; in 1950, 3,090,346 tons, valued at £156,071,278.

For statistics of metal production (pre-war) see THE STATESMAN'S YEAR-BOOK, 1948, p. 56.

Production of non-ferrous metals in 1950 amounted to :—Refined copper, 190,800 tons (192,000 tons in 1949); refined lead, 72,720 tons (35,880 tons in 1949); virgin tin, 28,440 tons (1949); virgin aluminium, 29,520 tons, refined nickel, 17,100 tons (1948).

Statistics of the shale oil industry are as follows:—Output of shale in 1938 was 1,551,000 tons, valued at £564,000. About 33,000,000 gallons of crude oil and crude naphtha and 25,200 tons of sulphate of ammonia were produced. Output of crude shale-oil in 1949 was 112,500 tons. Production of indigenous crude petroleum in 1949 was 45,500 tons (43,500 tons in 1948).

IV. INDUSTRIES.

The following table summarizes, for Great Britain and Northern Ireland, the statistics relating to the Census of Production, 1935 (no later general census has been taken), for the principal industries :—

Industry	Gross output £'000	Cost of materials £'000	No. of persons employed (average)	Mechanical power available [1] 1,000 n.p.
Iron and steel	420,574 [2]	257,058 [2]	635,651 [2]	3,151·2
Engineering, shipbuilding & vehicles	473,639	229,646	1,061,671	2,025·1
Non-ferrous metals	104,767	74,842	119,257	326·0
Textiles	516,769 [2]	340,181 [2]	1,075,553 [2]	2,772·4
Leather	33,288	22,668	48,294	78·2
[illegible]	171,997	91,698	515,700	123·7
[illegible] tobacco	652,563	396,529	505,621	745·3
Chemicals, etc.	191,792	101,517	191,080	852·3
Paper, printing, etc.	181,066	69,007	400,736	778·6
Timber	68,722	36,175	167,350	279·8
Clay and building materials	83,522	29,795	245,792	575·7
Building and contracting	187,561	101,078	434,374	223·3
Mines and quarries	165,624	29,423	840,635	3,913·3
Public utility services & govt. debt	338,222	135,848	783,432	11,263·4
Miscellaneous	89,814	47,015	178,893	408·9
Total, all trades	3,464,300	1,801,017	7,076,593	27,517·2
England and Wales	3,112,829	—	6,290,878	24,078·5
Scotland	290,912	—	646,449	3,099·3

[1] 1930 census. [2] 1937 census.

V. Power (Water, Gas and Electricity).

The available water-power resources of Great Britain are estimated to be 850,000 B.H.P., of which 250,000 B.H.P. are developed (1927).

Gas manufactured (provisional figures) (millions of cubic feet), 1950: coal gas, 384,800; water gas, 84,760. Gas bought from coke ovens, 62,920. Total gas available, 543,400. In 1950, coal used for gas production was 26,208,000 tons. The number of authorized gas undertakings in Great Britain (1947) was 677; non-authorized undertakings, 387.

The electricity industry was vested in the British Electricity Authority on 1 April, 1948. At Dec., 1948, authorized undertakings, including the Central Electricity Board, owned or leased 348 generating stations containing an aggregate of 12,951,000 kw. of generating plant. Total number of consumers 1947–48, 11,917,000.

Electricity generated amounted to 47,736 million kwh. in 1949 and 54,960 million kwh. in 1950. Coal used for electricity generation in 1949 amounted to 30,004,000 tons; 32,916,000 tons in 1950.

Commerce.

Value of the imports and exports of merchandise (excluding bullion and specie and foreign merchandise transhipped under bond) of the United Kingdom for 5 recent years and 1938 (in £ sterling):—

Year	Total imports	Exports of British produce	Exports of foreign and colonial produce	Total exports
1938 . .	919,508,933	470,755,320	61,524,646	532,279,966
1946 . .	1,301,029,676	914,698,966	50,268,650	964,967,616
1947 . .	1,794,540,160	1,138,276,478	59,839,223	1,198,075,045
1948 . .	2,078,040,435	1,582,867,453	63,627,643	1,646,495,096
1949 . .	2,274,138,240	1,786,395,271	58,049,921	1,844,445,192
1950[1] . .	2,602,945,396	2,170,085,836	84,962,547	2,255,048,383

[1] Provisional.

The value of goods imported is generally taken to be that at the port and time of entry, including all incidental expenses (cost, insurance and freight) up to the landing on the quay. For goods consigned for sale, the market value in this country is required and recorded in the returns. This is ascertained from the declaration made by the importers, and is checked by the expert knowledge available in the Customs Department, with the help of current price-lists and market reports. For exports, the value at the port of shipment (including the charges of delivering the goods on board) is taken. Imports are entered as from the country whence the goods were consigned to the United Kingdom, which may, or may not, be the country whence the goods were last shipped. Exports are credited to the country of ultimate destination as declared by the exporters.

Included in the exports for 1950 were:—Iron and steel manufactures, 3,090,346 tons, value £156,071,278 (2,382,670 tons in 1949); cotton piece-goods, 822 million square yards, value £100,258,799 (904 million square

yards in 1949); artificial silk and manufactures, 199 million square yards, value £32,811,143 (167 million square yards in 1949); cotton yarn, 9,340,700 lb., value £3,896,659 (7,679,000 lb. in 1949).

Trade according to countries for 1949 and 1950 (in £'000) :—

Communications.

I. Shipping.

The total gross tonnage of merchant vessels (500 gross tons and over) on the United Kingdom register (excluding foreign owned vessels on bareboat charter or requisition) was, on 31 Jan., 1951, 19,604,000 gross tons (non-tankers, 15,434,000 gross tons); tankers, 4,170,000 gross tons).

Output in merchant shipbuilding in 1949 (all vessels of 100 tons and over): total number 332 of 1,301,000 gross tons, including 42 tankers (380,000 gross tons) and 167 passenger and cargo boats (885,000 gross tons). In 1950 the total tonnage (1,000 gross tons) of merchant shipbuilding laid down was, 1,357; under construction, 1,861, and completed, 1,376. At the end of 1950, there was a further 1,575,000 gross tons of shipping on order but not yet laid down.

The total net tonnage of entrances at ports of the United Kingdom with cargoes during 1950 was 57,500,629 (including 36,003,106 tons, British); total clearances were 45,273,879 net tons (including 31,509,696 tons, British). Of the foreign tonnage, 21,497,523 tons, entered:—United States had 2,655,614; Norway, 3,512,636; Sweden, 2,642,040; Holland, 3,084,945; Denmark, 1,624,146; Belgium, 1,181,358; France, 1,757,867.

In 1938, total entrances, 63,372,392 tons; clearances, 58,881,246 tons.

The total net tonnage of British and foreign vessels employed in the coasting trade that arrived at ports in the United Kingdom with cargo in 1950 was 31,167,128 tons (31,153,168 tons in 1949); departures amounted to 30,789,186 tons (30,791,193 tons in 1949).

II. Canals.

The total length of canals in the United Kingdom in 1905 was 4,673 miles, of which 3,641 miles were in England and Wales, 184 in Scotland and 848 in Ireland. It is estimated that in 1951 there are approximately 2,400 miles of navigable canals and locked river navigations in the United Kingdom, of which some 1,766 miles, open for traffic, belong to the British Transport Commission.

Statistics of canal traffic on waterways coming under the British Transport Commission, covering about 90% of total traffic, for the year ending 1 Jan., 1951:—

Division.	Tonnage originating.	Net ton miles.
	Thous.	Thous.
North Eastern	4·932	103·236
North Western	1·621	23·592
South Eastern	3·295	33·820
South Western	1·851	32·318
Scottish	103	1·438
Total	11·802	194·404

Manchester, one of the leading ports in the United Kingdom, was opened to maritime traffic in 1894 by the construction of the Manchester Ship Canal, which is 35½ miles in length. Between Eastham and Stanlow Oil Docks the waterway has been excavated to a depth of 30 ft.; from Stanlow Oil Docks to Manchester to 28 ft. The general excavated bottom width of the canal at the depth of 28 ft. is 120 ft., except for ¾ mile near Latchford, where it is 90 ft. The maximum width of the locks is 65 ft., with the exception of the entrance lock, which is 80 ft. wide. The canal is in direct communication with all the principal railway systems and barge canals of the kingdom.

The total issued capital of the company at 31 December, 1948, was £18,848,230. The net receipts of the canal in 1948, including the Bridgwater department and the railways, amounted to £943,101 (£872,138 in 1947).

Owen (Sir D. J.), The Ports of the United Kingdom. Rev. ed. London, 1949.

III. Railways, Tramways, Aviation and Highways.

The following table shows railway statistics for Great Britain, excluding the railways of the London Transport Executive :—

Calendar year	Road open for traffic at end of year	Passenger journeys originating	Freight train traffic originating
	Miles	Millions	Million tons
1949 . . .	19,573	993	280
1950 . . .	19,471	982	281

Nationalization.—Under the provisions of the Transport Act, 1947, the four main line railways, together with their associated lines, docks, steamships and hotels, the London Passenger Transport Board, and the major canal [illegible] passed on 1 January, 1948, into the ownership of the British [illegible] Commission, as the instrument of the State.

Day to day operation and management is in the hands of five executives known as (*a*) Railway, (*b*) Docks and Inland Waterways, (*c*) London Transport, (*d*) Road Haulage and (*e*) Hotels Executives. The Road Passenger Executive came into operation on 8 Aug., 1949.

Railways.—The system, under the name of British Railways, is organized in six regions. There are: *The London Midland Region*, corresponding to the system of the former L.M.S.R. company in England and Wales, with headquarters at Euston station. *The Western Region*, corresponding to the system of the former G.W.R. company, with headquarters at Paddington station. *The Southern Region*, corresponding to the system of the former S.R. [illegible] with headquarters at Waterloo station. *The Eastern Region*, [illegible] to the southern area of the former L.N.E.R. company (roughly from Doncaster to Leeds and London), with headquarters at Liverpool Street station. *The North Eastern Region*, [illegible] to the north eastern area of the former L.N.E.R. company (fr [illegible] to Berwick), with headquarters in York. *The Scottish Region*, corresponding to the Scottish systems of the former L.M.S.R. and L.N.E.R. companies, with headquarters in Glasgow.

While responsibility for the general administration of the regions and for co-ordination, standardization, and other matters of principle rests with the Executive, undue centralization is avoided by the delegation to regional officers of responsibility for matters of local importance.

In 1950 the total goods traffic amounted to 281·3 million tons, including merchandise and livestock, 54·0 million tons; minerals, 60·3 million tons; coal, coke, etc., 167·0 million tons. Available operating stock, 1950, included 15,974 locomotives available for traffic; passenger carrying vehicles, 38,474 available; trucks and wagons, 1,031,007 available.

The Commission's gross receipts for the year 1950 from its principal carrying activities amounted to £519,233,651, made up as follows:—British

Railways, £340,070,298; road collection and delivery etc. services of British Railways, £9,560,472; British road services, £62,473,177; Road Passenger Transport (Provincial and Scottish), £38,673,331; London Transport, £56,350,683; ships, £11,412,052; and inland waterways carrying operations, £693,638. The gross receipts from other principal activities was £33,179,980. The deficit at 31 Dec., 1949, on the net revenue account after allowing for capital redemption and special items was £20,761,233.

The London Transport Executive, in Dec., 1950, owned 223 route miles of railway open for traffic. Number of vehicles operated (1950):—Railway, 4,014 (including 2,373 electric motor vehicles, trailer cars, and 1,641 carriages); buses and coaches, 7,694; trams, 718; trolley-buses, 1,763. Total number of miles run (1950) was 656 million miles. The number of passenger journeys originating, in 1950, was:—Railway, 631 million; bus and coach, 2,718 million; trolley-bus and tram, 1,124 million. Average receipt per originating passenger was 2·98*d.* in 1950.

Road Transport.—Motor vehicles for which licences were current under the Vehicles (Excise) Act, 1949, numbered, in Nov., 1950, 4,321,455, including 2,222,389 cars; 715,146 cycles and pedestrian controlled vehicles; 127,981 hackneys (excluding tramcars); 873,024 goods vehicles. The number of new vehicle registrations in 1950 was 417,721 (415,217 in 1949).

Civil Aviation.—On 1 Aug., 1946, the royal assent was given to the Civil Aviation Bill which authorized the setting up of three publicly owned corporations to operate, under the direction of the Minister of Civil Aviation, all British scheduled air services throughout the world. The corporations are the British Overseas Airways Corporation, British European Airways and British South American Airways.

Operating statistics for 1950 of regular services operated by United Kingdom airlines are as follows:—Aircraft miles flown, 48,228,000 (44,256,000 in 1949); revenue passengers carried, 1,155,600 (921,600 in 1949); freight carried, 21,660 tons (15,852 tons in 1949).

Air traffic between the United Kingdom and abroad in 1950 included 41,280 aircraft miles, carrying 669,600 passengers and 19,104 tons of freight.

Estimate of expenditure (including certain grants and subsidies) for civil aviation for year ending 31 March, 1952, amounted to £17,957,000 (£21,180,000 in 1950–51).

The total number of civil aircraft registered in the United Kingdom at Dec., 1949, was 2,227 (including, regular airlines, 194; charter companies, 429; private and business, 628; club [illegible], 26). The total number of civil aircraft with certificates of airworthiness was 1,352 (regular airlines, 187; charter companies, 296; private and business, 448; club, 181).

Highways.—The public highways in Great Britain at 31 March, 1950, had a total length of [illegible] miles (England and Wales, 157,197 miles; Scotland 26,624 miles), of which 8,176 were trunk roads, 19,599 miles were Class I and 17,697 miles were Class II.

IV. Posts, Telegraphs and Telephones.

(Great Britain and Northern Ireland.)

Number of post offices at 31 March, 1950, approximately 24,200; number of road and pillar letter boxes other than at post offices, about 69,000; staff employed on 1 Feb., 1951, 333,587.

The telegraphs were transferred to the State on 5 Feb., 1870.

The total number of telegraph offices open on 31 March, 1950 (including railway and cable companies' offices, etc., which transact telegraph business), was approximately 14,000.

On 31 March, 1950, the London telecommunications regions system had 266 exchanges, 11,099 call offices and 1,682,816 telephones. In the provinces there were 5,600 exchanges, 45,044 call offices and 3,488,675 telephones. The approximate number of originated effective calls in 1949–50 was 3,176 million. For private wires the accrued revenue in 1949–50 amounted to £7,761,250.

The number of sound broadcast receiving licens[illegible] year ended 31 March, 1950, was 11,876,000, and the [illegible] for television broadcast receiving licenses was 344,000.

The approximate surpluses of income over expenditure (after charging interest on capital) and the estimated amount derived from the increases are as follows (in £ sterling):—

Year ended 31 March	Surplus	Yield of increases in charges—all sources	Year ended 31 March	Surplus	Yield of increases in charges—all sources
1945	39,850,000	34,600,000	1948	19,555,000	40,866,000
1946	36,140,000	34,700,000	1949	15,222,000	43,812,000
1947	24,110,000	38,300,000	1950	13,814,000	--

Banking and Credit.

[1] Including nickel-brass threepenny pieces. [2] Cupro-nickel.

The returns for imports and exports of coins are not now available.

During the year ended 31 Dec., 1950, the Mint produced 369,952,699 coins, of which 155,302,670 were imperial coins to the value of £8,555,545. The imperial coins included 28,335,500 half-crowns, 24,357,490 two-shilling pieces, 33,543,473 shillings, 32,741,955 sixpences, 1,600,000 nickel-brass threepenny pieces, 240,400 pennies, 24,153,600 half-pennies and 10,324,800 farthings. Estimated number of coins in circulation in the United Kingdom (in millions):—415 half-crowns, 450 two-shilling pieces, 538 shillings, 665 sixpences, 92 silver threepenny pieces, 449 nickel-brass threepenny pieces, 1,928 pennies, 869 half pennies, 264 farthings.

The Bank of England, Threadneedle Street, London, is the Government's banker and the 'banker's bank.' On behalf of the Government it manages the National Debt, administers the Exchange Control Regulations and manages the note issue; it does not accept new commercial business. The bank operates under royal charters of 1694 and 1946. The capital stock has, since 1 March, 1946, been held by the Treasury. The former

holders of Bank stock were given £58,212,000 3% Treasury stock in exchange.

The statutory return is published weekly. End-December figures for the past 5 years are as follows (in £'000) :—

Year	Issue department			Banking department				
	Notes issued	Securities	Gold coin and bullion	Capital and 'rest'	Deposits	Securities	Notes in the 'reserve'	Coin in the 'reserve'
1946	1,450,248	1,450,000	248	18,090	346,158	341,197	22,065	1,285
1947	1,450,248	1,450,000	248	18,130	429,086	316,438	100,516	262

1949	1,321,928	1,350,000	357	18,132	519,952	504,371	28,429	5,284
1950	1,357,679	1,375,000	357	18,123	414,237	413,191	17,678	1,491

The proportion of reserves to deposit liabilities at the end of Dec., 1950, was 4%.

Between 31 Dec., 1939, and 10 Dec., 1946, the fiduciary note issue rose from £580 million to £1,450 million, but was reduced to £1,300 million between Jan. and March, 1948. All the profits of the note issue are passed on to the Exchequer.

The average circulation of Scottish bank-notes during the 4 weeks ending 16 Dec., 1950, was £71,135,327 (including Clydesdale and North of Scotland Bank, £15,063,220, Commercial Bank of Scotland, £12,662,856). The authorised circulation for this period was £2,676,350.

Gold and dollar reserves (Exchange Equalization Account holdings of gold, U.S. and Canadian dollars) at 31 Dec., 1950, amounted to £1,178,000,000.

Bank [illegible] provincial clearings), for 1949, £86,060,000,000; for 1950, [illegible]

The following statistics relate to the eleven London clearing banks for the year ending 31 Dec., 1950 (monthly averages in £ millions):—Deposits, etc., 6,014 (5,974 in 1949); cash in hand and at the Bank of England, 497 (496 in 1949); money at call and notice, 550 (510 in 1949); investments, 1,505 (1,505 in 1949); advances, 1,603 (1,440 in 1949); bills discounted, 1,298 (914 in 1949); Treasury deposit receipts, 430 (983 in 1949).

In 1950 the 'Big Seven' clearing banks had a total of net profits of £9,892,662; dividends amounted to £5,733,266; there were allocations to published reserves of £1,950,000 and declared allocation to contingencies of £1,800,000.

Trustee Savings Banks.—Trustee Savings Banks originated in 1810. They are still conducted by voluntary Trustees who may receive no payment for their services. There are no shareholders or proprietors. The banks are supervised by the National Debt Commissioners and regularly inspected on behalf of a statutory committee. There are 84 Trustee Savings Banks in the United Kingdom and the Channel Islands with 1,151 offices. The number of depositors and stockholders in these banks on 20 Nov., 1950, was 7,174,752, and the amounts due to them were: in the General or Ordinary Departments, £793,736,478 cash, and £87,757,196 (face value) stock; in the Special Investment Departments, £115,179,318; due to depositors and stockholders, £996,672,992; combined surplus funds, £19,354,147; total funds, £1,016,027,139.

Post Office Savings Bank.—Statistics for 1948 and 1949 :—

Money, Weights and Measures.

The sovereign weighs 123·274 grains, or 7·98805 grammes, 916 (or eleven-twelfths) fine, and [illegible] it contains 113·001 grains or 7·32238 grammes of fine gold [illegible] weighs 87·27 grains or 5·6552 grammes, and down to 1920 was ·925 (or thirty-seven-fortieths) fine, thus containing 80·727 grains or 5·231 grammes of fine silver, but under the Coinage Act, 1902, the fineness was reduced to ·500 (one-half). The Coinage Act, 1946, however, provides for the replacement of silver coinage by coins of cupro-nickel of the same weight. Bronze coins consist of a mixture of copper, tin and zinc. The penny weighs 145·83 grains or 9·45 grammes. Threepenny pieces of nickel-brass were issued for the first time in 1937; they are legal tender up to 2*s.* The standard of v[illegible] the Coinage Act, 1870, silver is legal tender up to 40 [illegible] the Coinage Act, 1946, cupro-nickel to the same amount); bronze (pennies, half-pennies and farthings) up to 12*d.* Bank of England notes of £5 dated on or after 2 September, 1944, are legal tender in England and Wales, but not by the Bank itself (3 & 4 Will. 4, cap. 98, and 8 and 9 Vict., cap. 37 and 38). Bank of England notes of £1 and 10*s.*, issued under the Currency and Bank Notes Act, 1928, are legal tender in Scotland and Northern Ireland also, and for the payment of any amount, including payments by the Bank itself. The

Gold Standard Act, 1925, decreed that bank-notes were not redeemable in legal coin, but the Bank of England was obliged to sell gold at a fixed price in the form of bars. This latter provision was suspended by the Gold Standard (Amendment) Act, 1931. The total amount of notes issued at 21 March, 1951, was £1,350,356,823, of which £1,312,985,025 were in the hands of other banks and the public and £37,371,798 in the Banking Department of the Bank of England.

Standard units are: of length, the standard *yard*; of weight, the standard *pound* of 7,000 grains (the pound troy having 5,760 grains); of capacity, the standard *gallon*, containing 10 pounds avoirdupois of distilled water at 62° F., the barometer at 30 inches. On these units all other legal weights and measures are based.

NORTHERN IRELAND.

Constitution.

UNDER the Government of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922 (13 Geo. V, Ch. 2, Session 2), a separate parliament and executive government were established for Northern Ireland, which comprises the parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, and the parliamentary boroughs of Belfast and Londonderry. The Parliament consists of a Senate of 2 *ex-officio* and 24 elected persons and a House of Commons of 52 elected members. The Parliament has power to legislate for its own area, except in regard to (1) matters of Imperial concern (the Crown, making of peace or war, military, naval and air forces, treaties, titles of honour, treason, naturalization, domicile, external trade, submarine cables, wireless telegraphy, aerial navigation, lighthouses, etc., coinage, etc., trade marks, etc.), and (2) certain matters 'reserved' to the Imperial Parliament (postal service, Post Office and trustee savings banks, designs for stamps). The executive power is vested in the Governor on behalf of His Majesty the King: he holds office for six years and is advised by ministers responsible to Parliament. Senators, who are elected by members of the House of Commons on a proportional representation basis, hold office for a fixed term of years: the House of Commons continues for five years, unless sooner dissolved. The qualifications for membership of the Parliament are similar to those for membership of the Imperial House of Commons. By the Representation of the People Act (Northern Ireland), 1928, the franchise was conferred upon women upon the same terms as it had hitherto been enjoyed by men; and by the House of Commons (Method of Voting and Redistribution of Seats) Act (Northern Ireland), 1929, the system of Proportional Representation (under which the Parliaments which met in 1921 and in 1925 had been elected) was abolished, and Parliamentary Representation, except for the constituency of Queen's University of Belfast, was based upon single-member constituencies.

Northern Ireland now returns 12 members to the Imperial House of Commons instead of, as formerly, 13, the University constituency having been abolished in 1950.

Two Acts of the Imperial Parliament, passed in 1928 and 1932, modified, in certain details, restrictions placed on the powers of the Northern Irish Parliament by the Act of 1920. The legislative and administrative powers relating to Railways, Fisheries and the Contagious Diseases of Animals (originally intended for a Council of Ireland), were, under the Ireland (Confirmation of Agreement) Act, 1925, transferred to, and became, as from 1 April, 1926, powers of the Parliament and Government of Northern Ireland. The general subject matter of the Land Purchase Acts was 'reserved' by the Act of 1920, but the Imperial Government's land purchase scheme has been practically completed, the Land Purchase Commission for Northern Ireland being closed on 1 April, 1937. Further Acts passed by the Imperial Parliament in 1945 and 1947 extended the jurisdiction of the Parliament of Northern Ireland in matters relating to criminal law and procedure, schemes extending athwart the country's land frontier and in matters affecting transport services, health services and the transfer of publicly-owned property. Under the Act of 1947, provision was also made for the future transfer to local jurisdiction of the Northern Ireland Land Registry of Deeds and for the removal of some minor constitutional diffi-

culties which had tended to hinder the full and free exercise by the Parliament of Northern Ireland of its general legislative powers. With the extension of the Social Services in 1945 and 1946, power was conferred to make reciprocal arrangements with the Dominions as respects National Insurance and Family Allowances.

The Northern Irish Parliament met for the first time in June, 1921. At the election on 10 Feb., 1949, there were returned 37 official Unionists, 9 Nationalists, 3 Independent and non-party Unionists, 1 Independent Labour, 1 Socialist Republican and 1 Independent.

Members of the Senate (except those in receipt of salaries as members of the Government or as officers of the Senate) receive payment at the rate of £2 5*s. per diem* in respect of expenses for attendance at meetings of the Senate, Select Committees of the Senate, and Joint Committees of the Senate and House of Commons. Members of the House of Commons (including members of the Government) receive £300 per annum in respect of expenses. Members (except those in receipt of salaries as members of the Government or as officers of the House) also receive a salary of £200 per annum.

Governor.—Vice-Admiral the Earl Granville, K.C.V.O., C.B., D.S.O. Appointed 2 July, 1945; assumed office 7 Sept., 1945. Salary, £8,000 per year, payable from Imperial revenues (£2,000 being recoverable from Northern Ireland revenues).

The Ministry, all the members of which belong to the Ulster Unionist Party was, on 1 March, 1951, composed as follows :—

Prime Minister.—Rt. Hon. Sir Basil S. Brooke, Bart., C.B.E., M.C.
Minister of Finance.—Major the Rt. Hon. J. M. Sinclair.
Minister of Home Affairs.—Rt. Hon. W. B. Maginess, K.C.
Minister of Labour and National Insurance.—Major the Rt. Hon. Ivan Neill.
Minister of Education.—Rt. Hon. H. C. Midgley.
Minister of Agriculture.—Rev. the Rt. Hon. Robert Moore.
Minister of Commerce.—Rt. Hon. W. V. McCleery.
Minister of Health and Local Government.—Rt. Hon. Dame Dehra Parker, D.B.E.
Minister in the Senate.—Senator Lt.-Col. the Rt. Hon. A. R. G. Gordon.
Attorney-General.—Rt. Hon. J. E. Warnock, K.C.

The Prime Minister receives a salary of £2,850 per annum, the other ministers £1,700 each; in addition, they receive the members' expenses allowance of £300 per annum.

The usual channel of communication between the Government of Northern Ireland and the Imperial Government is the Home Office.

Ulster Agent in Great Britain.—Lieut.-Col. Sir Ronald Ross, Bt., M.C. (13 Regent St., S.W.1).

Local Government and Health Services.

The establishment of the Ministry of Health and Local Government in 1944, under the Ministries Act (Northern Ireland), 1944, resulted in the transfer to that Ministry from the Ministry of Home Affairs of functions in connexion with public health, housing and local government services. The Ministry also supervises the housing and planning activities of local authorities.

The 2 county borough councils and 6 county councils are responsible for the construction and maintenance of roads and other public works, and the

collection of rates, and are the education, health and welfare authorities within their respective areas.

The 6 counties include 32 rural districts, in each of which is a rural district council, which is the sanitary authority for the district, and is also responsible for such matters as labourers' cottages, burial grounds, etc. There are also under municipal government 9 boroughs and 24 urban districts as well as 3 towns which are not urban districts.

Under the terms of the Health Services Act (Northern Ireland) 1948, the main object of which is to provide a comprehensive health service for all, free of direct charge to the individual, two new bodies have been set up—the Northern Ireland Hospitals Authority and the Northern Ireland General Health Services Board. The expenditure of these two bodies is recouped by the Ministry. The main function of the Hospitals Authority is to provide an adequate hospital and specialist service for the community, and it now controls the former local authority hospitals such as district hospitals, county and union infirmaries and the great majority of voluntary hospitals. The last named, under the terms of the act, were at liberty to remain independent as before if they so desired. The General Health Services Board is responsible for the general medical, dental and pharmaceutical services, and the great majority of doctors, dentists and pharmaceutical chemists participate in the arrangements made by the Board for the provision of these services.

The County and County Borough Health Authorities established under the Public Health and Local Government (Administrative Provisions) Act (Northern Ireland), 1946, are responsible for personal health services—as distinct from environmental health or sanitary services—and their functions include maternity and child welfare, domiciliary midwifery, home nursing, vaccination, health education and school health services. These services were formerly administered by the councils of county borough, borough, urban and rural districts and by boards of guardians. A grant of 50% of the approved net expenditure of Health Committees is payable by the Ministry, while a grant amounting to 65% is payable in respect of expenditure on the school health service. The latter grant is payable under the terms of the Education Act (Northern Ireland), 1947. In addition, County and County Borough Health Authorities are also the food and drug authorities.

Functions in regard to environmental health or sanitary services remain to a large extent with the councils of borough, urban and rural districts, although the sanitary officers concerned are employed directly by the Health Committees to whom the councils, in recognition of the services rendered on their behalf, recoup part of the sanitary officers' salaries. Expenditure on these services is not grant-aided by the government.

The Mental Health Act (Northern Ireland), 1948, provides the legislative framework for a comprehensive mental health service to be administered by the Northern Ireland Hospitals Authority in close co-operation with the general scheme of health services. It repeals and re-enacts with amendments the Mental Treatment Act (Northern Ireland), 1932, and introduces a complete departure from the mental treatment principles existing in most countries, in that it specifies that no patient being admitted to a mental hospital will in future require to be certified by a magistrate's order, although where prolonged detention is subsequently found to be necessary such an order must eventually be obtained. The existing provisions of the 1932 act, whereby a person can be admitted to a mental hospital on a voluntary basis, are continued and extended. The act provides a scheme for the care and supervision of persons usually referred to as 'mental defectives.' This

term has been avoided in the act, which refers to such people as ' persons requiring special care,' and the part of the act dealing with these persons embodies the most modern ideas on their treatment and care and provides for the expenditure of a sum of £500,000 from the Exchequer to be made available to the Hospitals Authority to provide institutional accommodation for such persons.

Since 1 Sept., 1947, the Northern Ireland Tuberculosis Authority has been responsible for the prevention and treatment of tuberculosis under the Public Health (Tuberculosis) Act (Northern Ireland), 1946. Its expenditure is met by direct grant in full from the Exchequer for the majority of the services provided, supplemented by a partial grant from local rates for certain specified services which are mainly domiciliary in character. In addition, a sum of £1,000,000 has been set aside by parliament for the Authority's use in providing new chest hospitals, clinics, X-ray equipment and other items of a capital nature. The Authority had, on 31 Dec., 1949, 8 institutions under its direct control and had made arrangements with other bodies for the admission of certain types of cases to general hospitals, all of which gave a total of some 1,385 beds available for tuberculous patients.

Welfare Services are administered by the County and County Borough Welfare Authorities established under the Public Health and Local Government (Administrative Provisions) Act (Northern Ireland), 1946, whose functions relating to the welfare of aged, infirm and handicapped persons, etc., are contained in the Welfare Services Act (Northern Ireland), 1949.

Housing.—While under the code of the Housing Acts the main burden of providing housing accommodation for workers must be borne by the Local Authorities, the government to meet the post-war position, created a new public authority—the Northern Ireland Housing Trust—which was set up early in 1945. The Housing Trust has been given full powers to provide workers' housing, anywhere in Northern Ireland, acting in conjunction with the various local Housing Authorities. The Housing Act (Northern Ireland), 1945, under which the Housing Trust was constituted, provided that all such new housing was to be subsidized.

Legislation was passed during 1946 enabling subsidies to be paid to private builders erecting houses for letting, and to private persons wishing to build for their own occupation. This legislation was rounded off in 1948 and 1950 by further measures designed to encourage the improvement of housing conditions in the agricultural districts, subsidies being made available to farmers, not only for the erection of new houses but also for the improvement and modernization of existing farmhouses, and those of their farm workers who must live on the lands where they are employed.

In addition facilities are available in Northern Ireland—under the provisions of the Industries Development Act (Northern Ireland), 1945—whereby industrialists can provide housing accommodation for their workers with the aid of Government grants.

Water Supply and Sewerage.—Many local authorities have extensive schemes at an advanced stage. Parliament provided in the Water Supplies and Sewerage Act (Northern Ireland), 1945, for government grants to be given to assist local authorities in this work and up to 30 June, 1950, grants amounting to £4,424,298 have been offered towards schemes estimated to cost £10,276,264. Encouragement has been given to local authorities to co-operate in the formation of Joint Boards, so that the sources of water supply can be utilized on a regional basis. Nine Waterworks Joint Boards comprising 20 rural and 13 urban authorities have been formed since 1945.

Area and Population.

A census of Northern Ireland was taken on 28 Feb., 1937. The area and population of the country at that date were as follows:—

Counties and county boroughs	Area in statute acres (exclusive of water)	Males	Females	Total
Antrim	702,900	96,003	101,263	197,266
Armagh	312,767	54,271	54,544	108,815
Belfast C.B.	15,289	205,538	232,548	438,086
Down	609,057	102,535	108,152	210,687
Fermanagh	417,912	28,856	25,713	54,569
Londonderry Co.	512,580	47,929	46,994	94,923
Londonderry C.B.	2,198	22,344	25,469	47,813
Tyrone	779,548	65,678	61,908	127,586
Northern Ireland	3,352,251	623,154	656,591	1,279,745

Estimated civilian population at 30 June, 1949, 1,359,798.
Vital statistics for 4 years:—

Year	Marriages	Births	Deaths	Year	Marriages	Births	Deaths
1946	9,801	30,134	16,666	1948	9,360	29,532	15,125
1947	9,517	31,254	16,913	1949	9,216	29,106	15,652

Numbers of divorces, separation and nullity of marriages in 1946, 224; 1947, 204; 1948, 185; 1949, 195.

Religion.

The religious professions in Northern Ireland, as recorded at the census of 1937, were:—Roman Catholics, 428,290; Presbyterians, 390,931; Church of Ireland, 345,474; Methodists, 55,135; other professions, 59,915; total, 1,279,745. There were 1,090 members of the Society of Friends in 1949.

Education.

The following are the statistics for 1949–50:—

University: The Queen's University of Belfast (founded in 1849 as a College of the Queen's University of Ireland, and reconstituted a separate university in 1909) had 34 professors, 99 lecturers, 84 assistant lecturers, 16 clinical lecturers and 2,686 students.

Secondary Education: 78 grammar schools with 26,413 pupils; 11 intermediate schools with 5,904 pupils. *Technical Instruction:* 115 centres with 31,209 students.

Primary Education: 1,632 primary schools with 185,712 pupils; 12 special and hospital schools with 660 pupils; 6 nursery schools with 201 pupils. In the case of these schools the Ministry of Education pays the whole salary of the teachers in both county and voluntary schools.

Substantial grants are made to all classes of voluntary schools.

Justice.

Under the Government of Ireland Act, 1920, a Supreme Court of Judicature of Northern Ireland was established, consisting of the Court of Appeal

in Northern Ireland and the High Court of Justice in Northern Ireland. An appeal lies direct, in certain conditions, from the former to the House of Lords. A Court of Criminal Appeal was established in 1930.

A system of County or Civil Bill Courts deals with civil disputes generally where the sum at issue does not exceed £100, but possesses wider jurisdiction in certain cases. These County Courts have also a criminal jurisdiction, and act as appellate courts from the decisions of Resident Magistrates.

By the Summary Jurisdiction and Criminal Justice Act (Northern Ireland), 1935, Justices of the Peace were relieved of their judicial functions which are now vested in permanent judicial officers known as Resident Magistrates. The administrative functions of the Justices of the Peace are preserved to them and they are permitted to hear and determine cases of drunkenness and vagrancy, but only when sitting out of Petty Sessions.

The Police Force consists of (*a*) the Royal Ulster Constabulary, with a statutory maximum strength of 3,000 and (*b*) the Ulster Special Constabulary, a part-time force.

Finance.

The bulk of the taxation of Northern Ireland is imposed and collected by the Imperial authorities, who make certain deductions and remit the balance to the Northern Ireland Exchequer. The exact share of the latter in the proceeds of such taxation is determined by the Joint Exchequer Board, a special body consisting of one representative of the Imperial Treasury, one of the Northern Ireland Treasury, and a chairman appointed by His Majesty the King. The deductions made by the Imperial Treasury represent a contribution towards Imperial liabilities and expenditure, and the net cost to the Imperial Exchequer of Northern Ireland services 'reserved' to the Imperial Parliament.

The Northern Ireland Parliament has limited powers of taxation, the powers excluded relating to customs duties, excise duties on articles manufactured and produced, excess profits tax, income tax, including surtax, or any tax on profits or a general tax on capital, or any tax substantially the same in character as any of these duties or taxes. The Government of Northern Ireland also raises money from time to time for capital purposes by means of Stock, Savings Certificates and Treasury Bills.

The revenue and expenditure of the Northern Ireland Exchequer for the past 4 years were as follows (in £ sterling):—

	1947–48	1948–49	1949–50	1950–51 [2]
Revenue [1] . . .	29,274,497	38,806,286	43,191,307	47,577,000
Expenditure . .	28,662,482	38,712,828	42,908,914	47,504,000
Contribution . .	22,500,000	22,500,000	20,000,000	16,000,000

[1] Net, after deduction of estimated cost of 'Reserved' Services and contribution to Imperial Services. An adjustment is made when the true Residuary Share has been finally ascertained.

[2] Estimates.

The public debt at 31 March, 1950, consisted of £2,477,800 Northern Ireland 3¼% Stock, 1950–54, £25,883,366 Ulster Savings Certificates, and Bank and other Advances, £1,000,000. The proceeds of Savings Certificates were re-lent to the United Kingdom Government during the war, the amount so invested at 31 March, 1950, being £13,917,300.

Loans to local authorities and others for public utility services are made from the Government Loans Fund, the amount of principal outstanding at 31 March, 1950, being £29,082,727. Loans are financed by issues of Loans Stock supplemented as necessary by other borrowings. Loans Stocks outstanding at 31 March, 1950, were £1,859,690, Ulster Loans 5% Stock, 1950–60, and £5,000,000 Northern Ireland 3% Loans Stock, 1956–61.

Production.

Principal Products.—Agriculture is the largest single industry in Northern Ireland. Farms are small, there being about 90,000 holdings. Most of the farmers are in process of completing the purchase of their farms under the Land Purchase Acts.

The acreage under crops in Northern Ireland in 1950 was as follows:—Wheat, 2,060; oats, 345,160; barley, 3,820; mixed corn, 6,030; potatoes, 179,010; flax, 22,310; turnips, 12,450; hay, 435,850.

Yields as forecast 1 Nov., 1950, were (in tons):—Oats, 293,386; potatoes, 1,342,575; turnips, 164,340; flax (scutched fibre), 5,000 (1949); hay, 577,914; barley, 3,343, wheat, 1,844; mixed corn, 5,306.

Livestock numbers at 1 June, 1950, were:—Cattle 989,840; sheep, 716,640; pigs, 523,010; poultry, 20,723,800.

Mining.—The output of minerals in tons during 1949 was:—Basalt and igneous rock, 990,000; chalk, 313,000; clay, 289,000; diatomite, 8,000; fireclay, 12,000; granite, 55,000; limestone, 274,000; sand and gravel, 605,000; grit and conglomerate, 427,000.

The number of persons employed in the mines and quarries was:—1944, 2,905; 1945, 2,558; 1946, 2,679; 1947, 2,680; 1948, 2,755; 1949, 2,844.

Industrial Development.—The basis of the industrial structure of Northern Ireland is continuously broadening and the development of established industries encouraged by the assistance which the government is enabled to extend under the provisions of its Industries Development Acts.

Manufactures.—The two principal industries are linen and shipbuilding. The value of linen goods and yarn exported from the United Kingdom during the year ended 31 Oct., 1950, was £18,578,000. A very large proportion of United Kingdom exports of linen goods originated in Northern Ireland and in addition the Northern Ireland linen industry exported nearly £2,000,000 worth of rayon goods. The textile and clothing industry gives employment to about 100,000 people.

About 40,000 people are employed in shipbuilding. The Belfast shipyards possess an output of 200,000 tons per year. Textile machinery is a very important product of the engineering industry.

Electricity Development.—The distribution of electricity in Northern Ireland is carried out by three main undertakings, which cover between them virtually the whole of the province. These are the Belfast Corporation, the Londonderry Corporation and the Electricity Board for Northern Ireland. Sales during 1949 amounted to 533 million units. Units sold by the Electricity Board during 1949 amounted to 217,480,000. At 31 Dec., 1949, the Board had in commission 1,791 miles of high tension transmission lines and was distributing supplies to 92,586 consumers, of whom 29,853 were in rural areas.

The generating capacity in Northern Ireland was increased during 1943

with the construction, by the Ministry of Commerce, of a new generating station at Ballylumford, Co. Antrim. This station, which began production with 30,000 kw. of plant, has since been extended to a capacity of 93,000 kw. and further extensions are in progress, which will bring the capacity up to 124,500 kw. The station was transferred to the Electricity Board on 1 Jan., 1949. The Harbour Power Station of the Belfast Corporation was in 1949 extended so as to bring its capacity up to 144,750 kw.; work is in hand on a further extension of 30,000 kw.

Trade statistics	1946	1947	1948	1949
	£	£	£	£
Imports . .	123,188,000	157,561,000	177,382,000	188,732,000
Exports . .	127,667,000	145,691,000	156,937,000	163,867,000

Social Welfare.

The social security schemes in Northern Ireland differ from those in Great Britain only in minor details, the rates of contributions, benefits and allowances being identical. Reciprocal arrangements link the schemes closely so that a person moving from one country to the other carries all his insurance rights with him. In addition, close administrative liaison with Great Britain is maintained through the National Insurance Joint Authority and the Industrial Injuries Joint Authority (consisting in each case of the Minister of National Insurance in Great Britain and the Minister of Labour and National Insurance for Northern Ireland), which are charged with the duty of co-ordinating the schemes and of making such financial adjustments as may be necessary. There are also comprehensive reciprocal arrangements with the Isle of Man.

Reciprocal arrangements have been made with the Irish Republic in respect of those parts of the insurance schemes in the two countries which are on a comparable basis. Under the arrangements, insurance for sickness benefit and maternity benefit is maintained where an insured person moves from one country to the other, and persons who live on one side and work on the other side of the border between the United Kingdom and the Republic are insured for those benefits in the country of residence, the necessary financial adjustments being made between the schemes. A reciprocal agreement has also been completed with France to cover all benefits other than unemployment benefit, widows' benefits and family allowances. An agreement has been made with New Zealand for reciprocity in respect of family allowances.

National Insurance.—The National Insurance Act (Northern Ireland), 1946, replaced and extended the earlier schemes of insurance under the National Health Insurance, Contributory Pensions and Unemployment Insurance Acts and, in additio[illegible]rants towards the cost of funeral expenses and brought into [illegible] appropriate benefits the self-employed and adult non-employed members of the community. For details of the contributions payable by insured persons and the benefits to which they may become entitled see pages 79–81 (relating to Great Britain).

The total number of insured persons is about 590,000. During the year ended 31 March, 1950, the average number of persons in receipt of sickness benefit was 27,000 and in receipt of unemployment benefit was 20,500. Widows' benefits were in payment to 10,500 women and retirement pensions to 76,500 persons. Receipts and payments of the Northern

Ireland National Insurance Fund in the year ended 31 March, 1950, were as follows (in £ sterling) :—

Receipts		Expenditure	
Contributions from insured persons and employers	8,900,000	Unemployment benefit	1,610,000
Contributions from the Northern Ireland Exchequer	2,900,000	Sickness benefit	2,050,000
Interest from investments and other receipts	700,000	Maternity benefit	270,000
		Widows' benefit	590,000
		Guardians' allowances	20,000
		Retirement pensions	4,730,000
		Death grants	30,000
		Benefit payments, total	9,300,000
		Contribution to health services	900,000
		Administrative and miscellaneous expenditure	800,000
	12,500,000		11,000,000

Industrial Injuries Insurance.—The National Insurance (Industrial Injuries) Act (Northern Ireland), 1946, takes the place of the Workmen's Compensation Acts and provides insurance against 'personal injury by accident arising out of and in the course of employment' and against industrial diseases. About 470,000 persons are covered by the scheme and the contributions they pay and the benefits to which they may be entitled are the same as in Great Britain (for details see pages 81–2). Accidents in respect of which claims to benefit are made occur at the rate of about 200 a week.

Receipts and payments of the Northern Ireland Industrial Injuries Fund in the year ended 31 March, 1950, were as follows (in £ sterling) :—

Receipts		Expenditure	
Contributions from insured persons and employers	642,000	Injury benefit	133,000
Contributions from the Northern Ireland Exchequer	128,000	Disablement benefit	39,000
Interest from investments and other receipts	14,000	Death benefit	4,000
		Benefit payments, total	176,000
		Administrative and miscellaneous expenses	58,000
	784,000		234,000

Disablement benefit, which normally takes the form of a pension related to the degree of loss of faculty, [illegible] only in respect of accidents which occurred on or after 5 July, 1948, the amount payable under this head will accordingly continue to increase.

Family Allowances.—Under the Family Allowances Act (Northern Ireland), 1945, an allowance of 5*s.* a week is payable for each child other than the first in a family. The number of families in receipt of allowances is over 97,500, and the cost of the scheme in the year ended 31 March, 1950, was as follows :—Allowances, £2,660,000; administration, £66,000.

National Assistance.—The National Assistance Scheme provides for the grant of assistance to persons who are without resources, or sufficient resources, to meet their requirements. Subject to need, benefit under the National Insurance Scheme may be supplemented under the National Assistance Scheme.

Non-contributory Pensions.—Old Age Pensions (non-contributory) are granted to individuals who are not eligible for retirement pensions provided they have reached the age of 70 (40 in the case of blind persons), and comply with certain conditions as regards means, British nationality and residence in the U.K. The number of persons in receipt of non-contributory pensions is approximately 30,000.

Transport and Communications.

Roads.—Under the Roads Act (Northern Ireland), 1948, the Government set up a Trunk Roads system and took on full responsibility for the improvement and maintenance of the main traffic routes of Northern Ireland, and on 1 April, 1949, 350 miles of such roads were transferred to the Ministry of Commerce from the Local Authorities, who have been relieved of the cost of maintenance. For administrative purposes, roads and streets in Northern Ireland are divided into 5 classes as follows:—Trunk, 346 miles (2·6%); class I, 961 miles (7·3%); class II, 1,742 miles (13·1%); class III, 2,748 miles (20·7%); unclassified, 7,457 miles (56·3%); total 13,254 miles.

The cost of maintaining roads other than Trunk Roads in County Boroughs, Boroughs and Urban Districts is chargeable to the County Borough, Borough or Urban District, as the case may be. The cost of maintaining a road not situated in an Urban Area is chargeable to all the Rural Districts in the County if it is graded as a class I, II or III road, but is chargeable only to the Rural District or Districts in which it is situated, if it is graded as unclassified.

Finance.—A Road Fund to which are credited motor vehicle duties and drivers' licence fees, and out of which are paid grants to Local Authorities for the maintenance, improvement and reconstruction of the roads, is administered by the Ministry of Commerce. For the year ended 31 March, 1949, a total of £813,075 on grants from the Road Fund was paid to Local Authorities.

Road and Rail Transport.—Public transport services in Northern Ireland are provided almost wholly by three main undertakings, namely (1) the Ulster Transport Authority operating passenger and freight services by road throughout the Province and passenger and freight services by rail over the lines formerly owned by the Belfast and County Down Railway Company and by the London Midland and Scottish Railway Northern Counties Committee; (2) the Great Northern Railway Company (Ireland) operating passenger and freight services by rail in Northern Ireland and the Irish Republic, and (3) the Belfast Corporation operating passenger services by omnibus, trolley bus and tramcar in Belfast. In addition to the Great Northern Railway Company (Ireland), several small railway companies operate rail and road services between Northern Ireland and the Irish Republic. Road freight services in the cities of Belfast and Londonderry are provided by a number of licensed 'local carriers' as well as by the Ulster Transport Authority.

During the year ended 30 Sept., 1949, the Ulster Transport Authority carried 405,063 tons of merchandise by rail and 1,648,343 tons by road; 141,830 head of livestock by rail and 579,581 head by road; and 9,092,564 passengers by rail and 94,623,839 by road. The Authority's gross receipts for the year from road and rail services including hotels and catering were £5,263,806 and their net receipts were £52,303. The Authority operate 1,008 road passenger vehicles and 1,352 goods vehicles.

During the year ended the 31 Dec., 1949, the other railway companies

carried 1,681,940 tons of merchandise, 630,004 head of livestock and 11,984,996 passengers. Their gross receipts for the year were £4,008,714, and net receipts £60,997. These figures include traffic in the Irish Republic as well as in Northern Ireland.

During the year ended 31 March, 1950, the Belfast Corporation Transport Department carried 251,123,535 passengers. Gross receipts for the year were £1,977,209 and net receipts £122,035. The Corporation operate 187 trolley buses, 190 omnibuses and 249 tramcars.

The great bulk of road transport in the Province is private. While the carriage of merchandise for hire or reward is restricted under the provisions of the Transport Act (Northern Ireland), 1948, the owner of a motor goods vehicle is not subject to any restriction in the carriage of his own goods, except in the interest of public safety.

The number of motor vehicles licensed at 30 Sept., 1949, was 95,146, including :—Private cars, 47,618; motor cycles, 8,069; motor goods vehicles, 18,413; agricultural engines, 16,597.

Sea.—Regular passenger and freight services are provided between Belfast and Heysham and between Larne and Stranraer by the Railway Executive of the British Transport Commission; between Belfast and Liverpool, by the Belfast Steamship Company Ltd.; and between Belfast and Glasgow and between Belfast and Ardrossan by Messrs. Burns and Laird Lines Ltd. Regular freight services also ply between Belfast and Bristol and other ports in Great Britain. Vehicle ferry services ply between Larne and Preston and Belfast and Preston operated by Continental Lines Ltd.

Air.—British European Airways Corporation maintain regular passenger services between Belfast (Nutt's Corner) and London, Liverpool, Manchester, Birmingham and Glasgow, with connexions to the principal towns in Great Britain and to the Continent. Charter services for both passengers and freight are available at Nutt's Corner.

ISLE OF MAN.[1]

The Isle of Man is administered in accordance with its own laws by the Court of Tynwald, consisting of the Governor, appointed by the Crown; the Legislative Council, composed of the Lord Bishop of Sodor and Man, 2 Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members elected by the House of Keys, total 11 members, including the Governor; and the House of Keys, a representative assembly of 24 members chosen on adult suffrage with 6-months residence for 5 years by the 6 ' sheadings ' or local sub-divisions, and the 4 municipalities. Women

[1] Area and population, *see* p. 57.

have the franchise as well as men. Number of voters 1949–50, 41,881. The island is not bound by Acts of the Imperial Parliament unless specially mentioned in them.

On 25 April, 1944, at a special session of the Manx Legislature both branches of the Legislature reached general agreement on a proposal to establish an Executive Council to act with the Governor on all matters of government, and, by resolution of Tynwald on 15 Oct., 1946, an executive council was appointed. The present constitution of the council is the chairmen of 6 Boards of Tynwald together with the Speaker who is chairman of the Board of Education and the Publicity Board; of these, 5 are members of the House of Keys and 2 of the Legislative Council.

Lieut.-Governor.—Air Vice-Marshal Sir Geoffrey Rhodes Bromet, K.B.E., C.B., D.S.O. (term of office began 7 Sept., 1945).

The population (national registration, 1939) numbered 50,829 (22,475 males, 28,354 females); 529 (1·1%) were bilingual (Manx and English).

The principal towns are Douglas (population, 20,012), Ramsey (4,240), Peel (2,523), Castletown (1,742). Births (1949), 842; deaths, 790. On 1 Jan., 1948, there were 31 primary schools (36 departments), 28 being county schools. The enrolled pupils numbered 4,174. The gross expenditure of the Education Authority for the year 1949–50 amounted to £281,835. There are 5 secondary schools, 4 provided by the Education Authority (2,523 registered pupils), 1 direct grant school (145 registered pupils), 1 independent public school for boys (331 registered pupils), 1 school of technology, art and crafts (270 full- and part-time pupils), 1 domestic science college (205 full- and part-time pupils) and 1 evening institute (853 pupils). The police force numbers 91; in the year 1949 there were 1,171 persons convicted.

Revenue is derived from customs duties and partly from income tax. In 1948–49 the revenue from customs duties, etc., amounted to £2,598,519. Expenditure totalled £2,831,880.

The principal agricultural produce of the island consists of oats, wheat, barley, turnips and potatoes, and grasses. The total area of the island, excluding water, is 145,325 acres; the total area under crops in 1949 was 76,147 acres and of rough grazings, 45,979 acres. The total acreage under corn crops in 1949 was 16,796 acres, including 13,575 under oats, 744 under wheat and 324 under barley or bere. There were also 4,176 acres under turnips and swedes, 2,017 under potatoes, 7,943 under hay and 28,158 under grass, following rotational cropping. The livestock in 1949 consisted of 1,874 horses, 24,976 cattle, 72,094 sheep and 3,890 pigs.

The registered shipping (1949) comprised 54 vessels of 11,763 net tons; also 111 fishing vessels. The tonnage of vessels arrived at ports of the island in 1949 was 1,098,403 tons, and departed 1,097,927 net tons. The railways have a length of 70 miles, and there are 410 miles of roads. Several road races for bicycles and motor cars, including the British Empire Trophy Car Races, take place annually. Number of vehicles (31 March, 1950):—5,688 cars and trucks, 566 taxis and buses, 1,241 motor cycles, 711 tractors.

CHANNEL ISLANDS.

THE Channel Islands are situated off the north-west coast of France and are the only portions of the 'Duchy of Normandy' now belonging to the Crown of England, to which they have been attached since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres) and the following dependencies of G[illegible] (1,962), Brechou (74), Great Sark (1,035), Little Sa[illegible] (300), Jethou (44) and Lihou (38), a total of 48,083 acres, or 75 square miles.

The climate is mild. Total rainfall (1949), Jersey, 25·18 in.; (1950) Guernsey, 41·59 in. Temperature registered: highest, Jersey, 89°; Guernsey, 79°; lowest, Jersey, 31°; Guernsey, 31°.

Communications. Passenger and cargo steamer services between (*a*) Jersey and Guernsey and (*b*) between Jersey and Guernsey and England, and (*c*) between Jersey and St. Malo are maintained by British Railways: passenger service between Gorey and Carteret during the summer by French vessels. Cargo steamer services between Jersey and Guernsey and between Jersey and Guernsey and London are maintained by the British Channel Islands Steamship Co., Ltd.; cargo service between Liverpool and Jersey weekly by Cunard Steamship Co.

Scheduled air services are maintained by British European Airways (B.E.A.C.) between (*a*) Jersey and Guernsey, Alderney, Southampton, Birmingham, Manchester, Belfast, Liverpool, London, (*b*) between Alderney and Southampton, (*c*) between Guernsey and Alderney, Southampton and London, and (*d*) between Jersey and Dinard and Rennes. There are, in addition, numerous charter services in operation between the islands and between the islands and England and France.

Omnibus services, maintained by insular organizations, operate in all parts of Jersey and Guernsey.

Postal services in the islands, and between the islands and the United Kingdom and the Continent, are maintained by branches of the General Post Office. The telegraph and trunk telephone services to the United Kingdom are maintained by the General Post Office. The local telephone services in the islands are maintained by the insular authorities.

There are no broadcasting stations in the islands.

Trade.—Total trade (in £ sterling) of the Channel Islands with the United Kingdom (Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports into U.K.	4,670,688	10,094,462	13,233,219	10,570,545	11,409,202
Exports from U.K.	5,093,144	12,114,750	15,193,326	14,727,354	14,375,589
Re-exports from U.K.	1,002,742	1,337,928	1,404,210	1,658,857	1,882,208

JERSEY.

Constitution.—The Lieutenant-Governor and Commander-in-Chief of Jersey is the Personal Representative of the Sovereign, the Commander of the Armed Forces of the Crown, and the channel of communication between His Majesty's Government in the United Kingdom and the Insular Government. He is appointed by the Crown. He is entitled to sit and to speak in the Assembly of the States (the insular legislature) but not to vote. He has a power of veto on certain forms of legislation.

The Bailiff is appointed by the Crown and is President both of the Assembly of the States and of the Royal Court of Jersey. He has in the States a right of dissent and a casting vote.

The government of the island is conducted by committees appointed by the States. The States consist of 12 senators (elected for 9 years, 4 retiring every third year), 12 constables (triennial) and 28 deputies (triennial) all elected on universal suffrage, by the people.

The Dean of Jersey, the Attorney-General and the Solicitor-General are appointed by the Crown and are entitled to sit and to speak in the States, but not to vote. Permanent laws, but not triennial regulations, passed by the States require the sanction of the King in Council.

The official language is French, but English is the language in daily use.

The principal industries are agriculture (potatoes, tomatoes and cattle) and tourism.

The principal town is St. Helier on the south coast.

Justice.—Justice is administered by the Royal Court, which consists of the bailiff and 12 jurats. There is a final appeal in certain cases to His Majesty in Council. A stipendiary magistrate deals with minor civil and criminal cases.

Church.—Jersey constitutes a deanery within the Diocese of Winchester. The 12 rectories are in the gift of the Crown. The Church of Rome and various Nonconformist Churches are represented in the island.

Education.—There are two public schools in the island, namely, Victoria College (for boys) and the Jersey College (for girls). The total number of scholars is 7,323; 4,641 attend the states primary schools and 1,703 attend private schools. The States Public Instruction Committee provide facilities for technical instruction, domestic science and evening classes.

Population, 1949, 56,621; births, 926; deaths, 715.

Finance (year ending 31 Jan., 1950).—Revenue, £2,336,670; expenditure, £1,953,770; public debt, £2,537,057.

The standard rate of income tax is 4s. in the pound. No super-tax or death duties are levied. Parochial rates of moderate amount are payable by owners and occupiers.

Commerce.—Principal imports, 1949:—Building material, 37,423 tons; builders' timber, 268,455 cu. ft.; fuel, 73,931 tons; foodstuffs, 27,378 tons. Principal exports, 1949:—Potatoes, 26,249 tons; tomatoes, 30,472 tons; cattle, 1,770 head.

Shipping.—Number of ships entering Jersey (1949), 1,802; leaving Jersey, 1,799. All vessels arriving in Jersey from outside Jersey waters report at St. Helier or Gorey on first arrival. There is a harbour of minor importance at St. Aubin. Ships registered in Jersey (excluding fishing boats), 1949.—Steam, 14; sail, 5; motor, 3; yachts, 37.

Aviation.—The Jersey airport is situated at St. Peter. It is an all-grass landing area of approximately 119 acres. Number of aircraft in (1949), 11,327; out, 11,345; passengers, 76,192 arrivals, 81,610 departures.

Lieutenant-Governor and [illegible] *of Jersey.*—Lieut.-General Sir Arthur Edward Grasett, K.B.E., C.B., D.S.O., M.C. (appointed 21 Aug., 1945).

Bailiff of Jersey.—Sir Alexander M. Coutanche, Kt.

GUERNSEY.

Constitution.—The Lieutenant-Governor and Commander-in-Chief of the Bailiwick of Guernsey is the Personal Representative of the Sovereign, the Commander of the Armed Forces of the Crown and the channel of communication between His Majesty's Government in the United Kingdom and the Insular Government. He is appointed by the Crown. He is entitled to sit and speak in the Assembly of the States, but not to vote. The Bailiff is appointed by the Crown and is President both of the Assembly of the States (the Insular Legislature) and of the Royal Court of Guernsey. He has a casting vote in the States.

The government of the island is conducted by committees appointed by the States.

Under the Reform (Guernsey) Law, 1948, the States of Deliberation was re-constituted and from 1 Jan., 1949, is composed of the following members:—the Bailiff, who is President *ex officio*; 12 Conseillers elected by the States of Election; H.M. Procureur and H.M. Comptroller (Law Officers of the Crown), who have a voice but no vote; 33 People's Deputies elected by popular franchise; 10 Douzaine Representatives elected by their Parochial Douzaines.

The function of the States of Election is to elect persons to the offices of Jurat, Conseiller and H.M. Sheriff. It also was re-constituted as from 1 Jan., 1949, and is composed of the following members:—the Bailiff (President *ex officio*); the 12 Jurats or 'Jurés-Justiciers'; the 12 Conseillers; the 10 Rectors; H.M. Procureur and H.M. Comptroller; the 33 People's Deputies; 34 Douzaine Representatives.

Until Jan., 1949, the Royal Court possessed, inter alia, the power to make ordinances dealing with various local matters. Thenceforth, all powers and functions of a legislative nature (with minor exceptions formerly exercised by that Court have been vested in the States of Deliberation. Projets de Loi (Bills) require the sanction of His Majesty in Council.

Language.—Meetings of the States and of the Royal Court, formerly conducted in French, are now conducted in English, which is the language in common use. The Norman patois is, however, often heard in the country parishes.

Justice.—Justice is administered in Guernsey by the Royal Court, which consists of the bailiff and the 12 jurats and certain court officials. The Royal Court also deals with a wide variety of non-contentious matters. A stipendiary magistrate deals with minor civil and criminal cases.

Church.—Guernsey constitutes a deanery within the Diocese of Winchester. The ten rectories are in the gift of the Crown. In addition to the rectories, there are various other livings of the Church of England. The Church of Rome and various Nonconformist Churches are represented.

Education.—There are two public schools in the island: Elizabeth College, founded by Queen Elizabeth in 1563, for boys, and the Ladies' College, for girls. The States intermediate schools provide for education up to school certificate standard, and there are numerous modern and elementary schools. The total number of school children is about 6,000, of whom some 600 attend private schools. Facilities are also available for the study of art, domestic science, and many other subjects of a technical nature.

Population.—The population at 31 Dec., 1950, was 44,493. Births during 1950 were 746; deaths, 495.

Finance.—Revenue for the financial year ending 31 Dec., 1950, was £1,870,273; expenditure, £1,791,150; States' funded debt, £5,066,507; note issue, £436,672. The standard rate of income tax is 5*s.* 4*d.* in the pound. Sur-tax is levied on such part of incomes as exceeds £1,000, commencing at 6*d.* (£1,000–£1,500) and rising to 7*s.* 6*d.* (£10,000 and over). States and parochial rates are very moderate.

Commerce.—Principal imports for 1950 were:—Fuel, 177,880 tons; foodstuffs, 19,547 tons; building materials, 30,667 tons. Principal exports were:—Tomatoes, 38,483 tons net; grapes, 491 tons; flowers, 1,290 tons; cattle, 485 head.

Shipping.—The principal harbour is that of St. Peter Port, and there is a harbour at St. Sampson's (used mainly for commercial shipping). In 1950, the number of ship tons net entering and leaving Guernsey was 1,149,003. Sea passengers: arrivals, 89,026; departures, 88,319. The number of ships registered in Guernsey at 31 Dec., 1950, was 30 (steam, 8; sail, 1; yachts, 21).

Aviation.—The airport in Guernsey, situated at La Villiaze, is an all-grass landing area [illegible] 91 acres. In 1950, 8,575 aircraft arrived (passengers, [illegible] departed (passengers, 42,143).

Lieutenant-Governor and Commander-in-Chief of Guernsey and its Dependencies.—Lieut.-General Sir Philip Neame, V.C., K.B.E., C.B., D.S.O. (appointed 25 Aug., 1945).

Government Secretary.—Major-General R. F. Colwill, C.B.E.

Bailiff of Guernsey and President of the States.—Sir Ambrose J. Sherwill, C.B.E., M.C.

Alderney.—Population (31 Dec., 1950), 1,469. Chief town, St. Anne's, with airport. The constitution of the island (reformed 1949) provides for its own popular elected President and States, and its own Court.

President of the States.—Commander S. P. Herivel, O.B.E., D.S.C., R.N. (Retd.).

Clerk of the States and Court.—P. W. Radice, M.A., I.C.S. (Retd.).

Sark.—Population (31 Dec., 1950), 502. Motor cars are not allowed on the roads. The constitution is a mixture of feudal and popular government with its Chief Pleas (parliament), consisting of 40 tenants and 12 popularly elected deputies presided over by the Seneschal. The head of the island is the Seigneur.

Seigneur—R. W. Hathaway.
La Dame de Sercq—Mrs. R. W. Hathaway, O.B.E.
Seneschal.—W. Baker.

GIBRALTAR.

THE Rock of Gibraltar was settled by Moors in 711; they named it after their chief Djebel Tarik, 'the Mountain of Tarik.' In 1462 it was taken by the Spaniards, from Granada. It was captured by Admiral Sir George Rooke on 3 Aug., 1704, and ceded to Great Britain by the Treaty of Utrecht, 1713. It is a Crown colony, situated in 30° 7′ N. latitude and 5° 21′ W. longitude, commanding the entrance to the Mediterranean. The average rainfall at Gibraltar is 35 in. The rainy season is from September to May.

Governor and Commander-in-Chief.—General Sir Kenneth A. N. Anderson, K.C.B., M.C. (**salary £5,000, with £500 allowance**; assumed office 21 March, 1947).

Colonial Secretary.—B. J. O'Brien, C.M.G.

The Governor, who is also Commander-in-Chief, is assisted by an Executive Council of 7 members, 4 official and 3 unofficial selected by the Governor, and by a Legislative Council which was inaugurated by the Duke of Edinburgh on 23 Nov., 1950. The latter is composed of 10 members, 3 official, 5 elected and 2 appointed by the Governor. Area, $1\frac{7}{8}$ square miles. Population, including port and harbour (census, 1931), civil, 17,613 (7,986 males and 9,627 females); military, 3,218 (2,544 males and 674 females); naval, 541 (397 males and 144 females); total, 21,372 (10,927 males and 10,445 females). Estimated fixed civil population, 1 Jan., 1951, 24,886. The population are mostly descendants of Italian and Spanish settlers. Civil population births (1950), 458; marriages, 210; deaths, 236. Religion of civil population mostly Roman Catholic; 1 Anglican and 1 Catholic cathedral and 4 Catholic churches; annual subsidy to each communion, £500.

Education is provided for children between ages 5 and 14 years. There were, in 1950, 16 primary, 4 secondary, 1 commercial and 1 technical government schools. Total number of schoolchildren in government schools (1 Sept., 1950), 2,985; average annual attendance, 92%. The judicial system is based on the English system. There is a Supreme Court, presided over by the Chief Justice, and a Magistrates' Court. In 1950, 1,107 cases were dealt with in the latter court.

Revenue and expenditure for 6 years (in £ sterling):—

	1944	1945	1946	1947	1948	1949
Revenue	532,067	510,009	545,325	1,389,375	681,580	1,021,270
Expenditure	433,348	469,191	751,630	912,856	652,755	1,236,565

Local industry is mainly confined to a sardine cannery recently established for export purposes and to the production of commodities for local consumption, chiefly manufactured tobacco, roasted coffee, ice and mineral waters. The trade of the port is chiefly transit trade and the supply of coal to ships. There are import duties on malt liquors, wine, spirits, tobacco, motor spirits, perfumery and coffee, and on exportation of oil fuels.

A considerable proportion of the workers are organized in one or other of the 11 registered trade unions of which the Gibraltar Confederation of Labour has the largest membership; 7 others are local branches of parent associations in the United Kingdom. The registered labour force on 31 Oct., 1950, consisted of 5,100 male and 1,200 female resident Gibraltarian workers, 500 United Kingdom expatriates, and 7,900 men and 4,500 women (mostly Spaniards) who reside in Spain. The majority of these workers are

employed by the service departments, the colonial government and the city council.

Government savings bank, with 11,204 depositors, had £1,022,885 deposits at the end of 1950.

Gibraltar is a naval base and position of great strategic importance. There is a deep Admiralty harbour of 440 acres. Vessels entered and cleared in 1950, 4,254; net tonnage, 8,210,806. An automatic telephone system exists in the town, and Cable and Wireless, Ltd., have a station. There is world-wide cable or wireless communication *via* the cable and/or wireless circuits of Cable and Wireless, Ltd. Air-mails arrive by B.E.A. daily except Fridays. A direct air-mail service between Gibraltar and Tangier, Tetuan, Malaga, Granada and Seville is operated by Gibraltar Airways, Ltd. Surface mails arrive direct and through France and Spain.

The legal currency is that of Great Britain. Since the outbreak of the Great War in 1914 there are also currency notes issued by the local government. The amount in circulation at end of 1950 was £916,515. There are 3 private banks, including a branch of Barclays Bank (D., C. & O.).

MALTA.

MALTA was held in turn by Phœnicians, Greeks, Carthaginians and Romans, and was conquered by Arabs in 870. From 1090 it was joined to Sicily until 1530, when it was handed over to the Knights of St. John, who ruled until dispersed by Napoleon in 1798. The Maltese rose in rebellion against the French and the island was subsequently blockaded by the British Fleet, aided by the Maltese, from 1798 to 1800, and with the free will of the Maltese was finally annexed to the British Crown by the Treaty of Paris in 1814. It is one of the most important ports of call in the world, and is the base and resort for repair and refitment of the British Fleet in the Mediterranean.

On 17 April, 1942, in recognition of the steadfastness and fortitude of the people of Malta during the Second World War, King George VI awarded the George Cross to the island.

Governor and Commander-in-Chief.—Sir Gerald H. Creasy, K.C.M.G., O.B.E. (sworn in 16 Sept., 1949).

Lieut.-Governor.—Sir David Campbell, K.B.E., C.M.G. (12 Feb., 1943).

Constitution.—On 7 July, 1943, it was announced in the House of Commons that after the war responsible government would be restored in Malta. On 20 Jan., 1945, the National Assembly met to consider the form of a new constitution. A report on the two proposals of the Maltese Assembly (Colonial Office paper No. 207) and a statement of policy by the British Government (Cmd. 7014) were published on 20 Jan., 1947.

Letters patent, dated 5 Sept., 1947, came into force on 22 Sept. They provide for a Legislative Assembly of 40 members, elected by universal suffrage by proportional representation. The Ministry consists of the Prime Minister

and not more than 7 other Ministers; the Ministry forms the Executive Council. Legislative and administrative powers in regard to defence and various matters related or incidental to defence and external relations are reserved to the Governor advised by the Nominated Council which consists of the Lieutenant-Governor, the Legal Secretary and three officers (one from each of the Royal Navy, the Army and the Royal Air Force). The Privy Council consists of the Executive Council and the Nominated Council sitting together.

The Privy Council affords an opportunity for joint consultation in matters in which action proposed to be taken by one side of the dyarchy may affect the other side.

The English language and the Maltese language are the official languages of Malta.

The elections held in Sept., 1950, resulted in 12 Nationalists, 11 Boffa's Labour Group, 11 Malta Labour Party, 4 Constitutionals, 1 Democratic Action Party, 1 Independent.

The Nationalist cabinet, formed on 26 Sept., 1950, consists of the following ministers:—

Prime Minister, Minister of Justice, Minister of Works and Reconstruction and Minister of Education.—G. Borg Olivier.
Minister of Finance.—Dr. J. Frendo Azopardi.
Minister of Health and Social Services.—Dr. G. A. Muscat.
Minister of Industry.—Dr. C. Caruana.
Minister of Emigration and Labour.—Dr. G. Camilleri.

Area and Population.—Malta is 17·4 miles long; area, 95 square miles; and the [illegible] island, Gozo, 26 square miles; total area (with Comino), 122 [illegible]. Population, census 14 June, 1948, 306,996. Births (1949), 10,199; deaths, 3,067; marriages, 1,641. Chief town and port, Valletta.

Education.—In 1950, there were 109 primary schools with 39,490 pupils. Adult education classes for illiterates, introduced in 1946, were attended by more than 3,200 students. There are also 4 secondary schools for girls with 957 students, a lyceum with 1,030 boys, a preparatory secondary school for boys and girls with 554 children, a technical school with 348 pupils, and the Royal University with an average of 300 students. There are 81 private schools with 15,877 pupils, of which 9 (with 587 pupils) are subsidized by the government.

There were, in 1949, 26 cinemas with a seating capacity of 13,335.

Justice.—In 1949-50, 361 persons were committed to prison; 109 persons were convicted of serious crime and 252 for minor offences. Police numbered 39 officers and 693 other ranks; temporary constables numbered 279.

Finance.—Revenue and expenditure (in £ sterling) for 5 years were:—

	1945-46	1946-47	1947-48	1948-49	1949-50
Revenue [1]	4,007,474	4,890,748	5,233,878	5,309,097	5,557,243
Expenditure	3,362,381	4,540,263	4,739,382	4,969,037	5,910,628

[1] Includes an Imperial grant for commodity subsidies of £900,000 (1946-47), £450,000 in 1947-48, and £300,000 in 1948-49.

Savings bank, 31 March, 1950, had 54,058 depositors, and deposits £16,812,173.

Production.—Chief products:—Wheat, barley, potatoes, onions, beans, cumin, vegetables, tomatoes, forages, grapes and other fruits, cotton. Total value of agricultural produce during the agricultural year 1948–49, £3,464,401. Area cultivated, 43,947 acres, in 12,614 holdings, mainly on 4-year lease certain and 4 years optional. Manufactures:—[illegible], cigarettes, wine, tomato-paste, buttons, pipes, footwear, gloves, mortadella and salami. Chief industry, farming; in Dec., 1949, horses, mules and asses numbered 8,439; horned cattle, 2,633; sheep, 21,237; goats, 50,677; pigs, 20,015. The fishing industry occupied 660 motor fishing boats of various sizes, employing about 1,020 persons in 1949. The catch was 1,412 tons, valued at £171,860 wholesale.

Labour and Welfare.—An employment exchange system is in operation. The male working population as at 31 Dec., 1949, was distributed as follows:—Agriculture and fishing, 22,500; service depts., including H.M. Forces, 21,500; private industry, 34,600; government, 12,700. Approximately 11,400 women are in wage-earning employment, mainly on agriculture on a family basis. The number of registered unemployed as at 31 Aug., 1950, was 1,274.

Welfare.—A workmen's compensation scheme on a contributory basis covers all manual workers other than those employed by Service Departments. On 2 Sept., 1950, 1,269 households were in receipt of social service assistance, 668 households were in receipt of outdoor medical relief, and 13,006 persons were drawing old-age pensions.

Trade Unions.—There were 33 trade unions registered as at 1 Aug., 1950, with a total membership of approximately 23,900.

Commerce.—Imports and exports (in £ sterling) for 5 years:—

	1945	1946	1947	1948	1949
Imports [1] . . .	9,108,258	12,953,113	14,390,732	16,177,614	15,311,753
Exports [1] . . .	600,574	707,458	1,006,730	1,256,818	1,037,501

[1] Including bullion and specie.

Principal items (1949) of imports:—Textiles (£1,813,430), cattle foodstuffs (£905,602), metals and manufactures thereof (£1,067,244), grains (1,212,462 cwt., £1,490,538); of exports:—Smoking requisites (£30,866), gloves (24,735 dozen pairs, £40,879).

In 1949, 45·5% of the imports came from the United Kingdom, 14·3% from other Empire countries, 10% from Italy; of the exports, 38·2% went to ships' stores, 19·5% to the United Kingdom, 3·2% to other Empire countries, 9·1% to Italy.

Vessels entered, 1949, 2,229 of 1,761,424 tons, including 583 British of 835,687 tons.

Communications, etc.—Every town and village is served by motor omnibuses, of which there are 546 running on all the principal roads. There is a ferry service running between Malta and Gozo on which cars can be transported.

There is a Government system of telephones with exchanges at Malta and Gozo. In 1950, there were 4,343 exchange lines with 6,616 stations.

Electricity Supply.—All towns and villages in Malta and some villages in Gozo are provided with electric current. The generating plant in Malta is of a capacity of 10,200 kw., and 26,312,000 kwh. were generated during the year ending 31 March, 1950. In Gozo, the capacity is 301 kw. and 305,188 kwh. were generated during the same period.

Money.—Government of Malta currency notes issued under the Currency Notes Ordinance 1949, and British coins are the sole legal tender. The amount of local currency notes in circulation on 31 March, 1950, was £14,927,361. Bank of England notes ceased to be legal tender as from 20 Sept., 1949. Barclays Bank (D., C. & O.) maintains 3 branches.

Commissioner-General in London.—Alfred Salomone, O.B.E., Malta House, 39 St. James's Street, S.W.1.

Books of Reference.

STATISTICAL INFORMATION.—The Central Office of Statistics (3 Old Mint St., Valletta), set up in 1947, is under the direction of G. F. Stivala. The functions of this Office have so far been limited to providing material compiled and tabulated separately by government departments. Such material is published in two annual publications, viz., 'Statistical Abstract of the Maltese Islands,' and 'Taxes, Duties, Fees and Other Sources of Revenue'; these publications incorporate the statistical data previously contained in Blue Books, the publication of which ceased in 1939.

ASIA.

AFTER several meetings during 1950 in Sydney, Colombo and London, the Commonwealth Consultative Committee on South and South-East Asia published, on 28 Nov., 1950, the 'Colombo Plan for Co-operative Economic Development in South and South-East Asia.' The participating countries were the United Kingdom, Australia, Canada, Ceylon, India, New Zealand and Pakistan. The colonial territories were represented through the United Kingdom delegation. Cambodia, Laos, Viet-Nam, and Thailand sent delegations, and Burma and Indonesia observers.

The plan contains 6-year development programmes for India, Pakistan, Ceylon, Malaya, Singapore, British North Borneo, Brunei and Sarawak. These total £1,868 million in cost and will require external finance to the extent of £1,084 million, of which £246 million would be found from sterling balances. The rest would have to come from other sources, such as private investment, governments both inside and outside the Commonwealth, and the International Bank.

The following table shows the cost of the programme (in £ million) in each country :—

	India	Pakistan	Ceylon	Colonies	Total
Agriculture [1]	456	88	38	13	595
Transport and communications	527	57	22	21	627
Fuel and power	43	51	8	20	122
Industry and mining [2]	135	53	6	—	194
Social capital	218	31	28	53	330
Total	1,379	280	102	107	1,868

[1] Including multi-purpose projects. [2] Excluding coal.

The following table shows the proportions of the total estimated cost of each programme to be spent on different types of development :—

	India	Pakistan	Ceylon	Colonies	Total (%)
Agriculture	33	32	37	12·1	32
Transport and communications	38	20	22	19·5	34
Fuel and power	3	18	8	18·7	6
Industry and mining	10	19	6	0·2	10
Social capital	16	11	27	49·5	18
Total	100	100	100	100	100

The total external finance required for the plan over the 6-year period, July, 1951–June, 1957, is given as follows (in £ million) :—

	India	Pakistan	Ceylon	Colonies	Total
Total development programme [1]	1,379	280	102	107	1,868
Capital goods imported	237	115	39	20	411
External finance needed—					
From [illegible] resources	211	16	19	—	246
From other sources	607	129	41	61	839

[1] The internal finance available for the [illegible] on the assumption that external finance is forthcoming, would be :—India, £[illegible] million; Pakistan, £151 million; Ceylon, £61 million; Malaya and British Borneo, £46 million.

The Colombo Plan. (Cmd. 8080.) H.M.S.O., 1950.

INDIA.

(BHARAT.)

Constitution.

ON 26 Jan., 1950, India became a sovereign democratic republic. India's relations with the British Commonwealth of Nations were defined at the London conference of Prime Ministers on 27 April, 1949. Unanimous agreement was reached to the effect that the Republic of India remains a full member of the Commonwealth and accepts the King as 'the symbol of the free association of its independent member nations and, as such, the head of the Commonwealth.'

Constituent Assembly.—In consequence of the enactment of the Indian Independence Act, 1947, the Dominion of India was set up from the 15th Aug., 1947, and the old Indian Legislature consisting of the Council of State and the Legislative Assembly ceased to function with effect from that date.

The powers of the Dominion Legislature under the Government of India Act, 1935, as adapted, are exercisable by the Constituent Assembly of India until other provision is made by or in accordance with a law made by that Assembly under sub-section (1) of section 8 of the Indian Independence Act, 1947. Under article 379 of the new Constitution of India the Constituent Assembly has become the provisional Parliament of the Union of India until both Houses of the new Parliament are constituted and summoned to meet for the first session. The total strength of the Constituent Assembly is 324.

The Constitution of India.

The constitution which was formally introduced in the constituent assembly on 4 Nov., 1948, was passed by the assembly on 26 Nov., 1949. The constitution comprises 395 articles and 8 schedules. The preamble recites that the people of India have solemnly resolved to constitute the country into a Sovereign Democratic Republic and to secure to all its citizens justice, liberty, equality and fraternity. India is to be a Union of States, and the Union is to comprise 28 states, 9 of which correspond to what are now governors' provinces, another 9 to what are now Indian states or unions of states and the remaining 10 to the present chief commissioners' provinces. Besides these states, the Union will consist also of the territory of the Andaman and Nicobar Islands. There is provision for the establishment, formation and admission of new states.

Any person who was domiciled in India when the constitution came into force is a citizen of India if he or either of his parents was born in India or he has been ordinarily resident in India for not less than 5 years immediately preceding the commencement of the constitution. There are special provisions for excluding those who migrated to Pakistan and for including those who have migrated to India as well as for Indians overseas.

Two chapters deal with fundamental rights and the allied subject of 'Directive Principles of State Policy.' 'Untouchability' is abolished and its practice in any form is made punishable. The fundamental rights can be enforced through the ordinary courts of law and through the Supreme Court of the Union. The directive principles cannot be enforced through the courts of law; they are in the nature of moral precepts.

The head of the Union is an elected President in whom all executive power is vested, to be exercised by him on the advice of ministers responsible to Parliament. He is elected by an electoral college consisting of all the elected members of Parliament and of the various state legislative assemblies. He holds office for 5 years and is eligible for re-election. He can be removed from office by impeachment for violation of the constitution. There is also a Vice-President who is the *ex-officio* chairman of the upper house of Parliament.

The Parliament for the Union consists of the President and of two houses known as the Council of States and the House of the People. The Council of States, or the upper house, consists of not more than 250 members. The election to this house is indirect; the representatives of each state are elected by the elected members of the state legislature if it is unicameral and of the lower house of the state legislature if bicameral. The Council of States is a permanent body not liable to dissolution, but one-third of the members retire every second year. The House of the People, or the lower house, consists of not more than 500 members, directly elected by the voters of the states on the basis of adult suffrage. The normal life of this House is 5 years.

The superintendence, direction and control of all elections (whether for

Parliament or the state legislatures) including the appointment of election tribunals is vested in an Election Commission.

Each state corresponding to the present governors' provinces has a governor at its head appointed by the President for a term of 5 years. Each state corresponding to the present Indian states and states unions has a Rajpramukh at its head to be recognized as such by the President. The states' legislatures consist of the governor or the Rajpramukh, as the case may be, and either one house (legislative assembly) or, in some states two houses (legislative assembly and legislative council). The term of the assembly is 5 years, but the council, like the upper house of Parliament, is not subject to dissolution.

The various subjects of legislation are enumerated in the three legislative lists in the seventh schedule to the constitution. List I, the Union List, consists of subjects with respect to which the Union Parliament has exclusive power to make laws; the state legislature has exclusive power to make laws with respect to the subjects in list II, the State List; the power to make laws with respect to the subjects in list III (Concurrent List) are concurrent. But Parliament may legislate with respect to any subject in the State List under certain circumstances when the subject assumes national importance or during emergencies.

Other provisions deal with the administrative relations between the Union and the states, inter-state trade and commerce, distribution of revenues between the states and the Union, [illegible] etc.

The new constitution came into force on [illegible].

National flag: saffron, white, dark green (horizontal); with Asoka's wheel in navy blue in the centre of the white band.

National anthem: Jana Gana Mana (words by R. Tagore).

Government.

President of the Republic.—Dr. Rajendra Prasad (elected 23 Jan., 1950; sworn in 26 Jan., 1950).

There is a Council of Ministers to aid and advise the President of the Republic in the exercise of his functions. A Minister who for any period of

6 consecutive months is not a member of the Legislature ceases to be a Minister at the expiration of that period.

Following is the present composition of the Cabinet and the portfolios held by the Ministers (1 April, 1951):—

Prime Minister, Minister of External Affairs and Scientific Research.—Jawaharlal Nehru.
Home Affairs.—C. Rajagopalachari.
Parliamentary Affairs.—Satya Narain Sinha (*Minister of State*).
Information and Broadcasting.—R. R. Diwakar (*Minister of State*).
Food and Agriculture.—K. M. Munshi.
Defence.—Sardar Baldev Singh.
Finance.—Chintaman Deshmukh.
Law.—Dr. B. R. Ambedkar.
Railways and Transport and States.—Sir N. Gopalaswami Ayyengar.
Railways.—K. Santhanam (*Minister of State*).
Commerce and Industry.—Hari Krishan Mahtab.
Natural Resources and Scientific Research.—Sri Prakasha.
Works, Production and Supply.—N. V. Gadgil.
Communications.—Rafi Ahmad Kidwai.
Health.—Rajkumari Amrit Kaur.
Education.—Maulana Abdul Kalam Azad.
Labour.—Jagjivan Ram.
Rehabilitation.—A. P. Jain.
Minorities.—C. C. Biswas.

The salary of each Minister is Rs. 36,000 per annum, and, except for Ministers of State, sumptuary allowance (Rs. 6,000) and furnished residences in Delhi and Simla. At the head of each Ministry is one of the secretaries of the Government of India. The Ministers of State are not members of the Cabinet.

States.—1947–48 witnessed the beginning of revolutionary changes in the constitutional set up of the States. The bigger States, including viable units, like Gwalior, Patiala and Indore agreed to integrate themselves to form Unions with a common executive, legislative and judiciary. The covenants relating to the formation of these Unions have the concurrence and guarantee of the Government of India.

Name of Union	Area in sq. miles	Population in 1 000s
United State of Saurashtra	21,062	3,556
Rajasthan Union	128,424	13,085
United State of Madhya Bharat	46,710	7,141
Patiala and East Punjab States Union	10,099	3,424
United State of Travancore and Cochin	9,155	7,493

The smaller States which were not viable units, executed agreements for the administrative merger of the States with the neighbouring Provinces, *e.g.*, Orissa, Central Provinces and Berar, Madras, Bombay, etc.

Local.—There were at the end of 1947–48, 360 [1] municipalities, with a population of 16¼ million. The total number of members of the municipal bodies was 7,085, of whom 6,932 were non-official. The municipal bodies have the care and lighting of the roads, water supply, drainage, sanitation, medical relief, vaccination and education, particularly primary education; they impose taxes, enact bye-laws, make improvements and spend money, with the sanction of the Provincial Government. Their aggregate income in 1947–48 was Rs. 16,43,39,300, exclusive of loans, sales of securities, and other extraordinary receipts amounting to Rs. 60,84,08,759. The aggregate expenditure was Rs. 23,77,97,928, excluding extraordinary and debt expenditure of Rs. 53,46,14,513. By the Local Self-Government Acts of 1883–84, the elective principle was introduced, in a large or small measure, all over India, and has since been further extended by recent legislation. In all larger towns, and in many of the smaller towns, the majority of members of committees are elected by the ratepayers; everywhere the majority of town committees consists of Indians, and in many committees all the members are Indians. In many municipalities women have the right to vote, and in a few they are eligible for election. For rural tracts there were, in 1947–48, 201 [2] district and sub-district boards or councils, and 397 major panchayat boards in Madras, with 7,543 members, 7,087 being elected. These boards are in charge of roads, district schools, markets, public health institutions, etc. Their aggregate income in 1947–48 was Rs. 19,20,00,829 and expenditure Rs. 18,30,14,085.

Area and Population.

I. Progress of the Population.

Indian Union.[3]

The area of the Indian Union, including States, is 1,218,327 square miles, and its population 318,776,000 according to the 1941 census but arranged according to the lay-out of Provinces and States as on 31 Dec., 1949. The estimated mid-year population for 1949–50 is 360,185,000.

Vital statistics [4] 1949 (and 1948):—Birth rate, 26·8 (25·4) per 1,000 population; death rate, 16·0 (17·1) per 1,000 population; infant mortality, 122 (131) per 1,000 live birth[illegible] divorces are not registered.

Following are the leading [illegible] of 1 March, 1941, and that of 24 Feb., 1931:—

[1] Does not include figures for the East Punjab, Assam, Delhi and Northern and Central Divisions of Bombay as they are not available.
[2] Does not include figures for Uttar Pradesh, East Punjab and Assam.
[3] Figures have been arranged according to the lay-out of Provinces and States as on 31 Dec., 1949.
[4] Figures for 1949 are provisional.

Province or State	Area in square miles	Population, 1941 (in thousands)			
		Total	Total	Males	Females
Provinces	737,409	217,004	217,752	127,159	120,593
Madras	127,768	44,659	49,841	24,800	25,040
Bombay	115,570	25,017	29,384	15,184	14,200

[1] Patiala and East Punjab States Union.

Figures given in thousands are rounded individually to the nearest thousand; hence the difference in some cases between the details and the total.

II. Indians Overseas.

Indians settled in various parts of the British Commonwealth :—In Ceylon, according to the 1940 census, there were about 800,000 Indians; in British Malaya, 748,829; in Mauritius, 269,885; in Kenya, 44,635; in Uganda, 13,026; in Zanzibar, 14,242; in Tanganyika, 23,422; in Jamaica, 19,039; in Trinidad, 161,106; in British Guiana, 142,736; in Fiji, 94,966; in Canada, 1,599 Indians settled in Vancouver; in Australia, 2,404, and in New Zealand, 1,146.

III. Language of the Population.

The official language of the Union is Hindi. For a period of 15 years from the commencement of the Constitution, English shall continue to be

used for all official purposes. The following 14 languages are recognized:—Assamese, Bengali, Gujarati, Hindi, Kannada, Kashmiri, Malayalam, Marathi, Oriya, Punjabi, Sanskrit, Tamil, Telugu, Urdu.

IV. Principal Towns.

Population (1941) of cities (towns with a population of 100,000 and over) in India was as follows:—

Calcutta [1]	2,610,256	Baroda and Cantonment	153,301
Bombay	1,489,883	Indore	203,695
Madras and Cantonment	777,481	Coimbatore	130,348
Hyderabad and Secundrabad Cantonment	739,159	Ajmer	147,258
Lucknow and Cantonment	387,177	Moradabad	142,414
Delhi and Cantonment	695,686	Ambala and Cantonment	104,835
Ahmedabad and Cantonment	595,210	Calicut	126,352
Benares and Cantonment	263,100	Shahjahanpur and Cantonment	110,163
Agra and Cantonment	284,149	Mysore	150,540
Cawnpore and Cantonment	487,324	Jhansi and Cantonment	103,254
Allahabad and Cantonment	260,630	Jullunder and Cantonment	135,283
Poona and Cantonment	298,644	Koil (Aligarh)	112,655
Amritsar and Cantonment	391,010	Trivandrum	128,365
Jaipur	175,810	Saharanpur	108,263
Patna	175,706	Sholapur	212,620
Madura	239,144	Bhawnagar	102,851
Bareilly and Cantonment	192,688	Jodhpur	126,842
Srinagar and Cantonment	207,787	Salem	129,702
Trichinopoly and Cantonment	159,566	Bikaner	127,226
Meerut and Cantonment	169,290	Bhatpara	117,044
Surat	171,443	Ludhiana	111,639
Nagpur	301,957	Jamshedpur	148,711
Bangalore	406,760	Gaya	105,223
Jubbulpore and Cantonment	178,339	Lashkar	182,492
		Kolar Gold Fields	133,859

[1] With suburbs and Howrah.

Of the Christians, the following are the chief subdivisions (1921 census):—

Denomination	Persons	Denomination	Persons
Roman Catholics [1]	2,113,659	Methodists	208,135
Anglicans	533,180	Congregationalists	123,016
Presbyterians	254,838	Salvationists	88,922
Baptists	441,479	Syrian (Romo-Syrian)	654,939
Lutheran	240,816	Syrian (others) [1]	525,607

[1] 1931 census figure

On 27 Sept., 1947, the Anglican, Methodist, Congregationalist, Presbyterian and Dutch Reformed Churches of South India joined in one 'Church of South India,' with the metropolitan see of Madras.

Education.

Literacy.—According to the 1941 census the literacy [illegible] in the country (excluding age-group, 0–5) was 14·6. For the [illegible], it was estimated to be about 18%. The next census is due to be taken in 1951.

Educational Organization.—In the states, other than those which are administered by the central [illegible], the general control over education rests ultimately with the Minister of Education. He is responsible to the state legislature, of which he himself is an elected member. Certain forms of technical education are under the technical departments concerned and come within the purview of the Minister in charge of those departments. In the centrally administered states, education is under the direct control of the central government and is administered through the Chief Commissioner of the state concerned. The authority of the [illegible] controlling the system of education is in part delegated [illegible], boards of secondary and/or intermediate education, local bodies (district boards, municipal boards, cantonment boards etc.), and some philanthropic and religious societies and [illegible].

The central Ministry of [illegible] works as a clearing house of educational information. It also deals with education in centrally administered states, grants to universities, colleges, scientific and technical research institutes and societies, overseas and cultural, and scheduled castes' and backward tribes' scholarships, U.N.O. fellowships, schemes for social and basic education, co-ordination of technical education in the country, centrally administered educational institutions, such as the Delhi Polytechnic, Central Institute of Education, Delhi, Eastern Higher Technical Institute, Hijli and public schools at Sanawar and Lovedale, etc., state development programmes, museums and ancient monuments, and Department of Archives, Archæology and Anthropology. A Central Advisory Board of Education assists the central and states governments. The collection and collation of information about education in India and abroad and publication of educational reports and pamphlets on different subjects is done by the Central Bureau of Education, which dates its existence from 1915.

System of Education.—(a) *School Education.* The school system in India can be divided into four stages: nursery or pre-primary, primary, middle and high. The latter two combined together constitute the secondary stage. There are as yet not many nursery schools in India, but efforts are being made to provide nursery schools and classes for children below the minimum age, with compulsory attendance.

The education at the primary stage is imparted either at independent primary (or junior basic) schools or primary classes attached to middle or high schools. The period of instruction in this stage varies from 4 to 6 years and the medium of instruction is the mother tongue of the child or the regional language. Some states have provision for compulsory primary education.

The period for the middle stage varies from 2 to 4 years and instruction is given in middle classes of high schools or middle schools, the latter having, generally, primary classes attached to them. Mother-tongue or the regional language is still the medium of instruction but English is taught as an optional subject.

The high-school stage extends from 2 to 4 years. Education is given in higher classes of high schools, which have middle or primary (or both) departments attached. English is taught as a compulsory subject. The medium of instruction, which was previously English, is being gradually replaced by the regional language.

There are, in addition, schools for professional subjects such as teachers' training, engineering, technology, medicine, agriculture etc., and special schools for adults, physically and mentally handicapped, juvenile offenders etc.

(b) *Higher Education.*—Higher education is given in arts, science or professional colleges, universities and all-India educational or research institutions. The medium of instruction is English, although in a few universities arrangements have been made to teach some subjects in Hindi.

Information about universities in India on 31 March, 1950, is given in the following table :—

Name	Character	Name	Character
Calcutta (1857)	Teaching and affiliating	Travancore (1937)	Teaching and affiliating
Bombay (1857)	Teaching and affiliating	Utkal (1943)	Affiliating
Madras (1857)	Teaching and affiliating	Sangor (1946)	Teaching and affiliating
Allahábád (1887)	Teaching, unitary and residential	Punjab (1947)	Teaching and affiliating
Banaras (1916)	Teaching and residential	[illegible]	Teaching and affiliating
Mysore (1916)	Affiliating	Poona (1948)	Teaching and affiliating
Patna (1917)	Teaching and affiliating	Roorkee (1948)	Teaching, unitary and residential
Osmania (1918)	Teaching and residential		
Aligarh (1920)	Teaching and residential	Jammu and Kashmir (1948)	Affiliating
Lucknow (1920)	Teaching and residential		
Delhi (1922)	Teaching, unitary and residential	Madhya Bharat (1948)	Affiliating
[illegible] (1923)	Teaching and affiliating	S N D T.I., Women's, Bombay (1949)	Affiliating
[illegible] (1926)	Teaching and affiliating		
Annamalai (1929)	Teaching, unitary and residential	Karnatak (1950)	Teaching and affiliating

The Government of India appointed a University Education Commission to report on Indian university education and to suggest improvements and extensions. The commission started its work in Dec., 1948, and submitted its report in Aug., 1949. A special meeting of the Central Advisory Board of Education, held in April, 1950, approved most of the recommendations of the Committee. The Government of India have accepted the Board's recommendations and efforts are being made to implement these, subject to the availability of financial resources.

Development Programmes.—A plan for post-war development of education in India was prepared by the Central Advisory Board of Education early in 1944. It aimed at giving the country a modern system of education which would include universal, compulsory, primary education, within 40 years. The period was, however, considered too long by the All-India Educational Conference held in New Delhi in Jan., 1948. It expressed the opinion that under the scheme of junior basic education compulsion should be introduced for children of 6 to 11 within a period of 10 years, and that later the compulsory stage should be extended to children between the ages of 11 and 14.

The Government of India appointed a Committee to examine the existing financial resources and the programme for educational development for all the states and to make suggestions to ensure that educational development may not be held up for want of funds. The Committee recommended a scheme by which compulsion could be extended from year to year so that at the end of the first 5 years a substantial portion of all children in the age-group, 6–11, will be compulsorily attending schools.

Scholarships.—The Government of India, in co-operation with the states governments, have sent abroad 1,546 scholars from the year 1945–46

up to 31 Oct., 1950, under the Overseas Scholarships Scheme; out of this, 454 scholars are still receiving training abroad. The Scheme did not operate during 1948 and 1949. During 1950, 49 scholars have been selected for studies abroad. The Scheme is intended to be essentially a short-term scheme to be implemented only so long as adequate facilities for training are not available in India.

The Government of India also provide educational facilities to foreign students for studies in India. In 1949 a scheme was started to award 70 government scholarships every year to Indian and indigenous students of neighbouring countries for higher studies in India.

The Government of India have also a scholarships' scheme for providing educational facilities to scheduled castes', scheduled tribes' and other backward classes' students pursuing post-matriculate studies in India. During 1950–51, 1,845 scholarships of the total value of Rs. 12,00,000 have been awarded.

Technical Education.—An All-India Council for Technical Education has been set up to make a survey of the needs in the matter of technical and scientific education of the country as a whole. The Council has recommended that grants to the extent of Rs. 1·5 crores capital and Rs. 25 lakhs ultimate recurring be given to 14 engineering and technological institutions for their improvement and expansion. Government have accepted this recommendation in principal and have already made capital and recurring grants amounting to Rs. 56·26 lakhs and Rs. 10,98,875 respectively. In the provincial development 5-year plans, provision has been made for the establishment of 47 new technical institutions and expansion and re-organization of 20 existing ones. For the training of high-grade engineers and technologists the Government of India proposed the establishment of 2 central higher technological institutions near Calcutta and Bombay, each with facilities to train about 2,000 undergraduates and 1,000 post-graduates in the first quinquennium 1947–52. Of these, one institution at Hijli in Khargpur district started functioning during 1951.

A Scientific Manpower Committee was appointed by the Government of India in April, 1947, to assess the country's requirements for different grades of scientific and technical manpower. An expenditure amounting to Rs. 25 lakhs was incurred during 1949–50 for implementing the interim recommendations. It is proposed to spend about Rs. 22 lakhs during 1950–51. The Committee submitted its final report in July, 1949, which is under consideration.

Educational Statistics.—The following tables give provisional figures for the year ending 31 March, 1949 :—

(*a*) INSTITUTIONS AND STUDENTS.

Type of institution	No. of institutions	No. of students on rolls
(i) *Recognized* :—		
Universities	26	264,500
Arts and science colleges	455	
Professional colleges	200	58,700
Secondary schools	18,900	4,351,000
Primary schools	192,800	15,999,000
Professional and special schools	16,160	586,500
(ii) *Unrecognized*	10,890	425,200
Total	239,431	21,684,900

(*b*) EXPENDITURE (ON RECOGNIZED INSTITUTIONS).

	Rs.
From government funds	45,08,65,000
From local boards funds	9,65,54,000
From fees	17,49,88,000
From other sources	9,64,41,000
Total	81,88,48,000

(*c*) NUMBER OF TEACHERS (IN RECOGNIZED INSTITUTIONS).

Universities and colleges	16,244
Secondary schools	179,100
Primary schools	477,100

(*d*) EXAMINATION RESULTS.

Students getting :—	
(i) Degrees	
1. In arts and science subjects	31,563
2. In professional subjects	15,101
(ii) [illegible] ate)	67,712
(iii) [illegible] certificates	234,200

Newspapers.—During 1949 the following states published more than 100 separate newspapers and periodicals :—Madras, 946; Uttar Pradesh, 784; West Bengal, 698; Bombay, 587; Delhi, 267; Punjab, 259; Bihar, 173; Travancore-Cochin, 169; Madhya Pradesh, 150; Mysore, 115.

Justice and Crime.

All the courts in the country form a single hierarchy, with the Supreme Court at the head. Immediately below the Supreme Court are the various State High Courts and below them are the subordinate courts of each state. Every court in this chain, subject to the usual pecuniary and local limits, administers the whole law of the country whether made by Parliament or by the state legislatures.

With the passing of the Federal Court (Enlargement of Jurisdiction) Act, 1947, all civil appeals, and with the passing of the Abolition of Privy Council Jurisdiction Act, 1949, all criminal appeals, which used to be filed with the Privy Council, lie to the Federal Court.

The Federal Court of India is the highest supreme court in respect of constitutional matters. The Provinces of Madras, Bombay, West Bengal, U.P., Bihar, the East Punjab and the Central Provinces and Berar have each a High Court, with a maximum of 15, 13, 15, 12, 11, 7 and 7 judges, respectively. There is an appeal to the Privy Council in England but in all cases other than criminal cases, the leave of the Federal Court is to be obtained. Oudh has a Chief Court. For Orissa the High Court of Patna, and for Assam the High Court of Calcutta, has been the highest judicial authority but High Courts have been proposed for bo[illegible] administrations of Coorg and Ajmer-Merwara have [illegible] For Delhi, the High Court of East Punjab is the highest judicial authority. Below the High Courts, for criminal cases, there are Courts of Session, and below these, courts of magistrates (first, second and third class). The inferior civil courts are determined by special acts or regulations in each province. The most extensive system consists of the sessions judge acting as a 'district judge,' subordinate judges and, below them, 'munsifs.' There are also numerous special courts to try small causes. Side by side with the civil courts there are revenue courts, presided over by officers charged with the duty of settling and collecting the land revenue.

Statement showing the strength of police in the various provinces of India (post-partition figures), with the sanctioned strength for 1949 in brackets :—

Coorg	155 (215)	Delhi	4,364 (5,635)
United Provinces	65,976 (58,875)	Orissa	5,900 (12,276)
Central Provinces	18,299 (21,698)	East Punjab	20,708 (21,986)
Madras	44,887 (55,104)	Andaman and Nicobar Islands	— (535)
Bombay	43,696 (59,628)	Himachal Pradesh	— (1,830)
Assam	3,600 (7,977)		
Bihar	21,668 (29,929)	Total	260,170 (312,771)
West Bengal	29,567 (35,963)		
Ajmer-Merwara	1,350 (2,120)

Finance.[1]

(Rs. 13½ = £1.)

Revenue and expenditure of the Central Government for 6 years :—

Years ending 31 March	Revenue (crores of Rs.)	Expenditure (crores of Rs.)	Years ending 31 March	Revenue (crores of Rs.)	Expenditure (crores of Rs.)
1947	336,18	381,48	1950	332,37	336,10
1948[4]	178,77	185,29	1951[2]	387,21	379,28
1949	371,70	320,86	1952[3]	401,00	375,43

[1] Definite sources of revenue are allocated to provincial governments. Hence the accounts and estimates of the Government of India embrace only the transactions of the Central Government. With the introduction of provincial autonomy from 1 April, 1937, the balances of the provincia[illegible] have been separated from those of the Central Government. From 1 April, 1[illegible], [illegible] and Sind have been constituted into governor's provinces. From 1 April, 1937, [illegible] are paid to certain provincial governments from the resources [illegible] A share of net receipts from taxes on income other than central emoluments and supertax on companies is paid to provincial governments. A share of the net duty on jute export is also paid to the provincial governments in whose territory jute is produced.

[2] Revised. [3] Budget (as passed by Parliament).

[4] From 15 Aug., 1947, to 31 March, 1948.

The following table shows the important items of revenue and expenditure charged to revenue of the Central Government for 1950–51 (Budget estimates) :—

Revenue	Rs. crores	Expenditure	Rs. crores
Customs	1,06,54	Direct demands on revenue	13,81
Central excise duties	71,50	Irrigation	23
Corporation tax	38,10	Debt services	36,50
Taxes on income, other than corporation tax	1,28,68	Civil administration	50,06
Currency and mint	9,52	Currency and mint	1,76
Railways (net contribution)	6,37	Civil works, etc.	9,97
Posts and telegraphs (net contribution)	4,04	Miscellaneous	38,70
		Defence services (net)	1,68,01
		Contributions and miscellaneous adjustments between union and states' governments	15,41
		Extraordinary items	3,44

The following tables show the revenue and expenditure of the states (in lakhs of rupees).

Part A States	Revenue		Expenditure	
	1949–50 (revised)	1950–51 (budget)	1949–50 (revised)	1950–51 (budget)

[illegible] Punjab States Union	5,25	4,57	5,34	4,54
Total	96,98	90,33	95,45	90,83

Land Revenue.—This is levied according to an assessment on estates or holdings. In the greater part of West Bengal, Bihar, Orissa, and in some

districts of Madras, and the United Provinces of Agra and Oudh, the assessment was fixed permanently at the end of the 18th century; while it is fixed periodically at intervals of from 12 to 40 years over the rest of India. For details as to the nature of the different tenures of land that prevail in India *see* THE STATESMAN'S YEAR-BOOK, 1886, p. 799. *See also* under AGRICULTURE.

Opium.—In India the cultivation of the poppy for the production of opium is confined to Uttar Pradesh (formerly the United Provinces), and the area under poppy cultivation in that state has been drastically reduced. The area settled for cultivation during the season 1947–48 was 30,300 bighas. Opium is also grown in many of the former princely states of Central and Northern India. The question of suppressing poppy cultivation in these states was investigated by a committee, which started work in Nov., 1927. After giving careful consideration to the report submitted by the committee, the Government of India entered into fresh contracts with the states for the supply of crude opium to Government on a quota system, with an assurance that these quotas would not be reduced except *pari passu* with the diminution of production in British India. These agreements remained in force for a period of 4 years ending on 30 June, 1936, during which period the states submitted to effective restriction or prohibition of cultivation otherwise than for the Government of India. These agreements have been renewed periodically with successive increases in the quota in view of Allied war requirements, but it was reduced from the season 1945–46. In order to secure greater control over production of opium in Indian states, the Government of India have made certain amendments in the terms of agreements between the Government of India and [illegible] states; it has been stipulated that the states (with two or three [illegible] will permit no poppy cultivation except for supply to the Government and that they will purchase from the Government stock the hard opium required for internal consumption. The question of introducing an effective control over poppy cultivation in the Simla hill states and of the suppression of illicit export of opium from these states was carefully considered by the Government, but as it was not found possible to suppress cultivation, certain neighbouring provinces and Indian states have [illegible] like steps to improve the effectiveness of their preventive [illegible] Export to China was prohibited in 1913, and exports of opium from India, except for strictly medical and scientific purposes, have ceased from the beginning of 1936, barring small exports to the French and Portuguese Settlements in India and to Nepal, Zanzibar and Pemba, which are made in accordance with long standing practice and are subject, of course, to arrangements which confine the amounts of such exports to the quantities approved by the governments of those territories. Export of opium is also allowed to Aden and Burma for purposes other than medical and scientific, because these territories formed an integral part of India before 1937. In order to meet the demands arising as the result of the war, exports of opium for medicinal and scientific purposes were allowed to Eastern Group countries, the United Kingdom, U.S.A. and Australia, but these exports, except to the United Kingdom, have been discontinued since the end of the war.

In fulfilment of their international obligations, the Government of India have, in consultation with the provincial Governments, decided to prohibit altogether the smoking of opium in India, exception being made only in [illegible] addicts so long as they survive and subject to their producing [illegible]. The Indian states before 1947 had also adopted a similar policy in their territories.

Debt.—On 31 March, 1948, the estimated interest bearing obligations of the Government of India was estimated to amount to Rs. 24·95 crores.

Defence Services.

The partition of the country into the two Dominions of India and Pakistan in 1947 meant a division of the armed forces. The Royal Indian Navy, the Indian Army and the Royal Indian Air Force were divided between the two Dominions on a territorial-cum-optional basis and the result was a division in the approximate proportion of one-third to Pakistan and two-thirds to the Union of India.

The Defence Minister is responsible for all three services. He is assisted by the Defence Committee of the Cabinet, the Defence Minister's Committee and the Chiefs of Staff Committee. Each service is under its own head, designated 'Chief of the —— Staff and C.-in-C. of the ——.'

Pending the establishment of a Defence Academy at Khadakvasla near Poona, an experimental Defence Academy at Dehra Dun has been operating from 1 Jan., 1949.

A National Cadet Corps (Senior, Junior and Girls' Divisions) has been constituted in colleges and schools; the Senior Division includes Air units. A Territorial Army is being built up.

The order of precedence has been prescribed as Army, Navy and Air Force.

The King's Colours have been laid up at Dehra Dun, to be preserved as 'treasured relics of the past.'

The net expenditure on defence services is given as follows :—

Year ended 31 March	Expenditure	Year ended 31 March	Expenditure
	Rs crores		Rs. crores
1939	46·18	1947	238·11
1943	214·62	1948	188·77
1944	358·40	1949	157·45
1945	395·49	1950[1]	182 98
1946	360·23	1951[1]	179·75

[1] Estimate.

Army.

The C.-in-C. of the Army, has under him 3 Army Commands—Southern, Eastern and Western—with their headquarters at Poona, Ranchi and Delhi respectively, and 4 main branches of the staff—General Staff Branch, Adjutant General's Branch, Quartermaster General's Branch and Master General of the Ordnance's Branch. While each command is under an Army Commander of the rank of Lieut.-General, the branches are headed by Principal Staff Officers, each of the rank of Major-General.

There are no non-Indians holding operational posts; the few British officers working in advisory capacities or holding technical posts will be gradually replaced.

Recruitment has been thrown open to all, irrespective of caste or creed, and no distinction is any longer allowed between martial and non-martial classes.

Navy.

The Indian Navy traces its history in an unbroken line from the formation in 1612 of the Hon. East India Company's Marine. Known in the early years of this century as the Royal Indian Marine, the service was reorganized in the late 1920s on a combatant basis. In 1928 it hoisted the White Ensign for the first time, and from 1934, after the passing of the Indian Navy (Discipline Act, to 1950 was designated the Royal Indian Navy. As from 26 Jan., 1950, the former 'Royal Indian Navy' has been redesignated 'Indian Navy,' and the ships referred to as 'I.N.S.' instead of 'H.M.I.S.'

The fleet now includes the 7,030-ton cruiser *Delhi* (ex-*Achilles*), 3 destroyers (*Rajput* [ex-*Rotherham*], *Rana* [ex-*Raider*], *Ranjit* [ex-*Redoubt*]), 4 frigates, formerly sloops (*Jumna, Sutlej, Kistna, Cauvery*); the boys' training frigate *Tir* (ex-*Bann*); the surveying vessel *Kukri* (ex-*Trent*) converted from a frigate; 6 fleet minesweepers; 3 motor minesweepers; 4 motor launches; the tank landing ship *Avenger*, and 6 tank landing craft. The Government is to launch a comprehensive programme of expansion of the Navy within the next 10 years and to build up a balanced naval force. The establishment of the Indian Navy is 1,000 officers and 10,000 ratings.

The partition also resulted in the loss of the three best training establishments, which were situated in Karachi, *i.e.*, the boys' training establishments, H.M.I.S. *Dilawar* and H.M.I.S. *Bahadur*, and the gunnery and radar school, H.M.I.S. *Himalaya*.

The Government of India intend to build modern [illegible] establishments for the Navy. A new boys' training establishment (I.N.S. [illegible]) has been established at Vizagapatam.

The Indian Navy has the following training establishments for ratings in Indian territory:—(*a*) Communication school; (*b*) torpedo and electrical school; (*c*) mechanical training establishment; (*d*) physical training school; (*e*) seamanship, damage control and disciplinary school; (*f*) anti-submarine school; (*g*) supply and secretariat and cookery school. Gunnery, navigation and radar schools are planned.

Since 1939, the naval dockyard at Bombay has been expanded. New machinery was installed and much work in repairing R.N., R.I.N. and Allied naval vessels carried out during the war. With the acquisition of the cruiser and 3 destroyers further developments in the dockyard are expected.

Air Force.

The Royal Indian Air Force had its origins in the recommendation of the Skeene Committee in 1926. Six years later the Indian [illegible] passed the Indian Air Force Act and the first flight was formed [illegible]. On 12 March, 1945, the King approved the designation of 'Royal' in recognition of the services rendered by the Indian Air Force during the war. In 1946 it consisted of 8 fighter and 2 transport squadrons with modern aircraft.

On the division of the country into India and Pakistan, India received 7 fighter squadrons and 1 transport squadron as its share. This force has since been considerably enlarged.

The Air H.Q., under the Chief of the Air Staff and C.-in-C. of the Air Force, consists of 3 main branches, viz. Air Staff, Personnel and Organization Staff and Technical and Equipment Staff, each under the charge of a Principal Staff Officer of the rank of Air Commodore or Air Vice-Marshal. Outside the headquarters, I.A.F. units are, in the main, organized into 2

commands—Operational Command in Delhi and Training Command at Bangalore.

The Advanced Flying School at Ambala and the Elementary Flying School at Jodhpur are now known as No. 1 and No. 2 Air Force Academies respectively. The Initial Training Wing at Coimbatore has been reorganized and is now known as No. 3 Air Force Academy for ground training. A Technical College has been established at Jalahalli, where British experts are assisting I.A.F. personnel on the staff. An Air Navigators' Training School exists at Jodhpur, while a Flying Instructors' School, a Paratroopers' School and a Radar School have been opened. Selected Air Force officers have been regularly sent to the U.K. for specialized training and a permanent liaison staff has been set up in England to supervize them during their course of instruction and to ensure the procurement of aircraft and equipment for India.

Agriculture and Industry.

Agriculture, Land Tenure, etc.—The chief industry of India has always been agriculture. In undivided India the total number of the population supported by agriculture, including forestry and raising livestock, and excluding non-working dependents, [illegible] to the census of 1931, about 110 million out of a total [illegible] 353 million. The last census in 1941 did not specify the agricultural population. In most of the states there is a department of agriculture. There are staffs of experts in these states; a central staff of experts with a fully-equipped central station, research institute and college for post-graduate training of private students and of those who have completed the agricultural course in state colleges; a civil veterinary department for the prevention and cure of cattle diseases; an Indian veterinary research institute for the preparation of sera and anti-toxins and an Indian dairy research institute. Following the recommendations made by the Royal Commission on Agriculture, an Indian Council of Agricultural Research has been established by the Government of India. Besides, there are 8 Central Commodity Committees which carry on research and development on some important commodities, viz., cotton, jute, sugar cane, tobacco, oilseeds, coconuts, lac and arecanuts. The production and introduction into general cultivation of improved strains of crops still forms the most prominent feature of the work of agricultural departments.

For the proper maintenance of agricultural statistics in most of the states, there are departments of land records. In the temporarily settled areas and now in most of the permanently settled areas too, the statistics are based on complete enumeration. At the centre for co-ordinating and compiling all-India statistics there is a directorate of economics and statistics under the Ministry of Agriculture, Government of India. This directorate was set up in 1948 and has already brought out a number of useful publications on area and yield statistics, livestock statistics, forests, food distribution, prices and commodities such as rice, wheat, cotton, jute, sugar cane, etc. The directorate publishes a monthly journal, 'Agricultural Situation in India.'

In states where the *zamíndárí* tenure prevails (*i.e.*, where single

The following table, so far as returns are available, shows, in thousand acres, according to states, the net area, and the classification of areas of India that were in 1946–47 cultivated and uncultivated, and the areas under forests and irrigation.

States	Net area according to village papers	Cultivated		Uncultivated		Forests	Net area irrigated
		Net area actually sown	Current fallows	Other uncultivated land, excluding current fallows	Not available for cultivation		
Assam	33,462 [1]	5,184	1,524	17,612	4,247	4,056	1,124
Bihar	44,326	17,691	7,083	6,415	6,525	6,612	5,320
Bombay	57,810	33,714	6,095	1,965	7,199	8,837	1,504

West Bengal	19,549	11,635	1,126	1,988	3,091	1,709	1,856
Ajmer	1,561	443	180	295	596	47	101
Coorg	1,012	156	49	226	250	331	6
Delhi	363	186	39	62	76	—	51
Other states [2]	139,863	62,184	15,001	18,208	27,782	16,688	8,262
Total	556,675 [1]	243,887	50,523	88,592	93,072	79,762	48,356

[1] Includes 839,000 acres of the newly constituted district of Tirap Frontier Tract for which details are not available.
[2] Relate to Hyderabad, Jammu and Kashmir, Madhya Bharat, Mysore, Patiala and East Punjab States Union, Rajasthan, Saurashtra, Travancore-Cochin, Bhopal, Bilaspur, Himachal Pradesh, Kutch and Vindhya Pradesh.

proprietors or proprietary brotherhoods possess large estates of several hundreds or thousands of acres), the state land revenue is assessed at an aliquot part (considerably less than one-half) of the ascertained or assumed rental, this aliquot part being itself the land tax. The revenue is payable on each estate as a whole, the assessment remaining unchanged for the period of settlement. In the greater part of West Bengal, Bihar and Orissa, and in parts of Uttar Pradesh and Madras, the settlement is a permanent one and not liable to revision. In states where the *raiyatwárí* (or *ryotwari*) tenure prevails (*i.e.*, where each petty proprietor holds directly from the state and has no landlord between himself and the government), the revenue is separately assessed on each holding and land revenue becomes payable at once (or after a short term of grace in the case of uncleared lands) on all extensions of cultivation. The *raiyatwárí* proprietor may throw up his holding, or any portion of it, at the beginning of any year after reasonable notice, whereas the *zamíndár*, or large proprietor, engages to pay the revenue assessed upon him throughout the term of the settlement.

The *zamíndárí* system is being replaced by the *ryotwari* system in most of the states of India. Bihar, Madras and Uttar Pradesh have already passed legislation for the abolition of *zamínddrí*, while in the case of Assam and Madhya Pradesh, bills have yet to receive assent of the President. In Madhya Bharat and Orissa, the proposed bills have been referred to select committees. In a number of other states, committees have been set-up to examine the problem.

The following table shows in 1945–46 the returns of the land surveyed under the two types of tenure, and the land revenue assessed in certain Indian states (excluding merged territories) :—

States	Zamíndárí and village communities			Raiyatwárí, etc.		
	Area surveyed, acres	Population of surveyed area	Revenue in Rs.	Area surveyed, acres	Population of surveyed area	Revenue in Rs.
Ajmer (1946–47).	1,561,330	389,443	3,03,045	—	—	—
Assam (1945–46)	3,354,044	(*a*)	16,70,325	29,262,940	7,555,621	1,37,68,919

[1] In terms of raw sugar (gur). [2] Nuts in shell.
[3] Yield of tea, coffee and rubber in lb.; of cotton in bales of 392 lb., and of jute in bales of 400 lb.

Yield (in 1,000 tons) in 1949–50 (reporting areas) :—Rice, 21,913 (from 71,660,000 acres); wheat, 6,110 (from 23,627,000 acres); tobacco, 223 (from 774,000 acres); cotton, 2,165,000 bales (from 11,793,000 acres). In 1948–49 :—Rice, 21,725 (from 70,275,000 acres); wheat, 5,472 (from 21,855,000 acres); tobacco, 255 (from 803,000 acres); cotton, 1,767,000 bales (from 11,293,000 acres). Jute crop, 1948–49, acreage, 833,580; production, 2,054,775 bales; 1949–50, acreage, 1,158,318; production, 3,116,699 bales.

Livestock Census, in India, 1945 :—Cattle, 136,739,000; buffaloes, 40,732,000; sheep, 37,728,000; goats, 46,302,000; horses and ponies, 1,398,000; mules, 45,000; donkeys, 1,131,000; camels, 656,000; pigs, 3,709,000; poultry, 58,248,000.

Forests.—The lands under the control of the provincial forest departments are classified as ' reserved forests ' (forests intended to be permanently maintained for the supply of timber, etc., or for the protection of water supply, etc.), ' protected forests ' and ' unclassed ' forest land. The following table shows the extent of these areas (in square miles) in 1946–47 in certain Indian states (excluding merged territories) :—

State	Reserved forests	Protected forests	Unclassified	Total
Ajmer	73	—	—	73
Andaman and Nicobar Islands	1,498	554	137	2,189
Assam	6,691	93	14,484	21,268
Bihar	1,403	807	2	2,212
Bombay	10,559	160	—	10,719
Coorg	517	26	291	834
Madhya Pradesh	19,425	—	—	19,425
Madras	15,833	37	—	15,870
Orissa	1,396	1,417	1	2,814
Punjab (India)	486	3,845	428	4,759
Uttar Pradesh	5,244	885	78	6,207
West Bengal	2,648	1	—	2,649
Total	65,773	7,825	15,421	89,019

The net revenue for the state forests in 1946–47 from the above mentioned States and Forest Research Institute and Colleges was Rs. 6,27,20,000.

Irrigation.—The area of over 50 million acres under irrigation exceeds that of any other country. The length of canals is about 60,000 miles and the total capital outlay on irrigation works is Rs. 120 crores. Details of the benefits extended to the various areas are shown under the separate Provinces.

Industries.—The most important indigenous industry, after agriculture, is the weaving of cotton cloths. Other important indigenous industries are silk rearing and weaving, shawl and carpet weaving, wood-carving and metal-working. One of the most important industries connected with agriculture is the tea industry, the average number of persons employed daily being 790,323 (1946). The area under tea in 1946 was about 689,838 acres, distributed as follows:—Assam, 362,404; West Bengal, 130,735; Bihar, 3,255; United Provinces, 5,910; East Punjab, 9,825; Madras, 81,740; Coorg, 415; Tripura (West Bengal), 11,180; Travancore, 77,173; Mysore, 4,524; the Cochin State, 1,674, and the Mandi State (East Punjab), 1,073. The production was, in 1946, 509 million lb. The exports of tea were 348,962,000 lb. in 1938–39; 327,365,000 lb. in 1946–47.

Tea crop [illegible] Eastern Pakistan) was estimated at 586,400,000 lb. in 1947 and [illegible] lb. in 1948.

Production, 1948–49, of factory sugar and gur, 5,000,000 long tons; of refined sugar, 1,000,000 long tons.

Annual production of wool in India in 1949 is estimated at 54,500,000 lb., including 4,700,000 lb. of pulled wool and 4,900,000 lb. from lambs under one year old. From April, 1947, to March, 1948, India exported 26,000,000 lb. of raw wool, of which the United States received 11,700,000 lb. and the United Kingdom 12,600,000 lb.

By a Government of India resolution of 2 Sept., 1948, a Central Advisory Council of Industries was constituted, consisting of representatives of the Central, Provincial and States Governments and of unofficial commercial, labour and industrial bodies.

Some statistics for 1945 of mills, factories, etc., subject to the Indian Factories Act, are given as follows for British India (*excluding* Indian states and government factories):—

Class of industry	No. of establishments	No. of workers	Class of industry	No of establishments	No. of workers
Cotton spinning and weaving mills	875	655,731	Tea factories	1,063	71,896
Jute mills	87	303,319	Foundries	180	12,536
Cotton - ginning and pressing factories	1,638	105,366	[illegible]	34	90,331
Railway and tramway workshops	46	33,264	Saw mills	270	14,819
Rice mills	1,900	57,501	Petroleum refineries	4	3,360
General engineering	1,011	110,714	Woollen mills	31	11,613
Electrical works	175	21,081	Sugar factories	478	92,686
Printing, bookbinding, etc.	831	34,826	Stone dressing	11	615
Tanneries and leather works	282	35,051	Oil mills	434	29,934
Jute presses	59	7,960	Kerosene tinning and packing works	44	12,482
Tile and brick factories	209	20,913	Motor works and coach building	210	20,629
Shipbuilding and engineering	25	32,854	Tobacco factories	249	34,213
			Paper mills	24	18,276
			Lac factories	18	2,237
			Silk mills	152	7,580

With regard to cotton spinning and weaving, the number of spindles in all India on 31 Aug., 1947 was 10,353,973, and of looms, 202,662. The production of yarn in 1947–48 was 1,330 million lb. and of woven goods, 899 million lb.

The estimated output of steel during 1947 was 900,000 long tons.

Electricity and Power.—Statistics for 1949 of the installed capacity of generating plant and energy generated in India :—

Type of power plant	Number of authorised undertakings	Installed capacity of generators as at 31 Dec., 1949 (kw.)	Kwh. generated in 1949 (millions)
Steam	60	852,639	2,243,669
Oil	266	125,468	175,755
Hydro	21	559,079	2,489,865
Total	347 [1]	1,537,186	4,909,289

[1] In addition to these there are 139 authorised undertakings which purchase energy in bulk for distribution to ultimate consumers.

Cinemas.—The number of cinemas operating in India in 1950 was 2,058 with a seating capacity of 1,393,876.

Companies.—On 31 March, 1948, there were 22,674 joint-stock companies incorporated in the Indian Union, including Mysore, Baroda, Gwalior, Indore, Hyderábád, Travancore and Cochin, and in operation, with paid-up capital of Rs. 5,69,56 lakhs.

Co-operative Societies.—On 30 June, 1949, there were in the Indian Union, including all states which have acceded to it, 134,815 agricultural co-operative societies with a membership of 6,963,265. For separate details see under some of the Indian states and provinces.

Mineral Production.—The quantity and value (in rupees) of certain minerals produced in India in 1948 were as follows (£1 = Rs. 13·4) :—

Items	Quantity	Value	Items	Quantity	Value
Coal . . tons	30,124,175	45,20,56,474	Ilmenite . tons	229,416	31,36,697
Manganese ore[2] do.	525,876	1,78,49,256[1]	Saltpetre . cwt.	2,972	11,31,622
Gold . . oz.	180,429·79	5,43,20,157	Chromite . tons	22,555	7,05,963
Petroleum . gals.	65,607,982	1,08,99,126	Magnesite . do.	48,327	6,61,015
Salt . . tons	2,264,536	4,33,88,667	Diamonds . carats	2,426	4,17,373
Iron ore . do.	2,284,587	1,02,99,463	Silver . oz.	12,797	60,299
Mica[2] . . cwt.	361,875	6,14,40,100	Graphite . tons	1,649	2,64,349
Copper ore . tons	322,282	80,44,332			

[1] f.o.b. value at Indian ports. [2] Export figures.

In 1949, 1,588,719 tons of pig-iron and 3,491 tons of aluminium were produced; 613,907 tons of manganese and 6,382 tons of chromite were exported. Coal output in 1949 was 31,681,232 tons.

The average number of persons employed daily in the coal-mining industry in 1948 was 348,383. The output per head employed was 86 tons.

A 5-year plan for the re-organization of the Geological Survey of India with a view to expanding the development of the Dominion's mineral

resources was accepted by the Government of India in 1947. As a result of part implementation of this plan the strength of geological, geophysical and mining officers in this department was 150 in 1950, as compared with the pre-war strength of 27.

Commerce.

The following table applies to the sea-borne external trade of India (relating to trade on both private and government accounts) :—

Years	Imports		Exports and re-exports	
	Merchandise	Treasure	Merchandise	Treasure
	Rs.	Rs.	Rs.	Rs.
1945–46	2,93,28,68,058	8,40,78,516	2,66,43,43,601	7,41,70,825
1946–47	3,35,53,84,592	36,25,09,596	3,20,78,18,910	3,09,80,756
1947–48	4,55,89,17,794	22,69,03,267	4,08,45,36,724	4,40,21,665
1948–49	5,42,91,83,527	3,05,93,820	4,23,30,87,647	1,21,95,484
1949–50	5,60,05,16,111	8,78,84,851	4,82,62,26,782	1,10,25,745

The figures for 1947–48 exclude the direct foreign seaborne trade of the Pakistan provinces of Sind and East Bengal with effect from 1 and 15 Aug., 1947, respectively. They also do not include India's seaborne trade with Pakistan up to Feb., 1948. The seaborne trade of Kutch is included with effect from June, 1948, and that of Travancore, Saurashtra and Baroda with effect from April, 1949.

The distribution of commerce by countries was as follows in years ending 31 March :—

Countries	Imports into India from		Exports of Indian produce to	
	1948–49 Rs.	1949–50 Rs.	1948–49 Rs.	1949–50 Rs.
United Kingdom	1,52,96,24,037	1,49,32,41,602	97,68,91,769	1,15,00,99,959
France	3,00,93,631	3,79,79,975	7,34,41,148	4,41,91,895
Germany	2,25,37,236	6,38,69,877	2,60,55,487	8,87,58,032
Austria	79,81,177	57,46,593	34,30,230	52,18,922
Hungary	11,66,886	6,31,357	24,88,021	22,48,603
Italy	18,31,23,176	13,94,82,691	6,46,58,939	5,21,67,709
Belgium	7,10,16,541	4,81,79,734	5,86,78,305	8,64,05,170
Netherlands	5,45,16,271	4,84,16,103	7,24,54,606	7,27,88,868
Spain	42,59,886	34,16,551	1,32,95,440	30,81,772
Union of Soviet Socialist Republics	3,25,33,166	12,62,91,718	5,36,47,358	3,20,00,806
China (including Hong Kong)	3,69,75,379	3,17,62,259	8,70,19,470	15,76,00,221
Japan	6,38,07,416	21,40,82,381	4,58,97,361	5,70,02,439
Burma	23,39,97,393	12,86,27,706	9,96,69,145	13,92,81,305
Ceylon	2,72,40,936	2,75,33,565	11,94,47,467	16,40,43,311
Straits Settlements	9,39,22,210	12,62,86,174	3,75,40,102	12,25,72,074
Java, Borneo and Sumatra	44,91,937	2,47,94,845	1,40,98,724	1,20,82,908
Arabia	1,78,93,467	2,81,95,264	3,83,22,692	6,09,44,410
Iran	20,57,36,298	32,47,63,168	3,05,87,064	4,76,79,386
Egypt	31,89,60,981	39,45,55,456	6,69,78,556	7,85,81,068
Kenya, Zanzibar and Pemba	12,18,57,569	15,69,65,186	3,77,81,283	6,46,66,241
Other E. African ports	4,65,31,284	5,68,00,530	3,66,87,972	5,13,01,412
Mauritius (including Seychelles)	20,276	13,572	1,13,44,870	1,71,12,424
United States	1,08,74,20,447	87,91,50,561	70,07,14,354	78,89,62,724
South America	15,78,96,161	12,57,86,662	25,17,55,996	13,39,92,498
Australia	26,55,11,442	33,97,55,602	20,59,99,389	26,13,08,661

See note below the following Table.

The value of the leading articles of merchandise (Indian produce only in the case of exports) was as follows in 1949–50 :—

Imports	Value (Rs.)	Exports	Value (Rs.)
Cotton (raw)	63,24,60,340	Jute (raw)	15,75,98,956
Cotton manufactures (including twist and yarn)	18,40,93,618	Jute (manufactured)	1,26,98,34,257
Sugar (refined and unrefined, molasses included)	22,523	Cotton (raw)	10,59,95,351
Metals and ores	32,07,63,583	Cotton (manufactured) including twist and yarn	74,30,80,347
Machinery and mill work	1,03,07,49,762	Rice	—
Silk (raw and manufactured)	53,42,685	Other grain and pulse	3,88,776
Artificial silk	14,64,19,191	Tea	72,43,79,694
Oils	59,18,93,814	Hides and skins and leather goods (excluding cuttings)	27,76,54,024
Chemicals	7,62,73,445	Seeds (oil seeds mainly)	14,79,64,311
Hardware	6,13,60,898	Lac (excluding lac dye)	8,08,45,020
Liquors	1,80,31,816	Wool (raw)	3,71,47,342
Matches	429	Wool (manufactured)	3,65,27,272
Paper and pasteboard	8,65,68,094	Oils	8,79,12,796
Salt	1,36,30,047	Rubber (raw)	1,30,667
Woollen goods	5,98,15,254	Dyes and tans	1,15,60,885
Spices	3,53,55,646	Paraffin wax	1,56,74,763
Provisions	7,69,33,468	Spices	18,63,43,382
Instruments, apparatus and appliances, not elsewhere specified	20,67,16,442	Saltpetre	16,036
Tobacco	2,23,23,627	Hemp (raw)	1,74 88,190
Glass and glassware	1,91,40,168	Manganese ore	5,84,81,947

Imports	Value (Rs.)	Exports	Value (Rs.)
Dyeing and tanning substances	9,33,96,485	Other kinds of metals and ores	3,17,45,873
Drugs and medicines	7,85,48,639	Oilcakes	5,93,055
Wood and timber	3,02,35,419	Provisions	64,17,643
Apparel (excluding hosiery and boots and shoes)	40,79,231	Fruits and vegetables	7,74,04,601
Soap	5,77,313	Tobacco	11,94,82,879
Building and engineering materials	4,25,25,487	Silk (raw and cocoons)	4,64,792
Fruits and vegetables	6,68,75,497	Silk (manufactured)	27,81,889
Paints and painters' materials	1,76,47,487	Coir goods	6,84,63,934
Tea-chests	1,26,59,847	Manures	56,94,082
Haberdashery and millinery	13,00,051	Wood	63,70,194
Belting for machinery	1,00,61,815	Coal and coke	4,03,39,085
Mechanically propelled vehicles	18,81,98,482	Sugar (refined and unrefined)	42,80,785
Stationery	1,04,95,689	Coffee	1,30,50,951
Animals, living	11,84,385		
Books, printed and printed matter	76,35,832		
Earthenware and porcelain	59,09,905		
Boots and shoes	4,02,387		
Umbrellas and fittings	53,46,097		
Grain, pulse and flour	99,64,66,732		
Coal and coke	69,083		

The figures for 1947–48 exclude the direct foreign seaborne trade of the Pakistan provinces of Sind and East Bengal with effect from 1 and 15 Aug., 1947, respectively. They also do not include India's seaborne trade with Pakistan up to Feb., 1948. From April, 1948, onwards figures relate to combined figures of trade on private account and [illegible] seaborne trade of Kutch is included with effect from June, 1948, [illegible], Saurashtra and Baroda with effect from April, 1949.

The trade between British India (until 1947), the Dominion of India (from 1948) and the United Kingdom (British Board of Trade returns) is as follows (in £ sterling) :—

	1938	1948	1949	1950
Imports into U.K. from India	49,939,297	96,348,285	98,960,329	98,370,918
Exports to India from U.K.	33,764,754	96,028,016	117,118,970	96,808,824
Re-exports to India from U.K.	534,255	385,206	313,053	471,829

Communications.

I. Railways.

	Miles open		Miles open		Miles open		Miles open
1940–41	41,052	1942–43	40,525	1944–45	40,509	1946–47	40,524
1941–42	40,477	1943–44	40,512	1945–46	40,518	1947–48	33,885

The railways open on 31 March, 1947, included 31,533 miles of India Government owned lines and 8,991 miles of other lines.

The gauges of the Indian railways in 1944–45 were :—(1) the standard, or 5 ft. 6 in. (15,639 miles); (2) the metre, or 3 ft. 3⅜ in. (15,008 miles), and (3) the special gauges of 2 ft. 6 in. and 2 ft. (3,338 miles).

The total capital at charge on railways to end of 1946–47, including lines under construction and survey, etc., was Rs. 6,39,27,01,000, and Rs. 7,41,39,58,000 in 1947–48. From 1924–25 railway finance has been separated from the general finances of the Government of India. The Delhi–Umballa–Kalka railway was purchased by the Government in April, 1926, the Southern Punjab Railway on 1 Jan., 1930, the Amritsar–Patti railway on 1 Jan., 1936, and the Bezwada–Masulipatum railway on 4 February, 1938. With effect from 1 April, 1937, the Jorhat railway became the property of the Central Government under the Government of India Act, 1935. The Government also took over the following railways on the dates shown:—Larkana Jacobabad (3 May, 1939), Hardwar Dehra (1 Jan., 1940), Bengal Dooars (1 Jan., 1941), Bombay, Baroda and Central India, Bengal and Assam (1 Jan., 1942), Tapti Valley (1 April, 1942) and Mirpur Khas Khadro (1 Jan., 1943). On 1 Jan., 1943, the Government also took over the Bengal–North-Western and the Rohilkund–Kumaon railways; the combined system is now known as the Oudh Tirhut railway. On 31 March, 1944, the contract of the Guzerat railways was terminated. The Madras and Southern Mahratta railway and the South Indian railway were taken over on 1 April, 1944, and the Bengal Nagpur railway on 1 Oct., 1944. The following railways were purchased by the Government of India on the dates shown:—Dhond Baramati (1 Oct., 1944), Dibru Sodiya (1 April, 1945), Jacobabad Koshmor (1 April, 1945), Podanur Pollochi (15 Oct., 1945), Hoshiarpur Dooh branch (1 April, 1946), Sialkot Narowal (1 April, 1946), Sara Sirajganj (1 Oct., 1946), Ahmedabad Prantej (1 Jan., 1947), Mandra Bhan (1 April, 1947), Matheran Light (1 April, 1948), Darjieling Himalayan Railway and extensions (20 Oct., 1948) and Pachora Jamner (1 April, 1949).

Passengers carried in 1947–48 were 1,044,118,400; aggregate tonnage of goods, 73,464,000. The following table shows the gross earnings, working expenses and net earnings on railways during 1946–47 and 1947–48 :—

		Gross earnings	Working expenses	Net earnings
		Rs.	Rs.	Rs.
Grand total, [illegible] and Assam,	1946–47	1,67,07,29,000	1,28,42,08,000	38,65,21,000
Assam and East Punjab .	1947–48	1,74,87,87,000	1,55,06,09,000	19,81,78,000
Total, Assam and East Punjab .	1947–48	8,80,95,000	8,87,95,000	— 7,00,000
Grand total, including Assam and East Punjab . . .	1947–48	1,83,68,82,000	1,63,94,04,000	19,74,78,000

Average return on the capital at charge, 4·88% in 1946–47 and 2·66% in 1947–48. The net gain to the state, after m[illegible] for interest, etc., was Rs. 8·57 crores. The railway staff at [illegible] numbered 753 Europeans and 899,730 Indians; total, 900,483.

India and Ceylon are connected by rail and steamer ferry combined, the steamers plying between Dhanushkodi Point on Rameswaram Island and Talaimannar in Ceylon.

II. Posts, Telegraphs and Telephones.

On 31 March, 1949, there were 20,517 permanent post offices, 48,089 letter-boxes and 7,781 telegraph offices open for paid traffic. The department at the end of the year was maintaining 97,583 miles of line, including cables, and 1,235,066 miles of wire, including conductors.

The telephone system is in the hands of the Indian Posts and Telegraphs Department; the telephone exchanges which had been established in Calcutta, Madras, Bombay and Ahmedabad by private companies, under licences from the Government, were acquired by Government from 1 April, 1943. On 31 March, 1949, there were 2,747 exchanges (including sub-exchanges) and 113,466 telephones, of which 2,182 were non-exchange telephones. Private companies owned 8 exchanges and 1,662 telephones; 140 licensed systems operated 2,466 telephones.

Wireless receiver licences on 31 March, 1949, numbered 299,000.

III. Civil Aviation.

India is well served by air transport. In addition to the direct B.O.A.C. services between the United Kingdom and Delhi, Calcutta and Bombay, she is on the flying-boat route to Sydney and Singapore. As regards internal air services, there were in Nov., 1949, 36 services covering 20,661 miles. Most of the large cities and towns of India are linked by air routes. There are 10 air transport undertakings operating these routes, the longest of which are operated by Air India, Ltd., Indian National Airways, Ltd., and Air Services of India, Ltd. Some 170 aircraft are employed on the internal services. An Indian air service to Europe (Air India International, Ltd.) was established on 8 June, 1948, as a joint state and private enterprise. In Dec., 1948, it operated 3 services a week from Bombay to London. An all-up air-mail scheme for carrying all first-class mails and parcels by air was introduced from 1 April, 1949, and, in addition, a night air-mail service has been carrying passengers as well as mails between Bombay, Madras, Calcutta and Delhi *via* Nagpur.

Bharat Airways, Ltd., is operating an air service on the Calcutta–Bangkok route. The Air India International began in 1950 operating an air service from Bombay to Aden and Nairobi.

Statistics for the calendar year 1949 show 93,000 hours flown, 14,900,000 miles flown, 358,000 passengers carried, 13,300,000 lb. freight carried, 4,900,000 lb. mail carried.

Bilateral air transport agreements have been concluded with Australia,

Ceylon, France, Netherlands, Pakistan, Philippines, Sweden, Switzerland and U.S.A. Temporary [illegible] been entered into with Denmark, Egypt, Ethiopia, Norway, Persia, Thailand and the United Kingdom.

IV. Roads.

There are in India, excluding urban roads, about 91,000 miles of surfaced and 154,000 miles of unsurfaced roads maintained at public expense. Roads are divided into 5 main administrative classes, namely national and state highways, and district, village and urban roads. The national highways connect capitals of States, major ports and foreign highways, and constitute the main arteries of communication in the country. The State highways are the main trunk roads of the States, while the principal district roads connect subsidiary areas of production and markets with distribution centres, and form the main link between headquarters of neighbouring districts.

There were (31 March, 1949), 269,669 motor vehicles in India, comprising 133,399 cars, 37,882 passenger vehicles, 72,926 goods vehicles, 22,810 motor cycles, and 2,652 miscellaneous vehicles.

Money and Credit.

Value of nickel and bronze money coined at the Calcutta and Bombay Mints (year ended 31 March) :—1948, Rs. 5,74,28,000; 1949, Rs. 3,61,56,000; 1950, 5, 89,33,200.

An Act to constitute a reserve bank to operate the currency and credit system of the country was passed on 16 Feb., 1934. The bank started functioning on 1 April, 1935, bringing India into line with other important countries where the currency and credit system is controlled by central banks of issue. It was a shareholders' bank with a majority of elected members on the directorate. The Government account is kept with it, and its functions include the management of the note issue and of the public debt. In view of its altered position, an Act amending the original Imperial Bank of India Act was also passed during 1934, removing some of the limitations imposed on it, such as the prohibition of dealings in foreign exchange. An agreement was concluded between the Reserve Bank and the Imperial Bank under which the latter would be the sole agent of the Reserve Bank in places in India where there were branches of the Imperial Bank on 6 March, 1934, and there was no branch of the banking department of the Reserve Bank. The net profits of the Reserve Bank of India for the year ended 30 June, 1947, amounted to Rs. 8,02,27,306.

Under the provisions of the Reserve Bank of India (Transfer to Public Ownership) Act, 1948, the Reserve Bank became a State-owned institution with effect from 1 Jan., 1949.

Since 1835, rupees have been coined as required to meet public demands. There has been no coinage from purchased silver since 1921–22. Reserve bank-notes and Government of India currency notes are legal tender at any place in India. According to the published accounts of the Reserve Bank of India, the total value of notes in circulation on 3 Feb., 1950, was Rs. 11,33,24 lakhs, and that of foreign securities held in the issue department Rs. 6,40,34 lakhs.

Currency.—The monetary unit is the Indian *rupee*, the sterling equivalent of which is 1*s.* 6*d.* Coins in circulation :—Silver, 1 rupee, equals 16 annas and weighs one tola or 180 grains troy; nickel 1 rupee; ½ rupee or 8 anna piece; ¼ rupee or 4 anna piece; nickel, ½, 1, 2, 4 and 8 anna pieces; bronze, 1

pice = ¼ anna; ½ pice = ⅛ anna; 1 pie = $\frac{1}{12}$ anna or $\frac{1}{8}$ pice. The fineness of the silver coin has, since Feb., 1940, been reduced from eleven-twelfths to one-half.

The paper currency consists of reserve bank-notes in denominations of Rs. 2, 5, 10, 50 and 100. Bank-notes of Rs. 500, 1,000 and 10,000 were demonetized and ceased to be legal tender after 12 Jan., 1946. Government of India currency notes are also in circulation, but, with the exception of the Re. 1 note, are being withdrawn. A special issue of Government of India Re. 1 notes was introduced in July, 1940, to supplement the circulation of silver rupees. They are, for all purposes, equivalent to silver rupees.

A hundred thousand rupees are called 1 lakh and are written thus: Rs. 1,00,000; one hundred lakhs are called 1 crore and are written thus: Rs. 1,00,00,000. A lakh of rupees when the rupee is 1*s.* 6*d.* is equivalent to £7,500.

Banks.—On 31 March, 1950, there were 100 scheduled banks in India and 2,912 offices and branches of banks. The number of non-scheduled banks on 31 March, 1950, was 364.

Statistics of the post office savings banks for 5 years :—

	Deposits (in lakhs of rupees)	Balance at end of year (in lakhs of rupees)
1945–46	74,42	1,15,04
1946–47	89,45	1,42,35
1947–48 :—		
1 April to 14 Aug.	37,68	1,46,82
15 Aug. to 31 March . . .	45,79	10,12
1948–49	83,26	29,91
1949–50	84,90	44,11

STATES AND TERRITORIES.

The First Schedule to the Constitution of India arranges 'the States and the territories of India' in 4 groups; the number of seats in the Council of States, allotted to each State or group of States, is added in square brackets.

A. 1. Assam [6]
2. Bihar [21]
3. Bombay [17]
4. Madhya Pradesh [12]
5. Madras [27]
6. Orissa [9]
7. Punjab (India) [8]
8. Uttar Pradesh [31]
9. West Bengal [14]

B. 1. Hyderabad [11]
2. Jammu and Kashmir [4]
3. Madhya Bharat [6]
4. Mysore [6]
5. Patiala and East Punjab States Union [3]
6. Rajasthan [9]
7. Saurashtra [4]
8. Travancore–Cochin [6]
9. Vindhya Pradesh [4]

C. 1. Ajmer [and Coorg, 1]
2. Bhopal [1]
3. Bilaspur [and Himachal Pradash, 1]
4. Cooch–Behar [1]
5. Coorg [*see* Ajmer
6. Delhi [1]
7. Himachal Pradesh [*see* Bilaspur]
8. Kutch [1]
9. Manipur } [1]
10. Tripura }

D. Andaman and Nicobar Islands [—

A. States Administered by a Governor.

ASSAM.

Government.—Assam first became a British Protectorate at the close of the first Burmese War in 1826. In 1832 Cachar was annexed: in 1835 the Jaintia Hills were included in the East India Company's dominions, and in 1839 Upper Assam was annexed to Bengal. In 1874 Assam was detached from the administration of the Lieut.-Governor of Bengal, and made a separate chief commissionership. On the partition of Bengal in 1905, it was united to the Eastern Districts of Bengal under a lieut.-governor. From 1912 the chief commissionership of Assam was revived and from 1921 a governorship was created.

Constitution.—Assam was constituted an autonomous province on 1 April, 1937, with a legislature of 2 chambers (the Legislative Council and the Legislative Assembly). The Legislative Council consists of not more than 22 members, of whom not more than 4 are to be nominated by the Governor. The Legislative Assembly consists of 108 elected members. Election results, Dec., 1945:—Congress Party, 63 seats; Moslem League, 31 seats. There are 15 local boards, 14 municipalities and 10 town committees. The areas comprising the United Khasi and Jaintia Hills District, Garo Hills District, Lushai Hills District, Naga Hills District, North Cachar Hills, Mikir Hills District and North-East Frontier Tract, including Balipara Frontier Tract and Tirap Frontier Tract, are excluded areas. Abor Hills District and Mishmi Hills District and the Naga Tribal Area, are tribal areas.

Under the terms of the Indian Independence Act, 1947, almost the whole of the district of Sylhet, which is predominately Moslem, was detached from Assam and amalgamated with East Bengal in the Dominion of Pakistan.

Governor.—H.E. Shri Jairamdas Doulalnam (took his seat on 27 May, 1950; salary Rs. 66,000 p.a.)

Premier.—Bishnuram Medhi.

Area, Population and Religion.—The plains districts, the hill districts and the tribal areas, exclusive of the state of Manipur, cover an area of 54,029 square miles, with a population of 7,617,670 in 1941. The capital is Shillong. Manipur state, with an area of 8,638 square miles and a population of 512,069, formerly under the political control of the Governor of Assam, ceased to be a feudatory state from 15 Aug., 1947, and has acceded to the Indian Union.

Instruction.—The new university at Gauhati was constituted on 1 Jan., 1948. There were 17 Arts Colleges, including 3 colleges for women with an enrolment of 6,703 students on 31 March, 1949. The Earl Law College, Gauhati, came under Gauhati University on 1 Nov., 1949. The enrolment of the College was 93 on 31 March, 1949. In the B.T., classes attached to the St. Edmunds' Arts College for men and the St. Mary's College for women, Shillong, there were 28 and 8 students respectively under training. The number of secondary schools for boys was 883 with 148,723 pupils, and that of primary schools for boys was 8,046 with 452,800 pupils on 31 March, 1949. The number of girls at all kinds of institutions was 202,489. There were 24,928 pupils in 445 tea-garden schools of B and C classes.

National Cadet Corps Organization.—The National Cadet Corps Organization has been at work in this State Service since Sept., 1948. It consists of two units, viz. Senior Division Unit and Junior Division Unit.

Mass Literacy and Adult (Social) Education.—The organization of the campaign in the province was under the Provincial Mass Literacy Committee with the Minister of Education as Chairman and some official and non-official members.

In the sub-divisions, [illegible] was left to the care of sub-divisional committees consisting of [illegible] and non-officials with the local Deputy Inspectors of Schools as the secretary.

There was a special staff of officers for this work consisting of one Mass Literacy Officer in class I of the A.S.S. and 15 in Assam Lower School Service High School Cadre. During the year some post-literacy centres were opened in conjunction with mass-literacy centres. The numbers of post-literacy centres opened during the year was 190, the number of circulating libraries and rural libraries was 290 and 300 respectively. During the year government sanctioned an annual recurring grant at the rate Rs. 25 for each post-literacy centre and Rs. 36 for each rural library. Besides the above, 2 mobile van units, provided with motion projectors, radio sets, microphones, etc., were at work.

Technical Education.—To meet the ever increasing demand for skilled artisans, certificate courses in various engineering trades have been introduced in the Prince of Wales Technical School at Jorhat and at its branch at Nowgong. The grant to the Technical and Vocation Training Centre (now known as Industrial Training Institute) at Jorhat has also been substantially increased to provide training for such trades and other vocations.

The improved courses in the Prince of Wales Technical School at Jorhat has met with considerable success. Third Year Diploma Classes in mechanical, automobile and electrical engineering were opened in 1949, and additional staff for the school have been appointed. The number of students admitted in the First Year Diploma Classes has been fixed at 60. The school is being modernized and orders placed for more up-to-date equipment for the workshops and laboratories attached to the Jorhat Technical School.

To provide for more advanced technical training, the Fuller Technical School at Kohima, which was amalgamated with the local Government High School was separated and re-organized and the technical school so re-organized is now named the Junior Technical School, Kohima.

Justice and Crime.—The province was formerly under the jurisdiction of the High Court of Calcutta; a separate High Court was set up with effect from 5 April, 1948. There were 2 sessions judges up to the time of the separation of the district of Sylhet from Assam in Aug., 1947, and thereafter 2 judges have been created with effect from 15 Nov., 1948. In 1946, 61,548 criminal cases were reported combined with the number pending from the previous year (56,719 in 1945); 24,036 civil suits were instituted (24,302 in 1945).

Finance.—The gross revenue for 1946–47 was 719 lakhs of rupees, to which land revenue contributed 179 lakhs, excise 82 lakhs, forests 68 lakhs and stamps 25 lakhs. The total expenditure in 1946–47 was 570 lakhs. General administration cost 57 lakhs, education 74 lakhs, police 69 lakhs, land revenue administration 25 lakhs, public works 104 lakhs and forests 51·50 lakhs.

Production and Industry.—The cultivation and manufacture of tea is the principal industry in Assam. Agriculture employs nearly 89% of the population. Sericulture and hand-loom weaving, both silk and cotton,

are the most important home industries. The coal industry is also important. In 1944 there were 1,132 tea gardens with 441,792 acres under tea. The area of tea plucked in 1944 was 405,709 acres; the total output was 266,947,184 lb. of black and 3,886,119 lb. of green tea, and the daily average number of persons employed was 425,845. All-India statistics regarding the tea industry are given on p. 156. In 1944–45 there were 6,680 square miles of reserved forests. Assam contains important oilfields. In 1947, 65,192,235 gallons of crude oil were extracted from the oilfields of the province to the value of Rs. 1,16,69,410. On 13 July, 1949, co-operative societies numbered 2,901, with a total membership of 256,978 and working capital of Rs. 1,08,31,000.

Communications.—In 1948 there were 720·45 miles of metalled, 1,456·11 of gravelled, 675·6 of earthed and 2,298·3 miles of bridle roads. The open mileage of railways was 1,302 miles.

BIHAR.

Government.—The province contains the two ethnic areas of Bihar and Chota Nagpur. For the purposes of administration it is divided into 4 divisions covering 16 districts. The sole executive authority in the province is the Governor.

Constitution.—Bihar has a bicameral Legislature, the Upper House being known as the Bihar Legislative Council and the Lower House as the Bihar Legislative Assembly. The Legislative Council consists of 29 members, of whom 4 are nominated by the Governor in his discretion. Twelve members of the Legislative Council are elected by the members of the Legislative Assembly and the rest by direct election. The Legislative Assembly consists of 150 elected members, including 4 women.

Governor.—H.E. Shri M. S. Aney (assumed office, January, 1948; salary, Rs. 100,000 per annum).
Premier.—Sri Krishna Sinha.

Area, Population and Religion.—The province covers 69,745 square miles, with a population of 36,340,151. The four principal towns are Patna, the capital, Gaya, Bhagalpur and Jamshedpur. The hot weather seat of the Government is at Ranchi. Hindus form the great majority of the population.

Education.—At the census of 1941 the proportion of literates was only 9·1% as compared with 18·0 for the rest of India. The percentage of Indian boys attending school reached 5·47 in 1943–44. The university of Patna constituted in 1917 is an affiliating university. All university teaching is carried on in 17 arts and science colleges, 1 law college, 1 engineering college, 1 medical college and 1 training college. There is also a veterinary college not affiliated to the university. There are 55 technical institutions including those at Jamshedpur, Ranchi and Muzaffarpur, and a medical school at Darbhanga. A board of secondary education was constituted in 1922. In 1943–44 there were 6,912 students in arts and science colleges. There were 246,747 pupils in 1,710 secondary schools and 834,983 pupils in 21,565 primary schools.

Justice and Crime.—There is a high court (constituted in 1916) at Patna with a chief justice, 8 judges and 2 additional judges. On the criminal side there are sessions judges, stipendiary and honorary magistrates. For the administration of civil justice there are district judges, subordinate judges and munsiffs (courts of first instance). The police force is under an inspector general: there is 1 policeman to 1,746 of the population and to 3·35 square miles of the area of the province.

Finance.—The revenue in 1947–48 was Rs. 1,848 lakhs, including Rs. 463¾ lakhs from Excise, Rs. 138¾ lakhs from land revenue, Rs. 206 lakhs from stamps, and Rs. 32¼ lakhs from the forest department. The expenditure charged to revenue was Rs. 1,678½ lakhs. The chief items were :—Police, Rs. 261⅛ lakhs; education, Rs. 124 lakhs, and general administration, Rs. 144 lakhs. Budget, 1948–49 :—Revenue, 2,156¼ lakhs; expenditure, 2,008¾ lakhs.

Production and Industry.—In Bihar the total area cropped during 1942–43 was 23,033,800 acres, which included 5,440,900 acres cropped more than once. Of this the principal crop, rice, covered 9,291,200 acres; maize, 1,651,900 acres; oilseeds, 1,505,700 acres; gram, 1,446,500 acres; barley, 1,269,100 acres; wheat, 1,280,100 acres; marua, 543,300 acres; sugar-cane, 402,600 acres; fibres (cotton, jute, etc.), 284,200 acres; indigo, 2,100 acres; tea, 4,100 acres; tobacco, 114,100 acres; fruits and vegetables, including root crops, 324,400 acres. The remaining area was distributed under miscellaneous food and non-food crops of minor importance. The principal coal area of Bihar lies in the Manbhum and [illegible] districts. The total output was over 15 million tons in 1940. [illegible] of Hazaribagh, Monghyr and Gaya form the most important source of mica in the world. Iron ore is mainly raised in the district of Singhbhum, the total output of which in 1940 was over 1½ million tons. The total number of persons employed in coal, mica and iron ore mines was about 153,965. Of this, the Tata iron and steel works, situated at Jamshedpur in Singhbhum district, employed daily about 19,961 persons, excluding contractors' labour, during 1938–39. On 13 Dec., 1949, there were 11,373 co-operative societies, with 492,973 members and a working capital of Rs. 3,98,86,000. The reserved forests covered an area of 1,403 square miles on 31 March, 1947.

Communications.—The total mileage of metalled roads is 7,012 and of unmetalled roads 26,373. The length of canals open for navigation is 200 miles. The East Indian, Oudh and Tirhut, and Bengal Nagpur railways continue to traverse the province. There has not been any increase in the open mileage of light railways.

O'Malley (L. S. S.), Bengal, Bihar and Orissa, Sikkim. Cambridge, 1917.

BOMBAY.

Government.—The English obtained a factory at Surat in 1616. Bombay was acquired by the Portuguese in 1530, and given in 1661 to Charles II as part of the dowry of Catherine of Braganza. In 1668 the king granted the Island of Bombay to the East India Company for the small annual rent of £10; it was placed under the control of the President of the factory at Surat. The headquarters of the Bombay Governor were transferred from Surat to Bombay in 1708. The early summer seat of Government is at Poona; for the hottest months the Governor resides at

Mahableshwar. The province of Sind was separated from the Presidency in 1936 and constituted a separate province. For the former States now merged in Bombay, *see* THE STATESMAN'S YEAR-BOOK, 1949, pp. 177–81.

Constitution.—The Bombay Legislature consists of 2 Chambers, the Bombay Legislative Assembly and the Bombay Legislative Council. The Assembly consists of 172 elected members and 61 nominated members from the merged States, *i.e.*, in all 233 members. The Council consists of 25 elected, 4 nominated by the Governor and 10 other members nominated from the merged States, *i.e.*, in all 39 members. The members of the Legislature can speak in any recognized regional language of the Province.

The powers of the Governor to act in his discretion or exercise his individual judgment in the discharge of his special responsibilities were removed in Aug., 1947, and his power of making rules under section 84 of the Government of India Act, 1935 was confined to the procedure in respect of joint sittings of and communications between the 2 Chambers, which is retained under article 208(3) of the Constitution of India.

Governor.—Raja Sir Maharaj Singh (assumed office 6 Jan., 1948; salary, Rs. 56,100 per annum).

Chief Minister.—B. G. Kher.

Area, Population and Religion.—Bombay State stretches along the west coast of India, from Gujarat in the north to Kanara in the south. After the merger of states it has an area of 108,142 square miles with an estimated population of about 32 million, mainly Hindus. There are, in addition to Bombay City, 28 districts, 309 *talukas* and mahals, and 36,315 villages. The chief languages are Gujarati, Marathi and Kannada. The principal towns are Bombay (the capital) (1,489,883), Ahmedabad (591,267), Poona (258,197) and Sholapur (212,620), 1941 census. The birth rate of the State was 31·09 in 1949; death rate, 19·44 per 1,000 of population.

Education.—The Bombay University, founded in 1857, is mainly an affiliating university. Under the university, in addition to the university school of economics and sociology and departments of chemical technology and statistics, are 21 arts and science colleges and 23 professional colleges, for medicine, commerce, law, education and veterinary science. In 1950 the number of students in the arts colleges was 22,376, and in the professional colleges 8,247. The Poona University, founded in 1948, is both teaching (Poona area) and affiliating (Maharashtra area); in 1950, it had 14 arts and science colleges with 10,167 students, and 9 professional colleges with 2,546 students. The Karnatak University (established 1950) had 7 arts and science colleges with 3,574 students and 5 professional colleges with 815 students. The S.N.D.T. Women's University has 4 colleges with (1950) 430 students.

Recognized and [illegible] educational institutions numbered, in 1949–50, 41,353, with [illegible] scholars. Secondary schools numbered 1,282, with 390,319 pupils, and primary schools 28,780, with 3,311,644 pupils. To the total expenditure on education Government contributed 57·2%, local authorities 10·6%, fees 21·2%, Central Government 1·2% and other sources 9·8%.

Justice and Crime.—The High Court of Bombay has 10 permanent judges, including the chief justice. Criminal justice was, as at 31 Dec., 1949, administered by the high court, 46 sessions judges, 1,200 magistrates and 3,750 village panchayats.

Finance.—The estimated revenue of the Government of Bombay for 1949–50 is Rs. 6,262 lakhs, the chief contributions being Rs. 541 lakhs from land revenue, Rs. 497 lakhs from excise, Rs. 373 lakhs from stamps and Rs. 284 lakhs from forests. The estimated expenditure for 1949–50 is Rs. 6,273 lakhs. General administration was estimated to cost Rs. 379 lakhs, education Rs. 1,129 lakhs and police Rs. 833 lakhs.

Production and Industry.—64% of the population are dependent on agriculture. The textile trade is dominant in production. The number of looms in 1949 in Greater Bombay was 67,104, and in the rest of the State, 66,177. The number of factories of all kinds was 6,835 in 1949, and the number of workers in all industries was 789,463, including 87,135 women, 8,923 adolescents and 1,296 children. There were in 1950, 13,831 square miles of reserved forests. On 30 June, 1950, the number of co-operative societies was 14,821, with 1,815,933 members and a working capital of Rs. 65,64,56,000.

Irrigation.—Area irrigated by major irrigation projects in 1949 was 664,427 acres. Area irrigated by major works, minor works, tanks, bandharas, wells, lift irrigation, etc., in 1949 was 1,552,433 acres.

Communications and Commerce.—In 1946–47, Bombay had 11,572 miles of metalled roads and 8,903 miles of unmetalled roads. The total mileage of roads maintained by the Public Works Department and local bodies as on 31 March, 1948, was 22,140 miles. In 1947–48, the total length of railway open in Bombay State was 2,692·216 miles (excluding Indian States).

STATISTICAL INFORMATION.—The Bureau of Economics and Statistics (Yacht Club Premises, Apollo Pier, Bombay) was set up on 9 Nov., 1946; *Director.*—Shri G. M. Sankpal, B.A. (Bom.), M.A. (Cantab.). It publishes a Quarterly Bulletin (from July, 1947) and an Annual Statistical Abstract (from 1951); other publications :—

Statistical Atlas of Bombay State. Rev. ed 1950.
Patil (P. C.), Regional Survey of Economic Resources: Kolhapur. 1950.

MADHYA PRADESH.

Government.—In 1853 the Maratha Raja of Nagpur died and the territories of the kingdom of Nagpur were declared by Lord Dalhousie to have lapsed to the paramount power. This area was at first administered as the Nagpur province by a commissioner under the Government of India, but in 1861, in the administrative readjustments which followed the Mutiny, it was united to the Saugor and Nerbudda territories and the whole area was named ' the Central Provinces ' and placed under a chief commissioner. In 1853 the inability of the Hyderabad state to maintain the Hyderabad contingent led to a treaty by which, in return for their upkeep of the contingent, the districts called ' the Hyderabad Assigned Districts,' which comprised the area now known as Berar, were assigned to the British. These districts constituted a separate administrative unit until 1902, when the Treaty of Assignment was superseded by a perpetual lease of Berar to the Government of India on an annual rent of 25 lakhs of rupees. The administration of Berar was thereupon transferred to the chief commissioner of the Central Provinces. In accordance with an agreement concluded with the Nizam on 24 Oct., 1936, which recognized and re-affirmed his sovereignty over Berar, the Central Provinces and Berar are now administered as one governor's province. The Nizam and his successors will henceforth hold the dynastic title of ' His Exalted Highness the Nizam

of Hyderabad and Berar,' and the Heir Apparent of the Nizam and his successors, the title of ' His Highness the Prince of Berar.'

In 1920 the chief commissioner was replaced by a governor, and the province was included in the scheme adumbrated in the Government of India Act, 1935, being constituted an autonomous province on 1 April, 1937.

Constitution.—Under the new Constitution of India, which came into being on 26 Jan., 1950, the former province of Central Provinces and Berar became the state of Madhya Pradesh. The state has a unicameral legislature—the Legislative Assembly consisting of 111 elected members, including 3 women. Of these, 94 belong to the Congress Party, 10 to the Moslem League Party, 1 to Hindu Mahasabha, 1 to Scheduled Caste Federation and 5 are unattached members. There are 4 main administrative divisions, in charge of commissioners, and 19 districts, each under a deputy commissioner. There are 51 municipalities, 18 district councils and 2 independent local boards in the former Central Provinces and 31 municipalities, 4 district councils and 1 independent local board in Berar. As from 1 Jan., 1948, the 14 Chhatisgarh States have been absorbed in and are administered by the state.

The seat of government is at Nagpur, but in April it is transferred to Pachmarhi for a period of 3 months.

Governor.—Shri Mangaldas Mancharam Pakwasa (assumed office, 15 Aug., 1947; salary, Rs. 60,000 per annum).

Premier.—Pandit Ravishankar Shukla.

Area, Population and Religion.—The total area and population of the Central Provinces and Berar (excluding states) are 98,574 square miles and (1941) 16,813,584 respectively. The area and population (1941) of the Central Provinces only were 80,766 square miles and 13,208,718, and of Berar 17,808 square miles and 3,604,866. The urban population is 124·46 per mille. The chief towns and their population are Nagpur, the capital, 301,957; Jubbulpore, 178,339; Amraoti, 74,309; Saugor, 63,933; Raipur, 63,465, and Akola, 62,564. The Hindus in 1941 numbered 12,931,996 (including 3,051,413 of the scheduled castes); aboriginals professing tribal religions, 2,937,364; Moslems, 783,697; Jains, 84,593; Christians, 58,569; Sikhs, 14,996, and others, 2,369.

Education.—The Nagpur and Saugor Universities were established in 1923 and 1946 respectively and are examining and affiliating bodies, the colleges at Nagpur, Wardha, Amraoti, Akola, Basim and Khamgaon being affiliated to the former and those at Jubbulpore, Raipur, Bilaspur and Saugor being affiliated to the latter. There were 6,900 collegiate students in 1945–46. There is a High School Education Board for regulating and supervising high school education. There were 138,091 and 13,811 pupils in secondary schools for males and females respectively in 1945–46. Under the head of primary education there were 4,526 recognized institutions for boys, with 347,681 pupils, and 503 similar institutions for girls, with 47,271 pupils. For technical education there is an engineering school at Nagpur managed by Government with 140 students. The agricultural college at Nagpur had 199 students in 1945–46. There is also at Amraoti the Victoria Technical Institute, managed by the Berar Victoria Memorial Society, with 78 students in 1945–46. The Laxmi Narayan Institute of Technology started in August, 1942, by the Nagpur University had 35 students on its rolls. There are also technical and industrial schools at Nagpur, Jubbulpore, Saugor, Khandwa, Sunpuri (Mandlo District), Amraoti, Darwha (Yeotmal District), Akola, Khamgaon, Buldana, Dhamtari and Raipur (Raipur District), Kohmara (Bhandara District), Tamia and Chandametta (Chhindwara District). The

University Training College established from July, 1945, had 85 students on its rolls.

Justice and Crime.—The High Court of Judicature at Nagpur having a chief justice and 7 puisne judges continues to be the highest criminal and civil court of the province. There were in 1947, 9 district and sessions judges, with 449 magistrates for trial of criminal cases, and 183 civil judges for trial of civil cases. There were 29,455 criminal cases disposed of and 49,599 civil suits were instituted.

Finance.—The revenue for 1947–48 was Rs. 1224 lakhs. Towards this total, land revenue contributed Rs. 235 lakhs; excise, Rs. 199 lakhs; stamp duties, Rs. 71 lakhs; forests, Rs. 152 lakhs, and income-tax, Rs. 178 lakhs. On the expenditure side the total was Rs. 11,43 lakhs. Direct demands on revenue were Rs. 139 lakhs; general administration, Rs. 143 lakhs; police, Rs. 179 lakhs; education, Rs. 184 lakhs; civil works, Rs. 147 lakhs, including Rs. 4 lakhs from the road development account; superannuation allowances and pensions, Rs. 62 lakhs, and forests, Rs. 77 lakhs.

Production and Industry.—The principal crops are cotton, rice, wheat and juar. During the year ended 31 March, 1944, the exports were :— Rice, 3,964,449 maunds; wheat, 61,264 maunds, and juar and bajra, 261,514 maunds. 1,572,708 maunds of rice were exported in the previous year. Cotton is grown chiefly in Berar and the west, rice in the east and wheat in the north. The area irrigated from state works in 1945–46 was 765,817 acres. The total area of the reserved forests is 19,425 sq. miles and the revenue for 1947–48 was Rs. 1,51,81,041. With the integration of the Chhattisgarh States to this province an area of 7,455 sq. miles of reserved forests and 10,464 sq. miles of unclassed forests have been added with effect from 1 Jan., 1948, making a total of 37,344 sq. miles.

Nagpur is the centre of the cotton-spinning and weaving industry. There were 1,217 factories of all kinds in the Central Provinces and Berar during the year 1945, with a daily average of 110,263 employees. There is one large factory producing cement in the Jubbulpore district. In 1943 the number of mines working was 165, namely, 40 coal mines, 73 manganese mines and 52 mines for other minerals. The coal output in 1943 was 1,657,019 tons, and the manganese output, 461,676 tons. The Central Provinces produced 89% of India's output of manganese in 1943. There is a *biri* making industry in the province, which gives employment to over 50,000 workers.

Communications.—In 1945–46 the mileage of professionally aligned roads was 5,752, metalled and 3,106 unmetalled. The mileage of forest roads during the year ending 31 March, 1946, was 9,745. The railway mileage was 2,594, of which 1,741 miles are broad gauge and 853 narrow and metre gauge.

Low (Sir E.), The Possibilities of Industrial Development in the Central Provinces and Berar. Journal of Industries and Labour, February, 1921. Calcutta, 1921.
Russell (R. V.) and *Lal* (R. B. H.), The Tribes and Castes of the Central Provinces of India. London, 1916.

MADRAS.

Government.—The first trading establishment made by the British in the Madras Presidency was at Peddapali (now Nizampatam) in 1611 and then at Masulipatam. In 1639 the English were permitted to make a settlement at the place which is now Madras, and Fort St. George was

founded. By 1801 the whole of the country from the Northern Circars to Cape Comorin (with the exception of certain French and Danish settlements) had been brought under British rule.

Constitution.—The Presidency was constituted an autonomous province on 1 April, 1937. The Governor is aided by a Council of 12 ministers. The legislature consists of an Upper House (Legislative Council) and a Lower House (Legislative Assembly). The former consists of not less than 53 and not more than 55 members, of whom not less than 8 and not more than 10 are chosen by the Governor, the rest being elected. The Legislative Assembly consists of 214 elected members, including 8 women, and 2 members nominated by the Governor-General to represent Pudukottai Banganapalle, and Sandur, former Indian States now merged with the province as part of the union territory. There are 25 districts, each under a district collector, who is also the district magistrate except in the district of Madras. A scheme for the separation of the judiciary from the executive has been introduced under which there will ultimately be a separate set of officers functioning as district magistrates in all districts. Under the head of local administration there are 25 district boards, 1 agency district board (under an official president), 94 municipal councils and the corporation of Madras.

Governor.—H.E. Col. Sir Rao Shri Krishna Kumarsinhji Bhavsinhji, the Maharaja of Bhavnagar, K.C.S.I. (salary, Rs. 66,000 per annum).

Premier.—Sri P. S. Kumaraswami Raja.

Area, Population and Religion.—Area, 127,768 square miles. Population (1941), 49·8 million. The area and population figures include those of three former Indian States, since merged with the province as part of the union territory. Principal languages, Tamil, Telugu, Malayalam and Kannada. The first two account for 78% of the population. The principal towns are:—Madras (the capital) with 777,481 inhabitants, Madura with 239,144, Trichinopoly with 159,566 and Salem with 129,702. Hindus formed 80%, Moslems 14% and Christians 5% of the population in 1941.

Vital statistics for Madras Province for 1948:—

Estimated mid-year population	52,882,725
Total births registered	1,654,313
Birth rate per 1,000 of estimated mid-year population	31·28
Total deaths registered	958,069
Death rate per 1,000 of estimated mid-year population	18·12
Infantile deaths registered	211,975
Infantile death rate per 1,000 live births	128·13
Maternal deaths (deaths of mothers from child-birth) registered	12,175
Maternal death rate per 1,000 births (live and still)	7·28

Marriages, 1948–49	Europeans, Anglo-Indians	Indian Christians	Others
Under the Indian Christian Marriage Act, 1872	175	12,197	—
Under the Special Marriage Act, 1872	—	—	292

Education.—There are 3 universities, the Madras University, the Andhra University and the Annamalai University. The first of these, founded in 1857, is an affiliating university and since 1923 has been discharging teaching functions to a limited extent. The Andhra University, founded in 1926, was only an affiliating university in the earlier stages, but

has since undertaken teaching work in certain subjects. The Annamalai University, founded in 1929, is the first attempt in South India at organizing a unitary residential type of university. The number of colleges affiliated to or recognized by the two affiliating universities in 1948 was as follows:—Madras 39, of which 10 were maintained by the Government of Madras; Andhra 15, of which 2 were maintained by government. On 31 March, 1948, male arts students numbered 30,529 and women arts students numbered 3,602, excluding Annamalai University. Recognized public educational institutions numbered 38,356, with 4,227,062 scholars. There were 32,395 public elementary and 790 secondary schools for Indian boys and 4,180 elementary and 185 secondary schools for Indian girls. Public funds contributed 66% of the total expenditure on education in 1947–48.

Justice and Crime.—There is a High Court with a Chief Justice and 15 Judges. There were in 1948 in all 1,129 criminal courts, and 818,127 criminal cases were instituted. The police force in 1948 numbered 46,102, under an Inspector-General, while there was a force of 3,178 for Madras city. The total number of civil suits instituted in the courts, including village and panchayat courts, was 246,696 in 1948.

Finance.—The revenue of the Government of Madras was Rs. 5,071 lakhs in 1947–48, the chief contributions being Rs. 808 lakhs from land revenue (including the portion due to irrigation), Rs. 1,069 lakhs from excise, Rs. 535 from taxes on income, Rs. 336 lakhs from stamps, Rs. 183 lakhs from forests, Rs. 1,030 lakhs from sales tax and other taxes and duties, and Rs. 298 lakhs from [illegible] receipts. The expenditure in 1947–48 was Rs. 4,559 lakhs, excluding the transfer of Rs. 510 lakhs to the revenue reserve fund. General administration accounted for Rs. 560 lakhs, administration of justice for Rs. 146 lakhs, police for Rs. 465 lakhs, education for Rs. 704 lakhs, medical for Rs. 238 lakhs, civil works for Rs. 464 lakhs, pensions for Rs. 158 lakhs, irrigation for Rs. 42 lakhs, interest and appropriation for reduction or avoidance of debt for Rs. 225 lakhs, public health for 191 lakhs (including Rs. 100 lakhs transferred to the rural water supply fund), agricultural veterinary and co-operation for Rs. 191 lakhs, industries and supplies for Rs. 113 lakhs, miscellaneous departments for Rs. 239 lakhs and extraordinary charges, including net outlay on state trading, for Rs. 169 lakhs.

Production and Industry.—Agriculture engages 71% of the population. There were in 1947, 58 cotton mills with about 4,125 looms. The total number of factories working in 1948 was 3,960 with 288,722 operatives. The Madras Government in 1948–49 treated at the government quinine factory about 630,767 lb. of cinchona bark. The area irrigated in 1946–47 was 9,736,974 acres: productive irrigation works showed a return of 6·94% on the capital outlay. The output of timber by the forest department was 65,820 tons in 1946–47. The total generating plant of all electricity supply undertakings in the Presidency amounted to 199,294 k.v.a. by the end of 1949, of which capacity 99·1% is under government ownership. The total electric energy generated by all public utilities in the presidency in 1948–49 was about 576·13 million units.

Communications and Commerce.—In 1946–47, Madras Presidency had 26,739 miles of metalled roads and 13,894 miles of unmetalled roads, as well as 1,403 miles of navigable canals. There were 4,961 miles of railway, in addition to 136 miles of district board lines. The imports of private merchandise under the head of seaborne foreign trade were valued

in 1948–49 at Rs. 83·87 crores and the exports at Rs. 78·50 crores. Trade to the United Kingdom represented 28·27% of the total trade of the Presidency in 1948–49. In 1948–49 the Madras Port accounted for 51% of the total trade; its imports and exports amounted to Rs. 77·70 crores and 47·94 crores respectively. Cochin is the chief of the other ports. It has been declared a major port and its administration taken over by the Government of India from 1 August, 1936. The administration of the Port of Madras has also been taken over by the Government of India with effect from 1 April, 1937.

Laccadive Islands.—These islands are attached to Madras Province and consist of a group of 14 islands (9 inhabited), about 200 miles off the west of the Malabar coast of Madras. The northern portion is called the Amindivis, and is under the administrative control of the District Collector of South Kánara. The southern islands, called the Laccadive (including Minicoy Islands), are under the administrative control of the District Collector of Malabar. Population (1941) 18,297, nearly all Muslims. The language is Malayalam, but the language in Minicoy, which is considerably to the south of the other islands, is Mahl. The staple products are coconut husk fibre (coir) and coconuts.

ORISSA.

Government.—Orissa, ceded to the Mahrattas by Alivardi Khan in 1751, was conquered by the British in 1803. In 1804, a board of 2 commissioners was appointed to administer the province, but in the following year it was designated the district of Cuttack and was placed in charge of a collector, judge and magistrate. In 1823 it was split up into 3 regulation districts of Cuttack, Balasore and Puri, and the non-regulation tributary states which were administered by their own chiefs under the ægis of the British Government. Angul, one of these tributary states, was annexed in 1847, and with the Khondmals, ceded in 1835 by the tributary chief of the Baudh state, constituted a separate non-regulation district. Sambalpur was transferred from the Central Provinces to Orissa in 1905. These districts formed an outlying tract of the Bengal Presidency till 1912, when they were transferred to Bihar, constituting one of its divisions under a commissioner. Natural Orissa, considered as a [illegible] cultural whole, had long been divided between Bihar, the [illegible] and Madras. It was constituted a separate province on 1 April, 1936, some portions of the Central Provinces and Madras being transferred to the old Orissa division.

Consequent on the lapse of Paramountcy the Eastern States Residency ceased to function on 19 Aug., 1947. In pursuance of an agreement entered into with the Dominion Government on 19 Dec., 1947, the rulers of 25 Orissa states surrendered all jurisdiction and authority to the Government of India on 1 Jan., 1948, on which date the Provincial Government took over the administration of these areas on behalf of the Government of India. The administration of 2 states, viz., Saraikella and Kharswan, was transferred to the Government of Bihar in May, 1948. By an agreement with the Dominion Government, Mayurbhanj State was finally merged with the province on 1 Jan., 1949. By the States Merger (Governors' Provinces) Order, 1949, the states were completely merged with the Province of Orissa on 19 Aug., 1949.

The rulers have been granted an annual privy purse on a graduated scale

based on the revenues of the respective states for 1945–46. The continuance of their privileges, honours and dignities has been guaranteed by the Dominion Government.

The province consists of 13 districts, Cuttack, Balasore, Puri, Sambalpur, Ganjam, Khondmals, Koraput, Mayurbhanj, Dhenkanal, Sundergarh, Keonjhar, Bolangir-patna and Kalahandi.

Constitution.—Orissa has the status of an autonomous province, administered by the Governor with a council of ministers and a uni-cameral legislature consisting of 91 members, designated as Orissa Legislative Assembly.

Governor.—Asaf Ali (salary, Rs. 66,000 per annum).
Premier.—Sri Harikrishna Mahtab.

Area, Population and Religion.—The area of the province (after the final merger of states) according to the census figures of 1941 is 59,839 square miles, with a total population of 13,169,988. The figures of the classification of the population by community are:—Hindus (excluding scheduled castes), 8,199,328; scheduled castes; 1,857,016 Moslems, 161,228; Christians (including Anglo-Indians and Europeans), 37,469; Buddhists, 1,889; Sikhs, 461; Jains, 765; Parsees, 24; Jews, 5, and tribes, 3,509,458. Cuttack is the capital (population, 74,291 in 1941); a new capital at Bhubaneswar, 16 miles from Cuttack, is under construction.

Education.—The province has a university of its own. The schools and colleges, which were hitherto affiliated to the Patna and the Andhra Universities, are now affiliated to the Utkal University, which came into being on 27 Nov., 1943. There are 14 arts colleges (10 teaching up to degree standard and 4 up to intermediate standard), 1 medical college, 1 law college, 1 training college and 3 Oriental colleges in the province including the integrated states. Of these, 9 arts colleges, the medical and training colleges and 2 Oriental colleges are managed by Government. The remaining colleges are privately managed. The number of students in the colleges on 31 March, 1949, was 5,216 (including 301 women). The total number of recognized schools in the province, 31 March, 1949, was 10,357 (which included 552 special schools). The schools for general education included 139 high schools (including 7 for girls), 448 middle schools (including 35 for girls) and 9,218 primary schools (including 244 for girls). The special schools included 1 engineering school, 30 training schools, 30 technical and industrial schools, 3 commercial schools, 1 reformatory school, 1 deaf-and-dumb school, 328 schools for adults, and 158 other schools. The total number of pupils in all the schools for general education on 31 March, 1949, was 493,280 (including 101,461 girls), and in special schools 14,911 (including 970 girls). Besides, there were 1,452 unrecognized schools (including 4 for females) with a total strength of 35,803 scholars (including 2,364 females).

Justice and Crime.—The province of Orissa was under the jurisdiction of the high court of Patna till July, 1948, when the high court of Orissa was inaugurated. The number of civil suits instituted during 1946 was 12,309, but added to the number pending from the previous year (6,903) and to the number revived or otherwise received during the year (255), gives a total of 19,467 suits before the courts. The number of criminal cases brought to trial during 1946 was 25,460.

Finance.—The figures in this paragraph relate to the revised budget for 1948–49. The total gross revenue is estimated to be 7,90,35 lakhs of

rupees, including a subvention of 1,20,00 lakhs and post-war grant of 1,20,00 lakhs from the Government of India. The estimates under the principal heads of revenue are:—Excise, 1,35,00 lakhs; land revenue, 55·22 lakhs; forest, 23·35 lakhs; stamps, 33·69 lakhs. The principal heads of expenditure are:—General administration, 70·79 lakhs; education, 96,53 lakhs; police, 89·98 lakhs; civil works, 1,89,01 lakhs; medical, 30·65 lakhs; agriculture, 43·56 lakhs. Total expenditure is estimated at 9,12,99 lakhs.

Production and Industry.—The cultivation of rice is the principal occupation of nearly 80% of the population. A small quantity of jute is produced, and cereals and sugar-cane are grown for local consumption. Turmeric is extensively cultivated in the uplands of the district of Ganjam, and practically the whole of it is exported. In the coastal areas fish abound and there is a large fish export trade to Calcutta, particularly from the Chilka lake. There are a number of rice mills, a few oil and flour mills, a soap factory and 3 sugar mills. There are cottage and small-scale industries in the province, *e.g.* handloom weaving and the manufacture of baskets, wooden articles, hats and nets; silver filigree works of Orissa are specially well known. On 30 June, 1949, the number of co-operative societies was 4,330 with a membership of 233,596 and a working capital of Rs. 3,16,82,000.

Communications.—The total mileage of the roads in the province maintained by the public works department is 3,384, metalled 2,200 and unmetalled 1,183 miles respectively. The open mileage of railway in the province is 818·24 miles, broad gauge (5 ft. 5 ins.) 714·25 miles, and narrow gauge (2 ft. 6 ins.) 104 miles.

Mazumbar (B. C.), Orissa in the Making. Calcutta, 1925.

PUNJAB (INDIA).

Government P[illegible] denotes the land of the 5 rivers, viz., Jhelum, Che[illegible] R[illegible], R[illegible]; Sutlej. British power in the Punjab began with the dissipation by the successors of Ranjit Singh of the power consolidated by him. In 1849 the country was annexed, and placed under a board of administration. In 1853 it was placed under a chief commissioner, and by 1859 the Punjab and the Delhi territory constituted the charge of lieut.-governor. The North-West Frontier area was separated in 1901, and the Delhi province in 1911.

Constitution.—The Punjab was constituted an autonomous province on 1 April, 1937. The Governor had a council of ministers to aid and advise him in the exercise of his functions.

Under the terms of the Indian Independence Act, 1947, the province was partitioned and districts of the Lahore, Rawalpindi and Multan divisions became a new Province of West Punjab in the Dominion of Pakistan. There are 124 municipalities. The capital of Punjab (India) is Simla.

Governor.—H.E. Sir Chandulal Madhavlal Trivedi, K.C.S.I., C.E.I., O.B.E. (assumed office, 15 Aug., 1947; salary Rs. 66,000 per annum).

Premier.—Dr. Gopichand Bhargava.

Area, Population and Religion.—The area of the Punjab State is 43,160 square miles with an estimated population of 12,386,915 in 1948. Of this population, 53·8% are Hindus, 29·9% Sikhs, 13·4% Scheduled Castes, 1·6% Muslims and 1·3% others.

Education.—After the partition, the Punjab (India) University was established on 1 Oct., 1947, as an examining, teaching and affiliating body. The following 11 teaching departments have been established under the direct control of the University:—Physics Department, Govt. College, Hoshiarpur; Chemistry Department, Govt. College, Hoshiarpur; Zoology Department, Govt. College, Hoshiarpur; Geography Department, Govt. College, Ludhiana; English Department, Govt. College, Hoshiarpur; Sanskrit and Hindi Department, D.A.V. College, Jullundur City; Punjabi Department, Khalsa College, Amritsar; Botany Department, Khalsa College, Amritsar; Pharmaceutics Department, Medical College, Amritsar; Chemistry (Technical) Department, Delhi Polytechnic, Delhi; Journalism Department, Punjab University Camp College, New Delhi.

In addition to these [illegible] ments, the University administers the Law College at Simla, [illegible] College at Dalhousie and Punjab University Camp College, New Delhi.

In 1949–50 there were 18,336 male students in arts colleges, 142,042 in secondary schools and 349,085 in primary schools. The total expenditure on education in 1949–50 was Rs. 400 lakhs, of which sum Rs. 193 lakhs were provided by government, Rs. 100 lakhs by fees and the balance from private sources.

Justice and Crime.—The Punjab High Court, which was created upon the partition of the Punjab in 1947, exercises jurisdiction over the states of Punjab and Delhi. It is located in Simla and consists of a chief justice and 6 puisne judges. There are 10 district and sessions judges, including 1 for Delhi. In 1949 the number of criminal cases brought to trial in the Punjab was 143,898, and the number of civil suits instituted was 22,535. The police force consists of 21,273 officers and men under the overall command of an inspector-general.

Finance.—The revenue in 1950–51 was Rs. 1,618 lakhs, to which receipts from irrigation works contributed Rs. 278 lakhs; land revenue, Rs. 172 lakhs; excise, Rs. 220 lakhs; and other taxes and duties, Rs. 194 lakhs. Expenditure, Rs 1,614 lakhs; chief items:—Education, Rs. 179 lakhs; police, Rs. 249 lakhs: general administration, Rs. 162 lakhs. The net profit earned by the irrigation department of the undivided Punjab has been (in lakhs):—

1940–41 . . .	Rs. 372	1943–44 . . .	Rs. 473
1941–42 . . .	Rs. 383	1944–45 . . .	Rs. 446
1942–43 . . .	Rs. 435	1945–46 . . .	Rs. 407

Industry.—The industrial economy of the Punjab is making a steady recovery after the collapse which it suffered consequent upon the partition. Production in the existing concerns is more or less at the normal level and progress is also being made in the establishment of new factories in the new industrial areas which are being set up at Faridabad, Bahadurgarh, Sonepat, Panipat, Rohtak, Jagadhari, Khanna and Ludhiana. The number of registered factories in the province rose from 600 in 1947 to 739 in 1949, while the total number of workers during the same period rose from 37,486 to 39,333. Over 50% of the registered factories and 60% of their workers are concentrated in the border districts of Amritsar, Gurdaspur and Ferozepore.

There is relatively a small number of really large-scale factories in the state but the New Egerton Woollen Mills, Dhariwal, the Shri Gopal Paper Mills, Abdullapur, and the Saraswati Sugar Mills, Jagadhari, can easily rank among the country's important units in these industries. The Batala Engineering Company which is one of the most well-equipped concerns in India for the manufacture of machine tools, agricultural implements and certain precision instruments, is closed owing to complications resulting from the partition. The other industrial concerns of note in the state are cotton, woollen and silk textile mills, embroidery mills, absorbent cotton and antiseptic dressing factories, glass and carpet factories and chemical factories at Amritsar, metal foundries at Batala and Jullundur, a starch factory at Ludhiana, factories manufacturing nuts and bolts at Jullundur and Ludhiana, steel re-rolling mills at Amritsar, Khanna, Ludhiana and Karnal, tanneries and engineering workshops at Jullundur, fruit preserving factories at Pathankot and factories for the manufacture of scientific apparatus at Ambala and Amritsar.

Ludhiana, which is the centre of the hosiery industry in the Punjab, occupies the premier position in this industry in the whole of India. The sports-goods industry, which had won world fame at Sialkot (now in Pakistan), is making good progress at Jullundur.

The small-scale cottage industries in the province are quite numerous and varied. Handloom weaving ranks foremost. The most notable among the other cottage industries are the manufacture of blankets and rugs at Panipat, utensil making at Rewari and Jagadhari, hosiery and cycle parts industries at Ludhiana and tanning and wood working in Jullundur and Hoshiarpur. The sericulture industry is gradually expanding in the sub-mountainous districts. The artistic [illegible] Punjab, *e.g.*, the ivory work of Amritsar and lacquer work of Hoshiarpur are marked by the distinctive genius of the province in craftsmanship and skill. Gold and silver workers are found all over the state. On 31 July, 1949, the number of co-operative societies was 12,978 with an approximate membership of 671,165 and a working capital of Rs. 10,63,87,000.

Production.—On 31 March, 1950, there were 2,944,093 acres of forests under the Punjab Forest Department. The total receipts of the department in 1949–50 amounted to Rs. 41½ lakhs and expenditure to Rs. 39 lakhs. Soil conservation is being undertaken in the Hoshiarpur and Ambala forest divisions.

As a result of partition all shisham and mulberry plantations are now situated in the Punjab (Pakistan) and efforts are now being made to raise new plantations of these species in the Punjab (India). The majority of the population depends on agriculture. Agricultural [illegible] is mainly due to irrigation. The canal-irrigated area rose from [illegible] acres in 1892–93 to 4·77 million acres in 1948–49, out of which 3·39 million acres are in Punjab territory and 1·38 million acres in the East Punjab States.

Communications.—The Punjab possesses an extensive system of railway communications, and is served mostly by the Eastern Punjab Railway and partly by the Bikaner State Railway, the Bombay, Baroda and Central India Railway (metre gauge) and the Great Indian Peninsula Railway, lengths of the lines in the state being 1,005, 124, 360 and 43 miles respectively, and the total length 1,532 miles. The total length of metalled and unmetalled roads in the Punjab in 1949 was 2,333 and 2,761 miles respectively, out of which 2,054 and 847 miles respectively are maintained by the

Punjab Public Works Department and the remainder by the district boards. The Punjab (India) has also 153 miles of navigable canals.

UTTAR PRADESH.

Government.—Under the Constitution of the Sovereign Republic of India, which came into being on 26 Jan., 1950, the name of the United Provinces of Agra and Oudh was changed into Uttar Pradesh State. The territory comprising this state grew out of various cessions and acquisitions. In 1833 the then Bengal Presidency was divided into two parts, one of which became the Presidency of Agra. In 1835 the Agra area was styled the North-West Province and placed under a Lieutenant-Governor. The two provinces of Agra and Oudh were placed, in 1877, under one administrator, styled Lieutenant-Governor of the North-West Province and Chief Commissioner of Oudh. In 1902 the name was changed to 'United Provinces of Agra and Oudh,' under a Lieutenant-Governor, and the Lieutenant-Governorship was altered to a Governorship in 1921.

Constitution.—Uttar Pradesh has, since 1 April, 1937, an autonomous system of government. The Legislative Council consists of not less than 58 and not more than 60 members, of whom not less than 6 and not more than 8 are chosen by the Governor, the rest being elected.

Under the Constitution of the Sovereign Republic of India, the Uttar Pradesh Legislative Council will consist of 72 members, of whom 24 shall be elected by the members of the Legislative Assembly from amongst persons who are not members of the Assembly; 24 shall be elected by electorates consisting of members of municipalities, district boards and such other local authorities in the state as the parliament by law specify; 6 shall be elected by persons who are graduates of at least 3 years' standing; 6 shall be elected by teachers of at least 3 years' standing of not lower in standard than that of a secondary school, and 12 shall be nominated by the Governor. This provision will come into force after the first elections under the Constitution have been held. Till then the existing Council continues to function.

The Legislative Assembly consists of 232 members, including the 6 seats exclusively set apart for women.

Under the new Constitution of the Republic of India, the House of People in Uttar Pradesh will consist of 430 members chosen by direct election.

There is a Council of Ministers headed by the Hon. Pandit Govind Ballabh Pant, Chief Minister. There are 10 administrative Divisions under 5 Commissioners who have two Divisions each under them. There are 51 districts, the average size of which is 2,213 square miles and the

average population just over a million. The number of municipalities is 110 and that of district boards 49.

Governor.—Shri Hormasji Peroshaw Mody (salary, Rs. 66,000 per annum.)

Chief Minister.—The Hon. Pandit Govind Ballabh Pant.

Area, Population and Religion.—The area of the state as now constituted after the merger of Rampur, Banaras and Tehri-Garhwal states is 112,523 square miles. Population (1941), 56,346,456. The population is rural to the extent of 87·6%. Kanpur (487,324 in 1941) is now the largest city; the second largest is Lucknow (387,177), the capital of the state. Other big cities in order of population are Agra (284,149), Banaras (263,100), Allahabad (260,63[illegible]), Meerut (169,290), Moradabad (142,414), Aligarh [illegible] (110,163), Saharanpur (108,263) and Jhansi (103,254).

Hindus form 83·15% of the population and the Muslims 15·42%.

Education.—The University of Allahabad, first constituted as an affiliating university in 1887, was reorganized in 1921 as a unitary teaching and residential university. It exercised control over the affiliated colleges. Since July, 1927, these colleges have been transferred to the new Agra University, which is a purely affiliating and examining university. The Banaras Hindu University was constituted in 1916; Lucknow University in 1920; the Aligarh Muslim University in 1920, and the Roorkee University in Oct., 1948, all being unitary teaching and residential universities. The first 5 universities had 24,182 students in 1948–9, including students of intermediate classes in the Banaras Hindu and Aligarh Muslim Universities. Government maintains medical colleges at Lucknow and Agra and an Ayurvedic college attached to the Lucknow University, an agricultural college, a technological institute, a sugar institute and a textile institute at Kanpur; besides 3 government training colleges for men teachers at Lucknow, Agra and Banaras and 3 government training colleges for women teachers at Lucknow, Allahabad and Bareilly, a college of physical education at Allahabad, a government pedagogical institute, a training college for constructive subjects, a bureau of psychology and a college of home science for girls at Allahabad. There is also a government veterinary college known as U.P. College of Science and Animal Husbandry at Mathura, and training colleges for women at Allahabad and Lucknow, *i.e.* 3 at Allahabad, 2 at Lucknow and one at Agra. Government also maintain agricultural schools at Bulandshahr, Gorakhpur and Ghazipur, Chirgaon (district Jhansi) and Hawalbagh (district Almora). Educational institutions of all kinds numbered 26,275 in 1946–47 and 32,893 in 1948–49, including 25 mobile training squads. For secondary education there were 2,967 institutions, with 594,594 scholars, and for primary education 26,337 schools, with 1,985,016 scholars. On 31 March, 1949, technical and industrial schools of all kinds numbered 104 and had 2,902 students on their rolls. There were 2,833 institutions for Indian girls, with 2,464,953 scholars, and compulsory primary education for boys in 86 municipalities, and in 357 rural areas of 25 districts (1,224 villages), government meeting two-thirds of the extra cost involved. The percentage of scholars to the population is 8·31 for males and 1·36 for females. Government contributed 45·08% of the total cost of education in 1948–49.

Technical Education.—There is a technical research institute known as Harcourt Butler Technological Institute, and government textile

institute at Kanpur; a school of arts and crafts at Lucknow; 3 government technical institutes at Lucknow, Gorakhpur and Jhansi; 2 Polytechnic institutes at Srinagra (Garhwal) and Almora; 2 carpentry and wood-working schools at Bareilly and Allahabad. In addition there are 3 small carpentry schools ar Faizabad, Nainital and Dehra Dun. In textiles there is a Central Weaving Institute at Banaras and 5 smaller weaving schools at Mau (Azamgarh), Khairabad (Sitapur), Roorkee, Muzaffarnagar and Bulandshahr. There are 2 leather-working schools at Kanpur and Meerut, and one tanning school at Fatehpur. In metals, besides one [illegible] school at Aligarh, there is a brassware school known as [illegible] Khatri Industrial Institute at Banaras. There is also a government-aided technical college and leather-working school at Dayalbagh, Agra, and 2 government occupational institutions at Lucknow and Allahabad respectively.

There are 124 tuitional classes in rural areas for teaching different cottage arts. Besides these institutions, there are 51 government-aided industrial and technical schools run by local boards or registered associations.

Justice and Crime.—There is one high court in the province with a chief justice, and 14 permanent judges and 5 additional judges at Allahabad; including a bench at Lucknow consisting of 5 judges. There are 28 sessions divisions in the state. The total number of persons under trial in the state was 610,808 in the year 1948. The police force, consisting of 61,000 officers and men and 49,003 village chaukidars together with 63 daffadars, is administered by an inspector-general with 7 deputy inspectors-general, including 2 temporary officers, and 2 deputy inspectors-general now known as D.I.G. headquarters and railways, and D.I.G., C.I.D. and one assistant to I.G., 98 (permanent and temporary) district superintendents, 38 assistant superintendents and 204 (permanent and temporary) deputy superintendents. There is a police training college at Moradabad under a superintendent of police as principal. There is a C.I.D. and government railway department under the charge of a deputy inspector-general of police and assistant inspector-general of police respectively. The deputy inspector-general C.I.D. is assisted by 6 superintendents of police and 28 deputy superintendents of police, assisted by 3 superintendents and 6 deputy superintendents. There is a Provincial Armed Constabulary which has been re-organized and expanded to constitute 13 battalions. It is under the command of an assistant inspector-general, 11 commandants of the rank of the superintendents of police and 24 assistant commandants of the rank of deputy superintendents of police, and 12 adjutants of the rank of deputy superintendents of police. The Anti-Corruption Department forms part of the Criminal Investigation Department and is under the charge of 6 superintendents of police and 22 deputy superintendents of police.

Finance.—The revenue of the Uttar Pradesh in 1947–48 was 387·6 lakhs of rupees. To this total the main contributions were:—691 lakhs from land revenue, 218 lakhs from stamps, 706 lakhs from state excise, 183 lakhs from forests, 175 lakhs from irrigation and 565 lakhs from the Government of India on account of the state share in the income tax receipts and 253 lakhs from other taxes and duties. On the expenditure side the total for 1947–48 was 387·4 lakhs; money spent on education amounted to 409 lakhs; on police, 641 lakhs, and on general administration, 271 lakhs. The government spent Rs. 175 lakhs for construction of new irrigation and hydro-electric works and 205 lakhs on electricity schemes.

Production and Industry.—Agriculture absorbs 76% of the population; 36·92 million acres were under cultivation in 1948–49, 4·88 million acres were irrigated from wells and 6·13 million acres from canals and other sources. The productive canals and tube wells gave a net revenue of 8·63% on the total capital outlay. In 1945 there were 1,047 registered factories in the state. On 31 March, 1947, there were 121 trade unions, with a membership of 139.115.

The Ganga Canal hydro-electric grid had, in 1948, an effective capacity of 36,900 kw. The total mileage of transmission lines was 4,756. The number of transformers was 2,539.

The total area irrigated in Uttar Pradesh, in 1948, was 5,971,639 acres. The total mileage of irrigation channels was 26,082 miles. The number of tube-wells was 2,009.

Communications.—There were, up to 31 Dec., 1948, 7,535 miles of metalled roads, 6,512 miles of unmetalled roads and 418 miles of cement concrete roads and tracks maintained by the Public Works Department of the Uttar Pradesh State.

WEST BENGAL.

I. The former Province of Bengal.

Government.—The British first came to the shores of Bengal in 1633, when the first factories were established. A new centre of trade was fixed by Job Charnock at Calcutta in 1690. In 1699 Bengal was constituted a separate Presidency, and there were Presidents and Governors of Fort William from 1700 to 1774, the last being Warren Hastings. There were Governors-General of Fort William from 1774 to 1834, who were given powers of superintendence and control over the Presidencies of Fort St. George (Madras) and Bombay. In 1834 the Bengal Presidency was divided into two, 'Agra' and 'Fort William in Bengal,' and the title of Governor was changed to that of Governor of the Presidency of Fort William in Bengal and Governor-General of India. In 1854 the Governor-General was relieved of his responsibilities as Governor of Bengal, a Lieut.-Governor of Bengal being appointed. In 1874 the Bengal Province was reduced to Bengal proper, Bihar and Orissa. In 1905 a portion of Bengal proper together with Assam went to form a new province, Eastern Bengal and Assam. In 1910 the Government of the remainder of Bengal with Bihar and Orissa was constituted into a Lieut.-Governorship with an Executive Council consisting of 3 members. A new Presidency of Bengal, reuniting all the Bengali-speaking districts, was established in 1912 under a Governor in Council (3 members). From 1921 till 1 April, 1937, in accordance with the Government of India Act of 1919, the administration consisted of the Governor with 4 executive councillors (two being Indians) for the 'reserved' subjects and of the Governor with 3 Indian ministers for the 'transferred' subjects. On that date it was constituted an autonomous province, with a legislature of 2 chambers: viz. the Legislative Council and the Legislative Assembly. The Legislative Council consisted of not less than 63 and not more than 65 members, 30 elected by constituencies, 27 elected by members of the Legislative Assembly, and not less

than 6 nor more than 8 chosen by the Governor. The Legislative Assembly consisted of 250 elected members.

II. The present State of West Bengal.

Under the terms of the Indian Independence Act, 1947, the Province of Bengal ceased to exist. The Moslem majority districts of East Bengal, consisting of the Chittagong and Dacca Divisions and portions of the Presidency and Rajshahi Divisions, became part of the Dominion of Pakistan, under the name of East Bengal (*see* p. 204).

Constitution.—Pending the framing of the new constitution of India, the legislature of the new Indian province of West Bengal was made unicameral by an order of the Governor General issued under the provisions of the Indian Independence Act, 1947. The West Bengal Legislative Assembly now consists of 90 members from 72 constituencies plus 2 nominated members from Cooch Behar. The Cabinet in 1950 consisted of the Chief Minister and 12 other ministers.

For administrative purposes there are 2 divisions, under which there are 13 districts, exclusive of Calcutta. For the purposes of local self-government there are 13 district boards, 3 local boards, and about 1,865 smaller units called union boards. The Darjeeling and (temporarily) Birbhum district boards have official, the other district boards have non-official chairmen. There are 78 municipalities, 4 of which are under supersession. The Calcutta Corporation was reconstituted by an act of 1923 with a mayor, chief executive officer and other officials: from March, 1948, the Corporation has been superseded and placed in charge of an administrative officer appointed by the provincial government.

Governor.—Dr. Kailas Nath Katju (assumed office 21 June, 1948; salary, Rs. 66,000 per annum).

Premier.—Dr. B. C. Roy.

Area, Population and Religion.—Bengal, as reconstituted in 1912, covered 82,876 square miles, of which 77,442 square miles were British territory. The population (1941) was 60·3 million in British territory and 1,153,852 in the two Indian states of Cooch Behar and Tripura. Calcutta (the capital) with its suburbs account for 2,108,891; greater Calcutta in 1949 was estimated to have a population of 5,007,772. The urban population of the remainder of the province was, in 1941, only 6·3% of the whole. Howrah had a population of 379,292. Moslems constituted 54% and Hindus 42% of the total population. Of the 167,026 Christians, 111,426 were Indian Christians and 31,620 Anglo-Indians. Bengali is the mother tongue of 92% of the total population, though altogether 90 different languages are found spoken in Bengal.

In 1947, a commission under the chairmanship of Sir Cyril Radcliffe determined the boundary between the East and West Bengal. As constituted under the award of this commission, West Bengal has an area of 28,215 square miles. The population is estimated to be 21,196,453, of whom 25·01% are Moslems, the rest being non-Moslem, including Anglo-Indian, Indian Christian, etc.

Education.—Recognized educational institutions in West Bengal in 1950 numbered 20,079 and unrecognized 413. The number of pupils in all classes of institutions was 1,946,525. The Calcutta University is both an affiliating and a teaching university, dating from 1857. Art colleges for males numbered 84 with 54,605 students (1950); of these 9 were maintained

by Government. There were 2,438 secondary schools and 61 institutions for the training of teachers. There were 2,385 students in 2 engineering colleges. There were 1,453 institutions of all kinds for girls. For children of Europeans and Anglo-Indians there were 55 institutions.

Justice and Crime.—The High Court, Calcutta, from 15 Aug., 1947, consisted of a chief justice and 14 judges. For criminal and civil justice there were from that date 14 district and sessions judges (including additional judges). For criminal justice there were 203 stipendiary and 128 honorary magistrates and for civil justice 32 subordinate judges and 83 munsifs (civil judges of the first instance), 1 provincial small cause court judge exercising also the powers of a subordinate judge, and 6 judges in the court of small causes at Calcutta. There were 272,589 criminal cases brought to trial in 1948, and outside Calcutta 213,822 civil suits were instituted. The strength of the West Bengal police was 24,657 under an Inspector-General. The Calcutta police is a separate force under a commissioner of police who is directly under Government.

Finance.—The revenue collected in 1949–50. was 3,401$\frac{2}{5}$ lakhs of rupees, including a grant of 116$\frac{1}{4}$ lakhs from the central government for post-war development schemes. Taxes and duties furnished the largest contribution, nearly 854 lakhs; next comes excise, 614$\frac{1}{5}$ lakhs; taxes on income (share of income tax and taxes on agricultural income), 612$\frac{3}{5}$ lakhs; stamps, 266$\frac{1}{4}$ lakhs; land revenue, 177$\frac{4}{5}$ lakhs; customs, 82$\frac{2}{5}$ lakhs; West Bengal forests, 60$\frac{2}{3}$ lakhs; receipts under motor vehicles acts, 46$\frac{1}{6}$ lakhs, and the registration fees, 37 lakhs. On the expenditure side the total was 3,138 lakhs. Police cost 447$\frac{1}{4}$ lakhs; extraordinary charges, 328$\frac{1}{4}$ lakhs; education, 268$\frac{3}{4}$ lakhs; general administration, 205$\frac{4}{5}$ lakhs; civil works, 269$\frac{1}{4}$ lakhs; medical, 271$\frac{1}{4}$ lakhs; agriculture, 205$\frac{1}{8}$ lakhs; justice, 90$\frac{4}{5}$ lakhs; jails, 92$\frac{1}{9}$ lakhs; irrigation, 42$\frac{3}{4}$ lakhs; industries, 77$\frac{1}{2}$ lakhs; famine relief, 29 lakhs; public health, 66$\frac{1}{4}$ lakhs; forests gave a surplus of income over expenditure of 7$\frac{1}{7}$ lakhs.

Production and Industry.—At the close of 1949 there were 2,415 registered factories of all kinds. There were 94 jute mills with a daily average of 288,766 operatives. Cotton mills numbered 31 with 28,125 operatives. The coal-mining industry in Bengal had, in 1948, 239 mines, employing 88,612 operatives, with an output of 8,129,541 tons.

On 30 June, 1949, co-operative societies numbered 14,310, with a membership of 746,303 and a working capital of Rs. 17,75,31,000.

Commerce and Communications.—The foreign trade of Bengal in 1947–48 amounted to 115·74 crores of rupees of imports and 237·96 crores of exports (excluding treasure, re-exports and Government stores). Of the exports, jute manufactures and raw jute accounted for 64·30%. The United Kingdom sent 36·52% of the imports and received 24·51% of the exports of private merchandise.

In March, 1949, the length of metalled roads was 3,750 miles, and of unmetalled roads 11,100 miles, exclusive of municipal and village roads. West Bengal possesses 484 miles of navigable canals. The length of railways within the province is 1,728 miles.

B. States Administered by a Rajpramukh.

Hyderabad.—The territory of this state, the largest (next to Kashmir, which, however, contains vast areas of almost uninhabited land), and most populous of Indian states, had become a province of the Mogul Empire in 1687. In 1713 the emperor appointed Mir Kamruddin Ali Khan, otherwise known as Chin Killij Khan, of Turkoman descent, as subadar or viceroy of the Deccan with the title of Nizam-ul-Mulk (administrator of the state). Nizam-ul-Mulk founded the present dynasty of the Nizam in 1724, and Hyderabad, founded in 1589 by a descendant of the Kutb Shahis of Golconda, who gave way to the Moguls, became the capital.

After the entry of Indian troops into Hyderabad territory in Sept., 1948, a military government, under Major-General Chaudhuri, was set up as a temporary measure. The military administration terminated on 1 Dec., 1949, following the accession of the state to the Indian Union.

The area is 82,698 square miles, and the population, 16,338,534 (1941). There is a legislative council of 22 members, 8 being elected. Besides the Hyderabad municipality, there are 17 district and 108 sub-district boards. The jurisdiction over Secunderabad was handed over to the Nizam's Government on 1 Dec., 1945.

There are 1 chief justice and 12 puisne judges. In 1941 there were 296 officers administering criminal and civil justice, including 4 sessions judges and 4 honorary [illegible]. In 1941, 79,626 criminal cases were instituted and 56,225 c[illegible]. The district and city police numbered 15,466.

The number of public educational institutions in 1942 was 5,796, with 422,962 pupils. There were 7 arts colleges, including 1 for women, and 3 professional colleges. The Osmania University, in which teaching is in Urdu, was founded in 1918. The total expenditure on public instruction for 1944–45 amounted to Rs. 145·87 lakhs.

The estimated revenue for 1945–46 was Rs. 1,582·43 lakhs, and the estimated expenditure Rs. 1,720·40 laks. 171·30 lakhs of the estimated expenditure was to be met from the various reserves under Government, leaving a net surplus of 33·33 lakhs.

The number of co-operative credit societies was 19,045 in 1947–48, with a membership of 1,507,536. The number of factories working in 1944 was 659, employing 51,741 workers.

A state bank was established in 1942, with an authorized capital of Rs. 1,500,000. The state has its own currency.

The ruler is General H.E.H. Sir Mir Osman Ali Khan, G.C.S.I., G.B.E., Nizam of Hyderabad and Berar; born 1886; succeeded 1911; salute of 21 guns. Heir-apparent is Prince Azam Jah Bahadur, Prince of Berar.

Prime Minister.—M. K. Vellodi.

Furer-Haimendorf (C. v.), The Aboriginal Tribes of Hyderabad. 3 vols. London, 1943–48.

Qureshi (A. I.), The Economic Development of Hyderabad. Bombay, 1949.

Jammu and Kashmir.—The state of Jammu and Kashmir, which had earlier been under Hindu rulers and Moslem sultans, became part of the Mogul Empire under Akbar from 1586. After a period of Afghan rule from 1756, is was annexed to the Sikh Kingdom of the Punjab in 1819. In 1820 Ranjit Singh made over the territory of Jammu to Gulab Singh. After the decisive battle of Sobraon in 1842 Kashmir also was made over to Gulab Singh under the Treaty of Amritsar. British supremacy was recognized. The bulk of the population, except in Jammu, are Moslems. The

ruling family is Hindu. The area is 84,471 square miles; the population according to the 1941 census is 4,021,616. Geographically the state may be divided into (1) the Tibetan and semi-Tibetan tracts which contain the districts of Ladakh and Gilgit; (2) the Jhelum valley, within which is situated the lovely and world-famous 'Happy Valley' of Kashmir, and (3) the submontane and semi-mountainous tract which includes Jammu, the winter capital of the state.

The present Maharaja is Lieut.-Gen. H.H. Maharaja Sir Hari Singh, G.C.S.I., G.C.I.E., G.C.V.O., A.D.C., LL.D., born 1895, succeeded 1925, salute of 21 guns; heir apparent, Lieut. Yuvaraj Karansinghji Bahadur, born 1931.

The Maharaja acceded to the Dominion of India on 27 Oct., 1947; and, in view of large-scale attacks by tribesmen from outside the state, the Indian Army took over its defence. The dispute between India and Pakistan about the state was brought before the United Nations in 1948. In May, 1950, Sir Owen Dixon was appointed U.N. Mediator in Kashmir and his Report has been submitted to the Security Council of the United Nations Organization.

The government is now carried on by a Ministry representing the majority party in the state. The Prime Minister is Sheikh Mohammad Abdullah, leader of the National Conference.

In April, 1945, there were 2,078 educational institutions, including 4 arts colleges, an oriental college and 1,492 primary schools, with over 100,000 pupils. Primary education for boys is compulsory in the cities and important towns. The state has now a University of its own established in 1949. A Kashmiri script has been evolved for the first time in history; text-books in Kashmiri for children have been introduced in elementary schools.

The government have enacted land reform measures under which land in excess of 22½ acres held by a single person is to be transferred to the actual tiller. Measures have been adopted to procure paddy on a monopoly basis to eliminate profiteering, hoarding and black-marketing by private agencies. Under the Grow More Food Campaign, 23,196 acres of cultivatable waste lands were allotted to landless peasants during the year 1948–49 and 6,194 acres in 1949–50.

Besides agriculture, the chief industry is sericulture, which dates back to the 15th century. Forests cover about one-eighth of the area of the state forming an important source of revenue, besides providing employment to a large section of the population.

The Drug Research Laboratory in Jammu, the winter capital of the state, is the premier pharmaceutical laboratory in India.

The government has started a network of emporia to provide an outlet for the trade of the state. Business done by the emporia during 1949 was over Rs. 20 lakhs.

The trade in 1944–45 was:—Imports, Rs. 636·09 lakhs; exports, Rs. 153·94 lakhs. The revenue of the state in 1949–50 was Rs. 439·90 lakhs.

Kashmir is linked with the railway system of India by the newly-constructed motorable Jammu–Pathankot road. The Banihal cart road, which is 200 miles long, connects Srinagar, the summer capital, with Jammu, the winter capital. The state owns a transport fleet of over 500 trucks for the movement of goods to and from the state, and 2 standard workshops have been set up in Srinagar and Jammu to maintain this fleet. Under a plan of opening up the country, new roads have been laid out connecting far-flung areas with the main road.

A Planning Committee set up in 1949 is engaged in collecting important statistics with regard to various aspects of the state's economy.

A Handbook of Jammu and Kashmir State. Jammu, 1946.
Sinha (S.), Kashmir: The Playground of Asia. A Handbook for Visitors. 3rd ed. Allahabad, 1947.

Madhya Bharat.—The Union of Madhya Bharat was formed under the new Constitution of India and comprises 25 of the former Indian states which merged into the Union on 15 June, 1948. The Union has a total area of 46,710 square miles and a population of 7,141,000. The former states affected by the merger are:—Alirajpur, Barwani, Dewas (Senior), Dewas (Junior), Dhar, Gwalior, Indore, Jaora, Jhabua, Khilchipur, Narsingarh, Rajgarh, Ratlam, Sailana, Situmau, Jobat, Kathiawara, Kurwai, Mathwar, Piploda, Muhammadgarh, Pathari, and the Bhumia estates of Nimkhera, Jamnia and Rajgargh.

Details of [illegible] these states may be found in earlier editions of THE STATESMAN'S [illegible].

Mysore.—Mysore state is surrounded on all sides by the Madras state, except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara, respectively, and towards the south-west by Coorg. It is famous for its picturesque and diversified scenery and for its temperate and healthy climate. The capital of the state is Mysore, which is also the residence of the Maharaja, and the headquarters of the Mysore University. The administrative headquarters is Bangalore.

The area of the state is 29,475 square miles, the population 7,329,140 (1941) and annual revenue Rs. 11,84,40,000. For administrative purposes, the state is divided into 9 districts, namely, Bangalore, Mandya, Mysore, Hassan, Chikmagalur, Shimoga, Chitaldrug, Tumkur and Kolar.

According to tradition the ancestors of the present dynasty came to Mysore in 1399, and established themselves in Hadinad, a few miles from the present capital of the state. By successive conquests, the family extended the kingdom till it reached a position of eminence during the 17th century. In the latter part of the 18th century the real power passed into the hands of Hyder Ali. Under him and his son, Tippu Sultan, the territories of Mysore were largely extended. On the defeat of Tippu in 1799, the territories were partitioned and the Mysore state, in its present shape, was handed back to the old Hindu dynasty. As a result of an inquiry made by a committee into the administration, Lord William Bentinck assumed direct administration of the state in 1831, and for 50 years Mysore was administered by commissioners. In 1865, the present Rajpramukh's grandfather was adopted as heir by the Maharaja, and in 1881 he was placed on the throne of Mysore, and invested with powers under an instrument of transfer. In 1931 this was replaced by a treaty.

The Bangalore Civil and Military Station was retroceded to the Maharaja in 1947. Mysore has now acceded to the Indian Republic under certain specified conditions and has sent its own representatives to the Indian Parliament at New Delhi. The administration is carried on by the Maharaja as Rajpramukh and a Council of Ministers which functions on the basis of joint responsibility. The Council consists of a Chief Minister and 6 other Ministers. The Constituent Assembly, which was set up in the year 1948 to frame the new Constitution, composed of 76 elected members, of whom 5 were Muslims and 9 Depressed Classes, has been converted into the Legislative Assembly in the place of the two former Houses, namely, the Representative Assembly and the Legislative Council.

The Rajpramukh is H.H. Maharaja Sri Jaya Chamaraja Wadiyar Bahadur, G.C.B., G.C.S.I., born 1919; succeeded 8 Sept., 1940; salute of 21 guns.

The Council of Ministers :—

Chief Minister.—K.Chengalaraya Reddy.
Minister for Finance and Industries.—H. C. Dasappa.
Minister for Law and Labour.—K. T. Bhashyam Iyengar.
Minister for Education and Public Health.—(Vacant.)
Minister for Revenue and Excise.—H. Siddiah.
Minister for Home Affairs.—T. Mariappa.
Minister for Local Self-Government.—R. Chennigaramiah.

There are, besides, the High Court, 74 criminal and 45 civil courts, excluding 8 courts of justices of the peace. There are 5,103 co-operative societies with 390,615 members. The University of Mysore has 18 constituent colleges, 13 affiliated colleges and a medical school, with a total strength of 13,422 students. The number of recognized educational institutions on 1 March, 1950, was 11,056 with 859,917 scholars. The state forests cover 4,696 square miles. The mines in the Kolar Gold Field area produced 180,039,771 oz. of fine gold during 1948–49.

Communications by road as well as by railway are well maintained throughout the state. There are 6,273 miles of road, of which 5,051 miles are metalled. The state railway comprises 609 miles metre gauge line and 102 miles narrow gauge line. Bangalore is also rapidly developing into an important airport.

Patiala and East Punjab States Union.—The Union of Patiala and the East Punjab States was formed under the new Constitution of India and comprises 8 of the former Indian states which merged into the Union on 20 Aug., 1948. The Union has a total area of 10,099 square miles and a population of 3,424,000. The former states affected by the merger are :—Patiala, Kapurthala, Malerkotla, Faridkot, Nabha, Jind, Nalagarh and Kalsia.

Details of the former states may be found in earlier editions of THE STATESMAN'S YEAR-BOOK.

Rajasthan Union.—The Union of Rajasthan was formed under the new Constitution of India and comprises 18 of the former Indian states which merged into the Union on 7 April, 1949. The Union has a total area of 128,424 square miles and a population of 13,085,000. The former states affected by the merger are :—Jodhpur, Jaipur, Bikaner, Jaisalmer, Alwar, Bharatpur, Dholpur, Karauli, Banswara, Bundi, Dungarpur, Jhalawar, Kishengarh, Kotah, Partabgarh, Shahpura, Tonk and Udaipur.

Details of some of the former states may be found in earlier editions of THE STATESMAN'S YEAR-BOOK.

Saurashtra Union.—The Union of Saurashtra was formed under the new Constitution of India and comprises 222 of the former Indian states which merged into the Union on 15 Feb., 1948. The Union has a total area of 21,062 square miles and a population of 3,556,000. The former states and areas affected by the merger are :—Units including the jurisdictional states of Nawanagar, Bhavnagar, Porbandar, Dhrangadhra, Morvi, Gondal, Jafrabad, Rajkot, Wankaner, Palitana, Dhrol, Chuda, Limbdi, Wadhwan, Lakhtar, Sayla, Vala. Junagadh, Manavadar, Jasdan, Amarnagar (Thana Devli), Vadia, Lathi, Mali, Bajana, Virpur, Maliya, Kotda-Sangani, Jetpur, Bilkha, Patdi and Khirasra.

Details of some of the former states may be found in earlier editions of the STATESMAN'S YEAR-BOOK.

Travancore and Cochin Union.—The Union of Travancore and Cochin was formed under the new Constitution of India and comprises these two former Indian states which merged into the Union on 1 July, 1949. It has a total area of 9,155 square miles and a population of 7,493,000.

Details of the former states may be found in earlier editions of THE STATESMAN'S YEAR-BOOK.

Vindhya Pradesh.—Vindhya Pradesh, which has been constituted a centrally administered area under the new Constitution of India, comprises 35 of the former Indian states which merged into the new area on 1 Jan., 1950. It has a total area of 24,600 square miles and a population of 3,569,000. The former states affected by the merger are Ajaigarh, Baoni, Baraundha, Bijawar, Chhatarpur, Charkhari, Dattia, Maihar, Nagod, Orchha, Panna, Rewa, Samthar, Ahipura, Banka-Pahari, Beri, Bhaisaundha, Bihat, Bijna, Dhurwai, Gaurihar, Garrauli, Jaso, Jigni, Kamta-Rajaula, Khaniadhana, Kothi, Lugasi, Narsinghgarh, Pahara, Paldeo (Nayagaom), Sarila, Sohawal, Taraon, and Tori-Fatehpur.

Details of some of the former states may be found in earlier editions of THE STATESMAN'S YEAR-BOOK.

C. STATES ADMINISTERED BY A CHIEF COMMISSIONER.

AJMER.

An agency subordinate to the factory at Surat was established at Ajmer early in the 17th century. The British received the tract by cession from the Maharaja of Gwalior after the Pindari War in 1818. This small province of Ajmer consists of one district with 3 sub-divisions, Ajmer, Kekri and Beawar, with an area of 2,400 square miles and a population of about 700,000. The province is administered by the President acting through a Chief Commissioner, who resides at Ajmer. The city of Ajmer has a population of about 200,000. The income of the province was Rs. 47·16 lakhs, in 1949–50, and the expenditure Rs. 89·82 lakhs. The Government College at Ajmer had 960 students in the 1950–51 session.

Ajmer has different types of soils, viz., sandy, sandy-loam, clay loam and clayey. Nearly 60% of the population live on agriculture. The total area of the province is a little over 1,536,000 acres, of which about 1,148,059 acres are under cultivation, depending on the vagaries of rainfall. The annual produce of foodgrains in normal years varies between 50,000 and 60,000 tons, as against the requirement of about 88,000 tons.

Births numbered 17,613 and deaths 12,115 in 1949–50.

The total mileage of roads in the state is 365 miles, of which 226 miles of roads are maintained by the Central P.W.D. and the remainder by local bodies, *e.g.* municipalities and district boards. There are 16 different routes on which motor vehicles are plying. The types and numbers of vehicles plying on the various routes are as follows:—Passenger buses, 100; public carriers, 100; taxis, 30.

Chief Commissioner.—K. L. Mehta, I.C.S.

BHOPAL.

This state has been constituted a centrally administered area under the new Constitution of India as from 1 June, 1949. It has an area of 6,921 square miles, a population of 785,322 and an approximate revenue of Rs. 1·19 lakhs.

BILASPUR.

Bilaspur, one of the former Punjab States, has been constituted a centrally administered area under the new Constitution of India with effect from 12 Oct., 1948. It has an area of 453 square miles and a population of 110,396. Its revenue in 1948 was approximately Rs. 6·5 lakhs.

COOCH-BEHAR.

This state merged with the province of West Bengal on 1 Jan., 1950. It has an area of 1,321 square miles and a population of 640,842.

COORG.

This state came under British control in 1834, when, at the wish of the inhabitants, the reigning raja was deposed. At first there was a superintendent of Coorg, acting under the commissioner of Mysore and Coorg. In 1881 the resident in Mysore became the chief commissioner of Coorg, but with effect from 1 July, 1940, a separate chief commissioner of Coorg has been appointed with headquarters at Mercara (the capital). A legislative council of 20 was created in 1924. This number was reduced by 2 consequent on the abolition of the European Constituency in 1949. Coorg has one seat in the Union Parliament and shares with Ajmer one seat in the Council of State.

The area of Coorg is 1,593 square miles and the population (1941) is 168,726. Kannada is the ch[illegible]: Kodagu (Coorg language) is a dialect of old Kannada. In [illegible] estimated revenue was Rs. 45·18 lakhs and the expenditure Rs. 66·34 lakhs.

There were, in 1949–50, 3,689 boys in high schools, 6,395 in middle schools and 4,356 in primary schools, and 2,116 girls in high schools, 3,378 in middle schools and 2,476 in primary schools. [illegible] college was started in Coorg affiliated to the Madras [illegible] effect from 1 July, 1949, and the number of students was [illegible] 14 women) in 1949. During the academic year 1950–51, there were 106 students in the junior and 78 students in the senior intermediate class.

There were 3,865 births and 2,099 deaths in Coorg during the year 1949.

Coorg is a surplus area in respect of rice, which is the main staple food of the people of the state, but other foodstuffs have to be imported. In 1947–48, 7,500 tons of rice, in 1948–49, 11,800 tons of rice and in 1949–50, 11,000 tons of rice, being the surplus quantity, were exported to Mysore State and the Malabar District of Madras State. Wheat is not grown in Coorg, but the small requirement of about 240 tons per annum is imported from Mysore out of the allotment made to that state under the annual basic plan of the Central Government. Major cultivations are paddy, coffee, orange, cardamom and pepper. Most of the lands are rain-fed and only 6,000 acres are cultivated by irrigation. There are 42,139 acres under coffee, 88,755 acres under paddy, 18,394 acres under orange, 13,901 acres under cardamom, 3,189 acres under rubber, 518 acres under pepper and 415 acres under tea cultivation.

The total length of the State roads is 325 miles, consisting of 45 miles of tarred roads, 256 miles of metalled roads and 24 miles of gravelled roads. The length of the roads under the control of the District Board is 62 miles. The State being a hilly country is unconnected by railway and has to depend solely upon motor transport both for passenger and goods traffic. The total number of motor vehicles registered and running in the State is :— 250 motor cars, 40 motor cycles, 25 taxis, 60 stage carriages, 250 lorries

and 30 other vehicles. The income under the Motor Vehicles Taxation Act is about Rs. 3·5 lakhs.

Coorg has contributed the first Indian Commander-in-Chief, General K. M. Cariappa, Maj.-Gen. K. S. Thimmayya, 2 brigadiers, over a 100 senior commissioned officers in the Indian Army and the 37 (Coorg) Anti-Tank Regiment, R.I.A.

Chief Commissioner.—Lieut.-Col. D. S. Bedi, I.P.S.

DELHI.

The Delhi province, with an area of 574 square miles, was part of the Punjab province before Oct., 1912, when the enclave was created into a separate province under a chief commissioner. In 1915 a tract of land in the United Provinces comprising 65 villages was added to the Delhi province, and is included in the above-mentioned area. The population is 917,939 (census of 1941).

Education.—The university of Delhi, intended to be a unitary, teaching and residential institution, was founded in 1922. There are 4 arts colleges affiliated. There is also the All-India Lady Hardinge Medical College for the medical education of Indian women (opened 1916). A board of secondary education, established in 1926, was converted into a board of higher secondary education in 1942. The Director of Education, Delhi Province, is responsible for the primary and secondary education in the province. The total number of colleges and schools during the year 1948–49 was 550, out of which 166 were for girls. The total enrolment in these institutions on 31 March, 1949, was 115,023, including 32,486 students studying in girls' institutions. There are 7 local bodies in the province, which are mainly responsible for primary education in the areas under their respective jurisdiction.

Finance.—The revenue of the province in 1949–50 was Rs. 251·67 lakhs and the expenditure Rs. 333·97 lakhs.

Production and Industry.—It is a matter of common knowledge that in ancient India when the means of communication were extremely slow, and transport of goods from one place to another was attended with hazardous risks, artists and master craftsmen flocked to the capital towns where they were assured of rich rewards and encouragement by the ruling chief and local nobility. Delhi, in its long career as the capital of the far-flung Hindu Empires and Muslim Kingdoms of bygone days, attracted the best skilled workers in the cultural arts, samples of whose superb workmanship may still be seen in the exhibits preserved in Indian and foreign museums and in the monumental architectural remains of old Delhi, covering an area of over 50 square miles. Of the old industries which spread the fame of Delhi beyond the border of the country, a few are still flourishing. Among them are ivory carving and miniature painting, gold and silver embroidery, lametta and kalabatoon, gold and silver jewellery and household utensils. Industries concerned with the production of gold tissue fabrics, wood and stone carving, arms and armour and illuminated manuscripts have died away.

The modern city of Delhi and New Delhi with an exceedingly large population is not only the largest commercial centre in northern India, but is also an important industrial centre. The location of the Department of Supply in Delhi during the last war had been responsible, in a large

measure, in more than doubling the number of registered factories alone. During the 6 years of war, registered factories increased from 111 in 1939 to 227 in 1945, with a corresponding increase in the number of operatives employed from 17,400 to 36,870, besides the growth of a very large number of small establishments for the production of military requirements and consumer goods.

The number of registered concerns covered by the Indian Factories Act, 1948, stood, in [illegible], affording employment to about 40,000 operatives. After the partition of the country in 1947, a large number of industrial concerns came to be established in Delhi. A Labour Department under the Director of Industries and Labour was created at the end of 1947, and since then, both conciliation as well as adjudication machinery have been brought into operation in line with other provinces.

The development of cottage industries in Delhi after the partition was also considerable; in 1949 as many as 1,100 small-scale industrial establishments and cottage workers were known to be operating in Delhi, affording employment on an average to 5 operatives in each concern.

Agriculture.—The total area under plough during 1949–50 in the province is estimated at about 229,987 acres. During the year 137,439 acres were sown with rabi crops and 90,818 acres with kharif crops. Among the rabi crops, wheat, gram and barley and among the kharif crops, jowar (fodder), bajra and sugar cane are popular. Vegetables and other cash crops are common among the local peasantry. The villagers sell their milk in the city and very little time is devoted by them to the agriculture industry for which dearth of labour is the common problem. The total expenditure on the Agriculture department during the year 1949–50 was Rs. 84,500.

Co-operative Societies.—There are 820 co-operative societies of various types in the State of Delhi, with a membership of 43,328 and a working capital of Rs. 90·27 lakhs.

Motor Vehicles and Haulage.—Since the enactment of the Motor Vehicles Act of 1939 about 26,000 vehicles have been registered in Delhi State out of which about 13,500 are now plying on roads in Delhi; the remaining having been either scrapped or removed to other provinces. Out of the vehicles on the road there are about 8,000 private cars, 2,500 motor cycles, 400 taxis, 220 motor cycle rickshaws, 300 [illegible] buses and 1,580 goods vehicles. Total expenditure on roads in [illegible] was Rs. 8,57,237.

Chief Commissioner.—Shri Shankar Prasad (appointed 18 July, 1948; salary, Rs. 36,000 per annum).

Hearn (Sir G.), The Seven Cities of Delhi. 2nd ed. Calcutta, 1929.
Sharp (Sir H.), Delhi: Its Story and Buildings. 2nd ed. London, 1929.

HIMACHAL PRADESH.

Himachal Pradesh has been constituted a centrally administered area under the Constitution of India and comprises 21 of the former India states which merged into the new area on 15 April, 1948. It has a total area of 10,600 square miles and a population of 935,000. The former states affected by the merger are:—The Punjab Hill states of Baghai, Baghat, Balsan, Bashahr, Bhajji, Bija, Darkoti, Dhami, Jubbal, Keonthal, Kumharsain, Kunihar, Kuthar, Mahlog, Sangri, Mangal, Sirmur, Tharoch, Chamba, Mandi and Suket.

Details of the more important of these former states may be found in earlier editions of THE STATESMAN'S YEAR-BOOK.

KUTCH.

The state became a centrally administered area under the new Constitution of India with effect from 1 June, 1948. It has an area of 8,461 square miles and a population of 501,000. In 1948 the revenue of the state was Rs. 80·00 lakhs.

MANIPUR.

Formerly a feudatory state with which the Assam government had political relations. On 15 Aug., 1947, paramountcy lapsed and the state acceded to the Indian Union. The political agency was abolished with effect from the same date and the administration was taken over by the Government of India on 15 Oct., 1949.

Manipur has an area of 8,638 square miles and a population (1941) of 512,069. About one-third are animistic tribes. For the last 5 years the average annual revenue has been rather over Rs. 19 lakhs. The ruler is H.H. Maharaja Bodh Chandra Singh, born 1908; succeeded 1941; salute of 11 guns. Capital, Imphal. The chief minister of the council is Maharaj Kumar Captain Priya Brata Singh, B.A. The council includes representatives of popular parties invited to serve, and representatives of the hill tribes.

There is one small hydro-electric plant, which is owned by the state. Its output is one 70 kva., one 127 kva. and Deisel plant 77·5 kva.

TRIPURA.

Under the new Constitution of India the state of Tripura became a centrally administered area, the date of the merger being 15 Oct., 1949. It has an area of 4,049 square miles and a population of 513,010.

D. Territory Administered by a Chief Commissioner.

ANDAMAN AND NICOBAR ISLANDS.

The **Andaman Islands** lie in the Bay of Bengal, 120 miles from Cape Negrais in Burma, 780 from Calcutta, and 740 from Madras. Five large islands closely grouped together are called the Great Andamans, and to the south is the island of Little Andaman. There are some 204 islets, the two principal groups being the Ritchie Archipelago and the Labyrinth Islands. The total area is about 2,500 square miles. The Great Andaman group is about 219 miles long and, at the widest, 32 miles broad. The group, densely wooded, contains many valuable trees, both hard wood and soft wood. The best known of the hard woods is the *padauk* or Andaman redwood; *gurjan* is in great demand for the manufacture of plywood. Large quantities of soft wood are supplied to match factories.

The islands possess a number of harbours and safe anchorages, notably Port Blair in the south, Port Cornwallis in the north, and Elphinstone and Mayabandar in the middle.

The original inhabitants live in the forests by hunting and fishing; they are of a small Negrito type and their civilization is about that of the Stone Age. Their numbers are not known as they avoid all contact with civilization. The total population of the Andaman Islands (excluding the aborigines) was in 1949 about 16,500 (11,800 males and 4,700 females). In 1948–49, 31,000 tons of timber and timber-products were shipped to India; revenues from the sale amounted to about Rs. 50,00,000. Coconut, coffee

and rubber are cultivated. The islands are slowly being made self-sufficient in paddy and rice, and now grow approximately half their annual requirements. No [illegible] of the mineral resources has yet been undertaken. On 31 Oct., 1947, there were 4,379 head of cattle and 1,000 goats. There are about 114 miles of metalled road in and around Port Blair.

From 1858 to March, 1942, the islands were used by the Government of India as a penal settlement for life and long-term convicts, but the penal settlement was abolished on re-occupation in Oct., 1945.

Japanese forces occupied the Andaman Islands on 23 March, 1942. Civil administration of the islands was resumed on 8 Oct., 1945.

The Andaman Islands are administered by the President acting through a Chief Commissioner and an Advisory Council of 5 members. The seat of administration is at Port Blair, which is connected with Calcutta and Madras by a mail steamer which calls approximately once every 3 or 4 weeks. The islands are connected to India by wireless telegraphy.

The **Nicobar Islands** are situated to the south of the Andamans, 75 miles from Little Andaman. The British formally took possession in 1869. There are 19 islands, 7 uninhabited; total area, 635 square miles. The islands are usually divided into 3 groups (southern, central and northern), the chief islands in each being respectively, Great Nicobar, Camotra with Nancowrie and Car Nicobar. There is a fine land-locked harbour between the islands of Camotra and Nancowrie, known as Nancowrie Harbour.

The population numbered about 13,000 in 1949. The coconut is the main item of trade, and a major item in their diet; and they have been cultivating the coconut for as long as anyone can remember.

The Nicobar Islands were occupied by the Japanese in July, 1942; and Car Nicobar was developed as a big supply base. The Allies reoccupied the islands on 9 Oct., 1945. The Japanese built some roads in Car Nicobar and small jetties at Malacca in Car Nicobar, and in the harbour at Nancowrie.

The islands are part of the Chief Commissionership of the Andaman and Nicobar Islands; and the Government is represented by an Assistant Commissioner at Car Nicobar.

Chief Commissioner, Port Blair.—A. K. Ghosh, I.C.S. (salary, Rs. 36,000 per annum).

Whitehead (G.), In the Nicobar Islands. London, 1924.

FORMER STATES AND AGENCIES.

Prior to Aug., 1947, subject to British paramountcy, states were governed by their rulers. Constitutional reforms had been introduced in an increasing number of states.

In 1921, under the auspices of His Majesty's Government, a Chamber of Princes was formed as a permanent consultative body. The Government of India Act of 1935 aimed at the establishment of a Federation of India as soon as a sufficiently representative number of princes had signified their willingness to adhere by means of Instruments of Accession. But agreement was never reached between the Viceroy and the rulers as to the nature of the requisite Instruments of Accession, and Federation was not brought into being. The Indian Independence Act, 1947, released the states from their obligations to the Crown and, following the constitution of India into a

Dominion, the majority of the states have either combined to form new Unions or merged with the Provinces or the centre. Many of the larger states have individual representation on the Constituent Assembly of India and are treated as viable units.

The majority of the States and former Agencies, after acceding to the Union of India, have either merged with the Provinces or the Centre or have combined to form a new Union of States. For information prior to merging see THE STATESMAN'S YEAR-BOOK, 1949, p. 175 ff., *and earlier volumes. Full details of the position of the States are contained in the Government 'White Paper on Indian States' (New Delhi, July,* 1948), *and the revised White Paper (March,* 1950). *A statement showing details of the States that have merged with the Provinces is appended below :—*

AREA, POPULATION AND REVENUE OF STATES THAT HAVE MERGED WITH THE PROVINCES.

[1] Since partitioned between Bombay and Rajasthan

The following states have not been affected by merger schemes:—Hyderabad, Jammu and Kashmir, Mysore.

Sikkim.—The ruler of the state is His Highness Maharaja Sir Tashi Namgyal, K.C.S.I., K.C.I.E., born 1893; succeeded 1914. Until the transfer of power in India in Aug., 1947, Sikkim was an Indian State under British paramountcy. Since that date relations between Sikkim and the Government of India have been governed by a stand-still agreement; but under the terms of a new treaty, which was signed in Gangtok on 5 Dec., 1950, Sikkim will continue to be a protectorate of the Government of India, and the Government of India will have special responsibility in respect of the state's defence, external relations and communications. In 1949, at the request of His Highness the Maharaja, the Government of India nominated an official to serve as Dewan of Sikkim. The Dewan is assisted by a nominated Advisory Council. The Government of India continues to maintain important roads in Sikkim, including the two main trade routes to Tibet. Linked with one of these trade routes is a motorable Indian national highway, of which the last 25 miles lie in Sikkim territory. The Political Officer in Sikkim, who resides at Gangtok, represents the Government of India in Tibet and Bhután as well as Sikkim.

Area, 2,818 square miles. Population in 1941, 121,520. The inhabitants are Bhutias, Lepchas and Nepalese, the last-named being now the most numerous. The capital is Gangtok. The state religion is Buddhism, but the majority of the people are Hindus.

The revenue is about Rs. 6½ lakhs per year. Sikkim produces rice, Indian

corn and millets, cardamoms, oranges, apples and woollen cloth. Fruit gardens are maintained by the state. There are extensive forests in the state.

Political Officer.—H. Dayal, I.C.S.
Dewan, Sikkim State.—J. S. Lall, I.C.S.

PAKISTAN.

Government and Constitution.

THE Dominion of Pakistan was constituted on 15 Aug., 1947, under the provisions of the Indian Independence Act, 1947, which received the royal assent on 18 July, 1947. Jurisdiction of the Judicial Committee of the Privy Council ceased on 30 April, 1950. The Dominion consists of the following former territories of British India:—Balúchistán, East Bengal (including practically the whole of Sylhet, a former district of Assam), North-West Frontier, West Punjab and Sind. The seat of government is Karachi. The national language is Urdu.

National flag: dark green with a white vertical bar at the mast, the green portion bearing a white crescent in the centre and a 5-pointed white heraldic star. The white portion is one-quarter of the size of the rectangular flag.

The first Governor-General of the new Dominion was Quaid-I-Azam Mohammed Ali Jinnah (appointed 15 Aug., 1947). He died on 11 Sept., 1948, and was succeeded by the present Governor-General.

Governor-General of Pakistan.—Khawaja Nazimuddin (14 Sept., 1948).

Following is the present composition of the government and the portfolios held by the Ministers (1 April, 1951):—

Prime Minister.—Liaquat Ali Khan.
Defence, States and Frontier Regions.—Dr. Mahmud Husain.
Foreign Affairs and Commonwealth Relations.—Chaudhri Mohammad Zafrullah Khan.
Foreign Affairs and Commonwealth Relations.—(Vacant) (*Deputy*).
Finance and Economic Affairs.—Ghulam Mohammad.
Interior, Information and Broadcasting.—Khwaja Shahabuddin.
Refugees and Rehabilitation.—Dr. I. H. Qureshi.
Commerce and Education.—Fazlur Rahman.
Communications.—Sardar Bahadur Khan.
Food and Agriculture.—Pirzada Abdus Sattar.
Kashmir Affairs.—Mushtaq Admad Gurmani.
Industries.—Chaudhri Nazir Ahmed Khan.
Law and Labour.—
Health and Works.—Dr. A. M. Malik.

Area, Population, Religion.—The total area of Pakistan is 361,007 square miles; its population, 70,103,000, of which 72·7% are Moslems.

The population of the principal cities (census of 1941) is :—

Dacca	213,218	Peshawar	180,967
Karachi	359,492	Rawalpindi	181,169
Lahore	671,659	Sialkot	138,348
Multan	142,768		

Defence.

Navy.—The Royal Pakistan Navy comprises 3 destroyers (*Tariq* (ex-*Offa*) and *Tippu Sultan* (ex-*Onslow*), transferred from the Royal Navy in 1949 and *Tughril* (ex-*Onslaught*), transferred in 1951), 4 frigates (*Sind, Jhelum, Zulfiquar* and *Shamsher*), 4 fleet minesweepers, the training ship *Karsaz*, 2 trawlers, 2 motor minesweepers and 4 motor launches.

Principal base is at Karachi. Naval personnel comprises 500 officers and 5,500 ratings.

Army.—The Pakistan military academy was opened at Kakul on 25 Nov., 1948.

Finance.—Revenue and expenditure of the Government of Pakistan (in Rs. crores) :—

Year ending 31 March	Revenue	Expenditure
1947–48 (15 Aug. to 31 March)	21	44
1948–49	59	58
1949–50	75	75
1950–51	123·68	94·72
1951–52 [1]	116·27	95 53

[1] Budget estimate.

The following table shows the principal items of revenue and expenditure for [illegible] estimates, in Rs. crores) :—

Revenue		Expenditure	
Customs	31,50	Direct demands on revenue	2,53
Excise duties	6,20	Debt service	4,26
Taxes on income	9,50	Civil administration	14,84
Sales tax	6,00	Currency and mint	42
Salt tax	2,60	Civil works	90
Railways	4,00	Defence	50,00
Posts and telegraphs	10	Adjustments between central and provisional governments	16
Currency and mint	2,50	Other expenditure	2,63
[illegible]	12,88		
New fiscal projects	2,00		
Total Revenue	77,28	Total Expenditure	77,18

Banking and Currency.—A state bank came into operation on 1 July, 1948, with an authorized capital of Rs. 600 lakhs. Deposits at 29 Sept., 1949, amounted to Rs. 22,21,00,000, and foreign exchange resources to Rs. 2,41,36,00,000. The monetary unit is the Pakistani rupee, the sterling equivalent of which is 2*s.* $1\frac{13}{16}$*d.* The first notes and coins of the new Dominion were put into circulation on 1 April, 1948. The notes are of Re. 1 denomination and the coins nickel of Rs. 1, $\frac{1}{2}$, $\frac{1}{4}$; copper-nickel of annas 2, 1, $\frac{1}{2}$, and bronze of 1 pice ($\frac{1}{4}$ anna). The coins are minted at the Pakistan Government mint at Lahore.

Agriculture and Industry.—Out of a total area of 114·3 million acres (excluding Balúchistán), the net area under cultivation is about 41·8 million acres.

	1938–39	1944–45		1938–39	1944–45
Rice	18,966,000	25,610,000	Jute	2,225,000	1,700,000
Wheat	8,691,000	9,950,000	Tea	97,000	80,000
Cotton	2,443,000	2,950,000			

Acreage figures for other agricultural products are barley, 510,000; bajua, 2,450,000; jowan, 109,000; maize, 1,030,000; tobacco, 38,070,000, and oil seeds, 245,000.

Output of cotton, 1948–49, was estimated at 989,000 bales (400 lb. each) from 2,704,000 acres (1947–48, 1,090,000 bales from 3,091,000 acres).

The production of jute in 1948–49 was estimated at 5,479,095 bales from 1,876,565 acres; estimates for 1949–50, 6 million bales from 1,880,000 acres.

Tea production in 1948 was estimated at 41,900,000 lb., grown on 80,000 acres, of which 95% were situated in Sylhet.

Forests.—There are 9,861 square miles of reserved and protected forests, of which 4,447 square miles are located in East Bengal, 1,872 in West Punjab, 1,805 in Balúchistán, 1,161 in Sind and 592 in the North-West Frontier Province. East Bengal forest products consist of timber, bamboos, resin, gum, fibre and honey.

Mineral Production.—The quantity (in tons) and value (in rupees) of the chief minerals produced in Pakistan in 1944 were as follows:—

Items	Quantity	Value	Items	Quantity	Value
Chromite . .	20,869	3,16,312	Petroleum (galls.)	75,157,052	37,89,263
Coal . . .	264,443	46,50,310	Salt . . .	794,137	58,69,072
Fuller's earth .	7,714	1,78,520	Steatite . .	618	41,200
Gypsum . .	25,521	82,203			

Cinemas.—The number of cinemas in 1950 was 465 with a seating capacity of approximately 225,000.

Commerce.

The value (in lakhs of rupees) for the chief articles imported and exported at Karachi for the 10-month period April, 1947–Jan., 1948, was as follows:—

Imports		Exports	
Cotton goods	1,61	Skins	1,46
Metals and ores . . .	1,87	Raw cotton	20,35
Hardware and mill stores .	3,01	Raw wool	2,57
Liquor	72	Raw hides	62
Vehicles	2,67		
Oils	4,71	Total	25,00
Woollen goods . . .	66		
Total	15,28		

The total value of imports by sea during the year ended 30 June, 1949, was Rs. 5,81,40,177.

Exports to United Kingdom, 1948, £11,279,780; 1949, £14,918,855; 1950, £25,908,622; imports from United Kingdom, 1948, £17,942,335; 1949, £33,004,193; 1950, £40,924,226; re-exports, 1948, £41,317; 1949, £100,068; 1950, £117,445 (Board of Trade returns).

Communications.—*Railways.*—The equipment of Pakistan's 2 railway systems includes 829 locomotives, 1,680 coaches and 21,943 freight cars owned by the Northwestern Railway, and 434 locomotives, 1,023 coaches and 13,983 freight cars on the Eastern Bengal Railway. Both systems use 1·677 metre (5 ft. 6 in.) broad gauge (39⅜ in.) and 0·762 metre (30 in.) narrow gauge. Railway has 4,561·58 miles of broad gauge, 318·71 miles of metre and 181·77 miles narrow gauge, and the Eastern Bengal Railway has 498·50 miles broad, 1,101·72 miles metre, and 19·50 miles of narrow gauge.

Posts.—Telephones, on 1 Jan., 1949, numbered 16,454, all owned by the government; 55·5% were automatic; 4,968 were in Karachi.

Civil Aviation.—Karachi is on the main B.O.A.C. airline and flying-boat services between the United Kingdom and India, Singapore and Sydney. India and Pakistan signed an air-transport agreement in Karachi on 23 June, 1948, which provides for 17 routes, 5 of which will extend beyond India and Pakistan. The Pakistan routes will be operated by two lines, the Orient Airways and Pak Air. The Government of Pakistan has approved the formation of a company, the Pakistan Aviation Limited, to provide common technical repair facilities for the two afore-mentioned airlines and for the Royal Pakistan Air Force.

PROVINCES.

BALÚCHISTÁN.

Government.—After the Afghán War, 1878–81, the districts of Pishin, Shorarúd, Duki, Sibi and Sháhrig were assigned to the British and in Nov., 1887, were formally constituted as British Balúchistán. In 1883, the districts of Quetta and Bolán were made over by the Khán to the British on an annual quit-rent of Rs. 25,000 and Rs. 30,000 respectively. In 1886, the Bori valley, in what is now the cantonment of Loralai, was occupied. In 1887, the Khetrán country, now known as the Bárkhán tahsil, was brought under British control; in 1889 British [illegible] was established in the Zhob valley and Kákar Khurásán; in [illegible] and Western Sinjráni were included in administered territory; in 1899, the Nuskhi Niabat was made over by the Khán of Kalát on an annual quit-rent of Rs. 9,000, and in 1903 the Nasirábád tahsil was acquired from the Khán on an annual quit-rent of Rs. 117,500. The area of British and administered territory, including tribal areas, was recorded in 1941 as 54,456 and the population 501,631. The chief town is Quetta with a population (1941) of 64,476 (town proper 36,460, and cantonment 28,016). It is the only municipality. The head of the civil administration is the agent to the Governor-General, and Chief Commissioner in Balúchistán. The area under his direct administration is divided as follows:—Quetta-Pishin, Sibi, Zhob, Loralai, Chágai districts and Bolán subdivision. The revenue administration of the province is entrusted to an officer who is styled the Revenue and Judicial Commissioner.

Regular troops are cantoned at Quetta, and militia and scouts at Chaman, Fort Sandeman and Loralai, detachments are also stationed at different places, principally in the Zhob and Loralai districts, for the preservation of law and order. There is also a police force, supplemented by levies. The Indian staff college was opened in Quetta in 1907.

Agent to the Governor-General and Chief Commissioner in Balúchistán.—Mian Amin-ud-Din (salary, Rs. 48,000 per annum).

Area and Population.—Area 134,002 square miles; population (1941 census) 857,835. The main divisions are:—(1) The former British

Balúchistán proper, with an area of about 9,084 square miles, consisting of tracts assigned to the British Government by treaty in 1879; (2) Balúchistán leased areas and Balúchistán tribal areas, with an area of about 45,372 square miles, composed of tracts which have from time to time been acquired by lease, or otherwise brought under control, and placed directly under British officers; and (3) the states of Kalát, Las Bela, Kharan and Mekran, with an area of about 79,546 square miles, Kalát state consisting of a confederation of tribes under the Khán of Kalát, and stretching westwards to Mekran, while Las Bela occupies the alluvial valley between the Pab and Hálá ranges from the sea to Bela. The Kharan state occupies the part of the hilly tract to the south-east of the Chagai district, and touches the borders of Iran and Mekran, and Mekran state, which was formerly the south-western and maritime division of the Kalat state, has a fairly long line of sea-board, the general character of the inland being mountainous.

Religion and Education.—The religion of the population is either Moslem, in general of the Sunni sect, or Hindu. The Moslems numbered (1941 census) 785,181; Hindus, 54,394; Christians, 6,056; Sikhs, 12,044; others, 160. On 1 Oct., 1949, there were 186 primary schools, 23 secondary schools, 1 degree college and 4 private schools, of which 12 and 1 respectively were girls' schools. There were also 2 European schools for boys and girls. Of the 18,500 pupils, 2,000 were girls. Expenditure on education about Rs. 14 lakhs.

Justice.—With certain exceptions, the law of Balúchistán is customary law, administered through jirgas (councils of elders) and the Frontier Crimes Regulation.

Finance.—In the directly administered territory the chief items of revenue are:—Customs, land revenue, grazing tax, excise, stamps and forest. In some places the land revenue is levied in money in accordance with a fixed assessment, but generally it is levied in kind. The revenue from all sources in 1949–50 was Rs. 38,61,424 lakhs and the expenditure Rs. 1,84,17,905 lakhs.

Production and Industry.—The country consists largely of barren mountains, deserts and stony plains; its climate is subject to the extremes of heat and cold, and the rainfall is uncertain and scanty. The agricultural products are wheat, barley, millet, lucerne, rice, maize and potatoes, while grapes, apricots, peaches, apples, pears and melons are grown in abundance. Mekrán is famous for its dates.

Coal is mined at Shrigh and Harnai on the Sind–Pishin railway and in the Bolan pass, also in Sur Range in Quetta–Pishin district. Chromite is extracted in the Zhob district near Hindubagh. Limestone is quarried in small quantities. Gypsum is mined in the Sibi district near Spintangi railway station.

Commerce and Communications.—Registration of trade was discontinued from April, 1925. There are approximately 5,340 miles motorable roads, of which 1,790 miles are all-weather and 3,550 miles fair weather.

The north-western railway, gauge 5 ft. 6 in., enters Balúchistán near Jhatpat and crosses the Kachhi plain to Sibi, where it bifurcates, one branch going *via* Harnai to Khost (83 miles) and the other *via* Quetta to Chaman (271 miles). In addition, a 5 ft. 6 in. gauge line, 440 miles long, runs from Spezand junction, 16 miles south of Quetta, *via* Nushki, Dalbandin and Nok-Kundi to Zahidan in Iran. A narrow gauge line also runs from Bostán

junction, 21 miles north of Quetta on the Chaman line, to Fort Sandeman, a distance of 184 miles.

There is a complete and frequent postal service, extending to Kalát and through Nok Kundi to Zahidan, Seistan and Meshed.

A network of telegraph wires covers the north-eastern portion of the province and extends to Kalát, and westwards *via* Nushki to Nok-Kundi, while a land line, formerly part of the Indo-European system but now worked by the Pakistan department of posts and telegraphs, connects Karachi with Las Bela–Panjgur–Gwadur. Wireless telegraph stations have been installed at Ormara, Pasni and Panjgur.

The Administration Report of the Balúchistán Agency. Annual. Calcutta.

EAST BENGAL.

East Bengal is the biggest province of Pakistan, comprising the eastern territories of the partitioned province of Bengal and the former Assam district of Sylhet, with the exception of certain thanas of the Karimganj sub-division. East Bengal is administratively divided into 3 divisions and 17 districts:—(1) Dacca Division; the districts of Dacca, Mymensingh, Faridpur and Bakerganj; (2) Chittagong Division; the districts of Chittagong, Tippera, Noakhali, Chittagong Hill Tracts and Sylhet; (3) Rajshahi Division; the districts of Rajshahi, Dinajpur, Rangpur, Bogra, Pabna, Kushtia, Jessore and Khulna.

The capital of the province is Dacca and its ports are [illegible] Chalna. The area of the province is 54,100 square miles; [illegible] census) 41·9 million, of which 29·5 million were Moslems and 11·7 million Hindus. The principal language is Bengali.

Vital statistics:—1947, births, 828,859; deaths, 580,092. 1948, births, 718,737; deaths, 500,338.

Agriculture.—East Bengal is primarily an agricultural area and accounts for about 96% of her population. The total area under cultivation is 26·2 million acres of which 5·7 million acres are double or triple cropped, the net cropped area being 20·5 million acres. The area which can be classified as cultivable waste is about 3 million acres. Amongst food crops, rice is the most important; the total area under rice is 19 million acres, which is 72% of the total cropped area. East Bengal yearly produces 195,000 tons of pulses, over 50,000 tons of grams, 20,000 tons of wheat, 15,000 tons of barley, 118,000 tons of oilseeds, 77,000 tons of chillies and over 3 million tons of sugar cane. Amongst non-food items East Bengal produces about 75% of the world production of raw jute; the area under jute is 1·9 million acres and the annual production is 5·5 million bales. East Bengal also produces yearly 41·5 million lb. of tea, 45,000 tons of tobacco, 22,000 tons of sun-hemp and 14,000 bales of cotton.

Forests.—The total area under forests is 3 million acres which is 8·6% of the total land area of the province. The major products are timber and fuel, the annual output of which is about 14 million cubic feet. Among minor forest products. East Bengal produces 41 million bamboos, 144,000 canes, over 400,000 lb. of honey and about 80,000 lb. of wax a year. The total value of the minor forest products only is about Rs. 650,000.

Fishery.—Being bounded on the south by the Bay of Bengal and having numerous rivers, streams, khals and bils, East Bengal is pre-eminently a fish-producing area and possesses great possibilities for the manufacture of various oils and fish products. The estimated annual production of fresh

fish is over 1 million tons and that of sea fish is about 70,000 tons. About 20,000 tons of fish are exported annually to the Indian Union.

Industry.—The industries of the province are yet to be developed. Out of the existing industries, its 13 textile mills, 4 sugar factories, 4 match factories, 3 glass works, 15 hosiery factories and 1 cement factory are the most prominent. East Bengal, the home of famous Dacca muslins, is essentially a land of cottage industries, such as the hand loom, conch shell, brass and bell metal industries, mat making and bamboo and cane works.

Commerce.—The principal imports in 1948–49 were:—Cotton yarn (49·8% of the total), oils (10·8%) and cotton piece-goods (5%); total value, Rs. 21,31,33,000. Principal exports:—Jute (80·8%) and tea (12·2%); total value, Rs. 30,86,85,000. In 1948–49, imports came chiefly from the United Kingdom (22·7%), China (17·2%), Persia (4·7%) and Italy (4·6%); exports went to the United Kingdom (26·9%), U.S.A. (18·4%), Belgium (11·1%), France (11·1%) and Germany (9·1%).

Governor.—Sir Firoz Khan Noon, K.C.S.I., K.C.I.E. (appointed 31 March, 1950; salary, Rs. 72,000 per annum).

Premier.—Nurul Amin.

For further details concerning former territories of Bengal, now in East Bengal, see under the Indian province of WEST BENGAL (p. 186).

NORTH-WEST FRONTIER PROVINCE.

The area of the entire province is 39,270 square miles, of which 14,290 square miles represent the settled districts as opposed to agencies and tribal areas. The former comprises the province proper under a governor. The frontier districts of Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan were separated in 1901 from the Punjab under the name of the North-West Frontier Province. Mardan has since been divided from Peshawar as a separate district. The province was constituted an autonomous province on 1 April, 1937. It has a unicameral legislature (Legislative Assembly), consisting of 50 members. During the negotiations for the division of India, the province had a Congress Ministry, which stood for the Indian Union, but in the Referendum of July, 1947, the electorate voted for Pakistan, and the Congress Ministry was dismissed on 22 Aug., 1947, by an order of the Governor-General of Pakistan. The present Moslem League Ministry was installed in office the following day.

The affairs of the states of Amb and Phulera in the tribal areas were transferred to the direct control of the Governor of the North-West Frontier Province in Sept., 1950. Previously these states were administered by the Governor acting as agent to the Governor-General.

The province had a population of 3,038,067 in 1941. About 91% were Moslems. This percentage has further increased, owing to the migration of nearly all the Hindus and Sikhs to the Indian Union since the establishment of Pakistan. Peshawar, the capital, had in 1941 a population of 173,420. The chief language is Pushtu. The chief court is that of the judicial commissioner, which consists of 2 judges. There are 5 sessions judges. In 1946 the total number of offences reported was 56,489. The total number of civil suits instituted was 11,996. The gross revenue in 1947–48 was Rs. 335·75 lakhs (including a subvention of Rs. 100 lakhs from the central government). Of this Rs. 22·46 lakhs was land revenue, 11·77 lakhs from excise, 8·35 lakhs from stamps. The gross expenditure in 1947–48 was Rs. 365·66 lakhs, 95·68 lakhs being expenditure on police, 47·97 lakhs

on civil works and 38·13 lakhs on education. In 1947–48 there were 1,059 recognized educational institutions for males, with 101,377 scholars, and 156 similar institutions for females, with 11,035 scholars. The percentage of scholars to the total population is 6·1 for males and 0·7 for females. The direct expenditure on education was Rs. 38,13,000. Co-operative societies numbered 1,331 in 1948–49, with a membership of 46,707 and working capital of Rs. 2,45,78,000. Wheat covered 1,013,015 acres in 1947–48, of which the irrigated area was 376,582 acres. A hydro-electric power-station at Malakand supplies the districts of Mardan, Peshawar, Kohat and Hazara. The railway line through the Khyber, 27 miles long, with 34 tunnels, from Jamrud to the frontier of Afghánistán, was opened in Nov., 1925.

Governor.—Lieut.-Col. Sahibzadah Mohammed Khurshid (salary, Rs. 66,000 per annum).

Premier.—Khan Abdul Qaiyum Khan.

Administration Report. Annual. Peshawar.
Davies (C. C.), The Problem of the North-West Frontier. Cambridge, 1939.
North (R.), The Literature on the North-West Frontier. Peshawar, 1947.

North-West Frontier Agencies and Tribal Areas.—Between the settled districts of the North-West Frontier Province and the Afghan frontier, and interspersed amongst these districts, is the erstwhile tribal territory, which through the free consent of its inhabitants has now become an integral part of Pakistan and is administered by the central government of Pakistan through the N.W.F.P. Governor. This region is divided into 5 political agencies: Malakand (Dir, Swat and Chitral), Khyber, Kurram, North Waziristan and South Waziristan. These agencies are administered through Pakistani officers known as Political Agents. The further areas interspersed amongst the districts of the North West Frontier Province are administered through the deputy commissioners of the 6 districts of the North-West Frontier Province. There are 3 states in these regions, all in the Malakand agency (Dir, Swat and Chitral states). Chitral is ruled by H.H. Mehtar Saif-ur-Rahman, Mehtar; Dir by Nawab Sir Shah Jehan Khan, K.B.E.; Swat by Sir Abdul Wadud, K.B.E.; Amb by a nawab. The estimated gross revenue from all agencies and tribal areas in 1949–50 was Rs. 8,25,728. The total estimated expenditure in 1949–50 was Rs. 6,04,62,000 (Rs. 3,27,69,900 being on political expenditure and Rs. 2,79,92,100 on frontier watch and ward).

The area of this tribal territory is 24,986 square miles, with an estimated population of 2,500,000. The Pakistan Government have almost trebled the number of primary and high schools in these areas. An adult literacy campaign has been started. The Peshawar University was set up in 1950.

Pakistan has provided increased employment to the inhabitants of these areas. A major hydro-electric project is under construction at a place called Warsak in the Khyber Agency where the Kabul River is being dammed. This station will generate 80,000 kw. of hydro-electric power.

Administration Report of the Border of the North-West Frontier Province. Peshawar. Annual.
Barton (Sir W.), India's North-West Frontier. London, 1939.
Thomas (L.), Beyond Khyber Pass. London, 1927.

SIND.

The division of Sind, annexed in 1843, was transferred from the Presidency of Bombay on 1 April, 1936, and constituted an autonomous province on 1 April, 1937. The Legislative Assembly consists of 60 mem-

bers, including 2 women. The Governor has a council of ministers to aid and advise him in the exercise of his functions.

Governor.—H.E. Din Mohammad (assumed office, Oct., 1948; salary, Rs. 66,000 per annum).

Premier.—Yusuf Haroon.

Area, Population and Religion.—Sind (excluding Khairpur state) has an area of 48,136 square miles and a population (census, 1941) of 4,535,008. Moslems numbered 3,208,325; Hindus [illegible] scheduled castes), 1,229,926; Sikhs, 31,011; Christians, 20,209; [illegible], Jains, 3,687, and Jews, 1,082. Only 10% are literate. The chief language is Sindhi. The principal town is Karachi.

Education.—On 31 March, 1946, educational institutions of all kinds numbered 3,679 of which 505 were for girls. There are 9 colleges in the province with 3,700 students. The number of secondary schools for boys was 206 with 34,810 pupils and 37 for girls with 9,262 pupils. There were 2,327 primary schools for boys with 165,653 pupils and 398 for girls with 40,257 pupils.

Justice and Crime.—There is a chief court of Sind with a chief judge and 4 judges. In 1945 there were 26,043 civil and 56,042 criminal cases decided. The strength of the police force, under an inspector-general, was 13,999 (including 1,491 men of Sind Police Rangers) at the end of 1945.

Production and Industry.—According to the census report for 1941, 62% of the population is engaged in the production of raw materials from land (excluding fisheries), industry employing about 8%. Woollen and other cottage industries, especially cotton weaving, have made great strides. Among the new industries recently started are sodium silicate, chocolate, tanning and paint and varnish factories. Salt is one of the most important industries of Karachi and considerable quantities are normally exported from that port. Large quantities of raw hides and skins, wheat and wheat flour are also exported. The principal imports are machinery and millwork, cotton manufactures, chemicals and drugs. The population engaged in the fishing industry is about 39,000, which works out at 0·8% of the total population.

Irrigation.—The province of Sind is situated beyond the influence of the south-west and north-east monsoons, and in consequence its rainfall is very scanty. In normal years, nine-tenths of the area cultivated depends on irrigation by canals. From the point of view of irrigation, Sind may be divided into two distinct spheres :—(*a*) Area which falls under the command of the Lloyd Barrage Canals, (*b*) area served by the inundation canals.

The Lloyd Barrage and Canal Construction Scheme, which consists of a barrage across the river Indus at Sukkur and 7 canals—4 on the left and 3 on the right bank—is the largest irrigation scheme undertaken in any part of Pakistan. The project is designed to provide an assured supply of water to an area of about 1·83 million acres in territory which has hitherto received an indifferent supply from inundation canals. It also brings under irrigation a further area of 3·62 million acres in Sind, the Khairpur state and the Nasirabad Tahsil in Balúchistán, which was previously without facilities for irrigation. The project thus provides for an annual cultivation of 5·45 million acres on final development, which is expected to be reached in 1962–63. Irrigation from the new canals commenced from 1932.

As a result of the construction of the Lloyd barrage and canals systems

in Sind, the cultivation under cotton has increased from 253,232 acres in the pre-barrage period to 878,627 acres in 1943–44. The area under wheat increased from 480,000 in pre-barrage period to 1,259,212 acres in 1943–44. It is now proposed to construct another barrage across the Indus, 4½ miles north of Kotri, for the protection of the area which is to the south of the Lloyd barrage area and part of which is at present settled on the various inundation canals in the southern part of Sind. The work on this barrage, which is called the Kotri barrage, has been started and it is estimated to cost Rs. 21,05 crores. This barrage will have three feeders, one on the right bank and two on the left bank. The total discharge of all the canals taking off from above the Kotri barrage will be 45,775 cusecs. The irrigable area to be served by this scheme will be about 2,792,000 acres. The cultivation in this area will be mostly rice. The Kotri barrage is expected to function from the year 1952.

The area irrigated in Sind by the Lloyd barrage canals and other capital works during the year 1943–44 was 5,211,462 acres.

Communications.—The Hyderabad–Jodhpur metre-gauge line connects the frontier with the Jodhpur railway, thus linking Sind at Hyderabad with Rajputana, Northern and Central India and Gujarat.

PUNJAB (PAKISTAN).

The old province of the Punjab was divided between Pakistan and India under the Indian Independence Act, 1947. The portion included in Pakistan was first termed West Punjab and is now named Punjab (Pakistan). It covers about 58,000 square miles and comprises :—Lahore Division (the districts of Gujranwala, Lahore, Sheikhupura and Sialkot); Rawalpindi Division (the districts of Attock, Gujrat, Jhelum, Mianwali, Rawalpindi and Shahpur); Multan Division (the districts of Dera Ghazi Khan, Jhang, Lyallpur, Montgomery, Multan and Muzaffargarh). The chief city of the province is Lahore. The population is estimated at nearly 19 million. Agriculture continues to be the principal industry providing means of subsistance to 92% of the people of the Punjab. Total area of the province is 37·1 million acres, of which 51·3% (*i.e.* 19·1 million acres) is cultivated. The areas under, and the production of each of the important crops during the agricultural year 1949–50 are indicated below. The most commonly grown crops in the province are :—Wheat, cotton, gram, millets, rice, maize, pulses, fodder, sugar cane, barley, vegetables and fruits. Of these, food crops occupy about 70%, fodder crops, 14·3% ; cotton, 8·6% ; sugar cane, 1·7% ; vegetables, 0·8%, and fruits, 0·3% of the cultivated area.

Produce	Acreage	Production (in tons)	Produce	Acreage	Production (in tons)
Wheat (husked)	7,022,800	3,027,700	Maize . .	455,700	182,100
Rice . .	847,400	311,200	Barley . .	247,100	79,100
Jowar . .	522,600	77,000	Cotton (bales of 400 lb. each)	1,548,200	733,200
Gram . .	1,762,300	512,600			
Bajra . .	1,270,100	231,700			

Out of 830 registered factories which came to Punjab (Pakistan) after the partition, 577, employing 83,703 workers, were working normally in 1950.

The table below gives details of such factories and number of workers employed therein :—

Nature of factories	No. of registered factories	No. of workers	Nature of factories	No. of registered factories	No. of workers
Textile . . .	152	21,617	Wood, stone and glass	17	2,398
Engineering . .	111	3,424	[illegible] . . .	3	1,718
Chemicals and dyes .	31	2,179	[illegible] . . .	4	245
Paper and printing .	32	1,556	Government managed		
Metal. . . .	100	5,490	factories . .	61	42,086
Food, drink and tobacco	63	2,990			

In addition to the above, a large number of new industrial enterprises have sprung up in the province since the partition, including 3 new textile mills, one each at Lyallpur, Multan and Lahore, 10 new calendering plants, one woollen mill at Gujranwala. Jhang, Lyallpur and Multan are now big centres of handloom, cotton and woollen industries. Sialkot, the world-famous centre of sports-goods industry, has shown vivid signs of recovery, and in 1949 the total output of sports goods was estimated at Rs. 50 lakhs. A campaign has been launched for the organization of urban small-scale industries on co-operative lines, through the formation of industrial co-operative societies, consisting of small-scale and cottage workers. The Government Surgical Instruments and Allied Trade Development Centre at Sialkot has been [illegible] with a view to enabling it to function as a centre for the training of technical personnel, and inspection and standardization of surgical goods.

As for tanning industry, demonstration parties have been organized to promote village tanning and to introduce new tanning methods. Three new tanning factories are nearing completion, while 3 more are in the planning stage. The government have sanctioned a scheme for the establishment of a tanning and leather institute in the province.

In the case of sericulture, a government silk reeling and throwing factory has been set up. A commercial and industrial museum has also been established in Lahore recently, where samples of finished products will be exhibited in order to encourage the sale of goods manufactured in the province. A special committee has also been set up to prepare a scheme for the establishment of an art academy.

The system of industrial education in the province has been given a new orientation to meet the present day requirements. Last year a sum of Rs. 1 lakh and 5 lakhs was provided, for the grant of subsidies and loans to the various industrial concerns.

In the field of commerce, new banking houses have come into being; the National Bank of Pakistan has also established its principal branch in Lahore and more branches of this Bank are being opened in the province. An import licence office has also been set up here by the central government.

An Industrial Planning Committee was set up in June, 1950, to prepare a 5-year development plan for the medium and small-scale cottage industries of the province. The province is well on the road to progress, but certain factors, such as paucity of technicians, delay in the procurement of capital goods and lack of finance, present difficulties in pushing forward the industrial programme of the Punjab.

Governor.—Sardar Abdur Rab Nishtar (appointed 2 Aug., 1949; salary Rs. 72,000 per annum).

ACCEDED STATES.

The former territories known as the Balúchistán, Punjab and Frontier States acceded to Pakistan on the separation of India and Pakistan in 1947. Details of the acceded states are as follows :—

Former Punjab States.

Bahawalpur.—Area, 17,494 square miles; population, 1,691,209; yearly revenue [illegible] crores. The present ruler of Bahawalpur is Lt.-Gen. H.H. [illegible] Sir Sadiq Muhammad Khan Abbasi, Bahadur, G.C.S.I., G.C.I.E., K.C.V.O., LL.D., born 30 Sept., 1904; succeeded his father on 4 March, 1907. The head of the administration is the Sadr-i-Azam.

Khairpur.—Area, 6,050 square miles; population, 335,787; yearly revenue, Rs. 59,27,200. The present ruler of the state is H.H. Mir George Ali Murad Khan Talpur, who was born at Brighton on 29 June, 1933, and ascended the Masnad on 24 July, 1947. The head of the administration is the Chief Minister.

Former Balúchistán States.

Kalat.—The present Khan, Maj. H.H. Beglar Begi Mir Sir Ahmad Yar Khan, G.C.I.E., was born in 1904 and succeeded in 1933. He has a permanent salute of 19 guns. The area of the state is 30,799 square miles and the population 166,654. The revenue amounts to Rs. 25,85,474. The head of the administration is the Wazir-i-Azam.

Las-Bela.—The present ruling chief of Las-Bela is Jam Mir Ghulam Qadir Khan, who was born in 1920 and succeeded in 1937. He was formally installed in March, 1939, and was given full ruling powers. The area of the state is 7,043 square miles; population, 69,067, and revenue, Rs. 7,06,000. The state is not under the suzerainty of Kalat State.

Kharan.—The ruling chief of Kharan is Nawab Habibullah Khan Nausherwani, who was born in 1897 and succeeded in 1911. The area of the state is 18,508 square miles; population, 33,832, and revenue, Rs. 3,92,334. The head of the administration is the Wazir.

Mekran.—The ruling chief of Mekran, Nawab Bai Khan Ghichki, was born in 1890 and became independent of Kalat by accession to Pakistan. The area of the state is 23,196 square miles; population, 86,651, and the revenue, Rs. 8,30,514. The head of the administration is the Wazir.

Frontier States.

Chitral.—H.H. Saif-ur-Rehman is the present Mehtar of Chitral who succeeded his late father in Jan., 1949. The area of the state is 4,000 square miles; population, 107,906, and the revenue, Rs. 3,40,000. The President, Board of Administration, is in charge of public affairs.

Dir.—Khan Bahadur Nawab Sir Mohammad Shah Jehan Khan is the present Nawab and head of the administration of Dir State. The area of the state is 3,000 square miles; population, 250,000, and the revenue, Rs. 5,75,000.

Swat.—On the voluntary abdication of Miangul Gul-Shahzada Sir Abdul-Wadud, K.B.E., his son, Miangul Abdul Haq Jehanzeb, was installed as the new Wali of the Swat State on 11 Dec., 1949. The area of the state

is 1,800 square miles; population, 446,014, and the revenue, Rs. 30,00,000. The head of the administration is the Chief Secretary.

Amb.—Nawab Sir Mohammad Farid Khan, the present ruler of Amb State, succeeded to the Gaddi in Feb., 1936. The area of the state is 174 square miles; population, 47,910, and the revenue, Rs. 3,55,000.

Other States.

Junagadh and **Manavadar.**

CEYLON.

Constitution and Government.

Ceylon, the ancient Taprobane (Tamraparni, the island of 'dusky leaves'), is an island in the Indian Ocean, by the south of India, lying between 5° 55′ and 9° 50′ N. lat., and 79° 42′ and 81° 53′ E. long. Its area is 25,332 square miles. The average annual rainfall varies from 40 ins. in the north-west to over 200 ins. south-east and some parts of the interior. Annual average for Colombo is 91 ins. and for Kandy 87 ins.

According to the Mahawamsa chronicle, an Indian prince from the valley of the Ganges, named Vijaya, arrived in the 6th century B.C. and became the first king of the Sinhalese. The monarchical form of government continued until the beginning of the 19th century when the British subjugated the Kandyan Kingdom in the central highlands.

In 1505 the Portuguese formed settlements on the west and south, which were taken from them about the middle of the next century by the Dutch. In 1796 the British Government annexed the foreign settlements to the presidency of Madras; in 1802 the maritime provinces of Ceylon were separated from India and formed into a Crown colony. Passing through various stages of increasing self-government, Ceylon reached fully responsible status within the British Commonwealth when the Ceylon Independence Act, 1947, came into force on 4 Feb., 1948.

The 'Proposals for conferring on Ceylon fully responsible Status within the British Commonwealth of Nations' (Cmd. 7257), which form the basis of the Independence Act, include agreements on defence, external affairs and public officers. The defence agreement provides that the United Kingdom and Ceylon will give to each other such military assistance for the security of their territories, for defence against external aggression and for the protection of essential communications as it may be in their mutual interest to provide. The United Kingdom may base such naval and air forces and maintain such land forces in Ceylon as may be required for these purposes, and as may be mutually agreed. Ceylon will grant to the United Kingdom all the necessary facilities. These facilities will include the use of naval and air bases and ports and military establishments and the use of telecommunication facilities. The United Kingdom will furnish Ceylon with such military assistance as may from time to time be required towards the training and development of Ceylonese armed forces. The two governments will establish such administrative machinery as they may agree to be desirable for the purpose of co-operation in regard to defence matters and to co-ordinate and determine the defence requirements of both governments.

The agreement on external affairs declares the readiness of Ceylon to

adopt and follow the resolutions of past imperial conferences; provides for the representation of the two governments in London and Colombo; provides that in external affairs generally the two governments will conform to the principles and practice observed by other members of the Commonwealth; provides for the exchange of diplomatic representatives between Ceylon and foreign countries, and pledges United Kingdom support for any application by Ceylon for membership of the United Nations or any specialised international agency; provides that the Ceylon government will enjoy reciprocal rights and benefits enjoyed by the United Kingdom, and bear the obligations and responsibilities carried by the United Kingdom, which arise out of any valid international instrument which applies to Ceylon.

The public officers agreement protects the positions of specified classes of persons holding offices in the public service of Ceylon.

Governor-General.—The Right Hon. The Lord Soulbury, P.C., G.C.M.G , O.B.E., M.C. (appointed 6 July, 1949).

For purposes of general administration, the island is divided into 9 provinces, each presided over by a Government agent, with assistants and subordinate headmen. There are 6 municipalities, with 37 urban councils and 26 town councils.

The elections held in Sept., 1947, had the following results:—42 United National Party; 21 Independents; 10 Sama Samaj Party (Trotskyist Communists); 7 Ceylon Tamil Congress; 6 Indian Tamil Congress; 5 Bolshevik Sama Samaj Party; 3 Communists; 1 Labour.

The Cabinet, which has a majority from members of the United National Party, consists of:—

Prime Minister, Defence and External Affairs.—D. S. Senanayake, P.C. *Justice.*—Dr. L. A. Rajapakse. *Home Affairs.*—Sir Oliver Goonetilleke, K.C.M.G., K.B.E. *Commerce.*—H. W. Amarasuriya. *Health and Local Government.*—S. W. R. D. Bandaranaike. *Finance.*—J. R. Jayawardene. *Labour.*—M. D. Banda. *Education.*—Major Edward Nugawela. *Agriculture.*—Dudley Senanayake. *Industries.*—G. G. Ponnambalam. *Food.*—A. Ratnayake. *Posts.*—C. Sittampalam. *Transport and Works.*—Sir John Kotelawela, K.B.E. *Minister of State.*—A. E. Goonesinha.

High Commissioner for the U.K.—Sir Cecil Syers, K.C.M.G., C.V.O.

High Commissioner in London (13 Hyde Park Gardens, W.2).—E. A. P. Wijeyeratne. *Trade Commissioner.*—C. E. P. Jayasuriya.

High Commissioner in India.—C. Coomaraswamy.

High Commissioner in Pakistan.—T. B. Jayah.

High Commissioner in Australia.—Aubrey Martensz.

Commissioner in Malaya.—M. Saravanamuttu.

Ambassador in U.S.A.—G. C. S. Corea.

Minister in Burma.—D. Susanta de Fonseka.

Area and Population.

The population of Ceylon (inclusive of local residents enumerated with the services, but exclusive of non-residents in H.M. Forces and on ships in Ceylon ports) at the census held on 19 March, 1946, showed an increase of 25·4% since 1931. The distribution by provinces, and the average number

of persons per square mile in each province, are shown in the following table :—

Provinces	Area : English sq. miles	Population, 1946		Provinces	Area : English sq. miles	Population, 1946	
		Total	Per sq. mile			Total	Per sq. mile
Western .	1,432	1,876,904	1,310	Uva . .	3,277	372,238	113
Central .	2,290	1,135,290	495	Sabaragamuwa	1,893	745,382	393
Southern .	2,146	961,418	448				
Northern .	3,429	479,572	139	Total .	25,332	6,657,339	262
Eastern .	3,840	279,112	72	Non-resident Military .	—	33,772	—
North-Western .	3,016	667,889	221	Non-resident Shipping .	—	2,834	—
North-Central .	4,009	139,534	34	Grand Total	—	6,693,945	—

The Sinhalese numbered about 4,621,000. The population on the principal estates, mainly consisting of immigrant Tamils from Southern India, numbered, at the census of 1946, about 851,000, and formed 12·8% of the total population. The Indian Tamils on estates numbered about 764,900. There were also about 409,600 Moors (Ceylon and Indian); 41,500 Burghers (Dutch and Portuguese strains as well as Euro-Ceylonese) and 5,100 Europeans.

Estimated population at the end of 1948 was 7,193,000.

Marriages registered, 1949, 45,663; births registered, 291,191; deaths registered, 91,889.

The urban population is 15·4% of the total population. The principal towns and their population (exclusive of the non-resident military and shipping), according to the census of 1946, are :—Colombo, 362,000; Jaffna, 63,000; Dehiwala-Mt. Lavinia, 56,900; Kandy, 51,200; Moratuwa, 50,700; Galle, 49,000.

Religion and Education.

Buddhism was introduced from India in the 3rd century B.C., and is still the religion of the majority of the inhabitants, especially in the southern part of the island. There are about 4,288,000 Buddhists, 1,326,000 Hindus, 606,000 Christians, 433,000 Moslems and 5,000 others.

Education in the island has undergone a radical change with the introduction of the scheme of free education from the kindergarten to the university stage. The scheme came into operation on 1 Oct., 1945, but modifications are being considered owing to the mounting cost.

All schools are now graded as primary—up to standard 5, junior—up to standard 8, senior secondary or senior practical—above standard 8, and central (post primary). The number of Sinhalese and Tamil schools in 1949 was government schools 2,852, with an attendance of 304,831 boys and 243,602 girls; assisted schools 2,758 (including estate schools and night schools), with an attendance of 241,649 boys and 220,102 girls. There were also 631 central and English schools attended by 150,494 boys and 87,184 girls. Total expenditure on education in 1948–49, Rs. 93,021,495 (nett). The University of Ceylon was established on 1 July, 1942, by the incorporation of the Ceylon Medical College (founded 1870) and the Ceylon University College (founded 1921). In 1949, the university had faculties of oriental studies, arts, science, medicine, law, agriculture and veterinary science. In 1949–50 it had 1,850 students. The Ceylon Technical College

provides a series of full time and part time courses in science, engineering, commerce, arts, and arts and crafts. The laboratories are equipped for instruction up to the university degree standard.

The training of teachers is carried on in 12 government and 7 assisted training colleges for primary schools. Secondary training for [illegible] is given at Government Training College, Maharagama; the University started post-graduate training in 1950. The number of teachers in training in 1949 was as follows :—primary, 1,653; secondary, 222; post-graduate, 68.

The Technical College prepares students for the college diploma and the B.Sc.Eng. (London) diploma. Courses in commerce and accountancy, and a course for training vocational teachers have recently been added to the curriculum. Number of students in 1949–50 was 1,969.

There were, in 1949, 82 cinemas with a seating capacity of 46,000.

Justice and Crime.

Roman-Dutch law modified by local enactments is administered in the Maritime Provinces, while Kandyan laws and customs, now partly codified, are administered in the Kandyan Provinces. The Tamils of the Jaffna district are governed by the Thesavalamai, a special code of laws relating to persons and property. The Moslem inhabitants are governed by their religious law, modified by local enactments, in matters such as inheritance, marriage and divorce.

District courts and Courts of Requests administer justice on the civil side. The Supreme Court exercises only an appellate jurisdiction in civil matters, excepting in divorce cases instituted under the Indian and Colonial Divorce Jurisdiction Act, 1926. On the criminal side magistrates' courts, district courts and the Supreme Court exercise an original jurisdiction. The Supreme Court also exercises an appellate jurisdiction in cases decided by magistrates' courts and district courts. A Court of Criminal Appeal exercises an appellate jurisdiction in cases tried by the Supreme Court in its original criminal jurisdiction. Rural courts exercise a criminal and civil jurisdiction in rural areas in respect of petty crimes and civil disputes. In 1946 the number of cases instituted in the magistrates' courts and municipal courts was 150,840. 16,312 convicted persons were sent to prison.

The strength of the police force on 31 Dec., 1949, was 5,584 (authorized strength, 6,660).

Social Welfare.

The ordinance relating to the relief of the poor was brought into operation on 1 Jan., 1940. Its provisions have been applied in the first instance to the municipal towns of Colombo, Kandy and Galle, where the local authority is responsible for financing and administering poor relief, and Public Assistance Committees have been appointed in this connection. In other areas the administration of poor relief is a commitment of the central Government and is undertaken by revenue officers with the assistance of advisory committees. Where recognized charitable agencies function in urban areas, grants are given to such agencies for the administration of relief. The maximum monthly rate of assistance has been increased from Rs. 10 to Rs. 20, with effect from 1 April, 1948. The relief of widespread distress due to floods, epidemics, failure of crops, etc., is undertaken by Government whenever circumstances demand it, such relief being generally given in employment on works of public utility in the case of failure of crops, and in cash or kind during floods or epidemics. Money grants up to a maximum of Rs. 300 are also paid for rebuilding houses destroyed by floods, fire and other exceptional causes.

Finance.

Financial years [1]	Revenue	Expenditure	Financial years [1]	Revenue	Expenditure
	Rs.	Rs.		Rs.	Rs.
1945–46	382,263,327	312,855,337	1948–49	576,063,090	547,863,936
1946–47	461,173,263	405,387,434	1949–50 (est.)	561,780,000	563,511,323
1947–48	540,605,161	621,952,721	1950–51 (est.)	672,240,900	655,103,488

[1] 1 Oct.–30 Sept.

The principal sources of revenue in 1948–49 were:—Customs, Rs. 329,291,165; port, harbour, wharf, warehouse and other dues, Rs. 13,847,861; excise (salt), Rs. 46,206,846; income tax, stamps, etc., Rs. 121,431,753; postal, Rs. 17,621,586.

The principal items of expenditure in 1948–49:—Ministry of Education, Rs. 94,435,562; Ministry of Health and Local Government, Rs. 81,993,572; Ministry of Food and Co-operative Undertakings, Rs. 64,229,318; Ministry of Agriculture and Lands, Rs. 46,655,274; Ministry of Finance, Rs. 83,463,408; Ministry of Defence and External Affairs, Rs. 20,034,233; Ministry of Justice, Rs. 7,713,964; Ministry of Home Affairs and Rural Development, Rs. 22,382,156; Ministry of Labour and Social Services, Rs. 19,630,705; Ministry of Commerce and Trade, Rs. 1,528,614; Ministry of Industries and Fisheries, Rs. 7,579,034; Ministry of Transport and Works, Rs. 66,132,964; Ministry of Posts, Rs. 27,572,977.

The public debt on 30 Sept., 1949, was £9,408,775 and Rs. 423,623,700. The accumulated sinking funds for their redemption were valued at £4,271,054 and Rs. 48,214,728 respectively.

Defence.

Army.—The Ceylon Army Act came into operation on 10 Oct., 1949. Simultaneously the Governor-General appointed Brigadier the Earl of Cavan, D.S.O., as the Commander of the Ceylon Army. The Ceylon army will have units of infantry, artillery, signal corps, electrical and mechanical engineers, medical corps, engineer corps and engineer works services. The intention is to mobilize a force of 70 officers and 610 other ranks with a view progressively to reach a final strength of about 3,000 all ranks. The defences of the Colombo area have been taken over by the Ceylon Army.

Navy.—The Ceylon Royal Naval Volunteer Reserve in 1949 received on transfer from His Majesty's Government the fleet minesweeper *Flying Fish*, which has been renamed His Majesty's Ceylon Ship *Vijaya*, and is employed as a training ship. The future Ceylon Navy will be called the Royal Ceylon Navy (R.Cy.N.).

Air Force.—The Air Force Act (No. 41) of 1949 has been passed by the Ceylon Parliament. It is intended initially to have only a volunteer component of the Air Force and later to expand to a regular Force.

Production and Industry.

The area of the island is approximately 16,212,400 acres, of which about 3,208,000 acres (excluding small holdings below 1 acre) are under cultivation, and about 456,000 acres pasture land. The approximate areas under the principal products, according to the census of Feb.–March, 1946, were:—Paddy, 192,500 acres; chena, 46,322 acres; cacao, 19,700 acres;

cinnamon, 33,779 acres; tea, 533,830 acres; coconuts, 920,093 acres; citronella, 30,107 acres; rubber, 573,243 acres (production, 1950, 113,500 tons).

The production of tea averaged 283,403,628 lb. in 1940–49, was 298,559,169 lb. in 1949, and was estimated at 300,000,000 lb. in 1950.

Livestock in 1949:—166 horses, 1,248,747 cattle, 656,052 buffaloes, 103,767 swine, 573,015 goats and 57,349 sheep.

There are 7 government dairies and cattle farms, with together 2,989 heads of cattle. There were 38 plumbago mines working at the end of 1947. Phlogopite mica of high dielectric strength exists in economically workable deposits. Graphite is the chief mineral exported from Ceylon. Ilemnite, monazite and zircon are found in quantities of commercial importance in beach sands. There are several hundred gem pits, from which sapphires, rubies, aquamarine, moonstone, topaz, chrysoberyl (cat's-eye), zircons, spinels, tourmalines and other gems are obtained. Among the other resources of the island are deposits of kaolin, iron-ore and glass sands. There has been considerable activity in industrial development in recent years furthered by the Department (now the Ministries) of Commerce and Industries, which was set up in 1938. Government has been responsible for the establishment of factories for the production of plywood, leather and shoes, glass, coir goods, rolled steel bars, acetic acid, ceramic ware, quinine, strychnine and shark liver oil. Post-war plans aim at factories for the manufacture of textiles, extraction of refined coconut oil (from poonac), steel, caustic soda, writing paper, creamed latex, sole crepe, separated ilmenite, and an industrial workshop.

Manufacture of salt is a government monopoly.

The Government is implementing a comprehensive programme for the development of fisheries in inland as well as deep-sea waters.

Trade Unions.—The [illegible] control of trade unions are regulated by the Trade Unions Ordinance (Ch. 116 of the Legislative Enactments), and the Trade Unions (Amendment) Act, No. 15 of 1948. At the end of 1949, there were 142 unions; 82 employees' unions had a membership of 128,327; and 11 employers' unions had 304 members.

Commerce.

The values of the imports and exports (both including bullion and specie) for 6 years are given in the following table :—

Years	Imports	Exports	Years	Imports	Exports
	Rs.	Rs.		Rs.	Rs.
1944	517,654,000	679,936,000	1947	970,127,000	835,398,000
1945	621,264,000	665,800,000	1948	994,407,000	1,001,176,000
1946	695,568,000	764,584,000	1949	1,028,843,449	1,064,147,992

Principal exports (domestic), in 1949 :—Cacao, Rs. 5,995,889; cinnamon (quills and chips), Rs. 4,925,043; coir (bristle, mattress, yarn and manufactures), Rs. 2,129,765; copra, Rs. 21,570,759; coconut oil, Rs. 121,326,750; tea, Rs. 649,845,462; plumbago, Rs. 6,381,146; coconuts, fresh, Rs. 4,584,303; coconuts, desiccated, Rs. 25,499,662; areca nuts, Rs. 3,291,963; rubber, Rs. 124,544,850; citronella oil, Rs. 4,568,436.

Principal imports in 1949 :—Cotton manufactures, viz. : cotton piece-goods, Rs. 116,492,023; rice and paddy, Rs. 226,355,771; coal and coke,

Rs. 17,375,339; spirits (brandy, gin and whisky), Rs. 1,099,322; sugar (refined, unrefined and jaggery), Rs. 52,726,450; manures, Rs. 30,702,677.

Of the 297,573,381 lb. of black tea exported in 1949, the following countries received the greatest amounts: [illegible] 529,173 lb.; Australia, 33,819,134 lb.; United States, [illegible] 25,032,768 lb.; Union of South Africa, 15,619,112 lb.; Canada, 14,761,713 lb.; New Zealand, 14,324,660 lb., and Iraq, 12,087,296 lb.

Trade with the United Kingdom, according to Board of Trade returns (in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. . .	12,398,930	22,620,901	25,762,763	26,718,970	27,817,086
Exports from U.K. .	3,491,516	11,518,318	12,649,200	14,746,136	17,183,850
Re-export from U.K. .	67,750	39,305	42,963	53,132	72,383

Shipping and Communications.

In 1949, 3,730 vessels of 11,290,471 tons entered and 3,515 vessels of 10,862,272 tons cleared the ports in Ceylon.

896 miles of railway were open at the end of 1949, of which 809 miles were 5 ft. 6 in. gauge, and 87 miles 2 ft. 6 in.

On 30 Sept., 1948, there were 1,235 offices of various classes open for postal business; money-order offices, 795; telegraph offices, 409; 10,693 miles of telegraph wire. There were, 1 Jan., 1949, 14,884 telephones.

Cable and Wireless, Ltd., operate cables, a wireless station and a photo-telegraph service between Colombo and London.

Number of motor vehicles, 31 Dec., 1949:—31,261 passenger cars, 10,286 lorries, 2,947 buses, 6,994 motor cycles.

Air Services.—Air Ceylon, the national airline of Ceylon, operates regional services from Colombo to Madras, [illegible] Bombay, Karachi and international services on the routes [illegible] Cairo–Karachi–Bombay–Colomo and Colombo–Singapore–Darwin–Sydney.

Other services which call in Ceylon are:—Air India (Colombo–Karachi); B.O.A.C. (Colombo–U.K. and Singapore–Colombo); Quantas (Sydney *via* Colombo to London).

Money and Credit.

The leading banks in Ceylon are:—The Bank of Ceylon (state-aided), The Mercantile Bank of India, Ltd., the Imperial Bank of India, the National Bank of India, Ltd., the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, the Eastern Bank, Ltd., Grindlay & Co., Ltd., the Bank of Uva, Ltd., the Hatton Bank, Ltd. and the Indian Overseas Bank, Ltd.

The Ceylon Savings Bank had 118,623 depositors, and deposits amounting to Rs. 56,615,531 in 1949. The post office savings bank on 31 Dec., 1949, had 1,360,000 depositors, and the balance to their credit was Rs. 134,830,661; amount deposited during 1949, Rs. 56,315,109. The loans granted by the Ceylon State Mortgage Bank in 1948, amounted to Rs. 2,281,500.

A Central Bank was established in 1950 to regulate and administer the monetary system of the Dominion.

The Imperial weights and measures of the United Kingdom are established as the standard weights and measures of the island. Local and

customary weights and measures are still in force in various parts of the country. The Currency Ordinance No. 21 of 1941 provides for a Ceylon rupee having a par value equal to 2·88 grains of fine gold as the unit of currency (Amending Ordinance No. 40 of 1949). The Board administering the Ordinance is obliged to exchange Ceylon currency for Indian currency and vice versa on that basis. The exchange of Ceylon currency for sterling and vice versa on the same basis is also permissible, subject to the prior approval of the Board. This exchange is effected through the Reserve Bank of India, Bombay, and the Crown Agents for the Colonies, London, who are the Ceylon Currency Board's Agents in India and the United Kingdom respectively. Currency notes are issued in the denominations of Re. 1, Rs. 2, 5, 10, 50 and 100, and subsidiary currency notes in the following denominations: 50 and 25 cents. The following subsidiary coins were legal tender on 31 Dec., 1949, (1) nickel brass, 50, 25, 10 and 2 cents; (2) cupro-nickel and nickel brass, 5 cents; (3) copper and bronze, 1 cent. and copper, ½ cent. The note circulation stood at Rs. 419,477,194 on 30 Sept., 1949, and the estimated liability of the Currency Board in respect of the circulation of subsidiary notes and coin was Rs. 15,474,333 on the same day. The exchange rate between Ceylon and the United Kingdom is subject to fluctuation, within narrow limits; it remained close to 1*s.* 6*d.* per rupee throughout 1949. The Ceylon rupee was devalued with sterling in Sept., 1949.

The **Maldive Islands,** 400 miles south-west of Ceylon, are a group of 12 coral atolls, richly clothed with coconut palms, and yielding millet, fruit and edible nuts. The old form of government was abolished in 1932, and a new constitution was introduced. The Sultan-Designate is His Highness Amir Abdul Majid Didi, the former Prime Minister, appointed on 3 Oct., 1945. According to the modified constitution there is a People's Assembly consisting of 33 members and a Cabinet of 4 ministers. The Prime Minister is selected by the Sultan from the members of the People's Assembly and he selects his colleagues who form the Cabinet.

Population over 93,000. The people are Moslems; they are great navigators and traders.

ADEN.

Aden is a volcanic peninsula on the Arabian coast, about 100 miles east of Bab-al-Mandeb. It forms an important bunkering station on the highway to the East. The colony includes Little Aden, a peninsula very similar to Aden itself, and the settlement and town of Shaikh Othmán on the mainland, with the villages of Imad and Hiswa and Perim Island.

Under the provisions of the Aden Colony Order, 1936, Aden became the Colony of Aden on 1 April, 1937. The colony is administered by a governor, who is also commander-in-chief, aided by an executive council which in 1948 comprised 6 members. The council consists of the chief secretary, attorney general, financial secretary and such other persons as the governor may from time to time appoint. Under the provisions of the Aden Colony (Amendment) Order 1944 which came into force on 24 October, 1946, a legislative council was established in January 1947. It consists of the governor as president, 4 *ex-officio* members, not more than 4 official members and not more than 8 unofficial members.

Area 75 square miles: including the protectorate and the Hadhramaut, about 112,000 square miles; of Perim, 5 square miles. Population of Aden (census of October, 1946): 80,516 (males, 50,589; females, 29,927); population of Perim: 360 (males, 202; females, 158). There were 9,456 Indians, 7,273 Jews and 365 Europeans in Aden. Vital statistics:—

Year	Live Births	Still Births	Marriages	Divorces	Deaths
1946	2,224	174	—	—	1,764
1947	2,510	185	—	—	1,935
1948	2,192	131	1,498 [1]	1,000 [2]	1,681

[1] 1,472 Arabs and Indian Moslems; 14 Jews; 6 Bohras (Moslems); 6 Hindus.
[2] 994 Arabs and Indian Moslems; 5 Jews; 1 Bohra.

Education in Aden Colony is under the control of the Director of Education. In the Eastern and Western Aden Protectorates it is under the immediate general guidance of the British Agents; but the Government Department of Education inspects schools within the area. In the colony the government maintains 5 boys and 3 girls primary schools and 1 boys' secondary school. There are in addition 8 aided primary schools for boys, 5 of which have a secondary section, and 4 aided primary schools for girls, 2 of which have a secondary section. There are also a number of unrecognised schools. In all schools in the colony there are 5,215 pupils in primary or indigenous school classes (including 765 girls) and 1,132 pupils in secondary schools (including 147 girls). A number of students are sent abroad on scholarships for further education. Classes for adult females are conducted at the government girls' school. Commercial classes are held at the government secondary school and at a privately run commercial institution. The former advisory committee has been replaced by elected school committees representing the parents.

The British Council opened an institute for men in 1940 and an institute for women in 1942.

There were, in 1949, 7 cinemas with a seating capacity of 4,330.

The government revenue is from duties on liquor, tobacco, motor spirit, opium and salt, and from income tax, court fees, judicial fines and local taxes. The total revenue during the year 1947–48 amounted to Rs. 121,12,421, and the expenditure to Rs. 92,80,631. There is a Port Trust which issues a separate administrative report containing information on the port. Imports (1948), by sea, Rs. 351,278,439; by land, Rs. 14,671,583; treasure (sea and land), Rs. 2,158,309; total imports, Rs. 368,108,331 (1947, Rs. 329,748,238). Chief imports:—Fuel oil, petrol, kerosene, cotton piece-goods, grain, gums, hides and skins, tobacco, coal, coffee, sugar, fruits, vegetables and other provisions. Exports, by sea, Rs. 167,027,181; by land, Rs. 5,357,908; treasure (sea and land), Rs. 1,034,221; total exports, Rs. 173,419,610 (1947, Rs. 168,694,846). Chief exports :—Salt, coffee, gums, hides and skins, cotton piece-goods, tobacco, grain, sugar and other provisions. These statistics are exclusive of [illegible] stores and treasure. In 1948, 2,994 merchant vessels of 1[illegible]3 (net) entered the port of Aden, of which 1,677 were British; in the same year 2,260 country (local) craft of 142,858 tons entered. The harbour of Perim was closed for shipping from November, 1936. Aden itself produces little, its chief industries being the manufacture of salt and cigarettes and building of dhows. The trade is largely a transhipment.

Registered motor vehicles, at the beginning of 1950, included 1,375 passenger cars, 196 taxis, 61 buses, 334 lorries and 76 motor cycles.

The Aden Protectorate (area about 112,000 square miles) lies to the east, west and north of the colony of Aden and consists of the territories and dependencies of Arab chiefs in protectorate treaty relations with His Majesty's Government. It is bounded on the east by the Qara country, which is part of the dominions of the Sultan of Muscat and Oman, and on the north and west by the Great Desert and the Kingdom of Yemen, whose southern boundary was temporarily fixed by Article III of the Treaty of Sana' (February, 1934), by which His Majesty's Government and the Yemen Government agreed to maintain the *status quo* frontier as it was on the date of the signing of the treaty. The coastline of the Aden Protectorate, which is about 750 miles long, starts in the west from Husn Murad, opposite the island of Perim, and it runs eastward to Ras Dharbat 'Ali, where it meets the Sultanate of Muscat and Oman. The population (of which no census has ever been taken) is estimated to be about 600,000.

The Aden Protectorate is divided into the Western Aden Protectorate and the Eastern Aden Protectorate. The former consists of 19 sultanates and His Highness the Sultan of Lahej, Fadl 'Abdul Karim, is the premier chief. The Eastern Aden Protectorate comprises the Hadhramaut (consisting of the Qu'aiti State of Shihr and Mukalla and the Kathiri State of Seiyun), the Mahri Sultanate of Qishn and Soqotra, the Wahidi Sultanates of Bir 'Ali and Balihaf, and the Sheikhdoms of 'Irqa and Haura. His [illegible] Sultan Sir Salih bin Ghalib al Qu'aiti, K.C.M.G., Sultan of Shihr [illegible], is the premier chief of the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organized of these areas. By treaties of 1938 and 1939 respectively a Resident Adviser was appointed to the Qu'aiti State of Shihr and Mukalla and the Kathiri State of Seiyun. Mulalla on the coast is the seat of government of the Qu'aiti State and Seiyun is the capital of the Kathiri State. The Hadhramaut is bounded on the east by the Mahri Sultanate and on the west by the Wahidi Sultanates. The Mahri Sultanate of Qishn and Soqotra is the most easterly area in the Aden Protectorate. The Sultan resides on the island of Soqotra

(area 1,400 square miles), which lies 150 miles from Cape Guardafui. The population, said to number about 12,000, is mostly pastoral inland, fishing on the coast. Religion formerly Christian, but Moslem since the end of the seventeenth century. Chief products, dates and various gums; sheep, cattle (hump-less) and goats are plentiful; butter is exported. The Sultan entered into protectorate treaty relations with His Majesty's Government in 1886. Principal village, Tamarida.

In the Qu'aiti State of Shihr and Mukalla and in the Sultanate of Lahej there are now separate state departments of education. Lahej had in 1948, a secondary school with 140 boys, while at Gheil ba Wazir boarding school in the Qu'aiti state there were 125 boys. No other education in the protectorate is above primary standard. There were, in 1949, 58 inspected schools with an enrolment of 4,378 pupils, including 196 girls.

The Aden Protectorate, which is not directly administered, is under the control of the Governor and Commander-in-Chief, Aden.

Total trade (in £) between Aden (Colony and Protectorate) and the United Kingdom (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K.	61,357	629,425	875,601	806,500	943,672
Exports from U.K.	476,918	1,965,491	2,521,089	2,815,152	3,458,512
Re-exports from U.K.	15,466	13,230	33,389	54,014	58,735

Governor and Commander-in-Chief.—Tom Hickinbotham (appointed April, 1951).

Chief Secretary.—W. R. C. Goode (appointed 5 Nov., 1949).

The **Kuria Muria** islands form part of the Colony of Aden and are at present controlled on behalf of the Governor by the Resident in the Persian Gulf. The islands are situated in the Kuria Muria Bay off the south coast of Oman at 55° 55′ eastern longitude. They were given to the British Government by the Sultan of Muscat in 1854. They are 5 in number :— Haskiyah (1 square mile), Suda (5 square miles, rising to 1,300 feet), Hallaniyah (22 square miles, rising to 1,600 feet; about 70 inhabitants in 1947), Gharzaut, Jibliyah (from W. to E.).

The island of **Kamaran** in the Red Sea, about 200 miles north of Perim, was taken by the British from the Turks in 1915, and is, since 1 Feb., 1949, administered by the Governor of Aden through a Civil Administrator. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Netherlands Indies.

Civil Administrator.—Major D. Thompson, O.B.E.

BORNEO (BRITISH).

North Borneo occupies the northern part of the island of Borneo. The interior is mountainous, Mount Kinabalu being 13,455 feet high.

The territory was a British protected state administered by the British North Borneo Company under royal charter granted in 1881. The sovereign rights and assets of the Company were transferred to the Crown with effect from 15 July, 1946. On that date, the island of Labuan (*see* p. 226) became part of the new colony of North Borneo and the first Colonial Government assumed the administration of the territory.

The government is administered by a Governor aided by an appointed Legislative Council of 22 members of whom 12 are officials and 10 unofficials. There is also an Executive Council consisting of 5 officials and 4 unofficials.

From Jan., 1942, to 10 Sept., 1945, North Borneo was in the occupation of the Japanese. The country suffered heavily; the principal towns and villages were destroyed. Much repair work has already been done, and the railway carried, in 1950, more traffic than ever before.

Area, about 29,387 square miles, with a coastline of over 900 miles. Population (1931 census), 270,223, of whom 205,218 were natives and 47,972 Chinese. In 1950, the population (including Labuan) was estimated to be 351,000. The native population comprises Dusuns (mainly agricultural), Bajaus and Bruneis (mainly occupied in fishing), Muruts (hill tribes), Suluks (mostly sea-faring) and several smaller tribes. The Labuan population, which was 8,963 in 1941, comprises mainly Malays and Chinese.

The principal towns are situated on the coast. These are Jesselton (the capital), Kudat, Sandakan, Lahad Datu and Tawau on the mainland, and Victoria on the island of Labuan.

There are Protestant and Catholic missions. The laws of the mainland are based on the Indian penal, criminal and civil procedure codes, and local ordinances; in the island of Labuan, Straits Settlements laws generally apply. There are native courts for native and Moslem law and custom.

	1940	1946 *	1947	1948	1949	1950 [1]
	$	$	$	$	$	£
Revenue [2] . .	4,173,559	1,833,259	7,171,067	8,578,058	11,689,285	15,722,950
Expenditure [2] .	2,071,385	2,550,696	11,919,368	11,391,134	17,614,274	20,995,420

* From 15 July (resumption of civil administration) to 31 Dec. only.

[1] Estimates.

[2] All figures include gross railway revenue and expenditure, but exclude colonial development and welfare schemes, the expenditure under which was as follows —1947, $42,022; 1948, $163,757; 1949, $1,508,837; 1950, $1,546,413.

[3] In all probability the true figures for exports are considerably greater as the values given for timber, tobacco, manila hemp and some other commodities are nominal and subject to adjustment when the sale price is known.

Most of the trade is carried through Singapore and Hong Kong. The main imports are rice, provisions, textiles and apparel, tobacco, sugar and vehicles. Comparative pre-war and post-war figures are given in the following table (in $1,000) :—

	1940	1947	1948	1949	1950
Rice	1,452	2,960	4,282	6,017	3,176
Provisions	998	3,606	3,557	4,347	6,015
Textiles and apparel	1,201	2,827	2,824	3,799	6,863
Tobacco, cigars, cigarettes	413	1,879	2,438	1,998	2,597
Ironware	670	—	—	—	—
Sundries	598	451	478	—	—
Sugar	—	—	—	2,388	2,725
Vehicles	—	—	—	1,340	1,530

The main exports are as follows (in million dollars):—

	1940	1947	1948	1949	1950
Rubber	14·50	11·25	18·50	15·90	59·86
Timber	2·20	1·50	3·00	5·40	6·53
Cutch	·65	—	·50	1·10	1·24
Hemp	·55	·50	·50	·80	1·16
Dried and salt fish	·55	·50	·50	·50	·58
Tobacco	·45	—	1·50	2·00	1·74
Firewood	·40	·25	·25	1·50	1·57
Copra	·30	·50	1·70	7·50	17·20

Merchant shipping (men-of-war and government vessels excluded) amounting to 2,436,246 gross tons, used the ports in 1950, and cargo totalling 508,857 tons was handled.

A railway, 96 miles, runs from Jesselton on Gaya Bay to Melalap in the interior, with a branch (20 miles) from Beaufort to Weston on Brunei Bay. There are 153 miles of metalled roads, 225 miles of earth roads and 578 miles of bridle paths.

Three aviation services operate within the colony: Malayan Airways, thrice-weekly between Singapore and North Borneo; Cathay Pacific Airways, weekly between Hong Kong, Manila and North Borneo; and Qantas Empire Airways, weekly between Sydney and Hong Kong with stops overnight at Labuan.

At Jesselton and Sandakan there are branches of the Hongkong and Shanghai Banking Corporation and the Chartered Bank of India, Australia and China. The Hongkong bank has also a branch at Tawau. Agency facilities exist at Labuan.

Labuan is an island, 35 square miles in area, lying 6 miles off the north-west coast of Borneo. It has a fine port, Victoria Harbour, safe and easy of access. The settlement comprises 7 smaller islands, some of which are under cultivation. It was ceded to Great Britain by the Sultan of Brunei in 1846; for its chequered administrative history *see* THE STATESMAN'S YEAR-BOOK, 1947, p. 189. In 1946 Labuan was re-united with North Borneo. The estimated population (1947) was 9,253. Capital, Victoria, 2,022 inhabitants (census, 1931).

Total trade (in £ sterling) between North Borneo and the United Kingdom (Board of Trade returns):—

	1938	1947 [1]	1948 [1]	1949	1950
Imports into U.K.	411,980	457,071	1,107,922	846,312	1,366,618
Exports from U.K.	49,694	1,030,524	1,784,982	2,366,988	2,383,079
Re-exports from U.K.	1,657	5,758	9,837	18,528	16,905

[1] Including Labuan.

Governor and Commander-in-Chief.—Maj.-Gen. Sir Ralph Hone, K.B.E., M.C., T.D.

Chief Secretary.—J. Calder, C.M.G.

Brunei.—A state on the north-west coast of Borneo, lying between lat. 4° 2′ and 5° 3′ N. and long. 114° 4′ and 115° 22′ E. It is bounded on all sides by Sarawak territory, an intrusion of which splits the state into two separate parts. Area about 2,226 square miles with a coast line of about 100 miles. Census population, 1947, 40,657; including 394 Europeans, 31,161 Malays and Borneans, 8,300 Chinese and 434 Indians. Capital is Brunei (population about 10,620), on Brunei River 9 miles from its mouth, 758 nautical miles distant from Singapore. Climate is of tropical marine type, hot and moist, with cool nights.

In 1847 the Sultan of Brunei entered into a treaty with Great Britain for the furtherance of commercial relations and the suppression of piracy, and in 1888, by a further treaty, the state was placed under the protection of Great Britain. In 1906, by treaty, the general administration of the state was entrusted to a British Resident, whose advice must be asked and acted upon in all questions other than those affecting Malay customs and the Islamic religion. The present Sultan is His Highness Omar Ali Saifuddin Washa'dul Khairi Waddin, who succeeded his late brother, Sir Ahmed Tajudin, on 6 June, 1950. The supreme authority in the state is vested in the Sultan in Council, which at present consists of 12 members, including the British Resident, with His Highness the Sultan as President. On 1 May, 1948, the Governor of Sarawak became High Commissioner for Brunei.

The country was under Japanese occupation from 16 Dec., 1941, to 10 June, 1945. British military administration lasted from this date until 6 July, 1946.

The Resident is assisted by 2 Assistant Residents. The heads of the Police, Education, Agriculture, Forest, Medical, Customs and Public Works Departments are European officers, usually of the Sarawak establishment.

The principal products are crude oil, rubber, jelutong, cutch and sago. Native industries include boat building, cloth-weaving and the manufacture of brass and silver ware. Most of the interior is under forest, containing large potential supplies of serviceable timber.

In 1948 the Seria oilfields produced 2,645,412 metric tons; in 1949, 3,302,879 metric tons.

Revenue, 1949, £1,019,717; estimated revenue, 1950, £1,115,041. Expenditure, 1949, £493,323; estimated expenditure, 1950, £988,901.

Imports, 1949, £4,152,722; exports, 1949, £7,240,058. Imports from the U.K., 1947, £5,299; 1948, £73,865; 1949, £60,392; 1950, £53,149.

Free vernacular education in the Malay language is provided by the state. There were 27 vernacular schools in 1949, with 2,267 pupils. In addition there were 5 Chinese vernacular schools with 1,272 pupils, 4 private English schools and one trade school.

The police force consists of 169 officers and men under the chief police officer, an assistant commissioner from Sarawak constabulary.

At the end of 1949, the state had 137 miles of road, 57 miles of which were treated with asphalt or concrete. The main road runs from Brunei Town to Tutong, about 30 miles. The oil company maintains about 43 miles, connecting Seria with Kuala Belait. Number of motor vehicles, 469, including 249 passenger cars and 60 buses.

There were 5 post offices in the state in 1949.

There is a central wireless station at Brunei in direct communication with Singapore, Sarawak and North Borneo. There are also 3 subsidiary

wireless stations at Belait, Seria and Temburong for internal traffic. Communication by small Straits Steamship Company's vessels and by launches is regularly maintained with Labuan, distant about 35 miles from Brunei.

The currency is the Malayan dollar, with a par value of 2*s.* 4*d.*

British Resident.—E. E. F. Pretty, C.M.G.

Sarawak.—Area about 47,000 square miles, coast line 450 miles, many rivers navigable. The government of part of the present territory was obtained on 24 Sept., 1841, by Sir James Brooke from the Sultan of Brunei. Various accessions were made between 1861 and 1905. Under an agreement of 1888, Sarawak was placed under the protection of Great Britain. A supplementary agreement concluded in Nov., 1941, provided for the appointment of a British representative with certain limited powers. On 16 Dec., 1941, Sarawak was occupied by the Japanese. After the liberation, the Rajah took over his administration from the British military authorities on 15 April, 1946. He had previously proposed to the British Government the cession of Sarawak to the British crown.

On 24 Sept., 1941, the Rajah began to rule through a constitution. Since 1855 two bodies, known as the Supreme Council and the Council Negri, had been in existence. By the constitution of 1941 they were given, by the Rajah, powers roughly corresponding to those of a colonial executive council and legislative council respectively. The Council Negri, on 17 May, 1946, authorized the Act of Cession by 19 to 16 votes. During 1947, District and Divisional Advisory Councils on a representative basis, and 5 Local Authorities were established.

Final figures of the population census of 26 Nov., 1947, show a total of 546,385 (increase since 1939, 11%), consisting of Malays, Dayaks, Melanaus, Kayans, Kenyahs, Muruts, and other minor tribes, with Chinese and other settlers. Estimated population, 1950, 550,000.

The chief towns are the capital, Kuching, about 18 miles inland, on the Sarawak River, Sibu, 80 miles up the Rejang River, which is navigable by large steamers, and Miri, the headquarters of the Sarawak Oilfields, Ltd. There are Church of England, Roman Catholic, American Methodist, Seventh Day Adventist and Borneo Evangelical missions with schools. The revenue is derived from customs duty, royalty on oil, land revenue, timber royalty, trade licences, income tax, excise revenue, exemption tax payable by Malays, and from Dayak and Kayan revenue.

Actual revenue, 1949, $15,349,662; revised estimated revenue, 1950, $22,336,457; estimated, 1951, $19,309,600. Actual expenditure, 1949, $17,945,155; revised estimated expenditure, 1950, $18,362,272; estimated, 1951, $19,700,000.

The country produces rubber, sago, oil, rice, pepper, gold and jungle produce. These are also known coal deposits. A considerable oil field is being developed at Miri. The trade is mostly with Singapore. In 1948, vessels of 1,600,699 tons entered and vessels of 1,379,674 tons left Sarawak from and to foreign ports.

Imports, 1949, $109,969,460. Exports, 1949, $187,628,559. Exports to the United Kingdom, 1947, £126,365; 1948, £216,100; 1949, £337,752; 1950, £1,272,221. Imports from the United Kingdom, 1947, £239,953; 1948, £458,050; 1949, £545,827; 1950, £690,381.

There is a constabulary of about 1,000 men, principally Dayaks and Malays, under European officers. There are no railways. There are 154 miles of metalled road and 366 miles of earth roads, besides bridle paths. There are 36 post offices. The government offices have a telephone system extending over Kuching and Upper Sarawak, and there is communication

by wireless with Singapore, etc. There are wireless stations at Kuching, Miri, Sibu, Lundu, Mukah, Simanggang, Bintulu, Sarikei, Meluan, Kapit, Limbang, Baram, Saratok, Matu, Belingian, Selalang, Tatau, Lawas, Belaga and Kanowit. Telegrams are sent by wireless *via* Singapore.

The post office savings bank had 2,895 depositors at the end of 1949; the amount at their credit was $982,752.

Sarawak and Straits Settlements currency, $1 = 2*s.* 4*d.*

Governor and C.-in-C.—Anthony Foster Abell, C.M.G. (sworn in, 4 April, 1950).

Chief Secretary.—R. G. Aikman.

CYPRUS.

Constitution and Government.—Cyprus is 40 miles from the coast of Asia Minor and 60 from the coast of Syria. At a very early date important Greek and Phœnician colonies were established in Cyprus and later it formed part of the Persian and Roman Empires. Its government frequently changed hands until 1571, when the Turks conquered the island from the Venetians, and retained possession of it until its cession to England for administrative purposes under a convention concluded with the Sultan at Constantinople, 4 June, 1878. On the outbreak of hostilities with Turkey on 5 Nov., 1914, the island was annexed. On 1 May, 1925, the island was given the status of a crown colony by letters patent, and the High Commissioner became Governor. There is an Executive Council, consisting of the Colonial Secretary, the Attorney-General, the Financial Secretary, the Commissioner of Labour and 2 non-official members. On 13 Nov., 1931, following disturbances arising out of the movement for union with Greece, the Legislative Council, first constituted in 1882, ceased to exist, and power to make laws was granted to the Governor. Municipal corporations exist in 16 towns and villages. Since April, 1943, members of the councils are elected by all male residents 21 years old or over. Since 1 Dec., 1931, the appointment of the mukhtars (headmen) of villages has been vested in the Governor. On 1 Nov., 1947, a consultative assembly drawn from representative elements of the island was convened to frame proposals for constitutional reforms, including the re-establishment of a central legislature. In May, 1948, a new constitution was proposed by His Majesty's Government for consideration by the Assembly. These proposals proved unacceptable to 7 Greek members of the Assembly who declared that they would no longer be able to take part in its deliberations. In these circumstances, which gravely diminished its representative character, the Assembly was dissolved on 12 Aug., 1948, but the offer of a constitution was not withdrawn. If responsible and fully representative political leaders in Cyprus

ask that these or comparable constitutional proposals might be re-examined or implemented, or if there is any genuine manifestation of public opinion in their favour, His Majesty's Government will take the necessary steps.

Governor.—Sir Andrew Barkworth Wright, K.C.M.G., C.B.E., M.C. (Salary, £4,500, of which amount £1,200 is payable to the officer from time to time administering the government).

Colonial Secretary.—J. Fletcher-Cooke (appointed 27 Nov., 1950).

Area and Population.—Area, 3,572 square miles; about 140 miles is greatest length from east to west, and about 60 miles is greatest breadth from north to south. Average rainfall for the past 10 years, 21·16 inches. Most of the rain falls between October and March.

Population by religions at different censuses :—

Religion	1921	1931	1946 [1]
Greek Orthodox . .	244,887	276,573	361,199
Moslems	61,339	64,238	80,548
Others	4,489	7,148	8,367
Total . . .	310,705	347,959	450,114

[1] Excluding military and camps.

Inhabitants per square mile, 1950, 137. Births registered, 1949, 13,234; 1950, 14,517; deaths registered, 1949, 4,243; 1950, 3,959.

The principal towns are Nicosia (the capital), population 37,728; Limassol, 25,124; Famagusta, 18,693; Larnaca, 15,593; Paphos, 6,170, and Kyrenia, 3,165 (in 1950). There are 6 administrative districts named after these towns.

Education.—There is a separate educational system for each religion. Elementary schools are under the control of the Government, assisted by an advisory Board of Education for each religious community. In 1949–50 there were 484 Greek (48,127 pupils), 206 Moslem (10,951 pupils) and 5 Maronite schools (297 pupils); also 4 Armenian and 4 Latin schools under independent management.

Secondary schools (subject to varying degrees of state control) included: 12 classical gymnasiums, 22 schools with an academic curriculum other than classical, 5 commercial schools, 1 government school of the grammar school type, 5 Turkish schools including 3 branch schools. There is a government training college for schoolmasters, a mistresses' training centre, 2 agricultural schools, an apprentices' training centre and a boys' reform school. There is also a juvenile welfare service which includes a probation service.

The total government-controlled expenditure on education in 1950 was £1,047,160, of which £594,339 was from colonial revenue.

Greek, Turkish and English are the official languages. English is spreading rapidly. There are 3 English, 6 Turkish and 18 Greek newspapers.

Justice.—The colony is divided into 6 judicial districts, viz., Nicosia, Kyrenia, Famagusta, Larnaca, Limassol and Paphos. The present judicial system provides for (1) a supreme court with appellate jurisdiction, both civil and criminal, over the decisions of all other courts, and original jurisdiction as a colonial court of Admiralty under the Imperial Act of 1890 and in matrimonial causes, with powers in such causes similar to those of the High Court in England; (2) 6 assize courts, having unlimited criminal jurisdiction; (3) 6 district courts, having unlimited civil jurisdiction, and summary

jurisdiction in criminal cases. There are also 3 *Sheri* Courts, for Moslems only, which administer the Moslem *Sheri* or religious law, and an appeal lies from their decisions to the Supreme Court.

In 1949 the number of offences was 38,665, excluding 2,640 offences under the Supplies and Services (Transitional Powers) Act, and the number of persons committed to prison was 2,582 convicted, 448 unconvicted. Strength of police force, 31 Dec., 1949, 36 officers and 1,027 men. Strength of prison service, 31 Dec., 1949, 5 officers, 87 permanent and 45 temporary warders and 2 temporary wardresses.

Finance.—The revenue and expenditure for 5 years, exclusive of grants-in-aid, share of the Turkish debt charge, and colonial development fund grants and expenditure, were (in £ sterling) :—

	1946	1947	1948	1949	1950[1]
Revenue . .	4,294,720	5,040,442	5,825,823	4,957,844	4,225,610
Expenditure . .	3,736,947	4,546,992	5,675,820	4,595,148	4,053,062

[1] Estimates

Chief sources of revenue, 1949 :—Customs duties and port dues, etc., £2,053,421 ; income tax, excise duties, property and animal taxes, licences, stamp duties, etc., £2,165,664; court receipts and payments for specific services, etc., £192,316; forest revenue, £32,023; railway, £78,024; miscellaneous receipts, £240,236. Annual grants from imperial funds (not included above), £92,800.

The expenditure for 1949 includes railway expenditure of £69,063. The share of Cyprus in the Turkish debt charge, not included in the above expenditure, amounts to £92,800 annually; public debt, on 31 December, 1949, amounted to £2,903,492.

Since 1928 Cyprus contributes £10,000 annually to imperial defence.

Production.—Chief agricultural products in 1949 :—Wheat, 2,342,856 bushels; barley, 2,834,677 bushels; oats, 213,773 bushels; vetches, 272,240 bushels; olives, 20,944 tons; carobs, 36,891 tons; potatoes, 35,733 tons; raisins, 5,313 tons; cotton (unginned), 1,011 tons; cheese, 7,340 cwt.; linseed, 9,085 cwt.; flax, 590 cwt.; hemp, 1,130 cwt.; silk cocoons, 2,156 cwt.; wines, 3,732,588 gallons; spirits, 447,599 gallons; olive oil, 3,906 tons; oranges, 576,539 cases; lemons, 109,786 cases; grapefruit, 176,595 cases; tobacco, 547 tons.

Of the island's 2·3 million acres, approximately 1 million are farmed, out of which 570,000 acres are cropped annually. There are two main potato crops.

Livestock in 1949 :—Cattle (including draught oxen), 36,932; horses and mules, 14,127; donkeys, 53,989; sheep, 304,180; goats, 166,945; pigs, 27,321.

The Forest Department has done much for the preservation and development of the forests existing at the time of the British occupation, and for the re-afforestation of denuded districts. The area of delimited forest is 623 square miles. Sponge fishing is usually carried on from June to October.

The principal minerals exported during 1949 were :—Iron pyrites, 401,768 long tons; cupreous concentrates, 111,390 long tons; cement copper, 2,010 long tons; cupreous pyrites, 77,820 long tons; asbestos, 11,098 long tons, gypsum, 23,981 long tons; umber, 3,625 long tons; chrome ore, 14,640 long tons.

Trade Unions.—Cyprus has in the Trade Unions Laws of 1949, which replaced the Trade Unions and Trade Disputes Law of 1941, trade union legislation on the lines of the English trade union acts. All combinations, whether workmen or employers, which have as their principal objects the regulation of the relations between workmen and employers, or between workmen and workmen, or between employers and employers, are considered to be trade unions. Registration is compulsory except in the case of trade unions whose membership is restricted to persons in the civil employment of the Crown. At the end of 1949 there were registered 5 employers' associations and 108 workmen's unions, with a total membership of 101 and 13,601, respectively. There were also 6 federations [illegible] activities of workmen's unions and 2 unregistered unions [illegible].

Commerce.—The commerce and the shipping, exclusive of coasting trade, for 5 calendar years were :—

	1945	1946	1947	1948	1949
Merchandise :—	£	£	£	£	£
Imports . .	5,327,709	8,123,709	13,552,926	15,407,639	11,008,526
Exports . .	3,532,787	4,202,300	5,140,734	5,678,617	8,243,289

Hardware and cutlery . .	112,814		
Electrical goods . . .	278,060		
Machinery	841,301		

Chief exports, 1949 (in £ sterling):—

Barley	567,308	Asbestos	520,795
Almonds	55,470	Chrome ore	115,120
Grapefruit	116,463	Copper cement	96,970
Oranges	461,296	Cupreous concentrates	1,731,142
Raisins	96,463	Cupreous pyrites	287,153
Potatoes (except seed potatoes)	321,282	Iron pyrites	853,549
Wine (except commandaria)	118,721	Seed potatoes	145,324
Carobs :—		Cumnseed	96,299
Whole	51,913	Artificial teeth	86,822
Kibbled	615,073	Buttons	87,701
Seed, including germ	125,542	Mules	104,739
Tobacco, unmanufactured	55,868		

In 1949, the United Kingdom supplied 44·15% of the imports (1948, 38·07%), other parts of the Commonwealth 18·82% (19·27%); of the exports, 16·16% went to the United Kingdom (1948, 20·83%), 16·73% to Germany (20·61%), 9·47% to Israel (6·44%), 9·36% to U.S.A. (6·06%).

Imports from United Kingdom (Board of Trade returns) 1938, £794,941; 1947, £2,125,273; 1948, £1,910,923; 1949, £1,788,194; 1950, £2,453,968. Exports to United Kingdom, 1938, £658,212; 1947, £3,892,293; 1948, £4,674,887; 1949, £4,157,235; 1950, £5,605,965.

Communications, etc.—The primary system of arterial or main roads totals 876 miles, of which 718 miles have an asphalt-treated surface. The secondary system of feeder or village roads totals 1,847 miles. The main roads are well maintained and are usable in all weathers. Most of the secondary roads are stone surfaced and can be used by motor vehicles. A narrow-gauge government railway runs from Famagusta harbour to Kalokhorio (71 miles).

Post.—Length of physical telephone lines, 4,284 miles; length of superimposed phantom and carrier telephone circuit, 1,189 miles; length of superimposed phantom telegraph circuit, 474 miles; number of telephones (31 Oct., 1950), 4,729.

Civil Aviation.—The following air companies operate scheduled services to and from or through Nicosia:—*Cyprus Airways Limited:* twice weekly to Cairo, twice weekly to Beirut, thrice weekly to Athens, thrice weekly to Lydda, once weekly to Istanbul and twice weekly to Rome. The services to Rome and Athens connect with British European Airways' services to Southern France and the United Kingdom. *Misrair:* twice weekly to Cairo and once weekly to Istanbul. *Middle East Airlines:* twice weekly to Beirut. *Hellenic Airlines:* twice weekly to Athens and Paris. *Turkish State Airlines:* once weekly to Ankara and Istanbul and to Beirut. *British Overseas Airways Corporation:* one stop per week in each direction on the service, London–Tripoli-Nicosia–Teheran. In addition to these scheduled services, numerous non-scheduled flights are made to all parts of the world.

Money, etc.—The Ottoman Bank, the Ionian Bank, Barclays Bank (D., C. & O.) and the Bank of Athens have establishments in the island, in addition to which there are various local banks. Moneys of account are pounds, shillings and Cyprus piastres. 180 Cyprus piastres or 20 shillings = one pound, which is equivalent to the pound sterling. Government currency notes of £5, £1, 10*s.*, 5*s.*, 2*s.*, 1*s.* and 3*p.* are in circulation, the value at 31 Dec., 1949, being £4,789,895. Coins current—Silver, 45, 18, 9, 4½ and

3 Cyprus piastres; bronze and nickel, 18, 9, 1, ½ and ¼ Cyprus piastres. Weights and measures are as follows:—Length: 1 Cyprus pic = ⅔ yard; Weight: 1 oke = 2·8 lb.; Capacity: 1 kilé = 8 imperial gallons.

HONG KONG.

Constitution and Government.—The Crown Colony of Hong Kong was ceded by China to Great Britain in Jan., 1841; the cession was confirmed by the treaty of Nanking, in Aug., 1842, and the charter bears date 5 April, 1843, since when Hong Kong has been under British administration, with the exception of the period from 25 Dec., 1941, to 16 Sept., 1945, when it was occupied by the Japanese.

The administration is in the hands of a Governor, aided by an Executive Council, composed of the General Officer Commanding-in-chief, the Colonial Secretary, the Attorney-General, the Secretary for Chinese Affairs, the Financial Secretary (who are members *ex-officio*) and such other members, both official and unofficial, as may be appointed. At the end of 1949, there were 5 official and 6 unofficial members, three of whom were Chinese. There is also a Legislative Council, presided over by the Governor, and consisting of not more than 9 official members (including the same 5 *ex-officio* members listed above) and not more than 8 unofficial members. At the end of 1950, there were 8 official and 7 unofficial members.

Governor.—Sir Alexander Grantham, K.C.M.G.

General Officer Commanding-in-Chief.—Lieut.-Gen. Sir E. C. Robert Mansergh, K.B.E., C.B., M.C.

Colonial Secretary.—J. F. Nicoll, C.M.G.

Area and Population.—Hong Kong is situated at the mouth of the Canton River, about 91 miles south of Canton. The island is an irregular and broken ridge, stretching nearly east and west about 11 miles, its breadth from 2 to 5 miles, and its area rather more than 32 square miles; separated from the mainland by a narrow strait, the Lyemun Pass, about a quarter of a mile in width. The opposite peninsula of Kowloon (3¼ square miles), was ceded to Great Britain by treaty in Oct., 1860, and now forms part of Hong Kong. The southern shore of the extensive harbour is now built up for over 8 miles, nearly 5 of which are within the old limits of the City of

Victoria, a term now seldom used. By a convention signed at Peking on 9 June, 1898, there was leased to Great Britain for 99 years a portion of Chinese territory mainly agricultural, together with the waters of Mirs Bay and Deep Bay and some islands, including Lantao. Its area is 355 square miles, including islands, with about 200,000 inhabitants, including a number of Europeans. Large areas have been reclaimed at Kowloon Bay, Wanchai and North Point. Total area of colony, 391 square miles. The climate of Hong Kong is sub-tropical, the winter being cool and dry and the summer not and humid. The average rainfall is 84·26 in., May to Sept. being the wettest months.

No official census has been taken since 1931 when the population was 849,751. Since the war the [illegible] risen steadily and, due to the influx of refugees from China, [illegible] at 2,360,000 by May, 1950. As a result of the return to China of some refugees, the estimate at the end of 1950 was 2,060,000. Estimated number of British subjects of European race, 13,000.

Education.—Education is not compulsory, but all schools are required to be registered with the Education Department and, unless specially exempted, are inspected by its officers and are required to comply with government regulations as to staff, buildings, numbers of pupils and health.

By the end of 1950, government schools had an attendance of 9,250 pupils; grant schools, 13,790; subsidized schools, 29,062; private schools, 106,429. In all, there were 893 schools. Northcote Teachers' Training College had 118 students, and the Rural Teachers' College, 48.

In 1949 the University of Hong Kong had 629 full-time undergraduates (450 men, 179 women). The figures for Christmas term, 1950, were: 711 [illegible] (518 men, 193 women).

In 1950 there were 38 cinemas with a seating capacity of 41,685; this includes theatres which sometimes show Chinese films.

Justice and Crime.—There is a supreme court, having original, summary, criminal, probate, divorce, admiralty and prize jurisdiction, and courts of appeal, police magistrates' courts and a marine magistrates' court. In 1950, 18,312 persons were committed to Hong Kong prisons for criminal offences. The police force numbered, in 1950, 4,101 men, and was composed of 36 officers, 390 inspectorate, 515 Shantung police, 3,042 Cantonese and 118 Indians.

Finance.—The public revenue and expenditure for the financial year ending 31 March were as follows (in Hong Kong dollars):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1947–48	164,298,310	127,701,174	1949–50	264,250,543	182,121,726
1948–49	191,933,955	159,954,023	1950–51 [1]	204,139,480	200,839,083

[1] Estimated.

The revenue is derived chiefly from rates, licences, duties on liquor, tobacco, hydrocarbon oils and motor cars, and a tax on earnings and profits.

The outstanding public debt as at 31 March, 1950, consisted of $4,838,000 4% Conversion Loan (1933), $5,600,000 3½% Dollar Loan (1934), $7,546,000 3½% Dollar Loan (1940) and $49,450,000 3½% Rehabilitation Loan (1973–78). The Conversion Loan is redeemable in 1953 by means of a sinking fund. The Dollar Loans are redeemable by annual drawings over

a period of 25 years. The Rehabilitation Loan is redeemable by a sinking fund at a rate of not less than 1% per annum as from 15 July, 1948.

Industry and Commerce.—The chief industries are ship-building and repairing, rope-making, the manufacture of paint, cement, torch batteries, vacuum flasks, matches and tobacco, preserving of ginger and the production of knitted and woven goods and canvas shoes with rubber soles. Fish is the main primary product. Deep-sea fishing is important, especially for the New Territories.

Hong Kong is a free port, except as regards the importation of intoxicating liquor, tobacco, proprietary medicine and toilet preparations, and hydrocarbon oils; under the Ottawa Conference Agreements, a registration fee of 15% of their value is charged on non-British motor-vehicles. Preference was also extended to Empire brandy and tobacco and tobacco manufactures. Principal articles of trade in 1948–49 were foodstuffs, oils and fats, piece goods and textiles, Chinese medicines, metals, minerals and ores, paper, chemicals and drugs, dyeing and tanning materials, tobacco. Hong Kong is a port of call for steamship lines operating across the Pacific; it is also in direct communication with Europe, South Africa, Australia and the Americas, via the Pacific sea-board, the Panama Canal and the Suez and Atlantic routes.

The trade of Hong Kong and the United Kingdom (Board of Trade returns, in £ sterling) is given as follows:—

	1938	1947	1948	1949	1950
Imports into U.K. . .	1,002,350	2,088,387	5,510,467	10,265,175	12,060,485
Exports to Hong Kong .	3,924,647	12,742,797	20,575,326	27,907,383	27,748,274
Re-exports to Hong Kong	55,878	85,948	129,924	126,375	287,213

Imports from the British Commonwealth countries in 1950 ($1,168 million) amounted to 30·80% of total imports (17·2% in 1938). Exports to British Commonwealth countries in 1950 ($999 million) were 26·9% of the goods exported from Hong Kong (16·3% in 1938).

The total value of imports in 1949 was HK $2,750 million; in 1950, HK $3,787,661,653; of exports HK $2,318 million in 1949 and HK $3,715,552,373 in 1950.

Communications.—In 1950, the colony had 425 miles of roads, distributed as follows:—Hong Kong Island, 180; Kowloon and New Kowloon districts, 107; New Territories, 138.

There is an electric tramway of 19 miles, and a cable tramway connecting the Peak district with the lower levels in Victoria. There is a 4 ft. 8½ in. gauge government railway on the mainland, connecting Kowloon with Hankow, of which 22·06 miles are in British territory and 771 miles in Chinese.

Posts.—There were 10 post offices in 1950; postal revenue (1949–50), $12,066,219; expenditure, $3,358,563. Telegraph and telephone routes, including cables, but excluding military lines, in 1950, 1,242 cable miles, 107,092 wire miles (53,546 circuit miles). There is a wireless telegraph service, under the control of Cable and Wireless, Ltd., which provides for marine, meteorological and aeronautical communications, as well as a broadcasting service with facilities for medium and short-wave transmissions of European and Chinese programmes. Commercial wireless services are also under the control of Cable and Wireless, Ltd. There are also military and naval wireless stations.

Shipping.—Vessels engaged in foreign trade, including launches and junks, [illegible] clearing the port during the year ending 31 March, 1950, [illegible] vessels of 26,396,355 net tons, while launches and junks engaged in local trade totalled 28,039 vessels of 954,165 net tons. 2,060,920 passengers were landed or were embarked in addition to 25,098 declared as emigrants. 6,246,923 tons of cargo was declared as having been loaded or discharged during the year.

Civil Aviation.—The airport at Kai Tak is capable of taking aeroplanes up to 80,000 lb. in weight and the adjacent marine base is suitable for all types of flying boats. British, Canadian, Australian, American, French, Portuguese, Philippine and Thai airlines connect the colony by frequent scheduled services to all parts of the world. In 1949–50, 22,073 aircraft arrived on international flights.

Money, Weights and Measures.—The British banking institutions in the colony are the Hongkong and Shanghai Banking Corporation, whose head office is at Hong Kong, the Chartered Bank of India, Australia and China, and the Mercantile Bank of India, Ltd. Note circulation of the 3 banks in Sept., 1950, was $803,258,013. There are also several Chinese and foreign banks.

The currency of the colony consists of the notes of the above-mentioned banks, and of Hongkong government dollar notes and subsidiary notes of 10-cent, 5-cent and 1-cent denominations, and 10-cent and 5-cent coins. All silver coin in circulation was called in under the Currency Order No. 54 of 1935 and an exchange fund was established to control the exchange value of the Hong Kong dollar. On 14 Sept., 1945, Hong Kong reverted to its pre-war dollar currency, the dollar being worth 1*s.* 3*d.*

Weights and measures are:—The *Tael* (*leung*) = $1\frac{1}{3}$ oz. avoirdupois; the *Picul* (*tsam*) = $133\frac{1}{3}$ lb. (often taken as $\frac{1}{17}$ of a ton); the *Catty* (*kan*) = $1\frac{1}{3}$ lb. avoirdupois; the *Chek* (Chinese foot) = $14\frac{1}{8}$ inches (but varying from $11\frac{1}{2}$ inches to 14·88 inches according to the custom of various trades); the *Tsuen* (Chinese inch) = $\frac{1}{10}$ of a *Chek*; the *Cheung* = 10 *Chek*; the *Lei* (Chinese mile) = 707 to 744 yards.

Besides the above weights and measures of China, those of Great Britain are in general use.

FEDERATION OF MALAYA.

Constitution and Government.—The Federation of Malaya came into force on 1 Feb., 1948, as a result of consultations between representatives of the British Government, the rulers of the Malay states and the United Malays' National Organization. It succeeded the Malayan Union which was set up on 1 April, 1946, but to the constitutional arrangements

of which the Malays objected. The Federation consists of the same territories as the former union, namely the 9 States of the Malay peninsula and the 2 British Settlements of Penang and Malacca; Singapore, the third of the former Straits Settlements, is now a separate colony.

The King and the Malay rulers have power to admit any other territory into the federation by mutual agreement. Under the High Commissioner, to whom power is delegated jointly by the King and the Malay rulers, the central Government consists of a federal executive council and federal legislative council. The legislative council consists of the High Commissioner, 14 official members, a representative of each State and Settlement council, and 50 unofficial members; it has powers of legislation in matters concerning the Federation as a whole. Each state is governed by its ruler, assisted by a state executive council and a council of state, and each Settlement has a settlement council. The King, through the High Commissioner, exercises control over questions of defence and external relations. The rulers have agreed to accept the High Commissioner's advice in all matters of government, excepting those relating to the Moslem religion and Malay custom. The power of advice in State matters is to be exercised by the British Adviser of each State.

Federal citizenship may be acquired either automatically or on application for the High Commissioner's certificate; the detailed regulations concerning citizenship follow the proposals set out in section 24 of Cmd. 7171.

The legislative council was formally inaugurated on 24 Feb., 1948.

Commissioner-General for the United Kingdom in South-East Asia.—Malcolm MacDonald (appointed 29 Jan., 1946). His sphere of authority covers the Federation of Malaya, Singapore, North Borneo, Sarawak and Brunei.

Deputy Commissioner.—William Addis, C.M.G. (appointed Sept., 1950).

High Commissioner for the Federation.—Sir Henry Gurney, K.C.M.G. (appointed 1 Oct., 1948).

Chief Secretary.—M. V. del Tufo.

Sultan of Johore.—H.H. Ibrahim ibni Almarhum Sultan Abu Bakar, D.K., S.P.M.J., G.C.M.G., K.B.E.(Mil.), G.B.E., G.C.O.C.(I).

Sultan of Pahang.—H.H. Sultan Abu Bakar Ri'ayatu'd-Din Al-mu'adzam Shah ibni Al-marhum Al-mu'tasim Bi'llah Abdullah, K.C.M.G.

Yang di-Pertuan Besar of Negri Sembilan.—H.H. Tuanku Abdul Rahman ibni Al-marhum Tuanku Muhammad, K.C.M.G.

Sultan of Selangor.—H.H. Hisamuddin Alam Shah ibni Al-marhum Sultan Ala-Iddin Sulaiman Shah, K.C.M.G.

Sultan of Kedah.—H.H. Tunku Badlishah ibni Al-marhum Sultan Abdul Hamid Halim Shah, K.C.M.G., K.B.E.

Raja of Perlis.—H.H. Syed Putra ibni Al-marhum Syed Hassan Jamalullail, C.M.G.

Sultan of Kelantan.—H.H. Tengku Ibrahim ibni Al-marhum Sultan Mohamed IV, D.K., S.P.M.K., S.J.M.K., K.C.M.G.

Sultan of Trengganu.—H.H. Sultan Ismail Nasiruddin ibni Al-marhum Sultan Zainal Abidin, C.M.G.

Sultan of Perak.—Paduka Sri Sultan Yussuf Izzudin Shah ibni Al-marhum Sultan Abdul Jalil Radziallah Hu-'an-hu, K.C.M.G., O.B.E.

History.—In the period 1874–95, the former Federated Malay States of Perak, Selangor, Negri Sembilan (which is itself a federation of small states) and Pahang entered into treaty relations with Great Britain by which they sought and obtained British protection and the assistance each of a

resident to advise the ruler, and of other British officers to assist in the administration. In July, 1895, these 4 States agreed to form a federation and to maintain a contingent of troops. In 1909 a federal council was constituted to pass laws concerning federal matters.

The former Unfederated Malay States comprised Johore, Kedah, Perlis, Kelantan and Trengganu. The relations of Johore with Great Britain were defined by a treaty dated 11 Dec., 1885, and, by an amendment to this treaty made on 12 May, 1914, the Sultan agreed to accept, and to act upon the advice of, a British officer called the General Adviser. The Sultan is assisted in the administration of the state by an executive council, and by a legislative council consisting of official and unofficial members. The rights of suzerainty, protection, administration and control of the other 4 States were transferred from Siam to Great Britain by the Anglo-Siamese treaty of 10 March, 1909.

Malacca, one of the oldest European settlements in the East, was occupied by the Portuguese under Albuquerque in 1511, and held by them till 1641, when it passed into the possession of the Dutch, remaining in the hands of the Dutch till 1795, when it was captured by the English. It was restored (under the Treaty of Vienna) to the Dutch in 1818, being finally retroceded to the East India Company in 1824.

Penang (Prince of Wales' Island) was the first British settlement in the Malay Peninsula, being ceded by the Sultan of Kedah to the East India Company in 1786, Province Wellesley being added in 1800.

From 1826 to 1946, Malacca and Penang were incorporated with Singapore under a single government which, from 1867 onward, was a crown colony known as Straits Settlements.

Area and Population.—The total area of the Federation is about 50,680 square miles. The capital is Kuala Lumpur.

States	Area sq. m.	Population 1947 census	States	Area sq. m.	Population 1947 census
Perak . .	7,980	953,938	Perlis . .	310	70,490
Selangor . .	3,160	710,788	Kelantan. .	5,750	448,572
Negri Sembilan .	2,580	267,668	Trengganu .	5,050	225,996
Pahang . .	13,820	250,178	Penang . .	400	446,321
Johore . .	7,330	738,251	Unlocated . .	—	2,087
Malacca . .	640	239,356			
Kedah . .	3,660	554,441	Federation .	50,680	4,908,086

Population by races, 1947 census:—2,427,834 Malays; 1,884,534 Chinese; 530,638 Indians; 10,061 Eurasians; 9,607 Europeans; other communities, 45,412.

Estimated population, 30 June, 1950, 5,226,549.

In 1948, there were 86,144 Roman Catholic and 47,461 Protestant Christians in Malaya.

Education.—In 1949, there were 3,991 government maintained, aided and private schools, of which 231 used English as the language of instruction (3,003 teachers, 90,727 pupils), 1,533 were Malay schools (8,003 teachers, 238,592 pupils), 1,338 Chinese (5,493 teachers, 202,769 pupils), and 889 Indian (1,341 teachers, 38,743 pupils). The English schools provide a secondary education; of their pupils, in 1949, 50·7% were Chinese, 23·7% Indians, 20% Malays and 4·1% Europeans and Eurasians.

Professional education is given at the Technical College, Kuala Lumpur

(with 12 instructors and 177 students in 1949), the College of Agriculture, Serdang (71 students), and the Forest School, Kepong (35 students).

Malay teachers are trained at the Sultan Idris Training College in Perak (422 students in 1949) and the Malay Women's Training College in Malacca (111 students in 1949).

A number of open and closed scholarships are available for Oxford, Cambridge and London Universities.

Health and Social Welfare.—The Government maintains 72 general and district hospitals, an Institute for Medical Research, the Leper Settlement at Sungei Buloh, Selangor (with 2,130 patients at the end of 1949), and the Central Mental Hospital at Tanjong Rambutan (2,750 patients at the end of 1949).

The Protestant Churches maintain 3 hospitals and 2 clinics, with 125 beds.

In May, 1946, the Central Welfare Council for Malaya was formed as an unofficial advisory body. It became an independent body in 1949.

Justice.—The Courts Ordinance, 1948, constituted a Supreme Court, consisting of a High Court and Court of Appeal and presided over by the Chief Justice. The same Ordinance established Session Courts, Magistrates' Courts and Penghulu's Courts.

The strength of the Police Force on 31 Dec., 1949, was 333 officers, 319 inspectors, 17,871 other ranks, and 29,984 special constables.

There are 23 penal institutions. There were 15,364 admissions in 1949, of whom 6,922 were sentenced to penal imprisonment and 4,531 for safe custody. 3,599 persons were admitted to prison under the emergency regulations.

Finance.—The estimates of the Federation for the year 1949 were as follows:—Revenue, $261,119,484; recurrent expenditure, $169,371,366; extraordinary expenditure, $62,476,181; States and Settlements estimated and unforeseen expenditure, $88,758,227; total deficit, $59,486,290.

The public debt of the Federation of Malaya at the end of 1949 was $230,785,727.

Production.—The main industries are padi, rubber, mining, coconuts and oil palms, pineapples and fishing. Total area under agricultural crops, 1949, 5,259,000 acres.

Rice.—Acreage in 1949–50, 930,530 acres; yield, 435,840 tons of rice.

Rubber.—Total production in 1949:—Estates, 400,009 tons from 1,970,579 acres; small holdings, 270,248 tons from 1,393,881 acres.

Mining.—Production of tin-in-ore (long tons): 1946, 8,432; 1947, 27,026; 1948, 44,815; 1949, 54,910. Production of coal (long tons): 1946, 224,674; 1947, 226,301; 1948, 375,460; 1949, 386,898.

Palms.—Production in 1949, 50,561 tons of palm oil; 10,459 tons of kernels. Commercial copra production in 1949, 122,937 tons; coconut oil, 63,698 tons.

Tea.—Production of "made" tea in 1949, 3,233,950 lb.

Fisheries.—Landings in 1949, 71,200 tons; 1948, 53,200 tons.

Livestock.—Census, 1949: oxen, 235,400; buffaloes, 212,200; goats, 206,700; sheep, 20,600; swine, 350,900; horses, 700.

Trade Unions.—There were, 31 Dec., 1949, 169 registered trade unions with 42,288 members.

Commerce.—The value of imports in 1949 was $936,567,036, including $421,000,799 for foodstuffs and $434,500,392 for manufactured goods; 42·66% came from Singapore, 18·27% from the United Kingdom and 8·12% from other parts of the British Empire.

Exports and re-exports totalled $1,176,523,475; 47·16% went to Singapore, 7·72% to the United Kingdom and 6·99% to other parts of the British Empire.

Rubber gross exports in 1949 totalled 709,982 tons, valued $589,635,000; of these, 122,125 tons went to U.S.A., 78,256 tons to U.K., 14,436 tons to Canada, 35,686 tons to U.S.S.R. and 295,618 tons to Singapore.

Total trade (in £ sterling) of British Malaya, the Malayan Union and the Federation of Malaya with the United Kingdom (Board of Trade returns) [1]:—

	1938	1947	1948	1949	1950
Imports into U.K. .	5,473,726	17,456,279	17,353,282	13,871,164	36,759,762
Exports from U.K. .	3,402,029	12,189,455	16,371,804	18,906,246	23,886,489
Re-exports from U.K.	32,180	106,310	108,301	106,328	150,159

[1] The figures are not completely comparable.

Communications.—The Public Works Department maintains about 6,000 miles of public road, of which 3,917 miles is metalled surface, grouted or sealed with bitumen, 337 metalled surface waterbound, 849 hard surface waterbound, 725 earth surface, 212 hard surface bitumen sealed and 20 concrete surface. Motor vehicles registered at 31 Dec., 1949, numbered 43,922, including 20,837 cars, 11,890 goods vehicles and 7,568 motor cycles.

Posts.—On 9 Aug., 1949, the postal territories of the Federation of Malaya and the colony of Singapore were formed into a postal union administered by the Postmaster-General (Malaya) assisted by an advisory board consisting of official and unofficial representatives of the two governments.

The former Posts and Telegraphs Department has been divided into the Postal Services Department, which operates mails, money order and savings bank, and the Telecommunications Department, which controls telegraph, telephone (20,362 instruments in 1949) and wireless services.

Railway.—The Malayan Railway, formerly the Federated Malay States Railways, is owned and operated by the Government. The main line runs from Singapore to Prai, opposite Penang Island. From here, a branch line to Padang Besar on the Thai border connects Malaya with the State Railways of Thailand. Other branch lines connect the main line with Port Dickson, Port Swettenham, Teluk Anson and Port Weld. The east coast line, branching from the main line at Gemas, extends to Tumpat in the north of Kelantan; it was dismantled by the Japanese and has not yet been completely rebuilt. A short branch line from Pasir Mas to Sungei Golok establishes connexion with Thailand. In 1949, the track mileage was 1,091 miles; revenue, $36,870,000; expenditure, $33,742,000.

Aviation.—Seven government aerodromes are maintained in regular use, 7 government and 6 private airfields in usable condition; 17 airstrips were constructed in 1949 for security forces.

Penang was declared a free port in June, 1946.

Currency and Banking.—The standard currency of the Federation is the Malayan dollar, divided into 100 cents and equalling 2*s.* 4*d.* sterling. Note circulation at 31 Dec., 1949, $402,944,000. Fifteen banks were

operating in 1949, including the Chartered Bank of India, Australia and China; the Mercantile Bank of India; the Hongkong and Shanghai Banking Corporation.

The savings bank held a total amount of $47,288,000, due to 229,652 depositors at 31 Dec., 1949.

Weights and Measures.—These are the same as those used in Singapore.

SINGAPORE.

SINGAPORE became a separate crown colony on 1 April, 1946, when the former colony of the Straits Settlements was dissolved, Penang and Malacca being incorporated in the Malayan Union (since 1 Feb., 1948, the Federation of Malaya), and Labuan being transferred to British North Borneo. At the same date, military administration came to an end.

The early history of Singapore is obscure; in the 13th and 14th centuries it occupied a position of importance till destroyed by the Javanese about 1365, after which date it remained almost uninhabited until 1819, when Sir Stamford Raffles founded a trading settlement. The original lease of the site of a factory to the East India Company, by the Sultan of Johore and the Temenggong, Chief of Singapore, was followed by the treaty of 2 Aug., 1824, ceding the entire island in perpetuity to the company. In 1826, Penang, Malacca and Singapore were combined in an Indian presidency with headquarters at Penang. In 1830, the settlements were incorporated under the presidency of Bengal, headquarters being transferred in 1836 to Singapore. On 1 April, 1867, the settlements were transferred from the control of the Indian government to that of the secretary of state for the colonies. The Cocos Islands in 1886, Christmas Island in 1889 and the former colony of Labuan in 1905, were brought under

the control of the governor of the Straits Settlements, being incorporated in the colony, in the settlement of Singapore in 1903, 1900 and 1907 respectively.

Governor and Commander-in-Chief.—Sir Franklin C. Gimson, K.C.M.G. (appointed 29 Jan., 1946).

Colonial Secretary.—W. L. Blythe, M.C.S.

Government.—The Legislative Council consists of the Governor as President (with an original and casting vote); 4 *ex-officio* members (the Colonial and Financial Secretaries, the Attorney-General, and the President of the Municipal Commissioners); 5 nominated officials; 3 elected severally by the Singapore Chinese and Indian Chambers of Commerce; 9 elected in one-member territorial constituencies (from 1951) by universal suffrage of all British subjects over 21; and 4 nominated unofficials.

Elections for the first legislative council took place on 20 March, 1948 :— Progressive Party, 3; Independents, 3. The electorate, in 1950, numbered 49,241.

The affairs of the Municipal area of 30·96 square miles—chiefly public utilities, public health, roads and sewage disposal—are run by a body of 27 Municipal Commissioners, of which 18 are elected by popular vote and 9 are nominated by the Governor, under a Senior Officer of the M.C.S. as President. It raises it own funds from rates.

Area and Population.—Singapore is an island about 26 miles long by 14 wide, with an area of 220 square miles, separated from the southern extremity of the Malay Peninsula by a strait three-quarters of a mile in width. A number of small islands adjacent form part of the settlement. The seat of government is the town of Singapore, at the south-eastern point of the island.

The climate is characterized by uniform temperature, high humidity and copious rainfall. The variation of temperature throughout the year is very small. The average maximum temperature for the whole year is 87·5° F. and the average minimum temperature 75·1° F. There are no well-marked dry and wet seasons. Rain falls throughout the year. The average annual rainfall is 95 inches.

The estimated figures of the population in mid-1950 are as follows :—

	Malays	Europeans	Eurasians	Chinese	Indians and Pakistanis	Others	Total
Singapore Island .	123,624	11,504	10,093	789,160	72,467	8,605	1,015,453
Christmas Island .	249	67	—	1,137	19	—	1,472
Cocos-Keeling Islands . .	1,460	17	—	13	4	—	1,494

Education.—The numbers of schools and scholars in Singapore in 1949 were as follows :—

	Schools	Enrolment
Government	15	8,286
Grant-in-aid	79	29,214
Government	38	7,708
Grant-in-aid and private vernacular schools (boys and girls) .	291	69,903
Government junior technical (trade) school (boys) . . .	1	155
Total	424	115,266

In Singapore are Raffles College, formally opened in 1929, giving a higher education of a university standard in arts and science, and King Edward VII College of Medicine. These two institutions were fused on 8 Oct., 1949, to form the University of Malaya.

Singapore had, in 1950, 33 cinemas with a seating capacity of 22,928.

Justice and Crime.—The law in force is contained in local ordinances and in such of the English common law and such Imperial Acts and Orders of the King in Council as are applicable to the colony. The penal code closely follows the Indian penal code.

There is a supreme court which is a court of record and consists of (*a*) the High Court, which exercises original criminal and civil jurisdiction and appellate criminal and civil jurisdiction in appeals from subordinate courts; (*b*) the Court of Appeal, which exercises appellate civil jurisdiction in appeals from the High Court. The Supreme Court is composed of a chief justice and three or more puisne judges. The chief justice and the judges of the supreme court also form the court of criminal appeal. An appeal lies from the Supreme Court to the Privy Council.

Finance.—Public revenue and expenditure for 6 years ($1 = 2*s.* 4*d.*):—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£	£		£	£
1941 [1]	5,501,790	7,058,729	1947	9,096,250	6,046,134
1942 [1]	6,969,793	6,801,633	1948	9,481,506	8,661,521
1946 [2]	3,441,517	2,841,173	1949	12,638,144	10,811,276

[1] Estimates. [2] 1 April–31 Dec.

The debt on 31 Dec., 1949, amounted to $123,675,378 (*i.e.*, Straits Settlements 3% loan, 1962–72, $30,000,000; Straits Settlements 3% war loan, 1952–59, $25,000,000; Straits Settlements 3% war loan, 1953–60, $10,000,000; 3% rehabilitation loan, 1962–70, $50,000,000; war savings certificates, $8,675,378).

Commerce.—The imports during 1949 amounted to $1,305,078,002, the exports to $1,054,930,894.

The following figures are taken from the British Board of Trade returns the imports including produce from Borneo, Sarawak and other eastern places, transhipped at Singapore, which is thus entered as the place of export:—

	1946	1947	1948	1949	1950
	£	£	£	£	£
Imports into U.K. . .	22,723,676	12,319,324	14,919,008	11,762,671	21,315,869
Exports of British produce	14,821,339	17,879,390	20,411,269	23,168,279	29,940,151
Exports of foreign and colonial produce . .	127,562	133,212	126,103	144,355	180,666

Communications.—*Shipping.*—The total net tonnage of merchant vessels, with cargo and in ballast, which entered into and cleared from Malayan waters during 1949 was 30,723,485.

Road and Rail.—Singapore in 1950 had 116·56 miles of road outside the municipal boundaries, under control of the Rural Board, of which 107·63 miles were bitumenized.

There is a railway from Singapore to Johore Bahru passing across the Johore Causeway.

Post.—On 31 Dec., 1949, 186 post offices and 114 postal agencies were in operation in the Federation of Malaya and 19 in the Colony of Singapore. Telephones numbered 15,010 at 1 Jan., 1950.

The postal department in Singapore forms part of the postal union of Malaya

Banking and Currency.—There were 26 banks (including a post office savings bank) in the colony in 1949.

The Board of Commissioners of Currency Malaya is the issuing authority for currency notes and coins for the Federation of Malaya, Singapore, Brunei and Labuan where Malayan currency is exclusively legal tender. Malayan currency notes are also legal tender in North Borneo and Sarawak. The Malayan monetary unit is the dollar of 100 cents.

Notes of $1 and upwards are of unlimited legal tender, and of below $1 the limit of legal tender is $2. The denominations of notes are 1 cent, 5, 10, 20 and 50 cents, $1, $5, $10, $50, $100, $1,000 and $10,000.

Silver dollars are of limited legal tender up to $10, and silver, nickel, cupro-nickel and copper–bronze coins representing fractional parts of the dollar are legal tender up to $2.

The circulation of currency on 31 Dec., 1949 was :—Notes, $402,943,640; coin, $30,974,088. Pre-occupation notes ceased to be legal tender with effect from 31 Aug., 1948; the balance of the old issues normally in circulation was $11,148,886 on 31 Dec., 1949.

As from 1 Jan., 1949, the savings banks of the former Federated Malay States, the States of Johore, Kedah and Kelantan, and the Penang and Malacca sections of the former Straits Settlements Savings Bank, were amalgamated under the title of 'The Federation of Malayan Post Office Savings Bank.' The amount on deposit, including interest, in Malayan post office savings banks was $74,692,981 as at 31 Dec., 1949.

Weights and Measures.—The standard measures recognized by the laws of the colony are as follows :—(*a*) Standard of length, the imperial yard: (*b*) standard of weight, the imperial pound; (*c*) standard of capacity, the imperial gallon.

Among the Asiatic commercial and trading classes, Chinese steel-yards (called 'liteng' and 'daching') of various sizes are generally employed for weighing purposes. Other local measures of weight, capacity and length :—

Weight and capacity		Length	
Chupak	1 quart	2 jengkals	1 hasta
Gantang	1 gallon	2 hastas	1 ela
Tahil	1⅓ oz.	2 elas	1 depa (1 fathom or 6 feet)
Kati (16 tahils)	1⅓ lb.	4 square depas	1 square jemba (144 square feet)
Picul (100 katis)	133⅓ lb.	400 square jembas	1 square orlong (1¼ acres)
Koyan (40 piculs)	5,333⅓ lb.	1 chhum	1⅛ inches
		1 chhek	10 chhums (14⅛ inches)

The **Cocos** or **Keeling Islands** is a group of 27 small coral islands, lat. 12° S. amd long. 96° 50′ E., 581 miles distant from Java Head (S. 56° W.), and 1,161 miles from Singapore (S. 30° W.). The largest is 5 miles by ½ mile. They were declared a British possession in 1857, were placed by letters patent of 13 Oct., 1878, under the control of the Governor of Ceylon, and by letters patent of 1 Feb., 1886, under the Governor of the Straits

Settlements. In 1903 they were annexed to the Straits Settlements and incorporated with the Settlement of Singapore. The principal cultivation consists of coconuts; the labourers live mainly on Home Island. Copra, coconut-oil and nuts are exported. In 1902 a station on the Cape-Australia cable route was established on Direction Island in the north-eastern part of the group; it is now operated by Cable & Wireless, Ltd. There is an air-strip on West Island.

Christmas Island is in the Indian Ocean, lat. 10° 30′ S. and long. 105° 40′ E. It lies 223 miles S. 8° E. of Java Head, and 529 miles N. 79° E. from the Cocos Island. It is of irregular shape, about 11 miles long (at the longest point), and about 4½ miles wide (at the narrowest point). Area about 60 square miles. The climate is healthy. The island was formally annexed on 6 June, 1888, placed under the administration of the Governor of the Straits Settlements in 1889, and incorporated with the Settlement of Singapore in 1900. The island is administered by a district officer of the Malayan civil service. There is a small police force. The employed inhabitants (mainly Chinese and Malays) are employed by the Christmas Island Phosphate Company, Limited, registered in London, which work the large natural deposits of phosphate of lime to which the island owes its importance. In 1923 a wireless station was installed, and the island is in direct communication with Singapore. A school was established in 1931, and a teacher supplied by the Government.

Books of Reference.

STATISTICAL INFORMATION.—The Department of Statistics (P.O. Box 3010, Singapore), established 1 Jan., 1922, collects Singapore statistics and co-ordinates those with similar information prepared in the Federation of Malaya. Its publications are therefore mainly pan-Malayan with separate details for the two territories; they include 'Malayan Statistics, General Section' and 'Trade Section' (both monthly) and 'Average Prices . . . Imports and Exports . . . Cost of Living' (annual); *Registrar of Malayan Statistics.*—E. J. Phillips.

AFRICA.

UNION OF SOUTH AFRICA.

(UNIE VAN SUID AFRIKA.)

Constitution and Government.

THE Union of South Africa is constituted under the South Africa Act. 1909 (9 Edw. 7, Ch. 9), passed by the Parliament of the United Kingdom on 20 Sept., 1909. Under the terms of that Act the self governing colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony were united on 31 May, 1910, in a legislative union under one government under the name of the Union of South Africa, these colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively. There is a Governor-General, and an executive council in charge of the departments of state,

Legislative power is vested in a Parliament consisting of the King, a Senate and a House of Assembly. The Governor-General has power to summon, prorogue and dissolve Parliament, either both Houses simultaneously or the House of Assembly alone. There must be a session of Parliament every year.

The following is a list of the Governors-General :—

Viscount Gladstone	1910–14	Sir Patrick Duncan	1937–43
Earl Buxton	1914–20	N. J. de Wet (Administrator)	1943–45
H.R.H. Prince Arthur of Connaught	1920–24	The Rt. Hon. C. B. van Zyl	1946–50
Earl of Athlone	1924–31	Dr. E. G. Jansen	1951–
Earl of Clarendon	1931–37		

The Senate consists of fourty-four members, eight (four being selected mainly for their acquaintance with the reasonable wants and wishes of the non-European races) being nominated by the Governor-General-in-Council and thirty-two being elected, eight for each province. Each senator must be a British subject of European descent, at least 30 years of age, qualified as a voter in one of the provinces, and resident for five years within the Union; an elected senator must be a registered owner of property of the value of £500 over any mortgage. The Representation of Natives Act, 1936, provides for the direct representation of natives in the senate and the establishment of a natives representative council. This Act makes provision for the election of four additional senators, each of whom will represent one of the four electoral areas into which the Union is divided. Senators so elected hold their seats for five years. They are required to have the qualifications prescribed for elected senators and enjoy all the privileges of senators.

The House of Assembly consists, according to the Ninth Delimitation Commission appointed in connection with the 1946 population census results, of 153 members chosen in electoral divisions in numbers as follows :— The Cape of Good Hope, 55; Natal, 16; Transvaal, 66; Orange Free State, 13. Act No. 18 of 1930 introduced female franchise and gave the vote to all white women over 21. Act No. 41 of 1931 extended the franchise to all males of European, or white, extraction over the age of 21, thus removing the property and wage qualifications existing in the Cape and Natal Provinces. Each electoral district in each province returns one member, who must be a British subject of European descent, qualified as a registered voter, and resident five years within the Union. A House of Assembly continues five years from the date of its first meeting unless sooner dissolved Under the Representation of Natives Act, 1936, the persons whose names appear on the Cape Native Voters' roll are entitled to elect three members of the House of Assembly, who shall be additional to the number of members provided for in the South Africa Act, 1909. These members hold their seats for five years notwithstanding any dissolution of the House of Assembly.

The Natives Representative Council consists of six official members, four nominated members appointed by the Governor-General (one for each electoral area), and twelve elected native members, three for each electoral area. The functions of the council are to consider and report upon (*a*) proposed legislation in so far as it may affect the native population; (*b*) any matter referred to it by the minister; (*c*) any matter specially affecting the interests of the natives in general. In 1949, however, the Government announced its intention of abolishing this Council and developing instead the local councils and tribal systems. The matter is (April, 1950) under consideration.

The House of Assembly, not the Senate, must originate money Bills, but may not pass a Bill for taxation or appropriation unless it has been recommended by message from the Governor-General during the session. Restric-

tions are placed on the amendment of money Bills by the Senate. Provision is made respecting disagreements between the Houses, the royal assent to Bills, and the disallowance of laws assented to by the Governor-General.

Each member of each House must make oath or affirmation of allegiance. A member of one House cannot be elected to the other, but a minister of state may sit and speak, but not vote, in the House of which he is not a member. To hold an office of profit under the Crown (with certain exceptions) is a disqualification for membership of either House, as are also insolvency, crime and insanity. Pretoria is the seat of government of the Union and Cape Town is the seat of legislature.

After the elections held in South-West Africa on 28 Aug., 1950, the state of the parties in the House of Assembly (elected on 26 May, 1948), was as follows:—National Party, 77; United Party, 64; Afrikaner Party, 9; Labour Party, 6; Native Representatives, 3.

In the Senate, for which elections were held on 29 July, 1948, the Government and Opposition each have 22 members.

The Prime Minister receives an annual salary of £3,500; the other members of the Cabinet £2,500.

The Executive Council (a coalition of the National and Afrikaner Parties) was, in April, 1951, composed as follows:—

Governor-General and Commander-in-Chief.—Dr. the Rt. Hon. Ernest George Jansen (assumed office, 1 Jan., 1951). Salary, £10,000 per annum.
Prime Minister and Minister of External Affairs.—Dr. D. F. Malan.
Minister of Finance.—N. C. Havenga.
Minister of Native Affairs.—Senator H. F. Verwoerd.
Minister of Lands and Irrigation.—J. G. Strydom.
Minister of Justice.—C. R. Swart.
Minister of Transport.—P. O. Sauer.
Minister of Agriculture.—S. P. le Roux.
Minister of Economic Affairs.—E. H. Louw.
Minister of Health and of Social Welfare.—Senator Dr. Karl Bremer.
Minister of Mines, Education, Arts and Science.—J. H. Viljoen.
Minister of the Interior.—Dr. T. E. Dönges.
Minister of Defence.—F. C. Erasmus.
Minister of Labour, of Public Works and Forestry.—B. J. Schoeman.
Minister of Posts and Telegraphs.—J. F. T. Naudé.

In each province there is an administrator appointed by the Governor-General-in-Council for five years, and a provincial council elected for five years, each council having an executive committee of four (either members or not of the council), the administrator presiding at its meetings. Members of the provincial council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. Under the Representation of Natives Act, 1936, the persons whose names appear on the Cape Native Voters' Roll are entitled to elect two members of the provincial council, who shall be additional to the number of members provided for in the South Africa Act, 1909. These members hold their seats for five years notwithstanding any dissolution of the Cabinet. The number of members in each provincial council is as follows:—Cape of Good Hope, 57 (including 2 members elected by persons appearing on the Cape Native Voters' Roll); Natal, 25; Transvaal, 66; Orange Free State, 25. The provincial committees and councils have authority to deal with local matters of which provincial finance, education (primary and secondary, other than higher education and technical education), hospitals, roads and

bridges, townships, horse and other racing, betting, and game and fish preservation, are the most important. Other matters may be delegated to these councils. All ordinances passed by a provincial council are subject to the veto of the Governor-General-in-Council.

There is a provincial revenue fund in each province. The old colonial capitals are the seats of provincial legislature of the provinces.

The railways, ports and harbours are managed by a Railways and Harbours Board, under the chairmanship of a minister of state. The revenues therefrom are paid into a special fund. All other moneys received by the Union are paid into a consolidated revenue fund, on which the interest on debts of the colonies forms a first charge. To the Union has been transferred the public property, real and personal, of the colonies.

The English and Dutch languages are both official. The word 'Dutch' has been expressly declared by Act of Parliament to include Afrikaans, the mother tongue of the majority of the white inhabitants of the Union.

Diplomatic Representatives of the Union.

The rank is Envoy Extraordinary and Minister Plenipotentiary, unless stated otherwise.

There are Consuls-General in Brazil, Madagascar, Moçambique, New York and Norway; Trade Commissioners in the Central and West African Territories, in Belgian Congo and Singapore.

Consuls-General represent China, Czechoslovakia, Egypt, Spain, Switzerland, U.S.S.R.; Consuls, Liberia, Mexico, Panama and Peru; Consular Agent, Colombia.

Area and Population.

The total area of the Union is 472,494[1] square miles, divided between the provinces as follows:—Cape of Good Hope, 277,113; * Natal, 35,284; Transvaal, 110,450; Orange Free State, 49,647.

On 25 Dec., 1947, the Union formally took possession of Prince Edward Island and, on 30 Dec., of Marion Island, about 1,200 miles south-east of Capetown.

The census taken in 1904 in each of the four colonies was the first simultaneous census taken in South Africa. In 1911 the first Union census was taken.

The following tables give the returns of population at the various censuses classified according to race and sex:—

Year	All races			European		Non-European	
	Total	European	Non-European	Males	Females	Males	Females
1904	5,175,824	1,116,806	4,059,018	635,117	481,689	2,047,118	2,011,900
1911	5,973,394	1,276,242	4,697,152	685,164	591,078	2,384,228	2,312,924
1921	6,928,580	1,519,488	5,409,092	782,035	737,453	2,754,957	2,654,135
1926	—	1,677,322	—	857,393	819,929	—	—
1931	—	1,828,175	—	930,541	897,634	—	—
1936	9,589,898	2,003,857	7,586,041	1,017,874	985,983	3,819,233	3,766,808
1941	—	2,192,181	—	1,109,291	1,082,890	—	—
1946	11,418,349	2,372,690	9,045,659	1,194,626	1,178,064	4,612,018	4,433,641

The 1926, 1931 and 1941 population census were quinquennial ones of Europeans only.

[1] Includes Walvis Bay (374 square miles), which is an integral part of the Cape Province but is administered under Act No 24 of 1922 by South-West Africa.

Of the non-European population in 1946, 7,831,915 were Bantu, 285,260 Asiatic and 928,484 of other races.

The increase, 1936–46, in the total population in the Union was 19·1%; in the European population, 18·4%.

Principal towns (including suburbs) in the Union classified according to the number of inhabitants of European race, 1936, 1941 and 1946:—

Town	Province	1936	1941	1946
Johannesburg	Transvaal	260,747	285,819	332,026
Cape Town	Cape	173,412	187,946	220,393
Durban	Natal	96,804	115,032	130,143
Pretoria	Transvaal	78,028	114,125	130,810
Port Elizabeth	Cape	53,461	58,256	65,271
Germiston	Transvaal	34,391	42,854	52,609
East London	Cape	31,311	34,834	40,118
Bloemfontein	Orange Free State	30,291	33,264	38,262

Boksburg	Transvaal	15,916	17,848	20,527
Kimberley	Cape	15,914	17,018	19,067

Migration.—1947 gross figures (excluding 'In transit'):—European, arrivals, 142,720; 1948, 166,999; 1949, 163,366; departures, 112,706; 1948, 133,544; 1949, 164,206. Non-European (1949), arrivals, 4,152; departures, 5,403.

Vital Statistics.—The following table gives the total numbers of marriages, births and deaths registered in the Union for recent years for all races: —

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1944	61,253	21,457	23,069	80,055	70,452	29.738
1945	59,489	21,761	24,071	84,985	68,656	31,125
1946	61,060	20,595	28,308	87,839	64,154	31,537
1947	66,301	21,010	26,691	92,588	63,403	30,224
1948	66,477	22,417	27,917	105,720	69,839	33,797

[1] Partial registration only.

Unifying Act No. 17 of 1923, which came into effect as from 1 Jan., 1921, abolished compulsory registration of native vital events in rural areas, but made registration compulsory in all urban areas throughout the Union. The figures for non-Europeans must therefore be regarded as merely recording registrations, and not the total number of actual events.

Religion.

The results of the census of 1946 as regards religious denominations are as follows:—Europeans: Dutch Churches, 1,285,195; [illegible] 383,243; Presbyterians, 87,905; Congregationalists, 13,084; [illegible], 169,634; Lutherans, 22,909; Roman Catholics, 92,453; Baptists, 23,497; Jews, 103,435; Christian Scientists, 7,250; Apostolic Faith, Mission Church, 31,765; other Christian sects, 50,626; others, 16,701. Non-Europeans: Dutch Churches, 379,541; Anglicans, 573,197; Presbyterians, 114,291; Independents [illegible] 143,780; Methodists, 877,869; various Christian Sects, [illegible] ns, 366,922; Roman Catholics, 273,773; Native Separatist Churches, 1,089,479; Hindus, 160,117; Buddhists and Confucians, 3,671; Mohammedans, 79,088; no religion, 3,349,977; others and unspecified, 45,670; total, 7,586,041. There were 144 members of the Society of Friends in 1949.

Education.

The Union Department of Education administers technical colleges under Act No. 30 of 1923; reformatories and schools of industry under the Children's Act, No. 31 of 1937, and technical, housecraft and commercial high schools under the Vocational Education and Special Schools Act, No. 29 of 1928. State-aided special schools for the deaf, the blind and epileptics are also administered under the Act of 1928. By Act No. 30 of 1937, agricultural schools were transferred to the Provincial Administrations. Special schools for certain educable, subnormal and defective children are administered under the Children's Act. Ineducable mentally defective children are cared for in institutions administered by the Commissioner for Mental Hygiene under the Department of Health.

Higher Education.—There are 7 universities in the Union:—(1) The University of South Africa, founded in 1918, with its seat in Pretoria, is

a federal university which now caters mainly for external students. (2) The University of Cape Town, founded in 1918. (3) The University of Stellenbosch, founded in 1918. (4) The University of Witwatersrand, founded in 1922, Johannesburg. (5) The University of Pretoria, founded in 1930. (6) Natal University, founded in 1948, Pietermaritzburg and Durban. (7) University of the Orange Free State, Bloemfontein.

Rhodes University College, Grahamstown, and Potchefstroom University College, Potchefstroom, both constituent colleges of the University of South Africa, will attain University status in 1951.

The following are statistics concerning universities and colleges in 1948:—

University or college	Current (incl. capital) expenditure £	Number of full time professors	Number of lecturers and assistants[2]		Average number of students		
			Full time	Part time	Full time	Part time	Total
Cape Town . .	518,953	49	165	198	3,645	378	4,023
Stellenbosch . .	250,109[1]	58	208	27	2,263	—	2,263[3]
Witwatersrand .	686,319	38	214	179	4,066	967	5,033
Pretoria. . .	293,591[1]	47	70	145	3,250	72	3,322[3]
South Africa . .	83,023	—	—	—	—	—	—
Constituent colleges of University of South Africa:							
Bloemfontein .	85,096	24	22	27	1,174	9	1,183
Huguenot, Wellington . . .	15,398	5	9	4	121	3	124
Rhodes, Grahamstown . . .	229,024	23	59	14	953	6	959
Natal, Pietermaritzburg . .	282,658	26	148	15	1,017	938	1,955
Potchefstroom .	91,820	17	37	15	821	45	866
Total . .	2,535,991	287	932	654	17,310	2,418	19,728

[1] Does not include expenditure on the faculty of agriculture.
[2] Includes students in the faculties of agriculture and veterinary science.
[3] Includes part-time professors, but does not include farm and library assistants.

State and State-aided Education, other than Higher Education.—Subject to final control by the provincial administration, the central direction of public education in each province is exercised by the provincial education department.

Statistics of primary and secondary education:—

Year	Number of schools		Number of scholars		Number of teachers	Expenditure (excluding capital expenditure and loan charges).
	For European scholars	For non-European scholars	European	Non-European		
						£
1943	3,383	5,551	399,024	731,548	35,669	12,301,315
1944	3,280	5,654	398,943	760,141	35,753	15,395,464
1945	2,966	5,710	404,878	800,870	36,898	17,736,380
1946	2,851	6,030	413,884	864,410	38,194	19,654,452
1947	2,959	6,151	422,241	903,072	39,435	22,746,332

In 1949, there were 452 cinemas with a seating capacity of 230,000.

Social Welfare.

Social Security.—The social security measures administered by the Department of Social Welfare include the Disability Grants Act No. 36 of 1946, and maintenance grants and family allowances in terms of the Children's Act No. 31 of 1937.

Social Rehabilitation.—Social rehabilitation measures as applied by the Social Welfare Department include work colonies; Work Corps for Europeans; settlements for the unfit, semi-fit and aged; readjustment services, including sheltered employment projects and the subsidization of workshops and hostels for the blind; grants to societies caring for inebriates, epileptics and the deaf; the subsidization of social centres; adults probation services.

Voluntary Organizations and Social Welfare.—The Department is subsidizing over 200 trained social workers attached to voluntary welfare agencies. Departmental subsidies also include social centres and central registers. In terms of the Welfare Organizations Act No. 40 of 1947, a National Welfare Organizations Board has been established which renders advice to the Minister of Social Welfare as regards any matter in the field of social welfare, and is also entrusted with the responsibility of registering welfare [illegible] The Act *inter alia* aims to prevent the mal-administration of [illegible] which receive financial assistance from the State, local [illegible] the public. It also prohibits any person collecting contributions from the public without proper authority.

Child Welfare.—In the field of child welfare, the Department is concerned with the protection of infants; adoptions; subsidization of creches and boys' and girls' clubs; the care of children declared by the Children's Courts to be children in need of care; the supervision of juvenile offenders dealt with by juvenile courts; juvenile probation services. Places of safety and detention are run as state institutions under the control of the Department or are administered by voluntary agencies with 100% subsidy from the Department. In addition, the Department administers children's institutions of its own and also assists voluntary agencies financially in the running of institutions certified under the Children's Act. These latter institutions totalled 192 in 1948.

Housing.—The Department, through its Rent Control Board at Pretoria, and rent boards throughout the Union, administers the Rents Act No. 43 of 1950. The Department also provides subsidies for the erection and maintenance of workers' hostels and homes for the aged.

Poor Relief.—The Department distributes poor relief in the Union. This service is rendered by the Department's own welfare officers in certain centres, while in other areas benevolent societies, local authorities or magistrates act as the Department's agents.

Other poor relief measures administered by the Department include the distribution of blankets; the subsidization of communal restaurants; soup kitchens for pre-school children.

General.—Other Departmental activities include welfare services to merchant seamen and fishermen; the subsidization of legal aid bureaux; the control of coloured mission stations and communal reserves; survey work and research projects in the field of social welfare.

Old Age Pensions.—Provision for the payment of old age pensions is made under Act No. 22 of 1928, as amended by Acts Nos. 34 of 1931, 31 of 1937, 33 of 1943, 48 of 1944, 43 of 1946 and 41 of 1948.

The Act as amended applies to white (European), coloured, Indian and native persons of 65 years of age and over in the case of a man, and 60 years of age and over in the case of a woman, domiciled and resident in the Union, with means not exceeding a prescribed amount. The maximum amounts of pension payable are £72 per annum to a white person, £36 per annum to a coloured person, £30 per annum to an Indian person, £12 per annum to a native.

The administration of the Act is undertaken by the Commissioner of Pensions in the case of white, coloured and Indian applicants, and by the Secretary of Native Affairs in the case of native applicants.

On 1 October, 1948, the number of white pensioners was 66,956, who received £4,206,180: the number of coloured 33,405, receiving £840,198, and the number of Indians 5,008, receiving £115,860.

Justice.

The common law of the Union is the Roman-Dutch law—that is, the uncodified law of Holland as it was at the date of the cession of the Cape in 1806. The law of England as such is not recognized as authoritative, though by statute the principles of English law relating to evidence and to mercantile matters, *e.g.*, companies, patents, trademarks, insolvency and the like, have been introduced. In shipping and insurance, English law is followed in the Cape Province, and it has also largely influenced civil and criminal procedure throughout the Union. In all other matters, family relations, property, succession, contract, etc., Roman-Dutch law rules, English decisions being valued only so far as they agree therewith. The common law governing the prerogatives of the Crown is ' with certain divergencies ' the same as in England, but has been varied by statute.

The supreme court consists of an appellate division with a chief justice and five judges of appeal. In each province of the Union there is a provincial division of the supreme court possessing both original and appellate jurisdiction; while in the Cape there are, in addition to the provincial division, 2 local divisions, with original and appellate jursidiction, and in the Transvaal one, exercising the same original jurisdiction within limited areas as the provincial divisions, but with no appellate jurisdiction. The judges hold office till they attain the age of 70 years. No judge can be removed from office except by resolution of Parliament. The circuit system is fully developed. In Natal there is a native high court; 3 Union native appeal courts and 3 native divorce courts were established in 1927, 1929 and 1948. All of these courts have jurisdiction, to some extent concurrent with and in certain respects exclusive of that of the supreme court in cases in which natives are parties.

Each province is further divided into districts with a magistrate's court having a prescribed civil and criminal jurisdiction. From this court there is an appeal to the provincial and the Cape local divisions of the supreme court, and thence to the appellate division. A distinctive feature of the criminal system is that magistrates' convictions carrying sentences above a prescribed limit are subject to automatic review by a judge.

Courts of native commissioners have been constituted in defined areas to hear all civil cases and matters between natives and natives only. An appeal lies to the native appeal court, whose decision is final, unless the court consents to an appeal to the appellate division of the supreme court on a point stated by the court itself. Criminal jurisdiction corresponding to the criminal jurisdiction of magistrates' courts may be conferred upon courts

of native commissioners, while a very limited civil and criminal jurisdiction may be conferred upon the native chief over his own tribe.

Persons convicted, all courts, 1943:—Males, 592,182; females, 133,157; total, 725,339; in 1944: males, 605,633; females, 135,931; total, 741,564. There were 182 penal establishments with 158,902 prisoners in 1945.

Finance.

Prior to 1913–14 the expenditure of the 4 provinces was entirely met from grants by the Union Government. Since then various Financial Relations Acts have been passed defining the conditions upon which subsidies shall be granted to the provinces, assigning and transferring to them certain revenues and limiting their powers of taxation. Act No. 38 of 1945 provides that a subsidy equal to 50% of the net, normal or recurrent expenditure of a province in each year is payable.

Revenue and expenditure of the Union (excluding Railways and Harbours Administration) in £ sterling:—

	1945–46	1946–47	1947–48	1948–49	1949–50	1950–51[1]
Revenue .	136,133,094	140,014,917	132,814,331	146,800,336	152,198,988	156,354,000
Expenditure.	133,539,232	133,238,939	124,698,212	140,817,183	151,118,922	158,531,533

[1] Estimates.

The following figures show details of the ordinary revenue and expenditure of the Union Government for 3 years, ending March 31, in £'000:—

Revenue	1947–48	1948–49	1949–50	Expenditure	1947–48	1948–49	1949–50
Customs . .	22,540	24,508	14,689	Governor-General and Parliament	305	297	347

Totals (including all items)	132,814	146,800	152,199	Totals (including all items) .	124,698	140,817	151,119

Public debt on 31 March, 1950, £734,700,970, of which £617,605,784 was permanent debt, and the net debt £715,742,151. Internal debt, £704,710,319.

Defence.

[illegible] prescribed in the South Africa Defence Act (No. 13 o[illegible] Act No. 22 of 1922 and Act No. 32 of 1932. Every citizen of European descent who attains the age of 17 years will register himself in January of that year, to render in time of war personal service in defence of the country, in any part of South Africa within or without the Union. Further every citizen of sound physique between his 17th and his 29th year (both included), is liable to undergo a course of peace training for a period of 4 years. All employers are bound by law to afford their employees facilities for this training, without in any way prejudicing their employment. All citizens not accepted for training will, on attaining the age of 21 years, engage for service in Rifle Commandos. The liability of non-Europeans to service may be determined by Parliament.

A secretariat and a military headquarters staff administer the Permanent Force, the Active Citizen Forces, the Rifle Commandos and the school cadet organization.

The Union has been divided into 8 Commands and 2 Air Force Groups as follows:—Cape Command, Natal Command, Northern Command, Witwatersrand Command, Western Transvaal Command, Central Command, EP and B Command, S.W.A. Command; 1 Group, S.A. Air Force, 2 Group, S.A. Air Force.

The South African Naval Forces are administered by a headquarters staff at Cape Town under the Minister of Defence and the Director-General of Naval Forces, an officer of the rank of Commodore. The Naval Forces include 1 destroyer (*Jan van Riebeeck*, ex-H.M.S. *Wessex*), 3 frigates, 2 fleet minesweepers, 1 surveying vessel, 2 boom defence vessels, a controlled minelayer and 11 motor launches. Naval personnel number 888 officers and ratings.

Production and Industry.

Agriculture.—The number of farms in 1949 was 117,242, with an area of 214,777,497 acres. The production of principal crops by Europeans on occupied farms, for years from 1 Sept. to 31 Aug., is shown in the following table (in 1,000 lb.):—

Year	Wheat	Barley	Oats	Mealies	Potatoes	Kaffir corn
1945-46 .	608,693	69,100	169,861	2,719,430	585,633	70,112
1946-47 .	964,073	57,171	191,453	3,784,256	748,547	107,300
1947-48 .	1,076,886	81,367	271,333	5,101,554	556,672	264,949
1948-49 .	1,065,188	65,568	180,341	3,381,779	474,301	111,752

Natives, in 1948–49, produced 410,840,200 lb. of mealies on European-occupied farms, and 409,163,800 lb. in rural reserves.

The European production of other products:—Tobacco, 1948–49, 45,552,000 lb.; tea, 1946–47, green leaf, 2,976,917 lb.; manufactured tea, 715,657 lb.; sugar cane, 1947–48, 4,172,915 tons; 1948–49, 4,612,243 tons.

Citrus fruit exports, 1950, totalled 4,612,185 cases (1949, 3,845,734).

In 1949 the livestock in the Union was as follows :—12,241,925 cattle; 31,907,749 sheep; 5,528,820 goats; on European farms there were 761,481 pigs; (1947) 346,594 horses; 100,261 mules; 375,097 donkeys.

The production of wool during the 1948–49 season was 214,023,836 lb.; 1949–50, 217,532,042 lb. During the calendar year 1949 the production of factory butter was 46,466,230 lb.; of factory cheese, 17,132,298 lb.

Cotton-growing is now undertaken by many farmers, the plant being found a better drought resistant than either tobacco or maize. Yield in 1949, 5,600 bales.

On 31 March, 1948, the forest reserve areas comprised 3,527,000 acres.

Irrigation.—Technical and financial assistance is given by the state under the Union Irrigation Law of 1912, which was designed to encourage irrigation. The Government expenditure on irrigation in 1947–48 was £1,451,828 and £717,437 from revenue.

Manufactures.—The industrial census in the Union for 1947–48 gives the value added by process of manufacture, etc., as £272,659,060, and the value of the gross production of the industries covered as £582,899,521. The total number of factories which made returns was 13,653. Value of land and buildings, £104,435,776; machinery, plant and tools, £141,447,126, and cost of fuel, light and power, £12,959,584. Average number of males employed, 543,471 (Europeans, 171,979) and of females, 68,571 (Europeans, 38,460). Wages paid, £140,180,137. The net value of the output of the principal groups of industries was :—Food, drink, etc., £37,758,386; metals, engineering, etc., £63,052,764; chemicals, etc., £17,196,999; heat, light and power, £4,749,302; building, etc., £23,069,756; clothing, textiles, etc., £24,501,262; books, printing, etc., £16,774,953; leather, etc., £6,718,386; stone, clay, etc., £12,327,548; vehicles, etc., £16,877,069; furniture, etc., £6,906,555.

Mining.—The table hereunder gives the total value of the principal minerals produced in the Union to 31 Dec., 1949. The value of gold is calculated at £4·24773 per fine oz. up to 1919, when the gold premium came into effect, as from 24 July, and from 1925 onwards when the gold premium ceased to operate. The whole of the gold production of 1933 to 1939 was sold at a premium; the premium for 1939 amounted to £58,324,870. Copper, tin, antimony, scheelite and silver are valued on the estimated pure metal contained in shipments according to the average current prices in London. The value of other base minerals is calculated on average local prices.

The value (£ sterling) of the principal minerals produced to 1949 was :—

Classification	Cape of Good Hope	Natal	Transvaal	Orange Free State	Union
Gold [1]	39,507	96,589	2,844,369,270	27,148	2,844,532,514
Diamonds	280,928,092	—	65 751,231	33,623,087	380,302,410
Coal	2,062.094	68,586,609	112.674,599	15,104,100	198,427,402
Copper	31,108,961	389	17,542,688	—	48 652,038
Tin	72,833	—	9,492,276	—	9,565,109
Asbestos	4,871,962	10.900	10,445,252	—	15.328,114
Manganese	10,631,754	549	38,825	—	10,671,128

[1] Including premium.

Total value of the mineral production of the Union in £ sterling:—

	1945	1946	1947	1948	1949

[1] Gold at standard value.

The silver output in 1949 was 1,159,375 fine oz.; diamonds, 1,494,527 metric carats. Gold output in 1949 was 11,705,048 fine oz.; 1948, 11,584,849 fine oz. Coal output was 27·6 million tons in 1949; 26 million tons in 1948. Manganese production, 1949, was 644,831 long tons (1948, 272,029 long tons). Asbestos output, 1949, was 70,917 short tons (1948, 45,722 short tons).

Value of output, 1949, of copper was £3,680,004 (1948, £3,114,645); asbestos, £2,763,964 (£1,244,225); manganese ore, £2,409,108 (£952,497); platinum, £1,343,589 (£891,284).

Commerce.

The total value of the imports and exports of the Union of South Africa, exclusive of specie and gold bullion, was as follows (in £ sterling):—

Yearly average	Imports	Exports	Year	Imports	Exports
1930–34	52,658,362	26,651,321	1945	112,361,608	77,473,500
1935–39	90,312,565	31,521,253	1946	215,112,899	97,660,959
1940–44	110,720,451	49,308,235	1949	314,579,015	153,624,896

The principal articles of import and export (in £ sterling) were:—

Imports	1945	1946	Exports	1945	1946
Food and drink	11,515,751	27,088,950	Fruits and nuts	4,850,766	4,909,175
Tobacco	471,611	1,418,328	Sugar	1,366,010	416,228
Oil seeds	2,900,859	3,405,663	Beverages	2,240,642	2,110,126
Chemicals	6,632,295	9,050,932	Tobacco	1,053,791	472,518
Rubber	2,262,644	1,887,363	Chemicals	8,447,420	4,666,643

Imports	1945	1946	Exports	1945	1946
Wood, sawn	2,423,348	5,855,252	Footwear	2,513,266	2,936,892
Leather	2,311,103	2,753,174	Wool	10,693,964	30,487,852
Yarns and thread	2,743,747	3,246,679	Rubber	2,692,582	1,761,811
Artificial textile fabrics	4,088,655	7,311,178	Coal	3,517,225	4,359,174
Wool fabrics	3,778,274	6,347,357	Asbestos	1,095,330	1,256,160
Cotton fabrics	11,639,089	12,348,294	Diamonds, uncut	5,950,724	6,107,776
Flax, hemp and jute fabrics	1,249,014	2,597,296	Diamonds, cut	4,789,002	5,959,192
Clothing	7,406,828	18,165,936	Base metals	6,025,183	5,873,878
Bags and sacks	1,556,915	1,093,811	Machinery	1,680,726	1,200,963
Motor spirit	2,564,214	3,582,709			
Lubricating oil	1,129,795	1,862,313			
Non-metallic minerals	2,031,375	4,684,675			
Jewellery	250,381	3,174,738			
Base metals	7,746,550	9,538,578			
Machinery	7,731,939	15,552,084			
Electrical apparatus	3,821,914	8,683,686			
Vehicles	7,671,884	20,245,915			

In 1948, the exports of chrome ore totalled 332,869 short tons (1949, 343,768 short tons), of which 276,523 (232,727) went to U.S.A.; of asbestos, 38,550 short tons, of which 15,674 went to U.S.A. (1949: 63,428; 27,571 to U.S.A.); of manganese, 318,283 long tons, of which 176,000 went to U.S.A. (1949: 763,662 short tons, of which 418,033 to U.S.A.); coal (1949), 2,698,454 short tons.

The distribution of imports into and exports from the Union was mainly as follows (in million £):—

Country	Imports (including government stores)				Exports (S.A. produce)			
	1944	1945	1948	1949	1944	1945	1948	1949
United Kingdom	29·7	37·3	118·3	131·6	17·7	17·1	31·7	34·4
Rest of Commonwealth	27·0	24·6	42·0	43·4	24·4	25·2	22·0	21·7
United States of America	26·9	31·1	122·7	81·1	5·5	10·2	8·2	10·1
Argentina	4·4	3·5	—	—	0·5	0·6	—	—
Belgian Congo	3·4	2·2	4·4	4·9	1·0	0·9	1·2	1·4
Brazil	3·7	4·6	—	—	0·5	0 6	—	—
Egypt	0·2	0·3	0·1	0·7	15·8	5·7	3·2	5·3
Italy	—	—	3·4	1·8	1·3	2·0	5·0	5·8
Moçambique	1·1	1·6	—	—	0·6	0·7	—	—
Persia	2·9	2·6	6·8	7·3	—	—	—	—

The following figures (in £ sterling) are from the British Board of Trade returns:—

	1938	1947	1948	1949	1950
Imports into U.K.	14,629,726	26,257,190	31,679,683	33,444,281	51,918,393
Exports to Union	39,493,503	91,836,832	120,291,241	124,697,569	120,655,890
Re-exports	635,076	335,903	476,502	453,496	808,516

Communications.

Railways.—With the formation of the Union in 1910, the state-owned lines in the 4 provinces were amalgamated into one centrally controlled state undertaking—the South African Railways and Harbours Administration—which also took over the control of the harbours of the country.

Government-owned lines operated by the administration at 31 March, 1950, totalled 13,329 miles, distributed as follows:—Cape 5,253, Transvaal 3,400, Orange Free State 1,660, Natal 1,553, South West Africa 1,463, of which 12,536 miles were 3 ft. 6 in. gauge and 793 miles 2 ft. gauge. 613 miles of private railways are also operated by the administration. Passenger journeys, 1949–50, 255,775,851; goods and mineral traffic, 57,941,315 tons.

Roads.—The administration also operated road motor services over a route mileage of over 25,000 in 1949–50; during that year 13,798,560 passengers were conveyed and 1,754,523 tons of goods were carried.

Motor vehicles in operation on 1 Jan., 1949, included 413,766 passenger cars, 110,086 trucks, 4,004 buses, and 23,507 motor cycles.

Ports.—The 4 main ports are Durban, Capetown, Port Elizabeth and East London. In 1949–50, a total of 9,354 vessels of 23,077,503 tons net were handled at these ports.

Aviation.—An efficient internal airways system is operated by the South African Airways which is an integral part of the Railways and Harbours Administration. Regional services are operated to Lourenço Marques, East Africa, and in conjunction with Central African Airways, to the Rhodesias. Trunk services are operated to Israel and the United Kingdom. The latter service operated jointly by South African Airways and the British Overseas Airways Corporation is known as the Springbok Service. South African Airways uses Constellation aircraft to provide a fast through service to London following the route Johannesburg–Nairobi–Khartoum–Rome–London. B.O.A.C. uses Hermes aircraft and operate over the west route Johannesburg–Livingstone–Leopoldville–Kano–Tripoli–London.

During 1949, 127,805 passengers were carried by South African Airways while 131,893,350 [illegible] were flown. 435,096 freight ton miles and 2,332,599 [illegible] were flown during the same period.

First-class mail throughout the Union and adjoining territories and to and from overseas countries is conveyed by air.

The total capital expenditure on railways, harbours, steamships, airways and aerodromes at 31 March, 1950, amounted to £302,316,953. During the year the total revenue (all services) was £94,545,887, to which the railways contributed £85,195,043. Total expenditure (all services) amounted to £97,841,507 (£89,612,806 net on railways).

Post.—At the end of 1949–50 there were in the Union 3,464 post and 3,586 telegraph offices. Telephone and telegraph circuit mileage, 490,000. The cash revenue of the Department of Posts, Telegraphs and Telephones, 1949–50, was £13,674,570; expenditure, £12,066,770. The revenue included £1,706,853 from the telegraph service and £6,568,434 from the telephone service.

There were 415,518 telephone instruments and 415,518 subscribers; 1,811 exchanges and 9,689 public call offices, including the telephones and exchanges owned by the Durban Corporation. On 1 Feb., 1932, the telephone systems of Great Britain and the Union of South Africa were linked together by means of the 'Beam' radio system of Cable and Wireless, Ltd. Service, suspended on 15 Sept., 1939, was reopened on 1 Dec., 1945.

In addition, the following radio-telephone services were introduced in 1946–50:—*Via Great Britain* to Atlantic liners, Australia, Barbados, Belgium, Canada, Ceylon, Czechoslovakia, Cuba, Denmark, Egypt, Eire, Finland, France, Germany, Gibraltar, India, Italy, Luxemburg, Mexico, Netherlands, Norway, Pakistan, Spain, Sweden, Switzerland, United States of America; direct to Kenya, Uganda, Tanganyika, Belgian Congo. On 14 Nov., 1949, the service to the United States of America *via* Great Britain was suspended and replaced by a direct service.

Banks.

Statistics of the South African Reserve Bank [1] are as follows:—

	4 Feb., 1949	24 Feb., 1950	22 Dec., 1950
	£	£	£
Subscribed capital	1,000,000	1,000,000	1,000,000
Paid-up capital	1,000,000	1,000,000	1,000,000
Reserve fund	2,157,056	2,245,589	2,335,264
Notes in circulation	61,326,871	62,470,925	73,874,534
Deposit and current accounts	99,504,896	87,497,634	110,790,103
Coin and bullion	45,763,763	52,142,211	67,925,965
Securities (Government and other)	5,839,522	27,370,991	20,467,658
Loans and advances	95,464,658	10,509,000	6,031,146
Bills discounted	19,916,122	68,646,949	91,042,638

[1] In Dec., 1920, under the South African Currency and Banking Act, 1920, a Central Reserve Bank was established at Pretoria. It commenced operations in June, 1921, and began to issue notes in April, 1922. Liability for the outstanding notes of the commercial banks was transferred to it on 30 June, 1924, and amounted to £150,666 on 20 Oct., 1950. A branch was opened in Johannesburg on 1 Sept., 1925, and further branches at Cape Town, Durban, Port Elizabeth, East London, Bloemfontein and Pietermaritzburg subsequently.

Ratio of gold reserves to liabilities to the public was 75·7% on 22 Dec., 1950.

The total assets and liabilities of the institutions seeking registration as commercial banks on 30 Sept., 1950, amounted to £691,538,829.

The number of depositors in the Government Savings Bank in the Union at the end of Sept., 1950, was 2,148,135 and the amount standing to their credit £80,932,091.

Money, Weights and Measures.

Act No. 31 of 1922 provided for the issue of a Union coinage with denominations identical with those of British coins, which remained in circulation as legal tender until 15 Jan., 1933, when they were withdrawn. On 1 July, 1941, by Act No. 16 of 1941, a South African Mint was set up for the Union.

The Schedule to Act No. 31 of 1922 was amended by Act No. 57 of 1946, permitting the coining of crowns (5*s.* pieces). Union of South Africa silver coins of 5*s.*, 2*s.* 6*d.*, 2*s.*, 1*s.*, 6*d.*, 3*d.*, and bronze coins of 1*d.*, ½*d.*, ¼*d.*, are being coined and are in circulation. Gold coinage was in circulation until 21 Dec., 1932, on which date the Union suspended gold payments.

Weights and Measures.—The Weights and Measures Act, 1922, which came into effect on 1 April, 1923, established standard weights and measures throughout the Union and embodied the principle of optional use of the metric system, subject to provisions contained in the Act; it prescribes the denominations, and multiples thereof, of weight and measure which may be used in trade in the Union of South Africa. The original Act of 1922 was amended by Act No. 13 of 1933 and Act No. 8 of 1940.

Regulations issued under the Act prescribe the manner and frequency of assizing of trade weighing and measuring instruments, as well as controlling the sale of goods and fixing standard quantities for commodities in general use.

Books of Reference.

STATISTICAL INFORMATION.—The Office of Census and Statistics (Schoeman St., Pretoria) was established in 1911 as a Division of the Department of the Interior. Its activities [illegible]. Main publications:—

Official Year Book of the Union of South Africa and of Basutoland, Bechuanaland Protectorate and Swaziland. From 1918 (preceded by the Statistical Year Book, 1913–17). Vol. 24, 1948.

Statistics of Production: Industrial. Annual, from 1915/16 (but suspended from 1929/30 to 1931/32 and from 1938 to 1942).

Statistics of Production: Agricultural. Annual, from 1917/18 (but suspended from 1929/30 to 1931/32 and from 1939 to 1946).

Monthly Bulletin of Statistics.

Trade and Shipping of the Union of South Africa. Quarterly and annually.

PROVINCE OF THE CAPE OF GOOD HOPE.

(KAAPLAND.)

Constitution and Government.—The colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Britain took possession of it in 1795 but evacuated it in 1803. A British force again took possession in 1806 and it was formally ceded to Great Britain by the Convention of London, 13 Aug., 1814. Letters patent issued in 1850 declared that in the colony there should be a Parliament which should consist of the

Governor, a legislative council and a House of Assembly. On 31 May, 1910, the colony was merged in the Union of South Africa, thereafter forming an original province of the Union.

At the provincial council election on 9 March, 1949, the following parties were returned:—United Party, 28; Nationalists, 26; Labour Party, 1; Native Representatives, 2.

Cape Town is the seat of the provincial administration.

Administrator.—Hon. J. G. Carinus (appointed July, 1946; salary £2,750).

The province is divided into 132 magisterial districts, and the province proper, including Bechuanaland, but exclusive of the Transkeian territories (with the exception of the districts of Mount Currie and Matatiele, where there are also divisional council divisions), into 95 divisional council divisions. This figure includes the two divisions in the Transkei, viz. Mount Currie and Matatiele. Each division has a council of at least 6 members (14 in the Cape Division) elected quinquennially by the owners or occupiers of immovable property. The duties devolving upon divisional councils include the construction and maintenance of roads and bridges, local rating, vehicle taxation and preservation of public health.

There are 144 municipalities, each governed by a mayor and councillors, a certain number of whom are elected annually by the ratepayers. There are also 89 village management boards and 19 local boards.

Area and Population.—The following table gives the population of the Cape of Good Hope [1] at the last seven censuses:—

Census year	All races			European		Non-European	
	Total	Males	Females	Males	Females	Males	Females
1918	—	—	—	311,312	307,513	—	—
1921	2,782,719	1,348,589	1,434,130	329,394	321,215	1,019,195	1,112,915
1926	—	—	—	358,058	348,741	—	—
1931	—	—	—	378,046	371,185	—	—
1936	3,529,900	1,664,408	1,865,492	396,375	395,199	1,268,033	1,470,293
1941	—	—	—	413,136	412,534	—	—
1946 [2]	4,016,801	1,903,764	2,113,037	428,085	431,526	1,475,679	1,681,151

[1] Including Walvis Bay. [2] Preliminary figures.

The increase in the total population, 1936–46, was 13·8%.

Of the non-European population in 1946, 16,901 were Asiatics, 2,327,099 were Bantu and 813,190 were of mixed and other races. The great majority are engaged in agricultural or domestic employments.

Chief towns:—The census figures for the European population in 1946, are:—Cape Town, 214,201; Port Elizabeth, 64,745; East London, 39,646; Kimberley, 18,915; Uitenhage, 11,015; Paarl, 10,935; Grahamstown, 8,900; Oudtshoorn, 8,174; Queenstown, 8,136; Stellenbosch, 7,474; George, 7,300; Worcester, 7,277; King William's Town, 6,165.

Vital statistics are shown as follows:—

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1942	19,422	8,540	7,911	45,039	33,105	14,215
1943	20,169	8,311	8,246	45,407	31,733	13,890
1944	20,540	8,356	7,962	46,538	34,208	13,725
1945	20,847	8,485	8,245	48,272	32,965	14,330

[1] Partial registration.

Religion.—In 1936 (Europeans) there were 758,944 Christians—459,113 members of Dutch Churches, 139,858 Anglicans, 24,755 Presbyterians, 4,952 Congregationalists, 50,784 Methodists, 10,925 Lutherans, 33,434 Roman Catholics, 11,211 Baptists and 23,912 other Christian sects. Jews 28,163, others 4,467. Non-Europeans: Dutch Churches, 224,549; Anglicans, 300,879; Presbyterians, 77,281; Methodists, 442,413; Lutherans, 81,016; Roman Catholics, 67,226; Congregationalists, 115,079; other Christian sects, 48,115; Native Separatist Churches, 240,654; Buddhists, 59; Confucians, 557; Hindus, 3,079; Moslems, 36,472; no religion, 1,090,236 [1]; others and unspecified, 10,711; total, 2,738,326.

Education.—Local school administration is conducted by school boards and school committees, the unit of administration being the school district. Each school district is under the control of a school board, a portion of the members being elected by the ratepayers and a portion nominated partly by the provincial administration and partly by the local authorities. Education is compulsory for European children and under certain conditions for coloured children.

In June, 1950, there were 1,278 schools for European scholars, and in addition 8 institutions for the training of teachers. There were 167,602 European pupils, mostly under school boards, and a total of 7,309 teachers. There were 3,395 schools for non-European scholars, of which 16 were industrial schools and 23 training institutions for teachers. Altogether, there were 12,076 teachers in non-European schools and a total of 457,350 pupils, mostly under churches and missionary bodies.

Finance.—Since the coming into effect of the Union there is one financial statement for the four provinces together, particulars of which are given above under the Union. Since the passing of the Financial Relations Act, 1913, the provincial revenue consists of certain revenues assigned to the province (not included in the Union summary referred to above) and an amount voted by Parliament by way of subsidy. The following figures show the provincial revenue and expenditure:—

	1944–45	1945–46	1946–47	1947–48	1948–49
Revenue:—	£	£	£	£	£
Provincial collections	4,420,538	4,131,400	4,653,076	6,816,130	7,998,139
Union government subsidies:					
Ordinary	2,939,504	4,850,000	5,505,360	5,908,330	6,921,815
Special	—	150,000	150,000	150,000	150,000
In lieu of professional licences	26,325	—	—	—	—
In respect of rural libraries	300	—	—	—	—
National school feeding scheme	240,000	—	—	—	—
Grants:

PROVINCE OF NATAL.

Constitution and Government.—Natal was annexed to Cape Colony in 1844, placed under separate government in 1845, and under charter of 15 July, 1856, erected into a separate colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council, 26 June, 1893, the colony obtained responsible government. The province of Zululand was annexed to Natal on 30 Dec., 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were annexed in Jan., 1903. On 31 May, 1910, the colony was merged in the Union of South Africa, becoming an original province of the Union.

The seat of provincial government in Natal is Pietermaritzburg.

At the provincial council elections on 9 March, 1949, there were returned:—United Party, 22; Nationalists, 2; Independent, 1.

Administrator.—The Hon. D. G. Shepstone (appointed Feb., 1948; salary, £2,250).

Area and Population.—The province (including Zululand, 10,427 square miles) has an area of 35,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The province is divided into 45 magisterial districts.

The returns of the total population at the last 7 censuses were:—

Census year	All races			European		Non-European	
	Total	Males	Females	Males	Females	Males	Females
1918	—	—	—	62,745	59,186	—	—
1921	1,429,398	707,600	721,798	70,477	66,361	637,123	655,437

1945	4,856	2,366	2,316	17,809	11,419	6,258

[1] Partial registration.

Religion.—Statistics of 1936 census for religion in Natal :—Europeans Dutch Churches, 37,763; Anglicans, 68,790; Presbyterians, 16,787; Methodists, 21,562; Roman Catholics, 16,199; Lutherans, 6,048; Congregationalists, 4,106; other Christians, 13,049; Jews, 3,736; others, 2,509; total, 190,549. Non-Europeans: Dutch Churches, 7,471; Anglicans, 83,617; Presbyterians, 12,820; Methodists, 113,340; Lutherans, 69,302; Roman Catholics, 112,858; Congregationalists, 14,338; other Christian sects, 14,010; Native Separatist Churches, 294,185; Buddhists, 1,646; Confucians, 56; Hindus, 147,570; Moslems, 25,917; no religion, 847,174; [1] others and unspecified, 11,605; total, 1,755,919.

Education.—With the exception of higher, technical and vocational education which is under the control of the Union Government, education comes under the provincial administration. In 1949, there were, for children of European extraction, 268 schools giving primary, 43 giving beyond primary education, in all 311 schools, which were supported either entirely or partially by government funds. In addition there was 1 training school for teachers. For non-European children, there were 1,105 native schools; 162 Asiatic schools and 35 other coloured schools, state and state-aided. The enrolment of European pupils in government and inspected schools was 39,173 in June, 1949. The number of native, Asiatic, and coloured children receiving instruction in June, 1949, amounted to 195,254. A sum of £1,979,464 was spent on native, Asiatic and coloured education, during the year 1949 out of public funds; the corresponding figure in respect of European education was £1,680,942. It is estimated that only a very small percentage of European children are receiving no education.

Finance.—The following figures show the provincial revenue and expenditure for 5 years :—

	1944–45	1945–46	1946–47	1947–48	1948–49
Revenue :—	£	£	£	£	£

[1] Indicates for Europeans 'No Religion' (so returned), and for non-Europeans cover; Bantu religions and non-Christian Hottentots and Bushmen.

Ordinary expenditure, 1948–49 :—General administration, £293,416; education, £3,418,435; hospitals and poor relief, £1,571,255; roads, bridges, works, £1,132,021; miscellaneous, £306,016; interest and redemption, £243,924. The capital expenditure was £1,029,367.

Production and Industry.—On the coast and in Zululand there are vast plantations of sugar cane. The area in April, 1944, was 339,977 acres and the yield during 1942–43, 3,845,373 tons, exclusive of the non-European production, which is approximately 9% of the total Union production. Cereals of all kinds (especially maize), fruits, vegetables, the *Acacia molissima* (the bark of which is so much used for tanning purposes) and other crops are produced.

The province is rich in mineral wealth, particularly coal. For figures of mineral production, *see* pp. 257–8.

A whaling industry was commenced at Durban in 1908.

PROVINCE OF THE TRANSVAAL.

Constitution and Government.—The Transvaal was one of the territories colonized by the Boers who left the Cape Colony during the Great Trek in 1831 and following years. In 1852, by the Sand River Treaty, Great Britain recognized the independence of the Transvaal, which, in 1853, took the name of the South African Republic. In 1877 the Republic was annexed by Great Britain, but the Boers were not reconciled to the loss of their independence and war broke out towards the end of 1880. In 1881 peace was made and self-government, subject to British suzerainty and certain stipulated restrictions, was restored to the Boers. The London Convention of 1884 removed the suzerainty and a number of these restrictions but reserved to Great Britain the right of approval of the Transvaal's foreign relations, excepting with regard to the Orange Free State. In 1886 gold was discovered on the Witwatersrand and this discovery, together with the great influx of foreigners which it occasioned, gave rise to many grave problems. Eventually, in 1899, war broke out between Great Britain and the Transvaal. Peace was concluded on 31 May, 1902, the Transvaal and the Orange Free State both losing their independence. The Transvaal was governed as a crown colony until 12 Jan., 1907, when responsible government came into force. On 31 May, 1910, the Transvaal ceased to exist as a separate colony, becoming one of the four provinces of the Union.

The seat of provincial government is at Pretoria, which is also the administrative capital of the Union of South Africa.

At the provincial council election on 9 March, 1949, there were returned:—Nationalists, 34; United Party, 27; Labour, 2; Independent, 2.

Administrator.—Dr. Wm. Nicol (salary, £2,750).

Area and Population.—The area of the province is 110,450 square miles, divided into 45 districts. The following table shows the population at each of the last 7 censuses :—

Census year	All races			European		Non-European	
	Total	Males	Females	Males	Females	Males	Females
1918	—	—	—	260,840	238,507	—	—

[1] Preliminary figures.

The increase in the total population, 1936–46, was 25·2%.

According to the figures of the census, the largest towns had in 1946 a European population as follows :—Johannesburg, 330,184; Pretoria, 124,542; Germiston, 51,744; Brakpan, 27,351; Springs, 25,355; Benoni, 24,303; Krugersdorp, 23,441; Roodepoort, 22,950; Boksburg, 20,512; Potchefstroom, 13,558, and Vereeniging, 12,145.

Vital statistics are shown as follows :—

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1942	27,615	8,442	11,395	12,722	17,658	6,450
1943	28,937	9,104	12,098	13,658	18,641	6,632
1944	30,682	8,960	11,308	13,849	21,035	6 548
1945	29,605	9,420	11,772	15,105	20,918	7,043

[1] Partial registration.

Religion.—Statistics for the Transvaal (census 1936, Europeans only) :—

Churches, etc.	Europeans	Churches, etc.	Europeans
Dutch Churches . . .	426,725	Lutheran	8,118
Anglican	125,853	Apostolic Faith Mission Church	20,293
Presbyterian . . .	38,000	Other Christian . . .	36,780
Methodist	61,709	Jews	53,924
Roman Catholic . . .	40,446	Others	8,908

Non-Europeans :—Dutch Churches, 71,143; Anglican, 49,693; Presbyterians, 17,461; Methodists, 199,763; [illegible] Catholics, 59,599; Congregationalists, 12,364; other Christian sects, 44,000; Native Separatist Churches, 446,655; Buddhists, 67; Confucians, 1,286; Hindus, 9,454; Moslems, 16,664; no religion, 1,265,111; [1] others and unspecified, 20,523; total, 2,520,714.

Education.—All education except that of a university and of a vocational type is under the provincial authority. The province has been divided

[1] Indicates for Europeans 'No Religion' (so returned), and for non-Europeans covers Bantu religions and non-Christian Hottentots and Bushmen.

for the purposes of local control and management into 20 school districts. Instruction in government schools, both primary and secondary, is free.

The following statistics of education show the position in June, 1949:—661 primary, 44 junior high schools and school farms, and 57 high schools for European scholars with a total enrolment of 200,724; 1,503 state and state-aided schools for coloured, native and Indian children, with 268,494 pupils. There are 4 training institutions for European teachers, with 1,382 students, and 15 for coloured and native teachers, with 970 students.

The medium of instruction is the home language (English or Afrikaans) of the pupil. The teaching of the other language begins at the earliest stage at which it is appropriate on educational grounds. Both languages are taught as examination subjects to every pupil above the fifth standard.

Finance.—The following figures show the provincial revenue and expenditure for 5 years:—

	1944–45	1945–46	1946–47	1947–48	1948–49
Revenue:—	£	£	£	£	£
Provincial collections	5,855,695	4,832,071	6,112,155	8,987,519	11,140,084
Union government subsidies:					
Ordinary	2,340,524	4,916,000	5,750,000	6,500,000	7,870,000
In lieu of professional licences	28,013	—	—	—	—
In respect of rural libraries	1,600	600	600	600	600
National feeding scheme	281,417	—	—	—	—
Grants:					
S.A. native trust	541,941	631,049	772,149	1,096,569	1,291,224
Other	21,361	—	—	—	—
Total revenue	9,070,551	10,379,720	12,634,904	16,584,688	20,301,908
Total expenditure	9,314,044	11,339,695	12,935,866	15,527,232	19,893,791

Ordinary expenditure, 1948–49:—General administration, £715,541; education, £9,001,194; hospitals and health services, £4,811,222; roads, bridges and local works, £4,522,931; miscellaneous, £200,482; interest and redemption, £642,421. The capital expenditure in 1948–49 was £2,264,323.

The provincial revenue is mainly derived from licences, auction sales tax, personal and income tax, transfer duty, companies' tax, racing and entertainment taxation.

Production and Industry.—The province is in the main a stock-raising country, though there are considerable areas well adapted for agriculture, including the growing of tropical crops.

The live-stock (excluding the number in towns and villages) numbered, in 1943, 3,879,541 cattle; 3,833,036 sheep; 974,271 goats, and 320,768 pigs.

For mineral production, *see* p. 217 f. The province has iron and brass foundries and engineering works, grain-mills, breweries, brick, tile and pottery works, tobacco, soap and candle factories, coach and wagon works, etc. The output of gold for 1944 was 12,277,228 oz., valued at £103,128,715; for 1945, 12,213,545 oz., valued at £105,326,731.

PROVINCE OF THE ORANGE FREE STATE.

(ORANJE VRYSTAAT.)

The Orange River was first crossed by Europeans about the middle of the 18th century. Between 1810 and 1820, settlements were made in the southern parts of the Orange Free State, and the Great Trek greatly augmented the number of settlers during and after 1836. In 1848, Sir Harry Smith proclaimed the whole territory between the Orange and Vaal Rivers as a British possession and established what was called the Orange River sovereignty. Great dissatisfaction was caused by this step, as well as by the native policy of the British Government. In 1854, by the Convention of Bloemfontein, British sovereignty was withdrawn and the independence of the country was recognized.

During the first 5 years of its existence the Orange Free State was much harassed by incessant raids by, and fighting with, the Basutos. These were at length conquered. The British Government then stepped in and arranged matters much to the dissatisfaction of the conquering party. By the treaty of Aliwal North, only a part of the territory of the Basutos was incorporated in the Orange Free State.

On account of the treaty between the Orange Free State and the South African Republic, the former state took a prominent part in the South African War (1899–1902), and was annexed on 28 May, 1900, as the Orange River Colony. After peace was declared crown colony government was established and continued until 1907, when responsible government was introduced. On 31 May, 1910, the Orange River Colony was merged in the Union of South Africa as the province of the Orange Free State.

The seat of provincial government is at Bloemfontein. There are 64 municipalities.

At the provincial council election on 9 March, 1949, there were returned:—Nationalists, 24; United Party, 1.

Administrator.—J. J. Fouche (appointed 1950; salary, £2,000).

Area and Population.—The area of the province is 49,647 square miles; it is divided into 36 districts. The census population has varied as follows:—

Census year	All races			European		Non-European	
	Total	Males	Females	Males	Females	Males	Females
1918	—	—	—	93,969	87,709	—	—
1921	628,827	321,373	307,454	97,776	90,780	223,597	216,674
1926	—	—	—	104,392	98,593	—	—
1931	—	—	—	104,738	100,637	—	—
1936	772,060	381,903	390,157	101,872	99,106	280,031	291,051
1941	—	—	—	100,145	98,392	—	—
1946[1]	875,545	430,808	444,737	101,319	99,772	329,489	344,965

[1] Preliminary figures.

The increase in the total population, 1936–46, was 13·4%. The capital, Bloemfontein, had, in 1946, 37,750 European inhabitants, out of a total of 82,322.

Vital statistics are shown as follows :—

Year	European			Non-European [1]		
	Births	Deaths	Marriages	Births	Deaths	Marriages
1942	4,661	1,742	1,735	2,633	2,993	2,991
1943	4,857	1,793	1,736	2,637	3,204	3,062
1944	4,974	1,856	1,733	2,856	3,497	3,412
1945	5,050	1,803	1,738	2,826	3,384	3,494

[1] Partial registration.

Religion.—The census of 1936 (Europeans only) gave the following results :—Dutch Churches, 164,122; Anglican Churches, 10,629; Presbyterians, 2,802; Methodists, 7,692; Lutherans, 726; Roman Catholics, 2,374; Apostolic Faith Mission Churches, 2,243; other Christians, 4,751; Jews, 4,822; others, 817. Non-Europeans: Dutch Churches, 76,378; Anglicans, 39,008; Presbyterians, 6,729; Methodists, 122,353; Lutherans, 9,673; Roman Catholics, 34,090; Congregationalists, 1,999; other Christian sects, 14,038; Native Separatist Churches, 116,487; Hindus, 14; Moslems, 35; no religion, 147,456;[1] others and unspecified, 2,822; total, 571,082.

Education.—Higher and vocational education is under the control of the Union Education Department, while primary and secondary education and the training of primary teachers are controlled and financed by the provincial administration. The amount spent during the year ended 31 March, 1950, on European education was £1,935,461, and on non-European education, £144,806. Under the Education Ordinance of 1930 the province is divided into 25 school board districts, for each of which there is a school board elected by the school committees in the district. In June, 1949, there were 379 European public schools and 9 aided private schools in the province, with a total enrolment of 43,850 pupils. The number of teachers in European schools totalled 1,979. The Normal College had 179 teachers in training, and a staff of 17 teachers. Similarly, there were 595 non-European public and aided private schools with total enrolment of 72,674 and 4 training institutions for native teachers with 1,108 pupils; the number of teachers in all non-European institutions was 1,812. Education is free in all public schools up to the university matriculation standard, but certain schools are allowed to charge fees and to expend the proceeds for the advantage of the schools. Attendance is compulsory for Europeans between the ages of 7 and 16, but exemption may be granted in special cases. Unless parents object, the two official languages—English and Afrikaans—are taught to all pupils, the home language of the pupil being the chief medium of instruction and the second language being introduced gradually during the primary school course.

[1] Indicates for Europeans 'No Religion' (so returned), and for non-Europeans covers Bantu religions and non-Christian Hottentots and Bushmen.

Finance.—The following figures show the provincial revenue and expenditure (in £ sterling) :—

	1945-46	1946-47	1947-48	1948-49	1949-50[1]
Revenue :—					
Provincial collections . . .	948,799	1,054,575	1,355,590	1,542,845	1,727,666
[illegible] subsidies .	1,403,210	1,404,194	1,658,546	1,961,997	2,120,896
[illegible]	216,638	252,964	335,742	390,010	444,806
Total revenue	2,568,647	2,711,733	3,349,878	3,894,852	4,293,368
Total expenditure . . .	2,533,742	2,674,524	3,300,198	3,969,379	4,334,340

[1] Preliminary figures.

Ordinary expenditure, 1949-50:—General administration, £112,633; education, £2,380,267; hospitals and public health, £507,467; roads, bridges and local works, £1,070,613; miscellaneous, £59,103; interest and redemption, £204,059. The capital expenditure in 1949-50 was £489,444.

Production and Industry.—The province consists of undulating plains, affording excellent grazing and wide tracts for agricultural purposes. The rainfall is moderate. The country is still mainly devoted to stock-farming, although a rapidly increasing quantity of grain is being raised, especially in the eastern districts.

For mineral statistics, *see* p. 217 f.

The money, weights and measures are English. The land measure, the *morgen*, is equal to about 2·1165 acres.

SOUTH-WEST AFRICA.—SUIDWES AFRIKA.

Situation and Physical Features.—This country is bounded on the north by Portuguese West Africa (Angola) and North Rhodesia, on the west by the Atlantic Ocean, on the south and southern portion of the eastern boundary by the Cape Province of the Union, and on the remainder of the eastern boundary by the Bechuanaland Protectorate and North Rhodesia. On the western coast, a strip varying from 60 to 100 miles in width and extending from the Orange River in the south to the Ugab River, which borders on what is known as the Kaokofeld, consists of barren desert, and this is also the case in that portion of the Great Kalahari depression which is included in the country on its eastern boundary. The eastern portion is, however, not barren, being good grazing ground.

The Kunene River and the Okavango, which form portions of the northern border of the country, the Zambesi, which forms the eastern boundary of the Caprivi Zipfel, the Kwando or Mashi, which flows through the Caprivi Zipfel from the north between the Okavango and the Zambesi, and the Orange River in the south, are the only permanently running streams. But there is a system of great, sandy, dry river-beds throughout the country, in which water can generally be obtained by sinking shallow wells; these are the Kuiseb, Swakop, Omaruru and Ugab on the west; the Fish River in the south; the Nossob, the Auob and the Elephant Rivers in the south-east,

and a series of what are known as Omuramba in the north-east, with numerous smaller stream-beds. In the Grootfontein area, which geologists describe as a 'karst' region, there are large supplies of underground water, but except for a few springs, mostly hot, there is no surface water throughout the country.

Government and Administration.—The country was annexed by Germany in 1884, but was surrendered to the Forces of the Union of South Africa on 9 July, 1915, at Khorab. The administration was vested in the Government of the Union of South Africa by mandate of the League of Nations dated 17 Dec., 1920. In 1921 the Governor-General delegated certain of his functions to the Administrator of the Territory who was first assisted by an Advisory Committee and later, when a limited measure of self-government was conferred on the inhabitants in 1925, by an Executive Committee and the Legislative Assembly.

The South West Africa Affairs Amendment Act, 1949, abolished the Advisory Council as well as the provision for the nomination of a certain number of members of the Legislative Assembly. All 18 members of the Assembly are now elected by the registered voters of the Territory. The Territory is represented in the Union House of Assembly by 6 members elected by the registered voters of the Territory, and in the Senate by 4 Senators, of which number 2 are elected by the members of the Legislative Assembly and the representatives of the Territory in the Union House of Assembly, and 2 nominated by the Governor-General. One of the nominated Senators is selected mainly on the ground of his acquaintance with the reasonable wants and wishes of the coloured races of South West Africa.

The administration is conducted from Windhoek, and the country is divided into 17 districts controlled by magistrates. The Secretary for South-West Africa is also Chief Native Commissioner and has charge of all native affairs in the territory.

Administrator.—Col. P. I. Hoogenhout (appointed 1 April, 1943).

Area and Population.—The total area of the country including the Caprivi Zipfel is 317,725 square miles; that of Walvis Bay, administered by South West Africa, 374 square miles.

Owing to the difficulty of satisfactorily controlling that part of the Caprivi Zipfel, east of the line running due south from Beacon 22, situated west of the Kwando (or Mashi) River, which flows through the Caprivi Zipfel from the north, as from Aug., 1939, it was decided to make over the control of this area to the Union Department of Native Affairs.

The European population (1946 census) amounted to 37,858, the coloured population to 53,172, and the native population (provisional figures) to 269,569. As large areas of the country, particularly along the coast and in the north, are uncivilized, it has been impossible to procure precise figures. In particular it has been difficult to estimate the population of the Bushmen, who still exist in considerable numbers in the north-east.

Windhoek, the capital, is situated in the centre of the territory, and with its surrounding district contains a population of 7,908 Europeans, 2,843 coloured and 12,741 natives (1946 census).

The principal native races are the Ovambos, Hereros, Bergdamaras or Klipkaffirs, Hottentots and Bushmen.

The Ovambos are a Bantu race and are both agriculturists and owners of stock. They still possess tribal organization to its full extent.

The Hereros are a pastoral people who formerly owned enormous herds

of cattle. The Germans oppressed them, their tribal organization completely disappeared and they were scattered throughout the country on farms and in the different towns, where they formed the ordinary source of labour. Since the Union occupation of the country, reserves have been set apart for them and they have considerably increased in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race, whose language they now speak. They are an inferior tribe, and were alternately the slaves of the Hereros and the Hottentots in pre-European days, according as the former or the latter were in the ascendant.

The Hottentots, so called, consist of two distinct sections: one, whose remnants are found in the central portions of the country, being of pure native extraction, is thought to have migrated from the region of the Central African lakes in prehistoric times; the other is composed of tribes whose members are descended from persons born in the Cape a couple of centuries ago with an admixture of European and Hottentot blood. These tribes, after conflict with their European neighbours, sought refuge across the Orange River.

The Bushmen are the oldest inhabitants of South-West Africa, and are found in considerable numbers in its eastern portion from lat. 26° to the northern boundary.

In the centre of the country just south of the Windhoek district is the Rehoboth Gebiet, occupied by a race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, except that the admixture of European blood is much greater and their ordinary language is Afrikaans. These people have a measure of self-government under a council of which the local magistrate is chairman. They number about 5,000.

Education.—*European.*—There are (1949) 52 Government schools with 7,270 pupils, and 16 registered private schools with 1,006 pupils. Of the children in Government schools 3,503 are accommodated in 42 hostels which are conducted by the Administration in conjunction with the Government schools. The general policy has hitherto been to bring the country children into these hostels and so obviate the necessity for single-teacher country schools.

Native.—The education of the natives is mainly under the direct supervision of the various missions. There are (1949) 5 Government native schools, 1 Government coloured school and 98 Government-aided mission schools for coloured and native children, with 8,436 pupils. There are 2 training schools for native teachers, 1 Government and the other subsidized by the Government, with 131 student teachers in training.

In 1949, secondary classes for coloured pupils were instituted in one centre (21 pupils).

Finance.—The revenue and expenditure (in £ sterling) were:—

	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50
Revenue	2,360,245	2,360,244	2,877,154	3,196,777	3,297,991	3,564,422
Expenditure[1]	3,457,412	2,340,927	2,844,633	3,008,505	3,427,208	3,759,350

[1] Including extraordinary expenditure, 1944–45, £97,136; 1945–46, £3,785; 1946–47, £6,034; 1947–48, £2,000; 1948–49, £12,278; 1949–50, £30,532.

For the purposes of Customs and Excise revenue the territory is included in the South African Customs Union. The total revenue from this source for the year 1948-49 was £792,835, and for 1949-50, £656,838.

Production and Industry.—South-West Africa is essentially a stock-raising country, the scarcity of water and poor rainfall rendering agriculture, except in the northern and north-eastern portions, almost impossible. Generally speaking the southern half of the territory is suited for the raising of small stock, while the central and northern portions are better fitted for cattle. The stock census for the year 1946 (the latest taken) was as follows:—1,520,293 head of cattle, 3,559,982 head of small stock, 37,485 horses, 83,929 donkeys and 3,579 mules. Considerable attention is being paid to the improvement of cattle and the production of butter, the quantity of butter manufactured during the year ended 30 Sept., 1950, was 11,817,066 lb., of which 10,425,408 lb. were exported. Cheese manufactured at factories was 400,071 lb., of which 169,618 lb. were exported.

More and more attention is being centred on the production of karakul pelts. The number of pelts exported during 1949 was 2,398,863.

Minerals constitute 25% of the total value of exports from the territory. Diamonds, which constitute the principal production, are recovered from alluvial sources on a 300-mile stretch along the coastline from the Orange River northward. Exports in 1949, 252,158 carats, valued at £3,217,350; in 1948, 210,281 carats (£2,476,490).

Vanadium, tin, lithium ores and lead-copper-zinc concentrates are being worked in the north of the territory. Exports (1949):—Vanadium concentrates, 2,583 long tons (£140,715); tin concentrates, 212 long tons (£63,261); lead-copper concentrates, 79,445 short tons (£2,751,902); lithium, 1,493 short tons (£10,032); zinc concentrates, 25,892 short tons (£583,457). Lead-copper concentrates come from the Tsumeb mine, where operations were resumed in Feb., 1947.

Commerce.—Imports and exports for 6 years:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1943	3,315,966	6,639,618	1946	6,979,941	9,693,127
1944	4,029,702	6,969,186	1949	11,790,104	14,863,702
1945	4,847,688	8,150,550	1950	13,069,816	21,508,868

Imports from overseas, 1950, £2,474,749; Union of South Africa, £10,535,398. Exports overseas, £15,865,515; Union of South Africa, £5,643,353.

Total exports to the United Kingdom in 1947, £462,748; 1948, £1,028,462; 1949, £893,640; 1950, £3,510,120. Imports from the United Kingdom, 1947, £273,692; 1948, £325,415; 1949, £368,975; 1950, £485,202 (Board of Trade returns).

The bulk of the direct imports into the country is landed at Walvis Bay, which is now administered as a portion of South-West Africa, and the Government proposes to develop this port as the main harbour.

Communications.—The railway line from Walvis Bay to Nakop extends southwards and connects with the main system of the South African Railways at De Aar.

The total length of the line inside South-West Africa is 1,133 miles of 3ft. 6in. gauge, and 360 miles of 2ft. gauge. The Railway Administration

also operates well developed road motor services, totalling 3,077 route miles as at 31 March, 1949. These services have played an important part in the [illegible] of vast undeveloped areas. The service between the rail head at [illegible] *via* Tsumeb and Angola border has established an important link between South-West Africa and Portuguese West Africa, and that between Gobabis station and Buitepos, on the farm Sandfontein, has linked South-West Africa with the Bechuanaland protectorate.

At 30 Sept., 1950, there were 126 post offices and 1,731 private bag services distributed by rail or road transport.

On 31 Dec., 1950, there were 4,468 circuit miles of trunk lines, 3,838 miles of super-imposed telegraphs, 364 miles of rural telephones, 3,277 miles of carrier circuits, 43 miles of phantom circuits, 2,902 miles of high-frequency telegraph circuits, and 2,434 miles of farm telephone lines; 102 telegraph offices, 62 telephone exchanges, 27 rural call offices and 4,811 rented telephones. There are 19 point-to-point radio stations in operation.

A post office savings bank was established in 1916. The number of accounts open at 31 March, 1950, was 25,841, with a credit of £1,480,824. Savings certificates of a value of £50 are also issued. The balance due to holders as at 31 March, 1950, amounted to £377,100.

BRITISH EAST AFRICA.

East Africa High Commission.—The East Africa High Commission, which consists of the Governors of Kenya, Tanganyika and Uganda, came into being on 1 Jan., 1948, to provide for the [illegible] services common to the three territories, neither political federation nor fusion of the existing [illegible] being involved. The High Commission is assisted by the East [illegible] Legislative Assembly of 23 members (7 from the staff of the High Commission, 5 from each of the territories and 1 Arab) which is empowered to legislate for specified common services including railways, income tax, customs and excise, posts and telegraphs, civil aviation and research services. The governments of the three territories remain responsible for all basic public services such as administration, police, health, education, agriculture, animal health, forestry, labour and public works.

The East Africa Army command also includes Zanzibar, Northern Rhodesia, Nyasaland, Mauritius and Seychelles.

Communications.—By an Order made by the East African High Commission with the approval of the Legislative Councils of Kenya, Uganda and Tanganyika, the Kenya and Uganda Railways and Harbours and the Tanganyika Railways and Ports Services, were, with effect from 1 May, 1948, amalgamated into the East African Railways and Harbours Administration, which was placed under the administration of the East Africa High Com-

mission. Its functions are exercised by the Commissioner for Transport with the advice of a Transport Advisory Council.

The East African Railways, which is metre gauge, consists of: main line, Mombasa island to Kampala, in Uganda, 865 miles; other lines in Kenya are: the Nakuru Kisumu line, 134 miles; the Voi-Kahe Branch, 92 miles; the Magadi Branch, 91 miles; the Thika–Nyeri–Nanyuki line, 145 miles; the Solai Branch, 27 miles; the Kitale Branch, 41 miles, the Thomson's Falls Branch, 48 miles and the Kisumu–Butere Branch, 43 miles. In Uganda, Mbulamuti–Namasagali line, 19 miles; Port Bell–Kampala Railway, 6 miles; Tororo–Soroti line, 100 miles. In Tanganyika, the Tanga section from Tanga to Arusha *via* Moshi (273 miles); the Central Railway section from Dar es Salaam to Kigoma (780 miles), with branch lines from Tabora to Mwanza (237 miles), from Msagali to Hogoro (37 miles) and from Kaliuwa to Mpanda (130 miles); and the Southern Province railway from Mkwaya to Nachingwea (82 miles). Total mileage, 2,937.

The harbours comprise the following:—The Port of Mombasa, which includes Kilindini Harbour, Mombasa Old Port, Ports Reitz and Tudor; the ports of Lamu, Malindi and Kilifi; in Tanganyika, the harbours of Dar es Salaam and Lindi. Kilindini Harbour possesses 7 deep-water quay berths, a bulk oil jetty and a lighterage berth.

The East African Railways and Harbours also operate steamer services on lakes Victoria, Kioga and Albert and on the river Nile, and a motor-transport service, 75 miles, between Masindi Port, on Lake Kioga, and Butiaba, on Lake Albert; and, in Tanganyika, a road service between Morogaro and Korogwe and in the southern highlands.

Revenue, 1949, from railways, £8,524,672; from harbours, £2,108,067. Expenditure, 1949, on railways, £5,522,128; on harbours, £1,297,173.

Posts and Telegraphs.—With effect from 1 Jan., 1949, the Posts and Telegraphs Department of Kenya, Tanganyika and Uganda was converted to a self-contained department with its own capital account. The new department is designated 'The East African Posts and Telegraphs Department.'

The telegraph and telephone system has 52,550 miles of wire (Kenya 30,778 miles; Tanganyika 13,990 miles; Uganda 7,782 miles). Cables from Mombasa and Dar es Salaam connect with Zanzibar. Number of telephones in British East Africa (1950), 16,217.

Administrator.—Robert Scott, C.M.G.

Books of Reference.

STATISTICAL INFORMATION.—The East African Statistical Department is responsible for the collection, analysis and publication of economic statistics concerning the East Africa High Commission territories. The department was set up originally as the Statistical Section of the Conference of the East African Governors in 1943 and has now headquarters at Nairobi, Kenya Colony (P.O. Box 1101), and sub-offices at Dar es Salaam, Tanganyika Territory, and Entebbe, Uganda Protectorate; *Director.*—C. J. Martin, M.B.E. The Department publishes the quarterly East African Economic and Statistical Bulletin and annual Reports on Migration, on African Employment and Earnings, and on the Enumeration of Non Native Employees.

KENYA COLONY AND PROTECTORATE.

Government.—The Kenya Colony and Protectorate extend, on the Indian Ocean, from the Umba River to Dick's Head, and inland as far as Lake Victoria and Uganda. The protectorate consists of the mainland dominions of the Sultan of Zanzibar, viz., a coastal strip of territory 10 miles wide, to the northern branch of the Tana River; also Kau, Kipini and the Island of Lamu, and all adjacent islands between rivers Umba and Tana, these territories having been leased to Great Britain in 1895 for an annual rent of £10,000. The colony and protectorate, known as the East Africa Protectorate, were, on 1 April, 1905, transferred from the Foreign Office to the Colonial Office, and in Nov., 1906, the protectorate was placed under the control of a Governor and Commander-in-Chief and (except the Sultan of Zanzibar's dominions) was annexed to the Crown as from 23 July, 1920, under the name of 'The Colony of Kenya,' thus becoming a Crown Colony. The territories on the coast rented from the Sultan of Zanzibar became the Kenya Protectorate. In 1908 foreign consular jurisdiction in the Zanzibar strip of coast was transferred to the British Crown.

A treaty was signed (15 July, 1924) with Italy under which Great Britain ceded to Italy the Juba River and a strip from 50 to 100 miles wide on the British side of the river. Following on ratification of the treaty, cession took place on 29 June, 1925.

The Executive Council consists (1951) of 12 members, in addition to the Governor, while the Legislative Council consists of 11 elected European members, 5 elected Indian members, 1 elected Arab member, 1 Arab nominated to represent Arab interests, 4 nominated unofficial members (all Africans) to represent the interests of the African community, 7 *ex-officio* official members and nominated official members not exceeding 9 in number, with the Governor as President and a Speaker who is also Vice-President. The constituencies for Europeans, Indians and Arabs are separated from one another (*i.e.* communal franchise). Legislation is by Ordinances made by the Governor with the advice and consent of the Legislative Council.

In 1946 the administration of the colony was reorganized by the grouping of the departments of the Government under members of the Executive Council who became responsible to the Governor for their respective groups. At the same time a Development and Reconstruction Authority was established under the chairmanship of the Chief Secretary, who became also member for development. To facilitate these proposals the estimates of the colony were divided into two parts, providing respectively for the ordinary budget of revenue and expenditure and a fund for development and reconstruction.

There are 5 provinces, which are as follows:—Coast (capital Mombasa), Central (capital Nyeri), Rift Valley (capital Nakuru), Nyanza (capital

Kisumu) and Northern (capital Isiolo). There is also 1 extra-provincial district, *i.e.* Masai.

Area and Population.—The territory has an area of 219,730 square miles; census population in 1948 totalled 5,379,966, including 29,660 Europeans, 97,687 Indians and Goans, 24 174 Arabs and 5,225,120 Africans. On the coast the Arabs and Swahilis predominate; further inland are races speaking Bantu languages, and non-Bantu tribes such as the Nilotic Kavirondo, the Nandi, the Lumbwa, the Masai, the Somali and the Gallas. Mombasa harbour is situated on the eastern side of an island of the same name, and is the terminus of the Kenya and Uganda Railway. Kilindini harbour on the south-western side of the island is the finest land-locked and sheltered harbour on the east coast of Africa and is accessible to vessels of deep draught. The principal river in the north is the Tana, which flows into the Indian Ocean. Nairobi is the capital; the city was given a Royal charter on 30 March 1950.

Religion and Education.—The prevailing religious beliefs are Pagan; but on the coast Mohammedanism has made great progress. There are many Christian mission societies, British, French, Swedish and American, several being Roman Catholic. There were 160 government schools (12 European, 21 Indian, 7 Arab and Somali, and 120 African) in operation in 1949 including 11 teacher-training centres (2 Indian and 9 African) and 2 African technical and vocational training centres. There were also 1,088 schools aided by the government (3 European, 47 Indian and 1,038 African) including 1 European and 26 African teacher-training centres. In addition there were approximately 1,715 private institutions (16 European, 24 Asian and 1,675 African).

In 1949, there were 44 cinemas with a seating capacity of 19,350.

Justice.—The Supreme Court is based at Nairobi while a resident judge is stationed at Mombasa. There are district registries at Mombasa, Nakuru, Kisumu, Eldoret and Nyeri, and criminal sessions are held at these stations and elsewhere as may be necessary. Subordinate courts presided over by magistrates are held in each district.

Finance.—Revenue and expenditure (in £ sterling) for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1945	8,034,196	7,815,928	1948	11,411,664	10,966,893
1946	9,057,390	8,795,237	1949	13,030,651	10,761,676
1947	9,877,196	9,023,624	1950 [1]	10,748,926	10,643,444

[1] Estimates.

Of the revenue for 1949, customs and excise accounted for £5,733,013; licences, duties, taxes, etc., £3,904,306; fees, etc., £348,794; posts and earnings of government departments, £312,549; revenue from government property, £205,690; sale of government property, £853,028; miscellaneous receipts, £125,841; agricultural production and settlement board, £26,207; forest department, £154,724; land sales, £63,096, and reimbursements, £382,874. Public debt, 31 Dec., 1949, £22,491,705: colony, £12,955,283; railways and harbours, £9,536,422.

Agriculture, Forestry and Mining.—As agriculture is possible from sea level to altitudes of over 9,000 feet, climatic conditions are extremely varied, and tropical, sub-tropical and temperate crops are grown.

The main producing areas are in the highlands where coffee, maize, wheat, sisal, tea and pyrethrum are crops of major importance. At lower altitudes where conditions are tropical, maize, sisal, sugar, coconuts and cotton are crops of principal importance. The dairy and wool industries are important and considerable quantities of hides are exported annually.

Groundnuts, simsim, potatoes, beans, essential oils, cashew nuts, wattle and other miscellaneous crops are grown according to elevation and rainfall both for export and home consumption.

Production and value of the main agricultural products for the year 1949 was as follows:—Coffee, 6,562 tons (£1,090,280); cotton, 9,714 bales (£248,374); maize, 1,654,658 bags (£1,654,658); pyrethrum, 3,825 tons (£604,620); sisal, 33,413 tons (£2,851,823); tea, 12,020,305 lbs. (£1,400,000); wattle, 48,094 tons (£487,505); wheat, 1,207,817 bags (£1,700,000); butter, 5,872,166 lbs. (£700,000); hides and skins (export), 87,012 cwt. (£1,149,245).

The total area of gazetted forest reserves in the colony amounts to 5,482 square miles of which 5,080 square miles or 93% are situated in the highlands. The merchantable forests extend over some 2,050 square miles, nearly half of which are at present economically inaccessible. Crown forest (land) reserve is 4,558 square miles; crown forest (mangrove) reserve is 174 square miles; and native forest reserve 750 square miles.

The forests of the highlands, situated on Mount Kenya, Mount Elgon, the Aberdare Range, the Kikuyu Escarpment and the Mau–Elgeyo–Cherangani system at altitudes between 6,000 ft. and 11,000 ft. above sea-level may be divided into two main classes, namely, cedar forests and camphor forests. The upper edges of the highlands forests are ringed by a zone of bamboo forest (Arundinaria alpina) which occur mainly between altitudes of 8,000 and 10,500 feet and occupy some 14% of the total area of the highlands forest reserves.

Of the total area of gazetted forest reserves, as much as 1,368 square miles or 24% of the whole are occupied by protection forests which are carefully preserved for their effects on soil and water conservation and for the climatic benefit of the colony generally.

The colony has now a thriving area of 151 square miles of plantations spread over the more important forest centres of the highlands. Of the area of plantations established to date, nearly 56% consists of exotic softwoods and hardwoods being grown on a rotation of 35 years and under working plans in course of preparation it is hoped that Kenya will be able to produce from the year 1960 onwards very large quantities of softwood timbers.

The mineral resources are not yet fully explored. Production for 1949 was as follows:—Gold, 20,072 fine oz. troy (value £201,237); silver, 2,279 fine oz. troy (value £476); soda-ash and other soda products, 72,246, long tons (value £557,748); salt, 18,523 long tons (value £87,953); lime, 12,368 long tons (value £56,534); kyanite, 23,263 tons (value £128,015); diatomite, 2,189 long tons (value £21,890). Total value of all mineral products in 1949 was £1,071,436.

In addition, considerable quantities of building stone, marble, gypsum, coral and other minerals were produced.

Customs and Commerce.—The colony and protectorate of Kenya, the Uganda Protectorate and Tanganyika Territory have formed a customs union since 1927, and complete freedom of trade exists between the two territories and Tanganyika, customs revenue being allocated to the consuming territory. In 1949 the customs departments of Kenya, Uganda and Tanganyika were amalgamated under the title of the East African Customs and Excise Department as an East Africa High Commission Service.

The trade was distributed as follows, in 1949 (in £ sterling) :—

	Imports	Exports [1]
Kenya	54,123,277	29,173,704
Uganda	12,827,633	23,805,322
Tanganyika	27,576,110	20,724,985

[1] Including re-exports:—Kenya, £18,209,570; Uganda, £372,140; Tanganyika, £1,491,835.

In 1949 the main imports into Kenya were :—Base metals and manufactures thereof, £7,469,000; machinery, apparatus, etc., £6,985,000; products for lighting, heating and power, £5,944,000; cotton piece-goods, £8,418,000; vehicles and transport equipment, £7,492,000; non-metallic minerals and manufactures thereof, £2,070,000.

The principal countries of origin were :—United Kingdom, 51%; total British Empire, 71%; Persia, 6%.

Principal domestic exports of Kenya in 1949 were :—Coffee, £1,510,000; sisal, £2,852,000; hides and skins, £1,175,000; wattle extract, £889,000; sodium carbonate, £455,000; pyrethrum, £604,000.

The chief countries of destination were :—United Kingdom, 31%; India, 6%; Union of South Africa, 6%; total British Empire, 57%; United States of America, 15%; Netherlands, 6%; Germany, 6%.

Exports to the United Kingdom (Board of Trade returns), 1950, £19,761,949; 1949, £20,139,824; 1948, £17,407,611; imports from the United Kingdom, 1950, £7,142,228; 1949, £5,428,192; 1948, £4,079,398; re-exports, 1950, £96,099; 1949, £88,993; 1948, £63,649.

Communications.—The country is fairly well provided with roads and tracks. There is a motor road from Nairobi, across Uganda, to Mongalla in the Sudan. For railways *see* p. 272.

A short-wave wireless station, owned by Cable and Wireless, Ltd., is established at Nairobi and provides communication between the colony and protectorate and Great Britain, and the company also maintains a local broadcasting service.

Money.—The currency of the colony and protectorate, which is the same as that of the Uganda Protectorate, Tanganyika Territory, Zanzibar and British Somaliland, is controlled by the East African Currency Board (4 Millbank, London, S.W. 1) which maintains a stable rate of sterling exchange. The standard coin is the East African shilling of 100 cents, introduced as from 1 Jan., 1922, which is legal tender to any amount. Twenty East African shillings equal 1 East African pound. The subsidiary coins consist of 50 cents (silver), 10 cents, 5 cents and 1 cent (bronze). The silver coins are being replaced by cupro-nickel. The paper currency consists of notes of 1, 5, 10, 20, 100, 200, 1,000 and 10,000 shillings. The 1- and 200-shilling notes are being gradually withdrawn. Three banks operate in the colony: the National Bank of India, Ltd.; the Standard Bank of South Africa, Ltd.; Barclays Bank (D., C. & O.).

Governor and Commander-in-Chief.—Major-Gen. Sir Philip Mitchell, G.C.M.G., M.C. (appointed 19 Sept., 1944; salary, with allowances, £8,500).

Chief Secretary.—J. D. Rankine, C.M.G. (appointed 19 Sept., 1947).

THE UGANDA PROTECTORATE.

The territories now comprised within this protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British protectorate was declared over the kingdom of Buganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Anglo-Egyptian Sudan boundary; on the east, a line drawn from Mt. Zulia on the Sudan boundary along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya to the eastern shores of Lake Victoria; on the south by the Tanganyika Territory (formerly German East Africa); and on the west by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Anglo-Egyptian Sudan commences. Total area 93,981 square miles, including 13,680 square miles of water. For administrative purposes it is divided into 4 provinces:—(1) the Eastern Province, comprising the districts of Busoga, Teso and Mbale; (2) the Western Province, comprising the districts of Bunyoro, Toro, Ankole and Kigezi; (3) Buganda Province, with islands in Lake Victoria, comprising the districts of Mengo, Masaka and Mubende; and (4) the Northern Province, comprising the districts of Karamoja, Lango, Acholi and West Nile.

Government.—The province of Buganda is recognized as a native kingdom under a 'Kabaka,' with the title of 'His Highness.' He is assisted in the government by three native ministers and a Lukiko, or native assembly. In Buganda, and in Bunyoro, Ankole and Toro, also ruled over by native 'kings,' purely native matters are dealt with by the various Lukikos. The remainder of the protectorate is under an indirect administration, in which the native chiefs and councils are encouraged to conduct their own affairs. The principal British representative is the Governor, who is assisted by a legislative council, of which 8 members are Africans, and an executive council in carrying out the functions of government. The headquarters of the British administration is at Entebbe; the commercial centre is Kampala.

Population and Education.—The population of Uganda is 4,993,965 (census of Aug., 1948), composed as follows:—African, 4,953,000; Asiatic, 37,517; European, 3,448. Among the Africans approximately 1,300,000 are Baganda, the tribe from which the protectorate takes its name, and which was the most powerful and civilized at the time when the first explorers visited the country.

Until 1925 educational work was entirely in the hands of missionary societies, which still receive grants. For the last 20 years the efforts of the missions have been supplemented by a government educational scheme. The total number attending schools in 1949 was 278,794, of whom 193,763 were within the aided system. A higher college was established by government at Makerere (Kampala) in 1925, and reconstituted in 1939 under the management of a council, representing the various East African territories from which the student body is recruited. Total expenditure of public funds on education in 1949, £855,552. About 2,500,000 Africans speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the Africans belong to the Hamitic, Nilotic and Sudanese groups.

Justice.—The High Court, presided over by the Chief Justice and two puisne judges, exercises original and appellate jurisdiction, civil and criminal, throughout the protectorate, and district courts presided over by magistrates exercise limited and criminal jurisdiction in each district. The Court of Appeal for Eastern Africa, inaugurated on 9 Jan., 1951, operates for Kenya, Tanganyika, Uganda, Zanzibar, Aden, Somaliland and Seychelles; it hears appeals from the High Court. Native courts of varying limited jurisdiction deal with cases, both civil and criminal, involving Africans only, but certain classes of cases are reserved to the protectorate courts. Such native courts are supervised, in Buganda by a qualified judicial adviser, and elsewhere by the administrative officers, the High Court having appellate powers in such cases in Buganda and exercising revisional jurisdiction over such courts elsewhere.

There is an armed constabulary force under a British commissioner of police and British officers, in addition to native government police forces.

Revenue and Expenditure.—The revenue and expenditure (exclusive of loan disbursements) for 6 years were (in £ sterling):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944	2,658,242	2,597,660	1947	5,331,222	4,473,773
1945	3,366,424	3,199,422	1948	6,405,030	6,530,441
1946	4,053,236	3,574,194	1949	8,094,384	6,686,866

In 1949 the native poll-tax amounted to £454,565, customs and excise to £2,423,302, and income tax, £602,122. Public debt, £2,850,000.

Production and Trade.—Cotton is the principal product, and is grown almost entirely by Africans. The area under cotton in the 1949–50 season was 1,628,518 acres, yielding 330,000 bales. Other products are coffee, chillies, oil-seeds, tin ore, hides, ivory, sugar and tobacco. There are valuable forests.

Since 1927, Uganda has been united in a customs union with Kenya and Tanganyika.

Total exports in 1949, £23,433,182; cotton, £17,340,000; coffee, £2,891,000; cotton seed, £1,163,000; hides and skins, £491,000; ores, £123,000; sugar, £381,407; tea, £223,000; tobacco, £961,019. The total value of imports for consumption in 1949 was £12,817,633, consisting mainly of cotton fabrics and manufactures. The principal countries of origin were the U.K. (56%) and India (13%); the principal countries of destination were the U.K. (41%), U.S.A. (14%) and India (10%).

Total imports into the U.K. from Uganda, 1948, £3,961,176; 1949,

£6,114,771; 1950, £8,056,100. Exports from U.K. to Uganda, 1948, £2,551,300; 1949, £3,577,025; 1950, £4,503,076 (Board of Trade returns).

Communications.—There are steamer services on Lakes Victoria, Kioga and Albert. The steamers on Lake Albert descend the Nile to Nimule, on the Sudan boundary, whence there is a motor road (about 100 miles) round the rapids extending to Juba, the terminus of the Nile steamers from Khartum.

There are 2,200 miles of all-weather roads and 5,300 miles of other motorable roads. For railways *see* pp. 277–8.

Mail services by motor radiate from all main centres. The Sudan-Egyptian telegraph and telephone system is working as far as Rejaf. The Uganda telegraph line connects with the Belgian Congo via Fort Portal and the Semliki. The length of telegraph and telephone line in the protectorate is (1945) 7,139 miles. There is a wireless station, used mainly for messages in connexion with the aeroplane services and the meteorological service, at Entebbe. The four-times weekly air-mail service connects Uganda with the United Kingdom and South Africa by Hermes land plane, while local air services connect Uganda five times a week with the neighbouring territories and with the air-mail services *via* Nairobi.

Currency and Banking.—The currency unit is the shilling, introduced in 1921 and standardized, with subsidiary coinage of silver 50 cent pieces, and bronze 10 cent, 5 cent and 1 cent pieces. East African Currency Board notes of shillings 10,000, 1,000, 200, 100, 20, 10, 5 and 1 are also in circulation. The National Bank of India (Limited) has branches at Entebbe, Kampala, Jinja and Mbale, and the Standard Bank of South Africa and Barclays Bank (D., C. & O.) have branches at Kampala, Jinja and Mbale.

Governor and Commander-in-Chief.—Sir John Hathorn Hall, G.C.M.G., D.S.O., O.B.E., M.C. (appointed 19 Sept., 1944).

Chief Secretary.—H. S. Potter, C.M.G.

ZANZIBAR.

The island of Zanzibar is situated in 6° S. latitude, and is separated from the mainland by a channel 22½ miles across at its narrowest part. It is the largest coralline island on the African coast, being 50 miles long by 24 broad, and having an area of 640 square miles. To the north-east, at a distance of some 25 miles, lies the island of Pemba in 5° S. latitude, 42 miles long by 14 broad, having an area of 380 square miles. The average annual rainfall is about 60 in. in Zanzibar and just over 70 in. in Pemba.

In the 16th century the Arabs of the east coast sought the assistance

of the Imams of Muscat to drive out the Portuguese. The subsequent allegiance to Muscat, however, was of a more or less nominal character until Seyyid Said transferred his capital to Zanzibar in 1832. On his death in 1856 the African possessions were, under an arbitration by Lord Canning (then Governor-General of India), declared independent of the parent state. In 1890 the supremacy of the British interests in the islands of Zanzibar and Pemba was recognized by France and Germany, and they were declared a British Protectorate in accordance with conventions by which Great Britain waived all claims to Madagascar in favour of France and ceded Heligoland to Germany. In the same year the mainland possessions, which extended over the coast from Warsheikh in 3° N. latitude to Tunghi Bay in 10° 42′ S. latitude, were ceded to Italy, Great Britain and Germany, respectively, Great Britain and Italy paying rent for the territories under their protection, while Germany acquired the Sultan's rights by the payment of a sum of £200,000. At a later date Italy also acquired similar rights by payment of a sum of £144,000. The British-rented territories on the mainland were included in the East Africa Protectorate and now form the Protectorate of Kenya. Thus the Zanzibar Protectorate is confined for administrative purposes to Zanzibar, Pemba and adjacent small islands. In 1891, a regular government was formed for the Protectorate with a British representative as first minister. In 1906 the Imperial Government assumed more direct control over the Protectorate and reorganized the Government. On 1 July, 1913, the control of the Protectorate was transferred from the Foreign Office to the Colonial Office, legal effect being given to the change in the following year.

Constitution and Government.—The Sultan, Seyyid Sir Khalifa bin Harub, G.C.M.G., G.B.E. (born 1879), succeeded on the abdication of his brother-in-law, Ali bin Hamoud bin Mahomed, 9 December, 1911. The Government is administered by a British Resident, who is appointed by commissions under His Majesty's Sign Manual and Signet, and exercises his functions under the Zanzibar Order-in-Council, 1924, as amended by the Zanzibar Order-in-Council, 1925.

Legislation consists of decrees of His Highness the Sultan, which are binding on all persons when countersigned by the British Resident under the Order-in-Council.

In 1926 executive and legislative councils were established. The former is presided over by His Highness the Sultan, and the latter by the British Resident. The legislative council consists of 4 *ex-officio* and 5 official members. There are 8 unofficial nominated members (3 Arabs, 2 Indians, 2 Africans, 1 European).

Population, Religion and Education.—The population of Zanzibar and Pemba, at the 1948 census, was 264,162 (Zanzibar, 149,575; Pemba, 114,587). The African population is composed of the indigenous Watumbatu, Wahadimu and Wapemba, and also the Waswahili and other Africans comprising at least 50 mainland tribes. The racial composition of the population was as follows in 1948:—Africans, 199,608; Arabs, 44,560; Indian, 15,892; Europeans, 296; others, 3,554. Zanzibar town had a population of 45,284.

Most of the natives are Moslems (Sunnis of the Shafi school); the Sultan and the principal Arabs are of the Ibadhi sect. There are 3 Christian Missions: the Universities Mission to Central Africa (Church of England), the Mission of the Holy Ghost (Roman Catholic) and the Friends' Industrial Mission.

Primary education is free. There are government schools for Arabs,

Africans and Indians; schools which are grant-aided by government and include mission and community schools; and a few private schools. The total number of children attending government and grant-aided schools in 1950 was 9,082. There is a government rural boarding school, a teachers' training school for Arab and African boys and a teachers' training school for women of all races. Government boys' and girls' secondary schools are attended by all races. Government girls' schools in Zanzibar town were attended by 741 Arab and African pupils in 1950, of whom 59 were boarders.

Justice.—In cases in which persons subject to the Zanzibar Order-in-Council, 1924, are concerned, justice is administered by His Britannic Majesty's High Court and the courts subordinate to it, and in other cases by H.H. the Sultan's court for Zanzibar and the courts subordinate to that court. Subordinate courts are held by resident magistrates, administrative officers, Arab Kathis, and Mudirs, and an appeal lies from those courts to the British or Zanzibar court as may be required. An appeal lies from the British court and from the Zanzibar court in the exercise of their original civil and criminal jurisdiction to His Majesty's Court of Appeal for Eastern Africa and thence to the Privy Council.

Capitulations for foreign subjects in Zanzibar were abolished by exchange of notes with the European governments concerned between 1904 and 1907.

Finance.—The revenue and expenditure (in £ sterling) were as follows:—

Year	Revenue from customs (gross) [1]	Total revenue (excluding loans)	Expenditure	Year	Revenue from customs (gross)	Total revenue (excluding loans)	Expenditure
1944	292,718	637,067	565,942	1947	375,241	746,833	877,720
1945	309,784	628,866	647,986	1948	479,556	809,451	850,037
1946	474,205	795,063	749,533	1949	642,324	1,118,337	1,209,012

[1] Includes duties on imports and clove export duty.

Besides customs, the chief sources of revenue in 1949 were:—Interest on loan to Kenya and other investments, £21,729; electricity department, £33,525; agriculture, £26,456; court fees, etc., £120,928; post office, £40,596; rent of mainland territory, £10,000; rent of government property, land and houses, £37,086. The chief heads of expenditure in 1949 were:—Agriculture, £86,276; health, £80,939; education, £83,229; provincial administration, £58,024; public works, £142,148; pensions, £94,979.

Production and Industry.—The clove industry is the most important in the Protectorate, the islands of Zanzibar and Pemba yielding the greater part of the world's supply. It is estimated that there are in both islands about 50,000 acres under cloves and over 4 million trees, the average output of the last 35 seasons being over 20 million lb. The exports in 1950 were 396,435 centals of 100 lb., equivalent to 17,698 tons against an average over the 10-year period 1940–49 of 10,468 tons. In addition, 153 tons of clove oil were exported in 1950. The large plantations are owned chiefly by Arabs and Indians, but many Africans possess small holdings.

The coconut industry ranks next in economic importance. It is estimated that there are about 4 million bearing trees in both islands, but as these are not systematically planted the acreage is very difficult to assess.

The whole of the copra produced was manufactured locally; 160,179 cwt. of coconut oil, 11,925 cwt. of soap and 106,170 cwt. of oil cake were exported during 1950. During and just after the Second World War, a substantial trade developed, particularly in Pemba, in the export of mangrove bark used for the extraction of tannin. Stripping of bark is prohibited in order to allow the forests to recover from the excessive war-time cutting. The production of locally grown foodstuffs received an impetus during the war, particularly as regards rice cultivation, and this has been maintained. Oranges, pineapples, mangoes, paw-paws and other tropical fruits are grown, and there is a small export trade in oranges to the mainland. Small quantities of coil tobacco and chillies are also grown for export.

The manufactures are clove and clove stem oil, coir fibre and rope, soap, coconut and simsim oil, jewellery, ivory and ebony ornaments, copper and brassware, chests, mats, etc. There are no mines in the Protectorate.

Commerce.—The total imports, exports and shipping for 5 years were:—

Years	Imports (including bullion and specie)	Exports (including bullion and specie)	Shipping entered (gross tonnage)
	£	£	Tons
1946	1,977,996	2,163,886	713,855
1947	2,012,432	1,476,042	1,543,615
1948	2,699,717	2,116,858	1,954,179
1949	2,979,874	2,823,336	2,691,454
1950	3,879,344	5,069,156	—

The principal articles of import and export in 1950 were:—Imports: rice and grain, £452,379; cotton piece-goods, £650,316; motor spirit and petroleum, £105,666; sugar, £165,763; wheat flour, £259,640; tobacco, cigars and cigarettes, £59,848; ivory, £138,255. Exports: cloves, £3,199,945; ivory, £137,393; coconut oil, £787,504.

The trade between Zanzibar (and Pemba) and the United Kingdom (Board of Trade returns) for 5 years is given as follows (in £ sterling):—

	1938	1947	1948	1949	1950
Imports into U.K. . . .	43,160	141,395	104,267	1,026,130	948,526
Exports from U.K. . . .	109,681	404,298	508,815	669,003	880,180
Re-exports from U.K. . .	1,919	1,707	360	1,052	1,883

Communications.—The vessels of many British and foreign steamship companies visit the port. The Zanzibar Government steamers operate a weekly service to Pemba and Dar es Salaam, and a monthly service to Mombasa.

Ocean-going shipping dealt with in 1950: 1,441,565 tons net (301 vessels); coastwise, 162,088 tons (386 vessels); dhows, 112,709 tons entered and 103,261 tons cleared. Excellent water supplied at 3·5 tons per minute is available for shipping.

There is an all-weather landing ground in Zanzibar and a smaller dry-weather landing ground in Pemba.

There is cable communication with Europe either via Aden or via Durban.

There are 151 miles of tarmac roads in Zanzibar and 27 miles of all-weather unsealed roads; in Pemba there are 56 miles of tarmac roads, 4½ miles of all-weather roads, and 64 miles of dry-weather earth roads.

The Government maintains a telephone system in the town of Zanzibar, which is connected with the district [illegible] stations in the country. A telephone service also exists in [illegible] Pemba, connecting the 3 main townships, *i.e.*, Wete, Chake Chake and Mkoani. There are 5 post offices in the two islands. The Government savings bank at the end of 1949 had 14,456 depositors, with £378,150 on deposit.

Currency.—Since 1 January, 1936, the East African Currency Board shilling (20 = £1) has been the unit of currency in Zanzibar with subsidiary coinage of 50 cents (silver), and 10 cents, 5 cents and 1 cent (bronze). Notes issued by the East African Currency Board are also legal tender.

The rupee of British India and Seyyidieh copper pice ceased to be legal tender after 6 April, 1936. Notes of the Zanzibar Currency Board may be redeemed for East African currency on presentation to the Chief Accountant.

The value of East African currency in circulation on 31 Dec., 1949, was:—Coin, £186,243; notes, £240,900. Zanzibar currency notes unredeemed on 31 Dec., 1948, amounted to £1,604.

An important local unit of weight is the frasla (or frasila) = 35 lb. av.

British Resident.—Sir Vincent Goncalves Glenday, K.C.M.G., O.B.E. (appointed 3 March, 1946).

Chief Secretary.—Major E. A. T. Dutton, C.M.G., C.B.E. (8 June, 1942).

TANGANYIKA.

Government.—German East Africa was conquered in 1918 and was subsequently divided between the British and Belgians. In March, 1921, the district of Ujiji and part of Bukoba, formerly administered by the Belgians, were handed over to British jurisdiction, leaving Ruanda-Urundi as the Belgian section of the original German colony. The country is administered under United Nations trusteeship, the former League of Nations mandate having been terminated and replaced in 1946. For the terms of the trusteeship agreement see Cmd. Paper 7081 (1947).

Under an Order in Council, dated 22 July, 1920, the territory is administered by a governor, who is assisted by an executive council, comprising 3 *ex-officio* members, 5 official members and 4 unofficial members, all of whom are nominated. A legislative council has been constituted as from 1 Oct., 1926. An Order in Council which came into operation on 23 Nov., 1945, made the council consist of the Governor as President, 8 *ex-officio* members, 7 official members and not more than 14 unofficial members. The unofficial members comprised 7 Europeans, 4 Africans (including 3 chiefs) and 3 Indians in April, 1950.

Rights in or in relation to any public lands vest in the Governor, but the Secretary of State for the Colonies may appoint, if he sees fit, another trustee or trustees to exercise such right.

Area and Population.—The territory extends from the Umba River on the north to the Rovuma River on the south, the coast-line being about 450 miles long, and includes the adjacent islands (except Zanzibar and Pemba). The northern boundary runs north-west to Lake Victoria at the intersection of the first parallel of southern latitude with the eastern shore. The boundary on the west follows the Kagera River (the eastern frontier of Ruanda), thence the eastern boundary of Urundi to Lake Tanganyika. The western boundary then follows the middle of Lake Tanganyika to its southern end at the Kalambo River 50 miles south of Kasanga (formerly Bismarckburg), whence it goes south-east to the northern end of Lake Nyasa. Rather less than half-way down the lake the boundary turns east and joins the Rovuma River, whose course it follows to the sea. The total area is about 362,000 square miles, which includes about 20,000 square miles of water. Dar es Salaam is the capital and chief port, population, about 70,000 (1950). Other towns are Tanga and, inland, Arusha, Bukoba, Dodoma, Iringa, Kigoma, Moshi Mwanza and Tabora. Arusha and Moshi are situated on the Tanga railway in the farm country around Mount Meru and Mount Kilimanjaro. Dodoma, Tabora and Kigoma are all important trading towns on the Central Railway, the latter town being located on Lake Tanganyika and serving as the western terminus.

In 1948 (census) the European population was 16,299 (including 5,397 Polish refugees), the Asiatic population 60,737 and the native population 7,410,269. According to German law every native born after 1905 was free, but a mild serfdom was continued under German rule. Legislation for the abolition of slavery was enacted in 1922.

The native population of Tanganyika is made up of members of more than 100 tribes, each with a distinctive dialect and varying customs. Most of the tribes are of Bantu origin, although some are Bushman; and there is a strong Hamitic strain in the north (*e.g.* the Masai tribe). Swahili, the language of Zanzibar, is generally spoken and understood throughout Tanganyika, particularly along the trade routes which originally radiated out from Zanzibar.

Education.—*European Education.*—3 schools are maintained by government for the education of European children, at Dar es Salaam, Arusha and Mbeya (the last two being boarding schools). A correspondence course, which also serves other East African territories, is conducted from Dar es Salaam, for children in the more remote districts. Assistance is given to 9 privately maintained schools (3 English, 1 Afrikaans, 1 Greek, and 4 kindergarten schools). The total enrolment in 1949 was 1,170.

For secondary education European children go to schools in Kenya, Bursaries are awarded for secondary education in Kenya and South Africa. The total enrolment in secondary schools in 1949 was 256.

Indian Education.—There are 92 Indian schools with a total enrolment in 1949 of 11,425. Grants-in-aid are paid to 80 schools in respect of staff, and to 15 in respect of buildings and equipment. 42 schools are maintained by The Aga Khan's Central Council of Education. Instruction in the lower standards is conducted in Gujarati or Urdu, and in the higher standards in English. Secondary instruction up to the Cambridge school certificate examination is given in the Government Indian Central School, Dar es Salaam, the Aga Khan's Boys' School, Dar es Salaam, and the Indian Public School Dodoma.

There are 2 Goan schools with an enrolment in 1949 of 762, including 176 Indians.

African Education.—Schools for Africans are provided by government, the native authorities and voluntary agencies, the latter two being subsidized by a grant-in-aid system controlled by the education department. 338 schools are maintained by government or the native authorities, including 8 secondary and 5 girls' schools. Primary schools are usually co-educational. The total enrolment in primary schools in 1949 was 40,219.

Assistance is given to 810 schools run by voluntary agencies whose total enrolment in 1949 was 108,757. In the 19 secondary schools the medium of instruction is English. After 4 years of the secondary course many students enter government departments, where they are given further technical instruction, and some proceed to the clerical course of one year at Dar es Salaam government secondary school, in which boys intended for the local civil service are taught office routine, accountancy, typewriting and shorthand. Three of these schools give a 6-year secondary course, at the end of which students may sit for the entrance examination of Makerere College, Uganda, and for the Cambridge School Certificate. There are 2 government teachers' training centres, which provide the grade II teachers course, 1 with full grade I course, and 2 government and 6 native authority centres with part 1 of the grade II course only.

In the primary schools, stress is placed on the improvement of rural economy, and many village schools have their gardens. Industrial sections teach carpentry, masonry, smithing and tailoring.

The expenditure from general revenue on education in 1949 was:—European £95,584, Indian £107,635, African £384,565. The total expenditure on education in 1949 was £590,782, exclusive of further sums contributed by the native authorities and missions for African education.

The estimated expenditure on education from general revenue in 1950 was:—African £411,223, European £262,725, Indian £340,161, other non-native (including Goan) £32,226; total £1,046,340.

Finance. The revenue and expenditure (in £ sterling) were:—

	1947 [1]	1948 [1]	1949 [1]	1950 [1, 2]
Revenue	6,012,732	7,888,077	10,327,407	12,656,508
Expenditure . . .	5,931,257	7,378,331	9,459,540	12,651,388

[1] Includes development plan. [2] Estimates.

The chief items of revenue in 1949 were:—Customs and excise, £3,800,312; licences, taxes, etc., £2,679,050; reimbursements, £127,333; revenue from government property, £747,652; fees of court or office, £337,609; miscellaneous, £185,379; development, £1,741,762. The chief items of expenditure were:—Public works, £777,176; medical, £638,030; education, £404,738; subsidization and temporary bonus, £36,273; provincial administration, £426,725; native administration, £354,460; miscellaneous services, £846,054; pensions and gratuities, £263,068; development, £1,687,100; agriculture, £283,957; police, £348,693; public debt, £129,806; defence, £120,497; veterinary, £175,556.

Loans were received from the Imperial Government in the years 1920–21 to 1925–26, amounting to £3,135,446, for capital improvements and developments. £1,288,983 were expended upon railway works; other works, £770,995; restoration of war damage, £177,909, and to meet deficit upon recurrent account, £897,599. The loan for railway and other works is being repaid by equated annuities of £100,053, commencing on 31 March, 1947,

and terminating on 31 March, 1964. The rate of interest has been reduced from 5% to 3% per annum. The repayment of the balance of £1,075,508, representing the loan to meet deficits on current account and repair of war damage, has been remitted. Other loans:—Guaranteed loan, 1951–71, £3,000,000, of which £1,930,363 was allocated to railway works; guaranteed loan, 1952–72, £500,000, of which £81,975 was allocated to railway works; Barclays Overseas Development Corporation Loan, June, 1948, £250,000, raised for purchasing 255,000 £1-shares in Tanganyika Packers, Ltd. The balance of £5,000 is being met from revenue.

A new loan of £1,750,000 3½% Inscribed Stock redeemable at par 1970–75 was floated in Sept., 1950, for the purpose of conversion on 1 Feb., 1951, of a similar nominal amount of the £3,000,000 4% Guaranteed loan 1951–71. The remaining £1,250,000 of the latter loan will be repaid in cash on the same date. The terms of issue of the new 3½% Stock provided for the issue of stock for cash of any shortfall between the sum of £1,750,000 and the amount which holders of the 4% loan stock agreed to exchange. Holders of stock considerably in excess of the value of £1,750,000 assented and there was in consequence no issue for cash.

Production and Industry.—Tanganyika has three natural regions—the coast lowlands, the high plateau and the high mountain slopes around Mount Kilimanjaro and other northern peaks and round Rungwe and the Livingstones in the south. In these regions there are high rainfall areas as also in the foothills of the Ulugurus and Usambaras characterized by the presence of tropical rain-forest. The known total area of forest other than dry zone forest is in the region of 19,500 square miles or 5·7% of the land area of the territory: of this area 17% represents forest reserves, 10% areas awaiting reservation and the balance either native authority forest reserves or areas to which forest rules of some sort apply. The area of the dry forest or myombo exceeds 131,000 square miles or 38% of the land area. The forests contain some good merchantable timbers in varying quantity, among which camphor, podo, mvule and certain African mahoganies are the most important. In addition valuable species of hardwoods occur as single trees or in groups widely scattered throughout the large areas of savannah forest, chief being mninga and African blackwood. The mangrove woods are valuable as a source of tanning bark and also of poles which are carried by Arab dhows to the Persian Gulf. The possible output of the territory's forests far exceeds the normal local consumption but war-time demands and the restriction of markets has made such heavy calls on the forest estate that a reassessment of the position is overdue. The approximate production of timber in 1950 was 9 million cubic feet, firewood 250 million cubic feet, the total value being £4,500,000.

Agriculture is the chief occupation. The most important commodity exported is sisal, which constitutes in value approximately one-half of the principal exports. Tanganyika Territory is the world's leading producer of sisal. In 1950 the territory produced 121,598 tons—approximately one-third of the world's supply; other important producers are Central America, Indonesia, Mozambique, and Kenya. Other agricultural exports are cotton, coffee, papain, pyrethrum, rubber, hides and skins, ghee, copra, tea, sesame, sugar, tobacco, rice, groundnuts (peanuts) and sunflower seed. The important products collected from the forests are beeswax, gums (arabic and copal) and mangrove bark. The average yearly production of cotton was 48,157 bales in 1939–49; it was 51,308 bales in 1949.

In areas of dense population and land scarcity, soil conservation is more advanced than in the sparsely population areas where plentiful land permits

shifting cultivation. Territorial and colonial development and welfare funds have been provided for the development of rural water supplies and for water conservation and distribution. £170,000 was spent on these services in 1949.

In 1950 there were 6,252,819 cattle, 2,379,315 sheep and 3,262,519 goats.

The value of minerals mined and exported or sold locally in 1949 was as follows (in £ sterling) :—

Gold (refined)	692,574	Salt	98,477	Tungsten ore	12,474
Silver (refined)	5,551	Tin ore	65,176	Mica, ground	737
Diamonds	1,652,613	Building minerals	77,221	Beryllium ore	57
Kaolin	1,853	Lime	16,510		
Mica, sheet	49,417	Phosphates	349	Total	2,673,009

Trade and Shipping.—There is a uniform customs tariff in Tanganyika, Kenya and Uganda, the three countries being united in a customs union since 1927. Total imports, 1949, £27,576,110; 1948, £22,608,564. Total exports, 1949, £20,124,985; 1948, £16,923,394.

Chief exports, 1949 :—Sisal (132,514 tons), £11,111,230; coffee (12,041 tons), £1,460,853; cotton (242,001 centals), £2,059,779; diamonds (131,031 carats), £1,009,706; gold, unrefined (63,132 fine oz.), £619,941; rubber (421 centals), £3,780; beeswax (525 tons), £150,503; hides (3,331 tons), £440,495; skins, sheep and goat (1,436,900 pieces), £182,306; wood and timber (346,584 cu. ft.), £163,264; tobacco (2,407,968 lb.), £217,536; gum arabic and copal [illegible] Sisal exports comprised 57·8% (49·0% in 1947) of the value of all exports, followed by cotton, 10·7% (7% in 1947) and coffee, 7·6% (8·8% in 1947).

Chief imports, 1949 :—Cotton piece-goods, £4,643,797; foodstuffs, £681,019; cigarettes, £33,159; kerosene and motor spirits, £1,125,958; machinery other than electrical, £3,393,331; building materials (including cement and galvanized iron sheets), £1,387,626; iron and steel manufactures. £1,679,881; spirits, £131,376; sugar, £73,404. In 1949, the United Kingdom supplied 57·2% of all imports (32% in 1947); other parts of the Empire, 15·9% (32·1% in 1947); U.S.A., 7·7% (22·3% in 1947).

Trade with United Kingdom :—Imports into U.K., 1950, £10,340,015; 1949, £8,156,485; 1948, £7,820,136; exports from U.K., 1950, £9,290,828; 1949, £11,120,117; 1948, £9,003,447; re-exports, 1950, £15,028; 1949, £38,872; 1948, £42,502.

Communications.—Light motor traffic is now possible over 21,371 miles of road during the dry season. Road surfaces vary from tracks, precariously maintained over black cotton soil, which becomes impassable after a brief rain-storm, to gravel surfaces on well-drained formations. Usability of roads is dictated, apart from the overall condition of the earth and gravel surfaces, by the load capacity of bridges; bridge loading standards have progressively increased. For railways *see* pp. 277–8

There are steamers on Lakes Victoria, Nyasa and Tanganyika.

Dar es Salaam is in telegraphic communication with many inland centres and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Cable communication exists between Dar es Salaam and Zanzibar. A wireless station exists at Dar es Salaam for communication with shipping, and stations for dealing with aircraft are installed at Lindi, Mbeya, Dodoma, Dar es Salaam, Tanga, Mwanza, Nduli, Moshi, Kongwa and Tabora. There are 147 post offices and postal agencies and 185 offices at which telegraph business can be transacted. Postal order, money order and savings bank business is conducted at 38 post offices, and at a number of sub-offices. Telephone exchanges are established and trunk telephone communication

is in operation between various centres in the territory and also with Kenya and Uganda. Radio telephone facilities are at scheduled times available between Dar es Salaam, Tanga and Tabora and many overseas countries, including the U.K., France and South Africa.

East African currency is in use, consisting of a silver shilling (also cupro-nickel), the equivalent of 100 cents; a 50-cent silver piece (also cupro-nickel); copper and bronze 10-cent, 5-cent and 1-cent pieces. There are currency notes in denominations ranging from 1 to 10,000 shillings. Four banks, the National Bank of India, the Standard Bank of South Africa, Barclays Bank (Dominion, Colonial & Overseas) and the Banque du Congo Belge have branches in the country.

Governor.—Sir Edward Francis Twining, K.C.M.G., M.B.E. (appointed 18 June, 1949).

Chief Secretary.—E. R. E. Surridge, C.M.G. (appointed 18 Feb., 1946).

BRITISH SOUTH AFRICA.

SOUTHERN RHODESIA.

RHODESIA includes the whole of the region extending from the Transvaal Province northwards to the borders of the Belgian Congo and Tanganyika Territory, bounded on the east by Portuguese East Africa, Nyasaland and the Tanganyika Territory, and on the west by the Belgian Congo, Portuguese West Africa and Bechuanaland. The region south of the Zambezi (Matabeleland and Mashonaland) is called Southern Rhodesia; that north of the Zambezi is known as Northern Rhodesia.

Prior to Oct., 1923, Southern Rhodesia, like Northern Rhodesia, was under the administration of the British South Africa Company. In October, 1922, Southern Rhodesia voted in favour of responsible government. On 12 Sept., 1923, the country was formally annexed to His Majesty's Dominions, and on 1 Oct., 1923, the new form of government was established under a governor, assisted by an executive council, and a legislature. The latter consists at first of a single elected legislative assembly, but that body may pass a law constituting a legislative council in addition, but up to the present this power has not been exercised. The constitution also limits the powers of the Legislative Council respecting appropriation and taxation bills. There must be a session at least once a year, and the duration of the legislature is 5 years, unless sooner dissolved. The legislature may amend, by a two-thirds vote of the total membership, the Letters Patent setting up the constitution, with certain exceptions (relating to reservation of bills by the Governor, native administration, Crown letters patent and governor's salary). The Legislative Assembly numbers 30 members, each of whom receives a yearly allowance of £600. In July,

1928, the franchise was extended to all British subjects over 21 years of age, subject to certain qualifications.

In March, 1945, a standing consultative Central African council was set up, covering Southern and Northern Rhodesia and Nyasaland.

The Legislative Assembly, elected 15 Sept., 1948, consists of 24 United Party, 5 Liberal Party, 1 Rhodesia Labour Party.

Governor and Commander-in-Chief.—Major-Gen. Sir John Noble Kennedy, K.C.V.O., K.B.E., C.B., M.C.

The cabinet is as follows (reconstituted 8 March, 1951):—

Prime Minister and Minister of Defence, and of External Affairs.—Sir Godfrey M. Huggins, P.C., C.H., K.C.M.G., F.R.C.S.

Minister of Finance, and of Posts and Telegraphs.—E. C. F. Whitehead, O.B.E.

Minister of Mines and Transport and Education.—G. A. Davenport.

Minister of Justice and Internal Affairs.—J. M. Greenfield, K.C.

Minister of Agriculture and Lands.—J. M. Caldicott.

Minister of Trade and Industrial Development.—W. A. E. Winterton.

Minister of Native Affairs and Health.—P. B. Fletcher.

High Commissioner in London.—K. M. Goodenough, C.M.G. (Rhodesia House, 429 Strand, W.C.2.)

High Commissioner for the U.K.—Ian M. R. Maclennan, C.M.G. (appointed 1 Nov., 1950).

High Commissioner in the Union of South Africa.—A. D. Chataway.

High Commissioner for the Union of South Africa.—T. H. Eustace.

Native Councils.—The Native Councils Act, as amended in 1943, 1948 and 1949, provides for establishing Native Councils in any Native Reserve, Native Area as defined in the Land Apportionment Act, or any other area set apart for the use and occupation of natives which is not within the jurisdiction of any local authority. A Council consists of all duly appointed Chiefs and Headmen within its area and so many other indigenous male natives resident within the area as may be appointed by the Governor. The Native Commissioner exercises the executive powers of the Council over which he presides. The functions of a Native Council are concerned with virtually every economic, social, sanitary and cultural aspect of native life.

Act 25 of 1943 enabled Native Councils to levy taxation. In 1950, there were 57 Councils in existence, of which 41 were self-taxing.

Area and Population.—The area is 150,333 square miles. The growth of the population is given in the following table:—

Census	European			Asiatic and coloured total	Native total (estimated)	Total population (estimated)
	Males	Females	Total			
May, 1911 .	15,580	8,026	23,606	2,912	745,000	772,000
May, 1931 .	27,280	22,630	49,910	4,102	1,076,000	1,130,000
May, 1941 .	36,615	32,339	68,954	6,521	1,404,000	1,479,000
May, 1946 .	44,220	38,166	82,386	7,470	1,704,000	1,794,000
1950 (est.) .	—	—	129,000	8,800	1,957,000[1]	2,095,000[1]

[1] Provisional.

Estimated European population, 1950, of the chief towns:—Salisbury (the capital, including suburbs), 39,000; Bulawayo (including suburbs), 33,000; Umtali, 5,100; Gwelo, 4,000; Gatooma, 1,700; Que Que, 2,000.

Vital Statistics	1939	1945	1946	1947	1948	1949
Births (European)	1,433	2,038	2,147	2,637	2,853	3,171
Marriages "	1,013	804	1,032	1,093	1,243	1,196
Deaths "	597	687	687	718	821	808
Immigrants "	3,338	—	7,182	13,595	17,037	14,155

Education.—At the end of 1949 the schools for Europeans numbered 113, with a total enrolment of 20,247 pupils. Of these schools, 78 were government schools (16,432 pupils) and 35 non-government (3,815 pupils). In addition, there were correspondence classes conducting primary work, with a total enrolment of 679 pupils. There were also 16 schools for coloured children, including Eurafrican and Asiatic, with a total enrolment of 2,658 pupils (12 government schools, with 1,771 pupils; 4 non-government schools with 887 pupils), and 2,150 schools for native pupils, with a total enrolment of 230,151 pupils. The total expenditure on public education in the year ended 31 March, 1949, was £1,702,472 (European, £1,154,027; native, £548,444), against which receipts (European) were £155,918 (boarding and tuition).

Justice.—There is a high court (composed of a chief justice and 3 judges) with criminal and civil jurisdiction. The Chief Justice and 2 other judges are stationed at Salisbury and 1 judge is stationed at Bulawayo. Sittings are held at three of the other principal towns three times a year. There are 10 principal courts of magistrates, also courts presided over by detached assistant magistrates and several periodical courts. Natives are subject mainly to the same laws as Europeans, though there are special restrictions relating to arms, ammunition and liquor, and there are laws particularly applicable to natives, such as those dealing with marriage, taxation and registration and passes. Native commissioners have jurisdiction in civil cases in which the rights of natives only are concerned, and in criminal cases in which the accused is a native and, on appointment as such, have the jurisdiction of an assistant magistrate. A court of appeal for Southern Rhodesia, Northern Rhodesia and Nyasaland has been established.

Finance.—Revenue and expenditure, in £ sterling, for 5 years (year ended 31 March):—

	1946–47	1947–48	1948–49	1949–50 [1]	1950–51 [2]
Revenue . . .	11,214,278	12,700,414	13,602,085	16,912,797	16,621,000
Ordinary expenditure:					
From revenue funds .	10,001,039	12,899,754	13,530,621	14,843,793	16,620,579
From loan funds .	5,095,653	38,613,661 [4]	10,308,663	12,996,984	15,115,500
Total expenditure . .	15,096,692 [3]	51,513,415	23,839,284	27,840,777	31,736,079

[1] Unaudited. [2] Estimates.
[3] Including demobilization expenditure.
[4] Including £30,000,000 for acquisition of Rhodesia Railways.

Receipts from customs duty during the year ended 31 March, 1949, were £3,045,151; income tax, £6,576,500; native tax, £504,604; posts, telegraphs, telephones and radio, £850,297; mining revenue, £132,545 (from royalties and mining fees); stamps and licences, £336,481.

Principal items of expenditure from revenue funds were as follows:—Ordinary expenditure: £1,422,575 for service of loans; £897,331 for price subsidies; £1,099,290 for public health and hospitals; £1,702,472 for education; £839,989 for police; £573,915 for defence and air; £1,132,099 for public works and roads; £727,492 for agriculture and lands (including irrigation); £791,763 for mines; £798,911 for posts and [illegible]

The net amount of the public debt outstanding was, [illegible] 1949, £74,414,330.

Production and Industries.—When responsible government was granted to the colony the British South Africa Company relinquished all rights and interests in the land in Southern Rhodesia, except in the estates which it was already developing and working on 10 July, 1923, but was recognized by the Crown as the owner of the mineral rights throughout both Southern and Northern Rhodesia. In 1933 the mineral rights in Southern Rhodesia were purchased by the Government for the sum of £2,000,000. Land amounting to 21,127,040 acres has been set apart for tribal settlements ('native reserves'). A further 7,859,942 acres have been set aside as native purchase areas, while the area of surveyed and unsurveyed Crown land remaining unalienated and unassigned and available for sale and settlement is 32,685,659 acres. The country is well adapted for agriculture and European settlers. European-owned livestock (1949):—Cattle, 1,188,101; sheep, 108,064; pigs, 37,155; goats, 18,431. Native-owned livestock (1949):—Cattle, 1,815,733; sheep, 207,113; pigs, 69,583; goats, 524,029. Acreage under crops, Europeans only (season 1948–49), maize, 303,735; tobacco, 128,654; groundnuts, 7,337; wheat, 2,395; potatoes, 4,176. Tobacco crop, 1948–49, 83,607,643 lb. wet weight; maize, 1,388,297 bags of 200 lb. Large fruit orchards have been planted, and nearly all fruit trees thrive, the cultivation of oranges and lemons constituting an expanding industry. The sale of citrus fruit amounted to 273,039 cases in 1948–49. The sale of dairy produce is a profitable industry. In 1949, 8,750,000 gallons of milk (gross output) were produced, 1,127,561 lb. of butter and 543,438 lb. of cheese.

Soil Conservation.—In 1941 an act was passed to make provision for the conservation and improvement of the natural resources of the colony. A Natural Resources Board was set up to exercise general supervision and to recommend legislation to the government. The act provides for the voluntary setting up of Intensive Conservation Committees consisting mainly of local farmers who, with government assistance, carry out soil conservation in their areas. Total mileage of protective works pegged, 1929–49, in European areas is 28,235, protecting an area of 653,315 acres. Since 1944, conservation work in all [illegible] has been undertaken by the Department of Native Agriculture.

The 1948 census of industries showed the value of gross output of industries covered as £37,852,000. The value of materials and fuel purchased was £20,592,000, and the net output was £17,259,000. Numbers employed were 85,535, including 11,882 Europeans, and total salaries and wages paid amounted to £9,965,000.

Labour.—The Industrial, Commercial and Municipal Natives' Employment Regulations, of 25 Feb., 1949, regulate the working conditions for

Africans in commerce and general industry in certain areas. The regulations do not apply to railway workers, who already are provided for, farm workers, who have opportunities to cultivate land for themselves not available to town workers, mine workers where fewer than 300 are employed on one property, as this industry is well organized with regard to the treatment of employees, service workers, who are already considered to be adequately provided for, and domestic servants, who have advantages not enjoyed by the average commercial and industrial workers.

For Africans in the industries with which the regulations are concerned the minimum wage is 35*s.* a month with, and 80*s.* a month without, rations, fuel and accommodation laid down. Employees are also to be graded with minimum cash wages ranging from 35*s.* to 190*s.* a month. Provision also is made for a general [illegible] increase in pay for natives who have been in continuous service with one employer, and for increases after the first and second year's service, gratuities for long service, annual leave with pay, sick benefits, overtime and welfare measures.

Mining.—The country contains gold and other minerals. The gold output in 1949 was 528,180 oz., valued at £5,197,074; in 1948, 514,440 oz., valued at £4,437,049. The total value of minerals produced in 1948 was £8,903,469; in 1949, £11,293,201.

Commerce.—Southern Rhodesia, which formed part of the South African customs union system since 1903, terminated its customs union with the Union of South Africa in 1935. On 6 Dec., 1948, however, a Customs Union Interim Agreement was signed between the two countries in Salisbury 'to re-establish a full and complete customs union and to extend such customs union to other African States and Territories.' The agreement establishes a 'Southern Africa Customs Union Council,' composed of one member and alternate to be appointed by each, the Government of Southern Rhodesia and of the Union of South Africa, and a third member and alternate to be appointed by both governments jointly.

Total imports and exports excluding specie (in £ sterling) for 5 years:—

	1945	1946	1947	1948	1949
Imports . . .	12,502,630	20,358,583	33,490,499	42,614,842	54,585,817
Domestic exports . .	15,820,123	18,602,442	20,778,395	25,619,852	29,621,299
Re-exports . . .	2,133,197	2,669,561	2,870,885	3,569,521	4,901,490

Total imports of merchandise from the United Kingdom in 1949 amounted to £28,186,702; from the Union of South Africa, £12,231,050; from the United States, £3,829,145. Domestic exports to the United Kingdom were £16,529,152; to the United States, £1,682,360; to Northern Rhodesia, £2,995,685, and to the Union of South Africa, £2,591,008.

Principal articles of merchandise imported in 1949:—Cotton piece-goods, 36,745,731 yd. (£3,426,033); machinery and parts, £3,135,720; motor cars, 5,223 (£1,793,729); outer garments, £1,453,724; motor trucks and vans, 2,893 (£1,317,538).

Principal articles of Southern Rhodesia produce exported in 1949:—Unmanufactured tobacco, 67,937,005 lb. (£11,665,363); gold bar, 536,011 fine oz. (£5,317,968); raw asbestos, 72,808 tons (£3,982,702); chrome ore, 226,763 short tons (£1,255,109), of which 132,480 were shipped to the United States.

Total trade (in £ sterling) with the United Kingdom (Board of Trade returns) :—

	1938	1948	1949	1950
Imports into U.K. . .	2,304,543	11,407,062	12,475,826	16,746,550
Exports from U.K. . .	3,609,657	15,522,179	23,487,428	24,095,524
Re-exports from U. K. .	44,036	25,404	41,394	61,336

Communications.—*Aviation.*—The Central African Airways Corporation operate regular services for the carriage of passengers, mail and cargo from Salisbury to Tabora (Tanganyika), Nairobi (Kenya), Johannesburg (Union of South Africa), Blantyre–Zomba–Lilongwe (Nyasaland), Dar es Salaam (Tanganyika), Beira (Portuguese East Africa), Livingstone–Lusaka–Ndola (Northern Rhodesia). An internal service is also maintained. Freighter-cum-passenger aircraft specially designed for the carriage of large cargoes are operated on the main line routes.

Railways.—The total mileage of the Rhodesian railway system at 31 March, 1950, was 2,436 miles, of which 1,284 miles were operated within the boundaries of Southern Rhodesia. The system begins at Vryburg in the Cape Colony, and extends through the Bechuanaland Protectorate and Southern and Northern Rhodesia to the Belgian Congo. In addition, the Beira Railways operates 203 miles, and the Shabani Railway, 63 miles. In conjunction with the railways of the Union of South Africa and of Portuguese East Africa it provides through communication from Cape Town to the Congo border (2,153 miles), and (by a line from Bulawayo *via* Salisbury) to the port of Beira on the Indian Ocean (2,020 miles). There are also several branch lines in Southern Rhodesia. A system of road motor services has been organized, having in March, 1950, a total route mileage of 2,720 miles. All shares in the Rhodesia Railways, Ltd., have been purchased by the Government of Southern Rhodesia. The Rhodesia Railways Act, 1949, passed by the Legislative Assembly of Southern Rhodesia, provides for the establishment of a unified railway system for Southern Rhodesia, Northern Rhodesia and the Bechuanaland Protectorate.

Roads.—The construction and maintenance of all the main roads and airfields as well as of certain roads in native reserves and newly developing areas are undertaken by the government. In addition, 42 Road Councils have been formed which are responsible for the roads, other than main roads, in their areas. In 1950, there were 4,686 miles of main roads, 10,030 miles of council roads, and about 20,000 miles of tracks in the native reserves. The main roads are usable throughout the year, except in times of floods.

Estimated number of vehicles, at 31 Dec., 1949 :—Private cars, 26,527; commercial vehicles (excluding farm tractors), 18,065; motor cycles, 2,615.

Post.—On 31 Dec., 1949, there were in Southern Rhodesia 164 post offices, 65 of which are savings bank offices. The postal revenue for the year 1949 was £885,867 and the expenditure £909,623. There is an extensive telephone system in operation with automatic telephone exchanges at Salisbury, Umtali, Bulawayo and Gwelo.

Cable and Wireless, Ltd. operate a wireless station at Salisbury, with telegraphic and phototelegraphic services with London.

On 1 Jan., 1905, a post office savings bank was established, and on 31 Dec., 1949, the balance due to depositors amounted to £9,034,760.

Currency.—Southern Rhodesia coin and currency notes are legal tender in Southern Rhodesia, Northern Rhodesia and Nyasaland. The total

currency on issue to the three territories at 31 March, 1950, including bank-notes outstanding, was £9,919,546. At that date the assets of the currency fund stood at £10,859,084.

Statistical Information.—The Central African Statistical Office, P.O. Box 63, Causeway, S. Rhodesia, originated in 1927 as the Southern Rhodesian Government Statistical Bureau. Ten years later its name was changed to Department of Statistics, and in 1948 it assumed its present title when it took over responsibility for certain Northern Rhodesian and Nyasaland statistics. *Director of Census and Statistics.*—J. R. H. Shaul, O.B.E., M.Sc., B.Com., F.S.S.

NORTHERN RHODESIA.

By an Order in Council, dated 4 May, 1911, the two provinces of North-eastern and North-western Rhodesia were amalgamated under the title of Northern Rhodesia, the amalgamation taking effect as from 17 Aug., 1911. The limits of the territory, as defined by the Order in Council, are 'the parts of Africa bounded by Southern Rhodesia, German South-west Africa (now South-west Africa), Portuguese West Africa, the Congo Free State (now the Belgian Congo), German East Africa (now Tanganyika Territory) Nyasaland and Portuguese East Africa.'

By an Order in Council dated 20 Feb., 1924, the office of Governor was created, an executive council constituted and provision made for the institution of a legislative council. This latter council has, since 1945, an unofficial majority. On 1 April, 1924, the British South Africa Company was relieved of the administration of the territory by the Crown.

The Legislative Council was, in 1950, composed of 9 nominated official members, 10 unofficial elected members, 2 nominated European unofficial members in African interests, and 2 African members elected by the African Representative Council. There are also five unofficial members (one of whom must be a representative of African interests) in the Executive Council, and by an agreement made between the unofficial members and the Secretary of State for the Colonies in June, 1948, and reaffirmed in April, 1949, the view of the unofficial members in Executive Council carries the same weight as the views of unofficial members of the Legislative Council.

Northern Rhodesia has an area of 287,640 square miles, and consists for the most part of high plateau country, covered with thin forest. Some of the country is suitable for farming and contains areas carrying good arable and grazing land. The census population on 15 Oct., 1946, was as follows:—Europeans, 21,907; Asiatics, 1,117; coloured, 804. Estimated population at 30 June, 1950, was 36,000 Europeans, 3,100 Asiatics and coloured, 1,700,000 Africans. European vital statistics, 1949:—Births, 867 (1948, 801); marriages, 265 (1948, 270); deaths, 160 (1948, 158); infantile mortality, 21 (1948, 35). Immigration (1948), 5,516; (1949), 6,541.

The territory is divided into 6 provinces. The seat of government is at Lusaka, on the railway about 30 miles north of the Kafue River, having been moved from Livingstone, the old capital, on 28 May, 1935. The other important centres are Ndola, Luanshya, Mufulira, Kitwe and Chingola, on the copper belt; Broken Hill, the oldest mining township; Fort Jameson, a tobacco farming place; Kasama and Mongu Lealui, the administrative centres of the Northern and Barotse Provinces respectively. The police force, called the Northern Rhodesia Police, is composed of natives, with European officers and non-commissioned officers; the provincial administration also have at their disposal a force of messengers, a body of whom, varying in number from 12 to 30, is stationed at every district headquarters.

The Northern Rhodesia Regiment, which has been incorporated into East Africa Command, has African rank and file and European officers and non-commissioned officers, who are seconded from the British Army. During the Second World War the Regiment was expanded to a total of 7 battalions.

There were in 1951, 35 European schools, inspected by government. For Africans there were 1,319 schools, all of which are aided by government. In addition there were 375 unaided mission schools.

Northern Rhodesia has been united in a customs union with the Union of South Africa since 1911.

Revenue and expenditure (in £ sterling) for 6 years :—

	1946	1947	1948	1949	1950	1951 [1]
Revenue . .	3,362,141	4,302,926	6,715,517	10,583,863	10,484,714	14,417,630
Expenditure .	2,898,788	4,534,132	6,208,455	10,600,457	10,182,055	14,375,310

[1] Estimates.

The revenue in 1949 was made up as follows:—Customs revenue, £1,697,913; licences and taxes, £7,008,211; postal revenue, £488,881; fees, etc., £168,530; interest and loan repayments, £262,886. The public debt at 31 Dec., 1950, amounted to £4,627,000,

Gross imports of merchandise, 1948, £16,098,874; exports, £28,129,623; re-exports, £339,657.

Total trade (in £ sterling) with the United Kingdom (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K. .	4,089,403	15,593,189	20,172,249	19,481,579	22,748,424
Exports from U.K. .	1,262,058	1,954,494	3,465,558	5,388,474	6,729,530
Re-exports from U.K.	9,436	1,932	2,034	6,701	6,216

Principal agricultural products are maize (production in 1948–49, 344,000 bags; estimate 1950–51, 850,000 bags), tobacco (1949, circa 6,300,000 lb.) and cattle (about 879,000 in 1950). The most important timber is Rhodesian 'redwood' (*Baikiaea plurijuga*).

The total value of minerals produced during 1950 was £48,702,142, made up as follows :—

Mineral	Weight	Value	Mineral	Weight	Value
		£			£
Gold . . .	1,432 oz.	17,136	Lead . . .	13,685 tons	1,467,754
Silver . . .	173,304 oz.	43,258	Manganese ore (11·66% Mn) .	1,723 tons	2,585
Cobalt alloy (37·71% Co) .	31,914 cwt.	1,096,337	Selenium . .	27,056 lb.	21,645
Copper (blister) .	198,760 tons	30,678,420	Tin concentrates (72% Sn) . .	5·4 tons	2,068
Copper(concentrates) (20·79% Cu) .	259 tons	8,695	Zinc . . .	22,715 tons	2,740,588
Copper (electrolytic)	76,804 tons	12,578,089	Limestone . .	107,160 tons	48,221
Copper (other) .	30 tons	3,034	Mica . . .	4,395 lb.	1,094

High-grade iron ore fields near Lusaka are being investigated, and in 1949 investigations started into the Territory's coal resources in several

different areas. The 1948 and 1949 production of copper was considerably affected by the inability of the mines to obtain sufficient coal, a deficiency that was only partially offset by converting some of their plant to burn wood fuel. Coal was discovered in Aug., 1950, at Neganega south of Kafue.

The railway runs *via* the Victoria Falls, Lusaka, Broken Hill and Ndola and extends to the Belgian Congo (507 miles). There are 6 branch lines from Ndola to Luanshya (Roan Antelope Copper Mines) (24 miles); from Ndola to Nkana (41 miles), Mufulira (82 miles) and Chingola (82 miles). There is a private line from Livingstone to Mulobezi and Mululwe. The whole of the Rhodesia Railways system was in 1949 acquired jointly by the Northern and Southern Rhodesia and Bechuanaland Governments. The Zambezi, Kafue, Chambesi, Luangwa and other rivers are navigable for a considerable portion of their extent.

There are 62 post offices, 15 being money order offices, and 45 telegraph offices. Telegraph and telephone lines run alongside the railway from the Southern Rhodesia border at Victoria Falls to the Congo border north of Ndola with branches to the principal towns of the Copper Belt. All the other principal centres are provided with radio communication.

The airport at Livingstone, opened in Aug., 1950, is the largest and most up-to-date airport in Southern Africa. The main internal air services, operated by Central African Airways, connect Lusaka with Fort Jameson (thrice weekly); Balovale *via* Livingstone and Mongu (once weekly), and Abercorn *via* Ndola and Kasama (once weekly). Through services are provided by the B.O.A.C. Hermes aircraft service which calls twice weekly in either direction at Livingstone airport, and the Viking service between Johannesburg and Nairobi, which calls at Salisbury, Lusaka and Ndola.

There are hydro-electric power stations at Mulungushi and Lunsemfwa, which serve the Broken Hill Mine and township, and at the Victoria Falls, which serves Livingstone.

There are 2 registered European trade unions, the Northern Rhodesia Mineworkers' Union and the Rhodesian Railway Workers' Union; and 4 African trade unions (Mineworkers, Shop Assistants, Drivers, General Workers).

Governor.—Sir Gilbert McCall Rennie, K.C.M.G., M.C. (appointed 10 Nov., 1947).

Chief Secretary.—R. C. S. Stanley, C.M.G., O.B.E. (24 Aug., 1947).

NYASALAND PROTECTORATE.

The Nyasaland (until 1907 British Central Africa) Protectorate, constituted on 15 May, 1891, lies along the southern and western shores of Lake Nyasa (the third largest lake in Africa, about 360 miles in length and from 10 to 55 miles wide), and extends towards the Zambezi. It is administered under the Colonial Office by the Governor and Commander-in-Chief, assisted by an executive and a legislative council, both consisting of official, and unofficial nominated members, the Governor having the right of veto (Order in Council of 4 Sept., 1907). The laws consist of local ordinances duly enacted, with such British Acts as are of general application.

Land area, 37,374 square miles, divided into three provinces, each in charge of a Provincial Commissioner, and nineteen districts, each administered by a District Commissioner. Estimated population, at the end of 1948, was 3,000 Europeans, 4,000 Asiatics and 2,400,000 Africans. The chief settlements are Blantyre and Limbe in the Shiré Highlands, with about 600 European inhabitants; others are Zomba (the seat of government), Cholo, Lilongwe and Mlanje; on Lake Nyasa are Salima, Fort Johnston, Kota-Kota, Chinteche, Nkata Bay, Likoma and Karonga. There are good motor roads in all directions and life and property are safe.

Education.—Education is controlled by the Education Department. European primary education is available up to standard IV at 2 government day schools at Zomba and Lilongwe, and up to standard VI at a government boarding school at Blantyre and 2 grant-aided boarding schools at Limbe and Mkhoma. There are no facilities for European secondary education.

Grants-in-aid are paid to mission societies for native education. The government has established a training centre for native teachers and has financed the establishment of 2 secondary schools for Africans. There were, in 1950, 67 principal mission stations, 654 assisted schools and 3,922 unassisted schools, with a total roll of 226,878 pupils and an average attendance of 166,825. The total grant-in-aid paid by government to missionary societies in 1949 was £93,043 in respect of native education. The grant-in-aid to the 2 secondary schools was £6,811. The grant-in-aid for European education plus educational assistance to Nyasaland children attending schools in Southern Rhodesia, South Africa and the United Kingdom was £8,793, £1,242 was paid in bursaries to European children attending schools in Southern Rhodesia, £349 to Indians and £769 to Eurafricans. The grants-in-aid to the 5 Indian schools amounted to £2,303 and £1,200 to the Eurafrican school.

Justice.—Justice is administered in the High Court, which has jurisdiction in civil and criminal matters and also as a Court of Admiralty. Subordinate courts are held by magistrates in the various districts. Appeals from decisions of the High Court are heard by the Rhodesia and Nyasaland Court of Appeal.

Production.—With the exceptions of sugar and wheaten flour, the country is normally self-supporting in all agricultural products and great

efforts have been made to stimulate the production of food and economic crops for export. Owing to the serious drought during 1949 the export of foodstuffs was greatly restricted, and export figures for economic crops, with the exception of tobacco, showed a marked decline below those of 1948.

Tobacco forms a large proportion of the total exports. In 1948, 23,846,148 lb. (1949, 25,491,330 lb.) were exported. Tea cultivation is centred round Mlanje and Cholo; acreage in 1949 was 22,661 acres; exports amounted to 12,769,952 lb. Cotton exports (in lint) were 4,905,842 lb. in 1948 (1949, 2,930,528 lb.). Export of pulses was 3,405,732 lb. (1949, 614,315 lb.); of groundnuts, 3,060 lb. (1949, nil), and tung oil, 801,684 lb. (1949, 642,033 lb.). Livestock in 1949:—Cattle, 289,870; goats, 349,047; sheep, 51,042; pigs, 91,220; asses and mules, 159; horses, 62.

The principal imports in 1948 were iron and steel goods (£186,000; 1949, £291,500) and cotton manufactures (£1,637,000; 1949, £1,192,000). There were marked increases in imports of foodstuffs, industrial machinery, vehicles, cutlery, hardware and cycles. Footwear imports increased from 3,781 dozen pairs in 1948 to 7,097 dozen pairs in 1949.

The trade ports are Port Herald (Lower Shiré), Chileka, Blantyre, Luchenza, Limbe, Chipoka, Kota-Kota, Fort Manning, Karonga and Fort Johnston (Lake Nyasa).

Expenditure .	639,723	744,589	846,562	981,441	2,173,242	—

[1] Excluding specie, goods in transit and government imports.

Exports to the United Kingdom, 1950, £4,010,402; 1949, £4,486,641; 1948, £3,290,443; imports from the U.K., 1950, £2,472,406; 1949, £2,610,026, 1948, £1,754,019.

The ordinary revenue in 1949 was:—Customs, £893,000; taxes and licenses, £755,870; fees of court, £63,506; posts and telegraphs, £85,085; rents, £35,090; interest, £14,465; miscellaneous, £150,450; widows and orphans pension fund contributions, £20,777. Public debt, 31 Dec., 1949, £4,343,000.

There are military, volunteer reserve and civil police forces.

Communications.—There is a Marine Transport Department on Lake Nyasa, operated by Nyasaland Railways, Ltd. Lake transport registered in Nyasaland consists of 1 motor vessel, 4 steamers and about 60 dhows and lighters. A new lake steamer was put in commission in 1951.

There are 46 post offices. The post office savings bank had 13,816 depositors at the end of 1949; deposits, £449,000. There is a 3 ft. 6 in. gauge railway system extending from the Port of Beira, in Portuguese East Africa, to Salima near Lake Nyasa (496 miles) crossing the Zambezi at Sena (199 miles) by the Lower Zambezi Bridge and passing through Blantyre (353 miles). The road system comprises about 4,000 miles. Good motor road communication with South Africa exists and the extension northwards links Nyasaland with the Great North Road through Northern Rhodesia, Tanganyika Territory and Kenya Colony.

Several aerodromes, landing grounds and emergency landing grounds have been constructed, and the principal centres of Blantyre and Lilongwe are suitable for aircraft up to 30,000 lb. gross weight. Regular services for mails and passengers fly between Blantyre and Salisbury, Fort Jameson. There is a telegraph line through the Protectorate connecting southwards with Cape Town and northwards with Tanganyika, Kenya and Uganda. Telegraphs are controlled by the Government. Wireless stations are situated at Zomba, Mzimba, Karonga, Mzuzu, Likoma Island, Mkhoma, Lilongwe. Public Radio-telephone service is available to Salisbury and other places in Southern Rhodesia. Mail services operate daily to the principal places in the Southern and Central Provinces, and twice weekly to all other points.

Electric light and power plants have been installed at Zomba, Blantyre and Limbe.

Banking and Money.—At Blantyre, Zomba and other centres there are branches of the Standard Bank of South Africa and at Blantyre and Limbe there are branches of Barclays Bank (Dominion, Colonial & Overseas). The currency consists of British coin, gold, silver and bronze, and Rhodesian bank-notes, silver and cupro-nickel coin.

The rainy season in Nyasaland lasts from November to April.

Governor and Commander-in-Chief.—Sir Geoffrey Colby, K.C.M.G. (appointed March, 1948).

Chief Secretary.—Frank Leslie Brown, C.M.G., O.B.E., M.C. (appointed 5 April, 1945).

Government Commissioner in London.—S. S. Murray (11b, Lower Regent Street, S.W.1.).

The three Territories in Southern Africa which are not part of the Union: Basutoland, the Bechuanaland Protectorate and Swaziland, are administered, under general direction and control from the Commonwealth Relations Office in London, by a High Commissioner appointed by the King. The High Commissioner also holds the office of High Commissioner for the United Kingdom in the Union of South Africa. He is the sole legislative authority for these Territories, and is in much the same position as a Colonial Governor, but responsible to the Secretary of State for Commonwealth Relations. The day to day government of the Territories under the High Commissioner is conducted by 3 Resident Commissioners. The Territories are generally referred to for convenience as the High Commission Territories in South Africa.

All three Territories are members of the South African customs union system, by agreement dated 29 June, 1910.

Total trade (in £ sterling) of the 3 territories with the United Kingdom (Board of Trade returns) :—

BASUTOLAND.

Geography and Climate.—Basutoland is bounded on the west by the Orange Free State, on the north by the Orange Free State and Natal, on the east by Natal and East Griqualand, and on the south by the Cape Province. The altitude varies from 5,000 ft. to 11,000 ft. The climate is dry and rigorous, with extremes of heat and cold both seasonal and diurnal. The temperature varies from a maximum of 93° F. to a minimum of 11° F. The rainfall is capricious, the average being about 30 inches per annum.

History and Constitution.—Basutoland first received the protection of Britain in 1868 at the request of Moshesh, the first paramount chief. In 1871 the territory was annexed to the Cape Colony, but in 1884 it was restored to the direct control of the British Government through the High Commissioner for South Africa. The country is now governed by a Resident Commissioner under the direction of the High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland. For administrative purposes the country is divided into 9 districts under District Commissioners as follows :—Maseru, Qacha's Nek and Mokhotlong, Leribe, Butha-Buthe, Teyateyaneng, Mafeteng, Mohales Hoek, Quthing. Each of the districts is sub-divided into wards, most of which are presided over by hereditary chiefs allied to the Moshesh family, who are responsible to the paramount chief in all matters relating to native law and custom. The heir to the Paramountcy is Bereng, the minor son of Ma'Bereng (second wife of the late Paramount Chief Seeiso Griffith), for whom Ma'Ntsebo (the late Paramount Chief's principal wife) acts as regent. In 1903 there was established a Basutoland council, consisting of 100 members. The council meets annually to discuss domestic affairs of the territory, but it has no legislative authority. District councils were established in each district in 1944.

Area and Population.—The area is 11,716 square miles. According to the 1946 census, the population numbered 561,289 natives, 1,689 Europeans, 274 Asiatics and 602 coloured, totalling 563,854. In addition over 35,000 Basuto migrant labourers were employed on the Witwatersrand gold mines at the time of the census, and it is probable that a further 75,000 were engaged in other occupations. Basutoland is a purely native territory, and the few European residents consist of government officials, traders, missionaries and artisans.

Education.—Though school attendance is not compulsory, about two-thirds of the Basuto of school-going age attend school. There were 811 government and government-aided schools in the territory during 1949, of which 11 were institutions (secondary, normal and technical), 57 inter-

mediate schools and 743 elementary vernacular schools; in addition, there were 94 unaided or private schools. In 1949 the total enrolment in primary schools was:—Government schools, 836; aided mission schools, 83,680; unaided and private mission schools, 5,353; institutions, 908. There were also 6 small schools for European children with an enrolment of 113. The expenditure on education for the year 1949–50 was estimated at £166,745 from revenue, plus £11,506 from the Colonial Development and Welfare Fund.

Finance.—Revenue is derived mainly from native tax and customs and excise duties. Other major sources of revenue are posts and telegraphs, income tax, wool and mohair export duty. Under the native tax law every adult male pays 34*s.* or 40*s.* per annum (dependent [illegible] and if he has more than one wife he pays 25*s.* per annum for ea [illegible] wife up to a maximum of 90*s.* tax in all. Native tax receipts for 1949–50 amounted to £267,951. Income tax is levied on the lines of that of the Union of South Africa. Surcharges of 40% and 50% are added to the sums assessed on married and unmarried persons respectively. The yield for 1949–50 was £159,346. Basutoland, a member of the South African Customs Union, is dealt with for customs purposes as a part of the Union of South Africa, receiving a fixed percentage (0·88575%) of the total customs collected on imports into the Union. The revenue from customs during 1949–50 amounted to £284,000.

	1943–44	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50 [2]

[1] Including £57,337 from the Colonial Development and Welfare Fund.
[2] Estimates.

There was an excess of assets over liabilities of £433,491 on 31 March, 1950.

Police.—The police force on 30 Sept., 1950, numbered 17 European officers and the African personnel, consisting of 348 other ranks.

Production.—The chief crops are wheat, maize and sorghum; barley, oats, beans, peas and other vegetables are also grown. The estimated yields for wheat, maize and sorghum in 1949 were only 60,000, 50,000 and 30,000 bags of 200 lb. respectively, owing to a severe drought. Sheep-breeding is in a high state of efficiency.

The prosperity of the territory depends almost entirely on its agriculture, so that soil conservation and the improvement of crops and pasture are matters of vital importance. By the end of 1948 a total area of over 475,485 acres had been protected against soil erosion by means of terracing, training banks and grass strips. A vigorous campaign to encourage the manuring of lands has resulted in increased yields of maize and sorghum, and strong efforts are being made to secure the general introduction of rotational grazing n the mountain area.

Commerce.—The following are the total values of imports and exports by traders during recent years (in £ sterling):—

	1938	1945	1946	1947	1948	1949
Imports .	749,126	1,624,734	2,056,182	1,628,521	1,807,246	2,244,117
Exports .	401,512	501,269	485,204	887,773	1,333,269	1,275,437

Principal imports are blankets, ploughs, clothing, tin ware and other native requirements, and principal exports in 1949 were wool (9,708,212 lb., value £976,698), mohair (1,381,523 lb., value £127,661), wheat and wheat meal (1,770 bags, value £2,602), sorghum (3,256 bags, value £5,622), maize and maize meal (4,144 bags, value £4,647).

Communications.—A railway built by the South African Railways, 16 miles, connects Maseru with the Bloemfontein–Natal line at Marseilles station. There are 523 miles of gravel-surfaced main roads along the western border of Basutoland, with outlets to the border ports of exit. Regular motor services of the South African Railways operate between Zastron (O.F.S.) and Quthing and Mohale's Hoek, and between Fouriesburg (O.F.S.) and Butha–Buthe. In addition to the main roads there are 341 miles of by-roads leading to trading stations and missions. Communications into the mountainous interior are by means of bridlepaths suitable only for riding and pack animals.

Currency.—The currency is the same as in the Union of South Africa.

Resident Commissioner.—A. D. Forsyth Thomson, C.M.G., C.V.O., C.B.E. (appointed Nov., 1946).

BECHUANALAND PROTECTORATE.

Area and Population.—The Bechuanaland Protectorate comprises the territory lying between the Molopo River on the south and the Zambezi on the north, and extending from the Transvaal Province and Southern Rhodesia on the east to South-West Africa on the west. The climate is on the whole sub-tropical and the atmosphere throughout the year is very dry. Area about 275,000 square miles; population, according to the census of 1946:—Europeans, 2,325; Asiatics and coloured, 1,804; Africans, 292,754. The most important tribes are the Bamangwato (100,987), whose capital is Serowe (population 15,935), 32 miles west of the railway line at Palapye; the Bakgatla (20,111), under Chief Molefi; the Bakwena (39,826), under Chief Kgari; the Bangwaketse (38,557), under Chief Bathoeñ, the eldest son of the late Chief Seepapitso; the Batawana (38,724), under Regent Mrs. E. P. Moremi, assisted by a council, during the minority of the heir to the late Chief Moremi; the Bamalete (9,500), under Chief Mokgosi; the Batlokwa (2,530), under Chief Kgosi Matlala; and the Barolong (5,516), under Chief Lotlamoreng.

Government.—In 1885 the territory was declared to be within the British sphere; in 1889 it was included in the sphere of the British South Africa Company, but was never administered by the company; in 1890 a Resident Commissioner was appointed, and in 1895, on the annexation of the Crown Colony of British Bechuanaland to the Cape of Good Hope, new arrangements were made for the administration of the protectorate, and special agreements were made in view of the extension of the railway north-

wards from Mafeking. Each of the chiefs rules his own people much as formerly, under the protection and authority of the King, who is represented by a Resident Commissioner, acting under the High Commissioner The headquarters of the administration is in Mafeking, in the Cape Province, where there is a reserve for imperial purposes.

The territory is divided for administrative purposes into 8 districts, each under a district commissioner. There is a tax of 28*s.* on every male native in the territory, and under the native treasuries scheme, 35% of the tax collected in each native reserve is transferred to the native treasury of the tribe concerned, which manages expenditure upon such items as education, tribal stock improvement and native courts. Non-natives are subject to income tax. A graded tax on natives wholly accrues to the native treasuries. Licences for the sale of spirits are, as a rule, granted only at certain railway stations and hotels. The police force consists of 35 European officers and other ranks, and 214 African ranks.

Education.—There were 9 European, 4 coloured and 153 African schools in 1949. One of the European schools is maintained, the others are assisted by Government. Total Government expenditure on education in 1948–49 was:—European, £8,577; coloured, £895; African, £51,537. The native treasuries contribute substantially to African education. Under the Director of Education, the schools are controlled in most of the reserves by school committees with missionary and African representation. In addition, there is a government centre for the training of teachers and 4 mission schools, 1 of which supplies homecrafts training for adolescents.

Welfare.—There are 4 government hospitals, 4 government health centres or dispensaries, 3 mission hospitals and 2 missionary maternity centres. During 1949, 327,208 outpatients received medical attention, and 6,083 were treated in hospital.

Production.—Cattle-rearing and dairying are the chief industries, but the country is more a pastoral than an agricultural one, crops depending entirely upon the rainfall. In 1950 the estimated number of cattle was 1,049,966; sheep and goats, 694,465. Livestock and hides to the estimated value of £1,447,782 were exported in 1950, mainly to the Union of South Africa; this export produces the greater part of the taxable national income.

Gold and silver to the total value of £3,234 were mined in 1950.

Finance.—Revenue and expenditure (in £ sterling) for 6 years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944–45	426,991	384,175	1947–48	482,887	475,619
1945–46	416,570	356,067	1948–49	561,289	611,247
1946–47	469,075	405,071	1949–50	680,209	676,045

Chief items of revenue, 1949–50:—Income tax, £207,709; customs, £97,058; native tax, £88,348; posts, £64,572; licences, £20,030. Chief items of expenditure, 1949–50:—Resident commissioner and government headquarters, £35,090; district administration, £35,996; education, £31,267; medical, £67,751; police, £66,964; public works (ordinary and recurrent), £116,979; veterinary, £92,737. Excess of assets over liabilities on 31 March, 1950, £274,539.

When the Union of South Africa was established, an agreement was made

with the Union Government on 29 June, 1910, under which the previously existing customs union was continued. Duty on all dutiable articles imported into the protectorate is collected by the Union customs department and paid into the Union treasury, a lump sum representing a certain proportion of the annual customs revenue of the Union being paid over to the protectorate.

Commerce.—Imports in 1949 amounted to £1,314,733; exports to £1,159,868. Chief items of import:—General merchandise (£1,049,934), vehicles (£102,581), maize (£63,256), cattle (£37,150), wheat (£27,534). Chief items of export:—Cattle (£915,239), hides (£70,646), butter (£46,629), sheep and goats (£35,969).

Communications.—The telegraph from the Cape of Good Hope to Rhodesia and the railway extending northwards from the Cape of Good Hope traverse the protectorate. Wireless communication has been established between headquarters at Mafeking and various police stations. There are 6 post offices and 28 agencies; receipts, in 1949–50, £58,809; expenditure, £15,910. In 1949–50, £39,919 was deposited in the savings bank and £62,088 withdrawn.

There are about 1,000 miles of main roads; gravel surfacing has been used on some stretches.

The currency is South African. The Standard Bank of South Africa, Ltd., and Barclays Bank (D., C. & O.), hold weekly agencies at Lobatsi.

Resident Commissioner.—E. B. Beetham, C.M.G., C.V.O., O.B.E.

SWAZILAND.

Area and Population.—Swaziland is bounded on the north, west and south by the Transvaal Province, and on the east by Portuguese territory and Zululand. The area is 6,704·6 square miles.

The territory is divided geographically into three longitudinal regions of roughly equal breadth, running from north to south, and known locally as the high, middle and low or bushveld. The mountainous region on the west rises to an altitude of over 4,000 feet. The middle veld is about 2,000 feet lower, while the low veld, bounded on the east by the Lebombo Mountains, has an average height of not more than 1,000 feet. The mountainous region, or high veld, is free from malaria, which is present in the low veld, and in a slight degree in the middle veld during some of the summer months. The high veld and the middle veld are remarkably well watered. Innumerable small streams unite with the large rivers, which traverse the country from west to east. Except for these the low veld is not very well watered. The climate is good except for a few months in summer, when the heat is somewhat excessive in parts. The high veld portions, however, seldom experience any excessive heat, a spell of hot weather being almost invariably followed by cooling mists.

Population, census 1946, 185,214; namely, Europeans, 3,204; Natives (Bantu), 181,269; coloured, 735; Asiatics, 6. Estimated population, 1949,

185,500. There is no compulsory registration for Natives. European births (1949), 83; deaths, 24.

Government.—The Swazis are akin to the Zulu and other tribes of the south-eastern littoral. Up to about 100 years ago they occupied the country just north of the Pongola River, but a hostile chief in their vicinity forced them farther north, and, under their chief Sobhuza, they then occupied the territory now known as Swaziland. This chief, who died in 1839, was succeeded by Mswazi II. The further order of succession has been:—Ludonga, Mbandini and Bhunu, whose son, Sobhuza II (Hon. C.B.E., 1950), was installed as Paramount Chief in 1921, after a long minority, during which his grandmother, Labotsibeni, acted as regent.

The many concessions granted by Mbandini necessitated some form of European control, notwithstanding the fact that the independence of the Swazis had been guaranteed in the conventions of 1881 and 1884, entered into between the British Government and the Government of the South African Republic. In 1890, soon after the death of Mbandini, a provisional government was established representative of the Swazis, the British and the South African Republic Governments. In 1894, under convention between the 2 European governments, the South African Republic was given powers of protection and administration, without incorporation, and Swaziland continued to be governed under this form of control until the outbreak of the Boer War in 1899.

In 1902, after the conclusion of hostilities, a special commissioner took charge, and under an order-in-council in 1903 the Governor of the Transvaal administered the territory, through the Special Commissioner, until the year 1907, when under an order-in-council (1906) the High Commissioner assumed control and established the present form of administration. Previous to this, steps had been taken for the settlement of the concessions question by the definition of the boundaries of the land concessions and their partition between the concessionaires and the natives. The boundaries of the mineral concessions were also defined and all monopoly concessions were expropriated. Title to property is, therefore, now clear.

An elected advisory council, representative of the Europeans, was established in 1921 to advise the administration on purely European affairs. The advisory council was reconstituted in Dec., 1949.

The seat of the administration is at Mbabane; altitude, 3,800 feet; European population, 554.

Education.—During 1949 there were 7 schools for Europeans, 6 of which were either maintained by government or received a grant in aid. All of these schools provide primary education and 2 provide secondary education. The total enrolment was 560. There were 4 schools for Eurafrican children, 2 of which received government assistance; the enrolment was 258. There were 176 native schools falling under the direct superintendence of the missions, 3 national schools financed from the Swazi National Fund, 5 government controlled central schools and a number of small tribal schools, all providing primary education. The native trades school at Mbabane provides courses of training in carpentry, building and cabinet making. The total enrolment was 12,116.

Justice.—A High Court, coming on circuit twice a year and having full jurisdiction, and subordinate courts presided over by District Officers are in existence. A Swaziland police force was created in 1907; authorized strength (1949), 24 Europeans and 130 natives. During 1949 there were

6,261 convictions in subordinate courts and 28 convictions in the High Court. Native chiefs exercise jurisdiction according to native law and customs in all civil matters between natives, subject to a final appeal to the High Court of Swaziland.

Finance.—Revenue and expenditure (in £ sterling) for 6 years :—

	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50 [1]
Revenue .	256,788	491,903	446,784	472,412	422,078	476,570
Expenditure.	303,834	462,063	457,387	523,335	481,970	457,811

[1] Estimate.

Chief items of revenue, 1949–50:—Native tax, £53,000; customs and excise, £50,000; posts and telegraphs, £30,000; licences, £18,720; income tax, £185,000; base metal royalty, £23,550. Chief items of expenditure, 1949–50:—Headquarters, £30,000; district administration, £19,940; police, £37,707; public works, £38,750; medical, £43,904; education, £45,021; veterinary, agriculture and forestry, £64,000; pensions and gratuities, £8,162; posts and telegraphs, £19,025.

The public debt amounted to £36,225 at the end of 1949.

Production.—The agricultural and grazing rights of natives are safeguarded and delimited. The agricultural products are cotton, tobacco, maize (the staple product), sorghums, pumpkins, groundnuts, beans and sweet potatoes. It is sometimes necessary to import maize from the Union of South Africa and elsewhere. Stock numbers approximately (1949):—Cattle, 512,344, of which 77,349 were owned by Europeans; sheep and goats, 145,543. About 114,000 sheep were brought into Swaziland from the Transvaal for winter grazing.

The territory produces a large tonnage of asbestos from the Havelock Mine, Emlombe, north-west Swaziland, and is still producing small quantities of tin, entirely from alluvial and eluvial sources. The main production of gold comes from the Pigg's Peak Mine, but there are also two smaller producers. There is a deposit of barytes with large proved resources on the Londosi river in Swaziland, near Steynsdorp in the Transvaal. Development is proceeding and a small quantity of the mineral is being produced. There are other proved deposits of semi-anthracitic coal in the low veld, and haematite in the north-west mountain region. There are numerous prospects of talc, fluorspar, calcite, cassiterite, gold asbestos, monazite, kaolin, euxenite, coal corundum, galena, vermiculite; all of which require detailed investigation.

Geological work and investigation of mineral occurences has been organized by a small geological survey department since 1944. This department is being considerably expanded with funds made available under the Colonial Development and Welfare Act of 1945.

Mineral development in general is hampered by the complicated nature of mineral ownership, overlapped in some cases by native reserve areas, and the lack of cheap transport facilities.

Gold is subject to a tax of 10% on profits; base metals to a royalty of 2½% on output; in addition to any rentals now payable.

Exports.—By agreement (dated 29 June, 1910) with the Union of South Africa, Swaziland is united in a customs union with the Union of South Africa and receives a *pro rata* share of the customs dues collected. Chief exports,

1949, were:—Live cattle, 19,965 head, valued at £258,069; hides and skins, £61,160; bonemeal, £4,138; butter, £27,421; tobacco, £43,385; groundnuts, £13,145; gold, £25,443; pigs, £20,000; tin, £17,528.

Communications.—There is daily (except Sundays) communication by railway motor-buses between Bremersdorp, Mbabane and Breyten; Bremersdorp, Mankaiana and Piet Retief; Piet Retief and Hlatikulu; 5 days weekly between Bremersdorp and Stegi; 3 days weekly between Bremersdorp and Gollel; Gollel and Piet Retief; Gollel and Ingwavuma; twice weekly between Bremersdorp and Hlatikulu, and Bremersdorp and Balegane. There are 205 miles of trunk road, 476 miles of main road and 443 miles of branch roads. There are telegraph and telephone offices at Mbabane, Pigg's Peak, Bremersdorp, Ezulwini, Hlatikulu, Dwaleni, Mahamba, Stegi, Nsoko, Emlembe, Goedgegun, Hluti and Gollel.

Currency and Banking.—The currency is British and Union of South African coin, also coins of the late South African Republic, which are of similar denomination to the British. Barclays Bank (Dominion, Colonial & Overseas) has branches at Mbabane and Bremersdorp, and the Standard Bank of South Africa, Ltd., at Bremersdorp and Mbabane.

Resident Commissioner.—E. B. Beetham, C.M.G., C.V.O., O.B.E. (appointed 25 Aug., 1946).

NIGERIA.

History and Constitution.—This territory comprises a number of areas formerly under separate administrations. Lagos, ceded in August, 1861, from a native king, was placed under the Governor of Sierra Leone in

1866. In 1874 it was detached, together with the Gold Coast Colony, and formed part of the latter until January, 1886, when a separate 'colony and protectorate of Lagos' was constituted. Meanwhile the National African Company had established British interests in the Niger valley, and in July, 1886, the company obtained a charter under the name of the Royal Niger Company. This company surrendered its charter to the Crown in 1899, and on 1 January, 1900, the greater part of its territories was formed into the new protectorate of Northern Nigeria. Along the coast the Oil Rivers protectorate had been declared in June, 1885. This was enlarged and renamed the Niger Coast protectorate in 1893; and on 1 January, 1900, on its absorbing the remainder of the territories of the Royal Niger Company, it became the protectorate of Southern Nigeria. In February, 1906, Lagos and Southern Nigeria were united into the 'colony and protectorate of Southern Nigeria,' and on 1 January, 1914, the latter was amalgamated with the protectorate of Northern Nigeria to form the 'colony and protectorate of Nigeria,' under a Governor.

Lagos is the seat of the Central Government, and the protectorate is for administrative purposes divided into three groups of provinces, each under a chief commissioner subject to the final control and authority of the Governor: the northern provinces (headquarters Kaduna), the western provinces (headquarters Ibadan) and the eastern provinces (headquarters Enugu). The colony area is administered by the Governor, with the Commissioner of the colony as chief executive officer.

The trusteeship territory of the Cameroons is integrated with Nigeria for administrative and customs purposes. A Commissioner of the Cameroons has been appointed.

The executive council of the colony was made, from 1 January, 1914, the executive council of the protectorate also. It consists of a few of the senior officials, and since 1 October, 1942, of 3 unofficial members; in addition, 4 Africans were appointed in Aug., 1949, to serve on the executive council for one year.

A legislative council came into force on 1 Jan., 1947. This council legislates for the whole of Nigeria. It consists of the Governor as president, 13 *ex-officio* members, 3 nominated official members, 24 unofficial members and 4 elected members. The unofficial members are 4 members of the House of Chiefs appointed by that House, 16 members of the 3 regional Houses of Assembly (14 appointed by those Houses and 2 by the Governor), 1 nominated member for the colony and 3 nominated members to represent interests not otherwise adequately represented (appointed by the Governor). In addition, there are a House of Chiefs and a House of Assembly for the northern provinces, a House of Assembly for the western and a House of Assembly for the eastern provinces, each House of Assembly having an unofficial majority.

Governor of Nigeria.—Sir John Macpherson, G.C.M.G. (sworn in 14 April, 1948).

Chief Secretary to the Government.—A. E. T. Benson.

There are altogether 25 provinces, including the Cameroons, each under the immediate control of a Resident. Much local administration is carried out by native chiefs and councils who have statutory powers.

Climate.—Most of the rain falls between April and Sept. in the north, and March and Nov. in the south. During the dry season the Harmattan blows from the north-east, bringing with it a haze of dust. The rainfall is highest on the south-east coast, with an average of 150·99 in. at Bonny and

145 in. at Forcados. At Lagos there were 70 in. in 1947. In the middle of the country Kaduna has an average of 43·55 in., and in the north Katsina has 28 in. and Sokoto 25·45 in. In the Cameroons the rainfall varies from 355 in. on Cameroons Mountain on the coast to 25 in. at Dikwa, near Lake Chad.

Area and Population.—Area approximately 372,674 square miles, including the Cameroons under British trusteeship; population 1949 (estimate), 25,000,000. Northern provinces :—281,703 square miles, 12,980,000 population. Eastern provinces :—45,443 square miles, 5,200,000 population. Western provinces :—44,147 square miles, 4,350,000 population. Colony :—1,381 square miles, 450,000 population.

The populations of the largest towns in 1948 were estimated as follows :—Ibadan, 335,500 (including farming suburbs); Lagos, 230,000; Kano, 102,000; Iwo, 86,000; Ogbomosho, 84,500; Oyo, 79,000; Oshogbo, 64,000; Abeokuta, 54,000; Ilorin, 53,000; Ede, 51,000; Iseyin, 48,000.

Justice.—The judicial system of Nigeria was re-cast in 1945 by putting into force the legislation enacted in 1943, which merged the protectorate courts in the Supreme Court and unified the magistrateships. The Supreme Court now has jurisdiction throughout Nigeria, which is divided into 11 judicial divisions. The Bench consists of the Chief Justice, the senior, the second, and 15 unclassified puisne judges, each having power to exercise the jurisdiction of the court. For magisterial purposes Nigeria is divided into 18 magisterial districts, each having one magistrate (except the colony, which has 10). Magistrates are divided into first, second and third grades; those of the first grade are professional, with jurisdiction up to £200 in civil cases and 2 years' imprisonment in criminal; the others are administrative officers with more limited jurisdiction in out-of-the-way localities. There are also native courts with extensive jurisdiction in the north and a more limited jurisdiction in the south. The number of persons brought before the magistrates' courts during 1949, was 63,375, of whom 50,255 were convicted; 811 persons were dealt with by the Supreme Court, of whom 524 were convicted.

Religion.—No reliable statistics are available. The more primitive peoples retain their ancestral animistic religions but, in so far as they become progressive, they tend to embrace either Christianity or Islam. The Christian and Moslem religions show a strongly proselytizing character and, although the missionary endeavours of the Moslems are less organized, they are not the less powerful. In the most northerly regions of Nigeria, Islam is the dominant religion. In the western provinces, also, there are very many Moslems. There is an interesting difference between the northern and the southern Moslems. Islam in the north still has a mediaeval character and a conservative attitude, while in the south its adherents show a much greater readiness to adopt European customs and ideas. In the eastern provinces, Islam has made remarkably little headway. Generally speaking the people are either Animists or Christians.

The main Christian missionary societies represent the Roman Catholic, Anglican, Scottish, Methodist and Baptist Churches. In addition there are several inter-denominational Protestant societies such as the Sudan Interior Mission, the Sudan United Mission and the Qua Iboe Mission. The larger Protestant societies have achieved a considerable degree of co-operation. Africans play a large and increasing part in Church affairs, both as clerics and laymen. There is a considerable number of independent African Christian communities which, for the most part, have split off from

one or other of the parent Churches. On the whole these have a nebulous character and nomenclature, which make it very difficult to assess their work and influence. In the past there has been a broad difference in the attitude of Christians and Moslems with regard to secular education. The Christian missions have generally regarded the provision of secular schooling as a normal part of their work. The Moslems' view of education, on the other hand, has been restricted to studies in the religion and law of Islam. Thus, although Moslem local authorities in Northern Nigeria have provided schools offering secular subjects, they have mostly done this at the instigation of government. There are recent signs, nevertheless, that the northern Moslem is beginning to feel the need of a general education. In the western provinces the position is somewhat different. Here, although the Moslems have lagged behind the Christians, there is now an unmistakable keenness to open schools and a good deal of voluntary effort has been aroused.

Education.—Number of children of 'school age,' *i.e.* between 5 and 14 years, about 5 million; children on roll in primary schools, 1949, 933,333. 23,358 children are on roll at secondary schools. Number of trained African teachers at work 8,592; number of untrained African teachers at work, 30,055. Schools are owned and maintained by government, by voluntary agencies (mainly Christian missionary bodies), by native authorities and by private individuals.

The number of institutions directly maintained by government (including native authorities) comprises 674 primary, 11 middle (junior secondary), 9 secondary schools and 11 teachers' training colleges.

All schools are subject to inspection by the Department of Education. The estimated expenditure by government on education for the financial year 1950–51 was £2,457,860, apart from about £1·5 million allocated under the Nigerian Development Scheme and Colonial Development and Welfare scheme. Of a further £486,700 which has been allocated for the building programme, £320,000 is allocated under development loan expenditure (Nigerian funds) and £166,700 for technical education under the colonial welfare and development schemes.

Vote for technical education 1949–50: £175,939, of which £108,640 has been allocated under the Colonial Development and Welfare scheme and £67,299 under the development and welfare schemes.

An autonomous University College was established in 1947 at Ibadan. Enrolment of students for the academic year 1949–50, was 293. Courses leading to London University degrees in medicine, science and arts are provided, and more faculties will be added later. It is proposed to raise the status of the College to that of a University of West Africa which will confer its own degrees.

There were, in 1949, 25 cinemas, with a seating capacity of 13,250.

Finance.—Revenue, expenditure, and public debt (including the Cameroons territory under U.K. trusteeship :—

Year (ending 31 March)	Revenue	Expenditure	Public debt
	£	£	£
1946–47	14,832,438	14,051,688	22,064,599
1947–48	18,404,132	17,185,940	22,064,599
1948–49	23,811,380	23,898,426	22,064,599
1949–50 [1]	30,076,020	27,230,290	14,438,000 [2]

[1] Revised estimates.
[2] Reduction by redemption in 1949 of 6% Nigeria Loan 1949–79.

Production and Industry.—The principal exports for 5 years were:—

Principal exports	1945	1946	1947	1948	1949
Palm-oil, tons	114,199	100,885	125,954	139,204	168,789
Palm-kernels, tons	292,588	277,242	316,376	327,174	375,835
Cotton lint, centals of 100	23,743	148,108	117,545	103,824	223,642
Cocoa, tons	77,004	100,186	110,793	91,449	103,637
Mahogany, cu. ft	805,442	973,968	921,077	729,461	380,833
Tin ore, tons	15,166	13,929	14,090	12,169	12,676
Gold (raw ore), oz.	8,021	1,984	691	41	203
Groundnuts, tons	176,242	285,668	255,866	245,155	378,321
Hides and skins tanned, cwt.	1,456	2,221	3,654	2,740	3,100
Hides and skins untanned, cwt.	126,720	115,031	197,020	189,000	198,100
Bananas, cwt.	20,558	116,265	419,643	1,023,145	1,299,037
Rubber, lb.	23,561,439	25,642,711	16,677,659	17,962,418	15,362,277
Benniseed, tons	6,738	7,334	5,698	7,542	19,385
Coal, tons	192,624	188,382	156,636	97,306	63,331
Gum arabic, lb.	5,204,049	7,160,440	2,359,842	1,491,830	1,880,411

The natives have worked iron, lead and tin for centuries. There are also deposits of silver, galena, manganese ore, lignite and monazite (which contains thorium). Coal output, 1949, 550,513 tons. Mining rights are vested in the Government, but under an agreement made with the Royal Niger Company at the date of the [illegible] the charter, that company receives half the gross profits derived from royalties on minerals won between the main stream of the Niger on the west and a line running direct from Yola to Zinder on the east, for a period of 99 years with effect from 1 Jan., 1900.

Commerce.—The principal ports are Lagos, Warri, Burutu, Sapele, Degema, Port Harcourt, Opobo, Calabar, Tiko and Victoria. Numerous rivers and creeks form the chief routes for transport, and there are many well-made roads.

Considerable trade is carried on in the northern provinces. There is also a large trade by caravans which, coming from Salaga in the west, the Sahara in the north, and Lake Chad and Wadai in the east, make use of Kano as an emporium.

The trade and shipping of Nigeria are shown as follows (bullion and specie are included):—

Year	Trade		Shipping entered and cleared	
	Imports	Exports	Total	British only
	£	£	Tons	Tons
1945	15,917,862	19,251,836	2,913,355	1,996,131
1946	25,685,201	25,357,830	3,685,341	2,671,000
1947	39,421,512	38,369,076	3,228,011	2,190,503
1948	44,897,309	37,527,112	4,085,173	2,552,210
1949	—	—	—	3,112,780

Value and quantity of the chief imports for 2 years were:—

	1948, Value (£)	1948, Quantity	1949, Value (£)	1949, Quantity
Cotton piece-goods	12,368,240	124,695,662 sq. yd.	17,690,424	184,574,434 sq.yd.
Iron and steel manufacture	2,918,810	—	5,295,299	—
Fish	299,362	5,499,100 lb.	377,317	6,266,066 lb.
Salt	760,082	165,469,581 lb.	839,467	169,751,094 lb.
Imports from:				
British Commonwealth	28,228,651	—	42,132,216	—
U.S.A.	4,726,000	—	2,435,981	—

Total trade between the United Kingdom and Nigeria (including the Cameroons), according to Board of Trade returns (in £ sterling):—

	1938	1948	1949	1950
Imports to U.K.	6,256,621	53,548,511	65,916,433	74,091,141
Exports from U.K.	4,246,371	24,515,064	34,916,924	34,485,472
Re-exports	268,834	80,384	185,237	274,512

Communications.—The railway system comprises (1) a western line from Lagos to Kano (700 miles), crossing the Niger by bridge at Jebba, with an extension from Kano to N'Guru (143 miles), and branches from Minna to Baro (111 miles); from Zaria to Kaura Namoda (137 miles); and from Ifo Junction to Idogo (27 miles). (2) An eastern line (569 miles) from Port Harcourt, crossing the Benue River at Makurdi, and joining the Western Railway at Kaduna junction with a branch lines connecting Kafanchan (458 miles) with Jos (62¾ miles). The total capital expenditure on the Nigerian railway, up to 31 March, 1949, amounted to £23,580,328; interest charges payable, £900,774; operating receipts, £5,762,540; working expenditure, £4,194,372; operating surplus, £1,568,168; net revenue account receipts, £229,427; net revenue account expenditure, £1,616,156 (including loan interest charges); net surplus, £181,439; passengers carried, 6,197,049; goods and minerals transported, 1,384,660 tons.

Under the Ten-Year Development Plan it is proposed to construct 17,173 miles of roads in order to reach the total of 48,275 miles estimated to be necessary. Links will be provided with the road systems in adjoining territories which will eventually provide connections between Nigeria and both North and South Africa.

The Posts and Telegraph Department provides postal, savings bank, postal and money order, telegraph, wireless telegraph and telephone services, and also maintains telegraph and electric block signalling apparatus at all railway stations, radio telegraph and telephone apparatus at all main railway centres, wireless services for the Aviation Department at 16 aerodromes and arranges the collection and distribution of meteorological information. It is also responsible for maintaining Nigerian marine wireless facilities and for the Nigerian police radio telephone. Radio distribution services are maintained in Lagos and 5 provincial centres.

On 31 March, 1949, there were 533 post offices (including agencies), telegraphs being available at 132 of them. The post office savings bank on 31 March, 1950, had 179,611 depositors, with £2,825,511 to their credit.

Currency.—Currency is controlled by the West African Currency Board and is of a special pattern which is common to the four British West African Colonies. The denominations are: notes, £1 and 10*s.*; alloy coins, 2*s.*, 1*s.* and 6*d.*; nickel coins, 3*d.*, 1*d.*, half-penny and tenth of a penny. On 30 June, 1949, the circulation, in Nigeria only, amounted to £31,522,743, and consisted of £20,588,488 in alloy coin, £2,549,086 in nickel coin and £8,385,169 in notes.

The Bank of British West Africa, Ltd., Barclays Bank (Dominion, Colonial & Overseas), the Nigerian Farmers' and Commercial Bank, the National Bank of Nigeria, and the African Continental Bank, have branches in the larger towns.

GAMBIA.

Gambia was discovered by the early Portuguese navigators, but they made no settlement. During the 17th century various companies of merchants obtained trading charters and established a settlement on the river, which, from 1807, was controlled from Sierra Leone; in 1843 it was made an independent Crown Colony; in 1866 it formed part of the West African Settlements, but in Dec., 1888, it again became a separate Crown Colony. It is administered under a Governor with an Executive Council (including 3 unofficial members) and a Legislative Council (including 1 elected member). In Bathurst, the capital, a town council was established in 1946. A similar self-governing body, the Kombo Rural Authority, came into being on 1 Jan., 1947, for the contiguous district of Kombo St. Mary which, although part of the colony, was administered for many years on the protectorate system, but has now been restored to the colony.

Other parts of the country are administered on the protectorate system. Since 1901 both banks of the Gambia have been under direct British control up to the Anglo-French boundary.

Area of colony (comprising Bathurst and some adjoining land), 96 square miles; population (1944 census), 21,152. In the protectorate (area, 4,005 square miles) the population (1948 census) was 229,284.

The rainy season lasts from May to November. The total rainfall at Bathurst was 57 98 in. in 1948.

Education.—In 1945, all primary education in Bathurst was taken over and is now financed by the government. The schools have been reorganized in 3 groups, Anglican-Methodist, Roman Catholic and Moslem. Each group has a boys' primary, girls' primary and infants' school with the exception of the Moslem group which for the present has a mixed boys' and girls' primary school and an infants' school. The total number of pupils enrolled in all these schools was 1,450 boys and 565 girls in 1950.

The Methodists and Roman Catholics each have 2 secondary schools with a total of 230 boys and 220 girls enrolled; these receive financial assistance from the government, to cover all teachers' salaries.

In the Colony there are 2 government schools with a total of 328 children and a mission school with 186 children. In the Protectorate there are 1 government school, 6 mission schools and 13 Native Authority schools, with a total of 906 children.

In 1949 a teachers' training college was opened with 30 men on the roll.

Government expenditure on education was £54,800 in 1950.

Finance and Trade.—Revenue, expenditure, imports and exports for 5 years were as follows (in £ sterling):—

	1945	1946	1947	1948	1949
Revenue . .	587,004	616,328	693,774	866,899	964,154
Expenditure .	430,729	545,854	633,273	1,014,098	1,170,190
Imports [1] .	1,216,337	949,093	1,948,590	2,621,024	2,356,300
Exports [1] .	776,955	696,292	1,170,524	1,758,384	1,753,915

[1] Including specie.

Public debt on 31 Dec., 1949, was £38,760. On 31 Dec., 1949, the assets exceeded the external liabilities by £703,510 (excluding public debt, £38,760, and sinking fund, £16,250).

Principal items of revenue in 1949:—Customs, £324,983; taxes, £187,848; licences, £8,123; post telephones, etc., £42,440; port dues, £27,758.

Chief imports, 1949:—Apparel, £30,818; bags and sacks (empty), £41,484; boots, shoes and slippers, £17,305; cotton (piece-goods), £415,398; cotton, other, £39,698; cotton yarn, £37,125; flour, wheaten, £34,221; hats and caps, £13,231; kola nuts, £113,562; lumber, £24,528; machinery, all kinds, £170,150; medicines and drugs, £27,701; metals, all kinds, £137,173; motor vehicles, £104,346; oils, edible, £57,721; oils, non-edible, £76,776; rice, £40,579; soap, £45,100; spirits, potable, £4,511; sugar, £50,133; tobacco, £71,306; beer, £16,566; cement, £43,755; artificial silk (piece-goods), £9,628; woollen manufactures, £11,796.

Chief exports, 1949:—Groundnuts, £1,571,134; palm kernels, £38,466; bees-wax, £2,894; hides and skins (cattle, untanned), £3,277.

Imports from United Kingdom in 1950, £1,744,799; 1949, £1,143,713; 1948, £979,333. Exports to United Kingdom, 1950, £2,671,384; 1949, £2,540,237; 1948, £2,468,620 (Board of Trade returns).

Of the 356 vessels (704,784 tons) entered and cleared in the foreign trade in 1949, 196 of 598,171 tons were British.

In 1949, 538 aircraft (5,738 tons) entered and cleared; of these, 392 (4,146 tons) were British.

There are 700 miles of earth roads in the protectorate, most of them closed or restricted in the wet season; and 30 miles of bituminous surfaced roads in the colony. Number of licensed motor vehicles (1950):—318 passenger cars, 441 commercial vehicles.

Internal communication is maintained by steamers or launches. There are several post offices, and postal facilities are also afforded to all river towns by means of a travelling post office on the Government river mail-steamers. Bathurst is connected with St. Vincent (Cape de Verde) and with Sierra Leone by cable, but there are no local railways. Bathurst is in wireless communication with Mansakonko, Georgetown, Kuntaur and Basse in the Protectorate. In 1949, the government savings bank had 6,350 depositors holding deposits value £165,760. A special West African alloy currency was introduced in 1920 (*see* under NIGERIA). West African currency notes in circulation 31 Dec., 1949, amounted to £768,318. There is one bank in the colony, the Bank of British West Africa.

Governor.—Percy Wyn Harris, C.M.G., M.B.E. (appointed 4 Aug., 1949; salary £2,500 and £750 allowances).

Colonial Secretary.—Edward Rex Ward, C.M.G. (appointed 1 October, 1945).

GOLD COAST.

The **Gold Coast** first became known through Portuguese navigators in the 14th century, and English and Dutch traders and companies exploited the district in the 17th century, their main object being the slave traffic. The Dutch held settlements on the coast until 1871, when a convention was made transferring them to the English. The country stretches for 334 miles along the Gulf of Guinea, between the French Ivory Coast and Togoland. It is administered by a Governor with an executive council and a Legislative Assembly. Under the constitution which came in force in 1951, the Legislative Assembly contains 84 members of whom 3 are *ex-officio* appointments, 6 represent the Chambers of Commerce and Mines, 38 are elected by universal adult suffrage in the Colony and Ashanti, 18 by the Territorial Councils of the Colony and Ashanti, and 19 by an electoral college in the Northern Territories.

The elections for the House of Assembly, held in Feb., 1951, resulted in 38 seats for the Convention People's Party, 34 Independents, 3 United Gold Coast Convention.

The Executive Council, appointed 27 Feb., 1951, consists of 6 members of the Convention People's Party (leader, Kwame Nkrumah), a member representing the Ashanti, 1 member representing the Northern Territories, and 3 *ex-officio* members, with the Governor as President.

Attached to the Gold Coast are Ashanti and the Northern Territories, and, for administrative and customs purposes, Togoland under United Kingdom trusteeship.

The West African Council, of which the West African Governors are members, has its seat on the Gold Coast.

Area and Population.—The area of the colony, Ashanti, Northern Territories and Togoland under U.K. trusteeship is 91,843 square miles; population (census, 1948), 4,111,680, including 6,770 non-Africans. Chief towns (population, census, 1948):—Accra, 135,926; Kumasi, 78,483; Sekondi-Takoradi, 44,557; Cape Coast, 23,346; Koforidua, 17,806; Tamale, 16,164; Winneba, 15,171; Obuasi, 15,876; Keta, 11,380.

Education.—In the colony, Ashanti, the Northern Territories and Togoland under United Kingdom trusteeship there were in 1949–50 the following post-primary institutions: the University College of the Gold Coast, 21 teacher training colleges (2 government, 18 assisted and 1 government-endowed), 11 secondary schools (10 assisted and 1 government-endowed), 1 technical school (government), 2 trade training centres (government) and 1 clerks' training course (government).

Of the primary schools 36 were government and 584 assisted (71 of them being managed by native authorities, 5 by undenominational bodies and the rest by churches and missions). There were also 2,352 non-assisted primary schools, including 852 designated schools, most of [illegible] by the various religious bodies. Government expenditure [illegible] revenue on education in 1949–50 (excluding the University College and Achimota) was £1,577,660.

The total enrolment of the institutions enumerated above at the end of 1949 was 299,457 (227,250 boys and men and 72,207 girls and women); of this number 105,430 (74,288 boys and men and 31,242 girls and women) were in government and government-assisted institutions, including 1,693 teachers in training, 2,511 pupils in the secondary schools and 213 students in the University College.

In 1950, there were 20 cinemas with a seating capacity of 17,100.

Police Force.—The establishment of the police force, which is distributed throughout the colony, Ashanti and Togoland under United Kingdom trusteeship, was (1950) 75 police officers, 1 European bandmaster, 88 inspectors and sub-inspectors and 3,807 other ranks. Of these, 2 European police officers, 2 African inspectors and 278 other ranks are normally stationed in the Northern Territories. Convictions (1949), 20,230 persons, excluding 11,644 persons convicted summarily for motor traffic offences.

Medical Service.—There are 19 hospitals and 17 dispensaries in the colony. Three of these hospitals are without medical officers, and are run as dispensaries. There is a children's clinic in Accra.

Revenue and Expenditure, in £ sterling (for the year ending 31 March):—

	1945–46	1946–47	1947–48	1948–49	1949–50
Revenue .	9,327,771	9,850,177	12,265,589	14,294,981	20,918,334
Expenditure .	7,309,333	8,009,655	12,531,171	13,366,588	16,272,698

Chief items of revenue, 1949–50:—Customs and excise, £11,069,271; direct taxation, £3,669,641; licences, etc., £404,148; fees of court, etc., £909,265; posts and telegraphs, £407,977; rents of government lands, etc.,

£112,049; interest and loan repayments, £515,399; colonial development and welfare, £355,910; railway, £2,351,091; Takoradi harbour, £460,748.

Chief items of expenditure, 1949–50 :—Agriculture, £654,489; customs and excise, £345,528; education, £902,818; electricity department, £366,563; forestry, £128,684; medical, £894,202; military, £500,000; pensions and gratuities, £531,278; police, £553,882; political administration, £202,162; posts and telegraphs, £472,554; prisons, £195,034; printing, £156,079; public debt charges, £430,239; public works department, £337,762; public works annually recurrent, £783,036; transport, £130,617; subventions, £391,700; survey department, £114,663; local government grant-in-aid, £546,159. Extraordinary, £1,994,131; development, £1,911,258; railway, £1,937,294; Takoradi harbour, £191,864.

Public debt, 31 March, 1950, £8,410,000. Colony's general revenue balance account, £8,833,937; reserve fund, £1,500,000. Sinking fund for the amortization of the funded debt of the colony, £2,008,847.

Industry.—The Gold Coast Industrial Development Corporation was established in May, 1948, with an authorized capital of £100,000, increased to £350,000 in April, 1950. The corporation is managed and controlled by a board of directors composed of Africans and Europeans. Its primary purpose is to establish industries based on the natural resources of the country, to explore the possibilities of other industries, and to give financial assistance to individuals and craftsmen who have the knowledge and technical ability but lack the capital. The corporation will not retain control over businesses any longer than is necessary to establish these. The corporation is not a bank and does not advance money to increase purchasing power or establish internal trade.

Electricity produced in 1949 was 22,723,386 kwh.

Trade.—In 1949, the imports amounted to £52,942,041 and the exports to £48,246,334. The principal imports were :—Cotton goods, 102,939,941 square yards, valued at £10,594,778; oils, 31,282,368 gallons (£1,730,592); machinery and iron and steel manufactures, £5,594,221; tobacco, 3,459,309 lb. (£1,234,724).

The principal exports were :—Cocoa, 263,602 tons (£32,534,845); gold, 656,431 fine oz. (£6,413,825); manganese ore, 741,069 dry tons (£4,006,079); timber (unmanufactured), 7,039,327 cubic feet (£2,165,551); diamonds, 963,435 carats (£1,390,636).

Imports (1949) valued at £34,591,166 came from the United Kingdom, £649,785 from Dutch West Indies, £909,661 from Belgium, £2,440,452 from Netherlands, £1,147,180 from India, £885,968 from Italy, £1,855,926 from Germany, £470,249 from Canada, £1,099,014 from Czechoslovakia, £1,747,486 from Japan and £2,504,245 from the United States of America.

Exports to the value of £20,076,599 were sent to the United Kingdom, £12,035,754 to the United States of America, £1,059,522 to Canada, £504,228 to Australia, £708,680 to Norway, £3,130,023 to Netherlands, £2,455,357 to Germany and £1,353,042 to the Soviet Union.

Exports to the United Kingdom, 1950, £18,667,847; 1949, £17,392,875; 1948, £15,796,267; imports from United Kingdom, 1950, £23,577,843; 1949, £24,811,857; 1948, £17,014,855; re-exports, 1950, £200,095; 1949, £140,088; 1948, £87,415 (Board of Trade returns for Gold Coast and Togoland).

The shipping entered and cleared in the foreign trade in 1949 was 6,150,119 tons, of which 4,017,511 tons were British.

Communications.—Railway communication consists of a main line running from Takoradi to Kumasi thence to Accra, a distance of 365 miles

with branches. Takoradi Junction to Sekondi (3 miles), Tarkwa to Prestea (18 miles), Aboso to Cinnamon Bippo (4 miles), Huni Valley to Kade (99 miles) and Dunkwa to Awaso (46 miles). The main line and branches are 3 ft. 6 in. gauge. The railway gross earnings for the year 1949–50 were £2,457,915, and the working expenditure including provision for renewals (£419,473) and pensions was £2,274,337. The total number of miles open for traffic on 31 March, 1950, was 535, and the capital cost £10,039,013.

Total mileage of motorable roads (all classes) in the colony is 7,394, made up as follows:—All weather roads, maintained by P.W.D., 2,992 miles, 772 of which are tarred; roads occasionally closed to traffic in wet weather, maintained by political administration, native administrations and timber companies, 4,402 miles. The number of motor vehicles in operation at the end of Dec., 1950, was 4,704 passenger cars, 9,971 commercial vehicles, 1,610 taxicabs and 843 motor cycles.

There were (31 March, 1950), 4,918 miles of telegraph land wire, 13,272 miles of telephone trunks, 384 offices, and there are 216 telephone exchanges and call offices with 6,146 telephones in use, and 8,599 miles of underground and overhead land wire in the exchange areas. The telephone trunk system connects up all the main towns There are internal wireless stations at Accra, Kumasi, Enchi, Wiawso, Bawku, Lawra, Kete-Krachi, Tamale and Yendi.

In 1949-50 the savings bank had 308,311 depositors with £4,044,309 to their credit. The Bank of British West Africa, Ltd. and Barclays Bank (Dominion, Colonial & Overseas) operate in the colony and Ashanti. For currency, *see* under NIGERIA, p 311.

Ashanti was placed under British protection on 27 August, 1896, and an Order of the King in Council, dated 26 September, 1901, defined the boundaries of Ashanti and annexed it to His Majesty's Dominions, and provided for its administration under the Governor of the Gold Coast Colony. By a subsequent Order in Council, dated 22 October, 1906, the boundaries between the Gold Coast Colony and Ashanti, and between Ashanti and the protectorate of the Northern Territories, were readjusted and defined, with due regard to tribal land and natural features. By a further Order in Council (9 November) of 1934, the limits of Ashanti were further defined, and the Governor vested with full power for its administration, the making of laws and the appointment of a Chief Commissioner, Judges, Commissioners, Justices of the Peace and other necessary officers therefor. By the same Order Ashanti was brought under the constitution, and by Additional Instructions, dated 23 November, 1934, the Chief Commissioner was made a member of the executive council of the Gold Coast. Sections 5–17 of this Order in Council, defining the powers of the Governor as regards Ashanti, have been revoked by the Gold Coast Colony and Ashanti (Legislative Council) Order in Council 1946, which provides for the constitution and powers of a legislative council for the Gold Coast Colony and Ashanti in which four Ashanti members represent the peoples of Ashanti. By Letters Patent dated 7 March, 1946, the Governor's powers regarding the administration of the colony and Ashanti are also defined.

Ashanti is administered by a Chief Commissioner, acting on behalf of the Governor, with an Assistant Chief Commissioner as [illegible] officer, and a staff of 23 administrative officers. In Jan., 1935, the Confederation of Ashanti, which was broken up and had remained inoperative for 35 years, was re-established with Otumfuo Sir Osei Agyeman Prempeh II, K.B.E., a nephew of the late Nana Prempeh, at its head.

The area is 24,379 square miles, with a population (census of 1948) of

818,944 (including non-Africans, 1,162). Kumasi, the chief town, has 78,483 inhabitants. At the end of 1949 there were 1,668 children in the government schools, 16,264 in the assisted schools and 55,870 in the non-assisted schools. There are 4 hospitals and 11 dispensaries. One of the hospitals is without a medical officer and run as a dispensary. There is a children's clinic in Kumasi.

The southern half of the dependency is within the rich, high forest zone, which produces timber and cocoa, and has gold mines. 7,500 square miles, or nearly two-thirds of the area, still bear dense forests, in which mahogany and other huge and valuable timber trees are found. In [illegible] there is a lively logging industry, mainly for export. The forests are being steadily cleared to make further land available for cultivation, but in the west great blocks are still almost untouched. Forest reservation is just under 2,200 square miles, mostly of protection forest. The principal agricultural exports of Ashanti are cocoa and cereals. Approximately 100,000 tons of cocoa are exported annually to the United Kingdom and several hundred tons per year of maize and groundnuts are sent to the big consumer centres in the south. The amount of cereals, etc., exported varies. Rice cultivation is increasing; about 4,500 tons of paddy are now produced annually.

The Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection in 1901. They are administered, under the Governor, by a Chief Commissioner, an Assistant Chief Commissioner and 24 administrative officers. The country is divided into 4 districts:—Mamprusi, Dagomba, Gonja and Wa, with the headquarters of the protectorate at Tamale, 237 miles north of Kumasi. Population (census, 1948), 1,076,696, including Togoland; non-Africans, 214. Chief towns, Tamale, 16,164; Bawku, 6,888; Wa, 5,163; Salaga, 3,158; Gambaga, 1,952. Area of the protectorate, 30,486 square miles. The Moslems have substantial mosques; there are Roman Catholic and other missions. For the purposes of education the Northern Territories are regarded as a part of the Gold Coast under the Ministry of Education and Social Welfare, but having a separate Ordinance and Rules. At Tamale there are government senior primary boys' and girls' schools, and at Wa, Damongo, Yendi and Gambaga there are native-authority senior boys' boarding schools which admit selected pupils from the native-authority schools in the various districts. There are 71 native-authority village day schools. There are also a few mission schools, including senior primary boys' boarding schools at Navrongo and Nandom, a girls' senior primary boarding school at Jirapa and a teachers' training college at Navrongo. These are all operated by the White Fathers Mission. The number of pupils in Northern Territories schools at the end of 1949 was 4,214. There is also at Tamale a government teache[illegible]ollege, which in 1950 contained 86 students. There are 7 [illegible]. 38 dispensaries and dressing stations. Medical Officers are stationed at Tamale, Bawku, Navrongo and Wa. A new hospital is nearing completion at Bolgatanga.

There are 2,158 miles of motor roads.

The chief crops grown are yams, guinea corn, millet, maize, rice and tobacco. Livestock, 1947:—Cattle, 300,000; sheep and goats, 455,000; donkeys, 16,000; horses, 6,000; pigs, 1,500. The Department of Animal Health has its headquarters in Accra, with veterinary stations at Pong-Tamale and Navrongo in the Northern Territories. The Pong-Tamale station trains Africans in veterinary work and animal husbandry; but its

primary purpose is the production of anti-rinderpest and contagious bovine pleuro-pneumonia sera and vaccines, which have successfully controlled the two main killing diseases of cattle and have nearly trebled the cattle in the last 10 years. The control of imported livestock is effected by 5 quarantine stations on the frontier. In 1947 there were over 200 farmers in the Northern Territories who had adopted mixed farming methods with bullock cultivation; this number has since greatly increased. Anti-erosion measures also figure in the development plans of the Department of Agriculture. Gold-bearing quartz and alluvial deposits, and mica, exist.

Governor of the Gold Coast.—Sir Charles N. Arden-Clarke, K.C.M.G.
Chief Secretary of the Gold Coast.—R. H. Saloway, C.I.E., O.B.E. (appointed 12 Jan., 1950).
Chief Commissioner, Colony.—A. J. Loveridge, O.B.E.
Chief Commissioner of Ashanti.—W. H. Beeton.
Chief Commissioner of the Northern Territories.—G. N. Burden, M.B.E.
Commissioner in London (5 Buckingham Gate, S.W.1.).—Frank Leach.

SIERRA LEONE

The colony of **Sierra Leone** originated in the sale and cession, in 1788, by a native king to English settlers, of a piece of land intended as a home for natives of Africa who were waifs in London, and later it was used as a settlement for Africans rescued from slave-ships. The present combined colony and protectorate are bounded on the north-west, north and north-east by French Guinea, on the south-east by Liberia and on the south-west by the Atlantic Ocean. The colony, including those portions administered as protectorate, lies along the coast, extending from the boundary of French Guinea to the north of the mouth of the Scarcies River to the boundary of Liberia at the mouth of the Mano River, an approximate distance of 210 miles. Inland it extends to a distance varying from ¼ to 20 miles and includes the Yelibuya and other islands towards the north, as well as Sherbro and several smaller islands to the south, but the Isles de Los were ceded to France under the convention of 1904. Sierra Leone proper consists of a peninsula about 28 miles long and 9 miles wide of which Cape Sierra Leone is the north-west point.

Under the amended constitution of July, 1948, which was introduced in 1951, there is a Legislative Council of 30 members, of whom 7 are *ex-officio* appointments, 7 elected to represent the Colony, 12 elected by the district councils of the Protectorate, 2 elected by the Protectorate Assembly and 2

nominated by the Governor, being persons chosen for their commercial and economic experience. The Council has full power to legislate for both Colony and Protectorate. The Governor is advised by an Executive Council consisting of 4 official and 4 unofficial members, the latter appointed from among the unofficial members of the Legislative Council. Elected members must be 25 years of age. The franchise is confined to men.

Area and population.—The area is about 2,500 square miles. Those portions which are administered strictly as colony (viz. the Sierra Leone Peninsula, Tasso Island, Banana Islands, the township of Bonthe on Sherbro Island and York Island) cover approximately 271 square miles; population (estimated 1949), 124,000. Europeans numbered 964; Asiatics, 2,074. Chief town, Freetown, 86,000 inhabitants (Feb., 1944).

Education.—In the colony area there were, in 1949, 86 primary schools comprising 2 government schools, 50 amalgamated schools and 34 private unassisted schools. Amalgamated schools are those founded by Mission bodies but now virtually conducted by government in the Mission buildings. In these schools teachers' salaries, equipment and materials are provided from public funds, whilst the Missions are responsible for the upkeep of the buildings. In the Protectorate there were 123 primary schools, of which 4 were government schools, 24 native administration, 92 Mission and 3 private schools. The number of children attending primary schools totalled 14,682 in the Colony and 17,032 in the Protectorate.

Secondary education was provided in the Colony by one government school, 8 assisted and one unassisted secondary schools, and in the Protectorate by the government school for boys at Bo and the Harford girls' school, Moyamba, which is owned by the American E.U.B. Mission and assisted by government. The numbers on roll totalled 2,092 in the Colony and 220 in the Protectorate.

Teachers' training was carried out in the Protectorate at the Roman Catholic Mission College at Bo, the United Christian Council's Training College at Bunumbu and the Government Training College at Njala. The total number of teachers in training was 157. In addition 54 teachers were in training at the Fourah Bay College, Freetown.

Fourah Bay College, an institution of which the Church Missionary Society is the proprietor, is affiliated to the University of Durham and provides courses in theology and arts and a training course for primary teachers.

Total expenditure on education in 1949 was £316,671.

Health.—In the Colony area there are 6 hospitals (397 beds), a mental hospital at Kissy with accommodation for 112 patients and a home for the chronic sick with accommodation for 97 patients. In the Protectorate there are 7 hospitals (213 beds). There are 5 Mission hospitals in the Protectorate and one in Freetown and two hospitals associated with mines in the Protectorate. Two government hospitals provide training of student nurses and midwives. There are 10 government dispensaries in the Colony and 17 in the Protectorate. There are also 8 native administration dispensaries in the Protectorate.

Labour.—The Labour Department has its headquarters in Freetown, and employment exchanges at Freetown, Bo, Waterloo and Bonthe. Wages and conditions of employment are regulated by 2 Joint Industrial Councils and 2 statutory Wages Boards which together cover the majority of wage earners in the territory. There are 7 registered trade unions in Sierra Leone. There is a certain amount of unemployment, mainly in Freetown, where the number of persons registered for employment at the end of 1949

was 3,680, many of whom were migrants from the Protectorate. The Department also controls a training centre financed by Colonial Development and Welfare Funds, where semi-skilled workers are given courses of training.

Police.—Police force at end of Oct., 1950, had an authorized strength of 23 officers (European and African) and 597 other ranks. In 1948, 199 persons were convicted in the Supreme Court.

Finance	1943	1944	1945	1946	1947	1948	1949
	£	£	£	£	£	£	£
Revenue [1] .	1,747,838	1,656,829	1,825,750	2,195,474	2,109,638	2,648,985	2,730,340
Expenditure [1]	1,588,008	1,677,184	1,886,771	1,833,483	2,119,823	2,172,031	2,457,661
Imports .	6,227,100	5,484,203	3,718,162	3,961,384	4,586,922	4,979,350	6,171,910
Exports .	1,022,228	1,497,147	1,786,912	2,139,624	2,801,727	4,164,566	4,243,099

[1] Excluding railway revenue and expenditure.

The revenue in 1949 from customs was £1,192,959 (gross); fees, payment for services, etc., £162,154; post office, £64,604; harbour and light dues, £17,699 (gross); taxes, £964,191.

Net public debt, 31 Dec., 1948, £1,418,841.

Principal imports, 1948 :—Beer and ale, stout and porter, 276,001 gallons, £103,707; flour (wheaten), 57,583 cwt., £127,108; animals and birds (living) for food, 5,877, £21,639; milk (all kinds), 7,394 cwt., £55,615; salt, all kinds, 123,221 cwt., £72,727; spirits, potable, 23,631 gallons, £37,973; sugar, 33,656 cwt., £77,514; tobacco (unmanufactured), 1,362,420 lb., £208,557; tobacco (manufactured), 223,073 lb., £103,707; wines, 133,610 gallons, £66,545; coal, 61,820 tons, £302,893; apparel (all kinds), £174,104; bags and sacks (empty), not including paper bags, 1,814,638, £207,878; cotton manufactures, £1,523,251; artificial silk manufactures, £91,928; woollen and worsted manufactures, £62,095; machinery, mining and gold dredging, £118,043; metals, iron and steel manufactures, other kinds not elsewhere specified, £189,294; motor vehicles, 390, £169,870; cement, 17,202 tons, £105,865; matches, 60,745 gross of boxes, £23,174; medicines and drugs, £83,840; petroleum oils, 4,387,337 gallons, £234,789; soap, all kinds, 9,192 cwt., £51,705.

Principal exports, 1949 :—Kola nuts, 1,680 tons, £155,216; ginger, 1,395 tons, £146,790; piassava, 2,785 tons, £118,744, diamonds, 754,732 carats, iron ore, £996,552; chrome ore, 17,656 tons, £91,732; palm kernels, 76,541 tons, £2,314,038; palm oil, 3,308 tons, £186,348; groundnuts, 2,454 tons, £71,639.

Imports (Board of Trade returns) from United Kingdom in 1938, £1,076,299; 1948, £3,417,550; 1949, £3,451,277; 1950, £4,114,840. Exports thereto, 1938, £564,436; 1948, £5,181,288; 1949, £6,934,821; 1950, £6,346,867. Re-exports, 1948, £26,064; 1949, £48,519; 1950, £102,522.

Communications.—The only civil airport is at Lungi near Freetown. West African Airways Corporation provide a twice-weekly inter-colonial service connecting Sierra Leone with the other British West African colonies, Liberia and Dakar. Air France aircraft flying from Dakar to the French Cameroons call once a week in each direction.

A government railway, a single line of 2 ft. 6 in. gauge, is open from Freetown to Pendembu, near the Liberian frontier, a length of 227½ miles. From Bauya Junction, 64¼ miles from Freetown, a branch line runs to Makeni, a distance of 83 miles. Total line open, 1949, was 336 miles, including sidings. Total receipts, 1949, £437,147; gross expenditure,

£535,149. There were (1949) 1,640 miles of railway telegraph and telephone wires, excluding post office telephones. There are 80 post offices and postal agencies. At the end of 1949 there were 39,980 depositors in the savings bank, with £886,994 (inclusive of interest) to their credit.

Money and Banking.—The West African Currency Board, London, which was established in 1913, is responsible for providing the currency in the colony. At 31 Dec., 1949, West African Currency Board notes in circulation were estimated at £535,149 and coin at £1,425,500. A small amount of British silver coins still circulates. Bank of England notes are not legal tender. West African silver coins, which were replaced by alloy coins in 1920, have almost completely been withdrawn from circulation and the latter replaced by a new form of alloy 'security-edge' coinage introduced in 1939. The Bank of British West Africa and Barclays Bank (D., C. & O.) have their headquarters at Freetown; the former has a branch at Bo in the Protectorate.

The Protectorate.—On 31 August, 1896, a proclamation was issued declaring a protectorate over the hinterland of Sierra Leone. The area of the protectorate is approximately 27,669 square miles and, according to the 1931 census, it has a population of 1,672,000. An enumeration census in 1948 indicated a population of 1,734,000. It is bounded on the north and the east by French Guinea, and on the south-east by Liberia.

The Governor and Commander-in-Chief for the time being of the colony is also governor of the protectorate. The protectorate is administered by a chief commissioner, responsible to the Governor. The territory is divided into 3 provinces, each administered by a provincial commissioner. These are subdivided into 12 districts.

The legislative council of the colony and protectorate legislates for the protectorate. Protectorate interests are represented by 3 nominated paramount chiefs. In addition, there is the protectorate assembly, which was convened for the first time on 23 July, 1946. It is under the chairmanship of the chief commissioner and is the recognized body empowered to advise government on matters relating to the political, social and economic development of the peoples of the protectorate, and contains elected and nominated members.

Under the new constitution of 1951, there is an unofficial majority, which includes 14 members from the Protectorate indirectly elected, 12 being elected by the district councils and the remaining 2 from the Protectorate Assembly.

There are 181 chiefdom courts, each presided over by the paramount chief of the chiefdom and empowered to hear and determine all native disputes not involving serious crime. There are 12 magistrates' courts presided over by the district commissioners. Magistrates' courts are subordinate to the Supreme Court which sits at the different district headquarters as and when required.

The chief articles of imports are coal, cotton and artificial silk goods, flour, beer, wines and potable spirits, tobacco and petroleum oils. The chief agricultural exports are palm kernels, kola nuts, piassava, cocoa, coffee and ginger. Minerals comprise more than half of the value of the exports, diamonds and iron being mined in considerable quantities. Two iron ore deposits are known, the major one of which has yet to be worked. Deposits of chromite near Hangha on the Government railway are also worked. There is a small production of alluvial gold and platinum.

Governor.—Sir G. Beresford Stooke, K.C.M.G. (appointed Sept., 1947).
Colonial Secretary.—R. O. Ramage, C.M.G.

TERRITORIES UNDER TRUSTEESHIP.

CAMEROONS.

The Cameroons, lying between British Nigeria and the French Equatorial Africa, marches with the eastern boundary of Nigeria north-eastwards from the coast to Lake Chad. It was captured from the Germans in Feb., 1916, and was divided between the British and French under a declaration signed at London 10 July, 1919. The British portion is a strip stretching the whole length, save for one short break, of the Nigerian boundary. Area 34,081 square miles and population estimated at 1,032,700 (1949). Bantu negroes live near the coast, Sudan negroes inland. The country is administered under a trusteeship agreement which has superseded the mandate conferred on 20 July, 1922, containing provisions directed against slavery, forced labour (except for essential public services) and abuses of the traffic in arms and spirituous liquors. The northern part is attached to the provinces of Bornu, Benue and Adamawa in Nigeria, and the southern part, Cameroons and Bamenda Provinces, to the Eastern Provinces of Nigeria. There were, in 1949, 295 schools including 287 primary and 2 secondary schools, and 6 teachers' training institutions financed by the Central Government, the Local Authorities and the Voluntary Agencies.

There are graduated direct taxes for natives and Europeans. The revenue and expenditure are incorporated in the accounts for Nigeria. Government revenue for 1948–49, £552,360 (including customs, £179,600; direct taxes, £214,410); expenditure, £604,300 (including administration, £185,220; economic, £270,260; social, £148,820).

The soil in the coast region is fertile, and this area is heavily forested. Near the coast are a number of plantations controlled by European firms. Their chief products are palm-oil, palm-kernels, cocoa, rubber and bananas.

Trade through Cameroons ports (in £ sterling):—

	1943	1944	1945	1946	1947	1948	1949
Imports. . .	45,578	60,566	53,357	112,729	144,938	397,192	673,796
Exports. . .	188,625	245,327	282,476	317,321	400,352	558,509	810,265
Chief exports:	Tons	Tons	Tons	Tons	Tons	Tons	Tons
Bananas (fresh) .	—	—	—	4,583	19,882	51,157	64,951
Palm kernels .	84	1,090	925	601	911	649	674
Cocoa . .	—	552	743	1,597	1,107	1,467	2,149
Rubber . .	—	—	—	—	1,439	1,220	1,266

Chief imports:—Textiles, salt, cement, paints and colours, iron and steel manufactures, and machinery.

Shipping, 1949.—Victoria, entered 74 vessels of 140,767 tons; cleared 63 vessels of 126,166 tons. Tiko, entered 57 vessels of 34,899 tons; cleared 83 vessels of 101,574 tons.

The currency is British, similar to that in use in Nigeria. There is a branch of Barclays Bank (D., C. & O.) at Victoria.

TOGOLAND.

Togoland, between the Gold Coast on the west and French Dahomey on the east, was surrendered unconditionally by the Germans to British and French forces in August, 1914. On 30 September, 1920, the country was divided between France and Britain in accordance with the Franco-British declaration of 10 July, 1919. The boundary between the two spheres extends from the north-west corner in a general direction south-east and south, terminating not far from the port of Lome, but so that no part of the British sphere reaches the coast. (*See* map in THE STATESMAN'S YEAR-BOOK, 1920.) The area allotted to Great Britain is 13,041 square miles, and for administrative purposes it is attached to adjacent provinces and districts of the Colony and the Northern Territories. The population (census, 1948) was 382,717.

For purposes of education, Togoland under United Kingdom trusteeship is considered as part of the Gold Coast.

Medical officers are stationed at Ho and Hohoe.

The revenue and expenditure and imports and exports of the area are included in the figures for the Gold Coast. Expenditure still greatly exceeds revenue.

The principal imports are cotton goods, salt and tobacco. The principal export is cocoa. There are also minor inter-West African exports of raw cotton, coffee, kola nuts and native foodstuffs; and cottage industries manufacturing mats, cloths, soap and pottery. Tobacco is a very popular cash crop in some districts and rice has also become established as an economic crop in others.

Administrator of British Area.—The Governor of the Gold Coast.

CONDOMINIUM.

ANGLO-EGYPTIAN SUDAN.

Government.

THE rule of Egypt in the Sudan, after having gradually extended during the course of 60 years, was interrupted in 1882 by the revolt of the Mahdi, who, with his successor, the Khalifa, held the country from 1885 for about 13 years under a desolating tyranny. In 1896 an Anglo-Egyptian army commenced operations for the recovery of the lost provinces, and on 2 Sept., 1898, the overthrow of the Khalifa was completed at the battle of Omdur-

man. In Nov., 1899, he was finally defeated and killed by General Wingate's forces near Gedid.

A convention between the British and Egyptian Governments, signed at Cairo, 19 Jan., 1899, provides for the administration of the territory south of the 22nd parallel of latitude by a Governor-General, appointed by Egypt with the assent of Great Britain, and declares the general principles in accordance with which the administration shall be carried on. This status of the Sudan as a Condominium on the above lines was re-affirmed in the [illegible] Treaty of 1936. The British and Egyptian flags shall [illegible] no duties shall be levied on imports from Egypt, and duties on imports from other countries, via the Red Sea, shall not exceed those levied in Egypt; the import and export of slaves is prohibited, and special attention shall be paid to the Brussels Act of 1890 respecting the import and export of arms, ammunition and spirits.

The Sudan is divided into 9 provinces under Governors who may be advised on matters concerning the internal administration of their province by statutory councils consisting chiefly of Sudanese. Administration is carried out through District Commissioners, one or more of whom are appointed to each of the 46 districts into which the provinces are subdivided. Sudanese administrative officers are employed as or under the District Commissioners. Local administration is now largely in the hands of statutory local government authorities, which in tribal areas are the sheikhs and chiefs, and in urban or advanced rural district are councils. The number of formally constituted councils in 1948 was 16 urban, 18 rural and 17 (all rural) not yet formally constituted. Courts of sheikhs and chiefs have varying powers of limited jurisdiction over their territories in accordance with native custom throughout the country.

In 1910 a Governor-General's council was created to assist the Governor-General in the discharge of his executive and legislative powers. This council ceased to exist on 20 Dec., 1948.

In 1944 an advisory council for the Northern Sudan was constituted.

On 20 Dec., 1948, the Governor-General in Council established a Legislative Assembly, of 10 nominated and 65 elected members, and an Executive Council, at least half of which must be composed of Sudanese.

The first elections for the Legislative Assembly took place on 15 Nov., 1948. The Independence Front secured a large majority; the National Front, which favours union with Egypt, boycotted the elections.

Area and Population.

Extending southwards from the frontier of Egypt to Uganda and the Belgian Congo (approximately N. lat. 5°), a distance of about 1,650 miles and stretching from the Red Sea to the confines of Wadai in Central Africa, the territory has an area of 967,500 square miles. The [illegible] Sudan in 1949 was estimated at 8,309,663, including 2,091, [illegible] women, 3,724,478 children; non-natives numbered 301,030. (As so great a proportion of the people are nomads, the numbers of the native population must be taken as approximations only.) The Eritrea-Sudan frontier and the frontier with French Equatorial Africa have been delimited and demarcated, as also has the greater part of the frontier with Abyssinia.

Area and population of provinces, with inhabitants of provincial capitals, are as follows:—

Province	Area (sq. miles)	Population	Capital	Inhabitants
Bahr el Ghazal [1] . .	82,530	727,847	Wau	6,600
Blue Nile . . .	54,775	1,779,756	Wad Medani	61,450
Darfur . . .	138,150	949 640	el Fasher	23,250
Equatoria [1] . . .	76,495	629,623	Juba	7,900
Kassala . . .	134,450	736 793	Kassala	40,000
Khartoum . . .	5,700	395,999	Khartoum	75,000
Kordofan . . .	146,930	1,610,039	el Obeid	72,300
Northern . . .	236,200	690,606	ed Damer	7,650
Upper Nile . . .	92,270	759,360	Malakal	12,150

[1] Bahr el Ghazal was amalgamated with Mongalla in 1935 to form Equatoria, and again separated in 1948.

Other important towns are :—Omdurman (the old Dervish capital), population, 117,650; Port Sudan (47,000), Khartoum North (30,850), Atbara (42,000). The capital is Khartoum.

The population of the northern provinces is Arabicized and Moslem, that of the southern (Bahr el Ghazal, Equatoria and Upper Nile) Nilotic and Negro.

Religion and Education.

The population of the 6 northern provinces is almost entirely Moslem (Sunni), the majority of the three southern provinces is pagan. There are small Christian communities, with 2 Coptic bishops, a Greek Orthodox metropolitan, an Anglican bishop and assistant bishop, 3 Roman Catholic bishops and Greek Evangelical, Evangelical and Maronite congregations.

The education system falls into two spheres, the northern and the southern. The former comprises the provinces of Blue Nile, Darfur, Kassala, Khartoum, Kordofan and Northern, and the latter the provinces of Bahr el Ghazal, Equatoria and Upper Nile.

In the northern provinces education up to the secondary level is, for the most part, directly in the hands of the government. Higher education is represented by the Gordon Memorial College, which is constitutionally independent of the government, and by the Kitchener School of Medicine which is controlled by a special board. The College has established schools of arts, science, agriculture, engineering, veterinary science, and administration and law. It has been granted recognition as a University College and has 340 students reading for college diplomas or for external degrees of the University of London. The Kitchener School of Medicine has 35 students reading for diplomas in medicine and surgery.

Secondary education is provided at Wadi Seidna, Hantub and Khor Taqqat for over 1,200 boys. Two junior secondary schools provide vocational training in commerce or agriculture for 191 pupils and 16 intermediate schools provide a 4-year post-elementary course of general education for 2,344 pupils. There are 3 junior technical schools at Omdurman, El Obeid and Wad Medani with 264 pupils and a Sudan Railways school at Gebeit. Some 27,500 boys attend 166 elementary schools. The training of elementary and intermediate schoolmasters and the preparation of syllabuses and textbooks are carried out at the Institute of Education, Bakht er Ruda, and at a subsidiary training centre at Dilling. The output of Bakht er Ruda and Dilling is 120 elementary and 60 intermediate schoolmasters annually. Refresher courses for serving schoolmasters and special courses for adult education officers, boys' club leaders, literacy officers and village

welfare workers are also held. A Publications Bureau supervises the production of textbooks and publishes a fortnightly youth magazine.

The number of girls attending schools is comparatively small but is increasing rapidly. A girls' secondary school at Omdurman has 67 pupils. Intermediate schools in Omdurman, El Obeid and Wad Medani accommodate 321 girls; the Girls' Training College, Omdurman, has an annual output of about 60 schoolmistresses. A second training centre attached to the Intermediate School at Wad Medani in 1949 will train an additional 15 domestic science mistresses annually. Some 11,000 girls attend 96 elementary schools.

Sixty non-government schools are managed by independent authorities and in most cases subsidized by government. These schools provide varying levels of education for 3,406 girls and 12,910 boys. In addition, 422 subgrade schools and 117 subsidized Khalwas (Koranic schools) provide education, below the elementary level, for 40,221 pupils.

In the southern provinces, the missions, Roman Catholic and Protestant, are the main educational agents of the government. Mission schools, subsidized and inspected by the government, provide differing levels of education for 23,384 pupils. Primary teacher training centres, financed by government but controlled by boards representing both government and mission, have been established at Bussere and Mundri. Three elementary schools at Rumbek, Aweil and Tonj with 327 pupils, one intermediate school at Atar with 150 pupils, a newly opened secondary school at Rumbek, and training centres for clerical and agricultural employees at Juba and Yambio, are directly administered by government. A Publications Bureau at Juba produces literature suited to local requirements.

Health and Welfare.

The Sudan Medical Service maintains 40 hospitals, 352 dispensaries and 120 doctors.

Justice.

The High Court of Justice comprises the Court of Appeal and courts of original jurisdiction under the general supervision of the Chief Justice. In addition to the Chief Justice there are 7 judges of the High Court.

The Court of Appeal which exercises jurisdiction only on the civil side is constituted by 3 or more judges of the High Court sitting together and is usually presided over by the Chief Justice. An appeal lies of right from a decree of a judge of the High Court or a province judge if the relief claimed is more than £E100. When there is no appeal as of right the Court of Appeal exercises wide power of revision.

On the civil side the High Court judge, sitting singly, exercises general original jurisdiction. One High Court judge is stationed in each of the five central provinces, namely Khartoum, Northern, Kassala, Blue Nile and Kordofan Province. In provinces in which no judge of the High Court is stationed, general civil jurisdiction is exercised by a province judge.

Subordinate to the judge of the High Court or province judge are the district judges of the 1st, 2nd or 3rd grade within the province in which he is stationed. There are 7 specially appointed district judges of the 1st grade, all Sudanese, and 7 [illegible] appointed district judges of the 2nd grade, likewise all Sudanese, [illegible] in the 5 central provinces. The judge of the High Court or province judge exercise power of revision from decrees of district judges.

Criminal justice is administered in accordance with the Sudan Penal Code (which is an adaptation of the Indian Penal Code) either by courts of 3 magistrates (major or minor courts), by single magistrate or by benches of magistrates. Decisions of certain non-summary cases require confirmation, by the Chief Justice in the case of major courts and by the judge of the High Court or the Governor in other cases. Death sentences are subject to confirmation by the Governor-General. Rights of appeal to the confirming authority also exist.

On the criminal side the judges of the High Court have each been appointed circuit judge over the whole or part of the province in which they are stationed. As circuit judges they constitute and preside over the major courts held within the circuit for the trial of serious crimes.

The Moslem Law Courts administer the Moslem religious law in cases between Moslems relating to succession on death, marriage, divorce, and family relations generally, and also Moslem charitable endowments.

Apart from the civil, criminal and sharia courts above-mentioned there is throughout the country a large number of native courts with various degrees of powers who try civil, criminal and sharia cases in accordance with native law and custom. The powers of the larger courts may amount to £E100 fine and 4 years imprisonment. These courts are under the administrative authorities and appeal lies to the Governor or district commissioners.

Defence.

Defence is vested in the Sudan Defence Force owing allegiance to the Governor-General. Its commander, called the Kaid, is an *ex-officio* member of the Executive Council.

The force consists of a number of independent corps recruited on a territorial basis. It is officered by British officers, seconded from the Regular Army, and Sudanese native officers, all of whom receive the Governor-General's commission.

In addition, one British battalion, a Royal Air Force unit and one Egyptian Army battalion are normally stationed in the Sudan.

Finance.

The revenue and expenditure of the Sudan, in Egyptian pounds, are as follows (£E1 = £1 0*s*. 6*d*.) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944 . .	6,578,769	6,529,662	1947 . .	10,141,495	9,431,667
1945 . .	7,763,078	7,548,186	1948 . .	12,697,809	10,318,589
1946 . .	8,288,985	8,207,802	1949 . .	19,172,105	11,774,413

The main sources of revenue in 1949 were:—Direct taxation (£E1,250,143), royalties (£E620,939), railways net profit (£E300,000), agriculture and forests (£E1,366,338), customs (£E5,908,911), and posts and telegraphs (£E644,071).

The total external debt of the country at 31 Dec., 1949, was £E12,328,205, including £E5,264,525 owed to Egypt for development, etc., advances.

Production and Commerce.

The Sudan is the chief source of the world's supply of gum arabic, exports of which in 1949 amounted to 33,916 tons, valued at £E1,641,041; of this 10,222 metric tons went to Great Britain and 5,825 metric tons to the United States.

Egyptian cotton has been well established, and increasing quantities, which compare favourably with [illegible] varieties grown in Egypt, are being produced annually. In the 1949-50 season the area of cotton on the Gezira Irrigation Scheme (put into operation in 1925) was 217,541 acres and a crop of 994,957 kantars of 315 rotl seed cotton was harvested. The areas of cotton grown on the Gash and Baraka Deltas were 44,840 and 30,260 acres respectively and produced 103,189 and 34,098 kantars of 315 rotl seed cotton. In addition, considerable quantities of high-grade, long-staple American cotton are produced in the Northern Province under irrigation, and as a rain crop in the Kordofan, Upper Nile and Equatorial Provinces. The total area under cotton in the 1949-50 season was 414,364 feddans, and the total crop was 1,341,069 kantars of 315 rotl seed cotton.

Other products of the Sudan include senna leaves and pods, groundnuts, dates, hides and skins, mahogany, dom nuts (vegetable ivory), chillies, melon-seed, beans, maize, trochus and mother-of-pearl shell, shea nuts, salt, ivory and gold. The principal grain crops are dura (great millet), the staple food of the people in the Sudan and used as cattle and poultry food outside the Sudan, and dukhn (bulrush millet). The cattle and sheep trade of the Sudan is capable of great development.

A Rural Water Supplies and Soil Conservation Board was set up in Oct., 1944.

In 1948 there were estimated to be approximately 20,000 horses; 500,000 asses; 500 mules; 3,500,000 cattle; 5,500,000 sheep; 4,300,000 goats and 1,109,000 camels. Pigs are kept by the Nubas only—about 3,500.

The forests which line the Blue Nile River banks, rich in fibres and tanning material, extend to the frontier of Abyssinia. The forests of the Southern Sudan contain valuable trees, the mahogany and the acacia arabica being the most important. The finest gum forests are in Kordofan, Blue Nile and Kassala. The sudd area in the upper reaches of the White Nile is composed of an inexhaustible quantity of papyrus.

Gold is being successfully exploited in the Sudan, mines being worked at Gebeit and other places in the Red Sea Hills. Salt pans at Port Sudan supply the whole needs of the country, and considerable quantities of salt are exported annually. In 1949 the exports of salt totalled 6,752 tons.

IMPORTS AND EXPORTS.

Year	Imports [1]	Exports [2]	Year	Imports [1]	Exports [2]
1944 . .	9,947,932	8,638,695	1947 . .	16,207,129	14,865,848
1945 . .	10,018,613	10,555,878	1948 . .	22,153,257	23,250,039
1946 . .	11,429,543	9,267,144	1949 . .	23,869,569	26,435,396

[1] Including government imports.

[2] Exclusive re-exports (£E630,301 in 1944; £E538,702 in 1945; £E773,267 in 1946; £E529,833 in 1947; £E628,502 in 1948; £E931,349 in 1949). Specie (£E302,834 in 1944; £E432,993 in 1945; £E455,869 in 1946; £E449,603 in 1947; £E264,381 in 1948; £E69 732 in 1949) are also excluded.

Principal items of imports and exports are shown as follows :—

Item	1949		1948	
	Quantity (metric tons)	Value (£E)	Quantity (metric tons)	Value (£E)
Imports :—				
Sugar, refined	38,892	1,487,895	50,557	1,950,923
Machinery	—	1,587,724	—	1,240,837
Metals and metalware	—	1,758,401	—	1,392,800
Cotton piece-goods	8,286	4,408,020	7,689	4,573,238
Coffee	7,295	748,208	11,444	1,059,605
Tea	4,614	1,089,551	1,951	465,956
Sacks and hessian	6,916	847,149	5,586	722,114
Oil fuel and gas fuel	83,423	543,671	77,020	483,579
Vehicles	—	1,068,835	—	883,284
Wheat flour	12,594	508,653	1,193	59,328
Total (incl. other items)	—	23,869,569	—	22,153,257
Exports :—				
Cotton	65,334	19,064,458	50,886	15,702,809
Gum Arabic	33,916	1,641,041	34,655	1,586,351
Cottonseed	102,927	2,077,216	90,387	2,338,850
Total (incl. other items)	—	26,435,396	—	23,250,039

Principal sources of imports into the Sudan in 1949 :—United Kingdom, 32·5%; Egypt, 16·4%; India and Pakistan, 14·6%; principal countries of exports from the Sudan :—United Kingdom, 62·6% (1948. 62·5%); Egypt, 10 3% (1948, 13 9%); India and Pakistan, 6% (1948, 11·7%).

Trade with the United Kingdom (in £ sterling, Board of Trade returns) :—

	1938	1948	1949	1950
Imports to U.K.	3,367,283	15,734,845	22,201,412	21,836,090
Exports from U.K.	1,185,661	5,413,588	7,812,847	9,309,056
Re-exports from U.K.	28,697	22,144	30,008	33,469

Communications.

The Sudan railways system runs from Wadi Halfa in the Northern Sudan, and from Port Sudan on the east coast *via* Haiya Junction to Atbara where the railway headquarters, workshops and stores are situated. From Atbara the line runs south *via* Khartoum and Wadi Medani to Sennar Junction where it is joined by a line running from Haiya Junction *via* Kassala, Gedaref and Es Suki. From Sennar Junction the line runs in a westerly direction *via* Kosti to El Obeid. There are branch lines off the Wadi Halfa–Atbara line to Karima, off the Port Sudan–Atbara line to Suakin and off the Haiya–Sennar Junction line to Tessenei in Eritrea. The main flow of exports and imports is to and from Port Sudan *via* Atbara. Port Sudan is a modern port with quay accommodation equipped with electric cranes and transporters. The total length of line open for traffic is 2,001 miles as at 31 Dec., 1946. The gauge is 3 ft. 6 in.

Supplementing the railways are regular river steamer services of the Sudan railways, between Shellal and Wadi Halfa, 210 miles (which links the Egyptian state and Sudan railways systems); from Kareima to Kerma, 211 miles; from Khartoum to Juba, 1,090 miles; from Malakal to Meshra Er Rek, 235 miles, extended to Wau, 389 miles, in the flood season; from

Malakal to Gambeila, 353 miles (in the flood season only), and from Es Suki to Roseires on the Blue Nile, 131 miles.

A motor transport service under the control of the Sudan railways, runs between Juba and Nimule (122 miles), and provides a regular link between the Khartoum–Juba steamer services and the Lake Albert steamer services operated by the Kenya and Uganda railways and harbours.

Sudan Airways, operating De Haviland Dove 7-seater aircraft, run regular services from Khartoum; weekly to Juba, calling at Malakal; weekly to Asmara, calling at Kassala; weekly to El Geneina, calling at El Obeid and El Fasher, and twice weekly to Port Sudan, calling at Atbara. They also undertake charter work.

There are 28 wireless stations (including 8 aeronautical, 2 radiobeacon, 1 coast and 1 broadcasting stations), 80 post and telegraph offices, 86 post and telegraph agencies and 18 travelling post offices. There are 6,539 miles of telegraph and telephone routes, 33,779 miles of wire and 8,136 telephone stations.

The National Bank of Egypt maintains 6 branches, Barclays Bank (D., C. & O.) 4 branches and the Ottoman Bank one branch in the Sudan.

Governor-General.—Sir Robert G. Howe, G.B.E., K.C.M.G. (appointed April, 1947).

Civil Secretary.—Sir James Wilson Robertson, K.B.E. (appointed 2 April, 1945).

Financial Secretary.—A. L. Chick.

Legal Secretary.—C. C. G. Cumings.

Agency in London.—Wellington House, Buckingham Gate, S.W.1.

SOMALILAND PROTECTORATE.

British Somaliland occupies the north-east horn of the African continent along the south of the Gulf of Aden. It is bounded on the east and south-east by the Italian Somalia trusteeship territory, on the south and south-west by Ethiopia, and on the west by French Somaliland. The territory covers an area of approximately 68,000 square miles, and lies between 8° and 11° 27′ N. lat. and 42° 35′ and 49° E. long. The interior of the protectorate is characterized by an elevated plateau rising

towards the north to an altitude of from 2,000 to 7,000 feet, and descending in scarps and broken hills to the coastal plain, which varies in width from 10 to 60 miles. Vegetation consists largely of coarse grass and stunted thorn and acacia trees, which furnish good grazing for camels, sheep and goats.

Climatic conditions on the coast are governed by the south-west monsoon (Kharif) which blows from May to September, and the north-east monsoon which lasts from November to March. Much of the interior is generally cool and healthy owing to its elevation.

The protectorate owes its foundation to the capture of Aden by the Bombay Government in 1839, when Turkey claimed the Somali coast from Zeilah to Cape Gardafui. The Egyptians bought the port of Massawa in Eritrea in 1864, and subsequently spread their jurisdiction south to Zeilah and Berbera at a time when this coast provided the chief source of supplies for Aden. As they were pre-occupied by events in the Sudan and the rise of the Mahdi, the Egyptians withdrew from the Somali coast in 1884. Troops were sent from Aden to Zeilah to preserve order and safeguard British interests, and from 1884 to 1886 treaties were made with Somali tribes from Zeilah eastwards, placing most of them under British protection and guaranteeing their independence. On 20 July, 1887, the Powers were informed that a British Protectorate had been established on the Somali coast from the Ras Jibuti to Bender Zaida. Its boundaries were later defined by treaties with France, Italy and Abyssinia; but they are still artificial and partly undemarcated.

In 1901 a local Mahdi, later known as the Mad Mullah, appeared in the interior preaching a holy war against the British. Indecisive fighting with regular British troops took place intermittently for the next 9 years, and in 1910 the constant expense of the operations and difficulties of transport caused the British Government to withdraw from the interior to the coast. A period of great inter-tribal unrest resulted, until the final defeat of the Mullah in 1920.

The protectorate was invaded by Italian forces on 4 Aug., 1940, and, after resistance against greatly superior numbers, the British forces were evacuated on 18 Aug. British sovereignty was restored in 1941. Military administration ceased on 15 Nov., 1948.

The Governor is the sole executive and legislative authority. The protectorate is divided into 6 districts, which bear the names of the 6 principal towns:—Berbera (population in hot season about 15,000; in cold season about 30,000), Hargeisa (15,000 to 20,000), Burao (10,000), Borama, Erigavo and Las Anod. The seat of government is at Hargeisa, the chief ports are Berbera and Zeilah.

There is [illegible] Somaliland Scouts, and a locally enlisted police force under [illegible].

The nomadic population is estimated at 700,000, and consists entirely of Somali tribes who are Sunni Moslems of the Shafi'i sect. The life and wealth of the people is centred round their stock (camels, sheep and goats). Agriculture is confined to small areas with sufficient rainfall. Millet is grown in the western parts. Frankincense and myrrh are found in the east. The coastline abounds in fish, and the presence of coal, oil and minerals in the interior is reported. The chief exports are meat, hides and ghee. Game in the protectorate includes lion, kudu, ostrich and all types of gazelle. Revenue (1949–50), £422,811; expenditure, £1,118,435; imports (1949), £844,334; exports, £660,075.

Imports into U.K., 1938, £29,026; 1947, £24,591; 1948, £3,554; 1949, £4,404; 1950, £10,413. Exports form U.K., 1938, £52,111; 1947, £33,548; 1948, £39,318; 1949, £120,436; 1950, £155,559 (Board of Trade returns).

Education.—The Government Primary Boarding School is at Sheikh, and a secondary school was opened at Borama in 1950. In addition each district has an elementary school, and a considerable number of Koranic schools receive government grants. The Somali language has no written alphabet.

Communications.—An air service from Aden to Asmara calls at Hargeisa, connecting it with the main trunk air routes. There is considerable traffic, principally by dhow, between the Protectorate and Aden and Southern Arabia. There are neither railways nor waterways, but about 2,000 miles of road can be used by wheeled traffic in the dry season, and connect the principal towns.

Currency.—Both the Indian rupee and the East African shilling are in use. There are no banks.

Governor.—Sir Gerald Reece, K.C.M.G., C.B.E.
Chief Secretary to the Government and Commissioner for Native Affairs.—E. P. S. Shirley, O.B.E.

MAURITIUS.

Mauritius was known to Arab navigators probably not later than the 10th century. It was no doubt visited by Malays in the 15th century, and was discovered by the Portuguese between 1507 and 1512, but the Dutch were the first settlers (1598). In 1710 they abandoned the island and it was occupied by the French under the name of Isle de France (1715). The British occupied the island in 1810, and it was formally ceded to Great Britain by the Treaty of Paris of 1814.

The island, situated 20° S. lat. and 57½° E. long., is of volcanic origin. The climate is free from extremes of weather, except for tropical cyclones at times. Yearly rainfall varies from 30 in. on parts of the coast to 150 in. in the uplands.

Constitution and Government.—Under the constitution of 19 Dec., 1947, the government of the colony, with its dependencies, Rodrigues, the Oil Islands, etc., is vested in a Governor, aided by an executive council, consisting of the Colonial Secretary, the Procureur and Advocate-General, the Financial Secretary, and 4 members elected by the legislative council.

The legislative council consists of the Governor as president, 3 *ex-officio* members (the Colonial Secretary, the Procureur and Advocate-General, the Financial Secretary), 12 nominated and 19 elected members. Women have got the franchise. Legislation is enacted by the Governor with the advice and consent of the Legislative Council, the vote in which is free. In exceptional cases, however, the Governor is given power to enact legislation considered by him to be essential in the interests of good government.

In the general election in Aug., 1948, 11 of the 19 elected members of the legislative council were Indians.

Governor.—Sir Hilary Blood, K.C.M.G. (appointed May, 1949).

Colonial Secretary.—James Dundas Harford, C.M.G. (appointed 20 March, 1948).

Area and Population.—Mauritius, in the Indian Ocean, 500 miles east of Madagascar, has an area of about 720 square miles. According to the census of 1944, the population of the island was 419,185 and that of the dependencies was 13,463. The estimated resident population of Mauritius at the end of 1949 was 456,717 (males, 226,530; females, 230,187).

Births, 1949, 20,472 (46·0 per 1,000); marriages, 3,614 (16 3 per 1,000); deaths, 7,384 (16·6 per 1,000). Population of Port Louis, the capital, with its suburbs, 70,921 (1949).

In 1944 there were 141,941 Roman Catholics, 4,165 Protestants (Church of England and Church of Scotland). State aid is granted to the Churches, amounting yearly to Rs. 202,931; the Indians are mostly Hindus.

Education.—Primary education is free but not compulsory, though under the Education Ordinance of 1944 compulsion is being gradually introduced as circumstances permit. At the end of Oct., 1950, there were 64 government and 76 state-aided schools. Average attendance at government schools, 1950, 18,278 (23,670 on roll); at state-aided schools, 24,936 (31,246 on roll), of whom two-thirds were in Roman Catholic schools. There are also a number of unaided primary schools.

For secondary education there are 2 government boys' schools with (1950) 525 pupils, and 9 aided and 28 unaided secondary schools for boys and girls, with a roll of 5,275. There is a Government Agricultural College and a Government Training College for teachers.

Total government estimated expenditure on education in 1950–51 was Rs. 4,923,600; the actual expenditure for 1949–50 was Rs. 4,494,851.

Finance.

Year ended 30 June	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50 [1]

[1] [illegible]

[2] [illegible] which was estimated in 1944 at Rs. 4,875,000, in 19[illegible] [illegible],000, in 1947 at Rs. 4,793,000, in 1948 at Rs. 4,793,000, in 1949 at Rs. 4,830,000.

Sugar exports in 1949, 434,756,259 kilos, value Rs. 156,089,465; in 1948, 385,844,207 kilos, value Rs. 132,437,691. The sugar crop in 1948–49 was 416,029 metric tons; in 1947–48, 334,208 metric tons; estimate, 1949–50, 445,000 metric tons.

Imports into the United Kingdom from Mauritius (British Board of Trade returns), 1938, £3,631,253; 1947, £884,683; 1948, £6,247,113; 1949, £8,933,648; 1950, £6,081,373. British exports to Mauritius, 1938, £726,199; 1947, £2,097,718; 1948, £3,411,182; 1949, £3,599,168; 1950, £4,197,373. Re-exports from the United Kingdom, 1938, £8,660; 1947, £5,559; 1948, £7,744; 1949, £12,720; 1950, £18,716.

Shipping and Communications.—The registered shipping, 1 Jan., 1950, consisted of 5 sailing vessels of 128 tons, 5 steamers of 4,987 tons, and 1 motor vessel of 176 tons.

In 1949, 180 vessels of 706,725 tons entered and 180 of 700,329 cleared the colony.

There are 106·25 miles of railway of 4 ft. 8½ in. gauge, and 9·55 miles narrow gauge of 75 cm. The railway department is run on a commercial basis. Its receipts are excluded from the general revenue of the colony. Gross earnings, Rs. 3,521,751; working expenditure, Rs. 4,941,962 for 1947–48 (Rs. 3,696,810 and Rs. 5,164,267 [illegible] in 1948–49).

Of telegraphs and telephones there [illegible] 218 and 7,118 miles of line respectively; there is a cable communication with Zanzibar, Australia, Réunion, Madagascar and Durban. Number of telephones (1949), 4,262.

There is a twice-weekly air service (Air France) between Mauritius and Europe *via* East Africa. The aerodrome is at Plaisance, Grand Port district.

Roads.—The total official road system covers 730 miles, of which 265 miles are tarred. The rest include 315 miles of water-bound road. In 1949, there were 2,521 private cars, 519 cars for public hire, 182 buses and 212 motor cycles, with 204 government-owned vehicles. Commercial road vehicles comprised 870 lorries and 76 haulage tractors.

Money, Weights and Measures.—On 30 June, 1948, the Government Savings Bank held deposits amounting to Rs. 17,147,123, belonging to 62,630 depositors. There is a branch of Barclays Bank (D., C. & O.) at Port Louis.

The currency consists of:—(i) The Government note issue of Rs. 1,000, Rs. 10, Rs. 5 and Re. 1; (ii) the Mauritius silver rupee and its silver subdivisions; half rupees (50 cents), quarter rupees (25 cents) and 20 cents; (iii) cupro-nickel coins of 10 cents; (iv) bronze coins of 5 cents, 2 cents and 1 cent. All accounts are kept in rupees and cents. The note circulation as at 30 June, 1948, was Rs. 28,703,625. The metric system is in force.

Dependencies.

Rodrigues (under a magistrate) is about 350 miles east of Mauritius, 18 miles long, 7 broad. Area, 42 square miles. Population (census 1944), 11,885; estimated population on 31 Dec., 1949, was 13,591 (6,610 males; 6,981 females). Imports, 1949, Rs. 2,146,713; exports, Rs. 572,792. There are one government and 3 aided primary schools.

The lesser dependencies are Diego Garcia, Six Islands, Peros Banhos, Solomon Islands, Agalega, St. Brandon group, Trois Frères. The nearest island is 230 miles from Mauritius, and the most remote about 1,200 miles. Total population of the lesser dependencies, census 1944, 1,578 (842 males, 736 females).

Diego Garcia (the most important of the Oil Islands group), in 7° S. lat., 72° E. long., is 12½ miles long, 6½ miles wide, with 501 inhabitants (census 1944), a large proportion being labourers from Mauritius. Coconut oil exports in 1949, 5,586 litres; in 1948, 2,019 litres, from the Lesser Dependencies. Other exports are coconuts, copra, guano and salted fish.

SEYCHELLES.

Seychelles and its Dependencies consist of 92 islands and islets with a total estimated area of 156½ square miles. The principal island is Mahé (55½ square miles), smaller islands of the group being Praslin, Silhouette, La Digue, Curieuse and Félicité. Among dependent islands are the Amirantes, Alphonse Island, Bijoutier Island, St. François, St. Pierre, the Cosmoledo Group, Astove Island, Assumption Island, the Aldabra Islands, Providence Island, Coetivy, Farquhar Islands and Flat Island.

The islands were first colonized by the French in the middle of the 18th century, the object being to establish plantations of spices to compete with the lucrative Dutch monopoly. They were captured by the English in 1794 and incorporated as a dependency of Mauritius in 1810. In 1888 the office of administrator was created, with an executive council and a legislative council. In 1897 the Administrator was given full powers as Governor, and in Nov., 1903, he was raised to the rank of Governor. Since March, 1948, the Legislative Council consists of the Governor as President, 6 official members, 4 elected and 2 nominated unofficial members; and the Executive Council of the Governor as President, 3 *ex-officio* members and 3 unofficial members. The capital is Victoria, which has a good harbour.

Governor and Commander-in-Chief.—Frederick Crawford, C.M.G., (appointed Nov., 1950).

The population, 30 June, 1950, was estimated to be 35,725. The number of births in 1950 was 1,125; deaths, 475; marriages, 320; divorces, 2.

There were in 1950, 23 grant-in-aid schools (17 Roman Catholic and 6 Anglican), 2 Roman Catholic unaided primary schools and 6 private schools. In addition, there are 2 secondary schools, 1 for boys and 1 for girls, each with a preparatory department, with a total of 546 pupils, and government technical and housecraft centres. There are also a mixed government modern school, with 92 pupils, and a mixed government primary school, with 89 pupils. Total number of children attending school was 4,828; average attendance, 75%.

In 1950, 2,325 cases were brought before the courts (criminal side). The police force numbered 90 of all ranks.

Revenue and expenditure (in rupees) for 6 years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1945	1,764,812	1,340,493	1948	2,950,528	3,038,787
1946	3,376,382	1,863,549	1949[1]	3,286,436	3,424,085
1947	2,575,553	2,283,987	1950[2]	3,612,932	3,511,952

[1] Revised estimates. [2] Estimates.

There is no public debt.

Chief items of revenue, 1949:—Customs, Rs. 1,408,799; port and marine, Rs. 33,262; licences, taxes, etc., Rs. 633,202; fees of court, Rs. 151,983; post office, Rs. 389,261; crown lands, Rs. 150,457; interest, Rs. 75,397; miscellaneous, Rs. 141,141.

Chief products, coconuts (over 28,500 acres under cultivation) and cinnamon, patchouli and other essential oils. Foodcrop production is being encouraged, particularly on government estates where rootcrops, maize and fresh vegetables are being grown in increasing quantities. On some islands mangrove-bark, turtles and the yolk of birds' eggs are collected and guano deposits are worked. Livestock is increasing by importation of high-grade cattle, pigs and poultry. Fishing is actively pursued, both for local supply and export of salted fish to East Africa. Schemes for re-afforestation and the development of fisheries started in 1950-51.

Imports and exports (in rupees) for 4 years:—

Year	Imports	Exports	Year	Imports	Exports
1947	5,087,106	4,163,626	1949	5,109,430	5,421,350
1948	4,792,877	5,177,926	1950	5,885,963	8,310,996

Principal imports, 1950:—Rice, 1,370 tons, Rs. 707,132; sugar, 798 tons, Rs. 426,856; cotton piece-goods, 904,280 yards, Rs. 951,463; maize, 855 tons, Rs. 172,911; flour, 540 tons, Rs. 237,004; motor cars and cycles, 25, Rs. 95,842; motor spirit, 354,510 litres, Rs. 107,999; cigarettes, 6,935,120, Rs. 90,703; butter and cheese, 25 tons, Rs. 79,991.

Principal exports, 1950:—Copra, 5,959 tons, Rs. 5,793,187; guano, 9,847 tons, Rs. 300,372; cinnamon leaf oil, 97 tons, Rs. 1,175,679; patchouli oil, 4½ tons, Rs. 769,929; vanilla, ¾ ton, Rs. 8,987.

Imports, in 1949, from United Kingdom, Rs. 2,216,167; Kenya, Rs. 767,791; India, Rs. 554,717; Mauritius, Rs. 407,013; South Africa, Rs. 243,371; Australia, Rs. 85,194.

Exports, in 1949, to United Kingdom, Rs. 4,481,680; South Africa, Rs.

1,935; New Zealand, Rs. 216,580; Australia, Rs. 53; Kenya, Rs. 64,539; Mauritius, Rs. 75,181.

Total trade with the United Kingdom (Board of Trade returns, in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. . .	14,640	276,089	295,078	486,460	120,337
Exports from U.K. .	34,238	99,419	123,890	171,236	164,224
Re-exports from U.K. .	785	6,962	1,029	436	773

Shipping (1950) entered, 139,648 tons; cleared, 139,716 tons, mainly British, exclusive of coasters trading between Mahé and the dependencies. Steamers normally call every 4 weeks from Bombay on their way to Mombasa, and vice versa. There is fairly regular communication between the islands.

There is a good road system in Mahé, and further road-making is being undertaken. There is direct telegraphic communication with Mauritius, Zanzibar, Aden and Colombo.

ST. HELENA.

St. Helena, of volcanic origin, is 1,200 miles from the west coast of Africa. Area, 47 square miles, with a cultivable area of 8,600 acres. It is administered by an executive council consisting of the Governor and 3 official members. The Governor is assisted by an advisory council consisting of 6 unofficial members. Population (1949), 4,700. Births (living), 1949, 149; deaths, 56; marriages, 36; divorces, 4. There are 4 Episcopal and 4 Baptist chapels. Education, 1949—11 primary and 1 secondary schools controlled by government, with 1,242 pupils in 1949. Police force, 12; cases dealt with by police magistrate, 43 in 1949. The port of the island is Jamestown.

Governor.—Sir George Andrew Joy, K.B.E., C.M.G. (appointed 31 May, 1947).

	1944	1945	1946	1947	1948	1949
	£	£	£	£	£	£
Revenue [1] . .	83,941	63,715	98,694	60,668	126,813	121,650 [3]
Expenditure [1] .	74,491	84,053	88,823	124,756	99,626	117,185 [3]
Exports [2] .	31,585	35,200	31,790	48,043	73,260	106,881
Imports [2] . .	98,645	95,482	94,375	107,459	118,204	135,080

[1] Including imperial grants (1944, £15,000; 1945, nil; 1946, £25,000; 1947, nil; 1948, £30,000; 1949, £40,000).

[2] Including government stores.

[3] Estimates.

The revenue from customs was, in 1944. £16,826; 1945, £17,909; 1946, £15,161; 1947, 13,824; 1948, £14,500; 1949, £16,900.

The colony's liabilities at 31 Dec., 1949, exceeded the assets by £4,725.

The principal exports are flax fibre, tow, rope and twine; they totalled 1,810 tons in 1949.

Total trade between Ascension and St. Helena and the United Kingdom (Board of Trade returns, in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. . .	7,253	55,624	80,101	83,850	129,132
Exports from U.K. .	44,455	64,205	83,214	86,574	82,760
Re-exports from U.K. .	5,793	16,661	21,623	23,403	18,913

Savings-bank deposits on 31 Dec., 1949, £77,209, belonging to 495 depositors.

Fruit trees, Norfolk pines, eucalyptus and cedars flourish in St. Helena. Cattle do well, but there is no outside market for the meat. The flax (*phormium tenax*) industry is established at a government mill and 6 private mills. The area of land under flax was estimated at 3,250 acres in 1934. [illegible] industry was started in 1907. The number of vessels that [illegible] was 27; total tonnage entered and cleared was 148,193.

The Cable and Wireless cable connects St. Helena with Cape Town and with St. Vincent. There is a telephone service with 80 miles of wire.

Ascension is a small island of volcanic origin, of 34 square miles, in the South Atlantic, 700 miles N.W. of St. Helena. In Nov., 1922, the administration was transferred from the Admiralty to the Colonial Office and annexed to the colony of St. Helena. There are 10 acres under cultivation providing vegetables and fruit. Population, 31 Dec., 1946, was 292; 31 Dec., 1947, 183; 31 Dec., 1948, 191; 31 Dec., 1949, 162.

The island is the resort of sea turtles, which come to lay their eggs in the sand annually between January and May. Rabbits, wild goats and partridges are more or less numerous on the island, which is, besides, the breeding ground of the sooty tern or 'wideawake,' these birds coming in vast numbers to lay their eggs every eighth month.

Resident Magistrate.—H. L. N. Ascough.

Tristan da Cunha, a small group of islands in the Atlantic, half-way between the Cape and S. America, in 37° 6′ S. lat., 12° 1′ W. long. Besides Tristan da Cunha and Gough's Island, there are Inaccessible and Nightingale Islands, the former 2 and the latter 1 mile long, and a number of rocks. As from 12 Jan., 1938, the 4 islands have become dependencies of St. Helena. Tristan consists of an extinct volcano rising to a height of 8,000 feet, with a circumference at its base of 21 miles. The habitable area is a small plateau on the north-west side of about 12 square miles, 100 feet above sea-level. Only about 30 acres is under cultivation, three-quarters of it for potatoes. There are apple and peach trees; bullocks, sheep and geese are reared, and fish are plentiful. The island is extremely lonely, but the community is growing. In 1880 it numbered 109, in 1949, 231 islanders and 17 Europeans. The original inhabitants were shipwrecked sailors and soldiers who remained behind when the garrison from St. Helena was withdrawn in 1817.

At the end of April, 1942, Tristan da Cunha was commissioned as H.M.S. *Atlantic Isle,* and became an important meteorological and radio

station. In Jan., 1949, a South African company commenced crawfishing operations. An Administrator was appointed at the end of 1948 and a body of basic law brought into operation. The Island Council, which was set up in 1932, at present consists of 10 elected islanders under the chairmanship of the Administrator, with the Society for the Propagation of the Gospel in Foreign Parts' missionary and the company manager as *ex-officio* members. Women's affairs are discussed by the Island Women's Council which presents them for consideration to the general council.

Administrator.—H. F. I. Elliott.

AMERICA.

CANADA.

Constitution and Government.

THE territories which now constitute Canada came under British power at various times by settlement, conquest or cession. Nova Scotia was temporarily occupied in 1628 by settlement at Port Royal, was ceded back to France in 1632, and was finally ceded by France in 1713, by the Treaty of Utrecht; the Hudson's Bay Company's charter, conferring rights over all the territory draining into Hudson Bay, was granted in 1670; Canada, with all its dependencies, including New Brunswick and Prince Edward Island, was formally ceded to Great Britain by France in 1763; Vancouver Island was acknowledged to be British by the Oregon Boundary Treaty of 1846, and British Columbia was established as a separate colony in 1858. As originally constituted, Canada was composed of the provinces of Upper and Lower Canada (now Ontario and Quebec), Nova Scotia and New Brunswick. They were united under the provisions of an Act of the Imperial Parliament known as 'The British North America Act, 1867,' which came into operation on 1 July, 1867, by royal proclamation. The Act provides that the constitution of Canada shall be 'similar in principle to that of the United Kingdom'; that the executive authority shall be vested in the Sovereign, and carried on in his name by a Governor-General and Privy Council; and that the legislative power shall be exercised by a Parliament of two Houses, called the 'Senate' and the 'House of Commons.' The present position of Canada in the British Commonwealth of Nations was defined at the Imperial Conference of 1926: 'The self-governing Dominions are autonomous Communities within the British Empire, equal in status, though united by a common allegiance to the Crown.'

Provision was made in the British North America Act for the admission of British Columbia, Prince Edward Island, the Northwest Territories and Newfoundland into the Dominion. In 1869 Rupert's Land, or the Northwest Territories, was purchased from the Hudson's Bay Company; the province of Manitoba was erected from this territory, and admitted into the confederation on 15 July, 1870. On 20 July, 1871, the province

of British Columbia was admitted, and Prince Edward Island on 1 July 1873. The provinces of Alberta and Saskatchewan were formed from the provisional districts of Alberta, Athabaska, Assiniboia and Saskatchewan, and admitted on 1 Sept., 1905. Newfoundland formally entered the Dominion as Canada's tenth province on 31 March, 1949.

The following is a list of Governors-General of Canada :—

Viscount Monck	1867–1869	H.R.H. the Duke of Connaught	1911–1916
Lord Lisgar	1869–1872	Duke of Devonshire	1916–1921
Earl of Dufferin	1872–1878	Viscount Byng of Vimy	1921–1926
Marquess of Lorne	1878–1883	Viscount Willingdon	1926–1931
Marquess of Lansdowne	1883–1888	Earl of Bessborough	1931–1935
Lord Stanley of Preston	1888–1893	Lord Tweedsmuir	1935–1940
Earl of Aberdeen	1893–1898	Earl of Athlone	1940–1946
Earl of Minto	1898–1904	Field-Marshal Viscount Alexander of Tunis	1946-
Earl Grey	1904–1911		

In Feb., 1931, the Government of Norway formally recognized the Canadian title to the Sverdrup group of Arctic islands. Canada thus holds sovereignty in the whole Arctic sector north of the Canadian mainland.

On 30 June, 1931, the House of Commons approved the enactment of the Statute of Westminster emancipating the Provinces as well as the Dominion from the operation of the Colonial Laws Validity Act, and thus removing what legal limitations existed as regards Canada's legislative autonomy. The statute received the royal assent on 12 Dec., 1931.

The members of the Senate are nominated for life by summons of the Governor-General under the Great Seal of Canada. By the Amendment of the British North America Act, 1867 (May, 1915), which came into effect in 1917, the Senate consisted of 96 senators. As a result of Newfoundland's admission the Senate now consists of 102 senators, namely, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Prince Edward Island, 6 from Manitoba, 6 from British Columbia, 6 from Alberta, 6 from Saskatchewan and 6 from Newfoundland. Each senator must be at least 30 years of age, a born or naturalized British subject, and must reside in, and be possessed of property, real or personal, to the value of $4,000 within the province for which he is appointed. The House of Commons is elected by the people, for five years, unless sooner dissolved. The British North America Act provided that while Canadian Confederation lasts the province of Quebec shall have, in the Canadian Parliament, a fixed representation of 65 seats and all other provinces shall be represented proportionately according to their population, at each decennial census. The twenty-first Parliament, elected on 27 June, 1949, comprised 262 members, with the representation as follows :—83 for Ontario, 73 for Quebec, 13 for Nova Scotia, 10 for New Brunswick, 16 for Manitoba, 18 for British Columbia, 4 for Prince Edward Island, 20 for Saskatchewan, 17 for Alberta, 1 for the Yukon Territory and 7 for Newfoundland. Voting is by ballot. Women have the vote and are eligible for election to the Dominion Parliament.

State of parties in the Senate (Jan., 1951) :—Liberals, 77; Progressive Conservatives, 11; vacant, 14: total, 102.

State of the parties (Jan., 1951) in the House of Commons :—Liberals, 185; Progressive Conservatives, 43; Co-operative Commonwealth Federation (Canadian Socialist Party), 13; Social Credit Party, 10; smaller parties, 9; vacant, 2; total 262.

The Speaker of the Senate and the Speaker of the House of Commons receive salary and allowances of $10,000 per annum. The Deputy Speaker of the House of Commons receives salary and allowances of $5,500, and

these three officers receive in addition the sessional allowance of $4,000 paid to all Senators and members of the House of Commons. An additional allowance of $2,000 is paid at the end of each calendar year; this allowance is taxable with Senators, Ministers of the Crown and the Leader of the Opposition, but not subject to income tax with members of the House of Commons.

Governor-General.—Field-Marshal the Rt. Hon. Viscount Alexander, K.G., G.C.B., G.C.M.G., C.S.I., D.S.O., M.C. (appointed 1 Aug., 1945; installed 12 April, 1946; salary, £10,000 per annum). The office and appointment of the Governor-General are regulated by letters patent, signed by the King on 8 Sept., 1947, which came into force on 1 Oct., 1947.

He is assisted in his functions, under the provisions of the Act of 1867, by a Privy Council composed of Cabinet Ministers.

The following is the list of the Cabinet as in Jan., 1951, in order of precedence, which in Canada attaches generally rather to the person than to the office:—

Prime Minister and President of the Privy Council.—Rt. Hon. Louis Stephen St. Laurent, P.C., K.C.

Minister of Trade and Commerce.—Rt. Hon. Clarence Decatur Howe, P.C.

Minister of Agriculture.—Rt. Hon. James Garfield Gardiner, P.C.

Minister of Public Works.—Alphonse Fournier, K.C.

Minister of National Defence.—Brooke Claxton, K.C.

Minister of Transport.—Lionel Chevrier, K.C.

Minister of National Health and Welfare.—Paul Joseph James Martin, K.C.

Minister of Finance and Receiver General.—Douglas Charles Abbott, K.C.

Minister of National Revenue.—James Joseph McCann, M.D.

Leader of the Senate.—Wishart McLea Robertson.

Minister of Labour.—Milton Fowler Gregg, V.C.

Minister of Fisheries.—Robert Wellington Mayhew.

Secretary of State for External Affairs.—Lester Bowles Pearson.

Minister of Justice and Attorney-General.—Stuart Sinclair Garson.

Minister of Resources and Development.—Robert Henry Winters.

Secretary of State for Canada.—Frederick Gordon Bradley.

Minister of Veterans' Affairs.—Hugues Lapointe.

Postmaster-General.—Gabriel Edouard Rinfret.

Minister of Citizenship and Immigration.—Walter E. Harris.

Minister of Mines and Technical Surveys.—George Prudham.

The sessional indemnity of a member of the House of Commons is $4,000. The remuneration of a Cabinet Minister is $10,000 a year (and of the Prime Minister $15,000 a year) in addition to the sessional indemnity. A Cabinet Minister is also entitled to a motor-car allowance of $2,000. The Leader of the Opposition in the House of Commons receives an annual allowance of $10,000 in addition to the sessional indemnity. The Speaker of the House of Commons receives, in addition to his sessional indemnity of $4,000, a salary and motor-car allowance amounting to $7,000, and is also entitled to an allowance of $3,000 in lieu of residence. Members of the House receive $2,000 per annum as an expense allowance, payable at the

end of each calendar year. The allowance is not subject to income tax except in the case of Ministers of the Crown and the Leader of the Opposition, and of members of the Senate.

Diplomatic Representatives.

Country	Canadian Representative	Foreign Representative
Argentina	J. D. Kearney, M.C., K.C.	Dr. Agustin Nores Martinez
Australia	C. Fraser Elliott, C.M.G., K.C.	Rt. Hon. F. M. Forde

Area and Population.

The following is the population of the area now included in the Dominion :—

Year	Population	Year	Population	Year	Population
1806–7 (est.)	433,000	1891	4,833,239	1931	10,376,786
1861	3,229,633	1901	5,371,315	1941	11,506,655
1871	3,689,257	1911	7,206,643	1949 (est.)	13,549,000
1881	4,321,810	1921	8,787,949	1950 (est.)	13,845,000

The following are the areas of the provinces, etc., with the population at recent censuses :—

Province	Land area (sq. miles)	Fresh water area [1] (sq. miles)	Total land and fresh water area (sq. miles)	Population, 1921	Population, 1931	Population, 1941 (2 June)
Newfoundland	37,013[7]	5,721[7]	154,734	263,033	—	—

Northwest Territories	1,253,438	51,465	1,304,903	8,143	9,316	12,028
Royal Canadian Navy	—	—	—	485	—[4]	—[4]
Totals	3,499,116[6]	234,028[6]	3,815,144	8,787,949[6]	10,376,786[6]	11,506,655[6]

[1] The salt-water areas of Canada are excluded.
[2] By Federal Act passed during the session of 1912, the boundaries of the provinces of Ontario, Quebec and Manitoba were extended at the expense of the North-West Territories. Ontario was enlarged by 146,400 square miles, Quebec by 351,780 and Manitoba by 178,000.
[3] As amended by the Labrador Boundary Award.
[4] Distributed according to naval station or home residence.
[5] [illegible]
[6] [illegible] foundland which was 289,588 in 1935, and 321,819 in 1945.
[7] [illegible]

Of the total population in 1941, 9,487,808 were Canadian born, 1,003,769 other British born and 1,014,133 foreign born, 312,473 of the latter being

U.S.A. born. The population born outside Canada in the provinces was in the following ratio (per cent.):—Prince Edward Island, 2·57; Nova Scotia, 7·05; New Brunswick, 4·50; Quebec, 6·72; Ontario, 19·36; Manitoba, 26·53; Saskatchewan, 26 66; Alberta, 32·45; British Columbia, 37·26.

In 1941, figures for the population, according to origin, were :—

Origin	1941	Origin	1941
British :—		Italian	112,625
English	2,968,402	Russian	83,708
Scottish	1,403,974	Austrian	37,715
Irish	1,267,702	Chinese	34,627
Other	75,826	Finnish	41,683
		Hungarian	54,598
Total, British	5,715,904	Bulgarian and Rumanian	27,949
		Czech and Slovak	42,912
French	3,483,038	Belgian	29,711
German	464,682	Japanese	23,149
Scandinavian [1]	244,603	Negro	22,174
Ukranian	305,929	Yugoslavic	21,214
Hebrew	170,241	Greek	11,692
Netherlands	212,863	Other and origin not stated	72,632
Polish	167,485		
Indian and Eskimo	125,521	Grand totals	11,506,655

[1] Includes Danish, Icelandic, Norwegian and Swedish, which were, respectively 37,439, 21,050, 100,718 and 85,396.

Population of the principal cities and towns according to the returns of the 1941 Dominion census :—

Cities	Population	Cities	Population
Montreal	903,007	London	78,264
Toronto	667,457	Halifax	70,488
Vancouver	275,353	Verdun, P.Q.	67,349
Winnipeg	221,960	Regina	58,245
Hamilton	166,337	Saint John, N.B.	51,741
Ottawa	154,951	St. John's, Newfoundland	44,603 [2]
Quebec	150,757	Victoria	44,068
Windsor, Ont.	105,311 [1]	Saskatoon	43,027
Edmonton	93,817		
Calgary	88,904		

[1] Amalgamation of Windsor, Walkerville, East Windsor and Sandwich, 1 July, 1935.
[2] Census, 1945.

'Greater' Montreal had 1,139,921 population, 'Greater' Toronto 900,491, 'Greater' Vancouver 351,491 and 'Greater' Winnipeg 290,540 in 1941.

According to the quinquennial census of the Prairie Provinces, 1946. Winnipeg had 229,045 population, Edmonton 113,116, Calgary 100,044, Regina 60,246 and Saskatoon 46,028.

The total 'urban' population of Canada in 1941 was given as 6,252,416, against 5,572,058 in 1931.

While the registration of births, marriages and deaths is under provincial control, the statistics for the nine provinces are now by arrangement compiled on a uniform system by the Dominion Bureau of Statistics. The following table gives the results for 1948 :—

Province	Living births		Marriages		Deaths	
	Number	Per 1,000 population	Number	Per 1,000 population	Number	Per 1,000 population
Prince Edward Island	2,842	30·6	635	6 8	887	9·5
Nova Scotia . .	17,791	28 0	5,093	8 0	6,097	9·6
New Brunswick .	17,279	34·4	4,640	9 2	4,959	9·9
Quebec . . .	114,709	30·3	34,646	9·1	33,603	8·9
Ontario . . .	104,195	24·2	43,242	10·1	42,364	9·9
Manitoba . .	18,870	24 9	7,325	9·7	6,675	8·8
Saskatchewan . .	21,562	25·2	7,171	8·4	6,496	7 6
Alberta . . .	24,075	28·5	8,844	10·5	6,987	8·3
British Columbia .	25,984	24·0	11,718	10·8	11,316	10·5
Total . .	347,307	27·0	123,314	9·6	119,384	9·3

Immigrant arrivals in Canada during 4 calendar years :—

Origin	1946	1947	1948	1949
English and Welsh . . .	39,543	28,243	31,108	14,318
Irish	3,218	2,908	4,178	2,585
Scottish	8,647	7,596	10,771	5,298
Total British	51,408	38,747	46,057	22,201
The United States . .	11,469	9,440	7,381	7,744
German	449	300	3,051	5,988
Norwegian and Swedish . .	355	241	492	527
French and Belgians . . .	2,491	1,365	2,145	1,735
Italians	145	139	3,202	7,742
Jews	1,517	1,866	2,386	4,499
Russians and Finlanders . .	176	277	1,606	1,121
Other nationalities . . .	3,709	11,752	52,094	43,660
Total	71,719	64,127	125,414	95,217

Religion.

The number of members of each religious creed was as follows in 1941 :—

Roman Catholics . .	4,800,895	Greek Catholics . .	185,657
United Church . .	2,204,875	Jews	168,367
Anglicans . . .	1,751,188	Greek Orthodox . .	139,629
Presbyterians. . .	829,147	Others (incl. 894 Quakers), and religion not stated	542,152
Baptists . . .	483,592		
Lutherans . . .	401,153	Total .	11,506,655

The numbers of the leading denominations in the provinces, 1941 :—

Province	Roman Catholic[1]	United Church	Anglican	Presbyterian	Baptist
Prince Edward Island	42,743	24,005	5,739	14,724	5,443
Nova Scotia . .	188,944	124,301	103,393	47,415	89,272
New Brunswick .	220,454	63,268	55,155	15,382	88,766
Quebec . . .	2,894,621	100,196	162,056	56,086	12,303
Ontario . . .	882,369	1,073,425	815,413	433,708	192,915

[1] Includes Greek Catholic.

Province	Roman Catholic[1]	United Church	Anglican	Presbyterian	Baptist
Manitoba	203,259	194,001	125,076	43,073	13,267
Saskatchewan	243,734	230,495	117,674	54,856	19,460
Alberta	191,343	193,664	113,279	68,910	32,268
British Columbia	113,282	200,817	245,531	94,300	29,780
Yukon	742	404	2,545	422	75
N.W. Territories	5,061	299	5,327	271	43

[1] Includes Greek Catholic.

Education.

By the British North America Act the Provincial Governments have control in educational matters. In all provinces except Quebec the number of private schools is small, so that elementary and secondary education in Canada is almost entirely state-controlled. Primary schools—*i.e.* elementary schools in all provinces, except Quebec, are free, and the same is true of secondary education in most provinces. In Quebec (except in certain municipalities) a fee is collected for primary education for every child of school age without reference to school attendance. In the same province Catholic and Protestant schools are under one Department of Public Instruction and are supported by a common system of taxation, but are administered independently. In Alberta, Ontario and Saskatchewan minority elementary schools, whether Protestant or Catholic, are called Separate Schools, and are under the same provincial administration as majority schools. Secondary education in these three provinces is non-sectarian.

There are 6 state-controlled universities in Canada and 12 independent of provincial control. These, together with colleges of higher education, had an enrolment of 217,198 students in 1947, of whom 109,430 were of post matriculation grade.

The following statistics give information, for 1948, about the state-controlled schools, exclusive of universities, in all provinces and including independent primary schools in Quebec :—

Provinces	Schools	Teachers	Pupils	Expenditure[1]
Pr. Ed. Island	463	680	18,571	983,610
Nova Scotia	1,905	3,958	124,128	9,106,247
New Brunswick	1,601	3,153	98,331	7,562,848
Quebec	8,861	[2]	627,403	68,000,000
Ontario	7,300	23,578	690,612	88,628,759
Manitoba	2,098	4,595	120,482	13,643,466
Saskatchewan	4,450	7,141	168,605	20,051,752
Alberta	2,550	5,559	156,629	22,307,778
British Columbia	965	5,014	146,708	20,154,202
Total	31,393[3]	—	4,390,234	250,438,662

[1] By and through school boards, excluding expenditures of provincial governments.
[2] Data not available. [3] Including 1,200 in Newfoundland.

The aboriginal Indian population numbered 118,316 in 1941 and of these about 110,000 live on the Indian Reserves. The Dominion Govern-

ment provides a special school system for the Indian youth, of whom 20,101 were enrolled in its schools in 1948.

In 1949, there were 2,200 cinemas with a seating capacity of 1,004,849.

Justice and Crime.

There is a Supreme Court in Ottawa, having appellate, civil and criminal jurisdiction in and throughout Canada. There is an Exchequer Court, which is also a Court of Admiralty. There is a Superior Court in each province and county courts, with limited jurisdiction, in most of the provinces, all the judges in these courts being appointed by the Governor-General. Police magistrates and justices of the peace are appointed by the Provincial Governments.

For the year ended 30 Sept., 1948, total convictions for indictable offences were 41,632; total convictions for all offences amounted to 918,277, These figures are for convictions of adults only. The number of juvenile delinquents who were convicted of major and minor offences was 7,155 for the year ended 30 Sept., 1948.

Social Insurance.

The Canadian Unemployment Insurance Act came into operation on 1 July, 1941. At first no person who received more than $2,000 per year was covered, but by an amendment to the Unemployment Insurance Act, which came into effect on 1 Sept., 1943, all employees paid on a contractual basis of an hourly, daily, weekly or piece rate (including a mileage rate) are now included in insurable employment regardless of the amount of their earnings, together with all other employees who receive $2,400 or less per year under monthly or semi-monthly rates, or less than $3,120 per year under a weekly rate.

From 1 July, 1941, to 31 Dec., 1949, employers and employees paid $619,029,975 into the fund and the Dominion added $123,810,375.

Finance.

The following relates to the Consolidated Fund, *i.e.*, general revenue and expenditure (in Canadian dollars) :—

Years ended 31 March	Ordinary revenue	Total expenditure
1944-45	2,300,097,373	5,245,611,924
1945-46	2,363,161,854	5,136,228,506
1946-47	2,588,530,895	2,634,227,412
1947-48	2,629,845,985	2,195,626,454
1948-49	2,649,089,827	2,175,892,334
1949-50	2,528,716,437	2,448,615,662

Consolidated Fund revenue, 1949-50 (in Canadian dollars):—

Customs	225,877,683	Revenue from taxes	1,876,674,892
Excise	220,564,504	Various	80,982,763
Return on investments	91,528,987		
Post Office	84,511,786	Total	2,580,140,615

Detailed estimates of the expenditure for the year ended 31 March, 1951 (in Canadian dollars):—

Agriculture	59,775,636	Resources and Development—	
Auditor-General's Office	593,762	*Department*	45,740,571
Chief Electoral Officer	80,515	*National Film Board*	2,211,017
Citizenship and Immigration	20,888,154	R. Canadian Mounted Police	19,274,740
Civil Service Commission	1,587,250	Secretary of State	1,790,015
External Affairs	11,913,837	Trade and Commerce—	
Finance	568,577,141	*Department*	19,254,483
Fisheries	9,103,590	*Dominion Coal Board*	4,951,040
Governor-General and Lieutenant-Governors	259,132	*National Research Council*	12,093,703
Insurance	343,440	*Atomic Energy Control Board*	7,991,530
Justice—		*Canadian Arsenals Ltd.*	2,900,000
Department	4,613,597	Transport	82,909,801
Penitentiaries	7,661,296	Veterans' Affairs	215,769,939
Labour—			
Department	10,055,113	Total Expenditure	2,303,725,500
Unemployment Insurance	46,743,330		
Legislation	4,443,882	Chargeable to Ordinary Account	2,261,075,201
Mines and Technical Surveys	19,027,414	Chargeable to Capital Account	20,744,679
National Defence	425,000,000	Chargeable to Special Account	21,905,620
Health and Welfare	455,253,570		
National Revenue	51,998,312		2,303,725,500
Post Office	85,674,757	Government Owned Enterprises	5,106,100
Prime Minister's Office	141,260		
Privy Council	3,629,080	Grand Total Expenditure	2,308,831,600
Public Archives	208,242		
Public Printing and Stationery	588,730		
Public Works	100,677,521		

Preliminary estimated expenditures for 1951–52 total $2,308,831,600.
On 31 March, 1950, the net debt was estimated at $11,644,609,199.

Foreign Debts.—The amount of Greek debt to Canada outstanding is $6,525,000; the original Rumanian debt has been funded and with interest aggregates $24,329,262.

Defence.

The National Defence Act, 1922, which came into force 1 Jan., 1923, provides for a Department of National Defence presided over by the Minister of National Defence.

Army.—The Canadian Army comprises:—(*a*) The Active Force, consisting essentially of that portion of the Army which is maintained on continuous service. The Active Force is similar to the pre-war Permanent Force. (*b*) The Reserve Force, which comprises that portion of the Army liable to undertake not more than thirty days' training in any one year. When, during an emergency, the Reserve Force is placed on active service, other than in aid of the civil power, the units and personnel so placed shall be included in and form part of the Active Force. The Reserve Force is similar to that portion of the Army which was previously designated the Non-Permanent Active Militia. (*c*) The Supplementary Reserve, consisting of an organized and an unorganized element. Its personnel are not obligated to undertake annual training unless otherwise ordered by the Governor-in-Council. (*d*) The Canadian Officers Training Corps, which consists of officer cadets and is formed in contingents allocated to schools, colleges, universities and units. Officer cadets of the C.O.T.C. are liable for such

annual training as may be ordered by the Governor-in-Council. (*e*) The Cadet Services of Canada, which consists of such numbers of commissioned officers as may be authorized by the Governor-in-Council for the training and administration of the Royal Canadian Army Cadets. (*f*) The Reserve Militia, which consists of such numbers of officers and men as may be authorized by the Governor-in-Council. (*g*) The Canadian Army Special Force which was formed for service in fulfilment of Canada's obligation as a member of the United Nations.

Additional to, but not an integral part of, the Canadian Army are :—(*a*) officially authorized Cadet Corps, (*b*) officially authorized Rifle Associations, (c) certain training centres as authorized from time to time.

Command is exercised through commanders of 5 military commands, respectively designated Western, Prairie, Central, Quebec and Eastern Commands. There are 7 military areas within the five commands.

Strength of the Active Force at 23 Sept., 1950, 2,728 officers and 19,103 other ranks. Strength of the Special Force at same date, more than 9,000 officers and men.

Navy.—The Royal Canadian Navy was established in 1910. Previous to 1 January, 1946, it was made up of the Royal Canadian Navy, the Royal Canadian Naval Reserve and the Royal Canadian Naval Volunteer Reserve. On that date the two reserve components were merged and replaced by the Royal Canadian Navy (Reserve).

In 1950 it comprised :—(*a*) The Royal Canadian Navy (or permanent force), consisting of that portion of the Navy which is maintained on continuous service; (*b*) the Royal Canadian Navy (Reserve), which consists of the Active List, for both officers and men, the Retired List, for officers, and the Emergency List, for men. Personnel on the Active List are given training in 21 naval establishments, known as the Naval Divisions, located in centres from coast to coast, and receive a minimum of two weeks' full-time training per annum either at sea, or at one or other of the Commands located at Halifax and Esquimalt.

University Naval Training Divisions exist in 26 universities, and provide naval training for university students; these are a component of the R.C.N. (Reserve) Active List. The Royal Canadian Sea Cadet Corps, sponsored by the Navy League of Canada, provides cadet training under the supervision of the R.C.N

Principal ships of the Royal Canadian Navy :—

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft h.p.	Designed speed
			Belt	Turrets				
		Light Aircraft Carrier.						
1948	Magnificent .	Tons 14,000	inches —	inches —	30 40-mm. A.A. (34 aircraft)	—	40,000	Knots 25
		Cruisers.						
1945	Ontario .	8,000	3–4½	2	9 6-in.	6 21-in.	72,500	31½
1948	Uganda .				8 4-in.			

There are also 11 destroyers, 6 frigates, 9 fleet minesweepers, 3 motor minesweepers, 7 motor launches and 40 other vessels.

In 1950 the Royal Canadian Navy reorganized her fleet categories and adopted a hull number assignment list basically similar to that used in the United States Navy, every vessel in the Navy List being given a distinctive serial number prefaced by initials denoting the category to which she belongs, as follows:—CVL, light aircraft carrier; CL, light cruiser DDE, destroyer; DE, anti-submarine escort (fast A/S frigate); PF, frigate; AM, fleet minesweeper; AMc, motor minesweeper; AGB, Arctic patrol ship; YNG, gate vessel: PTC, motor launch, etc.

All Canadian destroyers have been or are being re-armed and equipped with the latest anti-submarine gear and reclassified as fleet escorts (DDEs). Three fast A/S frigates (DEs) are under construction in Canadian shipyards. They will each displace 2,000 tons and cost $8,000,000. Four more anti-submarine escorts are projected. Ten minesweepers are also included in the new construction programme of 18 ships.

The Navy estimates for 1950–51 amounted to $83,000,000. Personnel in 1950 numbered 9,600 officers and men with reserves of 7,500 authorized and 4,688 actual. Ships of the Royal Canadian Navy fly the white ensign and wear red maple leaves on the fore funnel.

The Royal Canadian Mounted Police (Marine Section) comprises 8 'Commissioner' class ex-fleet minesweepers of 590 tons, 4 'Fort' class motor launches, and a dozen harbour patrol craft.

Royal Canadian Air Force.—The Royal Canadian Air Force (formed as Canadian Air Force, 1920; granted title Royal in 1923, and reorganized as a permanent force, 1 April, 1924) is divided into two components, the RCAF (Regular) and the RCAF (Reserve). Closely associated with the RCAF is the Air Cadet League of Canada which gives mental, moral and [illegible]ing to air-minded youths. The Air Cadet League has an [illegible] for 22,500 Canadian boys.

Controlled by Air Force Headquarters, Ottawa, the RCAF is sub-divided into 4 commands: Training Command, with headquarters at Trenton, Ont.; North West Air Command, with headquarters at Edmonton; Air Transport Command, with headquarters at Rockcliffe, Ont., and Air Material Command, with headquarters at Ottawa.

Two regular force fighter squadrons are in operation, one of which moved to the United Kingdom in 1951. Establishment of 'more than five' regular fighter squadrons is planned together with a radar net. Other squadrons in the RCAF (Regular) in 1950 were 3 transport squadrons, one flying North Stars between the United States and Japan in the Korean Airlift; a Maritime Squadron, and 3 photo-survey squadrons. Two operational training units, one maritime, the other fighter-defence, are functioning. Ten reserve fighter or fighter-bomber squadrons and a reserve radar net are in operation.

The standard fighter plane in the RCAF is the British Vampire III but it is to be replaced by the Canadian-designed and built CF-100 'Canuck' and the Canadian-built F-86A 'Sabre.'

Strength of the RCAF (Regular) on 31 Aug., 1950, was 14,121 airmen and 3,309 officers for a total of 17,430 all ranks.

The Canadian Services Colleges, situated at Kingston, Ont. and Royal Roads, Victoria, B.C., are for the education and training of boys for commissioned careers in the Navy, Army and Air Force.

The Royal Military College at Kingston, Ont. reopened in Sept., 1948, as a joint Service College. The Naval and Air Force Cadet College at

Royal Roads, B.C. also became a joint Service College the same year. The duration of the course at Royal Roads is two years and that at Royal Military College four years, the first two years being the same at both Colleges. The course for Naval Cadets of the Executive and Engineering (Marine) Branches, two years in length, may be taken at either College. The course for other Naval Cadets and all Army and Air Force Cadets, of four years duration, of which the first two years may be taken at either College and the last two being spent at the Royal Military College.

With the exception of the fourth year at the Royal Military College, which has no summer term, each year consists of eleven months of instruction and is divided into three terms, Fall, Winter and Summer. During the Fall and Winter terms, most of the instruction is in academic subjects. The Summer term is devoted entirely to practical Service training at the various Armed Forces' training establishments. Naval cadets spend a large proportion of this time at sea and Air Force Cadets receive aircrew training.

Candidates must have reached their sixteenth birthday but not their twentieth birthday on 1 Jan. preceding entrance. Half the candidates are selected on provincial quotas, determined by population and the remainder selected in open competition.

The National Defence College, located at historic Fort Frontenac in Kingston, Ont., is an institution for the advanced study of war and security problems in relation to other aspects of national policy in times of emergency. The programme includes the study of new and forseeable developments in science, economics and international politics and their effects upon national security. It is open to officers of the three armed services and to senior civil servants and is under the control of the Chiefs of Staff of the Navy, Army and Air Force and the Director-General of Defence Research, as well as the Under-Secretary of State for External Affairs and the Secretary to the Cabinet. The course of the National Defence College is similar to that of the Imperial Defence College of the United Kingdom and that of the National War College of the United States.

Defence Research Board.—The Board consists of 12 members, 1 of whom is appointed Director General of Defence Research, and designated as Chairman and chief executive officer. There are five other *ex-officio* members, the Chief of the Naval Staff, the Chief of the General Staff, the Chief of the Air Staff, the Deputy Minister of National Defence and the President, National Research Council. The remaining six members are appointed by the Governor-in-Council, and are persons with scientific and technical qualifications drawn from the universities and industry.

The primary function of the Board is the co-ordination of the research and development activities of the Navy, Army and Air Force and to provide a link between the Armed Services and the civilian scientific community in Canada. A secondary function is to collaborate with the National Research Council in the application for the peaceful economic and industrial benefit of Canada of the technical achievements of wartime and future developments in defence science.

Royal Canadian Mounted Police.—The Royal Canadian Mounted Police is a civil force maintained by the Federal Government. It was organized in 1873, and then known as the North West Mounted Police, to provide police protection in the unsettled portions of the north-west. In 1904, the title 'Royal' was given to the force. In 1920, the Dominion Police was amalgamated with it and the name was changed to the Royal Canadian Mounted Police. The headquarters was moved from Regina to

Ottawa and the force may now be called upon to perform duties in any portion of the Dominion. In 1928 the Royal Canadian Mounted Police absorbed the Saskatchewan Provincial Police and in 1932 the Provincial Police Forces of Alberta, Manitoba, New Brunswick, Nova Scotia and Prince Edward Island were absorbed in like manner. During 1932, the Force also assumed the administration of the Preventive Service Branch of the Department of National Revenue. In Aug., 1950, the Royal Canadian Mounted Police absorbed the Newfoundland Rangers and selected members of the Newfoundland Constabulary whose duties are outside the City of St. John's. The British Columbia Provincial Police were also absorbed by the Royal Canadian Mounted Police.

The term of engagement in the Royal Canadian Mounted Police is 5 years. Recruits are trained at Regina, Saskatchewan, and Rockcliffe (near Ottawa), Ontario. The strength in Sept., 1950, was 3,975, excluding civil servants and reserves. The force has 155 horses, 984 motor vehicles, 58 trucks, 38 motor cycles, 7 aeroplanes, 15 police dogs, 259 sleigh dogs and (in its Marine Section) 22 vessels.

Production and Industry.

Agriculture.—Though the manufacturing industries now predominate, Canada is largely agricultural, and among her natural resources arable lands stand unrivalled. Present information permits only a rough estimate of their actual extent, but it is believed that about 547,924 square miles are physically suitable for agriculture. Of this area 243,507 square miles are now under forest, and about one-half of the potenial agricultural land has been alienated. Grain growing, dairy farming, fruit farming, ranching and fur farming are all carried on successfully. The following table shows the estimated agricultural wealth and production for 1949, valued in dollars :—

Land and buildings .	5,040,534,000	Field crops . . .	1,420,299,000
Implements and machinery	1,008,683,000	Farm animals . .	1,373,050,000
Livestock and poultry [1] .	1,462,328,000	Milk production . .	438,162,000
		Poultry and eggs . .	230,221,000
		Fruits . . .	43,120,000
		Miscellaneous [2] . .	72,473,000
Total value . .	7,511,545,000	Total production .	3,577,325,000

[1] Exclusive of value of animals on fur farms.
[2] Includes wool, maple products, tobacco, etc.

Number of occupied farms, according to the census of 1941, was 732,832.

Irrigation.—[illegible] in Canada began with the passing of the North West [illegible], 1894. With the transfer of the natural resources in 1931 the administration of water rights, excepting international streams, became a provincial responsibility. The total expenditure on irrigation up to that time was estimated at $50,000,000, and the total area of irrigable land was nearly 608,000 acres. The Prairie Farm Rehabilitation Act, passed by the Parliament of Canada in 1935, marked the beginning of a new phase in irrigation development on the prairies whereby the Dominion Government was to undertake construction of large irrigation works, to provide assistance for individual projects, as well as to conduct surveys and prepare plans.

The total area under irrigation in 1948 amounted to 401,075 acres in Alberta and about 160,000 acres in British Columbia. The St. Mary and Milk Rivers Project in Alberta will, when completed, irrigate about 500,000 acres.

Field Crops.—In 1949, 61,827,000 acres were under field crops, those most widely cultivated being wheat, oats, hay and clover, barley and rye. The following are the revised estimates of Sept., 1950, for acreage and yield of grain crops for the year 1949 :—

Provinces	Wheat		Oats		Barley	
	Acres	1000 bushels	Acres	1000 bushels	Acres	1000 bushels
Pr. Ed. Island	6,500	150	113,000	4,407	10,200	337
Nova Scotia	2,000	44	69,500	2,780	7,800	234
New Brunswick	3,600	79	189,000	6,993	15,000	435
Quebec	25,600	468	1,509,000	37,574	125,000	3,000
Ontario	864,000	25,776	2,086,600	71,967	228,000	6,908
Manitoba	3,167,000	57,000	1,703,000	53,000	1,699,000	40,000
Saskatchewan	15,737,000	183,000	3,381,000	85,000	1,800,000	33,000
Alberta	7,586,000	97,000	2,255,000	52,000	2,118,000	36,000
British Columbia	149,000	3,889	83,400	4,195	15,700	494
Total Canada	27,540,700	367,406	11,388,900	317,916	6,016,700	120,408

The November estimates of crops for 1950 were:—Wheat, 461,720,000 bushels, oats, 420,328,000 bushels; barley, 171,328,000 bushels; rye, 13,346,000 bushels; flax seed, 4,540,000 bushels; hay and clover, 13,164,000 tons.

The total value of field crops for 1949 was estimated at $1,420,299,000.

The following tables show the acreage and yield of field crops, by provinces, in 1949 :—

Provinces	Rye		Flax seed		Mixed grains	
	Acres	1000 bushels	Acres	1000 bushels	Acres	1000 bushels
Pr. Ed. Island	—	—	—	—	69,500	2,850
Nova Scotia	—	—	—	—	6,300	239
New Brunswick	—	—	—	—	10,100	374

[1] Exclusive of 1,488,900 acres and 2,602,000 tons of alfalfa and 740,000 acres and 914,000 tons of grain hay.

Livestock.—In parts of Saskatchewan and Alberta stockraising is still carried on as a primary industry, but the livestock production of the Dominion at large is mainly a subsidiary of mixed farming. The following table shows the numbers of livestock by provinces in 1949 :—

Provinces	Horses	Milch cows	Other cattle	Sheep	Swine	Poultry
Pr. Ed. Island	22,800	44,500	23,500	42,900	63,500	1,225,000
Nova Scotia	30,900	97,000	57,000	123,300	49,800	1,979,000
New Brunswick	41,500	102,100	47,000	69,000	76,500	1,475,000
Quebec	303,200	1,114,300	410,900	428,700	1,116,300	12,127,000
Ontario	401,500	1,249,900	905,500	511,800	2,193,100	24,720,000
Manitoba	164,300	243,600	251,900	131,000	303,000	7,100,300
Saskatchewan	433,600	359,800	533,200	234,100	458,600	9,522,000
Alberta	349,400	315,000	729,000	441,800	847,100	10,439,000
British Columbia	49,000	94,000	178,900	92,800	55,000	4,072,000
Total: 1949	1,796,200	3,620,200	3,136,900	2,075,400	5,162,900	72,659,300
Total: 1948	1,904,900	3,700,700	3,374,600	2,246,800	5,463,100	72,580,900

Net production of eggs in 1949, 343,848,000 dozens; in 1948, 388,579,000 dozens.

Wool production, 1949, 9,835,000 lb.; 1948, 11,915,000 lb.

Dairying.—The dairying industry of the Dominion is carried on most extensively in Ontario and Quebec, although there are dairy factories in all of the provinces. The total number of creameries in Canada in 1948 was 1,193; of cheese factories, 652; of combined butter and cheese factories, 106; of condenseries, 37; and the total value of all products of dairy factories, $438,496,356. Creamery butter produced in 1949 was 278,657,000 lb., and factory cheese, 118,034,000 lb. Total milk production, 1949, 16,788,864,000 lb.

Fruit Farming.—The value of fruit production by provinces in 1949 was (in dollars):—British Columbia, 23,300,000; Ontario, 12,613,000; Quebec, 4,108,000; Nova Scotia, 2,515,000; New Brunswick, 584,000; total apple production in Canada in 1949 was 18,151,000 bushels.

Miscellaneous.—The total shorn wool production in 1949 was estimated at 7,759,000 lb. The production in 1949 of tobacco, which is practically

confined to Ontario, Quebec and British Columbia, was estimated at 139,820,000 lb. from 109,053 acres. Farm eggs sold and used for consumption (in 1949), 314,488,000 dozens, valued at $133,750,000, and the 1950 value of maple products was $10,636,000.

Forestry.—The total area of land covered by forests is officially estimated at 1,290,960 square miles. Of this 813,000 square miles are productive and accessible. About 435,000 square miles of productive forest are considered to be economically accessible. Lumber production, 1948, 5,909 million feet; estimate for 1949, 5,289 million feet.

The value of primary forest production in 1948 was $586,295,068; gross value of lumber production (including all saw-mill products) was $409,267,472. Gross value of products in the pulp and paper industry reached $836,148,393 in 1949; newsprint production amounted to 5,187,206 tons with a value of $467,976,343.

Fisheries.—In the calendar year 1948 the capital invested in vessels, gear, canneries, etc., was $67,289,244. The total value of the produce of the fisheries of Canada in 1948 was $139,826,243. The principal kinds of fish marketed in 1948 were (in dollars):—Salmon, 37,929,189; cod, 18,802,344; herring, 15,867,918; lobsters, 13,958,139; halibut, 5,396,847; sardines, 7,247,977; whitefish, 4,988,865; pickerel (or dore), 3,742,200; haddock, 4,535,995; mackerel, 2,251,542. The number of persons employed in 1948 was 82,612, including fishermen and those employed in canning and curing establishments. Number of factories and canneries in operation in 1948, 600.

Mining.—Nova Scotia, British Columbia, Quebec, N. and W. Ontario, Alberta and Yukon Territory are the chief mining districts. The total value of the mineral produced in 1949 was $901,110,026. The principal metals and minerals produced in 1949 were as follows:—

Product	Quantity	Value
		Dollars
Metallics		
Gold . . . . . fine oz.	4,123,518[1]	148,446,648
Silver . . . . . fine oz.	17,641,493[2]	13,098,808
Other precious metals	—	19,892,917
Copper, nickel, lead, zinc . . . . . lb.	1,680,366,810	350,753,466
Antimony, bismuth, cadmium, chromite, cobalt, calcium .	—	4,008,236
Miscellaneous. Indium, iron ore, selenium, tellurium, titanium ore, tungsten concentrates and tin . . .	—	22,767,183
Total metallics	—	538,967,258
Non-metallics		
Fuels		
Coal . . . . . tons	19,120,046	110,915,121
Natural gas . . . . . m. cu. ft.	60,457,177	11,620,302
Peat . . . . . tons	56	560
Crude petroleum . . . . . bbls.	21,305,348[3]	61,118,490
Total fuels	—	183,654,473
Other non-metallics		
Asbestos, fluorspar, graphite, magnesitic-dolomite and brucite, mica, sulphur	—	45,235,518
Gypsum . . . . . tons	3,014,249	5,423,690
Salt . . . . . tons	749,015	5,566,725
Other non-metallics, miscellaneous	—	8,359,283
Total other non-metallics	—	64,585,216

Preliminary figures for 1950: [1] 4,430,612; [2] 22,416,150; [3] 29,145,000.

Product		Quantity	Value
Clay products and other structural materials.			
Clay products (brick, tile, sewer pipe, etc.)		—	17,981,709
Cement	bbls.	15,916,561	32,901,936
Lime	tons	1,018,822	11,309,820
Stone, sand and gravel		77,284,347	51,709,614
Total clay products, etc.		—	113,903,079

Mineral production in 1950 (prelimary) amounted to $1,040 million.

The following table shows the value (in Canadian dollars) of the mineral production in 1948 and 1949, by provinces :—

Provinces	1948	1949	Provinces	1948	1949
Alberta	93,211,229	113,728,425	Quebec	152,038,867	165,021,513
British Columbia	148,223,614	136,385 911	Saskatchewan	34,517,208	36,054,536
Manitoba	26,081,349	23,839,638	Northwest Territory	4,267.485	6,801,729
New Brunswick	7,003,285	7.134.009	Yukon	4,265,910	5,099,176
Newfoundland	—	27.583,615			
Nova Scotia	56,400,245	56,092.830			
Ontario [1]	294,239,673	323,368,644	Total	820,248,865	901,110,026

[1] Revised figure, 1947: $249,797,671 (total, $644,869,975).

The first section of a 1,139-mile oil pipeline was opened on 5 Oct., 1950; it stretches from Edmonton, Alberta, to Regina, Saskatchewan, and is 439 miles long. The line will ultimately reach Superior, Wisconsin, to enable oil from Alberta to be piped to the Great Lakes and shipped to markets in Ontario and the eastern United States.

Manufactures.—The following table shows the number of establishments and of employees and (in 1,000 Canadian dollars) the amount of their salaries and wages, the cost of materials, and the value of products in 1948, in various groups of industries :—

Group of industries	Number of establishments	Employees		Cost of materials	Gross value of products
		Number	Salaries and wages		
Vegetable	5,912	140,785	264,372	1,172,108	1,902,986
Animal	4,323	102,817	186,777	1,203,695	1,562,379
Textile	3,204	182,408	315,273	645,183	1,238,129
Wood and paper	13,806	256,938	534,657	1,013,842	2,215,985
Iron	2,548	269,776	652,954	1,076,895	2,253,777
Non-ferrous metal	817	99,921	230,892	736,583	1,270,323
Non-metallic mineral	1,009	40,956	93,583	441,613	724,110
Chemical	1,026	39,548	89,326	293,042	579,828
Miscellaneous	802	22,857	41,977	49,920	129,273
Totals	33,447	1,156,006	2,409,810	6,632,882	11,876,790

The Fur Trade.—In 1948–49 (year ended 30 June), 9,902,790 pelts valued at $22,899,882, were taken. Mink furs led in total value, followed by musk-rat, beaver, silver fox (including mutations squirrel), ermine, white

fox, otter and marten. Fur auctions are now held on a large scale at Montreal, Winnipeg, Regina, Edmonton and Vancouver. The more important animals raised on fur farms are fox, mink, racoon, marten, nutria, fitch, chinchilla and fisher. The value of animals and pelts sold from the farms during the year 1948 was $8,760,037. There were in 1948, 5,040 fur farms in Canada, of which 1,955 reported fox and 3,319 mink.

Water Power.—Canada is richly endowed with water power resources; on 1 Jan., 1950, the available horse-power at ordinary 6 months' flow was 42,709,100; on 1 Jan., 1950, turbine installation amounted to 11,613,333 horse-power. The Central Electric Station industry, which generates 98% of the total electrical output, had a gross production of power valued at $257,377,490 in 1948. The number of power plants was then 635.

Trade Unions.—Few unions are registered under the 1872 Act of the federal parliament which permits a registered union to bring or defend actions except in relation to certain contracts. From dicta of several courts, this provision relating to contract, a provincial subject, appears invalid.

Before the war, in the eight common-law provinces a union as a voluntary association could be sued only in a representative action, but since most unions are in restraint of trade, its right to sue was uncertain. To Quebec civil law, a representative action is unknown, but, under special statutes, a union in Quebec may be sued in its own name and some unions are incorporated. During the war, Alberta, Ontario and Saskatchewan removed the disability arising from the common-law doctrine of restraint of trade. Nova Scotia, Ontario and Saskatchewan have also exempted unions from the law of civil conspiracy.

Recent legislation in seven provinces, which requires employers to negotiate with unions, stipulates that the resulting agreement is binding on the parties, and penalties may be imposed on unions violating other provisions of these Acts. Ontario and Saskatchewan, however, provide that a union may not be made party to any action, nor a collective agreement the subject of an action, unless this can be done apart from the statute.

At the close of 1949 there were 1,005,639 trade union members in Canada. The membership of the Trades and Labour Congress of Canada, founded in 1886, was 459,068 in 2,865 branches of affiliated and directly chartered unions; that of the Canadian Congress of Labour, organized in 1940, was 301,729 in 1,175 branches and local unions; that of the Canadian and Catholic Confederation of Labour, formed in 1921 and confined to the Province of Quebec, 80,089 in 424 branches; unions affiliated with the A.F.L. but not with any Canadian Congress, 13,996 members in 29 branches; unions affiliated with the C.I.O. only, 27,475 in 53 branches; the independent railroad brotherhoods, 41,363 in 382 branches; and independent national and international unions, 57,923 in 255 branches; other central labour bodies and unaffiliated local unions, 23,996 in 85 locals.

Commerce.

The customs tariff of Canada is protective, but there is a preferential tariff in favour of the United Kingdom and of the Dominions, and of a number of the Crown Colonies. At the Imperial Economic Conference of 1932, held in Ottawa, the United Kingdom developed further the policy of preferential tariffs to the Dominions and on the part of the latter there

was a general lowering of the existing tariffs against certain lines of United Kingdom manufactures. Canada is one of the 23 signatories of the Geneva agreement on tariffs and trade, of 1947; and, in addition has numerous reciprocal tariff arrangements with both Commonwealth and foreign countries.

Imports and exports (in Canadian dollars) entered for home consumption (merchandise only):—

Year ended 31 December	Imports for home consumption	Total exports	Year ended 31 December	Imports for home consumption	Total exports
1945	1,585,775,142	3,267,424,288	1948	2,636,945,352	3,110,028,668

[1] From 1 April, 1949, including Newfoundland and Labrador.

Communications.

Shipping.—The registered shipping on 31 Dec., 1949, including vessels for inland navigation, totalled 14,102, with a net tonnage of 1,832,393. The sea-going and coasting vessels that entered Canadian ports during the year ending 31 Dec., 1949, were as follows :—Foreign service vessels, 30,565; 40,088,377 tons. Coasting service, vessels, 82,012; 56,037,003 tons. Total, vessels, 112,577; 96,125,380 tons.

Canada has a system of canal, river and lake navigation over 2,700 miles in length, and vessels drawing up to 14 ft. from the lake ports may reach the Atlantic without breaking bulk. Expenditures on canals, marine services and other water transport facilities have reached $390,953,995, and the value of fixed assets administered by the National Harbours Board

was $231,051,123 at 31 Dec., 1949. Of the expenditure $243,628,424 was on capital account and $22,264,472 on major improvements and alterations. The heavy expenditures in recent years have been due to the construction of the Welland Ship Canal, on which $131,867,244 had been spent to 31 March, 1949. The canal was opened on 20 April, 1931. Vessels 850 ft. long, 25 ft. draft, are allowed through as from April, 1932. In 1949, 24,219 vessels, of 24,033,869 tons, passed through the Canadian canals, carrying 24,373,752 tons of freight, chiefly grain, petroleum products, iron ore and coal.

Railways.—The total single track mileage of steam railways in Canada on 31 Dec., 1949, was 42,979. The total mileage, including second track, yard and sidings, was 57,005 in 1948.

The lines built or acquired by the Canadian Government are now consolidated in one system known as the Canadian National Railways, covering about one-half of the single track mileage, including two transcontinental lines with termini in Canada at Saint John, Halifax, Vancouver and Prince Rupert, and with termini at Portland, Maine, U.S.A., and Chicago.

The mileage in private ownership is mainly that of the Canadian Pacific Railway, 16,603 in 1949. The main line of this road from Vancouver, B.C., to Saint John, New Brunswick, is 3,367 miles.

Statistics of the Canadian steam railways for 1949:—Passengers, 34·9 million; freight revenue, $705,754,568 (1948); gross receipts, $894,397,264; net receipts, $62,940,818.

Electric railways in 1948, 29; single-track mileage, 779; passengers during the year, 1,309,565,795; tons of freight carried, 4,050,111. The gross earnings in 1948 reached an aggregate of $89,310,215. Operating expenses amounted to $88,024,727. Stocks and funded debt, $168,830,761.

Roads.—The total highway mileage in Canada was 556,266 in 1948. Of this total, 150,493 miles were surfaced and 148,298 miles improved earth roads. Expenditure on roads, bridges, ferries, etc., in 1948, reached a total of nearly $266 million. Provincial governments supplied almost $249 million towards this sum with the remainder contributed by federal, municipal and other sources. Federal expenditures were chiefly devoted towards the upkeep of national park roadways and nationally owned bridges and ferries, although in the building of the 'Mackenzie Highway' from Grimshaw, Alberta, to Hay River, N.W.T., the Federal Government paid about 68% of the total cost. In general, however, highways are provincially controlled and maintained and responsibility of assisting municipalities and townships falls directly on the provinces.

Registered motor vehicles totalled 2,290,628 in 1949; they included 1,672,352 passenger cars and taxis, 580,880 commercial vehicles and 39,994 motor cycles.

The Alaska Highway (*see* THE STATESMAN'S YEAR-BOOK, 1945, p. 667) is now part of the Canadian highway system.

Civil Aviation.—The Division of the Controller of Civil Aviation is under the jurisdiction of the Director of Air Services Branch of the Department of Transport, and is responsible for the administration of the air regulations; the location, equipment and maintenance of airways and airports; aeronautical engineering; the licensing of municipal and private aerodromes, and the supervision of flying clubs. The branch is divided into three divisions, namely, Civil Aviation, Radio and Meteorological. On 31 March, 1949, there were in force 2,491 private air pilot licences, 929 commercial licences, 837 public transport licences, 1,640 air engineers'

licences, 128 air traffic control officers' licences, and 586 private and 1,458 commercial aircraft were registered.

Canadian air carriers transported 1,211,149 revenue passengers in 1949, an increase of 14 8% over 1948 traffic. There were carried by air 37,097,767 lb. of revenue and non-revenue freight (exclusive of mails) and 13,506,220 lb. mail.

Established by Act of Parliament in April, 1937, the Trans-Canada Air Lines system, Canada'a national air service, now spans the continent from Newfoundland to Vancouver Island. On 1 May, 1947, Trans-Canada Air Lines (Atlantic) Limited assumed responsibility for the operation previously provided by the Canadian Government Trans-Atlantic Air Service. In 1949, 36,512 revenue passengers were flown on the overseas routes. A total of 404,903 mail-ton miles were flown and 1,635,996 freight-ton miles including air express, cargo and excess baggage. Service was also provided to the Caribbean in Dec., 1948, and a Pacific Service was inaugurated in 1949. At 31 Dec., 1949, Trans-Canada Air Lines overseas routes totalled 8,303 miles, reaching to the United Kingdom and the British West Indies.

Post.—On 31 March, 1950, there were 12,408 post offices and 7,876 money order offices. Net revenue, $101,294,305; expenditure, $99,405,390. There were also 5,087 rural mail delivery routes, on which were erected 368,758 boxes. Mail subsidies and steamship subventions for the fiscal year ended 31 March, 1949, amounted to $2,035,139. This represents the payments by the Canadian Maritime Commission for coastal and inland-water shipping services, including the conveyance of mail on certain routes.

There were 52,535 miles of telegraph lines in Canada in 1949, and 413,759 miles of wire (exclusive of 930,856 miles of multiple channels), with 5,288 offices. There were 7,913,068 miles of telephone wire on 31 Dec., 1948, and 2,451,868 telephones on 1 Jan., 1949 (19·0 per 100 population).

Wireless Communications.—There were 2,451,866 licences in force at 31 March, 1949, of which 2,057,799 were for private receiving stations. Of the remaining 13,787, ship stations numbered 2,111 and radiobeacon stations 46. Radio coast stations provide radio-communication facilities for ships within 500 miles of the Canadian coast.

Wireless 'beam' stations are operated at Montreal for direct communications with Great Britain and Australia, and a station at Louisburg, N.S., provides a long distance service to ships.

Money and Credit.

The British North America Act confers the jurisdiction over currency and banking to the Dominion Government. Commercial banks in Canada are known as chartered banks and are incorporated under the terms of the Bank Act which imposes strict conditions as to capital, notes in circulation, returns to the Dominion Government, types of lending operations and other matters. In 1949, there were in operation 10 chartered banks incorporated under the provisions of the Bank Act, with 3,562 branches and sub-agencies in Canada and 105 branches, exclusive of 4 sub-agencies, in other countries. The Bank Act is subject to revision by Parliament every ten years, the last revision having taken place in 1944. Bank charters expire every ten years and are renewed at each decennial revision of the Bank Act. The chartered banks make detailed monthly and yearly returns to the Minister of Finance and are subject to periodic inspection by the Inspector-General of Banks, an official appointed by the Government.

The following are some particulars of the 10 chartered banks in

1949 :—Capital paid up, $145,500,000; reserve fund, $187,000,000; notes in circulation, $14,731,992; total on deposit in Canada, $7,921,694,763; elsewhere, $666,047,561; liabilities to the public, $8,310,215,001; total assets, $8,657,764,277. Cheques cashed at the clearing-house centres of Canada for 1949 amounted to $87,554,362,843.

Government post office savings banks have been in operation since 1868. The post office savings banks had on 31 March, 1950, deposits amounting to $38,757,634.

The deposits in the Quebec savings banks, incorporated under the terms of a special Dominion Act, amounted to $192,567,275 on 31 March, 1950.

The Bank of Canada Act, passed on 3 July, 1934, provided for the establishment of a central bank for the Dominion. This bank commenced operations on 11 March, 1935, with a paid-up capital of $5,000,000. By reason of certain changes introduced into the composition of stockholders of the bank (for which *see* THE STATESMAN'S YEAR-BOOK, 1944, pp. 322–23), the Minister of Finance on behalf of the Dominion of Canada is the sole registered owner of the capital stock of the bank. The chartered banks are required to maintain, in the form of deposits with and notes of the Bank of Canada, a reserve of not less than 5% of their deposit liabilities in Canada. The Bank of Canada is required to maintain a reserve in gold coin or bullion not less than 25% of its note and deposit liabilities. All gold held in Canada by the chartered banks was transferred to the Bank of Canada along with the gold held by the Government as reserve against Dominion notes outstanding at the time of the commencement of operations of the Bank of Canada. The liability of the Dominion notes outstanding at the commencement of business of the Bank of Canada was assumed by the bank. The following are some of the particulars of the Bank of Canada as at 31 Dec., 1950 :—Notes in circulation, $1,307·4 million; chartered bank deposits, $541·7 million; total liabilities, $2,125·9 million; securities, $2,039·7 million.

The Bank of Canada's gold reserves have been placed at the disposal of the exchange equalization authorities as from 30 April, 1950.

In Aug., 1944, the Industrial Development Bank, a subsidiary of the Bank of Canada, was set up for the purpose of providing credit in the post-war period to small industrial establishments. The monthly statement of assets and liabilities of the Industrial Bank, as at 30 Sept., 1950, showed outstanding loans and investments of $25,344,721. The authorized, issued and paid-up capital at this date amounted to $25 million.

Currency, Weights and Measures.

The denominations of money in the currency of Canada are dollars and cents. The cent is one-hundredth part of a dollar. Subsidiary coins of the denominations of 1 cent, 5 cents, 10 cents, 25 cents, 50 cents and 1 dollar are in use. The monetary standard is gold of 900 millesimal fineness (23·22 grains of pure gold equal to 1 dollar). The Currency Act provides for gold coins in the denominations of $2·50, $5, $10 and $20, which are legal tender. The British and United States gold coins are also legal tender, but only at the par rate of exchange. The legal equivalent of the British sovereign is $4·86⅔. The privilege of issuing notes is restricted to the Bank of Canada and the chartered banks. It is intended that by 1950 the Bank of Canada will have the sole right to issue notes, and the latest revision of the Bank Act provides for a gradual withdrawal of the right of note issue by the chartered banks.

The Bank of Canada issues notes, which are legal tender, in denominations of $1, $2, $5, $10, $20, $25, $50, $100, $500 and $1,000. They may be issued in any amount, so long as the bank maintains a reserve in gold coin or bullion of at least 25% of its note and deposit liability. Under the terms of the Bank of Canada Act, the bank is required to sell gold in bars of 400 ounces to any person tendering legal tender. This obligation is at the present time suspended by Order-in-Council. The exportation of gold from Canada is prohibited except by licence issued by the Minister of Finance to the Bank of Canada or a chartered bank.

The Ottawa Mint was established in 1908 as a branch of the Royal Mint, in pursuance of the Ottawa Mint Act, 1901. In December, 1931, control of the Mint was passed over to the Canadian Government, and since that time has operated as the Royal Canadian Mint. The Mint issues silver, nickel, bronze and steel coins for circulation in Canada. No gold coins have been struck since 1919. In 1935, on the occasion of His Majesty's Silver Jubilee, the Royal Canadian Mint issued a silver dollar bearing the effigy of King George V. Standard silver dollars were issued in 1936–38, and in 1939 a special issue was made to commemorate the visit of King George VI and Queen Elizabeth to Canada. Gold refining is one of the principal activities of the Mint.

In 1949, 3,925,618 fine oz. of gold were received for treatment, and 3,865,296 fine oz. of bullion were issued. Coin issued :—Bronze, 321,901 dollars; silver, 4,148,842 dollars; nickel, 637,500 dollars.

The legal weights and measures are the imperial yard, pound avoirdupois, gallon and bushel; but the hundredweight is declared to be 100 pounds and the ton 2,000 pounds avoirdupois, as in the United States.

Books of Reference concerning Canada.

STATISTICAL INFORMATION.—The Dominion Bureau of Statistics, Ottawa, has been the official central statistical organization for Canada since 1918. To-day the Bureau under the Department of Trade and Commerce serves as the statistical agency for Federal Government Departments; co-ordinates the statistics of the Provincial Governments along national lines; and is the channel through which all Canadian statistical data are transferred to international organizations. *Dominion Statistician.*—H. Marshall.

Publications of the Dominion Bureau of Statistics are classified as Reports, Memoranda and Reference Papers. The latter two classes are designed to include material that has a limited circulation only and is not intended for general distribution. Memoranda are fairly regular in their appearance but Reference Papers deal with special subjects. A complete list of these publications is contained in ' Current Publications of the Dominion Bureau of Statistics ' (latest issue, 1950). Official publications include :—

The Canada Year Book. Annual.

Canada, Official Handbook. Annual.

Canadian Statistical Review. Monthly, with weekly supplements.

CANADIAN PROVINCES.

The ten provinces have each a separate parliament and administration, with a Lieutenant-Governor appointed by the Governor-General in Council at the head of the executive. They have full powers to regulate their own local affairs and dispose of their revenues, provided only they do not interfere with the action and policy of the central administration. Among the subjects assigned exclusively to the provincial legislatures are: the amendment of the provincial constitution, except as regards the office of the Lieutenant-Governor; property and civil rights; direct taxation for revenue purposes; borrowing; management and sale of crown lands; provincial hospitals, reformatories, etc.; shop, saloon, tavern, auctioneer, and other licences for local or provincial purposes; local works and undertakings, except lines of ships, railways, canals, telegraphs, etc., extending beyond the province

or connecting with other provinces, and excepting also such works as the Dominion Parliament declares are for the general good; marriages; administration of justice within the province; education. Quebec has two chambers and the other provinces one chamber. The Northwest Territories and the Yukon Territory are governed by commissioners assisted by councils.

Municipal Government.

Under the terms of the British North America Act the provinces are given full powers over local government. All local government institutions are, therefore, supervised by the provinces, and are incorporated and function under provincial acts.

The acts under which municipalities operate vary from province to province. A municipal corporation is usually administered by an elected council headed by a mayor or reeve, whose powers to administer affairs and to raise funds by taxation and other methods are set forth in provincial laws, as is the scope of its obligations to, and on behalf of, the citizens. Similarly, the types of municipal corporations, their official designations, and the requirements for their incorporation vary between provinces. The following table sets out the classifications which existed in 1949:—

Provinces	Cities	Towns	Villages	Total urban	Rural	Total local municipalities	Counties	Total incorporated municipalities
Newfoundland	1	19 [14]	—	20	—	20	—	20
Prince Edward Island	1	7	—	8	—	8	—	8
Nova Scotia	2	41	—	43	24 [1]	67	— [2]	67
New Brunswick	3	19	4	26	15 [3]	41	— [4]	41
Quebec	32	129	328 [5]	489	1,097	1,586	76 [6]	1,662
Ontario	29	147	157	333	584 [7]	917	38 [8]	955 [9]
Manitoba	4	33	33	70	114 [10]	184	—	184
Saskatchewan	8	84	401	493	304	797	—	797
Alberta	7	62	138	207	57 [11]	264	—	264 [12]
British Columbia	35	—	39	74	27 [13]	101	—	101
Totals	122	541	1,100	1,763	2,222	3,985	114	4,099

[1] Officially known as 'Municipalities.'

[2] Nova Scotia has 18 counties, 12 of which each comprise one municipality and 6 are divided into two municipalities each, making the total of 24 rural municipalities. Counties, as such, do not represent local units of self-government.

[3] Officially known as 'Counties.' Does not include 30 local improvement districts.

[4] New Brunswick has 15 counties which are incorporated municipalities and have direct powers of local self-government comprising the rural areas; they are thus classed here as 'rural.'

[5] In provincial reports these are classed as 'rural.'

[6] Although, being incorporated municipalities, each county is comprised of the villages and rural municipalities situated therein, which provide the necessary funds for the services falling within the scope of county administration.

[7] Officially known as 'Townships,' but includes also 11 'Local Improvement Districts.'

[8] Although, being incorporated municipalities, each county is comprised of the towns, villages and townships situated therein, which provide the necessary funds for the services falling within the scope of county administration. Geographically, there are 43 counties, but 5 are united with other adjacent counties for purposes of administration.

[9] Includes 5 units of self-government officially known as 'Suburban Municipalities.'

[10] [illegible]

[11] Officially known as 'Municipal Districts.'

[12] Excludes 58 'Improvement Districts.'

[13] Officially known as 'Districts.'

[14] Includes 15 towns and 4 rural districts, but not 4 local government areas.

ALBERTA.

Constitution and Government.—The constitution of Alberta is contained in the British North America Act of 1867, and amending Acts; also in the Alberta Act of 1905, passed by the Parliament of the Dominion of Canada, creating the province. In the British North America Act, provision was made for the admission of the new provinces from time to time, including the then North-West Territories, of which the present province of Alberta formed a large portion. Upon the granting of autonomy to the Northwest Territories, Alberta and Saskatchewan were created into provinces, and all the provisions of the British North America Act, except those with respect to schools, lands and the public domain, were made to apply to Alberta as they apply to the older provinces of Canada. On 1 Oct., 1930, the natural resources were transferred from the Dominion to Provincial Government control. The province is represented by 6 members in the Senate and 17 in the House of Commons of Canada.

The executive is vested nominally in the Lieutenant-Governor, who is appointed by the Federal Government, but actually in the executive council or the Cabinet of the legislature. Legislative power is vested in the Assembly in the name of the King.

Members of the legislative assembly are elected by the direct vote of the people. Women suffrage has been established in the province.

There are 57 members in the legislature (elected 17 Aug., 1948)—51 Social Credit, 1 Independent, 2 Co-operative Commonwealth Federationists, 2 Liberals, and 1 Independent Social Credit.

Lieutenant-Governor.—His Honour J. J. Bowlen.

The members of the Ministry are as follows :—

Premier and Provincial Treasurer.—E. C. Manning.
Attorney-General.—Lucien Maynard.
Minister of Economic Affairs.—A. J. Hooke.
Minister of Agriculture.—David Ure.
Minister of Lands and Forests, Mines and Minerals.—N. E. Tanner.
Minister of Public Works.—D. B. MacMillan.
Minister of Public Health and Public Welfare.—Dr. W. W. Cross.
Minister of Education.—Ivan Casey.
Minister of Municipal Affairs and Provincial Secretary.—C. E. Gerhart.
Minister of Industries and Labour.—Dr. J. L. Robinson.
Minister of Railways and Telephones.—G. E. Taylor.

Local Government.—The local government units are City, Town, Village, Municipality and District Municipality.

There are seven cities in Alberta, namely :—Edmonton, Calgary, Lethbridge, Wetaskiwin, Red Deer, Medicine Hat and Drumheller. These cities operate under special charters. The governing body consists of a mayor and a council of from six to ten members. Specified legislation is required for the erection of a city. The population requirements are 2,500 in practice but neither area nor population is specified in the statutes.

There is no limit of area for a Town, specified in the Town and Village Act. The population requirements are 700 in practice and the area at incorporation is that of the original village plus any adjoining land on which there is one *occupied* dwelling or place of business for every five acres.

A Village must contain 35 separate and occupied dwellings but there is no limit of area specified. The Town and Village Act requires each dwelling to have been occupied continuously for a period of at least one month.

A municipality is a locality the inhabitants of which are incorporated. Areas not incorporated as municipalities are termed Improvement Districts and Special Districts. There are no restrictions as to the number of residents of a District Municipality and the area is not specified in the statutes.

Area and Population.—The area of the province is 255,285 square miles, 248,800 square miles being land area and 6,485 square miles water area. The population (census, 1946) was 803,330; in 1921, 588,454, and in 1901, 73,022. In 1946 the rural population numbered 448,934, and the urban 354,396. There were 12,565 Indians in 1946, or 2·39% of the total population. Population of the principal cities (1946):—Edmonton, 113,116; Calgary, 100,044; Lethbridge, 16,522; Medicine Hat, 12,859.

Estimated population, 1 June, 1950, was 895,000.

The vital statistics for 5 years are given as follows:—

	Births	Marriages	Deaths	Excess of births
1945 . . .	19,939	7,310	6,454	13,485
1946 . . .	22,184	9,478	6,601	15,583
1947 . . .	24,631	8,797	6,543	18,088
1948 . . .	24,075	8,844	6,987	17,088
1949 . . .	24,955	9,038	7,101	17,854

Education.—Schools of all grades are included under the term of public school. The same boards of trustees control the schools from the kindergarten to entrance to the university. All schools are supported by taxes levied by the local board, supplemented by government grants, which are distributed to [illegible], secondary and technical education and agricultural [illegible]. In 1949 there were 2,459 schools and school systems in operation, which included 22 consolidated schools with 160,821 pupils. There are normal schools at Calgary and Edmonton for the training of teachers. The attendance during 1949 was 1,129. The University of Alberta, organized in 1907, had, in 1949–50, 6,260 students.

Justice and Crime.—Judicial power of the province is vested in the Supreme Court, consisting of two divisions, the appellate and trial divisions. The judges are appointed by the Dominion Government, and hold office for life unless impeached by Parliament. There are also minor courts of civil and criminal jurisdiction. The district courts have full jurisdiction over all matters up to $600. By the Small Debts Act of 1918, as amended in 1924, magistrates have jurisdiction over matters up to $100. There are also juvenile courts having power to try boys under 16 and girls under 18 years of age.

The system of procedure in civil and criminal cases conforms as nearly as possible to the English system.

Finance.—The revenue of the province is derived from the following sources:—(1) Dominion subsidies, (2) school lands and (3) provincial sources. The financial year ends 31 March.

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	$	$		$	$
1944–45	31,848,484	25,062,684	1947–48	54,178,322	36,989,598
1945–46 [1]	40,915,956	29,268,548	1948–49	70,445,624	45,495,102
1946–47	42,588,038	31,939,342	1949–50	99,553,102	53,009,208

[1] Excluding net debt reorganization costs, paid during 1945–46, of approximately $7,100,000.

The net bonded debt of the province on 31 March, 1950, amounted to $121,165,895. Of this amount $32,198,709 represent assets which are self-supporting, leaving net general funded debt of $88,967,186. To this should be added the unfunded debt of $9,402,793, making a total of $98,369,979, net general debt.

Production and Industry.—Alberta is pre-eminently an agricultural province. Within the surveyed area of the province, which comprises about 85,000,000 acres, there are approximately 70,000,000 acres which may be classed as lands capable of agricultural development. Up to the present, however, less than one-third of this area has been brought under cultivation.

For particulars of agricultural production and live-stock, *see* under CANADA above. The wool clip for 1949 was [illegible] 1,846,000 lb.

Grain elevators (1949) totalled 1,721, with [illegible] of 83,658,400 bushels, and temporary annexes having a capacity of 25,122,750 bushels.

A coal survey of Alberta by the Geological Survey of Canada places the coal area at 16,588 square miles containing 46 billion tons, of which 20 billion tons are mineable. The output in 1949 was 8,616,983 tons, valued at $44,541,538. Natural gas is found abundantly in numerous localities. In 1949, 67,095,204 cubic feet, with a well-head valuation of $3,354,760, were produced. High grade gasoline is profitably extracted from the gas in Turner Valley. 20,246,392 barrels of oil were produced in the province in 1949 from 1,219 wells in 24 petroleum fields; the production was nearly twice that of 1948, 79% coming from the oilfields outside Turner Valley, mainly Leduc and Redwater. Immense deposits of bituminous sand containing on an average 15 to 18% bitumen are situated in the McMurray district in northern Alberta. Value of total mineral production in 1949, $113,728,425.

Alberta has 8,999,322 acres of forest reserves.

The lakes of the province abound in whitefish, pickerel, pike and trout, but the industry is not developed. Value of fish marketed, 1949, $556,214.

Manufacturing in the province:—Flour, oatmeal, cement and linseed oil mills; pork and beef packing houses; clay, brass and iron, glass, wood, clothing, canning, biscuit and macaroni factories; large railway repair shops and oil refineries.

Statistics of manufactures for 1948:—Number of industrial establishments, 1,568; number of employees, 25,692; salaries and wages, $49,737,761; cost of materials, $253,754,967; value of products, $366,090,082.

Commerce and Communications.—The principal exports of the province consist of grain, livestock, meat and meat products, wool, fish, butter, eggs, mining and timber products.

In 1948, there were 82,235 miles of highways, including 14,228 miles surfaced. Number of motor vehicles, 173,950.

Length of railway lines 5,805 miles in the year 1949. Alberta's modern telephone system is owned and operated by the Provincial Government, except in the town of Banff and city of Edmonton. The total mileage of wire in all the telephone systems in the province is 341,781. There are 113,000 telephones installed, of which 23,000 are in the rural areas.

Agent General in London.—37, Hill Street, W.1.

BRITISH COLUMBIA.

Constitution and Government.—British Columbia (then known as New Caledonia) and Vancouver Island originally formed part of the Hudson's Bay Company's concession. In 1849 Vancouver Island, and in 1858 British Columbia, were constituted Crown colonies, and in 1866 the two colonies were united. On 20 July, 1871, British Columbia entered the Canadian Confederation, and is represented by 6 members in the Senate and 18 in the House of Commons of Canada.

The Provincial Government is administered by a Lieut.-Governor and a legislative assembly of 48 members on the system of executive administration known as 'responsible government.' The assembly is elected for 5 years, every adult. male or female (British subjects), having resided 6 months in the province, duly registered, being entitled to vote. The elections, held on 15 June, 1949, returned 39 Liberal-Progressive Conservatives (Coalitionists), 7 Co-operative Commonwealth Federationists, 1 Labour, 1 Independent.

Lieut.-Governor.—Col. The Hon. Clarence Wallace, C.B.E.

The members of the Coalition Ministry (assumed office in Oct., 1945, or were subsequently appointed) are as follows :—

Premier and President of the Executive Council.—B. I. Johnson, M.B.E.
Provincial Secretary and Minister of Education.—W. T. Straith, K.C.
Attorney-General.—G. S. Wismer, K.C.
Minister of Finance.—H. Anscomb.
Minister of Agriculture.—H. R. Bowman.
Minister of Lands and Forests.—E. T. Kenney.
Minister of Public Works.—E. C. Carson.
Minister of Mines and Minister of Municipal Affairs.—R. C. MacDonald.
Minister of Railways, Minister of Trade and Industry and Minister of Fisheries.—L. H. Eyres.
Minister of Labour.—J. H. Cates.
Minister of Health and Welfare.—A. D. Turnbull.

Agent-General in London.—W. A. McAdam, C.M.G., British Columbia House, 1/3 Regent Street, S.W.1.

LOCAL GOVERNMENT.—Vancouver City was incorporated by statute and operates under the provisions of the Vancouver Incorporation Act, 1921, and amendments. This is the only incorporated area in British Columbia not operating under the provisions of the Municipal Act, or the Village Municipalities Act. Under the former, the Lieutenant-Governor-in-Council, by letters patent, may incorporate any locality that has no direct debenture indebtedness into a city municipality where the area does not exceed 2,000

acres and in which there are resident 100 male British subjects of the full age of 21 years. District and Village Municipalities may be created similarly. There are no towns or townships as governmental units, although the latter term is occasionally used synonymously with 'district.'

Area and Population.—British Columbia, Canada's Pacific Coast Province, has an area of 366,255 square miles, of which 359,279 square miles are land area and 6,976 square miles water area, but exclusive of territorial seas. It lies between latitudes 49° and 60° north. Vancouver Island has an area of about 12,408 square miles.

The last census (1941) places the population at 817,861; in 1921 the [illegible] was 524,582 and in 1931 it was 694,263. Vancouver Island, [illegible] 1941). Estimated population of British Columbia in 1950, 1,138,000.

Some of the principal cities and towns and their approximate populations are (1950):—Greater Victoria (the capital), population, 116,800; Greater Vancouver, 527,721; New Westminster, 34,500; Trail, 11,500; Penticton, 11,000; Kelowna, 10,000; Prince Rupert, 9,200; Kamloops, 8,500; Nanaimo, 7,500; Nelson, 6,800; Prince George, 6,500.

Vital statistics for 5 years :—

Year	Births	Marriages	Divorces	Deaths	Excess of births
1945	18,877	9,262	1,401	9,756	9,121
1946	22,609	11,762	2,049	10,137	12,472
1947	26,286	11,852	1,880	10,613	15,673
1948	25,984	11,718	1,744	10,316	14,668
1949[1]	27,346	11,400	1,491	11,289	16,057

[1] Preliminary figures.

Education.—A complete system of free and non-sectarian education was established by Act in 1872. Attendance is compulsory from the age of seven to fifteen.

There were 90 high, junior-senior high and junior high schools, with 41,231 enrolled pupils and 1,748 teachers in 1948–49. The number of elementary and [illegible] schools was 865, with 3,601 teachers and 111,918 pupils. [illegible] superior schools with 2,366 pupils and 88 teachers. The Provincial University (University of British Columbia) was founded by Act in 1908. It began operations as a teaching institution in 1915, and in 1948–49 there were 8,810 students, with 416 more at Victoria College. There were 2 normal schools, with 486 students in 1948–49.

In addition, 14,292 students took advantage of the winter programme of evening continuation classes, and 2,759 students studied under the system of high school and elementary correspondence courses designed for those unable to obtain instruction in the public schools.

Finance.—Revenue and expenditure (in Canadian dollars) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1945–46	46,183,468	38,041,605	1948–49	92,000,910	87,435,964
1946–47	56,817,945	46,315,294	1949–50[1]	92,980,590	92,308,019
1947–48	67,077,739	63,475,697	1950–51[1]	105,831,190	105,558,518

[1] Estimate.

On 31 Dec., 1949, the net debt totalled $146,100,363.

Production and Industry.—British Columbia produced, in 1949 (1948 in brackets), minerals to the value of $133,012,968 ($152,524,752); fish produce, $56,456,260 ($58,703,803); agricultural produce, $139,960,500 ($144,225,000), and forest production, $331,589,549 ($363,786,000).

Fruit crop in 1949 :—Apples, 8,632,600 boxes; pears, 641,400 boxes; grapes, 2,224,500 lb.; peaches, 1,933,300 crates.

In 1949 gold produced was valued at $10,911,780; copper, lead and zinc, $[illegible], coal, $12,462,424. Uranium was discovered in 1948 in the Bridge River mining district north of Bralorne.

Particulars of the agricultural output and number of livestock are given under CANADA above.

British Columbia's industrial pay-roll for 1950 was estimated at $718,000,000 (1949 industrial pay-roll, $690,000,000).

The external trade through British Columbia customs ports had in 1949 a value of $153,489,462 for exports (1939, $140,527,174) and of $217,119,857 for imports (1939, $61,922,110).

Communications and Shipping.—The Canadian Pacific and the Canadian National lines are at present the principal railways in the province. The C.P.R. has 4 main lines—the Canadian Pacific Railway, the Crow's Nest Pass Railway, the Kettle Valley Railway, the Esquimalt and Nanaimo Railway—and several branches connecting with United States railway systems, also steamboat connexions on the inland lakes, besides a large fleet of ocean-going and coasting steamers. The Canadian National has 2 main lines, diverging in Yellowhead Pass, Mount Robson Park, one with ocean terminus at Prince Rupert and the other at Vancouver, besides steamship lines. The Pacific Great Eastern Railway, owned and operated by the province, runs north and south through the heart of the country. The railway mileage at 31 Dec., 1949, was 4,845 miles of main line track and 1,165 miles of sidings (not including logging, mining and industrial railways). Railway freight loaded in British Columbia, including freight received from foreign connexions, was 10,395,223 tons.

Roads.—At 31 March, 1950, there were some 22,711 miles of highway in British Columbia of which 10,295 were surfaced roads. A new 70-mile highway from Hope to Princeton was opened in 1949. Motor vehicles registered at 31 Oct., 1950, totalled 251,667.

Shipping.—In the year ending 31 Dec., 1949, 52,210 sea-going vessels, with a net tonnage of 33,566,475 entered British Columbia ports, and 53,505 ships departed with registered net tonnage of 32,922,542.

Banking.—Bank debits :—1944, $3,735,622,000; 1945, $4,416,364,000; 1946, $5,367,594,000; 1947, $6,539,917,000; 1948, $7,043,620,000; 1949, $7,540,592,000; 1950 (estimated), $8,250,000,000.

Books of Reference.

STATISTICAL INFORMATION.—The Bureau of Economics and Statistics (Department of Trade and Industry, Parliament Buildings, Victoria, British Columbia) which was established in 1937, collects, compiles and distributes information relative to the Province. *Director.*—G. T. Hatcher. Publications include the *Monthly Bulletin*, the annual *Trade Index*, *Facts and Statistics*, and *Statistics of Business Activity*.

MANITOBA.

Constitution and Government.—Manitoba was known as the Red River Settlement before its entry into the Dominion in 1870. The Provincial Government is administered by a Lieut.-Governor and a legislative assembly of 57 members elected for 5 years. Women have been enfranchised. Proportional representation has been adopted for the 12 seats in the city of Winnipeg, and the 2 in the city of St. Boniface, and the transferable vote for all other constituencies. The province is represented by 6 members in the Senate and 16 in the House of Commons of Canada. The Crown lands and other natural resources of the province, formerly in the hands of the Dominion Government, were transferred to the province as from 15 July, 1930.

Lieut.-Governor.—His Honour R. F. McWilliams, K.C. (Nov., 1940).

State of parties in Legislative Assembly (Dec., 1950):—Liberal, 34; Independents, 7 (Government Coalition); Conservative, 8; Co-operative Commonwealth Federation, 7; Labour Progressive, 1.

The members of the Ministry are as follows (Dec., 1950):—

Premier and President of the Council, Minister of Dominion-Provincial Relations and Provincial Treasurer.—Douglas L. Campbell (Liberal).
Minister of Agriculture and Immigration.—Francis C. Bell.
Attorney-General.—C. Rhodes Smith, K.C.
Minister of Education.—Wallace Miller (Conservative).
Minister of Mines and Natural Resources, Minister of Industry and Commerce.—John S. McDiarmid.
Minister of Public Works, Minister of Public Utilities.—William Morton.
Minister of Labour and Provincial Secretary.—C. E. Greenlay (Conservative).
Municipal Commissioner.—Saveur Marcoux.
Minister of Health and Public Welfare.—Ivan Schultz.

Local Government.—The Municipal Act, R.S.M. 1940, c. 141, applies to all incorporated rural municipalities, villages, towns and cities, except cities with special charters (Winnipeg, St. Boniface, Brandon and Portage La Prairie).

Rural municipalities are incorporated under the Municipal Boundaries Act.

A town containing over 10,000 inhabitants may be erected into a city.

A locality containing over 1,500 inhabitants may be incorporated as a town corporation. No town incorporated after the passing of the Municipal Act, the population of which does not exceed 2,000, shall occupy an area of more than 640 acres. If the population exceeds 2,000, the limits may be

increased in the proportion of 160 acres for every additional 1,000 inhabitants. Public parks are excluded in calculating area.

A locality containing over 400 inhabitants and a taxable assessment of over $150,000 may be incorporated as a village corporation. No village so incorporated shall occupy an area of more than 640 acres, unless its population exceeds 2,000. Upon petition from 50% of the householders in a locality which is not included within the limits of a municipality, it may be incorporated as a municipal district. Localities which do not qualify under the provisions of the Municipal Act, Municipal Boundaries Act, or Local Government Districts Act, or if they desire special power or privileges, may be incorporated by special act of the legislature.

Area and Population.—The area of the province is 246,512 square miles (219,723 square miles land and 26,789 square miles water). In 1912 its boundaries were extended to the shores of Hudson Bay. (*See* map, THE STATESMAN'S YEAR-BOOK, 1912.) The population (census, 1946) was 726,923. The rural population in 1946 was 389,592. Population of the principal cities:—Winnipeg (capital), 229,045; St. Boniface, 21,613; Brandon, 17,551; Portage la Prairie, 7,620. Estimated total (1950), 795,000.

Vital statistics for 6 years:—

Year	Births	Marriages	Deaths	Year	Births	Marriages	Deaths
1944	16,008	6,294	6,701	1947	20,410	7,712	6,773
1945	16,253	6,579	6,550	1948 [1]	29,088	7,320	6,652
1946	18,794	8,594	6,537	1949 [1]	19,459	7,265	6,892

[1] Preliminary figures.

Education.—Education is locally controlled, as in all the provinces, and is supported by local taxation and government grants. The University of Manitoba, founded in 1877 in Winnipeg had (in 1950–51) 4,052 regular students in all courses. There were (1950) 4,701 teachers and 126,477 pupils in the 4,650 public schoolrooms. There are 111 schools having one room for high school work, 57 two-room high schools, 29 junior high schools, 26 collegiate departments and 33 collegiate institutes.

Finance.—Revenue and expenditure for 6 years (in Canadian dollars) exclusive of capital expenditures:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944	21,012,974	18,315,818	1947 [1]	24,018,947	19,737,345
1945	22,268,320	19,054,252	1948	33,304,555	28,879,193
1946	24,185,796	19,461,320	1949	37,522,214	34,074,418

[1] The fiscal year prior to 1947 ended 30 April, it has been changed to 31 March, so that the 1947 figures cover only 11 months.

Production and Industry.—The southern part of Manitoba is rich agricultural land, while the northern two-thirds of the province form part of the Canadian shield, an area underlain by pre-Cambrian rocks which is rich in mineral deposits. For particulars of agricultural production and number of livestock, *see* under CANADA above.

Cereal grains, sugar beets, dairy products, livestock and honey are the principal agricultural products. Other important primary industries are mining, forestry, furs and fishing. Manitoba used to be supported almost

entirely by the primary industries but has now a well-developed and growing manufacturing industry whose gross production value substantially exceeds that of agriculture.

Total value of minerals, 1949, $23,839,638. Gold in the Rice–Beresford Lakes district and large copper–zinc–gold–silver deposits in northern Manitoba are being operated. Extensive new gold deposits in the Snow Lake area, important nickel–copper deposits in the Lynn Lake area and new copper–zinc deposits in the Flin Flon area are being developed. The numerous lakes furnish large quantities of excellent fish. Total quantity taken, 1949–50, 29,502,600 lb.; market value, $4,800,387

Forest reserves (excluding Riding Mountain National Park), 7 reserves, comprising 4,598 square miles. Value of pelts in 1949–50 taken from the wild, $3,170,971; from ranch-bred animals, 1949, $1,334,570; 1948, $958,483. Water power generated in 1949 totalled 2,175 million kwh. Value of power produced, $13,055,188.

Statistics of manufactures for 1949:—1,550 industrial establishments; employees, 41,750; wages and salaries, $87,150,000; cost of materials used, $325,300,000, and gross value of products, $506,700,000.

Communications.—In the year 1950, the province had 5,249 miles of railway, not including industrial track, yards and sidings. There are (1950) 100,051 miles of open telephone wire and 132,980 telephone subscribers, excluding 42,000 in municipal and privately owned systems.

NEW BRUNSWICK.

Constitution and Government.—New Brunswick was discovered by Jacques Cartier in 1534. It was acquired by the English under the Treaty of Utrecht in 1713, and was settled by the English as early as 1761. In 1784 it was separated from Nova Scotia. The Government is at present vested in a lieutenant-governor and a legislative assembly of 52 members elected for 5 years. Any male or female British subject of full age is entitled to vote after 6 months' residence. Last election, 28 June, 1948:—Liberals 47, Progressive Conservatives 5. The province is represented by 10 members of the Senate and 10 in the Canadian House of Commons.

Lieut.-Governor.—Hon. D. Laurence Maclaren (appointed 1 Nov., 1945).

The members of the Ministry are as follows (Jan., 1950):—

Premier and Attorney-General.—John B. McNair, K.C., M.L.A.

Provincial Secretary-Treasurer and President of the Executive Council.—J. Gaspard Boucher, M.L.A.

Minister of Public Works.—W. S. Anderson, M.L.A.

Minister of Agriculture.—A. C. Taylor, M.L.A.
Minister of Health and Social Services.—F. A. McGrand, M.D., M.L.A.
Minister of Lands and Mines.—Richard J. Gill, M.L.A.
Minister of Education and Minister of Municipal Affairs.—James W. Brittain, M.L.A.
Minister of Labour.—Samuel E. Mooers, M.L.A.
Minister of Industry and Development.—J. André Doucet, M.L.A.
Minister without Portfolio and Chairman of the New Brunswick Electric Power Commission.—Isaac Melanson, M.L.A.

Local Government.—For the purposes of certain acts there is a distinction which defines a Municipality as 'city, town, incorporated village and municipality' or county unit, and a Municipal Corporation as 'a county, city, town, parish, incorporated village, school district and the inhabitants of a defined area within the Province, incorporated for the purpose of providing water, fire protection, light, power, streets, sidewalks, or other like utilities within such area.' These latter municipal corporations are incorporated under Special Acts and constitute a Commission governed by a board of commissioners. Cities may be erected by Special Acts, as may also villages and towns if they have not the statutory requirements of the Village Incorporation Act, 1920, or the Town Incorporation Act, 1896.

Area and Population.—The area of the province is 27,985 square miles, of which 27,473 square miles are land area. The population (census, 1941) was 457,401; in 1931, 408,219. Estimated population (1950), 522,000; estimated rural population, 358,956. Estimated population of the cities:—Saint John, 57,262; Moncton, 25,366; Fredericton (capital), 14,201.

Education.—Public education is free and non-sectarian. There are 5 universities. The University of New Brunswick, at Fredericton, is supported by the province. It was founded in 1800, and had 1,334 students in 1948–49; the Mount Allison University at Sackville had 1,122 students; St. Joseph's University at St. Joseph, 425 students; St. Thomas at Chatham, 113 students; Collège du Sacre-Coeur at Bathurst, 92 students. There were (1948–49) 101,289 pupils and 3,565 teachers in the 1,588 public schools.

Finance.—The finance (in Canadian dollars) for 8 years is shown as follows (years ended 31 October):—

Year	Ordinary revenue	Ordinary expenditure	Year	Ordinary revenue	Ordinary expenditure
1943	12,230,727	10,487,777	1947	25,574,374	19,226,554
1944	12,691,236	12,609,133	1948	27,071,290	25,038,872
1945	14,457,782	13,992,476	1949	29,453,148	27,550,439
1946	18,723,593	16,436,478			

Bonded debt (exclusive of Treasury bills), 31 Oct., 1949, $158,273,644. Provincial sinking funds, 31 Oct., 1949, $25,855,175.

Production and Industry.—New Brunswick is productive in agricultural manufacture, mining, fishing and forest products. The total area under field crops in 1948 was 938,500 acres, and in 1949, 933,500 acres. For particulars of agricultural production and livestock, *see* under CANADA.

The Crown lands held by the province include 7,500,000 acres out of the total land area of 18,000,000 acres. About 14,000,000 acres are covered

with productive forest, of which the Crown owns about one-half. In 1949 the gross value of forest production was $113,000,000, which was equal to 50% of the total production of all primary industries. A new pulp mill came into production late in 1949 at an estimated cost of $5,000,000; it has a capacity of 125 tons of sulphate pulp per day and is located at Newcastle on the Miramichi River. The capital invested in pulp and paper mills, sawmills, logging and driving equipment, etc., is placed at $65,000,000, and wages in forest industries amount to approximately $30,000,000 annually.

A considerable variety of minerals is known to exist in the province, such as iron, copper, antimony, lead, zinc, tungsten, manganese, bituminous coal, gypsum, oil shale, salt, diatomite. The chief active mining in the year 1949 was in coal and gypsum. Quantities of good limestone exist in the southern part of the province, and are quarried for lime, the pulp industry and as a fertilizing agent. Various granites are quarried and manufactured at St. George. Natural gas and oil are produced near Moncton. Coal output, 1949, 547,552 tons. Total mineral production for 1949 was $7,386,859.

In 1948 there were 1,067 industrial establishments, employing 24,325 persons; salaries and wages $43,919,000 ; cost of materials, $134,411,000; gross value of products, $234,580,000. Pulp and paper is the most important industry followed by sawmills, fish curing and packing, butter and cheese, and miscellaneous foods.

The total marketed value of fisheries in 1949 was estimated at $18,000,000.

Commerce and Communications.—The exports of the province in 1942 amounted to $373,969,931; the imports for consumption to $35,018,410.

The province had in 1949, 13,165 miles of highway, including 11,930 miles of gravel roads and 1,235 miles of paved roads.

There were 1,836 miles of steam railway operating in 1949. In 1949 there were 142,000 miles of telephone wire and 65,613 telephones.

NEWFOUNDLAND AND LABRADOR.

Newfoundland was discovered by John Cabot 24 June, 1497, and was soon frequented by the Portuguese, Spanish and French for its fisheries. It was formally occupied in Aug., 1583, by Sir Humphrey Gilbert on behalf of the English crown. Guy, Calvert and others made unsuccessful attempts to colonize the island, but in the 17th century English colonists established themselves there. Although British sovereignty was recognized in 1713 by the Treaty of Utrecht, disputes over fishing rights with the French, who also had a station on the island, were not finally settled till 1904.

By the Anglo-French Convention of 1904, France renounced her exclusive fishing rights on a specified section of the coast, retained under the treaty of Utrecht, but retained the right to fish in territorial waters from Cape St. John northwards and southwards to Cape Ray for all sorts of fish, including bait and crustacea.

o

The Hague court in 1910 granted the right of Great Britain to make fishing regulations without the consent of the United States, subject to any limitations imposed by treaty. It also confirmed Great Britain's contention that the whole extent of a bay from headland to headland is comprised within territorial waters.

The coast line is extremely irregular. Bays, fiords and inlets are numerous and there are many good harbours with deep water close to shore. The coast is rugged with bold rocky cliffs from 200 to 400 ft. high; in the Bay of Islands some of the islands rise 500 ft., with the adjacent shore 1000 ft. above tide level. The interior is a plateau of moderate elevation and the chief relief features trend northeast and southwest. Long Range, the most notable of these, begins at Cape Ray and extends northeast for 200 miles; the highest peak reaching 2,673 ft. Approximately one-third of the area is covered by water. Grand Lake, the largest body of water, has an area of about 200 sq. miles. The principal rivers flow towards the northeast. On the borders of the lakes and water-courses good land is generally found, particularly in the valleys of the Terra Nova River, the Gander River, the Exploits River and the Humber River, which are also heavily timbered.

In Jan., 1941, sites on Newfoundland were leased to the United States for naval or military bases (Cmd. 7294; Treaty Series No. 1, 1948); these were transferred from the military air transport service to the U.S. Defence Department, on 20 Sept., 1950.

Constitution and Government.—Until 1832 Newfoundland was ruled by the Governor under instructions from the Colonial Office. In that year a limited form of representative government was granted. A Legislature was brought into existence, but the Governor and his Executive Council were not responsible to it. In 1855 Newfoundland was granted responsible government with an elected Lower Chamber and an appointed Upper Chamber or Legislative Council. Under the constitution of 1855 which lasted until its suspension in 1934, the Government was administered by the Governor appointed by the Crown with an Executive Council responsible to the House of Assembly of 27 elected members and a Legislative Council of 24 members nominated for life by the Governor in Council. Women were enfranchised in 1925. At the Imperial Conference of 1917, when the self-governing colonies were given the designation of Dominions, Newfoundland was constituted as a Dominion.

In 1933 the financial situation had become so critical that the Government of Newfoundland asked the Government of the United Kingdom to appoint a Royal Commission to investigate conditions. They recommended that, as a temporary measure, Newfoundland's parliamentary form of government should be suspended and that the island should be administered, until it again became self-supporting, by a Commission of Government composed of 6 members appointed by the Crown—3 from Newfoundland and 3 from the United Kingdom—under the chairmanship of the Governor. These recommendations were accepted and in 1933 the Newfoundland Act was passed by the United Kingdom parliament, and Government by Commission was inaugurated on 16 Feb., 1934.

A National Convention, elected in 1946, made, in 1948, recommendations to His Majesty's Government in Great Britain as to the possible forms of future government to be submitted to the people at a national referendum. Two referenda were held. In the first referendum (June, 1948) the three forms of Government submitted to the people were: commission of government for five years, confederation with Canada, and responsible government as it existed in 1933. No one form of government received a clear majority

of the votes polled, and commission of government, receiving the fewest votes, was eliminated. In the second referendum (July, 1948) confederation with Canada received 78,408 and responsible government 71,464 votes.

In the Canadian Senate on 18 Feb., 1949, Royal assent was given to the terms of union of Newfoundland with Canada and on 23 March, 1949, in the House of Lords, London, Royal assent was given to an amendment to the British North America Act, made necessary by the inclusion of Newfoundland as the tenth Province of Canada.

Under the terms of union of Newfoundland with Canada, which was signed at Ottawa on 11 Dec., 1948, the constitution of the Legislature of Newfoundland as it existed immediately prior to 16 Feb., 1934, shall, subject to the terms of the British North America Acts, 1867 to 1946, continue as the constitution of the Legislature of the Province of Newfoundland until altered under the authority of the said Acts.

The Constitution of the Legislature of Newfoundland insofar as it relates to the Legislative Council shall not continue, but the Legislature of the Province of Newfoundland may at any time re-establish the Legislative Council or establish a new Legislative Council. The franchise shall be extended to female British subjects who have attained the full age of 21 years and are otherwise qualified as electors. The coast of Labrador has been constituted an additional electoral district, making 25 districts and 28 members of the Legislature.

A general election was held in Newfoundland on 27 May, 1949, and a deferred election on the coast of Labrador on 25 July. The first session of the 29th General Assembly of Newfoundland and the first General Assembly of the Province opened on 13 July, 1949. The members of the legislature receive $2,500 per annum.

The Province is represented by 6 members in the Senate and by 7 members in the House of Commons of Canada.

Lieutenant-Governor.—Sir Leonard Cecil Outerbridge, C.B.E., D.S.O. (appointed 17 Aug., 1949).

The Executive Council was, in 1951, composed as follows :—

Premier and Minister of Economic Development.—J. R. Smallwood.
Attorney-General.—L. R. Curtis, K.C.
Minister of Finance.—H. W. Quinton, C.M.G.
Minister of Public Welfare.—H. L. Pottle.
Minister of Fisheries and Co-operatives.—W. J. Keough.
Minister of Supply.—P. S. Forsey.
Minister of Education.—S. J. Hefferton.
Minister of Labour.—C. H. Ballam.
Minister of Health.—J. R. Chalker.
Minister of Provincial Affairs.—J. J. Spratt.
Minister of Public Works.—E. S. Spencer.
Minister without Portfolio.—O. L. Vardy.

Area and Population.—Area, 42,734 square miles. Census population, 1945, was 321,819 (including Labrador). Estimated population, 1950, 350,000.

The birth rate in 1948 was 33·8 and the death rate 9·1 per 1,000.

Capital of Newfoundland, St. John's, 57,496 inhabitants (1945); other towns (1945), Corner Brook, 8,711; Bell Island, 8,171; Grand Falls, 4,552; Carbonear, 3,472; Windsor, 2,772; Botwood, 2,744; Bishop's Falls, 2,522; Grand Bank, 2,329; Harbour Grace, 2,065.

Religion and Education.—Of the total population of Newfoundland and Labrador (1945), 100,878 belonged to the Church of England, 106,006 were Roman Catholics, 80,094 United Church, 1,548 Presbyterians, 22,571 Salvation Army, 7,558 Pentecostal Mission, and 3,164 other denominations.

The number of schools of all kinds in 1949–50 was 1,200, with a total of 2,390 classrooms. The enrolment was 78,613. The Memorial University, offering degree courses in Arts and Science and diplomas in Engineering and Household Science, had in 1949–50 an enrolment of 308. Total expenditure for education by government in 1949–50 was $4,488,300, and in 1950–51, $4,697,000 (estimated).

In 1950, there were 23 cinemas with a seating capacity of 11,500.

Revenue and Expenditure (in Canadian dollars) in 5 years ended 31 March:—

	1946–47	1947–48	1948–49	1949–50	1950–51[1]
Revenue . .	37,257,000	40,556,541	41,087,900	37,743,292	29,655,400
Expenditure . .	37,147,000	41,019,784	40,000,000	34,983,309	38,637,900

[1] Estimates.

Public debt (1950), $4,398,706.

Production.—The estimated value of agricultural products, including livestock, in 1950, was $18 million. Forests of spruce and fir exist on crown lands, and over 1,160 saw-mills are in operation, with a total output of about 60 million board-measure feet. The mineral resources are considerable. Large beds of iron ore, with total reserves of about 3,500,000,000 tons, are being developed on Bell Island in Conception Bay. In the eastern part of the island gold-bearing rocks and extensive deposits of silver and lead ore have been found.

Fishing is the principal occupation of the population. The principal fish are cod, salmon, halibut, lobster, herring, caplin and seal. In 1949, 26,768 people were [illegible]. The total value of all fishery products exported in 1949 was [illegible]. 171 factories packed salmon, with a total pack of some 3,976 cases, and 151 factories packed lobster with a total pack of 3,882 cases.

The seal fishery in 1950 was prosecuted by 4 auxiliary vessels. The total number of seal pelts landed was 81,908; net value, $159,313. Two companies are operating the whale fishery, one at Hawk's Harbour, Labrador, using 4 whalers, and the second at Williamsport, White Bay, using 2 whalers. The total catch was 472 whales.

The total value of all forest products exported in 1948–49 was $35,394,000, including 375,899 tons of newsprint ($28,606,446), 43,462 tons of sulphite wood pulp ($3,578,265) and 43,867 tons of pulpwood ($1,305,800).

Two newsprint and sulphite mills are in operation. The mill at Corner Brook has a daily production capacity of 1,000 tons of newsprint and 180 tons of sulphite pulp and the mill at Grand Falls a daily production of 650 tons of newsprint and 80 tons of sulphite pulp.

The total value of all mineral products in 1949 was $16,976,269, including 1,425,393 tons of iron ore ($7,412,044), 119,614 tons of lead, zinc and copper concentrates ($7,991,608), 372,903 tons of limestone ($584,950) and 73,206 tons of fluorspar ($987,678).

There are 16 hydro-electric power plants, operated by 7 companies, with 261,550 h.p. developed; of these Junction Brook takes up more than half the total.

Trade Unions.—There are 91 unions, representing 35,000 persons.

57 unions, with a membership of 15,000, are members of the Newfoundland Federation of Labour. 50 of these are affiliated with the Trades and Labour Congress of Canada and the American Federation of Labor, 2 with the American Federation of Labor, and 1 with the Trades and Labour Congress of Canada.

14 unions are affiliated with the American Federation of Labor and the Trades and Labour Congress of Canada, 8 with the Congress of Industrial Organizations, one with the Canadian Congress of Labour and one with the Trades and Labour Congress of Canada. There are 10 independent unions with a membership of some 20,000.

Imports and Exports (in Canadian dollars) for 5 years ended 31 March:—

	1944–45	1945–46	1946–47	1947–48	1948–49
Imports . .	65,824,066	65,898,707	74,827,596	105,051,928	110,336,545
Exports . .	48,711,980	62,588,498	62,427,305	80,467,855	92,735,792

The chief imports in 1948–49 were:—Machinery and vehicles, $20,456,000; fuel oils and gasoline, $13,697,000; textiles and clothing, $10,132,000; barrelled beef and pork, $8,852,000; flour, meal and grains, $6,205,000; sugar and products, $4,097,000. The chief exports:—Fishery products, $25,500,000; mining products, $16,976,269; forest products, $35,394,000.

Of the imports (1948–49) the value of $53,913,602 came from Canada; $43,749,149 from the United States; $7,874,339 from the United Kingdom. Of the exports the value of $35,803,775 went to the United States; $15,126,916 to the United Kingdom; $10,625,713 to Canada; $5,162,958 to Belgium; $3,499,404 to Puerto Rico; $3,275,418 to Mexico; $2,464,329 to Italy; $2,203,704 to Portugal.

Shipping.—Vessels registered 31 Dec., 1949, 1,184 sailing vessels of 42,897 net tons, 47 steam vessels of 16,262 net tons, and 1,016 motor vessels of 42,723 net tons. In 1947–48, the tonnage of vessels entered and cleared at Newfoundland ports was 3,050,885, of which 2,319,369 tons were British.

Communications.—Railways open, 1949:—705 miles of government line with a gauge of 3 ft. 6 in., and 56 miles of private line. Communication between various points on the coast and with Sydney, Cape Breton, is maintained by 10 first-class steamers and 4 motor vessels. There were 606 post offices in 1949, of which 161 were also telegraph offices, including 58 post offices in Labrador. Telephone wire maintained in 1949 was 6,512 miles; there were 16,712 telephones.

Ten commercial airlines, including Trans-Canada Airlines and British Overseas Airways Corporation, set down and take up passengers at Gander Airport whilst flying the North Atlantic route. There are also 2 local airlines.

Banking.—On 31 March, 1950, the Newfoundland Savings Bank held $23,481,114 standing to the credit of 27,095 depositors.

Labrador, the most northerly district of the Province of Newfoundland forms the most easterly part of the North American continent, and extends from Blanc Sablon at the northeast entrance of the Straits of Belle Isle to Cape Chidley at the eastern entrance of Hudson's Strait. In March, 1927,

the Privy Council decided the boundary between Canada and Newfoundland in Labrador. The area now under the jurisdiction of Newfoundland is approximately 110,000 square miles. The population (1945 census) is 5,528. Capital: Battle Harbour.

Under the terms of the union of Newfoundland with Canada, the coast of Labrador together with the islands adjacent thereto, were constituted an additional electoral district to be known as Labrador and to be represented by one member in the House of Assembly.

Little is known about the geology of the country. The prevailing formation on the coast is granite, gneiss or mica slate; above which, in some places, are beds of old sandstone and a stratum of secondary limestone. The secondary rocks disappear towards the interior. Between Hamilton River and the southern boundary of Labrador there exists the largest stand of virgin timber on the North American continent. Estimates show some 50,000,000 cords of merchantable timber, with an approximate value of $62,500,000 on the stump. Labrador is noted for its fisheries. Cod fishery employed in 1949, 3,400 men and 144 vessels. Labrador also possesses valuable salmon, herring, trout and seal fisheries.

The Moravian Missions have maintained, over the past 150 years, mission stations in northern Labrador, at Nain, Mokkovik, Hebron and Hopedale; the International Grenfell Association operate hospitals at Mary's Harbour, Cartwright and North West River, as well as a boarding school at North West River. In the months that the coast is ice-free, from June to November, the Provincial Government maintains a coastal service, the steamer making a trip every 3 weeks from St. John's to Nain. In addition to this service a motor vessel is maintained by the government on the coast north of Hamilton Inlet to service the interests of fishermen.

The Government of Canada has established an airport at Goose Bay located at the bottom of Hamilton Inlet.

At the headwaters of the Hamilton River an iron exploration is being carried out on an area similarly of the same age as part of the Lake Superior iron ore where the geological formations are structurally similar to those of Lake Superior.

During 1949 the Labrador Mining and Exploration Company, holder of a concession from the Government of Newfoundland, proved the existence of 300,000,000 tons of high-grade iron ore in an area of one square mile. The productive zone is 90 miles long and the width of the trough, in which the concession is situated, varies from 10 to 60 miles. In 1950, the building of a railway was begun from Seven Islands, a port on the north shore of the Gulf of St. Lawrence, to the site of the iron-ore deposits, near the headwaters of the Hamilton River, a distance of 360 miles; and also the construction of a shipping port at Seven Islands.

The Hamilton River is probably the largest undeveloped power river left in North America. It has a length of 560 miles and drains an area of 30,000 square miles. The two most important power sites on it are at Grand Falls and at Muskrat Falls. Theoretical continuous horse-power is 4,350,000.

NOVA SCOTIA.

The first permanent settlement was made by the French early in the 17th century, and the province was called Acadia until finally ceded to the British by the Treaty of Utrecht in 1713.

Constitution and Government.—Under the 'British North America Act' of 1867 the legislature of Nova Scotia may exclusively make laws in relation to local matters, including direct taxation within the province, and the administration of justice. The legislature of Nova Scotia consists of a Lieut.-Governor, appointed and paid by the Federal Government, and holding office for five years, and a House of Assembly of 37 members, chosen by popular vote every five years. The province is represented in the Dominion Senate by 10 members, and in the House of Commons by 13.

The franchise and eligibility to the legislature are granted to every person, male or female, if of age (21 years), a British or Canadian subject, and a resident for one year in the province and two months before the date of the writ of election in the county or electoral district of which the polling district forms part, and if not by law otherwise disqualified, or in receipt of aid as a pauper.

At the election held on 9 June, 1949, there were returned 28 Liberals, 7 Progressive Conservatives and 2 Co-operative Commonwealth Federation candidates.

Lieutenant Governor.—The Hon. John Alexander Douglas McCurdy, M.B.E. (appointed 12 Aug., 1947).

The members of the Ministry are as follows:—

Premier and Provincial Treasurer.—Angus Lewis Macdonald, P.C., K.C., S.J.D.
Attorney General and Provincial Secretary.—Malcolm A. Patterson, K.C.
Minister of Highways and Public Works.—Merrill Denzil Rawding.

Minister of Agriculture and Marketing and Minister of Lands and Forests.—Arthur W. Mackenzie, E.D., B.S.A.

Minister of Public Health and Minister of Public Welfare.—Harold Connolly.

Minister of Mines and Minister of Labour.—Alexander Hugh McKinnon, K.C.

Minister of Trade and Industry.—Wilfred T. Dauphinee.

Minister of Education.—Henry Davies Hicks.

Minister of Municipal Affairs.—Ronald Manning Fielding, K.C.

Ministers without Portfolio.—Geoffrey Stevens; A. B. DeWolfe.

Clerk of the Executive Council.—Charles L. Beazley, K.C.

LOCAL GOVERNMENT.—The main divisions of the Province for governmental purposes are the 2 cities, the 40 towns and the 24 municipalities, each governed by a council and a mayor or warden. The cities have independent charters and the various towns take their powers from and are limited by The Towns' Incorporation Act of 1941 which is a consolidation of earlier acts, and the various municipalities take their powers from and are limited by The Municipal Act of 1940, which is in effect a consolidation of the earlier municipal acts of the Province. The majority of municipalities comprise one county, but 6 counties are divided into 2 municipalities each. In no case do the boundaries of any municipality overlap county lines. The 18 counties as such have no administrative functions.

Any city (of which there are 2) or incorporated town (of which there are 40) that lies within the boundaries of a municipality is excluded from any jurisdiction by the municipal council and has its own government.

Area and Population.—The area of the province is 21,068 square miles, of which 20,743 square miles are land area and 325 square miles fresh water area. The population (census, 1941) was 577,962. Total estimated population in 1949, 645,000.

Population of the principal cities and towns (1941):—Halifax, 70,488; Sydney, 28,305; Glace Bay, 25,147; Dartmouth 10,847; Truro, 10,272; New Glasgow, 9,210; Amherst, 8,620; Sydney Mines, 8,198; Yarmouth, 7,790.

The vital statistics for 3 years are as follows:—

Calendar year	Births [1]	Marriages	Divorces	Deaths	Excess of births
1946	17,914	6,046	259	6,549	11,365
1947	19,265	5,861	210	6,009	13,256
1948	17,791	5,093	230	6,097	11,694

[1] Exclusive of still births.

Education.—Public education in Nova Scotia is free, compulsory and undenominational through elementary and high school. Attendance is compulsory to age of 14 in rural areas and 16 in urban areas. There are also the Schools for the Blind and for the Deaf, which serve the Maritime Provinces; the Nova Scotia Home for Boys; the Maritime Home for Girls, and the Nova Scotia Training School for mental deficient children. The Nova Scotia Agricultural College and the Normal College are centrally located at Truro. The Nova Scotia Technical College at Halifax grants degrees in civil, chemical, electrical and mining engineering. The Department of Education operates through its Vocational Education Division vocational evening schools, coal-mining classes, apprenticeship

classes, a land survey school, a marine engineering school, a correspondence study branch and 2 regional vocational high schools.

Total expenditure on public education for the year ending 31 July, 1949, was $12,059,447, of which 54·7% was borne by the provincial government. 4,114 departments operated in 1,738 school sections, with 4,708 teachers and 127,069 pupils, of whom 25,418 were in junior high school and 9,847 were in senior high school grades. The province has 10 universities and colleges.

Justice and Crime.—Justice in Nova Scotia is administered in the Supreme Court, the county courts, the probate courts, the Divorce Court, the magistrates' courts, the municipal and justice courts. The Court of Appeal consists of a panel of judges of the Supreme Court. There are also bodies, sometimes referred to as courts, for the revision of assessment rolls, voters' lists and like purposes. There are also juvenile courts in certain counties of the province.

For the year ended 30 Nov., 1949, a total of 4,357 persons was committed to provincial jails for offences against dominion and provincial statutes.

Finance.—The revenue is raised from Dominion [illegible] under the British North America Act and under a Dominion-Provincial agreement in lieu of certain income and special taxes surrendered for a period of 5 years to the Dominion Government, royalty on coal and minerals, special fees on incorporated companies, partnerships, automobiles and other statutory fees, a tax on gasoline, theatres, lands and forests and telephones. Under the agreement with the Dominion Government (1942) the Province vacated the fields of personal income and corporation taxes for the duration of the war and one year thereafter. On the expiry of this agreement on 30 Nov., 1946, a new agreement was signed, the Province vacating to the Dominion Government for 5 years the fields of personal income, corporation income and succession duty taxes. The rental is an annual *per capita* allowance, plus $2,005,140 statutory subsidies. The *per capita* allowance is based on a formula of the Dominion gross national product of 1942 and the populations of the Dominion and the Province of the same year, varying from year to year in proportion as these factors change, with a guaranteed minimum of $8,865,000.

Revenue, expenditure and debt (in Canadian dollars) for 5 years :—

Year (ended 30 Nov.)	Revenue	Expenditure [1]	Debt
1945-46	22,546,260	19,249,801	105,779,633
1946-47	33,294,214 [2]	22,787,958	99,344,633
1947-48	33,502,015	27,335,602	124,469,633
1948-49	35,404,211	33,387,165	141,097,500
1949-50 [3]	47,655,609	46,793,267	—

[1] Not including Sinking Fund instalments.
[2] Includes $9,493,915 attributable to fiscal year 1947 under Dominion-Provincial agreement signed 8 Jan., 1948.
[3] Estimated.

Sinking fund investments totalled $14,382,335 (30 Nov., 1949). Revenue producing assets :—Advances to Nova Scotia Power Commission, $18,572,483; other revenue producing assets, including balance at credit of province with federal government, $14,869,077; totalling $33,441,560.

Production and Industry.—Nova Scotia is a province of many industries. Agriculture, coal-mining, fishing and steel manufacturing are the most important. Dairying, poultry raising and fruit growing are the

most important branches of agriculture. Gross cash income, including income in kind to persons on farms, for 1949 is estimated at $54,500,000.

Cash income from the sale of dairy products, including income in kind, is estimated at $17,700,000 in 1949. Milk production in 1949 approximated 442,700,000 lb.

In the poultry industry about 1,750,000 chicks were hatched in approved hatcheries during 1949. The marketing of dressed poultry in a graded basis exceeded 1,400,000 lb.

The 1949 apple crop was about 1,200,000 barrels, of which 500,000 were exported to the United Kingdom.

Interest in the use of ground limestone as a soil conditioner is increasing; approximately 78,000 tons were used in 1949 compared with 14,000 tons in 1939.

The 116 co-operative organizations, with over 24,000 members, had, in 1949, total assets in excess of $4,800,000 and a sales volume in excess of $13,800,000.

Principal minerals are (31 Dec., 1949):—Coal, 6,182,400 short tons; coke, 557,108 short tons; gold, 106 oz.; gypsum, crude, 2,558,891 short tons, calcined, 4,593 short tons; salt, 85,090 short tons; barytes, 43,347 short tons; dolomite, 84,361 short tons; limestone, 31,801 short tons; silica, 9,255 short tons.

The known coalfields embrace 1,000 square miles. The gold districts cover about 5,000 square miles.

The estimated forest area of Nova Scotia is over 15,900 square miles. The principal trees are spruce, fir, hemlock, pine, birch, oak, maple and poplar, with smaller quantities of larch, ash and elm.

The fisheries of the province in 1949 had an estimated value of $17,950,000 (landed value), including cod fishery, $4,902,000, and lobster fishery, $6,239,000. In 1948, $15,085,000 were invested in this industry, and 14,915 men were engaged in the primary fishing industry and 4,988 in the fish processing industry. Capital investment in the fish processing industry was $7,551,825 in 1945.

The number of manufacturing establishments was (in 1947) 1,480, employing 30,285 wage-earners; wages and salaries, $46,113,036; gross value of products, $204,219,433.

Trade Unions.—Most local unions are affiliated with the Trades and Labour Congress (the counterpart of the A.F.L. in the U.S.A.) or with the Canadian Congress of Labour (C.I.O. in the U.S.A.). The most important independent organizations are the railroad brotherhoods of engineers, firemen and enginemen, conductors and trainmen, which have international affiliation but are not connected with the A.F.L. or C.I.O. In 1948 the number of branches reporting membership in Nova Scotia was 207 (240 were chartered) with a membership of 33,533.

Communications.—The country is covered with a network of railways, 1,420 miles in extent. There are 15,117 miles of highways; 1,646 trunk (958 paved), 13,471 county (84 paved) highways. The figures are exclusive of highways within cities and towns. Besides this, subsidized boats ply round the shores, making regular calls at all the important ports.

ONTARIO.

Constitution and Government.—From 1791 to 1867 Ontario was called Upper Canada. The provincial government is administered by a Lieut.-Governor, a cabinet and one chamber consisting of 90 members elected by a general franchise for a period of 5 years. Women have the vote and can be elected to the chamber.

At the elections for the provincial legislature held on 7 June, 1948, the following parties were returned:—Progressive Conservatives, 53; Liberals, 13; Co-operative Commonwealth Federation, 21; Liberal Labour, 1; Labour Progressive, 2; total, 90.

Lieut.-Governor.—His Honour Ray Lawson, O.B.E.

The members of the executive council in Jan., 1951, were as follows (all Progressive Conservatives):—

Prime Minister, President of the Council and Provincial Treasurer.—Leslie M. Frost, K.C.
Minister of Agriculture.—Thomas L. Kennedy.
Minister of Highways and Minister of Public Works.—George H. Doucett.
Attorney-General and Minister of Education.—Dana H. Porter, K.C.
Minister without Portfolio.—George H. Challies.
Minister of Municipal Affairs.—George H. Dunbar.
Minister of Labour.—Charles Daley.
Minister without Portfolio.—Russell T. Kelley.
Provincial Secretary and Registrar.—G. Arthur Welsh.
Minister of Public Welfare.—William A. Goodfellow.
Minister of Planning and Development.—William Griesinger.
Minister of Lands and Forests.—Harold R. Scott.
Minister of Travel and Publicity.—Louis P. Cecile, K.C.
Minister of Mines.—Welland S. Gemmell.
Minister without Portfolio.—William E. Hamilton.
Minister of Health.—Mackinnon Phillips.
Minister of Reform Institutions.—John W. Foote, V.C.

Agent General in London.—J. S. P. Armstrong (Ontario House, 13 Charles II Street, S.W.1).

Local Government.—Local government in Ontario is divided into two branches, the more important branch pertaining to municipal institutions and the other to education. The present system of municipal institutions was established on 1 Jan., 1850; its scope has been considerably enlarged as to functional operation.

For general municipal and local government purposes, Ontario is divided into counties (or union of counties), cities, towns, villages and townships. The cities function ndependently of the county units, as also do 7 towns which many years ago were separated from the counties for municipal purposes. Every town, village and township which lies within

the confines of a county, functions for certain specific purposes through the county as a unit but for all other purposes each of them functions as a separate unit.

The municipalities have control over all local affairs and undertakings, including the construction and upkeep of roads and streets, other than main traffic arteries, provision of utility services, provision and administration of police forces, fire departments, sanitation services, and social welfare services. The annual expenditures for municipal purposes are provided in part by grants received from the Province of Ontario, but the bulk of the money required is provided by direct taxation imposed upon real property and in a limited way upon what is known as business assessment. The council of each municipality also imposes and collect from the taxpayers such monies as the local education authority itself may require for the purposes of education.

Each unit of municipal government is governed by a council elected by popular vote. A city council is composed of a mayor and aldermen; a town council of a mayor, reeve (or reeves) and councillors; a village and a township council of a reeve (or reeves) and councillors. The basic unit for a municipal council is the township which is composed of 5 members including the reeve and the deputy reeve, if any. The councils in cities, towns and villages vary in number of members but none of them exceed 25.

The county council is composed of the reeve and deputy reeve (if any) of each town, village and township within the county boundaries. The only exceptions from that rule are the cities and the 7 separated towns referred to above. The principal functions of a county council are related to construction and maintenance of such traffic arteries as have been included in the county road system, the provision of court houses and gaols, homes for the aged and child welfare institutions. Some counties also exercise a certain measure of jurisdiction for purposes of secondary education. Funds required for county purposes are apportioned among the towns, villages and townships which form the county, the apportionment being based on an equalization of the capital value assessment of real property in each such local municipality. A city, situated within the confines of a county, shares the cost of constructing and maintaining court houses, gaols and homes for the aged and child welfare institutions.

No municipality in Ontario may incur debts to be met in future years without the sanction of the tribunal created by the Provincial Legislature and known as the Ontario Municipal Board. Debenture obligations incurred by municipalities for utility undertakings (water-works and electric light and power systems) are discharged ordinarily out of revenues derived from the sale of utility services and do not fall upon the ratepayer.

With respect to education, municipal councils have no jurisdiction, except as to the provision of monies. Responsibility for provision of school premises and for their operation and maintenance and for the supply of teachers is in the hands of the local education authority, which is an elected body. In cities and towns education falls under the control of one local authority. The smaller urban communities and the townships usually have separate authorities for elementary and secondary education. In many townships there are several local boards for elementary education, the township being divided into school section areas.

The conduct of municipal institutions comes under the guidance of the provincial Department of Municipal Affairs. The principal functions of the department are of an advisory nature, but it does exercise a limited measure of control with respect to matters relating to municipal audits and other specific situations. Education comes under the guidance and control of

the provincial Department of Education, which deals with the training of teachers and formulation of the curriculum.

There are considerable areas in the northermost parts of Ontario where as yet there is little or no settlement of population. In such areas no municipal organization exists and control for all purposes over such areas remains in the hands of the provincial government.

Area and Population.—The total area is 412,582 square miles (363,282 square miles land area and 49,300 square miles water). The province extends 1,000 miles from east to west and 1,050 miles from south to north. About 82% of this area lies south of the isotherm of 60° F. mean July temperature, which is generally considered as the northern limit for the economic production of cereals.

The population of the province (census, 2 June, 1941) was 3,787,655, including 30,339 Indians and Eskimos. The assessed population of the principal cities (1949) was :—Toronto (capital), 673,104; Hamilton, 192,125; Ottawa, 188,665; Windsor, 120,532; London, 92,789.

Vital statistics, 1949 :—Births (exclusive of still births), 106,601 (ratio per 1,000 of population, 24·2); deaths, 43,371 (9·8); marriages, 43,304 (9·8). The estimated population as at 1 June, 1950, was 4,512,000.

Education.—There is a complete provincial system of elementary and secondary schools. The University of Toronto, founded in 1827, had about 1,500 professors, lecturers, etc., on its staff in Oct., 1950, and an enrolment of about 11,825 students, of whom 2,203 were Second World War veterans. Other Ontario universities are Queen's at Kingston, Western Ontario at London, McMaster at Hamilton, and Ottawa at Ottawa. The first two are now undenominational and are aided by the state. In 1950 there were 7,320 day and evening schools of all grades in operation, with 823,000 pupils enrolled, and 26,292 full-time certificated teachers engaged. The Agricultural College in Guelph had, in 1949–50, an attendance of 2,300 and the Veterinary College had 413 students. The total expenditure of the Provincial Department of Education for the fiscal year ended 31 March, 1949, was $47,812,478, excluding expenditure for the Agricultural College and other agricultural schools amounting to $2,625,471.

Finance.—The net ordinary revenue and expenditure (in Canadian dollars) for 6 years were as follows :—

Year ended 31 March	Revenue	Expenditure	Year ended 31 March	Revenue	Expenditure
1945	117,124,347	116,248,977	1948	191,698,952	166,070,200
1946	128,368,864	126,802,964	1949	215,469,614	206,256,361
1947	142,875,759	140,929,509	1950 [1]	224,033,800	223,029,800

[1] Net interim figures.

The estimated gross public debt on 31 March, 1950, was $698,124,175.

Production and Industry.—Ontario is rich in agricultural and mineral resources. There are 102,870 square miles which have agricultural possibilities. 34,981 square miles are occupied, and of this area 20,880 square miles are improved lands. In 1949 there were 9,411,000 acres under field crops (9,139,000 acres in 1948) and the estimated value of the crops was $343,940,000 ($378,378,000 in 1948). The estimated total value of agricultural production in 1949 amounted to $1,051,717,000; 1948, $1,029,204,000.

The mineral production in 1949 included gold, 2,330,108 oz.; silver,

2,061,774 oz. The total value of the mineral production in 1949 was $315,323,367.

The total area of productive forest is about 173,800 square miles, 66,200 square miles of which are softwood and 16,100 square miles hardwood. The accessible timber stand is approximately 58,384,000,000 cubic feet. Gross value of forestry production in 1949 was $294,390,605; 1947, $288,391,163.

In 1947 Ontario had 11,860 manufacturing establishments employing 537,581 persons. Total salaries and wages paid, $1,037,976,714; cost of materials used, $2,651,697,573; gross value of production, $4,903,472,526.

The Hydro-electric Power Commission of Ontario recorded for the year ended 31 Oct., 1949, a total available capacity of 2,229,906 kw. and a total energy generated of 14,032,949,990 kwh.

Communications.—In 1949 there were 73,000 miles of highways, of which 55,000 were surfaced. The amount expended by provincial, municipal and dominion governments for construction and maintenance in 1949–50 was $73,322,600. There were 10,464 miles of single-track steam railway operated in 1949. There were 1,190,000 telephones in use in 1949.

Number of motor vehicles, 1949, was 969,369, of which 771,709 were passenger cars.

PRINCE EDWARD ISLAND.

This island was discovered by Sebastian Cabot in 1497; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, and constituted a separate colony in 1769.

Constitution and Government.—Prince Edward Island entered the Confederation on 1 July, 1873. The provincial government is administered by a Lieut.-Governor and a legislative assembly of 30 members, who are elected for 5 years, half by real property holders and the remainder by universal male and female suffrage. Women can also be elected to the assembly. State of parties (elected 11 Dec., 1947):—Liberals, 24; Progressive Conservatives, 6; total, 30.

Lieut.-Governor.—T. William L. Prowse (sworn 4 Oct., 1950).

The members of the executive council are as follows (March, 1951):—

Premier, President of the Executive Council and Minister of Public Works and Highways.—J. Walter Jones.

Minister of Education.—Frederic Alfred Large, K.C.

Minister of Health and Welfare.—Alexander W. Matheson, K.C.

Minister of Agriculture.—C. Cleveland Baker.

Provincial Secretary.—J. Wilfrid Arsenault.

Minister of Industry and Natural Resources.—Eugene Cullen.

Attorney and Advocate General and Provincial Treasurer.—Walter E. Darby, K.C.

Minister without Portfolio.—Joseph G. Campbell.

LOCAL GOVERNMENT.—An Act to Enable the Inhabitants of Certain Villages to Supply Themselves with Certain Services, passed in 1950, provides for the incorporation of villages. All cities and towns have been incorporated under Special Acts.

Area and Population.—The province, which is the smallest in the dominion, lies at the mouth of the Gulf of St. Lawrence, and is separated from the mainland of New Brunswick and Nova Scotia by Northumberland Strait. The area of the island is 2,184 square miles. The total population (census, 2 June, 1941) was 95,047; estimate, 1948, 93,000. Population of the principal cities (1941):—Charlottetown (capital), 14,460; Summerside, 4,978. Estimated population as at 1 June, 1949, 90,000.

Religion and Education.—The population of the province at the census of 1941 was divided among the different creeds as follows:—Roman Catholic, 42,743; United Church, 24,005; Presbyterian, 14,724; Anglican, 5,739; Baptist, 5,443; other, 2,393. There were (1947) 462 schools, 691 teachers, 18,051 pupils. This is exclusive of 2 Roman Catholic convent schools at Charlottetown and Summerside, with 665 pupils. There are two colleges, Prince of Wales College, head of the provincial school system, and St. Dunstan's University, a Roman Catholic institution, both in Charlottetown. Total expenditure on government education in the year ending 31 March, 1949, $865,459.

Finance.—Revenue and expenditure (in Canadian dollars) for 6 years:—

	1944-45	1945-46	1946-47	1947-48	1948-49	1949-50
Revenue .	2,639,763	2,991,514	3,953,778	5,231,700	5,688,162	6,453,445
Expenditure	2,988,248	3,291,883	3,813,154	4,875,710	4,979,207	6,199,882

Total sinking funds on 31 March, 1950, amounted to $1,844,716.

The total liabilities of the province amounted on 31 March, 1950, to $14,157,172.

Production and Industry.—The farm land occupied in 1945 was 1,260,800 acres. Field crops in 1948 covered about 487,000 acres, and were valued at $22,748,000. The land in natural forest covers 610 square miles, and in pasture 317,440 acres. For particulars of agricultural production and livestock, *see* under CANADA above.

Silver fox breeding is extensively carried on. Breeding foxes are exported. The chief market is with the United Kingdom and the United States. In 1944 the value of the pelts sold was $607,252.

The fisheries of the province in 1947 had a landed value of $1,880,089 and a market value of $2,897,284. Oysters abound in Richmond Bay, the home of the famous 'Malpeques,' where the beds, under scientific cultivation, extend to upwards of 20,000 acres. The Dominion Government has possession and control of the oyster areas surrounding the province.

In 1946 there were 246 industrial establishments, employing 1,755 persons; salaries and wages, $1,651,469; cost of materials, $7,582,046; gross value of products, $11,200,310.

Commerce and Communications.—The trade of Prince Edward Island is chiefly with the other provinces of Canada and Newfoundland, and this inter-provincial trade does not appear in the trade statistics. The gross value of the production of its various industries for the year 1946 is

estimated at $38,000,000. In 1947 the province had 286 miles of railway—part of the Canadian National Railway system. Three ferries operate between Prince Edward Island and the mainland. One, a railway and automobile ferry steamer of great power, connects the lines of the Canadian National Railway on Prince Edward Island with those on the mainland, making several trips daily throughout the year. The others, two automobile ferry steamers, operate during the summer season between the island and the province of Nova Scotia. Daily steamship communication with the mainland has been maintained, without interruption, since 1917. There is a four-times-a-day air schedule for passengers, mails and express, both ways, between the province and the mainland, connecting with the airways of the continent. In 1946 there were 12,928 miles of telephone wires and 8,296 telephones.

QUEBEC.

Quebec was formerly known as New France or Canada from 1535 to 1763; as the province of Quebec from 1763 to 1790; as Lower Canada from 1791 to 1846; as Canada East from 1846 to 1867, and when, by the union of the four original provinces, the Confederation of the Dominion of Canada was formed, it again became known as the province of Quebec.

The Quebec Act, passed by the British Parliament in 1774, guaranteed to the people of the newly conquered French territory in North America security in their religion and language, their customs and tenures, under their own civil laws.

Constitution and Government.—The provincial government is modelled on that of the Dominion organization and is in the hands of a Lieut.-Governor and a responsible ministry, assisted by a legislative council of 24 members, appointed for life by the Lieut.-Governor, and a legislative assembly of 92 members elected for 5 years. Members of both Houses receive $3,000 per session, plus $1,000 for travelling and office expenses. Women were enfranchised by the Women's Franchise Bill, April, 1940. Last election, 28 July, 1948:—Union Nationale, 82; Liberals, 8; Independent, 2.

Lieut.-Governor.—Hon. Gaspard Fauteux (appointed 30 Oct., 1950).

The members of the Ministry (appointed 30 Aug., 1944, and all re-elected 28 July, 1948) are as follows:—

Premier and Attorney-General.—Maurice L. Duplessis, K.C., M.L.A.
Provincial Treasurer.—Onésime Gagnon, K.C., M.L.A.
Minister of Lands and Forests and of Hydraulic Resources.—Lieut.-Col. John S. Bourque, M.L.A.
Minister of Health.—J. H. Albiny Paquette, M.D., M.L.A.
Minister of Social Welfare and Youth.—J.-Paul Sauvé, M.L.A.
Minister of Municipal Affairs.—Bona Dussault, M.L.A.
Minister of Colonization.—J. D. Bégin, M.L.A.
Minister of Roads.—Antonio Talbot, M.L.A.

Minister of Public Works.—Roméo Lorrain, M.L.A.
Minister of Mines.—C. D. French.
Minister of Game and Fisheries.—Camille E. Pouliot, M.D., M.L.A.
Minister of Labour.—J. Antonio Barrette, M.L.A.
Minister of Trade and Commerce.—Paul Beaulieu, C.A., M.L.A.
Minister of Agriculture.—Laurent Barré, M.L.A.
Provincial Secretary.—Omer Côté, M.L.A.
Solicitor General.—Antoine Rivard, M.L.A.
Ministers without Portfolio.—Antonio Elie, M.L.A.; Tancrède L'abbé, M.L.A.; Marc Trudel, M.D., M.L.A.; Patrice Tardif, M.L.A.; J. H. Delisle, M.L.A.

LOCAL GOVERNMENT.—The Lieutenant-Governor-in-Council may erect the territory of a village municipality into a town municipality, if it contains at least 2,000 souls; and the territory of a village or town municipality, if it contains at least 6,000 souls, into a city municipality. Any territory, in order to be erected into a village municipality, must contain at least 40 inhabited houses within a space of 60 superficial arpents and the taxable immovable property in such territory must have a value of at least $50,000. The county council is composed of the mayors in office of all the local municipalities in the county which are subject to the provisions of the Municipal Code, 1916.

Area and Population.—The area of Quebec (as amended by the Labrador Boundary Award) is 594,860 square miles (523,860 square miles land area and 71,000 square miles water). Of this extent, 351,780 square miles represent the Territory of Ungava, annexed in 1912 under the Quebec Boundaries Extension Act. The population (census, 1941) was 3,331,882. Estimated population in 1950, 3,976,000. Of the 1941 population 91,857 were British born and 3,107,939 Canadian born. The rural population in 1941 was 1,222,198 and the urban population 2,109,681. According to religious beliefs, in 1941, 2,894,621 were Roman Catholics, 162,006 Anglicans, 100,196 United Church, 65,683 Jews and 4,228 Protestants. Population of the principal cities, 1949 (estimated):—Montreal, 1,125,000; Quebec (capital), 180,000; Verdun, 84,000; Three Rivers, 49,000; Sherbrooke, 44,000; Hull, 38,000.

Vital statistics (1949), including rates per 1,000 of population:—Births, 114,294 (29·4); marriages, 33,226 (8·5); deaths, 32,304 (8·3).

Education (1947-48).—*Superior Education.*—The province has 4 universities: 2 Protestant universities, McGill (Montreal), founded in 1821, and Bishop's (Lennoxville), founded in 1845; and 2 Catholic universities: Laval (Quebec), founded in 1852, and Montreal University, opened in 1876 as a branch of Laval and erected independently in 1920. The 2 Protestant universities had 1,096 professors and 13,028 students; the 2 Catholic universities, 2,843 professors and 23,444 students. Besides university schools (included in university figures) there are 19 Catholic and 3 Protestant institutions for higher education, chiefly theological colleges, with 719 students of theology and 2,273 others.

Secondary Education.—Secondary education is given in 44 classical colleges for Catholics and in 3 colleges of modern secondary education, with 17,422 students. The classical [illegible] girls appear in the primary section at the exclusion of 2 colleges h[illegible] for the B.A. degree only; there are 799 students of this course in 14 colleges for girls. Both Catholic and Protestant high schools are completely included with primary education.

Primary Education.—The primary schools, according to religious denomination, are, 8,916 Catholic schools, with 24,805 teachers and 561,528 pupils; 461 Protestant schools, with 2,685 teachers and 66,319 pupils.

Training of teachers for primary schools is given in 85 Catholic normal schools (939 teachers; 5,978 students) and in 1 Protestant normal school (13 teachers; 104 students).

The expenditure on education amounted to over $86,000,000.

Finance.—The ordinary revenue and expenditure for 6 years :—

Years ended 31 March	Revenue	Ordinary expenditure	Years ended 31 March	Revenue	Ordinary expenditure
	$	$		$	$
1945	96,455,703	91,990,114	1948	167,792,992	123,425,104
1946	110,321,293	95,552,896	1949	194,469,247	160,704,215
1947	133,405,956	106,934,126	1950	207,249,228	175,495,665

The total funded debt at 31 March, 1949, was $430,684,526, and the net funded debt $351,443,413.

Production and Industry.—Water power is one of the most important natural resources of the province of Quebec. Its turbine installation represents about 53% of the aggregate of Canada. On 1 Jan., 1950, the turbine installation amounted to 6,130,097 horse-power. Several of the more important hydro-electric plants and transmission and distribution systems of the province were taken over, on 15 April, 1944, by the Quebec Hydro-Electric Commission.

In 1949, the total area under cultivation in the province was 6,370,000 acres and the value of the crops $183,810,000. The principal varieties cultivated were :—

Crops	Yield	Value in $1,000	Crops	Yield	Value in $1,000
Hay and clover	5,935,000 tons	94,545	Fodder corn	713,000 tons	5,276
Oats . .	26,639,000 bush.	24,508	Turnips, beets	3,453,000 cwt.	3,798
Potatoes . .	10,558,000 cwt.	26,078	Barley . .	3,885,000 bush.	3,491
Mixed grains .	5,568,000 bush.	5,457	Alfalfa . .	156,000 tons	2,723

The agricultural production also includes for 1949 :—Dairy products, $124,516,000; farm animals (including poultry), $184,343,000; fruit and vegetables, $19,674,000, and maple products, $1,040,000.

The value of the wool clip for 1949 was estimated at $440,000.

There are about 264,170 square miles of forests, made up as follows :—Private forests, 26,740 square miles; wood lots under location tickets, 1,000 square miles; forests leased, 78,933 square miles; township forest reserves, 2,789 square miles, and timber lands not leased, 151,858 square miles. Quebec leads the Canadian provinces in pulpwood production, having over half of the Canadian estimated total. In 1948, 3,783,633 tons of pulp and 3,240,000 tons of paper were produced; gross value of products of pulp and paper industry, $393,347,430.

The principal fish are cod, herring, mackerel, lobster and salmon.

The value of the mineral production was $163,962,245 in 1949 and $152,285,045 in 1948. Production of metallic minerals (gold, copper, zinc, silver, chrome, molybdenum and others), valued at $83,601,340 in 1949. Gold (1949) 964,058 oz., valued at $35,010,360 at standard rate.

The most important iron ore deposits are situated in the Labrador Trough; the centre of exploration activity is at Burnt Creek camp. A titanium ore deposit was discovered in 1946 on the shores of Lake Allard near Havre St. Pierre. Non-metallic minerals produced include :—Asbestos (100% of Canadian production), industrial lime, dolomite and brucite, quartz and pyrite. Among the building materials produced in 1949 were :—Cement, $13,935,091; sand and gravel, $7,403,455; building limestone, $2,936,156; clay products, $5,684,899, and granite, $2,778,000.

The number of fur farms in the province in 1948 was 1,058, with landed property and buildings valued at $2,892,171 and animals in captivity estimated at $1,315,503. Of all the wild animals, the fox has proved the most adaptable to breeding. The total value of fur production for the season 1948–49 (pelts taken by trappers and pelts sold from fur farms) was estimated at $2,388,065. The royalties collected on pelts taken in 1948–49 netted to the Government the sum of $103,989.

In 1948 there were 11,122 industrial establishments in the province; employees, 383,966; salaries and wages, $756,216,134; cost of materials, $1,954,111,943; gross value of production, $3,599,306,033. Among the leading industries are pulp and paper, non-ferrous metal smelting and refining, chemical products, cotton yarn and cloth, men's and women's clothing, railway rolling stock, shipbuilding, brass and copper products, electrical apparatus and supplies, butter and cheese, slaughtering and meat packing, cigars and cigarettes, machinery, boots and shoes.

Commerce and Communications.—Total imports for consumption in 1949 amounted to $808,523,911; total exports to $1,000,018,626.

Quebec had 4,953 miles of railway, including 189 miles of tramway, in 1949. There were 604,715 telephones and 2,567 post offices, as well as 791 telegraph offices in 1949. In 1948, there were 40,650 miles of roads in the province, of which 25,562 were surfaced.

Books of Reference.

STATISTICAL INFORMATION.—The Quebec Bureau of Statistics (Department of Trade and Commerce, Parliament Buildings, Quebec) was established in 1912. Its most important publication is the Quebec Statistical Year-Book (annual since 1914).

SASKATCHEWAN.

Constitution and Government.—The province receives its name from the Saskatchewan River (Saskatchewan is Indian expression for 'rapid river'), which flows across its southern part. It comprises the old territorial districts of Assiniboia East, Assiniboia West (part), Saskatchewan and the eastern portion of Athabaska. Saskatchewan was made a province by the Saskatchewan Act, passed by the Canadian parliament, which came into force on 1 September, 1905, before which it was part of the Northwest

Territories. The provincial government is vested in Lieut.-Governor and a legislative assembly, elected for 5 years. Women were given the franchise in 1916, and are also eligible for election to the Legislature. State of parties (election 24 June, 1948):—Co-operative Commonwealth Federation (Socialist Party), 31; Liberals, 20; Liberal-Progressive Conservative, 1.

Lieut.-Governor.—Hon. J. M. Uhrich (appointed 24 March, 1948).

Present members of the Ministry, formed on 4 Aug., 1948, are as follows:—

Premier, President of the Council and Minister of Co-operation and Co-operative Development.—Thomas C. Douglas, M.L.A.
Provincial Treasurer.—Clarence M. Fines, M.L.A.
Attorney-General.—J. W. Corman, K.C., M.L.A.
Minister of Agriculture.—I. C. Nollet, M.L.A.
Minister of Municipal Affairs.—L. F. McIntosh, M.L.A.
Minister of Social Welfare.—J. H. Sturdy, M.L.A.
Minister of Natural Resources and Industrial Development.—J. H. Brockelbank, M.L.A.
Minister of Highways.—John T. Douglas, M.L.A.
Minister of Education.—Woodrow S. Lloyd, M.L.A.
Minister of Labour and Provincial Secretary.—Chas. C. Williams, M.L.A.
Minister of Public Works and Telephones.—J. A. Darling, M.L.A.
Minister of Public Health.—T. J. Bentley (appointed 14 Nov., 1949).

Agent General in London.—Graham Spry (28 Chester St., S.W.1).

Local Government.—The [illegible] a City requires a minimum population of 5,000 persons; [illegible], 500; that of a Village, 100 persons and an area not to exceed 240 acres. No requirements as to population exist for the Rural Municipality and the Local Improvement District, either of which usually has an area of 324 square miles. Cities, Towns, Villages and Rural Municipalities are governed by elected councils which consist of a mayor and 6–20 aldermen in a City, a mayor and 6 councillors in a Town, an overseer and 2 other members in a Village, a reeve and a councillor for each division (usually 6) in a Rural Municipality.

Area and Population.—The province stretches along the Canada–United States boundary for 393 miles east of the 110th meridian, and extends north for 761 miles. Its northern width is 227 miles. The area of the province is 251,700 square miles (237,975 square miles land area and 13,725 square miles water). The population (estimate, 1950) was 874,000 (census 1941, 895,992). Population of principal cities (1946):—Regina, 60,246 (capital); Saskatoon, 46,028; Moose Jaw, 23,069; Prince Albert, 14,532; Weyburn, 7,003; Swift Current, 6,379; North Battleford, 5,717; Yorkton, 5,714.

Education.—The province has one university—the University of Saskatchewan at Saskatoon, established 3 April, 1907. In 1950–51 it had 146 instructors and 2,417 students. The right to legislate on matters relating to education is left to the province. In 1949 there were operating under the School Act 5,207 school districts and 14 operating under the Secondary Education Act, with an enrolment of 138,882 pupils of elementary school grade and 33,856 pupils of high-school grade. Of the public school districts, 25 are Roman Catholic Separate and 10 are Protestant Separate. For the training of teachers there are 2 normal schools, at Saskatoon and Moose Jaw.

Finance.—Revenue and expenditure for 6 years (ending 30 April):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	$	$		$	$
1944–45	34,116,570	31,900,544	1947–48 [1]	53,251,281	51,772,523
1945–46	39,275,647	38,784,814	1948–49	55,622,965	54,608,746
1946–47	39,527,696	39,406,666	1949–50	52,303,302	52,059,105

[1] The end of the fiscal year was changed to 31 March in 1946.

Net public debt, 31 Dec., 1949, was $147,913,814.

Production and Industry.—Wheat production in 1950 was 263,000,000 bushels from 16,203,000 acres; oats, 116,000,000 bushels from 3,381,000 acres; barley, 47,000,000 bushels from 1,954,000 acres, and flax, 1,200,000 bushels from 177,000 acres. Cash income from the sale of farm products in 1949 was $570,560,000.

A large irrigation project is designed ultimately to provide for an area of 500,000 acres with a storage capacity of 4 million acre feet.

Mineral production was valued at $34,987,119 in 1949. Production included 80,938 lb. of cadmium, 62,148,713 lb. of copper, 87,923 oz. of gold, 127,482 lb. of selenium and tellurium, 1,323,900 oz. of silver, 60,943,757 lb. of zinc, 1,595,870 tons of coal, 451,973 m.c.f. of natural gas, 156,765 tons of sodium sulphate, 815,294 barrels of petroleum. Total value of clay products and building materials, $458,230.

The total value of the catch of the commercial fisheries during 1948–49 was $512,638 (8,075,619 lb.). Furs to the value of $2,243,867 and forest products valued at $5,251,098 were produced in 1948–49.

In 1947 Saskatchewan had 1,001 industrial establishments, employing 11,723 persons; gross value of products, $196,452,000; wages paid, $19,662,000.

Communications.—There were, in 1950, 7,100 miles of steam railway in operation in the province. There are 8,308 miles of provincial highways In 1949 there were 114,301 telephones; wire mileage, 53,503 miles.

There were 1,400 post offices operating during 1950. Eight radio broadcasting stations were in operation during 1950.

THE NORTHWEST TERRITORIES.

Constitution and Government.—The Northwest Territories comprise the mainland portion of Canada, lying north of the 60th parallel of latitude between Hudson Bay on the east and Yukon Territory on the west, together with the islands lying between the mainland of Canada and the North Pole, including those in Hudson Bay, James Bay and Hudson Strait. This region includes the areas formerly known as Rupert's Land and the Northwestern Territory, except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta, and the Yukon Territory.

For administrative purposes the Territories were divided into three districts, namely, Mackenzie (527,490 square miles), Keewatin (228,160 square miles) and Franklin (549,253 square miles), by Order in Council of 16 March, 1918.

The Northwest Territories Act, 1905, as amended, provides for the government of the Territories by a Commissioner (who is Deputy Minister of the Department of Resources and Development) under instructions from time to time given by the Governor in Council or the Minister of Resources and Development. A council of 6 (one of whom is Deputy Commissioner) aids the Commissioner in the administration of the Territories.

The Commissioner in Council has power to make ordinances for the government of the Territories relating to subjects designated by the Governor in Council as provided by the Northwest Territories Act (Chapter 142, R.S.C. 1927), subject to any act of the Parliament of Canada applying to the Territories, respecting such matters as direct taxation within the Territories in order to raise revenue, establishment and tenure of territorial offices, maintenance of municipal institutions, administration of justice, licences, education, public health, property and civil rights, and generally all matters of local nature.

Commissioner.—Maj.-Gen. H. A. Young, C.B., C.B.E., D.S.O.
Deputy Commissioner.—F. J. G. Cunningham.
Members of the Council.—S. T. Wood, J. G. McNiven, L. de la C. Audette, H. B. Godwin, D. M. MacKay.
Secretary.—J. G. Wright.

The administration is carried on by the Northern Administration and Lands Branch of the Department of Resources and Development. The seat of government is at Ottawa. District administrators reside at Fort Smith and Aklavik, and the main office for mining business is at Yellowknife.

Area and Population.—The area of the Territories is 1,304,903 square miles. The population at the census of 1941 was 12,028, including 2,284 whites, 4,334 Indians and 5,404 Eskimos. Estimated total population in 1950 was 15,786.

Education.—Schools are operated by the Northwest Territories Administration (11), by the Indian Affairs Branch of the Department of Citizenship and Immigration (8), and, with financial assistance from the federal government, by missions of the Church of England, the Roman Catholic Church and the Northern Canada Evangelical Mission. The only organized school district is at Yellowknife.

Public Welfare.—Medical care of Indians and Eskimos is the responsibility of the Department of National Health and Welfare. During 1950 there were 8 mission hospitals, 2 company hospitals, 1 community hospital and 8 health centres in operation. Medical teams conducting examinations, X-ray surveys and preventive inoculations reached each settlement.

The Royal Canadian Mounted Police are designated as District Registrars of Vital Statistics and Family Allowances for the Eskimo people.

Production and Industry.—Mining, fishing and fur trading are the principal industries. Mineral production, exclusive of pitchblende, for the year 1949 was valued at $6,801,729, of which gold accounted for $6,389,748. Yellowknife continues to be the centre of goldmining activity. The new hydro-electric power development on the Snare River, a federal government project 94 miles north-west of Yellowknife, which was opened in 1948, assists in the development of the mining industry.

Communications.—The Mackenzie District and Western Arctic are served by water and air transportation; truck and tractor roads exist near most settlements. The new all-weather Mackenzie Highway from Grimshaw, Alberta, to Hay River Settlement on Great Slave Lake was opened in 1948. Commercial passenger services were established by bus over the highway and by boat between Hay River and Yellowknife. Regular mail, passenger and express services are maintained by air throughout the year to many points in the Mackenzie District. Radio communication between important settlements and trading posts in the Territories and outside points is maintained through government and private radio stations.

Fur produced during the year ended 30 June, 1949, was valued at $1,535,461 from 922,136 pelts. Fur bearers include muskrat, beaver, mink, lynx and red and white fox. A commercial fishery operates on Great Slave Lake caught 3,722,783 lb. in winter 1949–50 and 3,[illegible] lb. in summer 1950. The principal catch are whitefish and lake trout.

The herding of reindeer as a native industry is being fostered; it is centred at the Reindeer Station, near Aklavik.

Crude oil is produced at Norman Wells on the Mackenzie River.

YUKON TERRITORY.

Constitution and Government.—The Yukon Territory was constituted a separate political unit in June, 1898. It is governed by a Commissioner (appointed) and a territorial council of 3 elected members who have a 3-year term of office. The seat of government is at Dawson.

The Northern Administration and Lands Branch of the Department of Resources and Development, at Ottawa, is responsible for business arising from the general administration of the Territory under the Yukon Act and Ordinances passed by the Territorial Council, the disposal of lands under the Territorial Lands Act, the administration of the Yukon Placer and Quartz Mining Acts and the collection of revenue.

Commissioner.—A. H. Gibson, K.C.
Territorial Treasurer.—W. A. Wardrop.
Members of Council (1949–52).—C. J. Lelievre, E. J. Corp, R. G. Lee.

Area and Population.—The area of the territory is 207,076 square miles (205,346 square miles land area and 1,730 square miles water area).

The population in 1941 was 4,914; it reached its peak in 1901 with 27,219. The estimated population in 1949 was 8,641 (7,141 whites, 1,447 Indians, 53 Eskimos). The estimated population of the principal cities (1948):—Dawson (capital), 783; Whitehorse, 3,845; Mayo, 288.

Vital statistics (1949):—Births, 268; marriages, 65; deaths, 73.

Education.—The territory had (1949) 10 public schools with 23 teachers and 652 pupils. The amount spent on education was $137,664.

Finance.—The territorial revenue and expenditure (in dollars) for 6 years (ending 31 March) was:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1945	299,016	296,682	1948	695,660	585,148
1946	412,985	417,341	1949	636,982	785,656
1947	615,405	618,595	1950	886,934	886,934

Production and Industry.—Mining is the principal occupation of the people. Silver, lead, gold are the chief minerals. The output of gold in 1949 was 81,970 fine oz.; silver, 1,562,730 fine oz.; lead, 5,356,405 lb. Total mineral production to the end of 1949 was valued at $254,218,235.

The principal forest trees are white and black spruce, balsam, poplar, cottonwood and birch, but lumbering is not a major industry.

The country abounds with big game, such as moose, caribou, mountain sheep, bears and fur animals. The fur yield for the year ended 30 June, 1949, was [illegible] pelts, valued at $143,810.

Communications.—There are 58 miles of railway. The Yukon River, 1,979 miles long, of which 1,777 are navigable (570 within Yukon Territory), is the great channel of communication from the end of the railway at Whitehorse to the interior. There were (1950) 2,383 miles of motor roads, secondary roads, winter roads and trails, in addition to the Alaska Highway which enters Yukon Territory at Mile 620 and crosses the international boundary into Alaska at Mile 1,221. There were 15 post offices in 1949; revenue, $59,319.

Commercial airlines provide passenger and express services daily except Sunday between Vancouver and Whitehorse, and Edmonton and Whitehorse. These services, which extend to Fairbanks, Alaska, connect with transcontinental airlines at Edmonton and Vancouver. A service is also maintained twice weekly from Whitehorse to Mayo and Dawson.

Agriculture and Forestry of Yukon Territory.

BERMUDA.

BERMUDA is a colony, with semi-representative government, consisting of a group of 360 small islands (about 20 inhabited), 580 miles east of North Carolina and 677 miles from New York, noted for its climate and scenery; a favourite winter resort for Americans, and now an important British and American naval and air base. The civil population (*i.e.* excluding British and American military, naval and air force personnel) at December, 1949, was estimated at 36,771.

The Spaniards visited the islands in 1515, but they had previously been discovered (the exact date is unknown) by Juan de Bermudez, after whom they were named. No settlement was made, and they were uninhabited until a party of colonists under Sir George Somers was wrecked there in 1609. A company was formed for the 'Plantation of the Somers' Islands,' as they were called at first, and in 1684 the Crown took over the Government.

Area, approximately 22 square miles (575 acres under cultivation). In 1949 the birth rate was 25·2 per 1,000 (20·2 white, 28·1 coloured) and the death rate 10·2 per 1,000 (10·2 white, 9·4 coloured); there were 305 marriages. Chief town, Hamilton; population, about 3,500. Bermuda is an important naval base on the America and West Indies station, with dockyard, victualling establishment, etc. In 1940 sites on the island were leased to the United States as air and naval bases. In January, 1941, Tucker and Morgan Islands, situated in the Great Sound, were leased to the United States for 99 years for use as a flying-boat base.

Governor.—Lt.-Gen. Sir Alexander Hood, G.B.E., K.C.B., assumed office 24 Oct., 1949 (£4,250 salary, £1,500 entertainment, £3,400 grant towards expenses of Government House).

Colonial Secretary.—Oswald Raynor Arthur (appointed April, 1951); *ex-officio* member of the Executive Council and Legislative Council.

The Governor is assisted by an Executive Council of 7 members (4 official) appointed by the Crown, a Legislative Council of 9 members (3 official), also appointed by the Crown, and an elected House of Assembly of 36 members; 4,211 electors. Women received the vote in 1944.

Police force, 1949, 111.

Education is compulsory between the ages of 7 and 13, and government assistance is given by the payment of grants, and, where necessary, of school fees. Free elementary education was introduced on 1 May, 1949. In 1949, 27 aided schools, with 5,701 pupils, received grants. Total amount spent on education in 1949 was £[illegible]. There is also 1 garrison school and 1 naval school, and 16 private schools receiving no government grant.

There were, in 1949, 15 cinemas with a seating capacity of 4,350.

Finance.—Revenue and expenditure (in £ sterling) for 6 years:—

	1944	1945	1946	1947	1948	1949
Revenue .	801,571	815,657	1,066,101	1,455,440	1,531,970	1,885,548 [5]
Expenditure.	847,885	836,129 [1]	1,121,704 [2]	1,362,511 [3]	1,531,762 [4]	1,706,587 [6]

[1] Includes £15,000 transferred to School Buildings Reserve Fund.

[2] Includes £115,000 for purchase of Bermuda Railway and £37,406 for contribution towards construction of road for causeway to naval base.

[3] Includes £100,000 transferred to School Buildings Reserve Fund, £75,000 to Public Works Fund, £40,000 towards the construction of Grays, Watford and Little Watford Bridges, and £13,000 operating loss on Bermuda Railway during 1946.

[4] Includes £19,712 for demolition of Railway, £25,000 transferred to School Buildings Reserve Fund and £50,000 transferred to Public Works Reserve Fund.

[5] Includes £86,000 on account of sale [illegible] Guiana.

[6] Includes £50,000 transferred to [illegible] Reserve Fund and £62,000 to School Buildings Reserve Fund.

Chief sources of revenue in 1949:—Customs, £1,132,380; postal, £85,000; public transportation, £60,000; note security fund, £12,818.

Public debt in 1949, £275,000, which includes £200,000 lent free of interest to H.M. Government.

The chief products are bananas, potatoes, lily-bulbs and various kitchen garden vegetables.

Legislation providing for trade unions was enacted in Oct., 1946, and 2 trade unions were registered in 1947 (Union of Teachers, 121 members; Industrial Union, 1,222 members, in 1949).

Commerce.—Imports and exports (in £ sterling) for 6 years:—

	1944	1945	1946	1947	1948	1949
Imports [1] .	2,465,678	2,444,472	3,612,127	6,004,840	7,121,039	7,182,178
Exports .	108,287	142,920	261,445	780,467	955,405	943,212

[1] Excluding government stores from imports.

Imports in 1949 (excluding government stores) from United Kingdom, £1,937,587; Canada, £[illegible],303. British West Indies, £134,357; United States of America, £3,174,149; other countries, £1,048,781. Imports to U.K. (Board of Trade figures) in 1950, £35,303; 1949, £33,566; 1948, £42,200. Exports from U.K., 1950, £2,211,432; 1949, £1,854,053; 1948, £1,537,792. Re-exports, 1950, £81,944; 1949, £38,560; 1948, £42,792.

Food supplies are mostly imported from the United States and Canada. The principal imports in 1949 were:—Food, £1,908,498; clothing, £1,150,605; alcoholic beverages, £316,934; agricultural supplies, £158,193; fuel, £617,658; building material, £632,353; drugs, etc., £150,459; cigars, cigarettes and tobacco, £85,297.

The registered shipping consisted (1949) of 5 steam vessels of 321 tons net, 21 sailing vessels of 2,363 tons net and 26 motor vessels of 662 tons net; total net tonnage, 3,346. In 1949 the total tonnage of vessels entered and cleared was 3,253,482 tons, of which 2,441,361 were British.

Communications.—British Overseas Airways maintains a twice-weekly service between Bermuda and London. Pan American Airways and Colonial Airlines each maintain a daily service between Bermuda and New York, and once weekly Colonial Airlines operate between Washington and Bermuda. Trans-Canada Airlines maintain weekly flights between Toronto and Bermuda, and Montrea and Bermuda. Aircraft entered and cleared in 1949, 2,450.

During April, 1948, the railway service was discontinued and a government-operated bus service introduced. There is a private telephone company, with over 26,500 miles of wire, serving 3,270 subscribers. Cables connect the islands with Halifax, Nova Scotia, and through Turks Island with Jamaica and Barbados. There were (1949) 14 post offices. Post office revenue was £126,227, and expenditure, £62,316.

Between 1908 and August, 1946, the use of motor vehicles, with the exception of ambulances, fire engines and other essential services, was prohibited. With the passing of the Motor Car Act in 1946, the use of motor vehicles, subject to certain limitations on size and horse-power, became lawful. At the end of 1949, 1,501 private cars, 439 taxis, 566 commercial vehicles, 3,363 auto-cycles, 39 buses and 88 miscellaneous vehicles were registered in addition to 14,234 bicycles.

Money.—There are 2 banks, the Bank of Bermuda, Ltd., and the bank of N. T. Butterfield and Son, Ltd. Savings bank deposits on 31 December, 1949, were £270,287 to the credit of 9,374 depositors

The currency, weights and measures are British. There were £5, £1,

10*s.* and 5*s.* Bermuda government notes to the value of £884,096 in circulation on 31 December, 1949.

FALKLAND ISLANDS AND DEPENDENCIES.

Crown colony situated in South Atlantic, 300 miles E. of Magellan Straits. East Falkland, 2,580 sq. miles; West Falkland, 2,038 sq. miles, including in each case the adjacent small islands; total, 4,618 sq. miles; besides South Georgia, 1,600 sq. miles. Among other dependencies are the South Shetlands (1,800 sq. miles), the South Orkneys (240 sq. miles), South Sandwich (130 sq. miles) and Graham Land. The dependencies include all islands and territories between 20° and 50° W. long., south of 50° S. lat., and between 50° and 80° W. long., south of 58° S. lat. Population:—Falkland Islands, estimated 1948, 2,268 (1,239 males and 1,029 females), exclusive of the Whaling Settlement in South Georgia (estimated population in 1946, 360, including 7 females). Chief town, Stanley (1946), 1,252 inhabitants.

Governor.—Sir Geoffrey Miles Clifford, K.B.E., C.M.G., E.D. (appointed 20 Sept., 1946; salary, £1,750 and £550 duty allowance per annum).
Colonial Secretary.—Michael Robert Raymer (appointed 30 April, 1949).

The Government is administered by the Governor, assisted by an executive council and a legislative council. As from 1949, the latter consists of 12 members, namely, 3 *ex officio* members (Colonial Secretary, senior medical officer, agricultural officer); 3 official and 2 non-official members nominated by the Governor, and 4 representatives elected by the people.

Education is compulsory. In 1950 there were 1 government school in Stanley, with 220 pupils on the roll; in the country districts, 8 schools were maintained or assisted by the government and their 119 pupils were taught in their homes for periods of a few weeks every few months by travelling teachers; there were 7 travelling and 8 resident settlement teachers.

Exports . .	8,844	811,556	1,287,882	2,214,588	4,221,587	3,551,782

Chief sources of revenue (1949):—Customs, £96,012; internal revenue, £49,519; sale of stamps, £25,985; telegrams, etc., £6,554. On 31 Dec., 1949, the assets exceeded the liabilities by £259,260. There is no public debt.

Leading exports, 1949:—Wool, £384,820; whale oil, £2,993,754 (£697,460 produced on the high seas and re-exported from South Georgia). Chief imports, 1949:—Groceries, £173,181; fuel, £765,176; drapery and bagging, £24,026; hardware and machinery, £411,920. Exports to United Kingdom were £2,498,744 in 1948; £2,416,193 in 1949; £1,746,559 in 1950. Imports from United Kingdom, £498,327 in 1948; £675,688 in 1949; £526,143 in 1950 (Board of Trade returns).

Vessels entered in 1949, 106; tonnage, 182,599 (British tonnage, 144,754).

Chief industry, sheep-farming; about 2,875,520 acres pasturage. Sheep 603,751 in 1948–49. The whaling industry is carried on successfully, 169,203 barrels of whale oil being exported in 1949 (58,814 produced on the high seas and re-exported from South Georgia). Sealing operations in 1949 yielded 13,358 barrels of oil. Value of whale-fishing exports to United Kingdom, 1950, £10,220,906; 1949, £11,705,235; 1948, £11,917,734.

On 31 Dec., 1949, the Savings Bank held a balance of £609,319 belonging to 1,842 depositors. There are no banking facilities except those offered by this bank.

There is normally a month to 6 weeks' mail service provided by a local steamer between Stanley and Montevideo. Interinsular mail service is carried on by a steamboat. There is a telephone exchange at Stanley, and a telephone line from Stanley to Darwin, and other settlements. There is wireless communication with the United Kingdom, Punta Arenas, Montevideo, Buenos Aires and South Georgia.

Money, Weights and Measures.—These are the same as in Great Britain.

BRITISH GUIANA.

Governor.—Sir Charles Campbell Woolley, K.C.M.G., O.B.E., M.C. (salary £4,500 and £1,500 allowances).

Colonial Secretary.—John Gutch, O.B.E. (appointed 24 June, 1950; salary £2,000).

This territory, including the counties of Demerara, Essequibo and Berbice, named from the three rivers, was first partially settled by the Dutch West India Company about 1620. The Dutch retained their hold until 1796, when it was captured by the English, and was finally ceded to Great Britain in 1814. The colony is situated on the north-east coast of South America on the Atlantic Ocean, with Surinam on the east, Venezuela on the west and Brazil on the south and west. Capital, Georgetown.

Constitution and Government.—The British Guiana (constitution) Orders in Council, 1928 to 1949, provide for the Government of the colony

and for the constitution of a legislative council. The present constitution came into operation on 18 July, 1928. The legislative council consists of the Governor as President, and since May, 1943, the Colonial Secretary, the Attorney-General and the Treasurer (now Financial Secretary and Treasurer) as official members, 7 nominated unofficial members and 14 elected members. Executive and administrative functions are exercised by the Governor and executive council.

The law, both civil and criminal, is based on the common and statute law of England, save that, with certain exceptions, the English law of personal property applies to both movable and immovable property, and the principles of the Roman-Dutch law have been retained in respect of the registration, conveyance and mortgaging of land. There is absolute equality of males and females before the law as regards divorce, property, succession and all other matters. Appeals lie to the Full Court of the Supreme Court and to the West Indian Court of Appeal, and from these courts to the Judicial Committee of the Privy Council.

In Nov., 1940, a site on the bank of the Demarara River, about 25 miles from the sea, was leased to the United States as a military base. A naval base at Makouria, about 40 miles up the Essequibo River, was also established by the United States Government. These bases are not now being used by the U.S. Government. Atkinson Field, on the Demarara River, is now being operated by the British Guiana Government as a civil airport.

Area, Population, etc.—Area, 83,000 square miles. Estimated population, 1949, 414,887. Births (1949), 17,137 (41·3 per 1,000); deaths 5,506 (13·2 per 1,000). Greater Georgetown had, in 1949, a population of 107,264. Total East Indians (1949), 184,773. 195 schools (and 71 in remote and sparsely populated districts) received government grant (£342,523) in 1949; 71,249 pupils; average daily attendance, 56,497; teachers, 1,688. Secondary education is provided for both boys and girls.

Finance.—Revenue and expenditure (in £ sterling) for 5 years :—

	1946 [1]	1947 [1]	1948 [1]	1949 [1]	1950 [2]
Revenue .	2,845,246	3,691,380	4,289,761 [3]	4,591,509	4,350,360
Expenditure .	2,938,928	3,619,486	4,085,593	4,364,701	4,288,519

[1] These figures are exclusive of special receipts from the Colonial Development Fund and the related expenditure.
[2] Estimates.
[3] Includes contribution by H.M. Government towards subsidization cost for 1947, £166,667.

Chief items of revenue (1949):—Customs, £1,717,873; excise and licences, £585,151; income tax, £1,055,974. Expenditure on general administration, £250,490; treasury, £28,828; customs, £38,668; lands and mines, £38,111; agriculture and forests, £172,579; judicial and legal, £72,449; police, £299.235; prisons, £42,199; charity, £148,653; medical, £490,092; education, £446,989; post and telegraphs, £219,458; pensions and gratuities, £156,267; subventions and miscellaneous, £280,620; public debt charges, £250,867; transport services, £358,594; public works, £709,145; colonial emergency measures, £233,227; surplus at 31 Dec., 1949, £1,616,801; public debt (funded), 31 Dec., 1949, £4,939,397.

Production.—British Guiana can be divided roughly into 3 regions :—(1) A low coastal region varying in width up to about 30 miles and con-

stituting the agricultural area; (2) an intermediate area about 100 miles wide, of slightly higher, undulating land containing the chief mineral and forest resources of the country, and (3) a hinterland of several mountain ranges and extensive savannahs.

Under cultivation (1949), 69,986 acres in sugar canes (sugar output, 174,236 long tons); 86,377 acres under rice (output, 103,311 tons of paddy, equal to 61,988 tons of milled rice); coconuts, 33,333 acres; under cultivation (1948), coffee, 2,877 acres; cacao, 375 acres; rubber, 787 acres; ground provisions, 20,400 acres; citrus and other fruit, 5,367 acres. Livestock (1948) estimated at:—Cattle, 186,262; horses, 2,518; sheep, 44,200; goats, 14,600; swine, 28,200; buffaloes, 101. British Guiana is rich in gold. Mining commenced in 1884, and from 1884 to 31 Dec., 1949, the output of gold was 3,211,846 oz., valued at £13,046,072; in the year 1949, 21,098 oz. were produced. In the period 1901 to 1949 the diamonds won amounted to 2,418,411 carats, valued at £9,521,440; in 1949, 34,375 carats were exported. Deposits of manganese-ore and mica have been found, and oil is also believed to exist. There are huge deposits of bauxite (the ore of aluminium), 1,757,650 long tons being exported during 1949, and 1,873,166 in 1948. Of the 1949 exports, 1,591,561 long tons went to Canada, 126,255 to the United States, 29,124 to the United Kingdom and 10,710 tons to other countries.

64,000 square miles of forests and 12,500 square miles of undeveloped land are still available for exploration and exploitation.

There are two wet seasons, one from the middle of April to the middle of August, the other from the middle of November to the end of January.

Commerce.—Imports and exports (in £ sterling) for 5 years:—

	1946	1947	1948	1949	1950 [2]
Imports .	5,597,454	8,652,266	10,037,708	10,609,950	11,470,332
Exports [1] .	5,633,715	7,255,397	7,707,054	9,636,784	10,466,053
Transit . .	146,331	163,235	101,980	50,048	—

[1] Including bullion and specie. [2] Preliminary.

Chief imports (1949):—Machinery, £1,569,407; cotton manufactures, £617,815; metal manufactures, £679,974; oils (other than edible), £541,564; flour, £676,373; manures, £333,102; tobacco, £91,474; fresh vegetables, £209,508; artificial silk manufactures, £413,273; boots and shoes, £250,721; paper manufactures, £133,756; fish (dried), £154,159; pickled meats, £123,503; motor vehicles, £216,491; medicines and drugs, £124,321; milk (condensed), £94,851; butter, £129,766; beer and ale, £109,067. Chief domestic exports (1949):—Sugar (raw) (173,818 tons), £4,386,367; rum (3,683,308 proof gallons), £991,414; rice (26,105 tons), £645,369; timber (596,297 cu. ft.), £213,227; charcoal (3,758 tons), £29,380; firewood (8,867 tons), £11,490; matches (28,040 gross boxes), £6,116; gold (16,331 oz.), £129,630; [illegible] £2,947,747; bauxite (1,757,650 tons), £2,501,949; ba[illegible] molasses 4,101,889 gallons), £90,590.

Imports (exclusive of transhipments) from United Kingdom (1950), £5,381,906; from Canada, £1,526,175; from United States, £1,430,406. Exports (exclusive of transhipments) to United Kingdom, £3,047,052; to Canada, £5,619,795; to United States, £533,133.

Exports to United Kingdom in 1950, £3,787,476; 1949, £4,575,701; 1948, £4,317,011. Imports from United Kingdom in 1950, £4,957,790; 1949, £4,505,532; 1948, £3,505,175.

Shipping.—In 1949, 3,019 vessels, with a total tonnage of 4,211,258. entered and cleared, mainly British, American, Dutch and Norwegian. The registered vessels in 1949 were 8 steamers of 902 net tons, 14 sailing vessels of 743 tons and 18 motor vessels of 1,495 tons.

Communications.—There are 305 miles of river navigation; 14 miles of canals; 317 miles of driving or motor road, 239 miles of forest road from Bartica at the junction of the Essequibo and Mazaruni Rivers to the Potaro Gold Mining District [illegible] inches to the Upper Potaro River at Kangaruma on the rout[illegible] to Issano on the Mazaruni River above the long range of falls and rapids and to the lower Potaro River at a point beneath the large fall of Tumatumari) and 268 miles of trails (including a government cattle trail of 182 miles, from Takama on the Berbice River to Annai on the Rupununi Savannah).

There are 91 miles of government-owned and operated railroads, including 12 miles of sidings. These extend from Georgetown to Rosignol along the East Coast, and from Vreed-en-Hoop to Parika along the West Coast of the colony. There are also 45½ miles of railroad owned and operated by the Demarara Baux. Co. in connection with their mining operations in the Demerara River, and 18 miles from Wismar on the Demerara River to Rockstone on the Essequibo River.

Air Services.—The following services of commercial airlines are in operation in British Guiana:—Pan American Airways Inc., to and from North, Central and South America thrice weekly; British West Indian Airways, Ltd., to and from Trinidad three times a week, and too and from Barbados once weekly; British Guiana Airways, Ltd., to and from Trinidad, St. Vincent, Barbados, Dominica, St. Lucia and Grenada, weekly; K.L.M., to and from Curaçao and Paramaribo once weekly. An air service within, and charter service outside, the colony is operated by British Guiana Airways, Ltd.

Post.—On 31 Dec., 1950, there were 125 post offices and agencies (including travelling post offices and agencies), of which 48 are telegraph offices and 6 radio stations.

Telecommunications.—The inland public telephone, telegraph and radio services are maintained and operated by Post Office Telecommunications. Landline telephone and telegraph services are operated along the coastlands. There are main telephone exchanges in Georgetown and New Amsterdam with 11 country sub-exchanges and 90 private branch exchanges carrying from 3 to 80 lines each. There are 5,001 conductor miles of telephone lines (which includes 1,701 miles contained in 16¾ miles of aerial cable), 120 miles of railway telephone lines and 415 miles of telegraph lines. The number of telephone instruments in use at 31 Dec., 1950, was 3,337. There are 66 radio telephone stations in the interior. Cable and Wireless, Ltd., operate and maintain cable and radio communications, including radio-telephone [illegible] vice with ships and radio-telephone services with Brit[illegible] amaribo, Canada, the United Kingdom, Europe and U.S.A.

Broadcasting.—The British Guiana United Broadcasting Co., Ltd. operates station ZFY on 5,981 and 1,230 Kcs., on a commercial basis.

Money.—Accounts are kept in dollars and cents ($1 = 4*s.* 2*d.*). In circulation are British silver and bronze coins, with some silver 'bits'—fourpenny pieces—local coins. Notes are issued by Barclays Bank (D., C. & O.) and the Royal Bank of Canada in denominations of $5, $20

and $100, and there are government currency notes of $1, $2, $5, $10, $20 and $100. The face value of the latter in circulation at 31 Dec., 1950, was £1,964,792.

BRITISH HONDURAS.

BRITISH HONDURAS is a Crown colony on the Caribbean Sea, south of Yucatan, and 600 miles west from Jamaica. Its early settlement was probably effected by woodcutters from Jamaica about 1638, and from that date to 1798, in spite of opposition from the Spaniards, settlers held their own and prospered. In 1786 the Home Government appointed a superintendent, and in 1862 the settlement was declared a colony, subordinate to Jamaica. It became an independent colony in 1884.

Governor and Commander-in-Chief.—Sir Ronald H. Garvey, K.C.M.G. (appointed, 1948; salary $9,600, duty allowance $2,400), assisted by an executive council of 7 members and a legislative council consisting of 3 official and 10 unofficial members (4 nominated and 6 elected).

Colonial Secretary.—Evelyn Dennison Hone, O.B.E. (9 June, 1948).

Area and Population.—Area, 8,867 square miles. The climate is tropical, with an average rainfall for the past 4 years of 81·96 in. The wet season lasts from the middle of May to the middle of February.

Population, census 1946, 59,220 (28,722 males and 30,498 females). Estimated population at 31 Dec., 1950:—66,892 persons (32,719 males and 34,173 females). The birth rate per 1,000 was 39·7 and the death rate 12·6; there were 480 marriages and 3 divorces.

The police force contained (1950) 3 officers, 190 non-commissioned officers and men, which includes immigration police. Chief town, Belize; population, census 1946, 21,886 (9,673 males and 12,213 females).

Education.—Government and aided primary schools (1950), 90; children enrolled, 11,298; average attendance, 9,227; [illegible] grant, $263,655. There are 5 unaided secondary schools, with a [illegible] pupils. All schools, both primary and secondary, except for 5 unaided primary schools and 3 government schools, are under denominational management.

The total school roll, including unaided schools, is estimated at 12,734, and attendance at 11,666.

Finance.—Revenue and expenditure (in dollars) for 5 years :—

	1946 [1]	1947	1948 [2]	1949 [3]	1950 [4]
Revenue .	2,637,501	2,941,158	3,208,623	3,711,232	4,763,345
Expenditure .	2,552,357	2,909,985	3,394,916	3,847,374	4,694,172

[1] Includes $80,600 grant-in-aid of the administration.
[2] [illegible] of the administration.
[3] [illegible] of the administration.
[4] [illegible] grant-in-aid of the administration.

Debt, 31 Dec., 1949, $1,160,503.

Commerce.—In 1950, total imports amounted to $8,787,510 (U.S.A., $3,040,856; U.K., $2,779,914; Canada, $713,365); total exports, $4,779,802 (U.K., $1,330,565; U.S.A., $884,859; Canada, $872,281).

Imports to U.K. (Board of Trade figures), £549,227 in 1950; £474,672 in 1949; £324,805 in 1948. Exports from U.K., £713,092 in 1950; £488,696 in 1949; £271,714 in 1948. Re-exports from U.K., £15,018 in 1950; £13,111 in 1949; £3,330 in 1948.

The principal domestic exports were, in 1950 :—Mahogany logs, 319,008 cu. ft. ($619,367); mahogany lumber, 382,809 cu. ft. ($1,000,087); pine lumber, 102,218 cu. ft. ($1,061,887); bananas, 28,083 bunches ($21,607); chicle, 934,161 lb. ($1,002,451); grapefruit juice, 2,323,495 lb. ($245,160).

Shipping and Communications.—Tonnage entered, 1950, 260,776 tons. Registered shipping, 1950, 88 sailing vessels, 613 tons, and 87 motor vessels, 1,647 tons. Telegraph and telephone lines connect Belize with Corozal and Consejo on the coast, Orange Walk on New River, San Antonio on the Rio Hondo and other stations in the north, El Cayo and Benque Viejo in the west, Stann Creek and Punta Gorda in the south. Telegraph line (1935), 395 miles. Number of telephones (1949), 575.

Money and Credit.—The Royal Bank of Canada took over the business of the local bank in 1912. There are 6 government savings banks; depositors, 7,532, deposits $1,608,315 on 31 Dec., 1949. 4 British Honduras dollars = £1 sterling.

There are (31 Dec., 1949) a paper currency of $837,643 in government notes and a subsidiary silver coinage of $150,626 in circulation. There is also a subsidiary mixed metal coinage of 1-cent and 5-cent pieces whose issues amount to $35,357. Barclays Bank (D., C. & O.) have a branch in Belize.

WEST INDIES.

THE British West Indian possessions fall into 6 groups, (1) Bahamas, (2) Barbados, (3) Jamaica with Turks Islands, (4) Leeward Islands, (5) Trinidad with Tobago, (6) Windward Islands. The Bahamas are not strictly a part of the West Indies, but for geographical purposes are included in the West Indian category.

Currency, weights and measures throughout the islands are based on their British counterparts. American and Canadian currency is generally accepted in some islands.

The Conference on the Closer Association of the British West Indian Colonies recommended on 19 Sept., 1947, 'the appointment of a commission to examine the establishment of a customs union.' The report of the commission, appointed by the Secretary of State for the Colonies, was published in Jan., 1951 (Colonial No. 268). It states that a customs union would strengthen the economic position of the territories, encourage their local industries, and increase trade between them, and that it could be with or without political federation. The proposed union would at first comprise Barbados, British Guiana, British Honduras, Trinidad, Jamaica (excluding the Cayman Islands and the Turks and Caicos Islands), the Leeward Islands (excluding the British Virgin Islands), and the Windward Islands. There would be a central advisory board, to which an Inspector-General of Customs and Excise, with headquarters in Trinidad, would be responsible.

BAHAMAS.

Governor and Commander-in-Chief.—Maj.-Gen. R. A. R. Neville, C.B.E. (sworn in 6 Dec., 1950) (£3,000), assisted by an executive council of 8, a legislative council of 9 and a representative assembly of 29 members, electors requiring to have a small property qualification. Women have not the vote.

Colonial Secretary.—C. P Bethel, O.B.E., I.S.O. (appointed 13 Dec., 1950).

Bahamas consists of about 20 inhabited and many uninhabited islands and rocks off the S.E. coast of Florida. They are the surface protuberances of two oceanic banks, the Little Bahama Bank and the Great Bahama Bank. Of the group, about 700 areas might be classified as islands or cays; the rest only as rocks. Land area, 4,404 square miles. Average annual rainfall 50·3 in. Month with heaviest average rainfall, Sept., 8·2 in.

Average winter temperature, 74° F. Average summer temperature, 80° F. Highest recorded temperature 94° F. Lowest recorded temperature 51° F.

Principal islands with population in 1943:—New Providence (pop. 29,391, containing capital, Nassau), Abaco (3,461), Harbour Island (769), Grand Bahama (2,333), Cat Island (3,870), Long Island (4,564), Mayaguana (591), Eleuthera (6,430), Exuma (3,784), San Salvador or Watling's Island (693), Acklin's Island (1,744), Crooked Island (1,078), Great Inagua (890), Andros Island (6,718).

Total estimated population, 1948, 80,639 (about 85% coloured). Births in 1949, 2,553 (33·7 per 1,000); deaths in 1949, 987 (13·2 per 1,000). Primary education is compulsory from ages 6 to 14. In government schools the number of pupils was, in 1949, 13,356 (in board schools 12,015 and in grant-in-aid schools 1,341). Government grant in 1949, £112,908. In 1949 there were in Church of England schools enrolled 803 pupils, in Roman Catholic schools 1,991 and in all other denominational schools 892 pupils. In 1948, there were 5 private secondary schools connected with religious bodies with 548 pupils, and a government secondary school with 127 pupils. There were, in 1950, 6 ci[illegible]

In 1948, 3,569 persons were dealt [illegible] court. The authorized strength of the police force in 1949 was 6 officers and 184 other ranks.

Revenue (1948), £1,360,226; expenditure, £1,317,621; customs, £802,001. Public debt, 31 Dec., 1949, £245,000.

Tomatoes are being exported in increasing quantities. Sponge and sisal used to be the mainstay of the colony, but in recent years the export of sisal has greatly diminished, and sponge has in the last few years suffered from a severe mortality, which has brought the industry almost to a standstill. Turtle fisheries are carried on, and some shell and ambergris is obtained. Okras and a certain amount of pineapples are exported.

Imports and exports (excluding specie) for 6 calendar years (in £):—

Year	Imports	Exports	Year	Imports	Exports
1944	1,743,399	338,482	1947	4,201,497	423,866
1945	1,806,019	432,202	1948	4,720,151	721,290
1946	2,840,576	399,319	1949	4,775,942	660,813

Imports from United Kingdom (1949) were valued at £1,297,857; from United States, £2,466,605; from Canada, £685,700.

Principal imports (1949) were:—Spirits and wines £91,313; iron and steel manufactures, £236,639; lumber and shingles, £86,002.

Principal exports (1949) were:—Salt, £67,737; tomatoes, £75,192; crawfish, £64,392; lumber, 8,276,000 board feet. Exports to the United Kingdom were £3,469; United States, £79,856; Canada, £118,823.

Trade with the United Kingdom (Board of Trade returns):—Imports to U.K., 1950, £197,208; 1949, £183,214; 1948, £47,326; exports from U.K., 1950, £1,572,977; 1949, £1,381,781; 1948, £1,012,179; re-exports, 1950, £120,054; 1949, £22,255; 1948, £11,049.

Shipping 1949:—Entered 1,855 vessels of 519,791 tons (1,000 British of 352,382 tons); cleared, 1,782 vessels of 533,330 tons (1,011 British of 365,017 tons).

In the island of New Providence an automatic telephone system of the latest type is in operation, together with an extensive system of underground cables. The total number of telephones in use at the end of Dec., 1950, was 3,856. An overseas radio telephone link to the U.S.A. provides

service from the subscribers' telephone to any part of the world. All the important islands are connected with Nassau by means of radio telegraphy, and in several cases radio telephony is also available. Connexion through Nassau to the U.S.A., Canada and Central America can be provided. Radio telegraph and telephone services to Jamaica, radio teletype to Florida connecting into the U.S.A. network, and ship–shore radio telephone services are also available. The Bahamas broadcasting station operates on 1,540 kilocycles. There are no railroads in the Bahamas.

There are more than 150 miles of good paved roads in Nassau, and good roads on most of the other islands.

Electricity for lighting and power is available in New Providence. Total units generated during 1949, 14,976,350. Total number of consumers, 5,500. Other islands have small privately owned generating plants.

The Royal Bank of Canada and Barclays Bank (Dominion, Colonial & Overseas) have branches in Nassau. British silver and 'copper' coins are legal tender. Silver coins of U.K. ceased, with effect from 1 Nov., 1936, to be legal tender in the colony for payment of an amount exceeding 40*s*. Local currency notes, based on £ sterling, are in circulation, but American and Canadian currency is generally accepted. Bank of England notes are not accepted, except at the banks from travellers from the U.K. and then only to a maximum of £5. Post office savings bank, 30 June, 1950, depositors, 24,638; balance due, £381,302.

BARBADOS.

Governor.—Sir Alfred W. L. Savage, K.C.M.G. (appointed Feb., 1949; salary, £3,000 plus £1,000 duty allowance).
Colonial Secretary.—R. N. Turner (appointed 30 Nov., 1950).

There are an executive council, executive committee, legislative council of 15 members (appointed by the King), and House of Assembly of 24 members, elected triennially; in 1946, there were 20,317 registered electors. In 1943 women were given the vote. At the election held in December, 1948, there were returned to the House of Assembly 12 Progressive League, 9 Electors' Association, 3 Congress Party.

Barbados lies to the east of the Windward Islands. It was occupied by the English in 1627; unlike most of the ' ' ' ' islands, it has never changed hands. The hot and rainy seas ' ' ' June to December, and the average rainfall is 61 inches a year.

Area, 166 square miles; population (census of 1946), 192,841. Estimated population, 31 Dec., 1949, 206,838. Births (1949), 6,357: deaths, 2,979. Bridgetown is the principal city. Education is controlled by a government department. In 1950 there were 123 primary schools, 30,492 pupils on roll (15,549 boys; 14,943 girls); 8 second-grade schools (3 for girls; 1 co-educational), with 1,735 pupils; 3 first-grade schools (1 for girls), with an attendance of 809 boys and 363 girls. Codrington College, affiliated to Durham University, had 28 students. Government votes on education in 1949–50, £295,957, and £23,025 to supply milk and biscuits to elementary school children, and £1,000 for medical, visual and dental treatment. There are 5 newspapers, 3 weekly, 1 tri-weekly and 1 daily; and 9 cinemas with a seating capacity of 7,014.

There is a supreme court; grand sessions are held once in every 4 months, with additional sittings under special commissions; there are 7 police magistrates. In 1950, there were 86 convictions in superior courts.

Of the total area of 106,470 acres, about 67,000 are under arable cultivation; the staple produce is sugar. In 1950, 41,241 acres were under sugar cane, which produced 158,183 tons of sugar [illegible] the equivalent of 5,016,475 wine gallons of fancy molasses, [illegible] equalling 1 ton of sugar). Exports in 1950 were 131,744 tons of sugar and 5,805,657 wine gallons of molasses. There are 35 sugar and molasses plants and 4 rum distilleries in production. Rum exported in 1949 was 631,926 proof wine gallons. The cotton lint exported in 1949 was 58,274 lb. In the fishing industry about 600 sail boats and 1,800 men and 400 women are employed during the flying-fish season. The majority of these boats are laid up from July to October.

Re-exports from U.K. .	23,336	11,614	15,261	23,201	59,761

Three banks operate in Barbados:—Barclays Bank (Dominion, Colonial & Overseas), the Royal Bank of Canada, and the Canadian Bank of Commerce. The Government Savings Bank on 30 June, 1950, had 40,876 depositors, with £2,181,660 to their credit. English gold, silver and bronze coins are legal tender, and $5, $20 and $100 notes of Barclays

Bank, Royal Bank and Canadian Bank, and $1, $2, $5, $20 and $100 government currency notes are in circulation. Government currency notes of British Guiana and Trinidad are also in circulation.

Registered shipping, 1949:—10 sailing vessels (net tonnage, 1,766), 12 steam and motor vessels (net tonnage, 521 tons). The total tonnage of shipping entered during the year 1949 was 1,288,420 (1,004 vessels). There are 583 miles of roads open to traffic of which 421 miles are all-weather roads. There are 16,500 miles of telephone line in the island belonging to one private company. The telephone system has been reconstructed with a new central automatic exchange in the city and other branch exchanges. There were, in 1950, 4,068 telephones. External telegraph communication is provided by both cable and wireless. There is also a wire broadcasting (rediffusion) service for Bridgetown and the suburbs. Radio telephone communication has been established with other West Indian Islands, Canada and the United Kingdom.

There is a landing ground for aircraft at Seawell, Christ Church.

JAMAICA.

Captain-General and Governor-in-Chief.—Sir Hugh Mackintosh Foot, K.C.M.G., O.B.E. (assumed office April, 1951); salary, £4,500; duty allowance, £1,500).

Colonial Secretary.—D. C. MacGillivray, C.M.G., M.B.E. (appointed 1 Oct., 1947).

Jamaica was discovered by Columbus in 1494, and remained in the possession of the Spaniards until it was taken by the English in 1655, and their possession was confirmed by the Treaty of Madrid, 1670.

There is a great diversity of climate, the temperature ranging from 80° to 86° F. on the sea-coast to 40° in the mountains, with a dry atmosphere.

Constitution and Government.—According to the constitution which came into force on 20 Nov., 1944, the Governor is assisted by a House of Representatives of 32 elected members; a legislative council—the Upper House—of 15 members, and an executive council of 10 members (5 to be appointed by the House of Representatives and 5 to be nominated by the Governor). Every person over 21 years of age has the right to vote.

At the election held on 20 Dec., 1949, the Labour Party secured 17, the People's National Party 13 and independents 2 seats.

In Nov., 1940, various sites in the island were leased to the United States for military purposes.

Area and Population.—Attached to Jamaica are Turks and Caicos Islands, Cayman Islands, Morant Cays and Pedro Cays. Area of Jamaica, 4,411 square miles; Turks and Caicos Islands, etc., 202 square miles. Population of Jamaica (census, 1943): total, 1,237,063 (males, 598,267; females, 638,796). According to the 1943 census there were:—White, 14,793; coloured, 216,348; black, 965,960; East Indian, 21,393; Chinese, 6,886. Capital, Kingston (census, 1943), 109,056. Other towns (census, 1943), Spanish Town, 12,007; Montego Bay, 11,547; Port Antonio, 5,482;

Savanna-la-Mar, 4,046; Port Maria, 3,167; St. Ann's Bay, 3,133; Falmouth, 2,561. Births (1950), 46,384 (33·06 per 1,000); deaths (1950), 16,584 (11·82 per 1,000); marriages (1949), 5,864 (4 2 per 1,000).

Estimated population in 1950, 1,416,987.

Religion.—There is no established Church. The numbers of communicant members in 1950 were as follows :—Church of England, 44,000; Baptists, 23,000; Methodists, 20,000; Presbyterians, 11,000; Moravians, 10,500; Disciples, 5,000; Church of God, 4,500; Congregational, 4,000; Salvation Army, 55 corps; Society of Friends, 16 meeting houses. These denominations, together with the Y.M.C.A. and Y.W.C.A. form the Jamaica Christian Council.

The Roman Catholic Church has 66 priests, but publishes no statistics of its members. A Jewish community numbers about 1,200. Seventh Day Adventists have 15,000 members.

Education.—In 1949 there were 677 public elementary schools, 197,969 children enrolled, average attendance 134,995. Government grants, £847,358. There are three vocational schools for boys and one for girls. There are three training colleges for women and one for men, and two secondary schools largely supported by government. There are 26 secondary and high schools, some endowed, others not endowed, in receipt of grants-in-aid from the Government, and 9 industrial schools. Total expenditure for education, 1949, £1,472,760.

The University College of the West Indies, affiliated to London University, opened its medical faculty with 33 students in Oct., 1948, and received a royal charter on 10 Jan., 1949. The faculty of science opened in 1949, that of arts in 1950.

There were in 1950, 29 cinemas with a seating capacity of 23,867.

Justice, etc.—There is a Supreme Court, circuit courts, and resident [illegible] in each parish. Total summary convictions (1950–51), [illegible] in gaol (police lock-ups) serving short sentences on 31 March, 1950, 30. In 1949–50 there was a constabulary force of 38 officers and 1,778 sub-officers and men, 3 women police and 1,225 district constables.

There is a garrison of regular troops.

Finance and Commerce.—Statistics for 6 years (in £ sterling) :—

	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50

[1] Includes customs revenue. [2] Calendar years.
[3] Revised estimates.

Principal imports in 1949 :—Flour, £1,690,825; cotton goods, £1,521,176; motor cars and trucks, £591,401; fish, £591,358; boots and shoes, £307,457; artificial silk piece-goods, £641,900; paper (all kinds), £631,887; rice, £406,865; machinery, £1,236,476; fuel oil, £549,225.

Principal exports in 1949 :—Sugar, 1,908,873 tons (£4,624,167); bananas, 6,563,378 stems (£2,270,507); rum, 1,640,864 gallons (£1,292,768); cigars, 200,570 lb. (£385,827); cocoa, 4,118,725 lb. (£203,879); pimento, 8,536,611

lb. (£405,414). Coffee export in 1947, 3,061,843 lb.; 1948, 2,822,102 lb.; 1949, 2,404,760 lb.

In 1949, the United Kingdom supplied 45·1% of the imports, U.S.A. 16·5%, Canada 12·9%; of the exports, 62·6% went to the United Kingdom, 26·5% to Canada, 3·5% to U.S.A.

Total trade with the United Kingdom, in £ sterling (Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports to U.K. .	4,615,680	10,072,634	10,317,434	9,460,621	10,981,080
Exports from U.K. .	2,007,227	3,561,101	6,959,732	7,859,556	8,702,600
Re-exports from U.K.	41,628	21,736	38,251	65,648	117,396

Registered shipping of Kingston, 1949:—14 sailing vessels of 985 net tons, 4 steam of 6,225 net tons and 4 motor of 1,022 net tons. Shipping, 1949:—Entered and cleared, 771 vessels of 1,961,134 net tons.

Production.—Acres under cultivation and care, 1949, 1,018,000; sugar cane, 90,000; coffee, 17,400; bananas, 66,780; coconuts, 100,000; cocoa, 2,474,000 trees; corn, 35,000; pasture, 595,000, including 50,000 acres of improved Guinea grass. Sugar production, 1949, 237,744 tons; 1950–51 (estimate), 281,280 tons. Rum production, 1948, 3,111,500 liquid imperial gallons. Livestock, 1942–3:—Cattle, 225,736; sheep, 12,706; horses, mules and asses, 90,009.

Communications.—Jamaica has 207 miles of railway open of 4 ft. 8½ in. gauge; receipts, in year ended 31 March, 1949, £356,467; expenses [illegible] charges), £550,470; 2,565 miles of main roads; 2,581 m[illegible]. including railway telegraph lines; 2,819 miles of telephor[illegible] lines not included); 26½ miles of electric and 81 of steam tramways; 27 miles mule tramways; 3,725 feet rope-ways. Total receipts of the postal service, 1949–50, £437,486; expenditure, £332,337, including telegraph and telephone (government) expenditure. There are 310 post offices and 86 postal agencies.

Roads.—The island has 2,565 miles of main roads which are maintained from the general revenue of the Colony and 4,438 miles of parochial roads, of which 2,137 miles are suitable for light motor traffic, and 2,301 miles are cart or bridle roads. The latter classes of roads are maintained by the Parochial Boards from funds derived from the local rates.

Money and Credit.—On 31 March, 1950, there were 277,531 depositors in the government savings bank, the balance at credit amounting to £2,623,237. The legal coinage is that of Great Britain. Notes of Barclays Bank (Dominion, Colonial & Overseas), the Bank of Nova Scotia, the Royal Bank of Canada, and the Canadian Bank of Commerce are current; their circulation on 31 March, 1950, was £24,680, £18,071, £5,296 and £3,571 respectively. Government of Jamaica currency notes are legal tender. The total circulation on 31 March, 1950, was £3,132,457.

STATISTICAL INFORMATION.—The Central Bureau of Statistics (93 Har[illegible] was set up in 1945—the nucleus being the Census Office which undertook [illegible] 1943 Census of Jamaica and its Dependencies; *Island Statistician.*—O. M. Royes. Publications of the Bureau include the Annual Trade Report and the Quarterly Digest of Statistics

CAYMAN ISLANDS, a dependency of Jamaica, consist of Grand Cayman, Little Cayman and Cayman Brac. Situated in the Caribbean Sea, about 200 miles N.W. of Jamaica, the islands were discovered by Columbus on 10 May, 1503; area 93 square miles. Census population of 1943, 6,670. Grand Cayman (population 5,311), 22 miles long, 4 to 8 miles broad; capital: Georgetown (population 1,462). Little Cayman, 10 miles long, 2 miles broad; population, 63. Cayman Brac, 12 miles long and 1¼ miles wide; population, 1,296. Vital statistics (1949):—Births, 164; marriages, 52; deaths, 52. Principal industries are turtle fishing, shark fishing, shipbuilding and rope making. There are 13 government primary schools with 952 pupils enrolled and 782 average attendance, and 3 private schools.

Revenue, 1948-49, £40,565; expenditure, £34,078. Public debt at 31 Dec., 1949, £5,530; reserve fund, £30,109. Exports—Grand Cayman: green turtle, shark skins, thatch rope, hides, turtle shell; Little Cayman and Cayman Brac: turtle shell. Imports (1949), £144,450; including food, drink and tobacco, £69,765, and manufactures, £74,685. Exports (1949), £22,764; including live turtles, 3,205 (£9,615), straw rope, 1,424,150 fathoms (£7,121), shark products, 9,208 lb. (£26,400), turtle products, 11,653 lb. (£2,860). Shipping registered at Georgetown, 5,191 net tons (1949).

The government is administered by a Commissioner, who sits as president of the Legislative Assembly of justices and vestry. Justices of the Peace (27) are appointed by the Governor of Jamaica.

Commissioner.—Ivor O. Smith.

Annual Report, 1948. H.M.S.O., 1949.

The MORANT CAYS and PEDRO CAYS (Guano Islands) are also attached to Jamaica.

TURKS AND CAICOS ISLANDS, a dependency of Jamaica, are geographically a portion of the Bahamas, of which they form the two south-eastern groups. The government is administered by a commissioner, assisted by a legislative board of 7 members, all of whom are appointed by the Crown. The Governor of Jamaica has a supervising power over the local government. There are upwards of 30 small cays; area 166 square miles. Only 8 are inhabited; the largest, Grand Caicos, is 25 miles long by 12 broad. The seat of government is Grand Turk, 7 miles long by 2 broad; about 1,800 [illegible] (1950 estimate), 6,500, of whom 122 were white. Births (1949), 227; marriages, 46; deaths, 73.

Education is free in the government schools. There are 11 government schools, average number on rolls in 1949, 934; average attendance, 674. The secondary school had an average attendance of 26.

Revenue in 1949, £100,240 of which £16,300 was from customs, and £4,800 from royalty on salt; expenditure, £93,931. Public debt, nil.

Total imports (1949) £102,544; (1948) £82,756. Total exports (1949) £78,935; (1948) £62,415. Principal imports (1949):—Flour, £7,905; sugar, £6,122; rice, £7,764; rum, £1,379. Principal exports (1949):—Salt, 60,809 tons (£72,895); conchs, 1,907,200 (£1,907). Imports from United Kingdom, (1948) £622, (1949) £22,600.

The total shipping entered in 1949 was 70,000 tons.

The most important industry is salt raking. There is a cable station at Grand Turk. Savings bank deposits (1949), £58,612; depositors, 1,421.

The current coins are British and Jamaica, in silver and copper. Jamaican Treasury notes are in circulation.

Commissioner.—C. E. Wool-Lewis, O.B.E.

Annual Report, 1948. H.M.S.O., 1949.

LEEWARD ISLANDS.

Governor and Commander-in-Chief.—K. W. Blackburne, C.M.G. (appointed 14 Sept., 1950; salary, £2,750 (of which £450 is duty allowance), and £100 travelling allowance).

Colonial Secretary.—P. D. Macdonald (appointed 31 Dec., 1949; salary £1,300 and free quarters).

The group, which lies to the north of the Windward group, and south-east of Puerto Rico, is divided into 4 presidencies, viz., Antigua (with Barbuda and Redonda); St. Christopher–Nevis (St. Kitts, Nevis, Anguilla and Sombrero), Montserrat, and the Virgin Islands. There are for the whole federation a federal executive council nominated by the Crown, and a general legislative council, 9 official and 9 unofficial members. Of the latter, 3 are elected by the unofficial members of the local legislative council of Antigua, 3 by those of St. Kitts, 2 by those of Montserrat and 1, appointed by the Governor, for the Virgin Islands. The general legislative council meets, as a rule, once a year. The duration of the council is 3 years. There are also separate executive and legislative councils for the 3 larger presidencies, and an executive council for the Virgin Islands. A commission appointed in 1932 recommended in 1933 that the Leeward Islands and the Windward Islands should be united into 1 colony under a governor, with headquarters at St. Lucia. Political franchise was introduced in the legislatures of St. Kitts–Nevis, Antigua and Montserrat by legislation passed in 1936.

Leeward Islands	Area: sq. miles	Population according to census taken in 1946		
		Males	Females	Total
Antigua	108	18,580	22,197	40,777
Barbuda and Redonda	63	442	538	980
Virgin Islands	67	3,131	3,377	6,508
St. Kitts	68	13,582	16,252	29,834
Nevis	50	5,056	6,327	11,383
Anguilla	50	2,216	2,820	5,036
Montserrat	32½	6,356	7,973	14,329
Total	422½	49,363	59,484	108,847

Estimated population on 31 Dec., 1949, was 110,525.

The principal religious bodies are Anglican, Roman Catholic, Methodist and Moravian. Education is denominational in Montserrat and the Virgin Islands. In Antigua there are 25 government elementary schools and 4 private schools; and 4 grant-aided and 1 denominational secondary schools. There are 32 government primary schools in St. Kitts–Nevis. In 1949 there were, in Antigua, St. Kitts, Nevis, Anguilla and the British Virgin Islands, 93 primary schools, with average attendance 19,412; government expenditure on education in the colony amounted to $490,791.

There were, in 1949, 6 cinemas with a seating capacity of 2,455.

Police force, end of 1949, 8 officers and 270 N.C.O.s and men.

The chief products are sugar and molasses (Antigua and St. Kitts), cotton (Montserrat, St. Kitts–Nevis), limes and fruits, carrots and onions (Mont-

serrat), coconuts (Nevis), salt (Anguilla and St. Kitts) and livestock and charcoal (Virgin Islands).

Financial and commercial statistics (in £ sterling) :—

	1944	1945	1946	1947	1948	1949
Revenue .	571,563	819,000	700,000	819,019	828,797	958,562
Expenditure	594,749	824,000	620,000	802,064	934,900	1,002,220
Public debt .	105,991	106,418	177,181	136,208	138,236	135,956
Imports .	1,200,000	1,250,000	1,500,000	2,180,821	1,894,163	2,083,480
Exports .	1,350,000	1,200,000	1,100,000	1,440,030	1,425,831	1,867,695

Total shipping entered and cleared (1949), 2,610,066 tons.

Total trade with the United Kingdom (Board of Trade returns, in £ sterling) :—

	1947	1948	1949	1950
Imports to U.K.	1,538,858	1,640,951	1,893,189	2,430,000
Exports from U.K. . .	366,039	416,197	694,073	1,052,206
Re-exports from U.K. . .	665	1,478	2,723	6,443

ANTIGUA. Area, 108 square miles; Islands of Barbuda (62 square miles) and Redonda (1 square mile) are dependencies; estimated population at end of 1949, 44,532. Antigua is the seat of government of the colony. There is an executive council, nominated, and a legislative council, consisting of 3 official members, 3 nominated members and 5 elected members. The Governor presides at the executive council. The administrator is president of the legislative council. Chief town, St. Johns, 11,000. In Antigua in 1949 the birth rate per 1,000 was 35·82; the death rate, 11·88; there were 170 marriages. There were 29 elementary schools (1949). Revenue (1949), $1,802,731; expenditure, $2,143,531. Public debt (1949), $427,036. Imports (1948), $4,180,781; exports (1949), $2,951,568. Chief products:— Sugar and cotton. In government savings bank, 4,858 depositors on 31 Dec., 1949, $573,224 deposits. Barclays Bank (D., C. & O.) have a branch at St. John's. Telephone lines 600 miles. The island is hilly. There are numerous sheltered harbours, but they are too shallow for steamships. Air-mail services connect the colony with Barbados, Trinidad, the Windward Islands, Jamaica and Puerto Rico. Passenger steamers from Canada and U.S.A. call at ports. Direct steamship communication with the U.K. is infrequent.

In Nov., 1940, sites near Parham were leased to the United States as military and naval bases.

Administrator.—Richard St. John Ormerod Wayne.

MONTSERRAT. Nominated executive and elected and nominated legislative councils. Area, 32½ square miles. Population, 1949, 13,508. Chief town, Plymouth, 2,000 inhabitants. Revenue (1949), $570,600; expenditure, $489,494. Imports (1949), $703,142; exports, $867,542. Chief exports, 1949, cotton lint (702,229 lb.), cotton seed, lime juice, lime oil, green limes, tomatoes, onions, carrots, tamarinds, vegetables, skins and hides.

A wireless station was opened in Montserrat on 25 May, 1925.

Commissioner.—Charlesworth Ross.

ST. CHRISTOPHER (ST. KITTS) AND NEVIS (with ANGUILLA) have one executive council, nominated, and a legislative council of 3 official members,

including the administrator, who is the President, 3 nominated members and 5 elected members. Population 1949, 46,288. Chief town of St. Kitts, Basseterre, population 29,142; of Nevis, Charlestown, 11,887, and Anguilla, 4,830. Revenue (1949), $1,970,939; expenditure (1949), $1,965,976. Public debt at 31 Dec., 1949, $128,921. Imports, 1949, $4,801,626; exports, $4,984,368. Chief exports (1949):—Sugar, 33,780 tons ($4,306,905); cotton, 591,179 lb. ($377,906); molasses, 1,067,807 gallons ($72,111). Savings bank at 31 Dec., 1949, 3,451 depositors, $518,948 deposits. There is a branch of Barclays Bank (D., C. &. O.) at Basseterre.

Administrator.—Hugh Burrowes.

SOMBRERO is a small island in the Leeward Islands group, attached administratively to the presidency of St. Kitts–Nevis. Phosphate of lime used to be quarried. There is a Board of Trade lighthouse.

THE BRITISH VIRGIN ISLANDS form the eastern extremity of the Greater Antilles and, exclusive of small rocks and reefs, number 36, of which 11 are inhabited. The largest are Tortola (estimated population 4,500), Virgin Gorda, Anegada and Jost Van Dykes. Area about 67 square miles; population (1949), 5,547. There is a nominated Executive Council and partly nominated, partly elected Legislative Council of 8 members [illegible] the President. Road Town, on the south-east of Tortola, the capital and only town, is a port of entry; population 700. Fruit, vegetables and charcoal are produced. A fair trade in livestock, fish and poultry is carried on. Revenue (1949), £53,506; expenditure £44,094. Imports (1949), £65,659; exports £33,636. Savings bank (1949), 325 depositors; deposits, £13,563. Shipping (1949) entered, 16,407 tons; cleared, 16,568 tons.

Commissioner.—His Hon. J. A. C. Cruikshank.

Annual Report on the Leeward Islands, 1948. H.M.S.O., 1949.

TRINIDAD.

Trinidad, which lies immediately north of the mouth of the Orinoco, and includes Tobago [illegible], was discovered by Columbus in 1498 and colonized by [illegible] the 16th century. About the period of the Revolution a large number of French families settled in the island. In 1797, Great Britain being at war with Spain, Trinidad was occupied by the British, and ceded to Great Britain by the Treaty of Amiens in 1802.

The climate is tropical, with an average rainfall of 1 to 3 in. per month in the dry season (January to May) and 7 to 10 in. per month in the rainy season (June to December).

Governor.—Major-General Sir Hubert Rance, G.C.M.G., G.B.E., C.B. (assumed office March, 1950); salary $21,600; duty allowance, $7,200; allowance in lieu of exemption from customs duty, $1,920.

Colonial Secretary.—P. M. Renison, C.M.G. (appointed 26 Feb., 1948).

Constitution.—The Trinidad and Tobago (Constitution) Order in Council, 1950, provides for a Legislative Council of 3 *ex officio*, 5 nominated and 18 elected members, presided over by a Speaker appointed by the Governor from outside the Council; and an Executive Council of 3 *ex officio*, 1 nominated and 5 elected members, the elected members being elected by the Legislative Council.

The elections held on 18 Sept., 1950, gave the Home Rule Party

6 seats, Independents 6, Political Progress Group 2, Labour Party 2, Caribbean Socialist Party 2.

Area and Population.—Area —Trinidad, 1,864 square miles; Tobago: 116. Population :—Census 1946, 557,970 (279,651 males and 278,319 females) (Trinidad, 530,276; Tobago, 27,161; afloat, 533). Estimated population, end of 1949, 618,603. Capital, Trinidad, Port of Spain, 102,878. The white population is chiefly composed of English, French, Spanish and P[illegible]. The large majority of the inhabitants are natives of the [illegible]s, of African descent, the balance being made up of East Indians, estimated at 214,177, and a small number of Chinese. English is spoken generally throughout the colony. Births, 1949, 22,931; deaths, 7,487; marriages, 3,782.

Religion.— According to the census in 1946 there were 135,312 Anglicans, 192,500 Roman Catholics, 20,074 Presbyterians, 14,048 Methodists 12,182 Baptists, 126,345 Hindus, 32,615 Moslems.

Education.—At the close of 1949 there were 269 primary and intermediate schools in Trinidad and 34 in Tobago, 50 being government and 253 assisted schools (98 were Roman Catholic, 64 Church of England, 66 Canadian Presbyterian Mission, 11 Methodist, 11 Moravian, 1 Baptist, 1 African Methodist Episcopal and 1 Moslem). Of the 10 secondary schools, 5 are controlled by the Roman Catholics, 2 by the Church of England and 2 by the Canadian P[illegible] Mission. The total number of children on roll between the ag[illegible]: 15 in primary, intermediate, secondary, private and orphanage schools in 1949 was 117,713 or 86·9% of the estimated population of those ages. There are also 3 training colleges. Technical and commercial education is provided by the Board of Industrial Training, a statutory body in receipt of government grants.

There are 3 daily newspapers and several weekly and monthly periodicals; 49 cinemas and a broadcasting station.

Finance and Commerce.—Statistics for 5 years (in dollars) :—

	1945	1946	1947	1948	1949
Revenue	30,558,550	41,889,872	37,325,302	45,310,825	50,877,074
Expenditure	33,650,710	31,936,681	37,417,052	38,610,998	42,329,867
Public debt	27,507,817	26,562,364	26,074,860	34,151,947	42,278,899
Customs and excise	12,046,265	13,130,550	18,453,193	17,691,613	17,854,800
Imports	65,030,924	75,403,038	118,783,075	131,822,264	154,214,803
Exports	59,367,581	61,675,946	87,115,147	132,627,133	138,396,486
Transhipments	13,290,982	8,674,683	22,846,967	34,056,894	33,383,102
Ships' stores and bunkers	38,248,681	12,627,498	19,202,716	22,983,160	20,977,236

Besides customs and excise, the principal items of revenue during 1949 were :—Licences, etc. $3,204,201; tax on incomes, $20,482,933; forests, lands and petroleum, $4,024,359.

Imports, 1949	$	Imports, 1949	$
Food, drink and tobacco	31,551,799	Manufactured goods	84,956,841
Flour, wheaten	7,597,236	Iron and steel goods	16,050,606
Milk, preserved	3,988,224	Cotton piece-goods	3,572,334
Animals, for food	298,541	Apparel	2,620,096
Rice	1,804,034	Boots and shoes	2,294,938
Meat and meat products	2,953,783	Machinery	13,553,970
Raw materials	37,541,716	Animals, not for food	164,447
Timber	2,305,210	Cement	1,347,234
Coal	663,093	Petroleum, crude	33,279,986

The principal domestic exports during 1949 were:—Sugar, $17,752,243; rum and bitters, $3,519,800; cocoa, $4,519,387; asphalt products, $4,848,875; petroleum products, $97,328,440.

The chief countries of origin of imports were:—Canada (12%), Great Britain and Northern Ireland (37·3%), U.S.A. (15·8%) and Venezuela (14%). Domestic exports were shipped chiefly to Great Britain and Northern Ireland (31·2%), Brazil (9·3%), Canada (12·9%) and U.S.A. (4·5%).

Trade with the United Kingdom (Board of Trade returns, in £ sterling):—

	1947	1948	1949	1950
Imports to U.K. .	9,822,582	13,060,358	11,032,019	11,562,088
Exports from U.K. .	5,197,020	8,383,437	10,422,400	12,613,396
Re-exports from U.K. .	25,492	167,830	110,157	175,546

Production.—Of the total area of 1,267,236 acres (Trinidad, 1,192,844 acres, and Tobago, 74,392 acres), about half has been alienated. Acres under cultivation and care include (1949):—Forest, 643,933; sugar, 82,000; cocoa, 100,000; coconuts, 40,000; citrus, 12,000; tonca beans, 6,000; vegetables, etc., 80,000. Sugar production in 1949 amounted to 159,182 long tons (1950, 146,508 long tons). The Colony is still largely dependent on imported [illegible] ir and meat. Areas are being irrigated for rice and [illegible] is practised.

Production of crude oil during 1949 amounted to 20,616,721 barrels, asphalt output amounted to 145,160 tons.

At the end of 1949 there were 28 registered trade unions.

Communications.—There are 1,075 miles of main and 1,307 miles of local roads. Government railway:—118 miles of 4 ft. 8½ in. gauge; 119 miles of telegraph. Cable:—Communication by cable with the United Kingdom, Europe, North America and other parts of the world is maintained by the Cable and Wireless (West Indies), Ltd. Number of post offices, 148; number of telephones (1949), 12,216.

Four wireless stations are maintained by the Trinidad Government and 3 by airline companies. A meteorological station is maintained by the Air Ministry at Piarco airport. The following airlines operate scheduled passages, air-mail and freight services through the Colony:—British West Indian Airways Ltd., Trans-Canada Airlines, Air France, British South American Airways, Pan-American Airways, K.L.M. (Royal Dutch Airlines), Linea Aeropostal Venezolana, British Guiana Airways, Aerovias Brasil, Flota Aerea Mercante Argentina.

Money and Credit.—Banks operating:—Barclays Bank (D., C. & O.); Royal Bank of Canada; Canadian Bank of Commerce; Trinidad Co-operative Bank, Ltd; Gordon Grant & Co., Ltd. British currency is legal tender. There is no colonial coinage, but government 1, 2, 5, 10 and $20 notes are issued. Government savings banks are established in 44 districts, with a head office in Port of Spain, the amount of deposits at the end of 1949 being $9,736,082 and the total number of depositors 98,056. Currency circulation at the end of 1949, $18,399,234.

The British West Indian dollar equals 4*s.* 2*d.* sterling; £1 = $4·80 B.W.I.

Under the published United States Bases Agreement concluded between the Governments of the United Kingdom and the United States of America on 27 March, 1941, and the concomitant Trinidad–United States Bases

Lease of 22 April, 1941, defence bases have been leased to the United States Government for a period of 99 years. (Cmd. 7864; H.M.S.O., 1950.)

TOBAGO is situated about 21 miles north-east of Trinidad, and has an area of 116 square miles. Main town is Scarborough (population, 1,300).

The total value of the goods shipped from Tobago to Trinidad in 1949 was $1,614,019, of which copra amounted to $520,732, cocoa to $765,163, livestock and poultry to $118,800, fresh vegetables to $65,045 and coconut fibre to $49,100.

WINDWARD ISLANDS.

Consist of Grenada, St. Vincent, the Grenadines (half under St. Vincent, half under Grenada), St. Lucia and Dominica, and form the eastern barrier to the Caribbean Sea between Martinique and Trinidad.

Governor and Commander-in-Chief.—Brigadier Sir Robert Arundell, K.C.M.G., O.B.E. (appointed 1948); salary, £2,100; £850 duty allowance and £500 travelling allowance; resident at St. George's, Grenada.

Each island has its own institutions; there is no common legislature, laws, revenue or tariff; but colonies unite for certain other common purposes (Windward Islands and Leeward Islands supreme court and court of appeal). The legal currency is British sterling and Trinidad Government currency notes. Barclays Bank (D., C. & O.) and the Royal Bank of Canada issue $5 notes.

In a dispatch sent to the governors of the Leeward and Windward Islands on 14 March, 1946, the Colonial Secretary outlined proposals for the amalgamation of the two groups into one colony.

Total trade with United Kingdom (Board of Trade returns, in £ sterling):—

	1947	1948	1949	1950
Imports to U.K. . . .	634,498	844,798	862,416	1,140,827
Exports from U.K. . . .	535,526	790,305	1,137,560	1,562,067
Re-exports from U.K. . .	1,904	4,628	7,984	13,068

GRENADA. *Administrator.*—G. C. Green, C.M.G., M.B.E. (appointed 1942). There are a nominated executive council and a legislative council, consisting of the Governor, with 3 official and 4 unofficial members nominated by the Crown and 7 elected members. Each district has a semi-elective board for local affairs. Area, 133 square miles; population, estimated 1949, 75,913. Births (1949), 2,746; deaths, 1,060. There were (1949) 14 government and 42 government-aided elementary schools, with 18,402 pupils and average attendance 12,969, and 5 secondary schools (2 boys, 2 girls, 1 combined), with 853 pupils.

In 1949 the revenue was £551,637 (including £15,750 grants from development and welfare); the expenditure, £659,019. Public debt, 1949, £294,789; the reserves and surplus funds amount to £99,956. Total value of imports, 1949, £1,086,599; of exports, £917,403. Chief exports, 1949:—

Cocoa (48,482 cwt.), £364,347; nutmegs (44,817 cwt.), £347,086; mace, (6,303 cwt.), £123,293; lime oil (5,360 lb.), £5,966; bananas (18,262 stems), £4,943; copra (517 cwt.), £1,095. Value of imports, 1949:—United Kingdom, £369,132; United States of America, £163,901; Canada, £259,477. Value of exports to United Kingdom, £331,736; to United States of America, £417,967; Canada, [illegible]. Total shipping entered, 1949, 531,545 tons, nearly one-half British.

There were (1949) about 64,030 acres suitable for cultivation.

In 1949, 12,117 depositors in savings banks; balance (31 Dec.), £1,070,685. There are 3 banks in Grenada, Barclays Bank (D., C. & O.), Royal Bank of Canada and the Grenada Co-operative Bank. There are 6,584 miles of telephone line including trunk line and connexions, but no inland telegraph service. There is a wireless station in St. George's which communicates with Barbados, but it is not being operated at the present time. Telegraphic communication with the outside world is maintained by the cables of Cable and Wireless (West Indies), Ltd. Air communication with Trinidad is maintained by British West Indian Airways.

There are 400 miles of roads, of which 220 have bituminized surfaces.

The largest of the Grenadines attached to Grenada is Carriacou; area, 6,913 acres; population, provisional census, 1949, 7,113. A government wireless station communicating with Grenada has been installed.

Annual Report, 1948-49. H.M.S.O., 1950.

ST. VINCENT. *Administrator.*—W. F. Coutts, M.B.E. The legislative council consists of the Governor (and/or Administrator), 2 *ex-officio* members, 3 nominated members and 5 elected members. Area, 150·3 square miles; population, at the end of 1949, 66,164. Capital, Kingstown, population, 4,811 (1946 census). Births, 1949, 2,593; deaths, 898; marriages, 216. Education, 1949:—38 primary schools; scholars, 13,718, average attendance, 8,585; government grant, £26,301. There is also a secondary school for boys (230 pupils, and one for girls (217 pupils). Strength of police force, 1949, 111 (including 2 officers). There were 50 convictions in the Supreme Court in 1949.

Revenue, 1949, £380,555 (£39,435 from colonial development and welfare funds); expenditure, £375,456 (£60,150 expended on colonial development and welfare schemes). Public debt at end of 1949, £112,871. Imports, 1949, $3,158,309; exports, $2,134,789. Value of imports from United Kingdom, $1,091,742; of exports to United Kingdom, $557,465 (plus bullion and specie). Total shipping (1949), 892,340 tons.

Arrowroot, copra, cotton, sugar, rum, cassava, peanuts, food-crops and small quantities of cocoa, and spices are produced. The Sea Island cotton grown is the best in the British Empire, if not in the world. Sea Island cotton exports (1949), 339,255 lb. valued at $324,436. St. Vincent is also famed for the excellence of its arrowroot starch (exports, 1949, 7,580,802 lb., valued at $898,301). Copra exports in 1949, 2,984,161 lb., valued at $429,596. The estimated alienated area is about 54,000 of the total acreage of 96,000. About 25,000 acres are under cultivated crops. A few very large estates are in the hands of single individuals but recent census figures show that there are 4,579 farms of over 1 acre (covering an area of 49,381 acres) and 4,151 small plots. The Government has recently extended its land settlement programme in order to increase the peasant population.

There are 38 miles of oiled highway available for all traffic, 42 miles of metalled and 313 miles of earthen roads.

Besides the postal service, there is a telephone system with 1,200 miles of line and 361 subscribers, and a radio-telephone service to Union Island and Bequia of the Grenadines (1950). Kingstown and its environs are lighted by electricity; the installed capacity is 265 kw. There is a branch of Barclays Bank (D., C. & O.) at Kingstown.

A charter service provided by a Grumman Goose aircraft of the British Guiana Airways Company is operated weekly.

There are three registered trade unions:—Peasant Cultivators, General Workers Union, and Growers, but the first and third have ceased to function.

Annual Report, 1949. H.M.S.O., 1951.

ST. LUCIA. *Administrator.*—John Montague Stow, C.M.G. (27 Aug., 1947); with a nominated executive and a partly nominated and partly elected legislative council. Area, 233 square miles. Castries, the capital, was greatly damaged by fire in June, 1948, and again in March, 1951.

Births, 1949, 2,758; deaths, 1,274; population, 85,321.

Education (31 Dec., 1949): 45 primary schools (39 Roman Catholic, 3 Anglican, 3 Methodist), with 11,882 pupils on roll; government expenditure, 1949, £53,389. Primary education is free and compulsory by law, but the legislation is not enforced. There are 2 Roman Catholic secondary schools in receipt of government grants, totalling £2,153 in 1949.

Revenue in 1949 (including colonial development and welfare schemes, £204,402, and [illegible] £13,739) was £606,479, of which £156,553 was [illegible], £622,655, including £215,378 from development and welfare schemes and £24,739 from parliamentary grant-in-aid. Public debt, 1949, £559,946. Value of imports (1949), £5,248,187; of exports, £1,483,542. Exports in 1949 included sugar, £819,462; coconut products, £317,606, and cocoa, £185,065. Main items of imports, 1949, were cotton [illegible] wheat flour (£416,397) and machinery (£357,424). Total [illegible] 97,471 net tons.

Sugar, cocoa, charcoal, cotton, honey, rum, coconuts, fruits and vegetables are the chief products. Savings bank (end of 1949), 2,170 depositors, £71,677 deposits. There are 600 miles of telephone line, of which 150 miles are trunk lines and 450 branch lines. The island has 365 miles of main and secondary roads.

Currency:—British gold, British silver and copper coins, notes of Barclays Bank (D., C. & O.) and currency notes of the Government of Trinidad and Tobago of 1, 2, 5, 10 and 20 dollar denominations.

In Nov., 1940, a site at Gros Islet Bay was leased to the United States as a naval air base, and a United States military base and army aerodrome base was established at Vieux Fort. Both these bases are now (1951) out of use.

Annual Report, 1948. H.M.S.O., 1949.

DOMINICA.—After being governed by a nominated council of 12 members since 1898, Dominica in 1925 reverted to the elective system. A new constitution, providing for an unofficial majority in the Legislative Council with certain reserve powers vested in the Governor of the Leeward Islands colony, was introduced under the Constitution Ordinance, No. 8, of 1936. On 1 Jan., 1940, the island was transferred to the Windward Islands group, and has since then been governed as a separate colony. Chief town, Roseau (population, 9,812); estimated population of island, 1949, 52,858. Revenue, 1949, £272,910 (including £66,635 from development and welfare

fund); expenditure, £290,780 (including £28,569 from development and welfare fund); public debt, £23,000. Imports, 1949, £494,115 (from U.K., £145,597; Canada, £111,152; U.S.A., £80,899); exports, 1949, £284,089 (to U.K., £101,768; to Canada, £8,484; to U.S.A., £52,660). Chief products :—Limes, lime juice, bananas, bay oil, lime oils, oranges, cocoa, coconuts, copra, vanilla, fruit and rum. Exports of copra, 1949, 1,183,426 lb.; cocoa, 330,204 lb.; bananas, 141,474 bunches. Savings bank (1949), 1,357 depositors, with £66,801 deposits. There is a branch of Barclays Bank (D., C. & O.) at Roseau. Telephone lines, 655 miles. Dominica contains a Carib settlement with a population of about 400, the majority being of mixed Negro blood, but about 100 apparently pure Caribs.

Administrator.—E. P. Arrowsmith, C.M.G. (appointed 26 Jan., 1946).

Annual Report, 1948. H.M.S.O., 1949.

AUSTRALASIA AND OCEANIA.

THE COMMONWEALTH OF AUSTRALIA.

On 1 Jan., 1901, the colonies of New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania were federated under the name of the 'Commonwealth of Australia,' the designation of 'colonies' being at the same time changed into that of 'states'—except in the case of Northern Territory, which was transferred from South Australia to the Commonwealth as a 'territory' on 1 Jan., 1911.

In 1911 the Commonwealth acquired from the state of New South Wales the Yass-Canberra site for the Australian capital, with an area of 911 square miles. Building operations were begun in 1923 and Parliament was opened at Canberra on 9 May, 1927, by H.R.H. the Duke of York (now His Majesty King George VI). A further area of 28 square miles at Jervis Bay was acquired in 1915. (For further information concerning Canberra, *see* below, section Australian Capital Territory.)

Territories under the administration of the Commonwealth, but not included in it, comprise Papua (1 Sept., 1906), Norfolk Island, the trusteeship territories of New Guinea and Nauru, the territory of Ashmore and Cartier Islands, and the Australian Antarctic Territory (24 Aug., 1936), comprising all the islands and territory other than Adélie Land, situated south of 60° S. lat. and between 160° E. long. and 45° E. long.

The British Government transferred sovereignty in the Heard Island and the MacDonald Islands to the Australian Government on 26 Dec., 1947.

Government and Constitution.

Federal Government.

Legislative power in the Commonwealth is vested in a Federal Parliament, consisting of the King, represented by a Governor-General, a Senate

and a House of Representatives. Under the terms of the constitution there must be a session of parliament at least once a year. The Senate, originally consisting of 36 senators, was expanded in 1948 to comprise 60 senators (10 for each of the original states voting as one electorate) chosen for 6 years. In general, the Senate is renewed to the extent of one-half every 3 years, but in case of prolonged disagreement with the House of Representatives, it, together with the House of Representatives, may be dissolved, and an entirely new Senate elected. The House of Representatives consists, as nearly as may be, of twice as many members as there are senators, the numbers chosen in the several states being in proportion to population as shown by the latest statistics, but not less than five for any original state. Number provided for in 1948 enactment, 121 (excluding the non-voting members for Northern Territory and the Australian Capital Territory). The Northern Territory, by virtue of an Act passed in 1922, elects a member who is not entitled to vote, except on a motion for the disallowance of any ordinance of the territory or on any amendment of any such motion, but may take part in any debate in the House. In 1948, representation of the Australian Capital Territory was provided for under similar conditions. The House of Representatives continues for 3 years from the date of its first meeting, unless sooner dissolved. Every senator or member of the House of Representatives must be a natural-born subject of the King, or have been for 5 years a naturalized subject under a law of the United Kingdom or of a state of Australia. He or she must be of full age, must possess electoral qualification and have resided for 3 years within Australia. The franchise for both chambers is the same and is based on universal adult (male and female) suffrage. Compulsory voting was introduced in 1925. If a member elected to the Federal Parliament holds a seat in a state parliament, he must relinquish it before entering the Federal Parliament.

Formally, executive power in the Commonwealth is vested in the Governor-General, who is advised by an executive council, which meets only for certain formal purposes. The whole policy of a ministry is, in practice, determined by the Ministers of State meeting without the Governor-General under the chairmanship of the Prime Minister. This [illegible] the Cabinet, does not form part of the legal mechan[illegible], its meetings are private and deliberative; the actual [illegible] are alone present; no records of the meetings are made public, and the decisions taken have, in themselves, no legal effect. All ministers are members of the Cabinet, and, as they are the leaders of the party or parties commanding a majority in the popular House as well as members of the Executive Council, the Cabinet substantially controls not only the general legislative programme of parliament, but the whole course of parliamentary proceedings and is a dominant element in the executive government of the country. The Executive Council is presided over by the Governor-General and its members hold office at his pleasure. All ministers of state are *ex-officio* members of the Executive Council. Meetings are formal and official in character, and a record of proceedings is kept by the secretary or clerk. At Executive Council meetings, the decisions of the Cabinet are (where necessary) given legal form, appointments made, resignations accepted, proclamations issued, and regulations and the like enacted.

The legislative powers of the Federal Parliament embrace commerce, shipping, etc.; finance, banking, currency, etc.; defence; external affairs; postal, telegraph, and like services; census and statistics; weights and measures; copyright; railways; conciliation and arbitration in industrial disputes extending beyond the limits of any one state; social services (an

amendment to the constitution in 1946 specifying, in addition to the existing provision for invalid and old-age pensions, the provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services, etc.). The Senate may not originate or amend money bills; and disagreement with the House of Representatives may result in dissolution, or, in the last resort, a [illegible] of the two Houses. No religion may be established. The Federal [illegible] is a government of limited and enumerated powers, the several state parliaments retaining the residuary power of government over their respective territories. If a state law is inconsistent with a commonwealth law, the latter prevails.

The constitution also provides for the admission or creation of new states. Proposed laws for the alteration of the constitution must be submitted to the electors, and they can be enacted only if approved by a majority of the states and by a majority of all the electors voting.

Last election for the House of Representatives was held on 10 Dec., 1949, with the following results :—Liberal Party, 46; Liberal Country Party, 9; Country Party, 19 (Government Coalition); Australian Labour Party, 48 (Opposition); Independent, 1; total, 123 (including the non-voting members for Territories: A.C.T., 1 Independent; N.T., 1 Labour).

Senate.—As a result of the elections held on 10 Dec., 1949, the Labour Party had 36 seats and the Liberal-Country Party 24 seats until 30 June, 1950. From 1 July, 1950, the Labour Party has 34 seats and the Liberal-Country Party 26 seats.

The Cabinet fund, divided among ministers, amounts to £27,650, and ordinary members of parliament receive £1,500 per annum.

Governor-General.—The Right Hon. William John McKell, P.C., K.C. (assumed office 11 March, 1947).

The following is a list of Governors-General of the Commonwealth :—

Earl of Hopetoun	1901–2	Lord Somers (Acting)	1930–31
Lord Tennyson	1902–4	Sir Isaac Alfred Isaacs	1931–36
Lord Northcote	1904–8	Lord Gowrie	1936–44
Earl of Dudley	1908–11	Sir Winston Joseph Dugan (Acting)	1944–45
Lord Denman	1911–14	H.R.H. the Duke of Gloucester	1945–47
Viscount Novar	1914–20	Sir W. J. Dugan (Acting)	1947
Lord Forster	1920–25	William John McKell	1947–
Lord Stonehaven	1925–30		

The Liberal-Country Party Cabinet (appointed 19 Dec., 1949) is as follows (the state from which each member comes is added in brackets) :—

Prime Minister.—The Right Hon. Robert Gordon Menzies, P.C., C.H., K.C. (V.).

Treasurer.—The Right Hon. Arthur William Fadden, P.C. (Country Party, Q.).

Minister for the Interior.—Eric John Harrison (N.S.W.).

Minister for Labour and National Service and Minister for Immigration.—Harold Edward Holt (V.).

Minister for Commerce and Agriculture.—John McEwen (Country Party, V.).

Minister of National Development and Minister for Works and Housing.—The Right Hon. Richard Gardiner Casey, P.C., C.H., D.S.O., M.C. (V.).

Minister for Defence.—Phillip Albert Martin McBride (S.A.).

Minister for Health.—The Right Hon. Sir Earle Christmas Grafton Page, P.C., G.C.M.G., C.H. (Country Party, N.S.W.).

Minister for Trade and Customs.—Senator Neil O'Sullivan (Q.).

Minister for Fuel, Shipping and Transport.—Senator George McLeay (S.A.).

Minister for Air and Minister for Civil Aviation.—Thomas Walter White, D.F.C., V.D. (V.).

Postmaster-General.—Hubert Lawrence Anthony (Country Party, N.S.W.).

Minister for the Army and Minister for the Navy.—Josiah Francis (Q.).

Attorney-General.—Senator John Armstrong Spicer, K.C. (V.).

Minister for Social Services.—Senator William Henry Spooner (N.S.W.).

Minister for Repatriation.—Senator Walter Jackson Cooper, M.B.E. (Country Party, Q.).

Minister for Supply.—Oliver Howard Beale, K.C. (N.S.W.).

State Government.

In each of the six States of the Commonwealth (New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania) there is a State government whose constitution, powers and laws continue, subject to changes embodied in the constitution of the Commonwealth and subsequent alterations and agreements, as they were before federation. The system of government is the same as that described above for the Commonwealth—*i.e.* the sovereign, his representative (in this case a governor), an upper and lower house of parliament (except in Queensland, where the upper house was abolished in 1922), a cabinet led by the premier, and an executive council. Amongst the more important functions of the State governments are those relating to education, health, hospitals and charities, law, order and public safety, business undertakings such as railways and tramways, and public utilities such as water supply and sewerage. In the domains of education, hospitals, justice, the police, penal establishments, and railway and tramway operation, State [illegible] activity predominates. Care of the public health and [illegible] are shared with local government authorities and the Commonwealth government, social services other than those referred to above are now primarily the concern of the Commonwealth government, and the operation of public utilities is shared with local and semi-governmental authorities. Other activities of State governments pertain to lands and surveys, agriculture, forestry and public works, including roads (the latter shared with local and semi-governmental authorities).

Local Government.

The system of municipal government is broadly the same throughout the Commonwealth, although local government legislation is a state matter. Each state is sub-divided into areas known variously as municipalities, cities, boroughs, towns, shires, district councils or road districts, and

numbering in all about 970. Within these areas the management of road, street and bridge construction, health, sanitary and garbage services, water supply and sewerage, and electric light and gas undertakings, hospitals, fire brigades, tramways and omnibus services and harbours is, in varying degree, the duty of elected aldermen and councillors. The scope of their duties, however, differs considerably, for in all States the State government, either directly or through semi-governmental authorities also carries out these types of services. In some instances, *e.g.* in New South Wales, a number of local government authorities combine to conduct a public undertaking such as the supply of water or electricity.

Diplomatic Representatives.

Countries	British Commonwealth and Foreign Representatives	Australian Representatives
Belgium [3]	Felix F. A. Jansen	—
Brazil [3]	José Cochrane de Alencar	P. R. Heydon
Canada [1]	C. Fraser Elliott, C.M.G., K.C.	F. M. Forde

Area and Population.

States and territories (capitals in brackets)	Area (sq. miles)	Estimated population (30 June, 1950)[1]			
		Males	Females	Total	Per 100 sq. miles
New South Wales (Sydney)	309,433	1,621,456	1,603,786	3,225,242	1,042
Victoria (Melbourne)	87,884	1,099,575	1,103,294	2,202,869	2,507
Queensland (Brisbane)	670,500	605,904	577,888	1,183,792	177
South Australia (Adelaide)	380,070	349,680	350,577	700,257	184
Western Australia (Perth)	975,920	286,803	271,115	557,918	57
Tasmania (Hobart)	26,215	143,226	136,160	279,386	1,066
Northern Territory (Darwin)	523,620	9,639	5,664	15,303	3
Australian Capital Territory (Canberra)	939	10,886	9,886	20,772	2,212
Total	2,974,581	4,127,169	4,058,370	8,185,539	275

[1] Does not include full blood aboriginals. Those in employment camps, etc, numbered 23,869 at the last census. The nomadic habits of the tribes in the wild state render close computation difficult. Half-castes numbered 27,179 in 1947.

The number of occupied dwellings in Australia (at 1947 census) was 1,907,895, distributed as follows:—New South Wales, 746,343; Victoria, 527,406; Queensland, 272,045; South Australia, 168,538; Western Australia, 124,767; Tasmania, 62,484: Northern Territory, 2,697; Australian Capital Territory, 3,615. Of the grand total, 1,873,623 were private dwellings. There were also 47,041 unoccupied dwellings and 34,758 being built. New houses completed numbered 32,607 in 1946–47; 43,503 in 1947–48; 51,339 in 1948–49; 55,485 in 1949–50.

Vital statistics for 1949 :—

States and territories	Marriages	Divorces (including judicial separations)	Births	Deaths	Net migration	Infantile mortality rate (per 1,000 live births)
New South Wales	28,757	2,660	68,812	29,364	74,143	27·29
Victoria	20,066	1,780	46,873	21,991	33,134	21·89
Queensland	10,234	732	27,748	10,161	10,148	24·72
South Australia	6,247	588	16,042	6,373	12,277	27·68
Western Australia	4,951	569	13,511	4,790	13,764	26·42
Tasmania	2,422	266	7,110	2,389	4,382	23·91
Northern Territory	130	7	346	92	1,102	37·57
Aust. Cap. Terr.	192	19	819	100	1,051	15·87
Total	72,999	6,621	181,261	75,260	150,001	25·31

The birth rate in 1949 was 22 91 births per 1,000 of mean population; rate of marriages 9·23 per 1,000 of mean population; rate of mortality, 9·51 per 1,000 of mean population.

Oversea arrivals during 1949 numbered 233,135 and departures 83,134. Of these, 167,727 were permanent new arrivals and 18,457 Australian residents departing permanently. The resulting net permanent gain in population of 149,270 persons was the largest recorded since this basis of classification was introduced in 1924.

Religion.

Under the constitution the Commonwealth cannot make any law to establish any religion, to impose any religious observance or to prohibit the

free exercise of any religion, nor can it require a religious test as qualification for office or public trust under the Commonwealth. The figures in the table refer to those religions with the largest numbers of adherents at the time of the census of 1947. The census question on religion was not obligatory, however, and no reply was made in respect of 824,824 persons. In 1949, the Society of Friends had 696 members.

States and territories	Church of England	Roman Catholic [1]	Methodist	Presbyterian	Other Christian	Non Christian	Total

[1] Includes Catholics (so described).
[2] Excludes indefinite, 18,708; no religion, 26,328; no reply, 824,824.

Education.

The 1939–45 war, with the necessity for the technical training of civilian and service personnel, first brought the Commonwealth to any extent into the field of education. Later incursions were brought about by the need for advice on the question of man-power in relation to the training of university students and to arrange for the training of graduates for national service (Universities Commission). Post-war developments are the Commonwealth Reconstruction Training Scheme, the constitution of the Commonwealth Office of Education (an advisory and research body maintaining liaison with other countries and the State systems) and preliminary steps in the establishment at Canberra of the Australian National University. During 1949–50, the Commonwealth government spent £11,953,000 on education, research, etc.

Primary and secondary education is undertaken by the State, sometimes termed 'public,' schools and the so-called 'private' schools, the bulk of which, though privately managed, cater for all classes of the community. They include the church schools, the most numerous being those of the Roman Catholics. The following is a summary for 1948 of State and private school education:—

States and territories	Schools		Teachers		Scholars (average weekly enrolment)		Net expenditure on State schools	Net State expenditure on education, science, art
	State	Private	State	Private	State	Private		
	No.	No.	No.	No.	No.	No.	£	£
N.S.W.[1] .	2,618	720	12,243	5,591	348,855	114,066	9,135,065	11,793,207

North. Terr.	5	2	29	11	993	302	27,370	27,370
Total .	7,969	1,835	33,271	12,425	869,906	281,056	23,187,981	29,654,220

[1] Includes Australian Capital Territory. [2] 1947.

This table excludes, in general, technical education, but expenditure on this is included in the last column, together with expenditure on universities, agricultural education, public libraries, museums, etc. Commonwealth government and private school expenditure is not included. There is a university in each of the States and technical education is provided for in more than a hundred State schools and colleges.

There were, in 1950, 1,656 cinemas with a seating capacity of 1,164,035.

Social Welfare.

The Commonwealth Social Services Consolidation Act, 1947–50, provides for the payment of invalid and age pensions, but so that the amount shall not exceed £130 a year, nor the pensioner's whole income (including the pension) exceed £208 a year. By special provision, a permanently blind person may receive an income of £416. Age pensions are granted upon application to persons who are at least 65 years of age and have lived in Australia or Australian territory at least 20 years. In the case of women, however, and of men subject to certain disability, the pension may be paid from age 60. Invalid pensions are granted to persons who have lived at least 5 years in Australia, have there become totally incapacitated, and have no other sufficient means of support. Funeral benefits in respect of pensioners' deaths totalled £245,822 in 1949–50.

On 10 Oct., 1912, a Commonwealth Maternity Allowance Act was passed providing for the payment, subject to a means test, of an allowance of £5 in respect of every viable child born (alive or dead) in Australia. From 1 July, 1943, the means test was abolished. From 1 July, 1947, the rates are as follows:—Where there are no other children under 16 years, £15; where there are one or two other children, £16; where there are three or more other children, £17 10*s.*; in addition, £5 is paid for each additional child born at a birth. To 30 June, 1950, 4,590,315 claims were paid, and the aggregate expenditure totalled £35,754,473.

A Commonwealth Child Endowment Act came into operation on 1 July, 1941. Payments are paid for children under 16 years at rate of 5*s.* per week for first or only child and 10*s.* per week for other children.

A Commonwealth Widows' Pensions Act was introduced in 1942, and operated from 1942–43. Subject to certain conditions, it provides for the payment of £2 15*s.* per week to widows maintaining one or more children under 16 years of age, and of £2 2*s.* per week to widows 50 years and over not maintaining children. A special allowance of £2 7*s.* 6*d.* per week, for not more than 26 weeks following death of husband, is also provided for widows under 50 years in necessitous circumstances not maintaining children. An allowance of £2 2*s.* per week is made to a woman whose husband has been imprisoned for more than 6 months. The cost of widows' pensions in 1949–50 was £4,420,566.

The Commonwealth Unemployment and Sickness Benefits Act came into operation on 1 July, 1945. Persons eligible must be between the ages of 16 and 65 (males) and 16 and 60 (females), and not qualified to receive age, invalid, widows' or service pensions, and must have resided in Australia for 12 months preceding the claim, or they must satisfy the Director-General of Social Services that they intend to reside permanently in Australia. The number of claims and amounts paid during 1949–50 were:—Unemployment, 161,101, £1,266,072; sickness, 63,842, £816,014; special, 4,660, £424,338 (including special benefits paid to new Australians).

The Hospital Benefit Act was introduced in 1945 and operated early in 1946, whereby the Commonwealth Government pays 8*s.* per day for

patients in public and private wards of public hospitals provided the hospital does not charge fees to patients in the public wards. The cost of this service in 1949-50 was £6,320,164.

The Tuberculosis Act, introduced in 1945, amended in 1948, provides for diagnosis, treatment, after care and allowances to sufferers and their dependents. The Commonwealth government meets approved additional maintenance cost and provides all capital money required. Cost of this service in 1949–50 was £534,550.

Provision was made in 1935–36 for the payment of service pensions to (*a*) aged ex-members of the forces, (*b*) to those permanently unemployable, (*c*) those suffering from tuberculosis and in certain cases to dependants of ex-soldiers. The number of pensioners (dependants stated in brackets) in each class at 30 June, 1950, were:—(*a*) 7,448; (*b*) 4,608 (3,598); (*c*) 299 (385).

[3] Endowed children, 1,813,925.
[4] Includes 324,984, 1939–45 war.

Justice.

The judicial power of the Commonwealth is vested in a federal supreme court (the High Court of Australia), consisting of a chief justice and 6 justices, appointed by the Governor-General in Council. The High Court has original jurisdiction in all matters arising under treaties, between states of the Commonwealth, or affecting representatives of other countries, as well as in other matters as empowered by the Parliament. It may also hear and determine appeals from judgments of its own justices exercising original jurisdiction, and from judgments of any other federal court, or of the Supreme Court of any state, subject to certain rights of final appeal to the King in Council. The Commonwealth Court of Conciliation and Arbitration consists of a chief judge and 3 other judges, a chief conciliation commissioner

and 16 conciliation commissioners. The Federal Court of Bankruptcy is presided over by a judge.

Finance.

COMMONWEALTH.

In 1929, under a financial agreement between the Commonwealth and States, approved by a referendum, the Commonwealth took over all state debts existing on 30 June, 1927, and agreed to pay £7,584,912 a year for 58 years towards the interest charges thereon, and to make substantial contributions towards a sinking fund to extinguish existing debts in 58 years and future debts in 53 years. The Commonwealth Government arranges all borrowing for both Commonwealth and states through a loan council consisting of representatives of Commonwealth and state governments. By a war-time arrangement between the Commonwealth and state governments the Commonwealth Government alone levies taxes on incomes. In return for vacating this field of taxation, the states are reimbursed by a grant from the Commonwealth out of revenue received. This arrangement has now been continued indefinitely.

From loan [4]	11,015,000	13,305,000	14,492,000	17,215,000
Primary production self-balancing items [5]	18,819,507	8,913,981	19,329,071	14,072,581

[1] Part included with Postmaster-General's Department, balance included in Wireless Broadcasting Trust Account.
[2] Includes Capital Works and Services.
[3] This amount represents the payments to the fund to meet future benefits or the withdrawals from the fund for current expenditure (Cr.).
[4] Advances to States for housing.
[5] In addition, the following amounts for assistance to primary producers were provided under war services, £7,719,605 during 1946–47; £10,808,117 during 1947–48; £8,248,323 during 1948–49; £13,070,693 during 1949–50.

The estimated receipts, excluding loan, for 1950–51 amount to £A790,000,000 and the expenditure for purposes other than defence services £A656,000,000 (including £A51,000,000 self-balancing items connected with assistance to primary production). The estimated defence expenditure £A133,000,000 includes an estimated expenditure on the stockpiling of certain strategic raw materials and equipment of £A50,000,000.

The following table shows the public debt of the Commonwealth and the States at 30 June, 1950:—

Maturing in	Currency	Commonwealth	States	Total
London	£'000 Stg.	65,486	304,261	369,747
New York	£'000 [1]	15,731	24,440	40,171
Australia	£'000 Aust.	1,749,410	750,108	2,499,518
Total	£'000 [2]	1,830,627	1,078,809	2,909,436

[1] Payable in dollars which have been converted on the basis of $4·8665 to £.
[2] 'Face' or 'book' value, leaving out of account currency changes since the loans were floated.

The nominal annual interest payable (taking no account of exchange) was £85,576,759, an average rate of £2 18*s.* 10*d.* The nominal amount of interest payable in London amounted to £11,683,037 (excluding suspended interest on war debt due to British Government) and in New York to £1,596,525.

The average rate of interest on internal debt at 30 June, 1930, 1940, and 1950 was 5·27%, 3·62% and 2·90% respectively.

Debt per head of population at 30 June, 1950, was £355 8*s.* 9*d.*, while the annual interest charge, exclusive of exchange, and suspended interest of £3,919,774 on war debt due to British Government, amounted to £10 9*s.* 1*d.* per head.

STATES.

The following tables present a summary of the revenue and expenditure of the several States during 1949–50, showing, under general headings, the main sources of income and the main items of expenditure.

States	Revenue (£'000)				
	Taxation	Business undertakings	Commonwealth payments [1]	Lands and other	Total
New South Wales	11,936	50,879	31,754	11,935	106,504
Victoria	7,576	23,834	18,363	5,784	55,557
Queensland	4,649	15,460	12,739	4,271	37,119
South Australia	3,298	9,133	11,012	2,917	26,360
Western Australia	1,691	8,822	11,974	3,531	26,018
Tasmania	1,844	4	3,751	1,478	7,077
Total	30,994	108,132	89,593	29,916	258,635

[1] Includes special grants and other payments under the Tax Reimbursements Act.

States	Expenditure (£'000)				
	From revenue				From loan —Net expenditure on works
	Public debt charges	Business undertakings	Administration, works and social services	Total	
New South Wales	15,959	48,370	43,352	107,681	24,850
Victoria	9,295	21,420	25,101	55,816	17,870
Queensland	6,782	15,469	14,839	37,090	7,910
South Australia	5,628	9,934	10,988	26,550	9,968
Western Australia	4,659	10,908	10,427	25,994	8,105
Tasmania	1,676	715	4,953	7,344	4,880
Total	43,999	106,816	109,660	260,475	73,583

The aggregate revenue and expenditure (excluding loan) of Commonwealth and States combined during 1949–50 was, respectively, £746,300,000 and £747,100,000. Aggregate net loan expenditure on works was £116,265,000.

Defence.

The functions of the Department of Defence relate to defence policy and matters dealt with by the joint service machinery.

ARMY.

The military forces of Australia are administered by a Military Board, consisting of the Minister for the Army (President), the Chief of the General Staff, the Vice-Chief of the General Staff, the Adjutant-General, the Quartermaster-General, the Master-General of the Ordnance, the Citizen Force Member, a Finance Member, the Secretary of the Department of the Army, and a Secretary. The military forces consist of the Australian Regular Army and the Citizen Military Forces plus the Australian Cadet Corps.

The Australian Regular Army is organized in such a way as to enable it to carry out preparations for defence, and to form the nucleus for expansion in war-time.

Commencing on 1 May, 1951, all youths of 18 years of age who are British subjects in Australia are liable for National Service. In the case of the Army, this involves 14 weeks full-time military training in the first year, in training units specially raised, and this is followed by 3 years additional service in the Citizen Military Forces. The Australian Cadet Force is composed of students of educational establishments, and youths enrolled in detachments with C.M.F. units.

The Commonwealth of Australia is divided into 7 military districts, generally corresponding with the boundaries of the states. They are Northern, Eastern, Southern, Central, Western, Tasmania and Northern Territory, with headquarters at Brisbane, Sydney, Melbourne, Adelaide, Perth, Hobart and Darwin respectively. New Guinea is the responsibility of Northern Command. The organization is territorial, and the divisions are based upon infantry units.

Navy.

The Royal Australian Navy was established in 1911, with the provision of a squadron, commanded by a rear-admiral, and wholly maintained by the Commonwealth of Australia. On 1 Jan., 1949, the sea-going command was renamed from Squadron to Fleet. The policy has been to maintain a force as an active unit in the scheme of British Commonwealth Defence. The Naval Board, which is responsible for administration and control, consists of the Minister for the Navy, 4 Naval Members, 1 Finance Member and the Secretary, Department of the Navy (*ex officio*), the seat of administration being at Melbourne.

Following is a table of principal ships of the Royal Australian Navy : —

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Turrets				
					Light Aircraft Carrier.			
		Tons	inches	inches		21in.		Knots
1948	Sydney (capacity 34 aircraft) . .	14,000	—	—	30 40-mm. A.A.	—	40,000	25
					Cruisers.			
1936	Hobart . .	7,105	3	1	6 6-in.; 8 4-in. A.A.	8	72,000	32½
1929	Shropshire . .	9,830	—	2	8 8-in.; 8 4-in. A.A.	8	80,000	32¼
1928	Australia . .	10,000	5	2	6 8-in.; 8 4-in. A.A.	—	80,000	31½

There are also 10 destroyers (5 of which are being converted to fast anti-submarine frigates), 14 frigates, 32 fleet minesweepers, 3 L.S.T.s, a depot ship, 4 motor launches and a number of fleet auxiliaries.

Naval aviation is an integral part of the Navy, and a naval air station (H.M.A.S. *Albatross*) was established at Nowra, N.S.W., in Aug., 1948. A naval base is being established at Manus Island, in the Admiralty group.

Under the current 5-year defence programme (from July, 1947),

£A95,550,000 is being spent on naval defence. Of this amount £12,045,000 is being expended on the destroyer building programme and £A1 million on construction of frigates. Current estimates provide for the spending of £26,727,000 on Naval Aviation, £12,850,000 for capital expenditure and £13,877,000 for maintenance.

In addition to 2 'Battle' class destroyers (H.M.A.S. *Tobruk*, completed in May, 1950, and H.M.A.S. *Anzac*, completed in March, 1951), present plans provide for the building in Australian shipyards of 4 modern destroyers of the 'Daring' class; and it was announced in Aug., 1950, that 6 new fast anti-submarine frigates, to cost £12,000,000, are to be laid down. H.M.A. Naval Dockyard at Williamstown is responsible for half the programme in 2 'Daring' class and 3 fast frigates; the balance of construction is in the hands of Cockatoo Docks at Sydney. The current naval programme provides for a balanced force consisting of 2 light aircraft carriers, 3 cruisers and 9 modern destroyers, supported by frigates, minesweepers and auxiliaries, to a total of 116 vessels. The second of the R.A.N.'s light carriers, the *Majestic*, to be renamed H.M.A.S. *Melbourne*, is under construction in England. The destroyers *Quadrant*, *Quality*, *Queenborough*, *Quiberon* and *Quickmatch*, formerly in the Royal Navy and lent to Australia in 1943-45, were permanently transferred to the Royal Australian Navy in June, 1950, and are being converted to fast anti-submarine frigates.

The main repair base and store depot are at Sydney, where a graving dock, capable of accommodating battleships, was opened in March, 1945. An additional cruiser dock is at Brisbane.

The principal training establishment is at the Flinders Naval Depot, Victoria, and here the Royal Australian Naval College for the training of midshipmen is situated. Entry to the Naval College is by competitive examination, open to all boys on attaining the age of 13 years. There is also an intermediate entry available to boys of 15 years, special-entry candidatures are available to boys of 17–18 years. The personnel of the Navy is largely Australian-born, with some officers and ratings on loan from the Royal Navy, and many ex-Royal Navy personnel who have joined since 1945. Period of first engagement for a rating is 6 or 12 years. Manpower is to be built up to 15,173 officers and men by 1952. The serving strength as at June, 1950, comprised 1,018 officers, 9,198 ratings and 102 cadet midshipmen in training at the Naval College. The second year of resumed Reserve Training (1951) provided for the training of 5,000 men, including 500 officers.

Air Force.

The Royal Australian Air Force is administered by the Air Board which consists of the Chief of the Air Staff, the Air Member for Personnel, the Air Member for Technical Services, the Air Member for Supply and Equipment, the Citizen Air Force Member, the Finance Member, the Secretary, Department of Air (*ex officio*), and a Secretary.

The total strength of the R.A.A.F. as at 1 Sept., 1950, was 1,216 officers and 8,941 airmen.

Production.

At 31 Dec., 1949, 687,697,000 acres, representing 36·1% of the total area of Australia, were either unoccupied or occupied by the Crown; only 7·6% had been actually alienated (143,872,000 acres); 1·9% (36,006,000 acres) was in process of alienation, and 54·4% (1,036,158,000 acres) was held under the various forms of leases and licences.

The area of crops (distinguishing the principal crops) in Australia and the yield in 1949–50 were as follows :—

Crops	Total acreage	Total yield	Yield per acre
	'000 acres	'000 bushels	bushels
Wheat (grain)	12,210	218,221	17 83
Oats (grain)	1,748	27,421	15 69
Barley (grain)	1,040	19,543	18 79
Maize (grain)	194	6,313	32 53
		'000 tons	tons
Hay	1,605	2,437	1·52
Potatoes (ordinary)	134	473	3 53
Sugar cane [1]	281	6,849	24 35
Vineyards	136	—[2]	—[2]
		'000 gallons	gallons
Wine	59 [3]	32,631	552 26 [4]
Orchards and fruit gardens	281	—	—

[1] Sugar cane for crushing.

[2] [illegible] ield, 1 04); table grapes, 12,898 tons (yield, 1 57); wine [illegible] d, 2·89).

[4] [illegible] vines.

The following summary shows, for 1949–50, or the latest year available, some of the more important items or classes of production, classified by States :—

Production, 1949–50	N.S.W.	Vic	Q'ld.	S.A.	W.A.	Tas.	Australia (incl. territories)
Area of crops ('000 acres)	5,639	4,479	2,057	3,617	4,405	368	20,574 [1]
Production of wheat ('000 bush)	81,939	57,434	11,778	28,357	38,500	127	218,313
Number of sheep ('000)	53,298	19,161	17,582	9,477	10,923	2,170	112,891
Production of wool ('000 lb.)	515,043	215,889	153,396	106,394	97,750	16,958	1,107,953
Number of cattle ('000)	3,440	2,231	6,305	464	865	275	14,640
Production of factory butter (tons)	36,812	63,499	48,196	8,249	6,702	4,974	168,432
Production of factory cheese (tons)	2,806	21,202	9,050	10,584	703	388	44,823
Number of pigs ('000)	333	213	392	70	79	36	1,123
Production of all meat (tons, bone-in weight)	327,764	241,270	258,024	78,863	65,715	23,273	1,050,899
Production of minerals (value £'000)	36,276	2,749	11,868	2,430	9,463	4,630	68,016
Total primary production [2] (value £'000)	209,172	128,709	100,045	58,389	50,808	18,955	566,078 [3]
Factory production [2] (value £'000)	251,199	182,760	53,540	43,668	21,173	16,075	548,415 [3]

[1] Excluding Northern Territory.
[2] 1948–49.
[3] Excluding Northern Territory and Australian Capital Territory.

The mineral output was valued as follows in 1948 and 1949 (in £A) :—

Mineral	1948	1949	Mineral	1948	1949
Gold . . .	9,530,275	10,811,639	Coal (black) .	18,805,433	20,964,789
Silver and lead .	21,130,327	20,271,820			
Copper . .	1,744,237	2,076,786			
Tin . . .	999,731	1,081,747	Total . .	64,422,225	68,015,890

Gold production in 1947 was 937,654 fine oz.; in 1948, 890,805 fine oz., and in 1949, 899,057 fine oz. (valued at £A10,811,639). Black coal, 14,831,000 tons mined in 1947; 14,781,000 tons in 1948, and 14,106,000 tons in 1949.

Statistics of the manufacturing industries in Australia in 1948–49 are given as follows :—Number of establishments, 10,070; workers employed, 890,232; salaries and wages paid, £339,287,160; value of plant and machinery, land and buildings, £479,234,068; value of materials used, £810,547,704; value of production, £568,415,358; value of output, £1,425,024,884.

The estimated net value (in £A'000) of the products of Australia was :—

Products	1943–44	1944–45	1945–46	1946–47	1947–48	1948–49
Agriculture . . .	82,140	72,636	101,627	99,042	208,745	151,464
Pastoral . . .	108,406	98,410	86,312	130,207	193.048	241,739
Dairying, poultry, bees .	57,944	61,500	65,082	65,436	78,022	89,257
Trapping, forestry, fisheries	20,140	19,973	23,691	27,368	28,574	32 265
Mining . . .	27,612	26,831	26,288	32,486	42,581	48,353
Manufacturing .	366,236	362,284	352,323	410,862	489,297	568,415
Total . . .	662,478	641,664	658,323	765,401	1,040 267	1,134,493

Labour and Employment.

The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organization, which, in its turn, may be merely a branch of a British or international union. In 1949 there were 323 separate unions in Australia, with 2,503 branches having a total of 1,497,924 members.

In 1927 a central organization called the Australasian Council of Trade Unions came into being and is based on the Metropolitan Trades and Labour Councils in each state. It is the first interstate body in Australia with authority to deal with industrial matters of an interstate character affecting the trade union movement generally. It is also the body responsible for submitting to the Commonwealth government the names of persons suitable for selection as the Australian workers' delegate to the annual International Labour Conference.

The estimated Australian work force in June, 1947, numbering 3,196,400 persons (2,479.300 males and 717,100 females), comprised employers and self-employed 608,400, wage and salary earners 2,447,500, defence forces (including those abroad) 55.500 and unemployed 82,800. Persons engaged in rural industries numbered 498,000 and in other industries 2,698,400.

Commerce.

Throughout Australia there are uniform customs duties, and trade between the states is free. For 1949–50, the gross revenue collected from customs duties amounted to £81,446,000, and from excise to £66,206,000. The total net revenue from customs and excise for 1949–50, after allowing for drawbacks and repayments, was £143,863,000.

The following table shows for 5 years the value of the total imports and exports in £A'000 (f.o.b.) :—

Years	Imports	Exports [1]		
		Australian produce	Other produce	Total
1945-46	178,857	218,821	4,467	223,288
1946-47	209,485	304,454	4,575	309,029
1947-48	339,746	404,716	5,238	409,954
1948-49	415,194	537,570	5,103	542,673
1949-50	538,119	608,465	5,235	613,700

[1] Excluding ships' stores.

The customs tariff of 1933–49 provides for preference to goods produced in and shipped from the United Kingdom to Australia, and for reciprocal tariff agreements with other countries. A trade agreement signed at the closing session of the Imperial Economic Conference at Ottawa, Canada, on 20 Aug., 1932, provides for increased preference between the United Kingdom and the Commonwealth of Australia. On 1 Sept., 1922, a reciprocal tariff agreement, revised between 1922 and 1940, came into operation between Australia and New Zealand. The agreement made with Canada on 1 Oct., 1925, was considerably extended by the Customs Tariff (Canadian Preference) Act 1934–39.

Principal commodities imported and exported in 1949–50 :—

Imports	Value (£A'000 f.o.b.)	Exports	Value (£A'000 f.o.b.)	Quantity ('000)
Tea	8,395	Butter	24,653	177,340 lb.
Tobacco and preparations thereof	12,395	Cheese	4,145	52,588 „
Towels and towelling	2,206	Eggs (in shell)	2,949	23,047 doz.
Trimmings and ornaments	2,572	Meats	34,978	—
Piece-goods :		Milk and cream	6,710	118,033 lb.
Canvas and duck	1,313	Fruits, dried	2,888	90,101 „
Cotton and linen	26,391	Fruits, fresh	3,934	1,902 ctl.
Silk and rayon	14,608	Fruits preserved in liquid	4,018	101,367 lb.
Woollen [illegible] wool	4,896	Wheat	62,173	78,426 bu.
Sewing silk	1,618	Flour	26,333	13,842 cwt.
[illegible]	7,425	Jams and jellies	2,473	65,229 lb.
[illegible]	6,138	Hides and skins	15,153	—
Bags and sacks	13,006	Wool	313,116	1,411,907 „
Yarns : artificial silk, cotton, wool, etc.	6,273	Tallow, unrefined	1,868	408 cwt.
Electrical machinery, etc.	24,510	Coal	206	68 tons
Tools of trade	3,018	Concentrates and ores	5,821	—
Timber, undressed	5,609	Leather	1,855	—
Glass and glassware	3,079	Timber, undressed	1,911	—
Paper, printing	7,220	Soap	195	—
Stationery, books, etc.	5,572	Sugar (cane)	17,346	433 tons
Drugs, chemicals, etc.	8,306	Sandalwood	46	—
Films for cinematographs	1,059	Tobacco, cigarettes, etc.	308	—
Surgical and dental instruments	1,392	Pearlshell	625	34 cwt.
Fertilizers	3,785	Wine	516	1,103 gal.
Fish preserved in tins	2,093	Barley	6,433	5,351 ctl.
Motive-power machinery (excluding electric)	27,445	Biscuits	101	1,853 lb.
Motor vehicles and parts	73,136	Rice	1,181	—
Timber, dressed	1,820	Boots and shoes	138	—
Hides and skins	1,881	Vegetables preserved in liquid	1,256	—
Plated ware and cutlery	1,787	Lead, pig	12,521	2,441 cwt.
Paints and varnishes	1,812	Zinc, bar block, etc.	3,404	788 „
Hessians and jute piece-goods	1,787			
Oils in bulk :				
Kerosene	4,540			
Lubricating (mineral)	4,611			
Petroleum, including crude	28,945			
Residual and solar	11 287			

Total trade (£A'000 f.o.b.) with the more important countries (imports according to country of origin) :—

From or to	Imports (1948-49)	Imports (1949-50)	Exports (1948-49)	Exports (1949-50)
United Kingdom	209,312	278,798	229,795	237,526
Canada	11,952	13,276	8,647	9,030
New Zealand	3,970	4,968	17,346	21,303
India	25,874	27,664	25,985	37,034
Ceylon	7,511	8,937	8,800	6,070
Malaya, Federation of	4,028	4,926	6,101	5,566

[1] Capital was reduced during the period 1 July, 1927, to 1 July, 1937, by the following amounts: Victoria, £25,700,000; Queensland, £28,000,000; South Australia, £3,100,000; Tasmania, £4,700,000.

[2] Includes proportion of cost of Brisbane–Grafton standard gauge line not apportioned to states.

Private railways in Australia, open for general traffic, 1948–49, 647 miles.

The state railway gauge is :—In New South Wales, 4 ft. 8½ in.; in Victoria, 5 ft. 3 in. (114 miles, 2 ft. 6 in.); in Queensland, 3 ft. 6 in. (69 miles, 4 ft. 8½ in.,

and 30 miles, 2 ft. 0 in.); in South Australia, 5 ft. 3 in. for 1,480 miles, the rest, 3 ft. 6 in.; in West Australia, 3 ft. 6 in., and in Tasmania, 3 ft. 6 in. Of the Commonwealth lines, the gauge of the Trans-Australian and Australian Capital Territory is 4 ft. 8½ in., and that of the Central Australia and North Australia is 3 ft. 6 in. The Railway Standardization Agreement Act of 1946 authorized the conversion to a standard gauge of 4 ft. 8½ in. of the railway systems of Victoria and South Australia, the provision for the completion of the north to south railway and the conversion of existing systems to a standard 4 ft. 8½ in. gauge railway. The terminus of the North Australia railway is at Birdum (316 miles from Darwin), while the Central Australia railway extends as far north as Alice Springs.

Posts and Telegraphs.

Postal and telegraph business, year ended 30 June, 1949: number of post and receiving offices, 8,260. Earnings, 1948–49:—Postal, £14,023,000; telegraph, £3,525,000; telephone, £15,659,000; total revenue, £33,207,000. Working expenses:—Postal, £14,246,000; telegraph, £4,537,000; telephone, £14,849,000; total, £33,632,000

At 30 June, 1949, 6,584 telephone exchanges, with 734,427 lines and 1,028,134 instruments connected, were in operation.

Civil Aviation.

Civil flying in the Commonwealth and territories is subject to legislative control by the Commonwealth Government. The administration of the Air Navigation Act and Regulations is a function of the Civil Aviation Department under the Minister of Civil Aviation. The permanent head of the department is the Director-General of Civil Aviation.

At 30 June, 1949, there were 48,239 route miles of regular internal air services in Australia. Hours flown during 1948–49 numbered 224,853. The total mileage flown was 35,242,000 miles. Passengers carried numbered 1,409,300; weight of goods carried was 33,381 tons, and gross weight of mails was 1,580 tons.

Australian overseas services operated 29,695 route miles at 30 June, 1949. During 1948–49, hours flown numbered 40,262; miles flown, 7,982,000; payin[illegible] . . 15,296; freight, 765 tons; mail, 577 tons.

Civil aviation [illegible] the year 1948–49 was £9,706,230 (including £4,678,419 on new works).

At 30 June, 1949, there were 222 licensed public aerodromes under the control of local authorities. The total number of recognized civil landing grounds in Australia at 30 June, 1949, was 407.

Roads and Motor Vehicles.

The length of all roads in Australia used for general traffic is roughly 500,000 miles, of which about one-half is natural surface only, about one-quarter is formed only, about one-fifth is macadam and other similar composition, whilst the balance is bituminous, concrete, wood or stone composition.

At 30 June, 1949, 1,224,777 motor vehicles, including 655,497 motor cars, 117,133 motor cycles and 452,147 commercial vehicles were registered in Australia. The revenue derived from registration fees and motor tax for the year was £8,276,780, drivers' and riders' licences £713,509, and miscellaneous, £1,442,796. The registrations were equivalent to 154·8 vehicles per 1,000 of population. New vehicles registered in 1948–49 numbered 66,471 cars, 36,678 commercial vehicles and 22,226 motor cycles.

Wireless Broadcasting.

Wireless broadcasting stations are in operation in all the state capitals and in other regional areas throughout the various states of the Commonwealth. At 30 June, 1950, 2,029,628 wireless broadcast listeners' licences had been issued; revenue from fees amounted to £1,898,865 during 1948–49. The National Broadcasting Service controlled by the Australian Broadcasting Commission and the Postmaster-General's Department now operates 37 medium-wave and 8 short-wave broadcasting stations. In addition 102 other medium-wave commercial broadcasting stations were licensed at 30 June, 1949. Two beam stations have been erected, one for direct communication with London, and the other for direct communication with North America. In addition to the above mentioned broadcasting stations 3 short-wave broadcasting stations are operated by the Australian Broadcasting Commission for oversea services only.

Money and Banking.

The banking system in Australia comprises the Commonwealth Bank of Australia (the central bank), the trading banks, the rural and agricultural banks and the savings banks. Money in circulation comprises legal tender notes issued by the Note Issue Department of the Commonwealth Bank of Australia and silver and bronze coinage issued by the Commonwealth Treasury.

The Commonwealth Bank commenced savings bank business on 15 July, 1912, and general banking business on 20 Jan., 1913. During the 1914–18 war the Bank expanded rapidly and assisted the Commonwealth Government in its war finance. In 1920 the control of the Australian note issue was transferred from the Commonwealth Treasurer to the Bank. In 1924 the management of the Bank was placed under a Board of Directors and the legislative framework set up to enable the Commonwealth Bank to operate as a central reserve bank. However, it was not until 1929, with the onset of the depression, that the Commonwealth Bank started to develop as a central reserve bank. In 1928 the Commonwealth Savings Bank was established as a separate institution and the savings bank business of the Commonwealth Bank was transferred to that institution. On 21 Aug., 1945, the Commonwealth Bank was reconstituted under the control of a Governor with an Advisory Council in accordance with the provisions of the Commonwealth Bank Act 1945. Under this act it is the duty of the Commonwealth Bank to pursue a monetary and banking policy directed to the greatest advantage of the people of Australia and of exercising its powers in such a manner as, in the opinion of the Bank, will best contribute to:—(*a*) the stability of the currency of Australia; (*b*) the maintenance of full employment in Australia, and (*c*) the economic prosperity and welfare of the people of Australia. The Commonwealth Bank has been given extensive powers, both under this Act and the Banking Act, 1945, to perform its functions as a central bank.

At 30 June, 1950, the capital of the Commonwealth Bank totalled £17,553,781 and reserve funds £8,374,122. The capital was distributed as follows:—Central banking business, £4,000,000; general banking division, £4,000,000; rural credits department, £2,000,000; mortgage bank department, £3,553,781, and industrial finance department, £4,000.000. Reserve funds held were:—Central banking business, £1,423,372; note issue department, £4,754,954; general banking division, £957,760; rural credits department, £564,542; mortgage bank department, £171,076, and industrial finance department, £502,418. Profits for the year ended 30 June, 1950

(including all branches except the note issue department), amounted to £1,793,264.

The average deposits of the trading banks with the Commonwealth Bank (Central Banking Business) for the month of June, 1950, were £447,845,000 in special accounts and £28,714,000 in other accounts. The average deposits with the trading department of the Commonwealth Bank for the same month amounted to £87,821,000, of which £71,538,000 were non-interest-bearing deposits.

In addition to the Commonwealth Bank, there are 16 other banks providing general banking facilities. Three of these banks are state government institutions, the business of which is mainly directed to financing Australian rural industries. Of the remaining 13 banks, 3 are branches of overseas banks and 10 are joint-stock banks financed by capital subscribed in Australia or the United Kingdom. Eight of the 10 joint-stock banks have branches throughout Australia. At 30 June, 1950, the 17 banks operating in Australia provided full banking facilities at 2,940 branches situated in all parts of Australia.

Including deposits with the trading department of the Commonwealth Bank, the average deposits in Australia with all cheque-paying banks for June, 1950, amounted to £1,131,867,000, while the average of advances made by the banks amounted to £574,211,000. The average of total assets in Australia for the same period was £1,293,945,000.

There are 5 savings banks operating in Australia. These include the Commonwealth Savings Bank with branches throughout Australia, the State Savings Banks in Victoria and South Australia and 2 Trustee Savings Banks in Tasmania. At 30 June, 1950, these savings banks provided savings bank facilities at 763 branches and 5,011 agencies (mostly at post offices) throughout Australia and held deposits amounting to £762,085,000. Sales of savings certificates were discontinued after 31 Jan., 1949; net sales of saving certificates at 30 June, 1950, amounted to £55,025,000.

In 1948, there were 21 companies registered under the Life Insurance Act, 1945, transacting life insurance business in Australia; in addition there were 2 State government institutions. Receipts, £73,540,000; expenditure, £40,975,000; liabilities, £493,339,000 (including Life Assurance and Annuity Funds, £465,986,000).

The following table is a summary of banking and assurance business (in £'000) in the several States of the Commonwealth :—

Particulars	N.S.W.	Vic.	Q'ld.	S.A.	W.A.	Tas.	Australia (incl. territories)
All cheque-paying banks [1]:							
Deposits bearing interest	101,188	89,149	33,219	25,916	13,255	6,166	270,016
Deposits not bearing interest	369,532	255,211	113,370	53,719	47,388	18,468	861,851
Advances	241,965	182,457	77,168	27,096	31,877	12,658	574,211
Savings bank deposits [2]	258,874	257,121	92,201	87,695	39,612	24,272	762,085
Life assurance [3]:							
New policies issued (value)							
Ordinary	49,222	41,407	22,472	11,958	8,776	5,029	140,261
Industrial	11,332	9,202	3,884	2,542	1,937	741	29,690
Policies existing (value)							
Ordinary	337,395	274,736	149,082	81,114	55,606	28,522	930,798
Industrial	84,404	72 646	26.552	21.031	13.563	5,525	224,011

[1] Weekly averages for June, 1950. [2] At 30 June, 1950.
[3] 1949. Number of policies: (new) ordinary, 253,650; industrial, 300,988; (existing) ordinary, 2,224,848; industrial, 3,724,834.

Australian notes, issued by the note issue department of the Commonwealth Bank, are legal tender throughout Australia. The total value of notes in circulation on 28 June, 1950, was £231,313,000, of which £203,245,000 were held by the public. Notes have been issued in denominations of 10*s*., £1, £5, £10, £20, £50, £100 and £1,000.

Coins in circulation in Australia are Australian silver and bronze token coins issued by the Commonwealth Treasury. The silver coins have been issued in denominations of 5*s*., 2*s*., 1*s*., 6*d*. and 3*d*., and bronze coins in denominations of 1*d*. and ½*d*. Coins to the value of £1,228,000 were issued during the year ended 30 June, 1950, bringing the total issued to date to £31,778,000, after deduction of £5,227,000 for coin withdrawn.

There are 2 mints in Australia, at Melbourne (opened in 1872) and Perth (1899). They accept gold for refining and issue gold bullion for use in the commercial arts and for export. Australian silver and bronze coins have been minted at the Melbourne mint since 1916 and the Perth mint since 1942 on behalf of the Commonwealth Treasury.

NORFOLK ISLAND.—29° S. lat., 168° E. long., area 13 square miles, population (30 June, 1949) 1,148 (620 males and 528 females). The island was formerly part of the colony of New South Wales and then of Van Dieman's Land. It has been a distinct settlement since 1856, and under an Order in Council of 1900 was governed by the Governor of New South Wales; but from 1 July, 1914, the affairs of the island have been administered by the Commonwealth Government. The island, which is very picturesque and possesses a delightful climate, coupled with a fertile soil, is especially suitable for the cultivation of citrus fruits, bananas and coffee. In 1948–49 the imports (mostly from the Commonwealth) were valued at £131,230, and the exports, £19,336.

Books of Reference on the Commonwealth of Australia.

STATISTICAL INFORMATION.—The Commonwealth Bureau of Census and Statistics (West Block, Canberra, A.C.T.) was established in 1906. An outline of the development of statistics in Australia is published in the Official Year Book, No. 19. A complete list of publications can be obtained on request. *Commonwealth Statistician.*—Dr. Roland Wilson, C.B.E.

The principal publications of the Bureau are :—

Official Year Book of the Commonwealth of Australia. 1907 to date.
Pocket Compendium of Australian Statistics. 1913 to date.
Quarterly Summary of Australian Statistics. Dec., 1917 to date.
Monthly Review of Business Statistics. Oct., 1937 to date.

1. OTHER OFFICIAL PUBLICATIONS.

Annual Catalogue of Australian Publications. (Commonwealth National Library.) Canberra, No. 1, 1936, to date. (This includes a complete list of official publications of the Commonwealth and all states for each year to 1940 and for 1945–46.)

Select list of representative works dealing with Australia. (Commonwealth National Library.) Canberra, 1934 to date.

AUSTRALIAN CAPITAL TERRITORY.

Government.

THE area which is now the Australian Capital Territory was first visited by white men in 1820 and settlement commenced in 1824 or 1825. Until its selection as the seat of government it was a quiet pastoral and agricultural community with a few large holdings and a sprinkling of smaller settlers.

The constitution of the Commonwealth provided (Sec. 125) that the seat of government should be selected by parliament and that it should be within New South Wales but at least 100 miles from Sydney. After prolonged discussion, during which the claims of a great number of sites were put forward, the Canberra site was adopted by the Seat of Government Act, 1908. The present site, together with an area for a port at Jervis Bay, was surrendered by the state and accepted by the Commonwealth in 1909, and by subsequent proclamation the territory became vested in the Commonwealth from 1 Jan., 1911. In 1911 an international competition was held for the city plan. The plan chosen was that of W. Burley Griffin, of Chicago. Construction was delayed by the first world war, and it was not until 1927 that, with the transfer of parliament and certain departments, Canberra became in fact the seat of government. All major departments, with the exception of the war departments and the post office, have now their headquarters in Canberra.

The general administration of the territory is in the hands of the Minister for the Interior, but certain specific services are undertaken by the Department of Health, the Department of Works and Housing, and the Attorney-General. The Minister is advised on matters of local concern by an advisory council, consisting of 4 official and 3 elected members.

Area and Population.

The area of the Australian Capital Territory is 911 square miles, of which 170 square miles in the Cotter River Catchment area are reserved from occupation for water supply purposes. The area vested in the Commonwealth at Jervis Bay is 28 square miles of land and water.

Census population on 30 June, 1947:—Australian Capital Territory, 16,545; Jervis Bay, 360; total, 16,905.

Population at 5 censuses, with distribution by sex :—

Year	Males	Females	Total	Year	Males	Females	Total
1911	992	722	1,714	1938	6,286	5,276	11,562
1921	1,567	1,005	2,572	1947	9,092	7,813	16,905
1933	4,805	4,142	8,947				

Education.

State education in the Australian Capital Territory is provided by the New South Wales Education Department, the cost being refunded annually to that state by the Commonwealth. There are 7 public schools in the Australian Capital Territory and 2 in the Jervis Bay Territory. Secondary education is provided at the Canberra High School with accommodation for 450 pupils. The Canberra Technical College provides training for apprentices, journeymen desirous of improving their trade qualifications, and for others who desire to take commercial and special courses. There are also 4 private (denominational) schools in the territory, of which 3 provide primary and secondary education, and one sub-primary and primary. University education is provided by the Canberra University College, which is at present connected with the University of Melbourne.

An area of about 250 acres has been set apart at the foot of Black Mountain for an Australian national university. This is to include research schools for medicine, physical sciences, social sciences and Pacific studies. Building operations have begun.

Finance.

The revenue of the territory is derived in part from rent and rates, public utilities, transport and housing and various other fees and services, and partly from parliamentary appropriation.

Local revenue and expenditure (in £A) for 5 years ended 30 June :—

Year ended 30 June	Revenue	Expenditure			
		Capital	Maintenance	Other	Total
1945	860,732	236,859	185,333	1,004,806	1,426,998
1946	1,032,727	349,103	235,814	1,232,680	1,817,597
1947	1,393,248	779,050	279,251	1,716,143	2,774,444
1948	1,438,424	1,062,879	303,631	1,796,474	3,162,984
1949	2,337,700	1,813,568	549,921	2,836,682	5,139,541

Production and Industry.

The territory is predominantly pastoral. Livestock in March, 1950, were :—Horses, 940; cattle, 10,799; sheep, 269,670; pigs, 563. A considerable amount of re-afforestation has been undertaken, the total area of plantations at 31 Dec., 1949, being 15,750 acres. There is no secondary industry of any importance.

NEW SOUTH WALES.

Constitution and Government.

NEW SOUTH WALES became a British possession in 1770; the first settlement was established at Port Jackson in 1788; a partially elective Legislative Council was established in 1842, and responsible government in 1856. New South Wales federated with the other Australian states to form the Commonwealth of Australia in 1901. The legislative power of the state is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council consists of 60 members, elected at simultaneous sittings of both Houses of Parliament, for a term of 12 years. Fifteen members retire in rotation every 3 years. Members are entitled to an allowance of £300 per annum and to free travel on the government railways, tramways and buses. The Legislative Assembly has 94 members. Voting is compulsory. British subjects above 21 years of age, having resided 6 months in the Commonwealth, 3 months in the state, and 1 month in the electorate, are eligible for enrolment as electors. Members of the Legislative Assembly receive an allowance of £1,375 per annum, and they are allowed to travel free on government transport services. The Premier receives an annual salary of £2,917 (and entertainment allowance £500); the Attorney-General, £2,595; the Vice-President of the Executive Council and Leader of the Government in the Legislative Council, £2,445. The Leader of the Opposition receives an allowance of £500 per annum in addition to his salary as member. The duration of a Parliament is limited to 3 years. The Women's Legal Status Act, 1918, gives women the same political rights as men.

The Legislative Assembly, elected on 7 June, 1950, consists of the following parties:—Labour Party, 46; Unendorsed Labour, 2; Liberal Party, 29; Country Party, 17.

The executive is in the hands of a Governor, appointed by the Imperial Government, and an Executive Council consisting of members of the Cabinet.

Governor.—Lieut.-Gen. Sir John Northcott, K.C.M.G., C.B., M.V.O. (sworn 1 Aug., 1946).

The Cabinet was, in Jan., 1951, constituted as follows:—

Premier and Colonial Treasurer.—James McGirr, M.L.A.

Deputy Premier, Secretary for Public Works and Minister for Local Government.—J. J. Cahill, M.L.A.

Chief Secretary, Minister for Co-operative Societies and Assistant Treasurer.—C. R. Evatt, K.C., M.L.A.

Minister for Education.—R. J. Heffron, M.L.A.

Attorney-General.—C. E. Martin, M.L.A.

Minister of Justice and Vice-President of the Executive Council.—R. R. Downing, M.L.C.

Minister for Housing.—C. A. Kelly, M.L.A.

Minister for Health.—M. O'Sullivan, M.L.A.

Minister for Secondary Industries and Minister for Building Materials.—W. E. Dickson, M.L.C.

Minister for Agriculture.—E. H. Graham, M.L.A.

Minister for Conservation.—G. Weir, M.L.A.

Minister for Labour and Industry and Minister for Social Welfare.—F. J. Finnan, M.L.A.

Minister for Transport.—W. F. Sheahan, M.L.A.

Secretary for Mines and Minister for Immigration.—J. G. Arthur, M.L.A.
Minister without Portfolio.—F. H. Hawkins, M.L.A.
Secretary for Lands.—J. B. Renshaw, M.L.A.

Agent-General, London.—John M. Tully (56-57 Strand, W.C.2).

LOCAL GOVERNMENT.

A system of local government extends over the whole of the state except the Western Land Division, where, however, a few municipalities are incorporated. There are 113 municipalities, and 131 corporate bodies called shires, the numbers have been reduced by amalgamations. A number of the municipalities and shires have combined to form county councils, of which there are 34, to administer electricity or water supply undertakings or to render other services of common benefit.

Area and Population.

New South Wales is situated almost entirely between the 29th and 36th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 square miles, inclusive of Lord Howe Island, 5 square miles, but exclusive of the Australian Capital Territory (911 square miles at Canberra and 28 square miles at Jervis Bay).

The population (excluding aboriginals) at recent censuses was :—

Year	Males	Females	Total	Pop. per square mile	Average annual increase per cent. since previous census
1881	410,211	339,614	749,825	2·42	4·07
1891	609,666	517,471	1,127,137	3·63	4·16
1901	710,264	645,091	1,355,355	4·37	1·86
1911	857,698	789,036	1,646,734	5·32	1·97
1921	1,071,501	1,028,870	2,100,371	6·79	2·46
1933	1,318,471	1,282,376	2,600,847	8·41	1·76
1947	1,492,211	1,492,627	2,984,838	9·65	0·99
1949 [1]	1,591,724	1,561,211	3,175,935	10·26	2·41

[1] Estimate at 31 Dec.

At 31 Dec., 1949, the population of Sydney and suburbs, was estimated to be 1,549,590. The chief country municipalities, with their populations, were as follows:—Newcastle, 131,770; Greater Wollongong, 70,600; Broken Hill, 30,500; Blue Mountains, 22,070; Maitland, 20,600; Liverpool, 17,620; Goulburn, 17,080; Orange, 16,400; Wagga Wagga, 16,340; Lismore, 16,110; Albury, 15,290; Lithgow, 15,020; Cessnock, 13,490; Grafton and South Grafton, 12,930; Tamworth, 12,730; Bathurst, 12,310; Dubbo, 10,120; Armidale, 8,020; Parkes, 7,330; Casino, 7,220; Inverell, 6,720; Kempsey, 6,800; Forbes, 6,220.

The following table shows the vital statistics for 5 years :—

Year	Births	Marriages	Divorces	Deaths (civilians only)	Infantile mortality per 1,000 births
1945	61,662	25,283	3,097	26,994	30·6
1946	67,247	31,684	2,771	28,579	30·2
1947	69,398	30,172	3,784	28,449	29·8
1948	67,234	30,164	3,277	30,403	30·3
1949	68,812	28,757	2,631	29,364	27·3

The annual rates per 1,000 of the population in 1949 were :—Births, 22·10; deaths, 9·43; marriages, 9·24.

The following table shows the recorded movement of population :—

Year	Arrivals			Departures		
	Interstate	Oversea	Total	Interstate	Oversea	Total
1945	200,452	10,020	210,472	193,185	10,489	203,674
1946	263,511	22,501	286,012	258,723	31,767	290,490
1947	339,305	46,640	385,945	343,346	43,025	386,371
1948	396,567	72,778	469,345	407,191	44,223	451,414
1949	443,135	127,578	570,713	435,155	61,415	496,570

Religion.

There is no established church in New South Wales, and freedom of worship is accorded to all.

The following table shows the statistics of the religious denominations in New South Wales at the census of 1947 and of ministers of religion, registered for the celebration of marriages in 1949 :—

Denomination	Ministers	Adherents	Denomination	Ministers	Adherents
Church of England	656	1,293,964	Salvation Army.	97	10,871
Roman Catholic .	999	676,993 [1]	Church of Christ	45	10,269
Presbyterian .	322	262,166	Lutheran . .	22	5,915
Methodist . .	339	246,876	Seventh Day Adventist . .	117	7,157
Baptist . .	135	34,935	Others . .	94	403,167 [2]
Congregational .	95	19,331			
Jews . . .	13	13,194	Total .	2,934	2,984,838

[1] Includes 408,497 'Catholics undefined.'
[2] Includes 332,530 'religion not stated' and 9,511 'no religion.'

Education.

The state maintains a system of national education, and attendance at school is compulsory from 6 to 15 years of age. In all state schools education is free. There is a large number of private schools which are subject to state inspection.

There were at the end of 1949, 2,603 state schools, including 307 secondary schools and a correspondence school. At state schools during the year 1949, the average weekly enrolment of children was 362,258 and the average daily attendance was 319,646; teachers numbered 12,563, and there were 2,445 students in training. On 5 Aug., 1949, the effective enrolment was 369,410 children, including 34,822 pupils receiving kindergarten instruction at government schools.

On 5 Aug., 1949, there were 716 private schools with 4,343 full-time teachers and an effective enrolment of 120,120 pupils, of which 580 were Roman Catholic denominational schools, having 3,179 teachers and 98,897 scholars. The Church of England denominational schools numbered 41 with 494 teachers and 8,865 scholars; other denominational schools 28, teachers 334, pupils 6,141. The undenominational private schools numbered 67, the teachers 336 and scholars 6,217.

The University of Sydney, founded in 1850, and an affiliated University College at Armidale, in 1949 had 10,451 individual students (including 2,145 women) with 781 professors, lecturers and demonstrators. There are 5 denominational colleges, Church of England, Roman Catholic (1 for men and 1 for women), Presbyterian and Methodist, and an undenominational college for women, affiliated to the university. The principal government training college for teachers is situated in the university grounds. Post-school technical education is provided at state technical colleges, principally in the evening. Individual students enrolled in 1948 totalled 61,883.

State expenditure from revenue on education in 1949–50 was £13,170,263, of which £11,123,956 was spent on primary and secondary education.

Social Welfare.

The Commonwealth Government makes provision for social benefits (*see under* AUSTRALIA), such as age and invalid pensions, widows' pensions, child endowment, maternity allowances and unemployment and sickness benefits. State systems of family endowment and widows' pensions were discontinued when the Commonwealth systems were introduced on 1 July, 1941, and 30 June, 1942, respectively, but the state makes supplementary payments, in the nature of allowances for children, to widows whose Commonwealth pension is less than the amount which would have been payable under the Widows' Pension Act of New South Wales. 3,442 widows were receiving such allowances for about 7,000 children as at 30 June, 1950. During the year 1949–50, the amount paid to widows by the state was £128,627. Commonwealth widows' pensions current in New South Wales at 30 June, 1950, numbered 17,079, and the annual liability was £1,758,136.

The number of age and invalid pensions current in New South Wales on 30 June, 1950, was:—Age, 138,121 (males, 49,624; females, 88,497); invalid, 34,604 (males, 19,068; females, 15,536). The annual liability at 30 June, 1950, was £14,329,410 for age pensions and £3,682,451 for invalid pensions.

The number of claims in force in New South Wales under the child endowment system at 30 June, 1950, was 263,959, and endowed children in family units numbered 463,112 at that date. Endowment was paid also for 5,892 children in institutions. The annual liability as at 30 June, 1950, was £12,194,104.

During the year 1949–50, 73,566 maternity allowances amounting to £1,155,379 were paid in New South Wales.

Unemployment and sickness benefits commenced on 1 July, 1945. During the year 1949–50, claims totalling £1,548,711 were paid in New South Wales. At 30 June, 1950, unemployment benefit was being paid to 335 persons, and sickness benefit to 5,029 persons.

To relieve distress caused by unemployment and other causes, social welfare bureaux are conducted in various districts under the supervision of welfare officers, who are assisted by medical officers and nurses. Social aid such as food, clothing, medical and dental treatment are provided for persons whose income does not exceed a certain limit. On assessing income appropriate exemption is allowed in respect of earnings. The income limit is 40*s*. per fortnight for single adults and married persons of any age; for unmarried minors it is 10*s*. or 30*s*. according to age.

The cash payments for food are 50*s*. per fortnight for single adults, 90*s*. for married couples and 30*s*. or 40*s*. for unmarried minors. Recipients having one or more dependent children receive an additional payment of

10*s.* per fortnight. Where the income per fortnight exceeds the permissible limits stated above, the amount of the cash payment is reduced by a similar amount. Persons in receipt from the Commonwealth of widows', age and invalid pensions and unemployment and sickness benefits are not eligible for these payments.

Supplementary special foods are provided for mothers, young children and invalids.

Justice and Crime.

In New South Wales legal processes may be grouped within the Lower or Magistrates Courts, or the Higher Courts presided over by judges. There is also an appellate jurisdiction. Prisoners charged with capital crimes must be tried before the Supreme Court.

Children's Courts have been established with the object of removing children as far as possible from the atmosphere of a public court. There are also a number of tribunals exercising special jurisdiction, *e.g.* the Industrial Commission and the Workers' Compensation Commission.

In 1949 there were 189,955 convictions (mainly for minor breaches of administrative laws) before magistrates at Courts of Petty Sessions and Children's Courts and 1,352 distinct persons were convicted at the Higher Courts during the year ended 30 June, 1950. On 30 June, 1949, there were 1,717 convicted prisoners in gaol.

Industrial Arbitration and Trade Unions.

Two systems of industrial arbitration and conciliation for the adjustment of industrial relations between employers and employees are in operation in New South Wales—the state system which operates within the state only, and the Commonwealth with jurisdiction in the case of industrial disputes which extend to other parts of the Commonwealth.

The industrial tribunals are authorized to fix minimum rates of wages and other conditions of employment and their awards may be enforced by law. Industrial agreements between employers and organizations of employees, when registered, may be enforced in the same manner as awards.

The principal state tribunal is the Industrial Commission, consisting of 6 members, one of whom is appointed President by the Commission. All have the same status as puisne judges of the Supreme Court. Conciliation committees representing employers and employees make awards for the various industries, subject to appeal to the Industrial Commission. A conciliation commissioner is chairman of each committee.

The chief industrial tribunal of the Commonwealth is the Court of Conciliation and Arbitration, constituted by judges. The court (of at least three judges) determines such matters as standard hours, basic wage, annual leave with pay and minimum wages for women. Conciliation commissioners deal with other industrial matters.

The rates of wages prescribed by awards and agreements consist of a living or basic wage (which represents the cost of living for an unskilled worker) and margins added for skill, etc. During the currency of an award or agreement the basic wage is subject to variation in accordance with the rise and fall of retail price index numbers issued at quarterly intervals by the Court. The basic wage system of the Commonwealth Court was adopted, for the sake of uniformity, in the state jurisdiction in October, 1937, in substitution for the former method of fixation by the Industrial Commission of New South Wales. In Dec., 1950, the predominant basic

wage for men was 165*s.* per week in Sydney, Newcastle, Wollongong and Port Kembla; 174*s.* in Broken Hill; 162*s.* in other districts, and 165*s.* for Crown employees in all districts.

The standard of hours in industries is 40 per week.

Registration of trade unions is effected under the Trade Union Act, [illegible] which follows substantially the Trade Union Acts of 1871 and 1876 of England. Registration confers a quasi corporate existence with power to hold property, to sue and be sued, etc., and the various classes of employees covered by the union are required to be prescribed by the constitution of the union. The regulation of conditions of employment, however, by trade unions, as such, is limited, and the Industrial Arbitration Act, 1940–1947, extends the right of unions in this regard by making provision for the registration of trade unions of employees as industrial unions of employees, and the registration of employers as industrial unions of employers, with the right of approach to the industrial tribunals constituted by the act for the determination of the conditions of employment in any industry not excluded by the act.

Finance.

The revenue and expenditure of the state (in £'000) was as follows :—

Service	1946-47	1947-48	1948-49	1949-50
Revenue				
Governmental	36,002	41,085	47,888	54,325
Business undertakings	37,838	46,207	49,974	54,079
Total	73,840	87,292	97,862	108,404
Working Expenditure				
Governmental	28,414	33,123	37,380	44,068
Business undertakings	32,489	39,421	45,053	49,629
Debt Charges	14,787	14,870	15,265	15,884
Total	75,690	87,414	97,698	109,581

Governmental revenue in 1949–50 included receipts from the Commonwealth of £30,981,000; namely, towards interest on state debt, £2,917,000; uniform tax reimbursements, £25,490,000; hospital etc. benefits, £2,005,000; other, £569,000. Of a special government grant towards losses caused by a general coal strike (£3,261,000) £61,000 is included in [illegible] revenue and £3,200,000 in business [illegible] State [illegible] motor taxation, £4,648,000, which is [illegible] to special road and traffic funds) totalled £11,778,000, including probate duty, £5,141,000; stamp duty, £3,979,000; racing and betting taxes, £1,353,000, and liquor licences, £1,221,000. Revenue of business undertakings comprised railways £43,122,000; trams and omnibuses, £9,299,000, and Sydney Harbour authority, £1,658,000. Provision for debt redemption included in debt charges was £2,640,000, £2,770,000, £2,929,000 and £2,974,000 in the respective years.

In terms of the financial agreement between Commonwealth and states, the Commonwealth has assumed responsibility for debts of the Australian states, and contributes towards the interest thereon and sinking funds established for redemption of the debts. Loans for the states are raised by the Commonwealth in accordance with decisions of the Australian Loan Council.

The public debt of New South Wales on 30 June, 1950, consisted of the following:—Repayable in Australia, £A279,390,000; in London, £134,825,000; in New York, £11,073,000 (converted at $4·8665 to £). Interest payments in 1949–50 amounted to £A14,371,000, of which £A5,996,000 was in respect of the external debt. The Commonwealth contributed £A2,917,000 towards the interest. Contributions to the sinking fund for New South Wales debt, £A4,308,000, included £A804,000 contributed by the Commonwealth, and the cost of securities redeemed in the year was £A1,787,000. Since the institution of the sinking fund in 1928 contributions have totalled £A57,281,000 (£A13,684,000 by Commonwealth), and redemptions at cost £A54,649,000.

Production and Industry.

I. Land Settlement.

The total area of land alienated or in process of alienation from the Crown on 30 June, 1949, was 65,766,406 acres, exclusive of the Australian Capital Territory; 80,968,012 acres (including 55,138,637 acres in the Western Division) were held under perpetual lease from the Crown; 35,437,048 acres under other Crown leasehold tenures, and the total area of land neither alienated nor leased (including roads, reserves for public purposes, etc.) was 15,865,654 acres.

II. Agriculture.

The area under cultivation in New South Wales during 3 years and the principal crops produced were as follows:—

Year ended 31 March	1948		1949		1950	
Acres under cultivation	7,168,068		5,711,369		5,670,000 [1]	
Value (farm) of all crops [1]	79,459,000		49,150,000 [1]		— [2]

[1] Subject to revision. [2] Not available.

In 1949–50, 8,517 acres of sugar cane were cut for crushing, the yield being 330,738 tons. The total area under grapes in 1949–50 was 16,931 (including 1,864 not bearing) acres; the production of table grapes was 4,023 tons. In 1949–50 the production of wine was 5,185,124 gallons, and, in 1948–49, of sultanas, raisins and currants, 98,180 cwt.

In 1949–50 there were 32,800 acres under citrus fruit, principally oranges; the production from 25,394 acres was 3,355,813 bushels. The area of other orchards was 38,531 acres, and the production from 31,779 acres was 3,461,250 bushels. In addition there were 21,571 acres of banana plantations, the yield from 19,559 acres being 2,743,600 bushels, and there were 1,823 acres of passion-fruit, pineapples, berries, etc.

At 31 March, 1950, the state had 53,298,000 sheep and lambs, 3,440,461 cattle, 342,479 horses and 333,198 pigs. The production of wool in 1949–50 was approximately 515,043,000 lb. (greasy). In the year ended 30 June, 1950, production of butter was 87,005,933 lb.; of cheese, 6,333,526 lb., and of bacon and ham, 29,018,445 lb.

The estimated forest area is 11,000,000 acres. The total area of state forests amounts to 5,354,690 acres, and 1,297,660 acres have been set apart tentatively as timber reserves. The revenue from royalties, licences, etc., amounted in the year ended June, 1949, to £978,674. There were 881 saw-mills in the year ended 30 June, 1949, the employees numbered 9,293; the value of plant and machinery was £1,691,919, and land and buildings £1,318,356 The estimated value of production from forestry in 1948–49 was £6,561,000.

III. Mines and Minerals.

The aggregate value of all minerals won in New South Wales, as recorded by the Department of Mines to the end of 1949, was £776,203,525. The following table gives details for the year 1949 :—

Mineral	Quantity	Value (£A)	Total value (£A)
Gold	51,793 oz. fine	638,994	74,453,775
Silver	99,158 „ „	25,442	6,363,931
Silver-lead ore, concentrates, etc.	220,046 tons	14,307,964	205,613,959
Copper, ingots, matte, ore	2,453 „	433,363	19,062,673
Tin, ingots, ore, concentrates	431 „	261,067	20,492,946
Coal	10,736,098 „	16,384,802	342,436,187
Oil shale	120,956 „	181,437	4,201,412
Zinc, metal, concentrates	257,040 „	3,438,949	40,066,974
Iron, pig	—	—	10,753,309
Magnesite	30,991 „	60,287	952,968
Opal	—	1,592	1,645,468
All other minerals	—	3,152,673	50,159,923
Total	—	38,886,570	776,203,525

This table does not include iron made from scrap, lime, Portland cement or coke.

The production of coke in 1948–49, including coke manufactured at gas and coke works, was 1,723,852 tons, valued at £4,441,086.

IV. Factories.

The following table is compiled from the returns of 1948–49 :—

Classification	Establishments	Average number of employees	Total salaries and wages, exclusive of drawings of working proprietors	Goods manufactured and work done	Materials and fuel used	Value of production
Treating non-metalliferous mine and quarry products.	377	6,478	£1,000 2,889	£1,000 12,583	£1,000 7,893	£1,000 4,690
Bricks, pottery and glass	256	10,434	4,342	10,788	4,713	6,075
Chemicals, paint, oil, grease	513	16,004	6,613	50,744	33,169	17,605

Large iron and steel works, with subsidiary factories, are in operation in proximity to the coalfields, at Newcastle and Port Kembla. The products include iron and steel of various grades, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables and spun cast iron pipes. The production of pig-iron and steel in 1949–50 was pig-iron, 1,001,000 tons; ingot steel, 1,246,000 tons.

The output of electric power-plants during the 12 months ended 30 June, 1950, was 3,756,000,000 kwh.

The estimated value of recorded production from the primary and manufacturing industries in 1948–49 was as follows :—Pastoral, £101,535,000; agriculture, £49,150,000; dairying and farmyard, £35,409,000; forests, fisheries and trapping, £10,769,000, mining (including the output of quarries), £32,870,000; total primary, £229,733,000; manufacturing, £251,199,000; total, £480,932,000.

Commerce and Communications.

The external commerce of New South Wales, exclusive of inter-state trade, is included in the Statement of the Commerce of the Commonwealth. The external commerce of the state is given in the following table (in £A1,000 f.o.b.) :—

Year ended 30 June	Imports oversea			Exports oversea				
				Merchandise			Bullion and specie	Total
	Merchandise	Bullion and specie	Total	Australian produce	Other produce	Total		
1939	49,907	2,991	52,898	36,320	1,367	37,687	8,216	45,903
1946	86,076	1,638	87,714	73,530	2,860	76,390	451	76,841
1948	150,353	1,564	151,917	131,655	3,007	134,662	88	134,750
1949	177,211	908	178,119	173,195	3 414	176,609	145	176,754
1950 [1]	214,030	587	214,617	213,520	3,075	216,595	65	216,660

[1] Subject to revision.

The chief exports are wool, wheat, flour, dairy produce, fruits, meats, hides and skins, pig-lead, iron and steel, machinery, drugs and chemicals.

Of the total value of trade of New South Wales in 1949–50, an amount of £A106,512,000 was imported from Great Britain and Northern Ireland and £A70,928,000 exported thereto.

The vessels engaged in the inter-state and oversea trade which entered the ports of New South Wales in 1948 49, numbered 2,157, net tonnage 7,943,576 tons; the clearances were 2,166 vessels, 7,822,425 tons. Of the total net tonnage in the year 1948–49, 21·3% was owned in Australia, 55·4% in Great Britain, 4·2% elsewhere in the Empire and 19·1% was foreign. Sydney Harbour is the principal port of Australia. The number of vessels, coastal, inter-state and oversea, which entered in 1949–50 was 3,927; net tonnage, 8,149,000.

On 30 June, 1950, 6,113 miles of government railway were open. The revenue in 1949–50 was £43,121,758; the working expenses, £38,706,707; the number of passengers carried, 258,183,000. Victorian Government railways (241 miles) which extend over the border into New South Wales are not included in the foregoing figures. There are also 6 private railways having a total mileage of 85 miles (mainly in mining districts). The tramways and the principal omnibus services in Sydney and Newcastle are the property of the Government.

The number of registered motor vehicles on 30 June, 1950, was 510,504, including 269,250 cars, 159,226 lorries and vans, 42,461 motor cycles, 5,404 tractors and 24,840 trailers.

Regular air transport services with terminal in New South Wales carried an aggregate of 907,592 passengers in 1949–50, viz. 56,322 on oversea services, 697,783 on interstate services, and 153,487 on intrastate services. Aircraft flew 24,760,000 miles on these services.

There are 126,272 miles of roads and streets in New South Wales, including 581 miles concreted, 4,178 miles tar or bituminous macadam, 6,043 miles waterbound macadam, 31,866 miles gravelled, 27,454 miles formed only, 21,893 miles cleared only, 34,257 miles natural surface. A bridge across Sydney Harbour, the largest arch bridge in the world, was opened in March, 1932. The total capital cost was £9,743,252.

Banking and Credit.

There were 14 trading banks operating in New South Wales during 1948–49, including the Commonwealth Bank and Rural Bank (Government), 2 foreign banks and 1 New Zealand bank. The trading bank business is

transacted chiefly by 9 private banks, of which 6 have their head offices in Australia and 3 in London. At 30 June, 1950, the 14 banks operated 1,158 branches and 202 agencies in New South Wales.

The average amount of deposits held in New South Wales by the 14 banks was £470,721,000 in June, 1950, consisting of £101,189,000 bearing interest and £369,532,000 not bearing interest. Bank advances, overdrafts, bills discounted, etc., amounted to £241,965,000. A statement of other assets and liabilities of the banks in New South Wales is of little significance, as banking business is conducted on an Australia wide basis.

Savings bank deposits at 30 June, 1950, amounted to £258,874,000, representing about £81 per head of population.

LORD HOWE ISLAND, 31° 33′ 4″ S., 159° 4′ 26″ E., a dependency of New South Wales, situated about 436 miles north-east of Sydney; area, 3,220 acres, of which only about 300 acres are arable; population (census, 30 June, 1947), 179.

The island, which was discovered in 1788, is of volcanic origin. Mount Gower, the highest point, reaches a height of 2,840 feet.

A Board of Control at Sydney, under the Government of New South Wales, manages the affairs of the island and supervises the Kentia palm seed industry.

Books of Reference.

STATISTICAL INFORMATION.—The New South Wales Bureau of Statistics and Economics (61 Hunter St., Sydney) was established in 1886; *Government Statistician*:—S. R. Carver. Its principal publications are:—

Official Year-Book of New South Wales (1886/87–1900/01 under the title 'Wealth and [illegible] of New South Wales'). Latest issue, 1947/48.

New South Wales Statistical Register. Published annually since 1858; latest issue, 1946/47.

New South Wales Pocket Year-Book. Published since 1913; latest issue, 1951.

New South Wales Statistical Bulletin. Published quarterly since 1905 (except 1943–48).

Monthly Summary of Business Statistics. Published since May, 1931.

New South Wales, A Handbook of Information for Tourists, Migrants, Traders, Investors and Others. Government Printing Office. Sydney, 1947.

Australian Historical Society Journal. Quarterly. Sydney.

VICTORIA.

Constitution and Government.—Victoria, formerly a portion of New South Wales, was, in 1851, proclaimed a separate colony, with a partially elective legislative council. In 1855 responsible government was conferred, the legislative power being vested in a parliament of two houses, the legislative council and the legislative assembly. At present the council consists of 34 members who are elected for six years, but one-half of the members retire every third year. The council may not be dissolved except in the event of a continued disagreement between the two houses as indicated hereunder. The assembly consists of 65 members, and every assembly

continues for three years from the date of its first meeting unless sooner dissolved by the Governor. Members of the council must be in possession of a freehold estate in land of the annual value of £25; and electors must be in possession of a freehold estate in land of the annual value of £10, or must be lessees or occupying tenants of land of the annual value of £15, but graduates of any university in the British dominions, matriculated students of the Melbourne University, certificated teachers, lawyers, medical practitioners, and officers or retired officers of His Majesty's Navy, Army and Air Force may, if resident in Victoria, enrol as electors of the council. Neither members nor electors of the assembly are required to have a property qualification. Members and electors of both Houses must be adult natural born or naturalized British subjects. Women are fully enfranchised. Ministers of religion and judges may not be members of either House. Single voting (one elector one vote) and compulsory preferential voting apply to council and assembly elections. Enrolment of assembly electors is compulsory. The council may not initiate or amend money bills, but may suggest amendments in such bills other than amendments which would increase any charge or burden on the people. Any Minister, with the consent of the House of which he is not a member, may sit and speak in that House to explain a bill relating to the department administered by him, but may not vote in that House. A bill shall not become law unless passed by both Houses, except that, in the event of a continued disagreement between the two Houses as to a bill passed by the assembly, other than certain constitutional bills, the Governor having dissolved the assembly may subsequently dissolve the council, and if the disagreement still continues he may convene a joint sitting of the members of the council and the assembly; if at such joint sitting the Bill in dispute is passed by an absolute majority of all members it shall become law without the consent of the council.

Reimbursement of expenses has been, since 1 July, 1948, £750 per annum for council members and £1,050 per annum for assembly members. An additional allowance of £100 is payable to members of both Houses elected for urban or country constituencies. Annual allowances, in addition to the ab[illegible] to the unofficial leader of the council (£350), the leader of [illegible] the assembly (£500), and the leader in the assembly of any recognized party of twelve or more members of which party no member is a responsible minister (£350), whips of the 3 parties and the government whip (£50 each) and the parliamentary secretary of the cabinet (£350). Members holding the following offices do not receive reimbursement of expenses as members, but receive the official salary specified, together with the £100 special allowance mentioned above:—President of the Council (£1,500), Speaker of the Assembly (£1,500), Chairman of Committees of the Council (£1,000), Chairman of Committees of the Assembly (£1,300). All members have free passes over the Victorian railways.

The legislative assembly, elected on 13 May, 1950, consisted of the following parties (March, 1951):—Liberal-Country Party, 27; Labour Party, 24; Country Party, 13; Independent, 1; total, 65.

Governor.—General Sir Reginald Alexander Dallas Brooks, K.C.B., C.M.G., D.S.O. (assumed office 18 Oct., 1949).

In the exercise of the executive power the Governor is advised by a Cabinet of responsible ministers. The Constitution Act Amendment Act provides that the total number of salaried responsible ministers shall not at any one time exceed ten, of whom not more than two shall be council

members and not more than eight shall be assembly members. The ten salaried ministers do not receive reimbursement of expenses as members. No responsible minister may hold office for more than three months unless he is or becomes a member of the council or the assembly.

The salary provided for the premier is £2,750 per annum [illegible] with an entertainment allowance of £500 and an additional allowance of £250 if elected for a country or urban electorate. The salary provided for each of 9 other responsible ministers is £2,250 per annum, together with an entertainment allowance of £100 and an additional allowance of £200 if elected for a country or urban electorate. Allowances are provided for no more than 3 additional responsible ministers at such a rate as will bring the total payment to each of them, including reimbursement of expenses as a member, to £1,500 per annum, together with an additional allowance of £100 if elected for a country or urban electorate.

The Country Party Ministry (appointed 27 June, 1950) is as follows :—

Premier and Treasurer.—J. G. B. McDonald, M.L.A.

Chief Secretary, Minister in Charge of Electrical Undertakings, and Minister in Charge of Immigration.—Keith Dodgshun, M.L.A.

Commissioner of Crown Lands and Survey, Minister of Soldier Settlement, Minister of Forests, and President of the Board of Land and Works.—A. E. Lind, M.L.A.

Minister of Transport, Minister of State Development, Minister in Charge of Prices, and a Vice-President of the Board of Land and Works.—H. J. T. Hyland, M.L.A.

Minister of Agriculture, Minister of Mines, and a Vice-President of the Board of Land and Works.—G. C. Moss, M.L.A.

Minister of Water Supply and Minister for Conservation.—R. K. Brose, M.L.A.

Minister of Health.—W. O. Fulton, M.L.A.

Attorney-General and Solicitor-General.—T. W. Mitchell, M.L.A.

Commissioner of Public Works and a Vice-President of the Board of Land and Works.—P. T. Byrnes, M.L.C.

Minister of Education.—P. P. Inchbold, M.L.C.

Minister in Charge of Housing and Minister in Charge of Materials.—I. A. Swinburne, M.L.C.

Minister of Labour.—Trevor Harvey, M.L.C.

Agent-General in Great Britain.—J. H. Lienhop (Victoria House, Melbourne Place, W.C.2).

Local Government.

With the exception of the unincorporated areas of French Island (42,000 acres), Julia Percy Island (650 acres) and Tower Hill (1,350 acres), the state is divided into municipal districts called cities, towns, boroughs and shires. The basis of the constitution of cities, towns and boroughs is statutory requirements in respect of area, the number of inhabitant householders and net annual value of rateable property; and of shires, not limited in area by statute, rateable property capable of yielding, upon a rate not exceeding one shilling in the £ on the net annual value thereof, a sum of at least £3,000. In 1950 there were 37 cities, 5 towns, 18 boroughs and 138 shires.

Area and Population.—The state has an area of 87,884 square miles. It is divided into 37 counties, varying in area from 920 to 5,933 square miles.

The population (exclusive of full-blood aboriginals) at the latest consecutive censuses was :—

Date of census enumeration	Population			On previous census	
	Males	Females	Total	Numerical increase	Increase %
3 April, 1881 .	451,623	409,943	861,566	131,368	17 99
5 April, 1891 .	598,089	541,751	1,139,840	278,274	32 30
31 March, 1901 .	603,720	597,350	1,201,070	61,230	5 37
2 April, 1911 .	655,591	659,960	1,315,551	114,481	9 53
4 April, 1921 .	754,724	776,556	1,531,280	215,729	16·40
30 June, 1933 .	903,244	917,017	1,820,261	288,981	18·87
30 June, 1947 .	1,013,867	1,040,834	2,054,701	234,440	12·88
31 Dec., 1949 [1] .	1,073,298	1,091,033	2,164,331	—	—

[1] Estimate.

The average density of the population is 24·6 persons per square mile.

The estimated population of Greater Melbourne (capital city) on 31 Dec., 1949, was 1,288,000, or 59·5% of the population of the state. The other cities and principal towns are Geelong, 46,250; Ballarat, 41,400; Bendigo, 31,610; Mildura, 10,200, Shepparton, 9,200; Warrnambool, 8,350, Wangaratta, 7,890; Hamilton, 7,510; Horsham, 6,920; Colac, 6,830; Maryborough, 6,510; Ararat, 6,390; Castlemaine, 5,880; Sale, 5,410; Stawell, 5,160; Benalla, 4,950; Echuca, 4,810; Swan Hill, 4,550 and Wonthaggi, 4,370.

Vital statistics for 5 years :—

Year	Births	Marriages	Divorces	Deaths	Immigration (Overseas)	Emigration (Overseas)
1945 . .	41,200	16,501	1,727	20,496	1,656	2,960
1946 . .	46,693	21,405	1,619	21,534	7,660	7,640
1947 . .	47,366	20,437	2,266	21,442	9,149	7,786
1948 . .	46,099	20,035	1,660	21,825	22,751	8,094
1949 . .	46,873	20,066	1,766	21,991	69,612	10,935

The annual rates per 1,000 of the population in 1949 were as follows :—Marriages, 9·38; births, 21·92; deaths, 10·28; infantile deaths, 21·89 per 1,000 births.

Religion.—There is no state Church in Victoria, and no state assistance has been given to religion since 1875. At the date of the 1947 census, the following were the enumerated numbers of each of the principal denominations :—Christian : Catholic, Roman,[1] 131,377; Catholic,[1] [illegible], of England, 729,902; Methodist, 234,595; Presbyterian, 288,383; Protestant (undefined), 27,273; other Christian, 116,016. Non-Christian : Hebrew, 14,910; other, 1,025; indefinite, 4,828; no religion, 7,958; unspecified, 212,938.

Education.—Educational establishments in Victoria are of four kinds, viz., the university, established under a special Act and opened in 1855, state schools (primary and secondary), technical schools or colleges, and registered schools.

Affiliated to the university are five residential colleges :—Trinity, Ormond, Queen's and Newman in connection with the Church of England,

[1] So described on individual census schedules.

Presbyterian, Methodist and Roman Catholic Churches respectively, and the University Women's College, which is not a Church foundation. In 1948 the students who matriculated numbered 1,249, the new graduates numbered 916, and there were 9,536 students enrolled.

Primary education of children of the ages of 6 to 14 years inclusive is free, secular and compulsory. The compulsory provisions of the Education Act are rigidly enforced. At 31 December, 1948, there were 2,115 state primary schools with 8,049 teachers, a total enrolment of 196,061 scholars, and an average attendance of 148,561, or 76% of the numbers on the roll. There were also 162 state intermediate and secondary schools, comprising 25 central schools, 47 higher elementary schools, 14 girls' (domestic art) schools, 29 junior technical schools and 46 high schools. At these schools (excluding junior technical) there were 1,793 teachers, 35,997 scholars, and an average attendance of 29,842, or about 83% of the total on the roll. In addition there were 32 senior technical schools, attached to which were 29 junior technical schools with a staff of 2,403 teachers and 53,782 students. The total cost to the state of public instruction, including grants to the University of Melbourne, was £8,908,492 in 1949–50 (exclusive of interest on loans).

Schools not receiving Government aid.—There were, in 1948, 489 registered schools in Victoria with 3,088 teachers and 90,145 pupils enrolled. Of these schools, 345 were connected with the Roman Catholic community, the members of which do not as a rule avail themselves of the free primary education provided by the state. Some are under the control of the Church of England, the Presbyterian and the Methodist Churches, whilst a few are managed by private persons or companies.

Social Services.—Victoria was the first state of the Commonwealth to make a statutory provision for the payment of Old Age Pensions. The Act providing for the payment of such pensions came into operation on 18 January, 1901, and continued until 1 July, 1909, when the Federal Invalid and Old Age Pension Act came into force. The Social Services Consolidation Act, which came into operation on 1 July, 1947, repealed the various legislative enactments relating to age (previously old-age) and invalid pensions, maternity allowances, child endowment and unemployment and sickness benefits and, while following in general the Acts repealed, considerably liberalized many of their provisions; it has since been amended. On 30 June, 1950, there were 84,831 old age and 14,328 invalid pensioners in Victoria, and the amount paid in pensions, including payments to wives of invalid pensioners, during 1949–50 was £10,783,587.

The number of war pensions (members of the forces and their dependants) payable in Victoria on 30 June, 1950, was 121,593, and the amount paid in pensions by the Commonwealth Government during 1949–50 was £5,857,536. Service pensions at 30 June, 1950, totalled 3,883, and the amount paid in pensions for the year totalled £347,274.

During the year ended 30 June, 1950, maternity allowance was granted to 49,035 mothers in the state, the total amount paid in allowances during the year being £777,920.

Under the Commonwealth Unemployment and Sickness Benefit Act, 1944, there were 16,929 claims granted, and the amount paid in benefits totalled £365,726 in the year ended 30 June, 1950.

The number of widows' pensions in force in Victoria at 30 June, 1950, was 11,060, and the total amount paid in allowances during that year was £1,099,158.

The number of child endowments in force in Victoria at 30 June, 1950,

was 168,904, representing 452,333 endowable children. In addition, endowment was being paid in respect of 4,422 children who were being maintained in 81 approved institutions. The total amount paid in endowment in Victoria during the year ended 30 June, 1950, was £7,663,336.

State Housing.—The Housing Acts, 1937 and 1943, provided for the appointment of a Housing Commission of 5 members to be the central authority of the state. The Housing Commission was appointed on 1 March, 1938, and its activities are now spread over both metropolitan and country centres. The present policy is that one-half of all houses shall be built in country centres and that particular attention shall be paid to the needs of centres in which industry has been established under the state's decentralization plans. Since its inception to 30 June, 1950, 115 districts, including 88 in the country, have been developed by the commission and 11,596 houses provided thereon. In addition, 3,286 houses are in various stages of construction. In its normal house programme the commission had expended £A23,776,500 up to 30 June, 1950. Net revenue from rents for the year 1949–50 amounted to £A937,850.

Justice and Crime.—There is a supreme court with a chief justice and 8 puisne judges. There are courts of general and petty sessions, county courts, courts of mines, court of licensing and children's courts.

The following are the criminal statistics for 1949 :—80,511 cases (28,023 arrest cases and 52,488 summonses cases); summarily convicted, 72,416; committed for trial, 1,751.

There are 5 gaols and 4 reformatory prisons in Victoria. At the end of 1949 there were confined in these prisons 1,021 males and 45 females.

Finance.—The revenue and expenditure (in £A) of the state in the years shown (ended 30 June) were :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944–45	36,427,814	35,807,503	1947–48	43,611,349	44,165,053
1945–46	36,235 902	35,886,778	1948–49	48,968,397	50,351,178
1946–47	38,912,209	38,907,176	1949–50	59,975,065	60,233,875

The principal items of state revenue during 1949–50 were :—Taxation (including motor taxation), £25,051,269; railways, £21,883,486; Commonwealth payment to state, £2,127,159, and water supply (including interest), £1,575,346. The principal heads of expenditure were :—Interest and public debt charges, £9,295,047; railways, £20,118,057 (excluding interest but including pensions), education (excluding interest but including pensions), £7,461,060; public health, £4,988,320.

The amount raised by taxation (exclusive of taxes collected by Commonwealth but inclusive of Commonwealth reimbursements under the uniform taxation scheme), as shown in the above paragraph, was approximately £11 11*s.* 0*d.* per head of population.

The public debt of Victoria on 30 June, 1950, was £217,412,825. An amount of £286,422,739 has been expended from loan funds. Of this amount £85,115,435 was spent on railways; £42,307,166 on waterworks; £41,570,934 on land settlement; £16,370,307 on soldier settlement; £13,037,295 on country roads; £17,839,227 on electricity supply; £13,147,158

on unemployment relief; £11,055,167 in aid of revenue, and £45,980,050 for all other purposes.

Production and Industry.

I. Agriculture.

Of the total area of Victoria about 32,690,000 acres at the end of 1948 were either alienated or in process of alienation. Of the remainder about 130,645 acres are at present suitable for agriculture; 5,622,691 acres for pastoral purposes; 79,813 acres are held under perpetual lease; 52,025 acres are held under other leases; state forests, timber, water, and other reserves, 6,384,570 acres; auriferous land, 450,374 acres; roads, 1,794,218 acres; all other lands, 9,041,639 acres.

The number of rural holdings in 1948–49 was 71,049; in 1949–50, 70,486.

The following table shows the areas under the principal crops and the produce of each for 5 seasons :—

Season	Total area cultivated	Wheat		Oats		Barley		Potatoes		Hay	
	1,000 acres	1,000 acres	1,000 bushels	1,000 acres	1,000 bushels	1,000 acres	1,000 bushels	1,000 acres	1,000 tons	1,000 acres	1,000 tons
1945–46	7,721	3,251	29,634	511	7,402	134	1,714	63	231	1,060	1,444
1946–47	7,563	3,501	48,971	454	6,401	138	2,322	56	224	678	985
1947–48	7,550	3,227	46,962	650	16,381	164	3,677	59	185	657	1,042
1948–49	6,989	2,996	49,064	540	7,490	196	3,548	46	166	591	934
1949–50	6,909	2,828	57,434	483	8,718	236	4,876	51	168	607	1,001

In 1948–49 there were 45,609 acres of vines, yielding 3,080,512 gallons of wine and 43,671 tons of raisins and currants.

Green forage covered 50,847 acres, and vegetable area and orchards occupied an extent of 109,773 acres in 1948–49.

At March, 1950, there were in the state 200,143 horses, 2,230,948 head of cattle, 19,161,043 sheep and 212,901 pigs. The wool produced in the season 1948–49 amounted to 195,404,886 lb., valued at £34,197,832. The quantity of butter produced in 1948–49 was 136,946,388 lb.

At the end of 1949 the area of state forests in Victoria was 5,101,435 acres.

The gross value of Victorian production (primary and secondary) in 1948–49 was £343,416,233.

II. Mining.

The recorded production of certain metals and minerals raised in Victoria for the year 1949 was :—Gold, 68,426 fine oz., value £839,316; coal, black, 122,507 tons, value £379,464; coal, brown, 7,375,559 tons, value £1,469,455; gypsum, 30,985 tons, value £18,124; limestone, 460,930 tons, value £149,863.

III. Manufactures.

The total number of manufactories, works, etc., in 1948–49, was 12,702. The great majority used electric power; the aggregate horse-power used was 1,623,283; the number of hands employed was 292,006, and the lands, buildings, machinery and plant were valued at £149,464,000. The value of materials used was £244,487,000, and of articles produced or work done, £446,838,000. The wages paid amounted to £112,419,000.

Trade Unions.—There were 140 trade unions with a total membership of 376,934 operating in Victoria in 1949.

IV. Electrical Energy.

The State Electricity Commission of Victoria, the largest electricity authority in Australia, produces 98% of the electricity sold throughout the state; its supply network serves two-thirds of the area of Victoria in which four-fifths of the population reside. The total installed capacity of its interconnected generating system was 508,465 kw. at 30 June, 1950. Power generated in 1949–50 reached 2,363 million kwh. Thermal stations at Yallourn, Melbourne (3), Geelong and Ballarat had an installed capacity of 456,050 kw., the largest being Yallourn, the installed capacity of which (175,000 kw. in 1950) is being increased to 331,000 kw. by 1956. Hydro-electric stations at Sugarloaf-Rubicon and Kiewa (first power-station) had, in 1950, an installed capacity of 26,415 kw. and 26,000 kw., respectively. When the Kiewa project is completed, there will be 6 power-stations with a total installed capacity of 289,000 kw.

Commerce and Communications.—The commerce of Victoria, exclusive of inter-state trade, is included in the statement of the commerce of the Commonwealth of Australia.

The total value of the imports and exports of Victoria, including bullion and specie but excluding inter-state trade, in recent years, was :—

Years	Total oversea imports (£)	Total oversea exports (£A)	Years	Total oversea imports (£A)	Total oversea exports (£A)
1944–45	64,768,512	40,070,161	1947–48	120,600,004	115,963,539
1945–46	54,018,319	75,916,365	1948–49	145,573,187	137 344,111
1946–47	67,071,725	88,611,358	1949–50	184,256,748	166,123,710

The chief exports are wool, wheat, flour, butter, fruits, meats, hides and skins, milk and cream, cheese, eggs and tallow.

All the railways, with the exception of 14 miles privately owned, are the property of the state and are under the management of three commissioners appointed by the Government. The following are some state railway statistics (for years ending 30 June) :—

	1944	1945	1946	1947	1948	1949
Mileage open for traffic .	4,756	4,756	4,756	4,756	4,733	4,705
Total capital expenditure (£1,000) . . .	51,027	51,017	51,400	51,780	52,294	53,154
Gross receipts (£1,000) .	15,974	15,352	14,768	13,663	16,421	17,372
Expenditure and interest (£1,000) . . .	15,526	15,145	14,831	15,145	17,495	20,106

The figures shown above include particulars relating to 7 60 miles of electric tramway and certain road motor services under the control of the Railway Commissioners.

Civil Aviation.—Particulars for the year ended 30 June, 1949, were as follows : Revenue load carried, 181; flights carried out, 65,135; hours flown, 198,597; miles flown, 18,834,041; passengers carried, 1,163,410; goods carried, 65,999,210 lb.; mail carried, 595,556 lb.

Money and Credit.—A branch of the Royal Mint was opened at Melbourne on 12 June, 1872. Up to 31 December, 1949, 47,534,080 oz. of gold, valued at £179,899,710, was received at the mint, and gold coin and

bullion issued to the value of £179,892,534. The minting of silver coin was commenced in January, 1916, and bronze coin in 1919, and the total issues to the Commonwealth Treasury to the end of 1949 were :—Silver, £26,123,100, and bronze, £879,140. The issues of coin in 1949 were :—Gold, nil; silver, £477,400, and bronze, £107,430.

On 30 June, 1950, the State Savings Bank of Victoria had 228 branches and 394 agencies in the state. The total balance to the credit of depositors amounted to £198,680,211. Of this amount £196,768,073 was deposited to the credit of 1,960,849 ordinary accounts, £822,698 to 260,023 school bank accounts, and £1,089,440 was held in deposit stock.

In the Commonwealth Savings Bank in Victoria there were, on 30 June, 1950, 486,119 operative accounts with £58,440,455 at credit.

The weekly average of deposits and advances of trading banks in Victoria during June quarter, 1950, were as follows :—Deposits, bearing interest, £A259,058,000; deposits, bearing interest, £A87,669,000; total deposits, £A346,727,000; loans, advances and bills discounted, £A191,186,000.

QUEENSLAND.

Constitution and Government.

QUEENSLAND, formerly a portion of New South Wales, was formed into a separate colony in 1859, and responsible government was conferred. The power of making laws and imposing taxes is vested in a Parliament of one House—the Legislative Assembly, which comprises 75 members, returned from 4 electoral zones (each with a different quota for the election of members) for 3 years, elected by ballot. Members of the Assembly are entitled to payment of £1,375 per annum, with travelling expenses, and an allowance for stationery and postage. At the General Election of April, 1950, there were 718,685 persons registered as qualified to vote under the 'Elections Acts Amendment Act of 1932.' This provides for male and female adult franchise, 3 months' continuous residence in the state, 6 months' residence in the Commonwealth, and 1 month in the electoral district, being the only qualifications.

The Legislative Assembly, elected on 29 April, 1950, is composed of the following parties :—Labour Party, 42; Country Party, 20, Liberal Party, 11; Independent Labour Party, 1; Independent, 1; total, 75.

Governor of Queensland.—Lieut.-General Sir John Dudley Lavarack, K.B.E., C.B., C.M.G., D.S.O. (appointed October, 1946; salary, £3,850).

The Executive Council of Ministers, appointed 10 May, 1950, consists of the following members :—

Premier, Chief Secretary and Vice-President of the Executive Council.—Edward Michael Hanlon, M.L.A.
Treasurer.—Vincent Clair Gair, M.L.A
Secretary for Public Lands and Irrigation.—Thomas Andrew Foley, M.L.A.
Secretary for Agriculture and Stock.—Harold Henry Collins, M.L.A.

Attorney-General.—James Larcombe, M.L.A.
Secretary for Labour and Industry.—Arthur Jones, M.L.A.
Minister for Transport.—John Edmund Duggan, M.L.A.
Secretary for Mines [illegible] William Power, M.L.A.
Secretary for Public [illegible] Henry Devries, M.L.A.
Secretary for Health [illegible] William Matthew Moore, M.L.A.
Secretary for Public Works, Housing and Local Government.—Paul Jerome Remigius Hilton, M.L.A.

Each Minister has a salary of £2,575; the Vice-President of the Executive Council receives £750 in addition.

(*Acting*) *Agent-General in Great Britain.*—M. McAully (409 Strand, London, W.C.2).

Provision is made for local government by the subdivision of the state into areas denominated respectively cities, towns and shires. These are under the management of aldermen and councillors, who are elected by the Parliamentary electors and are charged with the control of all matters of a parochial nature, such as sanitary and health services, domestic water supplies, and roads and bridges within their allotted areas. Shires for the most part consist of purely rural districts.

The number and area of these subdivisions, together with the receipts and expenditure (including receipts and expenditure from loans) for the year ended 30 June, 1948, were :—

	No.	Area in square miles	Receipts	Expenditure	Rateable values
			£	£	£
City of Brisbane	1	385	2,729,038	3,291,877	21,408,690
Other cities .	11	237	1,441,180	1,402,449	7,889,103
Towns . .	11	173	330,106	305,379	1,716,622
Shires . .	121	668,195	3,784,564	3,554,479	46,676,171
Totals . .	144	669,290	8,284,888	8,554,184	77,690,586

These figures do not include receipts and expenditure of business undertakings. The total receipts and expenditure of Local Governmental business undertakings were £6,027,290 and £6,199,637 respectively.

Area and Population.

Queensland comprises the whole north-eastern portion of the Australian continent, including the adjacent islands in the Pacific Ocean and in the Gulf of Carpentaria. Estimated area 670,500 English square miles, with a seaboard of 3,236 miles. In 1824 a branch penal settlement was made at Moreton Bay; in 1842 free settlers were admitted to the country.

The increase in the population since 1900 has been as follows :—

Years	Population at 31 December			Increase during 10 years	
	Males	Females	Total	Numerical	%
1900	274,684	219,163	493,847	101,731	25·9
1910	325,813	273,503	599,016	105,169	21·3
1920	396,555	354,069	750,624	151,608	25·3
1930	481,559	435,177	916,736	166,112	22·1
1940	536,712	494,710	1,031,452	114,716	12·5
1949	594,154	566,146	1,160,300	—	—

The total number of aboriginals according to the census 30 June, 1941, was 8,977 full-bloods and 6,451 half-castes. The number of Torres Strait Islanders was 3,675 full-bloods and 120 half-castes.

Of the total population of 1,106,415, recorded at the census of 30 June, 1947, 992,178 persons (exclusive of aboriginals) were born in Australia; 3,905 in New Zealand; 312 in other places in Australasia; 82,463 in the British Isles; 21,557 in other parts of Europe; 2,925 in Asia; 743 in Africa; 1,783 in America; 332 in Polynesia, and 217 at sea.

Vital statistics for 5 years :—

Years	Total births	Illegitimate births	Marriages	Divorces	Deaths [1]
1945	26,713	1,804	9,905	907	9,459
1946	27,024	1,611	11,666	1,162	10,648
1947	28,358	1,475	10,999	935	10,116
1948	27,858	1,515	10,125	724	10,462
1949	27,718	1,470	10,234	732	10,161

[1] Civilians only during the war years.

Brisbane, the capital, with an area of 385 square miles, had on 30 June, 1949, a population of 424,000. The estimated population of the chief towns at the same date was :—Toowoomba, 36,500; Rockhampton, 36,000; Townsville, 35,200; Ipswich, 33,400; Cairns, 17,300; Bundaberg, 16,400; [illegible] 15,500; Mackay, 13,900; Redcliffe, 9,900; Gympie, 8,560; [illegible]ers, 7,610; Warwick, 7,350; Gladstone, 5,730.

Religion.

There is no state Church. Previous to 1861 valuable grants of land had been made to the principal religious denominations, which they still retain. The following were the numbers in 1947 :—Church of England, 388,621; Roman Catholic, 119,855; Catholic (not further defined), 132,097; Methodist, 124,322; Presbyterian, 121,604; Lutheran, 21,244; Baptist, 16,399; Congregational, 8,546; other Christian sects, 42,639; Jews, 1,011; all others [illegible] not stated and no religion), 130,077.

Education.

Primary secular education is free and compulsory. The public expenditure on account of education, science and art for the year 1948-49 was £4,194,279 At the end of 1949 there were 1,537 state primary schools (including 47 provisional schools, 28 rural schools, 2 intermediate schools, 9 special schools and 1 correspondence school), with 5,088 teachers (including sewing mistresses), and net enrolment of 149,468 scholars. Secondary education was provided during 1949 by 19 state high schools and 19 high 'top' departments attached to state primary schools, with 445 teachers, the net enrolment being 5,451 scholars, and by 8 subsidized grammar schools (4 for boys, 3 for girls, 1 mixed), with 94 teachers and a net enrolment of 1,611 students. There were, in addition, 242 private schools, with 1,689 teachers and a net enrolment of 39,495 children. The Government grants annually a considerable number of scholarships (6,417 in 1949), tenable for 2 years, to the various secondary schools. There were 12 technical schools with 14,657 enrolled students. The Queensland University (established in 1911) in Brisbane had, at the end of 1949, 25 professors, and 362 lecturers and demonstrators, with 4,395 students on the roll.

Justice and Crime.

Justice is administered by a Supreme Court, magistrates' courts (civil jurisdiction) and courts of petty sessions (criminal jurisdiction). In the lower courts, Justices of the Peace sit, except in the more important centres when the court is constituted by a stipendiary magistrate. The Supreme Court consists of a Chief Justice, a senior puisne judge and 7 puisne judges. The total number of persons convicted of serious offences by the superior courts in 1949–50 was 313, and the summary convictions at petty sessions in the same year numbered 38,691 (including cases of bail estreated). There were, at 30 June, 1950, 4 gaols, and 3 prison farms conducted on the honour system, with 406 male and 17 female prisoners. The total police force, including women police and native troopers, was 2,070 in 1949–50.

Social Welfare.

Public hospitals are maintained by State and Commonwealth Government endowment, supplemented by fees from patients not in public wards; benevolent asylums, institutions for the blind, deaf and dumb, and refuges and homes are also maintained by the State or receive government assistance. Age, invalid, widows' and war pensions, maternity allowances and child endowment are paid by the Commonwealth. The number of age pensioners in the State at 30 June, 1949, was 43,684, and invalid pensioners 12,469. The number of war pensioners at the same date was 51,557 (including dependants). Maternity allowance was paid to 27,570 mothers during 1948–49.

There were 6,879 widows' pensions current at 30 June, 1949, and at the same date child endowment was being paid to 94,206 families in respect of 177,126 children.

Finance.

The following table shows the net revenue and expenditure of the Consolidated Revenue Fund of Queensland during 5 years ending 30 June (in £A):—

	1946–47	1947–48	1948–49	1949–50	1950–51[1]
Revenue . .	25,033,131	26,819,848	32,979,078	37,119,291	40,477,735
Expenditure . .	25,017,275	26,914,480	32,929,355	37,089,902	41,245,560

[1] Estimate.

A substantial part of the State finances is handled through trust funds, and in 1948–49, total net receipts by consolidated revenue and trust funds was £49,685,352 and net expenditure £50,542,905. These figures do not include receipts and expenditure from loans.

The gross income from or expenditure on account of departments under the control of the Commonwealth is not included.

The gross public debt of the state amounted, on 30 June, 1950, to £A150,661,535 The debt was domiciled as follows:—Australia, £A101,105,429; Great Britain, £A44,721,270; United States of America, £A4,834,836. Interest paid on the public debt amounted to £A4,900,850 for the year.

Production and Industry.

Of the total area of the state, 23,122,966 acres have been alienated; in process of alienation, under deferred payment system, are 4,639,166 acres, leaving 401,357,868 acres still the property of the Crown, or 93·5% of the total area. The land policy of the State is based on leasehold tenure, and

no further alienations are being made. The receipts from the sale of land up to the end of 1949 amounted to £A14,917,548.

A large proportion of the area is leased for pastoral purposes, amounting to 243,243,880 acres in 1949, besides 84,705,009 acres in grazing selections and 18,531,360 acres under occupation licence. Perpetual leases amounted to 6,506,564 acres. Livestock on farms and stations at 31 March, 1950, numbered 317,261 horses, 6,304,778 cattle, 17,582,152 sheep and 391,836 pigs. The total area under crop during 1949–50 was 2,056,918 acres. 90,543 acres were irrigated in 1949–50, the principal crops so watered being sugar cane, vegetables, fodder crops, fruit and tobacco. The wool production, expressed [illegible] in 1948–49, 147,766,519 lb., valued at £A30,772,214; 1949–[illegible] lb., estimated value £A40,000,000.

A considerable area consists of natural forest, eucalyptus, pine and cedar being the timbers mostly in evidence, although a large quantity of more ornamental woods are utilized by cabinet makers. The amount of native timber sawn in 1948–49 was (in superficial feet):—Pine, 62,577,000; hardwoods, 125,783,000; other, mostly cabinet timber, 35,926,000; total value, £A5,597,098. The plywood industry is important; 104,262,000 square feet of plywood were produced, the value being set down at £A1,726,180. In addition, 18,463,000 square feet of veneer, valued at £A90,253, was produced from cabinet woods of the north. Forest and timber reservations total 7,210,711 acres (1949); areas for National Parks, 732,412 acres.

The crops, etc., in 2 years were as follows:—

Crop	Acres		Yield	
	1948–49	1949–50	1948–49	1949–50
Sugar cane, crushed	257,944	272,812	6,433,556 tons	6,518,042 tons
Wheat	607,750	600,013	14,317,422 bushels	11,778,495 bushels
Maize	97,598	115,550	2,451,207 „	3,680,817 „
Sorghum	48,011	99,362	899,136 „	2,157,717 „
Barley	27,674	25,074	622,323 „	578,193 „
Oats	21,278	20,456	418,725 „	337,566 „
Potatoes (English)	11,184	11,624	27,511 tons	30,681 tons
Pumpkins	28,236	28,319	68,801 „	72,221 „
Tomatoes	5,632	5,589	635,734 bushels	643,216 bushels

[1] Bearing area only.

Total value of all crops, 1948–49, £A36,695,329; 1947–48, £A30,280,604.

There are several coalmines in the state, the produce of which amounted to 1,970,388 tons in 1949, valued at £A2,874,062. Goldfields were discovered in 1858. In 1949, 76,282 oz. of gold were produced, valued at £A930,445; 2,872,577 oz. of silver, valued at £A584,075; copper, 4,925 tons, valued at £A758,374; lead, 37,679 tons, valued at £A4,136,607; zinc, 21,241 tons, valued at £A1,954,199; total value of all minerals, £A11,858,089.

A large proportion of the secondary industries of the state are works for processing primary products, the most important being sugar-mills, butter factories, saw-mills, and meat works. There are 32 cane-crushing mills, 2

sugar refineries, 28 meat works (including bacon factories) producing largely for export, and many saw-mills of various sizes. Other industries are railway workshops, rubber-mills and the production of various items of food and clothing, chiefly for local use. In 1948–49, there were 4,020 factories, employing 67,099 males and 14,552 females, and making goods worth £A150,903,549. The value of production (value added in manufacture) was £A52,271,698. In addition, there were 47 electricity stations and 16 gasworks.

The State Electricity Commission was established in Jan., 1938. It is authorized to co-ordinate the electricity industry's development throughout Queensland, and since its establishment substantial progress has been made in this direction. The number of private companies has been reduced by absorption and acquisition from 21 in 1938 to 7, and the number of publicly-owned undertakings has been reduced by amalgamation into Regional Authorities from 17 to 30. At the middle of 1950, electricity was generated by 7 private companies and 30 public undertakings, including 5 Regional Boards, all subject to the general supervision of the State Electricity Commission, and well distributed throughout the State. Electricity generated in the year ended 30 June, 1949, was 890,258,000 kwh.; estimate for 1949–50, 990 million kwh.

The gross value of Queensland primary production during 1948–49 amounted to £A123,183,000, which included agriculture, £A36,695,000; dairying, £A19,758,000; pastoral, £A53,971,000; poultry and bee-keeping, £A1,805,000; mining, £A5,333,000; forestry, £A4,444,000; fisheries, £A914,000; wild animals, £A263,000. Manufacturing, including production of light, heat and power, was £A53,540,000 (net value).

In the western portion of the state water is comparatively easily found by sinking artesian bores. At 31 Dec., 1948, 2,124 such bores had been drilled, of which 1,439 were flowing.

Labour.—The Industrial Court (established in 1917) consists of a Supreme Court judge and 3 other members, and is legally competent to determine all industrial matters in relation to employers and employees and in relation to the organizations representing them. The court operates under the Industrial Conciliation and Arbitration Acts. It controls most of the [illegible] in the state. The Commonwealth court is superior within its [illegible], but in Queensland its awards are much more limited in their application than in most other states.

Under the Industrial Conciliation and Arbitration Act, 1932, unions both of employees and employers must be registered. There were 75 employees' and 22 employers' unions at 31 Dec., 1949; the former comprising 238,820, and the latter 23,087 members.

Commerce.

The overseas commerce of Queensland is included in the statement of the commerce of the Commonwealth of Australia.

The total value of the direct oversea imports and exports of Queensland in recent years is given in the following table (in £A f.o.b. port of shipment for both imports and exports) :—

Years	Imports	Exports	Years	Imports	Exports
1944–45	14,769,590	18,283,487[1]	1947–48	22,560,511	48,311,980
1945–46	12,246,332	27,084,579	1948–49	32,484,412	99,121,770
1946–47	13,657,828	43,195,383	1949–50	48,919,095	98,702,550

In 1948–49, interstate exports totalled £30,482,972 and imports £53,870,263.

The chief exports overseas are wool, meat (preserved or frozen), butter, sugar and minerals.

Communications.

Practically all the railways are owned by the State Government, and their mileage, 6,560 miles at 30 June, 1949, is the greatest of any of the state systems. In 1948–49, 32,686,681 passengers, and 6,888,411 tons of goods were carried. At 30 June, 1948, the Main Roads Commission was responsible for 19,737 miles of main roads, of which 8,892 miles had been constructed. Including roads built by local governments and other authorities, there were 56,182 miles of constructed roads, of which 11,994 miles were surfaced with concrete, bitumen or macadam, while 78,664 miles of unconstructed roads were open for traffic in 1947–48.

At 30 June, 1948, motor vehicles registered in Queensland totalled 171,109, comprising 76,071 cars, 1,865 taxi-cabs, 796 buses, 78,986 trucks and 13,391 motor cycles.

Air Transport.—In Nov., 1949, 3 organizations were operating trunk routes linking North Queensland, Brisbane and the southern states; 3 companies were operating between Brisbane and Sydney or Melbourne; 3 companies operated between Queensland towns only, and one company provided services from Brisbane to the Barrier Reef Islands. Trans-Australia Airlines, operated by the Australian National Airlines Commission, and Australian National Airways Pty. Ltd. provided services between Queensland coastal cities, Brisbane and the southern capitals, connecting at Sydney with planes to New Zealand and America, and also operated services between various Queensland towns. Qantas Empire Airways Ltd. operated between Lae (New Guinea) and Sydney, landing at Cairns and Brisbane, while their Sydney to London route included stops at Cloncurry (bi-weekly) and Darwin. Other companies provided services from Brisbane, Rockhampton and Townsville to a large number of inland centres. Subsidiary companies provided planes for taxi and charter work, and the Flying Doctor Service operated throughout western Queensland. Many new aerodromes were built during the war and others improved, and the State Government is now assisting local authorities to provide aerodromes in all the more important country centres.

Banks.

There were 10 chartered banks operating in Queensland at 30 June, 1949. These included the Commonwealth Bank of Australia, all 7 of the larger Australian trading banks, and a Queensland bank with head office in Brisbane. The private banks had 383 branches and 171 agencies in the State; Queensland deposits of all banks, including the Commonwealth Bank, amounted to £A129,241,000; and loans, advances and bills discounted in Queensland were £A61,224,000. The Commonwealth Savings Bank was the only savings bank operating in the State, and deposits in its 754,430 customers' accounts amounted to £A87,442,122, or £A75 19*s.* 9*d.* per head of population at 30 June, 1949.

THURSDAY ISLAND (longitude 142°, latitude 11°), with an area of 800 acres, is the smallest of the Prince of Wales group of Islands. It is situated in Torres Strait, about 30 miles to the north-west of Cape York, on the northernmost point of the Queensland coast, and is some 1,430 miles by sea

from Brisbane. Thursday Island is the headquarters of the pearl-shell, bêche-de-mer and other fisheries of the Torres Strait, and is in regular and frequent communication by steamer with the other Australian states. The picturesque Albany Passage is passed through on the way from Cooktown to Thursday Island.

The population is a mixed one and numbered 1,090 at 30 June, 1949.

Books of Reference.

STATISTICAL INFORMATION.—The Statistical Office (Treasury Building, Brisbane) was set up in 1859, *Government Statistician:*—S. E Solomon. A 'Queensland Official Year Book' was issued in 1901, the annual 'ABC of Queensland Statistics' from 1923 to 1936. Present publications include:—

Queensland Year Book. Annual, from 1937 (omitting 1942, 1943, 1944).
Queensland Pocket Year Book. Annual, from 1950.
Statistics of Queensland. Annual, from 1859.

SOUTH AUSTRALIA.

Constitution and Government.

SOUTH AUSTRALIA was formed into a British province by letters patent of Feb., 1836, and a partially elective Legislative Council was established in 1851. The present constitution bears date 24 Oct., 1856. It vests the legislative power in a Parliament elected by the people. The Parliament consists of a Legislative Council and a House of Assembly. The former is composed of 20 members. Every 3 years half the members retire, and their places are supplied by new members elected from each of the 5 districts into which the state is divided for this purpose. The executive has no power to dissolve this body. The qualifications of an elector for the Legislative Council are, to be a resident of the state and subdivision for which enrolled, natural born or naturalized British subject and 21 years of age, besides war service or one of the following property qualifications:—freehold of £50 value, registered lease of £20 annual value, registered proprietor of a Crown lease with improvements of at least £50 or the inhabitant occupier of a dwelling house. By the Constitution Amendment Act, 1894, the franchise was extended to women, who voted for the first time at the General Election of 25 April, 1896. There were 161,917 registered electors in 1950. The qualification for a member of Council is merely that he must have attained the age of 30, be a natural born or naturalized British subject and a resident in the state for 3 years. Judges and ministers of religion are ineligible for election. Each member of the Council and also of the House of Assembly receives £900 per annum (£950 if 50 miles from Adelaide, £975 if 200 miles) and a free pass over Government railways, with superannuation rights.

The House of Assembly consists of 39 members elected for 3 years, representing single electorates. The qualifications of an elector are, to be a resident of the state and subdivision for which enrolled, natural born or naturalized British subject and 21 years of age. The qualifications for a member are the same. There were 437,832 registered electors in 1950. The election of members of both Houses takes place by ballot.

The House of Assembly, elected on 4 March, 1950, consists of the following parties:—Liberal-Country Party, 23; Labour Party, 12; Independents, 4; total, 39. The Legislative Council consists of 16 Liberal-Country and 4 Labour members.

The executive is vested in a Governor appointed by the Crown and an Executive Council, consisting of 6 responsible Ministers.

Governor of South Australia.—Lieut.-General Sir Charles Willoughby Moke Norrie, K.C.M.G., C.B., D.S.O., M.C. (appointed 10 August, 1944; salary, £5,000 per annum).

The departments of the Public Service are controlled by the following ministers):—

Premier, Treasurer and Minister of Immigration, Industry and Employment.—Thomas Playford, M.P.

Chief Secretary, Minister for Mines and Minister for Health.—A. L. McEwin, M.L.C.

Attorney-General and Minister for Education.—R. J. Rudall, M.L.C.

Minister for Works, Railways, Marine and Local Government.—M. McIntosh, M.P.

Minister for Agriculture and Afforestation.—Sir George F. Jenkins, M.P.

Minister for Lands, Repatriation and Irrigation.—C. L. Hincks, M.P.

The provision for the payment of ministers is £10,750. They are jointly and individually responsible to the legislature for all their official acts, as in the United Kingdom.

Agent-General for South Australia in London.—Sir Charles McCann (appointed 21 Sept., 1934).

Area.

The total area of South Australia is 380,070 square miles. The settled part of the state is divided into counties, hundreds, municipalities, and district councils, the last being the most general, as they cover most of the settled districts. There are 49 counties proclaimed, covering 56,008,960 acres. This area covers the settled portion of the state, 48,000,000 acres being in occupation. Outside this area there are three extensive pastoral districts, the western, northern and north-eastern, covering 187,235,840 acres, 101,000,000 being under pastoral leases. There are 143 local government districts.

Population.

Population (exclusive of aboriginals) at 6 consecutive censuses was:—

Date of census enumeration	Population			On previous census	
	Males	Females	Total	Numerical increase	Increase %
1891	162,241	153,292	315,533	39,119	14·2
1901	180,485	177,861	358,346	42,813	13·6
1911	207,358	201,200	408,558	50,212	14·0
1921	248,267	246,893	495,160	86,602	21·2
1933	290,962	289,987	580,949	85,789	17·3
1947	320,031	326,042	646,073	65,124	11·2

Population of the state, 1950, 700,000. Population of the city of Adelaide and suburbs 1950 416,000.

The number of full-blooded aboriginals in the state has been estimated at 2,700. Living in a wild state beyond the reach of civilization there are many more.

The following are the statistics of births, deaths and marriages for 5 years :—

Year	Births	Marriages	Divorces	Deaths	Excess of births
1945	14,033	5,321	604	6,049	7,984
1946	15,813	6,700	651	6,461	9,352
1947	16,317	6,668	685	6,215	10,102
1948	15,870	6,704	628	6,748	9,122
1949	16,042	6,247	586	6,373	9,669

The infant mortality rate of 24·27 in 1947 was the lowest ever recorded in the world to that date; the 1948 rate was 29·74; that of 1949, 27·68.

Religion.

The aggregate number of churches and chapels in the state is approximately 2,000. For details according to the census of 1947, *see* p. 440. No state aid is given for religious purposes.

Education.

Education is secular and compulsory and free to the age of 14. Religious instruction is given by ministers of religion for one lesson a week. In 1949 there were 757 schools, 34 being high schools, 30 higher primary schools and 13 junior technical schools, the number of children under instruction was 92,863. There is a training college for teachers. The University of Adelaide was incorporated in 1874. There are several denominational secondary schools. There were 157 private schools, with 23,666 pupils in 1949. There is a school of mines and industries in Adelaide, and technical schools in large country centres, 1 school of arts and crafts, apprentice classes, agricultural college, domestic art and woodwork centres and free kindergarten schools. State expenditure on education in 1949, £2,820,000.

Justice and Crime.

There is 1 Supreme Court, a court of vice-admiralty, and over 100 local courts and police magistrates' courts. There are circuit courts held at several places. Bankruptcy jurisdiction is vested in the Commonwealth Court of Insolvency with courts at Adelaide and 7 country centres. For the 12 months ending 31 Dec., 1949, there were 31 sequestrations and 21 schemes under the Bankruptcy Act. There were 205 convictions for felonies and misdemeanours in the higher courts and 22,834 in the magistrates' courts, in 1949. The total number of persons in gaols at the end of 1949 was 234.

Social Welfare.

Age, Invalidity, War etc., Pensions are paid by the Commonwealth Government. The number of pensioners in South Australia at 30 June, 1950, was :—War, 45,662; age, 30,316; invalid, 4,955. There are schemes for maternity allowances, childhood endowment, widows, unemployment and sickness and hospital and pharmaceutical benefits. The total annual liability in 1950 was £10,000,000.

Finance.

Revenue and expenditure (in £A) for 6 years :—

Years ended 30 June	Revenue	Expenditure	Years ended 30 June	Revenue	Expenditure
1945	16,113,000	16,113,000	1948	18,843,000	19,156,000
1946	16,343,000	16,343,000	1949	21,845,000	22,129,000
1947	17,193,000	17,253,000	1950	29,360,000	29,550,000

The public debt of the state amounted, on 30 June, 1950, to £133,175,000, representing £191 per head of the population. The public debt has been spent on railways, waterworks, irrigation, harbours, roads, buildings and advances to semi-public bodies, etc.

Production and Industry.

Of the total area of South Australia (243,244,800 acres), 14,000,000 acres were alienated and in process of alienation under systems of deferred payments on 31 Dec., 1949. Altogether nearly 92,000,000 acres are unoccupied. The freehold and leasehold land in South Australia amounts to 151,000,000 acres, of which 6,000,000 acres are under cultivation each year.

Value of production, 1948–49:—Crops, £31,793,000; pastoral, £22,819,000; minerals, £3,998,000; dairying, £6,720,000; fisheries and game, poultry, forestry, etc., £6,287,000. Total gross value of primary products £71,617,000, local value (*i.e.* less marketing costs) £66,118,000; net value (*i.e.* less materials used) £56,737,000; factories, net value £43,668,000; total net value £100,405,000.

Chief crops	1948–49		1949–50	
	Acres	Quantities	Acres	Quantities
Wheat	2,063,034	26,136,346 bushels	1,896,719	28,350,260 bushels
Barley	697,751	12,103,446 ,,	695,987	12,725,240 ,,
Oats	286,540	2,643,419 ,,	261,232	3,463,907 ,,
Hay	234,292	311,997 tons	291,563	384,604 tons
Vines	59,806	26,295,184 gallons [1] 261,587 cwts. [2]	60,153	24,977,313 gallons [1] 201,862 [2]

[1] Of wine. [2] Of dried vine fruits.

Fruit culture is extensively carried on, and annually about 350,000 cwt. of dried fruit, 3,000,000 cases of fresh fruit and 22,000,000 gallons of wine are produced. Other products, in addition to all kinds of root crops and vegetables, are flax, eucalyptus oil, olive oil, gums and chicory. The livestock in March, 1950, consisted of 83,000 horses, 464,000 cattle, 9,477,000 sheep and 70,000 pigs. An area of over 150,000 square miles is held under pastoral leases. In 1949–50, 106,400,000 lb. of wool were produced and 88,000,000 gallons of milk.

Irrigation.—49,100 acres are under irrigated culture, being used as follows :—Vineyards, 25,400; orchards, 9,000; vegetables, 4,900; green fodder, 9,200, and other crops, 600 acres. Most of these areas are along the River Murray; further areas are being prepared for the settlement of returned ex-servicemen.

Soil Conservation.—A soil conservator, a soil engineer and several assistant soil conservators have been appointed. Ryecorn is being planted to check sand drifts; con[illegible] and contour banking are being undertaken; areas have been pr[illegible] contour planting with vines and fruit trees and several water diversion schemes planned.

The value of minerals produced in 1949 was £3,364,000. Over £33,000,000 of copper has been produced since the foundation of the state. The principal minerals produced are iron, gypsum, salt, copper, gold, opals, sub-bituminous coal. In 1948, uranium was found in the Peake and Denison ranges, south of Oodnadatta, [illegible] area of about 250 square miles.

In 1949 there were [illegible] in the state, employing 75,945 hands. Wages and salaries amounted to £29,510,000. Gross value of output, £124,018,000; machinery, land and buildings, etc., valued at £45,020,000. Practically all forms of secondary industries are to be found in South Australia.

Commerce and Communications.

The commerce of South Australia, exclusive of inter-state trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

Oversea imports and exports in £A (year ending 30 June) :—

Years	Imports	Exports	Years	Imports	Exports
1944–45	5,308,000	19,167,190	1947–48	22,954,000	52,902,000
1945–46	10,007,000	20,154,000	1948–49	30,457,000	69,335,000
1946–47	13,609,000	32,512,000	1949–50	44,896,000	63,847,000

Principal exports in 1949–50 were:—Wool, 115,000,000 lb. (£A 24,046,000); wheat, 9,856,000 bushels (£A8,217,000); lead, £A8,053,000; flour, 92,000 tons (£A3,121,000); barley, 8,666,000 bushels (£A5,282,000); meats, £A1,899,000; concentrates and ores, £A1,665,000; cheese, £A1,012,000.

Principal imports in 1949–50 were:—Machines and machinery, £A7,161,000; textile piece-goods, £A3,703,000; bags, sacks, etc., £A2,723,000; motors, chassis, bodies and parts, £A8,744,000; oils, £A2,593,000; petrol, £A2,590,000; iron and steel, £A3,595,000; timber, £A1,289,000.

Railways.—There were (1950) 3,856 miles of railway, including the South Australian portion of the Transcontinental Railway from Port Pirie in South Australia to Kalgoorlie in Western Australia, which, in connexion with various state lines, completes a through rail connexion between Brisbane on the north-east coast, and Fremantle on the west coast. It also includes the South Australian portion of the Commonwealth Railway from Port Augusta to the Northern Territory.

Roads.—There are 52,000 miles of roads in use for general traffic in the more settled areas, but 25,200 have been surveyed only and with little or no improvement; 8,700 have been formed but with little or no metal; 13,400 have been metalled, and 4,700 have been improved with bituminous dressings or are of bituminous concrete, etc. Costs of construction and maintenance are shared by the state and federal governments and by the councils of the local areas. Motor vehicles registered include 91,500 cars, 42,400 commercial vehicles and 19,400 cycles.

Transport.—There are several good harbours, and the river Murray is navigable for 6 months of the year for 250 miles within the state. A

passenger and mail air-service is maintained with the other states, and facilities are available for air transport between the capital city and country centres and other states.

In 1948–49, excluding coastal, there were 1,107 vessels of 4,364,699 tons entered. Nationality:—British, 3,704,807 tons; foreign, 659,892 tons.

Post.—Postal, telephone and telegraph facilities are afforded at 900 offices. Telephones connected total to 92,500. There are 11 wireless broadcasting stations, and 220,000 wireless listeners' licences have been issued.

Banks.

There are 10 banking associations including the Commonwealth and State Government Banks. In June quarter, 1950, their average deposits were £80,012,000 and average advances £27,478,000.

The savings banks on 30 June, 1950, had 980,000 deposits amounting to £87,695,000, or over £125 per head of population, of whom approximately 90% have one or more accounts. Nearly 80% of the population have insurance policies, averaging £138 per head of population.

Books of Reference.

STATISTICAL INFORMATION.—The Statistical Office is at 24 Flinders Street, Adelaide (G.P.O. Box 1433J); Government Statist:—A. W. Bowden, A.I.A. Although the first printed statistical publication was the 'Statistics of South Australia, 1854' with the title altered to 'Statistical Register' in 1859, there is a written volume for each year back to the inception of the State in 1838. These contain simple records of trade, demography, production etc., and were prepared only for the use of the Colonial Office. One copy was sent to that Office and one copy retained in the State.

The publications of the Department include the Annual Pocket Year Book and the Annual Statistical Register, a printed Quarterly Summary of Statistics, a duplicated quarterly bulletin of [illegible] duplicated monthly bulletins of trade and general statistics, and [illegible] duplicated bulletins issued each year as particulars of various sections of statistics become available.

WESTERN AUSTRALIA.

Constitution and Government.

IN 1791 Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Fredericks Town. In 1827 Captain James (afterwards Sir James) Stirling surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain (afterwards Sir Charles) Fremantle took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieut.-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the state was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts

were sent out. The imperial convict establishment was transferred to the Colonial Government on 31 March, 1886.

In 1870 partially representative government was instituted and in 1890 the administration was vested in the Governor, a Legislative Council and a Legislative Assembly. The Legislative Council was, in the first instance, nominated by the Governor, but it was provided that in the event of the population of the colony reaching 60,000, it should be elective. In 1893 this limit of population being reached, as set forth in a proclamation dated 18 July of that year, the Colonial Parliament passed an Act (57 Vict. No. 14) [illegible] onstitution.

By t[illegible] Acts Amendment Act, 1899, further amended by the Constitution Acts Amendment Act, 1911, it is provided that the Legislative Council shall consist of 30 members representing 10 electoral provinces and holding their seats for 6 years. Members must be 30 years of age, resident in the state for 2 years, and either be natural-born British subjects or naturalized for 5 years and resident in the state for 5 years. Every elector must have resided in the state for 6 months, and must possess within the province freehold estate of the clear value of £50, or be a householder occupying a dwelling-house of the clear annual value of £17, or holder of a lease of the value of £17 per annum, or the holder of a lease or licence from the Crown of the annual rental of £10, or have his name on the electoral list of a Municipality or Roads Board in respect of property in the province of the annual rateable value of £17. The Legislative Assembly consists of 50 members, each representing 1 electorate, and elected for 3 years. Members must be 21 years of age, be either natural-born subjects of the Crown and have resided in Western Australia for 12 months, or naturalized for 5 years and have resided therein for 2 years. Electors must be 21 years of age, natural-born or naturalized subjects of the Crown, and must have resided in the state for 6 months, and must be resident in the district for at least 1 month whem making their claims. Members of and electors for both Houses may be of either sex. Enrolment for the Legislative Assembly is compulsory. No person can be registered as a voter in more than one Legislative Assembly district or more than once in each Legislative Council province for which he holds a sufficient qualification. Members of the legislature are paid £1,000 a year and periodical adjustments, with an additional annual allowance of £50 to country members, and travel free on all Government railways. Management and control of the unalienated lands of the Crown in Western Australia is vested in the legislature of the state.

The Legislative Assembly, elected on 25 March, 1950, is composed as follows:—Labour Party, 23; Country Party, 9; Liberal Party, 16; Independent, 2.

Governor.—Sir James Mitchell, G.C.M.G. (appointed Lieutenant-Governor, July, 1933; Governor, Nov., 1948).

The salary provided for the Governor is £4,000 per annum. He is assisted in his functions by a cabinet of responsible ministers, as follows (elected 6 April, 1950; portfolios as from 24 Oct., 1950) :—

Premier and Treasurer.—Duncan Ross McLarty, M.M., M.L.A.

Minister for Education, Child Welfare and Industrial Development.—Arthur Frederick Watts, C.M.G., M.L.A.

Minister for Works and Water Supply.—David Brand, M.L.A.

Minister for Lands, Labour and Immigration.—Lindsay Thorn, M.L.A.

Attorney-General and Minister for Police and Fisheries.—Arthur Valentine Rutherford Abbott, M.L.A.

Chief Secretary and Minister for Local Government and Native Affairs.—Victor Doney, M.L.A.

Minister for Health, and Supply and Shipping.—Mrs. Annie Florence Gillies Cardell-Oliver, M.L.A.

Minister for Transport, Railways and Mines.—Charles Herbert Simpson, M.L.C.

Minister for Agriculture and the North-West.—Garnet Barrington Wood, M.L.C.

Minister for Housing and Forests.—Gerald Percy Wild, M.B.E., M.L.A.

Agent-General in London.—Hon. William Henry Kitson. Offices—Savoy House, Strand, London, W.C.2.

Area and Population.

Western Australia includes all that portion of the continent situated to the westward of 129° E. longitude, together with the adjacent islands. The total estimated area of the state is 975,920 English square miles. It is divided into 149 local government areas.

The enumerated population at the date of each census was as follows :—

Census year	Males	Females	Total	Census year	Males	Females	Total
1881	17,062	12,646	29,708	1921	177,278	155,454	332,732
1901	112,875	71,249	184,124	1933	233,937	204,915	438,852
1911	161,565	120,549	282,114	1947	258,076	244,404	502,480

Estimated population, 30 June, 1950, 557,918 (286,803 males, 271,115 females).

There were enumerated, in 1947, 4,574 half-caste aborigines. The estimated full-blood aboriginal population in the state on 30 June, 1947, was 20,000.

Of the total population in 1947, 411,035 were returned as born in Australia. The number of married persons was 227,141 (114,594 males and 112,547 females); widowers, 7,387; widows, 19,981; divorced, 2,356 males and 2,098 females; unmarried, 132,571 males and 109,261 females. The conjugal condition of the remaining 1,685 persons was not stated. The number of males under 21 was 92,456, and of females 90,385.

Perth, the capital, had a population on 30 June, 1949, within the 10-mile radius area of the metropolitan district, of 287,800. This, however, includes the chief port of the state, Fremantle, with its suburbs, the population of which was 30,000. The principal municipalities outside the metropolitan area, with population as at 30 June, 1949, are :—Kalgoorlie, 12,900; Boulder, 6,600; Bunbury, 7,000; Geraldton, 6,200; Albany, 5,000; Northam, 5,000; Collie, 5,000; Narrogin, 2,600.

Vital statistics, covering a 5-year period, are set out hereunder :—

Year	Births	Illegitimate births	Marriages	Divorces	Deaths
1945	10,672	510	3,788	(*a*)	4,712
1946	12,105	529	5,171	725	4,753
1947	12,874	474	5,282	807	4,723
1948	12,931	490	5,186	696	4,685
1949	13,511	504	4,951	566	4,790

(*a*) Comparable figures not available.

Religion.

For particulars of the census of 1947, *see* p. 440.

Education.

Education is free throughout from the kindergarten to the university and comprises ample provision also for secondary education, technical schools, scholarships, etc.

Primary education is compulsory. Government schools in 1949 numbered 520 with 64,361 pupils; private schools, 197 with 19,743 pupils.

During the financial year ended 30 June, 1950, the total sum spent on education was £2,483,761 from consolidated revenue, including a grant of £159,778 to the University of Western Australia.

Justice and Crime.

The following table gives the number of apprehensions and convictions for 5 years :—

	1945	1946	1947	1948	1949
Apprehensions or summonses [1] .	19,716	24,831	22,893	26,257	27,373
Summary convictions [2] . .	18,263	23,042	21,096	24,360	25,388
Convictions in superior courts [3]	99	94	102	107	110

[1] In the case of concurrent offences each offence is included.
[2] Included convictions for traffic offences : 6,090 in 1945; 10,120 in 1946; 7,466 in 1947; 10,115 in 1948; 10,074, in 1949.
[3] Distinct persons convicted.

The total number of persons committed to prison for penal imprisonment in the year ended 30 June, 1949, was 2,037; the number of commitments totalled 2,692 (males, 2,503; females, 189).

All the above figures are exclusive of aboriginal crime.

Social Welfare.

There are 3 government institutions for the aged and infirm, at Claremont, Guildford and Shenton Park, with 542 inmates on 30 June, 1950. Thirty-two government hospitals (including 4 native hospitals), a government sanatorium for tubercular patients and 5 mental hospitals are maintained by public funds, whilst 60 other hospitals are assisted therefrom. In addition, numerous private hospitals are situated in Perth and other centres of population.

The Department of Native Affairs is administered in accordance with the Native Administration Act, 1905–47, for the protection and care of the native inhabitants of Western Australia. Its jurisdiction extends throughout the State which is divided into suitable native districts, each under the charge of a senior Field Officer. The following institutions are maintained solely for the welfare of the natives :—(1) The Moola Bulla Native Cattle Station, situated near Hall's Creek in the East Kimberley District, provides education, clinical attention, rehabilitation and training, for about 220 natives. The station runs approximately 30,000 head of cattle and serves as a training ground for the native stockmen. (2) Cosmo Newbery Native Settlement, situated 58 miles north-east of Laverton, functions as a reformative institution for transferred and incorrigible native prisoners, and is a feeding depot for nomadic natives approaching civilization from the inland areas. (3) Moore River Native Settlement, situated 100

miles north of Perth, is a major institution for the care of orphaned and neglected children of kindergarten age. It is also a minor reformative institution, a base hospital and a sanctuary for aged and infirm natives. (4) Carrolup Native Settlement, situated 18 miles west of Katanning, on the Great Southern Railway, has been converted into a native boys' town, where native boys between the ages of 6 and 16 years are educated to the post-primary stage by teachers of the State Education Department. (5) The institution at La Grange Bay, 130 miles south of Broome, is mainly a native feeding depot, but arrangements are in hand to provide education for the increasing number of children being brought to the institution.

Throughout the State, rationing centres are provided to assist natives who are distressed, unemployed or [illegible] There are, in addition, 21 native institutions under the contro[illegible] organizations; most of them are financially assisted by the Department or supplied with foodstuffs.

The Commissioner of Public Health maintains a leprosarium at Derby and 4 northern native hospitals. Natives in other parts of the State receive attention at ordinary public hospitals.

Fourteen Protestant and 7 Roman Catholic orphanages, industrial and farm schools are supported partly by private subscriptions and partly out of public money. There is also a government receiving home for children committed to the care of the Child Welfare Department and afterwards boarded out with foster-parents or placed in various institutions. On 30 June, 1950, 445 adults and 1,015 children were in receipt of monetary assistance, payment being met from state revenue.

Age, Invalidity, Widows' and War Pensions are paid by the Commonwealth Government. The number of pensioners in Western Australia at 30 June, 1950, was :—Age, 24,316; invalid, 4,294; widows, 2,876, and war pensioners and dependants, 50,831.

Finance.

The revenue and expenditure (in £A) of Western Australia in 6 years, ended 30 June, are given as follows :—

Year ended 30 June	Revenue	Expenditure	Year ended 30 June	Revenue	Expenditure
1945	13,953,830	13,949,340	1948	17,710,310	18,062,392
1946	14,407,557	14,407,557	1949	20,560,646	21,377,907
1947	14,980,875	15,028,427	1950	25,810,961	25,787,203

More than one-fourth of the public income is derived from railways and tramways (£6,965,698) for the year ended 30 June, 1950, and the rest mainly from various forms of taxation (£6,792,534), lands, timber and mining (£612,715), business and [illegible] other than railways and trams (£2,057,735), from Commonwealth Funds (£6,315,109) and from other sources (£3,067,170). Western Australia had a net loan liability of £109,550,142 on 30 June, 1950, the charge for the year being £4,107,724 (exclusive of exchange, £358,479).

Production and Industry.

Up to 30 June, 1950, of the entire area of the state (624,588,800 acres) 21,263,085 acres had been alienated; on that date 11,514,531 acres were in process of alienation; the area alienated and in process of alienation thus amounting to 32,777,616 acres. At the same date there were in force leases comprising an area of 226,005,162 acres, of which 219,200,060 acres

were pastoral, 3,418,217 acres were timber, 67,659 acres mining leases (exclusive of 480 acres on private property), 30,209 acres Miners' Homestead leases and 3,289,017 reserves and special leases.

Crops	1948-49		1949-50	
	Acres	Bushels	Acres	Bushels
Wheat	2,867,517	36,250,000	2,894,020	38,500,000
Oats	531,638	6,998,295	584,603	7,267,965
Barley	64,205	981,426	67,965	967,815
		Tons		Tons
Hay	226,779	277,329	216,320	272,052
Potatoes	6,344	39,516	6,895	39,459
		Cwt.		Cwt.
Tobacco	620	5,312	661	5,632
Orchards (including apples)	22,585	1,667,426 [1]	22,744	1,116,928 [1]
		Tons (dried)		Tons (dried)
Vines	10,014	3,244 [2]	9,676	1,979 [2]

[1] Bushels of apples. [2] Currants and raisins.

The area of state forests and timber reserves on 30 June, 1950, was 5,210,064 acres; the number of super feet sawn and hewn was (1948–49) 142,526,000.

Irrigation has been established by the Government along the south-western coastal plain. Reservoirs with an aggregate capacity of 25,000 million gallons provide water for three main irrigation districts of a total area of 72,000 acres. Dairying and stock raising activities account for 90% of the water used throughout the irrigation region, vegetable growing (including potatoes) for 8%, and fruit cultivation for the remaining 2%.

The livestock on 31 March, 1950, consisted of 59,166 horses; 864,936 cattle; 10,923,167 sheep, and 78,832 pigs.

The wool clip in 1949 was 91,000,000 lb.; the exports for 1949–50 (expressed as greasy wool), 118,386,361 lb.

Gold was first obtained in Western Australia in 1885. The sensational gold-finds at Coolgardie and Kalgoorlie in 1892 and 1893 gave an impetus to Western Australian gold-mining, which, in a few years time, placed this state at the head of all the Australian states as regards gold output. The aggregate output to the end of Dec., 1949, was 52,852,109 fine oz., valued at £A305,632,035. At 31 Dec., 1949, there were in force 1,390 gold-mining leases, representing an area of 24,985 acres; men employed in the mines, 6,762, viz., 3,222 above and 3,540 underground; output of gold, 1949, 638,426 fine oz., value £A7,962,808.

The total value of the mineral output of the state in 1949 was £9,567,371, and in 1948, £8,561,267. Principal minerals in 1949, other than gold, were:—Coal, 750,594 tons, value £972,245; silver, 194,721 fine oz., value £49,246; asbestos, 1,297 tons, value £125,332; lead and silver lead ore, 2,922 tons, value £154,777; manganese ore, 9,420 tons, value £56,289; pyritic ore, 31,299 tons, value £125,857.

There were, for the year ended 30 June, 1949, a total of 2,925 industrial establishments in the state, employing either machinery or at least 4 workers. The average number of persons employed by them over the year was 38,354. The gross output of these establishments for the year was computed at £53,117,833, while the net output, *i.e.*, the value added in the course of manufacture, was £21,174,228.

The estimated gross value of Western Australian primary production during 1948–49 was as follows:—Agricultural, £25,882,383; pastoral and trapping, £23,385,628; mining, £8,771,506; dairy, poultry and bee-farming, £5,981,981; forestry and fisheries, £2,701,618.

Commerce and Communications.

The external commerce of Western Australia, exclusive of inter-state trade, is comprised in the statement of the commerce of Australia given under the heading of the Commonwealth.

The total value of the imports and exports, including inter-state trade in 5 years (30 June) is as follows (in £A):—

	1945–46	1946–47	1947–48	1948–49	1949–50
Imports . .	21,628,149	30,591,097	42,819,781	52,628,846	69,443,677
Exports[1] .	26,544,880	29,720,015	55,731,230	55,593,840	61,865,270

[1] Including ships' stores.

The more important exports of local products for 1949–50, with Australian currency values, were:—Wheat (£16,692,007), flour (£4,167,598), wool (£25,461,582), timber (£1,002,150), hides and skins (£1,164,551), beef (£590,718), mutton and lamb (£242,556), butter (£431,862), fresh fruit (£890,073).

There were on the Western Australian register on 31 Dec., 1949, 98 steamers of 5,047 tons, and 235 sailing vessels of 3,785 tons; total, 333 vessels of 8,832 tons.

For the year ended 30 June, 1950, the state had 4,252 miles of state government railway; 277 miles of privately owned line and 450 miles of Commonwealth line, the latter being the western portion of the Trans-Australian line (Kalgoorlie–Port Pirie), which links the state railway system to those of the other states of the Commonwealth.

Two inter-state airlines, one of which is owned and operated by the Commonwealth government, connect Perth with the other state capitals by a daily service. Air communication within the state is maintained by 2 major companies, which operate regular services over 13,800 miles of route and fly about 2,780,000 miles annually between the capital and inland centres and the ports of the north and south coasts.

Money and Credit.

A branch of the Royal Mint was opened at Perth in 1899. To 30 June, 1950, production of coins was:—Gold (minting discontinued in Sept., 1931), £106,751,535; silver, £65,800; bronze, £635,140; and of bullion:—Gold, £69,770,037; silver, £964,601.

There are 9 cheque-paying banks in Western Australia including the Commonwealth Bank and the Rural and Industries Bank of Western Australia. In June quarter, 1950, average deposits were £62,927,058 and average advances £30,589,499.

The Commonwealth Savings Bank was opened in the state at the beginning of 1913, and on 1 Nov., 1931, absorbed the State Savings Bank. On 30 June, 1950, £38,990,997 stood to the credit of 378,670 depositors.

TASMANIA.

Constitution and Government.

ABEL JANZOON TASMAN discovered Van Diemen's Land (Tasmania) on 24 Nov., 1642. The island became a British settlement in 1803 as a dependency of New South Wales; in 1825 its connection with New South Wales was terminated; in 1851 a partially elective Legislative Council was established, and in 1856 responsible government came into operation. On 1 Jan., 1901, Tasmania was federated with the other Australian states into the Commonwealth of Australia.

Parliament consists of a Legislative Council and a House of Assembly. The Council has 19 members, elected on a property qualification of £10 freehold or £26 a year leasehold. Certain professional men and all 'returned soldiers' are also electors. Members sit for 6 years, 3 retire annually over 5 years and 4 every sixth year. There is no power to dissolve the Council. The House of Assembly has 30 members, elected for 5 years by adults with 6 months' residence in the state. Members of both Houses are paid according to the district represented. The amounts vary from £800 (Buckingham) to £1,050 (Darwin) a year. Women received the right to vote in 1903. Proportional representation was adopted in 1907, the method being the single transferable vote in 6-member constituencies. Casual vacancies in the House of Assembly are determined by a recount of the vacating member's ballot papers. For the Legislative Council a by-election poll is held.

At the election on 6 May, 1950, for the House of Assembly 15 Labour, 14 Liberal and 1 Independent members were returned.

Governor.—Sir Ronald Cross, Bt. (appointed Feb., 1951).

The Cabinet (appointed 25 Feb., 1948; reconstructed 2 Sept., 1948), is composed as follows:—

Premier and Minister for Education.—R. Cosgrove.
Treasurer and Minister for Transport.—J. L. Madden.
Attorney-General.—R. F. Fagan.
Minister for Lands and Works and Mines.—E. E. Reece.
Minister for Agriculture.—J. J. Dwyer, V.C.
Chief Secretary.—A. J. White.
Hon. Ministers.—R. J. D. Turnbull; C. H. Hand; C. A. Bramich.

A minister must have a seat in one of the two Houses.

Each of the ministers has a salary of £1,750 per annum. The Premier has an additional £250 a year. Each Honorary Minister has an annual salary of £1,450.

Agent-General in London.—E. E. von Bibra, O.B.E.
Official Secretary.—R. J. Garrad, O.B.E., 457 Strand, London, W.C.2.

Area and Population.

Area (including islands) 26,215 square miles or about 16,778,000 acres, of which 15,571,500 acres form the area of Tasmania proper.

The population at 6 consecutive censuses was :—

Year	Population	Increase % per annum	Year	Population	Increase % per annum
1891	146,667	2 36	1921	213,780	1·12
1901	172,475	1·64	1933	227,599	0·51
1911	191,211	1·04	1947	257,078	0·88

The estimated population on 30 June, 1950, was 279,394 (143,228 males and 136,166 females).

In 1947 there were 129,244 males and 127,834 females. Of the total population in 1947, 2·77% were natives of the British Isles, 0·23% natives of other European countries and 96·63% natives of Australia and New Zealand. The pure aboriginal is extinct.

Vital statistics for 5 years were as follows :—

Year	Births	Marriages	Divorces	Deaths	Excess of births
1945	5,785	1,868	172	2,413	3,372
1946	6,847	2,650	219	2,549	4,298
1947	7,140	2,584	210	2,363	4,777
1948	6,979	2,428	185	2,528	4.451
1949	7,110	2,422	266	2,389	4,721

Estimated population of the capital, Hobart, and suburbs (30 June, 1950), 83,600; of Launceston and suburbs, 43,940.

Religion and Education.

For the religious bodies at the census of 1947, *see* p. 440.

Education is controlled by the state and is free and secular, and compulsory between the ages of 6 and 16. Nine-tenths of the primary teaching is at state schools. There were 318 state primary schools, with 38.208 scholars enrolled at 1 Aug., 1948. Secondary education is about equally divided between the new state high schools and the older endowed schools. The 7 state high schools in 1948 had an aggregate enrolment of 2,840. There were 8 technical schools, and 3 junior technical schools, with a total enrolment of 5,519 in 1948.

The University of Tasmania, established 1890, had 76 teachers and 665 students taking courses for degrees in 1948. University expenditure in 1948 (exclusive of capital expenditure) was £114,030.

Justice and Crime.

There are a Supreme Court, courts of petty sessions and general sessions, the latter presided over by a stipendiary magistrate, assisted by justices of the peace. The Supreme Court is both a court of first instance and a court of appeal in all jurisdiction, civil and criminal. The state is also divided into 4 districts with local civil courts presided over by Commissioners who are also police magistrates, and petty sessions have all the powers of 2 justices of the peace. Petty offences and a limited number of civil

claims are dealt with in petty sessions and in general sessions by justices of the peace. During the year 1948, 7,701 persons were summarily convicted and 72 persons were committed for trial. The total police force on 30 June, 1949, was 340. There was 1 gaol, with 93 inmates at the end of June, 1949.

Old Age Pensions.

Old Age and Invalidity Pensions are paid by the Commonwealth Government. The number of pensioners in Tasmania on 30 June, 1949, was:—Old age, 10,952; invalid, 3,164; war, 17,593.

Revenue and Expenditure.

The revenue is derived chiefly from taxation (income, land, death duties and lottery taxation), and from the rental and sale of Crown lands. The customs and excise duties are in the hands of the Commonwealth, which Government makes a special grant to Tasmania and contributes a fixed amount per annum towards interest on the state's public debt.

	1943–44	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50
	£A	£A	£A	£A	£A	£A	£A
Revenue .	3,498,740	3,656,393	3,933,412	4,507,126	4,815,974	5,740,224	6,814,982
Expenditure .	3,468,515	3,675,537	4,033,894	4,573,312	5,101,882	5,845,325	7,082,373

The public debt of Tasmania amounted to £A42,720,980 at 30 June, 1950.

In 1949–50 state taxation amounted to £A4,216,036, of which income tax provided £A1,970,511; lotteries, £A1,076,362; land tax, £A96,965; death duties, £A246,099; motor vehicles, £A402,536.

Production and Industry.

The total area of Tasmania is 16,778,000 acres, including 1,206,500 acres islands and lakes. Unalienated land, chiefly rugged mountain country, much of it mineral-bearing, amounts to 10,290,149 acres. Of this unalienated land 2,718,354 acres are leased.

The net value in 1948–49 of agricultural and pastoral products was £A11,563,650; of manufactures, £A16,075,000 (output less raw material, fuel, etc.), and of mining products, £A4,368,440.

Agricultural production for 1948–49:—

	Acres	Yield (bushels)		Acres	Yield (tons)
Wheat . . .	6,867	155,820	Turnips . .	11,812	72,362
Oats . . .	11,697	261,576	Potatoes . .	32,319	131,800
Peas (blue) . .	6,486	146,941	Hay . .	90,579	150,699
Peas (grey and other)	7,879	155,272	Apples . .	19,338	2,562,565

Production of butter, 1948–49, 11,669,049 lb.; of cheese, 918,300 lb.

Livestock at 31 March, 1950:—Horses, 21,197; cattle, 274,740; sheep, 2,170,000; pigs, 35,841.

Wool production in 1948–49, 16,846,309 lb., valued at £A3,926,000.

Forests cover a considerable part of the island. 120 million super feet of timber were sawn in mills during the year 1948–49.

Chief mineral products for the calendar year 1949 :—

Mineral	Quantity	Value	Mineral	Quantity	Value
		£A			£A
Copper . . tons	5,229	735,365	Coal . . tons	181,618	181,897
Tin. . . tons	631	380,942	Gold . fine oz.	12,152	152,841
Silver . fine oz.	1,011,032	207,238	Zinc . . tons	20,286	1,713,499
Lead . . tons	7,874	796,701	All minerals . .	—	4,629,444

Manufactures.—The two important manufactures for export are metal extraction and fruit-preserving. The electrolytic-zinc works at Risdon near Hobart are using large quantities of ore imported from Broken Hill, the output being zinc, cadmium and other by-products. Other manufactures that have an output beyond local requirements are wool, confectionery, paper pulp and cement. The carbide works at North-West Bay are able to supply the needs of all Australia. In 1948–49, the number of industrial establishments was 1,346; value of output, £A36,657,036; salaries and wages paid, £A8,456,406, excluding amounts drawn by working proprietors.

Commerce.

Commerce (in £A) for 6 years (ending 30 June) :—

	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50
Imports .	14,812,612	16,135,884	20,896,833	26,281,591	29,592,874	33,795,480
Exports .	20,884,999	20,132,161	21,546,697	26,815,841	31,021,978	32,061,519

In 1948–49 imports from Australia totalled £A23,336,577; from the United Kingdom, £A135,911; from other British possessions, £A1,308,810, and from foreign countries, £A1,814,117. Exports to Australia amounted to £A18,532,080; to the United Kingdom, £A7,976,807; to other British possessions, £A915,149, and to foreign countries, £A3,597,942.

Principal imports, 1948–49 :—Food, drink and tobacco, £A6,551,385; apparel, textiles and manufactured fibres, £A2,708,709; metals and metal manufactures, £A9,039,758; stones and minerals, £A1,425,782; live animals, animal and vegetable substances, £A3,101,708. Principal exports, 1948–49 :—Butter and cheese, 52,282 cwt. (£A654,938); fruit fresh, 1,649,169 bushels (£A1,183,082); fruit dried, preserved or pulped, 68,223,937 lb. (£A1,578,780); hops, 1,936,800 lb. (£A277,824); jams and jellies, 23,764,366 lb. (£A848,096); copper, 3,918 tons (£A621,652); peas, 365,715 bushels (£A381,604); potatoes, 93,240 tons (£A1,545,671); wool, 24,048,077 lb. (£A5,073,307); hides and skins, £A507,499; zinc bars and blocks, 77,424 tons (£A4,416,291); timber, 49,096,863 super ft. (£A1,051,550); woollen manufacture, 510,326 cu. ft. (£A3,314,980).

Communications.

Roads.—The road mileage is about 13,000, consisting of a classified road system of 2,109 miles maintained by the State Department of Public Works, and the remainder which is maintained by the local authorities.

Motor vehicles registered at 30 June, 1950, comprised 25,175 cars and 4,930 commercial vehicles and motor cycles. Government-controlled bus services carried 1,490,122 passengers in 1948–49.

The registered shipping in 1949 consisted of 80 motor (including

auxiliary) vessels of 2,177 tons, 45 sailing vessels of 1,746 tons and 31 steamers of 3,450 tons. Total, 157 vessels, 7,755 tons.

For railways, posts and telegraphs, *see* COMMONWEALTH OF AUSTRALIA.

Savings Banks.

The deposits in savings banks, including the Commonwealth Savings Bank, was £A24,272,000, or £86 17*s.* 6*d.* per head of population as at 30 June, 1950.

Books of Reference.

THE NORTHERN TERRITORY OF AUSTRALIA.

Government.—The Northern Territory, after forming part of New South Wales, was annexed in 1863 to South Australia and in 1901 entered the Commonwealth as a corporate part of South Australia. The Commonwealth Constitution Act of 1900 made provision for the surrender to the Commonwealth of any territory by any state, and under this provision an agreement was entered into on 7 Dec., 1907, for the transfer of the Northern Territory to the Commonwealth, and it formally passed under the control of the Commonwealth Government on 1 Jan., 1911.

On 1 March, 1927, the Northern Territory was divided for administrative purposes into two territories, North Australia and Central Australia, the dividing line between the two territories being the 20th parallel of south latitude. Each territory was under a Government Resident, with headquarters at Darwin and Stuart (now Alice Springs) respectively. This division was effected under the authority of the Northern Australia Act, 1926, which also provided for the appointment of a North Australia Commission, the powers of which extended to matters relating to the development of North Australia, and also to the administration of Crown lands throughout North Australia and Central Australia. The Northern Australia Act, 1926, was repealed as from 12 June, 1931, by the Northern Territory (Administration) Act, 1931. The North Australia Commission was abolished, and the whole of the Northern Territory was placed under the control of an administrator. The administrator is charged with the general administration of Crown lands in the Northern Territory; his residence is at Darwin.

In 1947, the Legislative Council for the Northern Territory, consisting of the Administrator, 7 official and 6 elected members, was formed. The Council met for the first time on 16 Feb., 1948. All legislation which is passed by the Council is presented to the Administrator for assent. However, ordinances, (*a*) dealing with the granting or disposal of Crown lands (*b*)

whereby any lease or grant of land or money or any donation or gratuity is made to him, or (c) relating to aboriginals or aboriginal labour, are reserved by the Administrator for the assent of the Governor-General.

Administrator.—A. R. Driver.
Government Secretary.—R. S. Leydin.

Area and Population.—The Northern Territory is bounded by the 26th parallel of south latitude and the 129th and 138th degrees of east longitude. Its area is 523,620 square miles. The area alienated on 30 June, 1950, amounted to 711 square miles absolutely; 191,899 square miles were held under pastoral leases and 62,102 under other leases, licences, and mission stations; reserved for aborigines, defence and public requirements, 71,023 square miles; 197,885 square miles were unoccupied. The coast line is about 1,040 miles in length. The territory possesses fine rivers and good harbours, the principal being Port Darwin. The greater part of the interior consists of a table-land rising gradually from the coast to a height of about 1,700 feet. On this tableland there are large areas of excellent pasturage. The southern part of the territory is generally sandy with a small rainfall, but it can be watered by means of sub-artesian bores. The climate is tropical, but varies considerably over the whole territory. The proximity of the sea in the north keeps it fairly equable in the coastal region, but further south the climate is of a continental type, showing a great variation between the hottest and coldest months.

The population, excluding full-blood aborigines, has varied as follows:—

Year	Europeans	Total	Year	Europeans	Total
1881	667	3,451	1921 (census)	2,459	3,867
1901	782	4,811	1933 (census)	3,306	4,850
1911 (census)	1,418	3,310	1947 (census)	9,116	10,868

The census population at 30 June, 1947, excluding full-blood aborigines, was 10,868 (7,378 males; 3,490 females). The number of aborigines (including half-castes, but excluding nomadics) on 30 June, 1947, was 12,232.

Finance.—The revenue and expenditure (Central Australia Railway revenue and expenditure omitted) for 6 years were as follows (in £A):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944–45	1,118,951	1,051,186	1947–48	321,056	1,535,301
1945–46	404,846	807,998	1948–49	344,811	2,028,787
1946–47	292,122	1,628,549	1949–50	427,125	2,443,994

The chief sources of revenue for the year ended 30 June, 1950, were:—Postal revenue, £118,292; electricity supply, £103,177; rent and rates, £77,068, and railways, £34,880. The chief items of expenditure (excluding interest, loans, etc.) were administration, £503,501, and new works, £707,144.

Production and Industry.—The soils of the territory vary greatly, but most products suitable to the tropical and semi-tropical zones can be grown successfully. In the monsoonal climate of the north, all the rain falls during the hot summer months, and experimenting agriculturalists have concentrated mainly on wet-season crops which can be sown before the rains begin and harvested when they finish. From Katherine to Darwin, green vegetables, tomatoes, potatoes and tropical fruits are grown successfully on

a minor scale for local markets. These are cultivated in the dry season by irrigation and sprinkling. In many parts the natural grasses are extremely rich in nutriment, and provide food for cattle, horses, sheep and other stock. The numbers of stock on 31 Dec., 1949, were :—Cattle, 1,048,875; horses, 32,904; sheep, 25,725; goats, 12,102; donkeys, 935; mules, 466; camels, 165; swine, 419.

Buffaloes, crocodiles, kangaroos and snakes are hunted for their skins. Exports of skins and hides for the year ended 30 June, 1950, were :—Buffalo, 10,205; cattle, 5,652; crocodile, 2,269; sheep, 1,769; goat, 27; snake, 21; pigs, 20; kangaroo, 6.

The territory is rich in mineral resources, though these have been little developed until recent years. There is considerable activity in gold mining centred at Tennant Creek. Several uranium fields were discovered in 1949 and 1950. The value of the minerals produced in the year ended 30 June, 1950, was as follows :—Gold, £A476,914; copper, £A84,483; mica, £A49,861; wolfram, £A12,937; tin, £A15,206; silver lead, £A793; ochre, tantalite, etc., £A3,483; grand total (all minerals), £A643,677.

Commerce.—The overseas imports and exports are given as follows (in £A'000, f.o.b.) :—

Year	Imports	Exports	Year	Imports	Exports
1942–45	Under military control.		1947–48	278	73
1945–46	197	222	1948–49	267	22
1946–47	89	17	1949–50	762	11

Communications.—Two highways were built during the second world war :—Darwin–Alice Springs (960 miles) and Tennant Creek–Mt. Isa (Queensland), 403 miles.

There is an airfield at Darwin with a runway of 11,000 feet.

TERRITORIES OF THE AUSTRALIAN COMMONWEALTH (PAPUA AND NEW GUINEA).

Following the outbreak of the Pacific War civil administration in Papua and New Guinea was suspended on 11 Feb., 1942, and military control commenced. The Territory of New Guinea came under Japanese occupation in 1942, but the greater part had already been recaptured by Australian and Allied forces when the Japanese surrendered in Aug., 1945.

Pursuant to the provisions of the Papua-New Guinea Provisional Administration Act 1945, a single Provisional Administration Service was formed, and the transfer from military to civil control in Papua and the portion of the Territory of New Guinea south of the Markham River was effected on 30 Oct., 1945. Jurisdiction of the Supreme Courts of Papua and New Guinea was then vested in the Supreme Court of the Territory of Papua-New Guinea. As circumstances permitted, civil control was extended to other areas until the whole of the Territory of New Guinea came under control of the Provisional Administration of Papua-New Guinea on 24 June, 1946.

The Papua-New Guinea Provisional Administration Act, 1945-46, was repealed by the Papua and New Guinea Act, 1949, which came into force on 1 July, 1949. The Act approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for an administrative union, one Administrator, one Supreme Court and one public service.

Provision is made for an Executive Council of not less than 9 officers of the Territory who shall be appointed by the Governor-General, and a Legislative Council consisting of 29 members, namely:—The Administrator; 16 officers of the Territory (official members); 3 non-official members, elected by electors of the Territory; 3 non-official members representing the interests of the Christian missions in the Territory; 3 non-official native members; and 3 other non-official members. The Legislative Council shall commence to perform its powers and functions as soon as practicable after 1 July, 1950. The date will be fixed by Proclamation.

Subject to the Act, provision may be made by Ordinance for the establishment of advisory councils for native matters; and native village councils. The Act also makes provision for the continuance of the existing laws of the Territory of Papua and the Territory of New Guinea.

Trade between Papua and New Guinea and the United Kingdom (British Board of Trade returns; in £ sterling):—

	1948	1949	1950
Imports to U.K.	506,817	926,433	1,814,142
Exports from U.K.	126,125	195,870	270,051
Re-exports from U.K. . . .	2,438	1,207	1,503

Administrator of Papua and New Guinea.—Col. J. K. Murray (appointed 11 Oct., 1945).

I. Papua.

Papua is the south-eastern part of the island of New Guinea, with the islands of the d'Entrecasteaux and Louisiade groups and all islands between 8° and 12° S. lat., and 141° and 155° E. long. Area 90,540 square miles, of which about 87,786 are on the mainland of New Guinea and 2,754 on the islands above mentioned. On 30 June, 1947, the population was estimated as follows:—Non-indigenous, 3,239; indigenous, 300,000.

To prevent that portion of the island of New Guinea not claimed by Holland from passing into the hands of a foreign power, the Government of Queensland annexed it in 1883. This step was not sanctioned by the Imperial Government, but on 6 Nov., 1884, a British Protectorate was proclaimed over the southern portion of the eastern half of New Guinea, and in 1887 Queensland, New South Wales and Victoria undertook to defray the cost of administration, and the territory was annexed to the Crown the following year. The Federal Government took over the control in 1901;

the political transfer was completed by the Papua Act of the Federal Parliament in Nov., 1905, and on 1 Sept., 1906, a proclamation was issued by the Governor-General of Australia declaring that British New Guinea was to be known henceforth as the Territory of Papua.

Tribes have in large areas settled down to peaceful habits. Many thousands of natives are being taught by administration schools and mission societies. At 30 June, 1949, 219,532 acres of land had been leased, chiefly by planters, the principal cultures, as estimated in 1947, being coconuts (44,800 acres by Europeans, 20,000 by natives) and rubber (23,500 acres European-owned, 350 acres native-owned). A preferential tariff is granted by the Commonwealth on certain raw material from Papua. Freehold alienation is prohibited, but leases may be obtained at low rentals for long terms. Indigenous sago is plentiful in the western portion of the Territory, and there are considerable numbers of native-owned coconut trees. In any area declared to be liable to famine or a deficiency of food supplies a regulation requires that each native shall plant coconut trees or other economic trees or plants. The native may, in lieu of paying a tax in money, establish communal plantations under the direction of European instructors.

For administrative purposes the Territory is divided into 7 divisions (Central Highlands, Western, Delta, Gulf, Central, Northern, Milne Bay), each in charge of a District Officer, assisted by Assistant District Officers and patrol officers. The District Officer of the Central Highlands district of New Guinea is responsible for the Central Highlands division of Papua. There is a supreme court at Port Moresby, but it holds sittings wherever and whenever necessary. For native government some simple regulations have been passed.

Years ended 30 June	Total revenue	Expenditure	Imports	Exports	Tonnage entered and cleared
	£	£	£	£	Tons
1938	182,808	183,102	631,497	435,593	482,981
1940	177,918	177,932	826,412	510,672	489,970
1947	2,482,679[1]	2,303,370[1]	1,467,769	347,014	165,020
1948	1,081,629	1,030,123	2,393,497	823,891	253,621
1949	1,991,894	1,418,074	3,177,285	934,112	398,618

[1] Including New Guinea.

Exports from Papua and New Guinea to the United Kingdom were £506,817 in 1948; £926,433 in 1949; imports from United Kingdom, £126,176 in 1948; £195,625 in 1949 (Board of Trade returns).

Local revenue is mainly from customs duties.

Gold and manganese are the only minerals exported. There are 10 proclaimed mineral fields, 9 of which are also gold-fields. Gold is obtained in the Louisiade Islands, on the mainland, and on Woodlark Island. A large area near Port Moresby, with promising copper deposits, was proclaimed a mineral field, but the whole field was abandoned in 1927 owing to the then low price of copper. Indications of petroleum have been found over an area of 1,000 square miles. Large sums of money are now being spent by oil companies in an intensive search for oil. In 1940–41 the gold output was valued at £A133,341. Bullion produced and exported contains a fairly high percentage of silver. The trade is principally with Queensland and New South Wales. The chief imports are foodstuffs, tobacco, drapery and hardware; exports, 1948–49, copra (9,458 tons, £441,813), gold (28 oz., £264), rubber (1,198 tons, £145,968).

There is a regular shipping service between Sydney, Port Moresby and Samarai, and small coastal vessels run at frequent intervals between the various inter-territorial ports. An air service to and from Australia operates five times a week.

There are wireless telegraph stations at Port Moresby and Samarai. A short-wave station VLT was opened at Port Moresby at 28 June, 1948. A local [illegible] ce is operated by the Australian Broadcasting Comm[illegible] 9PA, Port Moresby.

There are branches of the Commonwealth Bank and of the Bank of New South Wales at Port Moresby. The currency and its legal tender are the same as in the Commonwealth of Australia. The coinage of the Territory of New Guinea is accepted as legal tender throughout the Territory of Papua and New Guinea.

II. New Guinea.

The Territory of New Guinea has an area of 93,000 square miles, extending from the Equator as far as 8° S. lat., and from 141° E. long. as far as 160° E. long. An Australian force occupied these possessions on 11 Sept., 1914. Under a mandate from the League of Nations (*see* The Statesman's Year-Book, 1929, p. xxvii), dated 17 Dec., 1920, on 9 May, 1921, the Australian Government established its civil administration in the territory. The Commonwealth government has now placed the territory of New Guinea under the trusteeship system established under the Charter of the United Nations. The trusteeship agreement for the territory, under which the government of Australia is the sole administering authority, was approved by the General Assembly of the United Nations on 13 Dec., 1946. The laws of the Commonwealth, subject to local modifications as necessary, may be applied.

The non-indigenous population at 30 June, 1947, was about 6,200. The latest figures available for the indigenous population are those for the year ended 30 June, 1941, when the enumerated population was 684,284. The native population of those areas of the Territory where no count was made was estimated at an additional 300,000.

Inter-island trade is carried on by small motor vessels and schooners. There is a regular shipping service from Australia to Rabaul, Lae, Madang and Lavongai. An air service is maintained from Australia to Lae five times a week, with an extension each week to Rabaul, Madang and Wau. Several companies operate air services within the Territory.

The total area under cultivation in the Territory, excluding native reserves (30 June, 1940), was 277,533 acres. The greater part of this area was planted with coconuts, 261,676 acres. Coffee, cocoa and kapok are also grown. Tropical fruits grow abundantly. The staple food of the natives is sweet potatoes, yams, taro, sago and bananas. There is very little land used for pasture. The land is rich in mineral wealth, but, on account of the difficulty of transporting mining machinery, only gold, silver and platinum are worked. Native labour is used to work the plantations, and the natives are recruited either from the adjacent villages or from other parts of the Territory.

The seat of administration used to be at Rabaul, New Britain. In Feb., 1947, the Australian Minister for External Territories announced that Kokopo was to become the administrative headquarters for the District of New Britain. The seat of administration is at present at Port Moresby (headquarters of the administration of the Territory of Papua and New Guinea).

1. **North Eastern New Guinea.**—This region, the northern section of south-east New Guinea, lies between 2° 35′ and 8° S. lat., and 141° and

148° E. long. The area, including Manam, Karkar, Long, Bagabag, Schouten, Kairiru (D'Urville), and some smaller islands, is 69,700 square miles. The enumerated native population in 1941 for areas explored was 451,280. It was declared a German Protectorate under the name of Kaiser Wilhelm's Land in 1884, and was under the control and development of the New Guinea Company from 1885 to 1899. The principal station on the mainland is at Lae. The coast-line is very little broken, and there are few good harbours. There are high ranges running parallel with the coast plain, which is from 20 to 100 miles wide and broken with steep spurs in some places extending to the actual coast-line. The ranges in the interior have not been completely explored, but some of their summits are known to attain 15,000 feet. The principal rivers are the Sepik, which is navigable for over 250 miles, the Ramu and the Markham. The climate is hot and the rainfall large. There are 10 missionary societies at work; some of these missions have plantations, saw-mills, etc.

The chief towns are :—In the Morobe District (non-indigenous population, 1,902), Wau and Lae; in the Madang District (non-indigenous population, 339), Madang, and in the Sepik District (non-indigenous population, 157), Wewak. (The population figures relate to 30 June, 1947.)

2. **Bismarck Archipelago.**—In Nov., 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, and in May, 1885, they were renamed the Bismarck Archipelago. The chief islands are New Britain (German name, Neu-Pommern), area 14,600 square miles; New Ireland (German name, Neu-Mecklenburg), area 3,340 square miles; Lavongai (late New Hanover), 460 square miles; Duke of York Islands, area 22 square miles; the Admiralty Islands (principal island, Manus), area 800 square miles. The other groups included in this Archipelago are Mussau Islands, Gardner Islands, Nuguria, Nissan Island, the Watt Islands, Umboi Islands, Hermit Islands, Ninigo Group, Kaniet and Sao Islands. In these various groups there are upwards of 100 small islands having a total area of 1,115 square miles. The enumerated native population of the Archipelago in 1941 of areas patrolled was 142,332.

New Britain, the largest island of this group, is a long island of crescent shape lying east and west. It has a mean breadth of 50 miles and a length of 300 miles. The island is practically undeveloped except for 35,942 hectares under cultivation at 30 June, 1940, chiefly on the Gazelle Peninsula in the north, and several plantations on the northern and southern coasts. A government station, named Gasmata, has been established on the southern coast. Talasea is situated on the north coast. The native population of areas patrolled as at 30 June, 1941, was 91,676, including adjacent islands. A mountain chain traverses the entire length of the island, and in the centre consists of several irregular ranges. There are several active volcanoes. The highest known peak is the Father, about 7,500 feet high, which is an active volcano. The island has very fine harbours. The chief product is copra. New Britain and the adjacent islands, including Duke of York Island, have an area of 14,600 square miles. Non-indigenous population at 30 June, 1947, was 2,642.

New Ireland (non-indigenous population, 334), the second in size and importance of the Bismarck Archipelago, is situated north of New Britain, from which it is separated by St. George's Channel. The chief town is Kavieng, at the north-west extremity of the island. The only other town is Namatanai on the south-east coast. The island has a long range of mountains running through it. It is of older formation than New Britain, and does not show any signs of recent volcanic activity. The principal harbour

is Nusa, on the north coast of which Kavieng, the seat of the local administration, is situated. The interior of the island is fairly well known. The enumerated native population in 1941 was 37,522, including adjacent islands. The soil is fertile and the climate similar to that of New Britain. The chief industry is coconut growing. The area under cultivation in New Ireland on 30 June, 1940, was 32,201 hectares, 31,955 being planted with coconuts. There are numerous plantations around the coast near Kavieng. New Ireland and adjacent islands, including Lavongai, Tabar, Lihir, Tanga, Feni, Nissan (Green Island), Nuguria, Mussau and Emirau Groups have an area of 3,800 square miles.

The Admiralty Islands (non-indigenous population, 38) are the most important of the small groups. The chief island is Manus. The chief town is Lorengau on the north-east coast. The enumerated native population of the group in 1941 was 13,134. Coconuts are the chief article of cultivation, and there are valuable pearl and other shell fisheries. There were 10,457 hectares planted with coconuts on 30 June, 1940.

3. **Solomon Islands.**—The portion of the Solomon Islands (non-indigenous population, 196) within the area of the Territory of New Guinea consists of the islands of Bougainville, Buka and adjacent islands, including Kilinailau (Carteret Island), Taku (Mortlock) and Nukumanu (Tasman) Islands. Bougainville has an area of 3,880 square miles, and an enumerated native population in 1941 of 50,206, including Buka, which has an area of 190 square miles. Smaller islands in this group have a total area of 30 square miles. The islands are very mountainous. Of the several volcanic cones, Bagana (in the Crown Prince range) and Balbi are the only active volcanoes. The principal harbours are Kieta, situated on the east coast of Bougainville, and Raua and Tinputz on the north-east coast of [illegible]. There is a good harbour on the west side of Buka, named [illegible]. The area planted with coconuts on 30 June, 1940, was 11,924 hectares. The natives grow bananas, coconuts, taro and sweet potatoes.

The following figures relate to the Territory of New Guinea :—

	1938-39	1947-48	1948-49 [2]
	£	£	£
Import duty	193,666	335,276	424,541
Export duty and royalties	8,768	16,446	118,306
Royalty on gold	107,975	35,581	49,053
Native head tax	21,417	—	—
Total revenue	460,836	1,699,203	2,438,045 [2]
Expenditure	502,580	1,656,929	2,593,304
Chief imports :—			
Foodstuffs, animal and vegetable	310,918	930,559	1,314,411
Spirits and alcoholic liquors	54,969	72,186	154,724
Tobacco and preparations	63,122	170,545	154,029
Apparel, textiles and manufactures	138,077	429,837	562,418
Oils, fats and waxes	65,901	258,196	453,387
Machines and machinery	241,642	308,051	365,269
Metals and metal manufactures	229,139	375,283	679,071
Drugs, chemicals and fertilizers	46,163	66,830	99,889
Total imports [1]	1,340,835	3,105,098	4,393,873
Chief exports :—			
Copra	727,949	625,662	1,522,681
Shell (marine)	10,560	21,092	24,426
Desiccated coconut	69,960	—	31,378
Gold	2,129,263	861,570	982,572
Total exports [1]	2,973,895	1,927,075	3,202,257

[1] Including those not enumerated.
[2] Revised figure for 1946–47 : £2,482,679.

The commodities exported in 1948–49 were:—Copra, 36,925 tons; gold, 91,295 oz.; timber (logs), 1,720,719 super feet; timber (sawn), 504 super feet. Net tonnage of shipping entered and cleared in 1948–49 was 403,782 tons. Total inward tonnage of cargo in 1948–49 was 79,347; outward 77,521 tons.

NEW ZEALAND.

NEW ZEALAND was first discovered in 1642 by Tasman, and the coast was explored by Captain Cook in 1769, and in subsequent years it became a resort for whalers and traders, chiefly from Australia. By the Treaty of Waitangi, in 1840, between Governor William Hobson and the representatives of the Maori race, the Maori chiefs ceded the sovereignty to the British Crown and the islands became a British colony.

The Maoris are a branch of the Polynesian race, having emigrated from the Eastern Pacific prior to the 14th century. Between 1845 and 1848, and again between 1860 and 1870, a large proportion of them were in revolt against British rule, but peace was permanently established in 1871.

Government and Constitution.

The powers, duties and responsibilities of the Governor-General and the Executive Council under the present system of responsible government are set out in Royal Letters Patent and Instructions thereunder of 11 May, 1917, published in the New Zealand Gazette of 24 April, 1919. In the execution of the powers vested in him the Governor-General must be guided by the advice of the Executive Council; but, if in any case he sees sufficient cause to dissent from the opinion of the Council, he may act in the exercise of his powers and authorities in opposition to the opinion of the Council, reporting the matter to His Majesty without delay, with the reasons for his so doing.

In March, 1951, the Executive Council consisted of 16 members in addition to the Governor-General.

Parliament or the 'General Assembly' formerly consisted of 2 Chambers, the Legislative Council and the House of Representatives, but by the Legislative Council Abolition Act, 1950, the Council was abolished as from 1 Jan., 1951.

The following is a list of Governors-General, the title prior to June, 1917, being Governor :—

Earl of Liverpool	1917–20	Viscount Galway	1935–41
Viscount Jellicoe	1920–24	Sir Cyril Newall	1941–46
Sir Charles Ferguson, Bt.	1924–30	Sir Bernard Freyberg, V.C.	1946–
Lord Bledisloe	1930–35		

Definition was given the status of New Zealand by the (Imperial) Statute of Westminster of Dec., 1931, which had received the antecedent approval of the New Zealand Parliament in July, 1931. The Governor-General's assent was given to the Statute of Westminster Adoption Bill on 25 Nov., 1947.

The House of Representatives consists of 80 members, including 4 Maoris, elected by the people for 3 years. They are paid £750 per annum, including allowances. Every man or woman registered as an elector is eligible as a member of the House of Representatives. For European representation every adult person (of either sex), other than aliens, if resident 1 year in New Zealand and 3 months in an electoral district, is required to be registered as an elector for such electoral district. No person may be registered on more than 1 electoral roll. Every adult Maori who has resided [illegible] Maori electoral districts for not less than 3 months is entitled to be registered as an elector of that district. A half-caste Maori is entitled to register either for a European or a Maori electoral district. Women's suffrage was instituted in 1893; women became eligible as members of the House of Representatives in 1919. The House in 1951 included 3 women members.

The right of Maori members of Parliament and of Maori petitioners to use their language is safeguarded by standing orders of the House under the discretionary power of Mr. Speaker. Speeches from the Throne and bills or clauses of bills specially affecting the Maori are also officially translated at Mr. Speaker's direction.

House of Representatives elected 30 Nov., 1949 :—National Party, 46; Labour, 34; total 80.

Governor-General and Commander in-Chief.—Lieut.-General Sir Bernard Cyril Freyberg, V.C., G.C.M.G., K.C.B., K.B.E., D.S.O. [illegible] 9 Sept., 1945; assumed office, 17 June, 1946; salary £5,000, [illegible] for the salaries and expenses of his establishment (exclusive of the Official Secretary) plus travelling expenses for himself, his family and his staff).

The Executive Council, formed on 13 Dec., 1949, was composed as follows in March, 1951 :—

Prime Minister, Minister of Finance.—S. G. Holland, P.C.

Minister of Agriculture, Minister of Marketing.—K. J. Holyoake.

Minister of Labour, Minister of Employment, Minister of Mines, and Minister of Immigration.—W. Sullivan.

Attorney-General, Minister of Justice.—T. C. Webb.

Minister of Education.—R. M. Algie.

Minister of Internal Affairs, Minister of Social Security.—W. A. Bodkin.

Minister of Customs, Minister of Supply, Minister of Stamp Duties.—C. M. Bowden.

Postmaster-General and Minister of [illegible] W. J. Broadfoot.

Minister of Lands, Minister of [illegible] of Maori Affairs.—E. B. Corbett.

Minister of External Affairs, Minister of Island Territories.—F. W. Doidge.

Minister of Works, Minister of Transport, Minister of Railways, Minister of Marine.—W. S. Goosman.
Minister of Defence, Minister of Rehabilitation.—T. L. Macdonald.
Minister of Health, Minister of Industries and Commerce.—J. T. Watts.
Ministers without Portfolio.—Mrs. G. H. Ross; J. R. Marshall; W. H. Fortune.

The Prime Minister (provided with residence) has a salary of £1,800 per annum; Ministers with portfolio, £1,170 per annum; Ministers without portfolio, £1,000 per annum. In addition, ministers not provided with residence receive £300 per annum house allowance.

Local Government.

For purposes of local government New Zealand is divided into counties, boroughs and town districts. The counties are subdivided into ridings. There are also numerous other local authorities created for specific functions, such as electric-power districts, river (*i.e.*, river protection) districts, gas districts, rabbit (*i.e.*, rabbit extermination) districts, etc.

Diplomatic Representatives.

Country	New Zealand representative	Foreign representative
Australia [1] .	G. E. L. Alderton	A. R. Cutler, V.C.
Belgium [3] .	—	A. Nihotte.
Canada [1] .	T. C. A. Hislop, C.M.G.	Alfred Rive.
Denmark [3] .	—	A. C. Fensmark.[4]
France [3] .	Miss Jean MacKenzie.[4]	Emmanuel Lancial.
Italy . .	—	Dr. Mario Carosi.[3]
Netherlands [3]	—	J. B. D. Pennink.
Sweden [2] .	—	L. R. G. Arfwedson.[4]
U.S.S.R.[3] .	—	Alexander M. Alexandrov.
U.K.[1] . .	Rt. Hon. W. J. Jordan, P.C. (415 Strand, W.C.2.)	Sir Charles Roy Price, K.C.M.G.
U.N.[5] . .	Sir Carl Berendsen, K.C.M.G.	—
U.S.A.[2] .	Sir Carl Berendsen, K.C.M.G.	Robert M. Scotten.

[1] High Commissioner. [2] Ambassador. [3] Envoy.
[4] Chargé d'Affaires. [5] Permanent Delegate.

New Zealand has a Consul-General in Washington; Trade Commissioners in Melbourne, Sydney, Montreal, Bombay and Washington; a Trade Representative in Tokio; and Agents in Vancouver, Bombay, Tientsin, Suva, Honolulu, Rangoon, Johannesburg, Adelaide, Perth, Brisbane.

There are in Wellington Consuls-General of China and Greece; Consuls of Argentine, Brazil, Chile (Auckland), Czechoslovakia, Italy, Lebanon, Norway, Panama (Auckland), Portugal, Switzerland, Turkey (Auckland); a Vice-consul of Uruguay; a Trade Commissioner of India.

Area and Population.

There are two principal islands, the North and South Islands, besides Stewart Island, Chatham Islands, and small outlying islands, including (since 1901) the Cook and some other islands in the Pacific Ocean. The Tokelau Islands, administered by New Zealand since 1925, were declared part of New Zealand in 1948. New Zealand administers the trusteeship territory of Western Samoa.

New Zealand is about 1,200 miles east of Australia and is 1,100 miles long.

Area, excluding island territories, 103,736 square miles; North Island, 44,281 square miles; South Island, 58,093 square miles; Stewart Island, 670 square miles; Chatham Islands, 372 square miles; minor islands, 320 square miles. Acreage 66,390,700 acres, exclusive of the Cook and other islands (129,900 acres), and up to March, 1948, 22,358,026 acres had been alienated, and 16,661,565 acres reserved and set apart by the state for special purposes. The area of Maori lands at 31 March, 1948, was 4,477,524 acres. The population of New Zealand proper at the census date of 25 Sept., 1945, was 1,702,298, inclusive of 98,744 Maoris. The census figures did not take into account 45,381 (44,715 males and 666 females) members of the armed forces overseas at census date. Including island territories (Cook and other annexed islands, Tokelau Islands, and the trusteeship territory of Western Samoa), the total population at the census of 1945 was 1,790,256. Census population, exclusive of Maoris and dependencies :—

Years	Males	Females	Total	Average increase % per annum
1891	331,744	292,711	624,455	2·5
1901	404,799	365,505	770,304	2 1
1911	530,433	475,152	1,005,585	2·7
1921	621,136	593,541	1,214,677	1·9
1926	686,384	658,085	1,344,469	2·1
1936	736,226	735,258	1,491,484	1 1
1945	782,602	820,952	1,603,554	0 8

The census of New Zealand is quinquennial, but the census falling in 1931 was abandoned as an act of national economy, and owing to war conditions the census due in 1941 was not taken until 25 Sept., 1945. The latest census was taken in April, 1951.

Area and estimated population of each provincial district at 1 April, 1950 :—

Provincial district	Sq. miles	Population (excluding Maoris)	Maori population	Total population
Auckland . . .	25,420	649,181	85,782	734,963
Hawke's Bay . .	4,260	80,500	8,200	88,700
Taranaki . . .	3,750	78,600	5,400	84,000
Wellington . .	10,870	380,700	13,000	393,700
Marlborough . .	4,220	21,400	600	22,000
Nelson . . .	10,870	63,200	300	63,500
Westland . . .	4,880	18,200	200	18,400
Canterbury . .	13,940	274,505	1,652	276,157
Otago :				
Otago portion .	14,050	156,000	400	156,400
Southland portion .	11,180	75,800	500	76,300
Total . .	103,440	1,798,086	116,034	1,914,120

At the census of 1945, 674,821 lived in the rural districts; 1,024,292 in cities and boroughs. The balance of 3,185 were migratory on census night. These figures are inclusive of Maoris.

Maori population of New Zealand :—1896, 42,113; 1901, 45,549; 1936, 82,326; 1945, 98,744; 30 Sept., 1950, 117,861.

Population (including Maoris), 30 Sept., 1950, 1,927,848 (969,183 males and 958,665 females).

The estimated populations (including Maoris) of the chief centres of New Zealand as at 1 April, 1950, were as follows :—Auckland, 308,500; Wellington, 193,300; Christchurch, 171,500; Dunedin, 91,200; Palmerston North, 32,100; Hamilton, 31,000; Invercargill, 30,900; Wanganui, 28,800; Hastings, 24,000; New Plymouth, 23,800; Napier, 23,600; Timaru, 22,100; Gisborne, 19,200; Nelson, 19,000.

VITAL STATISTICS (EXCLUDING MAORIS).

Years	Total live births	Illegitimate births	Deaths	Excess of births over deaths	Marriages	Divorces (decrees absolute)
1945	37,007	2,824	16,051	20,956	16,160	1,725
1946	41,871	1,824	16,093	25,778	20,535	2,133
1947	44,816	1,727	15,904	28,912	18,525	2,117
1948	44,193	1,686	15,812	28,381	17,192	1,853
1949	43,988	1,671	16,012	27,976	16,788	—

Birth rate, 1949, 24·88 per 1,000; death rate, 9·06 per 1,000; marriage rate, 9·50 per 1,000; infant mortality, 23·78 per 1,000 live births (exclusive of Maoris). Maori live births in 1949 numbered 4,917 (birth rate, 43·34 per 1,000); deaths totalled 1,566 (death rate 13·80 per 1,000).

EXTERNAL MIGRATION (EXCLUSIVE OF CREWS AND THROUGH PASSENGERS).

Year ended 31 March	Arrivals	Departures	Year ended 31 March	Arrivals	Departures
1945 . . .	7,207	6,189	1948 . .	33,144	27,388
1946 . . .	13,309	10,966	1949 . .	35,946	3,640
1947 . . .	25,358	22,320	1950 . .	50,888	43,000

Religion.

No direct state aid is given to any form of religion. For the Church of England the country is divided into 7 dioceses, with a separate bishopric (Ao-tea-roa) for the Maoris. The present Bishop of Christchurch is Primate and Archbishop of New Zealand. The Roman Catholic Church is under an archbishop residing at Wellington, and 3 bishops.

Religious denomination	Number of clergy (Jan., 1949)	Number of adherents	
		Europeans (Census 1945)	Maoris (Census 1936)
Church of England	489	601,786	24,832
Presbyterian	437	374,956	1,115
Roman Catholic [1]	501	215,629	11,326

[1] Including 'Catholic' undefined.
[2] Including the Society of Friends with 388 members in 1949.

Education.

The University of New Zealand consists of the Otago University at Dunedin; the Canterbury University College at Christchurch; the Auckland University College (at Auckland), and the Victoria University College (at Wellington); number of students (1949), 11,000. The university colleges are all endowed with lands, but also receive government grants. The Canterbury Agricultural College (at Lincoln) and the Massey Agricultural College (at Palmerston North) are attached to the university, and had, in 1949, a total of 1,120 students. There are 5 teachers' training colleges with 2,486 students in Dec., 1949, including 292 students admitted under a special training scheme, taking a one-year course.

At the end of 1949, there were 47 secondary or combined schools, with 1,049 (excluding part-time) teachers and 21,910 pupils. There are also 103 district high schools with 402 teachers and 7,075 scholars in the secondary division, and 7 Maori district high schools with an aggregate of 15 teachers and 245 pupils. Technical high and technical day schools numbered 28, with 722 teachers and 12,504 pupils. In addition, there were 15,370 part-time pupils attending technical classes. Of private secondary and endowed schools there were 84 registered, with 532 teachers and 9,889 pupils, including 10 secondary schools for Maoris with 41 teachers and 729 pupils.

For primary schools there is an education department (which also exercises certain functions in regard to both university and secondary schools). There are 9 local education boards. At the end of 1949, there were 1,905 public primary schools (including intermediate schools and departments), with 241,699 scholars; average attendance, 206,980; the number of teachers at the end of 1949 was 7,481. Education is compulsory between the ages of 7 and 15, but at the age of 5 a child may enter either a state or private primary school. The instruction given at the public schools is secular only, and for the ordinary standard course entirely free. There is a correspondence school for children in remote areas and those unable to attend school for various reasons. There were 4,189 correspondence school students at the end of 1949, 1,749 being in the primary department, 533 in the secondary and 1,907 part-time students. There were also, at the end of 1949, 306 registered primary private schools, with 1,056 teachers and 34,960 pupils.

There were 160 Maori village schools, with 396 teachers and 13,288 scholars, including 1,149 Europeans, while the number of scholars of the 10 Maori mission schools was 771.

Children aged 3 and under 5 may enrol at free kindergartens maintained by local branches of the Free Kindergarten Association, which are subsidized by the Government. At the end of 1949 there were 3,894 children on the rolls of 94 free kindergartens.

There are 7 schools of mines in addition to the Otago University School of Mines; 15 child welfare institutions; 2 schools for the deaf (at Christchurch and Auckland); an institute for the blind (at Auckland); a special school for mentally backward boys (at Otekaike, Otago), and a similar school for girls (at Richmond, Nelson).

Total net expenditure out of government funds in 1949–50 upon education of all kinds (including receipts from endowments) was £13,744,960.

There were in 1949, 568 cinemas with a seating capacity of 274,000.

Justice and Crime.

There were in the year 1949–50, 11 supreme court judges as well as 3 judges (and 3 deputy judges) in special courts.

A Maori may give evidence in any court in the Maori language and request the services of a licensed interpreter.

The police force in New Zealand is a national body maintained wholly by the general government. The total strength of the force at 31 March, 1950, was 1,538 (excluding 32 women police), the proportion of police to population being 1 to 1,230. The total cost of police services for the year 1949–50 was £1,206,206, equivalent to 12*s*. 9¼*d*. per head of population.

At the end of 1949 the gaols and Borstal institutions contained 990 prisoners, 941 undergoing sentence and 49 on remand and awaiting trial, etc.

The Crimes Amendment Act, 1941, abolished the death penalty (except for treason) and flogging, but capital punishment was restored in 1950.

Social Services.

New Zealand is divided into hospital districts, with elective boards for the administration of the public hospitals and charitable relief. The Government subsidizes contributions by local authorities. Estimated expenditure by hospital boards on public hospitals and kindred institutions during the year ended 31 March, 1950, was £8,454,000 for maintenance and £978,000 for capital expenditure, excluding loan works. Payments of medical, maternity, hospital etc., benefits from the Social Security Fund for the same year were £8,461,109.

Social Security.—A Social Security Act was passed in 1938 and became operative as from 1 April, 1939. The principal objects of the Social Security legislation were as follows:—(1) To substitute for the system of non-contributory civil pensions (*e.g.*, old-age, widows', and other pensions —a system of monetary benefits, on a contributory basis; (2) The inauguration of a system of medical and hospital benefits, and of other related benefits.

Monetary Benefits available and the rates from 8 June, 1950, are as follows:—In most cases the rates of benefit quoted are subject to certain deductions on account of income or accumulated property.

Superannuation Benefits.—Available as from 1 April, 1940, at the rate of £10 per annum during 1940–41, increases of £2 10*s*. per annum to be made until a maximum of £136 10*s*. per annum is reached on 1 April, 1991; 1950–51 rate, £35. Subject to certain residential qualifications, every person over the age of 65 is eligible for superannuation, irrespective of income or property.

Age Benefits.—The minimum age-limit is 60 years, and the basic rate is £136 10*s*. per annum. If the applicant's wife is under 60 years of age and thus cannot qualify for a benefit, the husband's benefit may be increased by an amount not exceeding £136 10*s*. per annum.

Widows' Benefits.—A widow without dependent children is entitled to a benefit of £136 10*s*. per annum, and a widow with a dependent child or children under 16 years of age is entitled to a benefit of £136 10*s*. per annum plus a mother's allowance of £84 10*s*. per annum. In addition, the universal family benefit (referred to under a subsequent heading) is payable in respect of a child or children under 16 years of age.

Orphans' Benefits.—Orphaned children under the age of 16 years, both of whose parents are dead, are each entitled to a benefit ranging up to a maximum of £71 10*s*. per annum.

Family Benefits.—As from 1 April, 1946, a family benefit of 10*s*. per week is payable in respect of each child under 16 years of age, irrespective of the

circumstances or income of the parents or children. Previously the payment of family benefits was restricted to persons in the lower income-groups.

Invalids' Benefits.—Subject to certain restrictions, all persons over 16 years of age who are blind or totally incapacitated for work are eligible for invalid benefits. For invalids over 16 and under 20 years of age the rate of the benefit is £110 10*s.* per annum, and for those 20 years and over £136 10*s.* per annum, increased by £136 10*s.* per annum for a dependent wife.

Miners' Benefits.—The basic rate of miners' benefits, which are available for miners suffering from occupational diseases, is £136 10*s.* per annum, increased by £136 10*s.* per annum for a dependent wife. There is also a provision for a benefit of £110 10*s.* per annum for a widow whose husband died while in receipt of a miner's benefit.

Sickness Benefits.—The rates are the same as those payable for unemployment.

Unemployment Benefits.—Every person, except a seasonal worker, who has been unemployed for a longer period than 7 days, and whose unemployment is not of his or her own choosing, is eligible for an unemployment benefit. For persons (without dependants) over 16 and under 20 years of age the rate is £1 12*s.* 6*d.* per week, and for all other persons £2 12*s.* 6*d.* per week, with an addition of £2 12*s.* 6*d.* per week for a dependent wife.

Reciprocity with other Countries.—There are reciprocal arrangements between New Zealand and Australia in respect of age, invalids, widows', family, unemployment, and sickness benefits, and between New Zealand and Great Britain and between New Zealand and Northern Ireland in respect of family benefits.

Medical, Hospital and other Related Benefits are also provided from the Social Security Fund. These consist mainly of the payment of certain prescribed fees for medical attention by private practitioners, free treatment in public hospitals and in mental hospitals, certain prescribed fees for treatment in private hospitals, maternity benefits (including ante-natal and post-natal treatment and services of doctors and nurses at confinements in hospitals or elsewhere) pharmaceutical benefits (medicines, drugs, etc., prescribed by medical practitioners), etc. There are also benefits in connexion with dental services, X-ray diagnostic services, massage, home-nursing, etc.

Financial Contributions.—The principal revenue of the Social Security Fund derives from a charge on salaries, wages and other income (including the income of companies), the rate being 1*s.* 6*d.* in the pound.

Total receipts of the Social Security Fund for the year ended 31 March, 1950, amounted to £43,838,183, made up as follows:—Charge on salaries and wages and other income, £31,702,570; grant from Consolidated Fund, £12,000,000; other receipts, £70,603; recoveries, £65,010.

War Pensions (including economic pensions).—Provision is made for the payment of pensions and allowances, on certain conditions, to members, or dependants, of disabled, deceased or missing members, of the New Zealand Forces who served in the South African War, the war of 1914–18, the war of 1939–45, or to members of the New Zealand Mercantile Marine during the war of 1939–45. Members of the Emergency Reserve Corps are also provided for. Such pensions are not a charge on the Social Security Fund, but are paid from the Consolidated Fund. Principal rates are:—War

pensions (and emergency reserve corps pensions on similar lines) are papable to widows at a rate of from £2 10*s.* to £4 according to deceased member's rank, together with a standard allowance of £1 17*s.* 6*d.* to a widow with a dependent child (or children). Total disablement rates range from £3 10*s.* to £3 15*s.* (by rank or rating), with £1 7*s.* 6*d.* to £2 to a wife without a child, and £1 17*s.* 6*d.* to £2 10*s.* to a wife with a dependent child. Economic pensions in addition may be paid up to a maximum of £2 7*s.* 6*d.* to a member, or £1 7*s.* 6*d* to a widow. War veterans' allowances are £136 10*s.* per annum plus an equal amount to a wife, subject to income qualifications.

The maximum rates of mercantile marine pensions vary in respect of death of a member from £2 10*s.* to £3 7*s.* per week to the widow (according to member's rank and the tonnage of vessel in which he served), plus £1 17*s.* 6*d.* to a widow with a child; while the total disablement maximum rate is £3 10*s.* to a member, £1 7*s.* 6*d.* to a wife without a child, and £1 17*s.* 6*d.* to a wife with a child. In all classes of pension, whenever there is a dependent child, the family allowance of 10*s.* for each child is payable in addition.

Social Security Benefits and War Pensions.—

Benefits	As at 31 March, 1950		
	Number in force	Annual value (£)	Total payments 1949–50 (£)

Finance.

The following tables of revenue and expenditure relate to the Consolidated Fund, which covers the ordinary revenue and expenditure of the general government—*i.e.*, apart from capital items, commercial and special undertakings, advances, etc. Taxation revenue excludes social security taxes and, for the years up to and including 1945–46, taxation levied for war purposes. The increase in 1946–47 is largely due to the inclusion of taxation formerly credited to the war expenses account.

Year ended 31 March	Customs and excise	Sales-tax	Income tax	Other taxes	Interest [1]	Total (including others)
	£	£	£	£	£	£
1946 [2]	11,108,616	4,505,443	26,465,912	6,290,747	5,857,264	63,913,649
1947	19,970,492	15,550,547	32,085,057	23,109,297	4,714,100	108,294,473
1948	28,794,932	15,945,813	36,632,581	14,725,827	5,002,728	117,116,115
1949	23,666,860	14,105,224	49,007,672	14,281,983	5,215,789	121,523,915 [3]
1950	26,296,873	14,785,320	48,483,450	14,287,821	5,886,354	124,996,634

[1] The totals shown for interest cover interest on the Loans Redemption Account and on other public moneys, together with interest on railway capital liability, post and telegraph capital liability and on [illegible] of certain other funds and accounts.
[2] Excludes taxation paid to [illegible].
[3] Excludes £20,000,000 stock issued for payment of exchange adjustment liability.

Consolidated Fund expenditure was as follows :—

Year ended 31 March	Debt services	Pensions [1]	Education	Health [1]	Police	Total (including others)
	£	£	£	£	£	£
1946 [2]	22,796,378	4,199,521	6,650,695	3,971,715	739,461	62,659,499
1947	22,515,369	4,735,185	7,712,490	4,481,974	1,044,953	103,683,455
1948	26,612,339	4,688,312	8,883,246	5,962,065	968,836	115,330,403
1949	26,029,077	4,926,081	9,588,988	8,081,457	1,073,999	118,316,947 [3]
1950	22,485,049	5,368,228	11,613,630	8,865,148	1,206,207	120,688,892

[1] Exclusive of Social Security benefits.
[2] [illegible] War Expenses Account.
[3] [illegible], being the exchange adjustment liability.

Total expenditure shown in the foregoing table includes amounts transferred to the Social Security Fund and in certain years amounts transferred to the War Expenses Account. In 1949–50, £12,000,000 was transferred to the Social Security Fund.

The Budget estimate for the Consolidated Fund for 1950–51 :—Revenue, £132,676,000; expenditure, £131,177,164.

Taxation receipts in 1949–50 for all purposes amounted to £135,556,319, giving an average of £71 13*s.* 6*d.* per head of mean population.

The gross public debt at 31 March, 1950, was £670,071,342, inclusive of £26,191,109 in respect of which interest has been suspended by agreement with the United Kingdom Government from 1931. Of the total debt, £252,383,021 represents the amount outstanding on account of war and defence expenditure. The majority of the remainder of the debt represents reproductive expenditure or investments. The [illegible] annual interest charge on the public debt at 31 March, 1950, was [illegible].

Defence.

The control and co-ordination of defence activities is obtained through a defence committee of the Cabinet, the appointment of a Minister of Defence in charge of the three Services, and through a series of inter-Service Committees. The Defence Committee consists of the Prime Minister, the Attorney-General and the Ministers of Defence and External Affairs. The chiefs of the Naval, General and Air Staffs, and the Secretary of the Treasury and the Secretary for External Affairs attend meetings of this Committee in a consultative capacity. The Committee is to keep defence policy and organization constantly under review, including questions

of co-operation in defence with other countries of the British Commonwealth and military questions arising as a result of New Zealand membership of the United Nations. The Chiefs of Staff Committee, comprising the Chiefs of the Naval, General and Air Staffs is responsible for advising the Government on defence policy and strategic questions.

The Department of Defence, under the Minister of Defence, is divided for the purpose of control and administration into:—(*a*) the Navy Department; (*b*) the Army Department; (*c*) the Air Department. Command, training and administration of each service is exercised through a service board, the President of which in each case is the Minister of Defence.

The Military Training Act, 1949 (approved by a referendum, held on 4 Aug., 1949, with 535,016 against 152,573 votes) provides for a system of compulsory military training to meet the requirements of the non-regular forces. Those called up for training are given the option of joining the non-regular naval or air forces and, subject to service requirements and the needs of the Navy and the Air Force, will be accepted for these services. Otherwise, they will be required to serve in the Army. On reaching the age of 18 years all male British subjects ordinarily resident in New Zealand are required to register. After registration, those found fit for training will be called upon to attend one of the two training camps which are held annually, the first in summer and the other in winter. The period of training is 14 weeks in the first year, after which the trainee is posted to a Territorial unit, and carries out annual training for 3 years of 14 days in camp and 6 days other training (week-end, etc.). He is then posted to the Reserve for a period of 6 years, but is liable for continuous service in the event of war or national emergency. It is anticipated that approximately 9,000 recruits will be trained annually.

Army.—The Army Board consists of:—(*a*) President (Minister of Defence); (*b*) First Military Member (Chief of the General Staff); (*c*) Second Military Member (Adjutant-General); (*d*) Third Military Member (Quartermaster-General); (*e*) the Army Secretary; (*f*) a Territorial Officer (associate member).

The New Zealand Army consists of a small Regular Force, the Territorial Force and the Reserve.

Militarily, the country is divided into 3 districts—Northern, Central and Southern—each being under the command of a senior officer of the regular force. The strength of the Regular Army at 31 March, 1950, was 403 officers and 2,693 other ranks, the total including 226 women.

Navy.—The Navy Department, Wellington, is controlled by the New Zealand Naval Board, set up in terms of the Naval Defence Amendment Act, 1950. This board consists of:—(*a*) The Minister of Defence (as President of the Board); (*b*) A Commodore, Royal Navy (as first Naval Member and Chief of Naval Staff); (*c*) A Captain, Royal Navy (as second Naval Member); (*d*) A Captain (S), Royal Navy (as naval secretary and member).

The Naval Board implements its instructions through the Navy Office, Wellington, which directs the administration, etc., of the Royal New Zealand Navy.

The present strength of the R.N.Z.N. comprises the cruisers *Bellona* and *Black Prince*, 5,900 tons (lent from the Royal Navy), 6 frigates, 8 trawlers, a surveying vessel, 10 S.D.M.Ls. and 8 small vessels. Personnel, as at 1 April, 1950, totalled 2,507 officers and ratings.

Air Force.—The Royal New Zealand Air Force is controlled by an Air Board under the Chairmanship of the Minister of Defence and administered by the Air Department. The Chief of the Air Staff is an Air Vice-Marshal and the Force consists of the Regular Air Force, the Territorial Air Force, the Air Force Reserve, the Air Training Corps and the Women's Auxiliary Air Force.

The organization, administration and equipment are almost identical with that of the Royal Air Force.

The strength of the Regular Air Force at 31 March, 1950, was 3,134; Women's Auxiliary Air Force, 361; Territorial Air Force, 296; Air Training Corps, 4,560.

Production and Industry.

I. Agriculture.

Two-thirds of the surface of New Zealand is suitable for agriculture and grazing. About 13,400,000 acres are still under forest. The total area under cultivation in 1949 was 20,128,199 acres (including 18,088,777 acres in sown grasses and 106,070 in fallow). The area of Crown lands (other than reserves) leased under various tenures at 31 March, 1948, was 15,890,723 acres, and 2,327,290 acres (the greater part unsuitable for settlement) were available for future disposal.

The largest freehold estates are held in the South Island. The extent of occupied holdings of or over 1 acre in 1949 (exclusive of holdings within borough boundaries) was as follows :—

Sizes of holdings (acres)	Number of holdings	Acres	Sizes of holdings (acres)	Number of holdings	Acres
1 and under 10	11,463	53,053	5,000 & under 10,000	538	3,661,138
10 „ „ 50	13,611	344,548	10,000 „ „ 20,000	278	3,891,586
50 „ „ 100	12,962	949,958	20,000 „ „ 50,000	144	4,457,035
100 „ „ 200	17,250	2,417,342	50,000 acres and over	51	4,864,847
200 „ „ 320	10,084	2,527,401			
320 „ „ 640	10,653	4,823,068			
640 „ „ 1,000	4,215	3,349,984			
1,000 „ „ 5,000	5,827	11,377,539	Total . .	87,076	42,717,499

The acreage and produce for each of the principal crops are given as follows (area and yield for threshing only, not including that grown for chaff, hay, ensilage, etc.) :—

Crop years	Wheat			Oats			Barley		
	Acres	1,000 bushels	Average per acre	Acres	1,000 bushels	Average per acre	Acres	1,000 bushels	Average per acre
1945	183,886	6,392	38·02	77,684	4,209	54·18	37,326	1,385	37·11
1946	161,049	5,439	33·77	57,278	2,797	48·83	48,646	1,872	38·49
1947	141,407	5,368	37·96	55,297	2,686	48·58	53,041	2,027	38·21
1948	123,751	4,539	63·68	63,159	2,854	45·19	63,398	2,088	32·93
1949	146,707	5,958	40·61	78,300	3,719	47·49	58,707	2,256	38·43

Livestock in 1949 :—196,055 horses, 4,722,836 cattle, 32,844,918 sheep and 544,841 pigs. The total number of dairy cows in milk as at 31 Jan., 1949, was 1,746,753, and the total butter-fat production in 1949–50 was 470,900,000 lb. Butter exported, 12 months ended June, 1950, was 2,963,530 cwt.; cheese exported, 1,793,771 cwt. Estimated production

of wool for the 12 months ended 30 June, 1950, 390,000,000 lb. (greasy basis). Exports of all wool on a greasy basis, 1949–50 (June year), was 406,757,890 lb.

II. Manufactures.

Statistics of the principal manufactories (excluding mines and quarries):—

Years ended 31 March	Persons engaged	Salaries and wages paid	Cost of materials	Value of output	Added value
		£	£	£	£
1944–45 . .	122,414	37,379,062	122,695,106	189,800,764	67,105,658
1945–46 . .	128,208	41,499,113	123,508,438	195,258,614	71,750,176

		Clothing manufacture . .	13,726,386 [1]

[1] 1947-48 figures; these industries were not covered by the 1948–49 sample survey.

III. Mines and Minerals.

New Zealand's production of minerals in 1949 included 84,474 oz. of gold, 232,599 oz. of silver, 19 tons of arsenic, 25 tons of tungsten ore, 94 tons of diatomaceous earth, 559 tons of magnesite, 456 tons of bentonite, 305 tons of manganese ore. Among the larger tonnages were 14,672 tons of valuable non-brickmaking clays, 4,352 tons of iron ore, 20,401 tons of silica sand, 4,210 tons of dolomite, 13,124 tons of pumice, 54,453 tons of serpentine, 1,100,126 tons of limestone for agriculture, 465,026 tons of limestone, marl etc. for cement, and 2,813,275 tons of coal. Crude petroleum production was 236,463 gallons.

IV. Electricity Supply.

The general policy of the government in regard to electric power is to supply power in bulk, leaving the reticulation and retail supply in the hands

of local authorities. Originally these consisted of cities, boroughs, etc., but, to facilitate the extension of electric supply into country areas, Electric Power Boards were created and these now embrace many urban areas. Some Power Boards operate small generating stations. Practically all stations rely on water-power, fuel plants occupying a place of minor utility for stand-by or peak-loading purposes. Principal statistics for 4 years ended 31 March are :—

	1947	1948	1949	1950
Total motive power (b.h.p.)	812,390	888,954	973,474	974,431
Generators (capacity):				
Main plant				
DC (kW)	292	191	191	191
AC (kW)	455,196	509,088	586,285	589,855
(kVA)	529,093	588,241	676,492	679,428
Standby plant				
DC (kW)	1,842	1,964	1,616	1,496
AC (kW)	91,903	91,721	86,734	87,774
(kVA)	114,115	113,890	107,735	108 913
All plant (kW)	547,099	600,809	673,019	679,316
Route miles of lines	31,747	36,164	38,341	40,516
Units generated (thous. kWh)	2,520,625	2,589,620	2,834,155	3,030,270
Revenue (£)	10,403,077	10,622,523	12,009,548	12,790,466
Expenditure:				
Operating (£)	5,647,213	5,623,250	6,485,529	6,761,479
Management, etc. (£)	854,698	991,549	1,088,739	1,260,093
Capital charges (£)	3,004,264	3,203,197	3,476,755	3,687,310

Commerce.

Years	Total imports [1]	Exports of domestic produce	Exports of other produce [1]	Total exports [1]

[1] Excluding specie.

The principal imports in the calendar year 1949 were as follows :—

Articles of import	Quantity	Value (£NZ)
Fruits (canned, fresh, dried)	85,749,129 lb.	1,928,518
Wheat	5,739,832 bushels	2,423,472
Sugar	1,590,690 cwt.	2,364,590
Tea	12,257,220 lb.	1,791,261
Alcoholic beverages (including wines)	797,712 gal.	727,932
Tobacco (unmanufactured)	5,901,856 lb.	1,190,574
Apparel and footwear	2,937,408 sq. yd.	2,327,577
Floor coverings	—	1,424,996
Cotton piece-goods	—	7,467,521
Drapery	—	1,443,796
Rayon and rayon and cotton piece-goods	—	3,647,635
Woollen piece-goods	7,183,841 sq. yd.	3,212,646
Bags, sacks and wool packs	1,396,489 doz.	1,614,668
Yarns	3,960,270 lb.	1,771,093
Motor-spirits	112,571,006 gals.	5,166,277
Mineral lubricating oil	1,331,219 „	623,593

Articles of Import	Quantity	Value (£NZ)
Crude petroleum, fuel oil, etc.	68,069,407 „	1,175,483
Iron and steel :		
Bar, bolt and rod	1,034,265 cwt.	1,483,998
Plate and sheet	1,191,442 „	1,492,735
Tubes, pipes and fittings	355,459 „	1,140,604
Iron wire	828,243 „	1,772,556
Electrical machinery and wireless equipment	—	6,952,111
Tractors :		
Agricultural	6,087 no.	2,236,035
Industrial	807 „	523,229
Parts of	—	568,589
Engines and parts	—	1,082,062
Other machinery	—	10,344,207
Railway and tramway plant	—	1,088,925
Artificers' tools	—	872,412
Raw rubber and rubber goods (other than tyres)	—	817,140
Earthenware, glass and glassware	—	1,645,936
Paper (printing and other)	—	3,020,734
Books, printed papers and stationary	—	2,068,282
Manures	—	2,151,271
[illegible] and druggists wares	—	3,197,006
[illegible] :		
Trucks, lorries	6,727 no.	2,155,388
Motor cars	11,764 „	3,182,352
Parts of motor vehicles	—	896,973
Tyres and tubes	—	575,643
Tota., including articles not specified	—	119,713,138

The principal exports in the calendar year 1949 were as follows:—

Articles of export (N.Z. produce)	Quantity	Value (£NZ)
Wool	429,657,252 lb.	46,553,151
Butter	2,952,039 cwt.	35,449,918
Casein	109,204 „	600,740
Cheese	1,878,756 „	12,674,359
Fish	—	519,371
Lamb (frozen)	3,800,348 „	17,946,871
Mutton (frozen)	1,338,182 „	3,535,004
Beef (frozen)	1,022,660 „	2,921,814
Pork (frozen)	173,468 „	982,124
Veal (frozen)	157,713 „	413,664
Other frozen meat	389,652 „	1,430,207
Canned meats	111,473 „	848,738
Meat extract	1,083,056 „	232,403
Sausage casings	542,525 „	2,044,867
Milk (dried and condensed)	77,033,426 „	2,866,116
Apples	21,357,099 „	382,980
Peas	508,984 cental	1,004,540
Hides, skins and pelts	—	6,679,490
Seeds :		
Grass and clover	161,992 cwt.	1,523,426
Other	—	118,108
Linen flax (fibre and tow)	9,415 cwt.	82,085
Lard and tallow (edible)	157,754 „	865,782
Tallow	19,102 tons	1,903,615
Coal	21,575 „	71,659
Kauri gum	20,930 cwt.	102,877
Gold	63,854 oz.	607,656
Machinery and machines	—	242,085
Timber (sawn or hewn)	24,427,950 sup. ft.	551,201
Total, including articles not specified	—	146,188,409

Exports of certain trade products :—

Years	Wool (lb.)	Frozen meat (cwt.)	Tallow (tons)	Butter (cwt.)	Cheese (cwt.)
1945	165,990,887	5,651,061	30,761	2,069,532	1,748,514

[1] Country of origin.

According to the British Board of Trade returns, the total trade between the United Kingdom and New Zealand was as follows (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports into U.K.	46,865,368	89,992,734	108,704,407	117,109,204	133,568,084
Exports from U.K.	19,205,093	43,151,503	52,476,719	64,618,363	86,424,014
Re-exports from U.K.	291,647	175,710	120,972	178,645	256,023

Communications.

Shipping.

At the end of 1949 the registered vessels were 44 sailing vessels of 3,525 tons (net), 113 steamers of 61,282 tons, 325 motor vessels of 40,797 tons; total, 482 vessels of 105,640 tons (net).

Shipping inwards and outwards (excluding coastwise shipping) :—

Year	Vessels inwards				Vessels outwards			
	British		Foreign		British		Foreign	
	No.	Tons	No.	Tons	No.	Tons	No.	Tons
1945 .	294	1,364,486	119	454,473	289	1,361,373	124	475,354
1946 .	385	1,715,027	77	426,499	358	1,609,052	77	423,775

1948 .	440	1,797,475	66	340,006	426	1,795,459	68	346,852
1949 .	494	2,172,098	69	300,558	491	2,163,040	65	281,928

Railways.

On 31 March, 1950, there were 3,526 m[illegible] of railways open for traffic. Operating earnings from [illegible] 1949–50, £16,062,066, operating expenses, £17,360,913. The capital cost of construction of all [illegible] lines, open and unopen, to 31 March, 1950, £83,290,485. In [illegible] the tonnage of goods (including livestock) carried was 9,948,261, and the passengers numbered 25,895,253.

The total revenue (including road motor and other subsidiary services amounted to £19,541,184, and total expenditure £20,596,740.

Roads and Road Transport.

Total mileage of formed roads in New Zealand at 31 March, 1949, was 53,661 inclusive of 7,780 miles of formed roads and streets which were not paved or surfaced. In addition there were 17,507 miles of unformed legal roads and 5,691 miles of bridle-tracks. There were also 8,141 bridges of over 25 feet in length with a total length of 674,554 feet. Main highways, principally outside borough boundaries, totalled 12,724 miles at 31 March, 1950; of this total 5,228 miles were classified as State Highways, these being the principal arterial traffic routes.

Total expenditure on roads, streets and bridges by the General Government and local authorities combined for the financial year 1947–48 amounted to £10,847,265, compared with £8,878,833 in the previous year.

At 31 March, 1950, motor-vehicles licensed numbered 413,363 of which 233,812 were private cars; 2,021 public taxis; 3,719 omnibuses and passenger trucks; 43,186 light commercial trucks and 34,440 heavy trucks. Included in the remaining number were 20,733 motor cycles, 28,557 local authority vehicles and 10,149 [illegible] vehicles. Licensed road goods-services for the year ended [illegible] 1950, recorded a total vehicle mileage of 143,594,000, the average miles per vehicle numbering 12,881. The road passenger services, vehicle miles amounted to 49,497,640, and passengers carried totalled 100,901,488.

Posts and Telegraphs.

Receipts of post and telegraph department for year ended 31 March, 1950, £9,647,950; working expenses, £9,787,851, excluding interest on capital liability, £704,000. The officials numbered 17,237 (excluding 1,466 country postmasters, etc., who are not classed as officers of the department) on 31 March, 1950.

The telegraph and telephone systems are governmental. Number of telephone subscribers, 257,034. The telegraph and telephone receipts for the year 1949–50 were £5,063,480. Number of radio receiving licences at 31 March, 1950, was 449,347.

Civil Aviation.

The New Zealand Airways Act, 1945, provides for complete control of air transport as a national service. The act established the New Zealand Airways Corporation and all internal services are now operated by it.

Domestic services (excluding operations of aero-clubs) during the 12 months ended March, 1950:—Hours flown 42,144; miles flown, 5,126,254; passengers carried, 213,511; mail, 873,305 lb.; freight, 36,599,923 lb. Overseas services:—Hours flown 15,933; miles flown, 3,124,165; passengers carried, 31,823; mail, 457,461 lb.; freight, 689,041 lb.

Money and Credit.

New Zealand has its own distinctive silver and bronze coinage, the denominations being similar to those in use in the United Kingdom. Prior to the issue of the New Zealand coinage (1933 for silver, and 1939 for bronze) the United Kingdom coinage was legal tender.

The constituents of the New Zealand banking system are a Reserve Bank, and 6 trading banks, and of the latter, 2—the Bank of New Zealand and the National Bank of New Zealand—are New Zealand institutions, the other 4 being primarily Australian concerns. Prior to the operation of the Bank of New Zealand Act, 1945, the Government held approximately one-third of the aggregate paid-up capital of the Bank of New Zealand, and the Act, which came into force on 1 November, 1945, completed the process, the bank being now state-owned. As originally constituted the Reserve Bank had private shareholders, but these were repaid under the Reserve Bank Amendment Act, 1936, and the bank was in effect nationalized. By the Reserve Bank Amendment Act of 1939, governmental control was extended, the Act directing the bank to give effect to any representations made to it by the Minister of Finance. The Reserve Bank Amendment Act, 1950, provides instead that the Bank shall give effect to any resolution of the House of Representatives in relation to the Bank's functions or business. Bank-notes of the Reserve Bank, which has the sole right to issue bank-notes, are legal tender. At the end of March, 1950, the amount on deposit at trading banks was £201,907,910, while advances were £95,904,182, exclusive of holdings of Government and other securities amounting to £13,443,070. The value of bank-notes in circulation was £44,301,862.

There are the post office savings bank and 5 trustee savings banks. The post office savings bank had at 31 March, 1950, 967 branches; number of accounts, 1,372,672; amount deposited during year, £77,963,430; withdrawn, £73,306,181; total amount to credit of depositors at end of year, £170,982,452. At 31 March, 1950, £34,942,977 was on deposit in trustee savings banks to the credit of 354,879 depositors. In addition, amount to credit of depositors in national savings accounts as at 31 March, 1950, totalled £47,671,147. Deposits to credit of scholars in school savings banks at 31 Dec., 1949, amounted to £301,962.

Minor Islands.—The minor islands (total area, 320 square miles) included within the geographical boundaries of New Zealand are the following:—Kermadec Islands, Three Kings Islands, Auckland Islands, Campbell Island, Antipodes Islands, Bounty Islands, Snares Islands, Solander Island. With the exception of the Kermadec Islands (population, 16) and Campbell Island (population, 5) none of these islands was inhabited at 31 March, 1950.

The **Kermadec Islands,** which were annexed to New Zealand in 1887, have no separate administration and all New Zealand laws apply to them. Situation, 29° 10′ to 31° 30′ S. lat., 177° 45′ to 179° W. long., 600 miles N.N.E. of New Zealand. Area 13 square miles. The largest of the group is Raoul or Sunday Island, 20 miles in circuit, while Macaulay Island is 3 miles in circuit.

A [illegible] and an aeradio station have been established on Raoul Island, and the population including the official staff in March, 1950. was 16. This is the only island of the group that is inhabited.

Island Territories.—Island territories coming within the jurisdiction of New Zealand consist of Cook Islands, Niue Island and the trusteeship territory of Western Samoa. The Tokelau Islands were proclaimed part of New Zealand as from 1 Jan., 1949.

The Cook Islands, which lie between 8° and 23° S. lat., and 156° and 167° W. long., were proclaimed a British protectorate in 1888, and on 11 June, 1901, were annexed and proclaimed part of New Zealand. The islands within the territory fall roughly into two groups—the scattered islands towards the north and the islands towards the south forming the Cook group proper.

The names of the islands with their populations (estimated as at 31 March, 1950) are as follows :—

Lower Group—	Population	*Northern Islands*—	Population
Rarotonga	5,684	Nassau	Nil
Mangaia	1,958	Avarau (Palmerston I.)	72
Atiu	1,301	Tongareva (Penrhyn)	728
Aitutaki	2,656	Manihiki (Humphrey)	484

		Total	15,031

Total area of the Cook Islands, excluding Niue, is about 99 square miles. During the year ended 31 March, 1950, registered births numbered 621, and deaths 301.

Rarotonga is 20 miles in circumference; Atiu, 20 miles; Aitutaki, 14½ miles. Laws governing the whole of the Cook Islands are made by Act of the Parliament of New Zealand or by Orders in Council and regulations issued thereunder. Ordinances applicable to the whole of the Cook Islands may be made by the Legislative Council of the Cook Islands, while other ordinances, restricted in their application to the islands where they are made, may be made by local island councils. Both classes of ordinances require the assent of the Resident Commissioner, or they may be reserved for the signification of the Governor-General's pleasure. The Resident Commissioner in Rarotonga and the Resident Agents in the outer islands are the Presidents of the respective island councils, which consist in each case partly of *ex-officio* members (officials and the Arikis or leading chiefs) and partly of elected members. General elections are to be held in every third year and all natives being British subjects of or over the age of 18 years are entitled to vote. An act passed by the New Zealand government in 1946 provides for a Legislative Council of the Cook Islands, consisting of the Resident Commissioner as president, ten unofficial members of Island Councils to be elected and ten members of the Cook Islands public service.

The Minister of Island Territories, a member of the Executive Council of New Zealand, is charged with the administration.

Health.—All Cook Islanders receive free medical and surgical treatment in their villages, the hospital and the tuberculosis sanatorium. Native patients in the hospital and the sanatorium and all schoolchildren receive free dental treatment. Education :—11 government schools are established in six islands of the [illegible] and at Pukapuka, and the London Missionary Society is [illegible] conducting 7 schools in the principal remaining islands of the group. There are also 6 Roman Catholic missionary schools. The instruction given in government schools is similar to that of the New Zealand state schools, but with a special syllabus suited to the requirements of the people. Revenue is derived chiefly from customs duties which follow the New Zealand customs tariff, income tax and stamp sales, and for the financial year 1949–50 amounted to £131,281 (excluding grants from New Zealand of £155,514, mainly for medical and educational purposes); expenditure, £259,806. The trade for 1949 was :—Imports, £315,537; exports, £214,020. Chief exports were :—Citrus fruits (£56,460), tomatoes (£15,489), copra (£47,608), mother-of-pearl shell (£48,903), manufactured goods (£27,464). Wireless stations are maintained at all the permanently inhabited islands; passenger and mail air services with three of the principal islands have been established. There is also a fortnightly air service between New Zealand and Rarotonga.

Niue (or **Savage Island**) is one of the Cook Islands, but has been under separate administration since 1903. There is a resident commissioner and an island council, and legislative measures apply as in the case of the Cook Islands. Distance from Auckland, New Zealand, 1,343 miles; from Rarotonga, 590 miles. Area, 100 square miles; circumference, 40 miles; height above sea-level, 200 ft. Estimated population as at 31 March, 1950, was 4,471. During the year ended 31 March, 1950, births registered numbered 148; deaths, 95. Revenue, 1949–50, £34,673 (excluding grants from New Zealand, £44,838); expenditure, £74,942. Exports, 1949, £52,052, of which copra accounted for £43,843. Imports, 1949, £76,761. There are 3 government schools and 9 mission schools subsidized by the administration; all pupils, 1,225 in 1949. There is a wireless station at Alofi, the port of the island.

Tokelau Islands.—Situated some 300 miles to the north of Western Samoa between 8° and 10° south latitude and between 171° and 173° west longitude are the three atoll islands of Atafu, Nukunono and Fakaofo of the Tokelau or Union group. Formerly part of the Gilbert and Ellice Islands Colony, the group was transferred to the jurisdiction of New Zealand on 11 Feb., 1926, the administration being carried out by the High Commissioner of Western Samoa. By legislation enacted in 1948, the Tokelau Islands were declared part of New Zealand as from 1 Jan., 1949. The area of the group is 4 square miles; the population in March, 1950, was 1,460.

Books of Reference.

STATISTICAL INFORMATION.—The statistical office for New Zealand is the Census and Statistics Department (Wellington, C.1); *Government Statistician:* G. E. Wood, O.B.E., M.A.

The beginning of a statistical service may be seen in the early "Blue books" prepared annually from 1840 onwards under the direction of the Colonial Secretary, and designed primarily for the information of the Colonial Office in England. In 1848 New Zealand was divided into two provinces, the province of New Munster being particularly active in the statistical field. Most of the later 10 provinces carried out some form of statistical activity although there was a general lack of uniformity. A permanent statistical authority was created in 1858. It was originally associated with the [illegible] Births, Deaths and Marriages but with the passage of years the association of the statistical branch with the registration branch became only nominal. By the Census and Statistics Act 1910, the

title of Government Statistician was given to the head of the statistical branch and in 1915 the "Census and Statistics Office" replaced the former "Government Statistician's Office." From 1858 to 1931 the statistical office was under the political control of the Minister of Internal Affairs; in 1931 it came under the Minister of Industries and Commerce and from 1 April, 1936, it was accorded full departmental status under the Minister in charge of Census and Statistics.

The oldest publications consist of (*a*) census results from 1858 onwards and (*b*) annual volumes of statistics (first published 1858 but covering years back to 1853). Main current publications:—

TERRITORY OF WESTERN SAMOA.

The Territory of Western Samoa lies between latitude 13° and 15° south and between longitude 171° and 173° west. It comprises the two large islands of Savai'i and Upolu, the small islands of Manono and Apolima, and several islets lying off the coasts. The total land area is about 1,130 square miles, of which 700 square miles is in Savai'i and between 420 and 430 square miles in Upolu. The islands are formed mainly of volcanic rocks, with coral reefs surrounding much of their coasts. Rugged mountain-ranges form the core of both main islands and rise to 3,608 ft. in Upolu and 6,094 ft. in Savai'i. Samoa is still an area of active vulcanism, and in Savai'i large areas of previously cultivated land were covered by lava during the most recent period of activity of the volcano Matavanu between 1905 and 1911. The large area laid waste by lava-flows in Savai'i is a primary cause of that island supporting only between a quarter and a third of the population of the Territory despite its greater size than Upolu.

The population as at 30 Sept., 1950, totalled 80,436. Of this total 73,997 were Samoans, 5,852 were persons of part-Samoan blood possessing European status and 352 where full Europeans (mainly New Zealanders connected with the Public Service, commercial organizations or the missionary societies).

Germany administered Western Samoa until 29 Aug., 1914, when the Territory was occupied by New Zealand Military Forces. On 7 May, 1919, the Supreme Council of the Allied Powers conferred on the British Crown on behalf of the New Zealand Government a mandate for the administration of Western Samoa. By the Samoa Act, 1921, New Zealand made provision for a civil administration to replace the wartime military regime. The new constitution provided for a Legislative Council with unofficial members, and the Administration built up a system of representative local government.

In Dec., 1944, the Prime Minister of New Zealand met the Legislative Council and the Fono of Faipule and declared his support for Samoan aspirations for political advancement. On the approval of the Trusteeship Agreement by the General Assembly of the United Nations in Dec., 1946, New Zealand formally committed itself to promote development towards self-government.

The Samoa Amendment Act, 1947, was passed by the New Zealand Parliament on 25 Nov., 1947, and came into force on 10 March, 1948. The Act provided for the constitution of a Council of State, composed of the High Commissioner (as the Administrator would henceforth be called) and the Fautua, an advisory body with which the High Commissioner would discuss all proposed legislation and questions involving Samoan custom. The Legislative Council was replaced by a Legislative Assembly composed of the members of the Council of State, 12 Samoan members elected by the Fono of Faipule, 5 representatives of the community of European status

elected under adult suffrage, and 6 official members. The new Assembly was given complete control of finance and wide legislative powers.

The revenue collected in the year ended 31 March, 1950, was £521,859, the expenditure was £458,095. Imports for 1949, £881,584; exports, £1,344,758. The main exports during 1949 were copra, £787,274; cocoa beans, £387,611; bananas, £64,644; desiccated coconut, £95,142. In 1949, exports to the United Kingdom totalled £651,242; 1950, £763,315; imports from the United Kingdom, 1949, £101,948; 1950, £205,502 (Board of Trade returns).

Roads.—The Territory has 263 miles of road suitable for motor traffic of which 43 miles are scaled. Nearly all roads are negotiable in wet weather. At 31 March, 1950, there were 642 motor vehicles in the Territory, including 204 trucks, 161 private cars, 103 taxis and 86 buses. Regular bus services operate over most of the main roads on Upolu; all taxis operate in Apia.

There is regular steam communication from New Zealand and Fiji, and the products of the territory are transported to overseas markets by steamer. A fortnightly air-service operates from New Zealand *via* Fiji. A high-power wireless station is erected at Apia.

New Zealand currency in the form of Samoan Treasury notes issued under the authority of the New Zealand Government is in general use. A branch of the Bank of New Zealand was opened at Apia in April, 1915.

The Minister of Island Territories for New Zealand is in charge of Samoa.

High Commissioner.—G. R. Powles (assumed office 1 March, 1949).

NAURU ISLAND.

The island is situated in latitude 0° 32′ south of the Equator, and longitude 166·55° east. Area, 5,263 acres. It is an oval shaped upheaval coral island of approximately 12 miles in circumference, surrounded by a reef which is exposed at low tide. There is no anchorage adjacent to the island. On the seaward side the reef dips abruptly into the deep waters of the Pacific. On the landward side of the reef there is a sandy beach interspersed with coral pinnacles. From the sandy beach the ground rises gradually, forming a fertile section ranging in width from 150 to 300 yards and completely encircling the island. On the inner side of the fertile section there is a coral cliff which rises to a height of from 40 to 100 feet. Above the cliff there is an extensive plateau bearing phosphate of a high grade, the mining rights of which are vested in the British Phosphate Commissioners subject to the rights of the native landowners. It is chiefly on the fertile section of land between the sandy beach and the plateau that the natives have established themselves, and from which they obtain the necessary food for themselves and families. With the exception of a small fringe round a shallow lagoon, about one mile inland, the plateau, which contains the

phosphate deposits, has few food-bearing trees and is not utilized for the purposes of native villages.

The island was discovered by Captain Fearn in 1798, annexed by Germany in Oct., 1888, and surrendered to the Australian forces in 1914. It was administered under a mandate, dated 17 Dec., 1920, conferred on the British Empire and approved by the League of Nations until 1 Nov., 1947, when the United Nations General Assembly approved a trusteeship agreement bringing Nauru within the United Nations trusteeship system with the governments of Australia, New Zealand and the United Kingdom as joint [illegible] authority.

Great Britain, [illegible] New Zealand agreed in July, 1919, that Australia should appoint the first Administrator for a term of 5 years, and thereafter the Administrator was to be appointed as the three governments should decide. By arrangement Australia has continued to appoint the Administrator who has all the powers of government, administrative, legislative and judicial. The expenses of administration are met out of local revenue and the proceeds of phosphate sales.

Nauru was occupied by the Japanese from 26 Aug., 1942, to 13 Sept., 1945. Civil administration was re-established on 1 Nov., 1945. By the end of 1950 the phosphate industry had reached its pre-war production level.

At 30 June, 1950, the population totalled 3,432, comprising 278 Europeans, 1,491 Chinese, 1,582 Nauruans and 81 other Pacific Islanders. Vital statistics, 1950 :—Births, 88 (including 6 Europeans); deaths, 22.

Education.—Attendance at school both for European and native children is compulsory until children reach the age of 16 years. A system of technical training for native boys under apprenticeships with either the British Phosphate Commissioners or the Administration is in operation.

Finance.—The revenue and expenditure (in £A) was as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1938	29,428	30,287	1947–48 [2]	23,745	96,347
1939	33,084	29,391	1948–49 [2]	34,204	105,673
1945–47 [1]	22,022	84,180	1949–50 [2]	42,103	68,567

[1] Oct., 1945–June, 1947. [2] 1 July–30 June.

The interests in the phosphate deposits were purchased in 1919 from the Pacific Phosphate Company by the Governments of the United Kingdom, the Commonwealth of Australia and New Zealand, at a cost of £3,500,000, and a Commission was appointed to ensure that the deposits were worked on business lines. In addition to a royalty to meet expenses of administration, as from 1 July, 1947, a royalty of 1*s.* 1*d.* per ton is being paid by the British Phosphate Commissioners for every ton of phosphate shipped, of which 6*d.* per ton is paid to the native landowners; 3*d.* per ton is paid to the Administrator to be used solely for the benefit of the Nauruan people; 2*d.* per ton is paid to the Administrator in trust and invested for the benefit of the landowner or his assigns, to whom the interest will be paid after the principal has been invested for a period of 20 years; and 2*d.* per ton is paid to the Administrator in trust for the Nauruan community and invested until the year 2,000. A capitation tax of £2 for Europeans, £1 for

Chinese, 15*s.* for natives, is collected from physically fit males between the ages of 16 and 60 years; Administration employees are exempt.

Commerce.—The export trade of the island consists entirely of phosphate, shipped mainly to Australia and New Zealand. Phosphate exported:—1940, 808,400 tons; 1948–49, 680,746 tons; 1949–50, 1,003,250 tons.

The imports consist almost entirely of food supplies, building reconstruction materials and machinery for the British Phosphate Commissioners, for use in connexion with their works. Value of imports:—1940, £192,749; 1948–49, £527,104; 1949–50, £646,155. Exports, 1940, £541,168; 1948–49, £1,174,287; 1949–50, £2,006,500.

Imports from the United Kingdom, 1950, £34,277; 1949, £18,303; 1948, £12,890 (Board of Trade returns).

Shipping.—Practically the whole of the shipping coming to the island consists of steamers owned by or under charter to the British Phosphate Commissioners. Numbers of vessels entered and cleared in 1940, 123 of 592,794 gross tons; in 1950, 128 of 778,093 gross tons.

Air Services.—There is an airstrip on the island but no regular services are yet in operation.

Communications.—The wireless telegraph station which was destroyed by enemy action was rebuilt by Amalgamated Wireless (Australasia) Ltd., and communication with Australia and merchant shipping was re-established on 13 Nov., 1945. Direct daily schedules are maintained with Sydney (N.S.W.), Suva (Fiji) and with merchant shipping—both long- and short-wave transmission. A free radio medical service is maintained for shipping.

On 5 Aug., 1946, Amalgamated Wireless (Australasia) Ltd. opened a radio-telephone service between Nauru and Sydney, Australia.

Administrator.—R. S. Richards (appointed 23 Nov., 1949).

FIJI.

Constitution and Government.

The Fiji Islands were discovered by Tasman in 1643 and visited by Captain Cook in 1769. The sovereignty was ceded to Great Britain on 10 Oct., 1874.

Governor of Fiji and High Commissioner for the Western Pacific.—Sir Brian Freeston, K.C.M.G., O.B.E. Salary £2,500 and a duty allowance of £750 as Governor of Fiji, £1,100 and a duty allowance of £300 as High

Commissioner for the Western Pacific, and an allowance of £150 as Consul General.

Colonial Secretary, Fiji.—Alexander Frederick Richard Stoddart (appointed 21 Sept., 1949).

The Constitution is regulated by letters patent of 2 April, 1937. The Executive Council consists of the Governor, the Colonial Secretary, the Attorney-General, the Financial Secretary, the Secretary for Fijian Affairs and four unofficial members nominated by the Governor.

The Legislative Council consists of the Governor and sixteen official members, five European members (three elected and two nominated), five Fijian members (selected by the Governor from a panel submitted by the Great Council of Chiefs) and five Indian members (three elected and two nominated).

The Fijians have always retained a large measure of self-government. This was increased under the terms of the Fijian Affairs Ordinance 1944, which came into operation on 1 Jan., 1945. The Colony is divided into administrative units called *tikina*, each controlled by a Fijian whose rank or ability, or both, commands the co-operation and respect of the people. This officer is called a *Buli*. A *Tikina* Council, at which the *Buli* presides, meets monthly, and makes orders to be obeyed by all Fijians within the area of its authority. Up to the middle of 1947 there were 184 *tikina*, but from 1 July, 1947, amalgamations took place which have reduced the number to 76. A number of *tikina* with common ancestry are grouped together to form a *yasana* 'province', which is governed by a *Roko Tui*. The *Roko Tui* is assisted by a Provincial Council which must meet once a year and may meet more often if desired. On 1 Jan., 1945, when certain boundaries were revised, the number of *yasana* was reduced from 19 to 14.

Under the Fijian Affairs Ordinance power is given to *Tikina* Councils to make orders and to Provincial Councils to make by-laws concerning the welfare and good government of the Fijians within their respective spheres. Such orders or by-laws have the force of law when sanctioned by the Secretary for Fijian Affairs. The Fijian Affairs Board may submit to the Governor such recommendations and proposals as it may deem to be for the benefit of the Fijian people. The Board supersedes the Native Regulation Board created in 1876, and may make regulations affecting Fijians as a whole. Such regulations may provide for penalties up to a fine of £50 or a term of imprisonment not exceeding 1 year, or both, and may also make provision for extra-mural punishment. These regulations require the sanction of the Legislative Council. Two grades of Fijian courts deal with offences against the regulations, by-laws and orders. The lower, or *Tikina* Court, consists of one Fijian magistrate, and the higher, or Provincial Court, consists of either three Fijian magistrates or two Fijian magistrates and a district officer. Each province has its own Treasury, and the Provincial Council imposes its own rates, which vary from £2 5*s*. to £3 10*s*. per annum for every male adult. Fijian males maintaining five or more children pay a lower rate or receive total exemption until the children become tax-payers. Other direct taxation is limited to school rates, which, in some provinces, are collected separately from the provincial rate. Three Senior Administrative Officers are responsible for general supervision over a number of provinces. The Council of Chiefs, established in 1876, continues to meet annually under the chairmanship of the Secretary of Fijian Affairs. It consists of *Rokos*, one or two representatives, according to population, from each province selected by the Provincial Council, one Fijian magistrate

and one Fijian medical practitioner nominated by the Secretary for Fijian Affairs, and not more than six chiefs appointed by the Governor. The Council of Chiefs advises Government generally on Fijian affairs.

The Fiji Military Forces Ordinance, 1949, provides for the maintenance of a small regular force, with territorial units and a growing number of trained reserves.

There is a police force consisting of Fijians and Indians, with European and some Indian and Fijian officers. Strength of police force in 1949, 442.

Area and Population.

Fiji comprises a group of about 322 islands (about 106 inhabited) lying between 15° and 22° south latitude and 177° and 178° west longitude. The largest is Viti Levu, area 4,010 square miles; next is Vanua Levu, area 2,137 square miles. The island of Rotuma, about 12° 30′ south latitude and 178° east longitude, was added to the colony in 1880. Total area, including Rotuma, 7,083 square miles.

The estimated total population as at 31 Dec., 1949, was 284,955 (census, 1946: 259,638). It included:—Europeans, 6,126 (3,554 males, 2,552 females); Fijians, 126,650 (64,320 males, 62,330 females); Indians, 133,941 (71,526 males, 62,415 females); Chinese, 3,148 (2,230 males, 918 females); part-Europeans, 6,712 (3,475 males, 3,237 females); Rotumans, 3,581 (1,826 males, 1,755 females); Polynesians, Melanesians and Micronesians, 4,154 (2,432 males, 1,722 females); others, 643 (348 males, 295 females).

Suva, the capital, is on the south coast of Viti Levu; the European population (census of 2 Oct., 1946), 1,611; suburbs, 655; rural, 33. Total population of Suva, 11,398; suburbs, 12,115; rural, 1,882.

Vital Statistics 1948	Europeans	Part-Europeans	Fijians	Indians	Rotumans	Polynesians, etc.	Chinese	Others

Religion and Instruction.

Attending at Methodist churches in 1949, 111,000; Roman Catholic, 22,000; Church of England, 4,000; Seventh Day Adventists, 1,700; Hindus (1946), 99,400; Moslems (1946), 16,932; Sikhs (1946), 979. The Methodist Church in Fiji comprises European ministers, 13; Fijian ministers, 130; Indian minister, 1; lay missionaries, 6; European mission teachers, 12; Fijian and Rotuman members, 29,540; Indian members, 277; Fijian catechists, 462; lay preachers, 5,056; churches and other preaching places, 1,152. The Church of England (Diocese of Polynesia) has a Bishop and 5 priests, 6 churches and 8 meeting places, 4 schools, 1 hospital, 20 teachers, 7 lay preachers. The Catholic Mission has a Bishop and 41 European priests, 5 Fijian priests, 16 European teaching brothers, 112 European sisters, 56 churches and chapels, 2 native training institutions, 200 catechists, 20 native brothers and 94 native sisters. The Seventh Day Adventists has 58 companies with 58 ordained ministers, and 30 school teachers.

In 1949 there were 431 schools, of which 28 were controlled by government, 343 aided from government funds and 60 unassisted. The total enrolment was 49,473, of whom 2,296 were Europeans, 26,229 Fijians (including Rotumans and Melanesians), 20,647 Indians and 301 Chinese.

Expenditure by the Education Department from colonial revenue amounted to £F260,168, of which £F24,005 was expended on administration, £F23,741 on European, £F116,974 on Fijian and £F95,448 on Indian education; £35,779 was spent from local funds. Education is not compulsory.

There were, in 1949, 15 cinemas with a seating capacity of 5,314.

Finance.

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944	1,738,791	1,614,224	1947	2,728,270	2,329,232
1945	1,692,518	1,796,667	1948	2,888,006	2,475,133
1946	2,157,356	1,981,629	1949	3,100,752	2,648,516

The principal sources of revenue in 1949 were:—Customs, £1,393,861; wharf and shipping dues, £34,775; licences, excise, etc., £1,045,840; fees of court, etc., £172,091; post office, £87,560; rent of government property, £37,200; interest, £69,100; miscellaneous, £76,160, public works, recurrent expenditure, £314,208; extraordinary, £94,482. The public debt on 31 Dec., 1949, was £1,770,522.

Production, Industry and Commerce.

The total forest area amounts to approximately 2,300,000 acres, producing both hard woods and soft woods. There are 6 mills with an estimated production of 4,000,000 super feet.

There are 5 sugar-mills, 112 rice-mills, 2 butter factories, 494 copra dryers, 4 oil-mills, 1 biscuit factory, 13 butcheries, 1 tea factory and 3 pineapple factories. In 1949 there were under cultivation by European, Fijian and Indian settlers:—Bananas, 2,500 acres; coconuts, 130,000 acres; sugar cane, 160,000 acres; rice, 34,474 acres; pineapples, 800 acres. In 1949 there were 16,164 horses, 80,845 cattle, 56 sheep, 23,787 goats and 8,615 pigs.

There were 22 trade unions registered at the end of 1949.

[illegible] parcel post and £10,707 passengers' luggage.
[illegible] ships' stores and £1,156 for sundry exports.

Imports from the United Kingdom in 1949 were £2,282,385; Australia, £2,135,702; Canada, £330,172; India, £386,960; New Zealand, £497,293; United States, £567,968; Hong Kong, £118,416; others, £634,261.

Exports to the United Kingdom in 1949 were £1,734,022; Australia, £111,681; Canada, £1,985,576; New Zealand, £1,469,149; United States, £1,138,026; Hong Kong, £2,152; others, £251,953.

The exports in 1949 included 110,968 tons of sugar (£3,205,524), 29,156 tons of coconut products (£1,713,880) and 104,115 oz. of gold bullion (£1,123,241).

Exports to the United Kingdom in 1949 were £1,874,577; 1950, £2,130,299; imports from United Kingdom, 1949, £1,668,926; 1950, £1,803,178 (Board of Trade returns).

Communications.

There is a complete road round Viti Levu, the distance from Suva to Lautoka *via* Ra, Tavua and Ba (King's Road) being 168 miles and *via* Navua and Sigatoka (Queen's Road) being 152 miles.

There is a private small-gauge railway of 130 miles from Tavua to Sigatoka belonging to the Colonial Sugar Refining Company.

Fiji has one of the main airports on the Trans-Pacific airline services, at Nadi. Trans-Pacific services using Nadi are British Commonwealth Pacific Airlines operating twice-weekly services between Vancouver, New Zealand and Australia; Pan-American World Airways, operating a twice-weekly service between San Francisco, New Zealand and Australia; New Zealand National Airways Corporation, operating a service, in alternate weeks, between the Cook Islands, Western Samoa, Tonga and Fiji; Air France operating a service between New Caledonia and Tahiti; Canadian Pacific Airlines operating a fortnightly service between Vancouver and Australia. New Zealand National Airways Corporation operate a weekly flying-boat service between Auckland, Suva and Labasa; Quantas Empire Airways operate a weekly flying-boat service between Sydney and Suva *via* Noumea.

Wireless telegraph stations have been erected at Suva, and 10 other places, and wireless telephone stations at Suva, 12 other places and 3 inter-island vessels. There is a direct cable communication with Canada, Australia and New Zealand and direct wireless communication with Australia, Tonga and New Zealand.

Money, Weights and Measures.

The Government Savings Bank had, at the end of 1949, deposits amounting to £1,376,959. The headquarters are at the General Post Office, Suva, and there are 24 branches throughout the colony.

The Bank of New South Wales has two branches and the Bank of New Zealand has one in the colony. The currency in circulation consists of Fiji Government notes and Fiji coins containing 181·181818 oz. fine silver in each £100 face value. The currency notes in circulation on 31 Dec., 1949, amounted to £3,355,575 and the Fiji coins to £253,182. The securities forming the investment portion of the Note Security Fund amounted to £1,443,021.

Money, weights and measures are the same as in the United Kingdom. The Fiji pound is linked to sterling by law at the fixed rate of £F111 = £100 sterling.

PACIFIC ISLANDS.

THE office of High Commissioner in, over and for the Western Pacific Islands, was created by an Order in Council, cited as the Western Pacific Order in Council, 1877.

High Commissioner and Consul-General for the Western Pacific (also Governor of Fiji.—Sir Brian Freeston, K.C.M.G., O.B.E.

The jurisdiction of the High Commissioner extends over all islands in the Western Pacific not being within the limits of the territories administered by His Majesty's Governments in the Commonwealth of Australia, and in New Zealand or the Colony of Fiji, and not being within the jurisdiction of any other civilized power. In 1893 a new Order in Council was issued, known as the Pacific Order in Council, 1893, in accordance with which the High Commissioner's jurisdiction is extended to foreigners and (in most cases) to natives residing in British settlements or protectorates within the limits of the Order. Under the provisions of the New Hebrides Order in Council, 1922, the jurisdiction of the High Commissioner extends also to the islands in the Pacific Ocean known as the New Hebrides, and all the islands known as the Banks Islands and Torres Islands. The expenses of the High Commission at Suva, Fiji, are met from the funds of the Gilbert and Ellice Islands Colony and the British Solomon Islands Protectorate, but a contribution is paid from imperial funds in respect of work in connexion with Tonga and the New Hebrides.

The Chief Justice of Fiji, and every other judge for the time being of the Supreme Court of Fiji, is by virtue of his office a judicial commissioner.

Deputy commissioners are appointed by the High Commissioner on behalf of His Majesty.

The High Commissioner's court consists of the High Commissioner, the judicial commissioners and the deputy commissioners, and in it is vested all His Majesty's civil and criminal jurisdiction exercisable in the Western Pacific Islands.

The court of a judicial commissioner has powers similar to those of the superior courts of England, and the deputy commissioners have civil jurisdiction in common law, equity and bankruptcy, with a limited jurisdiction in probate, and have a criminal jurisdiction in respect of offences not punishable with 7 years' penal servitude or upwards.

With some few exceptions all decisions of the High Commissioner's court may be appealed against to the Supreme Court of Fiji.

In addition to the other means of preserving order the High Commissioner has certain special powers for the deportation of persons whose proceedings endanger the peace of the islands.

The principal groups under the High Commissioner are :—(1) The Gilbert and Ellice Islands Colony; (2) The British Solomon Islands Protectorate; (3) Tonga; (4) The New Hebrides, and (5) Pitcairn Islands.

GILBERT AND ELLICE ISLANDS COLONY.

The Gilbert and Ellice Islands were proclaimed a protectorate in 1892 and annexed (at the request of the native governments) as the Gilbert and Ellice Islands Colony on the 10 Nov., 1915. The Colony now comprises 4 groups of atolls together with the adjacent Ocean Island.

Ocean Island is situated at 0° 52′ S. lat. 169° 35′ E. long. and is approximately 2 sq. miles in area. Population (Dec., 1949) 2,008, including 163 Europeans and 595 Chinese; most of the latter, employed by the British Phosphate Commissioners, had by the end of 1950 been repatriated to Hong Kong. This island was annexed and included in the colony (at that time a protectorate) by a proclamation issued on 28 Nov., 1900.

The **Gilbert Islands** between 4° N. and 3° S. lat. and 172° and 177° E. long. comprise Little Makin, Butaritari, Marakei, Abaiang, Tarawa (headquarters of the colony and district), Maiana, Abemama, Kuria, Aranuka, Nonouti, Tabiteuea, Beru, Nikunau Onotoa, Tamana and Arorae. Population (Dec., 1949) 27,868, including 140 Europeans and 25 Chinese; area approximately 114 sq. miles. The Gilbertese are classed as a Micronesian race.

The **Ellice Islands** between 5° 30′ and 11° S. lat. and 176° and 180° E. ong. comprise Nanumea, Nanumanga, Niutao, Nui, Vaitupu, Nukufetau, Funafuti (headquarters of the district) Nukulaelae and Niulakita. Population (Dec., 1949) 4,464. Area approximately 9½ 'sq. miles. The Ellice Islanders are a Polynesian race and speak a Samoan dialect.

The **Phœnix Islands** between 3° and 5° S. lat. and 170° and 175° W. long., comprise the islands of Canton (headquarters of the district), Enderbury, Birnie, McKean, Phœnix, Hull, Sydney and Gardner. Population (Dec., 1949) 1,077, including 29 Europeans but excluding United States subjects resident on Canton and Enderbury. Area approximately 11 sq. miles. The Phœnix Islands were included in the colony by an order in council of 18 March, 1937. In March, 1938, the United States claimed sovereignty over Canton and Enderbury. In an exchange of notes on 6 April, 1939, the United Kingdom and United States Governments agreed, without prejudice to their respective claims, to exercise joint control over the 2 islands for a period of 50 years. Canton is used as an international airport on the trans-Pacific route between Fiji and Honolulu and both countries enjoy equal facilities. The southern Phœnix Islands of Hull. Sydney and Gardner were colonized by Gilbertese between 1938 and 1940. Phœnix, Birnie and McKean Islands are uninhabited being too small for permanent settlement.

The **Line Islands** between 4° 40′ and 2° N. lat. and 160° 20′ and 157° W. long. comprise Fanning (headquarters of the district), Washington and Christmas Islands. Fanning Island: population (Dec., 1948) 293, including 21 Europeans and 20 Chinese. Area approximately 12 sq. miles. Washington Island: population (Dec., 1948) 171, including 1 European. Area approximately 3 sq. miles. Christmas Island: population (Dec., 1948) 124, including 1 European. Area approximately 222 sq. miles. Fanning and Washington Islands were annexed in 1889 and a repeating station for the Pacific cable was established on the former. They were included in the colony in 1916. Both islands are worked as copra plantations by Fanning Island Plantations, Ltd., using Gilbertese labour. Christmas Island was discovered by Capt. Cook in 1777, annexed by Great Britain in 1888 and included in the colony in 1919. It is the largest atoll in the

Pacific. The island is partially planted with coconut trees and worked as a copra plantation by government.

Total population (census 1947) 36,000, including 304 Europeans, 142 Chinese, 29,923 Micronesians and 5,066 Polynesians. Estimated total, Dec., 1948, 37,120. In 1948 there were 1,183 births and 765 deaths.

Revenue for the year ending 31 March, 1949, amounted to £315,408, of which the principal items were customs duties, £152,382; taxes and fines, £32,414; commuted taxation, £24,000; royalties, £10,936. Expenditure on normal administration for the same period amounted to £169,857, and special war and rehabilitation expenditure to £83,803. £4,446 was expended from Colonial Development and Welfare Funds. Currency is Australian.

Trade.—Statistics for 1947-48:—Imports £134,189, of which the principal items were cotton piece-goods, £16,958; flour, £15,831; rice, £15,496; meat, £15,084; provisions, £4,605; biscuits, £4,371; sugar, £4,206. Exports: copra, 4,007 tons valued at £148,651, and 124,850 tons of phosphate.

Education.—The government maintains 2 boys' boarding schools—the King George V School at Abemama and the Ellice Islands School at Vaitupu, each with about 40 boys. Government also maintains 2 primary mixed schools, one at Tarawa, with 135 pupils, and one at Ocean Island, with 247 pupils, for the children of the Gilbertese and Ellice Islands labour employed by the British Phosphate Commissioners. At Ocean Island also, the B.P.C. have approximately 60 Gilbert and Ellice boys training in the various technical trades connected with the phosphate industry. Under a Colonial Development and Welfare grant, students have been sent to Fiji for advanced primary education and vocational training. There are 227 village schools throughout the Gilbert, Ellice and Phœnix groups run by the London Missionary Society and the Mission of the Sacred Heart. Some of these schools are assisted by grants-in-aid from the government. The 1947 census showed 92·9% of the population over 10 years of age (in the principal native races) was fully literate.

Climate.—The rainfall varies considerably. In normal years the annual rainfall ranges from 40 in. in the vicinity of the equator, to about 100 in. in the North Gilbert Islands and 120 in. in the Ellice Islands. The Southern and Central Gilbert Islands and Ocean Island are subject to periodic droughts. The temperature varies between 80° and 90° F. by day and drops to a minimum of 70° at night.

Crops and Foodstuffs.—The land is basically coral reefs upon which coral sand has built up, and then been enriched by humus from rotting vegetation and flotsam which has drifted ashore. The principal tree is the coconut, which grows prolifically on all the islands except some of the Phœnix Islands. Other indigenous trees are the pandanus palm and the breadfruit. As the amount of soil is negligible, the only vegetable which grows in any quantity is a coarse calladium (alocasia) with the local name 'babai' which is cultivated most laboriously in deep pits. There is also a little taro cultivated in the Ellice group. Cattle were introduced to Niulakita some years ago, and a herd of some 15 head still survives in a semi-wild state. Pigs and fowls are also kept throughout the colony, and there is an abundance of fish.

Copra production is mainly in the hands of the individual native, who collects the coconut products from the trees on his own land. The main imports are rice, cotton piece-goods, tobacco, biscuits, hardware, flour, soap, sugar, kerosene and milk.

Welfare and Justice.—Social welfare in the community is assisted by the government's free educational, medical and other services. There are no towns, and the people are almost without exception landed proprietors thus eliminating child vagrancy and housing problems. Destitution is almost unknown. The colony has an armed constabulary of 94 constables under a Superintendent of Police. Detachments are stationed at colony and district headquarters.

Government.—In each island of the Gilbert and Ellice groups (except Niulakita) and in 3 islands in the Phœnix group there is a native government under an appointed native magistrate whose court administers a code of native laws. The colony is administered by the High Commissioner through a Resident Commissioner.

Resident Commissioner.—W. J. Peel.

BRITISH SOLOMON ISLANDS PROTECTORATE

British Solomon Islands Protectorate is comprised in the approximate area enclosed by 5° to 12° 30′ S. and 155° 30′ to 169° 45′ E. The Solomon Islands were first discovered in 1568 by Alvaro de Mendaña, on a voyage of discovery from Peru. The group includes the islands of Guadalcanar, Malaita, San Cristobal, New Georgia, Ysabel, Choiseul, Shortland, Mono (or Treasury), Vella Lavella, Ronongo, Gizo, Rendova, Russell, Florida, Rennell, and numerous small islands, including the Lord Howe Group or Ongtong Java, the Santa Cruz Islands, Tikopia and Mitre Islands, and the Duff and Reef Groups. The four first named were placed under British protection in 1893; the other islands were added to the protectorate in 1898 and 1899. The land area of the protectorate is estimated at 14,600 square miles; the larger islands are mountainous and forest-clad. The largest island is Guadalcanar (estimated 2,500 square miles) and the most populous is Malaita (estimated 40,000 inhabitants). Rainfall at Ilu during the year ended 31 Dec., 1949, was 69·12 inches. Malaria is prevalent. The population at the census of 1931 was:—Europeans, 497; Asiatics, 193; natives, 93,415; of the natives, about 4,000 (in Rennel, Ongtong Java, Tikopia, etc.) are Polynesians, the remainder Melanesians. Education is in the hands of the 5 missions. Revenue for the year ended 31 March, 1948, £A509,[illegible] grants); expenditure, £A485,169 (including rehabilitation [illegible]

Coconuts, rubber, sweet potatoes, pine-apples and bananas are grown. The value of exports in 1947–48 was £A29,163, including copra, 312 tons, £A22,526; gold, 140 fine ozs., £A1,349; trochus shell, 93 tons, £A4,441; green snail shell, 16 tons, £A847. Imports, 1947–48, £A223,970, including oil, kerosene, etc., £A56,073; machinery, £A26,486; rice, £A23,178 and meat, £A19,727. Australian notes and silver are the medium of exchange. No gold is in circulation. There is a Resident Commissioner, whose headquarters are at Honiara on Guadalcanar. A nominated advisory council assists in the administration. (For part of the Solomon Islands formerly owned by Germany and now administered by Australia, *see* section on NEW GUINEA, p. 508.)

Resident Commissioner.—H. G. Gregory-Smith (appointed 21 Jan., 1950).

NEW HEBRIDES CONDOMINIUM.

The **New Hebrides Group** lies roughly 500 miles west of Fiji and 250 miles north-east of New Caledonia. Estimated area 5,700 square miles. The group is administered for some purposes jointly, for others unilaterally, as provided for by Anglo-French Convention of 6 February, 1906, ratified 20 October, 1906, and a protocol signed at London on 6 August, 1914, and ratified on 18 March, 1922. The interests of British, French and natives, respectively, are protected; the conditions of land-holding in the islands fixed, and the regulation of the recruitment of native labour provided for. Within the islands Great Britain and France are represented by High Commissioners, who delegate their powers to Resident Commissioners stationed in the group.

The larger islands of the group are:—Espirutu Santo, Malekula, Epi, Pentecost, Aoba, Maewo, Paama, Ambrym, Efate or Sandwich, Erromanga, Tanna and Aneityum. There are 3 active volcanoes, on Tanna, Ambrym and Lopevi, respectively. Earth tremors are of common occurrence. Rainfall at Vila averages 81 inches. The native population of the group is about 48,500 (1949). On Malekula, cannibalism is still practised, but only as ritual.

European population, 1949:—British, 344; British protected, 19; French, 1,196. Foreigners, including Asiatics, who have opted for British regime, 73, and for French regime, 34. There were also 1,828 French protected persons (Indo-Chinese coolies). There are numerous mission native elementary schools; 1 French government primary school and 2 Catholic mission primary schools for mixed races, and 1 British government-subsidized primary school for British children. Condominium revenue, 1949, £139,000; expenditure, £108,600; British service revenue, 1949–50, £2,464; expenditure, £34,510.

The chief product for export is smoke-dried copra, which is grown on European and native plantations. Native production, under the stimulus of record prices, comprises nearly half of the whole. Pre-war exports averaged 10,000 to 11,000 tons, but, in 1949, 22,000 tons were exported. During 1948, a factory was erected at Vila for the manufacture of coconut fibre and desiccated coconut. Cocoa and coffee production is progressively being neglected in favour of the easier and more lucrative copra.

Bananas, sugar cane, oranges and all tropical fruits grow well. Kauri pine is found on Aneityúm. There are several British and French trading companies operating in the group. Settlers and real estate companies have acquired interests in land within the islands, the ownership of which is generally disputed, and which in consequence remains undeveloped pending adjudication by the mixed tribunal. Imports, 1949:—Value £804,806 (from Australia, £500,476; U.S.A., £54,262; New Caledonia, £19,868; United Kingdom, £32,000; France, £160,000). Exports, 1949:—Value £1,174,800. Principal imports in 1949, were:—Flour, £28,813; rice, £39,050; preserves, £24,175; cement, £22,307. Principal exports, 1949:—Copra, £1,034,000; cocoa, £90,000; coffee, £20,500; timber, £16,500. Imports of arms, ammunition, wines and spirits is prohibited except under

special permit. There is frequent communication by sea and a fortnightly air service with New Caledonia and Australia. Malaria is prevalent in the group.

In 1949, 66 vessels of 110,708 tons entered, and 57 of 109,424 tons cleared the ports. Of those entering, 26 were British (20,976 tons) and 32 French (70,637 tons); of those clearing, 23 were British (20,859 tons) and 26 French (69,470 tons).

In 1948, the Bank of Indo-China opened a branch at Vila.

British High Commissioner.—Sir Brian Freeston, K.C.M.G., O.B.E.
French High Commissioner.—M. Cournarie.
British Resident Commissioner.—H. J. M. Flaxman.

TONGA ISLANDS.

FRIENDLY ISLANDS.

The **Tonga** or **Friendly Islands**, an independent Polynesian kingdom since 1845, continued up to 1899 to be a neutral region in accordance with the Declaration of Berlin, 6 April, 1886. By the Anglo-German Agreement of 14 November, 1899, subsequently accepted by the United States, the Tonga Islands were left under the Protectorate of Great Britain. A protectorate was proclaimed on 18 May, 1900, and a British agent appointed. British and foreign nationals charged with any offence against the laws of Tonga, not including crimes punishable by death or by imprisonment exceeding 2 years, are subject to the jurisdiction of the Tongan courts. In other respects they are subject to the jurisdiction of the court of the High Commissioner.

Queen.—Her Majesty Salote Tupou, G.B.E., succeeded on the death of her father, George II, on 12 April, 1918.

There is a legislative assembly which meets annually, composed of 7 nobles elected by their peers, 7 elected representatives of the people, and the Ministers of the Crown (numbering 7), or 22 members including the Speaker. The elections are held triennially.

The kingdom consists of some 150 islands and islets with a total land area of 269 square miles, and lies between 15° and 23° 30′ south and 137° and 177° west, its western boundary being the eastern boundary of Fiji. The islands are split up into the following groups reading from north to south :—Vava'u, Ha'apai, Kotu, Nomuka, Otu Tolu and Tongatapu. The 3 main groups, both from historical and administrative significance, are Tongatapu in the south, Ha'apai in the centre and Vava'u in the north. The Tongatapu group was discovered by Tasman in 1643.

The islands, being mostly of limestone formation, are low lying and with but a few exceptions seldom exceed 100 ft. above the level of the sea. Those of a volcanic nature, approximately 11, average between

350 and 3,380 (Kau) ft. in height. After a violent volcanic eruption in Sept., 1946, on the island of Niuafo'ou (Tin Can Island to philatelists, so named because of the method that was used of collecting and delivering mail) the 1,300 inhabitants were evacuated and permanently settled on the island of 'Eua.

The climate is mild and healthy, malaria being unknown. The temperature during 7 months of the year, from May to Nov., rarely exceeds 84° F. in the shade, and seldom, even in the hottest part of summer, exceeds 90° F. Estimated population as at 31 Dec., 1948, 44,395 Tongans, 220 Europeans, 558 mixed, 309 other Pacific islanders and 76 others, of whom almost half inhabit Tongatapu; the capital is Nukualofa on Tongatapu. The natives are Christian, there being 22,419 adherents of the Wesleyan Church, 8,363 of the Free Church of Tonga, 4,600 of the Church of Tonga, 6,056 Roman Catholics, 2,500 Seventh Day Adventists, 495 Latter Day Saints, 500 Church of England.

The Tongans enjoy free education, free medical attendance and dental treatment. In 1949 there were 69 government and 64 denominational schools, with a total of 10,379 pupils. There are 9 secondary schools, for both boys and girls, with a total roll of 1,524. The revenue in the year ended 30 June, 1949, amounted to £254,000, and the expenditure to £222,242. Native produce consists almost entirely of copra and bananas. Imports in 1948 were valued at £688,444; exports, £842,128, including copra, £779,464, and bananas, £38,484. Regular steamer communication is maintained with New Zealand, and cargo steamers visit the group from time to time for shipments of copra. Shipping entered and cleared in 1948, 58,057 tons.

A regular air service operated by the New Zealand National Airways runs fortnightly between Auckland, Norfolk Island, Fiji, Tonga, Western Samoa and the Cook Islands, returning by the same route to Auckland 4 days later.

Since 1906 British and Australian coin has been legal tender. By an Act passed in 1935 the exchange standard system was adopted, based on Australian currency. There is a government note issue. The weights and measures are the same as in Great Britain. Accounts are kept in pounds, shillings and pence. The kingdom has its own issue of postage stamps.

Agent and Consul, Tonga.—J. E. Windrum.

Wood (A. H.), A History and Geography of Tonga. Nukualofa, 1932.

PITCAIRN ISLAND.

Pitcairn Island (2 square miles) is situated in the Pacific Ocean, nearly equidistant from Australia and America (25° 3′ S. lat., 130° 8′ E. long.). It was discovered by Carteret in 1767, but remained uninhabited until 1790, when it was occupied by the mutineers of H.M.S. *Bounty*, with some women from Otaheite. Nothing was known of their existence until the island was visited in 1808. No regular government was established, but assistance of various kinds was given on the subsequent visits of English vessels. In 1856, the population having become too large for the island's resources, the inhabitants (192 in number) were, at their own request, removed with all their possessions, to Norfolk Island; but 40 of them soon returned. The population (Sept., 1950) numbers 127 persons. It is a British colony by settlement, and was brought within the jurisdiction of the High Com-

missioner for the Western Pacific in 1898 under section 6 of the Pacific Order in Council, 1893.

The Government is now administered under the High Commissioner, by a council consisting of a chief magistrate, 2 assessors, a secretary and a chairman of the internal committee. These officers are elected annually by the people. Oranges and pineapples are exported, and flour, sugar and other foodstuffs imported.

The islands of **Henderson, Ducie** and **Oeno** were annexed in 1902, and are included in the district to Pitcairn.

Chief Magistrate.—Warren Christian.

Starbuck Island, 5° 35′ S. lat., 155° 52′ W. long.; area 1 square mile, uninhabited. **Malden Island,** 4° S. lat., 155° W. long.; area 35 square miles, containing deposits of guano of doubtful value, uninhabited. **Flint Island,** 11° 26′ S. lat., 151° 48′ W. long. **Caroline Island,** 10° S. lat., 150° 14′ W. long., and **Vostock Island,** 10° 06′ S. lat., 152° 23′ W. long., are planted with coconut palms.

PART III

THE UNITED STATES OF AMERICA

UNITED STATES OF AMERICA.

Constitution and Government.

THE Declaration of Independence of the thirteen states of which the American Union then consisted was adopted by Congress on 4 July, 1776. On 30 Nov., 1782, Great Britain acknowledged the independence of the United States, and on 3 Sept., 1783, the treaty of peace was concluded.

The form of government of the United States is based on the constitution of 17 September, 1787, to which ten amendments were added 15 December, 1791; two in 1795 and 1804; a 13th amendment, 6 December, 1865, abolishing slavery; a 14th in 1868, including the important 'due process' clause; a 15th, 3 February, 1870, [illegible] equal voting rights for white and coloured; a 16th, 3 February, 1913, [illegible] rizing the income tax; a 17th, 8 April, 1913, providing for popular election of senators; an 18th, 16 January, 1919, prohibiting alcoholic liquors; a 19th, 18 August, 1920, [illegible] woman suffrage; a 20th, 23 January, 1933, advancing the [illegible] of the President's and Vice-President's [illegible] and abolishing the 'lame-duck' sessions of Congress; a 21st, [illegible], 1933, repealing the 18th (liquor prohibition) amendment; a 22nd, 26 Feb., 1951, limiting a President's tenure of office to 2 terms, or to 2 terms plus 2 years in the case of a Vice-President who has succeeded to the office on the death of a President.

The 5th article of the constitution provides that Congress may, on a two-thirds vote of both houses, propose amendments to the constitution, or, on the application of the legislatures of two-thirds of all the states, call a convention for [illegible] amendments, which in either case shall b valid as part of the [illegible] when ratified by the [illegible] of three-fourths of the several states, or by conventions in [illegible] thereof, whichever mode of ratification may be proposed by Congress.

By the constitution the government of the nation is composed of three co-ordinate branches, the executive, the legislative and the judicial. The executive power is vested in a president, who holds office for four years, and is elected, together with a vice-president chosen for the same term, by electors from each state, equal to the whole number of senators and representatives to which the state may be entitled in the Congress. In each state the electors, nominated by the various political parties and virtually pledged (in a few states by law, but in most states merely by custom and prudent politics) to the party's candidates for president and [illegible], are in turn chosen by direct vote of the citizens on a general [illegible] system known in France as *scrutin de liste*. The president must be a natural-born citizen, resident in the country for 14 years, and at least 35 years old.

National flag: 7 red and 6 white alternating stripes, horizontal; with a blue canton, extending down to the lower edge of the 4th red stripe from the top, and displaying 48 white 5-pointed stars, one for each state. Each star has one point directed vertically upward, and the 48 are arranged in 6 horizontal rows. On the admission of additional states, stars are added, effective on 4 July following the date of admission. Congress, by law of 22 Dec., 1942, has codified 'existing rules and customs' pertaining to the display of the flag, for civilians. All practices tending to lower its prestige are deprecated but no penalties are attached.

National anthem: The Star-spangled Banner, 'Oh say, can you see by the dawn's early light' (words by F. S. Key, 1814; tune by J. S. Smith; formally adopted by Congress 3 March, 1931).

The presidential election is held every fourth (leap) year on the Tuesday after the first Monday in November. Technically, this is an election of presidential electors, not of a president directly; the electors thus chosen meet and give their votes (for the candidate to whom they are pledged) at their respective state capitals on the first Monday after the second Wednesday in December next following their election; and the votes of the electors of all the states are opened and counted in the presence of both Houses of Congress on the sixth day of January. The total electoral vote is 531 (1 each for 96 senators and 435 representatives) and a majority—266—is necessary to elect. If the successful candidate for President dies before taking office, the Vice-President-elect becomes President; if no candidate has a majority, or if the successful candidate fails to qualify, then, by the twentieth amendment, the Vice-President acts as President until a president qualifies. The duties of the Presidency, in absence of the President and Vice President by reason of death, resignation, removal, inability or failure to qualify, devolve upon the Speaker of the House under legislation enacted 18 July, 1947. And in case of absence of a Speaker for like reason, the presidential duties devolve upon the President *pro tem* of the Senate and successively upon the members of the Cabinet in order of precedence.

The presidential term, by the twentieth amendment to the constitution, begins with the inauguration of the President on 20 Jan., of the inaugural year. This amendment also instals the newly elected Congress in office on 3 January, instead of—as formerly—in the following December. The President's salary (from 1949) is $100,000 per year, plus $50,000 for travelling expenses and official entertainment. The Vice-President's salary (from 1949) is $30,000, plus $10,000 tax-free allowance for travel.

The President is commander-in-chief of the Army, Navy and Air Force, and of the militia when in the service of the Union. The Vice-President is *ex officio* President of the Senate, and in the case of 'the removal of the President, or of his death, resignation, or inability to discharge the powers and duties of his office,' he becomes the President for the remainder of the term. In case of the death or resignation of the Vice-President, the President *pro tem* continues as presiding officer of the Senate and the office of Vice-President remains vacant.

President of the United States.—Harry S. Truman, of Missouri, born in Lamar, Missouri, 8 May, 1884; farmer and business man; during World War I served as captain of Battery D, 129th F.A., in several major offensives; member of Jackson County Court (the equivalent of board of county commissioners), 1922–24, and presiding officer, 1926–34; United States senator from Missouri, 1935–41, and re-elected for term 1941–47; sponsor and head of Senate Special Committee to Investigate Contracts under the National Defence Programme; resigned from the Senate on 17 Jan., 1945, having been elected Vice-President; succeeded to the Presidency 12 April, 1945, upon the death of Franklin D. Roosevelt; was elected President on 2 Nov., 1948.

The offices of President and Vice-President have been occupied as follows :—

PRESIDENTS OF THE UNITED STATES.

Name	From state	Term of service	Born	Died
George Washington	Virginia	1789–97	1732	1799
John Adams	Massachusetts	1797–1801	1735	1826

Harry S. Truman	Missouri	1945–12 Apl., 1945 [1]	1884	—
Alben W. Barkley	Kentucky	1949–53	1877	—

[1] Position vacant thereafter until commencement of the next presidential term.

The administrative business of the nation has been traditionally vested in several executive departments, the heads of which, unofficially and *ex officio*, formed the President's Cabinet. Beginning with the Interstate Commerce Commission in 1887, however, an increasing amount of executive business has been entrusted to so-called independent agencies, such as the Veterans Administration, Public Works Agency, Tariff Commission, etc.

Under the National Security Act of 1947 a new Executive Department of the Air Force was established, to operate, together with the Departments of the Army and the Navy, under the general direction of a Secretary of Defence. The Secretary of Defence as head of the National Military Establishment is a member of the Cabinet in lieu of the Secretaries of the Army, Air Force and Navy. His precedence is that formerly accorded the Secretary of War. All heads of departments are appointed by the President, but must be confirmed by the Senate.

The Cabinet now consists of the following:—

1. *Secretary of State* (created 1789).—Dean Acheson, of W[illegible], D.C.; lawyer, Under-Secretary of Treasury; Assistant Sec[illegible] of State, 1941–45; Under-Secretary of State, 1945–47; appointed 7 Jan., 1949; born 1893.

2. *Secretary of the Treasury* (1789).—John W. Snyder, of Missouri; banker; former Comptroller of the Currency, and Director of War Mobilization and Recovery; appointed 25 June, 1946; born 1896.

3. *Secretary of Defence* (1947).—George C. Marshall, of Virginia, former Chief of Staff of the Army, 1939–45; personal representative of the President to China, 1945; Secretary of State, 1947–49; appointed 21 Sept., 1950; born 1880.

4. *Attorney-General* (Department of Justice, 1870).—James Howard McGrath, of Rhode Island; lawyer; former governor and U.S. senator; appointed 24 Aug., 1949; born 1903.

5. *Postmaster-General* (1792).—Jesse M. Donaldson, of Washington, D.C.; formerly First Assistant Postmaster-General; employed in the Postal service for 41 years; appointed 1 Dec., 1947; born 1885.

6. *Secretary of the Interior* (1849).—Oscar L. Chapman, of Colorado; lawyer; Assistant Secretary of the Interior, 1933; Under Secretary, 1946; appointed 11 Nov., 1949; born 1896.

7. *Secretary of Agriculture* (1889).—Charles F. Brannan, of Washington, D.C.; lawyer; government service since 1935; Assistant Secretary of Agriculture, 1944–48; appointed 24 May, 1948; born 1903.

8. *Secretary of Commerce* (1903).—Charles Sawyer, of Ohio; lawyer and business man; formerly ambassador to Belgium; appointed 5 May, 1948; born 1887.

9. *Secretary of Labour* (1913).—Maurice J. Tobin, of Massachusetts; formerly governor; appointed 13 Aug., 1948; born 1901.

Each of the above Cabinet officers receives an annual salary (Act of 15 Oct., 1949) of $22,500; each holds office during the pleasure of the President; the Postmaster-General alone must be re-appointed and confirmed at the beginning of a president's second or later term, the others merely continuing in office.

The whole legislative power is vested by the Constitution in a **Congress**, consisting of a Senate and House of Representatives. The Senate consists of two members from each state, chosen by popular vote for 6 years, one-third retiring or seeking re-election every 2 years. Senators must be not less than 30 years of age; must have been citizens of the United States for 9 years, and be residents in the states for which they are chosen. The Senate has complete freedom to initiate legislation, except revenue bills (which must originate in the House of Representatives); it may, however, amend or reject any legislation originating in the Lower House. Besides these legislative functions, the Senate is entrusted with the power of giving or withholding its 'advice and consent' to the ratification of all treaties initiated by the President with foreign Powers, a two-thirds majority of senators present being required for approval. (However it has no control over 'international executive agreements' made by the President with foreign governments; such 'agreements,' representing an important but very recent development, cover a wide range and are actually more numerous than formal treaties.) It also has the power of confirming or rejecting major appointments to office made by the President, but it has no direct control over the appointment by the President of 'personal representatives' or 'personal envoys' on missions abroad. Theoretically, Congress, in appropriating funds for the Chief Executive, could ban the use of funds to pay such a representative, but in practice this has never been done. Members of the Senate constitute a High Court of Impeachment, with power, by a two-thirds vote, to remove from office and disqualify any civil officer of the United States impeached by the House of Representatives, which has the sole power of impeachment.

The Senate has 15 Standing Committees (formerly 33) to which all bills are referred for study, revision or rejection. The lower House has 19 such committees (formerly 48). In both houses, each Standing Committee has a chairman and a majority representing the majority party of the whole house.

The House of Representatives is composed of members elected every second year by the vote of citizens who, according to the laws of their respective states, are qualified to vote for members of the state legislature. By amendments of the constitution, disqualification on the ground of race, colour or sex is forbidden. Accordingly the electorate consists theoretically of all citizens of both sexes over 21 years of age (in Georgia the voting age has been reduced to 18 years), but the franchise is not universal. There are requirements of residence varying in the several states as to length from

3 months to 2 years; differing requirements as to registration; in some states the payment of taxes (called ' poll-taxes ') is necessary to qualify for the suffrage. In 19 states the ability to read (usually an extract from the constitution) is required—in Louisiana the ability to read English or one's native tongue. In some southern states voters are required to give a reasonable explanation of what they read. Several of the southern states have adopted methods with the frankly avowed purpose of excluding Negroes from the franchise and yet avoiding the constitutional consequences of discriminating ' on account of race, colour or previous condition of servitude.' In the 1948 elections 693,000 Negroes registered as voters in 11 Southern states (150,000 in 1944). In most states convicts are excluded from the franchise, in some states duellists and fraudulent voters.

On 2 Nov., 1948, those of voting age in the United States numbered about 93,941,000 (46,181,000 men and 47,760,000 women). At the Presidential election on 2 Nov., 1948, total vote cast, including men and women in the armed services, was 48,690,075, of which Harry S. Truman (D.) received 24,104,030 (303 electoral college votes), while the Republican candidate, Thomas E. Dewey, received 21,970,986 (189 electoral votes), and Governor James S. Thurmond, Southern Democrats or ' Dixie-crats,' 1,169,118 (39 electoral votes). Henry A. Wallace, representing the Progressive party, polled 1,156,883 votes but received no votes in the electoral college. Legislation tending to discourage the rise of third parties is being adopted by a number of state legislatures. In Florida new parties are effectively barred by a law that no party may present a list of candidates on the official ballot unless it polled 5% of the votes at the preceding election. In Illinois a new party must present a petition signed by at least 500 voters in 50 of the 102 counties.

Some form of Australian ballot (first adopted by Kentucky in 1888) is now used in all states except Delaware, South Carolina and Georgia. In Delaware and South Carolina the various political parties furnish their own ballot-papers to the voter as he or she enters the polling-booth. In Georgia the use of the Australian ballot is left to the option of each county. Seventeen states use different ballots for federal, state and local elections.

The number of each state's representatives is determined by the decennial census, in the absence of specific Congressional legislation affecting the basis. There will be such a re-apportionment following the census of 1 April, 1950. The states, as the result of the 1940 census, have the following representatives, beginning with the 78th Congress (1943–45) :—

Alabama	9	Maryland	6	Oregon	4
Arizona	2	Massachusetts	14	Pennsylvania	33
Arkansas	7	Michigan	17	Rhode Island	2
California	23	Minnesota	9	South Carolina	6
Colorado	4	Mississippi	7	South Dakota	2
Connecticut	6	Missouri	13	Tennessee	10
Delaware	1	Montana	2	Texas	21
Florida	6	Nebraska	4	Utah	2
Georgia	10	Nevada	1	Vermont	1
Idaho	2	New Hampshire	2	Virginia	9
Illinois	26	New Jersey	14	Washington	6
Indiana	11	New Mexico	2	West Virginia	6
Iowa	8	New York	45	Wisconsin	10
Kansas	6	North Carolina	12	Wyoming	1
Kentucky	9	North Dakota	2		
Louisiana	8	Ohio	23		
Maine	3	Oklahoma	8	Total	435

The average constituency contains 300,000 population (of which about two-thirds are of voting age); by almost invariable custom the representative lives in the district from which he is elected. When by reapportionment a state's quota of representatives is changed, until the state revises its districts to correspond with the new quota, the whole number of representatives, in case of a decrease, or the added number, in case of an increase, are elected 'at large,' that is, by the voters of the entire state.

Representatives must be not less than 25 years of age, citizens of the United States for 7 years, and residents in the states from which they are chosen. The House also admits a 'delegate' from each of the two organized territories, Alaska and Hawaii, and a 'resident commissioner' from Puerto Rico, each of whom has the right to speak on any subject and to make motions, but not to vote. The delegates and resident commissioner are elected in the same manner as the representatives. Each of the two Houses of Congress is sole 'judge of the elections, returns and qualifications of its own members'; and each of the Houses may, with the concurrence of two-thirds, expel a member. The period usually termed 'a Congress' in legislative [illegible] for 2 years, terminating at noon on 3 January.

Effective with the 86th Congress, the salary of a senator or representative, also that of a resident commissioner or delegate in Congress from a territory, is $12,500 per annum, with $2,500 tax-free expense allowance and allowances for travelling expenses and for clerical hire. The salary of the Speaker of the House of Representatives and the Vice-President is $30,000 per annum, with $10,000 tax-free expense allowances.

No senator or representative can, during the time for which he is elected, be appointed to any *civil* office under authority of the United States which shall have been created or the emoluments of which shall have been increased during such time; and no person holding *any* office under the United States can be a member of either House during his continuance in office. No religious test may be required as a qualification to any office or public trust under the United States or in any state.

The 82nd Congress (1951–53), as elected 7 Nov., 1950, was constituted as follows:—Senate, 49 Democrats and 47 Republicans; House of Representatives, 235 Democrats, 199 Republicans and 1 Independent. The Senate contained one woman member; the lower House, 8 women. About 60% of the Senate and 56% of the House are lawyers (in the British House of Commons, 1950, lawyers number 100 out of 640, or 15%). The lower House included 18 in agriculture, 24 in teaching, 37 in business or manufacturing, 16 in real estate or insurance, 30 in journalism and 8 in banking.

The National Government has authority in matters of general taxation, treaties and other dealings with foreign Powers, Army, Navy, and (to a certain extent) militia, foreign and inter-state commerce, postal service, coinage, weights and measures, and crimes against the United States.

Slavery was abolished throughout the whole of the United States by the thirteenth amendment of the constitution, adopted 6 Dec., 1865, while the fourteenth and fifteenth amendments of the constitution, adopted in 1868 and 1870, gave to the former slaves all the rights and privileges of citizenship.

By an Act passed on 2 June, 1924, full citizenship was granted to all Indians born in the United States, though those remaining in tribal units were still under special Federal jurisdiction. Those remaining in tribal units constitute from one-half to three-fourths of the Indian population. The Indian Reorganization Act of 1934 gave the tribal Indians, at their own option, substantial opportunities of self-government and of self-controlled corporate enterprises empowered to borrow money, buy land, machinery

and equipment; these corporations are controlled by democratically elected tribal councils; by 1945 roughly a third of the Indians had taken advantage of this Act. Indian lands (1945) amounted to 55,362,949 acres, of which about 67% were tribally owned and 31% in trust allotments, with the remainder owned by the Government. Indian lands are held free of taxes. Indian population is about 402,000 (1947); over one-half are in the three states of Oklahoma, Arizona and New Mexico. The Indians for many years were dying out, but they are now the fastest growing racial group.

State and Local Government.

The Union comprises 13 original states, 7 states which were admitted without having been previously [illegible] territories, and 28 states which had been territories—48 states in [illegible] state has its own constitution (which the United States guarantees shall be republican in form), deriving its authority, not from Congress, but from the people of the state. Admission of states into the Union has been granted by special Acts of Congress, either (1) in the form of 'enabling Acts' providing for the drafting and ratification of a state constitution by the people, in which case the territory becomes a state as soon as the conditions are fulfilled, or (2) accepting a constitution already framed, and at once granting admission.

Each state is provided with a legislature of two Houses (except Nebraska, which since 1937 has had a single-chambered legislature), a governor, and other executive officials and a judicial system. Both Houses of the legislature are elective, but the senators (having larger electoral districts usually covering 2 or 3 counties compared with the single county which sends one representative to the lower House) are less numerous than the representatives, while in some states their terms are longer and in a few the Senate is only partially renewed at each election. Members of both Houses are paid at the same rate, which varies from $150 to $5,000 per session, or from $3 to $15 dollars per day during session, plus mileage, etc. In most states sessions are biennial, the Governor having power to summon an extraordinary session, but not to dissolve or adjourn. The duties of the two Houses are similar, but in many states money bills must be introduced first in the lower House. The Senate sits as a court for the trial of officials impeached by the other House, and often has power to confirm or reject appointments made by the Governor.

State legislatures are competent to deal with all matters not reserved for the Federal Government by the federal constitution nor specifically prohibited by the federal or state constitutions. Among their powers are the determination of the qualifications for the right of suffrage, and the control of all elections to public office, including elections of members of Congress and electors of President and Vice-President; the criminal law, both in its enactment and in its execution, with unimportant exceptions, and the administration of prisons; the civil law, including all matters pertaining to the possession and transfer of, and succession to, property; marriage and divorce, and all other civil relations; the chartering and control of all manufacturing, trading, transportation and other corporations, subject only to the right of Congress to regulate commerce passing from one state to another; labour; education; charities; licensing; fisheries within state waters, and game laws (apart from the hunting of migratory birds, which is a federal concern under a treaty with Canada). Taxes on income were left to the states until 1913, when the sixteenth amendment was adopted authorizing the imposition of federal taxes on income without regard to apportionment.

The Governor is chosen by direct vote of the people over the whole state. His term of office varies in the several states from 2 years to 4 years, and his salary from $4,500 to $25,000. His duty is to see to the faithful administration of the law, and he has command of the military forces of the state. He may recommend measures, but does not present bills to the legislature. In some states he presents estimates. In all but one of the states (North Carolina) the Governor has a veto upon legislation, which may, however, be overridden by the two Houses, in some states by a simple majority, in others by a three-fifths or two-thirds majority. In some states the Governor, on his death or resignation, is succeeded by a Lieut.-Governor who was elected at the same time and has been presiding over the state Senate. In several states the Speaker of the lower House succeeds the Governor.

The chief officials by whom the administration of state affairs is carried on (secretaries, treasurers, members of boards of commissioners, etc.) are usually chosen by the people at the general state elections for terms similar to those for which governors hold office. State employees, April, 1950, numbered 1,033,000 earning $212·2 million monthly; schools accounted for 309,000 employees (29·9%), highways for 16·5% and welfare institutions for 16·6%.

The chief unit of local government is the county, of which there are 3,050 with definite functions. The counties maintain public order through the sheriff and his deputies who may, in a crisis, be drawn temporarily from willing citizens; in many states the counties maintain the smaller local highways; other functions are the granting of licenses and the apportionment and collections of taxes. But in only a few states do they manage the schools.

The unit of local government in New England is the rural township, governed directly by the voters who assemble annually or oftener if necessary, and legislate in local affairs, levy taxes, make appropriations and appoint and instruct the local officials (selectmen, clerk, school-committee, etc.). Townships are grouped to form counties. Where cities exist, the township government is superseded by the city government. In July, 1950, more than 1,000 cities and counties had 'city managers' or 'council-managers' with large executive powers.

The District of Columbia, ceded by the State of Maryland for the purposes of government in 1791, is the seat of the United States Government. It includes the city of Washington, and embraces a land area of 61 square miles. The District has no municipal legislative body, and its citizens have no right to vote either in national or municipal concerns, Congress having sole plenary legislative authority. By an Act of Congress of 1878, its municipal government is administered by three commissioners, appointed by the President.

The Territories of Hawaii and Alaska have local legislatures, whose Acts may be modified or annulled by Congress; both are (1951) pressing Congress to be admitted to the Union as the 49th and 50th States. The President appoints for 4 years the Governor of a Territory, the Territorial secretaries and other officials, and the Territorial judges. Puerto Rico, although not designated as a 'Territory' in the technical sense, is self-governing, on a system almost identical with that of the territories. Guam, as a military outpost manned by Army, Navy and Marine Corps forces, has had as governor a naval officer appointed by the President; but by an executive order effective 1 Aug., 1950, administration was transferred to the U.S. Department of the Interior. The local legislature has considerable powers. The Virgin Islands are administered, under the supervision of the Secretary of the Interior, by a Governor, who is appointed by the President.

Area and Population.

1. Progress and Present Condition.

Population of the continental United States at each census from 1790. Residents of Hawaii, Alaska, Puerto Rico, the Philippine Islands, Guam, Samoa, Virgin Islands and Panama Canal Zone, and persons in the military and naval service stationed abroad are not included in the figures of this table. The residents of Indian reservations are not included prior to 1890.

Year	White	Negroes	Other races	Total	Decennial increase, per cent.
1790 [1]	3,172,006	757,208	—	3,929,214	—
1800	4,306,446	1,002,037	—	5,308,483	35·1
1810	5,862,073	1,377,808	—	7,239.881	36·4
1820	7,866,797	1,771,656	—	9,638,453	33·1
1830	10,537,378	2,328,642	—	12,866,020	33·5
1840	14,195,805	2,873,648	—	17,069,453	32·7

[1] At the first census in 1790 the white population was made up of Anglo-Scottish, 89·1%; German, 5·6%; Dutch, 2·07%; Irish, 1·67%; French, 0·5%.

Year	White	Negroes	Other races [1]	Total	Decennial increase, per cent.
1850	19,553,068	3,638,808	—	23,191,876	35·9
1860	26,922,537	4,441,830	78,954	31,443,321	35·6
1870 [2]	33,589,377	4,880,009	88,985	38,558,371	22·6
1870 [2]	*34,337,292*	*5,392,172*	*88,985*	*39,818,449*	*26·6*
1880	43,402,970	6,580,793	172,020	50,155,783	*26·0*
1890	55,101,258	7,488,676	357,780	62,947,714	25·5
1900	66,809,196	8,833,994	351,385	75,994,575	20·7
1910	81,731,957	9,827,763	412,546	91,972,266	21·0
1920	94,820,915	10,463,131	426,574	105,710,620	14·9 [3]
1930	110,286,740 [4]	11,891,143	597,163	122,775,046	16·1 [3]
1940	118,214,870	12,865,518 [5]	588,887	131,669,275	7·2

[1] The other races, in 1860, comprise 34,933 Chinese and 44,021 Indians; for 1870, 63,199 Chinese, 55 Japanese and 25,731 Indians; for 1880, 105,465 Chinese, 148 Japanese and 66,407 Indians; for 1890, 107,488 Chinese, 2,039 Japanese and 248,253 Indians; for 1900, 89,863 Chinese, 24,326 Japanese and 237,196 Indians; for 1910, 71,531 Chinese, 72,157 Japanese, 265,683 Indians and 3,175 other races; for 1920, 61,639 Chinese, 111,010 Japanese, 244,437 Indians and 9,488 all others; for 1930, 332,397 Indians, 74,954 Chinese, 138,834 Japanese and 50,978 all others; for 1940, 333,969 Indians, 77,504 Chinese, 126,947 Japanese and 50,467 all others.

[2] Enumeration in 1870 incomplete. Figures in italics represent estimated corrected population

[3] Between the 1910 census (15 April, 1910) and the 1920 census (1 January, 1920), the period covered was 116¼ months (less than a full decade) Adjusting for this, the exact rate of increase for the decade was 15·4%. Similarly correcting for the 123 months between the 1920 and 1930 censuses, the true rate of increase was 15·7%.

[4] Figures for 1930 have been revised to include Mexicans (1,422,533) who were classified with 'Other Races' in the 1930 census reports.

[5] Less than 1% of the Negroes were foreign born. Seventeen southern states in 1940 had 9,904,619 [illegible] the total Negro population), as compared with 8,912,231 (85·2%) in 1920 an [illegible] in 1900.

Total population in 1940 at 131,669,275 comprised 66,061,592 males and 65,607,683 females; 74,423,702, or 56·5%, were urban.

In the following table of population statistics for 1950 and 1940 (final census figures for continental United States in both years, but preliminary 1950 figures for non-contiguous territories) there is shown the year in which each of the original 13 states ratified the constitution, the year when each of the other states was admitted into the Union, and the years of organization of Territories; postal abbreviations for the names of the states are shown in brackets. Continental United States is the part lying on the continent of North America south of the Canadian boundary. (For census population by states and regions in 1930 and 1940 *see* THE STATESMAN'S YEAR-BOOK, 1944, pp. 495 and 496.)

Geographic divisions and states	Land area: English sq. miles, 1950	Census population, 1 April, 1950	Census population in 1940	Pop. per sq. mile, 1950

[1] Preliminary, 1950, in the case of the non-contiguous territories.
[2] Excluding the Philippines which became independent on 4 July, 1946; the total land area previously was 696,532 square miles.
[3] Census of the present area in 1940; including the Philippines the 1940 total for non-contiguous territories was 18,951,956, and the grand total, 150,621,281.
[4] Includes Baker, Canton, Enderbury, Howland, Jarvis, Johnston, Midway and Palmyra Islands in the 1940 census, but in the 1950 census all except Palmyra were excluded (Canton and Enderbury are owned jointly with Great Britain).
[5] Gross area (land and water) 1950, Continental United States, 3,022,387; Non-contiguous Territory, 597,257. Total, 3,619,644 square miles. The total, in 1940, included the Philippine Islands, with a gross area of 115,600 square miles, a net land area of 114,830 square miles and an estimated population (based on the 1939 census) of 16,356,000 (density, 142·4 per square mile).

The 1940 census showed 11,419,138 foreign-born whites, and 23,157,580 native whites of foreign or mixed parentage. About 75% of the foreign-born were concentrated in 8 states and 80% were living in cities as compared with 55% of the native-born. The 10 countries contributing the largest numbers who were foreign-born, or had one or two foreign-born parents, were Germany, 5,236,612; Italy, 4,594,780; Canada, 2,910,159; Poland, 2,905,859; Russia (U.S.S.R.), 2,610,244; Eire, 2,410,951; England, 1,975,975; Sweden, 1,301,390; Austria, 1,261,246; Mexico, 1,076,653. (For other details of countries of origin, *see* THE STATESMAN'S YEAR-BOOK, 1944, p. 497.)

Increase or decrease of native white, and foreign-born white, population from 1860 to 1940, by decades :—

Year	Native white			Foreign-born white		
	Total	Increase	Per cent. increase	Total	Increase or decrease (—)	Per cent. change
1860	22,825,784	5,513,251	31·8	4,096,753	1,856,218	82·8
1870	28,095,665	5,269,881	23·1	5,493,712	1,396,959	34·1
1880	36,843,291	8,747,626	31·1	6,559,679	1,065,967	19·4
1890	45,979,391	9,018,732[1]	24·5	9,121,867	2,562,188	39·1
1900	56,595,379	10,615,988	23·1	10,213,817	1,091,950	12 0
1910	68,386,412	11,791,033	20·8	13.345,545	3,131,728	30·7
1920	81,108,161	12,721,749	18·6	13,712,754	367,209	2·8
1930	96,303,335	15,195,174	18·7	13,983,405	270,651	2·0
1940	106,795,732	10,492,397	10·9	11,419,138	−2,564,267	−18·3

[1] Exclusive of population specially enumerated in 1890 in Indian Territory and on Indian reservations.

Estimated non-white population on 1 July, 1947 (with 1940 census total in parentheses) was 15,139,000 (13,454,405) including Negroes, 14,460,000

(12,865,518); American Indians, 402,000 (333,969); Japanese, 131,000 (126,947); Chinese 87,000 (77,504); other races, 60,000 (50,467, of whom the Filipinos numbered 45,563, Asiatic Indians, 2,405 and Koreans, 1,711). Of the non-white groups the American Indians had the largest proportionate increase, 20·3%.

II. Vital Statistics

Vital statistics are based on records of births, deaths, fetal deaths, marriages and divorces filed with registration officials of States and cities. To make available the statistical data contained in these records, systematic collection of copies of mortality records from a national death-registration area was inaugurated in 1900. A national birth-registration area was established in 1915. These areas, which at their inception were composed of a limited group of States and cities, expanded gradually until 1933 when both the birth- and death-registration areas covered the entire continental United States. No national registration areas for marriages and divorces have ever been established. For each year from 1867 through 1943, data were obtained through intermittent collections supplemented by estimates for years in which national surveys were incomplete or none were made. Starting with 1944, marriage and divorce statistics have been compiled annually from reports furnished by State or local officials.

Year	Live births [1]	Deaths [2] excluding fetal deaths	Marriages [3]	Divorces [4]	Maternal deaths [5]	Deaths under 1 year [5]
1900 . .	—	343,217	709,000	55,751	—	—

1949 . .	3,581,000 [8]	1,446,000 [8]	1,585,440	386,000	3,053 [6]	111,200 [8]

[1] For birth-registration States, which increased in number from 10 States and the District of Columbia in 1915 to the entire continental United States in 1933.

[2] For death-registration States, which increased in number from 10 States and the District of Columbia in 1900 to the entire continental United States in 1933. Data exclude deaths among armed forces overseas, 1940–49.

[3] Estimated, except for 1945–49. Figure for 1949 provisional.

[4] Estimated, except for 1900 and 1930. Estimate for 1949 provisional.

[5] Estimated.

[6] Estimate based on a 10% sample of death certificates received in State vital statistics offices. Deaths for 1949 were classified according to the Sixth Revision of the International Lists of Diseases and Causes of Death; while deaths for 1939–48 were classified according to the Fifth Revision. For 1949, 7% fewer deaths are assigned to maternal causes under the sixth revision than under the Fifth.

[7] The 1948 male births were 1,813,852 or 1,054 males per 1,000 females.

Births (per 1,000 estimated mid-year population) fell from 25·0 in 1915 to 16·6 in the depression year 1933, rising to a new peak of 25·8 in 1947; in 1948, it was 24·2 and 1949, 24·1.

Deaths, excluding fetal deaths (per 1,000 population) declined slowly from 17·2 in 1900 to 10·9 in 1935, remaining stationary around an average of 10·8 until 1945 when at 10·6 a fresh decline began; 1946, 10·0; 1947, 10·1; 1948, 9·9; 1949, 9·7, lowest for the half-century.

Marriages have ranged from a low of 7·9 per 1,000 population in the

depression year 1932 to a peak of 16·4 in 1946; thereafter, 1947, 13·9; 1948, 12·4, and 1949, 10·7.

Divorces rose from a low of 0·7 per 1,000 of the population in 1900 (census) to a peak of 4·3 in 1946, a year in which the population base included, exceptionally, the armed forces overseas; thereafter, with the population base excluding armed forces overseas, the rate was:—1947, 3·4; 1948, 2·8; 1949, 2·6.

Maternal mortality rates (deaths of mothers per 10,000 live births) began in 1915 at 60·8, rising to a peak of 79·9 in 1920, and still high in 1930 at 67·3; then a steady decline continued, the rate reaching 20·7 in 1945; thereafter, 1946, 15·7; 1947, 13·5; 1948, 11·7, and 1949, 8·5.

Infant mortality rates (per 1,000 live births) began in 1915 at 99·9, fell to 85·8 in 1920, to 71·7 in 1925 and to 64·6 in 1930; thereafter progress was slower, reaching 38·3 in 1945 and the half-century low of 31·1 in 1949.

In the decade 1940–50 the increase in the population (19,028,086) was a record in members, but the percentage increase, 14·5%, was the lowest of any decade except the 'depression decade,' 1930–40, which was only 7·2%. The increase in numbers was due almost wholly to the steep rise in births which were 32,294,000 in 1940–50 compared with 23,186,000 in the previous decade; changes in deaths and net immigration were negligible. Deaths in 1940–50 were 14,265,000 compared with 14,245,000 in 1930–40.

Marital condition of males and females 14 years old or over (in thousands) in April, 1949, and April, 1940, was as follows:—

Date and sex	Pop. 14 years or over	Single (never married)	Married, spouse present	Married, spouse absent	Widowed	Divorced
April, 1949						
Male	53,448	13,952	35,323	1,151	2,181	842
Per cent.	*100·0*	*26·1*	*66·1*	*2·2*	*4·1*	*1·6*
Female	56,001	11,174	35,323	1,690	6,582	1,233
Per cent.	*100·0*	*20·0*	*63·1*	*3 0*	*11·8*	*1·1*
April, 1940						
Male	50,554	17,593	28,658	1,534	2,144	624
Per cent.	*100·0*	*34·8*	*56·7*	*3 0*	*4 2*	*1·2*
Female	50,549	13,936	28,517	1,574	5,700	823
Per cent.	*100 0*	*27·6*	*56·4*	*3·1*	*11·3*	*1·6*

The population shifts within the country reached extraordinary proportions during World War II. Between April, 1940, and April, 1947, of the 122,633,000 people born on or before 1 April, 1940, 13,081,000 (10·7%) moved to a different county in the same state and 12,388,000 (10·1%) moved to a different state; 44,429,000 (36·2%) moved to a different residence in the same county. Members of the armed forces are excluded. This population shift has continued; between April, 1947, and April, 1948, about 3¾ million workers had migrated, compared with 3 million in the 12 months following V-J Day (Aug., 1945). Migrants were relatively more numerous among the professional and semi-professional occupations than in any other occupation group.

Total number of alien immigrants admitted in year ending 30 June, 1949, was 188,317; in 1948, 170,570. Total alien arrivals (immigrant and non-immigrant) in 1948 (30 June) was 646,576; total alien departures, 448,218.

The total number of alien immigrants from 1820 to 1949 (30 June) arriving for permanent residence was 39,076,295. In the following statement immi-

grants from Canada, Mexico and all other countries are included in the total :—

Year ending 30 June	British Isles [1]	Germany [2]	Sweden, Norway, and Denmark	Austria [2] and Hungary	Italy	Poland	France	Total immigrants
1930	54,460	26,569	6,919	3,009	22,327	9,231	3,713	241,700
1940	6,997	21,520	1,256	1,902	5,302	702	2,575	70,756
1945	3,456	172	149	54	213	195	201	38,119
1946	35,368	2,598	1,085	179	2,636	335	5,708	108,721
1947	26,362	13,900	4,814	2,348	13,866	745	7,285	147,292
1948	33,937	19,368	6,042	3,218	16,075	2,417	5,550	170,570

[1] Including Eire

[2] For 1939 and subsequent years through 1945, the figures for Austria are included with Germany and excluded from Hungary.

The total number of immigrants from China between 1820 and 1948 was 394,187; the total number from Japan, from 1861, the earliest year of record, was 278,577. In 1929 the number of Chinese admitted, from all countries, was 1,071; in 1940, 106; 1946, 233; 1947, 1,136; 1948, 3,574. In 1929, 716 Japanese were admitted; in 1941, 30; 1943, 1944 and 1945, none; 1946, 2; 1947, 10; 1948, 316.

Owing to war conditions, in the fiscal year 1942 only 10% of the immigration quotas was used; in 1943, 5%; 1944, 6%; and in 1945, 7%. These unused quotas are not cumulative. Total of quota immigrants admitted in 1940–44, 121,253; 1945, 11,623; 1946, 29,095; [illegible].

Aliens are now subject to special federal legislation. The Alien Registration Act of 1940 required all aliens 14 years of age or older to be registered and finger-printed, the first such registration ever required. The Act also extended in peacetime the provisions of the wartime Espionage Act regarding utterances and included, in addition, a federal peacetime sedition law modelled on the state 'criminal syndicalism' acts (*see* section on ECONOMICS AND LABOUR). This is the first federal legislation of this kind adopted since 1798. Aliens who become naturalized citizens may, on conviction, be deprived of citizenship and deported. Those who become a charge on the community may be deported; in the depression year 1933, 19,865 aliens were deported at government expense.

The federal registration of 26 Dec., 1940, showed a total of 5,009,857 aliens, of whom 25·1% (1,257,501) were living in New York state.

In most states aliens are barred from practising medicine or law, etc. Four states prohibit them from owning real property. Many states bar them from old-age assistance and state relief.

Bernard (W. S.) and others, American Immigration Policy. New York, 1950.

III. PRINCIPAL CITIES.

Cities with	No. of cities [1]			Combined population [1]		
	1910	1930	1940	1910	1930	1940

Religion.

For details of the 1936 census of religious bodies, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 493.

In 1948 the Department of Commerce published a table of church membership, using the figures supplied by the various groups for years ranging mostly from 1942 to 1945. This showed 253,762 church organizations, with aggregate membership of 72,492,669 (55,807,366 in 1936), of whom 59,717,107 were 13 years of age or older. The principal denominations are shown below :—

Denominations	Year of census or estimate	Local churches	Total membership	Members 13 years of age and over
Protestant bodies :				
Adventist bodies	1944	2,531	194,832	194,832
Baptist bodies	1936–44	67,225	13,831,690	12,890,895
Church of Christ, Scientist	1936	2,113	268,915	268,915
Congregational Christian Church [1]	1943	5,753	1,075,401	1,075,401
Disciples of Christ	1944	7,917	1,672,354	1,504,115
Evangelical and United Brethren [2]	1944	4,742	689,361	639,373
Evangelical and Reformed Church [3]	1943	2,835	675,958	675,958
[illegible]	1943–44	862	114,069	97,975
[illegible]	1944	2,320	983,410	830,736
Lutheran bodies	1943–44	14,228	4,924,047	3,468,566
Mennonite bodies	1936	913	114,337	—
Methodist bodies	1942–44	54,984	9,786,108	8,770,351
Presbyterian bodies	1944	12,809	2,799,889	2,653,829
Protestant Episcopal Church	1949	7,894	2,515,265	—
Reformed bodies [4]	1944	1,046	298,304	241,221
Salvation Army	1944	1,474	208,329	91,664
Spiritualists, General Assembly	1945	236	100,000	100,000
Unitarians	1936	305	59,228	—
Universalists	1936	339	45,853	—
Roman Catholic Church	1948	14,905	26,075,697	—
Jewish Congregations	1936	3,728	4,641,184	3,341,652
Eastern Orthodox Churches	1942–44	580	550,000	400,000

[1] Represents merger of Congregational Churches with General Convention of the Christian Church, since 1926.
[2] Merged in 1946.
[3] Represents merger of Evangelical Synod of North America with Reformed Church in the United States, since 1926.
[4] Excludes membership of Reformed Church in the United States, since merged into Evangelical and Reformed Church.

Education.

Each state of the Union has a system of free public schools established by law, comprising elementary schools, junior high schools and high schools, with courses covering 12 years; some states, in addition, have a 2-year junior college as part of the free public school system. Every state has compulsory school attendance laws, covering generally the ages 7 to 16 years.

The main objective of the American school system is public mass education. The cumulative effect of this in recent years is shown by the median of 12·1 years of school completed by the population 20 to 24 years of age as compared with only 8 years for the population who completed their schooling a little more than a generation ago (those 55 to 64 years old). Results of the general effort to keep children in school regardless of economic

pressures and temptations may be summed up for 1949 as follows:—Of those who were 14 to 17 years old that year, 81·6% were attending school; of those 18 and 19 years old, 25·3%; of those 20 to 24 years old, 9·2%. (For more detailed figures, covering the entire population, *see* THE STATESMAN'S YEAR-BOOK, 1945, pp. 501 and 502.)

The Census Bureau estimates that in Oct., 1947, only 2·7% of the 106 million persons who were 14 years of age or older were unable to read and write; in 1930 the percentage was 4·9. Illiterates, 1947, were 2,838,000, compared with 4,000,000 in 1930.

In the autumn of 1950, 2,296,592 students (1,569,322 men and 727,270 women) were enrolled in 1,888 colleges and universities; 572,307 were veterans (both men and women) of World War II, availing themselves of the special Government grant.

Public school revenue is supplied largely from county and other local sources, 58·3% in 1947–48. State sources accounted for 38·9% and Federal sources for 2·8%. In 1947–48 the amount, including interest, expended on public elementary and secondary schools was $3,898,709,000, representing an annual cost per pupil of $183 08. In addition, $412,467,000 or $19·73 per pupil was expended for capital outlay. Estimated expenditures for private elementary and secondary schools in 1947–48 were $475,000,000. In 1947–48 the 1,788 universities, colleges, teachers' colleges and professional schools expended $1,391,594,000, of which $712,988,000 was spent by institutions under public control. This does not include auxiliary enterprises and activities, other non-educational expenditures and capital outlay. Federal expenditure on the education of veterans amounted to $364,727,000, excluding payments of living expenses and student supplies; students (not veterans) contributed in fees $304,601,000.

Vocational education below college grade, including the training of teachers to conduct such education, is Federally-aided. During the school year 1948–49 enrolments in these vocational classes were: agriculture, 651,604; distributive occupations, 312,608; home economics, 1,328,521; trade and industry, 801,913.

Summary of statistics of schools (public and private), teachers and pupils in 1947–48 (compiled by the United States Office of Education):—

Schools by level	Number of schools	Teachers			Enrolment		
		Male	Female	Total	Male	Female	Total
Elementary schools:							
Public	146,760	39,655	515,284	554,939	9,429,268	8,861,959	18,291,227
Private [1]	10,071	3,753	63,677	67,430	1,232,793	1,218,637	2,451,430
Secondary schools:							
Public	25,484	122,258	183,481	305,739	2,747,061	2,906,244	5,653,305
Private [1]	3,292	15,578	25,990	41,568	284,611	317,873	602,484
Higher education:							
Public	630	58,198	20,864	79,062	930,665	395,482	1,326,147
Private	1,158	72,500	22,642	95,142	905,674	384,441	1,290,115
Noncollegiate departments of institutions of higher education:							
Public	—	—	—	—	18,732	19,209	37,941
Private	—	—	—	—	23,307	11,295	34,602
Public and private residential schools for exceptional children [2]	444	1,148	4,771	5,919	38,474	24,663	63,137

[1] Estimated. [2] Blind, deaf, mentally deficient and delinquent; 1945–46 data.

Schools by level	Number of schools	Teachers			Enrolment		
		Male	Female	Total	Male	Female	Total
Private commercial & business schools [1]	1,200	3,537	4,338	7,875	150,000	150,000	300,000
Nursing schools, not parts of colleges [1]	1,067	—	—	4,500	698	74,435	75,133
Federal schools for Indians . .	283	555	1,118	1,673	14,535	15,747	30,282
Total . .	190,389	317,182	842,165	1,163,847	15,775,818	14,379,985	30,155,803

[1] Estimated.

Since 1936 the secondary schools have graduated more than 1,000,000 pupils a year, reaching a peak in 1942 of 1,242,000. The largest number graduated from college in any one year was 433,724 in 1949–50.

The District of Colombia and 17 states—Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia and West Virginia—require separate elementary schools for Negro pupils.

Negro public elementary schools, 1948–49, had an enrolment of 2,026,327 pupils; public high schools had 327,178 pupils compared with 163,185 in 1933–34. Average daily attendance in both types of school reached a new high in 1948–49 of 1,971,487. Instructional staff in Negro schools was 72,803.

Teachers' salaries are rising. In 1948–49 the average, by states, ranged from $1,356 per annum in Mississippi to $4,178 in California; the average for the country was $2,846 which was about that paid industrial workers. Eight states paid an average salary of less than $2,000; 16 states paid an average of $3,000 or more.

Forty-one of the 48 states require at least a bachelor's degree to secure a certificate to teach in secondary schools; 36 states require at least graduation from a normal school or 2 years of college work for elementary school teachers and 17 of these 36 require a bachelor's degree. To teach in cities, experience is considered important. All states have some legislation affecting teacher welfare; all states make provision for teacher retirement; a majority have minimum salary schedules and 19 have sick leave benefits.

Although the public schools are nominally under local control, the various state legislatures intervene from time to time. Twenty-six states require uniform textbooks, very often selected by a State Textbook Commission; under this plan each local unit has the advantage of having textbooks selected by a professional group, and buying in bulk appreciably lowers the cost. Local school authorities are free to purchase other textbooks to supplement those on the approved list. In most states free transportation is provided to and from school daily for pupils living at a distance. The legislatures of 46 states require that the schools give instruction on the Constitution of the U.S.; some states require in addition the teaching of the State Constitution and the history of the state. South Dakota and Washington provide that any teacher who speaks 'disrespectfully' of the Government or of the Federal Constitution shall be deprived of his or her teaching certificate. Tennessee, Mississippi and Arkansas forbid the teaching of evolution even in the state colleges; in Florida, Louisiana, Texas and Kentucky, under pressure from the churches, all references to evolution have been deleted from the textbooks.

In 26 states, the District of Columbia, Alaska, Hawaii and Puerto Rico,

the teachers in all public-supported schools are (1949) required to take an oath of allegiance or otherwise satisfy the authorities that they are loyal. California's law requires a pledge 'to teach by precept and example' undivided loyalty to the Government. Georgia bars the teaching of 'any theory of [illegible] economics or social relations which is inconsistent . . . with high ideals of Americanism.' Several states forbid teachers to be Communists; the Texas act requires the presidents of the 21 state-supported colleges to dismiss any teacher *or* student who is found to be a Communist. New York requires the Board of Regents to draw up a list of 'subversive organizations' membership of which will suffice to cause a teacher's dismissal. New Jersey and New Hampshire have similar acts [illegible] state and local employees.

[illegible] is secular, most state constitutions forbidding the appropriation of public moneys for the support of church-controlled schools. However, some states have required daily Bible-reading in the schools without denominational comment; on 9 March, 1948, the United States Supreme Court held that the holding of religious education classes in public school buildings during school hours is unconstitutional.

About one-tenth of the elementary and secondary school children attend non-public (private) schools; 90% of these schools are affiliated with religious denominations, the Roman Catholics having 80% of the non-public schools. Such schools are supported by church funds, by endowments, and by tuition fees. These schools generally parallel closely the work of the public schools and pupils may, and do, transfer freely between public and non-public schools. In 1947–48 the Roman Catholics maintained 8,289 elementary schools with 2,304,965 pupils, 2,150 secondary schools with 482,672 pupils, 239 colleges and normal schools with 295,478 students, and 243 seminaries with 23,928 seminarists studying for the priesthood.

In 1949 the United States had 1,781 English language daily newspapers with a circulation of 52,285,297 and 530 Sunday newspapers with a circulation of 50,311,509; 8,676 weeklies had a circulation of 13,643,465. There are 76 'chains' of newspapers with 375 daily newspapers, which control 53·8% of the total daily circulation; 14 newspaper owners control 25% of the total circulation, while fewer than 50 owners share nearly half the total Sunday circulation. In only 117 cities is there any competition between 2 or more daily papers; in 10 states no city has competing daily papers. About one-third of the radio stations are controlled by newspapers.

Motion-picture theatres increased from 17,003 (1940) to 18,351 in 1949, with seating capacity of 11,796,072.

Justice and Crime.

In the United States controversies may be decided in two systems of courts, the federal courts with jurisdiction confined to certain situations enumerated in Article III of the Constitution and the state courts with jurisdiction in all other situations. The federal courts alone have jurisdiction in criminal prosecutions for violation of federal statutes and in civil cases involving the government as plaintiff or defendant, and in bankruptcies, admiralty cases, certain suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the United States which reviews cases from the lower federal courts and certain cases from state courts involving questions of federal law. This court, consisting of 9 justices who receive salaries of $25,000 a year, meets from October until June every year and disposes of about 1,400 cases, of which over 200 are decided on their merits, and the remainder are dismissed on various grounds. Although cases *may* originate in the Supreme Court, only 3 cases have seen the inauguration of a fact-finding jury.

The U.S. Courts of Appeals number 11 (in 10 circuits composed of 3 or more states and one circuit for the District of Columbia); the 65 circuit judges receive $17,500 a year. A disappointed suitor in a lower federal court usually has a right of appeal to these courts which decide about 3,000 cases a year.

The trial courts are the U.S. district courts, of which there are 84 in the 48 states, one in the District of Columbia, and one each in Puerto Rico and Hawaii. Each state has at least one district court, and 2 states have 4 apiece. Each district court has from one to 16 judgeships depending upon the amount of its business. There are 215 district court judges ($15,000 a year) who decide over 50,000 civil cases and 35,000 criminal cases every year. The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. They may retire with full pay at the age of 70 years, if they have served a period of 10 years, but they are subject to call for such judicial duties as they are willing to undertake. Only 9 U.S. judges have, up to 1950, been impeached; only one of these was a Supreme Court judge.

Federal (and other) judges are liable for federal income tax, under a decision of the Supreme Court in 1938, which reversed several earlier decisions to the contrary. In another decision the Supreme Court held that no governmental employee, whether federal, state or local, was immune to taxation of a general character, no matter by whom imposed.

Of the 35,000 criminal cases in the federal courts in the year ending 30 June, 1950, about 10,000 involved alleged infractions of the immigration laws; 3,000, the transport of stolen motor vehicles; 9,000, fraud and other thefts; 3,500, liquor laws, and 1,600, narcotic laws. Federal prisoners in the year ending 30 June, 1949 (averaging 16,733) included 33 transgressors of war-time rationing and price-control laws and 51 conscientious objectors.

Persons convicted of federal crimes are either fined, released on probation under the supervision of probation officers of the federal courts, or confined in one of 6 federal penitentiaries, 3 prison camps, 5 reformatories, 9 correctional institutions, or 1 hospital.

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the courts of last resort as to the validity of treaties or of laws of the United States, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the

United States. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the state Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. Their salaries range from $4,200 to $30,000. The lowest courts are usually those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving usually not more than $300.

The Federal Bureau of Investigation estimates the number of major crimes in the United States and its possessions as follows :—

Offence	1948	1949
Murder and non-negligent manslaughter	7,620	6,990
Manslaughter by negligence	5,390	4,880
Rape	16,180	16,380
Robbery	54,990	59,120
Aggravated assault	77,310	78,860
Burglary—breaking or entering	377,640	409,400
Larceny—theft	978,000	1,024,520
Motor car theft	169,540	163,140
Total	1,686,670	1,763,290

In 1947, 152 prisoners were executed, 42 white persons and 110 Negroes. In 128 cases the death penalty was for murder, in 23 for rape and in 1 for burglary, in North Carolina. Executions occurred in 29 of the states and in the District of Columbia; North Carolina led with 22 executions (18 Negroes), followed by Georgia with 16 (12 Negroes), South Carolina, 13 (all Negroes), New York, 12 (8 Negroes), and Pennsylvania, 11 (6 Negroes).

According to the records of the Tuskegee Institute (coloured) there were 2 lynchings in 1950 (1 white in Alabama, 1 Negro in Georgia); 7 attempted lynchings (3 white, 4 Negroes) were prevented.

Health and Social Welfare.

Admission to the medical profession is controlled by examining boards in the various states. Number of physicians, 1950, 191,277 (1 to 800 inhabitants), but distribution is uneven; there were, 1947, 70 counties which had no physician; in 1948, out of 2,323 areas surveyed, 594 had no general hospital beds. This represents a population of 9,952,000, for which 33,805 beds are needed. Number of hospitals registered with the American Medical Association, 1 Jan., 1949, was 6,572 in continental United States, with 1,439,030 beds and 16,659,973 patients during the year; average daily census was 1,224,951. In addition there were 157 in overseas territories and U.S. Army commands abroad. Chief categories are general hospitals, 4,761; nervous and mental disease, 606; tuberculosis, 444; maternity, 102;

convalescent, 109. More hospital beds are occupied by mental patients than by all other types of patients combined. One person in about 9 became a hospital patient in 1948. Schools of nursing at the close of 1948 numbered 1,215, with 88,817 students; in 1949, there were an estimated 300,533 registered professional nurses available for duty. By closings and consolidations, medical schools have been deliberately reduced from 160 in 1904 to 78 in 1949 (including seven 2-year schools).

Social legislation fell largely within the province of the various states until the adoption of the Social Security Act of 14 August, 1935, which, as amended, provides for a Federal system of old-age and survivors' insurance; Federal-state unemployment insurance, and Federal grants to states for public assistance (old-age assistance, aid to dependent children, aid to the blind) and for maternal and child health and welfare services. Federal responsibility for all programmes except unemployment insurance is vested in the Social Security Administration. Responsibility for unemployment insurance was transferred to the Department of Labour in Aug., 1949.

All the states, Alaska, Hawaii and the District of Columbia have since 1935 established Old Age Assistance systems. The applicant must have reached 65 years of age. Average monthly assistance payments in the states for June, 1950, ranged from $20·49 (Alabama) to $70·68 (California); 2,790,068 persons were receiving old-age assistance, amounting to an average of $43·85 for that month. Some states require that the applicant shall be a citizen; most states require that the individual shall have resided in the state for a specified period, the maximum being 5 years in the past 9. A few states waive the requirement of residence.

The Old Age and Survivors' Insurance scheme, operated directly by the Federal Government, is financed by contributions from employers and employees of 1½% each on wages up to $3,000 a year. As at 30 June, 1950, approximately 40,000,000 wage-earners had acquired the fully insured status entitling them to payment of retirement benefits at 65; the families of these workers and of an additional 5,000,000 currently insured workers had survivor protection under the programme. On 30 June, 1950, 2,930,357 persons were drawing monthly benefits totalling $60,681,500 :—1,384,823 retired workers ($26·33 on the average); 419,123 aged wives of these workers ($13 93); 665,351 children of retired or deceased workers ($13 26 per child); 156,664 young widows with children ($21·20); 290,307 aged widows ($20·94) and 14,089 aged parents ($13·83). Lump sum death benefits (1949) totalled $32,200,000.

All the states, Alaska, Hawaii and the District of Columbia co-operate i[illegible] Compensation scheme; in the fiscal year 1949–50 [illegible] received $1,861,517,000 in benefits (benefits ranging from $13·77 per week of total unemployment in Florida to more than $25·25 in Alaska, with a national average of $20·86).

The 48 states, Alaska, Hawaii and the District of Columbia were furnishing aid in June, 1950, to 654,180 families with 1,659,655 needy dependent children (Nevada operating without federal participation) at the average rate of $70·37 per family that month. In aid to the blind 48 states, Hawaii and the District of Columbia were furnishing aid to 77,171 needy blind persons at the average rate of $47·52 per person that month. Missouri, Nevada and Pennsylvania aided an additional 18,247 blind persons under programmes administered without federal participation. Federal grants to states for public assistance in the year 1948–49 totalled $728,000,000; total expenditures, local, state and federal, reached $1,812,000,000. In June, 1950, 6,200,000 persons were in receipt of public aid; 4,500,000 of them under the Federal Social Security Act.

Finance.

Federal.

Since 10 June, 1921, a National Annual Budget System and an independent Audit of Government Accounts have been installed.

The following table gives net 'budget' receipts and expenditures of the Federal Government and receipts and expenditures of trust and related accounts. The 'budget' accounts comprise the general and special accounts and the checking accounts of government corporations, combined. 'Budget' receipts include such income as customs and internal revenue, repayment of foreign loans, and receipts from sale of government surplus property, but exclude postal revenues (except surplus receipts); 'budget' expenditures cover disbursements for general governmental activities, including departmental expenditures, national defence or war activities, foreign loans and grants, veterans' benefits, aids to agriculture, interest on public debt, etc.; they exclude postal expenditures, which are payable from postal revenues, except postal deficiencies. Debt transactions of the government are excluded from 'budget' transactions.

In general, 'trust' accounts relate to moneys received by the government, together with moneys transferred from [illegible] for the special benefit of individuals or [illegible] expenditures from 'trust' accounts are net expenditures from special deposit accounts; and, when the Treasurer of the United States serves as fiscal agent, expenditures for redemption (less receipts from sale) of securities of government corporations and enterprises, in the market, net.

Year ending 30 June	Budgetary receipts and expenditures (net)[1] (millions of dollars)		Trust accounts, etc. (millions of dollars)			
			Receipts	Expenditures		
	Receipts [2]	Expenditures		Investments	Other [2]	Total
1941	7,227	13,387	2,665	1,338	419	1,757
1943	22,202	79,622	3,954	3,004	1,287	4,293
1945	44,762	98,703	7,086	5,200	1,094	6,294
1947	40,043	39,289	6,244	3,362	3,985	7,347

1949	38,246	40,057	5,714	2,311	3,898	6,209
1950	37,045	40,167	6,669	−402	6,971	6,570

[1] Budgetary receipts and expenditures, beginning 1943, differ from previously published figures in that receipts and expenditures are both reduced by the exclusion of (1) refunds of receipts and (2) payments to the Treasury principally by wholly-owned Government corporations, for retirement of capital stock and for disposition of earnings. These changes are without effect upon the budget surplus or deficit.

[2] Excludes net transfers of social security employment taxes of Federal Old-Age and Survivors Insurance Trust Fund as follows (in millions of dollars): fiscal year 1941, 688; 1943, 1,130; 1945, 1,310; 1946, 1,238; 1947, 1,459; 1948, 1,616; 1949, 1,690. Such transfers are also excluded from budgetary expenditures.

[3] Includes redemption or sale (−) of obligations of Government corporations, etc., in the market (net), in millions of dollars: fiscal year 1941, −852; 1943, 694; 1945, 1,553; 1946 95; 1947, 359; 1948, −107; 1949, 74.

Actual sources of revenue and branches of expenditure for year ended 30 June, 1950 (in thousands of dollars) were :—

Revenue, 1949–50

[1] Excess of receipts over expenditures.

Note.—Estimates contained in this budget review reflect the newly introduced practice of excluding from budget receipts and expenditures payments into the Treasury by wholly-owned Government corporations for retirement of capital stock or for dividends.

Of the *estimated* 1952 budget, 57·8% is assigned to military services; 10·4% to international security and foreign relations; 6·8% to war veterans' benefits; 8·2% to interest on the national debt; leaving $11·9 milliard (billion) or 16·8% to all the remaining activities.

Total Lend-Lease aid to the War Allies from its inception, 16 March, 1941, down to 31 March, 1947, was $50,377,618,000, while Reverse Lend-Lease was $7,819,323,000. For details, by countries, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 501.

From 30 June, 1945, to 30 June, 1950, the United States extended to foreign countries gross foreign aid, in the form of grants and credits, totalling $28,055 million (£10,019,608,000 (at $2·80 = £1)); it received collections on principal and reverse grants and returns on grants totalling $2,091 million (£746,732,000); hence net foreign aid totalled $25,964 million (£9,272,876,000). If subscriptions to the International Monetary Fund and the Bank for Reconstruction and Development, amounting to $3,385 million, be added, the net total is $29,349 million (£10,481,805,000).

Expenditures for 'international finance and aid,' fiscal year 1950, were

(in millions of dollars) :—Export-Import bank, 45; Greek–Turkish aid, 121; government and relief in occupied areas, 753; mutual defence assistance, 44; Economic Co-operation Administration, 3,523; other foreign aid, 111; total (net), 4,598.

The gross debt on 30 June, 1950, was (in millions of dollars) 257,357, made up as follows :—Debt bearing no interest, 1,883 (chiefly 1,270 million loaned to International Monetary Fund); matured debt on which interest has ceased, 265, and interest-bearing debt, 255,209 plus 17 of obligations of governmental corporations and credit agencies guaranteed by the U.S. Government as to principal and interest.

National direct debt excluding guaranteed obligations (in thousands of dollars), and *per capita* debt (in dollars) on 30 June of the years shown :—

Year	Gross debt	*Per capita* [2]	Year	Gross debt	*Per capita* [2]
1919 [1]	25,482,034	242·54	1945	258,682,187	1,853·21
1920	24,299,321	228·23	1947	258,286,383	1,793·23
1930 [1]	16,185,310	131·51	1948	252,292,246	1,721·30
1935	28,700,893	225·55	1949	252,770,360	1,694·00
1940	42,967,531	325·59	1950 [3]	257,357,352	1,696·11

[1] On 31 Aug., 1919, gross debt reached its World War I (1914–18) peak of $26,596,702,000, which was the highest ever reached up to 1934, on 31 Dec., 1930, it had declined to $16,026 million, the lowest it has been since the World War I. On 30 Nov., 1941, just preceeding Pearl Harbour, debt stood at $55,039,820,000. The highest World War II debt was $279,213,559,000 on 28 Feb., 1946.

[2] *Per capita* figures, beginning with 1940, have been revised; they are based on the Census Bureau's estimates of the total population of Continental United States, including armed forces overseas.

[3] Preliminary.

The statutory debt limit was reduced on 26 June, 1946, from $300 milliard to $275 milliard.

State and Local Finance.

Revenue of the 48 states and all local governments (about 150,000) amounted to $19,731 million in fiscal 1949, equalling $132·23 *per capita*, or 35% of the net federal–state–local total. Taxes provided $15,776 million (80%), fiscal aid from the federal government $1,800 million (9·1%) and charges and miscellaneous sources $2,155 million (10·9%). Of all state and local tax revenue in 1949, property taxes (mainly imposed by local governments) provided $45·83 *per capita*, sales taxes—general and selective, including those on motor fuel and liquor—$32·34 *per capita*, and all other state and local taxes together, $27·55 *per capita*.

State tax revenue totalled $8,349 million in fiscal year 1949, and $8,967 million in fiscal year 1950. Largest sources of state tax revenue are general sales taxes (imposed during 1950 by 28 states), motor fuel sales taxes (48 states), pay roll taxes for unemployment compensation (48 states), motor vehicle and operators' licenses (48 states), corporation income (33 states), individual income (31 states), tobacco products (40 states) and alcoholic beverage sales taxes (48 states).

Revenue of local units in fiscal year 1949 totalled $12,453 million including $3,749 million of aid from states and the federal government. Property taxes provided 52·7% of all local government revenue, other taxes 6·9%, fiscal aid 30·1% and miscellaneous sources 10·3%.

Gross debt of state and local governments totalled $20,875 million or

$140 *per capita* on 30 June, 1949. Cities accounted for nearly half of this total, states for nearly one-fifth, the remainder representing special districts, counties, school districts and townships. This 1949 total was a new high, representing an increase of about one-fourth in 1946 to 1949.

State and local pay rolls totalled $882,700,000 in May, 1950, for employment of 4,247,000 persons, of whom 3,405,000 were employed full-time.

National Defence.

The President is Commander-in-Chief of the Army, Navy and Air Force.

The National Security Act of 1947 provides for the unification of the Army, Navy and Air Forces under a single Secretary of National Defence with cabinet rank. The President is also advised by a National Security Council and a National Security Resources Board. The establishment consists of the Department of the Army, the Department of the Navy and the Department of the Air Force, each with a civilian head (not of cabinet rank) appointed by the President with the approval of the Senate. The Act provides for a War Council, Joint Chiefs of Staff, Research and Development Board, and a Munitions Board.

The following changes in titles have become effective (previous title in brackets) :—Department of the Army (War Department); Department of the Air Force, United States Air Force (Army Air Forces); Secretary of the Army (Secretary of War); Under Secretary of the Army (Under Secretary of War); Assistant Secretary of the Army (Assistant Secretary of War); Chief of Staff, United States Army (Chief of Staff); General Staff, United States Army (War Department General Staff); Special Staff, United States Army (War Department Special Staff). The Office of Assistant Secretary of War for Air has been abolished.

I. Army.

Secretary of the Army.—Frank Pace, Jr. (appointed 12 April, 1950). The Secretary of the Army controls the Army, and is aided by the Under Secretary of the Army, two Assistant Secretaries of the Army (procurement of supplies, research and development; generally administrative and specially delegated duties), and by the Chief of Staff, U.S. Army.

The Secretary of the Army is responsible for the personnel, training, operations, administration, logistical support and maintenance, welfare, preparedness, and effectiveness of the Army, including research and development, and for the mobilization of materials and industrial organizations essential to wartime needs of the Army.

The Chief of Staff is appointed by the President, with the consent of the Senate. He has supervision of all members and organizations of the Army. He presides over the Army Staff and is directly responsible to the Secretary of the Army for the efficiency of the Army, its state of preparation for military operations, and plans therefor. He transmits to the Secretary of the Army the plans and recommendations of the Army Staff, advises him in regard thereto, and, upon the approval of such plans or recommendations by the Secretary of the Army, acts as the agent of the Secretary of the Army in carrying the same into effect. He is assisted by the Vice-Chief of Staff, the Deputy Chiefs of Staff, and the Assistant Chiefs of Staff.

The Army consists of the Regular Army, the National Guard while in the Service of the United States and the Organized Reserve Corps, and includes

persons recruited into the land forces of the United States under the Selective Service Extension Act, approved 30 June, 1950. Recruitment under this act started in Sept., 1950.

Under legislation, approved 28 June, 1947, enlistments are authorized, at the option of the person enlisting, for periods of 3, 4, 5 or 6 years.

The strength of the Army on 31 May, 1950, was 593,526; a total of 240,278 were serving outside the continental United States. By the end of 1951, the strength of the Army, including the Federalized divisions of the National Guard, will be raised to about 1,750,000 men.

The Office, Chief, Army Field Forces, is located at Fort Monroe, Virginia, and is charged with the direction, supervision, co-ordination and inspection of all matters related to training of individuals and units (including Reserve and National Guard) utilized by the Army in the field.

Six Army Areas, the Military Dis[illegible] and necessary overseas commands exercise command [illegible]rations, administration, training and supply of units and installations within their boundaries. The six Army Areas have headquarters at Governor's Island, New York City, New York; Fort George G. Meade, Maryland; Fort McPherson, Atlanta, Georgia; Fort Sam Houston, San Antonio, Texas; Chicago, Illinois; and the Presidio of San Francisco, California.

The Army Comptroller, whose office was established on 2 Jan., 1948, and renamed the 'Office, Comptroller of the Army' on 15 Oct., 1949, serves as the Budget Officer, Fiscal Director and Management Engineer for the Department of the Army. He is responsible for all budgeting, accounting, progress and statistical reporting, and internal audit in the Army Establishment.

The General Staff, United States Army, plans, directs, co-ordinates and supervises the management of the Army. The Special Staff deals with special subjects such as legislation, education and history. The Administrative Services comprise the Adjutant General, the Chief of Chaplains, and the Provost Marshal General. The Technical Staffs and Services are the Chief Chemical Officer, the Surgeon General, Chief of Engineers, the Quartermaster General, Chief Signal Officer, Chief of Ordnance and Chief of Transportation.

Basic units of Army field forces are Infantry, Airborne and Armoured Divisions. The Infantry and Armoured Divisions contain 3 regiments or combat commands, 3 battalions of 105 mm. howitzers, one battalion of 155 mm. howitzers, one battalion of 40 mm. and ·50 caliber anti-aircraft artillery automatic weapons, and necessary supporting troops integrated within the divisions. All divisions contain tanks mounting 76 mm. guns or 90 mm. guns.

Rifles, automatic rifles, carbines, machine guns, sub-machine guns, light and heavy mortars, rocket launchers and recoilless rifles increase the fire power of the new division. Anti-aircraft artillery is now equipped with improved radar.

Tanks have become faster, more manœuvrable, have more fire power and more resistance to enemy attack and enemy fire. The M46 with a 90 mm. gun is being improved automotively to provide a standard medium tank superior to the old M26 and M4 series. The standard light tank is the M24 mounting a 75 mm. gun. The light tank, in conjunction with fully armoured personnel carriers, will be used in reconnaissance and security missions.

The manually operated Springfield rifle, calibre ·30, has been replaced by a semi-automatic rifle, the U.S. calibre ·30 M1. Machine guns of both

·30 and ·50 calibres are of the Browning type. The approved calibres of mobile artillery are as follows :—

For the pack	.	75 mm. pack howitzer,
for the light	.	105 mm. howitzer, and 4·5 in. rockets,
for the medium	.	155 mm. howitzer,
for the heavy	.	240 mm. howitzer, 155 mm. gun, 8 in. gun and 8 in. howitzer.

Automatic weapons are of 40 mm., 90 mm. and 120 mm. calibres; machine guns are of ·50 and ·30 calibre.

The Army is working with radar in the detection and tracking of guided missiles and has also set up a Guided Missiles Regiment for training in the employment of rockets and guided missiles.

Women volunteers were first organized in a Women's Army Auxiliary Corps, which on 1 Sept., 1943, became the Women's Army Corps, and was made a permanent component of the Army in June, 1948.

The Army National Guard is a Federally supervised civilian force, recruited and housed by the several states, the District of Columbia and the Territories of Alaska, Hawaii and Puerto Rico. The members are equipped, paid and recognized by the Federal Government. All training is supervised by the Federal Government with instructors furnished by the Regular Army. Standards of physical fitness, intelligence and military aptitudes are those of the Regular Army, as are equipment, methods of training and organization. The Guard is subject to the call of the President during National Emergency, and to the call of the Governor of each State when needed in time of local disaster or emergency. By Feb., 1951, 6 of the 27 National Guard divisions had been called into Federal service.

II. Navy.

Secretary of the Navy.—Francis P. Matthews (appointed 25 May, 1949).

The affairs of the Navy Department are directed by the Secretary of the Navy, who has as his principal advisers the Under Secretary of the Navy, the Assistant Secretary of the Navy, the Assistant Secretary of the Navy (Air), the Chief of Naval Operations, the Chiefs of the seven bureaus, the Judge-Advocate-General of the Navy, the Chairman of the General Board, the Director of Budget and Reports, and the Commandant, United States Marine Corps.

The principal divisions of the Department are as follows :—Executive Office of the Secretary, Office of Chief of Naval Operations, Bureau of Yards and Docks, Bureau of Naval Personnel, Bureau of Ordnance, Bureau of Ships, Bureau of Supplies and Accounts, Bureau of Medicine and Surgery, Bureau of Aeronautics and Headquarters United States Marine Corps.

There are 14 Naval Districts and 2 River Naval Commands (Potomac and Severn).

The U.S. Navy has 11 shipyards, 21 stations, 5 training centres, 55 air stations, 2 amphibious bases and 3 submarine bases. Under an agreement with the British Government dated 2 Sept., 1940, leases were granted for naval and air bases in Newfoundland, Bermuda, the Bahamas, Jamaica, St. Lucia, Trinidad, Antigua and British Guiana.

The gross naval expenditures (actual or budgeted) have recently been as follows: 1945–46, $15,164,000,000; 1946–47, $5,597,000,000; 1947–48,

$3,268,766,100; 1948–49, $3,686,733,250; 1949–50, $4,600,000,000; 1950–51, $4,168,000,000.

The total personnel on duty on 1 Feb., 1951, was 458,052 officers and men, including the Marine Corps, which numbered 72,098. The Air Service is an integral part of the Fleet.

On 1 Feb., 1950, 25 fleet and 62 escort carriers, 14 battleships, 18 heavy and 40 light cruisers, 212 destroyers, 233 destroyer-escorts and 117 submarines were laid up in the inactive reserve.

The following is a classified statement of United States vessels existing on 31 Dec. of the years named :—

Types	1944	1945	1946	1947	1948	1949	1950
Fleet aircraft carriers	24	31	35	37	37	37	37
Escort aircraft carriers	65	79	72	66	66	66	66
Battleships	23	23	21	19	15	15	15
Large cruisers	2	2	2	2	2	2	2
Heavy cruisers	17	24	28	28	27	29	25
Light cruisers	42	45	46	46	47	48	44
Destroyers	370	355	378	361	352	351	351
Submarines	236	209	208	203	192	191	187

The following table shows the principal ships of the United States Navy, including all ships expected to be retained that were completed or laid down up to 1 April, 1951 (in the armament column, guns of less than 3-inch calibre are not given) :—

Completed	Name	Standard displacement	Armour		Principal armament	Shaft horse-power	Designed speed
			Belt	Big guns			
Fleet Aircraft Carriers							
		Tons	ins.	ins.			knots
1947	Coral Sea	45,000	—	—	14 5-in. (137 aircraft)	200,000	33
1945	F. D. Roosevelt						
1945	Midway						
1942–50	Essex Class	30,800	3	—	12 5-in. (82 aircraft)	150,000	33
1947	Wright	14,500	4	—	Light A.A. (48 aircraft)	120,000	33
1946	Saipan						
1943	Bataan	11,000	3	—	Light A.A. (45 aircraft)	100,000	32
	Belleau Wood						
	Cabot						
	Cowpens						
	Langley[1]						
	Monterey						
	San Jacinto						
1938	Enterprise	19,800	4	—	8 5-in. (81 aircraft)	120,000	34

The *Essex* class consists, in addition to the name ship, of :—Yorktown, Intrepid, Hornet, Franklin, Lexington, Bunker Hill, Wasp, [illegible] Randolph, Bennington, Bon Homme Richard, St. [illegible] Tarawa, [illegible] Kearsarge, Lake Champlain, Leyte, Philippine [illegible], Valley Forge, Oriskany.

[1] To be transferred to the French Navy.

Completed	Name	Standard displacement	Armour		Principal armament	Shaft horse-power	Designed speed
			Belt	Big guns			
		Battleships

1942	San Diego, San Juan						
1938	Savannah, Brooklyn [1], Philadelphia [2], Honolulu	9,700 / 9,650	4	3–5	15 6-in.; 8 5-in.	100,000	32·5

[1] To be transferred to the Chilean Navy. [2] To be transferred to the Brazilian Navy.

Other vessels may be summarized. There are 66 escort aircraft carriers, 351 destroyers, 187 submarines, 244 destroyer-escorts, 217 minelayers and minesweepers, 176 patrol vessels, 945 amphibious craft, 553 fleet auxiliaries, 1,724 service craft, and 74 dry docks. The United States Fleet thus consists of a total of 4,660 naval vessels, of which 2,150 are in actual service, the remaining 2,510 ships being in reserve.

The United State Coast Guard operates under the Treasury Department in time of peace and as a part of the Navy in time of war. Its peace-time duties embrac[illegible]w enforcement upon the sea and navigable waters of the [illegible]. the maintenance of navigational aids and the saving of life and property. Its military personnel at the end of 1950 comprised 19,000 officers and men,. An Academy is maintained for the education of cadets for careers as commissioned officers.

III. Air Force.

Secretary of the Air Force.—Thomas Finletter (appointed April, 1950).

The responsibility for land-based air power is delegated to the independent Department of the Air Force. The Department of the Navy will retain operational control of carrier-borne and anti-submarine reconnaissance aircraft, together with land-based aircraft organic in their operations. Similarly, the Department of the Army, will exercise control of a limited number of liaison and tactical aircraft as may be organic therein.

The Department of the Air Force is headed by a Secretary of the Air Force, assisted by an Under Secretary of the Air Force and two Assistant Secretaries of the Air Force. The Air Force includes all headquarters, forces, reserves, installations, activities and functions under the control or supervision of the Department of the Air Force.

Post-war requirements of the United States Air Force are being considered in the light of the situation created by the Korean war and new technological developments such as jet propulsion, with particular emphasis upon the potentialities of guided missiles; discussions with other North and

South American Nations with a view toward mutual hemispheric defence, and the decisions of the United Nations relative to the establishment of an International Air Force.

On 1 July, 1950, a total of 411,277 personnel were assigned to duty with the U.S. Air Force, including 2,092 warrant officers and 54,914 commissioned officers. Of the total personnel, 93,461 were assigned to duty beyond the continental limits of the United States. The civilian component branches of the U.S. Air Force include the Air Reserve (354,000 officers and airmen), the Air National Guard (45,000 officers and airmen) and the Air Force Reserve Officers Training Corps (54,000 basic advanced cadets).

Aircraft strength on 1 July, 1950, was 16,900 planes, of which 8,700 were active. Of these, 3,200 were first-line combat types. In addition, aircraft of the Air National Guard totalled 2,700, of the Air Force Reserve, 900, and Civil Air Patrol, 300, for a combined total of 20,800.

The subordinate commands are as follows: (*Continental*) Strategic Air Command; Continental Air Command (Reserve affairs and training); Air Defence; Tactical Air Command; Air Matériel; Air Training; Air University; Air Proving Ground; Air Research and Development; Special Weapons; Headquarters Command and Military Air Transport Service (joint activity with U.S. Navy). (*Overseas*) United States Air Forces in Europe, Far East Air Forces, Alaskan Air Command, Caribbean Air Command.

Production and Industry.

In 1940 those gainfully employed (not on public emergency work) were listed in the following general divisions of industry :—

Industry	Male	Female	Total
Employed (except on public emergency work) .	34,027,905	11,138,178	45,166,083
Agriculture, forestry and fishing . . .	7,988,343	487,089	8,475,432
Mining	902,061	10,939	913,000
Construction	2,022,032	34,242	2,056,274
Manufacturing	8,250,590	2,322,252	10,572,842
Transport, communication and other public utilities	2,768,267	345,086	3,113,353
Wholesale and retail trade	5,509,228	2,029,540	7,538,768
Finance, insurance and real estate . .	1,013,297	454,300	1,467,597
Business and repair services	787,377	76,877	864,254
Personal services	1,133,555	2,875,762	4,009,317
Amusement, recreation and related services .	316,063	79,279	395,342
Professional and related services . . .	1,472,453	1,845,128	3,317,581
Government	1,414,069	339,418	1,753,487
Industry not reported	450,570	238,266	688,836

Estimated number of women gainfully employed in Sept., 1950, was 17,982,000, of whom 16,538,000 were in non-agricultural industries.

I. Agriculture.

Since the First World War agriculture has been profoundly affected first by the general cumulative loss of fertility of land (a loss estimated at between 40% and 50% of the original fertility); secondly, soil erosion due to wind or water (top soil has diminished from 9 in. to an average of 6 in.); thirdly, about three-fourths of the grazing land is suffering from past or present overstocking; fourthly, the growth of large-scale 'commercial' farms, highly mechanized and using, instead of permanent hired workers, armies of migratory workers hired usually from contractors.

Nevertheless there has been a phenomenal increase in total farm output due to a higher degree of mechanization; greater use of lime and fertiliser, cover crops and other conservation practices; improved varieties such as hybrid maize and Clinton oats; a better balanced feeding of livestock, and more effective control of insects and disease. Since 1910 farm output has increased by more than two-thirds and since 1942 it has run 25% or more above the average for 1935–39. But some of the recent gains have been obtained by decreasing the soil fertility reserve.

A survey (in the 1930s) by the Soil Conservation Service of the Department of Agriculture revealed that some 282,000,000 acres of all kinds of land—cropland, rangeland, pastures, woodlands, etc.—had been so severely damaged by soil erosion that their further use for crop production or grazing would be unprofitable, and an additional 775,000,000 acres were found to be so damaged as to require immediate erosion-control measures to ensure continued productivity. There remained approximately 460,000,000 acres of good cropland of which about 70,000,000 acres needs to be cleared, drained, irrigated or otherwise improved before it can be tilled and planted, and another 70,000,000 acres, currently in cultivation, which should be converted to grass or trees because it is too steep, too shallow or too erodible for further cultivation. All but about 80 to 100 million acres of good cropland is subject to soil erosion if not safeguarded within the next 20 years.

By 30 June, 1950, about 18·6% of the soil conservation job had been completed. More than 100,000,000 acres of farm land had been completely treated with the needed conservation practices, and soil conservation programmes were being carried out by nearly 670,000 farmers and ranchers operating 185,000,000 acres. Detailed soil conservation surveys preliminary to farm planning had been made on 304,000,000 acres in farms and ranches, and definite conservation farm plans had been completed for 780,473 farms and ranches covering about 217,994,000 acres. Higher per-acre yields, even for the semi-arid grazing lands of the Western cattle industry, have been reported wherever the new practices have been established. Soil conservation districts, 30 June, 1950, numbered 2,285, covering 1,253,484,000 acres; of these, 841,871,000 acres were in 4,771,635 farms and ranches.

Farms are divided into three broad groups:—(1) Large-scale, highly mechanized farms, which use considerable hired labour and with income per farm (1945 census) of $20,000 or more, make up slightly less than 2% of all farms and account for more than 20% of total production; (2) commercial family farms, approximately 55% of all farms, account for 70% of production, and range from $1,200 to $20,000 in value of products reported, and (3) about 2½ million small-scale farms with reported incomes of less than $1,200, which contribute less than 8% of the total value of production.

Total area of farm land under irrigation in 1944 was 20,539,470 acres (288,195 farms), of which the Rocky Mountain states had 10,703,164 acres, the Pacific states 6,602,031 acres, the West South Central states 2,146,737 acres. With the available water supplies about 23,000,000 more acres could be irrigated.

According to census returns the total acreage of farms and the improved acreage have been as follows :—

Years	Farm area. Acres	Improved area. Acres [1]	Value, land, bldgs., mach'y, livestock	Value of products in preceding year [2]
			Dollars	Dollars
1910	878,798,325	478,451,750	40,837,695,622	8,494,230,307
1930	986,771,016	522,395,804	56,960,093,028	11,011,329,335
1940	1,060,852,374	530.131,043	41,227,849,287	7,813,644,567
1945	1,141,615,364	512,000,000	60,008,207,993	18,108,132,494

[1] Land available for crops (harvested, failure idle, fallow, plus ploughable pasture).
[2] Value of all farm products sold, traded or used by farm households.

By 1945 the number of farms had declined in 15 years by 589,000 (9%) to 5,859,169, but farm acreage rose by 19% to 1,141,615,364 acres, and the size of the average farm rose by 32·0% from 148·0 acres to 194·8.

According to census returns the numbers of farms by size groups were :—

Census year	Acreage size group (in thousands.)							
	Total	Under 10	10–19	20–29	100–259	260–499	500–999	1,000 and over
1920	6,448	289	508	2,978	1,980	476	150	67
1930	6,289	359	560	2,815	1,863	451	160	81
1940	6,097	506	559	2,512	1,796	459	164	101
1945	5,859	594	526	2,286	1,693	473	174	113

In 1945, 3,301,361 farms were operated by full owners, 660,502 by part owners, 38,885 by managers, and 1,858,421 by tenants. Farm tenancy has fluctuated; in 1880 only 25% of all farmers were tenants; in 1930, 42·2%; in 1940, 38·7%; in 1945, 31·7% (lowest since before 1900). Farm population on 1 January, 1920, 31,614,269; 1930, 30.169,000; 1940, 30,269,011; 1949, 27,776,000. On 1 Aug., 1949, hired farm workers numbered 3,629,000 and farm family workers, including operators, 8,387,000. Migratory farm workers, travelling from state to state, numbered about 600,000 in 1946; accompanied by their families, they constituted a labour force, including children, of about 1,000,000. Twenty-three states specifically exclude farm child labour from labour legislation so that the children of migratory workers are free to work; only 3 states have laws regulating the labour of children in agriculture. The 1940 and 1945 census showed that agriculture had 17·6% of all 10 years of age or older who were gainfully employed; in 1930, 21·4%; in 1920, 27%; in 1900, 37·5%; in 1870, 53%.

Cash receipts from farm marketings and government payments (in million dollars) :—

	Crops	Livestock and livestock products	Government payments	Total
1932	1,997	2,750	—	4,747
1945	9,538	11,982	769	22,289
1947	13,504	16,510	314	30,328
1948	13,485	17,060	257	30,802
1949	12,566	14,951	185	27,703

Federal income tax paid by farm operators was $15 million in 1940, $960 million in 1947 and 1948, and $791 million in 1949 (largely reflecting liability growing out of income received in 1948).

The areas and production of the principal crops for 2 years and the average for 10 years, 1938–47, were :—

Crops	Average, 1938-47			1948			1949		
	1,000 acres	1,000 bush.	Bush. per acre	1,000 acres	1,000 bush.	Bush. per acre	1,000 acres	1,000 bush.	Bush. per acre
Corn (all)	88,617	2,787,628	31·4	86,067	3,681,793	42·8	86,735	3,377,790	38·9
Wheat (all)	59,854	991,950	16 6	73,017	1,313,534	18·0	76,751	1,146,463	14 9
Oats	38,347	1,234,082	32·1	40,198	1,493,304	37 1	40,560	1,322 924	32·6

Barley	12,720	304,741	24·0	11,987	315,894	26·4	9,879	238,104	24·1
Soybeans	8,025	148,381	18·7	10,430	223,006	21·4	9,912	222,305	22·4
Flaxseed	3,248	30,102	9 2	4,859	54,529	11·2	4,880	43,661	8·9
Rice	1,357	62,944	46 6	1,781	85,056	47·8	1,821	89,141	49 0
Potatoes	2,730	393,403	145 5	2,109	454,654	215·5	1,901	401,962	211·4
Sweet potatoes	711	63,626	89·7	515	50,204	97·4	542	54,232	100·1

Indicated production figures for 1950 (in thousands of bushels) are :—All corn, 3,131 000; oats, 1,465,134; all wheat, 1,027,000; potatoes, 439,500; barley, 301,009; soybeans, 287,010; sweet potatoes, 58,729; flaxseed, 39,263; rye, 22,977; rice, 37,971,000 lb.; cotton, 15,500,000 bales.

The chief wheat-growing states (1949) were (yield in thousands of bushels) :—Kansas, yielding, 164,208; North Dakota, 111,439; Texas, 102,848; Oklahoma, 88,725; Montana, 64,080; Ohio, 60,002; Washington, 57,511; Nebraska, 54,408; Colorado, 49,551; Illinois, 49,379; Indiana, 39,532; Idaho, 38,106; Missouri, 35,028; Michigan, 35,019; South Dakota, 34,276.

In 1949, output of tame hay was 99,305,000 tons from 72,835,000 acres; of alfalfa, 38,546,000 tons from 17,288,000 acres.

Sugar cane in 1949 amounted to 7,323,000 short tons, with sugar output of 502,000 short tons. The sugar beet production in 1949 was 10,168,000 short tons, producing 1,279,000 short tons of sugar.

Cotton acreage and production (excluding 'linters') were :—

Years	Acres harvested	1,000 bales (500 lb. gross)	Years	Acres harvested	1,000 bales (500 lb. gross)
1926–30 [1]	42,212,000	14,834	1947	21,148,000	11,694
1940	23,861,000	12,566	1948	22,821,000	14,877
1946	17,615,000	8,640	1949	26,898,000	16,034

[1] Period of maximum acreage.

Cotton production is moving west of the Mississippi River with, in 1949, the 4 states of Texas, New Mexico, Arizona and California furnishing nearly half of the crop of 16,034,000 bales. Cotton production in 1949 was grown mainly in the following states (in thousands of bales, 500 lb. gross) :—Texas, 5,900; Arkansas, 1,600; Mississippi, 1,490; California, 1,300; Alabama, 865; Louisiana, 650; Tennessee, 650; Oklahoma, 620; Georgia, 510; South Carolina, 560; Arizona, 500; North Carolina, 460; Missouri, 460; New Mexico, 255.

In 1949 tobacco output was 1,990,129,000 lb. from 1,626,300 acres

compared with the 10-year average, 1938–47, of 1,718,375,000 lb. from 1,654,210 acres. Yield per acre has risen from 972 lb. in 1936–45 to 1,224 lb. in 1949. Output of the chief tobacco-growing states, over the 10-year period, 1938–47, and in 1949, was (in 1,000 lb.):—

State	Average 1938–47	1949	State	Average 1938–47	1949
North Carolina .	685,066	745,120	Ohio . .	24,165	29,220
Kentucky . .	368,552	445,775	Connecticut .	22,555	25,464
Virginia . .	128,170	137,262	Florida . .	19,045	25,061
Tennessee . .	119,098	148,512	Indiana . .	10,957	15,720
South Carolina .	117,124	147,630	Massachusetts .	9,423	12,624
[illegible] .	88,358	116,590	Missouri . .	6,109	5,980
[illegible] .	48,934	57,190	West Virginia .	2,853	4,620
Wisconsin . .	33,653	30,266	New York. .	1,215	650
Maryland . .	31,551	41,000	Minnesota .	738	540

The following table exhibits the number of farm animals (in thousands) on farms on 1 Jan., 1930, 1940, 1945, 1949 (revised) and 1950 (preliminary):—

Livestock	1930	1940	1945	1949	1950
Horses	13,742	10,444	8,715	5,898	5,310
Mules	5,382	4,034	3,235	2,348	2,153
Cattle of all kinds . .	61,003	68,309	85,573	78,298	80,277
Milch cows	23,032	24,940	27,770	24,416	24,625
Sheep (all)	45,577	42,666	46,520	31,654	30,797
Swine	55,705	61,165	59,331	57,128	60,424

Total value of all farm animals on farms in the United States on 1 January was, for 1930, $6,061,330,000; for 1933 (low point of the agricultural [illegible] $2,772,136,000; average for 1937–46, $7,080,209,000; for 1947, $11,97[illegible],636,000; for 1948, $13,384,000,000; for 1949, $14,697,000,000.

Milk production, 1949. 119,136 million lb.; average for 10 years, 1938–47, 115,231 million lb. In 1948, 1,513 million lb. of farm and factory butter, 1,097 million lb. of all cheese, and 3,831 million lb. of condensed and evaporated milk were produced.

There were 1 Jan., 1949, 448,838,000 chickens on farms; production of eggs in 1949 was 56,362 million; average for 1938–47, 55,954 million.

In 1948 the production of shorn and pulled wool was 280·5 million lb. from 29,060,000 sheep; in 1937–46, 419,134,000 lb. from 44,226,000 sheep.

II. Forests and Forestry.

The United States forest lands, capable of producing timber for commercial use, cover 461,044,000 acres (about one-fourth of the land area), classified as follows:—Saw-timber areas, 205,176,000 acres; pole timber

areas, 95,013,000 acres; seedling and sapling areas, 85,552,000 acres; poorly stocked and denuded areas, 75,303,000 acres. Ownership of commercial forest land is distributed as follows:—Federal government, 88,957,000 acres; state, county and municipal, 27,114,000 acres; privately owned, 344,973,000 acres, including 139,058,000 acres on farms. Of the saw-timber stand (1,600,972 million board feet) Douglas fir constitutes 26·9%; Western yellow (ponderosa) pine, 11·6%; Southern yellow pine, 11·8%; other softwoods, 30·7%; hardwoods, 19·0%. Normal annual cut and destruction is 13,661 million cubic feet, against an annual growth of about 13,370 million cubic feet. In saw-timber sizes, annual drain is at the rate of 53,900 million board feet against an annual growth of only 35,300 million board feet. The net area of the 152 national forests and other areas in United States, Alaska and Puerto Rico administered by the U.S. Forest Service, including commercial and non-commercial forest land, was on 30 June, 1949, 180 million acres.

Fire takes a heavy annual toll in the forests; total area burned over in 1949 was 15·4 million acres, of which 85% was unprotected land; 87% (348 million acres) of total forest area is now under organized fire protection service. About 520,000 acres were planted with trees in 1940; in 1949, 348,000 acres.

III. Mining.

Production statistics of metallic minerals in continental United States for 2 years (long tons, 2,240 lb.; short tons, 2,000 lb.):—

Metallic minerals	1948		1949	
	Quantity	Value	Quantity	Value
		Dollars		Dollars
Bauxite (dried equiv.), long tons	1,457,148	8,696,708	1,148,792	6,778,181
Copper (mine output), short tons	834,797	362,301,898	752,746	296,581,924
Gold (mine output), troy oz.	1,765,862	61,805,170	1,762,367	61,682 845
Iron ore (usable),[1] long tons	100,274,965	391,229,884	84,174,399	377,637,131
Lead (mine output), short tons	390,147	139,672,626	409,857	129,514,812
Molybdenum, lb.	29,669,000	20,418,000	23,280,000	19,332,000
Silver (mine output), troy oz.	38,028,690	34,417,884	34,638,896	31,349,949
Zinc (mine output), short tons	629,955	167,973,567	593,201	148,912,878
Other metals	—	32,484,263	—	29,210,280
Total metals.	—	1,219,000,000	—	1,101,000,000

[1] Excluding by-product iron sinter.

Preliminary 1950 figures for outputs (in short tons except where otherwise indicated) are:—Iron ore, 98,000,000; silver, 41,500,000 troy oz.; gold, 2,100,000 troy oz.; copper, 903,000; refined lead, 427,000; zinc, 615,000; bauxite, 1,320,000; quicksilver, 4,200 flasks.

Metallic products in 1950 had a total value of $1,320 million; fuels, $8,711 million; other non-metallic products, $1,694 million; total, $11,725 million.

The two world wars and uninhibited business methods have hastened the exhaustion of the once abundant supplies of metal, and the United States is increasingly an importer. Copper and bauxite imports already furnish one-half of current consumption. Imports now meet about 30% of domestic needs in antimony, asbestos, manganese, mica and tungsten. Imports of lead, zinc, chromium, iron ore, mercury and vanadium are

important. Chromite, nickel, platinum metals, tin, industrial diamonds, quartz crystal and spinning quality asbestos must be wholly imported.

In 1948 the mining industry consisted of 35,500 firms (Department of Commerce) of whom 48% were petroleum and gas producers, 40% metal and coal producers and 12% non-metallic producers. During the year 4,800 firms retired and 5,900 new firms appeared.

To the national income in 1948 ($226 billions or milliards) the food and raw-material producers contributed $27 billions:—81·3% from farms, 17·9% from mines, 0·6% from fisheries and 0·2% from forests. Of the $5 billions (more precisely $4,903 millions) contributed by mining, 47% came from coal, 33% from oil and gas extraction, 11% from metal mining and 9% from non-metallic minerals.

The precious metals are mined mainly in California, South Dakota, Utah, Colorado, Idaho, Montana, Arizona, Nevada and Alaska. Output of gold, 1792 to 1847 [illegible] Bureau of the Mint), 1,187,170 troy oz.; from 1848 to 1872, [illegible], from 1873 to 1949, 222,620,789 oz.; total, 282,087,737 oz. Output of silver, 1792 to 1847, 309,500 troy oz.; 1848 to 1872, 118,568,200 oz.; 1873 to 1949, 3,906,000,334 oz.; total, 4,024,878,034 oz.

Statistics of important non-metallic minerals in continental United States for 2 years are :—

Non-metallic minerals	1948		1949	
	Quantity	Value	Quantity	Value
		Dollars		Dollars
Boron minerals, short tons	450,932	11,147,735	467,592	11,511,893
Cement, barrels[1]	205,239,342	446,165,335	207,142,364	475,074,352
Clays,[2] short tons	31,303,697	80,996,834	28,473,844	74,618,654
Coal.				
Bituminous, short tons	596,024,437	2,983,465,256	434,342,373	2,126,225,715
Lignite, short tons	3,085,886	7,012,190	3,092,130	7,335,553
Pennsylvania anthracite, short tons	57,139,948	467,051,800	42,701,724	358,008,451
Gypsum (crude), short tons	7,254,535	19,112,669	6,608,118	18,318,553
Lime (open market), short tons	7,245,211	74,677,160	6,302,551	68,907,830
Natural gas,[3] 1,000 cu. ft.	5,148,020,000	333,173,000	5,486,582,000	355,472,000
Natural-gas liquids, gal.	6,162,287,000	458,977,000	6,560,546,000	372,150,000
Petroleum, barrels[4]	2,020,185,000	5,245,080,000	1,840,307,000	4,667,480,000
Phosphate rock, long tons	8,668,729	50,501,598	8,986,933	51,415,027
Potassium salts,[5] short tons	1,143,339	35,998,758	1,120,653	35,105,799
Salt (common), short tons	16,388,118	54,219,710	15,578,033	53,970,904
Sand and gravel, short tons	318,069,684	252,241,195	315,895,407	245,660,928
Stone,[6] short tons	224,474,900	326,660,222	222,548,750	339,442,316
Sulphur, long tons	4,978,912	89,600,000	4,789,311	86,208,000
Other non-metallic minerals	—	117,615,938	—	106,094,025
Total non-metallic minerals	—	11,054,000,000	—	9,453,000,000
Fuels[7]	—	9,495,000,000	—	7,886,000,000
Other	—	1,559,000,000	—	1,567,000,000

[1] Of 376 lb. net.
[2] Excludes clays sold or used for cement.
[3] Valued at wells.
[4] Barrels of 42 American gallons.
[5] K_2O equivalent.
[6] Excludes limestone for cement and lime.
[7] Coal, natural gas, natural-gas liquids, petroleum.

In 1950 output of bituminous coal and lignite was estimated (preliminary) at 506 million net tons; anthracite, 44·4 million net tons; crude petroleum, 1,973 million barrels, valued at the well at $5,000 million

(average, $2·54 per barrel); natural gas, nearly 6,124,000 million cubic feet; natural gas liquids, 7,638 million gallons; iron ore, 98 million gross tons.

Minerals Yearbook of the United States. Bureau of Mines. Washington. Annual.

IV. Manufactures.

The following table presents general statistics of manufactures in the United States as reported at various censuses from 1909 through 1947. The figures for 1939, but not for earlier years, have been revised to exclude data for establishments classified as manufacturing in 1939 and prior years but classified as non-manufacturing in 1947. The figures for 1909–35 were previously revised by the deduction of data for industries excluded from manufacturing during that period.

The statistics for 1947 relate to all establishments employing one or more persons any time during the year; for 1927 through 1939, those reporting products valued at $5,000 or more; and for 1909 and 1919, those reporting products valued at $500 or more. These differences in the minimum size of establishments included in the census affects only very slightly the year-to-year comparability of the figures, amounting to less than 1% of the number of workers and the value added by manufacture. The census was suspended for 1941, 1943 and 1945 in order that the Census Bureau's facilities might be turned to the collection of data urgently needed by the war agencies.

Year	Number of establishments	Production and related workers (average for year)	Production and related worker wages, total	Value added by manufacture [1]
			In thousands of dollars	
1909	264,810	6,261,736	3,205,213	8,160,075
1919	270,231	8,464,916	9,664,009	25,841,624
1927	187,629	7,848,070	10,099,465	26,525,394
1929	206,663	8,369,705	10,884,919	30,591,435
1931	171,450	6,163,144	6,688,541	18,600,532
1933	139,325	5,787,611	4,940,146	14,007,540
1935	167,916	7,203,794	7,311,329	18,552,553
1937	166,794	8,569,231	10,112,883	25,173,539
1939	173,802	7,808,205	8,997,515	24,487,304
1947	240,881	11,916,188	30,242,343	74,425,825

[1] Value of products less cost of materials, supplies, fuel, electricity and contract work.

For comparison of broad types of manufacturing, the industries covered by the census of manufactures have been divided into 20 general groups :—

Group	Census year	Number of establishments	Production and related workers (average for year)	Production and related worker wages, total	Value added by manufacture [1]
				In thousands of dollars	
1. Food and kindred products	1939	43,667	802,133	888,355	3,484,696
	1947	39,933	1,099,478	2,572,190	9,024,912
2. Tobacco manufactures	1939	765	87,525	68,500	350,152
	1947	1,086	103,289	175,318	641,356
3. Textile mill products	1939	6,388	1,081,710	906,927	1,817,996
	1947	8,185	1,147,194	2,449,312	5,340,876
4. Apparel and related products	1939	20,275	752,829	656,289	1,386,004
	1947	30,960	972,897	2,015,220	4,443,373

[1] Value of products less cost of materials, supplies, fuel, electricity, and contract work.

Group	Census year	Number of establishments	Production and related workers (average for year)	Production and related worker wages, total	Value added by manufacture [1]
				In thousands of dollars	
5. Lumber and products (excl. furniture)	1939	13,208	422,947	355,142	731,208
	1947	26,231	596,118	1,179,981	2,497,192
6. Furniture and fixtures	1939	5,178	189,382	186,820	417,785
	1947	7,687	282,780	653,915	1,377,908
7. Paper and allied products	1939	3,328	270,239	315,193	888,350
	1947	4,103	388,901	1,010,972	2,874,958
8. Printing and publishing industries	1939	24,878	324,371	493,444	1,765,314
	1947	28,986	438,135	1,318,285	4,269,416
9. Chemicals and allied producers	1939	8,839	275,669	342,068	1,818,941
	1947	10,073	466,458	1,242,628	5,365,201
10. Petroleum and coal products	1939	1,227	107,695	176,606	697,273
	1947	1,387	169,610	556,365	2,015,307
11. Rubber products	1939	595	120,740	161,410	406,155
	1947	875	214,533	614,762	1,302,863
12. Leather and leather products	1939	3,505	327,189	293,922	582,915
	1947	5,308	348,529	725,143	1,532,803
13. Stone, clay, and glass products	1939	6,678	267,094	307,248	856,323
	1947	11,650	405,755	994,884	2,306,480
14. Primary metal industries	1939	3,512	672,438	978,355	2,168,899
	1947	5,363	1,010,055	2,976,507	5,765,434
15. Fabricated metal products	1939	9,532	451,087	546,654	1,400,883
	1947	16,734	822,514	2,188,581	4,921,476
16. Machinery (except electrical)	1939	8,860	536,082	769,569	2,036,965
	1947	17,906	1,244,135	3,592,771	7,812,455
17. Electrical machinery	1939	1,979	247,930	323,388	941,469
	1947	3,973	639,147	1,647,401	3,894,115
18. Transportation equipment	1939	2,012	544,553	867,024	1,772,573
	1947	3,711	987,142	2,939,815	5,869,196
19. Instruments and related products	1939	1,292	84,867	107,704	333,409
	1947	2,599	181,939	467,785	1,080,336
20. Miscellaneous manufactures	1939	8,084	241,725	252,899	629,994
	1947	14,131	397,579	920,508	2,090,168

[1] Value of products less cost of materials, supplies, fuel, electricity, and contract work.

Output of synthetic rubber, 1941, 8,383 long tons; 1943, 231,722; 1945, 820,373; 1946, 740,026; 1947, 508,702; 1948, 488,343; 1949, 393,690. In 1948, U.S. consumption of rubber was 1,330,517 long tons, comprising 627,332 tons of natural rubber, 261,113 tons of reclaimed rubber and 442,072 tons of synthetic rubber.

Statistics of cotton (exclusive of linters) and cotton system spindle activity are :—

Year ending July 31	Production		Consumption (running bales)	Exports of U.S. production (running bales)	Net imports for consumption (500-lb. bales)	Cotton system spindle activity	
	Running bales [1]	500-lb. bales				Active on cotton [2] (thousands)	Hours operated on cotton (millions)
1937–38 [3]	18,252,075	18,945,028	5,747,978	5,598,415	158,081	24,774	74,962
1944–45	11,839,366	12,230,053	9,567,932	1,924,380	190,180	22,675	111,898
1946–47	8,517,291	8,639,595	10,024,811	3,544,040	269,605	21,383	114,727
1947–48	11,557,138	11,856,743	9,354,392	1,967,970	237,575	21,328	119,017
1948–49	14,580,279	14,868,269	7,795,401	4,747,587	163,452	19,008	98,217

[1] Counting round as half bales.
[2] Number operated on the last working day of the year, except 1937–38 and 1944–45 include all spindles consuming cotton at any time during the year.
[3] Year of biggest cotton crop.

Output of the iron and steel industries (in net tons of 2,000 lb.) according to figures supplied by the American Iron and Steel Institute, was :—

	Furnaces in blast 31 Dec.	Output, pig-iron (including ferro-alloys)	Output, steel ingots and steel for castings	Output of steel by method used [1]			Price index of iron and steel (1926 = 100)
				Open hearth	Bessemer	Electric	
	No.	Net tons	Net tons	Net tons	Net tons	Net tons	
1929 [2]	165	47,727,661	63,205,490	54,155,235	7,977,210	1,065,603	94·9
1932 [3]	44	9,835,227	15,322,901	13,336,210	1,715,925	270,044	79·4
1939	195	35,677,097	52,798,714	48,409,800	3,358,916	1,029,067	95·8
1943 [4]	230	62,769,947	88,836,512	78,621,804	5,625,492	4,589,070	97·2
1944 [4]	218	62,866,198	89,641,600	80,363,953	5,039,923	4,237,699	97·2
1946	218	46,199,826	66,602,724	60,711,963	3,327,737	2,563,024	110·3
1947	229	60,117,319	84,894,071	76,873,793	4,232,543	3,787,735	133·7
1948	237	61,911,559	88,640,470	79,340,157	4,243,172	5,057,141	155·1
1949	218	54,916,785	77,978,176	70,248,803	3,946,656	3,782,717	165·7

[1] The sum of these 3 items should equal the total in the preceding column; any difference appearing is due to the very small production of crucible steel, omitted from these tables.
[2] 'Boom' year. [3] Low point of the depression.
[4] Peak years of war production.

Output of pig-iron and ferro-alloys made in blast furnaces in 1950 (preliminary) was 91·5% of capacity (capacity, 71,621,730 net tons), that of ingot steel and steel for castings, 96·7% of capacity estimated at 100,563,500 net tons.

Leading producers of pig-iron in 1949 were:—Pennsylvania, 15,037,221 net tons (with 57 blast-furnaces in blast on 31 Dec.); Ohio, 10,639,837 (43 furnaces); Indiana, 5,990,723 (19); Illinois, 4,912,811 (19); Alabama, 3,662,801 (18); New York (15) and Massachusetts (1) jointly produced 3,541,466; Michigan (6) and Minnesota (3) jointly produced 2,002,005 net tons.

On 1 Jan., 1951, 247 blast-furnaces had an annual capacity of 72,471,780 net tons of pig-iron (and ferro-alloys) compared with 243 furnaces and an annual capacity of 56,782,208 net tons in 1938. Consumption of ore, 1949, was 109,664,151 net tons, of which blast-furnaces took 96,754,745 tons, steel producing furnaces 5,303,481 tons and sintering plants 7,605,925 tons.

The iron and steel industry in 1949 employed 491,615 wage-earners (compared with 511,414 in the peak year 1942), who worked an average of 34·5 hours per week (46·6 in peak year 1944) and earned an average of 170·3 cents per hour (new high, compared with the average of 117·2 cents during the war years, 1942 to 1945); total wages were $1,506,465,668 and total salaries for 89,209 employees was $432,827,472.

Largest unit in the iron and steel industry (also largest in the world) is the United States Steel Corporation, with an annual capacity, 1 Jan., 1948, of 24,860,500 net tons of pig-iron and ferro-alloys (36·8% of the country's capacity) and 31,226,200 net tons of ingot steel and steel for castings (33·1% of the country's capacity).

Apparent *per capita* U.S. consumption of steel, 1950, was 1,274 lb., and in 1948, 1,142 lb.; in 1948, that of the U.K. was 595·3 lb.; of Europe, 243 6 lb.; of U.S.S.R., 190·3 lb. (U.N. estimate).

In 1949, electric power output for sale reached 291,100 million kwh.; in addition, industries produced for their own use 53,967 million kwh.; of the combined total 94,773 million (27·5%) was hydro-electric.

V. Tennessee Valley Authority.

Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 square miles, in 65 counties (aggregate population, about 2 million) in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville, Tenn. There were 13,923 employees at 30 June, 1950.

Under the Act its chief duties are flood control of a difficult river and the maintenance of navigation. Regarding the first objective, TVA's 17th dam was completed in 1948–49; there are now 27 major dams and reservoirs controlling the flow of the river; in addition the headwaters and the shores of the reservoirs are being re-forested. Regarding the second, there is now a navigable channel 630 miles long, connecting with the American system of inland waterways, which in the calendar year 1949 carried 508 million ton-miles of traffic in automobiles, iron and steel products, wheat and maize, coal, petroleum and general merchandise.

Growing out of this has been the production and distribution of hydro-electric power which has multiplied from 1,500 million kwh. in 1933 to 17,514 million in fiscal 1950, when generating capacity reached 3 million kw. Rates are kept low to encourage consumption; the official figures are: average TVA price per kwh., 1·54 cents compared with the national average of 2·98 cents. Net revenue from operations, in 1949–50, $27,005,954, equal to a return of 5·8% on the average power investment.

A fourth activity is the manufacture and distribution of mineral fertilizers of types essential to the soils of the Valley. The TVA works closely with other federal agencies, such as the Bureau of Reclamation, and with state and local authorities in combating soil erosion, forest destruction, the conversion of farms, in whole or in part, from row-crops, such as maize, to livestock, and to the development of local industries based on natural resources, woodland or mineral. In the depression year, 1933, the average *per capita* income in the area was $148 compared with the national average of $368; in 1947 the Valley's *per capita* income had multiplied over 5 times to $797 while the national average had increased 3·5 times to $1,323.

Total net investment, 30 June, 1950, in the multiple-purpose water-control system was $855 million, of which $141·6 million was devoted to navigation, $155 million to flood control, and about $469 million to the development of power.

TVA's total assets, 30 June, 1950, were $931,717,307, of which $854,743,374 were fixed assets; among the liabilities was a funded debt of $49 million; against [illegible] appropriations totalling $827,603,981, the Authority had paid into the U.S. Treasury $38,144,796.

Commerce.

The subjoined table gives the total value of the imports and exports of merchandise in 6 calendar years (in thousands of dollars):—

Year	Exports		General imports	Year	Exports		General imports
	Total	U.S. mdse.			Total	U.S. mdse.	
1944	14,258,702	14,161,544	3,928,866	1947 [1]	15,310,289	15,162,352	5,756,333
1945	9,805,625	9,584,684	4,159,138	1948 [1]	12,655,058	12,532,093	7,123,834
1946 [1]	9,739,482	9,502,513	4,932,565	1949 [2]	12,039,877	11,924,908	6,622,400

[1] Under revision. [2] Preliminary figure

For a description of how imports and exports are valued by the U.S. Customs, see *Explanation of Statistics of Foreign Commerce and Navigation of the United States*, Bureau of the Census, U.S. Department of Commerce, Washington, D.C., 1945.

The 'most favoured nation' treatment in commerce between Great Britain and the United States was agreed to for 4 years by the treaty of 1815, was extended for 10 years by the treaty of 1818, and indefinitely (subject to 12 months' notice) by that of 1827

Beginning 1947, export data include civilian supply shipments (goods supplied to the occupied areas through the United States armed forces). These data were excluded from the immediate preceding years.

Imports and exports of gold and silver bullion and specie in 6 calendar years (in thousands of dollars):—

Year	Exports			Imports		
	Gold	Silver	Total	Gold	Silver	Total
1933	366,652	19,041	385,693	193,197	60,225	253,422
1940	4,995	3,674	8,669	4,749,467	58,434	4,807,901
1945	199,968	90,937	290,905	93,718	27,278	120,996
1947	213,241	30,649	243,890	2,079,588	68,140	2,147,728
1948	300,771	12,400	313,171	1,981,175	70,885	2,052,060
1949	84,936	23,281	108,217	771,390	73,536	841,926

Exports and imports of merchandise for years ended 30 June are as follows in dollars:—Total exports, 1945, 12,675,831,000; 1947, 12,931,530,000 (includes civilian supplies for Jan.–June, 1947, valued at 431,689,000); 1948, 13,453,484,000; 1949, 12,811,338,000. Exports of U.S. merchandise, 1945, 12,549,283,000; 1947, 12,728,029,000 (includes civilian supplies for Jan.–June, 1947, valued at 431,525,000); 1948, 13,320,447,000; 1949, 12,687,751,000. General imports, 1945, 4,319,242,000; 1947, 5,510,109,000; 1948, 6,406,835,000; 1949, 6,993,883,000.

The domestic exports of United States produce and the imports for consumption by economic classes for 2 calendar years were :—

Merchandise	Exports (U.S. merchandise)				Imports for consumption			
	1948		1949		1948		1949	
	million dollars	per cent.	million dollars	per cent.	million dollars	per cent	million dollars	per cent.
Crude materials	1,488	11 9	1,780	14·9	2,147	30·3	1,854	28·1

Semi-manufactures	1,370	10 9	1,354	11·4	1,633	23 0	1,418	21·5
Finished manufactures.	7,094	56 6	6,564	55 0	1,309	18 5	1,246	18·9
Total	12,532	100 0	11,925	100·0	7,092	100·0	6,592	100 0

Chief exports of U.S. merchandise for the calendar year 1949 :—

Commodity	$1,000	Commodity	$1,000
Chemicals and related products :		Nonmetallic minerals :	
Coal-tar products	84,384	Coal and products	307,940
Chemical specialties [1]	165,243	Glass and products	51,544
Fertilizers and materials	91,637	Petroleum and products, total	561,027
Industrial chemicals	117,100	Crude petroleum	98,425
Medicinals	198,205	Lubricating oils	168,903
Pigments, paints, varnishes	76,359	Motor fuel and gasoline	146,498
Foodstuffs and tobacco :		Textile fibres and manufactures :	
Dairy products	174,367	Cotton manufactures including yarns, etc.	366,340
Fruits and preparations	100,130	Cotton, unmanufactured	874,216
Grains and preparations	1,456,625	Synthetic fibres and manufactures	204,761
Maize	208,890	Transportation equipment :	
Rice	90,093	Aircraft, parts and accessories [1]	130,494
Wheat	835,917	Automobiles, parts and accessories [1]	752,571
Wheat-flour	148,200	Motor trucks, buses and chassis, new [1]	229,171
Lard	89,378	Passenger cars and chassis, new	206,201
Meat products	51,462	Merchant vessels	172,948
Peanuts	50,570	Wood and paper :	
Tobacco and manufactures	308,556	Paper and manufactures	93,620
Vegetables and preparations	87,753	Saw-mill products	59,956
Machinery :		Other chief exports :	
Agricultural, except tractors	128,105	Commodities exported for relief	75,004
Electrical machinery	475,109	Photographic and projection goods	53,744
Specialized application [1]	78,563	Rubber and manufactures	114,438
Industrial machinery, total	1,319,610	Scientific and professional instruments	60,762
Construction & conveying	220,784	Vegetable oils, expressed, and oilseeds	123,811
Engines, turbines & parts	196,266		
Metalworking machine tools and machinery	196,502		
Mining, well and pumping	188,006		
Textile machinery	156,274		
Office appliances	84,017		
Tractors, parts and accessories	299,111		
Metals and manufactures :			
Copper and manufactures	75,769		
Iron and steel (advanced manufactures)	183,671		
Iron and steel mill products	731,928		

[1] Certain exports, for security reasons, were excluded from commodity data after April, 1949.

Chief imports for consumption for the calendar year 1949 :—

Commodity	$1,000	Commodity	$1,000
Chemicals and products :		Nonmetallic minerals :	
Coal-tar, and industrial	31,469	Asbestos, unmanufactured	33,940
Fertilizers and materials	62,685	Diamonds, gem stones and industrial	87,317
Foodstuffs, beverages, tobacco :		Petroleum and products, total	477,788
Cattle, live	54,386	Crude petroleum	340,658
Cocoa or cacao bean	124,531	Fuel oils	126,894
Coffee	795,133	Textile fibres and manufactures :	
Distilled spirits	74,375	Cotton manufactures, incl. semis.	49,845
Edible nuts	47,950	Cotton, unmanufactured	22,415
Fish, shellfish, fish products	112,402	Jute and manufactures	142,093
Fruits and preparations	98,862	Wool manufactures, incl. semis.	71,964
Grains and preparations	75,311	Wool, unmanufactured	222,223
Meat products	71,791	Wood and paper :	
Sugar and related products	396,409	Paper and manufactures	452,638
Tobacco and manufactures	75,535	Paper base stock	212,887
Vegetables and preparations	52,419	Saw-mill products	113,176
Machinery and vehicles :		Other chief imports :	
Agricultural machinery and tractors	82,993	Clocks, watches and parts	50,766
Automobiles and parts	12,696	Furs and manufactures	108,836
Metals and manufactures :		Hides and skins, raw (except furs)	72,533
Iron, steel, ferro-alloys :		Naval stores, gums and resins	28,578
Ferro-alloys, ores, metals	76,646	Oilseeds	95,178
Steel-mill products	66,313	Rubber, crude	200,312
Nonferrous metals and manufactures :		Vegetable oils, expressed	61,049
Aluminium	53,158		
Copper	224,236		
Lead	121,900		
Nickel	66,022		
Tin	212,304		
Zinc	45,922		

The net customs duties collected on merchandise imported for consumption amounted, in 1945, to $378,675,000; in 1946, $498,001,000; in 1947, $445,355,000; in 1948, $417,401,000, and in 1949, $374,291,000.

The total trade between the continental United States and the United Kingdom for 6 years (Board of Trade returns) in thousands of £ sterling was as follows :—

	1938	1946	1947	1948	1949	1950
Imports from U.S. to U.K.	117,980	229,573	297,131	183,239	222,091	211,541
Exports to U.S. from U.K.	20,484	35,515	47,973	66,107	57,062	112,966
Re-exports U.K. to U.S.	8,274	4,155	13,349	4,623	5,460	14,247

Imports and exports by continents and selected countries for calendar years :—

Country	General imports		Exports, including re-exports	
	1948	1949	1948	1949
Grand divisions :	$1,000	$1,000	$1,000	$1,000
North America	2,539,649	2,493,472	3,395,977	3,294,893

Tariffs.—The American tariff system has ceased to be an important revenue-raising device. In 1789–91 customs duties (plus the tonnage tax) furnished 99·5% of the government revenue; in 1859, just preceding the Civil War, 92·6%; in 1939, 6·1%, and in 1948 and 1949, 0·9%.

During the 5-year period 1945–49, the latest for which statistics are available, annual imports for consumption averaged $5,652,788,000 (as compared with $2,440,042,000 during the 5 pre-war years 1936–40). Of these imports, 60·8% ($3,436,621,000) entered duty-free and 39·2% ($2,216,167,000) paid duties averaging $425,305,000 or 19·2% of dutiable imports and 7·5% of total imports for consumption. During this period imports increased yearly, from $4,098,101,000 in 1945 to $7,092,032,000 in 1948; in 1949 imports of $6,591,720,000 exceeded all earlier records except that of 1948.

Exports of United States merchandise, including aid and relief shipments, during the same period, 1945–49, averaged $11,552,153,000 compared with $3,166,518,000 in 1936–40. The peak of $15,162,352,000 was reached in 1947, a year in which aid and relief shipments dropped to the lowest point since 1941, amounting to about 10% of the total. In 1948 and 1949 foreign assistance was greatly increased by programmes of the Economic Co-operation Administration, but other exports declined, especially after the middle of the year 1949. (Data on exports financed by E.C.A. and on other aid and relief shipments in 1948 and 1949 are not available separately.) Exports totalled $12,532,093,000 in 1948 and $11,924,908,000 in 1949.

In 1949, dutiable imports for consumption amounted to $2,708,456,000 and duty-free imports to $3,883,264,000. Expressed as percentages, total imports for consumption (preliminary figures) were divided as follows:—Crude materials, 28·1%; crude foodstuffs, 20·2%; manufactured foodstuffs and beverages, 11·2%; semi-manufactures, 21·5%; finished manufactures, 18·9%. In the same year, total domestic exports of $11,924,908,000 had the following distribution:—Crude materials, 14·9%; crude foodstuffs, 11·2%; manufactured foods and beverages, 7·4%; semi-manufactures, 11·4%; finished manufactures, 55·0%.

Per capita exports fell from $41·77 in 1929 (the 'boom year' when American investors lent heavily abroad) to a low of $12·42 in the depression year of 1932, rising to $23·44 in 1939, and to an all-time high of $103·31 in 1947 (including Civilian Supplies). In 1948 they stood at $83·90 and in 1949 at $78·19 (both years including Civilian Supplies). In the same years, *per capita* imports were as follows:—1929, $35·14; 1932, $10·44; 1939, $17·08; 1947, $38·60; 1948, $47·48; 1949, $43·41.

Various attempts have been made to compare the 'tariff levels' of different countries but none has met with general acceptance. The best

known is the report on ' Tariff Level Indices ' prepared for the 1927 International Economic Conference at Geneva and covering the 1925 tariff systems of 20 countries. One of the tables, confined to the tariff rates on manufactured goods only (and submitted tentatively and with considerable reserve), suggested that the various countries ranked as follows :—Countries with a tariff level on manufactured goods of 40% or higher, Spain; between 35 and 40%, United States; 30–35%, Poland; 25–30%, Argentina, Australia, Czechoslovakia, Hungary; 20–25%, Canada, France, Germany, Italy, Yugoslavia; 15–20%, Austria, Belgium, India, Sweden; 10–15%, Denmark, Switzerland; under 10%, United Kingdom and the Netherlands. The ' tariff wars ' of the 1930s altered this pattern radically, as have also recent tariff decreases under international agreements, but there has been no subsequent attempt, of similar standing, to show how the ' tariff levels ' compare.

As a participant in the programme under the General Agreement on Tariffs and Trade for the reduction of tariffs throughout the world, the United States took part in the multilateral trade agreement negotiations at Geneva, Switzerland, in 1947 and at Annecy, France, in 1949. Prior to the Geneva conference, the United States under the Trade Agreements Act had negotiated bilateral trade agreements with numerous countries for the reciprocal reduction of import duties. As a result of these negotiations, the great bulk of United States imports are now subject to trade agreement concessions of some type. Imports of dutiable articles on which the United States has made concessions were valued at $2,111,000,000 in 1947, or nearly 96% of total dutiable imports in that year. The rates of duty applicable to about 91% of total dutiable imports have been reduced in some degree by trade agreements; those applicable to about 5% have been bound against increase at the pre-agreement level. In addition, imports of articles on which the United States has bound duty-free treatment were valued at $3,343,000,000 in 1947, or over 97% of total duty-free imports in that year.

The effect of trade agreement concessions, in themselves, on the over-all level of the United States tariff has been material. This effect is best calculated by applying pre-agreement and post-agreement rates of duty to the import statistics of a single year, thus excluding the effects of changes in prices from year to year, and changes in the relative magnitude of imports of individual commodities in different periods. Calculated on the basis of 1947 imports, the average *ad valorem* equivalent of United States duties before giving effect to reductions made in trade agreements was 28·4% on total dutiable imports. The average after all the Geneva concessions (and those granted in bilateral agreements) had become effective was 15·0%; assuming all the concessions made at Annecy had been placed in effect, it was 14·5%. The average *ad valorem* equivalent (based on 1947 imports) therefore declined 49% as a result of trade agreement concessions.

The average rate of duty actually collected on United States dutiable imports has declined markedly since the early 1930s, as a result both of reductions in United States import duties by trade agreements and of the great advance in prices. In the depression years of 1930–33, the average rate under the Hawley–Smoot Law was 52·8%. The rate on dutiable goods declined to 37·3% in 1939, 14·3% in 1948 (the first year the majority of the Geneva concessions were in effect), and 13·8% in 1949. In the latter year, the average rate of duty on total United States imports—both dutiable and free—was 5·8 %.

Brown, Jr. (W. A.), The United States and the Restoration of World Trade, Washington, 1950.
Harris (S. E.) (editor), Foreign Economic Policy for the United States. Cambridge, Mass., 1948.

Economics and Labour.

The Office of Business Economics of the Department of Commerce prepares detailed estimates on the national income and product of the United States. The National Income Supplement to the July, 1947, *Survey of Current Business* and the July, 1950, *Survey of Current Business* jointly contain the complete set of national income and product estimates prepared by the Office of Business Economics, covering the period 1929–49. The monthly *Federal Reserve Bulletin* also carries the revised figures for a number of years, and the latest tentative calculations for the current year. The latest revised figures[1] in milliards (billions) of dollars for various years are as follows:—

	1929 [2]	1933 [3]	1939	1944	1947 [4]	1948 [4]	1949
I. Gross National Product composed of	103·8	55·8	91·3	213 7	233·3	259·1	255 6

[1] Details do not always add up to the totals given because of rounding the figures.
[2] Peak year of the inter-war period. [3] Low point of the depression. [4] Revised.

The gross national product for 1950 is tentatively estimated at $270·3 milliards; the national income, $229·1 milliards; income payments to individuals, about $215 1 milliards, of which taxes, etc., should take $19·5 milliards, leaving a disposable personal income of $195·6 milliards (new high); consumers' expenditures for goods and services, $185·2 milliards; net savings of individuals, $10·4 milliards. Composition of the national income, 1950, is tentatively estimated as follows:—Compensation of employees, $147·9 milliards (new high); net income of proprietors, $34·1 milliards (income of agricultural proprietors, $11·7 milliards); income from rentals, $7·1 milliards, and from interest, $5·0 milliards.

The Census Bureau estimates the average family income, 1949, at $3,100, a decrease of $100 from that of 1948. It estimates that of the 39,100,000 families in 1949, 4,700,000 earned less than $1,000 and 18,600,000 families (49% of the total) earned less than $3,000. The largest single group, of 8,100,000 families, earned between $2,000 and $2,999. About 1,000,000 families earned $10,000 and over.

The cost-of-living index for moderate income families in large cities as compiled by the Department of Labour (the average for 1935-39 = 100) has moved as follows :—

Average for year or on 15th of month	All items	Food	Clothing	Rent	Fuel, electricity and ice	House furnishings	Miscellaneous
1929 (Boom)	122·5	132·5	115·3	141·4	112·5	111·7	104·6
1933 (Low)	92·4	84·1	87 9	100·7	100·0	84·2	98·4
1939	99·4	95·2	100 5	104·3	99·0	101·3	100·7
1941	105·2	105·5	106·3	106·2	102·2	107·3	104 0

[1] Price controls largely removed. [2] Start of the Korean War.

The American trade unions in Oct., 1949, comprised over 200 national and international unions and 89 state and territorial organizations. They had a total membership of approximately 16,000,000, according to figures derived from official union sources. The American Federation of Labour (founded 1881 and taking its present name in 1886) claims a total membership of 8,000,000. The actual per capita tax, received from its affiliated unions, was based upon a membership of 7,241,290. The Congress of Industrial Organizations claims 6,000,000, with no per capita tax reported.

(The C.I.O. was formed originally as the Committee for Industrial Organization in 1935, with the stated purpose of working for industrial organization *within* the A.F.L. The latter suspended unions affiliated with the Committee in 1936 and in 1938 revoked their charters, whereupon in Nov., 1938, the C.I.O. was formed as a separate federation.) The 4 unaffiliated or independent Railroad Brotherhoods, covering operating staffs embracing engine-drivers, firemen, conductors and trainmen, had about 450,000. Other independent unions including those organizing machinists, coal-miners and government workers, together with a number of small independent unions have an estimated total membership approaching 2,000,000.

The largest single unions are the International Brotherhood of Teamsters (A.F.L.), the United Automobile Workers (C.I.O.) and the United Steelworkers (C.I.O.) each with more than 900,000 members. Other unions with more than 600,000 members are the International Association of Machinists (Ind.), the United Mine Workers (Ind.) and the Brotherhood of Carpenters and Joiners (A.F.L.).

Legislation to regulate trade union activities was enacted in 30 states in 1947, but in 1948 only one state, Louisiana, passed such legislation, an act restoring the anti-injunction law of 1934 and one creating a new Board of Mediation to promote friendly settlements of labour disputes. Statutes regulating, restricting or prohibiting closed shop or other types of union security [illegible] were passed in 15 states in 1947:—Arizona, Arkansas, Georgia, [illegible] (repealed by referendum in 1948), Massachusetts, Nebraska, Nevada, New Hampshire, North Carolina, North Dakota, South Dakota, Tennessee, Texas and Virginia. In 12 of these states (Arizona, Arkansas, Georgia, Iowa, Nebraska, Nevada, North Carolina, North Dakota, South Dakota, Tennessee, Texas and Virginia) all types of union security agreements were prohibited.

Ten states passed acts to regulate industrial disputes between public utilities and their employees:—Florida, Indiana, Massachusetts, Michigan, Missouri, Nebraska, New Jersey, Pennsylvania, Virginia and Wisconsin. Texas passed a law prohibiting picketing and sabotage in public utilities. In addition, Michigan, Missouri, New York, Ohio, Pennsylvania and Texas prohibit strikes by public employees.

Laws to restrict or regulate picketing or other strike activities were enacted in Arizona, Connecticut, Delaware, Georgia, Idaho, Michigan, Missouri, North Dakota, Pennsylvania, South Dakota, Texas and Utah. Six states (California, Massachusetts, Michigan, Missouri, Pennsylvania and Wisconsin) also regulated or prohibited strikes in connexion with jurisdictional disputes. Secondary boycotts are now prohibited under the laws of California, Delaware, Idaho, Iowa, Minnesota, Missouri, North Dakota, Oregon, Pennsylvania, Texas and Utah. An omnibus labour relations law was enacted in Delaware which includes restrictions on closed shop, secondary boycotts, strike activities and picketing. Other legislation enacted in 1947 dealt with union registration and financial reports, check-off of union dues and mediation and arbitration of labour disputes.

Thirty-four states and the Territories of Alaska and Hawaii have 'criminal syndicalism' laws in some form or other.[1]

[1] The Idaho Act (1925) may be taken as representative. The primary offence, punishable as a felony, is the advocacy, by word of mouth or in writing, of the 'doctrine of criminal syndicalism' which is defined as 'the doctrine which wilfully and maliciously advocates crime, sabotage, violence or unlawful methods of terrorism as a means of accomplishing industrial or political reform.' The Act defines 'sabotage': 'Sabotage for the purpose of this chapter is defined to mean damage, injury or destruction of real or personal property; work done in an improper manner; tampering with or disabling machinery; improper use of materials; loitering at work; slack work; slowing down work or production; scamped work; waste of property; the publication of trade secrets.'

Industrial stoppages in 1948 numbered 3,419 (1947, 3,693; 1946, 4,985), involving 1,960,000 (2,170,000; 4,600,000) workers and the loss of 34,100,000 (34·6 million; 116 million) man-days of work.

Minimum-wage laws governing private employers have been enacted (largely since 1934) in 26 states, the District of Columbia, Hawaii, Alaska and Puerto Rico. The laws of Connecticut, Massachusetts, Rhode Island, New York, Hawaii and Puerto Rico cover all workers; in the other states they cover only women or women and minors.

Workers in the motion picture production and distribution industry get a higher average weekly wage than the workers in any other industry. In Aug., 1949, they were getting an average of $93 a week; the average for all manufacturing industries was $55 a week.

There are 3 federal agencies which provide formal machinery for the adjustment of labour disputes :—(1) The Federal Mediation and Conciliation Service (now an independent agency, formerly the Conciliation Service of the Department of Labour), which handles disputes which 'threaten to cause a substantial interruption of commerce.' Its aim is to keep down the loss of production due to work stoppages and its conciliators concentrate on securing agreements satisfactory to both sides, no attempt being made to formulate principles applicable to industry in general. (2) The National Mediation Board (1934) provides much the same facilities for the railroad and air transport industries. (3) The National Railroad Adjustment Board (1934) acts as a board of final appeal for grievances arising over the interpretation of existing railroad-labour collective agreements; either side may invoke its jurisdiction, but its decisions thereafter are binding upon both sides and enforceable by the courts.

The National Labour Relations Board administers and enforces the law which guarantees to employees the right to form a union of their own choice. It also provides an orderly procedure under which charges of 'unfair labour practices' (such as the arbitrary dismissal of a union member) may be settled without a strike.

The Taft-Hartley 'Labour Management Relations Act,' which became law on 23 June, 1947, over the President's veto (by an affirmative vote of 70% of the Senate and 76% of the lower house), greatly affects current trade union privileges and practices. It does so partly by creating new offences with penalties attached, partly by bringing the federal courts (with their power of issuing injunctions) back into the field of industrial relations from which they had been removed under the 'New Deal' (the Norris–La Guardia Anti-Injunction Act of 1932).

The Act forbids 'closed shops,' *i.e.*, shops in which no worker may be engaged unless he *already* belongs to a certain trade union; in 1945, it was estimated, about 30% of all trade unionists were employed in 'closed shops' or union shops with preferential hiring. 'Union shops' in which an employee must join the union *after* he has been hired, are declared legal providing the majority of the workers eligible to vote (employees then on strike may be declared ineligible if their places have been filled) in a secret ballot, have voted for the union to represent them. Among the 'unfair acts' which are proscribed are: coercing an individual to join the union; refusing to bargain collectively with any employer, *e.g.*, insisting that an employer agree to an illegal clause in a contract, such as a 'closed-shop'; secondary boycotts, *e.g.*, refusing to handle goods for A unless he refuses to have any dealings with B whose employees are striking; jurisdictional strikes, attempts to force an employer to recognize a union different from the one certified by the N.L.R.B.; charging initiation fees or dues which are higher than those found reasonable by the N.L.R.B.

The courts are, once again, empowered under certain conditions to issue injunctions restraining these practices, but such injunctions may be sought only by the N.L.R.B. Both employers and employees may sue and be sued for damages arising from 'breach of contract.' Penalties are provided for strikes designed to terminate or modify an existing agreement unless preceded by a 60-days 'cooling off' period in which efforts are made to reach agreement. Trade unions and corporations are forbidden to make any expenditure for political purposes. In order to use the facilities of the N.L.B.R. in either an unfair labour practice or representation case, a union must file an annual report with the Secretary of Labour covering such things as the names and emoluments of their 3 chief officers and those receiving more than $5,000 a year, the dues and initiation fees charged, their methods of electing officers, etc. No union may avail itself of the benefits of the Act whose officers do not certify that they do not belong to the Communist Party or advocate the overthrow of the government by force or violence. Unions of factory foremen and farm workers are not covered by the Act. Government employees who strike may not return to the government service for 3 years.

Shipping and Navigation.

On 30 June, 1950, the United States merchant marine included 3,516 sea-going vessels of 1,000 gross tons or over, with aggregate dead-weight tonnage of 37,478,000. In 1949, 39 ships of 1,000 gross tons or over, totalling 857,000 [illegible] tons, were built.

On 1 [illegible], the merchant marine had 1,379 vessels with dead-weight tonnage of 11,681,700. During the war period (1 Sept., 1939, to 31 July, 1946) 614 merchants ships were lost by enemy action and 161 through marine hazards. Dead-weight tonnage of American merchant marine on 1 Jan., 1942, 10,300,000; dead-weight tonnage built between that date and 31 Dec., 1946, 55,058,000. Number of ships built in this period, 5,686. The War Shipping Administration operated merchant-type ships of 46,839,000 dead-weight tons. Personnel of the merchant marine, 197,000 men on 1 Sept., 1946; war casualties to 31 Oct., 1945, 807 dead, 4,830 missing and 112 prisoners of war; total casualties, 5,749.

The shipping registered under the United States was classed as follows on 1 Jan., 1949:—Vessels of from 5 to 99 gross tons, 22,260 (of 539,788 gross tons); from 100 to 499 gross tons, 6,981 (1,906,193); from 500 to 999 gross tons, 1,649 (1,081,962), and of 1,000 gross tons and over, 4,374 (28,653,820); total, 35,264 vessels of 32,181,763 gross tons.

In 1949, vessels entering the ports of the United States had a net ton-

nage of 85,700,000, of which American net tonnage was 41,251,000; vessels clearing had 84,286,000 net tons (American, 39,681,000).

Transportation.

On 1 Jan., 1949, the estimated rural road mileage, including state highway systems, was 3,006,904, of which 1,573,700 miles were surfaced roads. Mileage of primary state highway systems included 349,929 miles of rural roads, of which 335,470 miles were surfaced, and 31,863 miles of urban extension or [illegible] streets under state control (31,087 miles, surfaced). There were also 200,[illegible]53 miles of secondary rural road systems under state control, of which 140,008 were surfaced. Estimated expenditures by all levels of government for construction, maintenance and administration on all roads and streets, from 1920 through 1948, was $52,165 million.

Motor vehicles registered on 1 Jan., 1951, were estimated at 48,484,000, including 39,710,000 passenger cars, 8,550,000 trucks and 220,000 buses; on 1 Jan., 1950, they numbered 44,120,243.

Road haulage of goods by motor lorries and trucks in 1949 used 7,692,569 vehicles, compared with 250,048 in 1916. The industry employed 5,677,000 workers, or 1 out of every 11 employed in the United States. The estimated truck ton-miles in 1949 was 89,100 million on main rural roads. Motor carriers of passengers and property earned, in the 12 months ending 30 June, 1949, $3,417,796,000 compared with the railways' $9,755,930,000.

Railway history in the United States commenced in 1828. The extent of railways in operation in 1830 was 23 miles. It rose to 52,922 miles in 1870; to 167,191 miles in 1890, and to a peak of 266,381 miles in 1916, falling thereafter to 261,871 in 1925; 246,739 in 1940, and 237,798 in 1949 (these include some duplication under trackage rights and some mileage operated in Canada by U.S. companies). The ordinary gauge is 4 ft. 8½ in. In 1940, 54,453 communities (43·0% of the total) were not served by any railroads. Loadings of revenue freight cars in 1949 totalled 35,909,741 cars; in 1948, 42,718,828 cars.

The following table, based on the figures of the Interstate Commerce Commission, shows some railway statistics for 5 years :—

	1940	1944	1947	1948	1949
Mileage owned (first main tracks)	233,670	227,335	225,806	225,149	224,511
Revenue freight originated (million tons)	1,069	1,665	1,613	1,580	1,284
Freight ton-mileage (million ton-miles)	375,369	740,586	657,878	641,104	529,111
Passengers carried (thousands)	456,088	915,817	706,551	645,535	556,741
Passenger-miles (thousands)	23,816	95,663	45,972	41,224	35,133
Operating revenue (million dollars)	4,355	9,525	8,784	9,784	8,681
Operating expenses (million dollars)	3,132	6,345	6,870	7,553	6,968
Net railway operating income (million dollars)	691	1,113	791	1,015	694
Net income after fixed charges (million dollars)	243	733	537	768	496

Equipment in service on 31 Dec., 1949, was as follows :—Locomotives, including electric and other, 43,272; freight train cars, excluding caboose and privately-owned cars, 1,778,811; passenger train cars, 38,006. Average number of railway employees during 1949 was 1,272,131.

In civil aviation there were, on 1 May, 1949, 491,306 certificated pilots, and, at the end of 1949, 92,622 civil aircraft.

Data of the Civil Aeronautics Board indicate that in 1949 the scheduled domestic air carrier trunk lines maintained service on an average of 55,675 route miles of domestic airways, flew 323,241,018 revenue miles, with 14,021,047 revenue passengers; revenue passenger-miles, 6,562,580,000.

Scheduled American-flag air carriers in international and overseas air transport maintained services on an average of 107,776 route miles, flew 104,528,006 revenue miles, carrying 1,520,067 revenue passengers on 2,053,980,000 revenue passenger-miles.

Airports on 31 Dec., 1949, were :—Commercial, 2,585; municipal, 2,200; other types, 1,699; total, 6,484. Airports in use may be classified as :—Class I and under, suitable for personal flying, 4,100; Class II, suitable for personal flying and for small feeder airlines, 1,027; Class III, accommodating twin-engined aircraft, 576; Class IV, serving larger aircraft, 447, and Class V and over, designed for long-range domestic or foreign operations, 334; total, 6,484.

Communications.

International cable and radio services, providing connections with all parts of the world, are operated by 13 companies; in addition the international radio telephone circuits are operated by the American Telephone and Telegraph Company.

The telegraphs of the United States (as well as much of the cable business) are largely in the hands of the Western Union Telegraph Company, which on 31 Dec., 1949, had 29,400 offices, a gross communications plant investment of $338,997,021, 43,226 employees and handled 190,592,419 messages.

The following table shows the telephone and wire mileage of all the telephone systems in the United States and the chief operating statistics of the American Telephone and Telegraph Company, and its chief telephone subsidiaries, which together form the 'Bell Telephone System,' as of 31 Dec. of each year :—

	1945	1946	1948	1949
All systems :				
Total telephones	27,867,000	36,611,000	38,200,000	40,665,000
Miles of wire (partly estimated)	110,700,000	116,600,000	137,600,000	147,300,000
Telephones in Bell System [1]	27,853,000	31,597,000	38,288,000	40,654,000
Bell Telephone System				
Number of central offices	7,374	7,501	8,007	8,224
Telephones	22,445,519	25,709,458	31,364,493	33,388,258
Miles of wire, total	99,759,000	105,307,000	124,254,000	133,089,000
Average daily telephone conversations	90,548,000	105,762,000	125,271,000	132,025,000
Exchange	85,877,000	100,401,000	119,406,000	126,100,000
Toll and long distance	4,671,000	5,361,000	5,865,000	5,923,000
Total plant (1,000 dollars)	5,702,057	6,294,419	8,618,842	9,432,750
Employees, number	387,300	496,438	656,520	593,869

[1] Bell-owned and Bell-connecting (owned by other companies)

Postal business for the years ended 30 June included the following items :—

	1947	1948	1949	1950
Number of post offices, end of year	41,759	41,695	41,607	41,464
Postal revenue ($1,000)	1,299,141	1,410,971	1,571,851	1,677,487
Postal expenditure ($1,000)	1,562,515	1,687,805	2,149,322	2,222,949
Postal savings deposits ($1,000)	3,392,773	3,379,130	3,277,173	3,097,062

Banking.

On 30 June, 1950, there were 14,674 domestic banks doing a general deposit business with the public and having aggregate deposits of $163,770,402,000. Of these, 4,971 with deposits of $82,429,571,000, were national banks operating under charters granted by the Federal Government. The remaining

banks, including trust companies and savings banks, were organized under the laws of the various states. Of the 14,674 banks doing a general deposit business, 6,885 were members of the Federal Reserve System.

The Federal Reserve System, established under the Act of 1913, comprises the board of seven governors of the Federal Reserve System, the 12 regional Federal Reserve Banks, 6,885 member banks, the Federal Open Market Committee and the Federal Advisory Council. The Board of Governors, appointed by the President with the consent of the Senate, determines monetary, credit, and operating policies and formulates the rules for the System. Each governor holds office for 14 years, one governor's term expiring every 2 years. No two may come from the same Federal Reserve District. The Board, with 5 representatives of the Reserve Banks, constitutes the Federal Open Market Committee, which directs the purchase and sale of Government obligations made by the Reserve Banks to influence the general credit conditions of the country. The Board supervises the 12 Reserve Banks and the issue and retirement of Federal Reserve notes; it appoints three of the nine directors of each Reserve Bank; it passes on the admission of banks to the System and has power to remove the officers of member banks for continued unsound banking practices.

The 12 Reserve Banks (one for each district) implement Federal Reserve policies, chiefly through their dealings with member banks. Although non-member banks outnumber member banks (7,789 non-member banks compared with 6,885 member banks on 30 June, 1950), member banks hold about 85% of the country's total commercial banking resources. The Reserve Banks hold bank reserves, advance funds to member banks, provide currency for circulation, act as fiscal agent for the Government, and afford nation-wide cheque-clearing and fund transfer arrangements. They may issue notes, fully secured; discount paper for member banks; increase or reduce the country's supply of reserve funds by buying or selling Government securities and other obligations at the direction of the Open Market Committee. In addition, they may advance working capital to established industrial or commercial enterprises for periods not exceeding 5 years. Their capital is owned by the member banks.

Member banks include all national banks in the continental United States, and such banks with state charters as have voluntarily applied to the Board of Governors for membership and been admitted. On 30 June, 1950, 4,971 national banks and 1,914 state banks were members. Every member bank is required to subscribe to stock in the Reserve Bank of its district in an amount equal to 6% of its paid-up capital and surplus. Only one-half of the par value of the stock is paid, the other half remaining subject to call by the Board of Governors. The reserve balances which member banks must carry with Reserve Banks are based on the volume of their net demand and time deposits. The Board of Governors has the power to alter these requirements within limits; the following requirements have been in operation since 1 Feb., 1950, for country member banks and 25 Jan., 1950, for net demand and time deposits, respectively, for all other banks. All member banks must have reserve balances equal to 6% of their *time* deposits; member banks located in central reserve cities must carry reserves of 24% of *net demand* deposits; those in reserve cities, 20%; banks located elsewhere, 14%.

The Federal Advisory Council consists of 12 members (one from each district); it meets in Washington four times a year (or oftener) to advise the Board of Governors on general business and financial conditions.

The Comptroller of the Currency has supervisory authority over national

banks, and the banking commissioners of the 48 states have similar authority over banks and financial institutions organized under state laws.

Banks which participate in the federal insurance fund have their deposits insured against loss in the amount of $10,000 for each depositor. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks.

All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance. On 30 June, 1950, 13,449 commercial banks with deposits of $141,992,353,000 were members of the insurance fund, including 14 banks in the possessions (5 in Alaska, 7 in Puerto Rico and 1 each in Hawaii and the Virgin Islands).

Besides the commercial banks mentioned above, the deposit insurance scheme covered 192 mutual savings banks with deposits of $14,128,018,000. There were 1,047 uninsured banks comprising 709 commercial banks and trust companies with deposits of $2,029,113,000 and 338 mutual savings banks with deposits of $5,815,268,000.

There are also banks which operate solely in the field of agricultural credits under the Farm Credit Administration, and Federal Home Loan Banks to make advances to financial associations and institutions upon the security of home mortgages.

Currency, Money, Weights and Measures.

Prior to the banking crisis that occurred early in 1933, the monetary system had been on the gold standard for more than 50 years. An Act of March 14, 1900, required the Secretary of the Treasury to maintain at a parity with gold all forms of money issued by the United States. For a description of these, *see* THE STATESMAN'S YEAR-BOOK, 1934, p. 491.

The old gold *dollar* had a par value of 49·32*d.*, or $4·8666 to the £ sterling; it contained 25·8 grains (or 1·6718 gramme) of gold ·900 fine. Under existing statutes the Government is still under obligation to maintain parity between gold and all forms of currency. By the Act of 12 May, 1933, the President of the United States was given authority to reduce the gold content of the dollar by not more than 50% and by the Gold Reserve Act of 30 Jan., 1934, the minimum reduction which he could make was fixed at 40%; on 31 Jan., 1934, he fixed its value at 59·06%, or $15\frac{5}{21}$ grains of gold ·900 fine. This was equal to a price for gold of $35 a fine oz. (old price, $20·67183). The President's power to alter the gold content of the dollar to 50% of its value, which was extended by Congress in 1937, 1939 and 1941, was not again extended in 1943.

At the time of the banking crisis in March, 1933, gold payments by banks and the Treasury were suspended by the Government, and the Secretary of the Treasury in April placed an embargo on gold exports. Steps were taken to withdraw from circulation all gold coin and gold certificates.

The Silver Purchase Act of 1934 declared it to be the policy of the United States to increase the amount of silver in its monetary stocks with the aim of having and maintaining one-fourth of their monetary value in silver and three-fourths in gold, and the Treasury was directed to purchase silver at

home or abroad to achieve this end. The President was also authorized to require the delivery to the United States Government of all silver within the country in exchange for coin or currency; this he did on 9 Aug., 1934, authorizing payment of 50 cents a fine troy oz. for silver delivered pursuant to the executive order.

Currency in the United States for many years has comprised several varieties. Prior to May, 1933, the legal tender qualities of these classes varied, but in that month all types of currency were made equally legal tender.

Only four of the seven kinds of notes outstanding are important, (1) Federal Reserve notes in denominations of $5, $10, $20, $50, $100, $500, $1,000, $5,000 and $10,000; (2) silver certificates in denominations of $1, $5 and $10; (3) United States notes, in denominations of $2 and $5, and (4) Federal Reserve Bank notes, in denominations of $5, $10, $20, $50 and $100. Other kinds outstanding but not in general circulation are (1) National Bank notes; (2) gold certificates; (3) Treasury notes of 1890.

Federal Reserve notes are redeemable in lawful money (but not in gold) on demand at any Federal Reserve Bank or the United States Treasury. They are obligations of the United States and a first lien on the assets of the Federal Reserve Banks through which they are issued. Each of the 12 banks issues them against the security of an equal volume of collateral. In addition, each issuing bank must set aside a reserve in gold certificates, equal to not less than 25% of its notes in actual circulation.

On 18 Sept., 1949, the British Government fixed the official pound-dollar selling rate at $2·79⅞ and buying rate at $2·80¼. The free rate has ranged from $4·9440 (average for 1937) to $3·8300 in 1940, recovering to $4·0350 in 1942. Average for 1949, $3 6872; for 1950, $2·8007.

Gold coins (of the old weight and fineness) were $20, $10, $5 and $2½ pieces called *double eagles*, *eagles*, *half-eagles* and *quarter-eagles*. The old eagle weighed 258 grains or 16·7181 grammes ·900 fine, and therefore contained 232·2 grains or 15 0463 grammes of fine gold. Except for collectors' holdings, these are no longer legally in circulation. The stock of gold bullion, held by the Treasury on 30 June, 1950, was 692,306,293 fine oz., valued at $24,230,720,268, of which 356,669,010 fine oz. were stored at Fort Knox; stock of silver bullion was 1,734,158,359 fine oz. Estimated stock of domestic coin was $1,872,619,658, of which $492,582,858 were standard silver dollars and the remainder silver and other subsidiary coin.

The silver dollar weighs 412·5 [illegible] 900 fine, and therefore contains 371·25 grains or [illegible] Subsidiary silver coins contain 347 228 grain[illegible] these are the half-dollar, quarter-dollar and dime (one-tenth). Minor coins currently issued are the cupro-nickel 5-cent piece and the bronze 1-cent piece.

British weights and measures are usually employed, but the old Winchester bushel and wine gallon are used instead of the new or imperial standards:—*Wine Gallon* = 0·83268 imperial gallon; *Bushel* = 0·9690 imperial bushel. Instead of the British cwt. of 112 lb., one of 100 lb. is used; the *short* or *net ton* contains 2,000 lb.; the *long* or *gross ton*, 2,240 lb.

Diplomatic Representatives.

1. Of the United States in Great Britain (1 Grosvenor Square, S.W.1).

Ambassador.—Walter Sherman Gifford (accredited 21 Dec., 1950).

Minister.—Julius C. Holmes.

Counsellors.—Charles F. Baldwin (*Economic*); Mallory Browne (*Public Affairs*); James K. Penfield (*Political*).

First Secretaries.—John W. Bailey; Barry T. Benson; Paul C. Hutton;

Douglas Jenkins, Jr.; Jack C. McDermott; Miss Kathleen Molesworth; Ben T. Moore; Joseph Palmer, 2nd; Arthur R. Ringwalt; Merritt K. Ruddock; William C. Trimble; Miss Frances E. Willis.

Senior Military Attaché and Air Attaché.—Brig.-General Jack D. Wood.

Army Attaché.—Brig.-General Howard E. Kessinger.

Naval Attaché and Naval Attaché for Air.—Rear-Admiral Delbert S. Cornwell.

Labour Attaché.—Glenn R. Atkinson.

Publications Attaché.—James G. Chandler.

Legal Attaché.—J. A. Cimperman.

Financial Attaché.—Paul D. Dickens.

Treasury Attaché.—Charles R. Howard.

Shipping Attaché.—Harvey Klemmer.

Civil Air Attaché.—Ernest A. Lister.

Agricultural Attaché.—P. O. Nyhus.

There are Consular representatives in Belfast, Birmingham, Bradford, Cardiff, Edinburgh, Glasgow, Liverpool, London, Manchester, Newcastle, Southampton.

2. OF GREAT BRITAIN IN THE UNITED STATES.

Ambassador.—Sir Oliver Shewell Franks, P.C., K.C.B., C.B.E. (accredited 3 June, 1948).

Ministers.—C. E. Steel, C.M.G., M.V.O.; C. Empson, C.M.G. (*Commercial*); S[illegible] [illegible]ne, K.C.M.G. (*Head of U.K. Treasury and Supply Del.*); Sir [illegible], K.C.B., C.V.O. (*Economic*); Viscount Knollys, K.C.M.G., M.B.E., D.F.C. (*Raw Materials Section*).

Counsellors.—F. S. Tomlinson; C. A. G. de J. Meade; A. Christelow, C.M.G.; A. Mackay (*Financial*); B. A. B. Burrows C.M.G.; A. N. Morgan; H. Jones, O.B.E.; J. Currie, O.B.E. (*Commercial*); R. Burns; G. E. M. McDougall, H. O. Hooper; P. H. Gore-Booth, C.M.G. (*Head of British Information Services*); A. McD. Gordon, C.M.G. (*Labour*).

Secretaries.—I. F. Porter (*Adviser on German Affairs*); P. S. Stephens; J. H. A. Watson; D. A. Greenhill, O.B.E.; F. W. Marten, M.C.; Sir Robert Mackenzie, Bart.; Earl Jellicoe, D.S.O., M.C.; H. A. R. Philby, O.B.E.; J. A. Jukes; J. G. Boyd; Brig. J. H. Tiltman, C.B.E., M.C.; G. T. D. Patterson; R. H. Belcher; J. O. Rennie (*Commercial*); J. R. W. Wilby; C. H. Eborall; E. S. Jones; Miss C. J. Polak; N. W. H. Gaydon (*British Information Services*); J. R. Carter (*Education*); H. F. T. Smith (*Information*); H. F. B. Fane, M.B.E. (*Labour*).

Naval Attaché.—Capt. J. R. B. Longden, O.B.E., R.N.

Military Attaché.—Col. D. M. L. Gordon-Watson, O.B.E., M.C.

Air Attaché.—Group Captain M. G. Philpott.

Civil Air Attaché.—Christopher Clarkson, A.F.C.

Petroleum Attaché.—J. A. Beckett.

Attaché for Scientific Questions.—Dr. W. A. Macfarlane.

Shipping Attaché.—S. R. Walton.

Agricultural Attaché.—Prof. R. G. Baskett, M.Sc., O.B.E.

Food Attaché.—R. E. Stedman.

Attaché for Colonial Affairs.—J. K. Thompson.

There are Consular representatives at all the important centres, including Baltimore, Boston, Chicago, Cincinnati, Denver, Detroit, Honolulu, Houston, Jacksonville, Kansas City, Los Angeles, New Orleans, New York, Norfolk (Va.), Philadelphia, Portland (Oregon), St. Louis, San Francisco, Seattle, Washington, D.C.

Books of Reference concerning the United States.

I. Statistical Information.

Within the Federal Government of the United States, responsibilities for the collection, compilation, analysis and publication of statistics are decentralized among a number of agencies, with specified responsibilities for [illegible] in particular areas. In addition, most agencies of the Government [illegible] as a by-product of their administrative or [illegible] Responsibility for co-ordinating the decentralized [illegible] of Statistical Standards, Bureau of the Budget, Washington 25, D.C., as a part of the Executive Office of the President. This Division reviews all proposed collections of statistical data to avoid duplication or overlapping; promotes the use of improved statistical techniques; develops standard definitions and classifications so that the data collected by different agencies are comparable; serves as liaison between federal agencies and international organizations and as an information centre on government statistical programmes. It is headed by Stuart A. Rice, who is also the United States representative on the United Nations Statistical Commission. The Division does not itself collect or publish statistics.

The major general-purpose statistical agencies and their principal areas of responsibility are —

(1) Bureau of the Census in the Department of Commerce (Roy V. Peel, Director).— Decennial censuses of population and housing and quinquennial censuses of agriculture, manufactures and business; current statistics on population and the labour force, manufacturing activity and commodity production, retail and wholesale trade and services, foreign [illegible] finances and operations.

[illegible] the Department of Labor (Ewan Clague, Commissioner) [illegible] -hours, labour turnover, industrial accidents [illegible] ung agreements; construction; industrial productivity; wholesale prices, retail prices and urban consumers' price indexes; income and expenditures of urban families.

(3) Bureau of Agricultural Economics in the Department of Agriculture (Oris V. Wells Chief).—Statistics on crop and livestock production and inventories; crop forecasts, food processing and food consumption, farm population, labour and wages; farm management farm ownership values, transfers, taxation and finance; prices farmers pay and receive farm income.

(4) National Office of Vital Statistics in the Public Health Service, Federal Security Agency (Halbert L. Dunn, Chief) — [illegible] divorce

(5) Bureau of Mines in the Dep[illegible] Statistics on production, consumption and stocks of metals and minerals, and on injuries in mineral industries.

Other agencies in which statistics are an important by-product of regulatory or other administrative functions include: Social Security Administration in the Federal Security Agency; Bureau of Internal Revenue in the Treasury Department; Federal Power Commission; Federal Trade Commission; Interstate Commerce Commission; and the Securities and Exchange Commission.

Among the more important statistical publications of a fairly general nature are .—

Statistical Abstract of the [illegible] e Bureau of the Census, Department of Commerce. Annual. It [illegible] on the industrial, social, political and economic organization of the United States, with a representative selection from most of

the important statistical publications. *Survey of Current Business*, published by the Office of Business Economics, Department of Commerce. Monthly. Interpretive text and charts reviewing business trends, etc.; official estimates of national income. *Economic Indicators*, prepared by the Council of Economic Advisers and published by the Congressional Joint Committee on the Economic Report. Monthly. Tables and charts presenting current data on the total output of the economy; prices; employment and wages; production and business activity; purchasing power; money, banking and federal finance. *Monthly Labor Review*, published by the Bureau of Labor Statistics, Department of Labor. *Federal Reserve Bulletin*, published by the Board of Governors of the Federal Reserve System. Monthly. Current data on money and banking and other economic series. Federal Reserve indexes of industrial [illegible] financial statistics. *Treasury Bulletin*, published by the [illegible], Department of the Treasury. Monthly. Current coverage of federal fiscal statistics; international capital movements. *Minerals Yearbook*, published by the Bureau of Mines, Department of the Interior. Annual. *Agricultural Statistics*, published by the Department of Agriculture. Annual. *Crops and Markets*, published by the Bureau of Agricultural Economics in the Department of Agriculture. Monthly. Crop report and market statistics. *Foreign Agriculture*, published by the Office of Foreign Agricultural Relations, Department of Agriculture. Monthly. Foreign agricultural production, foreign [illegible] ies relating to [illegible] international trade in [illegible] *of the United States*, published by the Public Health [illegible] Agency. Annual. Natality and mortality data tabulated by place of occurrence, with supplemental tables for Hawaii, Puerto Rico and the Virgin Islands; and tabulated by place of residence.

An annotated bibliography of about 100 periodical statistical publications is included in 'Statistical Services of the United States Government,' a pamphlet issued by the Division of Statistical Standards [illegible] of the statistical system of the United States and the [illegible].

II. Other Official Publications.

Historical Statistics of the United States, 1789-1945. Washington, 1949.

United States Government Manual. Washington, 1944. (Irregularly issued.)

The United States in the World Economy. The International Transactions of the United States during the Inter-war Period. (U.S. Department of Commerce.) Washington, 1943.

The official publications of the United States are issued by the U.S. Government Printing Office and are distributed by the Superintendent of Documents, who issues every two years the *Catalog of the Public Documents of the . . . Congress and of All the Departments of the Government of the United States*. This *Catalog* is kept up to date by *United States Government Publications, Monthly Catalog*, and supplemented by *Price Lists*. Each *Price List* is devoted to a special subject or type of material, e.g., *American History* or *Census*. Anne M. *Boyd's United States Government Publications* (New York, 1941) furnishes an excellent descriptive list of the important publications, together with histories of each department, agency and commission. Analytical description of publications also appears in Laurence F. *Schmeckebier's Government Publications and Their Use* (Washington, 1939).

Treaties and other International Acts of the United States of America. (Edited by Hunter *Miller*.) Washington, 1931, to date. Treaty series. Washington, 1929 to date.

A Bibliography of Books and Articles on United States and Canadian History. (Issued by the American Historical Association.) Washington. Annual

Bemis (S. F.) and *Griffin* (G. S.), Guide to the Diplomatic History of the United States, 1775-1921. Washington, 1935.

Proudfoot (M. J.), Measurement of Geographic Area (16th Census of the U.S.A. 1940).

III. Non-Official Publications.

American Year Book. New York. Annual.

Who's Who in America [illegible] Biennial, with monthly supplement.

A Select [illegible] of the United States. Compiled by Allan *Nevins*. (Historical [illegible], No. 121.) London, 1942.

American Foreign Policy Series, ed. Sumner Wells (Harvard University Press): *E. A. Speiser*, The U.S. and the Near East (1947); *C. Brinton*, The U.S. and Britain (rev. ed. 1948); *J. K. Fairbank*, The U.S. and China (1948); *V. M. Dean*, The U.S. and Russia (1948); *D. Perkins*, The U.S. and the Caribbean (1948); *A. P. Whitaker*, The U.S. and South America (1948).

STATES AND TERRITORIES.

For information as to State and Local Government, see under UNITED STATES, *p.* 556 and *p.* 576.

Against the names of the Governors and the Secretaries of State, (D.) *stands for Democrat and* (R.) *for Republican.*

Official publications of the various states and insular possessions are listed in the *Monthly Check-List of State Publications*, issued by the Library of Congress since 1910. Their character and contents are discussed in J. K. *Wilcox's Manual on the Use of State Publications* (1940). Of great importance bibliographically are the publications of the Historical Records Survey and the American Imprints Inventory, which record local archives, official publications and state imprints. These publications supplement those of state historical societies which usually publish journals and monographs on state and local history. A [illegible] statistical data is the material issued by the various state planning [illegible], to which should be added the *Financial Statistics of State and Local Governments* issued by the U.S. Bureau of the Census.

Publications covering more than one State.

Book of the States. Chicago, 1935 to date. Biennial.
Appleton (J. B.), The Pacific Northwest: A Selected Bibliography covering Completed Research in the Natural Resource and Socio-Economic Fields. Portland, Ore., 1939.
Freeman (O. W.) and *Martin* (H. H.), The Pacific Northwest: A Re[illegible]man and Economic Survey of Resources and Development. New York and [illegible], 1942.

ALABAMA.

Constitution and Government.—Alabama, settled in 1699 as part of the French Province of Louisiana, and ceded to the British in 1763, was organized as a territory, 1817, and admitted into the Union on 14 Dec., 1819. The legislature consists of a Senate of 35 members and a House of Representatives of 106 members, all elected for four years. The Governor and Lieutenant-Governor are elected for 4 years. The state is divided into 67 counties. The capital is Montgomery. The state is represented in Congress by 2 senators and 9 representatives. Alabama is one of 6 southern states which disfranchise those who have not paid a poll tax. In 18 of the 67 counties Negroes constitute 50% or more of the population. Voters in 1948 numbered 349,284 out of the potential electorate of 1,564,000.

Governor.—Gordon Persons (D.), 1951–55 ($12,000).
Secretary of State.—Mrs. Agnes Baggett (D.).

Area and Population.—Area, 51,609 square miles, including 531 square miles of inland water. Census population, 1 April, 1950, 3,061,743, an increase of 228,782 or 8·1% over that of 1940. Birth rate, 1948, 29·4 per

1,000 population (national average, 24·2); death rate, 9·2 (9·9). Births, 1949, were 85,372; deaths, 26,620.

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,228,832	908,282	909	70	2,138,093	41·7
1920	1,447,032	900,652	405	85	2,348,174	45·8
1930	1,700,844	944,834	465	105	2,646,248	51·8
1940	1,849,097	983,290	464	110	2,832,961	55·5
Male . .	926,996	472,590	244	71	1,399,901	—
Female .	922,101	510,700	220	39	1,433,060	—

The foreign-born white population (1940) numbered 11,937 (0·4% of the total population of the state), of whom 1,699 were Italian, 1,530 German and 1,191 (10%) English. Of the total population in 1940, 30·2% were urban, 34·6% Negro and 31·5% (682,366 males and 211,482 females) were gainfully employed. Number of occupied dwelling units, 673,815 of 4·02 persons. Aliens registered in Dec., 1940, were 5,132.

The large cities (census population in 1950) were :—Birmingham, 298,747; Mobile, 127,010; Montgomery (capital), 105,715.

Religion, Education and Welfare.—Chief religious bodies (1936) are :—Negro Baptists (with 375,084), Southern Baptists [illegible] Episcopal (155,416), Roman Catholic, Presbyterian, [illegible] Total membership, all denominations, 1,138,472.

In 1940, of persons between the ages of 5 and 24 years of age (1,188,684), 617,572, or 52·0%, were attending school. In 1948–49 the elementary and high schools reported 21,115 teachers and 657,359 enrolled pupils; there are separate schools for coloured pupils numbering 233,699, with 7,036 teachers. Total public expenditure on education, $60,163,000. For superior and professional education the most important (1949–50) institutions are : the State University of Alabama (founded 1831) with 800 instructors and 10,099 students; Alabama Polytechnic Institute, 425 instructors and 8,834 students; Tuskegee Institute (coloured; founded in 1881), 220 teachers and 2,404 students.

Segregation of the Negroes is enforced by statutes requiring separate schools (except, specifically, not schools for deaf and blind children); separate transportation, including buses; separation in mental hospitals, poor-houses and penal institutions. Marriage between white and coloured persons is prohibited. In 1919 Alabama passed a law permitting, under legal safeguards, the sterilization of feeble-minded persons; up to 1 Jan., 1950, 129 men and 95 women had thus been sterilized.

In 24 counties the state controls the sale of alcoholic beverages, while 43 counties remain 'bone dry.' Unemployment Insurance was adopted in 1935. In June, 1950, there were 81,284 recipients of Old Age Assistance receiving an average of $20·49 per month. Approved hospitals registered with the American Medical Association numbered 109 in 1949, with 19,281 beds. In Dec., 1949, hospitals for mental diseases had 6,122 patients or 202·2 per 100,000 population (national average, 1945, was 363·2). Penalty for murder may be death by electrocution.

Finance.—General revenues of the state government for the fisca year ending 30 Sept., 1950, were $303,857,293; taxation furnished 60·4%, federal and other grants 24·5%, the alcoholic beverage monopoly

·5%. Expenditures were $304,798,946, of which debt retirement took 3,683,324, and aid to other governmental units, $24,535,399.

The net long-term debt on 30 Sept., 1949, amounted to $42,465,000.

Production and Industry.—Alabama is largely an agricultural state; ıe number of farms in 1945 was 223,369; the farm area was 19,067,844 ɔres, of which 7,412,380 acres were used as crop land; value of farm ınd and buildings was $559,742,689. Since the enactment of a Soil onservation Act in 1939, 12 soil conservation districts have been estab-shed embracing, in 1950, 32,689,920 acres, of which 19,067,844 acres were ı 223,369 farms. Chief feature is the 'plantation' system, represented by 5,431 large units farmed by tenants or share-croppers and occupying 28·7% f all farm land and with 23·5% of the farm population. In 1945, 35,953 ırms (16% of the 220,522 farms reporting) had a gross produce, for sale farm consumption, valued at less than $400; 36,190 farms had produce alued at $2,000 or more. Tenant-farmers (1945) operated 49·1% of all ırms and 15·7% of farm lands.

Cash income, 1949, from crops, $221,885,000, and from livestock, 123,794,000. Chief crops are peaches, maize (57,456,000 bushels in 1949), ıts, potatoes, sweet potatoes (4,565,000 bushels) and peanuts (365,025,000 ·.). Sugar cane is largely grown and 1,820,000 gallons of syrup were anufactured in 1949. In 1949 the cotton yield was 865,000 bales (average,)38–47, 901,000 bales) from 1,810,000 acres. Area of national forest lands ı 30 June, 1948, 2,435,745 acres. On 1 Jan., 1950, the livestock com-ɔised 56,000 horses, 190,000 mules, 430,000 milch cows, 1,330,000 all cattle, 2,000 sheep and 1,225,000 swine.

In 1947 (federal census) there were 3,334 manufacturing establishments, nploying 186,000 production workers, earning $372,000,000; value added y manufacture was $877,000,000 compared with $246,000,000 in 1939. on ore, 1948, from 24 mines amounted to 9,578,472 long tons; coal, 1948, 3,040,000 short tons; coke, 6,015,000 tons; Portland cement, 9,908,219 ırrels. The mineral output in 1948 was valued at $182,987,000. Lumber ıt, 1947, 1,795 million board feet.

The chief port is Mobile, through which there is a large ocean-going ade; the port can accommodate 22 ocean-going vessels. The larger rivers the state are navigable (except at low water) for several hundred miles; ıe Alabama River for 400 miles. In 1947 the railways had a length of 4,842 iles, exclusive of 300 miles of electric railway. In 1949 the state had 97 rports, including 32 municipal; 33 were lighted. The state system of ads comprised 6,722 miles in 1947; total highways, 60,048 miles.

ARIZONA.

Government.—Arizona was settled in 1732, organized as a Territory 1863 and became a state on 14 Feb., 1912. The state constitution aced the government under direct control of the people through the ıitiative, Referendum and the Recall. The state Senate consists of 19 embers and the House of Representatives of 58, all elected for 2 years

Arizona sends to Congress 2 representatives (each elected from a separate district) and 2 senators. A federal court ruled in 1949 that Indians, previously disfranchised, are entitled to vote.

The state capital is Phoenix (population in 1950, 105,003). Tucson had a population of 44,395. The state is divided into 14 counties.

Governor.—J. Howard Pyle (R.), 1951–52 ($10,000).
Secretary of State.—Wesley Bolin (D.).

Area and Population.—Area, 113,909 square miles, including 329 square miles of water. Of the total area (72,691,200 acres) 53,363,273 were owned by the Federal Government in 1944, including 19,457,374 acres held by the Office of Indian Affairs. Census population on 1 April, 1950, was 749,587, an increase of 50·1% over 1940. Birth rate, 1947, 30·5 per 1,000 population (national average, 26·0); death rate, 10·3 per 1,000. Births, 1949, 19,714; deaths, 6,118.

Population in 4 census years (with distribution by sex, 1940) :—

Years	White	Negro	Indian	Chinese	Japanese	Total	Per sq. mile
1910	171,468	2,009	29,201	1,305	371	204,354	1·8
1920	291,449	8,005	32,989	1,137	550	334,162	2 9
1930	378,551	10,749	43,726	1,110	879	435,573	3·8
1940	426,792	14,993	55,076	1,449	632	499,261	4 4
Male. .	219,958	8,423	28,218	965	354	258,170	—
Female .	206,834	6,570	26,858	484	278	241,091	—

In 1940, 36,837, or 7·3% of the total population were foreign-born whites, of whom 24,902 (67·8%) were Mexicans, 1,687 were English, 1,600 Canadians, 1,117 Germans, 715 Italian and 621 Irish. Of the total population in 1940, 33·3% were urban, 2·6% Negro; 30·0% (117,427 males and 32,746 females, not including those on public emergency projects) were unemployed. In 1940 census, 4,146 men and 4,098 women were [illegible], the number of private families was 131,897 (of 3·68 persons). Aliens registered in Dec., 1940, were 31,954.

Religion and Education.—The leading religious bodies are: Roman Catholics (94,043 adherents in 1936), Mormons (22,062), Methodists (10,571), Presbyterians (6,163); total membership, all denominations, 165,020. School attendance is compulsory between the ages of 8 and 16 years, and instruction is free for pupils from 6 to 21 years of age. Persons between the age of 5 and 20 years attending school in 1940 numbered 157,863, or 68·7% of the total. The enrolled pupils in 1949–50 in the 449 district elementary schools were 132,754, with 3,852 teachers; 75 public high schools had 31,002 pupils and 1,295 teachers. There are state colleges at Tempe and Flagstaff. The total expenditure for public schools (1949–50) was $31,213,889. Teachers' salaries averaged, 1948–49, $3,500 (national average, $2,644). The state maintains a university and a state agricultural school, both at Tucson, and 2 junior colleges at Thatcher and Phoenix.

Segregation of races is mandatory in the elementary schools and permissible in high schools. Marriage is forbidden between white and coloured persons.

Welfare.—Old Age Assistance (maximum $60 a month) is given, with federal aid, to needy citizens 65 years of age or older who have resided in the state at least 5 years within the nine years immediately preceding applica-

tion. On 30 June, 1950, 13,343 persons were drawing an average of $51·46 per month. In 1949 the state granted to Indians the right to social security benefits under the federal act; payments are 85% of those accorded to white beneficiaries. Hospitals registered by the American Medical Association numbered 64, with 6,467 beds in 1949. Hospitals for mental diseases had 1,142 patients in Dec., 1945, or 193·8 per 100,000 of the population (national average, 363·2); patients in Sept., 1950, numbered 1,557.

In 1929, Arizona adopted a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 10 men and 11 women had been sterilized.

A 'right-to-work' amendment to the constitution, adopted 5 Nov., 1946, makes illegal any concessions to trade-union demands for a 'closed shop.'

The Arizona state prison on 1 July, 1950, held 903 men and 26 women: lethal gas is used for the execution of the death sentence on murderers. Of the 17 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 14 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—Receipts and expenditure, General Fund, in the year ending 30 June, 1950, were (in dollars):—

Balance in hand, 1 July, 1949	12,117,985	Disbursements, 1949–50 .	37,685,181
Receipts, 1949–50 . .	32,397,185	Balance, 30 June, 1950 .	6,829,989
Total . . .	44,515,170	Total . . .	44,515,170

Bonded and contingent debt 30 June, 1950, was $8,882,775; net value of taxable real and personal property (1949) was $756,219,540.

Production and Industry.—Arizona, despite its dry climate, is well suited for agriculture along the water-courses and where irrigation is practised on a large scale from great reservoirs constructed by the United States as well as by the state government and private interests. Irrigated area, 1949, 1,000,000 acres. The wide pasture lands are favourable for the rearing of cattle and sheep, but numbers are either stationary or declining compared with 1920.

In 1945 Arizona contained 13,142 farms and ranches with 569,657 acres of crop land, out of a total farm and pastoral area of 37,856,370 acres; value of farm lands and buildings, $287,876,255. Farming is highly commercialized and mechanized, and concentrated largely on cotton picked by machines and by Indians, Mexicans and migratory workers from Oklahoma, Texas and other states. The average farm (1945) was 2,880·6 acres, valued at $21,905. Area under cotton (1949), 374,000 acres, from which 540,000 bales of short staple and Egyptian cotton were harvested.

Cash income, 1949, from crops, $164,909,000; from livestock, $71,395,000. Most important cereals (1949) were grain sorghums, 2,684,000 bushels, and barley, 5,440,000 bushels. Other crops, 1949, were oranges, 710,000 boxes; grapefruit, 1,800,000 boxes. Lettuce and other truck crops are important. On 1 Jan., 1950, there were 65,000 horses, 5,000 mules, 849,000 all cattle, 47,000 milch cows, 382,000 sheep and 24,000 swine. The wool clip in 1950 amounted to 2,647,000 lb. from 353,000 sheep; mohair production (1950) was 81,200 lb. from 29,000 goats. The national forests in the state have an area (30 June, 1949) of 12,159,018 acres.

In 1950 there were 47 soil conservation districts embracing 1,160,091 acres, all in farm land (7,966 farms and ranches).

The mining industries of the state are important. The production of gold in 1949 was 108,993 fine oz.; silver, 4,970,736 fine oz.; copper, 375,121 short tons in 1948, leading all states; lead, 29,899 tons; zinc, 54,478 tons; mercury (1946), 95 flasks (of 76 lb.); molybdenum (ranked sixth as producer, 1948). Arizona shipped 23 short tons of high-grade tungsten concentrates in 1948. The total value of minerals mined in 1948 was $201,244,000. The leading industry is the mining, smelting and refining of copper.

In 1947 (federal census), 545 manufacturing establishments had 11,167 production workers, earning $29,680,000; value added by manufacture, $103,958,000.

In 1949 there were 2,209 miles of steam railroad. Airports, 1950, numbered 163, of which 45 were municipal; 32 were lighted. The state maintains 29,117 miles of road, of which 6,564 miles were surfaced in 1950.

ARKANSAS.

Government.—Arkansas was settled in 1686, made a Territory in 1819 and admitted into the Union on 15 June, 1836. The name is Indian, and means 'the people down stream.' The General Assembly consists of a Senate of 35 members, elected for 4 years, partially renewed every 2 years, and a House of Representatives of 100 members elected for 2 years. The sessions are biennial and usually limited to 60 days. The Governor and Lieutenant-Governor are elected for 2 years. The state is divided into 75 counties; the capital is Little Rock. The state is represented in Congress by two senators and seven representatives. Arkansas is one of 6 southern states which require payment of a poll tax as a form of registration for voting. In 9 of the 75 counties Negroes constitute 50% or more of the population. Voters in 1948 numbered 242,475, or 22·0% of the potential electorate.

Governor.—Sidney S. McMath (D.), 1951–53 ($10,000).
Secretary of State.—C. G. Hall (D.).

Area and Population.—Area, 53,103 square miles (377 square miles being inland water). Census population on 1 April, 1950, was 1,909,511, a decrease of 39,876 or 2·0% from that of 1940. Birth rate, 1948, 24·8 per 1,000 population; death rate, 7·9 (national average, 9·9 per 1,000). Births, 1948, were 48,036; deaths, 15,224.

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,131,026	442,891	460	72	1,574,449	30·0
1920	1,279,757	472,220	106	121	1,752,204	33·4
1930	1,375,315	478,463	408	296	1,854,482	35·2
1940	1,466,084	482,578	278	447	1,949,387	37·0
Male . .	744,238	238,236	148	294	982,916	—
Female .	721,846	244,342	130	153	966,471	—

Of the foreign-born white population (7,692) which, in 1940, represented 0·4% of the total population, 2,023 (26·2%) were German, 791 Italian, 560 Canadians, and 513 (8·8%) English. Of the total population in 1940, 22·2% were urban, 24·7% Negro, and 30% (485,846 males and 98,098 females) were gainfully employed. Divorced persons in 1940 numbered 8,054 men and 10,956 women; the number of private families was 497,820 (of 3·9 persons). Aliens registered in Dec., 1940, numbered 3,389.

Little Rock (capital) had a population of 101,367 in 1950; Fort Smith, 47,864; Hot Springs, 29,298; Pine Bluff, 37,147.

Education and Welfare.—In 1940 of those between the ages of 5 and 24, 425,224 or 54·3% were attending schools. The state provides separate schools for white and coloured children. The 3,718 elementary and secondary schools, 1948–49, had 12,805 teachers (including 2,573 coloured) and 417,430 pupils, of whom 110,192 were coloured. Teachers' salaries in white schools, 1948–49, averaged $1,718 (in Negro schools, $1,262). Total state expenditure on schools in 1948–49 was $34,556,000 Higher education is provided at the University of Arkansas at Fayetteville, and the State Teachers' College at Conway. The Agricultural, Mechanical and Normal College at Pine Bluff is for coloured students. Expenditure on higher education in 1947–48, $5,301,185.

Segregation of N[illegible] is enforced by statutes covering educational institutions (but, [illegible] not separate schools for deaf and blind pupils); transportation, including sleeping cars, buses and street cars; race tracks; tuberculosis hospitals; separate polling places in elections. Marriage is forbidden between white and coloured persons.

In June, 1950, 66,722 persons were drawing Old Age Assistance at an average amount of $25·88 per month. There were 69 hospitals (with 13,585 beds) registered with the American Medical Association in 1949. In December, 1945, hospitals for mental diseases had 4,733 patients or 275·7 per 100,000 population (national average, 363·2); in 1949, 4,770 patients. Penalty for murder may be death by electrocution.

Of the 78 local jails (city and county) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 73 as sub-standard, unsuitable for the housing of federal prisoners.

The most numerous religious bodies in the state are Baptist (Negro Baptists with 150,664 members in 1936), Southern Baptists (78,825), Methodist (114,924), Roman Catholic and Disciples of Christ. Total membership, all denominations, 570,219.

Finance.—The state's [illegible] the fiscal year ending 30 June, 1949, was $120,024,000, c[illegible] furnished $87,873,000 and federal and other grants $25,668,000. Expenditures were $120,036,000, of which operations took $49,397,000, other governmental units $37,002,000 and debt retirement, $3,535,000.

Net long-term debt on 30 June, 1949, was $110,989,000.

Production and Industry.—Arkansas is [illegible] state. In 1945, 198,769 farms had a total area of 17,455,900 [illegible] farm lands and buildings, $662,770,230. In 1945, 68,590 farms (35% of the total) were under 30 acres; the average farm was 87·8 acres. In 1945, 29,895 farms (15% of the 195,572 farms reporting) had a gross produce, for sale and farm consumption, valued at less than $400. Land erosion is serious. Some 12,216,000 acres (36% of the total) are considered to have lost one-fourth of their top soil, and require drastic curative treatment; 3,286,000 acres (10%) require preventive treatment. Since the passage of a Soil Conservation

Act in 1937, 58 soil conservation districts have been established covering 32,079,540 acres, of which 16,133,160 acres were in 180,130 farms.

Cash income, 1949, from crops, $155,143,000 and from livestock, $372,464,000. In the north the chief crops are maize (28,368,000 bushels in 1949), oats, potatoes, sweet potatoes, hay and forage crops. For 1949 the cotton area was 2,450,000 acres and the yield 1,660,000 bales. Strawberries, picked by migratory workers, are an important cash crop. The cultivation of roses (for perfumes) is pursued locally. Livestock on 1 Jan., 1950, comprised 135,000 horses, 135,000 mules, 1,209,000 all cattle, 444,000 milch cows, 51,000 sheep and 974,000 swine.

Arkansas produces 95% of the country's supply of bauxite for aluminium; shipments, 1948, 1,395,341 long tons dried bauxite equivalent. The state has a large coal area; 1,660,000 short tons were mined in 1948. In 1948, crude petroleum amounted to 31,675,000 barrels; natural gasoline, 94,500,000 gallons, and natural gas (1947), 50,630 million cubic feet. Total mineral output in 1948 was valued at $123,138,000.

Of the industries, the cutting and working of timber is one of the most important. Arkansas, according to the census of manufacture of 1947, had 1,924 manufacturing establishments employing 58,254 production-workers, earning $101,869,000; value added by manufacture, $265,144,000.

In 1947, there were in the state 4,302 miles of steam railway and 122 miles of electric railway. Two commercial airlines serve the state; there were, in 1948, 85 airports (21 municipal); 11 are lighted. State-maintained highways (1948) total 9,259 miles; county highways, 46,291 miles.

CALIFORNIA.

Constitution and Government.—California, first settled in 1769, was from its discovery down to 1846 politically associated with Mexico. On 7 July, 1846, the American flag was hoisted at Monterey, and a proclamation was issued declaring California to be a portion of the United States, and on 2 Feb., 1848, by the treaty of Guadalupe–Hidalgo, the territory was formally ceded by Mexico to the United States, and was admitted to the Union 9 Sept., 1850.

The Senate is composed of 40 members elected for 4 years—half being elected each 2 years—and the Assembly, of 80 members, elected for 2 years. Sessions are held annually. The Governor and Lieutenant-Governor are elected for 4 years. The state capital is Sacramento.

California is represented in Congress by 2 senators and 23 representatives.

The state is divided into 58 counties, one of which—San Francisco—is governed by a board of 11 supervisors elected from the city and county at large. Each of the other counties has a board of 5 supervisors.

Governor.—Earl Warren (R. and D.), 1951–55 ($25,000).
Secretary of State.—Frank M. Jordan (R.).

Area and Population.—Area, 158,693 square miles (1,890 square miles being inland water). In 1944, the federal government owned 46% of the

state (46 million acres); public lands, unappropriated on 30 June, 1948, totalled 16,370,861 acres, practically all either mountains or deserts

Census population, 1 April, 1950, 10,586,223, an increase of 3,678,836 or 53·3% over 1940, leading all states in numbers gained and in percentage increase. The birth rate in 1948 was 23·2 per 1,000 estimated population; the death rate, 9·6. Births in 1948, 240,751; deaths 98,738; marriages, 88,242; divorces, 42,342 (leading all states).

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Japanese	Chinese	Total (incl. all others)	Per sq. mile
1910	2,259,672	21,645	41,356	36,248	2,377,549	15·3
1920	3,264,711	38,763	71,952	28,812	3,426,861	22·0
1930	5,408,260	81,048	97,456	37,361	5,677,251	36·2
1940	6,596,763	124,306	93,717	39,556	6,907,387	44 1
Male . .	3,334,507	61,210	52,550	27,331	3,515,730	—
Female .	3,262,256	63,096	41,167	12,225	3,391,657	—

Of the 1940 population 86·8% are of American birth; even of the Japanese, 60,148 (63·8%) were born in the United States, as were also 22,880 (58·9%) of the Chinese; 870,893 persons were classified as of white foreign birth (11·6% of the total), including 134,312 Mexicans, 100,911 Italians, 95,741 Canadians, 73,345 English, 71,727 Germans and 51,758 Russians. In the official registration of aliens, Dec., 1940, California had 542,464 or 10·8% of the total in the United States. Of the total population in 1940, 71·0% were urban, 2·2% Negro and 42·7% (2,218,459 males and 729,968 females) were gainfully employed; 8·8% (294,414) were 65 years of age or older. The 1940 census showed 86,512 men and 109,078 women divorced; private families numbered 2,146,809.

There are about 27 Indian reservations in the state, with a total area (1945) of 685,279 acres, of which 456,211 acres are under tribal control with an Indian population of 23,281.

The largest cities with census population, 1950 (preliminary) are :—

Los Angeles .	1,957,692	Glendale . .	95,398	South Gate .	50,684
San Francisco .	760,763	San José . .	95,044	Compton .	47,893
Oakland . .	380,576	Fresno . .	90,618	Riverside .	46,399
San Diego .	321,485	Burbank . .	78,318	Inglewood .	46,046

Religion and Education.—The Roman Catholic Church, with 978,902 adherents in 1936, is much stronger than any other single church; next are the Jewish congregations with 151,596 members, Methodists (113,241), Presbyterians and Baptists. Total membership, all denominations, 1,928,439.

The provision in the Education Code authorizing separate schools for children of Indian, Chinese, Japanese or Mongolian parentage, was repealed in 1947.

The potential school population is soaring; on 1 July, 1948, those under 21 years of age numbered 3,180,000, an increase since 1940 of 1,169,000 or 58·1%, the largest increase, both in numbers and percentage, in the country. Adult population, in this period, rose 38·5%.

In 1940, of persons between the ages of 5 and 24, 1,263,913 (67·2%) were attending school (the national average was 57·7%). Full-time attendance at school is compulsory for children from 8–16 years of age for a minimum of 170 days per annum, and part-time attendance is required from 16 to 18 years. In 1948–49 the average daily attendance was: kindergartens and elementary schools, 1,057,071 pupils; high schools, 383,715; junior colleges, 80,245. Teachers, 1948–49, numbered 53,824, with salaries averaging $4,178, highest in the country (national average, $2,846). Seven state teachers' colleges had about 7,000 students. In 1948–49, total [illegible] expenditures—the second largest in the country—were [illegible] Private and parochial schools have 3,600 teachers and 100,700 students.

The University of California has colleges for resident instruction and research at Berkeley, Davis, San Francisco, Los Angeles, Mount Hamilton (the Lick Astronomical Department), Riverside, La Jolla (the Scripps Institution of Oceanography) and Santa Barbara; during the college year of 1948–49, there were at all centres 3,754 officers of instruction and 48,943 resident students; the total annual income of the University is about $50 million. Stanford University, near Palo Alto, was founded in 1885 by Mr. and Mrs. Leland Stanford in memory of their son and opened in 1891; in 1948–49 it had 934 professors and teachers and 10,244 students; its total endowment is $38,424,326. The University of Southern California at Los Angeles (Methodist) had 1,188 instructors and 28,323 students in 1948–49.

The Civil Rights Statutes forbid any discriminations against *citizens* on account of race or colour by inns, restaurants, theatres and other places of public accommodation, or for employment on public works. The Civil Service Act forbids discrimination against applicants on account of race, colour, religion, sex or marital status, while the School Code forbids appointment boards to question teacher-candidates regarding their 'political or religious opinions, affiliations, race, colour or marital status'; teachers are forbidden to cast reflections upon 'citizens of the United States because of their race, colour or creed.' Other Acts declare illegal and void all marriages of white persons with Negroes, mulattoes, Mongolians and members of the Malay race, but on 1 Oct., 1948, the State Supreme Court, by 5 to 2, held that an Act forbidding Negro-white marriages was unconstitutional on the grounds that marriage is 'a fundamental right of free man' and not merely a 'civil contract subject to State regulation.' There is also an Act preventing aliens from owning land, but another Supreme Court decision, 1948, is said by state authorities to have made this Act unenforceable.

Welfare.—On 31 Oct., 1949, the state had 272 institutions for the care of children, 76 for the aged, 9 state mental hospitals (30,709 patients), 4 state institutions for the mentally deficient (6,473), as well as Youth Authority facilities with 2,223 wards; 58 county jails; and 6 state prisons, with 10,751 inmates. In 1945, 7,088 persons (102·8 per 100,000 population) were convicted and sentenced for major offences; 86 were convicted of murder and 4 sentenced to death. In 1948, 11 were sentenced to death (by lethal gas).

Before marriage licences are granted, both applicants must pass a Wassermann or similar laboratory blood test. California is one of the states whose birth certificates do not disclose illegitimacy. In 1909 California passed a law permitting, under legal [illegible] the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 9,985 men and 9,438 women had been thus sterilized.

Old Age Assistance (up to $75 per month) has been established for those 65 years or older who have been citizens and residents of the state for 15

years, and have real property assets not exceeding $3,000 or personal property not exceeding $600. In June, 1950, 267,960 aged persons were receiving an average of $70·68 per month; 10,389 blind persons were receiving an average of $82·60 per month, and 114,935 needy children in 50,116 families were receiving $110·63 per month per family; county indigent aid (1949) was being given to 88,889 persons (an average of $26·74 per person). In 1949 there were 383 hospitals registered with the American Medical Association; capacity, 98,668 beds. In Dec., 1945, hospitals for mental diseases had 26,503 patients or 326·4 per 100,000 population (national average, 363·2).

Finance.—For the year ending 30 June, 1949, receipts and disbursements were as follows (in dollars):—

Cash in hand, 1 July, 1948 .	239,857,974	Disbursements, 1948–49 .	1,944,655,030
Receipts, 1948–49 . .	1,883,368,839	Cash in hand, 30 June, 1949.	178,571,783
Total . . .	2,123,226,813	Total . . .	2,123,226,813

The net bonded state debt was $176,098,000 on 1 Aug., 1949.

Agriculture and Forestry.—Extending 700 miles from north to south, and intersected by several ranges of mountains, California has almost every variety of climate, from the very wet to the very dry, and from the temperate to the semi-tropical. Of the total surface area (99,634,672 acres), 5·4% were found seriously eroded and 52·3% had little or no erosion in 1939. Since the 'Soil Conservation Act' was passed in 1938, 64 soil conservation districts have been established embracing 12,494,651 acres in 1950, of which 8,576,807 acres are farm land; the total includes the Imperial irrigation district. In 1945 there were 138,917 farms, comprising 35,054,379 acres; the value of all farm lands and buildings was $3,484,548,812. The state leads in large-scale commercial farming, with 2,892 very large farms furnishing 28% of total farm and orchard production in 1940; they employ the bulk of the 200,000 migratory workers for seasonal operations. In 1945 there were 5,939 farms covering 1,000 acres or more. In 1935, 3·5% of the farms, by number, held 62% of all lands in farm. Canning and produce-shipping companies manage directly much of the farming. Cash income, 1949, from crops, $1,309,227,000; from livestock, $717,588,000.

California farming is intensive, with the result that various California counties lead all the counties of the country in output: Los Angeles county in total value of farm products, in number of cows, in milk production and value of dairy products; Sonoma county in poultry and eggs; Imperial county in flax and alfalfa; Santa Clara in plums and prunes; Fresno in grapes, and Orange county (usually) in oranges.

The cereal crops in 1949 were:—Maize, 2,376,000 bushels; winter wheat, 11,470,000 bushels; oats, 4,806,000 bushels; barley, 47,038,000 bushels; rice, 21,462,000 bushels. Principal tree crops (1949):—Wine grapes, 527,000 tons; table grapes, 515,000 tons; raisin grapes, 1,484,000 tons; peaches, 827,000 tons; apricots, 164,000 tons; plums, 90,000 tons; prunes, 166,000 tons; pears, 891,000 tons; apples, 9,520,000 bushels; cherries, 42,700 tons. Citrus fruit crops (1949) were:—Oranges, 41,500,000 boxes; lemons, 12,000,000 boxes; grapefruit, 2,450,000 boxes. Field crops (1949) included:—Beans, 4,696,000 bags; potatoes, 46,230,000 bushels; sugar beet, 2,565,000 short tons.

The hay crop is the most valuable of all crops grown in the state; output, 1949, 5,771,000 tons; alfalfa, 4,281,000 tons; grain sorghum, 3,496,000 bushels; hops, 15,313,000 lb., and cotton, 1,300,000 bales.

On 1 Jan., 1950, the farm animals were:—111,000 horses, 10,000 mules 920,000 milch cows, 2,709,000 all cattle, 1,602,000 sheep and 879,000 swine. The wool clip in 1949 was 13,948,000 lb. from 1,983,000 sheep. Mohair production (1948) was 56,000 lb. from 16,000 goats.

There were (1948) in the state 20 national forests covering a total net area of 23,838,674 acres; 4 national parks with a total net area of 1,697,715 acres; 7 national monuments with a net area of 2,452,515 acres; 66 state parks and 21 state historical monuments with a total area of 552,527 acres and a total ocean frontage of 66 miles; private timber land had an estimated area of 33,039,000 acres.

Mining, Manufactures, etc.—The discovery of gold in 1848 led to the 'gold rush of '49' and subsequent mining on a large scale. In 1948 the gold output was 417,231 fine oz.; silver, 783,880 fine oz.; copper, lead and zinc are also produced. California is one of three most important petroleum-producing states of the Union (Oklahoma and Texas being the other two); in 1949 the output was 332,839,000 barrels. Natural gas (1948) amounted to 591,285 million cubic feet; production of natural [illegible] was 1,112 million gallons; Portland cement, 24,601,892 barrels. Mercury output (1948), 11,188 flasks. The estimated value of all the minerals produced in 1948 was $1,174,674,000, third largest in the U.S.

The federal census of 1947 showed 17,648 manufacturing establishments, employing 530,283 wage-earners earning $1,519,255,000; value added by manufacture, $3,994,981,000 compared with $1,122,545,000 in 1939. It ranks second to Texas in oil refining with (1947) 68 refineries (18,813 employees) with product valued at $967,300,000. California ranks first in the motion picture industry, owing to a climate permitting outdoor pictures 350 days in the year. Los Angeles County now has a big garment-making industry with about 1,000 firms and an output valued at $460 million in 1946. The war brought a steel industry into being; output, 1949, 1,909,913 tons.

Commerce and Communications.—The chief ports are San Francisco (exports in 1948, $385,400,000, and imports, $184,020,446) and Los Angeles (exports, 1948, $246,700,000, and imports, $144,552,389).
