Total mileage of steam railroads (main lines and branches) is 7,988 miles; electric railways, 776 miles; steam railways carried (1949) 91,540,833 short tons of freight and 14,378,075 passengers; and the electric railways, 5,891,768 short tons of freight and 655,605,860 [illegible] 355 automobile stage lines carried 205,208,301 passengers and [illegible],406 tons of freight. In 1949 the state maintained 13,730 miles of improved highway. In 1948, it had 3,350,078 registered motor cars and 403,702 registered trucks. Airports, 1948, numbered 406, including 111 municipal; 130 were lighted.

COLORADO.

Government.—Colorado was first settled in 1858, made a Territory in 1861 and admitted into the Union on 1 August, 1876. The General Assembly consists of a Senate of 35 members elected for 4 years, one-half retiring every 2 years, and of a House of Representatives of 65 members elected for 2 years. Sessions are annual, beginning 1951. The Governor and Lieut.-Governor are elected for 2 years. Qualified as electors are all citizens, male and female (except criminals and insane), 21 years of age, who have resided in the state for 12 months immediately preceding the election. The state is divided into 63 counties. The capital is Denver. The state sends to Congress 2 senators and 4 representatives.

Governor.—Dan Thornton (R.), 1951–53 ($10,000).
Secretary of State.—George J. Baker (D.).

Area and Population.—Area, 104,207 square miles (280 square miles being inland water). Public lands unappropriated and unreserved totalled on 30 June, 1949, 8,091,990 acres (12·2% of the land area). Indian lands, 1950, covered 711,964 acres, of which 704,109 were under tribal control.

Census population, 1 April, 1950, was 1,325,089, an increase of 201,793 or 18·0% since 1940. Birth rate, 1949, was 27·1 per 1,000 population (national average 24·1); death rate, 10·8 (9·7). Births in 1949, 32,846; marriages, 12,628; deaths, 12,375.

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	783,415	11,453	1,482	2,674	799,024	7·7
1920	924,103	11,318	1,383	2,825	939,629	9·1
1930	1,018,793	11,828	1,395	3,775	1,035,791	10·0
1940	1,106,502	12,176	1,360	3,258	1,123,296	10·8
Male . .	560,322	5,832	714	1,910	568,778	—
Female .	546,180	6,344	646	1,348	554,518	—

In 1940, the foreign-born white population numbered 70,471 (6·2% of the total state population), of whom 11,185 were Russian, 8,352 Italian, 7,017 German and 6,360 Mexican. Of the total population in 1940, 52·6% were urban; 1·1% Negro, and 37·5% (329,499 men and 91,994 women) were in the labour market. Denver, the capital, had a population in 1950 (census) of 412,856; the metropolitan area (Adams, Arapahoe, Denver and Jefferson counties) had 560,361 (407,768 in 1940). Other cities with 1950 population: Pueblo, 63,561; Colorado Springs, 45,268; Greeley, 20,286; Boulder, 19,916; Fort Collins, 14,932; Grand Junction, 14,454; Trinidad, 12,206. There were 316,000 occupied dwelling units (3·55 persons).

Religion, Education and Welfare.—Roman Catholics, with 140,797 members in 1936, lead, with Methodists (36,932) and Northern Baptists (20,496) ranking next. Total membership, all denominations, 355,272.

On 30 June, 1949, the public schools had 235,509 pupils and 9,652 teachers, of whom 7,211 were women. The 1,936 school buildings housed 1,525 elementary, 352 senior and junior high schools, 12 junior colleges and 7 evening or 'opportunity' schools. Teachers' salaries, 1948–49, averaged $2,643 (national average, $2,846). Public school expenditure, 1949, $55,143,368. Colorado College, at Colorado Springs, had (1950–51) 62

professors and 1,163 students; University of Colorado, at Boulder, 431 professors and 8,095 students; University of Denver, founded by Territorial Charter in 1864, had 336 teachers and 9,352 students; College of Agriculture and Mechanic Arts at Fort Collins, 256 professors and 3,677 students; Colorado School of Mines at Golden, 88 professors and 1,012 students.

Old Age Assistance was reorganized in 1937 for those citizens 60 years of age or older who have been residents of the state for stated periods, with assets not exceeding $750 in value. In Dec., 1950, 51,880 persons were drawing an average of $77·53 per month (maximum, $85·00). The state pension fund is financed by a 2% tax on sales of merchandise and liquor taxes. In 1945, 740 persons (76·5 per 100,000 of the population) were convicted of major offences, including 14 convicted of murder, of whom 1 was sentenced to death (by lethal gas). Of the state's 60 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 51 as sub-standard, unsuitable for housing Federal prisoners. Approved hospitals, 1949, numbered 101 with 17,900 beds. In Dec., 1948, hospitals for mental diseases had 6,852 patients or 564 per 100,000 population.

Both applicants for a marriage licence must have passed a Wassermann or similar laboratory blood test.

Colorado has a Civil Rights Act (1935) forbidding places of public accommodation to discriminate against any persons on the grounds of race, religion, colour or nationality. No religious test may be applied to teachers or students in the public schools, 'nor shall any distinction or classification of pupils be made on account of race or colour.' An 1897 Act declares void all marriages between white persons and Negroes or mulattoes.

Finance.—The state's general revenue for the year ending 30 June, 1950, was $143,219,911, of which state taxes and other income furnished $104,288,077 and federal grants $38,931,834. General expenditures were $143,125,090, of which operations took $28,388,393; counties, for roads, schools and welfare, $69,780,651; state highways, $24,373,027, and state institutions, $20,583,018.

The net long-term debt on 30 June, 1950, was $7,290,000 in highway warrants and $130,000 of general debt.

Production and Industry.—Farms in 1945 numbered 47,618 (51,436 in 1940), with a total area of 36,217,808 acres (31,527,240 in 1940); value of land and buildings, $564,503,888 ($388,343,847 in 1940). In 1945, 6,234 farms (13% of the farms reporting) had produce for sale or consumption valued at less than $400. Cash income, 1949, from crops, $219,836,000; from livestock, $257,996,000. Important farm industry is the growing of sugar beet on some 147,000 acres (1949).

Of the total surface area (66,718,080 acres), 23·5% were found seriously eroded and only 14·9% with no erosion in 1939; mountains etc. covered 19·4% of the rest. On 1 Oct., 1950, there were 89 soil conservation districts with an acreage of 31,023,248 (46·5% of the total).

Production of principal crops in 1949:—Maize, 14,000,000 bushels; wheat, 49,551,000 bushels; oats, 7,470,000 bushels; barley, 23,256,000 bushels; rye, 350,000 bushels; hay, 2,360,000 tons; dry beans, 2,384,000 bags; potatoes, 18,150,000 bushels; sugar beet, 1,872,000 tons; sorghums for grain, 4,212,000 bushels; broomcorn, 12,100 tons; apples, 1,628,000 bushels; peaches, 2,109,000 bushels; pears, 204,000 bushels; cherries (sour) 3,380 tons; onions, 5,368,000 sacks.

On 1 Jan., 1950, the number of farm animals was:—112,000 horses,

4,000 mules, 202,000 milch cows, 1,746,000 all cattle, 1,186,000 sheep, 351,000 swine. The wool clip in 1950 yielded 10,544,000 lb. of wool from 1,167,000 fleeces. National forests (1950) cover 13,678,060 acres.

Colorado has great mining and smelting industries, coal (5,679,876 tons in 1948) being extensively worked. U.S. Geological Survey said in 1937 that the state's known deposits of available bituminous coal (212 millards or billion tons) exceed those of any other state. World's largest molybdenum mine is at Climax; output from 1914 to 1948 has been about 70% of the country's cumulative total or around 347 million lb. Output, 1949, was 10,752,817 lb. compared with the peak output of 46,133,715 lb. in 1943. Production of vanadium ore in 1947 was 1,912,158lb., or 90% of total U.S. production. In 1949, the gold output was 102,618 oz.; silver 2,894,886 oz.; copper, 2,403 tons; lead, 26,853 short tons; zinc, 47,703 tons; petroleum, 23,459,729 barrels; natural gas, 11,588 million cubic feet. Oil shale reserves are estimated at 270,000 million barrels. Total mineral output in 1949 was valued at $140,501,059. Cumulative total gold production from 1858 through 1948, is 39,379,000 oz., exceeded only by California.

The manufacturing industries (federal census of 1947), showed 1,602 establishments with 44,153 production workers, who earned $109,734,000; value added by manufacture was $286,774,000 compared with $90,330,000 in 1939.

In 1949, 88 electric power plants produced 1,630,959,000 kwh. (steam, 76·3%; hydro-electric, 20·1%; internal combustion 3·5%). By type of ownership production was divided between: private enterprises, 83·1%; municipal, 11·8%; federal projects, 3·9%; state projects, 1·2%.

In 1949, there were in the state 4,304 miles of main-track steam railway, and 308 miles of electric railways. There were (1950) 100 airports, including 43 municipal; 15 are lighted. The state maintained, 1949, 12,361 miles of highway, of which 4,984 miles are hard-surfaced and 5,402 miles gravel-surfaced. Total road mileage, 78,844. Colorado, with its national forests, ranks third in the number of tourists. It has 52 mountain peaks over 14,000 feet high.

CONNECTICUT.

Government.—Connecticut was first settled in 1635 and has been an organized commonwealth since 1637. In 1639 a written constitution was adopted which, it is claimed, was the first in the history of the world formed under the concept of a social compact. This constitution was confirmed by a charter from Charles II in 1662, and replaced in 1818 by a state constitution, framed that year by a constitutional convention. Connecticut was one of the original 13 states of the Union.

The General Assembly consists of a Senate of 36 members and a House of Representatives of 277 members. Members of each House are elected for the term of 2 years; salary, $600 and mileage. Legislative sessions are biennial. The Governor and Lieutenant-Governor are elected for 4 years. All citizens (with necessary exceptions) 21 years of age, resident in the state for a year and in the town for 6 months preceding the election, have

the right of suffrage provided that they can read the constitution in English. The state capital is Hartford.

Governor.—John Davis Lodge (R.), 1951-55 ($12,000).
Secretary of State.—Mrs. Alice K. Leopold (R.).

The state is represented in the Federal Congress by 2 senators and 6 representatives (one elected by the voters of the entire state). The 8 counties are subdivided into townships within which are cities and boroughs.

Area and Population.—Area, 5,009 square miles (110 square miles being inland water). Census population, 1 April, 1950, was 2,007,280, an increase of 298,038 or 17·4% since 1940. Population in 4 census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,098,897	15,174	152	533	1,114,756	231·3
1920	1,358,732	21,046	159	694	1,380,631	286·4
1930	1,576,700	29,354	162	687	1,606,903	328·0
1940	1,675,407	32,992	201	642	1,709,242	348·9
Male . .	833,310	16,004	109	500	849,923	—
Female .	812,097	16,988	92	142	859,319	—

In 1940 the foreign-born white population, [illegible] 19·6% of the total state population, numbered 327,941, of whom 81,373 (24·8%) were Italian; 37,755 Polish; 31,025 Canadian; 23,787 Russian; 19,625 German; 17,366 English and 7,554 Irish. Aliens officially registered in Dec., 1940, numbered 158,128. Of the total population (in 1940) 67·8% were urban; 1·9% Negro; 45·0% (544,737 males and 225,266 females) were in the labour market; 4,750 men and 6,729 women were reported divorced. The number of occupied dwelling units in 1950 was 614,075 (of 3·2 persons).

The chief towns are :—Hartford, with population (census, 1950, preliminary), 177,703; New Haven, 163,344; Bridgeport, 159,352; Waterbury, 104,242; New Britain, 73,663; Stamford, 73,584; Norwalk, 49,458; West Hartford, 44,401; Meriden, 43,747; Greenwich, 40,546. Torrington (population, 27,770) is the only American community which is permitted to 'farm out' to a private individual the collection of its taxes.

Religion, Education and Welfare.—Of the 65 religious denominations in the state, the leading ones are the Roman Catholic (635,750 members in 1936), Jewish [illegible] (90,615), Congregationalist (87,790), and Protestant Episcopal [illegible]3,317. Total, all denominations, 1,050,927.

The school population is rising; on 1 July, 1948, those under 21 years numbered 632,000, an increase of 15·2% since 1940.

In 1940 illiterates 25 years of age and older numbered 48,161 (4·7% of the age group); Elementary instruction is free for all children between the ages of 4 and 16 years, and compulsory for all children between the ages of 7 and 16 years. In 1949-50 the 678 public elementary schools had 5,694 teachers with 206,214 enrolled pupils; the 34 junior high schools had 687 teachers and 16,266 pupils; the 90 public high schools, 2,385 teachers and 61,083 pupils; 197 parochial and ecclesiastical schools had 2,691 teachers and 64,587 pupils. Average salary of teachers, 1948-49, was $3,538 (national average, $2,846). Expenditure of the state Board of Education for the year ending 30 June, 1950, was $11,780,069; local expenditure, $60,940,424. The Universit of Connecticut at Storrs, founded 1881, had 689 professors and

9,005 students in 1950–51. Yale University, New Haven, founded in 1701, had 1,505 professors and 7,745 students. Wesleyan University, Middletown, founded 1831, had 104 professors and 891 students. Trinity College, Hartford, founded 1823, had 76 professors and 1,206 students, and Connecticut College for Women, New London, founded 1915, had 101 professors and 832 students.

Including private and ecclesiastical institutions there were in the state on 30 June, 1950, 157 benevolent establishments (exclusive of almshouses); state paupers numbered 5,265, and inmates in state hospitals 12,456. Disbursements for charities, hospitals and corrections during year ending 30 June, 1950, amounted to $51,709,087, excluding Old Age Assistance amounting to $21,095,522 for 19,715 recipients. Hospitals registered with the American Medical Association, 1949, numbered 76 with 22,957 beds. On 30 June, 1949, hospitals for mental diseases had 8,339 patients or 436·6 per 100,000 population (national average, 446·7 in 1948). In 1909 Connecticut passed a law permitting, under suitable safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 41 males and 474 females had been sterilized.

In 1949–50, 1,197 persons were convicted of major offences, including 8 convicted of murder; 2 were sentenced to death (by electrocution).

Marriage licences are granted only after both applicants have passed the Wassermann or similar laboratory blood test. Connecticut is one of the 2 states which forbid the import or sale of contraceptives.

The Civil Rights Act makes it a punishable offence to discriminate against any person or persons 'on account of alienage, colour or race' and to hold up to ridicule any persons 'on account of creed, religion, colour, denomination, nationality or race.' Places of public resort are forbidden to discriminate, as are also—in another statute—the insurance companies, which are forbidden to charge higher premiums to persons 'wholly or partially of African descent.' Schools must be open to all 'without discrimination on account of race or colour.'

Finance.—The state finances for the year ending 30 June, 1950, were:—

	$		$
Cash balance, 1 July, 1949	22,712,379	Disbursements, 1949–50	301,199,336
Receipts, 1949–50	294,659,256	Balance, 1 July, 1950	16,172,299
Total	317,371,635	Total	317,371,635

The net long-term debt on 30 June, 1950, was $84,039.000; assessed value of real and personal property in 1949 was $4,450,984,319.

Production and Industry.—In 1945 the state had 22,241 farms with a total area of 1,593,169 acres; total value of farm lands and buildings, $263,023,415. Cash income, 1949, from crops, $42,380,000; from livestock, $99,261,000. In 1950 the output of tobacco was 27,265,000 lb.

In 1950 there were 7 soil conservation districts embracing 2,535,040 acres, of which 1,272,988 acres were farm land (20,372 farms).

The state has some mineral resources: sheet mica, sand, gravel and stone; total production in 1948 was valued at $6,745,000.

The census of manufactures of 1947 showed 3.947 manufacturing establishments employing 331,527 production workers, who earned $881,545,000; value added by manufacture was $1,896,546,000.

On 1 July, 1949, there were 831 miles of railroad track, 54 bus

companies, 166 taxi companies in operation. In 1950 there were 40 airports (14 commercial) and 14 seaplane bases (11 commercial); 82 of the 169 towns are marked for air guidance. The state (1950) maintains 2,985 miles of highway, all surfaced. Motor vehicles registered 30 June, 1950, numbered 748,488 with 841,564 drivers licensed.

There are 14 FM broadcasting stations and 27 AM stations in operation; there is 1 television station.

DELAWARE.

Government.—Delaware, first settled in 1631, is one of the original 13 states of the Union. The General Assembly consists of a Senate of 17 members elected for 4 years and a House of Representatives of 35 members elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. The state capital is Dover. Delaware is divided into three counties.

With necessary exceptions all citizens, registered as voters, who have resided in the state one year, and complied with local residential requirements, have the right to vote, except that those who have attained the age of 21 since the year 1900 must be able to read English and to write their names.

Delaware is represented in Congress by two senators and one representative, elected by the voters of the whole state.

Governor.—Elbert N. Carvel (D.), 1949–53 ($7,500).

Secretary of State.—Harris B. McDowell, Jr. (D.).

Area and Population.—Area, 2,399·2 square miles (437·5 square miles being inland water). Census population, 1 April, 1950, was 318,085, an increase of 51,580 or 19·4% since 1940. Birth rate, 1948, 25·6 per 1,000 population; death rate, 11·9 (national average, 10·0 per 1,000). Births in 1949, 7,302; deaths, 3,384. Population in 4 census years (with distribution by sex, 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	171,102	31,181	5	34	202,322	103·0
1920	192,615	30,335	2	51	223,003	113·5
1930	205,718	32,602	5	55	238,380	120·5
1940	230,528	35,876	14	87	266,505	134·7
Male . .	115,806	18,449	7	71	134,333	—
Female .	114,722	17,427	7	16	132,172	—

The foreign-born whites, 1940 (5·6% of the total state population), numbered 14,833, of whom 3,464 (20·0%) were Italian, 2,515 (13·3%) Polish, 1,646 Irish, 1,281 Russian, 1,209 German and 1,134 English. Aliens registered in Dec., 1940, numbered 6,428. Of the total population in 1940,

52·2% were urban; 13·4% Negro; 38·2% (76,200 males and 26,427 females) were gainfully employed. Occupied dwelling units in 1940 numbered 70,541 (of 3·78 persons). In 1940, 900 men and 1,152 women were reported divorced.

The 1950 census figures (preliminary) show Wilmington with population of 109,907; Dover, 6,322; Newark, 6,701; New Castle, 5,403; Milford, 5,179.

Education and Welfare.—The state has free public schools and compulsory school attendance, with separate schools for white and coloured children. In 1940, 40,260 persons (or 55·6%) between the ages of 5 and 24 were attending school. In 1948–49 the elementary and secondary public schools had 1,806 teachers and 43,222 enrolled pupils (7,602 coloured in separate schools). Teachers' salaries averaged $2,849. Total expenditure for elementary and high schools, $10,432,000. The state supports 2 schools for higher instruction: University of Delaware (1834), Newark, with 198 professors and 2,700 students; State College, for coloured students, Dover, with 31 professors and 303 students.

Statutory segregation of Negroes is confined to the educational system, hospitals for tubercular patients, penal institutions, and homes for orphans and the aged. Marriage between white and Negro is prohibited.

In 1923 Delaware passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 414 men and 388 women had thus been sterilized.

Old Age Assistance (maximum $40 per month) was established in 1931 for citizens 65 years of age or older who have been residents of the state for 5 years during the last nine and who have no relatives able to care for them without undue sacrifice. On 30 June, 1950, 1,696 persons were drawing an average of $28·70 per month. In 1949, there were 17 hospitals (4,322 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 1,183 patients or 426·4 per 100,000 population (national average, 363·2); patients, July, 1949, were 1,256. Penalty for murder may be death by hanging.

The most numerous denominations of the state are:—Roman Catholic with 39,399 adherents (1936), Methodists (25,542), and Presbyterian with 6,387. Total membership, all denominations, 112,785.

Finance.—For the year ending 30 June, 1949, ordinary revenues were $22,939,000, of which taxes furnished $17,019,000 and federal grants $3,502,000; ordinary expenditures were $28,070,000, of which operations took $14,575,000 and aid to other governmental units $5,705,000.

On 30 June, 1949, the net long-term debt was $8,127,000.

Production and Industry.—Delaware is mainly an industrial state, but 70·7% of the land area is in farms (923,350 acres), which in 1945 numbered 9,296; value of farm lands and buildings, $72,693,794. There are 3 soil conservation districts, farmer-managed, embracing 1,265,920 acres, of which 923,357 acres are in 9,296 farms. Cash income, 1949, from crops, $15,840,000, and from livestock, $86,179,000. About 44,800 acres are devoted to vegetable and fruit crops. The chief cereals are maize and wheat.

The mineral resources of Delaware are not extensive, consisting chiefly of clay products, stone, sand and gravel, valued in 1948 at $717,000.

The number of manufacturing establishments in 1947 (federal census) was 482 with 29,014 production workers, earning $70,007,000; value added by manufacture was $182,088,000 compared with $54,085,000 in 1939.

In 1947 the state had 295 miles of steam railway and 104 miles of electric

railway; only 55·9% of the communities are served by railways. In 1949, Delaware had 22 airports; 6 are lighted. The state maintains 3,099 miles of surfaced highways and 810 miles of dirt roads.

DISTRICT OF COLUMBIA.

Government.—The District of Columbia, first settled in 1790, is the seat of the Government of the United States, for which the land was ceded by the state of Maryland to the United States as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801.

Local government, from 1 July, 1878, has been that of a municipal corporation administered by a board of 3 commissioners, of whom 2 are appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner is detailed by the President from the Engineer Corps of the Army. Congress alone enacts legislation and appropriates money for the municipal expenses. A scheme to grant local self-government was discussed by Congress in 1949.

Secretary to the Board of Commissioners.—G. M. Thornett.

Area and Population.—The area of the District of Columbia is 69·245 square miles, 8 square miles being inland water. The federal government in 1944 owned 9,369 acres (24% of the total area).

Census population, 1 April, 1950, was 802,178, an increase—largely due to the war—of 21·0% over that of 1940. Birth rate, 1948, was 24·1 per 1,000 population (national average, 24·2); death rate, 9·5 (9·9). Births, 1948, were 20,815; deaths, 8,197.

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	236,128	94,446	68	427	331,069	5,517·8
1920	326,860	109,966	37	708	437,571	7,292·9
1930	353,981	132,068	40	780	486,869	7,981·5
1940	474,326	187,266	190	1,309	663,091	10,870 3
Male . .	227,748	88,672	102	1,000	317,522	—
Female .	246,578	98,594	88	309	345,569	—

In 1940, 62·2% of the population (212,118 men and 131,915 women) w··· · ·" ··ployed; 4,037 men and 7,276 women were reported ·:. ·, numbered 170,640 (of 3·9 persons). Of the 308,900 employed in the major industry groups, the largest section was in government service, numbering 89,499 men and women, or 28·9% of the total. Of the foreign-born white population, 17·8% were Russian, 14·4% Italian and 10·0% Irish. Aliens registered in Dec., 1940, numbered 14,752.

A portion of the District of Columbia embracing 6,654 acres is known in law as the City of Washington, 'the Federal Capital.' But that name is a geographical ·. · ·. . s the territory it includes is not a municipal

government separate from the rest of the District of Columbia, but is subject to the same national and municipal control in every respect.

Religion, Education and Welfare.—The most numerous religious bodies were (census of 1936): Roman Catholic with 80,690 adherents, Negro Baptists (43,825), Protestant-Episcopal (25,444). Total membership, all denominations, 271,724. In 1948 church membership was estimated at 369,000, of which the Catholics had 24%, Jews 7% and all others 69%. Church edifices, 1950, numbered 875, including 813 Protestant churches (divided about equally between 52 white denominations and 27 Negro denominations), 37 white and 6 Negro Roman Catholic churches and 19 Jewish synagogues.

The school population is soaring; on 1 July, 1948, those under 21 years of age numbered 261,000, an increase of 47·4% since 1940; the adult population rose 25·9%.

On 21 Oct., 1949, the 90 white and 68 coloured public elementary and secondary schools had 48,696 white pupils and 45,741 coloured pupils; teachers, 30 June, 1950, numbered 3,430. There is 1 normal school for whites, and 1 for coloured. In 1949-50, expenditure on instruction was $20,842,554. About 17,916 students attended private elementary and secondary schools in Oct., 1949.

Segregation of coloured children in the public schools is mandatory.

Superior education is given in Georgetown University, founded in 1795 by the Jesuit Order, with (1950) 694 professors and 5,667 students; George Washington University, non-sectarian, founded in 1821, 800 instructors and 15,500 students; Howard University, founded in 1867 under the auspices of the federal government for both white and coloured students (now mainly coloured), 467 professors and 6,575 students; Catholic University of America, founded in 1884, with 491 professors and assistants and 4,600 students; American University (Methodist) with 265 professors and 6,156 students.

Libraries of national importance are the Library of Congress and those of the Carnegie Endowment for International Peace, the Pan American Union, the Department of Agriculture, the U.S. Office of Education, the Army Medical Board, the National Academy of Science and the National Geographic Society.

In June, 1950, Old Age Assistance was being paid to 2,845 persons, receiving an average of $39·01 per month; aid to the blind, 265 persons ($41·19); and aid to 2,090 families ($73·79 per family per month) for 6,344 dependent children. In 1949 there were 28 hospitals approved by the American Medical Association with 16,376 beds. In 1945 956 persons (114·2 per 100,000 population) were convicted of major offences including 15 convicted of murder; 2 were sentenced to death (by electrocution).

In Dec., 1945, hospitals for mental diseases had 4,456 patients (D.C. residents) or 532·4 per 100,000 of population (national average, 362·2).

Finance.—The District's revenues are derived from a tax on real and personal property, taxes on corporations and companies, licences for conducting various businesses, and from federal appropriations.

On 1 July, 1950, the funds of the District of Columbia stood as follows (in dollars):—

Balance, 1 July, 1949 .	17,597,586	Disbursements in 1949-50 .	128,145,508
Receipts to 1 July, 1950 .	133,586,022	Balance on 1 July, 1950 .	23,038,100
Total . . .	151,183,608	Total . . .	151,183,608

The District of Columbia has no bonded debt not covered by its accumulated sinking fund. On 1 Jan., 1950, the assessed valuation of the taxable real estate was $1,667,470,897.

Production and Industry.—The District has few industries, with products mainly for local consumption. The census of manufactures in 1947 showed 428 establishments with 10,007 production workers, earning $27,691,000; value added by manufacture, $99,067,000. There were as of 1 April, 1945, 40 farms (1,854 acres) with lands and buildings valued at $4,961,340. Total mineral ouput, 1948, was valued at $835,000.

Within the District are 165 miles of electric street railway track and 243 miles of bus routes. The District had, 1949, 3 airports, all operated by the Government and all lighted.

FLORIDA.

Government.—The first recorded discovery of Florida was on 27 March, 1513, by Juan Ponce de Leon, a Spanish soldier and adventurer, who, landing on Easter Sunday (Pascua Florida or Feast of Flowers), called the country Florida. The first permanent settlement in the entire United States was made at St. Augustine, 8 Sept., 1565. It was claimed by Spain until 1763, then ceded to England; back to Spain in 1783, and to the United States in 1821. Florida became a Territory in 1821 and was admitted into the Union on 3 March, 1845. The present constitution dates from 1885. The state legislature consists of a Senate of 38 members, elected for 4 years, and House of Representatives with 95 members elected for 2 years. Sessions are held biennially, and are limited to 60 days. The Governor is elected for 4 years. Two senators and 6 representatives are elected to Congress

The state capital is Tallahassee (population 27,158 in 1950). The state is divided into 67 counties.

Governor.—Fuller Warren (D.), 1949–53 ($12,000).

Secretary of State.—R. A. Gray (D.).

Area and Population.—Area, 58,560 square miles, including 4,298 square miles of inland water.

Census population 1 April, 1950, was 2,771,305, an increase of 46·1% since 1940. Birth rate, 1948, was 24·5 per 1,000 population; death rate, 10·2. Births in 1948 were 61,655; deaths, 25,991. Population in 4 federal census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	443,634	308,669	74	242	752,619	13·7
1920	638,153	329,487	518	312	968,470	17·7
1930	1,035,390	431,828	587	406	1,468,211	27·1
1940	1,381,986	514,198	690	540	1,897,414	35·0
Male . .	689,570	252,799	341	413	943,123	—
Female .	692,416	261,399	349	127	954,291	—

Of the total, the foreign-born white (1940) numbered 69,861, of whom 6,496 (8·5%) were from Cuba and other West Indies, 7,985 (11·4%) from England, 2,237 from Ireland, 2,202 from Scotland, 7,080 from Germany, 5,524 from Russia and 9,368 from Canada. Of the total population in 1940, 55·1% were urban; 27·0% Negro; 36·0% (484,811 men and 198,522 women) were gainfully employed; 11,244 men and 16,895 women were reported divorced. Aliens registered, Dec., 1940, were 41,327.

The largest cities in the state (1950) are:—Miami with a population of 246,983; Jacksonville, 203,404; Tampa, 124,073; St. Petersburg, 95,712; Orlando, 51,826; Miami Beach, 45,541; West Palm Beach, 43,053; Pensacola, 43,293.

Religion, Education and Welfare.—Of the 555,317 church members of the state (1936), Negro Baptists led with 122,189 adherents, followed by Southern Baptists (87,006) and Roman Catholics (62,445).

Attendance at school is compulsory. All public schools are required to have readings from the Bible without sectarian comment once every school day. Separate schools are provided for white and coloured children.

On 1 July, 1948, those under 21 years numbered 855,000, an increase of 26·3% since 1940.

In 1948–49, the 1,596 public elementary schools and 773 high schools had 16,232 teachers and 426,340 enrolled pupils. Negro schools, included in the total, had 3,946 teachers and 111,781 pupils. Total expenditure on public schools (1948–49), $90,432,000. Teachers' salaries, 1948–49, ranged from $1,000 to $4,000; average was $2,840. The state maintains the University of Florida at Gainesville (founded 1905) with (1948–49) 10,075 students, the Florida State University (founded at Tallahassee in 1905), with 5,127 students, and a college for Negroes at Tallahassee with 1,611 students.

Separation of white and Negro pupils, with teachers of their own race, applies to all institutions except schools for the blind and the deaf. Negroes are also segregated, by statute, in railways, buses, street cars and penal institutions. Marriage between white and coloured persons is prohibited.

Florida in 1935 established a system of Old Age Assistance (maximum now $50 per month) for those citizens who are infirm or 65 years of age and have lived in the state 5 years. In June, 1950, 69,251 persons (out of 178,000 aged 65 or over) were drawing an average of $40·35 per month. Aid to the blind averaged $43 10 each to 3,319 persons; aid to dependent children averaged $44 05 to 27,413 families. Hospitals approved by the American Medical Association, 1949, numbered 140 with 20,173 beds. Hospitals for mental diseases, 1945, had 5,203 patients or 252·6 per 100,000 of the population (national average, 363·2).

Of the state's 71 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 57 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1949, the state had a general revenue of $194,920,000, of which taxation furnished $146,375,000 and federal aid $39,243,000. There is no state income tax on individuals or companies. General expenditures were $225,164,000, of which operations took $106,942,000, and aid to other governments $59,326,000.

Florida has no bonded debt.

Production and Industry.—In 1945, 61,159 farms had a total acreage of 13,083,501; farm lands and buildings were valued at $498,399,612. In

1945, 12,802 farms (22% of the 59,278 reporting) had produce for sale or consumption valued at less than $400; 2,069 farms each produced $20,000 or more. Negroes operated 16·4% of all farms. Cash income, 1949, from crops, $393,937,000 and from livestock, $94,616,000. Production of citrus fruits, 25,000,000 boxes in 1949, and oranges, 61,000,000 boxes. Other crops, 1949, were tobacco (25,061,000 lb.), sugar cane (1,091,000 short tons), cotton (18,000 bales), rice, maize, oats and peanuts (212,350,000 lb.). On 1 Jan., 1950, the state had 23,000 horses, 28,000 mules, 13,000 sheep, 619,000 swine, 152,000 milch cows, and 1,392,000 all cattle. The national forests area in June, 1948, was 1,241,955 acres.

In 1950 there were 47 soil conservation districts embracing 23,729,125 acres, of which 10,052,933 acres were farm land (52,878 farms).

Chief mineral product is phosphate rock (6,539,258 long tons in 1948, ranking next to Tunisia as the world's largest source). Mineral output, 1948, was valued at $53,877,000.

Florida has extensive fisheries for oysters, shad, red snappers, mullet, turtles and sponges, of which Florida has almost a monopoly.

Manufacturing industries, in 1947, had 2,808 establishments with 66,028 production workers, earning $128,240,000; value added by manufacture, $349,976,000. The lumber, wood pulp and food-processing industries are important.

In 1948 there were 4,965 miles of steam and 290 miles of electric railway; bus companies operated regular routes totalling 1,778 miles. The state (1948) maintained 8,950 miles of highways, of which 8,192 miles are surfaced. In 1949, Florida had 258 airports, including 49 commercial, 35 military and 28 emergency airports.

GEORGIA.

Government.—The colony of Georgia (so named from George II) was founded in 1733 and was one of the original 13 states. A new constitution was adopted on 7 Aug., 1945. The General Assembly consists of a Senate of 51 members (maximum 54) and a House of Representatives of 205 members, both elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. Legislative sessions are biennial. Georgia is divided into 159 counties. The state capital is Atlanta. Georgia is the first state to extend the franchise to all citizens above the age of 18 years. The state is represented in Congress by 2 senators and 10 representatives. Full-time state employees, 1949, numbered 16,000; employees of local authorities (1948), 48,994.

Potential voters, 1948, numbered 1,761,000; voters at the presidential elections, 1948, were 418,791 or 23·7% of the electorate.

Governor.—Herman Talmadge (D.), 1951–55 ($12,000).

Secretary of State.—Ben W. Fortson, Jr. (D.).

Area and Population.—Area, 58,876 square miles, of which 358 square miles are inland water. Census population, 1 April, 1950, was 3,444,578, an increase of 320,855 or 10·3% over that of 1940. Birth rate, 1948, 29·3 per 1,000 population; 1949, 29·0; death rate, 1948, 9·3; 1949, 9·16. Births, 1948, were 92,694; deaths, 29,526. Population in 4 census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,431,802	1,176,987	95	237	2,609,121	44·4
1920	1,689,114	1,206,365	125	228	2,895,832	49·3
1930	1,837,021	1,071,125	43	317	2,908,506	49·7
1940	2,038,278	1,084,927	106	412	3,123,723	53·4
Male . .	1,016,688	517,747	58	265	1,534,758	--
Female .	1,021,590	567,180	48	147	1,588,965	--

Of the total population (1940) 11,916 (0·3% of the total) were foreign-born white, of whom 2,016 (16·9%) were from Russia, 1,424 from Germany, 1,073 from England and 981 from Greece. Of the total population in 1940, 34·4% were urban; 34·7% Negro; 35·4% (806,694 males and 300,718 females) were gainfully employed; the number of occupied dwelling units was 752,241 (of 3·72 persons). In 1940 census, 8,176 men and 14,363 women were reported divorced. Aliens registered in Dec., 1940, were 5,187.

The largest cities are :—Atlanta (capital), with population (1950) of 327,090; Savannah, 119,689; Columbus, 79,510; Augusta, 71,507; Macon, 70,106.

Religion, Education and Welfare.—Baptists predominate, having more than half of the religious membership of the state. Negro Baptists had 597,000 adherents in 1943, and Southern Baptists 568,000. White Methodists had 305,000 and Negro Methodists (3 groups) 280,000. Total membership, all denominations, 2,654,000. Under a Local Option Act, the sale of alcoholic beverages (not including malt beverages and light wines) is prohibited in more than half of the counties.

Illiterates 25 years of age or over in 1940 numbered 99,917, which was 6·5% of the total in that age group; of persons between the ages of 5 and 24, 664,607 (52·0%) were attending school; the national average for this age group is 57·7%. Since 1916 education has been compulsory. There are separate schools for whites and Negroes, and tuition is free for pupils between the ages of 6 and 18 years. In 1948–49 the 2,871 public elementary and 1,368 secondary schools had 752,046 pupils and 22,999 teachers. Teachers' salaries, 1948–49, ranged between $627 and $2,178; average was $1,732 (national average, $2,846). Coloured students in elementary schools numbered 218,607 in 1948–9; coloured high schools had 36,666 students. Total expenditure for common schools (1948–49) $63,879,000.

The publicly supported university system of Georgia comprises 13 institutions for white students and 3 for Negroes. The University of Georgia (Athens) was founded in 1785 and was the first chartered State University in the United States. Other institutions of higher learning include Emory University (Atlanta) and Mercer University (Macon), for white students, and Atlanta University, Clark University, Morehouse College and Morris-Brown College, all in Atlanta, with advanced training for Negroes. Total university enrolment, 1948-49, was 36,636.

Separation of white and Negro pupils, with teachers of their own race, applies to all institutions except schools for deaf and blind children. The state authorities, 1950, announced that segregation in colleges would continue despite decisions of the U.S. Supreme Court declaring such segregation unconstitutional. Negroes are segregated, by statute, in railways (including sleeping cars with bedding, which must be kept separate), buses, poolrooms, hospitals and penal institutions. Negro clergymen may not marry white couples. Marriage between white and coloured persons is forbidden.

In 1937 Georgia passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 123 men and 680 women had been thus sterilized.

In June, 1950, 101,303 persons were receiving Old Age Assistance to an average amount of $23·40 per month; 15,254 families were receiving aid to 38,969 dependent children an average of $46·53 per family; aid to the blind went to 2,688 persons (averaging $27·75 monthly). Hospitals registered with the American Medical Association in 1949 numbered 131 with 25,323 beds. In Dec., 1945, hospitals for mental diseases had 8,484 patients or 282·5 per 100,000 population (national average, 363·2). Of the state's 159 local jails (county and city), the U.S. Bureau of Prisons as of 30 June, 1949, rated 148 as sub-standard, unsuitable for the housing of federal prisoners.

Finance.—For the fiscal year ending 30 June, 1950, general revenue receipts were $202,624,233 ($141,894,000 from taxes, and $57,313,563 in federal grants); expenditures were $204,288,000. Schools received $81,216,000; public roads, $43,570,000.

On 1 July, 1949, the net long-term debt was nil.

An unusual feature of the state's financial structure is that its assets include a state-constructed railroad (begun in 1938) valued at $22,000,000 and extending from Atlanta, Georgia, to Chattanooga, Tennessee, a distance of 137 miles.

Production and Industry.—In 1945, 225,897 farms had an area of 23,675,612 acres; value of farm lands and buildings, $654,244,224. 30·0% of the farms and 20·8% of the farm land were operated by Negroes; 83% of Negro farms were rented. Tenants farmed 53·8% of all farms. In 1945, 28,040 farms (13% of the 228,040 farms reporting) had a gross produce, for sale and farm consumption, valued at less than $400. In 1945, 51,168 farms (22% of the total) had less than 30 acres; the average holding, however, was 104·8 acres. There are 25 soil conservation districts, embracing 36,522,215 acres, including 23,297,630 acres of farm lands in 220,130 farms. The Negro farmers raise little but cotton, in the production of which Georgia ranks sixth among the states, but it is the largest producer of Sea-island cotton. For 1949 the cotton output was 610,000 bales, compared with the average, 1938–47, of 779,000 bales. Cash income, 1949, from crops, $282,396,000; from livestock, $166,179,000. Other crops, 1949, were peaches, 2,040,000 bushels; pecans, 17,000,000 lb.; peanuts, 605,900,000 lb.; maize, 59,400,000 bushels; rice; sweet [illegible], 6,036,000 bushels. The state's tobacco output (1949), 116,590,000 lb. (av. 1935–44, 88,358,000 lb.). On 1 Jan., 1950, the farm animals were 34,000 horses, 224,000 mules, 406,000 milch cows, 1,220,000 all cattle, 13,000 sheep, 1,700,000 swine.

Georgia was the first state to establish state-owned farmers' markets; the largest state-owned farmers' market in the world is located at Atlanta.

The state has modest mineral resources but furnishes 72% of the country's output of kaolin or china clay (1,018,427 short tons in 1948) and substantial supplies of fuller's earth. Mineral products, 1948, had a value of $42,662,000.

In 1947, Georgia had 4,754 [illegible] establishments employing 225,807 production workers, earning $[illegible]; the value added by manufacture was $1,015,999,000. About 98% of the plants (furnishing 90% of the total output) employed less than 500 persons each.

The principal port is Savannah; there are (1947) 6,135 miles of steam railways beside 157 miles of electric railway; airports, 1948, numbered 133, of which 51 were municipal; 29 were lighted. The state system of roads (1948) covered 13,282 miles: the county network, in addition, embraced 76,709 miles.

IDAHO.

Government.—Idaho was first permanently settled in 1860, although there was a mission for Indians in 1842 and a Mormon settlement in 1855. It was organized as a Territory in 1863 and admitted into the Union as a state on 3 July, 1890. The Legislature consists of a Senate of 44 members and a House of Representatives of 59 members, all the legislators being elected for two years. Sessions are held biennially in odd-number years and last for 60 days. Beginning in 1947, the Governor, Lieutenant-Governor and Secretary of State are elected for 4 years (previously 2). Voters are citizens, both male and female, over the age of 21 years, who have resided in the state over 6 months. The state is represented in Congress by 2 senators and 2 representatives.

The state is divided into 44 counties. The capital is Boise.

Governor.—Len B. Jordan (R.), 1951–55 ($7,500).
Secretary of State.—Ira H. Masters (R.).

Area and Population.—Area, 83,557 square miles, of which 749 square miles are inland water. In 1944, the federal government owned 33,730,114 acres (64% of the state area). Census population, 1 April, 1950, 588,637, an increase of 63,764 or 12·1% since 1940. Birth rate, 1948, was 27·5 per 1,000 population (national average, 24·2); death rate, 8·4 (9·9). Births, 1949, 16,132; 1950, 15,666; deaths, 1949, 4,906; 1950, 4,698. Population in 4 census years (with distribution by sex, 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	319,221	651	3,488	2,234	325,594	3·9
1920	425,668	920	3,098	2,180	431,866	5·2
1930	438,840	668	3,638	1,886	445,032	5·4
1940	519,292	595	3,537	1,449	524,873	6·3
Male . .	273,512	342	1,778	947	276,579	—
Female .	245,780	253	1,759	502	248,294	—

Of the total 1940 population, 24,116 (4·5% of the total) were foreign-born whites, 4,098 being Canadian, 2,974 Swedish, 2,533 German and 2,252 English; Japanese numbered 1,191, of whom 765 were citizens; 33·7% were urban, 0·1% Negro; 30·2% (132,748 men and 25,858 women) were gainfully employed; the number of occupied dwelling units was 141,727 (of 3·70 persons); 3,984 men and 3,044 women were reported divorced.

The largest cities are (1950) Boise, capital, with population 34,152; Pocatello, 25,882; Idaho Falls, 18,855; Twin Falls, 17,544; Nampa, 16,142.

Religion, Education and Welfare.—The leading religious denomination is the Mormon Church, with 100,392 adherents in 1936; Roman Catholics had 19,506, and Methodists, 11,005. Total, all denominations, 178,316.

In 1940, illiterates 10 years of age or older numbered 2,729 or 0·64% of the total in that age group; of the persons between the ages of 5 and 24, 120,471 (60·9%) were attending school. In 1948–49 the 789 public elementary schools and 170 secondary schools had 4,016 teachers and 107,967 enrolled pupils; teachers were to receive an average salary of $2,898. Total expenditure on education (1948–49) was $18,936,000. The State University of Idaho, founded at Moscow in 1892, had 224 professors and 3,912 students in 1949–50; its southern branch had 30 teachers and 500 students.

Old Age Assistance (maximum $40 per month) is granted American citizens 65 years of age, or older, who satisfy certain residential qualifications and are without resources. In June, 1950, 11,434 persons were drawing an average of $47·25 per month. In August, 1940, it was estimated that one-third of the population was receiving organized health services. In 1949, there were 44 hospitals (4,032 beds) registered by the American Medical Association. In Dec., 1945, hospitals for mental diseases had 1,089 patients or 236·8 per 100,000 population (national average, 363·2). In 1925 Idaho passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 4 men and 10 women had been thus sterilized.

In 1945, 234 persons (54·1 per 100,000 population) were convicted of major offences, including 2 convicted of murder; none was sentenced to death (death penalty is by hanging). Of Idaho's 43 local jails (county and city) the U.S. Bureau of Prisons as of 30 June, 1949, rated 37 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.— For the fiscal year ending 30 June, 1949, the state's revenue was $49,599,000, of which taxation furnished $33,779,000. Expenditures were $45,977,000, of which operations took $24,794,000 and other governmental units $7,504,000.

On 30 June, 1949, the net long-term debt was $23,000; the free fund balance amounted to $23,192,086.

Production and Industry.—A great part of the state is naturally arid, but extensive irrigation works, involving, up to 1948, capital investments of $102,586,000, have been carried out. In 1945, 41,494 farms had a total area of 12,503,332 acres; total value of farm lands and buildings, $493,331,235. There are 27 soil conservation districts, managed by local farmers and ranchers, embracing 17,502,796 acres, of which 7,182,582 acres are farm lands in 20,952 farms and ranches. Cash income, 1949, from crops

was $189,068,000 and from livestock, $128,931,000. The most important crop is wheat; in 1949, the yield amounted to 38,106,000 bushels, of which winter wheat was 22,388,000 bushels. Other crops are alfalfa, sugar beet 1,062,000 short tons in 1949), potatoes (34,560,000 bushels), oats, barley, field peas, apples and prunes. There is an active livestock industry, the number of horses on 1 Jan., 1950, being 86,000; mules, 3,000; sheep, 1,065,000; milch cows, 222,000; all cattle, 939,000; swine, 209,000. The wool clip (1949) was 8,808,000 lb. from 937,000 sheep. The state contains (1949) 21,572,354 acres of national forest.

The state has rich mineral deposits. Output of gold in 1949, 77,829 fine oz.; silver, 10,049,257 fine oz.; lead (1948) 88,544 short tons; copper, 1,624 short tons; zinc, 86,267 short tons, and some arsenous oxide, antimony, cadmium and phosphate rock. Production of mercury in 1948 was 543 flasks. Total mineral output in 1948 reached value of $79,330,000.

In 1947, 664 industrial establishments employed 14,602 production workers, who earned $37,904,000; value added by manufacture, $109,694,000.

The state had (1947) 2,713 miles of steam railway, besides 121 miles of electric railway track. There were, 1948, 93 airports, of which 52 were municipal; 15 were lighted. Since 1915 the Celilo Canal, on the Oregon side of the Columbia River, has connected Idaho with the Pacific ocean. Vessels can pass from the Pacific to Lewiston, a distance of 480 miles. The state maintained, in 1948, 4,975 miles of roads; the counties, 24,918 miles.

ILLINOIS.

Government.—Illinois was first discovered by Joliet and Marquette, two French explorers, in 1673, and settled in 1720. In 1763, the country was ceded by the French to the British. In 1783, Great Britain recognized the title of the United States to Illinois, which was organized as a Territory in 1809 and admitted into the Union on 3 Dec., 1818. The Legislature consists of a Senate of 51 members elected for 4 years (about half of whom retire every 2 years), and a House of Representatives of 153 members elected for 2 years. Sessions are biennial. The Governor, Lieutenant-Governor, Secretary of State and Auditor are elected for 4 years; the State Treasurer, elected for 2 years, may not succeed himself. Electors are citizens 21 years of age, having the usual residential qualifications.

The state is divided into districts, in each of which 1 senator and 3 representatives are chosen; for the election of the latter each elector has three votes, of which he may cast one for each of three candidates, or one and a half for each of two, or all three for one candidate. The state has

102 counties; Springfield is the capital. Illinois is represented in Congress by 2 senators and 26 representatives.

Governor.—Adlai E. Stevenson (D.), 1949–53 ($12,000).
Secretary of State.—Edward J. Barrett (D.).

Area and Population.—Area, 56,400 square miles, of which 453 square miles are inland water. Census population, 1 April, 1950, 8,712,176, an increase of 10·3% since 1940. Birth rate, 1948, 22·1 per 1,000 population (national average, 24·2); death rate, 11·0 (9·9). Births in 1948 were 184,871; deaths, 91,328. Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	5,526,962	109,049	188	2,392	5,638,591	100 6
1920	6,299,333	182,274	194	3,479	6,485,280	115·7
1930	7,295,267	328,972	469	5,946	7,630,654	136 4
1940	7,504,202	387,416	624	4,969	7,897,211	141·2
Male . .	3,766,703	186,067	335	4,044	3,957,149	—
Female .	3,737,499	201,379	289	925	3,940,092	—

Of the total population in 1940, 969,373 (12·2% of the total) were foreign-born whites, of whom 138,700 were from Poland, 138,023 (14·3%) from Germany, 98,244 from Italy, 79,906 from Sweden, 74,454 from Russia, 54,914 from Czechoslovakia, 48,506 from Ireland, and 36,966 from England. The urban population was 73 6% of the whole, and the Negro population 4·9%; 37·2% (2,197,498 males and 746,933 females) were gainfully employed; occupied dwelling units numbered 2,192,730 (of 3·60 persons). In 1940, 43,516 men and 57,008 women were reported divorced. Aliens registered in Dec., 1940, were 325,070.

The largest city in the state, and, after New York, the largest in the United States, is Chicago. On 1 April, 1950 (census, preliminary), it had a population of 3,606,436. Other cities with populations in 1950 are :—Peoria, 111,523; Rockford, 92,503; East St. Louis, 81,950; Springfield (state capital), 80,832; Evanston, 73,030; Decatur, 67,801; Cicero, 67,195; Oak Park Village, 63,175; Joliet, 52,460; Berwyn, 51,176, and Aurora, 50,508.

Religion, Education and Welfare.—The churches are, in order of strength :—Roman Catholic (with 1,448,650 adherents in 1936), Jewish Congregations (377,809), Methodist (288,736). Total membership, all denominations, 3,556,852.

In 1940, of persons between the ages of 5 and 24, 1,463,310 (58·0%) were attending school. In Illinois education is free and compulsory for children between 7 and 16 years of age. For the year ending 30 June, 1949, the 5,618 public elementary school districts had 31,436 teachers and 884,587 pupils, and the 672 high schools had 14,874 teachers and 303,287 pupils. Five state teachers' colleges (normal schools) had, 1949–50, 1,002 teachers and 10,140 students. Teachers' salaries, 1948–49, averaged $3,412. Total current expenditure on public schools, 1949, from the Educational Fund, $278,592,801. There are 59 colleges and universities (including the teachers' colleges); the principal ones, with teachers and students for 1948–49, are :—

Founded	Colleges, etc.	Location	Teachers	Students
1829	Illinois College (Presbyterian) . . .	Jacksonville	35	498
1837	Knox [illegible] . . .	Galesburg	67	795
1846	MacM[illegible] . . .	Jacksonville	60	734
1847	Rockfor[illegible] . . .	Rockford	50	479
1850	Illinois [illegible] (M.E.) .	Bloomington	97	1,283
1851	North-Western University (M.E.) .	Evanston	1,900	10,000
1853	Monmouth [illegible] . . .	Monmouth	70	939
1860	[illegible] . . .	Rock Island	59	1,267
1861	[illegible] College (Ev. Assn.) .	Naperville	50	893
1867	University of Illinois (State) .	Urbana	3,988	28,619
1892	University of Chicago (Non-sect.) .	Chicago	961	9 876
1897	Bradley Polytechnic Institute . .	Peoria	235	5,314
1898	De Paul University (Roman Cath.) .	Chicago	450	9,025
1901	James Milliken University (C. Presb.) .	Decatur	105	1,384
1909	Loyola University (Roman Cath.) .	Chicago	413	7,812

Marriage licences are granted only after both parties have passed the Wassermann or similar laboratory blood test.

A Civil Rights Act (1941) bans all forms of discrimination by places of public accommodation, including inns, restaurants, retail stores, railroads, aeroplanes, buses, etc., against persons on account of 'class, creed, religion, sect, denomination or nationality'; another section similarly mentions 'race or colour.' Public authorities and contractors on public works are forbidden to refuse employment on account of 'race or colour.'

In 1935 the state [illegible] a system of Old Age Assistance (maximum, since 1946, $600 per year) for those 65 or more years of age who are citizens of the United States, who have lived in the state one year preceding application. In June, 1950, 313,435 persons (47% of the 662,000 persons in that age group) were drawing an average of $34 82 per month; this represented a rise of 1·6% in persons assisted. There are approximately 478 welfare institutions. In 1949, hospitals registered with the American Medical Association numbered 330, with 97,163 beds. In Dec., 1945, hospitals for mental diseases had 31,579 patients or 418·4 per 100,000 population (national average, 363·2).

Of the 103 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 77 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1950, the receipts and disbursements were (in dollars):—

Balance, 1 July, 1949 . .	863,069,689	Disbursements, 1949-50 .	719,194,681
Receipts, 1949-50 . .	614,610,156	Balance, 30 June, 1950 .	758,485,164[1]
Total . . .	1,477,679,845	Total . . .	1,477,679,845

[1] Includes $447,335,375 of the Unemployment Trust Fund on deposit with the Federal Treasury.

Total bonded indebtedness, 1 July, 1950, was $419,254,900.

Production and Industry.—Illinois is largely agricultural. In 1945, 204,239 farms had an area of 31,602,186 acres; total value of land and buildings, $3,662,545. Tenant-farmers operated 39·1% of the farms (by number) and 45·2% of total farm acreage. In 1945, 24,806 farms (12% of the 203,699 farms reporting) had output for sale or consumption valued at less than $400.

Cash income, 1949, from crops, $754,532,000; from livestock and livestock products, $948,411,000. Illinois is a great producer of high-yielding

hybrid maize, second only to Iowa. Output, 1949, was 518,112,000 bushels and yield per acre 56·0 bushels, compared with the national average of 38·9 bushels. Other crops were, in 1949, wheat, 49,172,000 bushels; oats, 168,990,000 bushels; potatoes, 1,000,000 bushels; hay, barley, rye and buckwheat are also grown. Output of soya beans, 82,602,000 bushels in 1949, was more than one-third of the country's entire output. On 1 Jan., 1950, there were 180,000 horses, 16,000 mules, 992,000 milch cows, 3,159,000 all cattle, 585,000 sheep and 6,285,000 swine. The wool clip in 1950 was 3,385,000 lb. from 410,000 sheep. National forest area is 812,654 acres. The first soil conservation district was formed in 1938, embracing only 2,500 farmers and 319,000 acres; in 1950 there were 95 districts covering 31,005,297 acres with 217,900 farmers.

In 1947 (census) Illinois had 15,988 manufacturing establishments, employing 954,415 production workers, earning $2,627,318,000; value added by manufactures was $6,680,137,000 compared with $2,187,240,000 in 1939 census. Largest industry was machinery (excluding electrical) which had 172,500 workers; value added by manufacture was $1,096,100,000.

The chief mineral product of Illinois is coal, the productive coalfields with 337 mines having an output, 1948, of 66,500,000 tons. Mineral production includes petroleum, 64,669,000 barrels in 1948; natural gasoline (1948), 149,000,000 gallons; small amount of natural gas (1947), 17,023 million cubic feet; cement (1948), 7,570,536 barrels; steel (1949), 6,804,002 long tons; zinc (1949), 18,157 short tons. Illinois produced 14,687 short tons of abrasive stones (tripoli) in 1947. Total value of mineral products, 1948, was $523,422,000.

There were (1949) 11,698 miles of steam railway and 1,210 miles of electric railway. Airports, 1950, numbered 548, of which 382 were private and 166 municipal; 55 were lighted.

There is a British Consul-General in Chicago.

INDIANA.

Government.— Indiana, first settled in 1732–33, was made a Territory in 1800 and admitted into the Union on 11 Dec., 1816. The General Assembly consists of a Senate of 50 members elected for 4 years, and a House of Representatives of 100 members elected for 2 years. Sessions are held biennially. The Governor and Lieutenant-Governor are elected for 4 years. The state is divided into 92 countries and 1,011 townships. The state capital is Indianapolis. The state is represented in Congress by 2 senators and 11 representatives.

Governor.—Henry F. Schricker (D.), 1949–53 ($8,000).

Secretary of State.—Leland L. Smith (D.).

Area and Population.—Area, 36,291 square miles, of which 86 square miles are inland water. Census population, 1 April, 1950, was 3,934,224, an increase of 506,428 or 14·8% since 1940. In 1948 marriages were 54,387 (13·9 per 1,000 population); births, 92,529 (23·6); deaths, 39,544 (10·1). Population in 4 census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	2,639,961	60,320	279	316	2,700,876	74·9
1920	2,849,071	80,810	125	384	2,930,390	81 3
1930	3,125,778	111,982	285	458	3,238,503	89 4
1940	3,305,323	121,916	223	334	3,427,796	94 7
Male . .	1,664,706	60,105	124	266	1,725,201	—
Female .	1,640,617	61,811	99	68	1,702,595	—

Of the total in 1940, 110,631 (3·2%) were foreign-born whites, 18,784 (16 2%) being from Germany, 14,257 from Poland, 7,733 from Hungary, 6,309 from Italy, 5,782 from Czechoslovakia, 5,588 from Canada, 5,562 from England, 5,342 from Y [illegible] 1,405 from Austria. Urban population formed 55·1% of the w[illegible] population 3·6%, and those gainfully employed (901,555 males and 250,148 females) 33·6%; the number of occupied dwelling units was 961,498 (of 3·57 persons). In 1940, 21,241 men and 26,128 women were reported divorced. Aliens registered in Dec., 1940, were 44,385.

The largest cities are Indianapolis (capital), with a population, census of 1950 (preliminary), of 424,683; Gary with 133,541; Fort Wayne, 132,980; South Bend, 115,698; Evansville, 109,869; Hammond, 87,423; Terre Haute, 64,047; Muncie, 58,364; East Chicago, 54,124.

Religion, Education and Welfare.—Religious denominations, in 1950, included :—Methodist bodies (354,034), Roman Catholic (412,750), Disciples of Christ (178,892), Baptist Convention (110,382), Evangelical United Brethren (88,400), Presbyterian Church (83,729), Lutheran Church, Missouri Synod (76,969).

In 1940, of persons between the ages of 5 and 24, 681,167 (59·0%) were attending school. School attendance is compulsory from 7 to 16 years of age. In 1949–50 the elementary and public high schools had 25,281 teachers with 689,807 pupils. Teachers' salaries, 1948–49, ranged between $1,600 and $5,000; average was $3,243. Total expenditure for public schools, 1949–50, $169,000,000.

The principal institutions for higher education, 1949–50, were :—

Begun	Institution	Control	Professors and Instructors	Students
1824	Indiana University, Bloomington. .	State . .	736	14,805
1837	De Pauw University, Greencastle .	M.E. . .	127	2,214
1842	University of Notre Dame (Roman Cath.)	R.C. . .	343	4,811
1850	Butler University, Indianapolis . .		153	5,735
1874	Purdue University, Lafayette . .	State . .	989	13,675

Marriage licences are granted only after both parties have passed the Wassermann or similar blood test.

The Civil Rights Act of 1885 forbids places of public accommodation to

bar any persons on grounds not applicable to all citizens alike; no citizen, may be disqualified for jury service 'on account of race or colour,' but in the National Guard Negroes must be organised in separate battalions or regiments. An Act of 1915 authorizes the Commissioner of Labour to co-operate with employers and trade unions in programmes designed to reduce racial discrimination in employment, and an Act of 1947 makes it an offence to spread religious or racial hatred.

Old Age Assistance (maximum $50 per month) is available for those American citizens 65 years of age or older who have resided in the state for 5 years during the preceding 9 years. In June, 1950, 52,219 persons were drawing an average of $36·22 per month; 27,956 dependent children in 11,570 families were receiving $66·43 per family per month: 1,891 blind persons were receiving an average of $39·14; and 13,125 cases (33,163 persons) were getting general relief or township relief averaging $25·17 per case. In June, 1947, [illegible] for mental diseases had 12,973 patients or 295·6 per 100,000 population (national average, 337·7). Hospitals registered with the American Medical Association (1949), 135 (29,823 beds).

Of the state's 92 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 80 as sub-standard, unsuitable for the housing of Federal prisoners.

In 1907 Indiana passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 936 men and 953 women had been sterilized.

Finance.—In the fiscal year ending 30 June, 1949, general revenues were $249,016,000 and general expenditures $246,221,000. Taxes furnished $189,980,000; federal grants were $33,606,000.

On 30 June, 1949, the state had a net long-term debt of $10,525,000; the state's ability to contract debt, except for defence purposes, is severely limited, and the above debt is wholly that of subsidiary units, payable from their receipts.

Production and Industry.—Indiana is largely agricultural, about 89% of its total area being in farms. In 1945, 175,970 farms had 20,027,015 acres (average, 113·8 acres); value of land and buildings, $1,794,314,968. Tenant-farmers (39,902) operated 22·6% of the farms and 29·2% of total farm lands. In 1945, 31,931 farms (19% of the total) had produce, for sale or farm consumption, valued at less than $400. Cash income, 1949, from crops, $276,774,000, from livestock, $639,248,000, and from government payments, $3,869,000.

The chief crops are maize (247,052,000 bushels in 1949), winter wheat (39,532,000 bushels), oats (55,825,000 bushels), rye, hay, soya beans (33,166,000 bushels), tobacco (15,720,000 lb.), popcorn (25,420,000 lb.) and tomatoes for processing (350,400 tons). The livestock on 1 Jan., 1950, consisted of 107,000 horses, 1,760,000 all cattle, 728,000 milch cows, 454,000 sheep, 4,611,000 swine and 11,000 mules. In 1949 the wool clip yielded 2,728,000 lb. of wool from 359,000 sheep.

In 1950 there were 50 soil conservation districts, embracing 11,954,604 acres (92,752 farms).

The coalfields of the state have an area of 6,500 square miles. In 1949 the output of coal was 17,350,000 short tons and petroleum, 9,566,000 barrels from 3,774 producing wells. There were 9 oil refineries with a daily capacity of 344,300 barrels. In 1949, output of pig-iron from 19 blast furnaces was 5,990,723 short tons; ingot steel, 9,408,618 net tons. The total mineral output was valued at $166,803,000 in 1948.

The manufacturing establishments (1947 census) numbered 5,408, employing 457,582 production workers, earning $1,236,558,000; value added by manufacture was $2,977,508,000 compared with $964,746,000 in 1939. Electric power output, 1948, was 11,196 million kwh.; 116 million kwh. came from water power.

In 1949 there were 6,651 miles of main steam railway. Airports, 1950, numbered 160, of which 114 were municipal. There are 10,529 miles of state roads and 74,085 of county roads. Motor vehicles registered, 1948, 1,304,824 including 236,010 trucks or buses.

IOWA.

Government.—Iowa, first settled in 1788, was made a Territory in 1838 and admitted into the Union on 28 Dec., 1846. The General Assembly comprises a Senate of 50 and a House of Representatives of 108 members, meeting biennially for an unlimited session. Senators are elected for 4 years, half retiring every second year; representatives for 2 years. The Governor and Lieutenant-Governor are elected for 2 years. The State is represented in Congress by 2 senators and 8 representatives. Iowa is divided into 99 counties; the capital is Des Moines.

Governor.—William S. Beardsley (R.), 1951–52 ($12,000).
Secretary of State.—Melvin D. Synhorst (R.).

Area and Population.—Area, 56,280 square miles, [illegible] square miles of inland water. Census population, 1 April, 195[illegible], an increase of 82·805 or 3·3% since 1940. Birth rate, 1949, 24·2 per 1,000 population; death rate, 10·1. Births, 1949, were 62,897; deaths, 26,302.

Population in 4 census years (with distribution by sex in 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1870	1,188,207	5,762	48	3	1,194,020	21·5
1920	2,384,181	19,005	529	306	2,404,021	43·2
1930	2,452,677	17,380	660	222	2,470,939	44·1
1940	2,520,691	16,694	733	150	2,538,268	45 3
Male . .	1,271,503	8,467	398	126	1,280,494	—
Female .	1,249,188	8,227	335	24	1,257,774	—

At the census of 1940, there were 117,245 foreign-born whites (4·7% of the total), of whom 35,540 (30·3%) came from Germany; 11,406 (9·7%) from Sweden; 10,977 (9·4%) from Denmark; 8,642 (7·4%) from Norway; 5,961 (5·1%) from England; 4,962 from Canada; 3,461 from Italy and 3,418 from Ireland. Of the total population in 1940, 42% were urban, 0·7% Negro, and 48·9% (770,949 males and 186,920 females) were gainfully employed; number of occupied dwelling units was 701,824 (of 3·62 persons);

13,372 men and 16,002 women were reported divorced. Aliens registered in Dec., 1940, numbered 24,648.

The largest cities in the state, with their census population in 1950, are Des Moines (capital), 176,954; Sioux City, 84,035; Davenport, 73,640; Cedar Rapids, 72,149; Waterloo, 64,354; Dubuque, 49,528; Council Bluffs, 45,184; Ottumwa, 33,630; Burlington, 30,639; Clinton, 30,151; Mason City, 27,593; Iowa City, 27,[illegible]; Fort Dodge, 25,025.

Religion, Education and Welfare.—Chief religious bodies (1936) are:—Roman Catholic (294,833 members), Methodist Episcopal (204,047), Lutheran (61,682), Disciples of Christ (60,973). Total, all denominations, 1,086,989.

School attendance is compulsory for 24 consecutive weeks annually during school age (7–16). In 1948–49, of the persons between the ages of 5 and 21 years, 469,280 (74·0%) were attending school. In 1948–49, 6,726 public elementary schools had 357,742 pupils, and 862 high schools had 111,538 pupils. Teachers in 1948–49 numbered 22,578 with salaries ranging from $1,500 to $4,000; [illegible] ry, $2,479. Total expenditure on public schools in 1948–49, [illegible]. Leading institutions for higher education (1950–51) were:—

Founded	Institution	Control	Professors and instructors	Students
1847	University of Iowa at Iowa City	State	1,229	9,125
1847	Grinnell College at Grinnell	[illegible]	86	1,026
1853	[illegible]	[illegible]	67	694
1858	[illegible]	State	891	8,135
1876	[illegible] Falls	[illegible]	331	2,688
1881	Drake University at Des Moines	Disciples	215	3,166
1881	Coe College at Cedar Rapids	Presbyterian	60	684
1894	Morningside College at Sioux City	Methodist	63	850

Marriage licences are granted only after both applicants have passed the Wassermann or similar blood tests. In 1911 Iowa passed an Act permitting, under [illegible], the sterilization of insane and feeble-minded persons; up to [illegible], 3,305 men and 721 women had been thus sterilized.

Iowa has a Civil Rights Act (1939) which makes it a misdemeanour for places of public accommodation to deprive any person of 'full and equal enjoyment' of the facilities it offers the public.

Old Age Assistance (maximum $25 a month) was established in 1934 for citizens 65 years of age or older who have been residents of the state for 5 out of the last 9 years preceding application, with maximum income of $300 per annum. In Aug., 1950, 49,588 persons were drawing an average of $49·80 per month. In 1950 the state had 131 hospitals (22,077 beds) registered with the American Medical Association. On 31 Aug., 1950, hospitals for mental diseases had 5,840 patients.

In 1948, 622 persons were convicted of major offences including 5 convicted of murder; none received the death penalty. Of the state's 105 local jails (county and city), the U.S. Bureau of Prisons, as of 30 June, 1949, rated 91 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1950, the receipts of the general revenue fund were $199,986,527, including from taxes, $151,153,737, and from the liquor monopoly, $8,785,423. General expenditures were $125,263,576.

On 30 June, 1950, the net long-term debt was $1,953,000.

Production and Industry.—Iowa is the wealthiest of the agricultural states, partly because nearly the whole area (95·3%) is arable and included in farms. It has escaped large-scale commercial farming; only 502 farms exceed 1,000 acres. The average farm is 173·0 acres; nearly 40% of all farms are between 100 and 180 acres and only 20,253 farms (9%) are under 30 acres. It owes much of its prosperity to the discovery and perfecting of 'hybrid corn' or maize, which in 1948 gave an average yield for the state of 60·5 bushels to the acre compared with the national average of 42·8 bushels; similarly the new 'Clinton' oat gave Iowa a yield of 45·0 bushels per acre compared with the national average of 37·1. Land values are high and tenant-farmers operated (1948) 51·8% of the farm area. Rural poverty exists, but is less than elsewhere; in 1945, 9,264 farms (4% of the 205,948 farms reporting) had gross produce, for sale and farm consumption, valued at less than $400.

In 1950 there were 99 soil conservation districts covering 34,170,206 acres, all in farm lands in 207,191 farms. About 9% of the total area has suffered severe erosion. In 1949, 200,679 farms had 34,743,644 acres of farm land, including 22,596,881 acres of crop land. The estimated value of farm land and buildings in 1945 was $3,611,139,829 (exceeding all states except Illinois).

Cash income (1949) from livestock, $1,548,527,000 (far exceeding all other states); from crops, $445,344,000. It leads, usually, in maize, 527,302,000 bushels in 1949, and in oats, 238,344,000 bushels; other crops were wheat, barley, rye, soybeans (30,333,000 bushels), potatoes, buckwheat and popcorn (31,500,000 lb). The state leads in the value of its livestock ($800,343,000 in 1946), in the production of meat animals (14·5% of the national total in 1947) and in the output of dressed meat (10·7% of the total). But livestock totals are declining, notably horses and mules, milch cows (now 26% under their 1934 peak) and breeding flocks of sheep (lowest since 1917); cattle for beef and swine are increasing. On 1 Jan., 1951, totals included horses, 205,000; mules, 5,000; swine, 13,231,000; milch cows, 1,158,000; all cattle, 5,208,000, and sheep, 1,021,000. The wool clip (1949) yielded 5,071,000 lb. of wool from 626,000 sheep.

The coalfields covering 20,000 square miles, produced 1,750,000 short tons in 1949. The approximate value of mineral products, 1949, was $56,511,109.

The census of manufactures in 1947 showed 2,965 enterprises, with 112,490 wage-earners, earning $275,454,000; value added by manufactures was $671,100,000.

The state, 1949, had 8,725 miles of steam railway, 355 miles of electric railway and 9,745 miles of state-maintained roads. Airports (1950) numbered 101 commercial and 54 municipal; 58 were lighted.

KANSAS.

Government.—Kansas, first settled in 1727, was made a Territory (along with part of Colorado) in 1854, and was admitted into the Union with its present area on 29 Jan., 1861. The Legislature includes a Senate of 40

iembers, elected for 4 years, and a House of Representatives of 125 iembers, elected for 2 years. Sessions are biennial. The Governor and ieutenant-Governor are elected for 2 years. The right to vote is (with the sual exceptions) possessed by all citizens. The state is divided into 105 ounties; the capital is Topeka. The state is represented in Congress by senators and 6 representatives.

The state was the first (of 21 states) to establish in 1933 a Legislative ouncil of 10 senators and 15 representatives to sit continuously between essions for the study of legislative problems.

Governor.—Edward F. Arn (R.), 1951–53 ($10,000).
Secretary of State.—Paul R. Shanahan (R.).

Area and Population.—Area, 82,276 square miles, including 163 quare miles of inland water. Census population, 1 April, 1950, 1,905,299, n increase of 5·8% since 1940. Birth rate, 1948, 22·5 per 1,000 population; eath rate, 9·8. Births, 1949, were 42,514; deaths, 18,929; marriages, 7,912.

Population in 4 federal census years (with distribution by sex, 1940) 'as :—

Years	White	Negro	Indian	Asiatic	Total	Per sq mile
1870	346,377	17,108	914	—	364,399	4·5
1920	1,708,906	57,925	2,276	150	1,769,257	21·6
1930	1,811,997	66,344	2,454	204	1,880,999	22·9
1940	1,734,496	65,138	1,165	229	1,801,028	21·9
Male . .	873,095	32,452	617	176	906,340	—
Female .	861,401	32,686	548	53	894,688	—

Of the total population in 1940, 51,412 (or 3·0%) were foreign-born 'hites :—10,870 (21·1%) German, 6,401 (12·4%) Russian, 4,540 Swedish nd 3,136 English. Of the total population in 1940, 41·9% were urban; ·6% Negro; 48·0% of those 14 years old and over (466,944 males and 116,882 emales) were employed and 48,775 seeking employment; occupied dwelling nits numbered 512,819 (of 3·52 persons); 10,921 men and 12,170 women ere reported divorced. Aliens registered in Dec., 1940, numbered 15,955. ndian lands, 1945, covered 36,423 acres, of which 1,697 acres were tribal oldings.

The census of 1950 (preliminary) gave Wichita a population of 166,306; ansas City, 129,583; Topeka (capital), 77,827; Hutchinson, 33,524; alina, 26,141; Lawrence, 23,292; Leavenworth, 20,543; Pittsburg, 19,371; anhattan, 18,996.

Religion, Education and Welfare.—The most numerous religious odies are Roman Catholic, with 157,292 adherents in 1936, Methodists 140,792), and Disciples of Christ (65,740). Total membership, all denominations, was 691,438.

By a law enacted in 1947, applicants for marriage licenses must show a hysician's certificate dated within 30 days of the application. An Act assed in 1913 permits, under legal safeguards, the sterilization of insane nd feeble-minded persons; cumulative totals of persons thus sterilized own to 1 Jan., 1950, were 1,747 males and 1,254 females.

The school population is stationary; on 1 July, 1948, those under 21 ears numbered 659,000, an increase of 3·3% since 1940 compared with an ncrease in the adult population of 11·7%.

In 1940, persons 25 years of age or older who had not completed one school year numbered 11,975 (1·1%). In 1947, persons between the ages of 5 and 21 numbered 428,491; 316,942 or 74% were attending school. In 1950–51, the 4,102 operating public elementary and secondary school districts had 17,563 teachers and 328,104 enrolled pupils. Teachers' salaries, 1948–49, ranged between $680 and $3,850; average was $2,452. Total public expenditure in 1949–50, $62,911,811; total value of school property $105,896,185.

Leading institutions for higher instruction are (1950):—

Founded	Institution	Control	Professors	Students
1858	Baker University, Baldwin City	Methodist	45	557
1863	State College, Manhattan	State	438	5,902

Under the Civil Rights Act (1874) it was made an offence for any public educational institution or hotel, licensed place of entertainment, railroad or other 'means of public carriage' to discriminate against any persons 'on account of race, colour or previous condition of servitude'; fines up to $1,000 may be imposed and damages recovered. Public bodies and contractors employed by them may not refuse employment to any person on account of race or colour. Trade unions (1941) which exclude workers on account of 'race or colour' are refused recognition as bargaining agents. The Civil Service may not discriminate against any applicant or employee because of his religious or political opinions or affiliations unless he belongs to a 'political movement advocating the overthrow of government by force.'

In June, 1950, 43,016 persons were receiving Old Age Assistance to an average amount of $47·62 per month. In 1950, the state had 122 hospitals (18,396 beds) registered with the American Medical Association. In Dec., 1947, hospitals for mental diseases had 5,049 patients or 263·9 per 100,000 population (national average, 327·9).

In 1946, 416 persons were convicted of major offences, including 11 convicted of murder; none was sentenced to death. The state's penal and reformatory system in Oct., 1950, held 2,040 men and boys and 181 women. By a largely urban vote, the Kansas electorate on 2 Nov., 1948, voted in favour of the repeal of the prohibition section of the Constitution; the Legislature accepted this, and the repeal became effective on 9 March, 1949.

Of the state's 106 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 90 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1950, the total receipts and disbursements were (in dollars):—

Cash Balance, 1 July, 1949	150,803,604	Disbursements, 1949–50	198,332,986
Receipts, 1949–50	206,837,735	Balance, 1 July, 1950	159,308,353
Total	357,641,339	Total	357,641,339

Assessed valuation of real and personal [illegible] 1950, was 3,704,670,044; outstanding indebtedness, 2 July, [illegible]

Production and Industry.—Kansas is pre-eminently ut sometimes suffers from lack of rainfall in the west. In 1[illegible] arms had an area of 48,589,418 acres; total value of farm lands and uildings, $1,971,330,799. Wheat farming is highly mechanized, with 0% of the crop harvested by combines; it is also highly commercialized, ith many companies owning from 40,000 to 70,000 acres; 6,833 farms had ,000 acres or more in 1945. At the other extreme are small farms (15,649 nder 30 acres in 1945) on marginal lands; in 1945, 11,091 farms (8% of the 38,917 farms reporting) had produce, for sale and farm consumption, valued t less than $400. In 1950 there were 99 soil conservation districts nbracing 49,704,960 acres on 133,270 farms and ranches. Cash income, 949, from crops, $448,818,000; from livestock, $484,758,000; from overnment payments, $7,342,000.

Kansas is the greatest wheat-producing state. Its peak output (all inter wheat) reached in 1947 was 286,702,000 bushels; 1949, 164,208,000 ushels. Other crops in 1949 were maize, 73,196,000 bushels; oats, 8,942,000 bushels; rye, potatoes, flax and grain sorghums (26,404,000 ushels). The state has an extensive livestock industry, comprising, on 1 an., 1950, 206,000 horses, 14,000 mules, 628,000 milch cows, 3,627,000 all attle, 336,000 sheep and 1,253,000 swine. Wool clip (1950), 2,720,000 lb. om 330,000 sheep.

Kansas has coalfields covering 15,000 square miles, which produced 615,000 short tons in 1948. Yield of petroleum (1948) was 110,833,000 arrels; natural gas (1948), 245,189 million cubic feet; natural gasoline or etrol (1948), 101,900,000 gallons; lead (1948), 8,386 short tons; zinc (1948), 5,577 short tons; Portland cement (1948), 7,933,899 barrels; salt (1948), 31,756 tons. Total value of mineral products, 1948, $363,362,000.

In 1947 there were 1,946 manufacturing establishments, with 59,363 roduction workers, earning $151,269,000; value added by manufacture as $461,061,000 compared with $117,391,000 in 1939. The slaughtering dustry and petroleum refining are important.

There were 8,583 miles of steam railway in 1949 and 126 miles of electric ilway. There were 192 airports in 1950, of which 69 were municipal; 3 were lighted. The state maintains 9,403 miles of highway, of which 032 miles are surfaced. Total roads and streets, 137,350 miles.

KENTUCKY.

Government.—Kentucky, first settled in 1765, was originally part of irginia; it was admitted into the Union on 1 June, 1792, and its first gislature met on 4 June. The General Assembly consists of a Senate of 8 members elected for 4 years, one-half retiring every 2 years, and a ouse of Representatives of 100 members elected for 2 years. Sessions

are biennial. The Governor and Lieutenant-Governor are elected for 4 years. All citizens are (with necessary exceptions) qualified as electors. The state is divided into 120 counties; the capital is Frankfort (census population in 1950, 11,949). The state is represented in Congress by 2 senators and 9 representatives.

Governor.—Lawrence W. Wetherby (D.), 1950–51 ($10,000); succeeded former Governor E. C. Clements on 27 Nov., 1950, when the latter became U.S. Senator.

Secretary of State.—George Glenn Hatcher (D.), 1947–51.

Area, Population, Education.—Area, 40,395 square miles, of which 286 square miles are water. Census population, 1 April, 1950, 2,944,806, an increase of 99,179 or 3·5% since 1940. Birth rate, 1949, 26·7 per 1,000 population (national average, 24·1); death rate, 9·6 (9·7). Births in 1949, 77,101; deaths, 27,667. Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	2,027,951	261,656	234	64	2,289,905	57·0
1920	2 180,560	235,938	57	75	2,416,630	60·1
1930	2,388,452	226,040	22	75	2,614,589	65·2
1940	2,631,425	214,031	44	127	2,845,627	70 9
Male . .	1,329,625	106,066	28	93	1,435,812	—
Female .	1,301,800	107,965	16	34	1,409,815	—

In 1940 the foreign-born white population (0·5% of the whole) numbered 15,631, of whom 4,630 were German, 1,326 Russian, 1,302 Italian and 1,075 English; of the total population in 1940, 29·8% were urban, 7·5% Negro, and 29·7% (698,571 males and 148,992 females) gainfully employed; occupied dwelling units numbered 698,538 (of 4·07 persons); 11,522 men and 14,819 women were reported divorced. Aliens registered in Dec., 1940, were 5,558.

The census population of the principal cities was in 1950 (preliminary) as follows :—Louisville, 367,359; Covington, 64,282; Lexington, 54,449; Owensboro', 33,983; Paducah, 32,430, and Ashland, 31,228.

In 1940, of persons between the ages of 5 and 24, 436,771 (39·0%) were attending school. Attendance at school between the ages of 7 and 15 years (inclusive) is compulsory, the minimum term being 8 months, and in the larger cities 40 weeks. In 1948-49, the elementary and high schools had 18,180 teachers (1,336 Negro) and 534,820 pupils (37,124 Negro). Expenditure on elementary and high school education in 1948—49, $65,640,734; teachers' salaries, 1948–49, averaged $1,865 (national average, $2,846).

The state has 2 universities, 17 senior colleges and 14 junior colleges, with a total of 34,000 students. Of these universities and colleges, 6 are state-supported and the remainder are supported privately or by municipalities. The largest of the institutions of higher learning are (1950): University of Kentucky, with 10,169 students, 900 teachers; University of Louisville, 9,908 students, 174 teachers; Western State College, 3,024 students, 120 teachers; Eastern State College, 2,506 students, 132 teachers; Murray State College, 2,123 students, 96 teachers. Two of the several privately endowed colleges of high standing are Berea College, in Berea, and Centre College at Danville.

Religion and Welfare.—The chief religious denominations are:—Southern Baptists, with 554,500 members (in 1950), Roman Catholic (220,000) and Methodists (184,000). Total, all denominations, about 1,396,500.

Statutes require the separation of whites and Negroes in all educational institutions (each race having teachers only of its own race), but in 1950 these were amended to permit enrolment of Negroes in white institutions where 'equal facilities' are not available in Negro colleges. All graduate, and some undergraduate, schools now have mixed classes. Segregation is enforced in reformatories and penal institutions, railways (except freight cars), hospitals. Marriage between white and coloured persons is prohibited. Marriage licences are granted only after both applicants have passed the Wassermann or similar blood test.

The state has a public assistance programme for the needy aged, for dependent children and for the needy blind. Old Age Assistance (maximum $250 a year) is provided for those 65 years of age or older who have been citizens for 15 years and residents of the county for 10 years, with maximum income of $400 per annum or maximum assets of $2,500; in Aug., 1950, 68,399 persons (34% of those aged 65 or over) were receiving an average of $20 56 per month. Aid was given to 23,796 families ($37·34 monthly per family) with 60,385 children and to 2,395 needy blind persons ($21·98 per month). In 1949 the state had 111 hospitals (21,191 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 6,310 patients or 250 3 per 100,000 population (national average, 363·2).

Of the state's 125 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 116 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1950, general revenues were $167,968,000 (taxes, $122,496,000, and federal grants, $36,289,000) and general expenditures, $172,039,000.

The net long-term debt on July 1, 1950, was $8,024,000.

Production and Industry.—Kentucky is largely ar[illegible] state In 1945, 238,501 farms had an area of 19,724,834 acres; [illegible] lands and buildings, $1,015,796,276. In 1945, 54,301 farms (23% of the 233,970 farms reporting) had produce, for sale or farm consumption, valued at less than $400.

Cash income, 1949, from crops, $253,839,000 and from livestock, $274,081,000. In 1949, the maize crop amounted to 88,762,000 bushels, other farm products being wheat, hay, potatoes, sweet potatoes, watermelons, hemp, cotton and sorghum cane. The chief crop, however, is tobacco; output in 1949, 445,775,000 lb., compared with the average, 1938–47, of 368,554,000 lb.

Since 1940, when the Soil Conservation Act was passed, 110 soil conservation districts have been organized, covering 21,983,508 acres of the state's 25·7 million acres. Surveys have been completed on 6,927,862 acres and farm plans completed for 32,502 farmers on 4,145,825 acres. Contour [illegible] now covers 595,383 acres; there are 5,917 miles of terraces and [illegible] of open drainage ditches. Soil erosion has been severe on 11,724,735 acres (45·6% of the total) and moderate on 12,613,103 acres (49·1%).

Stock-raising is important in Kentucky, which has long been famous for its horses. The livestock on 1 Jan., 1950, included 177,000 horses, 136,000 mules, 634,000 milch cows, 1,608,000 all cattle, 700,000 sheep

and 1,668,000 swine. In 1949, the wool clip yielded 4,160,000 lb. of wool from 650,000 sheep. National forest area (1949), 1,393,534 acres.

The principal mineral product of Kentucky is coal, 73,997,000 short tons mined in 1949 (ranking third). Output of fluorspar, 84,889 short tons in 1948; petroleum (1948), 8,551,000 barrels; natural gasoline or petrol (1948), 66,600,000 gallons; natural gas (1947), 98,010 million cubic feet. Total value of mineral products in 1948, $506,249,000.

In 1947 (federal census), 2,244 manufacturing establishments had 110,602 production workers who earned $235,989,000; value added by manufacture was $740,772,000 compared with $186,485,000 in 1939.

In 1949, the state had 3,757 miles of steam railway besides 400 miles of electric railway track. There were, 1950, 67 airports, of which 17 were publicly owned. The state maintains 12,774 miles of highway.

LOUISIANA.

Government.—Louisiana was first settled in 1699. That part lying east of the Mississippi river was organized in 1804 as the Territory of New Orleans, and admitted into the Union on April 30, 1812. The section west of the river was added very shortly thereafter. The Legislature consists of a Senate of 39 members and a House of Representatives of 100 members, both chosen for 4 years. Sessions are biennial. The Governor and Lieutenant-Governor are elected for 4 years. Qualified electors are (with the usual exceptions) all registered citizens with the usual residential qualifications. In 1948, potential voters numbered 1,490,000; voters in the 1948 elections numbered only 416,336, or 27·9% of the electorate. The state sends to Congress 2 senators and 8 representatives. Louisiana is divided into 64 parishes (corresponding with the counties of other states); the capital is Baton Rouge.

Governor.—Earl K. Long (D.), 1948–52 ($15,000).
Secretary of State.—Wade O. Martin, Jr. (D.).

Area and Population.—Area, 48,522 square miles, including 3,346 square miles of inland water. Census population, 1 April, 1950, 2,683,516, an increase of 319,636 or 13·5% since 1940. Birth rate, 1948, was 28·3 per 1,000 population (national average, 24·2); death rate, 9·1 (9·9). Births, 1948, 73,312; deaths, 23,561.

Population in 4 census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	941,086	713,874	780	648	1,656,388	36·5
1920	1,096,611	700,257	1,066	575	1,798,509	39·6
1930	1,322,712	776,326	1,536	1,019	2,101,593	46·5
1940	1,511,739	849,303	1,801	1,037	2,363,880	52·3
Male . .	757,379	413,322	956	725	1,172,382	—
Female .	754,360	435,981	845	312	1,191,498	—

In 1940, the foreign-born whites (1·1% of the total) numbered 27,272, of whom 9,849 (37·3%) were Italian, 2,574 German, 1,840 French, 1,215 English and 811 Irish. Of the total population in 1940, 41·5% were urban, 35·9% Negro; 32·6% (587,901 males and 183,241 females) were gainfully employed; occupied dwelling units numbered 592,528 (of 3·73 persons); 6,809 men and 11,233 women were reported divorced. New Orleans has a population of 567,257 (census, 1950, preliminary); Shreveport, 125,506; Baton Rouge (capital), 123,957. Aliens registered in Dec., 1940, were 17,310.

Religion, Education and Welfare.—Most of the southern states are strenuously Protestant, but nearly 56% of the church membership of Louisiana are Roman Catholic. Latter had 632,583 adherents in 1936. Of Protestants in the state, Baptists (Negro Baptists, 213,055 and Southern Baptists, 87,926), and Methodists are the most numerous. Total, all denominations, 1,136,123.

In 1947, of persons between the ages of 5 and 24, 504,399 (54·3%) were attending school. Attendance in elementary schools is compulsory. In 1948–49, the public elementary and high schools had 15,687 teachers and 447,047 pupils, including 4,885 Negro teachers with 172,677 pupils. In 1948–49 teachers had an average salary of $2,771. There are 16 four-year colleges. Total expenditure on elementary and secondary education (1948–49), $34,556,000. Superior instruction is given in the Louisiana State University (1877), with, 1948–49, 653 professors and 9,912 students. Tulane University (founded in 1834) in New Orleans had 885 professors and 5,040 students. This university has state support to the extent of the remission of certain taxes. The Roman Catholic Loyola University (founded 1911) at New Orleans had 200 professors and 3,214 students. Dillard University and Southern University are for coloured persons.

Marriage licences are granted only when the male applicant can produce a physician's certificate, dated not more than 15 days before, that he is free from venereal disease.

Statutes require the separation of whites and Negroes in all educational institutions (but are silent on the question of teachers), circuses, mental hospitals, penal institutions, railroads, including waiting rooms. Children may not be adopted save by persons of the same race. Marriage is prohibited between any white or Indian person and any coloured person.

In June, 1950, 120,401 persons were receiving Old Age Assistance to an average of $47·30 per month; 33,222 families with 77,774 dependent children were receiving an average of $18 72 per month; 1,853 blind persons were getting $42·71 per month. In 1949 the state had 108 hospitals (20,707 beds) registered with the American Medical Association. In Dec., 1946, hospitals for mental diseases had 7,918 patients.

Of the state's 62 local jails (county and city) the U.S. Bureau of Prisons as of 30 June, 1949, rated 58 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1949, ordinary revenues were $341,036,000 (taxes, $223,097,000 and federal grants, $64,588,000), while ordinary expenditures were $385,235,000.

The net long-term debt of the state, 30 June, 1949, amounted to $187,373,000.

Production and Industry.—The state is divided into two parts, the uplands and the alluvial and swamp regions of the coast. A delta occupies about one-third of the total area. Agriculture is the leading industry.

In 1945, 129,295 farms had an area of 10,039,657 acres; value of farm land and buildings, $472,327,792. Cash income, 1949, from crops, $246,022,000, and from livestock, $96,129,000. In 1945, 19,078 farms (15% of the 127,000 farms reporting) had produce for sale or consumption valued at less than $400.

In 1950 there were 26 soil conservation districts covering 27,948,100 acres, of which 9,993,508 acres were farm land (128,553 farms). Production of sugar cane was 6,232,000 short tons in 1949; sugar-cane syrup, 2,600,000 gallons; rice (leading all states), 24,559,000 bushels; maize, 18,446,000 bushels; sweet potatoes, 8,330,000 bushels; tung nuts, 17,000 tons; pecans, 13,640,000 lb.; cotton, 650,000 bales. On 1 Jan., 1950, the state contained 109,000 horses, 117,000 mules, 140,000 sheep, 731,000 swine, 1,439,000 all cattle and 331,000 milch cows. Output of furs in 1947–48 was 6,144,060 pelts. National forest area (1949), 1,274,977 acres.

Rich sulphur mines are found in Louisiana, and wells for the extraction of sulphur by means of hot water and compressed air are in operation; output, 1948, 1,001,665 long tons. The yield in 1948 of crude petroleum was 181,181,000 barrels; of natural gasoline or petrol (1948) 706,200,000 gallons; natural gas (1947) 852,600 million cubic feet; salt (1948) 2,223,249 tons. Total mineral output in 1948 was valued at $593,403,000.

The manufacturing industries are chiefly those associated with petroleum, sugar, lumber, rice, cotton-seed. In 1947, 16 petroleum refineries, employing 11,453 men, shipped products valued at $479,700,000. In 1947 2,389 manufacturing establishments employed 111,553 production workers who earned $229,673,000; value added by manufacture was $694,074,000.

The state has ample facilities for traffic, having, besides 39,500 miles of public roads (13,911 miles maintained by the state), the Mississippi and other waterways, with 4,794 miles of navigable water. In 1947, the steam railways in the state had a length of 5,021 miles, besides 300 miles of electric railway track. There were, 1948, 77 airports, of which 23 were municipal; 25 were lighted. New Orleans is the second largest seaport, handling in 1948 imports and exports valued at $1,276,500,000 or 9·8% of the national total.

MAINE.

Government.—Maine was first settled in 1607. From 1677 to 1820 it was a part of Massachusetts and was admitted into the Union on 15 March, 1820. There is a Legislature consisting of the Senate with 33 members, and the House of Representatives with 151 members, both Houses being elected simultaneously for 2 years. Apart from these legislators and the Governor (elected for 2 years) no other state officers are elected. An Executive Council of 7 which meets each legislative day and twice monthly when the Legislature is not in session, has effective powers of approval or veto in many matters. The Justices of the Supreme Judicial Court give their opinion upon important questions of law and upon solemn occasions when

required by the Governor, Council, Senate or House of Representatives. The suffrage is possessed by all citizens, 21 years of age, who can read English and write their own names; paupers and un-taxed Indians (those belonging to the 2 tribes under state wardship) have no vote. The state is divided into 16 counties, subdivided into towns, cities, plantations and various unincorporated places. The capital is Augusta; the state sends to Congress 2 senators and 3 representatives.

Governor.—Frederick G. Payne (R.), 1951–53 ($10,000).
Secretary of State.—Harold I. Goss (R.), 1951–53.

Area, Population, Education.—Area, 32,562 square miles. Of the state's total land area (19,865,600 acres), about 16,783,000 acres (85%) are in timber and wood lots. Census population, 1 April, 1950, 913,774, an increase of 66,548 or 7·9% since 1940.

Population for 4 census years (with distribution by sex in 1940):—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	739,995	1,363	892	121	742,371	24·8
1920	766,695	1,310	839	170	768,014	25·7
1930	795,185	1,096	1,012	130	797,423	26·7
1940	844,513	1,304	1,251	128	847,226	27·3
Male . .	424,327	725	673	96	425,821	—
Female .	420,216	579	578	32	421,405	—

In 1940, the foreign-born white population (9·9% of the total) numbered 83,641, of whom 30,794 (36·9%) were French Canadian, 30,196 (35·7%) English Canadian, and 3,558 English. Of the total population in 1940, 40·5% were urban, 0·1 Negro, and 32·9% (204,215 males and 74,821 females) were gainfully employed; the number of occupied dwelling units was 218,968 (of 3·87 persons). Aliens registered in Dec., 1940, numbered 47,233. Birth rate, 1948, was 24·8 per 1,000 population (national rate 25·3); death rate, 11·2 (9·9). In 1949, births numbered 21,911, deaths 10,174; marriages, 8,085; divorces 2,117.

The largest city in the state is Portland with a census population of 76,963 in 1950 (preliminary). Other cities and towns (with population in 1950) are:—Lewiston, 41,142; Bangor, 31,473; Auburn, 23,078; South Portland, 21,732; Augusta, 20,900; Biddeford, 20,785; Waterville, 18,232.

In 1940, of persons between the ages of 5 and 24, 184,678 (62·3%) were attending school; national average for this age group was 57·7%. Education is free for pupils from 5 to 21 years of age, and compulsory from 7 to 15. In 1948–49 the 1,468 public elementary schools had 4,449 teachers and 122,000 enrolled pupils. The 189 public high schools had 1,762 teachers and 35,573 pupils. There are 59 academies with about 487 teachers and 7,727 pupils. Two teachers' colleges and 3 normal schools (1950–51) had 111 teachers and 1,218 students. Teachers' salaries, 1948–49, averaged $1,942 (national average, $2,846). The State University of Maine, founded in 1868 at Orono, had (1950–51) 299 professors and teachers and 3,554 students; Bowdoin College, founded in 1794 at Brunswick, had 85 professors and 841 students; Bates College at Lewiston, 57 professors and 831 students, and Colby College at Waterville, 82 professors and 1,096 students. Total public expenditure on elementary and secondary eduction (including grants to academies) in 1948–49, $22,224,848.

Religion and Welfare.—The largest religious bodies are :—Roman Catholic with 193,398 members in 1913; Baptists (36,549), and Congregationalists and Christian Churches. Total membership, all ..., was 305,123.

Marriage licences are granted only after both applicants have passed a physical examination, including a standard blood test within the 30 days preceding the application.

An Act passed in 1925 permits, under legal ..., the sterilization of the insane or feeble-minded; up to 1 Jan., 1..., ...1. ...men and 24 men had been sterilized.

Old Age Assistance (maximum $50 per month) was prescribed by statute in 1933 but failed to secure adequate funds until 1937; it is now granted to those citizens 65 years of age or older who have resided in the state 5 years out of the 9 years preceding application. In June, 1950, 15,064 (out of 6,000 aged 65 or over) were receiving an average of $44·34 per month. In 1950, the state had 57 hospitals (8,719 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 4,606 patients or 337·3 per 100,000 population (national average, 363·2); on Aug., 1950, patients numbered 4,026.

The state's penal system on 1 Sept., 1950, held 619 men and 92 women; reform schools had 118 boys and 87 girls. Of the state's 14 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 7 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the financial year ending 30 June, 1950, the amount of revenue was $61,210,062 and expenditure was $61,811,434.

Bonded debt on 30 June, 1950, was $8,517,500.

Production, Commerce, Railways.—The products of Maine are derived chiefly from agriculture, forestry, quarrying and fisheries. In 1945 2,184 farms occupied 4,613,175 acres, of which 1,315,562 acres were crop land; total value of farm land and buildings, $159,680,897. All farms were owner-operated except 1,337 operated by tenants and 211 by managers. There is some marginal farming: in 1945, 13,145 farms (32% of the 40,528 farms reporting) had produce, for sale or farm consumption, valued at less than $400. Cash income, 1949, from crops, $114,502,000; from live-stock and livestock products, $64,868,000. In 1950 there were 15 soil conservation districts covering 16,486,260 acres, of which 4,162,018 acres were farm land (39,744 farms). Maine leads all states in the output of potatoes (about one-seventh of the country's total); output in 1949 was 3,340,000 bushels (average, 1937–46, 50,964,000 bushels). Other crops are oats, hay, apples and blueberries. On 1 Jan., 1950, the farm animals comprised 25,000 horses, 121,000 milch cows, 214,000 all cattle, 22,000 sheep and 32,000 swine.

Minerals are stone, lime, clay products, slate and (1949) 18,286 short tons of feldspar; total output, 1948, was valued at $8,482,000.

In 1949 Maine had 1,409 manufacturing establishments employing 113,143 in production workers, earning $241,056,535; value added by manufacture (1947) was $432,123,000. Leading industry is the manufacture of pulp and paper with 30 plants, 15,608 workers and output, 1948, valued at 221,526,432.

Lumber is an important manufacturing product, the annual cut being about 400,000,000 board feet; white pine, spruce for wood pulp, hemlock, balsam, birch, cedar, oak, maple, beech and ash are found.

In 1949, there were 1,847 miles of steam railway and 32 miles of electric

railway. Airports, 1950, numbered 49, of which 21 were municipal, 3 military; 16 were lighted. There were 25 licensed commercial seapl bases.

Defence.—In Aroostock county, 4 miles from the Canadian bound in the extreme north-east part of the state, is the Limestone Air Base the heaviest super-bombers of the U.S. Air Force; covering 9,900 acre represents the 'polar concept' for U.S. defence which has led to sim bases at Stephensville, Newfoundland; Goose Bay, Labrador; Greenl and Alaska. It is stated to be the nearest American point to Europe European Russia.

MARYLAND.

Government.—Maryland, first settled in 1634, was one of the 13 orig states. The General Assembly consists of a Senate of 29, and a Hous Delegates of 123 members, both elected for 4 years. Voters are citiz who have the usual residential qualifications.

The state is divided into 23 counties and Baltimore City. The st capital is Annapolis. Maryland sends to Congress 2 senators and representatives.

Governor.—Theodore R. McKeldin, Jr. (R.), 1951–55 ($4,500).
Secretary of State.—John R. Reeves (R.).

Area, Population, Education.—Area, 10,577 square miles, of wh 690 square miles are inland water; the Chesapeake Bay occupies 1,203 squ miles. Census population, 1 April, 1950, 2,343,001, an increase since 1 of 521,757 or 28·6%. Birth rate, 1948, was 24·8 per 1,000 populati death rate, 10·4. In 1948 there were 53,423 births, 22,440 deaths, 56, marriages and 5,999 divorces.

Population according to 5 federal censuses (with distribution by sex 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per s mile
1870	605,497	175,391	4	2	780,894	78·(
1910	1,062,639	232,250	55	402	1,295,346	130·3
1920	1,204,737	244,479	32	413	1,449,661	145 8
1930	1,354,226	276,379	50	871	1,631,526	165·(
1940	1,518,481	301,931	73	759	1,821,244	184·5
Male . .	762,801	151,617	39	581	915,038	—
Female .	755,680	150,314	34	178	906,206	—

Of the total population (1940) 82,591 (or 4·5%) were foreign-born whi of whom 12,008 (17·0%) were from Germany, 15,158 (21·9%) from Rus 10,119 from Italy, 9,817 from Poland, 4,531 from England, and 3,383 f Ireland. Of the total population in 1940, 59·3% were urban, 16·5% Ne

and 37·9% (509,990 males and 180,921 females) were gainfully employed; the number of occupied dwelling units was 465,683 (of 3·91 persons). In 1940, 6,705 men and 9,125 women were reported divorced. Aliens registered in Dec., 1940, numbered 37,792.

The largest city in the state (containing 40% of the population of the state in 1950) is Baltimore, with 940,205, a decrease of 10% since 1940. Other cities, with population in 1950, are Cumberland, 37,63[illegible]; [illegible] 36,232; Frederick, 18,092; Salisbury, 15,109; Annapolis [illegible].

Education is compulsory from 7 to 16 years of age. In 1940, of persons between the ages of 5 and 24, 343,897 (54·6%) were attending school. In 1948–49 the elementary schools had 258,112 pupils (51,713 coloured), and [illegible] had 56,934 pupils (17,809 coloured). White teachers numbered [illegible]. Negro teachers 2,406. Expenditure on education, 1948–49, was $57,099,000. The state pays $400 a year towards the salary of each teacher (minimum $2,000) and $20 towards the cost of each pupil, plus special grants to those counties whose revenues are too low to permit adequate school facilities. In 1948–49 the state's 10,504 teachers had an average salary of $3,506 (national average, $2,846).

The most important institution for higher education is Johns Hopkins University, organized in 1876, with, in 1948–49, 990 teachers, and 3,227 students. Goucher College, founded in 1888, had 61 instructors and 755 students. Other institutions are the Peabody Institute for Music, the Maryland Institute School of Art and Design, and University of Maryland, at Baltimore and College Park, with 1,050 professors and 15,900 regular and ex-soldier students in 1948–49.

Religion and Welfare.—The Roman Catholic Church, with 272,884 adherents in 1936, is the leading denomination; next comes the Methodist, with 95,101. Jewish Congregations are third, with 75,225. Total membership of the 2,959 churches of all denominations, 751,600

Statutes require separation of whites and Negroes in all educational institutions, reform schools, farm and trade schools, railroads (except sleeping cars and freight cars), steam-boats and tuberculosis hospitals. Inter-racial marriage is prohibited. Bowing to the 1950 Supreme Court decisions declaring segregation unconstitutional, the University of Maryland admitted a Negro girl to its School of Nursing.

Counties (since 1931) furnish Old Age Assistance for those 65 years of age or older who have been citizens for 15 years and residents of the county for 10 years. In June, 1950, 12,107 citizens were receiving an average grant of $37·20 per month; 488 blind persons were receiving monthly $40·80. In 1949, the state had 85 hospitals (25,303 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 7,004 patients or 347·1 per 100,000 population (national average, 363·2).

Of the state's 25 local jails (county and city) the U.S. Bureau of Prisons as of 30 June, 1949, rated 19 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1949, the total receipts and disbursements were as follows (in dollars):—

Cash Balance, 30 June, 1948.	36,142,701	Disbursements, 1948–49 .	180,145,340
Receipts, 1948–49 . .	184,368,404	Cash balance, 30 June, 1949 .	40,365,765
Total . . .	220,511,105	Total . . .	220,511,105

On 30 June, 1949, the net long-term debts of the state amounted to $23,616,563.

Production and Industry.—Agriculture is an important industry in the state; about 70·0% of the farms (1945) were worked by their owners. In 1945, there were 41,275 farms with an area of 4,199,859 acres; total value of land and buildings, $354,806,789. In 1950 there were 23 soil conservation districts embracing 6,098,560 acres, of which 4,052,182 acres were farm land (40,779 farms). In 1945 marginal farming had 7,384 farms (17% of the 40,481 farms reporting) which had produce for sale and farm consumption valued at less than $400.

Cash income, 1949, from crops, $80,303,000, and from livestock, $159,834,000. Output of tomatoes, for processing, is about 251,000 tons. Other crops in 1949 were:—Wheat, maize (18,354,000 bushels), hay, potatoes, tobacco (41,000,000 lb.). The farm animals in the state on 1 Jan., 1950, were:—Horses, 41,000; mules, 8,000; milch cows, 245,000; all cattle, 449,000; sheep, 47,000; swine, 270,000.

Output of coal in 1948 was 1,596,000 short tons; coke, 2,147,787 tons. Maryland produces asbestos and some potash salts. Total mineral output (1948) was valued at $27,922,000.

In the census of 1947, Maryland had 2,824 manufactories, with 188,638 production workers earning $458,243,000; value added by manufacture was $1,138,407,000 compared with $420,589,000 in 1939. Steel manufacture and copper smelting and refining are the chief industries.

The state maintains a network of roads 4,352 miles in extent, all surfaced; local roads, 12,611 miles. Steam railways had (1947) 1,321 miles of line. There were, 1949, 32 licensed airports; 4 were lighted. Nine scheduled airlines were serving Baltimore's municipal airport in 1949. Private planes numbered 743 in 1949.

MASSACHUSETTS.

Constitution and Government.—The first permanent settlement within the borders of the present state was made at Plymouth in Dec., 1620, by the Pilgrims from Holland, who were separatists from the English Church, and formed the nucleus of the Plymouth Colony. In 1628 another company of Puritans settled at Salem, forming eventually the Massachusetts Bay Colony. In 1630 Boston was settled. In 1629 the whole region called New England was formed into a province, the government of which was divided between the colony of Plymouth and that of Massachusetts Bay, but in 1691 they were united. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and in 1780 adopted its present constitution and on 6 Feb., 1788, became the sixth state to ratify the U.S. constitution.

The legislative body, styled the General Court of the Commonwealth of Massachusetts, meets annually, and consists of the Senate with 40 members, elected biennially, and the House of Representatives of 240 members, elected for 2 years in 160 districts, each of which returns 1, 2 or 3 representatives according to the number of legal voters. The Governor and Lieutenant-

Governor are elected for 2 years. The state sends 2 senators and 14 representatives to the Federal Congress.

Electors are all adult citizens, with the usual residential qualifications, who can read and write the English language; excluded are paupers and those under guardianship.

The state has 11 counties, 39 cities and 312 towns; the capital is Boston.

Governor.—Paul A. Dever (D.), 1951-53 (salary, $20,000).
Secretary of the Commonwealth.—Edward J. Cronin (D.).

Area and Population.— Area, 8,257 square miles, 350 square miles being inland water. The census population 1 April, 1950, was 4,690,514, an increase of 373,793 or 8·7% since 1940. Births, 1948, were 97,389 or 21·0 per 1,000 population (national average, 24·2); deaths, 52,611 or 9·1 per 1,000 (national average, 9·9). Population at 4 federal census years (with distribution by sex, 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	3,324,926	38,055	688	2,747	3,366,416	418·8
1920	3,803,524	45,466	555	2,811	3,852,356	479·2
1930	4,192,992	52,365	874	3,383	4,249,614	537·4
1940	4,257,596	55,391	769	2,965	4,316,721	545 9
Male . .	2,072,515	27,240	409	2,315	2,102,479	—
Female .	2,185,081	28,151	360	650	2,214,242	—

Of the total population in 1940, 848,852 (19·4%) were foreign-born whites, of whom 142,462 (16·7%) were English Canadians and 81,411 (9·5%) were French Canadians; 114,362 from Italy; 113,924 (13·4%) from Ireland; 64,575 from Russia; 58,438 from England; 53,783 from Poland; 28,128 from Sweden; 25,174 from Scotland; 24,182 from Portugal and 16,531 from Germany. Aliens registered in Dec., 1940, numbered 364,421 or 7·2% of the national total. Of the total population in 1940, 89·4% were urban, 1·2% Negro, and 35·5% (1,050,678 males and 484,109 females) were gainfully employed; occupied dwelling units numbered 1,120,694 (of 3·85 persons). In 1940 census, 14,677 men and 21,938 women were reported divorced.

In 1950 (census, preliminary), the population of the principal cities was :—

Cities	Population	Cities	Population	Cities	Population
Boston (capital).	790,863	Somerville .	102,254	Medford . .	66,109
Worcester .	201,885	Lynn . .	99,521	Brockton .	62,856
Springfield .	162,601	Lowell . .	96,523	Malden . .	59,779
Cambridge .	120,676	Quincy . .	82,190	Holyoke . .	54,441

Education.—In 1940, of persons between the ages of 5 and 24, 860,665 (60·9%) were attending school. School attendance is compulsory for children from 7 to 16 years of age (except in certain instances). Children are excused attendance at school for religious instruction (outside school) for periods not exceeding one hour per week, but no public funds may be expended in connexion with this. For the school year ending 30 June, 1948–49, the total expenditure for public schools was $112,888,025. The

public elementary and secondary schools had 24,123 teachers and 598,901 pupils (1948–49). Teachers' salaries, 1948–49, ranged between $1,500 and $4,000; average was $3,159. There are 9 state teachers' colleges, a school of art and a maritime academy.

Within the state there are 25 colleges and universities, 15 professional schools, 12 teachers' colleges, 6 normal schools, 11 junior colleges, with about 5,500 professors and instructors, and 52,000 students. Some of the leading institutions (1948–49) are :—

Year opened	Location and name of universities and colleges	Professors and instructors	Students

1948	Waltham . Brandeis University [2] (non-sectarian, Jewish-sponsored)	14	104

[1] For men only. [2] Co-educational. [3] For women only.
[4] Radcliffe College is affiliated with, but is not legally a part of, Harvard University, certain professors in the university offering instruction to students in Radcliffe College.

Religion and Welfare.—The principal religious bodies are the Roman Catholics with 1,696,708 members in 1936, Jewish Congregations with 257,994 members, and [illegible] with 166,411. Total membership, all denominations, was [illegible].

Marriage licences are granted only after both applicants have passed the Wassermann or similar blood test. Massachusetts is one of the 2 states which forbid the import or sale of contraceptives; its birthrate, however, is the second lowest in the country.

On 30 June, 1949, the state had 17 public institutions for the insane, the feeble-minded and epileptics, as well as 20 private hospitals, including 2 veterans' hospitals. The number under public care in institutions for the mentally ill at the end of 1945 was 23,099 or 565·3 per 100,000 of the population (national average was 363·2).

On 30 June, 1945, there were 5 institutions under the supervision of the Department of Public Welfare, consisting of the Tewkesbury state infirmary with 2,094 inmates, three industrial schools with 859 inmates, and a hospital school for crippled children with 179 inmates. As state minor wards, under the care of the Department, there were 10,643 children placed with families.

Old Age Assistance (maximum unstated) was established in conformity

with Federal Social Security Law for those citizens 65 years of age or older who have lived in the state 3 out of 9 years preceding application. In June, 1950, 100,852 persons (about 25% of those aged 65 or over) were drawing an average of $65·76 per month. In 1949 the state had 223 hospitals (64,256 beds) registered with the American Medical Association.

In 1945 2,147 persons (52·5 per 100,000 population) were convicted of major offences, including 9 convicted of murder; none received the death penalty. The penal institutions consist of 5 strictly state institutions and 16 county jails; the U.S. Bureau of Prisons, as of 30 June, 1949, rated only one of them as sub-standard, unsuitable for the housing of Federal prisoners, which is easily the best showing of any state.

In 1946 the state adopted a 'Fair Employment Practice Act' designed to enforce the thesis that 'the right to work without discrimination because of race, colour, religious creed, national origin or ancestry is hereby declared to be a right and privilege of the inhabitants of the commonwealth.' Enforcement is entrusted to a 'Massachusetts Commission against Discrimination' of 3 members appointed by the Governor. All employers, public and private, with 6 or more employees, all trade unions and all employment agencies, but not non-profit organizations, are covered by the Act. The Commission is bound to investigate complaints, use its good offices to settle the issue and, such methods failing, to hold formal hearings and issue orders enforceable by the courts. In addition, a Civil Rights Act (1933) forbids 'places of accommodation and resort' to discriminate 'because of sect, creed, class, race, colour or nationality.' These Acts do not apply to educational institutions.

Finance.—For the fiscal year ending 30 Nov., 1949, the general revenue of the state (in dollars) was 340,089,000, of which 224,538,000 came from taxes and 55,201,000 from federal grants. General expenditures were 322,479,000, of which state activities took 111,439,000, other governmental units 134,339,000 and debt retirement 3,102,000.

The net long-term debt on 30 Nov., 1949, amounted to $149,590,000.

Production, Industry, Commerce.—In 1945, the number of farms was 37,007, with an area of 2,078,349 acres; value of farm land and buildings was $265,232,462. 33,269 farms were operated by the owners, 868 by managers and 967 by tenants. In 1945, 10,117 farms (28% of the 36,264 farms reporting) had produce, for sale or farm consumption, valued at less than $400. Cash income, 1949, from crops was $60,877,000 and from livestock, $120,309,000. Principal crops in 1949 were:—Potatoes, 2,850,000 bushels; [illegible] barrels; tobacco, 12,624,000 lb.; hay [illegible] In 1950, [illegible] the state had 123,000 milch cows and 179,000 all cattle.

The federal census of manufactures in 1947 showed 10,524 establishments, employing 601,603 production workers, who earned $1,464,047,000; value added by manufacture was $3,370,094,000 compared with $1,181,465,000 in 1939. Chief industries were woollen and worsted goods, boots and shoes, and cotton goods.

There is little mining within the state. In 1948, 2,147,787 net tons of coke were produced. Total mineral output in 1948 was valued at $13,844,000.

On 1 Jan., 1948, there were 1,732 miles of steam railways in the state and 426 miles of electric railways. There were (1949) 80 airports, of which 21 were municipal; 19 were lighted. A state-wide programme of highway construction will be completed in 1952. In 1948 the state maintained 1,829 miles of drained and graded roads, all surfaced; total

highway mileage, 17,407. The state licenses 1,035,369 private passenger motor cars (one for every 4·5 persons), 5,247 public buses and taxicabs and 155,800 commercial vehicles.

MICHIGAN.

Government.—Michigan, first settled by Marquette at Sault Ste. Marie in 1668, became the Territory of Michigan in 1805, with its boundaries greatly enlarged in 1818 and 1834; it was admitted into the Union with its present boundaries on 26 Jan., 1837. The Senate consists of 32 members and the House of Representatives of 100 members, all elected for 2 years, as are also the Governor and Lieutenant-Governor. Electors are all citizens over 21 years of age resident in the state for 6 months, next preceding the election. The state sends to Congress 2 senators and 17 representatives.

The state is organized in 83 counties, each administered by a Board of Supervisors, as well as in cities, townships and villages. The capital is Lansing.

Governor.—G. Mennen Williams (D.), 1951–53 ($22,500).

Secretary of State.—Frederick M. Alger, Jr. (R.).

Area, Population, Education.—Area, 96,720 square miles, of which 39,698 square miles are inland water.[1] Census population, 1 April, 1950, 6,371,766, an increase of 1,115,660 or 21·2% since 1940. Birth rate, 1949, was 24·6 per 1,000 population; death rate, 9·0. In 1949 births were 156,469; deaths, 57,107; marriages, 53,109, and divorces, 16,274.

Population of 4 federal census years, with distribution by sex in 1940:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	2,785,247	17,115	7,519	292	2,810,173	48·9
1920	3,601,627	60,082	5,614	1,089	3,668,412	63·8
1930	4,663,507	169,453	7,080	2,285	4,842,325	84·9
1940	5,039,643	208,345	6,282	1,836	5,256,106	92·2
Male . .	2,584,459	105,491	3,365	1,412	2,694,727	—
Female .	2,455,184	102,854	2,917	424	2,561,379	—

Of the total population in 1940, 683,030 (or 13·5% of the total) were foreign-born whites, of whom 158,416 (23·2%) were from Canada, 96,826 (14·2%) from Poland, 59,783 from Germany, 47,728 from England, 40,631

[1] These figures have been made official by the State Legislature of Michigan (Michigan Public Act, 78; approved 11 April, 1945). They differ from those issued by the Bureau of the Census by 38,504 square miles (inland water). *See* Chase S. and Stellanova *Osborn*, Errors in Official U.S. Area Figures. Lancaster, Pa., 1945.

from Italy, 27,306 from Scotland, 32,229 from Russia, 24,722 from Holland, and 12,506 from Ireland. Of the total in 1940, 65·7% were urban, 4·0% Negro; 34·5% (1,427,459 men and 397,494 women) were gainfully employed; the number of occupied dwelling units was 1,396,014 (of 3·77 persons); 33,547 men and 35,891 women were reported divorced. Aliens registered in Dec., 1940, were 303,103.

Population of the chief cities (census of 1 April, 1950, preliminary), was :—

Cities	Population	Cities	Population	Cities	Population
Detroit . .	1,838,517	Lansing (capital)	91,694	Battle Creek .	48,469
Grand Rapids .	175,647	Pontiac . .	73,112	Muskegon .	48,047
Flint . . .	162,800	Kalamazoo .	57,326	Ann Arbor .	47,279
Dearborn . .	94,529	Bay City .	52,372	Royal Oak .	46,817
Saginaw . .	92,352	Jackson . .	50,904	Highland Park	46,155

In 1940, of persons between the ages of 5 and 24, 1,123,792 (69·1%) were attending school; the national average for this age group was 57·7%. Education is compulsory for the school term for children from 6 to 16 years of age. The total net expenditure for graded and [illegible] public schools, for the fiscal year ending 30 June, 1949, was [illegible]. In 1949 there were 5,031 school districts (elementary and secondary schools) with 1,014,535 pupils and 35,200 teachers. Teachers' salaries, 1948–49, averaged $3,289 (national average, $2,846). On 30 June, 1950, the 10 junior colleges had 282 instructors and 6,837 pupils. There are 4 teachers' training colleges with 715 teachers and 12,274 students. The state University of M[illegible], founded in 1817 at Detroit, and removed to Ann Arbor in 1841, h[illegible], 1,309 teachers and 22,990 students; Michigan State College of Agriculture and Applied Science, at East Lansing, 868 teachers and 16,253 students; Michigan College of Mining and Technology, at Houghton, 164 professors and instructors and 1,937 students; Wayne University, at Detroit, 559 instructors and 28,804 students. Total net expenditure (1949) for 8 state supported institutions, $28,685,710.

Religion and Welfare.—Leading [illegible] bodies are the Roman Catholics, with 800,917 members in 1936, Methodist (142,141), Lutheran (Synod of Missouri, 106,854). Total membership, all denominations, 1,786,839.

Marriage licences are granted only after both applicants have taken a satisfactory serologic test for [illegible] a physical examination. In 1913 Michigan passed an Act [illegible] under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 826 men and 2,244 women had been thus sterilized.

Michigan abandoned in 1949 its novel, but highly controversial, system of a one-man 'grand jury' (a system in existence 32 years) designed to combat crime and corruption. Henceforth a 'grand jury' must consist of the traditional 23 men or a 3-man 'grand jury' consisting of circuit court judges.

A Civil Rights Act (1885, amended 1937) orders places of public resort, including hotels, restaurants, barber shops, retail stores, cinemas, theatres, public transport vehicles, to furnish equal accommodation to all without discrimination. Another Act (1941) forbids the Civil Service to discriminate against employees or applicants on the grounds of 'political, racial or religious opinions or affiliations except for membership in any organization which

has advocated or does advocate disloyalty to the government of the United States or any subdivision thereof.' A third Act (1881, and later incorporated in the School Code of 1927) forbids any discrimination in school facilities and a fourth one (1893) prohibits life insurance companies from discriminating between white persons and coloured persons.

Old Age Assistance (maximum $60 a month) was established in 1933 for persons of 65 years of age or older who have resided in Michigan 5 years in the last 9, including the last year before application; assets must not exceed $6,000 in real property, $500 in personal property for a single person or $750 for a married couple. In Oct., 1950, 99,343 persons (22% of those aged 65 or over) were drawing an average of $46·46 a month.

At the same time, aid to 61,728 dependent children in 26,921 families was provided; average payment for the month was $88·19 per family. Aid was provided to 1,864 blind residents, amounting to $51·01 per case. In 1949 the state had 259 hospitals (62,233 beds) registered with the American Medical Association. In Jan., 1950, hospitals for mental diseases had 19,222 patients or 304·7 per 100,000 population.

The state's penal reformatory system at 1 Dec., 1950, held 8,313 men and 269 women. Of the state's 83 local jails (county and city), the U.S. Bureau of Prisons, as of 30 June, 1949, rated 72 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1950, the revenue and expenditure were as follows (in dollars):—

Balance, 1 July, 1949	112,814,555	Disbursements, 1949-50	662,925,552
Receipts, 1949-50	630,683,195	Balance, 30 June, 1950	80,572,198
Total	743,497,750	Total	743,497,750

Total bonded indebtedness of the state on 15 Nov., 1950, was $194,232,000; total assessed valuation in 1950, $9,936,202,816, raised to $11,913,750,000 by the State Board of Equalization.

Production and Industry.—The state, formerly [illegible] is now chiefly industrial, with the motor-car industry leading. In 1945, it contained 175,268 farms with a total area of 18,392,227 acres; value of land and buildings was $1,199,290,024. In 1945, 31,637 farms (18% of the 171,001 farms reporting) had total produce, for sale and farm consumption, valued at less than $400 per farm.

In 1950 there were 64 soil conservation districts embracing 22,321,573 acres, of which 14,632,482 acres were farm land (137,995 farms). Cash income, 1949, from crops, $265,106,000; from livestock, $411,886,000. Principal crops were (1950) oats, 58,600,000 bushels; maize, 63,750,000 bushels; wheat 28,525,000 bushels; potatoes, 17,100,000 bushels; sugar beet, 1,020,000 tons; hay, grapes and beans. On 1 Jan., 1950, there were in the state 336,000 sheep, 100,000 horses, 1,016,000 milch cows, 1,914,000 all cattle and 927,000 swine. In 1950, the wool clip yielded 2,688,000 lb. of wool from 336,000 sheep. The area of national forest land (1950) was 5,142,000 acres. State forests (1950) totalled 3,662,519 acres; state parks, 95,562 acres; recreation areas, 45,024 acres.

Of the mineral output in 1949 petroleum amounted to 16,517,333 barrels; natural gas, 14,660 million cubic feet; natural gasoline 4,269,000 gallons; magnesium compounds (1947), 44,000,000 lb.; cement, 12,747,791 barrels; iron ore, 10,737,137 long tons; gypsum, 1,264,511 tons; copper,

19,249 short tons; salt, 4,064,106 short tons, and stone, 16,546,670 short tons. Mineral output in 1949 was valued at $507,588,000.

Motor-vehicle manufacturing is by far the leading industry, with (1947 census) 283 plants which employed 371,795 and paid $1,190,900,000 in wages and salaries; the value added by manufacture was $1,880,800,000. Nearly 60% of the country's motor-vehicle industry is concentrated in Michigan. The total number of manufacturing establishments (1947 census) was 9,892, employing 821,721 production workers, who earned $2,438,027,000; value added by manufactures was $5,196,338,000 compared with $1,794,016,000 in 1939.

On 1 Jan., 1950, there were 6,984 miles of steam railway, serving 65·8% of the communities. Airports, 1950, numbered 172, registered aircraft 2,714; seaplane bases, 11. Trunk highway mileage (195)totalled 9,329 of which 7,869 was hard surfaced.

MINNESOTA.

Government.—Minnesota, first explored in the 17th century and first settled in the 20 years following the establishment of Fort Snelling (1819), was made a Territory in 1849 (with parts of North and South Dakota), and was admitted into the Union, with its present boundaries, on 11 May, 1858. The Legislature consists of a Senate of 67 members, elected for 4 years, and a House of Representatives of 131 members, elected for 2 years. The Governor and Lieutenant Governor are elected for 2 years.

There are 87 counties, few containing less than 400 square miles. Townships are 6 miles square, each divided into 36 sections of 1 square mile. Cities, of four classes, according to population, frame their own charters and are governed by a mayor and council or by a commission. The capital is St. Paul. The state sends to Congress 2 senators and 9 representatives.

Governor.—Luther W. Youngdahl (R.), 1951-53 ($12,000).
Secretary of State.—Mike Holm (R.).

Area, Population, Education.—Area, 84,268 square miles, of which 5,637 square miles are water. Census population, 1 April, 1950, 2,982,483, an increase of 190,183 or 6·8% since 1940. Birth rate, 1948, was 24·8 per 1,000 population, death rate, 9·3. Births in 1949, 73,627; deaths, 28,144. Population in 4 census years (with distributuon by sex in 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq mile
1910	2,059,227	7,084	9,053	344	2,075,708	25·7
1920	2,368,936	8,809	8,761	619	2,387,125	29·5
1930	2,542,599	9,445	11,077	832	2,563,953	32·0
1940	2,768,382	9,928	12,528	862	2,792,300	34·9
Male	1,415,169	5,185	6,514	677	1,427,545	—
Female	1,353,813	4,743	6,014	185	1,364,755	—

The foreign-born white inhabitants in 1940 numbered 294,904 (15·1% of the total) comprising 67,161 (22·8%) Swedes, 52,025 (17·6%) Norwegians 42,047 (14·3%) Germans and 22,060 Canadians. Aliens registered in Dec. 1940, numbered 61,433. Of the 1940 population, 49·8% were urban, 0·3% Negro, and 33·3% (722,505 males and 208,994 females) were gainfully employed. In 1940, 11,571 men and 14,721 women were reported divorced

The largest cities are Minneapolis, with a population of 517,277 in 195 (census, preliminary); St. Paul (capital), 310,155, and Duluth, 104,066.

In 1940, of persons between the ages of 5 and 24, 576,887 (60·0%) wer attending schools. In 1949–50 the 7,687 elementary schools of the stat had 12,174 teachers and 324,743 enrolled pupils; 641 public accredite secondary schools had 8,533 teachers and 171,602 pupils; 9 junior college had 136 teachers and 1,603 pupils; 5 state teachers' colleges had 8,72 pupils in 1948–49. In 1948–49 the 20,500 teachers had salaries rangin from $900 to $5,300; average salary, $2,750. The total public schoo expenditure (1949–50) was $121,586,460, of which $106,860,189 was spen for maintenance. The University of Minnesota at Minneapolis, which wa chartered in 1851 and opened in 1869, had a total enrolment in 1949–50 o 35,174 day students and 3,128 instructors. Other institutions were :— Hamline University, at St. Paul, founded in 1854; St. John's (Roma Catholic) University, at Collegeville; Carleton College and St. Olaf College at Northfield, and Macalester College at St. Paul.

Religion and Welfare.—The chief religious bodies are :—Roma Catholic, with 510,388 members in 1936, Norwegian Lutheran (173,540 Lutheran–Synod of Missouri (108,669). Total membership of all denomina tions, 1,352,662.

A Civil Rights Act (1927) forbids places of public resort to exclud persons 'on account of race or colour' and another section forbids insuranc companies to discriminate 'between persons of the same class on account o race.' Contractors on public works may have their contracts cancelle if 'in the hiring of common or skilled labour' they are found to have dis criminated against 'citizens of the United States' on the grounds of 'race creed or colour'.

In 1925 Minnesota passed an Act permitting, under legal [illegible] th sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 50 men and 1,713 women had been sterilized.

Old Age Assistance, set up in 1929 with a maximum of $40 per month was increased from 1 July, 1949, to $55 a month maximum with certai additional allowances, for needy persons 65 years of age or older who hav resided in the state at least 5 years and who do not have property exceedin $5,000. In June, 1950, 55,704 persons were receiving in Old Age Assistanc an average of $49·12 per month; 8,034 families with 20,344 dependen children, an average of $91·37 per month; 1,084 blind persons, $56·93 pe month. In 1949, the state had 211 hospitals (32,795 beds) resistered wit the American Medical Association. In Dec., 1950, hospitals for menta disease had 10,7[illegible]

The state's [illegible] and youth conservation programm in 1950 held 2,030 men and women. There is no death penalty in Minnesota Of the state's 72 local jails (county and city) the U.S. Bureau of Prisons, a of 30 June, 1949, rated 49 as sub-standard, unsuitable for the housing o Federal prisoners.

Finance.—The revenue fund and expenditure for the year endin 1 July, 1950, were (in dollars) :—

Balance, 1 July, 1949 . .	134,001,316	Payments to 30 June, 1950 .	516,204,157
Receipts to 30 June, 1950 .	466,890,937	Balance, 1 July, 1950 . .	84,688,096
Total . . .	600,892,253	Total . . .	600,892,253

The state's four principal trust funds (derived from royalties from state-owned iron mines, special tax on iron ore, and sales of land and of timber) on 1 July, 1950, totalled $189,900,176.

Unpaid bonds and debt certificates, 30 June, 1950, were $129,815,133.

Production and Industry.—Minnesota is largely an agricultural state. In 1949, it contained 162,107 farms (of more than 3 acres) with a total area of 30,679,720 acres; value of farm lands and buildings (1945) was $1,833,761,000; 26·7% of the farms and 28·9% of the total farm area were operated by tenant farmers in 1945, but by 1949 the percentage of tenant farms had dropped to 23·0%. In 1945, 14,251 farms (7% of the 186,604 farms reporting) had total produce, for sale and farm consumption, valued at less than $400; 14,954 farms were under 30 acres. Of the total surface area (51,452,394 acres), 6·7% was found seriously eroded and 71·9% with little or no erosion in 1939. In 1950 there were 48 soil conservation districts embracing 14,606,951 acres, of which 13,774,334 acres were farm land in 81,615 farms and ranches.

Cash income, 1949, from crops, $336,206,000; from livestock, $808,849,000. Minnesota usually ranks first in production of flax seed, 16,280,000 bushels in 1949, and is one of the leading states in the production of creamery butter, milk and milk powder. In 1949, 252,621,000 lb. of creamery butter were produced. Output in 1949 of spring wheat, 17,128,000 bushels; maize, 248,512,000 bushels; oats, 178,272,000 bushels; barley, 25,464,000 bushels; rye, 2,550,000 bushels; hay, 5,021,000 tons; soybeans, 12,408,000 bushels. On 1 Jan., 1950, the farm animals included 264,000 horses, 3,276,000 all cattle, 1,486,000 milch cows, 554,000 sheep and 3,498,000 swine. In 1949, the wool clip amounted to 4,152,000 lb. of wool from 519,000 sheep. National forest area, 1949, 5,041,774 acres.

The mining of iron ores, mostly red hematite, in the Mesabi, Vermilion and Cuyuna ranges, is important, for Minnesota produces about 67% of the nation's iron ore; output in 1949 from 123 mines amounted to 56,825,957 long tons. But these valuable deposits may be exhausted in the near future and the state's abundant resources of low-grade ore are becoming more and more important.

The federal census of manufactures of 1947 showed 4,567 manufacturing establishments, employing 145,153 production workers, who earned $358,863,000; value added by manufacture was $1,022,586,000 compared with $306,840,000 in 1939.

In 1949, Minnesota had 8,940 miles of steam railway, besides 428 miles of electric railway track, including urban street railways. The state highway system covered 11,911 miles; total highway mileage, 121,001. Airports and landing strips in 1949 numbered 336, of which 83 were municipal.

MISSISSIPPI.

Government.—Mississippi, settled in 1716, was organized as a Territory in 1798 and admitted into the Union on 10 Dec., 1817. In 1804 and in 1812 its boundaries were extended, but in March, 1817, a part was taken to form the new Territory of Alabama, leaving the boundaries substantially as at present. The Legislature consists of a Senate (49 members) and a House of Representatives (140 members), both elected for 4 years, as are also the Governor and Lieutenant-Governor. The capital is Jackson; there are 82 counties. Electors are all citizens who have resided in the state 2 years, in the election district for 1 year (clergymen for 6 months) next before the election, have paid the taxes required by law and have been registered. The applicant for registration must be able to read the state constitution or show that he understands it when it is read to him. In 34 of the 82 counties Negroes constitute 49% or more of the population; Tunica County, with 85·5% Negro, has the highest percentage of any county in the United States. Of the 1,155,000 potential voters in 1948, 191,854 (16·6%) voted in the 1948 presidential elections.

The state is represented in Congress by 2 senators and 7 representatives.

Governor.—Fielding L. Wright (D.), 1951-55 ($10,000).
Secretary of State.—Heber Ladner (D.).

Area, Population, Education.—Area, 47,716 square miles, 296 square miles being inland water. Census population, 1 April, 1950, 2,178,914, a decrease of 4,882 or 0·2% since 1940. Birth rate, 1948, was 30·9 per 1,000 (national average, 24·2); death rate, 9·6. Births, 1948, were 65,303; deaths, 20,296; marriages, 53,645; divorces, 6,697.

Population of 4 federal census years, with distribution by sex in 1940:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	786,111	1,009,487	1,253	263	1,797,114	38·8
1920	853,962	935,184	1,105	367	1,790,618	38·6
1930	998,077	1,009,718	1,458	568	2,009,821	42·4
1940	1,106,327	1,074,578	2,134	757	2,183,796	46·1
Male . .	556,157	526,716	1,079	530	1,084,482	—
Female .	550,170	547,862	1,055	527	1,099,314	—

The foreign-born inhabitants in 1940 numbered 5,988 (0·4% of the total) of whom 1,294 (21·6%) were Italian, 588 German, 412 Russian and 316 English. Of the population in 1940, 19·8% was urban, 49·2% Negro, and 33% (553,279 males and 174,176 females) were gainfully employed; occupied dwelling units numbered 534,956 (of 4·08 persons). In 1940, 5,726 men and 9,794 women were reported divorced. The [illegible] cities (census of 1950, preliminary) are Jackson, 97,674; [illegible], 37,709; Biloxi, 37,084; Greenville, 29,914; Hattiesburg, 29,432; Laurel, 24,988; Vicksburg, 27,344; Natchez, 22,678; Gulfport, 22,428. Aliens registered in Dec., 1940, numbered 3,219.

In 1940, of persons between the ages of 5 and 24, 494,012 (54·6%) were

attending school; the national average is 57·7%. Attendance at school is compulsory; white and coloured children are taught in separate schools. The elementary and secondary schools in 1948–49 had 520,518 pupils (261,805 coloured) and 15,244 teachers (6,404 coloured); private elementary and high schools had about 10,000 pupils. In 1948–49 salaries of the elementary and secondary teachers ranged between $400 and $3,600, with an average (lowest in the country) of $1,396 (national average, $2,846). The appropriations for elementary and secondary education for 1949–50 were $36,271,436 and for higher education, $8,627,800. For higher education Mississippi has 20 universities and colleges, of which 7 are state-supported. The University of Mississippi, established 1844, had, 1948–49, 295 instructors and 3,876 students; Mississippi State College, 200 teachers and 3,286 students; Mississippi State College for Women at Columbus, 80 instructors and 1,095 students.

Religion and Welfare.—Over half the church-going inhabitants of Mississippi are Baptists. The Negro Baptists had 322,362 members in 1936 (approximately 300,000 in 1948) and Southern Baptists had 150,000 members in 1936 (311,311 in 1948). One-sixth are Southern Methodists (107,245 members in 1936 and 190,000 white Methodists and 38,000 Negro Methodists in 1948). Total membership, all denominations, 873,514 (1936). In June, 1950, 65,670 persons were receiving Old Age Assistance amounting to an average of $21·52 per month; 13,105 families with 36,079 dependent children were receiving $27·11 monthly; 2,871 blind persons, $26·58 monthly.

In Dec., 1945, hospitals for mental diseases had 4,130 patients or 207·5 per 100,000 of the population (national average 363·2). In 1949 the state had 100 hospitals (12,817 beds) registered with the American Medical Association.

Statutes enforce segregation of Negroes in educational institutions, penal and reformative institutions, hospitals (including mental hospitals), railroads (including waiting rooms), buses and street cars. The state requires separate schools for Indians. Marriage is prohibited between white and Negro or Indian persons.

Mississippi is one of the states whose birth certificates do not disclose illegitimacy. In 1925 Mississippi passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 154 men and 442 women had been sterilized.

Of the state's 83 local jails (county and city), the U.S. Bureau of Prisons, as of 30 June, 1949, rated 79 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1949, the general revenues were $135,468,000 and general expenditures were $135,386,000. Taxation yielded $92,748,000 and government grants $29,102,000.

On 30 June, 1949, the net long-term debt was $63,490,000.

Production and Industry.—Agriculture is the chief industry of the state, which has a semi-tropical climate and a rich soil. In 1945 the farms numbered 264,704 with an area of 19,686,873 acres; total value of farm lands and buildings, $647,562,141. Tenant-farmers in 1945 operated 59·3% of all farms (the highest percentage in the country) and 30·0% of the total farm area. In 1945, 27,126 farms (10% of the 260,597 farms reporting) had produce for sale and farm consumption valued at less than $400.

Cash income, 1949, from crops, $368,352,000, and from livestock, $112,960,000. The chief product is cotton, which was grown on 2,770,000

acres, and yielded 1,490,000 bales in 1949; yield per acre, through better farming, has risen from 187 lb. in 1911–15 to 441 lb. in 1948 (falling temporarily to 258 lb. in 1949). The state leads in the output of long-staple varieties and is second or third in total production. Timber is the next largest source of income; about 2,400 million board feet, valued at $62,500,000, are annually taken from 16 million acres of forests (49% of the state's area). The state leads in output of tung nuts, 36,544 tons in 1949. Other crops (1949) were pecans (7,900,000 lb.), sweet potatoes (3,990,000 bushels), maize (47,725,000 bushels), rice, wheat, oats, sorgo syrup (700,000 gallons) and sugar-cane syrup (2,030,000 gallons). On 1 Jan., 1950, there were in the state 104,000 horses, 276,000 mules, 543,000 milch cows, 1,674,000 all cattle, 104,000 sheep and 975,000 swine. National forest area, 1949, 2,777,325 acres, of which 1,045,977 were administered by the Forest Service.

In 1950, there were 71 soil conservation districts embracing 29,583,512 acres, of which 19,245,305 acres were farm land (258,568 farms).

Mississippi produced petroleum (38 million barrels) from 1,554 wells in 35 fields in 1949; some fields also produced natural gas (annual output about 50,000 million cubic feet). There are 2 oil refineries. The total value of the mineral deposits, including hydrated limestone, some coal and rich clay, in 1949, was $58,900,000.

In 1947, 1,982 manufacturing establishments employed 69,577 production workers, earning $114,980,000; value added by manufacture was $300,184,000.

Income payments to Mississippians in 1948 were $1,524 million (in 1939, $436 million); *per capita* payments were $718 (in 1939, $201).

The state in 1948 had 3,962 miles of steam railway and maintains 5,909 miles of highways. Private and commercial motor cars [illegible] 1949 were about 285,000; private and commercial trucks, 1 [illegible] were 103 airports in 1948, of which 34 were municipal; 21 were lighted.

MISSOURI.

Government.—Missouri, first settled in 1764, was made a Territory in 1812 and admitted to the Union on 10 Aug., 1821. In 1837 its boundaries were extended to their present limits. A new constitution was adopted on 27 Feb., 1945. The General Assembly consists of a Senate of 34 members elected for 4 years (half retiring every 2 years), and a House of Representatives of 154 members (maximum 200) elected for 2 years. The Governor and Lieut.-Governor are elected for 4 years.

Voters (with the usual exceptions) are all citizens and those adult aliens who, within a prescribed period, have applied for citizenship. The state is divided into 114 counties and the city of St. Louis. Jefferson City is the state capital. Missouri sends to Congress 2 senators and 13 representatives.

Governor.—Forrest Smith (D.), 1949–53 ($10,000).
Secretary of State.—W. H. Toberman (D.).

Area, Population, Education.—Area, 69,674 square miles, 404 square miles being water. Census population, 1 April, 1950, 3,954,653, an increase since 1940 of 169,989 or 4·5%. Birth rate, 1948, was 21·9 per 1,000 population (national average, 24·2); death rate, 11·0 (9·9). Births, 1948, were 88,258; deaths, 42,752.

Population of 4 federal census years, with distribution by sex in 1940:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	3,134,932	157,452	313	638	3,293,335	47·9
1920	3,225,044	178,241	171	599	3,404,055	49·5
1930	3,403,876	223,840	578	1,073	3,629,367	52·4
1940	3,539,187	244,386	330	761	3,784,664	54·6
Male . .	1,760,939	119,554	184	575	1,881,252	—
Female .	1,778,248	124,832	146	186	1,903,412	—

The foreign-born white population in 1940 numbered 114,125 (3·0%), of whom 27,882 (24·5%) were German, 13,168 Italian and 12,745 Russian. Of the total population in 1940, 51·8% were urban, 6·5% Negro, and 34·2% (988,641 males and 308,453 females) were gainfully employed; occupied dwelling units numbered 1,068,642 (of 3·54 persons); 21,908 men and 29,996 women were reported divorced. Aliens registered in Dec., 1940, numbered 43,550.

The largest cities, with census population (preliminary) in 1950, are:—

Cities	Population	Cities	Population	Cities	Population
St. Louis . .	852,623	University City	39,595	Webster Grove	23,289
Kansas City .	439,646	Joplin . .	38,515	Cape Girardeau	21,539
St. Joseph. .	75,572	Independence .	36,832	Hannibal. .	20,540
Springfield .	66,302	Jefferson City .	21,990	Sedalia . .	20,269

School attendance is compulsory for children from 7 to 14 years for the full term. In 1940, of persons between the ages of 5 and 24, 715,275 (57·4%) were attending school. In 1948–49, the elementary and secondary schools had 22,135 teachers and 640,329 enrolled pupils, including elementary and secondary schools for coloured pupils which had 1,625 teachers and 50,738 students. There were 5 teachers' colleges in 1948–49 with 6,652 students. Total expenditure for public schools (including building expenditures) in 1948–49, $108,392,080. Teachers' salaries, 1948–49, averaged $2,304 (national average, $2,846). For superior instruction, the more important institutions (1948–49) are the University of Missouri, at Columbia, founded in 1839, with 1,213 teachers and 14,103 students, Washington University (non-sectarian) at St. Louis, founded in 1857, with 1,152 teachers and 6,662 students, and St. Louis University (Roman Catholic), founded in 1818, with 1,251 teachers and 10,509 students.

Religion and Welfare.—Chief religious bodies are Catholic, with 440,000 members in 1942, Southern Baptist (284,891), Southern Methodists (209,890) and Disciples of Christ (129,419). Total membership, all denominations, 1,392,860 in 1936.

In Sept., 1950, the state was paying Old Age Assistance (maximum $50 monthly per person) to 132,691 persons, who received an average of $43·96 per month. In 1949, the state had 153 hospitals (36,120 beds) registered with the American Medical Association. In Dec., 1945, hospitals for

mental diseases had 12,462 patients or 357·9 per 100,000 population (national average, 363·2); in July, 1948, patients were 12,400.

Missouri statutes require separation of white and coloured persons throughout the state educational system (including separate libraries) but the Roman Catholic white parochial schools admit coloured pupils, as does also St. Louis University (R.C.), since 1946–47. Segregation statutes also cover parks, playgrounds, beaches and mental hospitals but not, so far as statutes go, general hospitals or penal institutions. There is no (statutory) segregation on railways, buses or street cars. Marriage is forbidden between white and Negro or Mongolian.

Strikes in public utilities are forbidden as are also strikes arising from jurisdictional disputes between unions, sympathetic strikes and secondary boycotts. Public employees are forbidden to strike. No strike is 'legal' unless the majority of employees vote for it in a secret ballot supervised by the state industrial commission. The courts may grant to employers injunctions against 'illegal' strikes, thus facing the leaders with punishment for 'contempt of court' if they persist.

Finance.—In 1949, the state's revenue was $255,853,000 ($177,263,000 from taxes and $65,152,000 from federal grants), while expenditures totalled $255,483,000. Appropriations for the biennium 1949–50 were $573,311,552.

On 30 June, 1949, the funded debt was $44,000,000; the unfunded debt, $4,398,839; the assessed value of property (1949) was $4,762,540,700.

Production and Industry.—Agriculture is one of the chief occupations in the state. The 1945 census showed 242,934 farms, with a farm area of 35,278,251 acres; total value of farm lands and buildings was $1,526,960,502. Tenant-farmers operated 28·8% of all farms (35·6% in 1940) and 25·7% (34·6% in 1940) of all farm area. In 1945, 34,985 farms (15% of the 237,697 farms reporting) had total outputs for sale or farm consumption valued at less than $400. Since the Soil Conservation Act was passed in 1943, 23 soil conservation districts have been formed, covering 7,516,521 acres, including 7,457,093 acres in 49,894 farms.

Cash income, 1949, from crops and livestock, $1,004,436,000; from government payments, $5,493,000. Maize is the principal crop, representing nearly 50% of crop acreage and often 40% of total crop values. Output in 1949, 173,963,000 bushels. Other crops are winter wheat, 35,028,000 bushels; oats, 43,248,000 bushels; potatoes, 2,432,000 bushels; cotton, 460,000 bales; tobacco, 5,980,000 lb. Missouri is a leading livestock state, the 1 Jan., 1950, totals being 79,000 mules, 347,000 horses, 1,054,000 sheep, 4,429,000 hogs, 976,000 milch cows and 3,107,000 all cattle. The 1949 wool clip was 7,571,000 lb. from 1,057,000 sheep; mohair clip (1947) was 177,000 lb. from 61,000 goats. National forest area, 1949, 3,459,999 acres.

The coalfields cover about 14,000 square miles, producing, in 1948, 4,470,000 short tons of coal. In 1948, zinc (8,724 short tons), lead (145,546 short tons), silver (1949, 123,413 fine oz.), lime (1,009,993 short tons), copper, barite (278,071 tons) and fire clay (1,205,971 tons) were produced. Value of total mineral production, 1948, $113,506,000.

Missouri's largest industry, judged by value of the product, is meat-packing, and its largest in number of wage-earners employed is the manufacture of boots and shoes. The 1947 federal census of manufactures showed 5,725 plants, employing 269,711 production workers, earning $607,404,000; value added by manufacture was $1,623,145,000.

The state in 1948 had 6,834 miles of steam railway and 263 miles of

electric railway track. A new system of federal and state highways covers 18,336 miles; the counties maintain 94,858 miles of roads. There were 118 airports in 1950, of which 40 were municipal; 32 were lighted.

MONTANA.

Government.—Montana, first settled in 1809, was made a Territory (out of portions of Idaho and Dakota Territories) in 1864 and was admitted into the Union on 8 November, 1889. The Senate consists of 56 senators, elected for 4 years, one half at each biennial election. The 90 members of the House of Representatives are elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. The state is divided into 56 counties. The capital is Helena. Montana sends to Congress 2 senators and 2 representatives.

Governor.—John W. Bonner (D.), 1949–53 ($7,500).
Secretary of State.—Sam W. Mitchell (D.).

Area, Population, Education.—The state has a total area of 147,138 square miles, including 822 square miles of water, of which the federal [illegible] owns 32,966,241 acres or 35%. Census population, 1 April, 1950, 591,024, an increase of 31,568 or 5·6% since 1940. Birth rate, 1948, was 29·4 per 1,000 population (national average, 24·2); death rate, 11·5 (9·9). Births, 1948, were 15,035; deaths, 5,884; marriages, 7,131; divorces, 2,090. Population in 4 census years (with distribution by sex for 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	360,580	1,834	10,745	2,894	376,053	2·6
1920	534,260	1,658	10,956	2,015	548,889	3·8
1930	519,898	1,256	14,798	1,654	537,606	3·7
1940	540,468	1,120	16,841	1,027	559,456	3·8
Male . .	288,975	647	8,647	740	299,009	—
Female .	251,493	473	8,194	287	260,447	—

Of the total population in 1940, foreign-born whites numbered 55,642, or 10·1%. Of these, 8,569 (16%) were Canadian, 6,896 (12·4%) Norwegian, 4,401 German, 4,134 English, 4,084 Russian and 4,032 Swedish. Japanese numbered 508, of whom 281 were citizens. Of the 1940 population, 37·8% were urban, and 33·2% (153,300 males and 32,264 females) gainfully employed; occupied dwelling units numbered 159,963 (of 3·50 persons): 4,907 men and 3,781 women were divorced. Aliens registered in Dec., 1940, were 13,777. Marriage between white and Negro or Asiatic persons is prohibited.

The largest cities are Great Falls, with a census population of 39,006 in 1950; Butte, 32,904; Billings, 31,725; Missoula, 22,320; Helena (capital), 17,498; Anaconda, 11,221. The Office of Indian Affairs administered, 1945, 6,502,211 acres, of which 1,217,697 acres were allotted to tribes.

The public elementary schools in 1949–50 had 78,620 enrolled pupils; high schools had 25,601 pupils. Teachers in 1948–49 numbered 4,780; average salary was $2,898 (national average, $2,846). Total expenditure on public school education in 1949–50, $22,287,483, exclusive of $11,240,396 spent on up-keep of buildings, transportation of pupils, debt liquidation, etc. The University of Montana consists of the State College at Bozeman (1949–50, 3,721 students), the School of Mines at Butte (291 students), the Western Montana College of Education at Dillon (253), the Eastern Montana College of Education at Billings (491), the Northern Montana College at Havre (309), and the State University at Missoula, founded in 1895 (3,783).

Religion and Welfare.—The leading religious bodies are (1936): Roman Catholic, with 75,292 members; Norwegian Lutheran, 13,363; Methodist, 13,238. Total membership, all denominations (1936), 160,138.

The Department of Public Welfare, created in 1937 under the Federal Social Security Act, administers old age assistance, aid to dependent children and similar activities. In Sept., 1950, 11,804 were receiving in Old Age Assistance an average of $52·39 per month. In 1945, 207 persons (48·3 per 100,000 population, compared with 81·0 in 1941) were convicted of major offences, including one convicted of murder. On 31 Oct., 1950, the Montana state prison held 588 men and women. Of the state's 55 local jails (city and county) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 43 as sub-standard, unsuitable for housing Federal prisoners.

In 1949, the state had 54 hospitals (5,598 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 1,864 patients or 411·9 per 100,000 population (national average, 363·2); in Oct., 1950, patients numbered 1,923.

In 1923 Montana passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 72 men and 177 women had been thus sterilized.

Finance.—The total receipts and disbursements for the year ending 30 June, 1950, were (in dollars):—

Balance on 1 July, 1949	60,116,227	Disbursements, 1949–50	78,703,356
Receipts, 1949–50	75,528,640	Cash on hand, 1 July, 1950	57,941,511
Total	136,644,867	Total	136,644,867

The net bonded debt of the state on 1 July, 1950, was $7,351,000.

Production and Industry.—In 1945, there were 37,747 farms and ranches (50,564 in 1935) with an area of 58,787,318 (47,512,000 acres in 1935) acres; total value of farm land and buildings, 1945, $517,890,663; farm-tenants operated 16·6% of all farms (27·8% in 1940). Large-scale farming predominates; 12,753 farms (34%, the highest in any of the states) are of 1,000 acres or over. But the size of the average farm, 1,557 acres, is exceeded by that of several states where cattle ranges predominate. Irrigation works were available for 2,344,390 acres in 1940; irrigated area, 1948, totalled 1,760,320 acres or 21% of total crop land harvested. In 1950, there were 75 soil conservation districts embracing 74,150,565 acres, of which 44,888,965 acres were farm land (31,161 farms and ranches). National forests numbering 13 had an area (1949) of 19,006,897 acres, of which 16,481,760 acres were federally administered. Timber resources—chiefly Douglas fir, pines and larch—total 44,189 million board feet; timber cut

in 1947 was 500 million board feet. Montana supplied 3,122,886 Christmas trees in 1948, leading all states.

The chief crops are wheat, amounting in 1949, to 64,080,000 bushels, including spring wheat, 39,816,000 bushels; hay, 2,479,000 tons; barley, 12,052,000 bushels; sugar beet, 690,000 short tons; maize, potatoes, oats, and flax seed. Cash income, 1949, from crops, $174,221,000; from livestock, $189,596,000. The raising of sheep and cattle, etc., is a very important industry. On 1 Jan., 1950, there were 1,735,000 sheep; 153,000 horses; 128,000 milch cows; 1,731,000 all cattle; 192,000 swine. The wool clip in 1949 was 15,575,000 lb. from 1,750,000 sheep. Average cash income per farm or ranch in 1947 was $10,640.

Chief mineral products, 1949, were:—Gold, 52,724 fine oz.; silver, 6,327,025 fine oz.; copper, 116,504,000 lb.; lead, 18,411 short tons; zinc, 118,190,000 lb.; manganese ore (1948), 130,184 short tons, leading all states; coal, 2,800,000 short tons. Petroleum output was 8,910,231 barrels in 1949, and of natural gas 35,593 million cubic feet. Arsenous oxide, crystalline graphite and phosphate rock (248,683 short tons in 1948) are also mined. Value of total mineral production, 1948, $103,125,000.

In 1947, 652 manufacturing establishments had 13,606 production workers, earning $35,350,000; value added by manufacture was $92,258,000. Electric power generated in 1948 was 2,915·9 million kwh., of which 2,884·4 million was hydro-electric

In 1948 there were 5,057 miles of steam railway in the state. There were 199 airports in 1948, of which 78 were municipal or county-owned; 21 were lighted. State maintained highway mileage (1948), 8,637; federal highways, 6,036; local, 55,119.

NEBRASKA.

Government.—The Nebraska region was first reached by white men from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the United States as part of the Louisiana Purchase in 1803. Its first settlement was in 1847 and on 30 May, 1854, it became a Territory and on 1 March, 1867, a state. In 1882 it annexed a small part of Dakota Territory, and in 1908 it received another small tract from South Dakota.

By a constitutional amendment adopted in Nov., 1934, Nebraska has a single-chambered legislature (elected for 2 years) of 43 members—the only state in the Union to have one. The Governor and Lieutenant-Governor are elected for 2 years. The present constitution was adopted in 1875. Amendments adopted in 1912 and 1920 provide for legislation through the initiative and referendum and permit cities of more than 5,000 inhabitants to frame their own charters. A 'right-to-work' amendment adopted

5 Nov., 1946, makes illegal the 'closed shop' demands of trade unions. The state has 93 counties; the capital is Lincoln. Nebraska is represented in Congress by 2 senators and 4 representatives.

Governor. Val Peterson (R.), 1951–53 ($10,000).
Secretary of State.—James S. Pittenger (R.).

Area and Population.—Area, 77,237 square miles, of which 584 square miles are water. Census population, 1 April, 1950, 1,325,510, an increase of 9,676 or 0·7% since 1940. Birth rate, 1949, was 24·5 per 1,000 estimated population; death rate, 9·8. Births, 1949, were 31,482; deaths, 12,607.

Population in 4 census years (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,180,293	7,689	3,502	730	1,192,214	15·5
1920	1,279,219	13,242	2,888	1,023	1,296,372	16 9
1930	1,360,023	13,752	3,256	932	1,377,963	18 0
1940	1,297,624	14,171	3,401	638	1,315,834	17 2
Male . .	656,667	7,069	1,686	366	665,788	—
Female .	640,957	7,102	1,715	272	650,046	—

The foreign-born white population in 1940 (6·3% of the whole) numbered 81,853, of whom 21,657 (26·5%) were German, 9,880 (12·1%) Czechoslovakian, 9,435 (11·2%) Swedish, 9,181 (11·2%) Russian. Of the total population in 1940, 39·1% were urban, 1·1% Negro, and 32·9% (345,629 males and 87,798 females) were gainfully employed; 6,478 men and 7,657 women were reported divorced. The largest cities in the state are:—Omaha with a census population, 1950 (preliminary), of 247,408; Lincoln (capital), 97,423; Grand Island, 22,835; Hastings, 20,108. The Bureau of Indian Affairs in 1945 administered 28,073 acres, of which 13,706 acres were allotted to tribal control. Aliens registered in Dec., 1940, numbered 18,933.

Education.—In 1940, of persons between the ages of 5 and 24, 292,121 (63·6%) were attending school; more than half the population aged 25 or over had completed at least 8 years of school. School attendance is compulsory for children from 7 to 16 years of age for not less than 6 months each year. The 5,020 elementary schools in 1948–49 had 8,598 teachers and 165,123 enrolled pupils; the 448 accredited high schools, 3,087 teachers and 58,950 pupils; the 4 state normal schools (which, since 1949, also grant liberal arts degrees), 245 teachers and 3,364 students. Teachers' salaries, 1948–49, ranged between $900 and $3,600; average was $2,162 (national average, $2,846.) Total expenditure for common schools for year ending 30 June, 1949, was $43,044,290. The state has 4 universities, 14 four-year colleges and 5 junior colleges. The more important higher academic institutions are (1949–50) :—

Opened	Institution	Professors, etc.	Students
1871	Univ. of Nebraska, Lincoln (state)	792	10,002
1878	Creighton Univ., Omaha (R.C.)	432	2,829
1882	Hastings College, Hastings (Presby.)	50	731
1887	Nebraska Wesleyan Univ. (M. E.)	56	869
1930	Municipal University, Omaha	73	1,951

A grant of 3,000,000 acres of public lands for permanent endowment of her schools was made by the federal government. Of this 1,638,585 acres are still held by the state; the value, 1950, was $16,587,660. Further sale of this land, with some minor exceptions, is forbidden, Nebraska being the only state which has adopted this policy. The permanent public school endowment is $12,844,299.

Religion and Welfare.—The Roman Catholics had 154,136 members in 1936, Methodist, 85,124 members, Lutheran (Synod of Missouri), 61,714 members. Total, all denominations, 566,806.

A 'Civil Rights Act' (1929) forbids discrimination against any 'persons' by 'inns, restaurants, public conveyances, barber shops, theatres and other places of amusement.' The state university is forbidden to discriminate between students 'because of age, sex, colour or nationality.' An Act of 1941 declares it to be 'the policy of this state' that no trade union should discriminate, in collective bargaining, 'against any person because of his race or colour.' In 1949 the Legislative Council was directed to study racial discrimination in employment and to report to the Legislature in 1951. Marriage between white and Negro, Chinese or Japanese persons is forbidden.

Old Age Assistance (maximum of $55 a month and a minimum of $5, with the amount depending upon the individual's own resources) was established in 1935 for all persons 65 years of age or older who have been residents of the state for 5 years; in July, 1950, 23,878 persons were drawing an average of $44·00 per month. In 1949, the state had 105 hospitals (12,287 beds) registered with the American Medical Association; these included 5 state hospitals for the tubercular, the mentally ill and the mentally deficient. In Dec., 1945, hospitals for mental diseases had 4,336 patients or 375·2 per 100,000 population (national average, 363·2); patients numbered 6,063 in Jan., 1950. In 1915 Nebraska passed an Act permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 332 men and 372 women had thus been sterilized.

The state's penal and reformatory system had, in Jan., 1950, 1,262 men and 161 women. Of the state's 79 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 69 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the calendar year 1950, the state's revenues were $99,126,020, and expenditure, $94,309,080. Federal grants furnished $21,782,597.

On 30 June, 1949, the net long-term debt was $740,000.

Production and Industry.—Nebraska is one of the most important agricultural states. In 1945, it contained 111,756 farms, with a total area of 47,752,941 acres; total value of farm lands and buildings, $1,699,209,821. The average farm, 1945, was of 427 acres and was valued at $15,205. Tenant-farmers operated 47·5% of all farms (52·8% in 1940) and 33·3% of the total farm area.

The principal crops, with 1949 yield, are:—Maize, 239,330,000 bushels; winter wheat, 53,316,000 bushels; oats, 49,720,000 bushels; barley, 5,833,000 bushels; rye, alfalfa and potatoes. About 1,783 farms grow sugar beet for 7 factories; output, 1949, 559,000 short tons; yield of sugar, 1945, 73,000 short tons. Cash income from crops (1949), $326,591,000, and from livestock $591,869,000. On 1 Jan., 1950, the state contained 236,000 horses, 7,000 mules, 3,920,000 all cattle, 477,000 milch cows, 588,000 sheep and 2,475,000 swine. The wool clip, 1949, was 1,815,000 lb. from 209,000 sheep. The area of national forest, 1949, was 207,209 acres.

Of the total area (49,291,829 acres), 15·3% were found seriously eroded and 54% with little or no erosion in 1939. In 1950, there were 87 soil conservation districts, covering 48,250,339 acres, of which 47,309,875 acres were in 111,845 farms and ranches.

In 1947, there were 1,344 manufacturing establishments with 37,338 production workers, earning $87,432,000; the value added by manufacture was $260,658,000 compared with $68,139,000 in 1939. The chief industry is meat-packing, mainly at South Omaha. Total output of minerals, of which pumice is the most important, was valued at $9,432,000 in 1948.

In 1950, there were 6,326 miles of steam railway in the state, besides 130 miles of electric railway track. Airports, 1950, numbered 255, of which 4 were state-owned and 61 were municipal. The state-maintained highway system embraced 9,506 miles in 1949.

NEVADA.

Government.—Nevada, first settled in 1849, when it was a part of the Territory of Utah (created 1850), was made a Territory in 1861 and was admitted into the Union on 31 Oct., 1864, as the 36th state. The Legislature consists of a Senate of 17 members elected for 4 years, about half their number retiring every 2 years, and an Assembly of 43 members elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. Qualified electors are all citizens with the usual residential qualification. The state capital is Carson City (population, 3,069 in 1950). There are 17 counties. The state emblem is the sage-brush. Nevada is represented in Congress by 2 senators and 1 representative, elected by the voters of the entire state.

Governor.—Charles H. Russell (R.), 1951–53 ($7,600)
Secretary of State.—John Koontz (D.).

Area, Population, Education.—Area, 110,540 square miles, 738 square miles being water. The federal government owns 87% of the state (61,378,360 acres out of the total of 70,273,280); this is the largest percentage shown by any state. The Office of Indian Affairs controls, 1945, 1,138,044 acres, of which 1,045,687 acres have been assigned to Indian tribes. Census population on 1 April, 1950, 160,083, an increase of 49,836 or 45·2% since 1940. Birth rate, 1948, was 22·5 per 1,000 population (national average, 24·2); death rate, 9·9 (9·9). Births, 1948, were 3,694; deaths, 1,624; marriages, 52,360; divorces (estimate), 11,000.

Population in 4 census years (with distribution by sex for 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	74,276	513	5,240	1,846	81,875	0·7
1920	70,699	346	4,907	1,455	77,407	0·7
1930	84,515	516	4,871	1,156	91,058	0·8
1940	104,030	664	4,747	806	110,247	1·0
Male . .	57,984	363	2,419	575	61,341	—
Female .	46,046	301	2,328	231	48,906	—

In 1940, the foreign-born white population numbered 10,599 (10% of the total), of whom 2,258 were Italians, 841 Canadians and 833 Spanish. Japanese numbered 470, of whom 225 were citizens. Of the total population in 1940, 39·3% were urban, and 37·2% (34,551 males and 6,911 females) were gainfully employed; number of occupied dwelling units was 33,291 (of 3·31 persons); 2,013 men and 1,311 women were reported divorced. Aliens registered in Dec., 1940, were 6,118. Largest city is Reno, with population (1950) of 32,225; Las Vegas, 24,418.

School attendance is compulsory for children from 7 to 18 years of age. On 1 Jan., 1950, the public schools had 29,490 pupils, including 15 kindergartens with 2,032 pupils, [illegible] with 6,416 students. In 1948–49 the 1,301 teachers were pa[illegible] $3,264 (national average, $2,846). Pupils included 1,030 Ind[illegible] whose education the U.S. Office of Indian Affairs contributed $116,914 for the year ending 30 June, 1950. The University of Nevada has 4 departments, with 147 professors and instructors, and 1,775 students in 1949–50.

Religion and Welfare.—Chief religious bodies in 1949 were the Roman Catholic with 22,810 members, the Mormon with 10,301, the Protestant Episcopal with 5,350, the Methodist with 2,182 and the Presbyterian with 1,028.

Nevada is one of the states whose birth certificates do not disclose illegitimacy. Marriage between white and 'black,' 'brown' and 'yellow' persons is prohibited.

Old Age Assistance (maximum $55 per month) is granted to all 65 years of age or older who have been American citizens for 15 years and residents in the state for 10 years, possessing assets less than $3,000; in Nov., 1950, 2,742 persons were receiving an average of $54·15 per month. The state prison had 303 inmates in 1950; the State Industrial Home had 26 boys and 1 girl; State Hospital for Mental Diseases had 367 inmates. In 1949, the state had 13 hospitals (1,136 beds) registered with the American Medical Association.

Of the state's 21 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 17 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—State revenues in the fiscal year ending 30 June, 1950, were (in $):—

Cash balance, 1 July, 1949	5,277,618	Disbursements, 1949–50	21,682,880
Receipts, 1949–50	22,382,037	Balance, 30 June, 1950	5,976,775
Total	27,659,655	Total	27,659,655

The state debt on 1 Jan., 1950, was $785,000. The state eschews income taxes, death duties and similar devices, including the sale tax. A new tax (2%) on gambling netted $1,519,256 in 1949–50 on a turnover of $1,211 million; players lost $60,554,700.

Production and Industry.—In 1945, 3,429 farms (all but 309 being irrigated farms) had a farm area of 6,178,004 acres (3,785,116 in 1940); total value, farm lands and buildings, $71,955,918 ($47,594,384 in 1940). Tenant-farmers operated 9·2% of the farms and 3·7% of the total farm area; these percentages are among the smallest west of the Mississippi River. But there is some rural poverty; in 1945, 520 farms

(16% of the 3,296 farms reporting) had total produce, for sale and farm consumption, valued at less than $400. Of the total surface area (70,286,188 acres), 32·9% was found severely eroded and only 0·3% with little or no erosion in 1939; mountains etc., cover 14·3% of the rest. In 1950 there were 20 [illegible] soil conservation districts embracing 39,822,450 acres, of w[illegible] acres were farm lands (1,435 farms and ranches).

Cash income, 1949, from crops, $7,942,000, and from livestock, $32,877,000. Spring wheat, barley and potatoes are the chief crops. On 1 Jan., 1950, there were 35,000 horses, 21,000 milch cows, 552,000 all cattle, 442,000 sheep and 28,000 swine. In 1949 the wool clip yielded 3,337,000 lb. of wool from 412,000 sheep. The area of national forests (1949) was 5,307,534 acres.

Output of minerals (1949) were :—Gold (130,399 fine oz.), silver (1,800,209 fine oz.), copper (45,242 short tons in 1948), lead (9,777 short tons in 1948), zinc (20,288 short tons in 1948), mercury and gypsum. Some magnesite, vanadium, tungsten, antimony, cobalt and nickel are also mined. Value of mineral output for 1948, $45,110,000.

The principal industries are mining, livestock raising, lumber and agriculture. Total estimated value of industries in 1947–49 was $697,500,000.

In 1947, 126 manufacturing establishments employed 2,064 production workers, earning $6,116,000; value added by manufacture was $27,777,000.

In 1948, there were 1,669 miles of steam railway. The state maintains 5,531 miles of highway, of which 3,103 miles are surfaced. There are (1948) 54 airports of which 15 are county or municipal; 23 are lighted.

NEW HAMPSHIRE.

Government.—New Hampshire, first settled in 1623, was one of the 13 original states of the Union. The sense of the people as to the calling of a convention for the revision of the Constitution must be taken every 7 years. The Legislature consists of a Senate of 24 members, elected for 2 years, and a House of Representatives, restricted to less than 400 members, elected for 2 years. The Governor and 5 administrative officers called 'Councillors' are also elected for 2 years. Electors must be adult citizens, able to read and write, duly registered and not paupers or under sentence for crime. The state is divided into 10 counties; the capital is Concord. New Hampshire sends to the Federal Congress 2 senators and 2 representatives.

Governor.—Sherman Adams (R.), 1951–53 ($10,000).
Secretary of State.—Enoch D. Fuller (R.).

Area, Population, Education.—Area, 9,304 square miles, of which 280 square miles are inland water. Census population, 1 April, 1950, 533,242, an increase of 41,718 or 8·5% since 1940. Birth rate, 1948, was 23·8 per 1,000 population; death rate 11·8 (national average, 9·9). Births, 1948, were 12,423; deaths, 6,172; marriages, 8,427; divorces, 1,260. Population at 4 federal censuses (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	429,906	564	34	68	430,572	47·7
1920	442,331	621	28	103	443,083	49·1
1930	464,351	790	64	88	465,293	51·6
1940	490,989	414	50	71	491,524	54·5
Male . .	244,608	222	24	55	244,909	—
Female .	246,381	192	26	16	246,615	—

Of the total population in 1940, 68,296 (representing 13·9% of the total population) were foreign-born white, of whom 41,972 (61·4%) were Canadian, 3,896 Irish (including Northern Ireland) and 3,250 Polish; of the population 57·6% were urban, 0·1% Negro and 35·8% (124,072 males and 51,927 females) were gainfully employed; the number of occupied dwelling units was 132,936 (of 3·70 persons). Aliens registered in Dec., 1940, were 30,538. In 1940 census, 3,027 men and 3,426 women were reported divorced.

The largest city of the state is Manchester, with a census (1950, preliminary) population of 82,581. Other cities are Nashua, 34,666; Concord (capital), 27,984; Portsmouth, 18,793; Berlin, 16,545; Dover, 15,911; Keene, 15,631; Laconia, 14,722; Rochester, 13,768; Claremont, 12,058.

In 1940, those 20 years of age or older who had no years of schooling numbered 7,341; of persons between the age of 5 and 24, 95,228 (58·8%) were attending schools. School attendance is compulsory for children from 8 to 14 years of age during the whole school term, or to 16 if they have not completed the elementary grades Employed illiterate minors between 16 and 21 years of age are obliged to attend evening or special classes, if provided by the district. In 1949–50, the elementary schools registered 54,491 pupils and the secondary schools 21,471 pupils. Private and parochial elementary schools had 19,989 registered pupils and secondary schools, 5,106. Teachers in 1948–49 numbered 2,949; salaries ranged from $1,607 to $4,312; average, $2,571. Total expenditure on public schools in 1949–50 was $18,000,000. The 2 teachers' colleges had (1949–50) 70 teachers and 764 students. Dartmouth College, at Hanover, founded in 1769, had (1950–51) 319 instructors and 2,809 students; the University of New Hampshire at Durham, founded in 1866, had (1950–51) 242 instructors and 3,394 students.

Religion and Welfare.—The Roman Catholics, with 157,751 adherents in 1936, had 63% of the Church membership; other bodies are Congregational (22,363), Methodist (13,435). Total, all denominations, 237,736.

Marriage licences are issued only after both applicants have passed the Wassermann or similar blood test.

In 1917 New Hampshire passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 118 men and 453 women had been sterilized.

Aid to the needy blind was established in 1913, aid to dependent children in 1915 and Old Age Assistance in 1931; in 1936 the state joined the Federal Social Security Scheme. The State Department of Public Welfare in Sept., 1950, was servicing 9,460 families, representing 7,482 Old Age Assistance recipients (average grant, $44·75 per month), 324 needy blind recipients (average grant, $48·71 monthly) and 4,171 dependent children (average monthly grant for each of 1,654 families, $92·59). Old Age Assistance (with a maximum of $55 per month or $60 for those eating in restaurants,

exclusive of medical, surgical and nursing care), covers all American citizens 65 years of age or older who are residents of the state, with personal property not exceeding $300 ($600 for a couple) and real property of less than $1,000 net equity. In 1949, the state had 39 hospitals (5,950 beds) registered with the American Medical Association. Hospitals for mental diseases had, in Dec., 1945, 2,349 patients or 526·8 per 100,000 of the population (national average, 363·2).

In 1945, 235 persons (54·4 per 100,000 population compared with 77·5 in 1940) were convicted of major offences, including 2 convicted of murder. The state prison held 235 men in Oct., 1950. Of the 11 local jails (city and county) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 5 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—The state government's income for the fiscal year ending 30 June, 1950, was $50,097,786; expenditures, $49,657,821; cash balance, $4,511,125.

Net debt of state, 30 June, 1949, was $14,367,272; assessed value of taxable property (1950) was $746,836,742. New Hampshire is one of 6 states granting some form of tax exemption to the blind.

Production and Industry.—In 1945, 18,786 farms had a total acreage of 2,017,049 acres, of which 435,748 acres were crop land; total value of farm lands and buildings, $80,394,869. Farm-ownership prevails; in 1945 only 3·6% of the farms (smaller than in the Union) and 3·3% of the farm area was operated by tenants. But productivity is not high; in 1945 7,510 farms (40% of the 18,729 farms reporting) had produce, for sale or farm consumption, valued at less than $400. The U.S. Soil Survey estimates that the state has 239,542 acres of excellent soil, 370,426 acres of fair soil, 1,671,601 of poor soil and 3,498,271 of non-arable soil. Cash income, 1949, from crops, $14,989,000; from livestock and products, $47,895,000. The chief field crops are hay, maize, potatoes and truck crops; the chief fruit crop is apples. On 1 Jan., 1950, animals on farms were 10,000 horses, 70,000 milch cows, 118,000 all cattle, 7,000 sheep and 13,000 swine. National forests on 1 July, 1948, covered 806,323 acres; state and municipal forests, 115,682 acres.

In 1950, there were 10 soil conservation districts embracing 5,775,360 acres, of which 2,017,049 acres were farm land (18,786 farms). Only 405,732 acres (7% of the total area) show moderate erosion.

Minerals are little worked; total value of mineral output, 1948, $1,732,000, largely from feldspar, mica, stone, sand and gravel.

In 1947, 1,124 manufacturing establishments had 66,448 production workers earning $145,324,000; value added by manufactures was $306,932,000 compared with $104,453,000 in 1939. Leading industries are boot and shoe manufacturing, and cotton goods. Output of electric power, 1947, was 1,378 million kwh., of which hydro-electric power (980 million kwh.) amounted to 71·1%. Of the 1,042 million kwh. generated for public sale, only 5 million came from municipally owned plants. An important occupation in the state is the entertainment, summer and winter, of some 1,500,000 guests in 444 hotels, 722 tourist homes, 562 over-night cabin developments and 163 boys' and girls' camps; there are 19,293 summer homes. Winter sports, especially ski-ing, are popular.

In 1949, the length of steam railway in the state was 946 miles. There were 34 airports in 1949, of which 12 were municipal; 8 were lighted; there were 13 seaplane bases. Commercial airlines serve Portsmouth, Lebanon, Keene and Concord. The state maintains 1,648 miles of primary

and 2,307 miles of secondary highways, of which 3,754 miles are surfaced. Motor vehicles registered, 1949, were 167,327.

NEW JERSEY.

Government.—New Jersey, first settled in the early 1600's, is one of the 13 original states in the Union. The legislative power is vested in a Senate and a General Assembly, the members of which are chosen by the people, all citizens (with necessary exceptions) 21 years of age, with the usual residential qualifications, having the right of suffrage. Under the new constitution adopted 4 November, 1947, the Senate consists of 21 senators, one for each county, elected by the voters for 4 years, approximately one-half being elected biennially. The General Assembly consists of 60 members elected for 2 years. The Governor was, from 1949, elected for 4 years.

The state is divided into 21 counties, which are subdivided into cities, towns, boroughs, villages and townships. The capital is Trenton. The state sends to the Federal Congress 2 senators and 14 representatives.

Governor.—Alfred E. Driscoll (R.), 1950-54 ($20,000).
Secretary of State.—Lloyd B. Marsh (R.).

Area, Population, Education.—Area, 7,836 square miles (314 square miles being inland water). Census population, 1 April, 1950, 4,835,329, an increase of 675,164 or 16·2% since 1940. Birth rate, 1948, was 20·5 per 1,000 population (national average 24·2); death rate, 10·1. Births, 1948, were 97,580; deaths, 48,076; marriages, 51,913; divorces, 6,931. Population at 4 federal censuses (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	2,445,894	89,760	168	1,345	2,587,167	337·7
1920	3,037,087	117,132	100	1,581	3,155,900	420·0
1930	3,829,663	208,828	213	2,630	4,041,334	537·3
1940	3,931,087	226,973	211	1,894	4,160,165	553·1
Male . .	1,957,705	109,865	122	1,467	2,069,159	—
Female .	1,973,382	117,108	89	427	2,091,006	—

In 1940, the foreign-born whites numbered 695,810 (16·7% of total population), of whom 169,063 (24·2%) were Italian; 87,692 (12·6%) German; 77,782 Polish; 55,407 Russian; 44,720 Irish, and 39,316 English. Aliens registered in Dec., 1940, numbered 279,199 or 5·5% of the national total. Of the total population in 1940, 81·6% were urban, 5·4% Negro, and 37·7% (1,120,137 males and 448,922 females) were gainfully employed; occupied dwelling units numbered 1,100,260 (of 3·78 persons); 9,547 men and 14,828 women were reported divorced

Census population of the larger cities in 1950 (preliminary) was :—

Cities	Population	Cities	Population	Cities	Population
Newark . .	437,857	East Orange .	78,057	Union City .	55,322
Jersey City .	300,447	Bayonne. .	76,657	Hoboken. .	50,510
Paterson . .	139,423	Clifton . .	64,567	Bloomfield .	49,313
Trenton (capital)	127,867	Atlantic City .	61,642	Montclair .	43,775
Camden . .	124,543	Irvington .	59,142	Perth Amboy .	41,291
Elizabeth . .	112,675	Passaic . .	57,851	Kearney . .	39,828

In 1940, of persons between the ages of 5 and 24, 806,993 (58·9%) were attending school; 304,305 persons 25 years of age or over (12% of that age group) had completed 4 years or less of schooling. Elementary instruction is compulsory for all from 7 to 16 years of age and free to all from 5 to 20 years of age. On 30 June, 1950, 1,528 public elementary schools had 488,451 enrolled pupils, and 278 public junior and senior high schools had 183,957 pupils; 6 teachers' colleges had 4,258 students; 61 schools furnish vocational education. Teachers in 1948–49 numbered 26,121; salaries ranged from $2,000 to $5,600 with an average of $3,366 (national average, $2,846). The total cost of day schools (1949–50) was $149,940,105 (excludes capital expenditures).

Princeton University (founded in 1746), had, in 1950–51, 522 professors and instructors and 3,161 undergraduate students; the New Jersey State University at New Brunswick, which includes Rutgers College (1766), State Agricultural College, New Jersey College for Women and New Jersey College of Pharmacy, had (1950–51) 15,314 undergraduate students and 1,079 instructors (7,901 students and 542 instructors on the campus); Stevens Institute of Technology (1870) at Hoboken had 101 professors and instructors and 1,025 full-time students.

Religion and Welfare.—The Roman Catholic Church had 1,390,966 baptized members in 1936, an increase of 334,968 over census of 1926; Jewish congregations had 257,761 members, Methodist (128,233), Presbyterian (128,020). Total membership, all denominations, 2,357,432.

Marriage licences are issued only after both applicants have passed the Wassermann or similar blood test. The divorce law provides that special investigators may be appointed to investigate undefended suits when collusion is suspected. New Jersey is one of the states whose birth certificates do not disclose illegitimacy.

New Jersey is one of 8 states having a 'fair employment Act,' *i.e.*, a Civil Rights statute forbidding any employer, public or private (with 6 or more employees), to discriminate against any applicant for work (or to discharge any employee) on the grounds of 'race, creed, colour, national origin or ancestry.' The Act (1945) condemns such conduct as a menace to 'the institutions and foundation of a free democratic state.' It is to be enforced by a special state apparatus, the 'Division against Discrimination.' Trade unions may not bar Negroes from membership. Penalties include fine and imprisonment. The new Constitution (1947) forbids discrimination against any person on account of 'religious principles, race, colour, ancestry or national origin,' and eliminates the statutes under which Negroes enlisting in the National Guard had to join exclusively Negro battalions and regiments.

Old Age Assistance was revised in 1943 to provide aid for all persons 65 years of age or older, without means of support, who have resided in the

state for one year preceding application. The monthly grant is now limited only by the need of the applicant as determined by a standard budget. Number of recipients, July, 1950, 24,533, drawing an average of $49·14 monthly.

The state's welfare system (in July, 1950) cared for 12,850 in hospitals for the mentally ill, 6,210 in institutions for the mentally deficient and epileptics, 2,633 in tuberculosis sanatoria, 224 in soldiers' homes, 4,096 in institutions for adult offenders and 646 in training schools for juvenile delinquents. Also under care of the state's welfare agencies were 22,518 dependent children and 687 visually handicapped. In 1949, the state had 162 hospitals (49,772 beds) registered with the American Medical Association. In July, 1950, hospitals for mental diseases had 19,128 patients; in 1948 the number of such patients per 100,000 population was 254·6 (national average, 323·1).

In 1949, 27,818 offences were known to the police of 131 cities, including 72 cases of murder or non-negligent manslaughter. Of the state's 27 jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated only 4 as sub-standard, unsuitable for the housing of Federal prisoners; this is the second highest rating in the country.

Finance.—The receipts and disbursements of all state funds for the financial year ending 30 June, 1950, were as follows (in $):—

Balance, 30 June, 1949	90,333,493	Disbursements and transfers, 1949-50	499,405,365
Receipts, 1949-50	494,072,308	Balance, 30 June, 1950	85,000,436
Total	584,405,801	Total	584,405,801

State debt, 30 June, 1950, was $76,090,000; assessed valuation of real and personal property (1950), $5,944,408,870; 1949, $5,794,303,146.

Production and Industry.—Livestock raising, market-gardening, fruit-growing, horticulture and forestry are pursued. In 1945, 26,226 farms had a total area of 1,818,103 acres; value of farm lands and buildings in 1945, $292,980,843. Tenant-farmers (1945) operated 10·2% of all farms (23·0% in 1920) and 12·7% of the farm area (28·5% in 1920). Large-scale commercial farming and market-gardening prevails. Of the total surface area of 4,818,546 acres, only 0·6% was heavily eroded and 19·5% showed moderate erosion in 1939. In 1950 there were 7 soil conservation districts, embracing 4,785,280 acres, of which 1,817,448 acres were farm lands (26,143 farms).

Cash income, 1949, from crops, $112,983,000, from livestock, $179,437,000, and from government payments, $629,000.

Preliminary estimates of 1950 production of leading crops were as follows:—Field corn, 9,050,000 bushels; wheat, 1,638,000 bushels; white potatoes, 12,364,000 bushels; sweet potatoes, 2,975,000 bushels; commercial apples, 2,280,000 bushels; peaches, 1,683,000 bushels; cranberries, 85,000 barrels; asparagus, 2,385,000 crates; snap beans for market, 816,000 bushels; sweet corn, 2,113,000 bushels; peppers, 2,185,000 bushels; lettuce, 896,000 crates; spinach, 1,011,000 bushels; tomatoes for market, 1,900,000 bushels; tomatoes for processing, 225,000 short tons.

Farm animals on 1 Jan., 1950, comprised 11,000 horses, 152,000 milch cows, 226,000 all cattle, 10,000 sheep and 72,000 swine.

The chief minerals are zinc (1949, 72,000 short tons from the largest mine in the country), iron ore, clay products, sand and gravel, mineral

wool and crushed stone. It is a leading producer of glass sand, moulding sand, trap rock and of green sand, used in water-softening. Iron ore, 1949, 448,489 long tons. Total value of all mineral products, 1948, was $51,092,000.

In 1947 (federal census), 10,755 [illegible] blishments employed 601,748 production workers, receiving [illegible] wages; value added by manufacture, $4,177,080,000 compared with $1,518,269,000 in 1939. The principal industries are:—Smelting and refining non-ferrous metals, petroleum refining; chemicals; motor vehicles and supplies; meat packing (wholesale); ship building and repairing, and paints, varnishes and lacquers. It ranks fourth in petroleum refining with 10 plants (1947) with 11,277 employees and a product valued at $533,400,000.

In 1949, 27 steam railroads had 6,132 miles of trackage, the greatest density per square mile in the country. Ten scheduled airlines radiate out from Newark. There were 110 airports in 1950, of which 10 were municipal; 31 were lighted. The state maintains 27,000 miles of improved highway, state, county and municipal.

NEW MEXICO.

Constitution and Government.—New Mexico was originally part of Mexico. Its first settlement dates from 1598. When the war between the United States and Mexico was concluded on 2 February, 1848, New M[illegible]d as belonging to the United States, and on 9 September, [illegible] Territory. Part of the Territory was assigned to Texas; later Utah was formed into a separate Territory; in 1861 another part was transferred to Colorado, and in 1863 Arizona was disjoined. [illegible] New Mexico its present area. It became a state in January, 1912. The state Legislature, which meets biennially, consists of 24 members of the Senate, elected for 4 years, and 49 members of the House of Representatives, elected for 2 years. The Governor and Lieutenant-Governor are elected for 2 years. For local government the state is divided into 32 counties. The state capital is Santa Fé; population (1950), 27,547. It sends to Congress 2 senators and 2 representatives, all elected by the voters of the entire state.

Governor.—Edwin L. Mechem (R.), 1951–53 ($10,000).
Secretary of State.—Beatrice Bassett Roach (D.).

Area, Population, Education.—Area, 121,666 square miles (155 square miles being water). Census population, 1 April, 1950, 681,187, an increase of 149,369 or 28·1% since 1940. In 4 census years the population (with distribution by sex for 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	304,594	1,628	20,573	506	327,301	2·7
1920	334,673	5,733	19,512	432	360,350	2 9

New Mexico is largely a Spanish-speaking state. Of the 1940 population (531,818), no less than 221,740 (41·6%) gave Spanish as their mother tongue. (Both Spanish and English are official languages.) It has been estimated that in 1940 49·1% of the population were Spanish-Americans or 'Hispanos' as they are called. In 7 of the 32 counties they constitute 80% of the population and in each of the 15 most populous counties (with three-fifths of the total) they constitute at least 50%. Virtually all are descendants of the original Spanish settlers, living mainly in the Rio Grande Valley and along the tributaries of that river. Their economic status is low. Aliens registered in Dec., 1940, numbered 12,402, of whom 9,909 were Mexicans.

In 1940, 15,247 (2·8% of population) were foreign-born whites, of whom 8,875 (60%) were Mexican, 1,148 (6·6%) Italians, 813 Germans and 504 English. Japanese numbered 186, of whom 114 were citizens. Of the 1940 population, 33·2% were urban, 0·9% Negro and 26·3% (112,500 males and 27,769 females) gainfully employed; occupied dwelling units were 129,475 (of 4·11 persons). In 1940, 2,443 men and 2,984 women were reported divorced. Vital statistics, 1948:—Births, 20,519 (35·9 per 1,000 population which is the highest in the U.S.); deaths, 5,609 (9·8 per 1,000); marriages, 16,492; divorces, 2,631.

The largest towns are Albuquerque, with population (census 1950), 97,012; Santa Fé (capital) 27,547; Roswell, 25,572; Carlsbad, 17,915. The U.S. Office of Indian Affairs administered, in 1946, 6,652,294 acres, of which 4,891,198 acres were assigned to tribes, chiefly Navajo, Apache and Pueblo (or village) Indians.

In 1940, of persons between the ages of 5 and 24, 129,187 (58·6%) were attending school. Elementary education is free, and compulsory between 6 and 16 years of age. In 1948–49, 675 public elementary and 143 secondary schools had 143,835 pupils and 4,514 teachers. Private schools, mainly Roman Catholic, had 10,000 pupils. The federal government maintains 26 Indian schools with about 2,000 pupils and 140 teachers. Total expenditure on education (1948–49), $23,483,000. For higher instruction (1949–50):—College of Agriculture and Mechanic Arts, at State College, with 150 professors and 1,816 students; School of Mines, at Socorro, with 25 professors and 280 students; the Normal University at Las Vegas, with 56 professors and 745 students; and the State University at Albuquerque, with 282 professors and 5,498 students.

Religion and Welfare.—The prevailing form of religion is Roman Catholic, with 196,795 members in 1936 (37% of the population); Southern Methodists had 10,225 members and Southern Baptists 8,687. Total, all denominations, 243,936.

Old Age Assistance, in accordance with federal law, was being drawn in June, 1950, by 9,989 recipients (26% of those aged 65 or over) who averaged $32·51 per month. In 1949, the Indians were granted by New

Mexico social security benefits under the federal act; Indian beneficiaries receive payments 15% smaller than those made to others. In 1949, the state had 50 hospitals (4,347 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 945 patients or 192·7 per 100,000 population (national average, 363·2).

Of the state's 29 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 20 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1949, general revenues were $53,981,445; expenditures, $56,171,331.

Long-term debt on 30 June, 1949, was $74,841,000.

Production and Industry.—New Mexico produces cereals, vegetables, fruit and cotton. Dry farming has proved valuable; irrigation, indispensable over wide tracts of fertile country, was available for 731,990 acres in 1940. In 1944, 14,299 farms had 534,640 acres under irrigation. In 1945, 29,695 farms and ranches had an area of 49,608,445 acres (38,860,427 in 1940); value of farm lands and buildings was $326,750,718. Tenant-farmers operated 13·7% of all farms (17·0% in 1940) and 16·0% of the total farm area (10·8%). There was [illegible] of marginal lands; in 1945, 8,640 farms (30% of the 28,[illegible]) had total produce, for sale or farm consumption, valued at less than $400. Cash income, 1949, from crops, $88,015,000 and from livestock, $104,938,000.

Of the total surface area (77,588,536 acres), 36·5% were severely eroded and only 1·3% without apparent erosion; mountains etc., covered 13·5% of the rest. In 1950 there were 58 soil conservation districts embracing 52,199,432 acres, of which 37,327,484 acres were farm and ranch lands (25,415 farms and ranches).

Principal crops are maize, wheat, potatoes, grain sorghums and cotton, 255,000 bales in 1949 from 310,000 acres. The farm animals on 1 Jan., 1950, comprised 81,000 horses, 5,000 mules, 60,000 milch cows, 1,166,000 all cattle, 1,392,000 sheep and 73,000 swine. In 1949, the wool clip amounted to 10,697,000 lb. of wool from 1,312,000 sheep. National forest area (1949) covered 10,105,493 acres; public lands, administered by federal agencies (1946) amounted to 34,211,071 acres or 44% of the total area. Large tracts of land, granted originally by Mexico, are a feature of the state's economy; the largest, known as the Maxwell land grant, embraces over 1 million acres.

The state has valuable mineral resources, of which in 1949, gold (3,249 oz.), silver (380,855 oz.), copper (74,687 short tons in 1948), coal (1,443,000 short tons in 1948), lead (7,653 short tons) and zinc were the most important. Petroleum output, 1948, was 47,969,000 barrels; natural gas (1947), 142,740 million cubic feet, and natural gasoline or petrol (1948), 99,980,000 gallons. Mining of molybdenum, potassium salts (1,841,054 short tons in 1948 with K_2O content of 964,940 short tons) and fluor-spar is important. The value of the total mineral output in 1948 was $221,022,000.

In 1947, 432 manufacturing establishments employed 6,349 production workers who received $14,173,000; value added by manufacture was $55,486,000.

In 1948, there were 2,495 miles of steam railway. There were 104 airports in 1948, of which 31 were municipal; 26 were lighted. The state, 1949, maintained 9,976 miles of highway; the federal government, 3,872 miles; counties, 48,026 miles.

NEW YORK STATE.

Constitution and Government.—From 1609 to 1664, the region now called New York was claimed by the Dutch; then it came under the rule of the English, who governed the country till the outbreak of the War of Independence. On 20 April, 1777, New York adopted a constitution which transformed the colony into an independent state, and paved the way for its entrance into the Union as one of the 13 original states on its ratification, on 26 July, 1788, of the constitution of the United States.

The question whether there shall be a convention to revise the constitution has to be submitted to the people every 20 years, beginning with 1916, 'and also at such times as the Legislature may by law provide.' The voters on 8 Nov., 1938, approved 16 amendments to the constitution (the new Bill of Rights) submitted to them by the Constitutional Convention; they rejected 41 proposed amendments. The Senate consists of 56 members elected every 2 years, and the Assembly of 150 members elected every 2 years. The Governor and Lieutenant-Governor are elected for 4 years. The state capital is Albany. The right of suffrage resides in every adult who has been a citizen for 90 days, and has the usual residential qualifications; new voters must establish, by certificate or test, that they have had at least an elementary education. For local government the state is divided into 62 counties, five of which constitute the city of New York. New York leads in state parks and recreational areas, covering 2,942,543 acres in 1941.

The state is represented in Congress by 2 senators and 45 representatives.

Governor.—Thomas E. Dewey (R.), 1951-55 ($25,000).
Secretary of State.—Thomas J. Curran (R.).

Cities are in 3 classes, the first class having each 175,000 or more inhabitants and the third under 50,000. Each is incorporated by charter, under special legislation. The government of New York City is vested in the mayor, elected for 4 years, and a city council whose president is elected for 4 years and members for 2 years. The council, beginning in 1949, has 25 members, each elected from a state senatorial district wholly within the city. The system of proportional representation, which enabled the Communists to win several seats, was abolished in 1947. The chief executive officer is the mayor, who appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Richmond) has a president, elected for 4 years.

Area, Population.—Area, 49,204 square miles (1,550 square miles being water). Census population, 1 April, 1950, 14,830,192, an increase of 10·0% since 1940. Birth rate, 1948, was 21·2 per 1,000 population (national average, 24·2); death rate, 11·1 (9·9). Births in 1949 were 302,277; deaths,

155,010. Population in 4 census years (with distribution by sex in 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	8,966,845	134,191	6,046	6,532	9,113,614	191·2
1920	10,172,027	198,483	5,503	9,214	10,385,227	217·9
1930	12,153,191	412,814	6,973	15,088	12,588,066	262·6
1940	12,879,546	571,221	8,651	19,724	13,479,142	281·2
Male . .	6,408,192	261,306	4,487	16,341	6,690,326	—
Female .	6,471,354	309,915	4,164	3,383	6,788,816	—

Of the total in 1940, 2,853,530 (21·2% of total population) were foreign-born white. [illegible] 784,075 (20·5%) Italian, 436,028 (15·3%) Russian, 316,844 (11 [illegible], 281,080 (9·9%) Polish, 235,755 Irish, 172,347 Austrian, 123,737 Canadian and 117,370 English. Japanese numbered 2,538, of whom 766 were citizens. Of the 1940 population, 82·8% were urban; 31,424 men and 51,755 women were reported divorced. Of those 14 years or older, 3,482,885 or 57·2% were in the labour market. Number of occupied dwelling units in 1940 was 4,033,540 (of 3·68 persons). Aliens registered in Dec., 1940, numbered 1,257,501 or 25·8% of the U.S. total.

The population of New York City, by boroughs, preliminary census results of 1 April, 1950 (with 1940 census totals in brackets), was:—Manhattan, 1,936,540 (1,889,924); Bronx, 1,444,903 (1,394,711); Brooklyn, 2,716,347 (2,698,285); Queens, 1,546,294 (1,297,634); Richmond, 191,015 (174,441); total 7,835,099 (7,454,995).

Census population of other cities, 1950 (preliminary), were:—

Buffalo . .	577,393	White Plains .	43,501	Valley Stream .	26,833
Rochester .	331,252	Jamestown .	43,250	Lockport. .	25,136

Elmira . .	49,690	Lackawanna .	27,646	Endicott .	20,168

Education.—In 1940 there were 468,985 persons over 25 years of age who had never attended school; of persons between the ages of 5 and 24, 2,554,162 (60·0%) were then attending school (in 1948, 2,430,887, estimated). Education is compulsory between the ages of 7 and 16. In 1948–49, the children enrolled in the 4,609 school districts numbered 1,362,488; 991 public high schools had 544,489 pupils; teachers in public schools numbered 73,225. 11 state teachers' colleges had (1947–48) 742 teachers and 9,644 students; immigration education classes had 40,674 students. Total expenditure on public schools in 1948–49 was $471,832,000; on other types of state-supported schools approximately $10,000,000; on private secondary schools (1947–48) $30,465,909; on universities, colleges and other higher institutions (1947–48) $183,725,488. Teachers' salaries, 1948–49, ranged from $2,000 to $5,325; average was $3,782.

New York is the only state which does not have its own State University in the accepted American sense of a separate institution with its own physical plant, faculty and student body. But the state's educational system, including public and private schools and secondary institutions, universities, colleges, libraries, museums, etc., constitutes (by legislative act) the 'University of the State of New York' which is governed by a Board of Regents consisting of 13 members appointed by the Legislature. Within the framework of the 'University of the State of New York' was established in 1948 a 'State University' which on 1 April, 1949, assumed administrative control of the 32 existing state-supported institutions for higher education. The 'State University' is governed by a Board of 15 Trustees, appointed by the Governor with the consent and advice of the Senate.

There were (1947–48) 114 universities, colleges, professional and technical schools, with 22,595 professors and teachers and 353,668 students, including summer and extension courses.

The names, year of foundation, and numbers of instructors (full-time) and students (excluding summer and extension students) in 21 of the larger colleges and universities in 1949–50 were as follows :—

Founded	Name and place	Professors, etc.	Students, full time
1889	* Barnard College, New York [2]	105	1,024
1930	† Brooklyn College, Brooklyn [3]	436	7,942
1846	Colgate University, Hamilton [1]	111	1,295
1847	†† College of the City of New York, New York [1]	1,367	26,820
1754	Columbia University, New York [3]	1,473	14,546
1857	Cooper Union Institute of Technology, New York [1]	74	564
1865	Cornell University, Ithaca [3]	969	10,112
1846	Fordham University, New York [1]	287	6,742
1914	† Hunter College, New York [2]	403	5,525
1863	Manhattan College, New York [1]	150	2,600
1927	N.Y.S. College for Teachers, Albany [3]	91	1,638
1831	New York University, New York [3]	1,437	19,773
1854	Polytechnic Institute of Brooklyn [1]	170	1,807
1824	Rensselaer Polytechnic Institute, Troy [1]	334	3,472
1871	St. John's University, Brooklyn [1]	171	3,711
1856	St. Lawrence University, Canton [3]	91	1,294
1849	** Syracuse University, Syracuse [3]	882	11,992
1795	Union University, Schenectady and Albany [3]	181	2,256
1846	University of Buffalo, Buffalo [3]	351	4,815
1848	University of Rochester, Rochester [3]	349	3,436
1861	Vassar College, Poughkeepsie [2]	179	1,377

[1] For men only. [2] For women only. [3] For men and women.
* Included in the total for Columbia University, of which Barnard is a department.
† Included in the total for College of City of New York.
†† Includes the City College of New York, Brooklyn College, Hunter College and Queens College.
** Includes also Utica College and Triple Cities College.

There are 48 other colleges and universities in the state, whose curricula are approved by the state education department, and 12 extra-territorial colleges, chartered by the University of the State of New York and located in Brazil, Syria, Turkey, Greece and China.

Religion and Welfare.—The chief churches are Roman Catholic, with 3,075,428 members in 1936, Jewish congregations (2,197,418) and Protestant Episcopal (349,528). Total membership, all denominations, 1936, was 7,150,501.

Marriage licences are issued only after both applicants have passed the Wassermann or similar blood test.

In 1945, New York adopted a ' Law against Discrimination ' applicable to all employers, public or private, trade unions and employment agencies, making it an offence under the police powers of the state to discriminate, in matters of employment, against any persons on account of ' race, creed, colour or national origin.' Enforcement is placed with a ' State Commission Against Discrimination,' which must first try persuasion and, that failing, may issue ' cease and desist orders,' which the courts will enforce. The State Constitution declares that no person shall be subject to discrimination in his civil rights ' because of race, colour, creed or religion,' but leaves it to the legislature to define ' civil rights.' Several statutes aim at preventing specific types of discrimination, such as one forbidding insurance companies to require larger premiums from Negroes.

The State Department of Social Welfare administers 3 state training schools for juvenile delinquents and has supervisory authority over [illegible] 1,500 charitable, eleemosynary, correctional and reformatory [illegible], whether or not in receipt of public funds, and 138 agencies administering public assistance.

Old Age Assistance provides relief for all American citizens 65 years of age or older who have lived in the state for 5 of the 9 years immediately preceding application. Number of recipients in May, 1950, 120,831 (about 11% of the 1,104,000 aged 65 or over), drawing an average of $51·91 per month. Aid to dependent children included 59,442 families, with 136,608 children, grants averaging $100·83 per family. Assistance to blind included 3,949 persons, averaging $57·88. In 1949, the state had 521 hospitals (204,681 beds) registered with the American Medical Association. In Dec., 1946, hospitals for mental diseases had 82,806 patients or 604·7 per 100,000 population, the largest for any state (national average is 382·4). In 1912 New York State passed a law permitting, under safeguards, the sterilization of insane and feeble-minded persons in state institutions; the law was declared unconstitutional in 1918, at which time a total of 41 women and 1 man had been sterilized.

In 1949, 3,435 persons were convicted of major offences; 1,879 were committed to state prisons, 1,226 to state reformatories and 330 to institutions for defective delinquents; 14 were electrocuted. For all the major criminal offences, New York State's rate per 100,000 population is remarkably low, from one-third to one-half of the national average.

Of the state's 72 local jails (county and city) the [illegible] of Prisons, as of 30 June, 1949, rated 18 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—The state receipts for the year ending 31 March, 1950, were $857,354,503 and expenditures $866,438,840. Of the total revenue in 1948–49 ($1,051,927,000), taxes furnished $896,549,000 and federal aid $104,810,000. Individual income tax, at $160,831,000, and corporation income tax, at $160,775,000, led all states. Total expenditures were $1,242,259,000. The net long-term debt, 31 March, 1949, was $563,294,000, equal to one-fifth of the aggregate net long-term debt of the 48 states.

The assessed valuation in 1951 of taxable real property in New York City was $18,396,138,375 distributed as follows:—Lands and buildings, $15,994,531,575; real estate of corporations, $1,652,856,440; special franchise, $748,750,360. The City of New York, 1 July, 1949, had a gross funded debt of $2,956,918,919.

Production, Industry, Commerce.—New York has large agricultural interests. In 1945, it had 149,490 farms, with a total area of 17,568,471

acres; total value of land and buildings, $1,087,522,090. Tenant-farmers in 1945 operated 8·3% of all farms and 11·1% of the farm area. There is pressure to farm inferior lands; in 1945, 28,184 farms (19% of the 145,761 farms reporting) had a gross produce, for sale or farm consumption, valued at less than $400. Cash income, 1949, from crops was $262,079,000 and from livestock, $579,482,000.

The agriculture of New York is dominated by the demands of the large urban population, with dairying the leading type of farming. In 1944, the production of milk was 914,322,000 gallons; cheese, 56,583,000 lb.; butter, 1,866,000 lb. Field crops, with their 10-year averages, 1939–48, comprise maize, 24,241,000 bushels (29,610,000 in 1949); winter wheat, 7,768,000 bushels (11,676,000 in 1949); oats, 23,966,000 bushels (22,951,000); barley and hay. Other products are apples, 14,399,000 bushels, leading all states except Washington (20,090,000 bushels in 1949); peaches, pears, cherries, grapes, cabbage, onions; potatoes, 31,686,000 bushels (30,660,000); maple sugar, 112,000 lb., and maple syrup, 679,000 gallons. The farm animals on 1 Jan., 1950, included 145,000 horses, 2,000 mules, 1,483,000 milch cows, 2,226,000 all cattle, 158,000 sheep, 212,000 swine. The wool clip in 1949 yielded 1,058,000 lb. of wool from 145,000 sheep.

Since the passage of the Soil Conservation Act of 1940, 38 soil conservation districts have been established, covering 18,868,480 acres including 12,884,468 acres in 106,637 farms.

Other productive industries are the mining and quarrying of gypsum 1,228,358 tons in 1948; talc, 119,716 short tons, leading all states; aluminium, emery, abrasive garnet and sand-lime brick. Yield of zinc (1948), was 34,566 short tons; salt (1948), 3,065,831 short tons; Portland cement (with Maine), 13,504,096 barrels; crude petroleum (1948), 4,621,000 barrels; natural gas (1947), 4,730 million cubic feet; coke (1948), 5,687,225 net tons. Quarry products include pyrite, granite, trap rock, slate, marble, limestone and lime. The value of mineral output in 1948 was $156,140,000, Some abandoned iron mines were re-opened in 1949; output of ingot steel, 1949, was 3,977,345 short tons.

In 1947 (census) the manufacturing establishments numbered 47,819 (leading all states), employing 1,424,705 production workers who earned $3,815,374,000; value added by manufactures was $9,666,588,000 compared with $3,313,649,000 in 1939. Leading industries were women's clothing, printing and publishing, newspapers and periodicals, books and commercial printing, men's clothing, bread and other bakery products.

In 1940, there were 2,250 publications, etc., of which 164 dailies, 824 weekly, 41 semi-weekly, 5 tri-weekly, 895 monthly, 40 semi-monthly, 33 fortnightly, were published in English; of the foreign languages there were 24 in Spanish, 25 in Italian, 11 in German, 13 in Yiddish, 5 in Hungarian, 10 in Polish, 6 in French, 4 in Czecho-Slovak, 2 in Arabic, 4 in Greek, 4 in Swedish, 1 in Portuguese, 4 in Yugoslav languages, 2 in Chinese, 3 in Finnish, 1 in Hebrew, 2 in Japanese, 1 in Welsh, 2 in Armenian, 1 in Danish and Norwegian, 2 in Lithuanian, 1 in Esthonian, 4 in Russian, 1 in Ukrainian, 1 in Ladino and 4 in Rumanian.

The port of New York is the leading shipping port of the world. The imports for consumption for the calendar year, 1948, amounted to $2,593,100,000; domestic exports, $4,422,900,000.

In New York State there were in 1949, 7,529 miles of steam railways and 163 miles of electric railways. There were 276 airports in 1949, of which 178 were commercial and 47 municipal. The canals of the state, combined in 1918 in what is called the Improved Canal System, have a length of 525 miles, of which the Erie or 'Barge' canal has 339 miles. In 1949 the canals carried 3,949,739 short tons of freight. There are (1949) 71,174 miles of town and country roads, of which 52,103 miles are

improved; 14,306 miles are embraced in the state highway system; there are no federal roads.

NORTH CAROLINA.

Government.—North Carolina, first settled in 1653, was one of the 13 original states of the Union. The General Assembly consists of a Senate of 50 members and a House of Representatives of 120 members, elected for two years. The Governor and Lieutenant-Governor are elected for 4 years. The Governor may not succeed himself and has no veto. All registered citizens with the usual residential qualifications have a vote; registration of those whose ancestors were not voters in 1867 (the 'grandfather clause') and who were not eligible to vote on 1 Dec., 1908, is limited to those able to read and write any section of the constitution in the English language. There is substantial disfranchisement; out of 2,049,000 potential citizens (1948), 791,209 (38·6%) voted in the 1948 election. In 9 of the 100 counties Negroes constitute 50% or more of the population. The capital is Raleigh.

The state is represented in Congress by 2 senators and 12 representatives.

Governor.—W. Kerr Scott (D.), 1949–53 ($15,000, plus expenses, $5,600).
Secretary of State.—Thad Eure (D.).

Area, Population, Education.—Area, 52,426 square miles, of which 3,868 square miles are inland water. Census population, 1 April, 1950, 4,061,929, an increase of 490,306 or 13·7% since 1940. Birth rate, 1948, was 28·5 per 1,000 population (national average, 24·2); death rate 7·9 (9·9). Births, 1948, were 109,430; deaths 30,161; marriages, 29,773; divorces, nil.

Population in 4 census years (with distribution by sex in 1940):—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,500,511	697,843	7,851	82	2,206,287	45·3
1920	1,783,779	763,407	11,824	113	2,559,123	52·5
1930	2,234,958	918,647	16,579	92	3,170,276	64·5
1940	2,567,635	981,298	22,546	144	3,571,623	72·7
Male . .	1,281,762	479,816	11,300	112	1,772,990	—
Female .	1,285,873	501,482	11,246	32	1,798,633	—

Of the total in 1940, 9,046 (representing 0·2% of the total population) were white foreign-born, 1,114 (12·3%) being Greek, 1,088 (12·0%) English, 1,005 Canadian and 916 German. Urban population (1940) formed 27·3% and the Negro population 27·4% of the whole; 31·4% (854,910 males and 266,700 females) were gainfully employed; families numbered 794,860 (of 4·5 persons); 6,366 men and 11,064 women were reported divorced.

Cities (with census population in 1950) are:—Charlotte, 133,219; Winston-Salem, 86,816; Greensboro, 73,703; Durham, 70,307; Raleigh (capital), 65,123; Ashville, 52,208; Wilmington, 44,975; High Point, 39,390. Aliens registered in Dec., 1940, numbered 4,207; the state ranks first in the percentage (99·6%) of the population which is native-born.

School attendance is compulsory between 7 and 16, inclusive, and free from 6 to 21, inclusive. Separate schools are provided for white, coloured and Indian children. In 1949 public school enrolment was 865,154. In 1948–49 the 3,158 public elementary schools (both white and coloured) had 687,558 pupils; 962 public high schools had 169,447 pupils; teachers numbered 26,226. Negro schools had 7,274 teachers and 261,535 pupils. There are 7 state-supported normal schools and teachers' colleges (3 white, 3 Negro and 1 Indian), special schools for blind and deaf and 5 four-year colleges (3 white and 2 Negro). Teachers' salaries, 1948–49, were between $900 and $2,412; average was $2,438. Total [illegible] elementary and high schools, 1948–49, $97,673,000.

Higher instruction is given in 5 state and 20 senior and 23 junior private and denominational institutions, including the Greater University of North Carolina with three units, the university proper at Chapel Hill (founded in 1795) with (1948–49) 609 professors and 7,603 students; the State College of Agriculture and Engineering at Raleigh (founded in 1889) with 480 professors, and 4,915 pupils and the College for Women (Greensboro) with 198 professors and 2,164 students. Duke University at Durham has an endowment of $41,000,000; it had 583 instructors and 5,025 students.

In 1949, 378,351 rural schoolchildren were driven to and from school in 5,385 state-owned buses driven by student drivers.

Religion and Welfare.— Leading denominations are the Southern Baptists (389,746 members in 1936), Negro Baptists (219,893) and Southern Methodists (207,875). Total, all denominations, 1,274,722.

Marriage licences are issued only after both applicants have passed the Wassermann or similar blood test.

In 1919 North Carolina passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 497 men and 1,904 women had been sterilized under the Act.

Old Age Assistance was being drawn in June, 1950, by 61,411 persons (21% of those aged 65 or over) receiving an average of $22 27 per month, and aid to 43,321 dependent children by 15,491 families, averaging $43·60 per month. In 1949, the state had 171 hospitals (27,244 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 7,720 patients or 231·6 per 100,000 population (national average, 363·2).

Statutory segregation of Negroes is enforced throughout the entire educational system (including separate school libraries and school textbooks), welfare and penal institutions, fraternal associations, the National Guard, railways (except, specifically, sleeping cars), steamboats, buses and street cars. White and Negro prisoners may not be chained together. Indians must have separate schools and a separate home for the insane. Inter-racial marriage is prohibited between whites, Negroes and Indians.

In 1948, 8 death sentences were imposed (lethal gas). Of the state's 101 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 90 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—The state had revenues for general and highway operations in the year ending 30 June, 1950, of $216,186,201 (income and sales taxes

furnished $96,259,035), while general expenditures were $214,281,000 Unlike most states, North Carolina has no state tax on land.

On 30 June, 1950, the net bonded debt amounted to $136,281,000 principally for highway construction; it is being retired through taxes or petrol.

Production and Industry.—The chief occupation is agriculture, highly varied in character. North Carolina grows, in quantities sufficient to be reported, all of the 100 crops listed by the U.S. Department of Agriculture as of possible growth in the United States. In 1950, there were 25 soil conservation districts embracing 28,032,400 acres, of which 17,221,382 acres were farm lands (259,465 farms). In 1945, there were 287,412 farms, covering a total farm area of 18,617,932 acres; total value of land and buildings $1,002,983,012. Tenant-farmers operated 42·6% of all farms (43·5% in 1920) and 31·6% of all farm area (30·9% in 1920). In 1945, 35,122 farms (27% of the 274,236 farms reporting) had a total produce, for sale and farm consumption, of less than $400.

The state usually ranks third or fourth in the value of its farm crops Cash income from crops (1949) was $570,421,000 and from livestock $142,292,000. Maize, produced in every county, is the principal crop output, 1949, 75,565,000 bushels. The chief money crops are cotton tobacco and peanuts. Cultivation of cotton (1949) on 815,000 acres produced 460,000 bales. North Carolina leads in the production of tobacco (745,120,000 lb.); output of sweet potatoes, 5,876,000 bushels. Also grown are peaches, potatoes, sorgo syrup and peanuts (236,000,000 lb. in 1949). On 1 Jan., 1950, the farm animals were 82,000 horses, 248,000 mules 710,000 all cattle, 387,000 milch cows, 40,000 sheep and 1,120,000 swine The area of national forest lands (1949) was 3,593,436 acres.

North Carolina leads all states in its expenditures on fertilizers $26,529,000 in 1939, compared with the national average per state of $4,081,000; consumption in 1947 was 1,653,000 short tons, compared with the national average of 313,000.

Timber, covering 18 million acres, is important, furnishing some 20 different products with an annual value of $25 million or about 7% of the total value of farm products.

Minerals in great variety (289 different types, leading all states) are found in the state. North Carolina since 1900 has furnished about 60% of the country's supply of mica (output, 1948, 44,557 short tons). It also leads in the production of feldspar (201,774 tons in 1948), silica, millstones, residual kaolin clays, is the only producer of pyrophyllite (a substitute for talc) and with the world's largest open-face granite quarry at Mt. Airy, is second in output of granite as well as of asbestos. Other products are abrasive garnet, talc, some nickel and rare minerals such as olivine, vermiculite monazite, zircon, columbite, allanite and wolframite. Mineral products 1948, were valued at $27,885,000.

North Carolina in 1947 had 5,322 industrial establishments, employing 350,207 production workers, who received $641,966,000; the value added by manufactures was $1,646,673,000 compared with $544,181,000 in 1939 The leading industries were:—Manufacture of cigarettes (70% of the U.S.A production), textile goods (leading all states), rayon fabrication, aluminium processing of some 50 food crops, and the manufacture of furniture (leading all states).

The state in 1950 contained 4,554 miles of steam railway; 16,846 miles of passenger vehicle routes, and 8,070 miles of freight vehicle routes. There are 30 chartered bus companies reaching every part of the state. Electric

street railways have been eliminated. Airports in 1949 numbered 151, of which 35 were municipal; 24 were equipped for night flying. The state was the first to undertake the construction and maintenance of all highways within her borders; she maintains, 1950, 64,421 miles of highways, including 17,875 miles of paved highways, and 46,546 miles of rural highways.

NORTH DAKOTA.

Government.—North Dakota, first settled around 1800, was admitted into the Union on 2 Nov., 1889; previously it had formed part of the Dakota Territory. The Legislative Assembly consists of a Senate of 49 members elected for 4 years, and a House of Representatives of 113 members elected for 2 years. The Governor and Lieutenant-Governor are elected for 2 years. Qualified electors are (with necessary exceptions) all citizens and civilized Indians. The state has 53 organized counties; the capital is Bismarck. The state sends to Congress 2 senators and 2 representatives, elected by the voters of the entire state.

Governor.—C. Norman Brunsdale (R.), 1951–53 ($12,000).
Secretary of State.—Thomas Hall (R.).

Area, Population.—Area, 70,665 square miles, 611 square miles being water. The Federal Office of Indian Affairs administered (1945) 1,091,124 acres, of which 77,504 acres were assigned to tribes. Census population, 1 April, 1950, 619,636, a decrease of 22,299 or 3·5% since 1940. Birth rate, 1948, was 28·5 per 1,000 population (national average, 24·2); death rate, 8·8 (9·9). Births in 1948 were 16,584; deaths, 5,146; marriages, 5,488; divorces, 692.

Population at 4 federal censuses (with distribution by sex in 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	569,855	617	6,486	98	577,056	8·2
1920	639,954	467	6,254	197	646,872	9·2
1930	671,851	377	8,387	230	680,845	9·7
1940	631,464	201	10,114	156	641,935	9·2
Male . .	330,047	128	5,102	125	335,402	—
Female .	301,417	73	5,012	31	306,533	—

The number of foreign-born whites in 1940 was 74,272 (11·5% of the total population), of whom 21,637 (43·2%) were Norwegian, 17,351 (23·0%) Russian, 8,721 Canadian, and 6,876 German. Urban population formed 20·6% and the Negro population less than 0·1% of the whole; 31·1% (166,741 males and 33,655 females) were gainfully employed; occupied dwelling units numbered 152,043 (of 4·22 persons). In the 1940 census 1,793 men and 1,988 women were reported divorced. Aliens registered in Dec., 1940, numbered 10,482. The largest cities are Fargo with population,

1950, of 37,981; Grand Forks, 26,617; Minot, 21,924, and Bismarck, 18,544.

The leading religious denominations are the Roman Catholics, with 130,639 members in 1950; Combined Lutherans, 172,481; Methodists, 18,722; Presbyterians, 11,490. Total, all denominations, 354,631.

Education and Welfare.—In 1949, there was a school population between the ages of 6 and 21 of 155,524, of which 112,917 were attending school. School attendance is compulsory between the ages of 7 and 15, or until the seventeenth birthday if the eighth grade has not been completed. In 1949, 3,219 public elementary and secondary schools had 6,349 teachers and 112,917 pupils. The 2,580 one-room schools had 28,670 pupils; the graded country schools, 2,416 pupils, and the town graded schools, 81,831 pupils. Average cost per pupil, $180·00. Teachers' salaries, 1948–49, ranged between $1,125 and $6,500; average was $1,810 (national average, $2,846). The state university, founded in 1883, had (1950) 171 teachers and 2,255 students; the state agricultural college, 140 teachers and 1,942 students. Expenditure on elementary and secondary education in 1949, $21,433,788; for higher education, including buildings, $6,023,145.

Old Age Assistance is provided for all needy persons 65 years of age or older who have resided in the state for one year and for 10 years in the United States, or who are citizens; in June, 1950, 8,959 persons (out of 45,000 in that age group) were drawing an average of $48·56 per month. In 1949, the state had 48 hospitals (6,566 beds) registered with the American Medical Association. Hospitals for mental diseases, Dec., 1945, had 2,011 patients or 329·0 per 100,000 population (national average, 363·2). In 1913 North Dakota passed a statuto permitting, under [illegible] the sterilization of insane and feeble-minded persons; up to [illegible], 275 males and 532 females had been sterilized.

In 1949, 130 persons (21·3 per 100,000 persons compared with 74·6 in 1940) were convicted of major offences. There is no death penalty. The state penitentiary in 1949 held 227 men and 5 women. Of the state's 53 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 47 as sub-standard, unsuitable for the housing of Federal prisoners.

Marriage licences are issued only after both applicants have passed the Wassermann or similar blood test. Marriage between white and coloured persons is prohibited.

Finance.—General revenue for the year ending 30 June, 1949, was $55,038,000 (taxes furnishing $37,837,000 and federal grants $11,910,000). General expenditures were $47,740,000.

Bonded debt on 30 June, 1949, $27,638,000 (against sinking fund of $17,624,000).

Production and Industry.—Agriculture is the chief pursuit of the North Dakota population. In 1945 census, there were 69,520 farms (73,962 in 1946) with an area of 41,001,158 acres (37,936,000 in 1946); value of farm lands and buildings, 1945, $708,322,156. Farm-tenants, 1945, operated 27·8% of the farms (45·1% in 1940) and 22·0% of the farm area (28·5%). Large-scale farming is growing; in 1940, 6,405 farms exceeded 1,000 acres, and in 1945, 7,975 farms.

Cash income, 1949, from crops was $295,683,000 and from livestock, $169,020,000. North Dakota leads usually in the production of barley (26,608,000 bushels in 1949), of spring wheat (77,427,000 bushels), of rye (2,748,000 bushels) and of durum wheat (34,012,000 bushels). Other important products are flax seed, potatoes, hay, oats and maize. The state

has also an active livestock industry, chiefly horse and cattle raising. On 1 Jan., 1950, the farm animals were :—153,000 horses, 421,000 milch cows, 1,542,000 all cattle, 388,000 sheep and 413,000 swine. The wool clip yielded (1949), 3,362,000 lb. of wool from 382,000 sheep. National forest area, 1948, 764,425 acres.

In 1950, there were 78 soil conservation districts embracing 41,802,167 acres (65,400 farms and ranches), covering 97% of the state's acreage.

The mineral resources of North Dakota consist chiefly of lignite coal (2,759,862 short tons produced in 1947). Total value of mineral output, 1948, $8,581,000.

In 1947, 362 manufacturing establishments employed 3,823 production workers, who earned $8,490,000; value added by manufacture was $29,464,000.

In 1948, there were 5,259 miles of steam railway in the state; 85·0% of the communities are served by railways. This is the highest percentage of all the states. The state highway department maintained in 1950, 6,429 miles of highway, of which 6,379 miles are graded and surfaced. Airports in 1950 numbered 388, of which 64 were municipal; 25 were lighted.

OHIO.

Government.—Ohio, first settled in 1788, was admitted into the Union on 19 Feb., 1803. The question of a general revision of the constitution drafted by an elected convention is submitted to the people every 20 years.

During the biennium of 1949–50, the Legislature consists of a Senate of 33 members and a House of Representatives of 135 members, both Houses being elected for 2 years, as are also the Governor and Lieutenant-Governor. Qualified as electors are (with certain necessary exceptions) all citizens 21 years of age who have the usual residential qualifications. Ohio is divided into 88 counties; the capital (since 1816) is Columbus. Ohio sends to Congress 2 senators and 23 representatives, including 1 elected by the voters of the entire state.

Governor.—Frank J. Lausche (D.), 1951–53 ($13,000).
Secretary of State.—Ted W. Brown (R.).

Area and Population.—Area, 41,222 square miles, of which 100 square miles are inland water. Census population, 1 April, 1950, 7,946,627, an increase of 1,039,015 or 15·0% since 1940. Birth rate, 1948, was 23·8 per 1,000 population; death rate, 10·3. In 1948 births numbered 186,353; deaths, 80,891; marriages, 83,146; divorces (estimate), 25,800. Population at 4 census years (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	4,654,897	111,452	127	645	4,767,121	117·0
1920	5,571,893	186,187	151	1,163	5,759,394	141·4
1930	6,335,173	309,304	435	1,785	6,646,697	161·6
1940	6,566,531	339,461	338	1,282	6,907,612	168·0
Male . .	3,291,080	168,849	195	948	3,461,072	—
Female .	3,275,451	170,612	143	334	3,446,540	—

Of the foreign-born whites in 1940, numbering 519,266 (7·5% of the whole), Germans were 66,373 (12·7%), Italians 65,453, Poles 50,959 and Hungarians 49,185. Japanese numbered 163, of whom 100 were citizens. Of the total population in 1940, 66·8% were urban, 4·9% Negro; occupied dwelling units numbered 1,898,212 (of 3·6 persons); 33·9% (1,792,154 males and 552,813 females) were gainfully employed; 41,662 men and 53,659 women were reported divorced. Aliens registered in Dec., 1940, numbered 203,038.

Census population (preliminary) of the chief cities on 1 April, 1950, was :—

Cities	Population	Cities	Population	Cities	Population
Cleveland	905,636	Lima	49,880	Massillon	29,524
Cincinnati	500,510	Warren	49,674	Cuyahoga Falls	29,076
Columbus (cap.)	374,770	Mansfield	43,363	Sandusky	29,060
Toledo	301,358	Euclid	41,447	Parma	28,852
Akron	273,189	Zanesville	40,434	Shaker Heights	27,980
Dayton	243,108	East Cleveland	39,875	Barberton	27,893
Youngstown	167,643	Portsmouth	36,663	Alliance	26,112
Canton	116,312	Steubenville	35,695	Lancaster	24,140
Springfield	78,029	Norwood	34,626	East Liverpool	21,072
Lakewood	67,878	Newark	34,178	Findlay	23,806
Cleveland Hgts.	58,783	Marion	33,786	Ashtabula	23,093
Hamilton	57,717	Middletown	33,634	Garfield Heights	21,606
Lorain	50,819	Elyria	30,197	Chillicothe	20,121

Religion, Education and Welfare.—The chief religious bodies are Roman Catholic, with 1,052,101 members in 1936, Methodist (377,822), Jewish Congregations (175,942), Presbyterian (156,908), Lutheran and Baptist. Total, all denominations, 2,934,248.

School attendance during full term is compulsory for children from 6 to 18 years of age. In 1950, the 591 kindergartens had 966 teachers and 51,621 pupils; 3,074 public elementary schools had 24,268 teachers and 765,759 enrolled pupils; 115 junior high schools had 2,623 teachers and 69,730 pupils; 1,096 high schools had 15,790 teachers and 329,324 pupils; 45 teachers' training institutions had 20,000 students and 2,000 teachers. Teachers' salaries, 1948–49, averaged $3,029 (national average, $2,846). Expenditure on public schools in 1948–49 was $210,654,043 and on higher education, $78,000,000. The state's 52 universities and colleges had a total enrolment of 142,708 resident students in 1949; the following had 2,000 or more students :—

Founded	Institutions	Professors, etc.	Students (all departments)
1804	Ohio University, Athens (State)	330	7,312
1809	Miami University, Oxford (State)	310	6,429
1826	Western Reserve University, Cleveland	707	10,605
1831	Xavier University, Cincinnati	103	3,575
1833	Oberlin College	174	2,228
1844	Ohio Wesleyan University, Delaware (M.E.)	104	2,185
1850	University of Dayton	184	2,751
1870	Municipal University of Akron	296	3,668
1872	Ohio State University, Columbus	1,425	28,290
1872	Toledo University	205	4,513
1874	University of Cincinnati (City)	659	9,049
1880	Case School of Applied Science, Cleveland	131	2,441
1886	John Carroll University, Cleveland	64	2,158
1908	Youngstown	89	4,437
1910	Bowling Green State	272	4,684
1912	Kent State University	334	9,351

A Civil Rights Act (1933) forbids inns, restaurants, theatres, retail stores and all other places of public resort to discriminate against citizens on grounds of 'colour or race'; none may be denied the right to serve on juries on the grounds of 'colour or race'; insurance companies are forbidden, under penalty, to discriminate, in their terms, between 'white persons and coloured, wholly or partially of African descent.' But segregation in the public schools has been permissible since 1887.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test. Ohio is one of the states whose birth certificates do not disclose illegitimacy.

Old Age Assistance (maximum $55 a month) provides for American citizens 65 years or older who have resided in the state for 5 years, with total assets not exceeding $480 per annum; in Aug., 1950, 125,281 persons (about 20·0% of those aged 65 or over) were drawing an average of $46·29 per month. On 31 Dec., 1949, 2,674 aged persons were being maintained in institutions. The state welfare department in April, 1950, was caring for 7,375 children in their homes and 4,019 in institutions. In 1949 the state had 240 hospitals (66,079 beds) registered with the American Medical Association. Hospitals for mental diseases, in Dec., 1945, had 20,299 patients or 297·5 per 100,000 population (national average, 363·2); in Jan., 1950, such patients numbered 23,169.

The state's penal and reformatory system in Sept., 1950, held 9,063 men and women. In 1945, 2,920 persons (57·5 per 100,000 persons) were convicted [illegible] 45 convicted of murder; 7 were sentenced to death. [illegible] Death sentences in 1948 numbered 7.

Finance.—The receipts and disbursements for the 18 months ending 30 June, 1950, were (in dollars):—

Cash in hand, 1 January, 1949	262,000,936	Disbursements, 18 months	1,023,982,662
Income and receipts, 18 months	972,757,548	Balance, 30 June, 1950	210,775,822
Total. . . .	1,234,758,484	Total. . .	1,234,758,484

The net long-term debt of the state on 31 Dec., 1949, was $190,060,000.

The assessed value of real property in 1949 was $10,909,042,720, of tangible personal property, $3,038,325,883 and of intangibles, $1,256,655,335; the yield from the tax on intangibles amounted to $19,667,016, including the tax on both productive and unproductive investments.

Production and Industry.—Ohio is extensively devoted to agriculture. In 1945, 220,575 farms covered 21,927,844 acres, of which 11,435,000 acres were crop land; value of land and buildings, $1,868,351,004. Tenant-farmers, 1945, operated 21·8% of all farms (26·3% in 1940) and 27·3% of the total farm area (31·2% in 1940). There is pressure to farm inferior land; in 1945, 44,533 farms (21% of the 216,193 farms reporting) had a gross produce, for sale or farm consumption, valued at less than $400.

Cash income, 1949, from crops, $292,221,000 and livestock, $619,724,000. The chief crops (1949) were:—Maize, 202,552,000 bushels; oats, 48,024,000 bushels; winter wheat, 60,002,000 bushels; potatoes, sugar beet, hay, tobacco (29,220,000 lb.) and grapes. The wool clip in 1950 yielded 7,812,000 lb. from 930,000 sheep. National forest area, 1949, 1,664,227 acres. On 1 Jan., 1950, the livestock on Ohio farms was:—132,000 horses, 6,000 mules, 1,060,000 milch cows, 2,149,000 all cattle, 3,176,000 swine and 1,195,000 sheep.

In 1950, there were 79 soil conservation districts embracing 22,839,885 acres, of which 19,896,942 acres were farmland (195,884 farms).

Ohio has also extensive mineral resources; value of total mineral output (excluding value of pig-iron), 1948, $328,228,000. The state produces limestone, 14,705,769 tons in 1949; fireclay, 2,483,654 tons; silica (quartz) and grindstones; coal, 30,777,212 short tons; petroleum (1949), 3,485,000 barrels; natural gas output (1949), 585,597 million cubic feet; cement (1948), 10,035,000 barrels; salt (1949), 2,794,970 short tons.

In 1947 (census), 12,303 manufacturing establishments had 988,446 production workers earning $2,727,481,000; the value added by manufactures was $6,359,006,000 compared with $2,116,434,000 in 1939. Largest industry was machinery (excluding electrical) with 186,500 production workers; value added was $1,256,400,000. Ohio is the second largest producer of pig-iron; 43 blast furnaces produced 10,639,837 short tons in 1949; output of ingot steel, 15,072,423 short tons.

The steam railways in 1948 had 8,893 miles of track; there were 61·48 miles of electric railway track. There were 360 airports and landing fields in Jan., 1949, of which 40 were municipal; 20 were lighted. The state maintains 17,305 miles of highway, all hard surfaced.

OKLAHOMA.

Government.—An unorganized area in the centre of the present state was thrown open to white settlers on 22 April, 1889. The Territory of Oklahoma was organized in 1890 to include this area and other sections, opened to white settlements by runs or lotteries during the next decade. On 16 Nov., 1907, Oklahoma Territory was combined with the Indian Territory and admitted as a state. The constitution provides for the initiative and the referendum.

The Legislature consists of a Senate of 44 members who are elected for 4 years, and a House of Representatives elected for 2 years, and consisting of from 114 to 120 members. The Governor and Lieutenant-Governor are elected for 4 years. Electors are (with necessary exceptions) all citizens with the usual residential qualifications. Indians are qualified as voters. The state has 77 counties; the capital is Oklahoma City.

The state is represented in Congress by 2 senators and 8 representatives.

Governor.—Johnston Murray (D.), 1951–55 ($15,000).
Secretary of State.—John D. Conner (D.).

Area and Population.—Area 69,919 square miles, of which 636 square miles are water. Census population, 1 April, 1950, 2,233,351, a decrease of 103,083 or 4·4% since 1940. Birth rate, 1948, was 22·0 per 1,000 population (national average, 24·2); death rate, 8·3 (9·9). Births, 1948, were 50,386;

deaths, 19,079; marriages, 83,146; divorces (estimate), 25,800. The population at 4 federal censuses (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,444,531	137,612	74,825	187	1,657,155	23 9
1920	1,821,194	149,408	57,337	344	2,028,283	29·2
1930	2,130,778	172,198	92,725	339	2,396,040	34 6
1940	2,101,228	168,849	63,125	232	2,336,434	33·7
Male . .	1,066,258	83,465	31,996	173	1,181,892	—
Female .	1,037,970	85,384	31,129	59	1,154,542	—

In 1940, 20,359 were foreign-born whites (0·8% of the total population), of whom 4,032 (20·0%) were Germans, 2,626 Russians, 1,654 Canadians and 1,323 English. Japanese numbered 57, of whom 41 were citizens. Aliens registered Dec., 1940, were 6,946. Indians occupy 2,468,770 acres administered by the Federal Office of Indian Affairs; 73,378 acres have been allotted to tribes. Of the total 1940 population, 37 6% were urban, 7·2% Negro and 28 2% (530,123 males and 128,616 females) were gainfully employed; occupied dwelling units numbered 610,424 (of 3·8 persons); 15,188 men and 20,297 women were reported divorced.

The most important cities, with census population, 1950 (preliminary), are Oklahoma City (242,450); Tulsa (180,586); Muskogee (37,255), Enid (35,976); Lawton (34,527); Norman (26,972); Shawnee (24,457); Ponca City (20,185); Stillwater (20,155) and Bartlesville (19,262).

Religion, Education and Welfare.—The chief religious bodies are Baptists, 277,642 (1946); Negro Baptists, about 75,000 (1946); Northern and Southern Methodists (black and white), 181,668 (1946); Indian Methodists, about 10,000 (1946); Disciples of Christ, 81,059 (1945). Total, all denominations, census of 1936, was 587,425. Oklahoma is one of the two states still adhering to complete prohibition; in Sept., 1949, the voters defeated in a referendum an attempt to repeal prohibition.

In 1950–51 there were 2,165 public-school districts with 379,620 elementary pupils and 117,169 high-school pupils; the 18,885 teachers were paid an average of $2,776. Negro schools (included above) had 36,214 pupils and 1,407 teachers. Total expenditure on pre-collegiate education in 1948–49, $68,769,000. The state university (founded at Norman in 1892) had, in 1949–50, 525 professors and 12,200 students; the agricultural and mechanical college (founded in 1891 at Stillwater) had 520 professors and 10,809 students.

Oklahoma statutes require separate educational facilities for whites and Negroes, including specialized schools for deaf, dumb and blind; separate reform schools, agricultural and trade schools; separate railroad facilities (except freight cars, but including waiting rooms); separate accommodation in buses and street cars; in parks, playgrounds; in hospitals for mental and tubercular patients; in homes for orphans and the aged. Oklahoma is unique in compelling the telephone companies to establish separate telephone booths for coloured persons. In 1948, the Federal District Court ruled that the State University was violating the U.S. constitution in failing to provide educational facilities for Negro students equal to those furnished to white students; the legislature in 1949 enacted a law under which they are admitted to the university but segregated as to classrooms. Negroes are forbidden to marry into other races.

Old Age Assistance, in June, 1950, was being drawn by 100,788 persons, receiving an average of $25·29 per month; 23,161 families with 59,055 dependent children were drawing $45·19 monthly and 2,692 blind persons, $46·73. In 1949, the state had 118 hospitals (17,473 beds) registered with the American Medical Association. In Jan., 1950, hospitals for mental diseases had 10,190 patients or 372 per 100,000 population.

The state's penal and reformatory system on 1 Jan., 1950, held 2,693 men and women; of the state's 85 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 67 as sub-standard, unsuitable for the housing of Federal prisoners.

In 1931 Oklahoma passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 122 men and 431 women had been thus sterilized.

Finance.—General revenue in the year ending 30 June, 1950, was $282,314,329, of which $208,862,148 came from taxes and licences, and $73,452,181 from federal grants. General expenditure, $271,976,062.

Oklahoma is a debt free state. On 30 June, 1950, the funding bond sinking fund had available assets of $13,548,127 against liabilities of $12,681,995.

Production and Industry.—Oklahoma is mainly agricultural. In 1945 it had 164,790 farms (reduced from 179,687 in 1940) with a total area of 36,161,822 acres (34,803,317 in 1940), of which 14,087,807 acres were in crops. Total value of farm lands and buildings, 1945, was $1,106,153,826. Owners and part owners operated 98,321 farms, tenants 65,771 farms and managers 698 farms in 1945. Soil erosion is serious—wind erosion in the western part and water erosion in the eastern. Of the total surface (44,586,881 acres) 58·6% was found seriously eroded and 18·9% free from erosion in 1939. On 25,268,034 acres (71% of all farm lands) drastic curative treatment is said to be needed, and on 5,664,207 acres (17%) preventive treatment. In 1950, there were 81 soil conservation districts embracing 43,290,200 acres, of which 34,911,208 acres were farm lands (162,292 farms and ranches). Number of farms declined by 33,638 (15·9%) between 1935 and 1940 and by 14,897 (8·3%) between 1940 and 1945. Large-scale commercial farming is becoming the dominant form; 3,522 farms exceeded 1,000 acres. On the other hand subsistence farming also exists; in 1945, 22,750 farms (14% of the 162,685 farms reporting) showed a gross production, for sale and farm consumption, valued at less than $400. Farm mortgage indebtedness has decreased from $274,971,000 in 1930 and $153,679,000 in 1940 to $112,963,000 on 1 Jan., 1948.

Oklahoma usually leads in production of broom corn (11,400 tons in 1949). The yield of maize in 1949 was 29,392,000 bushels; of wheat (all winter), 88,725,000 bushels; oats, 17,460,000 bushels; grain sorghums, 10,362,000 bushels. Of all these crops the yield per acre is substantially below the national average. The cotton crop for 1949 amounted to 620,000 bales, compared with the average, 1938–49, of 521,000 bales.

Cash income from crops, 1949, $317,650,000, and from livestock, $304,113,000. On 1 Jan., 1950, the stock comprised 654,000 milch cows, 2,655,000 all cattle, 835,000 hogs, 105,000 sheep, 213,000 horses and 27,000 mules. The wool clip in 1949 was 772,000 lb. of wool from 99,000 sheep. National forest lands (1949) total 344,269 acres.

Oklahoma ranks fourth as a petroleum producer and first in mileage of pipelines. Producing oil wells, 1949, 54,360. In 1949, 150,003,000 barrels of crude petroleum were produced; 470,100,000 gallons of natural

gasolene (1948); 649,680 million cubic feet of natural gas (1947); coal, 3,210,182 short tons (1949). In 1949, 18,080 short tons of lead, 64,823 short tons of zinc and 355,590 short tons of gypsum were also produced. The total mineral output in 1948 was valued at $503,654,000.

Petroleum refining is the chief industry; 27 refineries (7,202 employees) were operating in 1947, with output valued at $278,000,000. In 1947, 1,740 industrial establishments employed 41,362 persons who earned $105,277,000; the value added by manufacture was $341,027,000.

In 1948, Oklahoma had 5,900 miles of railroad besides 189 miles of electric railway. Airports, 1948, numbered 163, of which 75 were municipal; 42 were lighted. The state maintains 9,680 miles of highway; the counties, 89,305 miles; the federal government, 1,225 miles.

OREGON.

Government.—Oregon, first settled about 1830 by French Canadian employees of the Hudson's Bay Company and organized as a Territory in 1848, was admitted into the Union on 14 Feb., 1859. The Legislative Assembly consists of a Senate of 30 members, elected for 4 years (half their number retiring every 2 years), and a House of 60 representatives, elected for 2 years. The Governor is elected for 4 years. State employees are under Civil Service protection and administration. The constitution was amended in 1902 to reserve to the voters the rights of the initiative and referendum. In November, 1912, suffrage was extended to women. There are 36 counties in the state; the capital is Salem.

The state sends to Congress 2 senators and 4 representatives.

Governor.—Douglas McKay (R.), Jan., 1951–Jan., 1955 ($10,000).
Secretary of State.—Earl T. Newbry (R.).

Area, Population, Education.—Area, 96,981 square miles, 631 square miles being inland water. The federal government owns 32,269,760 acres (52% of the state area). Census population, 1 April, 1950, 1,521,341, an increase of 431,657 or 39·6% since 1940. Birth rate, 1948, 21·5 per 1,000 population (national average, 24·2); death rate, 8·6 (9·9). In 1949, births numbered 35,062; deaths, 13,698; marriages, 10,746, and divorces, 6,274. Population at 4 federal censuses (with distribution by sex for 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	655,090	1,492	5,090	11,093	672,765	7·0
1920	769,146	2,144	4,590	7,509	783,389	8 2
1930	938,598	2,234	4,776	8,179	953,786	9 9
1940	1,075,731	2,565	4,594	6,794	1,089,684	11·3
Male . .	554,719	1,384	2,331	4,255	562,689	—
Female .	521,012	1,181	2,263	2,539	526,995	—

The foreign-born whites in 1940 numbered 87,639, of whom 16,492 were Canadian, 9,883 German, 8,498 Swedish, 6,385 English and 6,129 Norwegian. Japanese were 4,071 (2,454 citizens). Of the total population in 1940, 48·8%

were urban, 1·9% Negro, and 41·5% (355,766 males and 97,616 females) were gainfully employed; there were 337,731 occupied dwelling units (with 3·2 persons); 12,504 men and 11,868 women were reported divorced. The U.S. Office of Indian Affairs administers 1,733,080 acres, of which 1,331,834 acres have been allotted to tribes. Aliens registered in Dec., 1940, were 34,424.

The largest towns, according to the 1950 census (preliminary) are:—Portland, with a population of 371,011; Salem, 43,064; Eugene, 35,672; Medford, 17,170; Corvallis, 16,173; Klamath Falls. 15,803; Astoria, 12,220.

School attendance is compulsory from 7 to 18 years of age if the twelfth year of school has not been completed; those between the ages of 16 and 18 years, if legally employed, must attend part-time or evening schools unless they have already acquired the ordinary branches of learning encompassed in the first 12 years of school. On 30 June, 1949, the 1,024 public elementary schools and 227 4-year standard senior high schools had 10,568 teachers and 233,298 pupils in average daily attendance; the 3 colleges of education had (1949–50) 123 teachers and 1,932 students. Teachers' salaries, 1948–49, ranged between $1,800 and $4,600; average was $3,187. Total expenditure (1948–49) on elementary and secondary education was $58,161,039, excluding debt service.

The Oregon State College at Corvallis was adopted as the agricultural college of the state in 1870. In 1949–50 the instructional staff numbered 526 and the student enrolment 6,763. The University of Oregon, organized at Eugene in 1876 had 367 professors and 5,846 fall-term students; its medical school, at Portland, had 102 paid and 300 volunteer instructors and 500 students of medicine and of nursing; its dental school, also at Portland, had 42 instructors and 291 students; its Vanport Center at Portland had 60 instructors and 1,619 students. The state's institutions for higher education had 25,520 students during the autumn term, 1949–50.

Religion and Welfare.—The chief religious bodies are Catholic (66,309 members in 1936), Methodist (28,598), Disciples of Christ (20,431), and Presbyterian (19,933). Total membership, all denominations, 249,275.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test. Oregon is one of the states whose birth certificates do not disclose illegitimacy. Marriage is prohibited between whites and Negroes, Mongolians and Indians.

Old Age Assistance is provided under the Federal Social Security Act and state laws for all needy persons 65 years or older who have been residents of the state for 5 years or more within the 9 years, and for at least one year, immediately preceding application. In Sept., 1950, 24,068 aged persons (about 17% of those aged 65 or over) were drawing an average of $53·86 per month. A system of unemployment benefit payments, financed solely by employers, with administrative expense borne by federal government, started 2 Jan., 1938, and covers approximately 16,500 employers and 480,000 employees. By 1 Oct., 1950, about $163,100,000 had been collected and $90,500,000 paid out in benefits, leaving a balance of $72,600,000. Benefits range from $15 to $25 weekly and from $100 to $650 per year.

About 34,000 state, school and local public employees are covered by the retirement system effective 1 July, 1946. Assets on 1 July, 1949, approximately $27,000,000. About 2,400 retired employees are (1950) drawing annuities aggregating $900,000 a year. In 1949, there were in the state 75 hospitals (12,715 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 3,900 patients or an average

of 326·7 per 100,000 population (national average, 363·2). In 1917 Oregon passed a law permitting, under safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 724 men and 1,129 women had been thus sterilized.

The Oregon state penitentiary in Oct., 1950, held 1,450 men and 32 women. Of the state's 40 local jails (city and county) in 1949, 28 were rated by the U.S. Bureau of Prisons as sub-standard and unsuitable for Federal prisoners. In 1950 the 2 state mental hospitals and 9 other institutions had 7,894 inmates. Total cost of operating these state institutions, in the biennium ending 30 June, 1950, was $11,498,496. In addition, the University State Tuberculosis Hospital operates independently in connexion with the University of Oregon Medical School with a biennium expenditure of $530,931.

Finance.—The receipts and disbursements of the General Fund of the state for the calendar year ending 31 Dec., 1949, were (in dollars):—

Balance, 1 January, 1949	54,616,447	Disbursements, 1949	170,654,354
Receipts, 1949	176,684,387	Balance, 1 January, 1950	60,646,480
Total	231,300,834	Total	231,300,834

On 30 June, 1950, net long-term debt was $2,741,533; assessed value of real and personal property (1950) was $1,607,876,262.

Production and Industry.—Oregon, which has an area of 61,664,000 acres, is divided by the Cascade Range into two distinct zones as to climate. West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown; east of the Range irrigation is necessary and stock-raising and wheat-growing are the principal industries. There are numerous irrigation districts and (1950) 34 soil conservation districts embracing 12,193,998 acres (in 25 of the 36 counties) and including 16,464 farms. In 1944, 15,597 farms, covering 1,129,059 acres, were under [illegible] total forested area, 30 June, 1950, was 29,661,800 acres, of [illegible] acres were privately owned; 14,856,128 acres belonged to the United States forest service; 687,219 acres were state forests.

In 1945 there were 63,125 farms with an acreage of 19,754,257, including 4,909,101 acres in crops; value of farm lands and buildings, 1945, was $697,775,183; 25,557 farms (40% of the total) were under 30 acres and 3,283 farms exceeded 1,000 acres. There is some subsistence farming; in 1945, 13,387 farms (21% of the 61,188 farms reporting) had a gross production, for sale and farm consumption, valued at less than $400; but only 3,097 of these farms were producing primarily for sale.

Cash income from crops and livestock, 1950, $394,026,000; government payments, 1949, $2,450,000. Agricultural production in 1949 was more than one-third above pre-war. Farm mortgage debt decreased from $135,917,000 (on 51·5% of all farms) in 1930 to $68,779,000 in 1946, rising to $100,582,000 on 1 Jan., 1950. The fruit and nut crops include apples, cherries, peaches, pears, prunes, walnuts and filberts. Farm-raised fur and game and honey are among the 'speciality' animal products grown commercially. Horses on 1 Jan., 1950, numbered 72,000; milch cows, 240,000; all cattle, 1,107,000; sheep, 689,000; swine, 166,000. Range land for grazing cattle and sheep, 39,000,000 acres. In 1950, the wool clip yielded 5,366,000 lb. from 624,000 sheep; mohair clip, 1949, 243,000 lb. from 64,000 goats. The salmon, sturgeon, halibut and oyster fisheries

are abundant. In 1949 total landings of fish amounted to 39,857,835 lb., of which 13,485,462 lb. were salmon and steelhead.

Oregon's mineral resources include gold, 15,890 fine oz. in 1949; silver, 13,700 fine oz.; copper, lead and mercury. Value of mineral products, 1949, was $20,676,000.

In 1947 (federal census) Oregon had 3,075 [illegible] establishments, with 92,144 production workers who received [illegible], value added by manufacture was $675,017,000 compared with $156,696,000 in 1939.

The Dalles and Celilo Canal, completed in 1915, opens the Columbia and Snake rivers to navigation to a length of 570 miles from the ocean. Large ocean-going vessels can reach Portland, 108 miles inland. The Bonneville Power and Navigation Project, first authorized in 1933, was completed in Dec., 1943, at a cost of $80,400,000. The state had (1949) a total steam railway mileage of 5,055 and a total electric railway mileage of 105 l. Hydro-electric generation by private utilities (1949) was [illegible] kwh. There were 158 airports in 1950, of which 46 were municipal; 30 were lighted. There were also 9 seaplane bases.

The state maintains (1950) 7,320 miles of primary and secondary highways, of which 6,824 miles are surfaced; counties and other agencies maintain 50,345 miles of highway. As of 30 June, 1950, there were 530,771 passenger cars, 66,027 pick-up trucks, 2,737 buses, 45,856 private and commercial trucks, 25,805 farm trucks and 5,502 motor cycles.

PENNSYLVANIA.

Government.—Pennsylvania, first settled in 1682, is one of the 13 original states in the Union. The General Assembly consists of a Senate of 50 members chosen for 4 years, one-half being elected biennially, and a House of Representatives of 208 members chosen for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. Every citizen 21 years of age, with the usual residential qualifications, may vote. The state sends to Congress 2 senators and 34 representatives.

The state is organized in counties (numbering 67), cities, boroughs, townships, school districts and poor law districts; the state capital is Harrisburg.

Governor.—John S. Fine (R.), 1951–54 ($25,000).

Secretary of State.—Dr. Gene D. Smith (R.).

Area, Population, Education.—Area, 45,333 square miles, of which 294 square miles are inland water.

Census population, 1 April, 1950, 10,498,012, an increase of 597,832 or 6·0% since 1940. Birth rate, 1948, was 21·7 per 1,000 population (national average, 24·2); death rate, 10·4 (9·9). Births, 1949, 224,510; deaths, 107,936; marriages, 83,968; divorces, 13,167. Population at 4 census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	7,467,713	193,919	1,503	1,976	7,665,111	171·0
1920	8,432,726	284,568	337	2,386	8,720,017	194·5
1930	9,196,007	431,257	523	3,563	9,631,350	213·8
1940	9,426,989	470,172	441	2,578	9,900,180	219 8
Male . .	4,718,483	230,477	258	1,989	4,951,207	—
Female .	4,708,506	239,695	183	589	4,948,973	—

In 1940, the foreign-born white population numbered 973,260 (9·8% of the total), of whom 197,281 (20·2%) were Italian, 117,319 Polish, 95,803 Russian, 80,111 German, 65,826 Irish, 59,394 Czechoslovakian and 55,346 English. Of the total population in 1940, 66·5% were urban, 4·7% Negro, and 32·6% (2,418,270 males and 811,897 females) gainfully employed; the number of occupied dwelling units was 2,516,423 (of 3·9 persons); 23,994 men and 32,064 women were divorced Registered aliens, Dec. 1940, 370,020.

The population of the larger cities and townships, 1950 census, was :—

Cities	Population	Cities	Population	Cities	Population
Philadelphia .	2,057,210	Upper Darby [1].	85,078	York . .	59,298
Pittsburgh .	673,756	Altoona . .	76,844	McKeesport .	51,185
Erie . .	130,125	Wilkes-Barre .	76,626	New Castle .	48,850
Scranton . .	125,080	Bethlehem .	65,968	Lower Merion [1]	47,678
Reading . .	108,929	Chester . .	65,821	Williamsport .	44,964
Allentown. .	106,295	Lancaster .	63,601	Haverford .	39,425
Harrisburg (cap.)	89,091	Johnstown .	62,723	Norristown .	38,228

[1] Townships.

School attendance is compulsory for children 8 to 17 years of age. In 1948–49, the public elementary and high schools had 60,643 teachers and 1,537,261 enrolled pupils. Teachers' salaries, 1948–49, averaged $2,675. Expenditure on public schools (1948–49) was $267,535,373, excluding debt service and capital outlay.

The largest academic institutions (1948–49), with full-time teachers and students, are as follows :—

Founded	Institutions	Professors	Students
1740	University of Pennsylvania, Philadelphia (non-sect.) .	1,050	7,925
1787	University of Pittsburgh (non-sect.)	1,096	12,584
1832	Lafayette College, Easton	131	2,060
1833	Haverford College (Quaker)	70	526
1842	Villanova College (R.C.)	125	2,572
1846	Bucknell University (Baptist)	133	2,378
1851	St. Joseph's College, Philadelphia . . .	52	1,567
1855	Pennsylvania State College, State College, Pa. . .	959	8,889
1864	Swarthmore College, Swarthmore (Quaker) . .	107	1,034
1866	Lehigh University, Bethlehem (non-sect.) . . .	244	3,112
1878	Duquesne University, Pittsburgh (R.C.) . . .	149	3,482
1884	Temple University, Philadelphia (non-sect.) . .	533	9,576
1885	Bryn Mawr College for Women	105	724
1888	University of Scranton	85	1,718
1891	Drexel Institute, Philadelphia	180	3,415
1900	Carnegie Institute of Technology, Pittsburgh . .	273	3,485

Religion and Welfare.—The chief religious bodies in the state are the Roman Catholic with 2,275,062 members in 1936, United Lutheran (541,207) and Jewish Congregations (423,943). Total, all denominations, 5,412,246 members.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test.

Old Age Assistance is granted; in June, 1950, 92,286 persons (about 11% of those aged 65 or over) were receiving an average of $37·49 per month; 53,256 families with 136,646 dependent children were receiving an average of $84·75 monthly per family; 15,429 blind persons received an average of $39·88. In 1950, the state had 344 hospitals (101,251 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 34,424 patients or 376·5 per 100,000 population (national average, 363·2); on 1 Jan., 1950, patients numbered 36,867 or 346·7 per 100,000 population.

In 1949, 10,039 persons were convicted of major offences, including 84 convicted of murder; 9 were sentenced to death (by electrocution). Of the state's 68 local jails (county and city), the U.S. Bureau of Prisons as of 30 June, 1949, rated 35 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 31 May, 1950, general revenues for the operating fund were $573,208,849 (taxes $265,654,576), and general expenditures were $653,373,090 (difference being due to f[illegible] of $80,652,654), of which $228,594,858 were for public welfare, $151,312,739 for education and $152,924,467 for highways. Pennsylvania leads in the revenue from its monopoly of alcoholic beverages; in 1949 50 it received a net income of $41,000,000.

On 31 May, 1950, net long-term debt amounted to $514,011,110.

Production and Industry.—Agriculture, market-gardening, fruit-growing, horticulture and forestry are pursued within the state. In 1945, there were 171,761 farms with a farm area of 15,019,675 acres (6,604,000 acres in crops); total value of farm land and buildings was $1,008,573,540. Tenant-farmers operated 12·9% of all farms and 13·3% of the total farm area; 47,176 farms were 30 acres or less and 146 farms each exceeded 1,000 acres. There is some subsistence farming; in 1945, 39,157 farms (23% of the 168,222 farms reporting) had gross output, for sale and farm consumption, valued at less than $400. In 1950, there were 27 soil conservation districts embracing 11,973,400 acres, of which 6 834,245 acres were farm lands (80,298 farms). Cash income from crops (1949), $198,770,000 and from livestock, $563,644,000.

Pennsylvania leads, usually, in the production of buckwheat (1,886,000 bushels in 1949), cigar leaf tobacco (58,709,000 lb.) and mushrooms. In 1949, production of winter wheat was 21,114,000 bushels; oats, 24,630,000 bushels; maize, 64,077,000 bushels; potatoes, 19,158,000 bushels. Rye, hay, apples and grapes are also grown. On 1 Jan., 1950, there were on farms:—110,000 horses, 11,000 mules, 1,020,000 milch cows, 1,790,000 all cattle, 217,000 sheep, 704,000 swine. Wool clip, 1950, was 1,520,000 lb. from 200,000 sheep. National forest lands (1950) totalled 469,889 acres; state forests (excluding state parks), 1,765,809 acres.

Pennsylvania is almost the sole producer of anthracite coal; its output reached a peak of 100,445,299 short tons in 1917 with a labour-force of 156,148 men producing 2·26 tons per man-day and an average 644 tons per man per year. Production in 1949 was 44,710,118 tons with a labour-

force of 79,209 men with daily output of 2·73 tons per man and 565 tons per year.

The value of Pennsylvania's mineral products, due principally to the production of coal, was, in 1948, $1,407,347,000, anthracite and bituminous coal representing about 80%; bituminous (1948), 132,550,000 tons; petroleum, 12,667,000 barrels; natural gasoline or petrol (1948), 12,300,000 gallons; natural gas (1947), 91,971 million cubic feet. Output of lime (1948), 1,085,807 short tons; cement (1948), 38,310,000 barrels; coke (1948), 22,383,524 short tons; gold (1948), 2,200 fine oz.; silver, 13,730 fine oz.

Pennsylvania leads in the production of iron and steel. In 1949, 57 blast furnaces produced 15,037,221 short tons of pig-iron (28% of the country's total); output of ingot steel and steel for castings, 21,840,561 tons (28%).

The 1947 federal census showed 16,789 manufacturing establishments employing 1,219,426 production workers (wages, $3,053,879,000); value added by manufactures was $6,946,958,000 compared with $2,476,862,000 in 1939.

In 1949, steam railways had 11,281 miles of track, and electric railways, 1,634 miles. There are (1950) 374 airports (including 11 seaplane bases), of which 38 are municipal; 18 are lighted. The state highway system covers 40,943 miles; counties and other bodies maintain 59,025 miles. As in all states, heavy truck traffic has damaged the highways constructed in the 1920s; Pennsylvania leads all states in annual expenditures (exceeding $100 million) on road construction, reconstruction and re-surfacing, apart from maintenance.

RHODE ISLAND.

Constitution and Government.—The earliest settlers in the region which now forms the state of Rhode Island were colonists from Massachusetts who had been driven forth on account of their non-acceptance of the prevailing religious beliefs. The first of the settlements was made in 1636, settlers of every creed being welcomed. In 1647 a patent was granted for the government of the settlements, and on 8 July, 1663, a charter was executed recognizing the settlers as forming a body corporate and politic by the name of 'The Governor and Company of the English Colony of Rhode Island and Providence Plantations, in New England, in America.' On 29 May, 1790, the state accepted

the federal constitution and entered the Union as the last of the 13 original states. The General Assembly consists of a Senate of 44 members and a House of Representatives of 100 members, both elected for 2 years, as are also the Governor and Lieutenant-Governor. Every citizen, 21 years of age, who has resided in the state for 2 years, and is duly registered, is qualified to vote. The state has 5 counties (without political functions) and 39 cities and towns. The capital is Providence.

Rhode Island sends to Congress 2 senators and 2 representatives.

Governor.—Dennis J. Roberts (D.), 1951–53 ($15,000).
Secretary of State.—Armand H. Coté (D.).

Area, Population, Education.—Area, 1,214 square miles, of which 156 square miles are inland water. Census population, 1 April, 1950, 791,896, an increase of 78,550 or 11·% since 1940. Birth rate, 1948, was 22·6 per 1,000 population (national average, 24·2); death rate, 11·0 (9·9). Births, 1948, were 16,861; deaths, 8,188; marriages, 8,716; divorces, 817.

Population of 4 census years (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	532,492	9,529	284	305	542,610	508·5
1920	593,980	10,036	110	271	604,397	655·4
1930	677,026	9,913	318	240	687,497	649 8
1940	701,805	11,024	196	321	713,346	674·2
Male . .	343,644	5,384	99	277	349,404	—

The foreign-born whites in 1940 numbered 137,784 19·3% of the total), of whom 28,851 (21 0%) were Italian, 23,168 (16·6%) French Canadian, 18,858 English and 12,082 Irish. The urban population was 91·6%; the Negro population, 1·5%; 37·1% (179,082 males and 85,641 females) were gainfully employed; occupied dwelling units numbered 187,706 (of 3·80 persons); 2,620 men and 4,252 women were reported divorced. Aliens registered in Dec., 1940, numbered 52,570.

The chief cities and towns are Providence, which (census 1950, preliminary) had a population of 247,700; Pawtucket, 81,180; Cranston, 55,130; Woonsocket, 50,186; Warwick, 43,027; E. Providence, 35,791; Newport, 32,090; Central Falls, 23,610; West Warwick, 19,042.

The federal census of 1950 showed 169,083 persons between the ages of 4 and 20; 128,564 or 75·7% were attending schools (preliminary). In 1949–50, the 303 public elementary school buildings had 2,024 teachers and 57,043 enrolled pupils; 37,992 pupils were enrolled in private and parochial schools. The high school buildings (30 senior and 34 junior) had 1,756 teachers and 33,529 pupils. Teachers' salaries, 1948–49, ranged from $1,795 to $5,000 with an average of $3,352. Local expenditures for schools for 1949–50 totalled $19,292,010; state and federal expenditures, $3,159,306. The state maintains a College of Education with 29 professors and teachers and 474 students (1949–50), and a State College with 234 professors and 2,249 students. Brown University at Providence, founded in 1764, is now non-sectarian; in 1950–51 it had 475 professors and instructors and 3,779 full-time students. Providence College, at Providence, founded in 1919 by the Order of Preachers (Dominican), has 106 professors and 2,256 students (1950–51).

Religion and Welfare.—Chief religious bodies are the Roman Catholic with 347,961 members in 1940 (48% of the population), Methodists (68,825), Protestant Episcopal (30,000), Jewish congregations (28,214), and Congregational. Total, all denominations, 475,000.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test.

The state's penal, reformatory and mental homes system, on 30 June, 1950, had 4,692 inmates. In 1945, 457 persons (65·4 per 100,000 of the population) were convicted of major offences, including 1 convicted of murder; none was sentenced to death. Of the state's 5 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 4 as substandard, unsuitable for the housing of Federal prisoners.

In conformity with the Federal Social Security Act, the state administers a system of Old Age Assistance and one of aid to blind persons and to families with dependent children. In June, 1950, 10,368 elderly persons were drawing an average of $46·36 per month; 3,817 families (with 9,090 dependent children) were drawing an average of $87·44 per month and 177 blind individuals were drawing an average of $53 10 per month. In 1949, the state had 24 hospitals (9,493 beds) registered with the American Medical Association. In Dec., 1948, hospitals for mental diseases had 3,321 patients or 494 per 100,000 population (national average, 1945, was 363·2).

Finance.—For the fiscal year ending 30 June, 1950, receipts and payments (in dollars) were as follows :—

Cash balance, 30 June, 1949 .	13,124,933	Disbursements, 1949–50 .	51,018,990
Receipts, 1949–50 . . .	49,945,841	Cash on hand, 30 June, 1950	12,051,784
Total . . .	63,070,774	Total . . .	63,070,774

Net bonded debt on 30 June, 1950, was $40,932,474.

Production and Industry.—Rhode Island is a manufacturing state, but agriculture contributes to the state income. Though there is little farming, it ranks fourth in the value of commodities per farm unit. Cash income, 1949, $6,225,000; from livestock, $16,087,000. In 1945 (census) it had 3,603 farms with an area of 264,734 acres, of which 48,753 acres were crop land; value of farm land and buildings was $35,609,000. Under an Act passed in 1943, 3 soil conservation districts have been established, covering 677,120 acres, including 264,734 acres in farms (100% of the total). The small mineral output, mostly stone, sand and gravel, was valued (1948) at $1,450,000.

At the United States census in 1947, 2,214 manufacturing establishments had 128,130 wage-earners, who earned $297,599,000; the value added by manufactures was $658,420,000 compared with $237,698,000 in 1939. In the year ending 28 Oct., 1950, 697,000 cotton spindles were in place, of which 607,000 were active. Cotton consumed in 1950 amounted to 6,692 bales.

In 1950, the railroads operated 184·79 miles; there were 214·5 miles of bus routes and 84·2 miles of trackless trolley routes. Telephones in service, 30 June, 1950, 235,164. There were 13 airports in 1950; the state owns and operates 4 airports; the state airport at Hillsgrove, near Providence, is served by 5 airlines making 41 scheduled flights a day. The state has 1,300 miles of roads, of which 839 miles are improved.

SOUTH CAROLINA.

Constitution and Government.—South Carolina, first settled permanently in 1670, was one of the 13 original states of the Union. The General Assembly consists of a Senate of 46 members, elected for 4 years (half retiring biennially), and a House of Representatives of 124 members, elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. Only registered citizens have the right to vote. The U.S. Circuit Court of Appeals, in a test case in Dec., 1947, ruled that Negroes are entitled to vote in the primary elections in South Carolina. On 16 July, 1948, the U.S. Supreme Court ordered the Democratic Party of the state to register Negroes for participation in the party primaries. The state repealed in Nov., 1950, its 85-year-old law disfranchising those who have not paid their poll tax. In 22 of the 46 counties Negroes constitute 50% or more of the population. The capital is Columbia. South Carolina sends to Congress 2 senators and 6 representatives.

Governor.—James F. Byrnes (D.), 1951-55 ($12.000).
Secretary of State.—O. Frank Thornton (D.).

Area, Population, Education.—Area, 31,055 square miles, of which 461 square miles are inland water. Census population, 1 April, 1950, 2,117,027, an increase of 11·4% since 1940. Births, 1948, were 57,759; deaths, 17,957; marriages, 46,748; divorces, nil. Birth rate, 1948, was 29·1 per 1,000 population (national average, 24·2); death rate, 9·1 (9·9). The population in 4 census years (with distribution by sex in 1940) was:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	679,161	835,843	331	65	1,515,400	49·7
1920	818,538	864,719	304	163	1,683,724	55·2
1930	944,049	793,681	959	76	1,738,765	56·8
1940	1,084,308	814,164	1,234	98	1,899,804	62 1
Male . .	510,597	393,958	616	68	935,239	—
Female .	543,711	420,206	618	30	964,565	—

The foreign-born white population in 1940 numbered 4,915 (0·2% of the total), of whom 713 were Greek, 570 German, 536 Russian and 447 English. Of the total population, 24·5% were urban, 42·8% Negro, and 34·7% (466,773 males and 194,300 females) were gainfully employed; the number of occupied dwelling units was 434,968 (of 4·37 persons). Aliens registered in Dec., 1940, numbered 2,188. There is no venereal disease test for marriage. Divorce is now allowed; the 1940 census showed 1,848 men and 3,295 women residing in the state who had been divorced.

Large towns are:—Columbia (capital), with a population of 85,949 in 1950; Charleston, 68,243; Greenville, 57,932; Spartanburg, 36,674.

In 1949, of persons between the ages of 5 and 24, 458,810 were attending school. School attendance is compulsory since 1922. There are separate schools for white and Negro children. In 1948–49, the public elementary and high schools had 458,810 enrolled pupils (215,599 Negro) and 16,127 teachers (6,644 Negro). Teachers' salaries, 1948–49, ranged from $348 to $2,286, average, $1,769. Expenditure on public school education in 1948–49 was [illegible]. For higher education the state has the University of South Carolina, founded at Columbia in 1801, with, in 1948–49, 270 professors and 4,790 students; Clemson Agricultural College, founded in 1893, with 225 professors and 3,360 students as well as a number of smaller colleges.

Religion and Welfare.—The chief religious bodies are the Negro Baptists, with 238,217 members in 1936, Southern Baptists, 159,887, and Southern Methodists, 91,519. Total, all denominations, 710,163.

Old Age Assistance was being granted in June, 1950, to 42,111 persons (out of 94,000 persons 65 years or older), who received an average of $24·86 per month. In 1950, the state had 81 hospitals (9,783 beds) registered with the American Medical Association.

South Carolina statutes require separate schools for white and coloured children (except in specialized schools for the deaf, dumb and blind); separate reform schools and penal institutions; separate hospitals; separate railway facilities, including dining cars and restaurants but excluding freight cars; separate accommodation in steamboats, buses and street cars; also in circuses and tent shows, in parks, playgrounds and on beaches. Children may be adopted only by persons of the same race. Inter-racial marriage is prohibited.

In 1935, the state passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 8 men and 80 women had been thus sterilized.

Of the state's 49 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 43 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1949, general revenues were $128,643,000 (taxes, $100,226,000 and federal aid, $21,951,000), while general expenditures were $146,438,000. Chief single source of revenue, income tax, furnished $29,934,000. State employees, April, 1949, numbered 14,000. Budget for the year ending 30 June, 1950, was $147,504,064.

On 30 June, 1949, the net long-term debt was $87,227,000.

Production and Industry.—South Carolina is an agricultural state containing in 1945, 147,745 farms (44% of which were Negro farms), covering a farm area of 11,021,623 acres; total value of farm land and buildings was $440,623,183. Tenant-farmers operated 54·2% of the farms and 32·3% of the farm area. Although the average acreage has increased from 64·5 acres in 1920 to 74·6 acres in 1945, there were 90,186 farms (61% of the total) which were under 30 acres. In 1945, 21,866 farms (15% of the 145,262 farms reporting) had a gross production, for sale and farm consumption, valued at less than $400. About 58% of the area of the state is woodland. Cash income, 1949, from crops was $205,982,000 and from livestock, $72,061,000.

The chief crops are maize, 31,590,000 bushels in 1949; oats, peanuts, 14,300,000 lb.; peaches, sweet potatoes, cotton (1,270,000 acres, yielding 560,000 bales of upland cotton) and tobacco, 147,630,000 lb. On 1 Jan., 1950, the farm animals in the state were 21,000 horses, 151,000 mules,

172,000 milch cows, 367,000 all cattle, 3,000 sheep and 663,000 swine. National forest lands, 1949, amount to 1,422,934 acres.

In 1950, there were 33 soil conservation districts embracing 19,580,160 acres, of which 11,021,623 acres were farm land (147,745 farms). About 15·7% of the total area has suffered severe erosion.

The state has few mineral resources; value of mineral output in 1948 was $12,105,000.

In 1947 federal census, 2,138 manufacturing establishments had 175,724 production workers, earning $330,465,000; value added by manufacture was $794,313,000 compared with $169,000,000 in 1939.

Of the state's installed electric power capacity (1,015,000 kw.), about 66% is hydro-electric. Electric power generated (1947) is about 3,493 million kwh.

In 1949, the length of steam railway in the state was 3,387 miles. There were, 1950, 85 airports, of which 35 were municipal; 15 were lighted; 5 are served by scheduled airlines. The state maintains 19,323 miles of highways, of which 10,398 miles are surfaced.

The state has 3 deep-water ports.

SOUTH DAKOTA.

Government.—South Dakota was first visited in 1743 when Verendrye planted a lead plate (discovered in 1913) on the site of Ft. Pierre, claiming the region for the French crown. Beginning as a trading post in 1794, it was settled in 1817 and organized as a state from part of Dakota Territory and admitted into the Union on 2 Nov., 1889. It ceded a small part of its territory to Nebraska in 1882.

Voters are all citizens 21 years of age or older who have complied with certain residential qualifications. The people reserve the right of the initiative and referendum. The Senate has 35 members, and the House of Representatives 75 members, all elected for 2 years, as are also the Governor and Lieutenant-Governor. The state is divided into 64 organized counties and 4 unorganized. The capital is Pierre (population, 1950, 5,690). The state sends 2 senators and 2 representatives to the Federal Congress.

Governor.—Sigurd Anderson (R.), 1951-53 ($8,500).

Secretary of State.—Geraldine Ostroot (R.).

Area, Population, Education.—Area, 77,047 square miles, of which 511 square miles are water. Area administered by the Office of Indian Affairs, 1946, covered 9,311 square miles (one-eighth of the state), of which 1,940 square miles are held by tribes. The federal government owns 8,820,845 acres or 18% of the total. Census population, 1 April, 1950, 652,740, an increase of 9,779 or 1·5% since 1940. Birth rate, 1948, was 26·8 per 1,000 population (national average, 24·2); death rate, 9·5 (9·9). Births,

1948, were 16,405; deaths, 5,806; marriages, 7,330; divorces, 1,030. Population in 4 federal censuses (with distribution by sex in 1940) was :—

Year	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	563,771	817	19,137	163	583,888	7·6
1920	619,147	832	16,384	184	636,547	8·3
1930	670,269	646	21,833	101	692,849	9·1
1940	619,075	474	23,347	65	642,961	8·4
Male . .	320,188	263	12,019	44	332,514	—
Female .	298,887	211	11,328	21	310,447	—

Foreign-born whites in 1945 numbered 32,602 (5·3% of the total), of whom 6,558 (20·1%) were Norwegians, 5,971 Germans, 4,872 Russians and 3,317 Swedes. The urban population (living in communities of 1,000 or over) formed 34·5% of the whole in 1945 (24·6% in 1940). In 1940 the Negro population formed 0·1% of the whole; 31·4% (164,497 males and 37,017 females) were gainfully employed; occupied dwelling units numbered 165,428 (of 3·89 persons); 2,539 men and 2,710 women were reported divorced. Aliens registered in Dec., 1940, were 7,400.

Population of the chief cities (census of 1950, preliminary) was :—Sioux Falls, 52,161; Aberdeen, 20,976; Rapid City, 25,179; Huron, 12,713; Watertown, 12,602.

In 1940, of persons between the ages of 5 and 24, 146,086 (60·8%) were attending school. The 1945 census showed only 1,643 illiterates (over the age of 9). Elementary and secondary education are free to all from 6 to 21 years of age. Between the ages of 8 and 16, attendance at a public day school is compulsory on all not otherwise taught. In 1950, 81·7% of those between the ages of 6 and 21 years were attending school; they numbered 127,918 of whom 117,675 were in public schools and 10,243 in parochial schools. In 1948–49, the public elementary and secondary schools had 114,879 pupils and 6,563 teachers. Teachers' salaries, 1948–49, ranged between $900 and $4,200; the average was $2,136 (national average, $2,846). State educational institutions in 1949–50 included 4 normal schools, with an enrolment of 1,382 students; a school of mines, established 1885, with 473 students; the State Agricultural College, with 1,732 students; the State University, founded at Vermillion in 1882, 1,622 students. Five denominational colleges had 1,868 students. The Government maintains Indian schools on its reservations and 2 outside at Flandreau and Pierre. The state leads in the percentage of its budget (6·4%) devoted to education. State expenditure on public schools (1949–50), $25,984,238.

Religion and Welfare.—The chief religious bodies are :—Lutherans (with 147,448 members in 1945), Roman Catholics (91,833), Methodist (65,557), Congregational (26,150), Presbyterian (26,579), Baptist (17,001), and Protestant Episcopal. Total, all denominations, 449,715.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test. Inter-racial marriage is prohibited.

In 1917, South Dakota passed a law permitting, under safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 276 males and 472 females had been thus sterilized.

In June, 1950, 12,169 persons received as Old Age Assistance an average of $39·16 per month; 225 blind persons received $35·35 per month and 2,360 families with 5,729 dependent children, $63·35. In 1949, the state had

54 hospitals (6,927 beds) registered with the American Medical Association. In Dec., 1949, hospitals for mental diseases had 1,888 patients or 293·6 per 100,000 population.

Of the state's 55 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 46 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the fiscal year ending 30 June, 1950, general revenues were $52,362,111, and government grants, $14,331,330. Chief sources of revenue were taxes on motor fuels, yielding $10,409,732, and sales tax, $9,613,922.

Net long-term debt on 1 July, 1950, was $21,730,993 arising from its loans to farmers in 1917 and from the Veterans' Bonus, 1949.

Production and Industry.—In 1945, 68,705 farms had an acreage of 43,031,964 (1940, 39,473,584); total value of farm land and buildings, $764,299,619 (in 1950, $823,891,594). Farm units are large; in 1945 there were only 3,448 farms of 50 acres or less, compared with 8,298 exceeding 1,000 acres; the average has grown from 464·1 acres in 1920 to 626·3 in 1945. Nevertheless there is some rural poverty; in 1945, 2,594 farms had a gross production, for sale and farm consumption, valued at less than $400.

Cash income, 1949, from crops, $199,998,000, and from livestock, $327,391,000. The leading crops are spring wheat (28,096,000 bushels in 1949), maize (82,824,000 bushels), oats (67,988,000 bushels) and barley (14,958,000 bushels). Rye, durum wheat, flax seed and potatoes are also grown. National forest area, 1948, 1,403,157 acres. The farm livestock on 1 Jan., 1950, consisted of 170,000 horses, 1,000 mules, 379,000 milch cows, 2,479,000 all cattle, 874,000 sheep, 1,442,000 swine. The wool clip in 1949 amounted to 6,076,000 lb. of wool from 733,000 sheep.

In 1950, there were 49 soil conservation districts embracing 24,757,756 acres, of which 24,637,110 acres were farm land (46,923 farms and ranches). Of the total area, 8·2% has suffered severe erosion.

The mineral products include gold (464,650 fine oz. in 1949), silver (109,383 oz.), lignite (14,618 tons in 1947), lithium minerals, feldspar and tin. Mineral products, 1948, were valued at $24,296,000.

Chief manufacturing industries are meat-packing and butter-making. In 1947, 494 industrial establishments employed 8,062 production workers, who earned $19,193,000; value added by manufacture was $51,398,000.

In 1950, the steam railways were 4,665 miles in length, serving 492 towns. The state maintains 94,008 miles of highways, of which 3,558 are surfaced. Airports, 1948, numbered 62, of which 34 were municipal; 10 were lighted.

TENNESSEE.

Constitution and Government.—Tennessee, first settled in 1757, was admitted into the Union on 1 June, 1796. The state has operated under three constitutions the last of which was adopted in 1870. Voters at an

election may authorize the calling of a convention limited to altering or abolishing one or more specified sections of the constitution. The General Assembly consists of a Senate of 33 members and a House of Representatives of 99 members, both elected for 2 years. No clergyman of any denomination is eligible to either House. Qualified as electors are all citizens (with the usual residential qualifications). Payment of a poll-tax is a requisite for all voters between the ages of 21 and 50 years, except that the legislature in 1949 voted to exempt women, blind persons and veterans of World Wars I and II. Potential voters (1948) numbered 1,840,000; voters in the presidential election of 1948 were 550,280 or 30%. Tennessee sends to Congress 2 senators and 10 representatives. The state is divided into 95 counties; the capital is Nashville.

For the Tennessee Valley Authority see p. 593.

Governor.—Gordon Browning (D.), 1951-53 ($12,000).
Secretary of State.—James H. Cummings (D.).

Area and Population.—Area, 42,246 square miles (285 square miles water). Census population, 1 April, 1950, 3,291,718, an increase of 375,877 or 12·9% since 1940. Birth rate, 1949, was 25 3 per 1,000 population; death rate, 8·9. Births, 1949, were 82,307; deaths, 29,012.

In 4 census years the population (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,711,432	473,088	216	53	2,184,789	52 4
1920	1,885,993	451,758	56	78	2,337,885	56·1
1930	2,138,644	477,646	161	105	2,616,556	62·4
1940	2,406,906	508,736	114	85	2,915,841	69·5
Male . .	1,199,580	246,129	57	63	1,445,829	—
Female .	1,207,326	262,607	57	22	1,470,012	—

The foreign-born whites numbered in 1940, 11,320 (being 0 3% of the total), of whom 1,734 (18·1%) were Italian, 1,499 Russian, 1,477 German and 966 English. Of the total population in 1940, 35·2% were urban, 17·4% Negro, and 32·3% (728,203 males and 213,511 females) gainfully employed; the number of occupied dwelling units was 714,894 (of 4·08 persons); 10,904 men and 17,574 women were reported divorced. Aliens registered in Dec., 1940, were 5,137.

The cities, with census population in 1950 (preliminary), are :—Memphis, 394,012; Nashville (capital), 173,359; Chattanooga, 130,333, and Knoxville, 124.183.

Statutes require segregation of white and coloured people in schools, colleges, transportation and recreational facilities; inter-marriage of white and Negro is forbidden.

Religion and Welfare.—The leading religious bodies are the Southern Baptists, with [illegible] 573,000 members in 1949, Southern Methodists (339,210), Negro Baptists (about 250,000). Just over 50% of the total population adheres to some religious faith. The state licenses the sale of alcoholic liquors for beverage purposes, under certain restrictions.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test. Tennessee is one of the states whose birth certificates do not disclose illegitimacy. It is one of 5 states

which have 'divorce proctors' to investigate undefended divorce suits for evidence of collusion.

Old Age Assistance was granted in June, 1950, to 65,646 persons, who received an average of $31·17 per month.

In 1949, the state had 136 hospitals (23,243 beds) registered with the American Medical Association. Hospitals for mental diseases in Dec., 1945, had 6,968 patients or 246·0 per 100,000 population (national average, 363·2).

Of the state's 98 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 84 as sub-standard, unsuitable for the housing of Federal prisoners.

Education.—In 1940, persons over 20 years of age having no years of schooling numbered 65,765 (3·73% of that age group), of whom 41,572 were native white and 24,193 were non-whites. Of persons between the ages of 5 and 24, 602,378 (or 52·8%) were attending school. School attendance is now compulsory, and the employment of children under 16 years of age in workshops, factories or mines is illegal.

The legislature in 1925 passed an Act prohibiting 'the teaching of the evolution theory in all the universities, normal schools and all other public schools of Tennessee which are supported in whole or in part by the public funds of the state.' Another Act says that white children may be taught only by white persons born in the United States whose parents could speak English and who themselves have spoken English since childhood. In 1949–50, the 4,632 public elementary and high schools had 659,785 enrolled pupils with 22,202 teachers; 7 state-supported colleges had 1,932 teachers and 34,681 pupils, including 3,824 Negroes. Teachers' salaries, 1949–50, ranged between $1,179 and $2,826; minimum guaranteed to any teacher with A.B. degree, $2,000. Total expenditure for public elementary and high schools in 1949–50, $72,763,207. The more important universities and colleges (1949–50) are :—

Founded	Institutions	Professors	Students
1794	University of Tennessee at Knoxville (State) . .	1,222	15,739
1819	[illegible] at Maryville (Presb.)	60	1,131
1842	[illegible] at Lebanon (Baptist) . .	34	361

1867	University [illegible] (M.E.)	111	2,711
1868	University of the South, Sewanee (P.E.) . . .	49	605
1875	Vanderbilt University at Nashville (non-sectarian). .	600	3,728
1875	George Peabody College for Teachers at Nashville .	122	5,159
1876	Meharry Medical College	150	477
1915	Tennessee Polytechnic Institute, Cookeville . . .	100	2,363

Finance.—For the fiscal year ending 30 June, 1950, the total income of the state government was $236,341,568 (taxes furnished $150,314,624), while disbursements were $227,871,216 (direct state operations taking $187,051,313, state aid to local units, $19,905,763, and debt payments and interest, $8,937,689). Chief single source of revenue, the 2% retail sales tax, yielded $42,523,379.

Total direct and assumed debt on 30 June, 1950, amounted to $96,690,000; sinking fund, $11,394,794.

Production and Industry.—In 1945, 234,431 farms covered 17,788,997 acres; value of farm land and buildings, $870,947,702. Farm units are small; the average farm acreage in 1945 was 75·9 acres (only 7 states have a smaller average); about half the farms were under 50 acres while

79,896 farms (34%) had less than 30 acres. In 1945, 46,189 farms (20% of the 230,381 farms reporting) had a gross production, for sale and farm consumption, valued at less than $400. In 1950, 31 soil conservation districts covered 8,707,840 acres, of which 6,878,206 acres were farm lands (93,187 farms).

Maize, cotton, tobacco and hay account for 90% of total valuation. Cash income, 1949, from crops was $216,894,000; from livestock, $215,067,000; and from government payments, $5,160,000. Output of maize, 1949, 68,900,000 bushels. Other crops are winter wheat, oats, Irish potatoes, sweet potatoes, sorgo syrup and peanuts. The cotton crop for 1949 yielded 650,000 bales; in value ($106,560,000) it was the state's most valuable crop. The tobacco crop, all types (1949), was 148,512,000 lb. On 1 Jan., 1950, the domestic animals consisted of 120,000 horses, 205,000 mules, 640,000 milch cows, 1,462,000 all cattle, 265,000 sheep and 1,371,000 swine. Wool clip in 1950, 1,269,000 lb. from 244,000 sheep. National forest area (1949) 1,531,797 acres.

Coalfields cover about 5,000 square miles; output in 1949 was 4,598,995 short tons. Tennessee is the only source of sinter iron and the leading source of pyrites. Other mineral products for 1949 were copper (6,399 short tons), zinc (48,435 short tons), lead, gold, silver (42,751 fine oz.), manganese ore, phosphate rock (1,432,076 long tons), dimension marble, cement (4,473,133 barrels of 376 lb.), sand and gravel, limestone (2,307,178 short tons). Total value of mineral products in 1948, exclusive of pig-iron, was $95,863,000.

The manufacturing industries include iron and steel working, but the most important products are knit goods and rayon and allied products. Census of manufactures, 1947, showed 3,346 manufacturing establishments, employing 192,367 production workers, who received wages of $369,920,000; value added to manufacture was $957,539,000 compared with $318,378,000 in 1939. The average number employed in industries, 1949, was 232,000.

The state contains (1949) 3,540 miles of steam railway and maintains 7,812 miles of surfaced highways. The state is served by 184 intrastate bus companies and 7 major airlines. Airports, 1950, numbered 61, of which 26 were municipal; 20 were lighted.

TEXAS.

Constitution and Government.—In 1836, Texas declared its independence of Mexico, and after maintaining an independent existence, as the Republic of Texas, for 10 years, it was on 29 Dec., 1845, received as a state into the American Union. The state's first settlement dates from 1686. The Legislature consists of a Senate of 31 members elected for 4 years (half their number retiring every 2 years), and a House of Representatives of 150 members elected for 2 years. The Governor and Lieutenant-Governor are elected for 2 years. Qualified electors are all citizens with the usual residential qualifications, but persons subject to

the poll-tax must have paid their tax prior to 1 February of the year in which they desire to vote. Voters in the presidential election of 1948 numbered 1,164,138, about 27% of citizens 21 years of age or over. The state has 254 counties; the capital is Austin. Texas sends to Congress 2 senators and 21 representatives.

Governor.—Allan Shivers (D.), 1951–53 ($12,000).
Secretary of State.—John Ben Shepperd (D.).

Area and Population.—Area, 267,339 square miles (including 3,695 square miles of inland water). Census population, 1 April, 1950, 7,711,194, an increase of 1,296,370 or 20·2% since 1940. Birth rate, 1948, was 26·8 per 1,000 population (national average, 24·2); death rate was 8·7 (9·9). Births in 1949 were 202,094; deaths, 63,262.

Population for 4 census years (with distribution by sex for 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	3,204,848	690,049	702	943	3,896,542	14·8
1920	3,918,165	741,694	2,109	1,260	4,663,228	17 8
1930	4,967,172	854,964	1,001	1,578	5,824,715	22 1
1940	5,487,545	924,391	1,103	1,785	6,414,824	24·3
Male . .	2,768,259	450,990	608	1,246	3,221,103	—
Female .	2,719,286	473,401	495	539	3,193,721	—

Of the total number (1940), 234,388, or 4·3%, were foreign-born whites, 159,266 (67·9%) being Mexican, 17,970 (7·7%) German, 9,171 (3·9%) Czechoslovakian, 5,451 Italians and 5,046 English. Japanese numbered 458, of whom 291 were citizens. Of the total, 45·4% were urban, 14·4% Negro, and 33·3% (1,675,495 males and 462,860 females) were gainfully employed; occupied dwelling units were 1,678,396 (of 3·82 persons). Aliens registered in Dec., 1940, were 213,898, of whom 183,758 were Mexicans.

The largest cities, with census population in 1950 (preliminary), are :—

Cities	Population	Cities	Population	Cities	Population
Houston . .	594,321	El Paso . .	130,003	Lubbock . .	71,390
Dallas . .	432,927	Corpus Christi .	108,053	Wichita Falls .	67,709
San Antonio .	406,811	Beaumont .	93,715	Galveston .	66,898
Fort Worth .	277,047	Waco . .	84,300	Port Arthur .	57,377
Austin (capital)	131,964	Amarillo . .	73,737	San Angelo .	51,889

Education.—In 1940, persons 25 years of age or older who reported no school years completed numbered 179,426 (5·3% of that age group), of whom 81,514 were native whites and 38,236 Negroes; of persons between the ages of 5 and 24, 1,340,931 (55·3%) were attending school. School attendance is compulsory for children from 7 to 16 years of age. Separate schools are provided for white and coloured children.

In March, 1949, the legislature enacted a law requiring the presidents of the 21 state-supported institutions of higher learning to dismiss any teacher or student found to be a Communist.

In 1948–49 the public elementary schools had 36,006 teachers and 1,097,369 enrolled pupils; the public high schools, 11,096 teachers and 252,428 pupils. Negro schools (included above) had 201,281 pupils and

7,400 teachers whose average salary was $2,175. Teachers' salaries, 1948–49, ranged between $2,007 and $2,880; average was $2,517. The state maintains 21 institutions of higher learning, including 6 teachers' colleges for white students; total enrolment, Oct., 1950, 55,412 students. Amount expended on public schools (not including colleges) for 1948–49 was approximately $241,000,000, of which $106,000,000 came from the state government and the balance from local school districts. Not all school districts have schools—about 1,500 districts have contracted with adjoining districts to take their children. For superior instruction, leading institutions (1949) are :—

Founded	Institutions	Control	Professors	Students
1845	Baylor University, Waco. . . .	Baptist	224	5,102

[1] Formerly College of Mines.

Religion and Welfare.—The largest religious bodies are the Roman Catholics (with 604,308 members in 1936), Negro Baptists (388,044), Southern Baptists (360,421), and Southern Methodists (335,739). Total, all denominations, 2,298,966.

Statutory segregation of Negroes is enforced in educational institutions, including deaf, dumb and blind schools; libraries; railroads (including separate sleeping compartments and bedding), buses and street cars; tuberculosis hospitals. But in 1950, following the decision of the U.S. Supreme Court, Negro students were admitted to the University of Texas. Coal-mines must provide separate washing facilities; children may be adopted only by persons of the same race. Texas is the only state which bans boxing matches between white and coloured fighters. Marriage between members of the 'Caucasian' and 'African' races is forbidden.

Marriage licences are issued only after each applicant has presented a physician's certificate (void after a limited period) showing freedom from venereal disease. A serologic test for syphilis, made by an approved laboratory, is required.

Old Age Assistance was being granted in Dec., 1950, to 224,775 persons, who received an average of $32·80 per month; aid was given to 6,669 blind persons ($37·37 per month) and to 19,448 families with 55,179 dependent children (average per family $43·21).

In 1949, the state had 514 hospitals (52,560 beds) registered with the American Medical Association. In Dec., 1946, hospitals for mental diseases had 15,953 resident patients or 234·3 per 100,000 population (national average, 382·4).

The prison system, Oct., 1950, held 6,503 men and women. Of the state's 251 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 207 as sub-standard, unsuitable for the housing of Federal prisoners.

Texas in 1947 adopted 9 laws governing the activities of trade unions: (1) 'Right to work Act,' makes the 'closed shop' illegal; (2) forbids employers to collect trade union dues on behalf of trade unions; (3) makes trade unions liable for damages due to breaches of contract, strikes or picketing; (4) forbids public employees to form or join trade unions; (5) forbids 'mass picketing'; (6) bans secondary boycotts, secondary strikes and picketing; (7) forbids employees of public utilities to resort to picketing or sabotage; (8) and (9) brings certain acts such as boycotts under the penal and civil (*i.e.*, damages) provisions of the Texas anti-trust law.

Finance.—The receipts and disbursements from all sources in the year ending 31 Aug., 1950, were (in dollars):—

Balance, 1 September, 1949	183,660,748	Disbursements, 1949–50	675,646,709
Receipts, 1949–50	666,589,010	Balance, 31 August, 1950	174,603,049
Total	850,249,758	Total	850,249,758

Revenue derived from the severance tax (*i.e.* tax on the removal of minerals, timber or other assets from the soil or waters of the state), in the 1949–50 fiscal year yielded $98,046,979 from petroleum, natural gas and sulphur alone; tax on motor fuels that year yielded $87,438,246.

Net long-term debt, 31 Aug., 1949, was $22,391,000, of which $4,102,000 was guaranteed by the state.

Production and Industry.—Texas is one of the most important agricultural states of the Union. In 1945 it had 384,977 farms (418,002 in 1940) covering 141,337,744 acres (137,683,372 acres in 1940 and 114,021,000 acres in 1920); value of farm lands and buildings (1945) was $3,574,997,897 (outranking all states except Illinois and Iowa). It is estimated that in 1948, 2,744,100 acres were irrigated, embracing 30,000 farms.

Soil erosion is serious in some parts. Some 97,297,000 acres now require drastic curative treatment and 51,164,000 acres require preventive treatment. Since the 'Soil Conservation Act' was passed in 1939, 152 soil conservation districts (including 8 wind-erosion districts) have been established, covering 142,933,500 acres, of which 116,806,303 acres were in 343,895 farms and ranches. Large-scale commercial farms, highly mechanized, dominate in Texas, causing a migration of former tenant-farmers and share-croppers, estimated in 1940 to exceed 350,000. Farms of 1,000 acres or more numbered 16,725 in 1945 (15,101 in 1940), a number far exceeding that of any other state. But small-scale farming persists; in 1945, 87,935 farms (22·8% of the total) were under 30 acres (in 1940, 82,479 farms and 19·0%). In 1945, 67,348 farms (17·5%) had a gross production, for sale and farm consumption, valued at less than $400. At the other extreme, farms with a produce valued at $20,000 or more numbered 6,726, a number exceeded only by California. Tenant-farming is under pressure; tenants in 1945 operated 144,792 farms (33,980,282 acres), compared with 204,462 farms (40,252,000 acres) in 1940. Full owners operated 197,994 farms in 1945 (50,865,122 acres) compared with 166,659 farms (42,442,000 acres) in 1940.

Texas leads in the production of cotton (5,900,000 bales from 10,725,000

acres in 1949); yield was 264 lb. per acre compared with the average of 286 lb. for all cotton states. It also frequently leads in pecans (29,000,000 lb. in 1949) and always in grain sorghum (92,676,000 bushels). Other important crops, 1949, were onions (3,685,000 sacks of 50 lb.), maize (58,208,000 bushels), winter wheat (102,848,000 bushels), oats (34,020,000 bushels), rice (22,618,000 bushels), potatoes, sweet potatoes, peanuts (343,785,000 lb.), vegetables, peaches, oranges (1,550,000 boxes), grapefruit (5,400,000 boxes) and sorgo syrup.

Cash income, 1949, from crops was $1,343,650,000; from livestock $807,144,000.

The state has a very great livestock industry, leading in the number of all cattle, 8,658,000 on 1 Jan., 1950, and sheep, 6,821,000; it also had on that date 352,000 horses, 139,000 mules, 1,296,000 milch cows and 1,701,000 swine. Texas ranks second (1949) with 770,000 turkeys and ranks third with 25,771,000 chickens. The wool clip in 1949 amounted to 51,569,000 lb. of wool from 6,555,000 sheep (a steep decline from 75,906,000 lb. and 9,833,000 sheep in 1938–47); mohair (1948), 15,810,000 lb. from 3,100,000 goats. National forest area (1948), 1,714,374 acres.

Production of petroleum (1949), 743,990,000 barrels, was 40% of United States total. It leads in the number of refineries, numbering, in 1947, 84 with 36,317 employees earning wages and salaries of $135,500,000; value of products shipped was $1,754,800,000. Production of other minerals (1948) were:—Natural gasoline, 2,040,197,584 gallons; natural gas, 3,298,483 million cubic feet; liquefied petroleum gases, 1,123,000 gallons; lignite, 57,000 short tons; cement, 13,700,633 barrels; salt, 1,354,109 short tons; stone, 3,844,350 short tons; sulphur, 3,790,499 tons, 77% of U.S. production. Texas is the only source of helium (63,143,513 cubic feet in 1948). Other products (1948) were gypsum (893,704 short tons), granite, sandstone and native asphalt. In 1944, 1,095 flasks of mercury (76 lb. each) were produced. Carbon black from natural gas, 903,384,000 lb. (1948), being 69·6% of U.S. production. Western Texas has extensive undeveloped potash fields. Total value of mineral products in 1948, $2,809,071,000, leading all states.

In 1947 (census), 7,128 manufacturing establishments had 242,014 production workers earning $558,420,000; value added by manufactures was $1,727,464,000 compared with $449,523,000 in 1939.

The port of Houston is by far the most important outlet for the cotton grown in the United States. The Houston Ship Channel (50 miles long), connecting Houston with the Gulf of Mexico, makes that city the largest inland cotton market of the world. The steam railways (1948) had a total mileage of 17,414 miles (main lines). Airports, 1950, numbered 647, including 169 commercial and 152 municipal. The state maintains (1948) 29,000 miles of highways, of which approximately 27,000 miles are surfaced.

UTAH.

Constitution and Government.—Utah, which had been acquired by the United States during the Mexican war, was, in 1847, settled by Mormons, and on 9 Sept., 1850, organized as a Territory. It was admitted as a state into the Union on 4 Jan, 1896; it sends to Congress 2 senators and 2 representatives.

The Legislature consists of a Senate (in part renewed every 2 years) of 23 members, elected for 4 years, and of a House of Representatives of 60 members elected for 2 years. The Governor is elected for 4 years. The constitution provides for the initiative and referendum. Electors are all citizens, male or female, who, not being idiots, insane or criminals, have the usual residential qualifications.

There are 29 counties in the state. The capital is Salt Lake City.

Governor.—J. Bracken Lee (R.), 1949–53 ($7,500).
Secretary of State.—Heber Bennion, Jr. (D.).

Area and Population.—Area, 84,990 square miles, of which 2,806 square miles are water. The Office of Indian Affairs in 1945 administered 1,874,966 acres, of which 1,774,486 acres were allotted to Indian tribes. Census population, 1 April, 1950, 688,862, an increase of 138,552 or 25·2% since 1940. Births in 1948 were 20,977; deaths, 5,169; marriages, 7,327; divorces, 2,199. In 1948 the birth rate was 30·9 per 1,000 population (national average, 24·2); death rate was 7·6 (9·9). Population at 4 federal censuses (with distribution by sex for 1940):—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	366,583	1,144	3,123	2,501	373,351	4·5
1920	441,901	1,446	2,711	3,338	449,396	5 5
1930	499,967	1,108	2,869	3,903	507,847	6 2
1940	542,920	1,235	3,611	2,544	550,310	6·7
Male . .	274,587	682	1,826	1,525	278,620	—
Female .	268,333	553	1,785	1,019	271,690	—

Of the total in 1940, 32,298 (5·8%) were foreign-born whites, of whom 7,190 (21·8%) were English, 3,353 German, 3,158 Danes, 2,832 Swedes, 2,189 Italian and 1,882 Greek. There were 1,069 Mexicans. Japanese numbered 2,210, of whom 1,381 were citizens. Of the 1940 population, 55·5% were urban, 0·1% Negro and 27·1% (120,109 males and 28,777 females) gainfully employed; occupied dwelling units were 139,487 (of 3·95 persons); 2,749 men and 3,548 women were reported divorced.

The largest cities are Salt Lake City, with a population (census, 1950, preliminary) of 181,718; Ogden, 56,910; Provo, 28,899, and Logan, 16,802.

Education.—In 1940, of persons between the ages of 5 and 24, 144,867 (64·8%) were attending school. School attendance is compulsory for children from 8 to 18 years of age. There are 45 school districts, each with a Board of Education and a District Superintendent. Teachers' salaries, 1948–49, averaged $3,106 (national average, $2,846); of the state's 4,876 teachers, 33·9% were men, the highest average in the country (national average, 19·7%). There were (1949–50) 150,586 pupils and 5,140 teachers in elementary and high schools; in 1948–49 the operating cost of the elementary and secondary schools was $25,143,846.

The University of Utah (1850) (9,866 students and 499 instructors in

1949–50) is in Salt Lake City, and the Agricultural College of Utah (1890) in Logan; the state also maintains 4 junior colleges at Ogden, Price, Ephraim and St. George, and 2 vocational schools at Provo and Salt Lake City. The Mormon Church maintains the Brigham Young University at Provo (1875) with 250 teachers and 5,652 students.

Religion and Welfare.—Latter-Day Saints (Mormons) form about 68·8% of the Church membership of the state, with 472,414 members in 1949. There are Catholics (23,395 in 1949), Protestant Episcopalians (3,167 in 1936), and others in small numbers.

Marriage licences are granted only after both applicants have passed the Wassermann or some similar blood test. Marriage is prohibited between white and Negro, Mongolian or Malayan. In 1925 Utah passed an Act permitting, under legal [illegible] the sterilization of insane and feeble-minded persons; up to [illegible], 266 men and 303 women had been sterilized.

Old Age Assistance (maximum then $25 a month) was established in 1929 for all needy American citizens 65 years of age or older who met certain residential and other requirements, but in 1947 it was expanded to provide assistance 'to any needy individual in the state who does not have sufficient resources actually available for his use to maintain a minimum standard of living compatible with health and well-being'; in June, 1950, recipients numbered 10,136, drawing an average of $44·98 per month; 3,517 families with 8,945 dependent children were drawing an average of $84 52 monthly.

In 1949, the state had 35 hospitals (4,391 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 1,137 patients or 192·1 per 100,000 population, which was the smallest ratio shown by any state (national average, 363·2).

Of the state's 24 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 20 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—For the year ending 30 June, 1950, general revenue was $79,926,000 (taxes furnished $42,246,000 and federal grants $12,031,000) while general expenditures were $76,366,000 (direct state activities taking $36,713,000, state aid to other units $17,913,000 and capital outlays $10,427,000).

The net long-term debt on 30 June, 1949, amounted to $180,000; there is no net general bonded indebtedness.

Production and Industry.—The federal government owns 72% of the area of the state. The area of unappropriated and unreserved lands on 30 June, 1948, was 23,954,184 acres; the state (1948) contained 8,983,787 acres of national forest. Irrigable lands in 1940 covered 1,357,714 acres; lands irrigated were 1,176,116 acres. In 1945, it had 26,322 farms with a total area of 10,209,107 acres, of which 1,663,000 acres were crop land; total value of farm and buildings (1945), $261,817,649.

Of the total surface area (52,865,688 acres), 19·7% was severely eroded and only 0·4% free from erosion in 1939; mountains etc., cover 45% of the rest. In 1950, there were 41 soil conservation districts embracing 40,283,220 acres, of which 10,280,101 acres were farm lands (23,875 farms and ranches). Cash income, 1949, from crops was $42,901,000 and from livestock, $97,331,000.

The chief crops are wheat, oats, potatoes, hay, alfalfa (836,000 tons in 1950) and sugar beet (532,000 tons). On 1 Jan., 1950, the number of animals was:—Horses, 57,000; mules, 1,000; milch cows, 116,000; all

cattle, 560,000; sheep, 1,332,000; swine, 88,000. The wool clip (1950) yielded 11,010,700 lb. of wool from 1,366,000 sheep.

The principal minerals are gold (314,058 fine oz., 1949), silver (6,724,880 fine oz.), copper (225,225 short tons, 1948), coal (6,716,000 tons, 1948), lead (55,950 short tons, 1948), zinc (41,490 short tons, 1948), salt (113,779 short tons, 1948), iron ore (3,233,413 tons, 1948). The state government owns some rich phosphate deposits. Other products are gypsum, sulphur, potash, arsenous oxide, uranium and vanadium ores, molybdenum and asphalt. Total value of mineral production, 1948, $204,752,000.

In 1947, 772 manufacturing establishments had 19,973 production workers, who earned $48,053,000; value added by manufacture was $128,298,000. A steel industry, started in wartime, now ranks fourth in the production of steel plates.

In 1948, the state had 1,854 miles of steam railways. There were 46 airports (26 municipal) in 1948; 19 were lighted. The state maintains 4,864 miles of highway; the counties, 15,532 miles; the federal government, 3,662 miles.

VERMONT.

Constitution and Government.—Vermont, first settled in 1724, was admitted into the Union as a state on 4 March, 1791. The first constitution was adopted by convention at Windsor, 2 July, 1777, and established an independent state government; in 1793 a new constitution was adopted which, with amendments, is still in force. Amendments are proposed by two-thirds vote of the Senate each decennium, and must be accepted by two sessions of the Legislature before being submitted to popular vote. The General Assembly, consisting of a Senate of 30 members and a House of Representatives of 246 members (both elected for 2 years), meets in January in odd-numbered years. The Governor and Lieutenant-Governor are elected for 2 years. Electors are all citizens who possess certain residential qualifications and have taken the freeman's oath set forth in the constitution. The capital is Montpelier (8,585, census of 1950). The state is divided into 14 counties; there are 246 towns and cities. The state sends to Congress 2 senators and 1 representative, who are elected by the voters of the entire state.

Governor.—Lee E. Emerson (R.), 1951–53 ($8,500).
Secretary of State.—Howard E. Armstrong (R.).

Area and Population.—Area, 9,609 square miles, of which 331 square miles are inland waters. Census population, 1 April, 1950, 377,747, an increase of 5·2% since 1940; density, 1950, 43·9 per square mile. Births, 1948, were 9,369; deaths, 4,096; marriages, 3,889; divorces, 516; crude birth rate, 1948, was 25·8 per 1,000 population (national average, 24·2); crude death rate, 11·3 (9·9); marriage rate 10·7 per 1,000 population (12·4). Occupied dwelling units, 1950, 122,707.

Population at 4 census years (with distribution by sex in 1940) was as follows:—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	354,298	1,621	26	11	355,956	39·0
1920	351,817	572	24	15	352,428	38·6
1930	358,966	568	36	41	359,611	38·8
1940	358,806	384	16	25	359,231	38·7
Male . .	181,975	220	9	20	182,224	—
Female .	176,831	164	7	5	177,007	—

In 1940, the foreign-born white population numbered 31,727, or 8·9% of the total. Of these, 11,976 (37·5%) were Canadian French, 7,759 (25·0%), Canadian English, 2,339 Italian, 1,378 English, 1,043 Irish and 1,020 Scottish. Of the population in 1940, 34·3% were urban and 34·8% (96,163 males and 28,929 females) gainfully employed; the number of occupied dwelling units was 92,435 (of 3·89 persons); 1,916 men and 2,029 women were reported divorced. The largest cities are Burlington, with a population in 1950 of 33,039; Rutland, 17,647; Barre, 10,866.

Education.—School attendance during the full school term is compulsory for children from 7 to 16 years of age. In 1949-50 the 815 public elementary schools had 45,450 enrolled pupils; the 83 high schools had 15,428 pupils; 24 private and parochial secondary schools had 4,049; the 3 teachers' colleges had 365 students. Teachers for all public schools numbered 2,415. Teachers' salaries, 1948–49, averaged $2,513 (national average, $2,846). The University of Vermont (1791) had, 1948–49, 3,189 students; Middlebury College (1800), 1,212 students; Norwich University (1834), 634 students; Benning[illegible] (1932), 306 students. Expenditure on education (1949–50) was [illegible].

Religion and Welfare.—The principal religious denominations are Roman Catholic (with 99,945 members in 1936), Congregational (20,713), Methodist (14,432), Baptist, Protestant Episcopal and Universalist, in the order given; total, all denominations, 169,792.

Marriage licences are issued only after both applicants have passed a serological test.

Old Age Assistance was being granted in June, 1950, to 6,848 persons, drawing an average of $35·54 per month.

In 1949, the state had 30 hospitals (4,042 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 1,074 patients or 346·2 per 100,000 of the population (national average 363·2). In 1931 Vermont passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 83 men and 168 women had been thus sterilized.

Of the state's 14 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 10 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—The revenue and expenditure for the year ending 30 June, 1950, were (in dollars):—

Cash balance, 1 July, 1949 .	4,270,061	Disbursements, 1949–50 .	36,350,593
Receipts, 1949–50 . . .	39,458,425	Cash balance, 30 June, 1950 .	7,377,893
Total . . .	43,728,486	Total . . .	43,728,486

Net long-term debt, 1 July, 1950, was $6,291,000.

Production and Industry.—Agriculture is the most important occupation within the state. In 1945 the state contained 26,490 farms with a total area of 3,930,514 acres, of which 1,160,000 acres were crop land; total value of farm lands and buildings, 1945, $134,575,897. Cash income, 1949, from crops and livestock, $105,144,000; from government payments, $1,112,000. The chief agricultural crops are hay, oats, maize, potatoes and apples. Vermont leads in maple products, of which the output, 1950, was 762,000 gallons of syrup and 158,000 lb. of sugar.

On 1 Jan., 1950, Vermont had 288,000 milch cows, 433,000 all cattle, 30,000 horses, 12,000 sheep and 21,000 swine.

The state is divided into 13 soil conservation districts (5,931,392 acres) which may utilize funds provided by local, state and federal agencies. On 1 July, 1950, 4,050 farmers with 826,103 acres were [illegible] the districts. There is no serious soil erosion; 13·1% of t[illegible] moderate erosion.

The forests provide annually over 200,000,000 board feet of lumber, [illegible] 50,000 cords of pulpwood and 450,000 cords of fuel-wood. Nat[illegible] forest area (1948), 580,520 acres. There are 24 state forests anp 21 state forest parks with a total acreage of 78,051.

The federal census of manufactures in 1947 found 830 manufacturing establishments, employing 30,239 production workers who were earning $66,400,000; value added by manufacture was $149,685,000.

In 1948 the production of [illegible] was 1,000,000 cubic feet, mostly for monumental use, valued at $[illegible]; marble was 600,000 cubic feet, for both monumental and building use; talc (1948), 70,922 tons. Vermont has the largest worked deposits of asbestos in United States. Re[illegible] old copper dumps in 1947 produced 145,661 short tons of copper. Total value of mineral products, 1948, $16,132,000.

There were (1 Jan., 1951) 955 miles of steam railway. There are (1949) 22 airports, of which 9 are municipal; 4 are lighted. The state maintains 1,821 miles of paved and gravelled highways and aids in the maintenance of 2,265 miles of paved and gravel roads. Town roads total 9,538 miles. The entire system is being slowly re-surfaced as funds permit; the earlier cement roads were found unsuitable for Vermont's extremes of weather. State road expenditures, year ending 30 June, 1950, was $11,445,814, of which $3,501,179 was for maintenance.

VIRGINIA.

Constitution and Government.—The first English Charter for settlements in America was that granted by James I in 1606 for the planting of colonies in Virginia. The state was one of the 13 original states in the Union. On the outbreak of the civil war in 1861, Virginia, after long hesitation, decided to join the seceding states, a course objected to by some in the western portion of the state, who set up a separate government which in 1863 was admitted into the Union as West Virginia.

The General Assembly consists of a Senate of 40 members elected for 4 years and a House of Delegates of 100 members, elected for 2 years The Governor and Lieutenant-Governor are elected for 4 years. Qualified as electors are (with few exceptions) all citizens 21 years of age, fulfilling certain residential qualifications, who have paid their state poll-taxes and registered. Potential voters (1948) were 1,772,000; voters in the presidential elections of 1948, were 421,564 (23·7%). The state capital is Richmond; the state contains 100 counties and 24 independent cities. The state sends to the Federal Congress 2 senators and 9 representatives.

Governor.—John S. Battle (D.), 1950–54 ($15,000).
Secretary of the Commonwealth.—Thelma Y. Gordon (D.).

Area and Population.—Area, 40,815 square miles, including 916 square miles of inland water. Census population, 1 April, 1950, 3,318,680, an increase of 640,907 or 23·9% since 1940. In 1948 there were 82,057 births, 28,976 deaths, 37,423 marriages and 7,081 divorces; the birth rate was 26·9 per 1,000 population; death rate, 9·5. Population for 4 federal census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,389,809	671,096	539	168	2,061,612	51 2
1920	1,617,909	690,017	824	437	2,309,187	57·4
1930	1,770,441	650,165	779	466	2,421,851	60 7
1940	2,015,583	661,449	198	543	2,677,773	67 1
Male . .	1,018,119	330,378	98	409	1,349,004	—
Female .	997,464	331,071	100	134	1,328,769	—

Of the total population in 1940, 22,987, or 1·1%, were foreign-born whites, of whom 2,795 (12·2%) were Russian, 2,792 (12·1%) [illegible] 2,353 German. The urban population in 1940 formed 35 3% ar . [illegible] 24·7% of the whole; 34·8% (722,026 males and 211,032 females) were gainfully employed (excluding those on relief works); the number of occupied dwelling units was 627,659 (of 4·3 persons). Aliens registered in Dec., 1940, were 10,093.

The population (census of 1950, preliminary) of the principal cities was :—Richmond, 229,906; Norfolk, 188,601; Roanoke, 91,089; Portsmouth, 71,294; Alexandria, 61,604; Lynchburg, 47,639; Newport News, 41,639, and Petersburg, 34,984.

Religion and Welfare.—The principal churches are the Negro Baptists, with 249,036 members in 1936, Southern Methodists (189,621) and Southern Baptists (177,196). Total, all denominations, 1,017,531 members.

Marriage licences are issued only after both applicants have passed the Wassermann or some similar blood test. In 1924, Virginia enacted a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 2,219 men and 3,362 women had been thus sterilized.

Virginia statutes require separate facilities for whites and coloured people throughout the school system, including colleges; in railways, including dining cars but excluding sleeping cars; in buses and street cars; in penal and correctional institutions and hospitals; in theatres and public halls; in fraternal benefit associations. But in 1950 the University of Virginia began to admit Negro students, in recognition of the U.S. Supreme

Court decisions declaring segregation unconstitutional. Marriage between white and 'non-white' persons is prohibited.

In 1938 Virginia established a system of Old Age Assistance under the Federal Security Act; in June, 1950, 19,385 persons were drawing an average of $21·41 per month.

In 1949, the state had 125 hospitals (29,639 beds) registered with the American Medical Association. Hospitals for mental diseases in Dec., 1945, had 9,702 patients or 345·2 per 100,000 population (national average, 363·2).

Of Virginia's 97 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 85 as sub-standard, unsuitable for the custody of Federal prisoners.

Education.—In 1940, of persons between the ages of 5 and 24, 554,903 (52·4%) were attending school. Elementary instruction is free, and for illiterate children compulsory between the ages of 8 and 12. No child under 12 may be employed in any mining or manufacturing work. White and coloured children must not be taught in the same school.

In 1948–49 the 583,728 pupils in primary schools had 20,561 teachers; the 412 accredited high schools had 5,234 full-time teachers and 111,360 pupils. Negro schools (included in the above totals) had 152,951 pupils (of whom 22,821 were in high schools) and 4,165 teachers. The 5 public normal schools (one for Negroes) had 470 teachers and 6,426 students. Teachers' salaries, 1948–49, averaged $2,236. Expenditure on public schools in 1948–49, $83,181,563. The more important institutions for higher education (1949) were :—

Founded	Name and place of college	Staff	Students
1693	William and Mary College, Williamsburg (State) . .	127	1,875
1749	[illegible] . .	83	1,293

Finance.—The revenue for the year ending 30 June, 1950, was $313,815,884; taxes furnished $130,111,955; sales of property and commodities, $86,652,847; grants and donations, $28,098,012. Expenditures were $317,242,170.

The public debt (30 June, 1950) amounted to $12,754,656; sinking funds were $14,300,430.

Production and Industry.—In 1945, there were 173,051 farms in Virginia with an area of 16,358,072 acres, of which 3,933,284 acres were crop land; total value of farm lands and buildings, $868,806,343. Farming units are small; the average farm is 94·5 acres compared with the national average of 194·8 acres; 61,491 farms (35% of the total) were under 30 acres. In 1945 41,266 farms (24% of the 170,494 farms reporting) had a total produce, for sale and farm consumption, valued at less than $400. Cash income. 1949, from crops, $195,593,000 and from livestock, $210,278,000. The chief crops in 1949 were corn, 53,580,000 bushels; wheat, oats, potatoes, 9,126,000 bushels; sweet potatoes, 2,880,000 bushels; apples, 7,820,000 bushels. The

tobacco crop, 1949, was 137,262,000 lb. The cotton crop covered 32,000 acres, yielding 20,000 bales. National forests, 1948, covered 4,123,667 acres.

In 1950, there were 22 soil conservation districts embracing 21,958,544 acres, of which 14,047,977 acres were farm land (142,513 farms). Moderate erosion affects 15,031,149 acres (59·2% of the total area).

Animals on farms on 1 Jan., 1950, were 129,000 horses, 66,000 mules, 497,000 milch cows, 1,108,000 all cattle, 293,000 sheep and 752,000 swine. Wool clip (1949), 1,330,000 lb. of wool from 251,000 sheep.

Virginia has considerable mineral wealth, coal being the most important, with output in 1948 of 19,620,000 short tons. Lead output, 1948, was 4,703 short tons; zinc, 15,882 short tons. Manganese ores, some sheet mica and titanium ore are also produced. In 1948, the mineral output was valued at $157,724,000.

There are extensive ironworks in the state, but the manufacture of cigars and cigarettes and of rayon and allied products and the building of ships and boats lead in value of products. Census of manufactures in 1947 showed 3,643 establishments, employing 191,000 production workers earning $384,000,000: value added by manufacture was $1,052,000,000 compared with $376,000,000 in 1939.

In 1946 there were 4,099 miles of steam railway. There were, in 1950, 127 airports, of which 22 were municipal; 24 were lighted. The state maintains 47,455 miles of highways, of which 9,320 miles are surfaced.

WASHINGTON.

Government.—Washington, formerly part of Oregon, was created a Territory in 1853, and was admitted into the Union as a state on 11 Nov., 1889. Its settlement dates from 1811. The Legislature consists of a Senate of 46 members elected for 4 years, half their number retiring every 2 years, and a House of Representatives of 99 members, elected for 2 years. The Governor and Lieutenant-Governor are elected for 4 years. The state contains 39 counties. The capital is Olympia (population, 1950, 15,711). To Congress the state sends 2 senators and 6 (from 1952, 7) representatives.

Qualified as voters are (with some exceptions) all citizens 21 years of age, having the usual residential qualifications, who can read and speak English.

Governor.—Arthur B. Langlie (R.), 1949–53 ($15,000).
Secretary of State.—Earl S. Coe (D.).

Area and Population.—Area, 68,192 square miles, of which 1,215 square miles are inland water. Public lands unappropriated on 30 June, 1948, totalled 493,501 acres. Lands owned by the federal government, 1944, were 15,034,462 acres or 35% of the total area. Census population,

1 April, 1950, 2,378,963, an increase of 642,772 or 37·0% since 1940. The increase is due to the war-time and post-war migration of industry to the west coast. Birth rate, 1948, was 22·7 per 1,000 population (national average, 24·2); death rate, 9·0 (9·9). Births, 1948, were 55,833; deaths, 22,211; [illegible] 37,007; divorces, 8,105. Population in 4 federal census years (w[illegible]y sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,109,111	6,058	10,997	15,824	1,141,990	17·1
1920	1,319,777	6,883	9,061	20,900	1,356,621	20·3
1930	1,521,661	6,840	11,253	23,642	1,563,396	23·3
1940	1,698,147	7,424	11,393	19,227	1,736,191	25 9
Male . .	883,688	4,321	5,939	11,809	905,757	—
Female .	814,459	3,103	5,454	7,418	830,434	—

The foreign-born white population in 1940 numbered 203,163, constituting 11·6% of the total population. Of this number 42,306 (20·6%) came from Canada, 26,993 from Sweden, 26,489 from Norway, 16,206 from England, 15,470 from Germany and 9,199 from Finland. Japanese numbered 14,565, of whom 8,882 were citizens. Alien [illegible]ed in Dec., 1940, numbered 81,636. Of the total population in 1940, 53·1% were urban, 0·4% Negro, and 35·0% (478,325 males and 129,347 females) gainfully employed; number of occupied dwelling units was 537,337 (of 3·23 persons); 18,658 men and 18,489 women were reported divorced.

There are 18 Indian reservations, the largest being the Colville, which contains 1,140,223 acres; total population, 1945, 13,943. The U.S. Bureau of Indian Affairs administers (1945) 2,722,397 acres, of which 1,756,558 acres have been assigned to tribes.

Leading cities are Seattle, with a population (census of 1950, preliminary) of 462,440; Spokane, 160,484; Tacoma, 142,975; Yakima, 38,375; Bellingham 33,934, and Everett, 33,807.

Education. Public [illegible]s free, and is compulsory for children from 8 to 15 years of age. In 1948–49, the 1,113 elementary schools had 8,165 teachers and 283,932 pupils; 80 junior high schools had 1,590 teachers and 42,801 pupils; 274 high schools had 3,435 teachers and 81,041 pupils. The 13th and 14th-year enrolments in the public schools and junior colleges have 175 teachers and 8,161 students. In 1948–49 the 15,400 teachers had an average salary of $3,374 (national average, $2,846). The total expenditure on public elementary and secondary schools for the school year 1948–49 was $84,986,541. In 1946, the private parochial elementary and secondary schools had 22,783 elementary and high school pupils and 982 teachers.

The University of Washington, founded 1861, at Seattle, had, in 1948–49, 917 full-time teachers and 16,650 students, and the State College at Pullman for science and agriculture, founded 1890, had 428 teachers and 6,667 students. Three state colleges of education had 272 teachers and 3,984 students. There are 23 other colleges and special schools.

Religion and Welfare.—Chief [illegible]odies are the Catholic (101,287 members in 1936), Methodis[illegible]. Presbyterian (33,983), Lutheran, Baptist, Disciples and Congregationalist; total, all denominations, 367,261.

Marriage licences are issued only after both applicants have appeared

before a county auditor or his deputy. Washington is one of the states whose birth certificates do not disclose illegitimacy.

Old Age Assistance is provided for persons 65 years of age or older who have been residents of the state for 5 years (within the 9 years immediately preceding application) without resources. In June, 1950, 73,744 persons were drawing an average of $65·86 per month; aid to 30,127 dependent children in 12,805 families averaged $97·34 per family monthly; to 829 blind persons, $78·89 per person monthly. The state's penal and reformatory system in Nov., 1948, held 2,069 men and 88 women. Incapacitated persons and those in correctional institutions numbered 12,337. Of the state's 48 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 25 as sub-standard, unsuitable for the housing of Federal prisoners.

In 1949, the state had 121 hospitals (24,762 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 7,033 patients or 360·0 per 100,000 population (national average, 363·2).

In 1909 Washington passed a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 184 men and 501 women had been thus sterilized.

Finance.—For the year ending 31 March, 1949, the state's revenue was $284,194,000 ($221,915,000 from taxes and $38,367,000 from federal grants), while expenditure was $325,148,000 ($131,780,000 in direct state operations and $114,035,000 disbursed through other agencies).

Net long-term debt on 1 April, 1949, was $21,743,000.

Production and Industry.—Agriculture is the leading occupation of the people. In 1945, there were 79,887 farms with an acreage of 16,719,870, of which 4,290,000 acres were crop land; total value of farm land and buildings, $900,184,222. Although large-scale commercial farming is expanding, farmers displaced from the 'Dust Bowl' in the prairie states have crowded in to work small holdings on marginal land. In 1945, 40,353 farms (50% of the total) were under 30 acres, though the average for the state is 209·3 acres. In 1945, 18,154 farms (23% of the 77,672 farms reporting) had a gross produce, for sale and farm consumption, valued at less than $400. Although Washington ranks only fifth among the [illegible] states, 3 of her counties—Whitman, Lincoln and Adams—rank first, second and third among all the [illegible] of the country. In 1950, there were 63 soil conserv[illegible] 31,651,148 acres, of which 12,485,415 acres were [illegible] and ranches). About 12% of the total area has suffered severe erosion and 44% moderate erosion.

Cash income, 1949, from crops was $324,361,000, and from livestock, $181,500,000. Washington far exceeds other states in production of commercial apples; 34,592,000 bushels in 1950. Other crops are wheat (67,582,000 bushels), barley, oats, maize, potatoes, pears (5,872,000 bushels), cherries (21,200 tons), peaches, prunes (13,600 tons), hops (58,336,000 bushels). On 1 Jan., 1950, animals on farms were 54,000 horses, 2,000 mules, 329,000 milch cows, 885,000 all cattle, 324,000 sheep and 160,000 swine. The wool clip in 1949 amounted to 2,984,000 lb. of wool from 332,000 sheep. The national forest-lands of the state had (1949) an area of 10,751,614 acres.

Coal output was 1,210,000 short tons in 1948. Metals (1949) include:—Gold 71,994 fine oz.; silver, 357,853 fine oz.; lead (1948), 7,147 short tons; copper, mercury and zinc. Clay products, granite, sandstone, marble, limestone and grindstones are produced. Antimony ores, tungsten, diatomite,

crude magnesite, olivine and platinum are found. Total mineral products in 1948 reached a value of $50,498,000.

In 1947, the federal census showed 3,410 manufacturing establishments employing 123,488 production workers, who earned $354,596,000; value added by manufacture was $874,036,000 compared with $267,716,000 in 1939. Shipbuilding, a small industry in 1939, grew enormously during the war, when its output reached a total of $1,750 million; aeroplane manufacture similarly expanded with an aggregate for the war years of $2,373 million. Food processing is a third major industry.

The steam railways had, in 1948, 5,227 miles (main track). There were in 1948, 136 airports (52 municipal); 39 were lighted. The state maintains 6,418 miles of highway, of which 6,102 miles are surfaced.

WEST VIRGINIA.

Government.—In 1862, after the state of Virginia had seceded from the Union, the electors of the western portion ratified an ordinance providing for the formation of a new state, which was admitted into the Union by presidential proclamation on 20 June, 1863, under the name of West Virginia. Its constitution was adopted by the voters almost unanimously on 26 March, 1863; it was revised in 1873.

The Legislature consists of the Senate of 32 members elected for a term of 4 years, one half being elected biennially, and the House of Delegates of 94 members, elected biennially. The Governor is elected for 4 years. Voters are all citizens (with necessary exceptions) 21 years of age and meeting certain residential requirements. The state capital is Charleston; there are 55 counties.

The state sends to Congress 2 senators and 6 representatives.

Governor.—Okey L. Patteson (D.), 1949–53 ($10,000).
Secretary of State.—D. Pitt O'Brien (D.).

Area and Population.—Area, 24,181 square miles, of which 91 square miles are water. Census population, 1 April, 1950, 2,005,552, an increase of 5·4% since 1940. Birth rate, 1948, was 27·4 per 1,000 population (national average, 24·2); death rate, 9·2 (9·9). Births, 1948, 52,396; deaths, 17,758; marriages, 16,495.

Population in 4 federal census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	1,156,817	64,173	36	93	1,221,119	50·8
1920	1,377,235	86,345	7	114	1,463,701	60·9
1930	1,614,191	114,893	18	103	1,729,205	71·8
1940	1,784,102	117,754	25	93	1,901,974	79·0
Male . .	907,906	60,595	14	67	968,582	—
Female .	876,196	57,159	11	26	933,392	—

Of the total population in 1940, 41,899, or 2·2%, were foreign-born whites, and of these 10,601 (25·4%) came from Italy, 4,245 (10·2%) from Poland, 3,221 (7·7%) from Hungary, 2,440 from England and 2,197 from Germany. Urban population was 28·1% and the Negro population 6·4 of the whole; 33·4% (523,813 males and 111,144 females) were gainfully employed; the number of occupied dwelling units was 444,889 (of 4·3 persons); 6,353 men and 8,446 women were reported divorced. Aliens registered in Dec., 1940, numbered 23,662.

In 1950 the population of the principal cities were:—Huntington, 86,160; Charleston, 72,818; Wheeling, 58,447; Clarksburg, 31,817, Parkersburg, 29,510, and Fairmont, 29,273 (preliminary figures).

Religion and Welfare.—Chief denominations are Methodists (214,826 members in 1949), Northern Baptists (114,500 members) and Roman Catholics (84,775). Total membership, all denominations (1943), 531,983.

Marriage licences are issued only after both applicants have passed the Wassermann or some similar blood test. Marriage between white and Negro persons is prohibited. In 1929, West Virginia enacted a law permitting, under legal safeguards, the sterilization of insane and feeble-minded persons; up to 1 Jan., 1950, 1 man and 47 women had been thus sterilized.

West Virginia statutes require separate facilities for whites and Negroes throughout the educational system (including colleges and schools for the deaf and blind), with a provision that teachers and pupils must be of the same race; in hospitals and penal institutions, and in billiard and pool rooms. But there are no statutes compelling separate facilities on the railroads or in buses and street cars.

Since June, 1936, the state has provided a system of Old Age Assistance; in June, 1950, 26,770 persons (out of 115,000 persons aged 65 or over) were receiving an average of $21 69 per month; 18,559 families were receiving aid for 52,509 dependent children amounting to $47 01 a month. There are 19 charitable, penal and correctional institutions. West Virginia has a state police force under the direction of the Governor. The penitentiary in Dec., 1948, held 1,837 men and 62 women; in 1947 a separate institution for women was opened. Of the state's 57 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 45 as sub-standard, unsuitable for the housing of Federal prisoners.

In 1949, the state had 82 hospitals (13,768 beds) registered with the American Medical Association. Hospitals for mental diseases in Dec., 1945, had 4,391 patients or 255·7 per 100,000 population (national average, 363 2).

Education.—In 1940, of persons between the ages of 5 and 24, 440,123 (56·6%) were attending school. Elementary education is free for all from 6 to 21 years of age, and school attendance for a minimum 180 days annually is compulsory for all children between the ages of 7 and 16 years. The public or free schools are non-sectarian. In 1948–49 the public elementary and high schools had 438,498 enrolled pupils (25,592 Negroes) and 16,030 teachers (804 Negro teachers). The 6 public teachers' colleges have about 160 teachers and 2,300 students. Teachers' salaries, 1948–49, ranged from $990 to $2,934; average was $2,402. Expenditure from state funds on public schools in 1948–49 was $56,819,000.

The West Virginia University, founded in 1868 at Morgantown, had in 1950, 401 professors and instructors and 8,500 full-time students. Bethany College (1840), under the auspices of the Christian Church, had 40 instructors and 733 students. West Virginia Wesleyan College (1890), a

Methodist institution, had 43 instructors and 805 students; West Virginia Institute of Technology (1895), at Montgomery, had 39 teachers and 490 students; West Virginia State College (for Negroes), at Institute, had 86 instructors and 1,943 students; Marshall College (1867), had an enrolment of 3,928 students. Including the university, there are 11 state-supported institutions of higher education, with a total enrolment (1950) of 15,845.

Finance.—The state revenue for the year ending 30 June, 1949, was $151,620,000 (taxes furnishing $117,110,000 and federal grants $17,302,000), while expenditures were $150,848,000, with state activities taking $63,186,000, aid to other governmental units $37,321,000 and debt retirement $6,038,000.

The net long-term debt was $60,190,000 on 30 June, 1949.

Production and Industry.—In 1945 the state had 97,600 farms, with an area of 8,719,575 acres, of which 1,505,000 acres were crop land; total value of farm lands and buildings, $341,008,205. Farming units are small; the average farm is 89·3 acres (national average, 194·8 acres). In 1945, 32,049 farms (33%) were less than 30 acres. In 1945, 33,618 farms (35% of the 95,095 farms reporting) had a gross output, for sale and farm consumption, valued at less than $400. Cash income, 1949, from crops was $24,572,000 and from livestock, $89,225,000.

The chief agricultural products are wheat, maize (11,748,000 bushels in 1949), oats, hay and potatoes. The tobacco yield, 1949, amounted to 4,620,000 lb. Apples, peaches, plums and grapes are grown. On 1 Jan., 1950, the domestic animals were 86,000 horses, 5,000 mules, 234,000 milch cows, 559,000 all cattle, 296,000 sheep and 256,000 swine. In 1949, the wool clip produced 1,399,000 lb. of wool from 264,000 sheep. National forest lands, 1948, amounted to 1,836,140 acres.

In 1950, there were 14 soil conservation districts embracing 15,043,928 acres of which 8,593,197 acres were farm land (96,720 farms).

West Virginia has extensive mining and quarrying industries. Petroleum output is declining from an annual average, 1921–25, of 6,575,000 barrels to 2,687,000 in 1948; natural gasoline (1948), 157,300,000 gallons and natural gas, 197,810 million cu. ft. The coal area extends over 17,280 square miles, and estimated coal reserves are, as of 31 Dec., 1940, 63,687,664,000 tons; 168,200,000 short tons of coal were produced in 1948; coke (bee-hive and by-product), 3,650,584 short tons (1948). Lime, salt, sand and gravel, sandstone and limestone are also produced. The total value of mineral output in 1948 was $1,008,299,000.

The federal census of manufactures of 1947 showed 1,602 manufacturing establishments employing 108,984 production workers who earned $268,469,000; the value added by manufactures was $663,903,000, compared with $213,284,000 in 1939.

In 1948 the state had 3,742 miles of steam railway, besides 302 miles of electric railway track. There were, 1948, 47 airports, of which 12 were municipal; 7 were lighted; there were 6 sea-plane bases. The state has a new system of improved highways totalling 33,234 miles, of which 4,917 miles were primary roads. Motor vehicles, 1948–49, numbered 306,914.

WISCONSIN.

Government.—Wisconsin, first settled in 1670 by French traders and missionaries, is a part of the country known first as New France from 1634 until surrendered to the British in 1763 and as the Northwest Territory after its cession to the United States in 1783; the region now embraced by the state was successively part of the Territories of Indiana, Illinois and Michigan, in 1836 becoming the Territory of Wisconsin with boundaries embracing what is now Iowa, Minnesota and part of the 2 Dakotas. It was admitted into the Union with its present boundaries on 29 May, 1848; the centenary was celebrated at the state capital on 5 January, 1948. The legislative power is vested in a Senate of 33 members, elected for 4 years, one-half (16 or 17 alternately) being elected each 2 years, and an Assembly of 100 members, all elected simultaneously for 2 years. The Governor and Lieutenant-Governor are elected for 2 years. The state has 71 counties. The capital is Madison.

Wisconsin has universal suffrage for all citizens over 21 years of age. Wisconsin is represented in Congress by 2 senators and 10 representatives.

Governor.—Walter J. Kohler (R.), 1951-53 ($12,500).
Secretary of State.—Fred. R. Zimmerman (R.).

Area and Population.—Area, 56,154 square miles, including 1,439 square miles of inland water, but excluding any part of the Great Lakes. Census population, 1 April, 1950, 3,434,575, an increase of 296,988 or 9·5% since 1940. Birth rate, 1948, 25·0 per 1,000 population; death rate, 10·0; resident births in 1949 were 82,736 (24·7 per 1,000 population); deaths, 32,876 (9·8); marriages, 27,782; divorces and annulments, 4,815. Population in 4 census years (with distribution by sex in 1940) was :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	2,320,555	2,900	10,142	263	2,333,860	42·2
1920	2,616,938	5,201	9,611	317	2,632,067	47·6
1930	2,916,255	10,739	11,548	464	2,939,006	53·7
1940	3,112,752	12,158	12,265	412	3,137,587	57·3
Male . .	1,587,193	6,318	6,354	311	1,600,176	—
Female .	1,525,559	5,840	5,911	101	1,537,411	—

The foreign-born white population in 1940 numbered 288,774, representing 9·3% of the total population. Of these 88,808 (30·8%) were German, 31,487 (10·9%) Polish, 23,211 Norwegian, 15,114 Russian, 14,880 Austrian, 13,697 Swedish, 12,654 Czechoslovakian, 11,622 Canadian and 9,491 English. Aliens registered in Dec., 1940, numbered 75,127. Of the total population in 1940, 53·5% were urban, 0·4% Negro and 39·1% (967,550 males and 260,002 females) gainfully employed; number of occupied dwelling units was 827,265 (of 3·8 persons); 15,203 men and 17,604 women were reported divorced. On 1 Jan., 1945, 452,678 acres of land (including 5 reservations) and about 13,780 persons were controlled by the Bureau of Indian Affairs; 264,318 acres have been allotted to tribes.

Population of the larger cities (census, 1950, preliminary) was as follows:—

Milwaukee. .	632,651	West Allis .	42,945	Wauwatosa .	33,300
Madison (cap.) .	95,594	Sheboygan .	42,485	Wausau . .	30,386
Racine . .	70,749	Oshkosh . .	40,934	Fond du Lac .	29,826
Kenosha . .	54,360	Eau Claire .	35,862	Beloit . .	29,541
Green Bay .	52,443	Superior . .	35,091	Manitowoc .	27,444
La Crosse . .	47,396	Appleton. .	33,892	Janesville .	24,829

Religion and Public Welfare.—The chief religious bodies (unofficial figures for 1948) are:—Roman Catholics (with 915,477 members), Lutherans (all bodies, 661,771) and Methodists (124,048). Total, all denominations, 1,950,385 (1936 census, 1,605,820).

Marriage licences are issued only after both applicants have passed the Wassermann or some similar blood test. Wisconsin is one of 5 states which employ 'divorce counsels' to investigate undefended divorce suits for evidence of collusion; the 'counsels,' however, have broader duties than their counterparts in other states. In 1913, Wisconsin passed a law permitting, under legal safeguards, the sterilization of feeble-minded persons; up to 1 Jan., 1950, 354 men and 1,332 women had been thus sterilized.

Old Age Assistance (established 1925) paying a maximum of $50 per month is available to persons, 65 years and over, satisfying requirements as to need, etc., who have resided in the state for one year preceding application; in Dec., 1950, 52,566 persons were drawing an average of $42·47 per month.

Aid to dependent children was established in 1913, available to mothers caring for their dependent minor children in their own homes; 8,907 families with 22,189 children received aid in Dec., 1950, with average of $98·50 per family. Aid to dependent children in approved foster homes became operative in Aug., 1947; in Dec., 1950, 1,460 children in 962 foster homes received an average of $40·78 per child. Aid to the blind (maximum $60 per month) was established in 1907; 1,394 persons were aided in Dec., 1950, receiving average allowance of $47 85. Totally disabled persons (752) were receiving an average of $62·46 per month.

Wisconsin maintains 12 state and 38 county institutions for the care of its insane, mentally deficient, penal, correctional and parole cases numbering 25,666 in Dec., 1950. Wisconsin maintains a school for the deaf (enrolment in 1950, 184) and a school for the visually handicapped (enrolment 149).

In 1949, the state had 222 hospitals (36,864 beds) registered with the American Medical Association. In Dec., 1945, hospitals for mental diseases had 13,426 patients or 457·6 per 100,000 population (national average, 363 2); patients in May, 1949, 16,532.

The state's penal, reformatory and correctional system in Dec., 1950, held 2,183 men and 211 women; the probation and parole system was supervising 2,393 men and 388 women. Of the state's 73 local jails (city and county) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 56 as sub-standard, unsuitable for the housing of Federal prisoners.

Education.—In 1945, illiterates 10 years of age or older were estimated to be less than 1%. All children between the ages of 7 and 16 are required to attend school full-time to the end of the school term in which they become 16 years of age. In 1948–49 the public elementary schools had 356,973 pupils and 14,241 teachers; in high schools were 140,701 pupils

with 6,674 teachers. Teachers' salaries, 1948–49, averaged $2,803 (national average, $2,846). The 9 state teachers' colleges had, in 1950–51, 611 teachers and 8,221 students. In 1949–50, schools of vocational and adult education had 939 teachers with 43,635 pupils. State supervised evening schools had 66,861 pupils with 1,450 teachers. There are also 24 rural county normal schools, the Stout Institute at Menomonie, which trains teachers for the vocational schools, and Wisconsin Institute of Technology (School of Mining) at Platteville.

The University of Wisconsin at Madison, established in 1848, had, in 1950–51, 1,534 full-time professors and instructors engaged in teaching, research and public services, plus 339 part-time teachers and 570 teaching and research graduate assistants; there were 15,766 resident students at Madison, 15,172 students in extension and correspondence courses. The total expenditure for public education in 1948–49 was $148,459,580.

Finance.—For the year ended 30 June, 1950, the gross receipts and disbursements of the state's general fund were (in dollars) :—

Balance, 1 July, 1949	10,248,490	Disbursements, 1949–50	345,276,227
Receipts, 1949–50	344,703,461	Balance, 30 June, 1950.	9,675,724
Total	354,951,951	Total	354,951,951

The state has no debt.

Production, Industry, Communications.—Wisconsin has slightly more people engaged in manufactures than in agriculture, but is the leading dairy state of the Union. In 1945 the farms numbered 177,745 with a farm area of 23,615,031 acres; value of all farm land and buildings, 1945, $1,434,294,817. In 1950 there were 61 soil conservation districts, locally managed, embracing 30,729,600 acres, including 166,167 farms and ranches.

Cash farm income, 1949, was, from crops, $123,952,000; from livestock, $828,476,000; from [illegible] payments, $4,260,000. Estimated yield of the principal crops [illegible] as:—Maize, 101,769,000 bushels; wheat, 2,096,000 bushels; oats, 136,800,000 bushels; barley, 8,774,000 bushels; potatoes, 14,625,000 bushels; tame hay, 7,061,000 tons; cranberries, 202,000 barrels. The tobacco yield in 1950 was 30,233,000 lb. Livestock on 1 Jan., 1950:—2,432,000 milch cows (leading all states), 224,000 horses, 1,000 mules, 3,804,000 all cattle (includes milch cows), 267,000 sheep, 1,666,000 swine. Output of milk (1949), 15,568,000,000 lb.; of creamery butter, 168,214,000 lb.; of American cheese, 430,102,000 lb. The wool clip, in 1950, amounted to 1,528,000 lb. of wool from 191,000 sheep. National forests (1948), 2,019,018 acres.

Iron ore (1,405,775 tons in 1949), zinc, lead, stone, granite and lime are the chief mineral products. Total value of mineral products in 1948 was $37,641,000.

In 1947 (census) there were 6,979 manufacturing establishments with 343,008 production wage-earners earning $906,112,000; value added by manufacture was $2,260,574,000 compared with $681,970,000 in 1939.

There are (1950) 120 hydro-electric power plants (23 of them municipal) with a total installed capacity of 268,589 kw.; output, 1949, was 978,563,000 kwh.

Trade unions are organized in the Wisconsin State Federation of Labor, consisting (1950) of 1,116 local unions with approximately 231,000 members,

Twenty-three international unions affiliated with the C.I.O. had, 1948, about 100,000 members in the state. The railway brotherhoods are also represented.

On 1 Jan., 1950, there were 6,367 road miles of steam railways operated in the state, besides 283 miles of electric railway and 68 miles of trolley coach routes. There were, in 1950, 167 airports and 14 seaplane bases, of which 62 airports and 4 seaplane bases were municipal; 21 were lighted. Eleven cities and towns are served by 7 scheduled airlines.

Including 8,770 miles of city and village streets, the state had on 1 Jan., 1950, 94,365 miles of highway; the state trunk highway system of 10,816 miles includes 4,986 miles of concrete, 5,407 miles of mixed bituminous surfacing and 423 miles of gravel and earth maintenance.

WYOMING.

Government.—Wyoming, first settled in 1834, was admitted into the Union on 10 July, 1890. The Legislature consists of a Senate of 27 members, elected for 4 years (about one-half retiring every 2 years), and a House of Representatives of 56 members elected for 2 years. The Governor is elected for 4 years. The state contains 23 counties. The capital is Cheyenne. The state sends to Congress 2 senators and 1 representative, the latter elected by the voters of the entire state. The suffrage extends to all citizens, male and female, who can read, and who have the usual residential qualifications.

Governor.—Frank A. Barrett (R.), 1951–55 ($10,000).
Secretary of State.—C. J. Rogers (R.).

Area and Population.—Area, 97,914 square miles, of which 408 square miles are water. Of the total, about 3,438 square miles are comprised within the Yellowstone National Park, which since 1872 has been reserved for public uses, and 150 square miles contained in the Grand Teton National Park established in 1929. There are 4 national monuments, Devil's Tower, Fort Laramie, Shoshone Cavern and Jackson Hole. The federal government owns 32,055,721 acres (51% of the total area of the state); 11 national forests, of which 5 are wholly within the state (1949), 9,013,328 acres.

Census population, 1 April, 1950, 290,529, an increase of 39,787 or 15·9% since 1940. Birth rate, 1949, was 25·4 per 1,000 population; death rate, 8·3.

Births in 1949 were 7,359; deaths, 2,405. Federal census results for 4 years (including distribution by sex in 1940) were :—

Years	White	Negro	Indian	Asiatic	Total	Per sq. mile
1910	140,318	2,235	1,486	1,926	145,965	1·5
1920	190,146	1,375	1,343	1,538	194,402	2·0
1930	221,241	1,250	1,845	1,229	225,565	2·3
1940	246,597	956	2,349	840	250,742	2·6
Male . .	132,782	492	1,238	543	135,055	—
Female .	113,815	464	1,111	297	115,687	—

In 1940 the foreign-born white population numbered 16,779 (6·8% of the total), of whom 1,490 (8·9%) were English, 1,392 German, 1,353 Swedish, 1,325 Russian and 1,198 Mexicans. Japanese numbered 643, of whom 390 were citizens. Of the total population in 1940, 37·3% were urban, 0·4 Negro and 40% (84,243 males and 16,166 females) gainfully employed; 69,374 occupied dwelling units had an average of 3·6 persons; 2,154 men and 1,875 women were reported divorced. The Federal Bureau of Indian Affairs in 1945 administered 2,080,618 acres, of which 1,940.315 acres were allotted to tribes. Aliens registered in Dec., 1940, numbered 5,917.

The largest towns are Cheyenne (capital), with census population (preliminary) in 1950 of 31,807; Casper, 23,557; Laramie, 15,498, and Sheridan, 11,402.

Education.—In 1940, illiterates 10 years of age or older numbered 2,866 (1·7% of that a[illegible] of persons between the ages of 5 and 24, 53,904 (59·0%) were [illegible] school.

In 1949–50, there were 2,001 teachers serving 5,308 rural and 40,696 elementary pupils; 90 high schools had 869 teachers and 13,581 pupils. Expenditure on elementary and secondary schools in 1948–49 was $12,444,896. Racial discrimination in public schools is permitted. Average salary of teachers, 1948–49, was $2,563. The University of Wyoming, founded at Laramie in 1887, and with branches at Powell, Sheridan and Torrington, had in 1949–50, 363 full-time professors and instructors and 3,697 students. There is a junior college at Casper.

Religion and Welfare.—Chief religious bodies are the Roman Catholic (with 17,695 members in 1936), Mormon (16,497), and Methodist (6,284). Total, all denominations, 67,770.

Marriage licences are issued only after both applicants have presented a physician's certificate (void after 30 days) showing freedom from venereal disease. Inter-marriage is prohibited between white and Negro, Malayan or Mongolian.

Old Age Assistance (maximum $70 a month for single person and $115 for husband and wife) is provided for needy American citizens 65 years of age or older who are residents of the state and county at the time of application; payments bridge the difference between a standard personal or household budget and actual income. In Sept., 1950, 4,301 persons were drawing an average of $55 37 per month. Aid to 573 families with 1,516 dependent children averaged $98 11 monthly per family, and aid to 100 blind averaged $53 54 monthly.

In 1949, the state had 31 hospitals (3,587 beds) registered with the American Medical Association. In Dec., 1949, hospitals for mental diseases had 996 patients or 344·9 per 100,000 population.

The state penal and reformatory system in 1950 held 310 men and women. Of the state's 29 local jails (county and city) the U.S. Bureau of Prisons, as of 30 June, 1949, rated 19 as sub-standard, unsuitable for the housing of Federal prisoners.

Finance.—The cash receipts and disbursements for the 2 years ending 30 Sept., 1950, were (in dollars):—

Balance, 1 Oct., 1948	23,795,249	Disbursements, 2 years	77,851,157
Receipts, 2 years	80,730,300	Investments made	4,472,400
Investments paid	3,064,658	Balance, 30 Sept., 1950	25,266,650
Total	107,590,207	Total	107,590,207

On 30 Sept., 1950, the net long-term debt was $825,000 in revenue bonds, and $770,000 in highway bonds.

Production and Industry.—Wyoming is semi-arid, and agriculture is carried on by irrigation and by 'dry farming.' Irrigation began on a small scale in 1853 in the extreme south-west and spread north-eastward. Irrigable lands, 1940, amounted to 2,277,046 acres; area irrigated, 1939, 11,527 farms covering 1,486,498 acres. In 1945 there were 13,076 farms and ranches with a total area of 33,116,554 acres, of which 1,909,000 acres were crop land; total value of farm land and buildings, 1945, $232,043,000. Under the Act passed in 1941, 36 soil conservation districts have (1950) been established, covering 31,071,379 acres, including 12,897,539 acres in 8,411 farms and ranches. Better stocking of ranches (735,397 acres) has been an important feature.

Cash income, 1949, from crops was $37,996,000; from livestock, $100,802,000. Principal crops are:—Alfalfa (310,000 tons), sugar beet (392,000 tons), potatoes (1,870,000 bushels) and cereals (17,517,000 bushels). The wool clip (1950) yielded 17,285,000 lb. of wool from 1,782,000 sheep. Animals on farms on 1 Jan., 1950, were:—80,000 horses, 56,000 milch cows, 1,001,000 all cattle, 1,980,000 sheep and 85,000 swine.

The state has numerous fish hatcheries and the largest elk herds in the world.

Wyoming is largely an oil-producing state. In 1948 the output of coal was 6,300,000 short tons; petroleum, 54,004,000 barrels; natural gasoline, 35,134,000 gallons; natural gas, 52,404 million cubic feet; iron ore 689,591 long tons; bentonite, 383,815 tons. The quarries yield limestone and sandstone; phosphate rock, tin, sodium salts and vermiculite are found. Value of mineral products in 1948 was $172,818,000.

The state's labour force, 1 Oct., 1950, totalled 115,300, of whom 1,100 (1%) were unemployed; none were employed on public relief works.

The 1947 federal census showed 256 industrial establishments with 4,285 wage-earners receiving $12,291,000; value added by manufacture, $34,957,000.

In 1948, the steam railways had a length of 1,930 miles. There were 124 airports (56 municipal) in 1950. The state highway system comprises 4,552 miles, of which only 100 miles are gravel. In 1949 there were 95,206 passenger cars, 35,358 trucks and 14,619 trailers registered.

ALASKA.

Government.—Alaska was purchased by the United States from Russia under the treaty of 30 March, 1867, for $7,200,000, at one penny an acre. It was not organized until 1884, when it became a 'district' governed by the laws of the state of Oregon. By Act of Congress approved 24 Aug., 1912, Alaska became a Territory; the legislative assembly consists of 16 senators, elected for 4 years, and 24 representatives, elected for 2 years. Thinly settled districts, formerly populous in 'gold rush' days, still control one-half of the Senate though representing only one-third of the voters. Congress reserved to itself the right to legislate on certain subjects, so that the Territory is governed conjointly by Congress at Washington and by its local legislative assembly. Regular sessions are held biennially, and last for 60 days. Special sessions may be called by the Governor. The latter is appointed for four years by the President.

As the result of the war the Army has established an Alaskan Department and the Navy the Seventeenth Naval District, both with headquarters in Alaska.

The Territory is represented in Congress by one delegate, elected biennially, who sits in the House of Representatives, but has no vote.

A Bill to admit Alaska into the Union as the 49th state passed the House of Representatives, 3 March, 1950, but at the end of the year was awaiting action in the Senate. On 8 Oct., 1946, the voters of Alaska, on a referendum voted by 9,630 to 6,822 in favour of statehood.

Governor.—Ernest H. Gruening, 1949-53 ($15,000).
Secretary of Alaska.—Llewellyn M. Williams.

Area and Population.—The gross area (land and water) is 1,518,717 sq. km. or 586,378 square miles. Only 1½% of the land area (571,065 square miles) is in private ownership. Alaska has 2 national forests: the Tongass with an area of 16,046,000 acres and the Chugach with an area of 4,802,000 acres; total area, 20,848,000 acres under the U.S. Forest Service. Mt. McKinley National Park embraces 1,939,200 acres. Census population, in 4 census years, was:—

Year	Population	Per sq. mile	Year	Population	Per sq. mile
1910	64,356	0·1	1940	72,524	0·1
1930	59,278	0·1	1950	128,643	0·2

The civil population is stationary; in 83 years under the American flag the aboriginal population of around 30,000 has remained unchanged and the net intake of Americans has totalled 60,000 in the period. The sharp rise

shown in the 1950 census reflects the increase in military activity. During the year ending 30 June, 1949, 9,245 aliens and 49,273 citizens entered Alaska.

Of the population in 1940, 43,003 were males and 29,521 females; 39,170 were whites, of whom 8,786 were foreign born and 30,384 were native stock (of whom 11,283 were Indians, 15,576 were Eskimos and 5,599 were Aleuts); of the foreign born, 4,334 were from Scandinavian countries, 589 were Germans and 263 were Japanese. Aliens registered in Dec., 1940, numbered 3,405.

In the calendar year 1949 there were 1,436 marriages, 3,526 births, 1,182 deaths and 130 adoptions.

The largest town is Anchorage, which had (census of 1950) a population of 11,060; other towns are Juneau, seat of the government, 5,818; Fairbanks, 5,625; Ketchikan, 5,203; Sitka, 2,080; Nome, 1,852; Petersburg, 1,605. There are altogether 29 incorporated towns with an assessed valuation, 1950, of $109,000,000.

Education and Justice.—In 1940, of 24,778 persons between 5 and 24 years (including all races), 47·6% were attending school; 44·3% of the native races were attending school. During 1950–51, there were 653 teachers in 68 rural and 26 city schools with 13,908 pupils; the Office of Indian Affairs maintained 90 elementary day schools with an enrolment of 4,000 pupils and 3 vocational high schools with 900 students; this office also handles the education, hospitalization (6 native hospitals) and general care of the native population. The 80th Congress, 1947–48, severely reduced the appropriations for this service, affecting some 1,300 children. The University of Alaska (founded in 1922) had 37 teachers and a total enrolment of 509 in 1950–51, excluding those enrolled in the extension courses.

The Territory constitutes one judicial district with 4 divisions, each with a district judge appointed by the President.

Religion and Public Welfare.—In Alaska are many [illegible] missions representing the Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist and other denominations. The Alaska Department of Health provides sanitary inspection, public health laboratories, nursing services for infants and crippled children's welfare services.

Old Age Assistance was established under the Federal Social Security Act, and 1,614 persons were recipients of an average of $57·88 per month in Nov., 1950; 645 families with 1,482 dependent children were receiving an average of $30 67 monthly. A Department of Public Welfare, established in 1937, handles welfare cases. There are 26 hospitals [illegible] with the American Medical Association. Indians are now eligible [illegible] under the law. Tuberculosis afflicts 5% of the population, with a death rate slightly under 9 times that in the United States; 4 persons die weekly of tuberculosis, due to the poor housing; the death rate among natives is very high while among whites it is about twice that in the United States. Efforts of the federal government through the Alaska Native Service, the U.S. Public Health Service and of the Territorial Department of Health have included intensive search for cases, education, BCG vaccination and an increase of hospital beds for tuberculosis from 70 in 1945 to 593 in Dec., 1950.

Alaska is the only section of the United States where women, by legislative Act, are guaranteed equal pay for equal work.

Finance.—Alaskans are subject to all the tax laws of the United States. In addition there is a Territorial income tax on individuals and corporations (equal to 10% of the federal income tax) and a system of license taxes on

businesses. All adults gainfully employed, between the ages of 21 and 55 pay a school tax of $5 per year. Taxation is light; the salmon industry, with an output of $100 million, paid in 1948 Alaskan taxes totalling $671,205.

Territorial receipts are derived from licences to conduct businesses.

	Dollars		Dollars

The Territory has no funded debt.

Production and Industry.—In some parts of the Territory the climate during the brief summer is not unsuitable for agricultural operations. In 1939 there were 623 farms with a total area of 1,775,752 acres. Total value of land and buildings in 1939 was $3,841,045. The 1939 census showed 24,291 dogs used as work animals and 496 horses, mules and colts. In Northern and Western Alaska are 200,000 square miles of treeless region worthless for agriculture but capable of furnishing pasturage for 4,000,000 reindeer. There were (in 1950) 28,000 reindeer on the ranges. The Office of Indian Affairs administers the reindeer industry on behalf of the native Eskimos and Indians; all non-native reindeer owners have been bought out. In 1946, 5,000 reindeer were butchered. The government-owned fur-seal herd of the Pribiloff Islands, administered by the Department of the Interior, comprises about 85% of the fur seals of the world. This herd contained 3,613,653 animals on 10 Aug., 1947; 70,142 fur-seal skins were taken in 1949, mainly from 3-year-old males. Subsequent sale realized $4,208,520 gross. The territory's 'wild life on the hoof' has an estimated value of about $100 million, of which $4 million worth is cropped annually by trappers and hunters. Value of furs shipped in the fiscal year 1949 was $2,075,547 (excluding fur seals). Heading the list were mink, beaver and Alaska marten. Game and wild fur-bearers are nominally protected by closed seasons, but there are only 8 game wardens to police an area one-fifth as large as that of the United States. By an exchange of notes in Jan., 1947, the United States and Canada extended indefinitely their war-time agreement for the protection of fur seals.

In South-eastern and South-Central Alaska timber fringes the shore of the mainland and all the islands and extends inland to a depth of 5 miles. The estimated stand is about [illegible] million board feet, of which 73% is western hemlock, 21% spruce and 6% Western red and Alaska cedar. A total of 55 million board feet of timber were produced in the fiscal year 1949, mostly spruce, but including hemlock and cedar.

The chief industries of Alaska are salmon-fishing and mining; about one-third of the population derives their livelihood from the sea. In 1947 the commercial fisheries of Alaska employed 27,253 persons; the value of the products (317,482,383 lb.), exclusive of aquatic furs, was $107,166,931. The output of canned salmon, from 118 canneries in 1949, totalled 4,391,051 cases, valued at $82,412,289.

Gold is worked mainly in the Yukon River basin, and at Nome and other places on the west coast. In 1949, output of gold was 229,416 fine oz. (755,970 fine oz. in 1940); silver, 36,056 fine oz.; copper, 4 short tons; lead, 51 short tons; zinc, 2 short tons; mercury, 100 flasks (of 76 lb.); antimony ore, 74 short tons; tin, 67 long tons. The mining industry, 1947, employed

2,488 men; [illegible] due to high costs. Total value of minera production, [illegible] ural gas was discovered in 1949 south of Point Barrow.

An 'Alaskan Development Board,' with a biennial appropriation of $80,000, was created in 1945; its office is in Juneau. It has helped in the establishment of numerous small businesses and is assisting the establishment of electro-metallurgical plants and of pulp and paper mills in south-east Alaska.

Commerce and Communications.—The value, in dollars, of the Territory's commerce for 6 calendar years was as follows :—

Year	Imports from U.S.	Imports from others	Merchandise exports to U.S.	Exports, gold and silver to U.S.	Merchandise exports to others
1940	48,039,460	149,833	40,173,952	20,984,000	471,315
1942	89,497,621	2,026,655	58,199,935	12,139,485	818,327
1944	62,042,363	596,456	72,359,111	1,026,443	271,111
1946	75,005,229	571,233	68,837,904	4,382,636	1,054,863
1947	116,809,279	502,487	123,640,865	5,886,594	1,907,978
1948 [1]	—	2,779,149	—	—	2,408,928

[1] In April, 1948, the practice of requiring export declarations for shipments between the United States and Alaska was discontinued.

Products shipped to the United States in the fiscal year 1947 were valued as follows:—Canned salmon, $43,530,071; all other fish products, $18,575,514; fur skins, $5,474,549; gold, $4,818,635; all others, $7,606,369; total, $80,005,138. Imports from the United Kingdom, 1948, £1,015; 1949, £397; 1950, £604; exports to the U.K., 1948–50, nil.

There is a railway of 111 miles from Skagway to the town of Whitehorse in the Canadian Yukon region); thence transport is by bus or aeroplane, or, in summer, by steamer. The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 470 miles (509 miles, including branches). In the fiscal year 1948 it carried 79,015 revenue passengers and 929,881 tons of revenue freight, much of it military requirements. In the fiscal year ending 30 June, 1948, 34 aviation companies (26 Alaska carriers and 8 States-Alaska) carried 129,616 passengers, 18,758,495 lb. of freight and 1,994,091 lb. of mail. More people and light cargo now travel by air than by any other means. Alaska maintains, extending from navigable waterways and railways into interior, 3,141 miles of roads, including 80 miles of tramway and 4,116 miles of permanent trail. The Alaskan towns are connected by telephone with the United States and with the United States and Canada by telegraph and radio; since 1901 these facilities have been furnished by the Signal Corps of the U.S. Army; there are 230 post offices, and good mail services to the Territory.

The Alaska Highway extends 1,527 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It is 24 feet wide and was built by U.S. Army engineers between 12 March and 1 December, 1942, at a cost of $138 million. The greater portion of it, because it lies in Canada, is now maintained by the Canadian government. In 1949, 4,464 passenger cars, 2,242 trucks and 124 buses carrying in all 16,282 passengers entered Alaska over this Highway; passengers departing numbered 12,165.

Regular shipping services to and from the United States are furnished by 2 steamship lines operating out of Seattle and other Pacific coast ports. Complaints as to freight rates, etc., form one of the chief political issues in

Alaska and are persistently forwarded to Washington. Three Canadian companies also furnish a regular service from Vancouver, B.C.

Alaska had, on 30 June, 1950, 4 national banks and 17 Territorial banks with combined capital of $1,505,000, surplus and net undivided profits of $3,572,915, and total deposits of $78,103,949.

HAWAII.

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54′ and 22° 15′ north latitude, and 154° 50′ and 160° 30′ west longitude. They are about 2,091 miles south-west of San Francisco.

Government.—The Hawaiian Islands (more than 20 in number; 8 of them inhabited), formerly known as the Sandwich Islands, celebrated in Aug., 1928, the 150th anniversary of their discovery by Captain James Cook, the English navigator. The islands formed during the greater part of the 19th century an independent kingdom, but in 1893 the reigning Queen, Liluokalani (died 11 Nov., 1917), was deposed and a provisional government formed; in 1894 a Republic was proclaimed, and in accordance with the request of the people of Hawaii expressed through the Legislature of the Republic, and a resolution of the United States Congress of 6 July, 1898 (signed 7 July by President McKinley), the islands were on 12 Aug., 1898, formally annexed to the United States. On 14 June, 1900, they were constituted as the Territory of Hawaii. The Organic Act has since been amended several times.

Efforts to persuade Congress to grant statehood to Hawaii have been made since 1940. At the Nov., 1950, election voters ratified by 82,788 to 27,109 a constitution drafted, in anticipation of statehood, by a constitutional convention of 63 delegates.

There is a Legislature of two Houses, a Senate of 15 members elected for 4 years' and a House of Representatives of 30 members elected for 2 years. In Nov., 1950, 9 Republicans and 6 Democrats were elected to the Senate and 21 Republicans and 9 Democrats to the lower House. Sessions, limited to 60 days, are held biennially. The Governor and Secretary are appointed for 4 years by the President of the United States; both must have been residents of the islands for 3 years.

The territory is represented in Congress by a delegate elected biennially to the House of Representatives.

Governor.—(Vacant) ($15,000).

Secretary of the Territory.—Oren E. Long.

Territorial Delegate (to the U.S. House of Representatives).—Joseph R. Farrington (R.) (elected 7 Nov., 1950).

Area and Population.—The area of the 8 principal islands is 6,435 square miles, with census population (preliminary) on 1 April, 1950, of 493,437, an increase of 70,107 or 16·6% since 1940. The 1950 totals by 'counties' were:—Hawaii, 67,683 (73,276 in 1940); Honolulu, 347,529 (258,256); Kauai, 29,838 (35,818), and Maui, 48,387 (55,980). Figures for racial groups, 1950, are:—184,732 Japanese, 81,911 Caucasians, 90,079 Hawaiians and part-Hawaiians, 61,040 Filipinos, 30,566 Chinese, 10,351 Puerto Ricans, 7,624 Koreans and 27,134 others. Of the total, 86·3% were citizens of the United States. The principal islands of the group are Hawaii, 4,030 square miles (population, 1950, 67,860); Maui, 728 (40,440); Oahu, 604 (320,732); Kauai, 555 (30,088); Molokai, 260 (5,486); Lanai, 141 (2,920); Niihau, 72 (185); Kahoolawe, 45 (0). The capital, Honolulu, on the island of Oahu, had an estimated population in 1950 of 232,193, and Hilo, 27,104.

Inter-marriage between the races is popular. Of the 5,752 persons married in the year ending 30 June, 1948, 1,668 or 28·9% married a wife or husband of a different race:—280 white men married Hawaiians or part-Hawaiians, 217 married Japanese, 61 Filipinos, 42 Chinese, 37 Puerto Ricans and 36 Koreans; 76 white women married Hawaiians or part-Hawaiians, 35 married Filipinos, 25 Puerto Ricans, 25 Japanese and 6 Koreans. Of 132 Hawaiian brides only 25 married into their own race.

Religion, Education and Welfare.—The Hawaiians are Christians. There is an American Protestant Episcopal bishop at Honolulu; also a Roman Catholic bishop, and ministers of various denominations.

Elementary education is free. The language in the schools is English. In 1950 there were 106 kindergartens, 135 elementary schools, 26 intermediate schools and 25 high schools, with a total enrolment of 89,951 and a staff of 3,752. The pupils in the public schools in 1950 were classed as 89,181 born in the United States (*i.e.* including Hawaii) and 770 outside. There are a teachers' college, a reformatory school for boys and one for girls, 4 vocational schools, a school for the deaf and blind, a school for the feeble-minded. In 1950 there were 114 private schools, with 1,101 teachers and 23,584 pupils; also a territorial university, the University of Hawaii, founded in 1907, with a registration of 5,862 and a staff of 464. The total expenditure for public elementary and secondary schools in 1949 was $16,583,714.

During the biennium of 1949–51 the Public Welfare Deparment will have $10,540,107 to spend for public assistance and care of needy persons, including hospital and medical care; the federal government provides 41·3% of this fund. In June, 1950, old age assistance went to 2,469 persons

receiving an average of $32·81 per month; 4,009 families with 11,871 needy children received $88·23; 111 blind persons received a monthly average of $37·61.

Justice.—Hawaii has a supreme court, circuit courts, a court of domestic relations, district courts and a land registration court, and a juvenile court. The judges of the supreme and circuit courts are appointed by the United States President; the district magistrates by the Chief Justice of the Supreme Court of Hawaii. There is also a United States District Court, the judges of which are appointed by the President.

Finance and Defence.—Revenue is derived mainly from taxation of real and personal property, gross and personal income, and inheritance taxes, licences, land sales and leases. For the year ending 30 June, 1950, the receipts in the general fund were $46,580,268 and disbursements $49,382,041; the bonded debt amounted to $19,152,236.

Labour.—The local branch of the International Longshoremen's and Warehousemen's Union has organized the workers in the two large industries, sugar and pineapples; there are also smaller unions affiliated with the American Federation of Labor.

Production and Commerce.—Farming is highly commercialized, aiming at export. Of the total area, 7% or 287,210 acres are under cultivation and 34% or 1,638,210 acres are in pasture, producing beef cattle and sheep. Of the cultivated area, 96% is devoted to sugar cane or pineapples under company management and the remainder, 15,488 acres is in diversified crops under individual farmer management. In 1940, there were 4,995 farms with [illegible] of 2,485,648; total value of land and buildings was $1[illegible] the total farm area, 2,398,145 acres, or 96%, were in 135 holdings of 500 acres or more, an average of 17,763 acres; 57% of the 4,995 farms had an average of only 3·9 acres; 1,882,113 acres were operated by managers, 490,396 acres by owners and 113,139 acres by tenants.

Sugar and pineapples are the staple industries, while molasses, coffee, hides, bananas and fresh flowers are also exported. For the calendar year 1949, sugar cane was harvested from 84,379 acres, producing 955,891 short tons of sugar. The pineapple pack for the crop year ending 30 June, 1950, was 23,739,983 cases of canned fruit and juices. In 1948, animal products had a total value of $21,964,520. But sugar and pineapple marketings, at $187,278,000, are about 80% of the total [illegible] income. The 64 forest reserves aggregate 1,027,299 acres; [illegible], 1,588,430 acres.

For imports and exports for the calendar years 1941–45 *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 704. The shipments of merchandise from the United States to Hawaii for the fiscal year 1948 amounted to $340,446,264, and those from Hawaii to the United States to $181,330,471, of which sugar, pineapples and coffee were the principal items. United Kingdom exports to Hawaii (Board of Trade figures) in 1948 totalled £65,101; 1949, £53,782; 1950, £88,499; imports, £424 in 1948; £3,876 in 1949; £301 in 1950.

Shipping and Communications.—Several lines of steamers connect the islands with the mainland of the United States, Canada, Australia, the Philippines, China and Japan. In 1949–50, 861 vessels of 7,280,503 gross tons entered and cleared the port of Honolulu. An inter-island steam navigation company provides communication between the different islands. Post offices number 91. Railway operations, 1950, are confined to the waterfront and harbours at Honolulu (20 miles) and a passenger and freight railway

(41 miles) on the island of Maui. Motor vehicles (1949) numbered 128,113. There are (1949) 89,204 telephones (more than 90% automatic) on the islands of Oahu, Maui, Hawaii, Kauai and Molokai, a radio-telephone system connecting the 4 principal islands with the United States, and wireless telegraphy in operation between the islands, vessels at sea and with the Pacific coast. Hawaii is connected by cable with both shores of the Pacific and by radio-telephone to the United States, Europe and other parts of the world. There are 8 commercial broadcasting stations.

Aviation.—Six scheduled and 3 non-scheduled airlines connect Hawaii with the United States, British Columbia, the Antipodes and the Orient. In 1949 passengers numbered 116,652. Three scheduled and 3 irregular air carriers operate between the islands and in 1949 carried 389,227 inter-island passengers.

Banking.—Four banks with 40 branches in operation on 30 June, 1950, had total deposits of $376,456,159, of which $197,219,773 were time or savings deposits.

PUERTO RICO.

Government.—Puerto Rico, by the treaty of 10 Dec., 1898 (ratified 11 April, 1899), was ceded by Spain to the United States. The name was changed from Porto Rico to Puerto Rico by an Act of Congress approved 17 May, 1932. Its constitution is determined by the 'Organic Act' of Congress (1917) known as the 'Jones Act.' Puerto Rico has representative government, the franchise being restricted to citizens 21 years of age or over, residence (1 year) and such additional qualifications as may be prescribed by the Legislature of Puerto Rico, but no property qualification may be imposed. The executive power resides in a Governor, who, since 1948, is elected directly by the people. Seven heads of departments form the Governor's Executive Council. The legislative functions are vested in a

Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). Puerto Rico is represented in Congress by a Resident Commissioner to the United States, elected by the people for a term of 4 years. All Acts of the Puerto Rican legislature have to be submitted to the U.S. Congress which is free to annul or amend them.

On 5 Aug., 1947, President Truman signed Public Law 362 amending the 'Jones Act' to provide: that the governor shall be elected by the voters of Puerto Rico every 4 years, beginning in Nov., 1948; that the Governor shall appoint the heads of all the departments of the Insular Government (including the Attorney-General and the Commissioner of Education, heretofore appointed by the President), that there shall be a co-ordinator of Federal Agencies in Puerto Rico appointed by the President with the consent of the Senate. The Auditor of Puerto Rico and the 5 justices of the Supreme Court will continue to be appointed by the President.

There is a revolutionary 'Nationalist Party,' seeking complete independence, and an 'Independence Party,' seeking independence by constitutional means. The strongest parties are the 'Popular Democratic Party' and the 'Coalicion' of Socialists, Liberals and Republicans.

The judiciary comprises a United States District Judge and United States Attorney, appointed by the President; a Supreme Court of 5 members, also appointed by the President, and an Attorney-general appointed by the Governor; 9 district courts with 23 judges appointed by the Governor; the 51 judges of the 37 municipal courts and the 54 justices of the peace are appointed by the Governor.

Governor.—Luis Muñoz Marín, 1949–53 ($10,600).
Executive Secretary.—Roberto Sánchez Vilella.

Area, Population and Education.—The island has a land area of 3,423 square miles, and a population, according to the census of 1950 (preliminary), of 2,205,398, an increase of 336,143 or 18·0% over 1940; density was 644·2 per square mile. Males (1940 census) numbered 938,280; females, 930,975. 76·5% of the population were white. Of the estimated population, 1 July, 1948 (2,146,686), about 750,000 were bilingual, Spanish being the mother tongue and English the official language.

Chief towns (1950 census, preliminary), are:—San Juan, 223,949; Río Piedras, 132,369; Ponce, 99,190; Mayaguez, 58,744; Caguas, 33,733.

The Puerto Rican island of Vieques, 10 miles to the east, has an area of 51·7 square miles, and 9,211 inhabitants, who grow sugar and pineapples and rear cattle. The island of Culebra, with 877 inhabitants, between Puerto Rico and St. Thomas, has a good harbour.

Education was made compulsory in 1899, but facilities are inadequate; 28% of the children had (1950) no access to schooling. In the school-year 1949–50 there were 9,138 public classrooms, with 386,229 public day-school pupils and 20,962 in accredited private schools. The University of Puerto Rico, in Río Piedras, 7 miles from San Juan, with a branch in Mayaguez, is open to both men and women, as is also the San Germán Polytechnic Institute. The University had 11,337 (including 2,000 extra mural) students in 1949–50. The percentage of illiteracy is 24% of those 10 years of age or older. Since Aug., 1949, all instruction below senior high school standard is given in Spanish only.

Motion-picture theatres numbered 155 in 1948, with seating capacity of 82,229.

Finance.—Receipts and disbursements (in millions of dollars) of the general fund (apart from trust funds) for the year ending 30 June, 1950, were :—Balance, 1 July, 1949, 40·5; receipts, 1949–50, 121·8; total, 162·3. Disbursements, 1949–50, 117·0; transfer to other funds, 5·4; balance, 1 July, 1950, 39·9; total, 162·3. In addition, the special fund had a balance of $20·3 on 1 July, 1949; receipts, 1949–50, 19·3; total, 39·6. Disbursement, 1949–50, 19·3; transfer to other funds, 2·1; balance, 1 July, 1950, 18·2; total, 39·6. Assessed value of property on 30 June, 1950, was $458,681,463, and bonded indebtedness was $31,036,000.

The United States administers and finances the road, post and telegraph services, spending on these and other departments, including air and naval bases, an average of $1 million weekly.

The police force (1950) consisted of 2,466 men.

Production, Industry and Commerce.—The cultivated land in 1940 was divided into 55,519 holdings with a farm area of 1,885,874 acres; value of land and buildings was about $173,860,000. About 76% of the farms (42,990) and 56% of the farm area (1,072,144 acres) were operated by owners; managers operated 1,303 large farms covering 30% of the farm area. By 1949, 83 'proportional profit' farms of from 323 to 2,788 acres (mostly sugar cane) had been established. The land is bought from the big corporations by the Land Authority. These farms are worked by teams under a trained manager somewhat on the model of Soviet 'collectives,' but each farm labourer owns a private plot of 1–3 acres.

The chief products are export crops, sugar, molasses, tobacco, pineapples, coconuts and vegetables, and the principal industries are the refining and manufacture of sugar and the manufacture of embroideries, men's clothing, rum, canned fruits, alcohol, straw hats, cigars, fruit juice, cordials, bay rum, buttons and rugs. With the help of the Industrial Development Company (a government agency) plants for the production of glass products, cement, paperboard, shoes, clay products and textiles have been established. Beginning May, 1948, certain established industries and new industrial enterprises will [illegible] a period of 12 years, complete exemption from certain taxes, [illegible] income tax, all local property and municipal taxes and some excise charges on machinery and materials.

Production of raw sugar, 96 degree basis, for the 1949 crop year, was 1,277,482 short tons, with refined sugar output of 208.840 short tons.

Sugar exported in 1949 to the United States amounted to 1,084,700 tons, valued at $123,182,935; tobacco leaf exported to the United States was 141,711 cwt. ($9,301,837); rum exports, 935,262 proof gallons ($2,697,506).

Gold, silver, iron, copper, bismuth, tin, mercury, platinum and nickel are found in the island, but in quantities not warranting commercial exploitation. There are salt works and deposits of high-quality marble.

In the calendar year 1949, imports into Puerto Rico amounted to $350,504,151, of which 93·0% came from the United States; exports were valued at $204,125,026, of which 95·9% went to the United States.

The United Kingdom imported from Puerto Rico in 1947, £1,150; 1948, £4; 1949, £123,106; 1950, £94,607; and exported to Puerto Rico, £63,012 in 1947, £71,730 in 1948, £84,964 in 1949, £255,137 in 1950.

Shipping and Communications.—In 1949, 3,130 American and foreign vessels of 9,916,700 gross tons entered and cleared Puerto Rico.

The Insular Department of the Interior had under maintenance in April, 1950, 2,235 miles of paved road. There are 385 miles of railway. The

railway system connects towns on the west coast and now almost encircles the island and penetrates the interior. On 30 June, 1948, there were 26 broadcasting stations, 3 cable companies and 31,988 telephones.

Twelve banks on 30 June, 1949, had total deposits of $301,443,375 (including those of the insular government, $50,319,007) and debits of $256,919,432. Bank loans were $119,412,788.

There is a British consul at San Juan.

VIRGIN ISLANDS OF THE UNITED STATES.

Government.—The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark for $25,000,000 in a treaty ratified by both nations and proclaimed 25 Jan., 1917.

The Act of 22 June, 1936, provided a civil government for the Virgin Islands; it is known as the Organic Act of the Islands; local legislative powers are vested in a municipal council of St. Thomas and St. John and in a municipal council of St. Croix, respectively. The first-named consists of 7 members and the second-named of 9 members, elected for a term of 2 years beginning 1 January. Joint sessions of these municipal councils constitute the Legislative Assembly of the Islands. The capital is Charlotte Amalie, on St. Thomas Island.

Beginning on 1 Jan., 1938, the franchise was vested in residents of the Virgin Islands who are citizens of the United States, 21 years of age or over, and able to read and write the English language. [See THE STATESMAN'S YEAR-BOOK, 1936, p. 644.] Women are enfranchised. The executive power of the Islands and of the municipalities is vested in the Governor and exercised under supervision of the Secretary of the Interior.

Governor.—Morris F. de Castro, formerly Government Secretary, was appointed Governor by President Truman on 24 March, 1950. He is the first Virgin Islander to hold that position. His tenure is indefinite; salary, $15,000 per annum.

Area, Population and Education.—The Virgin Islands group, lying about 40 miles due east of Puerto Rico, between the Atlantic Ocean and Caribbean Sea, comprises the islands of St. Thomas (32 square miles), St. Croix (82 square miles), St. John (19 square miles) and about 50 small islets or cays, mostly uninhabited. The total area of the 3 principal islands is 133 square miles, of which the U.S. government owns 10,082 acres (12%).

The population, according to the census of 1 April, 1950 (preliminary), was 26,654, compared with 24,889 in 1940, an increase of 1,765 or 7·1%; density was 200·4 per square mile. Population had slowly declined since 1835, when it stood at 43,000, but began to recover in the 1940s; in 1946 births were 917 (656 in 1935) and deaths 408 (492); birth rate, 1948, was 30·6 per 1,000 population (27·9 in 1935); death rate, 12·6 (20·9). Of the 1940 total, 67·5% was urban; the 1940 census showed 9·0% white, 69% Negro and 22% mixed; 13·4% were illiterates. The population of each of the islands (1950) was 13,811, 12,096 and 747. There are 3 towns, Charlotte Amalie, on the island of St. Thomas, with a population (1950) of 11,463, and Christiansted and Frederiksted, on the island of St. Croix, with population of 4,110 and 1,925 respectively.

Education is compulsory. In St. Thomas there are 10 public and 5 private and parochial schools, and in St. John there are 4 public schools; the two communities have 116 teachers and 3,695 pupils. In St. Croix there are 9 public schools and 4 private and parochial schools; total enrolment, 2,972 pupils and 63 teachers. There are churches of the Protestant, Roman Catholic and Jewish faiths in St. Thomas and St. Croix.

Finance.—Revenues are derived from customs, income tax, real and personal property tax, trade tax, excise tax, pilotage fees, etc. Actual revenue for fiscal year ending 30 June, 1950, $1,241,190; actual expenditure, $2,055,988. The annual deficit is met by congressional appropriations.

Production and Industry.—The census of 1950 showed 525 farms in St. Croix, 204 in St. Thomas and 108 in St. John, a total of 837. Total assessed value of land and buildings in 1949 was $12,948,694. An extensive homesteading programme is under way in St. Croix; chief industries of St. Croix are sugar cultivation, cattle raising, vegetable growing and the manufacture of rum. St. Thomas is the leading port in the Virgin Islands; its industries are fuel bunkering and servicing of ships, manufacture of rum and bay rum, truck gardening, cattle raising, deep-sea fishing, handicrafts and tourism. The island of St. John is noted for its bay-leaf oil, extracted from the leaves of the bay tree, but the industry is now dormant; other resources are limited farming and cattle raising, production of charcoal, servicing winter residents and tourists. Exportation of rum in 1949–50 amounted to 661,943 proof gallons.

St. Thomas and St. John [illegible] tax exemptions to persons, firms,

or companies prepared to invest $10,000 in new industries or in the promotion of tourism.

Exports to the United States in 1949 were $1,734,524; total exports, $2,501,056; imports from the United States, $8,176,045; imports from other sources, $1,791,180.

United Kingdom imports from the Virgin Islands in 1948, nil; 1949, £2; 1950, nil; exports in 1948 were £28,421; 1949, £30,161; 1950, £73,610.

Communication.—There is a daily air-mail service from St. Thomas and St. Croix and cable offices in St. Thomas and St. Croix. Radio telephone service began on 15 Oct., 1946. There were 5 post offices in 1950.

Money and Banking.—United States currency became legal tender on 1 July, 1934, [illegible] that formerly issued by the National Bank of the Danish West I[illegible] form of the franc valued at 19·3 cents, United States money. The Virgin Islands National Bank succeeded the National Bank of the Danish West Indies on 1 May, 1935; on 31 Dec., 1949, it had capital and reserves of $391,660, total deposits of $4,057,681 (savings deposits, $1,859,617) and total assets of $4,474,698.

GUAM.

The island of Guam, situated at the southern extremity of the Marianas Archipelago, in latitude 13° 26′ N., longitude 144° 43′ E., is the largest island of that group. Magellan is said to have discovered the island in 1521, which was ceded by Spain to the United States by the Treaty of Paris (10 Dec., 1898). Guam was captured by the Japanese on 12 Dec., 1941. It was retaken by American forces on 10 Aug., 1944. Guam is of great strategic importance; large naval, army and air force personnel are concentrated on the island.

The length of the island is 30 miles, the breadth from 4 to 8½ miles, and the area about 206 square miles. Agaña, the seat of government, was destroyed during the re-occupation of Guam; it is being rebuilt on the same site, which is about 8 miles from the anchorage in Apra Harbour. The census (preliminary) on 1 April, 1950, showed a population of 58,754, an increase of 36,464 or 163·6% since 1940. The Malay strain is predominant. The native language is Chamorro, but Spanish is also spoken, and English is the predominar[illegible] taught in all schools. About 95% of the Guamanians are [illegible], [illegible] hers are Protestants of the Baptist and Seventh Day Adventist faiths.

From 1899 until 1949 the Governor has always been a naval officer appointed by the President. In 1949 the President, by Executive Order, transferred the administration of the island from the Navy Department to the Interior Department, the transfer to be complete by 1 Aug., 1950. An 'Organic Act,' passed by Congress, conferred full citizenship on the Guamians who, since 1940, had been 'nationals' of the United States.

The Governor and his staff constitute the executive arm of the government and the Guamanian Congress (House of Council and House of Assembly, meeting monthly) form the legislative branch. In Aug., 1947, the Congress was empowered to override the Governor's veto, with direct appeal to the Secretary of the Navy. The Congress is elected biennally by the permanent residents; its powers are [illegible]ose of an American state legislature.

The judiciary comprises 1 Court of Appeal (consisting of 2 Guamians and 1 military officer), an island court, a justice court and a police court. There are no juries. The Spanish law prevailing was superseded in 1933 by 5 civil codes based upon California law, drafted by the then Governor. Women are enfranchised.

Elementary education is compulsory. There were (1949) 8,802 pupils registered in 21 elementary schools and 1 high school. The staff included 6 administrators and 352 teachers, 80 of whom are half-time employees. The educational standards are stated to be equal to those in the more advanced states of the United States. Children of United States parents attend the same schools as the Guamians. The University of Hawaii has established a summer session in Guam. English, American history, sanitation, music, handicrafts and [illegible] are taught. Cost of the school system ($815,500 in 1949–50) is borne by Navy funds and local taxes.

There is a Government radio station on the island, and the Commercial Pacific Cable Co., both of which maintain continuous communication with all parts of the world. Commercial and government transportation by ship is available at regular intervals.

By steamer 3,337 miles from Honolulu, 1,506 from Manila and 1,353 from Japan, Guam is only 25 air hours from Honolulu, 11 from Manila and 10 from Tokyo, and can be reached in but 42 hours from the west coast of the United States. There is daily air traffic between Guam, the United States, Japan and the Philippines.

The port is a closed port of call for foreign vessels and permission to enter must be obtained from the Navy department in each case.

The products of the island are maize, taro, sweet potatoes, bananas, pineapples, citrus fruits, limes, mangoes, papayas, breadfruit, coconuts, cassava and sugar cane. On 31 March, 1947, there were 1,360 acres under cultivation and another 1,400 acres cleared for planting. There were, in 1949, 3,243 head of cattle, 653 water buffaloes, 5,888 pigs, 370 goats, 63 horses and 71,675 chickens. Number of full-time farmers (1949), 595; part-time farmers, 695; full-time fishermen, 193. Grand total of crops harvested in July, 1948–June, 1949, was 664,595 lb.; fish caught, 1,151,126 lb.

Governor.—Carlton Skinner (the first civilian governor); inaugurated 27 Sept., 1949.

AMERICAN SAMOA.

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. In 1872 Commander Richard Meade, U.S. Navy, commanding the U.S.S. *Narragansett* visited Pago Pago and on his own responsibility consumated an agreement entitled 'Com-

mercial Regulations' with High Chief Mauga, but since this agreement was never ratified by the United States Senate, it never became [illegible]. In Jan., 1878, a treaty with the then independent Samoan Kingdom allowed the United States to establish a coaling station for naval and commercial vessels in Pago Pago harbour. On 14 June, 1889, a treaty between the United States, Germany and Great Britain proclaimed the Samoan Islands neutral territory, under a four-power government consisting of the three treaty powers and the local native government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes involving foreigners a Supreme Court of Justice, with an American citizen as presiding judge, was established. This arrangement continued till 1899, when, by the Berlin Treaty of 7 Nov. of that year, Great Britain and Germany renounced in favour of the United States all rights over the islands of the Samoan group east of 171° longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany, and later becoming a trusteeship under New Zealand.

Following this action the islands of Tutuila and Aunu'u were ceded voluntarily to the United States by their High Chiefs on 17 April, 1900, and the islands of the Manu'a group were ceded under similar circumstances on 16 July, 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb., 1929. Swain's Island, 210 miles north-northwest of the Samoan Islands, was ceded to the United States in 1925 and is administered as an integral part of American Samoa.

The total area of American Samoa is 73 square miles; census population (excluding the white naval personnel who are treated as transients), 1950, 18,602, all Polynesians or part-Polynesians. In the previous census (1940) the Samoans numbered 12,908, a large increase from the 5,697 recorded in the 1900 census. The island of Tutuila, 70 miles from Apia, has an area of 40·2 square miles, with a census population of 15,621 (including the island of Aunu'u). Ta'u has an area of 14 square miles, and the other islets (Ofu and Olosega) of the Manu'a group have an area of about 4 square miles with a population of 2,817, in 1950. Swain's Island, circular in shape, has a diameter of 1¼ miles. Population (1950) was 164.

The harbour at Pago Pago, which nearly bisects the island of Tutuila, is the only good harbour in Samoa. It is the seat of the United States Naval Government Unit, but American Samoa, as a whole, is constitutionally classified as an unorganized American possession; its indigenous inhabitants are American nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. All official publications are printed in both English and Samoan.

The Governor of American Samoa is a naval officer appointed by the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organized in 14 counties grouped in three districts, these counties and districts corresponding to the old Samoan political units. Each county has a county chief and one county chief in each district is also designated by the Governor to act as District Governor. On 25 Feb., 1948, a bicameral legislature was established, at the request of the Samoans, to have advisory powers. The upper house, known as the House of Alii, is composed of the holders of the 12 highest ranking titles; the lower House of Representatives consists of 54, one elected biennially by each of the 52 villages in open meetings and 2 elected by those Samoans not living under the clan system and by non-Samoan citizen permanent residents. The legislature, known as the Fono, will have only advisory powers, it is stated, for at least 10 years.

Judicial power is vested in a High Court, 6 district courts and 52 village courts. All judicial matters are handled by Samoans except the High Court, which is presided over by the Chief Justice, who is an American civilian appointed by the Secretary of the Navy. The other members are Samoans. All laws are contained in the Code of American Samoa. There is a native guard (known as the Fita Fitas) of 130 under the direction of the U.S. Navy.

There are virtually no public lands in American Samoa. Nearly all the land is owned by Samoans and, with a few exceptions, cannot be sold except to persons [illegible] one-half Samoan blood. About 20% of the area is suitable [illegible] divided mostly into small plots devoted to tree crops and with a minimum of cultivated field crops and pastures. Principal subsistance crops are taro, bananas, breadfruit, yams, coconuts, arrowroot, oranges and papayas. About 70% of the land is forest. Copra of excellent quality is abundant.

The census of 1940 showed illiterates 10 years of age or older numbered 6·3% of that age group; of the children of school age, 1948, 90% were attending school.

The Government (1949) maintains 43 elementary schools, three junior high schools, one senior high school and one vocational trades school. Education is compulsory between the ages of 7 and 15. Seven private schools have 929 children. The public schools have 14 foreign and 121 Samoan teachers; the private schools have 16 foreign and 15 Samoan teachers. There are no privately practising physicians or dentists. The entire population is under the care of the medical department of the U.S. Navy. A new hospital (with nursing school) with 224 beds, was opened by the navy in 1946.

Revenue comes from customs duties, a 1% tax upon freehold property, a tax upon landlords of 5% of the rents received, licences for businesses, a 2% export tax and the sale of utility services. There is no public debt. Revenue for year ending 30 June, 1949, was $477,739, and expenditure, $626,774 including funds previously appropriated. Chief exports are copra, pandanus mats and curios. Exports of copra in the fiscal year 1948–49 were 1,658 tons, valued at $353,285.

About 45 miles of public roads have been constructed on Tutuila, but the other islands have none. There is a United States naval high-powered radio station (open to commercial traffic) on Tutuila, which reaches New Zealand, Australia, Honolulu, the United States and the islands of the Pacific. The Bank of American Samoa, with capital of $50,000 and total assets exceeding $1,500,000, is the only bank and does all types of commercial banking business. The fast mail steamers of the Matson Navigation Company touch here on their regular trips between the United States, Fiji, New Zealand and Australia.

Governor.—Captain Thomas F. Darden, U.S. Navy.
Assistant Governor.—Commander Ralph L. Ramey, U.S. Navy.

PART IV

OTHER COUNTRIES

AFGHÁNISTÁN.

AFGHÁNISTÁN is a country of Asia lying between parallels 29° and 38° 35′ of north latitude, and 60° 50′ and 71° 50′ of east longitude, with a long narrow strip extending to 75° east longitude (Wákhán). For the boundaries, *see* THE STATESMAN'S YEAR-BOOK, 1925, pp. 654–55; for the treaty of November, 1921, *see* THE STATESMAN'S YEAR-BOOK, 1928, p. 642; and for earlier British relations with Afghánistán, which began in 1809, *see* THE STATESMAN'S YEAR-BOOK, 1916, pp. 662–63. A new boundary agreement with the Soviet Union was signed in Moscow in June, 1946; a joint commission completed the demarcation in Sept., 1948.

Government.—The Government of Afghánistán is a constitutional monarchy, in which the supreme legislative power is vested in the Parliament consisting of the King, a Senate and a National Assembly. The Senate consists of 50 members, who are nominated for life by the King. They sit throughout the year. The National Assembly consists of 171 elected members. It is in session between May and October, and may be summoned at any time. There is also a Grand Assembly (*Loe Jirgeh*), which is summoned at irregular and usually long intervals to consider major questions of policy referred to it by the King. The last meeting was in 1941. The title of king instead of amir was adopted in 1926. The country is divided into 7 major provinces of Kábul, Mazar, Kandahár, Herát, Kataghan, Simat-i-Mashriqi (*i.e.* Eastern Province) and Simat-i-Junubi (Southern Province), and 3 minor provinces, Badakhshán, Farah and Maimana. Each province is under a governor (called in major provinces *Naib-ul-Hukumeh* and in minor provinces *Hakim-i-'Ala*).

There are separate departments of War, Foreign Affairs, Internal Affairs, Education, National Economy, Justice, Public Works, Finance, Health, Mines and Communications, each in charge of a minister; and the departments of Agriculture, Tribes and the Press, each in charge of a director-general. Ministers and directors-general are all members of the cabinet.

National flag: black, red, green (vertical); with a white device in the centre.

Reigning King.—**Mohammed Zahir Shah**, born at Kábul in 1914; married on 7 Nov., 1931, to his cousin, Umairah, daughter of Sirdar Ahmed Shah Khan; succeeded his father, Mohammed Nadir Shah, who was assassinated on 8 Nov., 1933. Surviving offspring, 4 sons and 2 daughters.

Area and Population.—The extreme breadth of Afghánistán from north-east to south-west is about 700 miles; its length from the Herát frontier to the Khyber Pass, about 600 miles; the area is 250,000 square miles. Population, according to the latest Afghan estimate, is between 11 and 12 million, of which some 2 million are nomadic tribes. The languages spoken are Persian and Pushtu, and Turki in Turkistan and parts of Badakhshán.

Estimates of population of municipalities (and, in brackets, of provinces) in 1948 were as follows:—Kábul, 206,208 (2,817,234); Kandahár, 77,186 (1,063,496); Herát, 75,632 (1,142,343); Mazar-i-Sharif, 41,960 (944,020); Jalalabad, 14,756.

Religion and Education.—The predominant religion is Islam, mostly of the Sunni sect, though there is a minority of about a million Shiah

Mohammedans. Elementary schools exist throughout the country, but secondary schools exist only in Kábul and provincial capitals. Both elementary and secondary education are free. Primary schools are being established in almost all villages of any size except in the Southern Province and parts of the Kandahár Province, and there are 2 training schools for teachers in Kábul. Technical, art, commercial and medical schools exist for higher education. The Kábul University was founded in 1932 and has 4 faculties of law, science, medicine and arts.

There were, in 1950, 4 cinemas with 3,000 seats.

Justice.—The law is based on the *Shariat* or Islamic law in principle. Lower courts (*Mahakima-i-Ibtidaia*) are established in each seat of government, and higher courts (*Mahakima-i-Murafiaah*) may have appeals from the former brought before them. A high court in Kábul is the supreme judicial authority. In many instances efforts are made by litigants to compose their differences by the aid of unofficial juries in each locality. There is also an arbitration court.

Finance.—The revenue of Aghánistán is subject to fluctuations. The Government share of the produce recoverable is said to vary from one-fifth to one-tenth, according to the advantages of irrigation. The total revenue is estimated at about 188 million afghanis, a considerable portion of which is derived from customs, land taxation, income tax and the earnings of government monopolies, chiefly the Karakul Monopoly.

Defence.—The Army, which is mostly Turkish trained, is recruited by annual calls to the colours and on a voluntary basis. Compulsory service is for a period of 2 years with the colours. Service is obligatory from 18 to 40. Voluntary enlistment is lifelong and officers are recruited for life. The peace strength of the Army is 90,000, which includes 15,000 gendarmerie. It is organized in 2 army corps (Kábul; Southern Province) and 6 mixed provincial divisions. In addition there is the Royal Bodyguard, about 200 strong. In the event of war, besides the reserve, it is capable of support by a considerable number of warlike tribesmen, who are armed with modern rifles. Mechanical transport has been introduced, and a military academy for the training of cadets was opened in Kábul in 1932. There is a military school where about 2,000 students are prepared for the Military Academy and the police. From 1945 to 1947 some officers and N.C.O.s were trained in India. In 1949 some army officers were trained in Great Britain and others in Turkey.

The Afghan Air Force is part of the Army. It is organized in 2 squadrons and 1 training squadron, and based on Kábul at the Khwaja Rawash and Sherpur airfields.

Production and Industry.—Although the greater part of Afghánistán is more or less mountainous and a good deal of the country is too dry and rocky for successful cultivation, there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables and cereals. Afghánistán is virtually self-supporting in foodstuffs. The castor-oil plant, madder and the asafœtida plant abound. Fruit forms a staple food (with bread) of many people throughout the year, both in the fresh and preserved state, and in the latter condition is exported in great quantities. The fat-tailed sheep furnish the principal meat diet, and the grease of the tail is a substitute for butter. The wool (annual production, greasy, 6,800 metric tons) and skins provide material for warm apparel and one of the more important articles

of export. Persian lamb-skins (Karakulis) are one of the chief exports. No cotton was exported in 1949, but efforts are being made to increase cotton production, and a surplus for export is expected from the 1951 crop.

Most of the mineral resources of the country are undeveloped. Northern Afghánistán is reputed to be tolerably rich in copper, and lead and iron are found in many parts. Coal of poor quality is found in the Ghorband Valley and near the Lataband, but rich seams of coal exist on the northern slopes of the Hindu Kush. Crude petroleum has been discovered near Herát and in Northern Afghánstán. Neither oil nor silver are exploited, but silver mines exist in Panjsher Valley. Iron is smelted in small quantities in Kataghan and Parmal. Gold is obtained from Kandahár and also from several rivers in the north. Badakhshán is said to be the only area in the world to produce first-quality lapis lazuli. Raw asbestos has recently been discovered in Jidran district and a mica-mine in the Panjsher Valley. Sulphur deposits have been found in the province of Maimana and chrome ore in the Logar valley and the neighbourhood of Herát.

At Kábul there are factories for the manufacture of small quantities of matches, buttons, leather, boots, marble-ware and furniture. There is a wool factory at Kandahár and another at Kábul, a small cotton factory at Jebal-us-Siraj and a larger one, for which modern machinery has been supplied by Platt Bros., at Pul-i-Khumri. There is also an ordnance factory where arms and ammunition, boots and clothing, etc., for the Army are manufactured. This also includes a mint. Plans for the construction of hydro-electric stations, textile, sugar, cement, cotton ginning and pressing factories are under consideration of the Government. If implemented, the schemes may be financed by the Afghan National Bank and its subsidiary companies, including the Karakul Monopoly, the Afghan Sugar Manufacturing Co. and the Afghánistán Cotton Co. Other important monopolies are the Afghánistán Motor Co., the Shirkat-i-Umumi-Barq (generation of electricity and import of electrical goods), Shirkat-i-Ittahadia Shimali (joint stock company of the north engaged in trade in wool, skins, fruits and miscellaneous goods), Shirkat-i-Watan (Kandahár company dealing in miscellaneous goods, especially wool), and Shirkat-i-Hajjari Najjari (stone-cutting and carpentry monopoly). These monopoly companies are being reorganized (1950).

The American Export–Import Bank, at the end of 1949, granted a $21 million credit to the Afghan government, mainly for irrigation projects.

A United Nations technical aid mission has been in the country since April, 1950, and has made several recommendations for improving agriculture and mining. The World Health Organization has also sent a small mission.

Commerce.—Trade is controlled by the Government through the Ministry of National Economy and the National Bank of Afghánistán. Eighty per cent. of the trade goes through Pakistan. Of the imports from India and Pakistan the chief items are cotton goods, sugar, hardware, live animals, leather goods, tea, paper and cement. The exports to India and Pakistan include spices, fruits, caracul skins, carpets, cotton and raw wool.

Imports from Afghánistán into U.K. (Board of Trade figures), 1947, £3,130; 1948, £6,475; 1949, nil; 1950, £103,112. Exports to Afghánistán, 1947, £119,439; 1948, £433,281; 1949, £209,814; 1950, £132,807. Re-exports, 1947, £12; 1948, £262; 1949, £153; 1950, £183.

The Afghan National Bank, Kábul, has a Commercial Section, and a branch in London, which assist manufacturers who wish to make inquiries about openings in Afghánistán.

Communications.—Access to Afghánistán is mainly through passes in the mountains at the north and south, where peaks rise to a height of over 20,000 ft. On the north-west frontier of Pakistan the best known pass is the Khyber Pass, connecting Kábul with Peshawar, an important Pakistan railhead; the Kojak–Bolan–Sibi series of passes from Kandahár to the south, and the Gomal, Tochi and Kurram passes from Ghazni.

Afghánistán joined the Postal and Telegraphic Unions in 1928, and since 1 Feb., 1938, postal parcels are exchanged between the Indian and Pakistani and Afghan Administrations on Union principles.

There are no railways in the country. The number of roads fit for motor traffic is increasing; they include the road, 200 miles long, between Kábul and Peshawar, and all provincial capitals are now connected with Kábul by motor roads. The construction of a new broad second-class road between Kandahár and Chaman is an important recent achievement. But merchandise is still transported to a great extent on camel or pony back. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down the Kunar and Kábul rivers from Chitral on rafts. Telephones are installed in most of the larger towns; they numbered 3,899 at 1 Jan., 1949.

There is telegraphic communication between Peshawar–Kábul, Kábul–Gardez, Kábul–Kandahár, Kandahár–Herát, Kábul–Mazar-i-Sharif, Kábul–Khanabad, Kandahár–Chaman. A wireless installation connects Kábul with Europe, Bombay, the Far East, America and other parts of the world. There are 5 wireless stations in the country. The Kábul Radio broadcasts in Pushtu, Persian and Urdu. The telecommunication system is to be expanded in 1951.

Banking and Currency.—The monetary system is on the silver standard. The unit is an *afghani*, weighing 10 grammes of silver ·900 fine, which is subdivided into 100 *puls*. The currency consists of:—(*a*) Afghani rupee (silver); (*b*) kran ($\frac{1}{2}$ rupee) (silver); (*c*) pul ($\frac{1}{100}$ rupee) (copper); (*d*) 2 puls ($\frac{1}{50}$ rupee) (copper); (*e*) 5 puls ($\frac{1}{20}$ rupee) (copper); (*f*) 10 puls ($\frac{1}{10}$ rupee) (copper and nickel); (*g*) 20 puls ($\frac{1}{5}$ rupee) (copper); (*h*) 25 puls ($\frac{1}{4}$ rupee) (copper and nickel). Coins, however, are rarely used. Currency notes of 2, 5, 10, 20, 50, 100, 500 and 1,000 afghanis are in circulation.

Official rates of exchange fixed in Oct., 1949, are £1 = 47·04 afghanis; $1 = 16·80 afghanis.

The National Bank of Afghánistán (*Banke Millie Afghan*), with branches in Asia, Europe and America, was established in May, 1938, and now has a capital of 600 million afghanis. In addition, a state bank has recently been established under the name of 'Da Afghánistán Bank' with a capital of 120 million afghani. It has the exclusive right of note issue. The first notes were issued in Nov., 1935. They are of 2, 5, 10, 20, 50, 100, 500 and 1,000 afghani denomination and convertible into silver coin. Paper currency in circulation amounted to 800 million afghanis in April, 1950.

Weights and Measures.—Weights and measures used in Kábul are :—Weights :—1 khurd = $\frac{1}{4}$ lb.; 1 pao = 1 lb.; 1 charak = 4 lb.; 1 seer = 16 lb.; 1 kharwar = 1,280 lb. or 16 maunds of 80 lb. each. Long measure :—1 yard or gaz = 40 inches. The metric system of measurement has also been introduced and is in common use by the bigger cloth merchants in Kábul. Square measure :—1 jarib = 60 × 60 kabuli yards; 1 kulba = 40 jaribs (area in which 2$\frac{1}{2}$ kharwars of seed can be sown); 1 jarib yard = 29 inches.

Local weights and measures are in use at Kandahár, Herát and Jalalabad.

Diplomatic Representatives.

1. Of Afghánistán in Great Britain (31 Princes Gate, S.W.7).

Ambassador.—H.R.H. Sardar Shah Wali Khan (accredited 3 May, 1950).

Minister-Counsellor.—Mir Mohammed Siddiq Hussaini.

First Secretary.—Sayyid Masud Khan.

Attachés.—Abdul Qayum Khan Hairat; Sikander Khan; Rahman Pazhwak (*Press*).

2. Of Great Britain in Afghánistán.

Ambassador.—Alfred John Gardener, C.M.G., C.B.E. (accredited 11 Oct., 1949).

First Secretary.—D. M. H. Riches.

Military Attaché.—Col. R. A. Conner.

ALBANIA.

(Shqiperia.)

After the death of George Kastriota—popularly known as [illegible] in 1467, under whom the Albanians had heroically resisted [illegible] quarter of a century, Albania passed under Turkish suzerainty and thus remained—nominally or actually according to the locality and period—until 1912. The independence of Albania was proclaimed at Vloné (Valona) on 28 November, 1912, and on 17 December, 1912, the London conference of ambassadors agreed to the principle of Albanian autonomy. Subsequently that conference decided upon the frontiers of the new country, and agreed that a European prince be nominated to rule it. Prince William of Wied, having accepted the crown of the principality from an Albanian deputation at Neuwied, on 21 February, 1914, arrived at Durres (Durazzo) on 7 March, 1914. After the outbreak of the war in 1914, the Prince on 3 September left Albania, which fell into a state of anarchy. By the secret Pact of London of 26 April, 1915, provision was made for the partition of Albania; but this arrangement was repudiated by Italy on 3 June, 1917, when the Italian Commander-in-Chief in Albania, proclaimed at Gjinokastër (Argyrocastro) the independence of Albania. In January, 1925, the country was proclaimed

a republic and on 1 September, 1928, a monarchy. Ahmed Beg Zogu, President of the Republic since 31 January, 1925, reigned as King Zog till April, 1939, when, on the occupation of the country by the Italians, he fled to England. After the liberation, he was formally deposed *in absentia*, on 2 Jan., 1946.

During the years 1939–44 the country was overrun by Italian and German military forces.

On 10 Nov., 1945, the British, United States and U.S.S.R. Governments recognized the Provisional Government under General Enver Hoxha, on the understanding that it would hold free elections. The elections of 2 Dec., 1945, resulted in a Communist-controlled assembly, which on 12 Jan., 1946, proclaimed Albania a republic.

In 1946, Great Britain and the United States broke off relations with Albania and vetoed its admission to the United Nations.

President of the Republic.—Dr. Omer Nishani, elected 13 Jan., 1946.
Prime Minister.—Enver Hoxha.
Minister for Foreign Affairs and National Defence.—General Mehmet Shehu.

The constitution of 1945 provides for a single-chamber assembly, and extends the franchise to all men and women over 18 years of age, excepting those who collaborated with the Italians or Germans. There is only one political party, the National Liberation Movement (*Levizje Nacional Clirimtare*), under the leadership of General Hoxha.

National flag: red, with a black double-headed eagle. *Mercantile flag:* red, black, red (horizontal).

Area and Population.—The area of the country is 10,629 square miles, while the population (census of 25 May, 1930). was 1,003,124. Estimated population in 1947, 1,150,000. The capital is Tirana.

By the peace treaty Italy restored the Island of Saseno to Albania.

The country is divided into 10 prefectures, named after the principal towns, which with the population in 1930 are as follows:—

Prefectures	Population in 1930		Prefectures	Population in 1930	
	Prefecture	Town		Prefecture	Town
Berat . . .	142,616	10,403	Korçe (Koritza) .	147,536	22,787
Dibër (Dibra) .	86,992	—	Kosova (Kossovo)	49,081	—
Durres (Durazzo) .	77,890	8,739	Shkodër (Scutari).	132,334	29,209
Elbasan . . .	111,480	13,796	Vlone (Vulona) .	53,461	9,100
Gjinokaster (Argyrocastro) . .	143,926	10,836	Tirana (capital) .	57,808	30,806

The Albanians are divided into two principal language groups—the Ghegs, north of the river Shkumbi, and the Tosks in the south.

Religion and Education.—There is no state religion. The population is distributed according to the following estimates:—Moslems, 688,280; Orthodox Christians (the Orthodox Church of Albania), 210,313; Roman Catholics, 104,184. The Gheg Christians in the north are for the most part Roman Catholics under 2 archbishops, 3 bishops and 1 mitred abbot (there is also an apostolic delegate), and the Tosk Christians in the south are members of the Albanian Autocephalous Church, which was

under the rule of the Holy Synod (constituted 18 February, 1929) and had a primate and 3 bishops, and was recognized as autocephalous by the Oecumenical Patriarchate on 17 March, 1937.

Primary education is nominally compulsory for children between the ages of 6 and 13, but owing to the shortage of schools this cannot be thoroughly enforced. There were (1939) 663 state primary schools with 1,302 teachers, 38,988 boy pupils and 17,948 girls; 18 intermediate schools for boys with 4,810 pupils and 256 teachers, and 1 intermediate school for girls with 1,425 pupils and 37 teachers. In the 22 infant schools there were 40 teachers (women), 1,229 boys and 1,206 girls.

Justice is administered by the tribunal of first instance and the collegiate tribunal. There is no special court of appeal. At Tirana there is a court of cassation.

Finance.—For the pre-1940 budgets, *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 755. No post-war figures are available.

Defence. The Albanian Army, at the end of 1950, numbered about 55,000 men. The equipment, supplied entirely by the Soviet Union, includes 100 tanks.

On the disposal of excess units of the Italian fleet, Albania received the gunboat *Illyria*.

Production and Industry.—In 1941, about 90% of the population were engaged in agriculture, 25% exclusively in crop production and 65% in animal husbandry. Before the Second World War only 6% of the total area of 2,700,000 hectares was under cultivation of field crops, another 6% of unspecified crops, trees and bushes, about 30% consisted of meadows and permanent pastures, while about 60% was forests, swamps and waste. A number of agrarian reforms were initiated in 1930, including the formation of an agricultural bank, opened 1 August, 1937.

The country for the greater part is rugged, wild and mountainous, the exceptions being along the Adriatic littoral and the Korçe (Koritza) Basin, which are fertile. The main crops before the war were maize (58% of the cultivated land; yield, 1947, 140,000 metric tons) and wheat (18%; yield, 1947, 54,000 metric tons). Tobacco, timber, wool, hides, furs, cheese and dairy products, fish, olive oil, corn, cattle and bitumen are the principal products of the country. The wool (annual production, greasy, averages 2,200 tons) is made up into coarse and heavy native cloth and exported.

Livestock, 1946 (estimated):—Horses, 50,000; asses, 40,000; mules, 10,000; cattle, 345,000; sheep, 1,548,000; goats, 854,000; pigs, 35,000.

There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. The mineral wealth of Albania is considerable but undeveloped. The copper-mines in the Puka district are being exploited. The 1948 target for chromite was 16,500 metric tons. The salt-pits at Vloné (Valona) are said to be of commercial importance, and Selenizza bitumen-mines are also worked successfully. The principal industries are those connected with agriculture, such as flour-milling, olive-pressing and [illegible]. There is a cement factory in Shkoder and a brewery in Korçe. [illegible] production, chiefly at Kosova near Berat, is enough for home consumption.

Work on the first hydro-electric power plant on Mount Daita, near Tirana, was begun in 1947.

Commerce.—For trade statistics up to 1938, *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 756; no post-war statistics are available

The principal classes of imports into Albania in 1938 were cotton (including yarns and manufactures), which accounted for 21% of the total value; petrol (7%); wheat and maize (7%); wool and manufactures (5%); iron and manufactures (5%). The principal exports were crude petroleum (22% of the total value); skins and hides (14%); foodstuffs (28%).

Most of the trade was with Italy, which, in 1938, accounted for 36% of the imports and 68% of the exports.

Since the liberation, Albania has had a very small foreign trade, confined almost entirely to barter; hides, salt and tobacco were traded for grain and paper.

U.N.R.R.A. shipped to Albania 156,000 tons of supplies, valued at $27,450,000.

Total trade between Albania and the United Kingdom (according to Board of Trade returns) was as follows (in £ sterling):—

	1938	1946	1947	1948	1949	1950
Imports from Albania .	6,262	1	15	—	—	—
Exports to Albania . .	24,025	469,686	485,700	16,091	7,026	20
Re-exports to Albania .	1,374	31,862	6,400	—	10	—

Communications.—All the principal towns of Albania are connected by passable roads. The mountain districts of the north are still, however, mostly inaccessible with wheeled vehicles, and communications are still by means of pack ponies or donkeys. The total length of roads suitable for motor traffic in the country on 31 August, 1938, was 1,383 miles. The ports are Shengiin (San Giovanni di Medua), Durres (Durazzo), Vlone (Valona) and Sarandè (Porto Edda). Durres is being fully equipped, but the others remain primitive. Number of post and telegraph offices, 53.

In May, 1940, work on the first railway in the country, between Durrès and Elbasan, was commenced.

The merchant navy, in 1948, comprised 4 ships (714 tons).

Banking and Currency.—On 2 September, 1925, the National Bank of Albania was established in Rome, with branches in Tirana, Durres, Korçè, Vlone, Shkoder, Berat, Elbasan and Gjinokaster. It has a capital of 12,500,000 gold francs. Albanian participation was to have amounted to 5,625,000, but owing to the failure of Albanians to subscribe, almost the whole of the Albanian quota was eventually taken up by Italians. The remainder of the capital was subscribed by an international financial group headed by the Credito Italiano. The bank had the exclusive right of issuing paper money and metal coinage.

The monetary unit is the Albanian *franc ar* (the gold franc of the Latin American Union, containing 0·2903225 grammes of fine gold) but during the Italian occupation it was treated as equal to 6·25 lire. The Albanian *franc ar* is divided into 5 *lek* each of which contains 20 *quidars*. From Nov., 1946, to June, 1948, when Albania and Yugoslavia had a currency union, with the *lek* equal to the Yugoslav dinar, the *lek* was, by definition, equal to 2 cents, U.S.

The bank has issued bank-notes of 100, 20, 5 Albanian francs, and metallic currency as follows:—Gold, 100, 50, 20 and 10 franc pieces; silver, 2 and 1 franc pieces; nickel, 1, ½ and ¼ *lek*; bronze, 0·02, 0·01 franc pieces. On 31 October, 1939, there were in circulation notes amounting to 27,414,822 francs and coin to the value of 4,822,530 francs, of which 1,590,003 francs

were gold, 2,215,037 francs silver coins, 1,005,763 francs nickel coins and 11,700 francs bronze coins.

Total holdings of gold and foreign exchange at 31 Dec., 1945, amounted to 260,000 gold francs (= $82,000, U.S.).

ANDORRA.

THE independence of the valleys of Andorra is of Carolingian origin. Their political status was regulated by the *Paréage* of 1278, according to which they were placed under the joint suzerainty of the Comte de Foix and of the Bishop of Urgel. The rights vested in the house of Foix passed by marriage to that of Béarn and, on the accession of Henri IV, to the French crown; they are now exercised by the President of the French Republic. The country consists of gorges, narrow valleys and defiles, surrounded by high mountain peaks of the Eastern Pyrenees. Its maximum length is 27·35 km. and its width 28·96 km.; it has an area of 307·32 square km. and a population of 5,231, scattered in 6 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171 feet. The country is administered by a Council-General of 24 members elected for 4 years; half of the council is re-elected every 2 years. The council nominates a First Syndic (*Syndic Procureur Général*) to preside over its deliberations; in the First Syndic is vested the executive power. A Second Syndic is also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges (*Bayles*), one appointed by the Viguier de France and the other by the bishop. There is a judge of appeal appointed alternately by each co-prince, and in the third instance (*Tercera Sala*) the supreme court of Andorra at Perpignan or the ecclesiastical court of the Bishop at Urgel. Criminal justice is administered by the *Tribunal des Corts*, consisting of the 2 Viguiers, the judge of appeal, the *Bayles*, 2 members of the Council-General, an usher and 1 or 2 recorders.

The valleys pay an annual due of 960 francs to France and 460 pesetas to the bishop. The co-princes are represented in Andorra by the 'Viguier de France' and the 'Viguier Episcopal.' Each co-prince has set up a Permanent Delegation for Andorran affairs. A good road traverses the country, connecting the Spanish and French frontiers by way of Sant Julia, Andorre-la-Vieille, les Escaldes, Encamp, Canillo and Soldeu: it crosses the Col d'Envalira (2,407 metres). Another road connects Andorre-la-Vieille with Ordino. Catalan is the language spoken. French and Spanish currency are both in use.

National flag : blue, yellow, red (vertical).

Exports from the United Kingdom, 1938, £28; 1947, £1,218; 1948, £1,664; 1949, £3,237; 1950, £11,717; re-exports, 1949, £322; 1950, £1,091.

ARABIAN STATES.

THE Arabian peninsula comprises two member states of the United Nations, viz. Saudi Arabia and the Yemen, the independent sultanate of Muscat and Oman, and the British protectorates of Bahrain, Kuwait, the Trucial Sheikhdoms and Qatar.

Muscat and Oman.—The independent Sultanate of Muscat and Oman is situated at the easterly corner of Arabia. Its seaboard is nearly 1,000 miles long and extends from near Tibba on the west side of the Musandum Peninsula round to Ras Darbat Ali. Ras Darbat Ali marks the boundary between the Sultanate of Muscat and Oman and the territory of the Sultan of Kishen and Socotra, a sultanate within the Aden Protectorate. A small strip of the coast on the east side of the Musandum Peninsula from Dibah to Khor Kalba is administered by minor chiefs of Trucial Oman, independent of the Sultan. The sultanate extends inland to the borders of the Rub' al Khali ('Empty Quarter' of the Great Desert). Physically Muscat and Oman consists of three divisions—a coastal plain, a range of hills and a plateau. The coastal plain varies in width from 10 miles near Suwaiq to practically nothing in the vicinity of Matrah and Muscat towns where the hills descend abruptly into the sea. The mountain range runs generally from north-west to south-east. It reaches its greatest height in the Jebel Akhdhar region, where heights of over 9,000 feet occur. The hills are for the most part barren but in the high area round Jebel Akhdhar they are green and there is considerable cultivation. The plateau has an average height of 1,000 ft. With the exception of oases there is little or no cultivation. North-west of Muscat the coastal plain is known as the Batinah. It is fertile and prosperous. The date gardens extend for over 150 miles. The Batinah dates are famous for their flavour; they ripen in the first half of July well before the Basra dates. The coast line between Muscat and the province of Dhofar is barren. The fertile province of Dhofar lies on the south-eastern coast of Arabia. Sugar cane is grown and cattle can be raised. Its principal town is Salalah on the coast, while Murbat is the port. On the north coast of the Gulf of Oman is the port of Gwadur and a small tract of country surrounding the town, which also are under the sultan's rule. The town of Muscat is the capital and seat of government; its population is 5,500. At one time a town of some commercial importance, it has of recent years lost most of its trade to the adjacent town of Matrah (population, 8,500), which is the starting point for the trade routes into the interior. Other ports are Sohar, Khaburah and Sur.

The area of the sultanate has been estimated as about 82,000 square miles and the population at 550,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat and Matrah are composed of one-third Indian, one-third Baluch and one-third negro. There are few Arabs resident in these two towns.

The present Sultan is Saiyid Said bin Taimur (born 13 Aug., 1910), who succeeded his father Saiyid Taimur bin Feisal, on 10 Feb., 1932, as the 13th of his dynasty. The Sultan has one son, Qabus, born in Dec., 1940.

A treaty of friendship, commerce and navigation between Britain and the Sultan was signed on 5 Feb., 1939. The treaty reaffirmed the close ties which have existed between the British Government and the Sultanate of Oman and Muscat for nearly a century and a half.

In the valleys of the interior, as well as on the Batinah, date cultivation has reached a high level, and there are possibilities of agricultural development were the water-supply more certain. Camels are bred in large numbers by the inland tribes.

Annual revenue is estimated at Rs. 25 to 30 lakhs.

Trade is mainly in the hands of the Indians, some of whom are British subjects. Imports and exports are mainly from and to India. The chief imports in 1949–50 were:—Rice, £384,250; wheat, £44,575; coffee, £109,073; sugar, £114,751. Dates are the principal export:—£1,120,705 in 1949–50. Pomegranates, fresh and dried limes and dried fish are the only other exports of any note. There are no industries of any importance. Total imports for 1949–50 amounted to £2,176,353, and total exports to £2,282,780. The importation of alcoholic liquor is forbidden by law.

Trade with United Kingdom (Board of Trade returns, in £ sterling):—

	1948	1949	1950
Imports to U.K.	314	2,257	54
Exports from U.K.	91,581	98,796	126,618
Re-exports from U.K.	58	118	311

The port of call on the mail route Bombay–Basra is Muscat, where, in 1950, 130 steamers of 444,200 tons entered and cleared. The mail service is weekly in either direction. Gwadur is also served by these steamers, every alternate voyage. A post office operates in Muscat under the supervision of the General Post Office in London, and Cable and Wireless Ltd. maintain a telegraph office at Muscat.

Inland transport is by pack animals. The road connecting Muscat with Matrah continues as a motorable track up the coast to Khor Fakkan *via* Kalba at the far end of the Batinah, a distance of about 260 miles. Hajar, Bosher and Qariyat are also connected by motorable tracks with Matrah. Cars run frequently between Muscat and the towns in the Batinah, and *via* Shinas and the Wadi al Khor to Sharjah. There are also various other motorable routes which, however, should not be used without previous arrangement.

The common medium of exchange is the Maria Theresa dollar; the province of Dhofar also has a half-dollar. On the coast, the Indian rupee circulates and is the official currency of the sultanate, although it is not much used in the interior. There is one Omani copper coin called a *baiza*, and several nickel coins of different denominations of baizas. The official par rate of exchange is 200 baizas to a Maria Theresa dollar and 100 to

the rupee. The weights in use are 1 kiyas = the weight of 6 dollars or 5·9375 oz.; 24 kiyas = 1 Muscat maund; 10 maunds = 1 farásala; 200 maunds = 1 bahár. Rice is sold by the bag; other cereals by the following measures:—40 palis = 1 farrah; 20 farrah = 1 khandi.

British Consul.—Major F. C. L. Chauncy.

Thesiger (W.), Desert Borderlands of Oman. (Geographical Journal, 116, 1950.

The State of Kuwait is situated on the north-western coast of the Persian Gulf. The reigning dynasty was founded by Subah abu Abdullah, who ruled from 1756 to 1762. In Nov., 1914, the British Government recognized the Sheikhdom of Kuwait as an independent government under British protection. The present, the 11th, Sheikh Abdullah al Salim al Sabah, C.I.E., succeeded on 28 Jan., 1950.

The Kuwait Oil Company have developed a rich oilfield within the state. Production of crude oil in 1950 was just over 16½ million tons. In 1948 a concession was granted by the Sheikh to the American Independent Oil Company to exploit oil in the Kuwait Neutral Zone which is shared with Saudi Arabia. The total population of the state is estimated at 160,000; there were in 1951 about 1,000 Europeans and Americans in Kuwait.

The port of Kuwait, the capital, serves as an entrepôt for goods for the interior, and for the export of pearls, skins and wool. Imports (other than those for the Kuwait Oil Company) for the year 1949 amounted to £5,022,466 of which some were re-exported to Persia, Saudi Arabia and Iraq. There are three shipyards where carrying dhows are built for other Arabian ports. Kuwaiti dhows handled cargo valued at £565,048 in 1949. Exports, including re-exports, in 1949, totalled £1,048,448.

Ships of 4 British, Dutch and Norwegian lines make regular calls at Kuwait. B.O.A.C., Iraqi Airways and Iranian Airways operate scheduled air services. Wireless communications are managed by Cable & Wireless, Ltd. The post office is run by the British General Post Office. Banking is done by the British Bank of Iran and the Middle East. The currency is the Indian rupee.

Flag.—Red, with the word 'Kuwait' in Arabic in white.

British Political Agent.—H. G. Jakins.
Assistant Political Agent.—J. A. F. Gethin.

The Trucial Sheikhs.—From Khor Kalba, on the Gulf of Oman, 90 miles south of Ras Musandam, for nearly 50 miles to Dibah, the coast of the Gulf of Oman (with the exception of a small area belonging to the Sheikh of Kalba) is under the control of the Sheikh of Fujaira, a semi-independent ruler with no treaty relations with the British Government. Fujaira's claim to the sovereignty of this territory is, however, not admitted by certain other rulers. The tip of the Musandam peninsula, from Dibah on its east side to near Sha'am about 35 miles from Ras Musandam on its west side, forms part of the Sultanate of Muscat and is peopled by the Shihuh tribe. From Sha'am for nearly 400 miles to Khor el Odeid at the south-eastern end of the peninsula of Qatar the coast, formerly known as the Pirate Coast, of the Persian Gulf belongs to the Trucial Sheikhs who in 1820, after hostilities with the Honourable East India Company, signed a general treaty prescribing peace with the British Government and perpetual abstention from

plunder and piracy (specifically including the slave trade) by land and sea. This treaty was followed by further agreements providing for the suppression of the slave trade and for the search and, if necessary, seizure by British warships of any vessels belonging to the Trucial Sheikhdoms suspected of engaging in this trade, and by a series of other engagements of which the most important are the Perpetual Peace Treaty of May, 1853, and the Exclusive Agreement of March, 1892. Under the latter, the sheikhs, on behalf of themselves, their heirs and successors, undertook that they would on no account enter into any agreement or correspondence with any power other than the British Government, receive foreign agents, or cede, sell or give for occupation any part of their territory save to the British Government. The area of these sheikhdoms is not defined, but the total population is estimated at about 95,000, of whom about one-tenth are nomads. Relations with the Trucial Sheikhs are normally conducted through the Political Officer, Trucial Coast, and the British Residency Agent on the Trucial Coast, under the control of the Political Resident in the Persian Gulf.

The main commercial port of the Trucial Coast is Dubai. Most of the inhabitants of the sheikhdoms depend for their livelihood on fishing and pearling.

The Trucial Sheikhs are :—

Sharjah . .	Sultan bin Saqar.	Succeeded 1924.
Ras al Khaimah .	Saqr bin Mohammed.	,, 1948.
Umm al Qawain .	Ahmad bin Rashid.	,, 1929.
Ajman . .	Rashid bin Humaid.	,, 1928.
Dubai . .	Said bin Maktum.	,, 1912.
Abu Dhabi . .	Shakbut bin Sultan.	,, 1928.
Kalba . .	Hamud bin Said.	,, 1950.

Qatar.—This sheikhdom, which includes the whole of the Qatar peninsula, extends along the coast of the Persian Gulf from Khor el Odeid to the boundaries of Hasa. Its settled population was estimated in 1916 at about 25,000. The relations of the Sheikh of Qatar with the British Government are similar to those of the Trucial Sheikhs, and are regulated by a treaty of 3 November, 1916.

Sheikh of Qatar.—Ali bin Abdullah al Thani, succeeded in 1949.

The State of Bahrain.—The Bahrain islands form an archipelago in the Persian Gulf 20 miles off Al Hasa on the Arabian coast. The total area is about 213 square miles. Bahrain ('Two Seas'), the largest island, is 27 miles long and 10 miles wide. Moharraq, to the north-east, 4 miles long and 1 mile wide, is connected with Bahrain by a wide causeway, nearly 2 miles long, carrying a motor road; to the south of the causeway is the seaplane alighting area of the B.O.A.C.; the land aerodrome is on Moharraq island. Other islands are Sitra, to the east, 3 miles long and 1 mile wide; Nabi Saleh, about 2 miles in circumference, and several islets, some uninhabited. From Sitra an oil pipe line and a causeway carrying a road extend out to sea for 3 miles to a deep water anchorage. The islands are low lying, the highest ground being a hill in the centre of Bahrain, 450 feet high.

The total population is estimated at about 110,000, of which about half are the original inhabitants belonging to the Shia sect, the remainder, including the ruling family, being Sunnis. The Sunnis live mainly in the towns of Manamah and Moharraq. There is a wealthy Indian community, a number of well-to-do Persian merchants, and about 800 British and Americans, including the staff of the Bahrain Petroleum Company.

The ruling family, the Al Khalifah, came originally from the neighbourhood of Kuwait and occupied Bahrain, which was then in the hands of the Persians, in 1782. The present ruler, H.H. Shaikh Sir Sulman bin Hamad al Khalifah, K.C.I.E. (born 1895), acceded on 3 February, 1942.

Manamah, the capital of the state and the commercial centre, is situated at the northern end of the largest island and extends for 1½ miles along the shore. The town contains a post office, branches of the Eastern Bank and the British Bank of Iran and the Middle East, Government offices, the state hospital and the offices of commercial firms. It has a population of about 30,000. Electricity from the Government powerhouse in Manamah supplies light and power in Manamah and Moharraq. Water is obtained from artesian wells.

Bahrain is the centre of the famous pearl fishing industry of the Persian Gulf. In the pearl season, which lasts for six months during the summer, Bahrain is visited by numerous Arab and Indian and some European and American pearl buyers. In 1932 oil was discovered. Operations are being conducted by the Bahrain Petroleum Company, registered in Canada, under a concession granted by the Shaikh. The Bahrain Petroleum Company is part of an organization owned by the Standard Oil [illegible] of California and the Texas Corporation. Other industries are: [illegible] weaving, manufacture of reed mats, fishing, and breeding of particularly fine white donkeys. About a twentieth of the area is cultivated, dates and lucerne being the chief crops.

The revenue of the state is derived from oil royalties and from customs duties, which range from 5% to 15% *ad valorem* on all imports. Revenue of the state in 1950, Rs. 17 million. The greater part of the trade of the neighbouring Saudi Arabian provinces of Nejd and Hasa passes through Bahrain.

In 1949–50 the chief imports were :—Rice, £564,755; wheat, £135,220; flour, £230,185; coffee, £108,360; sugar, £347,650; tea, £182,396; cotton piece-goods, £588,925; woollen piece-goods, £100,000; cigarettes, £156,675. The chief exports were :—Sugar, £179,055; tea, £174,265; rice, £227,420; wheat, £114,815; cotton piece-goods, £243,810.

Imports into the United Kingdom amounted to £34,783,383 in 1950; £17,845,929 in 1949; £6,179,412 in 1948; exports from the U.K., £6,915,601 in 1950; £8,230,798 in 1949; £8,543,490 in 1948; re-exports, £50,165 in 1950; £51,410 in 1949; £59,344 in 1948. These Board of Trade returns include Qatar, Kuwait and Trucial Oman.

Steamships make periodical calls, and Bahrain is a port of call on the Empire air route to India and Australia. Import of arms and ammunition is subject to special permission; the sale of alcoholic liquor is restricted and the import of cultured pearls is forbidden.

The principal coin in use is the Indian rupee. The dhara (= 19 inches), roba (4 lb.), maund (56 lb.) and rafa (560 lb.) are the principal weights and measures.

ARGENTINA.

(REPÚBLICA ARGENTINA.)

Constitution and Government.

IN 1516 Don Juan Díaz de Solís discovered the Río de La Plata. In 1534 Don Pedro de Mendoza was sent by the King of Spain to take charge of the 'Gobernación y Capitanía de las tierras del Río de La Plata,' and in Feb., 1536, he founded the city of the 'Puerto de Santa María del Buen Aire.' In 1810 the population rose against Imperial Spanish rule and in 1816 Argentina proclaimed its independence. Civil wars and anarchy followed until, in 1853, a stable government was established with a constitution.

The following is a list of Presidents from 1898 onwards :—

Gen. Don Julio Argentino Roca, 12 Oct., 1898–12 Oct., 1904.
Dr. Don Manual Quintana, 12 Oct., 1904–12 Mar., 1906. (Died.)
Dr. Don José Figueroa Alcorta (acting), 12 Mar., 1906–12 Oct., 1910.
Dr. Don Roque Sáenz Peña, 12 Oct., 1910–9 Aug., 1914. (Died.)
Dr. Don Victorino de la Plaza (acting), 9 Aug., 1914–12 Oct., 1916.
Don Hipólito Irigoyen, 12 Oct., 1916–12 Oct., 1922.
Dr. Don Marcelo Torcuato de Alvear, 12 Oct., 1922–12 Oct., 1928.
Don Hipólito Irigoyen, 12 Oct., 1928–6 Sept., 1930. (Deposed.)
Gen. Don José Félix Uriburu (provisional), 6 Sept., 1930–20 Feb., 1932.
Gen. Don Agustín P. Justo, 20 Feb., 1932–20 Feb., 1938.
Dr. Don Roberto M. Ortiz, 20 Feb., 1938–24 June, 1942. (Resigned.)
Dr. Don Ramón S. Castillo, 27 June, 1942–4 June, 1943. (Deposed by a military junta.)
General Arturo Rawson, 5 June, 1943–7 June, 1943. (Resigned.)
General Pedro P. Ramírez, 7 June, 1943–9 March, 1944. (Resigned.)
General Edelmiro J. Farrell, 9 Mar., 1944–4 June, 1946.

The present Constitution of the Argentine Republic bears date 16 March, 1949. It was drafted by the government and passed by the Constitutional Convention, elected 5 Dec., 1948. It follows in many respects the liberal constitution of 1853, but gives the government great powers over the national economy. The President and Vice-president are elected directly by popular vote (no longer by an electoral college); their term of office is 6 years, and the President may be re-elected. The Vice-President, elected at the same time, presides over the Senate, but has otherwise no political power. The President is commander-in-chief of the Army and Navy, and appoints to all civil, military, naval and judicial offices, in certain cases with the approval of the Senate, and has the right of presentation to bishoprics; he is responsible with the Cabinet for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth. The President has a salary of 96,000 paper pesos, and 28,800 paper pesos for official expenses. The National Congress consists of a Senate and a House of Deputies. The Senate numbers 30, 2 from the capital and from each province, elected for 6 years (one-third retiring every 3 years). The deputies are also elected for 6 years, one-half retiring every 3 years. The two chambers meet annually from 1 May to 30 Sept.; the lower house receives the budget and initiates fiscal legislation. Since the adoption of the Sáenz Pena law in 1912, voting has been free, secret and obligatory. Women were enfranchised on 9 Sept., 1947.

A law adopted Sept., 1949, recognizes the 'legality' of the existing political parties—Conservatives, Progressive Democrats, Radicals, Socialists and Communists—but (1) forbids the formation of party coalitions for electoral purposes, and (2) empowers the government to dissolve parties endangering 'social peace,' inciting to violence or having 'international connexions.' Previously, the Communist party had been outlawed from 1930 to 1944. A law passed in Sept., 1950, imposes 8 years' imprisonment upon anyone who 'causes public alarm or despondency.'

Foreigners, under the new constitution, automatically become naturalized citizens after 5 years' residence unless they opt to retain their former nationality; they may, on application, be granted citizenship after 2 years' residence. In 1950 these rights, previously withheld, were extended to Japanese and German residents.

President of the Republic.—Colonel Juan Domingo Perón (elected on 24 Feb., 1946; election confirmed by the Electoral Assembly on 6 May, and assumed office 4 June, 1946, to serve until 1952).

Vice-President.—Dr. J. Hortensio Quijano.

National flag: blue, white and blue (horizontal); with a rising sun on the white band.

National anthem: Oid, mortales, el grito sagrado Libertad (words by V. López y Planes, 1813; tune by J. Blas Parera).

For the events leading up to ascendancy of President Perón, *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 737.

At the election of 24 Feb., 1946, Colonel Perón polled 1,479,517 votes (securing 304 votes in the Electoral College) and Dr. Tamborini, 1,220,822 votes (72 electors). The Perónistas elected 26 Senators with 4 undetermined; in the House of Deputies Perónistas numbered 109, Radicals 44, Conservatives 2, Anti-Personalists 2. The Social-Democrats and the Communists failed to secure a single seat.

The Cabinet, appointed by and acting under the orders of the President, consists of 20 secretaries of state controlling the various departments.

In May, 1947, a National Economic Council was created with large powers to direct the country's new 'planned economy' on state capitalist lines. The President of the Council enjoys cabinet rank, and the other members are the ministers in charge of the Departments of Finance, Agriculture, Public Works, Industry and Commerce, and Labour and Welfare, together with the President's Technical Secretary.

LOCAL GOVERNMENT.

The Constitution, with certain exceptions, resembles that of the United States. Such matters as affect the republic as a whole are under the central Government. The governors of the various provinces, elected by the people of each province for a term varying between 3 and 4 years, are invested with very extensive powers, and are independent of the central executive. The provinces elect their own legislatures, and have general control over such affairs as are not under the jurisdiction of the central government. The territories are under the supervision of governors appointed by the President. In Buenos Aires the 'Intendente' or Mayor is appointed by the President with the approval of the Senate. He is assisted by a deliberative council of 30 elected by the male inhabitants over 18 years of age, including foreigners who comply with certain conditions. Voting is compulsory under penalty of a fine. The deliberative council votes on measures relating to city finance, works and general administration,

and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

Area and Population.

The Argentine Republic consists of 14 provinces, 9 territories and 1 federal district, containing the land area and population (census of 19–21 April and 10–12 May, 1947) shown below :—

Provinces and territories [1]	Area : English sq. miles, 1944	Population : census, 1914	Population : census, 1947	Pop. per sq. mile, 1947
PROVINCES				
Litoral

[1] The capitals are given in brackets. Where no name appears in brackets the capital bears the same name as the province or territory.

[2] Carved out of Chubut Territory in 1946.

[3] Including 2,487 then inhabiting the territory of Los Andes.

[4] The official census make[illegible]6,108,573, including the Falkland Islands with a population of 2,[illegible] called 'Zone Austral,' and stated to comprise the 'Malvinas' (*i.e.*, Falklands), South Orcadas (*i.e.*, Orkneys), South Georgias, South Sandwich Islands and the 'sovereign territories of Argentina in the Antarctic.'

Total area claimed (and reported in the United Nations *Statistical Yearbook*, 1950) is 2,794,015 sq. km. (1,078,772 sq. miles); previously it had been put at 2,792,713 sq. km.

Estimated population, 1 Jan., 1950, 17,180,000.

In the 1947 census (preliminary) the population is stated to be 8,243,659 males and 7,864,914 females. The Federal District included 1,462,711 males and 1,537,660 females; the province of Buenos Aires, 2,310,964 males and 2,097,409 females. Women are everywhere in the minority, except in the Federal District and 5 of the smaller provinces.

In 1947, the urban population; *i.e.*, in communities of 2,000 or more inhabitants, was 61·4% of the total; 8 cities of 100,000 or more inhabitants accounted for 39·3% of the total.

Crude birth rate, 1946, was 24·3 per 1,000 population; crude death rate, 9·4; crude marriage rate, 7·8; infantile mortality rate, 79 0 per 1,000 live births.

The population is overwhelmingly European in origin (principally from Italy and Spain) with little admixture with the aborigines. The dwindling Indian [illegible] at from 20,000 to 30,000.

Immigration is, under the Constitution, restricted to white persons. Plans for the assisted immigration of 4 million Europeans, preferably Roman Catholics, were set in motion in 1947. In 1949, immigrants numbered 150,987; owing to unemployment there was an exodus, back to Europe, of about 22,500.

The movement of population for 5 years is given as follows (excluding territories) :—

	Marriages	Births	Deaths	Immigrants [1]	Emigrants [1]
1943 . .	103,316	319,170	137,805	999	836
1944 . .	110,140	340,906	141,491	1,302	814
1945 . .	112,660	345,533	144,780	1,245	1,532
1946 . .	115,272	346,141	138,040	5,236	5,427
1947 . .	—	—	—	41,488	11,183

[1] Excluding first-class passengers.

The population of the capital, Buenos Aires, on 1 Jan., 1944, was 2,457,494 [1]; Rosario, 522,403; Córdoba, 287,598 [2]; Santa Fe, 154,173; Tucumán, 157,926; Mendoza, 103,879 [2]; Paraná, 78,284; Santiago del Estero, 76,445.

Religion and Education.

There is no state religion, though the Roman Catholic religion is supported by the state; all other creeds are tolerated and freedom of conscience prevails. There are 1 cardinal, 7 archbishops and 15 suffragan bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the republic.

Illiteracy among the voters has fallen from 35% in 1916 to 21·98% in 1930; in the federal capital, to 2·6%. Primary education is free (subsidized by the central and provincial governments), secular and compulsory for children from 6 to 14 years of age. In 1945 the 14,294 primary schools had 2,064,464 pupils and 79,741 teachers. In 1946, 505 secondary, normal and special schools had 163,626 pupils and 19,562 teachers, and 640 incorporated secondary schools had 8,798 teachers and 57,783 pupils. There are national universities at Córdoba (founded 1613), with (1943) 9,168 students; Buenos Aires (1821), with 22,076 students; La Plata (1897), with 13,411 students; Tucumán (1912), with 2,384 students; the National University

[1] On 1 Jan., 1945, 2,620,827. [2] Figures for 1943.

of the Litoral, in Santa Fe, with branches in Rosario (1920), and in Corrientes (1922), with 12,716 students, and the National University of Cuyo, with 3,115 students in 1942.

By a law adopted in 1947, a new tax of 2% upon payrolls (excluding the wages of domestic servants and government employees) is levied upon employers; the proceeds are to go towards the support of the universities.

Motion-picture theatres increased from 1,208 in 1940 to 1,690 in 1950, with seating capacity of 945,000; in addition, other places of entertainment such as clubs, restaurants and bars are equipped, bringing the total up to 1,960 with an audience of 1,200,000.

Daily newspapers, 1949, numbered 180 with an aggregate daily circulation of 3,460,000.

Justice.

Justice is administered by federal and by provincial courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The chief federal court is the Supreme Court, with 5 judges at Buenos Aires; on 1 May, 1947, all 5 justices were removed on being impeached by the Senate 'for abuse of authority and interference in politics.' Other federal courts are the 5 appeal courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba and Rosario (Santa Fe), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so designated) and several minor courts. Trial by jury is established by the Constitution for criminal cases, but never practised, except in the province of Buenos Aires. The lawyers were organised in a State corporation in 1948.

Finance.

Total ordinary receipts and expenditures for recent years have been as follows, in paper pesos (at the official rate of 1 million pesos = $297,730 U.S.):—

Year	Receipts	Expenditure [1]	Year	Receipts	Expenditure [1]
1945	1,491,200,000	1,742,800,000	1949	4,581,600,000	4,477,000,000
1946	1,891,800,000	2,237,300,000	1950 [2]	4,870,000,000	5,[illegible]
1947	3,469,100,000	2,920,800,000	1951 [2]	4,844,100,000	1,[illegible]
1948	3,988,500,000	3,782,000,000	1952 [2]	4,844,100,000	4,844,000,000

[1] Exclusive of [illegible] 1,016,500,000 in 1945; [illegible], 1,736,700,000 in 1947, [illegible], 1,460,100,000 in 1949; 964,800,000 in 1950; 1,059,800,000 in 1951 and in 1952.

[2] Budget estimates.

The 1949 sale of bonds realized 2,728 million paper pesos, of which 1,267·9 million went to the 5-year plan and 705·7 million to defence.

The 1951 and 1952 budgets exclude expenditures from special bond issues, 1,059,800,000 pesos, and 2 self-balancing items: autonomous institutions, 5,987,900,000 pesos, and special accounts, 1,182·4 million, making the year's total for each of the 2 years 13,073·9 million compared with the 1950 total, similarly calculated, of 11,259·1 million.

The state has become an immense property owner. The National Accountancy Office, in 1947, valued the state-owned property at 11,801 million pesos, almost equalling the entire national debt.

On 30 June, 1950, the total debt of the National Government amounted to 16,643 million pesos (12,915 million on 31 Dec., 1948), of which 14,450·5 million was consolidated debt and 2,192·5 million was the Treasury's gross floating debt; it was all internal except 47·9 million pesos, the balance outstanding of the 'Roca' 1933 loan. This excludes the debt of the trading corporation I.A.P.I. (estimated at 9,300 million at the end of 1949) and of the other state corporations and of the provinces and municipalities. Consolidated internal debt of the provinces and the municipalities amounted to 2,058,200,000 paper pesos (31 Dec., 1946). External debt on that date was stated to be 309·1 million.

On 13 Feb., 1951, the government exempted from income tax all interest on federal, provincial and municipal bills, bonds and other securities maturing after 1 Jan., 1951; the exemption is retroactive through 1950.

British investments, end of 1949, had a par value of £69,428,083 (£5,666,450 in government bonds, and £63,761,633 in other enterprises which earned an average of 3·3% in 1949). Argentina's purchase of the British-owned railways in 1948 reduced the par value of the outstanding British investments by £249,166,317.

Defence.

In Feb., 1949, the 3 defence services were placed under a Secretariat of National Defence with powers to draft schemes (subject to legislative approval) to co-ordinate the services.

Army.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalized citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' Army, or first line (permanent forces). After completing 10 years in the first line the men pass to the National Guard, and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is mobilized only in case of war. The period of continuous service, or training in the ranks with the permanent forces, is for 1 year. The reservists can be called out for training periodically.

The territory of the republic is divided into 6 military districts for administrative purposes. The peace-time strength of the Army is 50,000 all ranks. The Army is organized in 6 skeleton divisions, 3 cavalry brigades and 2 mountain detachments; it consists of 31 infantry regiments, 15 cavalry regiments, 10 artillery regiments, engineer and communication battalions and specialized artillery units. On mobilization, divisions would be brought up to strength and their number doubled.

There is a trained reserve numbering 300,000 men, of whom 215,000 belong to the National Guard and 70,000 to the Territorial Guard. The territorial reserve numbers 100,000 men.

There is a military aviation training school at El Palomar. The Air Force is organized in 3 aviation groups, each comprising 3 reconnaissance groups and 1 fighting group. Each group is composed of two flights. There is a national aircraft factory at Córdoba.

NAVY.

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Guns				
	BATTLESHIPS	tons	in.	in.				knots
1915 1914	Moreno . . . Rivadavia . .	27,720	11	12	12 12-in., 12 6-in., 4 3-in. A.A.	2	45,000	23
	CRUISERS							
1939	La Argentina . .	6,000	3	2	9 6-in. . . .	6	60,000	31
1931	Almirante Brown . 25 de Mayo . .	6,800	3	2	6 7·5-in., 12 3·9-in. .	6	85,000	32
	COAST DEFENCE VESSEL							
1901	Pueyrredón . .	6,100	6	6	2 10-in., 8 6-in. .	–	13,000	18

There are also 11 sea-going destroyers, 4 small obsolete destroyers, 3 submarines, 5 frigates, 2 patrol vessels, 9 motor torpedo-boats, 11 mine-sweepers and some training and miscellaneous craft.

The cruiser *La Argentina* has had her 4 4-in. A.A. guns removed, and her secondary armament now comprises 14 40-mm. A.A. weapons. The battleships *Moreno* and *Rivadavia*, the coast-defence ironclad *Pueyrredón*, and the 4 old destroyers were converted to oil-burning and otherwise modernized.

A new programme authorized in Nov., 1946., provided for the acquisition or construction of 1 aircraft carrier, 1 cruiser, 4 destroyers, 3 submarines, 10 patrol craft and 1 supply vessel. So far 5 frigates have been acquired.

In 1951, the U.S. cruisers *Boise* and *Phœnix* were purchased for $7 8 million; they were re-named *Nueve de Julio* and *Diecisiete de Octubre*.

The active personnel of the Navy comprises 484 officers, and about 11,000 men (including about 5,000 conscripts), who have to serve 2 years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery and a school for torpedo practice.

Production and Industry.

Argentina has an area of about 670,251,000 acres, of which about 41% is pasture land, 32% woodland and 10% (67,400,000 acres) cultivated. The agricultural census of June, 1937, showed 439,874 farms and ranches, of which 164,871 were operated by owners, 197,174 by tenants and 77,829 under special arrangements. Owners and tenants included 276,129 Argentines; of the total, 111,379 were illiterate. Cereals occupied 46,840,000 acres.

In the territories the Federal Government owns 237,768,000 acres suitable in general for pastoral colonization, and these lands are conditionally offered free or for sale or on lease.

Farming has deteriorated due to preferential encouragement of industry financed from the proceeds of farm exports; acreage planted to leading export cereals, 1949, was 13·4 million hectares (33·1 million acres) or about 65% of pre-war average.

First official disclosure of crop statistics in several years appeared in 1950; area and production are shown as follows :—

	Season, 1949–50		Annual average, 1940–45	
	Area (hectares)	Output (metric tons)	Area (hectares)	Output (metric tons)
Wheat . . .	5,692,600	5,144,000	6,860,000	6,384,000
Linseed . . .	1,007,600	675,800	2,471,000	1,405,000
Maize	2,140,000	844,000	4,733,000	6,580,000
Oats	1,229,600	540,100	1,822,600	718,000
Barley . . .	803,000	324,900	746,800	540,000
Rye	1,863,000	277,100	1,526,100	255,000

The severe contraction in the production of cereal crops for export is shown even more strikingly by the pre-war figures : wheat area for 1938–39, 8,621,000 hectares and production, 10,000,000 metric tons.

The total grain and meat exported for 3 years (with average for 3 years, 1943–45), in metric tons, is shown as follows :—

Year	Wheat	Maize	Linseed	Barley	Meat
1943–45 avge.	2,213,156	437,267	352,103	150,177	653,614
1948 . .	2,148,623	2,520,721	nil	665,882	641,500
1949 . .	1,837,000	1,081,000	nil	198,000	486,300
1950 . .	2,743,618	790,439	131,074	95,768	163,790

Alfalfa, on about 13½ million acres for feeding livestock, is Argentina's most successful crop. Cotton, potatoes, sugar, vine, tobacco, rice and yerba maté (Paraguayan tea) are also cultivated. Oats are occasionally important, with exports of 332,779 metric tons, 1946, dropping to 191,900 in 1949. Sugar production in 1949, 548,772 tons; in 1950, 613,100 tons; 61,618,000 litres of alcohol (grapes, molasses and grains) were produced in 1946. There were 41 cane-sugar mills and one beet-sugar factory. Total production of wine, in 1948–49, 204,000,000 gallons. Production of table grapes, 1948–49, 200,000 tons. Citrus fruit in 1947–48 included 9,158,000 boxes of oranges, 2,850,000 boxes of tangerines and 1,343,000 boxes of lemons. Potato harvest, 1946–47, amounted to 747,700 metric tons; of sweet potatoes, 366,300 tons. The area under tobacco production is about 19,000 hectares; output (1946–47), 26,100 tons. Production of yerba maté was (1946) 99,400 metric tons; the plant is a rich source of chlorophyll, useful in the manufacture of medicines. Production of cotton in 1950 amounted to 140,000 tons of fibre; cotton exports, 1949, 10,400 metric tons.

Before World War II the country was the largest grower and shipper of linseed but, preferring to convert it into oil, no linseed was exported from 1946 until April, 1950, when it was resumed. Exports of linseed oil, 1947, was 213,500 metric tons. Peanut crop, 1946–47, 107,000 tons; sunflower seed (first grown by Russian immigrants in 1900 and now furnishing the country's most popular edible oil), 930,200 tons in 1947–48. Exports of vegetable oils (from sunflower, cotton seed, rape seed and peanuts), 1947, 237,300 tons from production of 487,469 metric tons. There are (1950) 5,238,000 olive trees, of which 48% are in Mendoza. Argentina's 20 quebracho extract factories handled 836,817 tons of wood in 1946 (726,575 in

1945), producing 263,572 tons of extract (232,372), of which 53·9% was soluble in cold water. Exports, 1950, 234,948 metric tons (152,600 in 1948). Argentina is the world's largest source of tannin.

Argentina lags in the use of farm machinery; in 1948 she had only 10 tractors per 10,000 hectares of arable land compared with Italy's 40, the United States' 190 and Great Britain's 263; tractors numbered 33,000, but 57% of them are obsolescent and only 5% modern.

The livestock census (1 July, 1947) showed cattle, 41,268,470; horses, 7,237,663; mules, 338,300; asses, 163,000; goats, 4,933,700; sheep, 50,856,556; pigs, 2,981,406. Wool production is about 220,000 tons; exports, 1949, 99,700 metric tons. Exports in the wool year ending 30 Sept., 1949, were 80,994 metric tons; in the year ending 30 Sept., 1950, 214,200 tons. Butter production (1946–47), 51,824 tons, with exports of 17,032 metric tons; casein, 33,554 tons, with exports of 25,832 metric tons; cheese, 86,340 tons, with exports of 10,612 tons. Cattle hides exported, 1950, were 10,702,700.

The principal industry is meat refrigeration; an Act of 1950 placed the entire industry under control of the State through the Argentine Livestock Institute which supervises every stage from [illegible] through the manufacture and distribution of meat. In [illegible] quarters of frozen beef (1949, 4,590,500), 254,208 (1949, 653,899) carcases of mutton and 1,097,510 (1949, 2,651,249) carcases of lamb were exported. The largest refrigerating plant in the world, with a daily capacity of 5,000 cattle and 10,000 sheep, is at Buenos Aires. Exports of salted ox-hides in 1950, 7,314,903 metric tons. Flour-milling ranks second to [illegible]. In 1947, 184 mills produced 1,935,100 tons of flour; exports, [illegible] tons.

In Oct., 1946, the Government submitted to Congress a huge '5-year plan' embodied in 27 proposed laws for the expansion and industrialization of the country's economy, as also for 'national defence.' The cost of the last-named was not disclosed but the two other sectors, 'state administration' and 'economic development,' called for 6,662,700,000 paper pesos (£400,000,000), to be expended at the rate of 1,332,000,000 pesos annually. This was increased to 6,790 million pesos in November, 1947. The [illegible] achievement was the completion of a pipeline conveying natural [illegible] the oilfields to Buenos Aires. But, after 3 years of this programme (instead of 5) the government announced in Sept., 1949, that national resources would be switched to the promotion of agriculture, beginning in 1950, when 164 million pesos in foreign exchange would be used to purchase farm machinery abroad, including $20,000,000 in the U.S.

In 1947 industrial production reached the highest level in Argentine's history, with a value (at 1935 prices) of 5,400 million pesos compared with 4,260 million in 1939. These figures exclude commerce and general services. Output of cotton textiles, 1947, 61,000 metric tons; woollen textiles, 20,896 tons. Rayon yarn output, 1948, was 10,252,000 lb. of which 8,895,000 lb. were viscose and the remainder acetate.

For the Central Bank's figures for the national income, 1935 to 1945 inclusive, and the index of the production of goods and services for Argentina's consumption, *see* THE STATESMAN'S YEAR-BOOK, 1948, pp. 701 and 702.

In 1947 there were 101,884 industrial establishments. Number of industrial workers rose from 489,000 in 1937 to 733,000 (wages 1·6 million pesos) in 1945 and to 956,000 (wages 5·6 million) in 1949. Peak year was 1948 when 965,200 were employed in industry. Cement output, 1950, was 1,558,000 metric tons. Electric power production, 1949, reached 4,120·6

million kwh. The total number of incorporated companies 31 Dec., 1948, was 2,337.

Most trade unions have joined the government-sponsored General Confederation of Labour; resisting this, the General Confederation of Maritime and Allied Trades (20,000 members) had a prolonged strike in 1950.

Up to 31 Dec., 1949, 117 foreign firms with aggregate machinery or capital of 353 million pesos (about £11 million) and 38,000 technicians and artisans had been granted permission to enter the country.

Mining is of no great importance and, 1950, is under state control. Mineral production in 1943 was valued at 105,374,000 pesos, of which petroleum accounted for 70,715,000 pesos. Gold, silver and copper are worked in Catamarca, where there are also 2 valuable tin mines, and gold and copper in San Juan, La Rioja and the south-western territories. Coal is found in the Andine Provinces, in the Cordillera region of Patagonia and in northern Patagonia; total consumption of coal, 1947, was 1,067,213 metric tons. A promising deposit of iron ore was reported in Patagonia in Aug., 1949; there are other deposits reported in Rio Negro. Tungsten (275 tons in 1946), lead (24,864 short tons in 1947), zinc and limestone are important minerals. During 1949 crude-oil production was 3,591,300 cubic metres (22,625,190 barrels), of which 2,580,100 cubic metres came from government oilfields and 1,011,200 cubic metres from private companies' oilfields. Output of crude oil, 1949, 3,151,000 metric tons; 1950, about 3,500,000 metric tons. Output of gas, 1949, was 224·2 million cubic metres. In 1947, uranium was found in ore from La Heras in the province of Mendoza.

Commerce.

For a time Argentina actively promoted the idea of customs union in South America, concluding agreements in 1943 with Chile and Paraguay under which, in 1946, joint committees were appointed to explore the possibilities; no further progress has been reported.

Foreign trade is based on the bulk selling of the major national products and the bulk buying of some imports by the I.A.P.I. (*Instituto Argentino de Promoción del Intercambio*), a state organ now (1951) under the Ministry of Economics (previously Ministry of Finance). It has capital and reserves of 1,465,300,000 pesos on 1 Jan., 1950, and total assets and liabilities of 11,823,300,000 pesos.

Import values include charges for carriage, insurance and freight; export values are on a f.o.b. basis. Real values of foreign trade in paper pesos, exclusive of coin and bullion :—

	Average 1937–39	1946	1947	1948	1949
Imports .	1,452,000,000	2,331,700,000	5,348,500,000	6,189,700,000	4,641,700,000
Exports .	1,762,000,000	3,973,100,000	5,504,900,000	5,541,800,000	3,717,500,000

Argentina's balance of payments in 1949 and 2 preceding years is as follows (in millions of pesos) :—

	1947	1948	1949
Inward payments from exports, freight, port dues, etc.	5,699	5,720	3,696
Outward payments for imports, debt service, official expenses, balance of private financial services, balance of movement of capital, etc.	5,121	5,519	4,172
Difference	+ 578	+ 201	− 476
Special outgoings, comprising official and private debt repatriation, movements of bullion and foreign trade adjustments	− 1,606	− 2,073 [1]	+ 163
Net balance	− 1,028	− 1,872	− 313

[illegible] pesos for private debt repatriation, this amount being approxi[illegible] the £150 millions paid by the government for the former British-owned railways operating in Argentina.

Imports, in 1947, were 11,103,900 metric tons; in 1948, 14,333,000 metric tons; in 1949, 12,161,900 metric tons. Exports, in 1947, 9,306,000 tons; in 1948, 8,759,000 tons; in 1949, 5,941,600 metric tons.

Principal imports and exports for 1948 (in millions of paper pesos):—

Imports	1,000,000 paper pesos	Exports	1,000,000 paper pesos
Textiles	687	Meat	662
Chemicals and colours	357	Industrial manufactures	96
Fuels and lubricants	693	Cereals and products	2,663
Paper	204	Hides	420
Foodstuffs and tobacco	316	Wool	414
Iron and manufactures	840	Other agricultural products	602
Other metals	315	Pastoral by-products	273
Machinery and vehicles	1,807	Dairy products	167
Timber and manufactures	315	Forestal products	101
Rubber and manufactures	50	Cattle on hoof	105

Receipts from customs duties and port dues were: in 1947, 515,219,290 paper pesos, and in 1946, 252,370,107 paper pesos. Import duties are assessed in gold pesos, but collected in paper pesos.

Trade by countries, with imports and exports in market values (in millions of paper pesos) in 1949 were:—

Imports from		Exports to	
Italy	742·2	United Kingdom	848·9
United Kingdom	721·6	Brazil	405·3
U.S.A.	689·5	U.S.A.	398·7
France	464·9	Italy	339·0
Brazil	357·4	France	189·4
India	271·1	Spain	178·5
Belgium	197·9	Belgium	163 4
Netherlands Antilles	179·5	Netherlands	160·5

Of total exports in 1949, cereals and other agricultural products were 45·01%; animal products, 50·46%; forestal products, 2·33%, and manufactured goods, 1·95%.

The staple Argentine imports into the United Kingdom and the chief

exports of British produce and manufactures to Argentina (Board of Trade returns) in 2 years were as follows (in £ sterling) :—

Imports into U.K.	1949	1950	Exports from U.K.	1949	1950
Grain and flour .	13,767,200	7,480,657	Chemicals and drugs	2,493,869	1,743,884
Feeding stuffs .	3,325,835	8,617,667	Pottery and glass .	1,081,359	404,526
Meat and animal products . .	36,452,600	33,570,973	Woollens & worsteds	1,863,350	434,711
Other foods . .	1,808,610	959,653	Machinery . .	8,077,037	6,780,819
Vegetable oils, gums	10,351,041	24,434,463	Cotton textiles .	1,009,724	1,383,490
Hides and skins .	9,667,401	8,478,773	Misc manufactures.	1,470,343	948,963
Raw materials .	728,675	764,911	Vehicles . .	15,970,688	12,918,126
Chemicals, drugs, etc. . . .	386,814	571,519	Linen mfrs. . .	565,953	121,772
Raw wool . .	418,352	502,474	Coal . . .	3,987,925	3,932,969
			Iron & steel mfrs. .	4,320,397	4,054,311
			Cutlery & hardware.	1,702 966	1,040,677

Total trade (Board of Trade returns) between Argentina and the United Kingdom for 5 years (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports into U.K. . . .	38,470,723	130,570,199	121,816,717	77,149,926	89,409,265
Exports from U.K. . . .	19,338,017	34,800,669	52,529,280	51,114,910	38,302,837
Re-exports from U.K. . .	377,054	179,708	306,060	456,617	449,437

Transportation and Communications.

From 1 Nov., 1948, all land, sea, river and air transport is under the control of a new Ministry of Transport.

Shipping.—Arrivals of vessels at Argentine ports, 1949, totalled 8,681,578 net registered tons, compared with 9,597,778 tons in 1948; British ships of 2,170,091 net tons led, followed by Argentine of 1,196,317 tons and the United States of 1,096,368 tons.

The state-owned fleet (1948) included 27 oil tankers and 87 cargo ships of 683,000 gross registered tons. Tonnage built and building in March, 1950, totalled 1,364,000. The state, in 1949, took control over the Dodero line, owners of several hundred vessels from tugs to passenger liners. Total merchant marine, 30 June, 1949, was 357 vessels of 814,274 gross tons.

A separate fleet, the State River Fleet, had, 1949, 32 self-propelled barges, 60 lighters, 24 tugs and 12 auxiliaries

Railways.—On 1 March, 1948, Argentina became the owner of her entire railway system, consisting of 18 different railways with a total mileage of 26,568 miles. The [illegible] brought together 7 government railways (mostly small) with [illegible] and some 12% of the aggregate revenue), 3 French-owned railways (2,660 miles and 7% of the revenue) and 8 British-owned railways (15,561 miles and 80% of the revenue). Legal formalities were completed on 5 May, 1949. For details *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 746.

Goods traffic on the railways has declined from year to year since 1945, but passenger traffic rose from 188 million in 1942–43 to 448 million in 1948–49.

Aviation.—Commercial airlines flew a total of 15,633,700 kilometres in 1947 (4,986,900 in 1946), carrying 223,500 passengers (132,500) and

19,434,700 tons (738,200), of which air mail was 16,643,500 tons (153,800). The government on 3 May, 1949, nationalized the 4 domestic airlines. A big new airport at Ezeiza near Buenos Aires was opened on 27 Oct., 1949.

Roads.—On 30 June, 1943, 39,782 miles of national and provincial highways were open; total mileage, all roads, 1946, 259,000. In Feb., 1940, the Transandine tunnel was opened to motor traffic, facilitating all-year road traffic with Chile. The four main roads constituting Argentina's portion of the Pan-American Highway were (1942) opened to traffic.

Post.—In 1945, national telegraph lines totalled 29,510 miles. In 1949, the telephone service was nationalized; instruments numbered 719,000, of which 452,000 were in Buenos Aires and its suburbs. Wireless telephony between Buenos Aires, Chile, the United States and Europe [illegible] use. There were in 1945, 4,382 post offices. There are 55 [illegible] stations and about 1,250,000 [illegible] Cable service to other Latin American countries and the [illegible] is provided by All-American Cables.

Banking and Credit.

A law promulgated 25 March, 1946, nationalized the Central Bank (established in 1935). It was conceived as an autonomous institution charged with maintaining a minimum reserve (25%) in gold and devisen against notes and total sight liabilities. But in Oct., 1949, a law was passed abandoning the currency reserve provision (at least temporarily) and placing the bank under the Minister of Finance who becomes president. Eight other directors consist of the Under-Secretary of the Ministry, the presidents of the Banco de la Nación (the largest of the commercial banks), and the 3 state-controlled banks as well as representatives of agriculture, stock-breeding, industry, commerce and labour.

A decree on 24 April, 1946, established a state guarantee of all banking deposits but transferred their control to the Central Bank, the banking institutions becoming agents of the Central Bank instead of principals. They may make use of the deposits only on the authorization of the central institution, which fixes rates of interest. The banks may use for loans and discounts only their own capital and reserves. These deposits of the commercial banks are not included as sight liabilities in computing the Central Bank's reserves.

The Central Bank reported (30 June, 1950) deposits of 21,592 million pesos, all taken over from the commercial banks, and guaranteed by the government. Note circulation (and fracti[illegible] [illegible], 10,845 million pesos; rediscounts and loans to banks, [illegible], gold reported separately, 656 million pesos, other gold and foreign exchange (less gold owed abroad), 1,538 million pesos. The gold stock of the Central Bank and other government agencies fell from $1,197 million (U.S.) in Dec., 1945, to $143 million in May, 1949, recovering to $216 million as of 31 Dec., 1950. Total holdings of [illegible] hange were not reported in 1949 and 1950.

On 31 July, 1948, [illegible] were 44 banks each with capital of 1,000,000 paper pesos or over (including the Banco de la Nación, with 36% of the total assets of the banking system), consisting of 9 provincial banks, 25 domestic banks and 10 foreign banks, all of which are shareholders in the Central Bank. There are 43 banks with capital of less than 1,000,000 pesos, the average being 569,000 pesos or $169,500 U.S. The Banco de la Nación (founded in 1891) reported 31 July, 1948, capital and reserves of 342,637,700 paper pesos; deposits (in the custody of the Central Bank), 5,389,032,200 paper pesos; loans and discounts, 4,763,401,400 paper pesos; cash,

573,528,200 paper pesos. It has 306 branches and agencies, including one at Asunción, Paraguay.

The national postal savings bank (*Caja Nacional de Ahorro Postal*) had on 31 Aug., 1944, 9,706 branches and 2,852,489 depositors with total deposits amounting to 257,756,540 paper pesos; 8,105 of the branches were in schools. Postal savings, 31 Dec., 1950, were 1,383·9 million pesos.

Money, Weights and Measures.

The monetary system of the republic is on a gold exchange standard, the unit for foreign transactions being, nominally, the *peso oro* (gold peso) and for domestic transactions, the *peso moneda nacional* (paper peso), legal tender for all domestic debts. Figures in gold pesos are followed by the abbreviation o/s (*oro sellado*, minted gold); figures in paper pesos, by the abbreviation m/n (*moneda nacional*, national money). The paper peso is equal to ·44 gold peso; to convert paper pesos into gold pesos, multiply by ·44. To convert gold pesos into paper pesos, multiply by 2·2727.

The gold peso weighs 1·6129 grammes of gold $\frac{9}{10}$ fine; it is divided into 100 *centavos*. The monetary law of 5 Nov., 1881, authorized the coinage of 5- and 2½-peso gold pieces. The 5-peso gold piece (the *Argentino*) weighs 8·0645 grammes, ·900 fine, and therefore contains 7·25805 grammes of fine gold, but gold is not widely in circulation. Circulation consists chiefly of paper notes (issued since 1897) ranging from 1,000 pesos down to 50 centavos. The coins actually circulating (1948) were copper–aluminium and copper–nickel, 20, 10 and 5 centavos, and bronze, 2 centavos and 1 centavo.

Gold may be privately owned and it may be bought and sold freely.

The paper peso, since 1939, had an official rate of 29·773 cents (U.S.), in conjunction with, since 1943, a succession of export and import rates; on 28 Aug., 1950, the official rate was devalued to 20·00 cents (U.S.). For sterling 3 new rates were established: 14 pesos to the £ for basic exports and for preferential imports, and 21 pesos to the £ for preferential exports. For financial transactions there is a free market rate.

Since 1 Jan., 1887, the use of the metric system has been compulsory by law, but actually its enforcement is lax.

Diplomatic Representatives.

1. Of Argentina in Great Britain (9 Wilton Crescent, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Carlos Alberto Hogan (accredited 4 May, 1950).

Minister-Counsellor—Carlos Alberto Leguizamón.

First Secretary.—Osvaldo A. Pombo.

Attachés.—Fernando Rada; Pascual Russo; Juan Gatto; Hortensio Quijano Alió; Carlos A. Bontai; Amilcar José Romeo.

Financial Attaché.—Armando Vicente Lago.

Naval Attaché.—Capt. Guillermo D. Plater.

Air Attaché.—Brig. Ricardo P. Olmedo.

Economic Counsellor.—Anselmo Viacava.

Economic Attaché.—Ramon Meira Serantes.

Agricultural Attaché.—Domingo A. Derisi.

Military Attaché.—Col. Marino B. Carreras.

Labour Attaché.—Roberto Gasparini.

There are consular representatives at Cardiff, Glasgow, Liverpool, London, Manchester and Newport (Mon.).

2. Of Great Britain in Argentina.

Ambassador Extraordinary and Plenipotentiary.—Sir Henry Bradshaw Mack, K.C.M.G. (appointed 19 Jan., 1950).

Counsellor.—R. H. S. Allen.

Secretaries.—J. P. E. C. Henniker-Major, M.C.; P. A. Miller; A. A. W. Landymore (*Information*); I. P. MacEwen; W. M. Wylie (*Labour*); N. D. T. Sutton.

Naval Attaché.—Capt. C. B. Alers-Hankey, D.S.C., R.N.

Military Attaché.—Brigadier R. G. Fullerton.

Air Attaché.—Air Commodore W. E. Oulton, D.S.O., D.F.C.

Agricultural Attaché.—A. G. Mill.

Minister (Commercial).—E. J. Joint, C.M.G., O.B.E.

Counsellor (Commercial).—L. Unwin, O.B.E.

Consul-General (at Buenos Aires).—J. F. R. Vaughan-Russell, C.B.E.

There is a Consul at Rosario and there are Vice-Consuls at Bahía Blanca, Comodoro Rivadavia, Concordia, La Plata, Mar del Plata, Mendoza, Puerto Deseado, Río Gallegos, Rio Grande (Tierra del Fuego), San Julián, Santa Cruz, Santa Fé, and Trelew.

AUSTRIA.

(REPUBLIK ÖSTERREICH.)

Constitution and Government.

UNTIL 12 March, 1938, Austria remained an independent State; on that date it was forcibly absorbed in the German Reich until it was liberated by the armies of the United Nations. Already in the Moscow Declaration of Oct., 1943, Great Britain, the United States and the U.S.S.R. had resolved upon the re-establishment of a free and independent Austria.

By May, 1945, the whole of Austria had been occupied by the troops of the four powers. On 4 July, 1945, Austria, within its 1937 frontiers, was, for purposes of occupation, divided into four zones, allotted to each power as follows :—

The north-eastern (Soviet) zone consists of the province of Lower Austria with the exception of the city of Vienna, that part of the province of Upper Austria situated on the left bank of the Danube, and the province of Burgenland. The north-western (United States) zone consists of the province of Salzburg and that part of the province of Upper Austria situated on the right bank of the Danube. The western (French) zone consists of the provinces of Tirol and Vorarlberg. The southern (United Kingdom) zone consists of the province of Carinthia, including Ost-Tirol, and the province of Styria.

In Vienna, four sectors were likewise divided between the occupying four powers, and Vienna is also the seat of the Allied Council, which exercises supreme authority in all matters affecting Austria as a whole.

On 27 April, 1945, Dr. Karl Renner set up a Provisional Government which restored the Republic of Austria in the spirit of the Constitution of 1920–29, and was recognized by the Four-Power Allied Control Council on 20 Oct.

President of the Republic.—(Vacant.)

On 9 Oct., 1949, the elections were held for the National Assembly, which returned 77 People's Party (85 at the elections of 25 Nov., 1945), 67 Socialists (76), 16 Union of Independents (—), 5 Left Bloc (4 Communists).

The coalition government, set up in Nov., 1945, by Dr. Leopold Figl, the leader of the People's Party, was reconstructed on 7 Nov., 1949, as follows :—

Chancellor.—Dr. Leopold Figl.[1]
Vice-Chancellor.—Dr. Adolf Scharf.[2]
Minister of the Interior.—Oskar Helmer.[2]
Minister of Justice.—Dr. Otto Tschadek.[2]
Minister of Finance.—Dr. Eugen Margaretha.[1]
Minister of Education.—Dr. Felix Hurdes.[1]
Minister of Commerce and Reconstruction.—Dr. Ernst Kolb.[1]
Minister of Agriculture.—Josef Kraus.[1]
Minister of Communications and Nationalized Undertakings.—Karl Waldbrunner.[2]
Minister of Social Welfare.—Karl Maisel.[2]
Minister of Foreign Affairs.—Dr. Karl Gruber.[1]

[1] Austrian People's (Catholic) Party. [2] Socialist.

National flag : red, white, red (horizontal).
National anthem : Land der Berge, Land am Strome (words by Paula Preradovic; tune by W. A. Mozart).

Local Government.

The Republic of Austria comprises 9 provinces (Vienna, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tirol, Vorarlberg, Burgenland). There is in every province an elected Provincial Assembly.

Every commune has a Council, which choses one of its number to be head of the Commune (burgomaster) and a committee for the administration and execution of its resolutions.

Area and Population.

For the boundaries of Austria according to the Treaty of St. Germain, signed on Sept., 1919, *see* The Statesman's Year-Book, 1920, pp. 674–5.

The area and population (as at 10 Oct., 1948) are shown as follows :—

Provinces	Area, square km.	Area, English square miles	Population	Percentage of population	Population per square km.	Population per square mile
Vienna . .	1,216	469	1,731,557	24·90	1,424	3,692·0
Lower Austria .	18,382	7,098	1,268,234	18·24	69	178·7
Upper Austria .	11,978	4,625	1,137,528	16·36	95	246·0
Salzburg .	7,153	2,762	331,615	4·77	46	120·1
Styria . .	16,385	6,326	1,105,170	15·90	67	174·7
Carinthia . .	9,534	3,681	482,886	6·95	51	131·2
Tirol . .	12,649	4,884	429,933	6·18	34	88·0
Vorarlberg .	2,602	1,004	191,743	2·76	74	191·0
Burgenland .	3,952	1,526	274,078	3·94	69	179·6
Total . .	83,851	32,375	6,952,744	100·00	83	214·8

Vital Statistics.

Year	Live births	Still births	Deaths (excl. still births)	Marriages	Divorces
1945	101,369	2,020	173,767	31,363	4,585
1946	111,302	2,501	94,077	62,791	13,423
1947	128,953	2,766	90,027	75,484	13,543
1948	123,221	2,634	84,213	71,904	14,256
1949	113,375	2,316	89,247	68,974	12,855
1950[1]	105,524	2,171	84,736	63,456	—

[1] Preliminary.

The population of the principal towns, according to the latest statistics available in Oct., 1948, was as follows :—

Graz . .	219,974	Klagenfurt	65,799	Leoben .	35,785	Dornbirn .	22,516
Linz . .	181,532	St Pölten	40,711	Wr Neustadt	31,894	Kapfenberg	21,552

Innsbruck .	97,221	Wels .	36,528	Krems .	22,656	Baden .	20,528

Religion.

In 1939 there were 5,872,175 Catholics (88·27%), 356,192 Protestants (5·35%), 84,043 Jews (1·26%), 339,242 'others' (5·10%), and 1,068 unknown. The Catholic Church has 2 archbishoprics and 4 bishoprics.

Education.

In 1949–50 there were in Austria 5,073 elementary and private schools, with 35,874 teachers and 846,846 pupils. Of all kinds of secondary schools there were 168 with 50,140 pupils and 3,550 teachers.

There were (1950) 10 commercial academies with 2,476 pupils and 44 commercial schools with 4,009 pupils, and a combined total of 603 teachers.

Austria has 3 universities maintained by the state, viz., Vienna (in 1949–50, 1,048 teachers, 10,427 students), Graz (346 teachers, 3,465 students), Innsbruck (373 teachers, 2,946 students) and a Roman Catholic theological faculty at Salzburg (20 teachers, 191 students). There are also 2 technical high schools at Vienna (357 teachers, 3,578 students) and Graz (198 teachers, 1,791 students), an agricultural college at Vienna (128 teachers, 1,124 students), a mining college at Leoben (54 teachers, 328 students), a commercial high school at Vienna (98 teachers, 1,822 students) and 4 other high schools with 300 teachers and 2,495 students. In 1949–50 there were also 28 training colleges for teachers with 530 lecturers and 4,338 students.

There were, in 1950, 1,023 cinemas with a seating capacity of 280,000.

Justice and Crime.

The Supreme Court of Justice (*Oberster Gerichtshof*) in Vienna is the highest court in the land. Besides there are 4 higher provincial courts (*Oberlandesgerichte*), 20 provincial and district courts (*Landes- und Kreisgerichte*) and 234 local courts (*Bezirksgerichte*). Trial by jury, which was abolished in June, 1934, was re-introduced on 5 Feb., 1951.

Finance.

The budgets for 6 years provided revenue and expenditure (ordinary and extraordinary) as follows, in thousands of schillings :—

	1938	1946	1947	1948	1949	1950
Revenue . .	1,951,543	2,530,177	2,988,866	5,092,027	6,090,790	9,617,193
Expenditure .	2,044,592	3,110,161	3,475.995	5,689,778	7,531,692	10,695.290

Defence.

The defence of Austria is vested in the four occupying powers, and the country has no armed forces of its own.

Production and Industry.

In 1936 the total acreage sown amounted to 4,871,800 acres. Of the total in 1936, 2,107,500 acres were in Lower Austria and 1,002,900 acres in Upper Austria.

The chief products (yield in metric tons) are shown as follows :—

Crop	1947		1948		1949	
	Acreage	Yield	Acreage	Yield	Acreage	Yield
Wheat .	495,442	206,371	502,094	260,971	512,431	350,452
Rye .	596,090	260,273 [2]	589,342	289,331	594,195	365,386
Barley .	280,817	109,994 [3]	266.765	124,548	291,512	198,655
Oats .	494,938	192,673 [4]	494,783	224,612	506,426	285,657
Potatoes.	420,907 [1]	1,841,993 [5]	431,467	2,068,964	438,531	2,008,205

Revised figures for 1946: [1] 385,609; [2] 244,256; [3] 112,396; [4] 188,126; [5] 1,532,880.

Production of raw sugar in 1946, 25,408; 1947, 42,196; 1948, 54,728 metric tons.

Livestock (3 Dec., 1949):—Cattle, 2,202,829; pigs, 1,926,938; sheep, 374,992; goats, 317,466; horses, 282,298.

The foodstuffs produced do not suffice for the population.

Felled timber in, cubic metres:—1935, 8,804,360; 1947, 8,705,504; 1948, 8,689,980; 1949, 9,230,548.

The mineral production (in metric tons) was as follows:—

	1949	1950		1949	1950
Lignite	3,815,550	4,307,501	Pig-iron	837,748 [1]	883,092
Anthracite	183,056	182,941	Raw steel	834,574	943,352
Iron ore	1,488,021	1,859,413	Rolled steel	534,228 [2]	585,718
Lead and zinc ore	91,016	98,631			
Copper ore	55,801	70,946	Electric current (mill. kwh.)	4,197	4,880
Raw magnesite	520,737	544,753			

[1] 1947. 218,500. [2] 1947. 238,248; 1948: 385,499.

Austria is one of the world's largest sources of high-grade graphite. Production, which averaged 20,000 metric tons yearly from 1929 to 1944, dropped to 246 tons in 1946, but rose to about 11,400 tons in 1948.

According to the industrial census of 14 June, 1930, there were in Austria 367,652 industrial establishments employing 1,438,967 people.

On 26 July, 1946, the Austrian parliament passed a government bill, nationalizing some 70 industrial concerns. As from 17 September, 1946, ownership of the three largest commercial banks, every oil-producing and refining company, and the principal firms in the following industries, devolved upon the Austrian state:—River navigation; coal extraction; non-ferrous mining and refining; iron-ore mining; pig-iron and steel production; manufacture of iron and steel products, including structural material, machinery, railroad equipment and repairs, and shipbuilding; electrical machinery and appliances. Six companies supplying electric power were nationalized in accordance with a law of 26 March, 1947.

Commerce.

Excluded from the Austrian customs territory are the 2 Austrian communes of Jungholz and Mittelberg which, because of their isolated location on the Bavarian slope of the Alps, have been united in a customs union with Germany since 1868 and 1890 respectively. After the construction of direct roads, which is being undertaken, Austria plans to reattach these 2 communes to her own economic territory.

Imports and exports were as follows (excluding precious metal):—

Unit	Imports						Exports	
	Commercial [1]		E.R.P.		Total			
	1949	1950 [2]	1949	1950	1949	1950	1949	1950
Quantity (1,000 tons)	7,629	7,660	1,554	822	9,183	8,482	2,455	3,518
Value (Mill. Sch.)	4,424	7,089	1,942	2,111	6,366	9,199	3,229	6,513

[1] Including drawing rights. [2] Preliminary.

The total trade between England and Austria (Board of Trade returns) for 5 years were as follows (in £ sterling) :—

	1937	1947	1948	1949	1950
Imports to U.K. . .	2,686,276	956,163	2,754,356	3,566,435	3,717,986
Exports from U.K. .	1,846,760	3,347,610	3,382,880	6,067,509	7,811,224
Re-exports from U.K. .	670,850	669,483	289,906	1,042,005	856,408

Communications.

From 1945, the whole railway system is operated by the state. It is intended to electrify the entire railway system; the plan will take 12 years to complete.

In 1949 Austria had 6,048 km. of railway lines, of which at the end of the war 2,507·4 km. were damaged. By the end of 1949, 2,479 km. had been repaired.

There were about 86,000 km. of road in 1947. Number of motor vehicles at 31 Oct., 1949 :—43,974 passenger cars, 41,248 lorries, 2,655 buses.

On 31 Dec., 1949, there were 241,431 direct telephone connexions; about 70% of them were automatic.

Banking and Credit.

The National Bank for Austria, which was opened on 1 January, 1923, with a capital of 30 million gold crowns, was taken over by the German Reichsbank on 17 March, 1938. It was provisionally reorganized on 3 July, 1945. Its first weekly balance-sheet (7 October, 1946) showed assets and liabilities of 12,560·65 million schillings, including a circulation of 5,133·15 million schillings. Note circulation, 15 Nov., 1949, 5,171·7 million schillings.

Money, Weights and Measures.

The Austrian unit of currency is the *schilling*, made up of 100 *groschen*.

The law 'for the protection of the currency through a reduction of the note circulation,' passed on 21 November, 1947, provides for the cancellation of funds deposited before April, 1945; the conversion into 2% state bonds of all funds deposited between the end of the war and December, 1945; the temporary blocking of funds deposited after January, 1946, and the exchange of all bank-notes in circulation at the rate of 3 : 1.

The metric system of weights and measures is in use.

Diplomatic Representatives.

1. Of Austria in Great Britain (18 Belgrave Sq., S.W.1).

Minister Plenipotentiary.—Dr. Lothar Wimmer (accredited 17 Feb., 1950).

First Secretary.—Dr. Eugen Buresch.

Second Secretary.—Dr. Heinz Laube.

2. Of Great Britain in Austria.

Minister and High Commissioner.—Sir Harold A. Caccia, K.C.M.G. (Sept., 1949).

Counsellors.—G. P. Labouchère, C.M.G.; S. E. H. Daw, M.B.E.

Secretaries.—J. E. Galsworthy (*Commercial*); R. J. Blair (*Commercial*); A. E. Cox (*Commercial*); G. W. Berry, O.B.E.; A. Bennett (*Labour*); H. C. Beaumont, M.B.E.; A. A. S. Stark (*Information*); J. K. Reuterdahl, M.B.E.

There are consuls at Vienna and Innsbruck.

Books of Reference.

BELGIUM.

(ROYAUME DE BELGIQUE—KONINKRIJK BELGIE.)

King.—Leopold III, born 3 November, 1901, son of the late King Albert (died 17 February, 1934) and of Queen Elisabeth, Duchess of Bavaria, Princess of Belgium; succeeded his father, 23 February, 1934; married (1) on 4 November, 1926, to Princess *Astrid of Sweden*, died 29 August, 1935, and (2) on 11 Sept. (civil marriage, 6 Dec.), 1941, to Mlle. Marie Lilian Baels, Princess de Rethy, daughter of Hendrik Baels, formerly Minister of Agriculture.

In view of the detention of King Leopold in Germany, the Belgian parliament (Senate and Chamber), on 20 September, 1944, elected Prince Charles, Count of Flanders, brother of the King, as Regent of the Kingdom of Belgium. After the liberation of King Leopold, a law of 19 July, 1945, provided that he would not resume his constitutional powers except after a majority vote in parliament.

On 12 March, 1950, a plebiscite was held on the 'question royale.' 2,933,382 votes were cast in favour of King Leopold's return; 2,151,881 votes against it; 151,477 were invalid. The majority in favour of the King was 57·683%, varying from 84·70% in the arrondissement Roeselare–Tielt to 31·21% in Mons; in Brussels, 51·83% voted against the King.

On 20 July, 1950, a joint session of the two Houses of Parliament passed by 198 votes out of the 384 members, the bill ending the Regency. On 22 July, the King, accompanied by his two sons, returned to Brussels. On 1 Aug., the King offered to delegate his constitutional powers to his eldest son and heir apparent, Prince Baudouin. On 11 Aug., a joint session of the two Houses of Parliament voted the bill concerning this delegation of powers. Prince Baudouin took the oath the same day and was consequently confirmed in the powers exercised under the title of Prince Royal.

Children of the King's first marriage.—(1) Josephine Charlotte, Princess of Belgium, born 11 October, 1927. (2) Prince Baudouin, Duke of Brabant,

born 7 September, 1930. (3) Prince Albert, Prince of Liége, born 6 June, 1934. *Children of the King's second marriage.*—Prince Alexandre, born 18 July, 1942; Princess Marie Christine, born 5 Feb., 1950.

Brother and Sister of the King.—(1) Prince *Charles*, Count of Flanders, born 10 October, 1903. (2) Princess *Marie-José*, born 4 August, 1906, married to Prince Umberto (who as Umberto II was King of Italy in 1946) on 8 January, 1930.

Aunts of the King.—(1) Princess *Henriette*, born 30 November, 1870; married 12 February, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme (died 1 February, 1931). (2) Princess *Josephine*, born 18 October, 1872; married 28 May, 1904, to Prince Charles of Hohenzollern (died 21 February, 1919).

The King has a civil list of 12,000,000 francs, and the Queen-Mother of 2,000,000 francs. Prince Charles, the former Regent, receives an annual grant of 4,000,000 francs.

Constitution and Government.

The kingdom of Belgium formed itself into an independent state in 1830, having from 1815 been part of the Netherlands. The secession was decreed on 4 October, 1830, by a provisional government, established in consequence of a revolution which broke out at Brussels, on 25 August, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on 4 June, 1831; he ascended the throne 21 July, 1831. On his death in 1865 he was succeeded by his son, Leopold II, who reigned until 1909.

By the Treaty of London, 15 November, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, 19 April, 1839, which established peace between King Leopold I and the King of the Netherlands, that all the states of Europe recognized the kingdom of Belgium. In the Treaty of Versailles (28 June, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

National flag: black, yellow, red (vertical).

National anthem: Après des siècles d'esclavage (La Brabançonne: words by Jenneval, 1830; tune by F. van Campenhout, 1830).

Both French and Flemish are official languages.

According to the constitution of 1831, Belgium is 'a constitutional, representative and hereditary monarchy.' Article 25 declares that 'all powers emenate from the nation.' The legislative power is vested in the King, the Senate and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under 18 years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organization of the legislative power were revised in October, 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for 4 years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives. The constitutent body is similar to that which elects deputies to the Chamber; the minimum age of electors is fixed at 21 years, and the minimum length of residence required is 6 months. Women were given the suffrage at parliamentary elections on 24 March, 1948. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by law of 29 December, 1899.

Senators are elected indirectly by the provincial councils, on the basis of one for 200,000 inhabitants. Every addition of 125,000 inhabitants gives the right to one senator more. Each provincial council elects at least 3 senators. There are at present 44 provincial senators. No one, during 2 years preceding the election, must have been a member of the council appointing him. Senators are elected by the Senate itself in the proportion of half of the preceding category. The senators [illegible] these two latter categories are also elected by the method of [illegible] representation. All senators must be at least forty years of age. They receive 144,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the royal family, are by right senators at the age of 18, but have no voice in the deliberations till the age of 25 years.

The members of the Chamber of Representatives are elected directly by the electoral body. Their number, at present 202 (law of 11 April, 1936), is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for 4 years. Deputies must be not less than 25 years of age, and resident in Belgium. Each deputy has an annual allowance of 180,000 francs, and a free pass all the year over government and companies' railways.

The Senate and Chamber meet annually in the month of November and must sit for at least 40 days; but the King has the power of convoking them on extraordinary occasions and of dissolving them either simultaneously or separately. In the latter case a new election must take place within 40 days and a meeting of the chambers within 2 months. An adjournment cannot be made for a period exceeding 1 month without the consent of the chambers.

Parties in the Chamber elected 26 June, 1949:—Christian Social (Catholic), 105; Liberal, 29; Socialist, 66; Communist, 12.

Parties in the Senate elected 26 June, 1949:—Christian Social (Catholic), 92; Liberal, 24; Socialist, 53; Communist, 6.

The Executive Government, appointed 15 Aug., 1950, is composed of the following Christian Social ministers:—

Prime Minister.—Joseph Pholien.
Minister of Foreign Affairs.—Paul van Zeeland.
Minister of Communications.—Paul W. Segers.
Minister of Foreign Trade.—L. Meurice.
Minister of the Interior.—M. Brasseur.
Minister of Justice.—L. Moyersoen.
Minister of Education.—Pierre Harmel.
Minister of Finance.—Jean van Houtte.
Minister of Economic Affairs.—A. Coppé.
Minister of Reconstruction.—A. de Boodt.
Minister of the Colonies.—André Dequae.
Minister of Labour and Social Insurance.—G. van den Daele
Minister of Public Works.—Oscar Behogne.

Minister of Agriculture.—C. Héger.
Minister of Public Health.—Alfred de Taeye.
Minister of Defence.—Col. Degreef.

Local Government.

The provinces and communes (2,670 in 1947) of Belgium have a large measure of autonomous government.

In regard to the communal electorate, the law of 15 April, 1920, definitely lays it down that all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least 6 months, have the right to vote. Proportional representation is applied to the communal elections, and communal councils are to be renewed every 6 years In each commune there is a college composed of the burgomaster, the president and a certain number of aldermen.

Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,506 square kilometres, or 11,755 English square miles. The following table shows the population at various dates :—

Census years	Population	Total increase	Increase % per annum	Census years	Population	Total increase	Increase % per annum
1900	6,693,548	624,227	1·03	1930	8,092,004	626,222	0·84
1910	7,423,784	730,236	1·09	1940	8,294,674	202,670	0·25
1920	7,465,782	41,998	0 06	1947	8,512,195	217,521	0 36

Area and population of provinces :—

Provinces	Area : hectares	Area : English square miles	Estimated Population		
			31 Dec., 1947	31 Dec., 1948	31 Dec., 1949
Antwerp (Anvers)	286,045	1,104	1,278,488	1,296,687	1,301,217
Brabant . .	328,312	1,267	1,792,983	1,811,330	1,822,834

[1] The suburbs comprise 18 distinct communes, viz., Anderlecht, Etterbeck, Forest Ixelles, Jette, Koekelberg, Molenbeek St. Jean, St. Gilles St. Josse-ten-Noode. Schaerbeek, Uccle, Woluwe-St. Lambert, Auderghem, Watermael-Boitsfort, Woluwe-St. Pierre, Berchem, Ste. Agathe, Evere and Ganshoren.

Religion.

Of the inhabitants professing a religion the majority are Roman Catholic, but no inquiry as to the profession of faith is now made at the censuses There are, however, statistics concerning the clergy, and according to these there were in 1945 :—Roman Catholic higher clergy, 87; inferior clergy, 6,302; Protestant pastors, 27; Anglican Church, 9 chaplains; Jews (rabbis and ministers), 18. The state does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

There are 6 Roman Catholic dioceses subdivided into 262 deaneries.

The Protestant (Evangelical) Church is under a synod. There is also a Central Jewish Consistory, a Central Committee of the Anglican Church and a Free Protestant Church.

Education.

There are universities at Louvain (founded 7 September, 1426), Brussels, Ghent and Liége, the two latter being state institutions. In October, 1930, Ghent University became a Flemish university. In 1949-50 Ghent had 2,467 students; Liége, 3,056; Louvain, 7,173; Brussels, 3,729. On 11 November, 1923, the Colonial School at Antwerp (founded 11 January, 1920) and the School of Tropical Medicine were constituted a colonial university (200 students in 1949–50). There are also several state agricultural institutes, viz., a state veterinary school at Cureghem (88 students), and 2 state agricultural institutes (at Gembloux and Ghent, with together 423 students). The Polytechnical Faculty at Mons had 247 students in 1949–50; there are also 7 commercial colleges, that at Antwerp being a state institution (211 students). Besides the Royal Academy of Fine Arts at Antwerp there are 5 royal conservatoires at Brussels, Liége, Ghent, Antwerp and Mons, 137 schools of music and 58 schools of design.

Secondary Education (31 Dec., 1949).—85 royal athenæums, with 38,820 pupils (34,364 boys, 4,456 girls); 6 communal and provincial athenæums, with 2,494 pupils (2,437 boys, 57 girls); 6 communal and provincial *lycées*, with 2,458 pupils (31 boys, 2,437 girls). The next grades of schools are the higher grade schools (*écoles moyennes*), of which there were 150 state schools (23 for boys, 38 for girls, 89 co-educational), with 24,134 boys and 20,731 girls; 7 communal (3 for boys, 3 for girls, 1 co-educational), with 1,052 boys and 812 girls, and 463 free higher-grade schools, with 66,633 pupils (49,552 boys, 17,081 girls).

Elementary Education (31 Dec., 1949).—There were 8,714 primary schools, with 768,283 pupils; 4,050 infant schools, with 289,791 pupils, and 370 adult schools, with 5,863 students.

Normal Schools (31 Dec., 1949).—There were 38 for training secondary teachers (12 for men, 26 for women, 1,304 students); 81 [illegible] elementary teachers (31 for men, 50 for women, 8,814 students), and 39 normal infant schools, with 1,582 students.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the state and provinces.

There were, in 1949, 1,289 cinemas, with a seating capacity of 612,000.

Justice and Crime.

Judges are appointed for life. There is 1 court of cassation, 3 courts of appeal, and assize courts for political and criminal cases. There are 26 judicial districts, each with a court of first instance. In each of the 230 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

Social Welfare.

The new régime of social security in Belgium is based on the law of Dec., 1944. It applies to all workers and is administered by the Central National Office of Social Security (O.N.S.S.), which collects from employers and employees all contributions referring to family allowances, health insurance, old age insurance, holidays, etc. These sums are distributed by the Central Office to the various institutions concerned with these benefits. Insurance against unemployment is organized through a common fund, which also undertakes to re-equip the unemployed for another employment while in the meantime providing for their families. The legislation of 1944 has been completed during the last years by a number of new bills and decrees, increasing allowances, making fresh provisions for housing (1945), injuries while working, professional illnesses, etc. (1948).

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either state or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

Finance.

[2] Including receipts from loans:—69,554 million in 1946; 1,487 million in 1947; 37,941 million in 1948; 2,656 million in 1949.

On 31 Dec., 1949, the Belgian public debt consisted of :—Internal debt, consolidated, 119,746,101,000 francs; short and middle terms, 97,011,805,000 francs; at sight, 19,181,226,000 francs; External debt, 37,766,956,000 francs. Total, 273,706,088,000 francs.

Defence.

A military and technical agreement signed by Belgium and the Netherlands on 10 May, 1948, provides for standardization of equipment, co-ordination of training methods, and contacts between the staffs of the military colleges.

Army.

According to the Military Law passed in 1937, the Belgian Army was recruited by means of annual calls to the colours and by voluntary enlistments. Military service was compulsory for those called to the colours.

Voluntary enlistment was for 5 years (for youths less than 17), 4 years (for youths less than 18) and 3 years (for youths over 18).

By the law of 1937 the duration of military obligation was 25 years, of which 15 were to be served in the Regular Army and Reserve and 10 years in the Territorial Army. In March, 1951, the period of service was extended from 1 to 2 years.

The Army, comprising 1 corps of 2 infantry divisions (1946), is being reorganized on lines to be decided by a Commission Mixte.

Navy.

On 1 March, 1949, the Force Navale Belge passed from the Ministry of Communications to the Ministry of National Defence. The Belgian naval forces include the anti-aircraft escort vessel *Artevelde*, the frigate *Victor Billet*, employed as a river keeper and training ship, 2 fleet minesweepers (4 more to be transferred from Royal Navy), 8 motor minesweepers, on loan from the British Navy, a trawler, some small craft, and the sail training-ship *Mercator*, used chiefly for the mercantile marine. Naval personnel, 1,000 officers and men.

Air Force.

Reorganization provides for a military Air Force. Its composition is being considered in reference to modern problems. Present equipment is British.

Production and Industry.

I. Agriculture.

Of the total area of 3,056,660 hectares, there were in 1938, 1,832,453 hectares under cultivation, of which 31·90% were under cereals, 0·73% vegetables, 4·89% industrial plants, 12·85% root crops and 49·63% forage. In 1937, 1,841,484 hectares were under cultivation. The forest area covers 18% of the land surface.

The following figures show the yield of the chief crops for 3 years :—

Crop	Area in hectares			Produce in metric tons		
	1947	1948	1949	1947	1948	1949
Wheat	77,507	143,146	153,101	121,808	343,991	596,008
Barley	82,278	76,670	72,413	187,990	172,132	246,895
Oats	230,195	189,126	173,698	509,263	384,522	586,973
Rye	85,114	86,150	95,025	161,785	184,001	257,810
Potatoes	84,312	88,239	88,841	1,600,148	2,133,068	2,047,145
Beet (sugar)	52,215	45,231	59,900	1,106,457	1,597,814	2,348,328
Beet (fodder)	87,078	80,785	73,893	3,458,984	6,224,057	4,991,370
Tobacco	2,607	1,627	1,357	5,725	2,831	3,144

On 15 May, 1949, there were 269,479 horses, 1,879,017 horned cattle (including 807,714 milch cows), 226,008 sheep and goats and 1,076,291 pigs.

II. Mining and Metals and other Industries.

Output (in metric tons) for 5 years :—

	1945	1946	1947	1948	1949
Coal	15,833,030	22,852,110	24,390,110 [1]	26,678,900	27,819,210
Briquettes	787,510	1,079,620	1,352,690 [1]	988,790	780,860
Coke	2,060,160	3,900,960	4,728,970 [2]	5,525,980	4,969,900
Cast iron	734,580	2,160,830	2,816,780	3,942,530	3,747,040

Finished steel	645,430	1,831,410	2,350,660	3,200,700	3,073,620
Wrought iron	27,910	36,620	36,110	29,710	27,360

[1] Provisional figures. [2] Excluding 64,710 tons on French account.

Production of phosphates in 1946, 851,529 metric tons; in 1947, 1,137,902 metric tons.

In 1948, there were 36 sugar factories, output 96,266 tons of raw sugar; 10 sugar refineries, output 182,218 tons; 25 distilleries, output 286,201 hectolitres of potable and industrial alcohol; 722 breweries, output 11,339,850 hectolitres of beer; margarine factories, output 69,765 tons (68,547 in 1949); 35 vinegar factories, output 162,435 hectolitres; 6 match factories, output 40,182 million matches.

The total quantity of fish landed at the various Belgian ports amounted to 61,312 tons, valued at 464,670,330 francs in 1949 and to 64,440 tons at 462,049,893 francs in 1948. The fishing fleet had a total tonnage of 20,512 gross tons at 31 Dec., 1947, and of 22,132 gross tons at 31 Dec., 1948.

According to an industrial census taken on 27 Feb., 1937, the number of people engaged in industry was 1,177,870 (941,490 men and 236,380 women): of these, 116,911 were employers, 41,489 managers

and 1,019,470 operatives. The industries with the largest number of workers were:—Metals, 220,712; textiles, 164,807; building, 101,873; mining, 143,917; foodstuffs, 94,703, and chemicals, 70,169. In commercial life there were 175,049 (117,886 men and 57,162 women); of these, 30,905 were engaged in the provision of food and 16,671 in the hotel industry.

The production of electricity amounted to 6,243,262 kwh. in 1946; 7,212,292 kwh. in 1947; 7,902,881 kwh. in 1948; 8,163,093 kwh. in 1949; that of gas to 443,396,737 cubic metres in 1945, to 800,005,182 cubic metres in 1946; to 897,301,737 cubic metres in 1947; to 1,060,588,467 cubic metres in 1948.

Commerce.

By the convention concluded at Brussels on 25 July, 1921, between Belgium and Luxemburg and ratified on 5 March, 1922, an economic union was formed by the two countries, and the customs frontier between them was abolished on 1 May, 1922. Dissolved in Aug., 1940, the union was re-established on 1 May, 1945.

On 14 March, 1947, in execution of an agreement signed in London on 5 Sept., 1944, there was concluded a customs union between Belgium and Luxemburg on the one hand and the Netherlands on the other. The union came into force on 1 Jan., 1948, and is now known as the Benelux Customs Union. A joint tariff has been adopted, but the union will be completed only in stages.

The following table shows imports and exports for 6 years (in thousands of francs):—

Year	Imports	Exports	Year	Imports	Exports
1938	23,166,507	21,723,953	1947 [1]	85,527,988	61,608,907
1945	13,729,441	3,983,814	1948 [1]	87,517,990	74,121,269
1946 [1]	56,856,678	29,836,464	1949	81,718,709	79,788,755

[1] Revised figures.

Trade by principal countries (in thousands of francs):—

[1] Including the four zones of occupation and the Saar territory.
[2] Including Newfoundland and Labrador.

The total trade between the United Kingdom and Belgium (in £ sterling) was as follows (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports to U.K. .	18,625,146	35,292,786	38,170,433	37,490,040	42,529,151
Exports from U.K. .	8,219,780	33,637,560	37,099,485	35,918,223	51,666,251
Re-exports from U.K.	4,433,018	3,113,335	5,332,573	4,316,624	6,243,409

Principal Belgian exports to U.K. in 1949 :—Textiles (43,379 metric tons; 1,853 million francs); metals (568,580 metric tons; 3,109 million francs); chemical and pharmaceutical products (297,760 metric tons; 761 million francs).

Principal Belgian imports from U.K. in 1949 :—Machinery and electrical apparatus (20,535 metric tons; 1,398 million francs); vehicles, chiefly motor cars, and aircraft (49,521 metric tons; 1,186 million francs); textiles (21,688 metric tons; 1,196 million francs); base metals (44,472 metric tons; 824 million francs).

Communications.

Shipping.—On 1 Jan., 1950, the Belgian merchant fleet was composed of 94 ships of 293,304 tons net. There were 25 Belgian shipping companies, of which the most important were the Compagnie Maritime Belge, with 27 ships, and the 'Armement Deppe,' with 11 ships.

The navigation at the port of Antwerp in 1949 was as follows :—Number of vessels entered, 9,535; tonnage, 21,793,979. Number of vessels cleared, 9,541; tonnage, 21,809,702.

The total length of navigable waterways (rivers and canals) in 1949 was 1,559 km.

Roads.—The total length of the roads in Belgium on 31 Dec., 1949, was as follows:—State roads, 9,089 km.; provincial roads, 1,566 km.; conceded roads, 2·5 km. The majority of the roads are metalled.

Number of motor vehicles in Belgium, 31 Dec., 1949, 491,999, including 221,437 passenger cars, 2,176 buses, 88,178 lorries, 122,472 motor cycles.

Rail.—In Sept., 1926, the state handed over its control of the railways to a private company, the Societé Nationale des Chemins de Fer Belges for a period of 75 years. The length of railway operated on 1 Jan., 1950, was 5,034 km. of main line. Revenue (1949), 10,479 million francs (excluding 2,600,000 francs state subsidy); expenditure, 10,578 million francs (1948: revenue, 10,517 million; expenditure, 10,316 million).

Post.—On 31 Dec., 1949, there were 1,931 post offices in Belgium. The gross revenue of the post office in the year 1949 amounted to 1,289,803,210 francs.

A régie of telegraphs and telephones for running the services on business lines was created by the law of 19 July, 1930, effective 1 Nov., 1930. Total length of public telegraph wires in 1948 was 48,938 km. and of line 10,516 km. There were (1948) 1,098 telegraph offices. Receipts for 1948 were 241,772,319 francs; expenditure, 273,712,000 francs.

In 1948 there were 373 radiograph stations.

In 1948, the telephone service comprised 625 exchanges, connecting 1,225 public telephone stations and 438,157 subscribers. There were 3,493,340 km. of telephone line in service, including 2,881,587 km. of local line, 524,903 km. of inter-urban and 86,850 km. of international lines.

Number of telephones in Jan., 1949, 601,614. Receipts in 1948, 1,316,170,000 francs; expenditure, 1,250,307,000 francs.

Money and Credit.

The *franc*, containing 0·02027 gramme of fine gold, is the unit of currency.

No gold had been minted since 1882 (save only 5,000,000 francs struck in 1914), and no silver 5-franc pieces since 1876, but in Dec., 1934, new 20-franc silver pieces and in May, 1935, a piece in silver of 50 francs were issued. Both the 20-franc and 50-franc silver coins have been demonitized.

On 26 Oct., 1926, the Belgian franc was stabilized and the paper currency relinked to gold, when all notes of the National Bank of Belgium became payable in gold or its equivalent in foreign currency. A new currency unit—called the *belga*, with a weight of 0·20921 gramme of fine gold—was introduced. The Monetary Law of 30 March, 1935, gave the Government the power to fix a new parity for the franc, between 75% maximum and 70% minimum of the 1926 parity. The purchase and sale of foreign exchange carried out by virtue of this law by the Exchange Equalization Fund took place according to a decree of 31 March, 1935, on the basis of 0·150632 gramme of fine gold to the belga. A decree dated 31 March, 1936, stabilized this *de facto* rate and this new parity of the belga represents 72% of its former gold content. One belga equals 5 paper francs. The franc, however, remains the basis of the monetary system, and will continue to circulate in the country, and is the medium of exchange in all domestic business. New nickel coins of the value of 5 francs or 1 belga were put into circulation in 1930. The use of the belga is compulsory in all foreign exchange transactions.

The one bank of issue in Belgium is the National Bank, instituted 1850. By law of 26 March, 1900, its constitution was modified, and its duration extended to 1 Jan., 1929. In 1926, its privileges were prolonged for a further 25 years. It is the cashier of the state, and is authorized to carry on the usual banking operations. The note circulation on 31 Dec., 1948, amounted to 84,861 million francs. The National Bank of Belgium was nationalized on 13 Sept., 1948.

The popular savings bank in Belgium is mainly concentrated in the Caisse Générale d'Epargne et de Retraite, at Brussels. The Caisse d'Epargne is a private company with legally regulated functions and operates under the supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal-savings system. During the year 1948 deposits amounted to 8,297 million francs (1949, preliminary, 8,766) and withdrawals to 5,665 million francs (1949, preliminary, 6,754).

The weights and measures are those of the metric system.

Diplomatic Representatives.

1. Of Belgium in Great Britain (103 Eaton Square, S.W.1).

Ambassador.—Vicomte Alain Obert de Thieusies (accredited 19 June, 1946).

Counsellor.—Amaury Holvoet.

Secretaries.—Prince Werner de Mérode; Jacques Deschamps; A. J. L. de Baerdemaeker.

Military Attaché.—Col. André Bigwood.

Air Attaché.—Major J. Ceuppens, D.F.C.

Commercial Counsellor.—Hippolyte Cools.

Economic Attaché.—Jacques Raeymaeckers.

Shipping Counsellor.—Baron Ph. de Gerlache de Gomery.
Agricultural Attaché.—Maurice Cammaerts.
Colonial Attaché.—J. Dequidt.

There are consular representatives at all the important centres, including Aberdeen, Belfast, Birmingham, Dundee, Edinburgh, Glasgow, Liverpool, Manchester, Newcastle and Southampton.

2. Of Great Britain in Belgium

Ambassador.—Sir John Heller le Rougetel, K.C.M.G., M.C. (appointed Feb., 1950).
Counsellor.—A. A. F. Haigh.
Secretaries.—P. F. Hancock; C. S. Collinson, O.B.E.; D. F. Muirhead (*Commercial*); W. C. R. Aue; S. A. Lockhard, O.B.E. (*Information*); C. F. Heron (*Labour*).
Naval Attaché.—Cdr. W. E. J. Eames, D.S.C., R.N.
Military Attaché.—Col. R. H. C. Drummond-Wolff.
Air Attaché.—Group-Capt. L. C. Slee, D.S.O., D.F.C.
Civil Air Attaché.—Air Marshall D. Colyer, C.B., D.F.C.
Commercial Counsellor.—A. H. Tandy, C.B.E.

There is a Consul-General at Antwerp, Consuls at Brussels and Liége.

Books of Reference concerning Belgium.

Statistical Information.—The Institut National de Statistique (68, Rue Royale, Brussels) was set up on 24 Jan., 1831, under the designation of Bureau de Statistique Générale; after several changes, it received its present name on 2 May, 1946. The activities of the Institute are classified under the 2 heads of Research and Information, Documentation and Publications. The 8 sections of the Research Service are :—Demography, Health, Education and General; Social Affairs; Agriculture; Industry; Commerce and Communications; Finances; Justice; Mathematical Statistics. *Director-General.*—A. Dufrasne. *Main publications.*—

BELGIAN CONGO.

(CONGO BELGE—BELGISCH CONGO.)

Constitution and Government.—Until the middle of the 19th century the territory drained by the Congo River was practically unknown. When Stanley reached the mouth of the Congo in 1877, King Leopold II of the Belgians recognized the immense possibilities of the Congo Basin and took the lead in exploring and exploiting it. Various nations immediately put forward claims by right of earlier explorations, especially Portugal on the strength of the discovery of the mouth of the Congo by its navigators in the 15th century. Other claims and conflicts led to the Berlin Conference of 1884–85, by which King Leopold II was recognized as the sovereign head of the independent Congo state.

The annexation of the state to Belgium was provided for by treaty of 28 Nov., 1907, which was approved by the chambers of the Belgian Legislature in Aug. and Sept. and by the King on 18 Oct., 1908. The law of 18 Oct., 1908, called the Colonial Charter (amended in 1911, 1912, 1916, 1921, 1923, 1924, 1926, 1929, 1931, 1935, 1942), provides for the government of the Belgian Congo.

The legislature is exercised by the metropolitan authorities: either by the King ordinary legislator by decree, or by the Legislative Chambers, the extraordinary legislator, by law. In case of emergency the legislature is delegated to the Governor-General who legislates by ordinance. The executive power belongs to the King, assisted by the Minister for the Colonies. He is president of the Colonial Council, consisting of 14 members, 8 of whom are appointed by the King, 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be re-appointed. The King is represented in the colony by a Governor-General, assisted by a Vice-Governor-General, a Secretary-General, a Commander-in-Chief of the Forces, 6 Provincial Governors and 7 Directors-General.

The Governor-General is also assisted by a consultative Government Council of which he is the president. The Government Council consists of official members: the Governor-General, the Vice-Governor-General, the Secretary-General, the Attorney-General, the Provincial Governors, the Commander-in-Chief; and of 30 unofficial members (6 representatives of the notables, 4 of the Chambers of Commerce, 4 of the Colonist Associations, 8 of the natives, 4 of the employers and 4 of the employees). The Permanent Deputation is a committee of the Government Council. The Provincial

Governors are assisted by the Provincial Councils which have the same powers and structure as the Government Council.

The precise boundaries of the Congo colony were defined by the neutrality declarations of Aug., 1885, and December, 1894, and by treaties with Germany, Great Britain, France and Portugal.

The territory of Ruanda-Urundi was united economically with the Congo by ordinance law of 13 April, 1922; this was expanded into a customs, administrative and political union by law of 21 Aug., 1925.

On 22 July, 1927, a convention was signed between Belgium and Portugal by which the former ceded to the latter territory in the extreme south-west portion of the Belgian Congo, having an area of 3,500 square kilometres (480 square miles), in return for a cession by Portugal of an area in the estuary of the Congo, near Matadi, of 3 square kilometres. Belgium further undertook the construction of a railway to link up with the Portuguese [illegible] Lobito; this railway was opened on 1 July, 1931.

The [illegible] into 6 provinces:—Léopoldville (capital Léopoldville), Katanga (Elisabethville), Eastern (Stanleyville), Kivu (Costermansville), Kasai (Lusambo), Equator (Coquilhatville). The provinces are divided into 20 districts, the districts into territories (122) or cities (3). The capital of the colony, formerly Boma, was in 1927 transferred to Léopoldville.

Governor-General.—Eugène Jungers.

Area and Population.—The area of Belgian Congo is estimated at 2,343,930 square km. The native population is composed of 3 ethnical groups: Negroes (Bantu, Sudanese, Nilotics), Pygmies, and Hamites (in the East). On 31 Dec., 1949, the native population numbered 11,073,311; the white population of 53,176 included 39,006 Belgians, 3,290 Portuguese, 1,754 Italians, 1,706 Greeks, 1,662 British, 985 Americans, 805 French, 761 Dutch, 374 Luxemburgers, 340 Swiss, 165 Swedes, 163 South Africans, 141 Poles and 1,063 Asiatics. Léopoldville, in 1949, had a population of 8,044 non-natives and 152,260 natives; Elisabethville, 7,055 non-natives and 41,679 natives.

There are 4 native languages: Kiswahili or Kingwana is the language spoken in the East, Tshiluba or Kiluba in the South, Lingala along the Congo River, and Kikongo and Fiote in the Lower-Congo.

Religion and Education.—The religion of the natives consists of a gross fetichism; mission work is actively carried on. There were, on 31 Dec., 1949, 5,083 missionaries, of whom 3,967 were Catholic and 1,116 Protestant. On 31 Dec., 1949, there were 54 schools for European children attended by 7,267 pupils; for native children there were 25,512 schools with 932,645 pupils. These schools are mostly maintained by the missionaries. The leading firms maintain schools for the children of their native clerks and workmen.

Beside the institutions for general instruction there are a seminary, and the University Centre of Kisantu, schools for native medical assistants, nursery schools, midwifery schools, agricultural schools and specialized courses (postal school, school for meteorological assistants, army schools).

Roman Catholics on 31 Dec., 1949, numbered 2,533,287; Protestants, 526,396, and Moslems nearly 70,000.

There were, in 1949, 60 cinemas.

Justice.—On 1 Jan., 1950, there were 6 courts of first instance, 19 district courts, 19 prosecutors' courts, 125 police courts, 2 courts of

appeal (one at Léopoldville and the other at Elisabethville) and 1,543 native courts. The supreme court has its seat in Brussels.

Finance.—Estimates of revenue and expenditure (in thousand francs):—

	1947[1]	1948[1]	1949[1]	1950	1951
Revenue . .	4,172,042	5,223,111	5,107,499	4,032,220	5,125,501
Expenditure .	3,700,668	4,713,533	4,713,533	4,008,982	4,959,093

[1] Actual receipts and expenditures.

For 1951 the receipts and expenditure were estimated as follows (in thousand francs):—

Receipts		Expenditure	
Duties and taxes . . .	4,285,908	Institutions and various services	42,054
Domanial receipts . .	78,240	Pensions and allowances .	179,589
Judicial and administrative receipts	364,147	Public debt . . .	329,829
Proceeds of capital and revenues	382,414	Administrative, judicial service and public force . . .	1,250,463
Proceeds of the 'Registers' .	11,792	Social services . . .	1,017,273
		Economic services . . .	1,487,419
		Provisions for possible deficit	575,000
		Other expenditures	77,466

Extraordinary expenditure, to be financed by loan, for 1951 is estimated at 2,662,773,000 francs, mainly for the Decennial Development Plan.

Debt, 31 Dec., 1950, 10,823,610,000 francs, of which 6,241,975,968 francs were consolidated debt, 2,495,026,200 francs floating debt and 2,086,608,000 francs indirect (guaranteed capital).

Defence.—The colony in peace time possesses a force of native troops amounting to (1950) 285 European officers, 368 European non-commissioned officers and 18,596 natives, including about 6,000 territorial police. The force is recruited by voluntary enlistment, and, if necessary, by some conscription.

Production.—The cultivated area comprised, in 1949, 197,139 hectares of palm plantations, 58,829 hectares of coffee plantations, 78,664 hectares of rubber plantations. Chief agricultural exports in 1950 (in metric tons):—Palm-oil, 130,131; timber, 105,185; cotton, 50,742; copal, 12,482; coffee, 33,226; oil cakes, 20,765; maize, 17,748; palmetto oil, 14,582. Cattle thrive only in the districts where there is no tsetse fly, notably in the highlands of Katanga, Ituri and Kivu. In 1949, European-owned cattle numbered 255,552 head; sheep, 40,360; native-owned cattle, 381,854; sheep, 1,446,477.

Mining flourishes, the chief minerals being copper, diamonds, gold, silver, tin, cobalt, uranium, radium and iron. The most important mines in the Congo are the [illegible] at Kipushi, Musonoie and Fungurume. The total output of copper [illegible] 176,000 metric tons; of gold (refined), 1949, 10,504 kilos, chiefly from the Kilo-Moto mines. The Union Minière produces radium from the Chinkolobwe mines. The exports of diamonds (chiefly from the mines of the Forminière company in the Kasai district) in 1950 amounted to 9,163,290 carats of industrial diamonds and 536,307 carats of jewellery stones; of cobalt metal, 9,026 metric tons; tin ores, 16,353 metric tons; tin metal, 4,020 metric tons; zinc concentrates, 129,869

metric tons; cement, 94,000 metric tons; cadmium, 35,896 kilos; tantalite ores, 502 metric tons; tungsten ores, 616 metric tons; manganese ores, 14,348 metric tons; gold, 12,097 kilos; silver, 931 kilos; uranium and radium, no figures available.

Rubber production :—1938, 998; 1943, 11,507 long tons; 1947, 3,668; 1948, 5,239 metric tons; 1949, 6,787 metric tons; export, 1950, 8,211 metric tons.

A pipeline, constructed in 1911, connects Matadi with Léopoldville.

Electricity consumed in 1949, 453,146,000 kwh.

Commerce.—The value of the commerce (special trade) was as follows (in 1,000 francs) :—

Years	Imports	Exports	Years	Imports	Exports
1938	1,022,637	1,897,154	1948	8,383,140	10,817,466
1945	2,023,935	4,991,455	1949	10,346,272	10,967,943
1946	3,427,845	6,025,645	1950	9,559,275	13,343,112
1947	6,453,267	8,097,759			

The special trade was distributed as follows in 1950 :—

	Imports		Exports[1]	
	Quantity in metric tons	Value in 1,000 frs.	Quantity in metric tons	Value in 1,000 frs.
Belgium	245,542	3,649,024	381,436	6,199,221
Union of South Africa	95,055	871,661	24,957	310,387
United Kingdom	22,793	869,469	36,660	1,355,257
United States	87,252	2,379,788	63,069	1,274,762

[1] Preliminary.

According to the Board of Trade returns the imports into the United Kingdom from the Belgian Congo (including Ruanda-Urundi) in 1947 amounted to £8,448,958; 1948, £10,393,234; 1949, £6,718,046; 1950, £8,021,980. The exports of British produce and manufactures to the Belgian Congo in 1947 amounted to £3,074,157; 1948, £4,266,607; 1949, £5,162,819; 1950, £5,735,351. Re-exports, 1947, £4,687; 1948, £16,147; 1949, £32,295; 1950, £31,600.

Communications.—The Congo and its tributaries are navigable over 13,047 km. Regular traffic has been established between Léopoldville and Stanleyville, Léopoldville–Port Francqui, and on the Lualaba (*i.e.*, the Congo River above Stanleyville).

At the port of Matadi, the most important harbour of Belgian Congo, the imports in 1950 amounted to 429,974 tons, and the exports to 516,684 tons. The chief inland port is Léopoldville.

Shipping with Belgium is conducted by the Cie. Maritime Belge; with South Africa by the Cie. Maritime Congolaise.

There were (31 Dec., 1949) 111,971 km. of road, of which 15,352 km. are main roads. Number of passenger motor cars, 1949, was 9,678; lorries, 11,227; tractors, 294.

The total length of public railways on 1 Jan., 1949, was 4,756 kilometres.

There are 6 first-class aerodromes, 54 second-class, 10 private and 121 emergency aerodromes. A regular air service, operated by the Belgian company Sabena, runs between Léopoldville and Brussels, Stanleyville and Brussels, and Elisabethville and Brussels. Sobelair serves the line

Brussels–Nile valley–East Congo. Pan American World Airways connect Léopoldville with New York and Johannesburg.

In 1949 there were 163 post offices. The Congo is included in the Universal Postal Union and in the African Postal Union. Length of telegraph lines, 4,209 miles. There were 81 stations of wireless telegraphy and 50 telegraph offices; telephone subscribers numbered 4,604.

Money and Credit.—The monetary unit is the Congolese *franc*. An agreement with the Banque du Congo Belge on 21 June, 1935, approved by royal decree on 27 July, 1935, and modified on 12 Nov., 1947, authorizes the bank to issue notes in Belgian Congo and Ruanda-Urundi, and also copper–nickel coins. The notes at present in circulation are of a nominal value of 10,000, 1,000, 500, 100, 50, 20, 10 and 5 francs. Coins in circulation are of the nominal value of 50, 5, 2 francs, 1 franc, 50, 20, 10 and 5 centimes. They are not legal tender in Belgium. Circulation of money at 31 Dec., 1949, was 2,421,822,000 francs.

Six banks are in existence, viz. the Banque du Congo Belge, the Banque Commerciale du Congo, the Banque Belge d'Afrique, the Société Congolaise de Banque, the Krediet Bank, and the Banque Nationale pour le Commerce et l'Industrie (Paris).

Weights and Measures.—The metric system was introduced by law on 17 Aug., 1910.

British Consul-General.—Thomas Wikeley (at Léopoldville).

There are British Vice-Consuls at Elisabethville and Matadi.

TERRITORY UNDER TRUSTEESHIP.

(Territoire du Ruanda-Urundi.)

The territory of **Ruandi-Urundi** (formerly in German East Africa) was ceded to Belgium as mandatory of the League of Nations. A trusteeship [illegible] was approved by the United Nations General Assembly on 13 [illegible], and became law on 25 April, 1949. The territory is united with the Congo economically by law of 30 June, 1922, and administratively, under the direction of a Vice-Governor, by a law of 12 Aug., 1925. The frontier was formerly ratified on 20 Oct., 1924. Usumbura is the capital.

Vice-Governor-General, Governor of Ruanda-Urundi.—L. Pétillon.

Area and Population.—The area is 54,172 square kilometres, or 20,900 square miles. Native population (1949), 3,882,392, consisting of the Batutsi, Bahutu and Batwa tribes. European population, 3,407; Asiastics, 2,894. Population of Usumbura, 1,298 Europeans, 891 Asiatics, 15,512 natives.

Political and Administrative Organization.—Legislation is exercised by the Belgian Parliament, by law; by the King by decrees; by the Governor-General of the Belgian Congo and the Governor of Ruanda-Urundi by ordinances. The Council of the Vice-Government-General is a consultative institution, similar to that of the Belgian Congo. Ruanda-Urundi has a special legislature for internal affairs. Ruanda-Urundi is divided into 2 counties each of which has a Mwami at its head, who is appointed by the custom and invested by the Governor. Each county is divided into districts, administered by chiefs (88) and sub-districts administered by under-chiefs (1,126). Administratively the territory under trusteeship is divided into 2 residences and 17 territories.

Judiciary Organization.—The judiciary organization has been amended by decree of 5 July, 1948, which came into force on 1 July, 1949. There are non-native jurisdictions: police courts, prosecutor's courts, courts of first instance, courts of appeal; native jurisdiction is divided into customary courts, district courts, court of the Bami-territory, extra-customary courts, central courts and courts of appeal.

Education.—On 31 Dec., 1948, state schools, 2; pupils, 1,240; native teachers, 21. On 31 Dec., 1947, Catholic mission schools, 3,549, pupils, 289,835; native teachers, 4,749. Protestant mission schools, 437; pupils, 34,322; native teachers, 638. Expenditure on education (1949); 52,815,000 francs.

Finance.—For 1950, revenue was estimated at 276,919,000 francs, and ordinary expenditure at 325,164,000 francs; 1951, revenue, 321,297,000 francs; expenditure, 363,993,000 francs. Extraordinary expenditure, 1951, to be financed by Belgium, is estimated at 153,500,000 francs.

On 31 Dec., 1950, the public debt was 20,000,000 francs.

Defence.—Military force consisted on 31 Dec., 1948, of 5 officers, 3 non-commissioned officers and 649 other ranks. The police force numbered 317.

Production.—Ruanda-Urundi is principally an agricultural and cattle-breeding country. Special attention is given by the Government to the raising of food-crops in order to avoid the famines which used to effect the country. Industrial crops are encouraged in order to increase the resources of the natives.

Commerce.—Imports, 1949, 57,643 metric tons (805,659,111 francs); exports, 72,217 metric tons (730,835,132 francs). Details are included in the Congo statistics.

Communications.—Total length of principal roads open to traffic, at the end of 1950, 7,642 km.

BHUTÁN.

(DRUK-YUL)

STATE in the eastern Himalaya, between 26° 45′ and 28° N. lat., and between 89° and 92° E. long., bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbí and by Sikkim, and on the south by West Bengal and Assam. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 18,000 square miles; population estimated at 300,000. The capital is Bumthang.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but repeated outrages on British subjects committed by the Bhután hill men led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhután Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 100,000. From 1 April, 1942, the Government of India increased the subsidy to Rs. 200,000 as a temporary measure for the duration of the war. After the end of the war the temporary increase was continued as an act of grace.

In supersession of the old treaties the Government of India concluded a fresh treaty with Bhután on 8 Aug., 1949. Under this treaty the government of Bhután continues to be guided by the Government of India, in regard to its external relations, and the Government of India have undertaken not to interfere in the internal administration of Bhután. The subsidy paid to Bhután has been increased to Rs. 500,000, and the Government of India have agreed to retrocede to Bhután an area of about 32 square miles in the territory known as Dewangiri, which was annexed by the British Government in 1865.

The form of government in Bhután, which existed from the middle of the 16th century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rájás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, Sir Ugyen Wangchuk, G.C.I.E., K.C.S.I., was elected as the first hereditary Maharaja of Bhután. He died on 21 August, 1926, and was succeeded by Maharaja Jig-me Wang-chuk, K.C.S.I., K.C.I.E.

Chief fortresses or castles:—Punakha, a place of great natural strength; Tashi-Cho-dzong, Pàro, Angduphodang ([illegible] Tongsa and Byaka. Beyond the guards for the defen[illegible] there is no standing army.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tashi-Cho-dzong, the chief monastery in Bhután, contains 300 priests.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, elephants, ponies and chowries. Extensive and valuable forests abound. Muzzle-loading guns and swords of highly-tempered steel are manufactured. Imports from the United Kingdom, 1947, £153; 1948 and 1949, nil; 1950, £200.

His Highness keeps an agent at Kalimpong who is also assistant to the Political Officer in Sikkim for Bhutánese affairs.

BOLIVIA.

(República de Bolivia.)

Constitution and Government.

The Republic of Bolivia was created by a proclamation issued on 16 Aug., 1825, with a constitution adopted on 19 Nov., 1826. The present constitution—the twelfth—was adopted in Oct., 1938, and amended by a National Convention in 1944–45. Under that constitution executive power is vested in a President, elected for 4 years by direct popular vote, and not eligible for re-election until 4 years after his term has ended. In the event of his death or failure to assume the office, the Vice-President, elected at the same time, assumes the presidency, and after him, the President of the Senate. There is a Congress of 2 chambers, called the Senate and the Chamber of Deputies, which meets annually on 6 Aug. at La Paz. There are 3 senators for each of 9 departments, elected for 6 years (one-third retiring every 2 years), and 110 representatives are elected for 4 years (one-half retiring every 2 years). Extraordinary sessions may be held for special purposes when convoked by the Executive or by a majority of both chambers. The electorate comprises all adult males (including Indians) who can pass the literacy test.

The congress elected in 1947 was charged with the task of revising the 1945 constitution.

The following is a list of presidents since 1899 and the dates on which they took office :—

General José Manuel Pando, 6 Aug., 1899.
General Imrael Montes, 6 Aug., 1904.
Dr. Eliodoro Villazon, 6 Aug., 1908.
General Imrael Montes, 6 Aug., 1912.
Dr. José Gutierrez Guerra, 6 Aug., 1917 (deposed 12 July, 1920).
—— Provisional Junta, under Dr. Saavedra, 12 July, 1920–10 Jan., 1921.
Dr. Bautista Saavedra, 10 Jan., 1921 (resigned).
Dr. Felipe Guzman, 1 Sept., 1925 (provisional).
Dr. Hernando Siles, 10 Jan., 1926 (deposed 22 June, 1930).
—— Provisional Junta, under General Blanco Galindo, 22 June, 1930–5 Mar., 1931.
Dr. Daniel Salamanca, 5 Mar., 1931 (resigned Nov., 1934).
Luis Tejada Sorzano, Nov. 27, 1934 (deposed 17 May, 1936).
Colonel José David Toro, 17 May, 1936 (deposed 13 July, 1937).
Lt.-General German Busch, 13 July, 1937 (committed suicide 23 August, 1939).
General Carlos Quintanilla (provisional), 23 Aug., 1939–12 Mar., 1940.
General Enrique Peñaranda, 12 Mar., 1940 (deposed 20 Dec., 1943).
Major Gualberto Villaroel, 20 Dec., 1943 (deposed and lynched 21 July, 1946).
Dr. Nestor Guillen (27 July–14 Aug., 1946, provisional).
Chief Justice Monje Gutierrez (15 Aug., 1946–9 March, 1947).
Dr. Enrique Hertzog (10 Mar., 1947–23 Oct., 1949.)

President.—Mamerto Urriolagoitia, then Vice-President and Acting-President, was proclaimed President on 24 Oct., 1949, on the resignation of President Hertzog for reasons of ill-health; term expires 10 March, 1951.

The Cabinet consists of 10 ministers.

The republic is divided into 9 departments, created in Jan., 1826, with 87 provinces administered by sub-prefects, and 940 cantons (the number varies) administered by corregidores. The supreme political, administrative and military authority in each department is vested in a prefect, but legislative matters are under a Departmental Assembly composed of the senators and deputies from that department and of delegates elected by the various provinces and the capital. Prefects are appointed by the President of the republic, from lists presented by the Departmental Assembly; sub-prefects (virtually chief constables) are appointed by the prefects; corregidores and village alcaldes are appointed annually by the sub-prefects of the provinces.

Until 1884, when Bolivia was defeated by Chile, she had a strip bordering on the Pacific which contains extensive nitrate beds and at that time the port of Cobija (which no longer exists). She lost this area to Chile, but in 1950 negotiations began, Chile reportedly offering a corridor to the sea through the desert region south of Arica in exchange for a supply of water from Bolivian rivers and lakes for the irrigation of the desert areas of northern Chile.

Bolivia's most serious boundary difficulty has been with Paraguay, about the frontier line in the Gran Chaco (*see* THE STATESMAN'S YEAR-BOOK, 1936, p. 722). It was fixed by arbitration on 10 Oct., 1938.

The boundary line between Bolivia and Peru in the peninsula of Copacabana, from the River Suches to the north of Lake Titicaca, has been delimited by a joint commission and awaits ratification. That between Argentina and Bolivia, as determined by treaty ratified in 1889, was re-examined in 1925; Bolivia ratified the new agreement in 1929 and Argentina in 1939.

National flag: red, yellow, green (horizontal).

National anthem: Bolivianos, el hado propicio (words by I. de Sanjinés; tune by B. Vincenti).

Area and Population.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets):—

Departments	Area: square kilometres	Census 1900 [1]	Estimated 1947	Per square kilometre 1947
La Paz (La Paz)	133,656	446,500	1,198,300	8·7
Cochabamba (Cochabamba)	59,647	328,200	627,600	10·5
Potosi (Potosí)	106,960	320,500	768,800	7·1
Santa Cruz (Santa Cruz)	371,847	202,700	393,000	1·0
Chuquisaca (Sucre)	49,575	187,800	375,800	7·5
Tarija (Tarija)	24,786	83,400	131,900	5·3
Oruro (Oruro)	52,800	86,100	203,500	3·8
Beni (Trinidad)	207,983	32,200	70,300	0·3
Pando (Cobija)	61,840	9,000	18,600	0·3
Total	1,075,794 [2]	1,696,400	3,787,800	3·6

[1] Population in 1900 in areas as they exist today—*i.e.*, allowing for areas ceded or lost to neighbours.

[2] Total area as recalculated in 1947.

census was taken on 16 Aug., 1950.

The language of the educated classes is Spanish, that of the natives Qüechüa and Aymara.

The estimated population (1946) of the principal towns:—La Paz (the actual seat of government, though Sucre is nominally the capital), 302,000; Cochabamba, 76,500; Oruro, 50,000; Potosi, 40,000; Santa Cruz, 33,000; Sucre (the legal capital and the actual seat of the judiciary and the archbishop), 30,000; Tarija, 17,000; Trinidad, 9,500; Riberalta, 7,000; Cobija, 5,000.

Crude birth rate, 1946, 30·7 per 1,000 population; crude death rate, 12·7; crude marriage rate (1945), 5·3. Infantile mortality, 113·1 per 1,000 live births.

Religion, Education and Justice.

The Roman Catholic is the recognized religion of the state; the free exercise of other forms of worship is permitted. The religious orders have 73 convents (36 for males and 37 for females); the male members number about 290, the female 280; there are about 240 secular clergy. The Church is under 2 archbishops (resident in Sucre and La Paz respectively), 5 bishops (Cochabamba, Santa Cruz, Oruro, Potosí and Tarija) and 5 apostolic vicars (titular bishops and chiefs of missions resident in Cuevo, Trinidad, San Ignacio de Velasco, Riberalta and Rurrenabaque). By a law of 19 March, 1912, all marriages must be celebrated by the civil authorities. Divorce is permitted by a law enacted in April, 1932.

Primary instruction, free and obligatory between the ages of 7 and 14 years, is under the care of the municipalities and the state. All illiterates under 21 years of age are required to attend school. In 1944 there were 1,513 rural schools with 3,624 teachers and 110,000 pupils; 1,740 elementary schools with 7,027 teachers and 144,056 pupils. For secondary instruction there were 55 colleges (27 national and 28 private), with 618 teachers and 17,496 pupils. At Sucre, Oruro, Potosí, Cochabamba and La Paz are universities which possess more than one faculty. The university at Sucre, known as the San Francisco Xavier University, is one of the oldest in America, having been founded in 1624. There are also a number of training colleges for teachers, including two for Indians. The Indians, from their own resources, had established 326 schools by 1945. Education in the 1948 budget received 297,000,000 bolivianos.

Motion-picture theatres increased from 39 in 1940 to 45 in 1949, with seating capacity of 31,000. There were 9 daily newspapers in 1949, with an aggregate daily circulation of 56,000.

The judicial power resides in the Supreme Court, in superior district courts (of 5 or 7 judges) and in the courts of local justices. The Supreme Court, with headquarters at Sucre, is divided into two sections of 4 justices each, with the Chief Justice presiding over both. Members of the Supreme Court are chosen on a two-thirds vote of Congress. They nominate the district judges and largely administer the judiciary budget. The district courts have each 5 judges; there are local tribunals and parish alcaldes. Public justice, supervised by commissions appointed by the Chamber of Deputies, is directed by an Attorney-General and by district and local attorneys.

Finance.

The revenue of Bolivia is derived mainly from export duties on tin, and other nonferrous metals (furnishing about 70% of total revenue), customs duties, spirit, patents, sur-taxes and stamps. Tin is the chief single source of revenue. Revenues and expenditures in bolivianos (1

boliviano = approximately one cent, U.S. at the legalized free market rate of exchange) for 6 years were as follows :—

	Revenue	Expenditure		Revenue	Expenditure
1946	1,174,520,967	1,186,335,435	1949 [1]	1,794,684,120	2,046,017,632
1947	1,312,269,235	1,854,485,212	1950 [1]	2,783,714,290	2,783,714,290
1948 [1]	1,496,911,040	1,496,911,040	1951 [1]	3,058,827,765	4,725,126,081

[1] Budget estimates.

In Sept., 1948, a supplementary budget increased the 1948 figures (above) by 488,276,361 bolivianos. The 1949 budget (above) was superseded in May by one proposing to balance revenue and expenditures at 2,125,421,537 bolivianos.

For the years 1938 to 1944, inclusive, the national accounts showed surpluses ranging from 13 million to 41 million, but it has been officially stated that the fiscal history of Bolivia has been one of constant deficits arising from extraordinary expenditures outside the budget. Deficits in ordinary budgets are unconstitutional, hence governments introduce supplementary 'extraordinary' budgets. The cumulative budget deficit by the end of 1951 is officially estimated to be 3,400 million bolivianos.

Chief items of expenditure proposed in the 1950 budget were (in bolivianos) :—Education, 546,597,422; state debts, 1,011,[illegible]; national defence, 564,688,674; home affairs and immigration, 276,094,510; labour and social security, 178,021,830; health, 119,945,225.

The public debt of Bolivia on 30 June, 1950, was 8,332 million bolivianos; on 31 Dec., 1949, it amounted to 8,272,926,052 bolivianos, of which the foreign debt amounted to 5,829,296,060 bolivianos, the internal debt to 2,304,799,208 bolivianos and the floating debt to 138,830,784 bolivianos. The government has submitted to congress a proposal for the resumption of payments on the dollar bonds (about $143 million, including capital and accrued interest) which have been in default since 1931. (For details *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 776.) American direct investments, apart from dollar bonds, amounted to about $9 million. British investments, 1949, were £11,357,143.

Defence.

The territory of the republic is divided into 8 military districts, with divisional headquarters respectively in La Paz, Oruro, Sucre, Camiri, Puerto Suárez, Riberalta, Cochabamba and Santa Cruz de la Sierra. Each military region is divided into two or more military districts, according to its importance, and is garrisoned by a division, which comprises 2 or 3 infantry regiments, 1 cavalry regiment, 1 artillery regiment, 1 battalion of engineers, 1 company of signals and [illegible] of auxiliary services (medical service). Some of the divisions, [illegible] the geographical nature of the region, include special units of railway and pontoon [illegible].

An infantry regiment is composed of 2 battalions and each battalion of 3 light companies (with light machine-guns, pistol machine-guns, rifles and grenades) and 1 heavy company (with anti-tank guns, mortars and heavy machine-guns).

A cavalry regiment is composed of 3 carabineer squadrons (with carbines, light machine-guns and pistol machine-guns) and 1 heavy squadron (with anti-tank guns, mortars and heavy machine-guns).

An artillery regiment is composed of 3 batteries and each battery of 4

guns, the material being 75 mm. or 105 mm., mountain, field or howitzer, according to the region.

The law of 1943 provided for a permanent force of 15,000 men, excluding the police force and the frontier carabineers, but the standing army numbers 8,000 to 10,000 men. Military service is compulsory for all males from the 19th to the 55th year. Those from 19 to 21 years of age serve not more than 2 years with the standing army; those from 21 to 45 years of age, 'the ordinary reserve,' return at some time for 3 months' service. After this the men pass to the territorial guard for 10 years.

A new law provides pre-military training for boys and girls between the ages 14 and 18, comprising [illegible]

The Army is under the [illegible] organization and instruction purposes. The Defence Ministry is responsible for the administrative side.

The Bolivian Army has the following training institutes: a staff college (*escuela de guerra*) to prepare staff officers; a military college (*colegio militar*) to provide officers for the different arms; a school of arms (*escuela de armas*) for the formation of non-commissioned officers and warrant officers; a geographical institute (*instituto geográfico*), and also a school for mechanics and a school for musicians.

The Bolivian Air Force has been reorganized by an American air mission. The following schools have been established: elementary flying training, in Santa Cruz de la Sierra; operational training, in Cochabamba, and the technical training, in La Paz.

The combat units comprise the squadrons (*escuadrillas*) of fighters, army co-operation and light bombers. Each squadron is composed of from 9 to 12 machines. The machines used are of United States manufacture. It was planned to train 2,000 pilots by the end of 1944.

The principal bases are La Paz, Oruro, Cochabamba, Santa Cruz de la Sierra and Puerto Suárez.

Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that about 4,940,000 acres are under cultivation, but rubber, quinine, cattle and hides are the principal products and agriculture is in a backward condition; wheat, rice, sugar and other basic foodstuffs have to be imported. Potatoes, maize, cacao, coffee, barley, coca and highland rice are produced. Bolivia ranks as the second rubber-exporting country in South America, coming next to Brazil; exports in 1948 were 348,291 kilos to the United States, 301,901 kilos to the U.K., 250,590 kilos to France, and 1,899,300 kilos to Spain. Tropical forests with woods ranging from the 'iron tree' to the light palo de balsa await exploitation. The public lands of the state have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonization; 2,423 concessions covering over 57,394,000 acres had been granted up to 31 Dec., 1944. Two-thirds of the population depend upon agriculture and only 60,000 (less than 2%) on mining. A census of agriculture was taken on 28 Aug., 1950—the first ever taken. A colony of Jewish refugees was established in 1940 at Buen Tierra, 60 miles east of La Paz.

Mining is still the most important industry. The mineral wealth of Bolivia includes tin, silver, copper, lead, zinc, antimony, bismuth, wolfram (11% of world output), gold and borate of lime. Output of gold, 1949 (exports plus government purchases), 1,008 fine kilos; exports of silver, 207,000 fine kilos.

Bolivia normally produces 15% of the total tin output of the world (the proportion rising to 21% in 1947 and 1948), and ranks third in the production of this metal. Tin mines are at altitudes of from 12,000 to 18,000 feet, where few except native Indians can stand the conditions; transport is costly. Bolivia has begun the smelting of tin. Exports, 1949, of minerals, net weight in metric tons:—Tin, 34,662 (about half to the United States); tungsten, 1,526; lead, 26,311; copper, 5,074; zinc, 17,667; antimony, 10,275. Some bismuth, sulphur, asbestos and fluorine were also exported. Large deposits of common salt are found near Lake Poopo and in the south of Bolivia. Petroleum abounds in the whole territory between the Argentine frontier and the north-west territory bordering Peru; some geologists have declared this to be potentially the largest oilfield in South America; output of crude oil (in barrels) by the state oil concern, 1949, 678,257; gasoline or petrol, 333,873; liquid paraffin, 41,294; fuel oil, 176,648; diesel oil, 40,709. With the completion of a pipe-line from the Camiri field to the refinery at Cochabamba, Bolivia is 85% to 90% self-sufficient as regards motor petrol, diesel oil, paraffin and fuel oil. Brazil and Argentina have rights to a certain percentage of petroleum products from specified regions after Bolivia's internal requirements have been met. Bolivia exported to Argentina in 1948, 15,795,000 litres of crude oil and 300,000 litres of fuel oil.

Industries are small; in 1949, the aggregate capital of Bolivian industry (including some public utilities, *e.g.*, electricity, was 1,792,066,434 bolivianos ($17,920,000, U.S.). Electric power production capacity is small, 35,000 kw. The production of the 9 main industries in 1947 was valued at 1,072,867,699 bolivianos. There are many cottage and workshop industries but the value of their production is small.

The miners are organized in trade unions; their leadership was purged by the government in June, 1950, of all Communists, 'Nazi-Fascists,' aliens, naturalized Bolivians and middle-class elements.

Commerce.

The value of imports and exports are given as follows in old gold bolivianos, valued at 18*d.* or 13·33 bolivianos to £1 :—

	1945	1946	1947	1948	1949
Imports .	134,027,882	170,534,043	197,730,715	224,079,354	259,408,907
Exports .	287,649,683	262,326,573	284,335,738	392,535,108	360,287,662

In millions of U.S. dollars, trade figures were :—1945, imports, $40·4 and exports, $80·3; 1946, $51·4 and $73·6, 1947, $59·6 and $80·6; 1949, $68·9 and $99·0. The 'favourable' trade balance is largely illusory; much of the earnings from shipments of tin, etc., are retained abroad by the foreign owners of the mining concessions.

Tin ore has usually constituted in value about 75% of Bolivia's exports since 1920; in 1949, it was 75·3%.

Bolivia having no seaport, imports and exports pass chiefly through the free ports of Arica and Antofagasta in Chile, Mollendo and Matarani in Peru, through La Quiaca on the Bolivian–Argentine border, and through river-ports on the rivers flowing into the Amazon. The chief imports are sugar, wheat, rice, meat, timber, petroleum, iron and steel products, mining machinery, motor vehicles and textiles. In 1949 imports from Argentina amounted to 41,145,861 bolivianos (16% of the total); from the United States, 135,592,589 bolivianos (52%); from Great Britain, 14,153,538 bolivianos (5·46%); from Peru, 21,030,410 bolivianos; from Chile, 11,851,846

bolivianos, and from Brazil, 3,707,968 bolivianos (all boliviano figures at the par rate of 13·33 bolivianos to the £).

Imports are controlled by a system of import licenses. Foreign exchange is granted at the rate of Bs. 42 = $1·00 U.S. for certain commodities of prime necessity, and at 60 = $1·00 for the bulk of imports; exchange for all other commodities is sold at the rate of Bs. 100 = $1·00 U.S.

Total trade between U.K. and Bolivia (Board of Trade figures) for 5 years (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports to U.K. . . .	3,085,504	5,596,268	9,417,533	8,481,155	11,029,999
Exports from U.K. . . .	206,283	497,320	931,444	948,353	1,026,392
Re-exports from U.K. . .	7,948	7,193	3,523	3,574	15,198

Communications.

The total length of railway open in Bolivia is 1,454 miles; 554 miles are state-owned. The principal line is the Antofagasta (Chile) and Bolivian Railway, with a total length in Bolivia of 749 miles. The Arica–La Paz line (278 miles, of which 148 miles are in Bolivia) is state-owned. Two treaties signed with Brazil in 1938 provide for joint construction of a railway from Santa Cruz de la Sierra in Bolivia to a point near the river-port of Corumba in Brazil. A railway is also being built from Yacuiba on the Argentine frontier to Santa Cruz.

The national airline is 'Lloyd Aéreo Boliviano'; in 1948 a total of 1,307,736 miles were flown, carrying 42,277 passengers and 8,631,171 kilos of freight. Pan-American Airways, with a non-exclusive concession expiring in 1967, links Bolivia with U.S.A. and nearly all South America. The Braniff International Airways operates a service from Lima *via* La Paz to Buenos Aires with connexions to the U.S.A.

Traffic on Lake Titicaca between Guaqui and Puno is carried on by the steamers of the Peruvian Corporation. About 12,000 miles of rivers, in three systems, are open to navigation by light-draught vessels.

Of main highways there are (1949) one from La Paz through Guaqui into Peru, another from La Paz, *via* La Quiaca, into Argentina, passable throughout the year except at the height of the rainy season, and others from Villazon to Villa Montes *via* Tarija, and from Potosi to Sucre, passable during the dry season, and over 1,000 miles under construction. In all there were, 1948, about 6,280 miles of roads. A motor highway is being constructed (with the aid of a $16 million loan from the Export-Import Bank) from highlands of Cochabamba to the Alto Beni forest region of Santa Cruz. Motor vehicles, 1950, numbered 12,587 (3,797 passenger cars, 8,391 trucks, 467 buses and 118 motor cycles).

In Bolivia there were, in 1948, 200 post offices, 465 letter boxes, 723 telegraph and telephone offices, 151 wireless offices, and about 10,950 miles of telegraph lines. There is telephone service in the towns of La Paz, Cochabamba, Oruro, Potosi and Santa Cruz, with together 7,860 telephones. There are 30 commercial broadcasting stations, of which 2 are state-sponsored; there are about 75,000 radio receiving sets in the country.

Banking, Money, Weights and Measures.

The Banco Central de Bolivia was inaugurated at La Paz in 1928 as a central bank of issue and in 1939 was taken over by the state. Beginning

1 Jan., 1946, its assets and liabilities were divided between an Issue Department and a Banking or Commercial Department. Note circulation, 31 May, 1950, 2,700,173,247 bolivianos; compulsory deposits of the local banks in the new Issue Department, 423,793,283; gold, at home and abroad, 955,760,586; foreign exchange, 287,040,662 bolivianos. Sight deposits in all banks on 31 May, 1950, totalled 3,723,099,000 bolivianos, of which 753,377,712 were deposited in the Central Bank by the government.

Required reserves may be gold or deposits abroad freely convertible into gold or other currencies. Gold and deposits payable in gold are valued at parity (1,470 bolivianos = 1 fine oz. troy); other deposits in foreign currencies are converted at the bank's official buying rate. Minimum reserves (against notes and demand deposits in the Issue Department) must be 50% but may be lowered to 25%, depending upon variations in export values.

Apart from the Central Bank (with 18 branches) there are 7 domestic banks (30 branches) and a Peruvian bank. Largest of these is the Mining Bank with paid-up capital of 80 million bolivianos.

The present unit of account, as accepted by the International Monetary Fund in 1950, is the gold boliviano equal to 1·66667 U.S. cents (or 60 to $1·00); in gold it was equal to 0·0148112 gramme of fine gold, 1 troy oz. of fine gold being worth 2,100 bolivianos.

The cost-of-living index (based on December, 1937 = 100) averaged 129 in 1938, 214 in 1940, 627 in 1947 and 843 in June, 1950.

The old unit of account was a gold boliviano, containing 0·54917 gramme of fine gold and equal then in U.S. money to 36·5 cents (61·8 cents in new U.S. gold dollars). There is no Bolivian gold in circulation. Coins in circulation, 1949, 50 centavos (95% copper, 5% zinc), 20 and 10 centavos (zinc with impurities). Paper notes in denominations of 1, 5, 10, 50, 100, 500, 1,000, 5,000 and 10,000 bolivianos are in circulation.

On 25 Sept., 1931, gold payments were suspended, and exchange control set up. Gold stock rose within a year from $1 million (U.S.) to around $3½ million, reaching $28·8 million on 1 Aug., 1948; on 30 Nov., 1950, the total of gold and foreign exchange was $37·9 million.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed.

Diplomatic and Consular Representatives.

1. Of Bolivia in Great Britain (1a Grosvenor Gardens, S.W.1).

Ambassador.—(Vacant).
Chargé d'Affaires ad interim and Counsellor.—Roberto Querejazu Calvo.
Consul-General.—Guillermo Scott-Murga.
Secretary.—Eduardo Aramayo.

There are consular representatives at London, Birmingham, Glasgow, Hull and Liverpool.

2. Of Great Britain in Bolivia.

Ambassador.—John Garnett Lomax, C.M.G., M.B.E., M.C.
First Secretaries.—R. C. Blackham (*Consul*); H. J. Legg, M.C. (*Commercial*); W. Oakley Evans (*Labour*).
Military Attaché.—Brig. R. G. Fullerton.
Air Attaché.—Group Captain E. S. Finch.
Civil Air Attaché.—G. S. Hill.

There are consular representatives at La Paz, Cochabamba, Oruro and Sucre.

BRAZIL.

(Estados Unidos do Brasil.)

Constitution and Government.

Brazil was discovered on 3 May, 1500, by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement; in 1815 the colony was declared 'a kingdom,' and on 13 May, 1822, Dom Pedro, eldest surviving son of King João of Portugal, was chosen 'Perpetual Defender' of Brazil by a National Congress. He proclaimed the independence of the country on 7 Sept., 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on 12 Oct., 1822. On 15 Nov., 1889, his only son, Dom Pedro II (born 1825, died 1891), was dethroned by a revolution, and Brazil declared a republic under the title of the United States of Brazil.

The following is a list of Presidents since the establishment of the republic:—

Marshal Deodoro da Fonseca, 15 Nov., 1889–23 Nov., 1891 (resigned).
Marshal Floriano Peixoto (Acting), 23 Nov., 1891–15 Nov., 1894.
Senhor Prudente de Moraes Barros, 15 Nov., 1894–15 Nov., 1898.
Dr. Manuel Ferraz de Campos Salles, 15 Nov., 1898–15 Nov., 1902.
Dr. Francisco de Paula Rodrigues Alves, 15 Nov., 1902–15 Nov., 1906.
Dr. Affonso Penna, 15 Nov., 1906–14 June, 1909 (died).
Dr. Nilo Peçanha (Acting), 14 June, 1909–15 Nov., 1910.
Marshal Hermes da Fonseca, 15 Nov., 1910–15 Nov., 1914.
Dr. Wenceslau Braz, 15 Nov., 1914–15 Nov., 1918.
Dr. Francisco de Paula Rodrigues Alves.[1]
Dr. Delphim Moreira (Acting), 15 Nov., 1918–28 July, 1919.
Dr. Epitacio da Silva Pessoa, 28 July, 1919–15 Nov., 1922.
Dr. Arthur Bernardes, 15 Nov., 1922–15 Nov., 1926.
Dr. Washington Luiz Pereira de Souza, 15 Nov., 1926–25 Oct., 1930 (deposed).
Dr. Getulio Dornelles Vargas, 26 Oct., 1930–29 Oct., 1945 (resigned).
Dr. Jose Linhares (Provisional), 30 Oct., 1945–31 Jan., 1946.
General Eurico Gaspar Dutra, 31 Jan., 1946–31 Jan., 1951.

[1] Owing to illness did not take office on 15 Nov., 1918; died 16 Jan., 1919.

The present constitution, adopted on 18 Sept., 1946, restored many features of the old one of 16 July, 1934 (*see* Statesman's Year-Book,

1949, p. 782), including a bicameral legislature, the senate elected for 8 years and the Chamber of Deputies for 4 years; it is less nationalistic and more hospitable to foreign capital than the old one. The President and Vice-President are elected for 5 years and are not eligible for successive terms.

Freedom of speech and press are not absolute: war propaganda, the teaching of 'subversive doctrines' and the dissemination of race or class prejudices are banned, as also are political parties opposed to democracy, the existing multi-party system or to 'fundamental human rights' which include the right to own private property. The Supreme Electoral Tribune on 7 May, 1947, decided by 3 votes to 2 that the Communist Party is illegal and may not appear on the ballot. In January, 1948, a law was enacted expelling 76 federal and state deputies, 1 federal senator and 18 members of the municipal council of Rio Janeiro belonging to the Communist Party. In the municipal council the Communists formed the largest party. It claimed 511,300 members out of a total electorate, 1948, of 6,188,856.

A novel provision of the constitution is that no taxation may be levied upon the royalties of authors or the incomes of professors or journalists.

Under the new electoral code the vote is compulsory for men and employed women between the ages of 18 and 65 and optional for unemployed women and persons over 65 and for officers of the armed forces. Enlisted men and illiterates (who comprise 66% of the adult population) may not vote. Registered electors, 1950, numbered 11,604,549. Several women hold responsible Government offices.

President of the Republic.—Dr. Getulio Dornelles Vargas (President from 26 Oct., 1930, to 29 Oct., 1945) elected 3 Oct., 1950: inaugurated 31 Jan., 1951, to serve until 31 Jan., 1956. Dr. Vargas polled 3,829,560 votes; Eduardo Gomes, 2,288,105; Christiano Machado, 1,653,521.

Vice-President.—João Cafe Filho.

There are Secretaries of State at the head of the following Departments:—Treasury; Economics; Justice and Interior; Defence; Foreign Affairs; Communications and Public Works; Agriculture; Labour, Industry and Commerce; Instruction and Public Health. War, Marine and Air were merged in 1951.

National flag: green, with yellow lozenge enclosing a blue sphere, with 21 white stars forming the southern cross, and the motto *Ordem e Progresso.*

National anthem: Ouviram do Ypiranga (words by J. O. Duque Estrada; tune by F. M. da Silva).

1. Local Government.

The United States of Brazil consists of 20 states, 5 federal territories (Acre, Guaporé, Rio Branco, Amapá, Fernando de Noronha), and 1 federal district. Each state has its distinct administrative, legislative and judicial authorities, its own constitution and laws which must, however, agree with the constitutional principles of the Union. The states may unite or split or form new states. Taxes on inter-state commerce, levied by individual states, which previously flourished, are prohibited; but export taxes on products shipped abroad, limited to 5% *ad valorem*, are permitted. The governors and members of the legislatures are elected, but magistrates are appointed and are not removable from office save by judicial sentence.

Area and Population.

The area of Brazil is 8,516,037 square km. or 3,288,050 square miles.

Following are the census returns for 1940 and estimated population 31 Dec., 1949 :—

State and Capital	Area (sq. miles)	Population	
		Census 1940	Estimate 1949
North :	1,379,082	1,462,420	1,788,207
Guaporé (Pôrto Velho [2])	98,138	— [1]	25,622
Acre (Rio Branco)	59,143	79,768	96,295
Amazonas [3] (Manaus)	616,182	438,008	511,393
Rio Branco (Boa Vista [2])	82,752	— [1]	14,535
Pará (Belém)	469,806	944,644	1,114,339
Amapá (Macapá [2])	53,061	— [1]	26,023
North-east :	375,418	9,973,642	12,040,047
Maranhão (São Luís)	129,278	1,235,169	1,491,079
Piauí (Teresina)	96,267	817,601	986,997
Ceará (Fortaleza)	59,171	2,091,032	2,524,266
Rio Grande do Norte (Natal)	20,483	768,018	927,141
Paraíba (João Pessoa)	21,732	1,422,282	1,716,960
Pernambuco (Recife)	37,460	2,688,240	3,243,909
Alagôas (Maceió)	11,017	951,300	1,148,397
Fernando de Noronha [4]	10	— [5]	1,298
East : [6]	487,194	15,625,953	18,863,441
Sergipe (Aracajú)	8,131	542,326	654,689
Bahia (Salvador)	217,682	3,918,112	4,729,892
Minas Gerais (Belo Horizonte)	224,714	6,736,416	8,132,111
Espírito Santo [7] (Vitória)	15,785	750,107	905,919
Rio de Janeiro (Niterói)	16,444	1,847,857	2,230,708
Dist. Federal (Rio de Janeiro)	524	1,764,141	2,129,648
South :	318,690	12,915,621	15,602,642
São Paulo (São Paulo)	95,459	7,180,316	8,679,059
Paraná (Curitiba)	77,722	1,236,276	1,492,416
Santa Catharina (Florianópolis)	36,437	1,178,340	1,422,476
Rio Grande do Sul (Pôrto Alegre)	109,072	3,320,689	4,008,691
Central West :	727,856	1,258,679	1,505,663
Mato Grosso (Cuiabá)	487,509	432,265	508,027
Goiás (Goiânia)	240,347	826,414	997,636
Total	3,288,050	41,236,315	49,800,000

[1] Territory created in 1943.

[2] Raised to the status of territorial capitals in 1943; previously, Pôrto Velho and Boa Vista belonged to the state of Amazonas and Macapá to the state of Pará.

[3] Including 1,232 sq. mls. recovered from the state of Pará.

[4] Including islets.

[5] Territory created in 1942; the 1940 census figures are included in those for the state of Pernambuco of which the territory then formed part.

[6] Including 3,914 sq. mls. and population figures of 66,994 and 80,874 respectively for 1940 and 1949, corresponding to the Região da Serra dos Aimorés, territory in dispute between Minas Gerais and Espírito Santo.

[7] Including off-shore islands.

Density of estimated population 1 July, 1949, was 15·1 per square mile.

A census was taken on 1 July, 1950, of population, agriculture and housing. Preliminary figures :—Total population, 51·5 million; São Paulo, 9·2; Minas Gerais, 7·7; Bahia, 4·9; Rio Grande do Sul, 4·2; Pernambuco, 3·2.

The 1940 total included 26,171,778 whites (63·5%), 6,035,869 Negroes (14·6%), 8,744,365 mulattoes (21·1%), 242,320 Asiatics and 41,983 unknown. Single, 27,177,242; married, 12,236,256; widows, 1,284,922; widowers, 437,097; divorced or separated, 67,183; not specified, 33,615. Of the total, 39,822,487 were Brazilians by birth, 122,735 naturalized, 1,283,833 aliens and 7,260 unknown. Of the aliens, 354,311 were Portuguese, 285,029 Italians; 147,897 Spaniards, 140,693 Japanese; 88,939 Germans; 45,786 Syrians. About 13 million were able to read and write. The urban and suburban population comprised 31·2%.

The language is Portuguese, though Italian and German are used in the southern states.

On 1 Jan., 1948, the estimated population of the principal towns was:—Rio de Janeiro, 2,052,672; São Paulo, 1,543,175; Recife, 405,410; Salvador, 337,946; Porto Alegre, 316,756; Belo Horizonte, 245,948; Belém, 240,077; Fortaleza, 177,[illegible]; Nova Iguaçu, 165,698; Curitiba, 163,661; Manaus, 123,801; João Pessoa, 109,761; Maceió, 105,014.

The number of immigrants between 1820 and 1947 was 4,767,030, but it is estimated that only one-half remained. Immigration declined from 34,677 in 1937 to 1,308 in 1943, rising to 30,800 in 1949, plus 13,600 displaced persons. Immigrants in 1947 (18,753) included 8,921 Portuguese, and 3,284 Italians. Japanese immigration began only in 1908 and ended in 1941; total Japanese immigrants, by 1941, was 188,622. Under the constitution, as amended in May, 1933, each nationality has its immigration restricted to 2% per year of the number calculated for the previous 50 years, except that the quota may be increased to 3,000 per annum, providing that 80% of the immigrants are 'farmers or rural technicians.' Settlements of foreigners must include 30% of Brazilians. The International Refugee Organization has placed 24,000 refugees in Brazil since 1947.

Religion.

The population is overwhelmingly Roman Catholic (census, 1940, showing 39,177,880 or 95%). In 1889 connexion between Church and state was abolished; it was restored by the 1934 constitution, but again abolished in 1946. Brazil has a representative at the Vatican. In 1946, the Catholics maintained 62 seminaries; there were 17 ecclesiastical provinces and archdioceses, and 65 dioceses with 2 cardinals, 19 archbishops, 59 bishops, 25 prelates and 2 apostolic prefects. The 3,036 parishes had 5,383 priests. Catholic seminaries had 4,639 students and the religious orders had 20,805 men and women. In 1940 Protestants numbered 1,074,857; Orthodox Christians, 37,953; Jews, 55,666; Buddhists, 123,353; Spiritualists, 463,400; avowed atheists, 87,330.

Education.

Education is compulsory. In 1940 (census) there were 9,143,563 persons over 18 years of age who could read and write; this was 43·6% of that age group and represents an increase of 73% over the literates recorded in the 1920 census. Of the 9,143,563 literates, 8,355,032 were Brazilian citizens; 57% of the literate citizens were men.

There were in 1948, 66,641 primary schools and [illegible] with 4,745,914 pupils. In 1946, 1,344 secondary schools had [illegible] pupils; 3,970 commercial, technical and industrial schools had 216,954 pupils; 339 superior schools conferring degrees had 28,404 pupils.

The Government undertakes to provide, in part, for higher or university instruction, but there are institutions of this nature maintained, some by

the states, and some by private associations, while primary schools are chiefly maintained and supervised, either by the states or by the municipalities and private initiative. There are 8 official universities—the University of Brazil (Federal District) (founded on 7 Sept., 1920), the University of Bahia (founded in 1946), the University of Recife (1946), the University of Paraná (1946), the Rural University (Federal District), the University of São Paulo, the University of Minas Gerais and the University of Rio Grande do Sul. In addition there are the 2 Catholic universities of Rio de Janeiro and São Paulo; there are in all 186 faculties which confer degrees.

At the capital, a school for the blind, another for deaf and dumb are maintained by the Federal Government. There are 13 engineering and mining schools, 12 schools of medicine; 24 of pharmacy and dentistry; 24 schools of law and social sciences, and 69 industrial schools, 21 agricultural and 53 commercial schools. The Oswaldo Cruz Institute, in Rio de Janeiro, is devoted to experimental medicine, and the Butantan Institute, in São Paulo, to the preparation of anti-ophidic and other serums.

The Technical School of Aviation, founded in November, 1943, by the Air Ministry, had, in 1946, 260 instructors and 1,800 students.

Motion-picture theatres numbered 1,736 in 1950, with seating capacity of 1,107,560.

In 1949 there were 220 daily newspapers with an estimated circulation of 1,500,000. Foreigners and corporations (except political parties) are not allowed to own or control newspapers or wireless stations.

Justice.

There is a supreme federal Court of Justice at Rio de Janeiro, which celebrated its centenary on 20 Jan., 1929; it has 11 justices, but may have more, on its own proposal subject to legislative approval, all appointed by the President with the approval of the Senate. There are also federal tribunals in each state and the Federal District and the territory of Acre, as well as an elaborate system of 'electoral courts' to protect the elections, and a system of 'labour tribunals.' Justice is administered in the states in accordance with state law, by state courts, but in Rio de Janeiro federal justice is administered. Judges are appointed for life. There are also 727 magistrates dealing with commercial cases and 4,963 justices of the peace. There is no divorce, but there is a form of judicial separation.

Finance.

Receipts and expenditures for 6 calendar years have been as follows in millions of cruzeiros (paper) (the cruzeiro heretofore = 5·27 cents, U.S.; 1950, 5·44 cents):—

	1946	1947	1948	1949	1950	1951 [1]
Revenue	11,570	13,853	14,379	15,823	17,908	20,550
Expenditure	14,203	13,393	13,027	15,416	20,638	22,868

[1] Estimates.

Chief items of revenue in 1949 were as follows (in millions of cruzeiros):—Taxes, 14,660 (of which income tax furnished 4,329); government property, 259; industrial enterprises, 923; extraordinary revenues, 752. The

principal items of expenditure were:—Finance, 3,429; communication and public works, 3,319; war, 2,827; education and health, 2,180; navy, 1,428; aviation, 1,481; justice and internal affairs, 980; labour, industry and commerce, 731; agriculture, 1,064.

The 1950 budget allocates to the external debt service 177 million cruzeiros for interest and retirement of the sterling debt (remitted at the rate of 52·416 cruzeiros = £1) and 134 million for the dollar loans (at 18·72 cruzeiros = $1).

In May, 1950, Congress approved a 5-year plan for the improvement of the country's economy known as the SALTE Plan from the initial letters of the words *Saúde* (health), *Alimentação* (food production), *Transporte* (transport) and *Energia* (power); in millions of cruzeiros health services get 2,640, food production, 2,720, transport, 9,815 and power (electrical and petroleum) 2,245; total, including minor funds, 21,300, spread over the period 1949–53. Sources of the funds include the ordinary budget, a foreign exchange loan from the Bank of Brazil, and 4,000 million from SALTE bond issues.

The 1950 budget excluded the appropriation for the SALTE Plan amounting to 1,900 million cruzeiros; a similar appropriation of 1,300 million in 1949 was also excluded.

In Dec., 1949, President Dutra reported that in 1949 Brazil had reduced her sterling debt by £24 million, and the dollar debt by $19·5 million.

The foreign debt (including states and municipalities) of Brazil on 31 Dec., 1949, amounted to £96,537,650, and $184,833,865 (U.S.). The French debt in paper francs and gold francs was liquidated in 1949. Internal funded federal debt, 31 Dec., 1948, was 10,410 million cruzeiros.

The par value of British investments, at the end of 1949, were £170,525,640, of which £30,760,877, or 18·0%, were in default; average interest received was 3·2%. Of the 1949 total, £93,651,924 were in government loans (1948, £121,285,920); direct investments in industrial enterprises amounted to £51,663,863, on which the return was 6·8%. American direct investments, 1947, amounted to $313,800,000; Brazilian utilities held $96 million, manufacturing, $84 million, and oil distribution, $69 million. American holdings of dollar bonds, end of 1943, were $337,242,028. The Bank of Brazil makes total U.S. direct investments, 31 Dec., 1948, at $525·2 million, by including the accumulated reserves as well as the original capitals. It estimates British direct investments as £41·8 million. The Bank of England (1950) places the par value of Brazilian investments held by residents in the U.K. in 1948 (? securities repatriated by Brazilians) at £82 million (in 1938, £164 million) on which interest and dividends received, 1948, were £2·6 million (in 1938, £1·6 million).

Defence.

Army.—Under the constitution of 1934, military service is compulsory for every Brazilian man from 21 years of age to 45. The terms of service are 9 years (from the 21st to the 30th years of age) in the Army 'first line' (1 in the ranks, the rest in the reserve) and 14 years (from the 30th to the 45th years of age) in the army 'second line' (7 in the 'second line' and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the Territorial Army also have an annual training of 2 to 4 weeks. The total peace strength for 1938 was 6,548 officers and 72,525 other ranks, organized in 5 divisions, 3 cavalry divisions, 1 mixed brigade and 1 coast defence district. The military police under the War Office number 38,213.

In 1948 the United States sent an Army, Navy and Air Force mission to Brazil to establish a college there for training senior officers in combined operations.

Air Force.—There is an Air Force (independent of both the Army and Navy since 1940) of 3 air regiments, 2 balloon battalions and 2 balloon companies, a personnel of 5,000. Air defence is organized in 5 zones and 5 air regiments. Equipment is chiefly of United States manufacture.

Navy.—The principal ships of the Brazilian Navy are as follows :—

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Guns				
	BATTLESHIPS	tons	in.	in.				knots
1910	Minas Gerais São Paulo [1]	19,200	9	9	12 12-in., 14 4·7-in., 4 3-in. A.A.	—	30,000	21

[1] Relegated to permanent harbour service.

There are 9 destroyers, 8 frigates (escort destroyers), 4 submarines, 6 trawlers (rated as corvettes), 27 submarine chasers, 2 river monitors, 3 river gunboats, 5 minelayers, 2 transports, 8 oilers and 2 sail training ships, the British-built *Almirante Saldanha*, and the *Guanabara*; a depot and repair ship, 4 surveying vessels, 7 tugs and 2 tenders. Naval bases are at Rio de Janeiro, Belém, Natal, Recife, Salvador, with a river base at Ladario. The active personnel is 1,300 officers and 25,000 men, including 400 marines.

In 1951, Brazil purchased the U.S. cruisers *Philadelphia* and *St. Louis*, to be renamed *Almirante Barroso* and *Almirante Tamandaré*.

Production and Industry.

Brazil's total production of goods (1939) was valued at 27 million contos (£337,000,000), of which industry accounted for 12½ million, agriculture 9 million, livestock 3 million and minerals 1 million. The census of 1940 showed 9,453,510 engaged in agriculture and forestry; 1,400,056 in manufacture; 473,676 in transport; 390,560 in the extractive industries; 310,726 in public service; 172,212 in the professions, and 118,637 in private service.

Brazil is an agricultural country, though only a small portion is under culture. The total cultivated area (1949) covers about 41 million acres, of which 6,297,317 acres are in coffee, 11,016,852 in maize, 6,233,356 in cotton, 4,287,520 in rice and 4,381,053 in beans. About 67,455 acres in the north-eastern section are under irrigation. Brazil ranks first in the production of coffee and castor-beans, second in the production of cocoa and third in that of sugar and tobacco. American interests, headed by Nelson Rockefeller, are encouraging in southern Brazil the production of hybrid maize, as perfected in Iowa, in connexion with hog-raising (5,650,292 tons in 1949).

Total agricultural production, 1949, is officially estimated at 62,858,593 metric tons, from 16,857,632 hectares, valued at 38,820 million cruzeiros. All staples were higher except sugar.

The 4 states of São Paulo, Paraná, Espírito Santo and Minas Gerais are the principal districts for coffee-growing. Large plantations or fazendas with more than 100,000 trees are the rule. Output, 1949, 1,031,501 metric tons or 17,191,700 bags (of 60 kilos); yield, 405 kilos per hectare. Coffee exports in 1949 totalled 19,368,000 bags; in 1950, 14,845,000 bags.

Sales since Feb., 1931, have been controlled by the Federal Government; the policy of incinerating surplus stocks to protect the price was suspended in Oct., 1943, and the National Coffee Department was wound up in Dec., 1947. Beginning in 1945, exports receive a subsidy, ranging from 65 cruzeiros to 15 cruzeiros per bag. Highest output recorded was 29,880,000 bags in 1933–34. A pest known as *broca* attacked the coffee trees in 1947.

Production and export of cocoa was nationalized in May, 1943. Bahia furnishes 96% of the output from about 250,000 acres, total output, 1949, 128,545 metric tons; exports, 1949, were 132,244 metric tons. Two crops a year are grown. The United States takes two-thirds of the crop. Castor-bean output usually exceeds 150,000 tons; output 1949, about 199,000 tons; exports in 1949, 132,213 tons. The plant grows wild.

Tobacco output ranges between 100,000 and 120,000 metric tons per annum (1949, 28,300 tons were exported, compared with 53,800 in the peak year, 1946).

Sugar production, 1948–49, was 23,423,074 bags (of 60 kilos), of which 5,188,995 were exported. Output per hectare (38 tons) is low compared with 50 tons, 120 tons and even 160 tons produced elsewhere. Anhydrous alcohol is distilled from sugar surplus, producing, in 1948, 92,903,000 litres, all for motor spirits. Annual beer production has reached 50 million gallons for domestic consumption only.

Brazil now ranks second only to the United States in production of oranges (exports, 1949, 71,963 metric tons). Exports of bananas, 1948, was 8,166,696 stems. Cotton production, 1949, 401,742 metric tons from 6 million acres; but output in the leading state, São Paulo, has fallen from 463,000 tons in 1944 to 221,661 tons in 1949, owing to soil exhaustion. Exports, 1949, 139,759 tons. Brazil formerly furnished only 10% of her own requirements in wheat (average output, 1934–38, 144,000 metric tons); but output, 1949, was up to 471,907 tons. Rice is important; output, 1949, was 2,647,956 metric tons.

Rubber is another natural product of the country, chiefly in the Acre territory and the states of Amazonas and Pará. Output, stimulated by the war, was 18,635 metric tons in 1940, in 1944, 29,800 tons and in 1948–49, 27,606 tons; peak reached in 1912 (when rubber realized $3, U.S., a lb.) was 42,510 tons. Output of tyres in local factories has risen from 106,000 units in 1940 to 1,200,000 in 1949, consuming all domestic supplies and, in 1951, requiring imports. Exports of raw rubber, which in 1947 were 14,510 tons, have all but disappeared; 3,241 tons in 1949. Brazil is the chief source of carnauba wax, used for electric insulation and gramophone records, exporting 11,109 tons in 1949. Caroa fibre is grown as a substitute for Indian jute; consumption by Brazilian mills, about 7,000 tons. Jute output, 1948, 9,369 tons. Plantations of tung trees established in 1930 (4 million trees in 1946) are beginning to yield tung oil in commercial quantities; output, 1948, 34,000 tons.

Livestock estimates for 1949 showed 46,250,000 cattle, 24,500,000 swine, 9,900,000 wool sheep and 8,600,000 hair sheep (*cabrettas*), 8 million goats, 6,770,000 horses, asses and mules and 11,880,000 oxen. In 1949, 1,357,000 cattle were killed for fresh meat, and 332,000 for dried meat; total was barely sufficient for domestic needs. Sericulture, started by Italian immigrants, produced 700 tons of cocoons in 1941. The fishing industry (including a fleet of 120 vessels) is owned by the Government; the catch in 1948 was 145,000 metric tons. Whale catching off the coasts began in 1949.

Both the mines and forests of Brazil are important. Brazil is the only source of high-grade quartz crystal in commercial quantities; exports in 1948, 720 tons. It is an important source of industrial diamonds (exports,

1948, 12,086 grammes); the second largest western producer of chrome ore (reserves of 4 million tons and exports, 1948, of 1,626 metric tons); fifth in the output of mica; third in zirconium; she has large reserves of beryllium, graphite, titanium ore and magnesite awaiting development. Along the coasts of the states of Rio de Janeiro, Espírito Santo and Bahia are found monazite sands containing thorium; reserves are estimated at 100,000 tons; exports, 1949, 2,435 tons. Manganese ores of high content are important (reserves in the Amapa region alone are estimated at 10 million metric tons); output in 1947 was 451,507 tons, valued at 51 million cruzeiros; the United States took 97%. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná and São Paulo. Total reserves are estimated at about 5,000 million tons, and the output (1949), from 7 mines, 2,133,800 tons.

Iron is found chiefly in Minas Gerais, where 17 plants are located. At Itabira, the Government is now opening up what is believed to be one of the richest iron-ore deposits in the world, with known reserves of 16 milliard (billion) tons, of which half rival the Swedish ores in iron content and have lower silica and phosphorus contents. Output of iron ore, 1949, from the government-owned mines was 477,000 metric tons; total output for the country was 1,298,000 metric tons; exports, 1950, were 722,000 tons. With the support of Export-Import Bank, a steel industry has been developed, starting with plants at Volta Redonda, State of Rio de Janeiro, which are expected to furnish 59% of Brazil's steel requirements. All furnaces and mills proposed were completed and operating in 1948. Total output of pig-iron (1950) at Volta Redonda, 330,000 tons, which was used, in part, for the production of 300,000 tons of steel; rolled products amounted to 287,000 tons. Brazil's total output of steel was, 1949, 605,500 tons; pig-iron, 508,200 tons; rolled products, 499,000 tons. Production of aluminium was started in Minas Gerais in 1945; output of bauxite, 1948, 14,044 tons. Cement output, 1949, from 7 plants was 1,281,000 metric tons.

Gold is found in practically every state, though large-scale mining is confined to a single mine in Minas Gerais; the production in 1948 was 130,260 fine oz. (valued, on the free market, at 115,084,000 cruzeiros); peak output was 166,366 oz. in 1944. Beginning Dec., 1948, miners must sell 20% of their gold to the central bank at the official price (647·50 cruzeiros per troy oz.) but the remainder may be sold in the domestic free market. Private export of gold has been forbidden since 1918. Salt output (1948), 781,333 tons. Diamond districts are Diamantina, Grao Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso and other states.

The most important [illegible] industry in Brazil is cotton weaving, which employs about 25% of all industrial workers; nearly 50% of the factories are in São Paulo and another 28% in the federal district and in Minas Gerais. The 423 mills have 2,911,506 spindles and 92,407 looms and, December, 1946, employed 224,535 workers. Output of cotton textiles, 1947, was about 1,200 million square yards of cloth. Exports of cotton piece-goods, 1949, were low at 4,011 tons (26,434 tons in 1943). Rayon output, 1947, was 18 million lb. of yarn and 13 million lb. of piece-goods. About 650 mills are working.

In 1945, there were 44,084 factories (excluding those with annual output of less than $120, U.S.), employing 944,318 workers and producing goods valued at 22,512·5 million cruzeiros. Brazil's potential capacity for electric power production is estimated at 14·5 million kw. (19·5 million horse-power) which is the fourth largest in the world. Only 1,816,000 kw. has yet been developed (1948). Of the total capital invested in industrial concerns ($1,779,786,350, U.S.), 49% was foreign-owned. Total value of national

production (farming, mineral and industrial) is between 40,000 and 45,000 million cruzeiros, of which industrial production represented 25,000 million. All branches of the petroleum industry, including production, importation and refining, were placed under federal control in April, 1938.

A big paper mill, reported to be the largest pulp and paper mill in South America, was established in 1946 at Monte Alegre, Paraná; it is sponsored by the governments of Canada, Brazil and the United States. Brazil's output of paper, 1949, was 200,000 metric tons.

Commerce.

Imports and exports (excluding specie) for 6 years in thousands of cruzeiros (cruzeiro = approximately 5·27 cents, U.S., and 1,000 cruzeiros = $52·70, U.S.):—

	1945	1946	1947	1948	1949	1950
Imports .	8,647,086	13,028,734	22,789,291	20,984,880	20,648,081	20,313,000
Exports .	12,197,510	18,229,532	21,179,413	21,696,874	20,153,084	24,913,000

Exports in 1948, 4,658,408 metric tons; in 1949, 3,744,053 metric tons. Imports, 1948, 6,799,421 metric tons; in 1949, 7,179,149 metric tons.

Principal imports in 1949 were (in millions of cruzeiros):—Machinery, valued at 1,714; motor fuel, diesel oil, etc., 1,751; iron and steel manufactures, 1,168; wheat and flour, 2,315; vehicles and parts, 1,349.

Principal exports in 1949 were (in cruzeiros):—Coffee, 11,610,700,000 (19,369,000 bags (of 60 kilos) or 1,162,000 metric tons); raw cotton, 2,006,900,000 (139,800 metric tons); cocoa, 964,000,000 (132,000 metric tons); sawn pinewood, 585,000,000 (387,643 metric tons).

Of exports (in millions of cruzeiros) in 1949 the United States took 10,117 (50·2%); Great Britain, 1,713 (8·5%); Netherlands, 1,550 (7·6%). Of 1949 imports the United States furnished 8,7[illegible] (42·1%); Great Britain, 2,663 (12·9%); Argentina, 2,174 (10·5%).

Brazil's customs duties are levied mainly on volume and not *ad valorem*.

Total trade between United Kingdom and Brazil (according to Board of Trade returns) for 5 years (in £ sterling):—

	1938	1947	1948	1949	1950
Imports from Brazil to U.K. .	7,661,315	23,725,519	23,736,956	23,031,340	40,701,100
Exports to Brazil from U.K. .	5,185,294	17,236,709	25,845,018	33,973,396	42,778,481
Re-exports to Brazil from U.K.	131,312	202,902	240,868	395,704	555,366

Shipping and Communications.

Inland waterways, mostly rivers, are open to navigation over some 21,944 miles and connect Brazil with the neighbouring states. All coasting and river vessels must be Brazilian. Rio de Janeiro and Santos are the 2 leading ports; there are 13 other large ports. Bolivia and Paraguay have been given free ports at Santos. During 1949, 9,749 vessels with tonnage of 22,402,000 entered the ports of Rio de Janeiro and Santos.

The largest company, the Lloyd Brasileiro, is owned and operated by the Government. Brazilian shipping, 30 June, 1948, amounted to 706,000 gross registered tons.

Railway history in Brazil begins in 1854. In 1948, the total length of railways was 35,622 km. In Dec., 1950, a line of 359 km. was opened to link

the railway systems of central, northern and southern Brazil. The Central Brazil Railway (2,082 miles) is the principal railway in Brazil, and is owned by the state; it joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay, and is being electrified. About half of the state-owned Sorocabana railway has also been electrified. Four [illegible] have a length of 3,165½ miles; 3 of the 4 were [illegible] by the Brazilian Government for £14,235,000. Brazilian railways to-day operate over tracks of 5 different gauges. A new railway line of 2,200 km. between Rio de Janeiro and Salvador (Bahia) was inaugurated on 7 Sept., 1950. The railways, in 1948, transported 308,631,000 passengers, 32,695,000 tons of freight, 1,238,000 tons of luggage and parcels and 4,245,000 animals. The total length of first-class highways in 1947 was 160,302 miles. Plans for a co-ordinated highway system, criss-crossing the country from north to south and from east to west, were adopted in 1944, embracing 27 highways with a total mileage of 24,000. In June, 1949, Brazil had 378,000 motor vehicles, including 183,000 passenger cars, 158,000 lorries, 11,000 omnibuses, 18,000 motor cycles and 8,000 tractors and farm vehicles.

Twenty-six companies, especially Pan-American World Airways, furnish air-mail and passenger services. Scheduled services, 1947, covered 2,095,000 km.; in 1947, passengers numbered 808,352, freight carried amounted to 12,111,000 kg.; baggage, 10,899,000 kg., and mail, 673,000 kg. Rio de Janeiro has 300 airline arrivals and departures weekly.

Of the telegraph system of the country, about half, including all inter-state lines, is under control of the Government. There are over 2,000 telegraph offices. Telephone instruments in use, 1949, were 484,300, of which 74% were automatic; only 1,500 instruments were under state ownership. In 1945 there were 111 [illegible] stations; receiving sets, 1945, numbered 629,794. There are 4,780 post offices.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from 1 Jan., 1914.

Money, Credit and Banking.

Brazil for many years had a dual currency, with a gold milreis (1,000 reals or reis) for foreign trade and a paper milreis for domestic trade. At one time the gold milreis was worth 27*d*., but fell to 15*d*. before the 1914–18 war, to 5·93*d*. in 1929 and to 2·78*d*. in 1938.

Beginning 1 Nov., 1942, the currency unit, the milreis, was renamed the cruzeiro (Cr.$), composed of 100 centavos. Metallic currency now consists of 1, 2 and 5 cruzeiros and 10, 20 and 50 centavos, all of copper–aluminium–zinc; notes are of the value of 5, 10, 20, 50, 100, 200, 500 and 1,000 cruzeiros, all resembling the former notes for similar amounts of milreis. Brazilian mint began printing the country's currency notes in 1949.

In 1946 Brazil informed the International Monetary Fund that its exchange rate would be 18·96 cruzeiros to the $, making the cruzeiro equal to 5·27 cents. In July, 1948, Brazil amended this to 18·50 to the $, or 5·40541 cents, U.S., per cruzeiro. One cruzeiro = 0·0480363 gramme of fine gold; 1 troy oz. of fine gold = 647·50 cruzeiro. Milreis notes are being recalled, under penalties effective after 1 June, 1949.

On the devaluation of sterling the new rates became 51·460 cruzeiros (buying) and 52·4160 (selling) for £1.

The Bank of Brazil (founded in 1808 and reorganized in 1906, with an authorized capital of 100 million cruzeiros) is not a central bank of issue but

a closely controlled commercial bank; it had (1949) 277 branches throughout the republic (and branches in Asuncion and Montevideo). On 31 Dec., 1949, deposits were 25,390 million cruzeiros; loans to agriculture, industry and commerce were a record at 12,918 million. The country's note circulation, 31 Dec., 1950, was 31,202·5 million cruzeiros, compared with 4,971 million at the end of 1939. The Bank of Brazil had gold and foreign exchange of 12,600 million on 30 Sept., 1950. The country's gold stock has fluctuated severely, falling from 7¼ million fine oz. in 1929 to ½ million in 1930; since Sept., 1939, it has risen from $40 million (U.S.) to $363 million in Jan., 1946; since Aug., 1948, it has remained at $317 million through 1950.

In 1946 all foreign banks came under new special l[illegible] their Brazilian assets are held solely to secure losses or [illegible] in Brazil and not abroad.

Banking institutions, including 332 co-operatives, numbered 3,275 in Dec., 1949. The 78 principal banks (excluding the Bank of Brazil) had on 30 June, 1950, capital and reserves of 5,736 million cruzeiros, deposits of 45,385 million (compared with the Bank of Brazil's 33,487 million) and loans of 38,335 million.

Weights and Measures.

The metric system has been in use in all official departments since 1862. It was made compulsory in 1872, but the ancient measures are still partly employed in certain rural districts of the interior. They are: *libra* = 1·012 lb. avoirdupois; *arroba* = 32·38 lb.; *quintal* = 129·54 lb.; *alqueire* (of Rio) = 1 imperial bushel, or 40 litres; *oitava* = 55·34 grains.

Diplomatic and Consular Representatives.

1. Of Brazil in Great Britain (54 Mount Street, W.1).

Ambassador Extraordinary and Plenipotentiary.—Dr. José Joaquim de Lima e Silva Moniz de Aragão, C.B.E. (appointed 14 Oct., 1939).

Minister-Counsellor.—[illegible] Chermont.

First Secretary.—Fra[illegible] Moscoso.

Commercial Counsellor.—Egydio da Camara Souza.

Naval Attaché.—Capt. Diogo Borges Fortes.

Military Attaché.—Lieut.-Col. Jardel Fabricio.

Air Attaché.—Air-Brigadier Henrique Fleiuss.

Commercial Attaché.—C. J. C. Vieira.

There are consular representatives at Liverpool, London, Southampton, Cardiff, Glasgow and Newcastle.

2. Of Great Britain in Brazil.

Ambassador Extraordinary and Minister Plenipotentiary.—Sir Neville Butler, K.C.M.G., C.V.O. (June, 1947).

Counsellor.—M. S. Williams.

First Secretaries.—K. C. Christofas, M.B.E.; W. A. T. Sowden, M.B.E. (*Commercial*); G. M. F. Stow (*Information*); B. B. Edge; L. Mitchell (*Labour*).

Minister (*Commercial*).—W. Godfrey.

Naval Attaché.—Capt. R. C. M. Duckworth, C.B.E., R.N.

[illegible] *Air Attaché.*—Air Commodore M. D. Crichton-Biggie, D.F.C.

[illegible] *Attaché.*—G. S. Hill.

Consul-General (Rio de Janeiro).—C. C. A. Lee.
Consul-General (São Paulo).—N. Mayers.

There are consular representatives at Bahia, Pará, Pernambuco, Rio Grande do Sul, São Paulo, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manáos, Nova Lima and other towns.

BULGARIA.

(Narodna Republika Bulgaria.)

Constitution and Government.

The Bulgarian People's Republic was proclaimed by the National Assembly on 15 September, 1946.

The Principality of Bulgaria and the Autonomous Province of Eastern Rumelia, both under Turkish suzerainty, were constituted by the Treaty of

Berlin, 13 July, 1878. On 22 Sept. (3 Oct.), 1908, Bulgaria declared her independence of Turkey and Prince Ferdinand of Saxe-Coburg-Kohâry, who had been elected prince on 7 July, 1887, assumed the title of Tsar of the Bulgarians. This was recognized by the Porte and the Powers in April, 1909. Tsar Ferdinand abdicated on 3 Oct., 1918, and was succeeded by his son, Tsar Boris III, who died on 28 Aug., 1943. His son, Simeon II (born on 16 June, 1937), lost his throne as a result of the referendum held on 8 Sept., 1946. 3,801,160 votes were cast in favour of a republic, 197,176 votes in favour of the monarchy; 119,168 voting papers were invalid.

The constitution of 4 Dec., 1947, provides for a single-chamber National Assembly of 465 members. The highest organ of the state is a collective body called the Presidium which consists of a chairman, 2 deputy-chairmen, a secretary and 15 members. It is elected by the National Assembly by absolute majority. Supreme power is vested in the National Assembly which consists of deputies elected by direct, secret and universal suffrage (everybody over the age of 18 being eligible to vote and hold office). One deputy is elected per 30,000 of the electorate. The Legislature's term of office is 4 years. The National Assembly also elects the ministers and the Presidium which are responsible to it.

A general election was held on 27 Oct., 1946. The Fatherland Front, composed of the Workers (Communist), A[illegible] Zveno Parties, and non-party independents, obtained [illegible] went to the Communists) and the opposition 101. On 26 Aug., 1947, the oppositional Agrarian Union was dissolved; its leader, Nicola Petkov, was sentenced to death as a 'foreign agent' and hanged, on 23 Sept. The Socialist Party was merged with the Workers' Party in Aug., 1948, and the Zveno Party dissolved itself.

Elections for the National Assembly and for the Provincial People's Councils were held on 18 Dec., 1949, and resulted in a 97·66% vote in favour of the Fatherland Front.

President of the Praesidium.—Lt.-Gen. Georgi Damianov (elected 27 May, 1950).

President of the Council of Ministers.—Vulko Chervenkov (1 Feb., 1950); elected Secretary-General of the Communist Party on 8 Nov., 1950.

Minister of Foreign Affairs.—Mincho Neichev (27 May, 1950).

Minister of National Defence.—Gen. Peter Panchevski (27 May, 1950).

Bulgaria, on 1 March, 1941, signed the Three Power Pact, and on 25 Nov., 1941, the Anti-Comintern Pact. On 26 Aug., 1944, Bulgaria asked Great Britain and the United States for an armistice. The U.S.S.R. formally declared war on Bulgaria on 5 Sept., 1944. The new Bulgarian Government of the Fatherland Front, which was established on 9 Sept., immediately asked the Soviet Government for an armistice, which was signed on 28 Oct., 1944, by representatives of the Soviet Union, Great Britain and the United States. Bulgarian troops joined the Red Army in the final stages of the war.

The peace treaty was signed in Paris on 10 Feb., 1947.

On 2 April, 1949, the British government protested in a note to the Bulgarian government against repeated violations of certain provisions of the peace treaty, by which the Bulgarian government had pledged itself to secure to all persons under its jurisdiction the enjoyment of human rights and of the fundamental freedoms, including freedom of expression, of the press and publication, of political opinion and of public meeting, and to refrain from legal discrimination between its nationals on the ground of race,

language or religion. The protest was renewed on 19 Sept., 1949. At the request of the United Nations, the International Court of Justice delivered an advisory opinion (30 March and 18 July, 1950) to the effect that Bulgaria should comply with the provisions for arbitration in the peace treaty.

In March, 1948, a 20-year treaty of friendship, co-operation and mutual assistance with the Soviet Union was signed in Moscow. The treaty with Yugoslavia, signed on 27 Nov., 1947, was [illegible] 3 Oct., 1949.

By a decree of 22 Sept., 1949, Bulgaria was divided into 14 provinces, with the city of Sofia as a separate administrative unit directly subordinate to the central authorities. Local government has been reconstituted by the Municipal Councils Law of 27 Feb., 1948. District and Municipal Councils represent delegated State authority; they are elected directly by the people.

National flag: white, red, green (horizontal); with the coat of arms of the Republic in the canton.

National anthem: Bulgario mecla, zemya na geroi (Dear Bulgaria, land of heroes); by Nikolov Furnadjiev, Mladen Isaov and Elizabeta Bagriana, 1950.

Area and Population.

On 8 September, 1940, by the treaty of Craiova between Rumania and Bulgaria, the former ceded to the latter the Southern Dobruja, fixing the new frontier on the 1912 line. This runs north of Silistria on the Danube to a point on the Black Sea just south of Mangalia, giving the Bulgarians the two provinces of Durostor and Caliacra. The total area of Bulgaria was thereby increased to 110,842 square kilometres or 42,796 square miles.

In April, 1941, Bulgaria occupied the Yugoslav [illegible] of Macedonia, and the Greek districts of Western Thrace, [illegible], Florina and Castoria. The peace treaty of 1947 restored the frontiers as on 1 Jan., 1941.

Population of districts, according to census of 31 Dec., 1946:—

Districts	Area in square miles	Population
Burgas	5,258	629,593
Gorna Djumaya (renamed Blagoevgrad)	—[1]	252,258
Plovdiv	6,115	876,993
Pleven	5,960	1,056,436
Russe	—[1]	527,708
Sofia	6,502	1,205,484
Stara Zagora	6,002	821,761
Varna (renamed Stalin)	—[1]	880,484
Vratza	4,298	771,486
Total	12,796	7,022,206

[1] Figures not yet released by the Bulgarian Foreign Office.

Of the total population in 1946, 3,506,273 were males and 3,515,933 females. The average density was 164 per sq. mile. Estimated population, 1 July, 1947, was 7,048,000.

National minorities were, in 1950, estimated to total 1,100,000, including Macedonians, Turks, Gypsies, Jews, Armenians and Rumanians.

The capital is the city of Sofia, with a population (estimate, 1947) of 434,888. Other principal towns, with population in 1947 (estimate) are Plovdiv, 125,440; Stalin, 77,792; Russe, 53,420; Burgas, 43,684; Pleven, 38,997; Stara Zagora, 37,057; Sliven, 35,553; [illegible] (formerly Shumen), 31,169; Yambol, 30,311; Pazardjik 30,430, [illegible], 18,580.

The movement of population in 6 years has been :—

Years	Marriages	Live births	Deaths
1942	66,850	141,249	82,501
1943	64,487	138,009	82,602
1944	58,677	139,907	88,577
1945	82,800	167,000	103,600
1946	76,900	179,226	95,799
1947	77,000	169,501	94,395

Infantile mortality rate was 153·9 per 1,000 live births in 1935 and 129·5 in 1947. The natural increase of population dropped from 1·19% in 1946 to 1·06% in 1947. Crude birth rate, 1947, was 24·0 per 1,000 population; crude death rate, 13·4.

Religion and Education.

The national faith is that of the Eastern Orthodox Church. The 'Law of the Churches' of 24 Feb., 1949, has disestablished the National Church though it is officially described as 'the traditional church of the Bulgarian people' and 'in form, substance and spirit a People's Democratic Church.' Freedom of conscience and belief is 'guaranteed'; the use of religion and religious institutions for propaganda against the government is punishable. Full information regarding organization and finance must be filed with the Ministry of Foreign Affairs. In case of need the state will furnish financial assistance. Only 'honest citizens of good reputation' may be appointed ministers, priests and other officials.

Churches may not maintain schools or colleges, except theological seminaries, or organize youth movements. Their hospitals and relief institutions have been taken over by the state. Relations with churches and missions abroad are subject to the supervision of the Ministry of Foreign Affairs.

In 1934 (latest census), the National Orthodox Church had 5,128,890 members. An official estimate (1949) puts the Moslems at 683,000; Bulgaro-Moslems (Pomaks), 123,000; Roman Catholics, 56,000; Armeno-Greeks, 23,000; Jews, 20,000; Protestants, 15,744.

In March, 1949, 15 Protestant church leaders were sentenced to imprisonment and fines for alleged acts of treason and espionage.

Elementary education is obligatory and free for children between the ages of 7 and 15. The census of 1934 showed that 19·5% of the male population over 10 years of age and 43·3% of the female population were illiterate.

The following are the educational statistics of Bulgaria for 1947–48 :— 729 kindergarten, with 863 teachers and 28,736 pupils; 9,238 public elementary schools with 28,957 teachers and 889,854 pupils; 258 secondary schools with 5,229 teachers and 152,661 pupils; 207 vocational training schools with 1,051 teachers and 32,968 pupils. For higher education there were, in Sept., 1950, 10 institutions with 20 faculties and 36,637 students.

Of the national minorities, in 1949–50, the Turks had 1,175 primary schools with 2,965 teachers and 98,609 pupils, 1 secondary school with 21 teachers and 618 pupils, and a teachers' training college with 284 students; the Armenians had 16 schools with 50 teachers and 1,092 pupils.

The educational system was reorganized on Soviet lines in Sept., 1950. The number of children attending 9,500 schools (excluding universities and kindergartens) was 1,200,000 in 1950.

There were 291 cinemas in 1949, with a seating capacity of 96,000.

Social Welfare.

In February, 1941, the Legislature passed laws instituting as from 1 January, 1942, old age pensions for the peasantry as well as for manual workers. Peasants, on reaching the age of 60, are granted a monthly pension of 300 leva; in order to qualify for this, every peasant must contribute 60 leva per annum; such pensioners numbered 582,000 in 1948. In 1947, 5,409 million leva was spent on agricultural pensions.

In 1949, social insurance covered 3,100,000 people of whom 2,500,000 were peasants. There were in 1949, 412 maternity hospitals and 618 health centres.

Justice.

The constitution of 1947 provides for the election (and recall at pleasure) of the judges by the people and, for the Supreme Court, by the National Assembly. The lower courts include laymen (called 'assessors') as well as jurists. Certain courts of appeal have been abolished.

Finance.

The revenue and expenditure of Bulgaria for 6 years were as follows (in millions of leva):—

	1946	1947	1948 [1]	1949	1950	1951 [1]
Revenue . .	77,007·9	68,531	95,500	165,680	211,866	271,794
Expenditure	80,883·6	67,441	95,500	165,680	211,866	267,922

[1] Estimates.

The 1949 budget was the first unified budget in Bulgarian history, *i.e.*, it included the budgets of the 2,143 municipal councils, 7 city councils and 95 county councils.

Principal items of expenditure, 1950 (in million leva):—Defence, 12,932; national economy, 71,010; social and cultural affairs, 61,156; administration, 26,729; loans, pensions, etc., 16,323; reserve fund, 14,214. Principal sources of revenue (1948):—Turnover tax, 27,500; income tax, 7,200; sale of goods under state control, 3,700; investment income, 3,360; state enterprises, 3,018.

On 31 March, 1947, the total debt of Bulgaria was given as follows:—Foreign debt, 44,385,108,595 leva; internal debt, consolidated, 44,669,645,905 leva; non-consolidated, 25,226,538,401; total, 68,896,184,306 leva. Estimated expenditure for the state debt in 1949 was 10,327 million leva.

On 15 Dec., 1948, the government agreed with its foreign bondholders in Britain, France, Belgium, Netherlands and Switzerland to start paying off the arrears of interest on its external debt. Arrears of interest up to 15 May, 1940, were to have been paid off on 1 Jan., 1949, but this was not done.

Defence.

The pre-war strength of the Bulgarian Army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

The peace treaty has restricted the maintenance of land, sea and air armaments and fortifications to meeting tasks of an internal character and local defence of frontiers. Bulgaria is authorized to have armed forces consisting of not more than a [illegible] with a total strength of 55,000 personnel. [illegible] of 1,800 personnel;

a navy with a personnel strength of 3,500 and a total tonnage of 7,250; an air force, including any naval air arm, of 90 aircraft, including reserves, of which not more than 70 may be combat types of aircraft, with a total personnel strength of 5,200. Bulgaria must not possess or acquire aircraft designed primarily as bombers with internal bomb-carrying facilities. These strengths in each case include combat, service and overhead personnel.

The strength of the Bulgarian Army at the end of 1950 was 200,000 men with about 700 guns and 600 tanks.

Production and Industry.

According to the census of 1934, 80% of the active population (2,744,927) were engaged in agriculture, most of them being small proprietors holding from 1 to 6 acres. Since 1945 land ownership has been limited to 20 hectares (49·4 acres). About 165,000 hectares have been taken away from monasteries and private owners and divided among landless peasants and co-operative farms. In 1946, 22·7% of the farms had no draught animals and 18·7% not even a [illegible]. There were, in Nov., 1950, 2,562 co-operative farms with an area of [illegible] decares, 91 state farms with 85,000 hectares and, 2,792 public animal-breeding farms. In Sept., 1950, there were 95 tractor stations with 6,139 tractors.

The total area of Bulgaria is 10,314,620 hectares, or 25,488,343 acres; of this the cultivated area is (1950) 4,880,000 hectares, or 12,058,480 acres.

A Ministry of Forests was set up in Dec., 1948. The forest area (1947) is 3,076,000 hectares, of which 2,976,000 hectares are economically useful.

The area (in acres) and yield (in metric tons) were as follows :—

Crops	1935–1939		1946	1947 [1]		1948 [1]
	Area	Yield	Yield	Area	Yield	Yield
Wheat .	3,080,000	1,735,280	1,840,878	3,690,000	1,306,359	3,232,601
Rye .	465,000	205,751	183,978	745,000	195,950	—
Barley .	535,000	329,311	283,044	725,000	261,272	689,022
Oats .	315,000	115,395	148,779	410,000	101,605	172,583
Maize.	1,685,000	845,867	484,441	1,880,000	653,179	1,129,871

[1] Preliminary.

Fruit grows in abundance, especially in the neighbourhood of Kustendil and Plovdiv. The area under vines was 283,651 acres in 1938. Cotton in 1946 yielded 13,500 metric tons of yarn. Production of sugar beet, 1948, 468,000 short tons; 1949, 400,000 short tons. The rose oil industry, now a government monopoly, produced 794 kilograms in 1946 from an area of 2,810 hectares (1939, 3,779 [illegible] from 6,338 hectares). Tobacco yield in 1948, 29,294 metric tons [illegible] 49,799 metric tons. In 1938, the production of silk-worm cocoons was 2,178,767 kilos.

In 1948 there were in Bulgaria 119,257 horses, 1,918,421 cattle, 8,994,853 sheep and goats, 956,607 pigs and 10,329,409 poultry.

Industry is not much developed, though the state encourages industrial enterprise. On 1 January, 1939, there were 3,381 undertakings in operation. Mining development has been slow. The country is rich in coal but mostly situated in mountain districts difficult to exploit. All mines have been nationalized. Total coal production in 1949 (estimate), 4,722,329 tons; 1948 (estimate), 3,870,760 tons. There are bauxite deposits. Salt output was 76,500 metric tons in 1938.

On 23 Dec., 1947, the whole of the country's industry was brought under national ownership and control, only foreign-owned enterprises and those

belonging to co-operatives being excluded. All property belonging to [illegible] was transferred to the state, together with any assets in the owner's private accounts, or in those of his relatives, unless these assets originated from private as distinct from business earnings. The state was made answerable for liabilities up to the total of the firm's assets, but not for liabilities incurred in 'illegal or profiteering trade.' Compensation is to be paid in interest-bearing state bonds, the rate of compensation diminishing as the value of the assets taken over rises.

In March, 1948, the entire production and distribution of electrical energy was put under the Ministry of Electrification. Output, in 1949, was 568 million kwh. (1948, 551 million).

Commerce.

Foreign trade is controlled by a separate Ministry of Foreign Trade.

Imports and exports (in millions of leva; 1 million leva = $3,470, U.S.):—

	1943	1944	1945	1946	1947	1948
Imports	15,131	6,478	5,820	17,514	21,416	35,119
Exports	16,271	11,357	12,397	14,942	24,533	34,114

In millions of dollars, U.S., Bulgarian trade has developed as follows:—

	1939	1942	1943	1944	1945	1946	1947	1948
Imports	61·8	162·9	190 6	81·6	73·3	60 8	74·1	124
Exports	72·2	169·3	205·0	143·1	156·2	52·4	86 1	91

Percentage of trade by principal countries for 3 years:—

	Imports			Exports		
	1946	1947	1948	1946	1947	1948

Shipping and Communications.

Mercantile marine, in 1949, comprised 2 vessels of 3,418 tons, one of 3,100 tons and one bought from Belgium (ex-S.S. *Skaldis*).

The number of vessels entered at all the Black Sea ports of Bulgaria in 1939 was 9,311 of 1,776,576 tons; number of vessels cleared, 9,291 of 1,770,484 tons. At all the Danube ports there entered, in 1939, 15,175 vessels of 2,429,642 tons, and cleared, 15,169 vessels of 2,435,013 tons.

The first iron-built, ocean-going vessel (*Blagoi Kassabov*, unspecified tonnage) built in Bulgaria was launched on 10 May, 1950 at Stalin.

In 1939, there were 19,638 miles of roads.

In 1939, Bulgaria had 1,941 miles of railway of ordinary gauge and 270 miles of narrow gauge; total, 2,211 miles. Number of passengers in 1942, 17,779,300; goods carried (1940), 6,567,000 metric tons. All the lines belong to the state. Railways connect Sofia with the general European system. In 1939, there were 49 miles of electric tramways.

There were, in 1939, 806 post offices. Length of [illegible] line belonging to the railways), 372 miles; number [illegible] were 772 telephone stations; length of line, 13,208 miles. Number of telephones in 1948, 54,347.

Money and Credit.

The National Bank of Bulgaria, with headquarters at Sofia and 131 branches, has a capital of 500 million leva provided by the state. It has the sole right of note issue. On 31 Dec., 1946, it had in hand 2,565 million leva in gold against a note circulation of 41,990 million leva. According to the International Monetary Fund, the National Bank's holding of foreign exchange (exclusive of any undisclosed holdings of gold) was equal to $84·9 million (U.S.) on 30 Nov., 1947, the last date for which information was available.

The Act of 27 Dec., 1947, nationalizing all banks, public and private, gave the National Bank complete autonomy, freeing it from any responsibility for state debts. Its capital is unlimited and its deposits consist, primarily, of the surpluses of the state and local authorities and the nationalized enterprises. Its chief task is to safeguard the purchasing power of the currency and the foreign exchange value of the *lev*. The only other important bank is the Bulgarian Investment Bank (formerly the Mortgage Bank of Bulgaria) whose capital includes the capital and reserves of the Mortgage Bank plus the investment funds of all those banks which have been nationalized. Its speciality is long-term financing for the national Plan. Several hundred small town banks, renamed People's Banks and by 1950 reduced to 100, and Credit Co-operatives were, by decree of 9 March, 1951, transformed into branches of the National Bank to which their capital has been transferred.

Deposits in the post office savings banks at 31 Dec., 1947, amounted to

17,996,000,000 leva. A Central Savings Institute was set up on 9 March, 1951, to co-ordinate the post office savings banks and other savings funds.

In March, 1947, the total monetary circulation was halved from 70,000 million to 35,000 million leva.

Coins in circulation :—Silver pieces of 100, 50 and 20 leva; copper-nickel pieces of 10, 5, 2 and 1 leva; the notes of the National Bank circulate at par. The *lev* is officially valued at 92 leva to 1 gramme of fine gold, or 673,659 leva = £1 (gold).

Since 27 Sept., 1949, the official rate of exchange in Sofia has been 797 leva = £1, and 290 leva = $1 U.S.

The metric system is in general use. On 1 April, 1916, the Gregorian calendar came into force in Bulgaria.

Diplomatic Representatives.

1. Of Bulgaria in Great Britain (12 Queen's Gate Gardens, S.W.7).

Minister.—Naiden K. Nikolov (accredited 9 June, 1950).

First Secretary.—Lubomir Popov.

Attaché.—Ivan G. Moutaftchiev.

2. Of Great Britain in Bulgaria.

Envoy Extraordinary and Minister Plenipotentiary.—John E. M. Carvell, C.B.E.

Secretaries.—J. V. Rob; N. E. Cox.

Naval Attaché (resident in Warsaw).—Capt. R. G. Mills, D.S.O., D.S.C., R.N.

Military Attaché.—Col. E. S. Batchelor, M.C.

Air Attaché (resident in Bucharest).—Group-Capt. R. E. G. Brittain.

There is a consular representative at Sofia.

BURMA.

(PYEE-DAUNG-SU MYANMA-NAINGGAN.)

THE Union of Burma came formally into existence on 4 Jan., 1948. On this day, Sir Hubert Rance, the last British Governor, handed over authority to Sao Shwe Thaik, the first President of the Burmese Republic; the Cabinet took the oath of office, and Parliament ratified the treaty with Great Brita[illegible]ic independence of Burma as a country not within His [illegible]'s dominions and not entitled to His Britannic Majesty's protection. This treaty was signed in London on 17 Oct., 1947, and enacted by the British Parliament on 10 Dec., 1947.

For the history of Burma's connexion with Great Britain *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 836; for a map of Burma, *see* THE STATESMAN'S YEAR-BOOK, 1936.

Burma was admitted to the United Nations on 19 April, 1948.

Constitution.—The Constituent Assembly, elected on 9 April, 1947, consisted of 173 members of the Anti-Fascist People's Freedom League, 7 Communists, 2 Independents, 4 Anglo-Burmans, 24 Karens and 45 representatives of frontier areas.

The Constitution of the Burma Union was passed unanimously on 24 September, 1947. It consists of 14 chapters (234 clauses), which contain the following provisions:—

Territory.—The Union consists of (i) the territories formerly governed by His Britannic Majesty through the Governor of Burma, and (ii) the Karenni States. The former Federated Shan States and the Wa States are combined in what is to be known as 'the Shan State'; the Myitkyina and Bhamo Districts are to be known as 'the Kachin State'; and the former Karenni States, *i.e.*, Kantarawaddy, Bawlake and Kyebogyi, as 'the Karenni State.'

Fundamental Rights.—There is only one citizenship of the Union. The special position of Buddhism is recognized 'as the faith professed by the great majority of the citizens.' Private property and private enterprise are guaranteed, but private monopolist organizations are forbidden. Nationalization of branches of national economy or single enterprises, with compensation of the owners, is provided for.

State Policy.—There is a general tendency towards large-scale planning, support of co-operative organizations and collective farming.

Presidency.—The President of the Union is to be elected by both Chambers of Parliament in joint session, for a 5-year term; re-election is permitted only once. He summons, prorogues and dissolves the Chamber of Deputies on the advice of the Prime Minister. He has no right of vetoing bills. In the event of his death, incapacity, etc., the presidential powers are exercised by a Commission, consisting of the Chief Justice and the Speakers of the two Chambers.

Parliament.—The Union Parliament consists of the President, the Chamber of Deputies and the Chamber of Nationalities. The latter comprises 125 members, 53 of whom represent the central unit, 72 the states and special areas. The Chamber of Deputies has about twice as many members Both are elected for 4 years.

States.—Chapter IX regulates the position of the Shan, Kachin, Karen and Karenni States and the Special Division of the Chins. Each of them is represented in the Union government by a minister to be chosen from its

own members of parliament, and enjoys a large measure of administrative autonomy.

Flag.—The national flag is red, with a canton of dark blue; in the canton, a five-pointed large white star with five smaller stars between the points.

Language.—The official language is Burmese; the use of English is permitted. The Constitution is enacted in Burmese and in English.

President of the Republic.—Sao Shwe Thaik (elected 4 Jan., 1948).

The Cabinet was, in March, 1951, composed as follows :—

Prime Minister and Minister for National Planning.—Thakin Nu.
Minister for Foreign Affairs and Shan States.—Sao Hkun Hkio.
Minister of Defence and Home Affairs and Religious Affairs.—U Win.
Minister for Judicial Affairs.—U Khin Maung Latt.
Minister of Agriculture and Forests.—Bo Khin Maung Gale.
Minister for Industry and Commerce and Supply.—U Kyaw Myint.
Minister of Information.—U Tun Pe.
Minister of Finance and Revenue.—U Tin (New Light).
Minister for Public Works and Rehabilitation.—Bo Min G[illegible].
Minister for Public Health and Local Government.—U [illegible].
Minister of Education, Relief and Resettlement.—A. Rivers.
Minister of Transport and Communications and Labour.—Mahn Win Maung.
Minister for Chin Affairs.—U Van Thu Maung.
Minister for the Kachin State.—Sima Duwa Sinwa Naung.
Minister for Karenni State.—Sao Wunna.
Minister for Karen Affairs.—Mahn Ba Saing.
Minister for Minorities.—U Ba Saw.
Minister of Co-operatives.—U Kyaw Nyein.

Area, Population and Religion.—The total area of the Union is 261,610 square miles (census, 1931). The total population (census, 1941) was 16,823,798 according to the only Census Statement which has survived the war. No classification by races is available for the 1941 census. The leading towns are (1941) Rangoon, the capital (500,800), Mandalay (163,243) and Moulmein (71,181). The proportion of religions per 1,000 in 1931 was :— Buddhists, 843; Animists, 52; Mohammedans, 10; Hindus, 39; Christians, 23, and others, 3. The Burmans belong to the Tibeto-Chinese (or Tibeto-Burman) family.

Estimated population in 1947, 17 million. The urban birth rate, 1947, was 33·49 per 1,000 (37·17 in 1948); the highest recorded was 50·95 in Kawkareik (58·97 in Maymyo in 1948). The urban death rate, 1947, was 32·84 per 1,000 (31·94 in 1948); the highest recorded was 75·0 (60·8 in 1948) in Moulmeingyun.

Education.—Schools were classified before World War II as English schools, Anglo-Vernacular schools and Vernacular schools, according to the main language and medium of instruction adopted in each class of schools. The schools were further classified as government schools and aided schools. All schools were graded into primary schools up to standard IV, middle schools up to standard VII and high schools up to standard X.

After the war a provisional system was introduced in 1945 in which the schools were unified into a single class and graded as primary teaching up to standard V, post-primary teaching from standard VI to IX and pre-university teaching standards X and XI.

After the attainment of independence the Government has adopted a centralized system of control of schools and confirmed the unified, homogeneous system of schools but has decided to revert to the pre-war parallel system of grading schools in primary, middle and high schools with the difference that the provision of standard X as a separate class in schools has been dropped from 1 June, 1950, the pre-university schools having been closed down at the end of the school-year 1946–47. The highest class in the tenth year is now called the High School Final *cum* Matriculation Class, and pupils in it prepare both for the High School Examination conducted by the Department of Education and the Matriculation Examination conducted by Rangoon University. The medium of instruction in the secondary state is being progressively changed to Burmese; English is taught as compulsory second language.

Primary education for children (6 to 11 years) is provided free in state primary schools but private primary schools charging tuition fees are also run by private bodies in a few urban areas. Buddhist monasteries exist in almost every village and provide facilities for learning the three Rs for those who are too poor to attend other primary schools. There were 4,795 state and private primary schools with 11,315 teachers attended by 431,684 pupils in the year ended 31 March, 1948.

Education in the secondary stage is not free although a large number of free places and stipends are provided. There were 142 post-primary schools (many of which are state) with 722 teachers attended by 11,648 pupils (generally 12 to 16) in 1947–48.

A state training college for teachers, opened on the 1 Sept., 1947, was attended by over 200 trainees during the year 1947–48.

Before the World War II, the University of R[illegible] was of 'federal' type with University College, Judson Colle[illegible], M[illegible] College and Teachers' Training College as constituent colleges. There were also an Intermediate College and Agricultural College at Mandalay. After the war the University became 'unitary.' All the constituent colleges were abolished and instead the following faculties were instituted :—Art, science, engineering, law, education, agriculture, medicine and (1950) forestry. The Intermediate College, Mandalay, has been raised to a degree status; University College, Mandalay, will eventually become the University of Mandalay. In 1950 there were 3,350 students, of whom 780 were women.

There were, in 1949, 75 cinemas with a seating capacity of 85,000.

Justice and Crime.—In 1946, the High Court of J[illegible] (constituted in 1922) had control of the administrat[illegible] justice. That court was presided over by a Chief Justice and 9 other judges. In 1946, 79,013 criminal cases were brought to trial and 8,988 civil suits were instituted. In addition to 16 Sessions Judges who were also *ex-officio* Special Judges, there were 115 Special Judges and 564 Stipendiary M[illegible].

In 1948, the High Court of Judicature was superseded by the present High Court under the Union Judiciary Act, 1948. This court is presided over by the Chief Justice and 7 other judges. A court of higher jurisdiction, the Supreme Court, has been created, presided over by the Chief Justice of the Union and 2 other judges. This court is a Court of Record disposing of all criminal miscellaneous applications under the Public Order Preservation Act, 1948, and the Public Property Protection Act, 1948, and hearing appeals from the High Court in certain cases.

The prison population on 31 Dec., 1948, numbered 18,321 and on 30 Sept., 1949, numbered 11,575.

Finance.—The budget (in thousand rupees) was as follows :—

	Year	Revenue	Expenditure
Accounts	1939–40	17,97,62	16,51,17
,, ...	1940–41	18,85,91	18,72,01
,, ...	1941–42	22,31,07	21,94,29
,, ...	1942–45	(under Japanese occupation)	
,, ...	1945–46	10,56,51	16,37,29
,, ...	1946–47	31,08,72	42,39,77
,, ...	1947–48	68,26,94	49,78,39
Estimates revised . . .	1948–49	51,52,83	58,96,80
,, ,, . . .	1949–50	51,70,15	53,60,52
Estimates . ,, . . .	1950–51	58,36,66	59,27,14

The external debt [illegible] on 30 Sept., 1950, is estimated at Rs. 8,715 89 lakhs, including Rs. 3,715 00 lakhs of non-interest bearing loans from the United Kingdom. This figure is arrived at after deducting Rs. 2,000 lakhs of debt cancelled under the Anglo-Burman treaty of 17 Oct., 1947.

The Economic Co-operation Administration, in Feb., 1951, granted $1·6 million to the Burmese government for rebuilding the port of Rangoon and other rehabilitation projects.

Defence.—The Burmese naval forces include 1 frigate (the *Mayu*), 2 motor minesweepers, a boom defence vessel, 4 landing craft, 8 motor launches, 11 motor gunboats, 4 river gunboats and 6 M.F.Vs. Altogether 37 naval vessels have been presented to Burma by the Government of the United Kingdom.

Production and Industry.—The area of reserved forests at the end of 1945–46 was 20,057,251 acres. The irrigated area was 1,115,448 acres. On 1 June, 1948, the government took over the teak concessions formerly held by European and indigenous lessees in the Insein, Prome, Allanmyo, Meiktila, Yamethin, Pyinmana, North and South Toungoo, and North and South Pegu forest divisions.

Principal crops, 1945–46 :—Rice, 6,274,307 acres producing 2,629,665 tons; sesamum, 802,852 acres, 32,059 tons; groundnuts, 375,427 acres, 76,385 tons; cotton, 176,996 acres, 3,659 tons; maize, 89,716 acres, 12,454 tons. Rice production in 1947–48 was estimated at 5,429,000 metric tons of paddy, from 3,624,000 hectares (average 1934–38, 6,791,000 metric tons from 4,931,000 hectares); in 1948–49, 5,800,000 metric tons.

Livestock (30 June, 1948):—Cattle, 5,207,000; buffaloes, 721,000; horses, 12,000; sheep, 21,000; goats, 172,000; pigs, 394,000.

Output of petroleum was 7,762,000 barrels in 1941 and 810,000 barrels in 1947. Production of natural rubber was 12,000 tons in 1941, and 10,000 tons in 1948; estimate, 1949, 9,000 metric tons. Minerals produced in 1948 (preliminary figures) were :—Gold, 42·4 oz.; antimony, 169·4 tons; building materials and road metals, 33,409·7 tons; clay for pottery, 1,097 tons; mixed tin and wolfram concentrates, 958·3 tons; petroleum, 10,343 gallons; tin concentrates, 1,035·5 tons; wolfram concentrates, 78·07 tons; silver, 415,099·1 oz.; copper matte, 114 7 tons; lead ore, 11,576 tons; zinc concentrates, 2,943·4 tons; lead slag, 5,646·5 tons.

The total number of factories of all kinds was 1,019 in 1938, and the total number of persons employed in factories was 86,383.

By the end of July, 1948, 2,437 agricultural credit and marketing societies were registered; 6,663 co-operative societies, 188 fishery societies

and 91 weavers' societies. The number of trade unions registered at the end of March, 1948, was 63, with a membership of 40,998.

Commerce.—Imports and exports (in million rupees) for the fiscal years 1 Oct.–30 Sept. :—

	Feb.–Sept., 1946	1946–47	1947–48	1948–49
Imports	193·8	472·6	505·8	373·3
Exports	66·8	478·6	757·3	733·3
Re-exports	2·1	14·1	12·9	5·9

Rice (milled) exports averaged 3,070,000 metric tons in 1934–38, and was 1,193,837 long tons in 1948–49. Rubber exports, 1948–49, 5,652 long tons.

Trade between Burma and the United Kingdom (Board of Trade returns) in £ sterling :—

	1938	1947	1948	1949	1950
Imports into U.K. .	5,974,760	3,609,042	6,093,809	3,240,201	2,560,652
Exports from U.K. .	2,648,901	20,460,089	14,030,515	7,101,223	8,969,714
Re-exports from U.K.	27,609	23,686	26,626	8,600	49,488

Communications.—*Railways.*—The Burma Railway system is entirely of metre gauge (3 ft. 3⅜ in.) and its main lines run from Rangoon to Prome (161 miles) to the north-west and Rangoon to Mandalay (386 miles) towards the north, extending to Myitkyina further north (723 miles from Rangoon). Branch lines extend from Letpadan to Tharrawaw (24 miles) on the west, the delta lines from Henzada to Bassein (82 miles) and Henzada to Kyangin (65 miles). In the Tenasserim Division, the lines are Pegu to Martaban (122 miles)—for Moulmein by ferry—and the Moulmein South to Anin (57 miles), and from Nyaunglebin to Madauk (11 miles). Then there are the branch lines from Pyinmana to Thazi (67 miles), from Thazi to Myingyan (70 miles), from Mandalay to Myitnge (17 miles) and from Ywataung to Alon (71 miles). The Northern and Southern Shan States hill sections connect with the main lines at Myohaung and Thazi and have respectively 12- and 16-miles sections continuously graded at 1 in 25. The opening of the Ava bridge across the Irrawaddy at Sagaing in 1934 permitted through traffic from Rangoon to Myitkyina. This bridge was damaged during World War II; a ferry service is operating across the river now. The Northern Shan States branch is breached by war damage to the Gokteik Viaduct, which is to be repaired by 1951; meanwhile a rail track has been constructed at the Gokteik Gorge.

The railway suffered severely as a result of the World War II and the insurrection of 1948–50. A vast amount of rehabilitation was necessary and the route mileage in 1950 was 1,400 as against 2,059 in 1942.

Roads and Waterways.—The length of metalled roads is 3,760 miles and there are 6,770 miles of unmetalled roads. Burma has also 60 miles of navigable canals. Its great river, the Irrawaddy, is navigable up to Bhamo, 900 miles from the sea, and its tributary, the Chindwin, is navigable for 390 miles. The Irrawaddy delta has nearly 2,000 miles of navigable water. The Salween, the Attaran and the G'yne also provide about 250 miles of navigable waters around Moulmein.

The gross tonnage of vessels excluding hulks and landing pontoons belonging to the Irrawaddy Section of the Inland Water Transport Board, a state-owned concern, was 55,777 in 1950 against 105,257 tons during 1939.

Aviation.—Union of Burma Airways, inaugurated in 1948 and reorganized in 1950, started its internal service in Sept., 1948, and set up its first external service, Rangoon–Bangkok, in Nov., 1950. There were, in 1951, 32 civil aerodromes and landing grounds.

Posts.—There were 378 post offices working in Sept., 1950. Number of telephones, about 6,000, over 3,000 of which were in Rangoon.

There are 108 telegraph offices, and the internal system of communication is chiefly by wireless. The external communications with foreign countries through Cable and Wireless, Ltd., Colombo, is operated by the automatic high-speed wireless system, while hand-speed operations are done with India. There is also a wireless coastal station at Rangoon.

Banking.—The Union Bank of Burma was established on 3 Feb., 1948, with an authorized capital of Rs. 4 crores; the bank is state-owned. It functions as a central bank, although not yet as a bank of issue. In 1950 there were 18 commercial banks doing business in Rangoon, most of which are branches of foreign institutions. Sixteen of these banks maintain accounts with the Union Bank.

Money.—The Burmese rupee equals 1*s.* 6*d.* ($1 U.S. = Rs. 4,76).

Since 1 April, 1947, the management of currency in the Union of Burma has been vested in the Burma Currency Board, and on 1 July, 1948, Indian currency ceased to be legal tender.

Diplomatic Representatives.

1. Of Burma in Great Britain (19A Charles Street, W.1).

Ambassador.—(Vacant.)
First Secretaries.—U Sam Bwa; Sao Boonwaat.
Second Secretary.—U Maung Maung.
Military Attaché.—Lieut.-Col. Ba Han.
Commercial Attaché.—U Saw Ohn Tin.

2. Of Great Britain in Burma.

Ambassador.—Richard Langford Speaight, C.M.G. (accredited 2 Oct., 1950).

Counsellors.—H. W. A. Freese-Pennefather; H. G. Curran (*Financial*); L. H. Whittall (*Commercial*); A. T. Oldham (*Consular*).

First Secretaries.—E. F. Given; E. Morgan (*Oriental*); A. W. R. Taylor (*Consular*); Mrs. M. E. Barraclough (*Information*).

CHILE.

(REPÚBLICA DE CHILE.)

Constitution and Government.

THE Republic of Chile threw off allegiance to the crown of Spain, constituting a national government on 18 Sept., 1810, finally freeing itself from Spanish rule in 1818.

The following is a list of the presidents since 1906 :—

Pedro Montt, 18 Sept., 1906–16 Aug., 1910.[1]
Elias Fernandez Albano (Acting), 16 Aug.–6 Sept., 1910.[1]
Emiliano Figueroa Larrain (Acting), 6 Sept.–23 Dec., 1910.
Ramón Barros Luco, 23 Dec., 1910–23 Dec., 1915.
Juan Luis Sanfuentes, 23 Dec., 1915–23 Dec., 1920
Arturo Alessandri, 23 Dec., 1920–10 Sept., 1924.[2]
Gen. Luis Altamirano (Acting), 10 Sept., 1924–23 Jan., 1925.[2]
Emilio Bello Codecido (Acting), 27 Jan.–21 Mar., 1925.
Arturo Alessandri (restored), 21 Mar.–1 Oct., 1925.[4]
Luis Barros Borgoño (Acting), 1 Oct.–23 Dec., 1925.
Emiliano Figueroa Larrain, 23 Dec., 1925–6 May, 1927.[4]
Gen. Carlos Ibañez (Acting, then elected), 6 May, 1927–26 July, 1931.[4]
[illegible]–27 July, 1931.[4]
[illegible] (Acting), 27 July–18 Aug., 1931.[4]
Manuel Trucco (Acting, 18 Aug.–15 Nov., 1931.
Juan Esteban Montero, 15 Nov., 1931–4 June, 1932.[3]
Socialist Junta (Carlos Davila, Col. Marmaduke Grove, Gen. Arturo Puga), 4 June–8 July, 1932.
Carlos Davila (Acting), 8 July–13 Sept., 1932.[3]
Gen. Bartolome Blanche (Acting), 13 Sept.–1 Oct., 1932.[4]
Abraham Oyanedel (Acting), 1 Oct.–24 Dec., 1932.
Arturo Alessandri, 24 Dec., 1932–24 Dec., 1938.
Pedro Aguirre Cerda, 24 Dec., 1938–25 Nov., 1941.[1]
Geronimo Mendez (succeeded as Vice-President), 25 Nov., 1941–1 April, 1942.
Juan Antonio Rios, 1 April, 1942–27 June, 1946.[1]
Alfredo Duhalde (Acting), 27 June–3 Aug., 1946.[4]
Vice-Admiral Vicente Merino Bielech (Acting), 3 Aug.–3 Nov. 1946.

[1] Died. [2] Left Chile. [3] Deposed [4] Resigned.

By the constitution of 18 Oct., 1925, legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies, both of which are elected by direct popular vote. The Senate consists of 45 members, elected for 8 years, who represent 9 provincial groups each of which elects 5 senators. One-half of the Senate is renewable every 4 years. The Chamber of Deputies consists of 147 members elected for 4 years by departments or groups of departments, one member for every 30,000 inhabitants or fraction of not less than 15,000. The Belgian system of proportional

representation prevails. Electors are all citizens of 21 years of age or over, who are able to read and write; electorate (1947) numbered 529,741 men and 127,744 women. Women were fully enfranchised in Jan., 1949. All voting is by ballot. Congress sits from 21 May to 18 Sept. The President is elected for 6 years, by direct popular vote, but is not eligible for re-election. He has a modified veto; a bill which he has vetoed may, by a two-thirds vote of the members of both Chambers (a majority of the members being present), be sustained and become law. The validity of all elections of president, deputies and senators is determined by a special body called *Tribunal Calificador*, consisting of 5 members chosen by lot from past-presidents or vice-presidents of the Chamber and Senate, members of the Supreme Court, of the Court of Appeal of the city where Congress meets. The capital is Santiago, founded on 12 Feb., 1541.

President of the Republic.—Gabriel Gonzalez Videla, a left-wing Radical, supported by the Communists, elected by the Chilean Congress on 24 Oct., 1946; assumed office, 3 Nov., 1946, for 6 years.

The salary of the President is fixed at 480,000 pesos a year.

The President is assisted by 12 Ministers of State, who constitute a Cabinet and who are responsible to him. The constitution of 1925 made the Cabinet a unit, *i.e.* the individual minister whose proposals were modified or rejected by the National Congress was no longer compelled to resign. Ministers may speak in Congress but do not vote. By special legislation in 1947, the Communist party was suppressed and the President was given extraordinary powers to quell demonstrations of the 'Left.' These powers were rescinded in Jan., 1949, but re-acquired in August.

National flag: white, blue, red, with a white star in the blue strip.

National anthem: Ha cesado la lucha sangrienta (words by E. Lillo, 1847; tune by Carnicer, 1828).

Local Government.

For the purposes of local government the republic is divided into provinces, presided over by *Intendentes*, and the provinces into departments, with *Gobernadores* as chief officers, appointed by the President. The departments constitute one or more municipal districts, each with a council or local [illegible] of 5 to 15 members, elected for 3 years. The Government in 1931 took over control of the finances of the 70 departments, to safeguard a loan made to them in New York of $15 million.

Area and Population.

Chile is divided into 25 provinces. All provinces except 3 extend from the Pacific to the international boundary, while the inter-provincial boundaries in most cases now follow watersheds instead of rivers, thus [illegible] being within one province the waters of a single system and avoiding [illegible] disputes.

Many islands to the north, west and south belong to Chile. The coastline is about 2,485 miles in length; the average width of the country, 110 miles. Area, 1947, is 741,767 square kilometers or 286,397 square miles.

On 4 Jan., 1947, Chile reaffirmed its ownership of the sector of the Antarctic lying between 53° and 90° West longitude; and asserted that the British claim to the sector between the meridians 20° and 90° West longitude overlapped the Chilean by 27 degrees. Three Chilean bases were established in British Antarctica in 1947, 1948 and 1951.

The present areas of these various provinces and their populations, as determined by the censuses of 1930 and 1940, are as follows :—

Provinces	Area : sq. miles (1940)	Population 1940 (census)	Population 1930 (census)	Provinces	Area : sq. miles (1940)	Population 1940 (census)	Population 1930 (census)
Aconcagua	3,939	118,049	103,054	Magallanes	52,271	48,813	37,913
Antofagasta	47,502	145,147	178,765	Malleco .	5,511	154,174	135,825
Arauco .	2,222	66,107	61,074	Maule .	2,172	70,497	74,383
Atacamá .	30,834	84,312	61,098	Ñuble .	5,485	243,185	231,890
Aysen .	34,348	17,014	8,615	O Higgins	2,745	200,297	170,536
Bio-Bio .	4,342	127,312	113,988	Orsono .	3,866	107,341	87,086
Cautin .	6,705	374,659	315,264	Santiago .	5,557	1,268,505	967,603

Llanquihue	7,005	117,225	91,651				

Estimated population on 1 Jan., 1950, 5,760,571; 1,161,633 live in Santiago. Density per square mile was 20·1. Chile plans to take a full census of population and agriculture in April, 1951.

Crude birth rate, 1949, was 33·2 per 1,000 population; crude death rate, 18·1; crude marriage rate, 8·1. Infantile mortality rate, 169·0 per 1,000 live births.

In the census of 1930, 2,122,709 were males and 2,164,736 females, and 49·4% were urban; 1,337,814 or 31% were gainfully employed; foreigners numbered 105,463, of whom 23,439 were Spaniards. The great majority of the population is of European origin. The indigenous inhabitants are of three branches : the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucanians* (98,000) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

The two leading cities, with census population in 1940, are Santiago, 952,075, and Valparaiso, 209,945. Other towns with census population in 1940 are :—Concepción, 85,813; Temuco, 42,035; Viña del Mar, 65,916; Chillán, 42,817; Talca, 50,464; Antofagasta, 49,106; Valdivia, 34,496; Talcahuano, 35,774; Iquique, 38,094. Punta Arenas, on the Straits of Magellan, with a population of 29,883, is the most southern city in the world.

Religion.

The Roman Catholic religion was maintained by the state until 1925, when the Church was disestablished. There is one cardinal-archbishop (Santiago), 2 archbishops, 15 bishops and 2 vicars apostolic. The census of 1940 showed 4,508,000 Roman Catholics, 114,000 Protestants and 8,000 Jews.

Education.

Education is free and, since Feb., 1928, compulsory for all children between the ages of 7 and 15. In 1948 the public primary schools had 14,828 teachers and 518,446 pupils; private and municipal schools had 149,802 pupils; secondary schools had an enrolment of 70,622. Professional and secondary instruction is provided in the state university of

Chile (founded in 1842) with, 1948, 5,287 students, the Catholic University at Santiago (1,528 students), the National Institute of Santiago, the University of Concepción, and in the lyceums and colleges established in the capitals of provinces and in some departments. A school of technology was opened at Valparaiso (Universidad Industrial de Valparaiso). There were 8,127 university students (1948).

There are (1949) 39 daily newspapers with an aggregate daily circulation of 456,000; in all there are 318 newspapers and 676 magazines.

Motion-picture theatres numbered 315 in 1949, with seating capacity of 272,000.

Labour.

In 1940 (census) the 'economically active' numbered 1,741,526 (424,828 women) of whom 442,515 were employers or [illegible] 1,299,011 (280,923 women) worked for salaries or wages. [illegible] employed 459,618, manufacturing, 207,551, [illegible] 93,928 and transport, 64,716.

Trade unions began in the [illegible] 1890's. On 1 Jan., 1949, there were 613 industrial unions and 1,234 professional syndicates, with total membership of 257,845. The Chilean Confederation of Workers was long controlled by the Communists, but President Videla has driven them out. In June, 1950, a 'National Central Movement of Workers' was launched comprising federations of unions in mining and other smaller industries to force wage increases and to defend the right to strike.

Justice and Crime.

There are, in addition to a High Court of Justice in the capital, 8 courts of appeal distributed over the republic, tribunals of first instance in the departmental capitals, and second-class judges in the sub-delegations. The police force had (1939) 15,949 officers and men; it is organized and regulated by the President of the republic.

Finance.

In recent years the revenue and expenditure were as follows (1,000 paper pesos = $51·60, U.S., at the old official rate; but $32·30 at the 1946 and subsequent rates):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Paper pesos	Paper pesos		Paper pesos	Paper pesos
1945	5,530,957,554	5,741,461,054	1949	16,395,092,000	15,415,755,000
1947	9,978,791,520	9,610,508,625	1950 [1]	15,649,600,000	15,619,600,000
1948	14,379,300,000	13,027,000,000	1951 [1]	23,259,000,000	23,259,000,000

[1] Budget estimates which, unlike those of previous years, made no provision for the Corporación de Fomento de la Producción and [illegible] loans expended on long-term capital projects.

Outside the 1951 budget are expenditures, already scheduled, of 2,678 million pesos for the Corporación de Fomento de la Producción and some 640 million for 3 other government enterprises. Direct and indirect taxation (20,088 million) is expected to furnish 86% of the ordinary 1951 revenue; but in Jan., 1951, unpaid taxes under the previous budget were reported as 1,500 million or 7% of the proposed revenue.

The principal items of expenditure in the 1950 Budget were (in millions of pesos):—National defence and aviation, 2,856; Ministry of Interior,

2,028; Treasury, 3,171; education, 2,352; health, 1,133. Chief sources of revenue were:—Taxes, 12,780; national services, 619; national properties, 267.

The government in Dec., 1949, was empowered to float an internal loan at 7% interest and at a price not less than 80 pesos (per 100 pesos par value) up to an amount sufficient to yield 1,000 million pesos; object is to help balance the 1950 budget. Government bonds sold in 1950 at prices yielding 8 33%.

Funded external debt, 31 Dec., 1950 (after allowance for bonds purchased and cancelled), amounted to £21,735,521, $114,791,000, U.S., and 93,297,000 Swiss francs. A decree of 22 July, 1948, provides for the conversion of all external debts, whether Federal, state or municipal, into new Federal bonds; during the years 1948–53, not less than $2,531,000 will be used annually in redemption of the debt. Service on the external funded debt (interest and redemption) is provided from the Government's income from the Chilean Nitrate and Iodine Corporation, and from the income tax on copper; this amounted in 1950 to $5,300,000, U.S. American dollar loans to Chile, end of 1941, amounted to $178,900,000, of which 75·8% were in default. American direct investments, 1940, were $413,983,000, of which nearly two-thirds were in copper and nitrates. British investments, end of 1949, were £45,277,707, of which 21·9% were in default; Government bonds outstanding, end of 1949, were $20,144,683. According to the Bank of England, the nominal value in 1948 of Chilean investments held by residents in the U.K. was £47 million (£63 million in 1938) and income received was £700,000 (£900,000 in 1938).

Defence.

Army.

The Chilian Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 20th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained for 12 months. After this training they pass into the reserve.

The Army is organized in 3 Army corps, 1 Army division, 1 cavalry division and 1 railway regiment. The 3 corps and the Army division are composed of: 20 regiments (of which 6 are reinforced), 2 mountain infantry detachments, 6 motorized artillery regiments, 1 battery motorized artillery, 4 engineer regiments and 3 groups of mechanized cavalry. The cavalry division includes 6 cavalry regiments, 3 mounted artillery groups and 1 engineering group.

During 1948 the total Army strength was, 1,900 officers and 18,500 other ranks.

Navy.

The principal vessels of the Chilean fleet are as follows:—

Completed	Name	Standard displacement	Armour	Principal armament	Torpedo tubes	Horse-power	Designed speed
	BATTLESHIP	tons	in.				knots
1915	Almirante Latorre	30,000	10	10 14-in ; 14 6-in.; 4 4-in.	—	37,000	23
	CRUISER						
1902	Chacabuco . .	3,437	4½	6 6-in. . . .	—	13,500	24

The *Almirante Latorre*, laid down for Chile in 1911, served in the British Fleet during the 1914–18 war as the *Canada*, was re-acquired by Chile in 1920, and in 1929–31 was refitted and modernized at Devonport Dockyard. In 1951 Chile purchased from the U.S.A. 2 cruisers of the 'Brooklyn' class. There are 6 destroyers, 7 submarines, 6 frigates, a surveying vessel, various training and auxiliary vessels, a submarine depot ship (the *Araucano*), 5 transports and 3 oil tankers, almost all built in England or in Canada. The active strength of the Navy, including marines and coastal artillery, is about 13,000 officers and men.

AIR FORCE.

The Chilean Air Force was during 1943 increased to 4 brigades, 1 for each military zone, equipped chiefly with American material.

Agriculture, Mining and Industry.

There are three zones in Chile—the arid zone in the north, which for many years furnished the world's entire supply of natural nitrate of soda, 90% of its iodine and 18% of copper consumed; the agricultural zone in the centre, and the forest zone in the south. Total area of agricultural land (1936) was 60,219,583 acres, of forest land, 8,671,051 acres; of fruit trees and vines, 459,872 acres; of meadows, 12,393,677 acres. Number of farms in 1937, 201,997. Area planted with cereals in 1948, 2,504,000 acres. The import, export and marketing of wheat is controlled by a State Board. Rice is now usually a leading agricultural export but, in recent years, exports have been restricted. Output of rough rice, 1948, 91,000 metric tons. Hemp fibre (*Phormium Tenax* from New Zealand) is of growing importance; output, 1948, about 12,600,000 lb. from 12,000 acres. Chile produces excellent wine; output in 1948, about 74 million gallons (exports are chiefly to Europe, U.S.A. and Ecuador). Fruit, largely for export to European markets, is normally important. The principal crops of the harvest for 2 years and the annual average for 5 years are shown as follows:—

	Acreage			Output in U.S. bushels		
	Average 1935–39	1947–48	1948–49	Average 1935–39	1947–48	1948–49
Wheat .	1,963,000	2,046,667	2,168,545	31,562,000	39,313,634	38,260 514
Barley .	184,000	155,717	132,892	5,011,000	4,939,395	3,954,754
Oats . .	279,000	221,965	253,010	7,670,000	4,976,530	5,606,413
Rice . .	13,000	70,520	60,000	1,299,000	4,381,619	4,035,000
Maize . .	110,000	120,017	110,000	2,496,000	2,921,171	2,520,000
Potatoes .	121,000	131,078	131,583	15,652,000	20,141,632	19,573,161

According to soil experts, soil erosion is so severe that several rivers have filled with silt, checking navigation. As the top soil goes, yields per hectare decline. Deforestation is heavy and the reforestation practised is said to be negligible. There are 375 large farms each with more than 12,250 acres, while 400,000 peasants live on less than 4 acres per family.

Cattle in 1949 numbered 2,344,188; sheep, 6,300,000; swine, 572,000. In 1945 horses numbered 527,827 and asses and mules, 93,525.

Chile's whale catch in 1948 yielded 2,900 short tons of sperm oil and 2,000 tons of whale oil. Catch of fish in 1949 was 60,375 tons, and of shell-fish, 15,875 tons.

In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming, largely by British subjects; there are about 2,800,000

sheep, chiefly Corriedales. Magallanes, which furnishes about 11,000 tons of wool, has also begun the [illegible] fine-furred animals, especially foxes, for their pelts. Output of wool is about 21,000 metric tons; exports in 1948, 7,490 metric tons, valued at 38,865,000 gold pesos; of sheepskins, 2,322 tons, valued at 8,335,000 pesos. Extensive natural forests are found, the largest in the provinces of Valdivia, Llanquihue and Chiloé. Timber production amounts to about 165,400,000 square feet. About 2,500 tons of *quillay* (soap) bark is produced annually, mostly for export. Digitalis, both wild and cultivated, flourishes in southern Chile.

The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacà. The metals are gold, chiefly obtained by 'washings' (5,572 kilos in 1949), silver (24,873 kilos in 1949), copper (371,094 metric tons in 1949), cobalt, zinc, molybdenum (886 metric tons in 1949), tungsten and manganese (exports, 1949, 12,460 tons); the non-metallic substances are coal, nitrate, borate, phosphate rock (59,529 tons, 1948), salt, sulphur (about 13,000 tons per year) and guano. To protect the silver mining industry the import of silver is virtually prohibited. Mercury output, 1948, 359 metric tons.

Chile's copper reserves are 36·8% of the world's reserves; exports of copper bars (1949), 370,133 tons, valued at 760,367,000 pesos. Peak production, in 1943, was 509,378 tons, with exports of 457,225 tons. The government has constructed a small smelter near Copiapo to handle 142,000 tons of ore annually from small Chilean-owned mines; output forecast at 20,000 tons of copper, 1·4 tons of gold and 3·5 tons of silver per annum. Marble and onyx are mined. Exports of fresh bird guano (like that from Peru) are forbidden, but exports of fossilized guano, mainly from the one-time famous beaches south of Iquique, sprang up in 1934. Iron-ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000 million tons. Output, 1949, of ore with iron content of 1,663,000 tons; exports (1949), 2,765,300 tons, valued at 33,500,000 pesos. Coal production in 1949, 2,077,000 tons. Reserves total 2,000 million metric tons, partly low in thermal unit. Cement output, 1949, about 495,000 tons; Chile, by 1947, was self-sufficient in cement. In Dec., 1945, oil was discovered in the Magallanes, with a potential output estimated at 30 million barrels; output, 1949, 7,080 metric tons; in 1950, about 80,000 metric tons.

Nitrate of soda, or 'saltre,' is an important article of export and usually a substantial source of governmental revenue. It is found in the section of the desert of Atacama some 450 miles long and from 5 to 40 miles wide, known locally as the 'pampa salitrera,' and situated from 4,000 to 7,500 feet above sea level. There are 152 nitrate works or oficinas with a productive capacity of 58,136,000 quintals. Three large producers furnish 90% of total output. To lower costs the industry is directed by the government to utilize the solar evaporation process which will also produce some 50,000 tons of potash per annum. Capital is mostly British and American. Output for the 10 years, 1937 to 1946, averaged 1,365,000 tons. Output in 1949 was 1,770,000 metric tons; exports were 1,547,674 tons, valued at 310,900,000 pesos. In 1910, with output of 420,964 tons, Chile furnished 64% of world production, but in recent years its share has fallen to 8%, owing to the competition of synthetic and by-product nitrogen. About 66% of the world's supply of iodine is a by-product of the Chilean nitrate oficinas; exports, 1948, were valued at 7,488,000 pesos.

A nationally-owned steel plant, representing an investment of $31,572,000, U.S., has been established at Huachipato, near Concepción. Iron ore comes from the Bethlehem Chile Iron Mines Co. Chile, in 1950 was the first

Latin-American country to ship pig-iron to the United States. The manufacture of tinplate began in Feb., 1950.

The textile industry consumes the entire wool clip of the northern, central and south-central zones, plus about 3,000 tons from Magallanes, amounting in all to 12,000 metric tons; the industry supplies 85% of the country's consumption of silk and rayon fabrics and employs 22% of the working population.

Commerce.

Imports and exports (including re-exports and excluding bullion and specie) in gold pesos (1 gold peso = 6*d.* gold or about 20 cents, U.S.) :—

	1939	1946	1947	1948	1949
Imports. .	410,438,000	953,439,152	1,287,325,063	1,596,072,370	1,474,999,970
Exports. .	660,445,000	1,049,311,913	1,351,756,138	1,306,332,243	1,493,525,726

Bullion imports, 1949, 100,000 gold pesos; exports, 55,800,000 gold pesos.

Imports, 1948, amounted to 2,129,454 metric tons and exports to 5,271,742 tons; in 1949 the figures were 1,997,169 and 5,110,406 tons.

Imports from the United States in 1949 were valued at 800,597,333 gold pesos (54·3% of the total), from Peru 158,196,396 (10·7%), from Argentina 64,718,125 (4·4%), from Brazil 62,926,171 (4·3%) and from Great Britain 116,822,483 (7·9%). Exports to the U.S. were valued at 724,454,426 gold pesos (48·5%), France 118,429,091 (7·9%) and Great Britain 120,434,849 (8·1%).

Imports in 1949 included industrial machinery and equipment valued at 332,534,487 gold pesos, chemical products, 202,138,589, vehicles (including 35·8 million for motor cars), 150,200,000 and textiles, 90,727,660. Mining products furnished 1,155 million, or 77% of exports, in 1949; much of the proceeds of these exports is retained abroad.

The Central Bank has estimated that in 1946 of the total value of sales of copper abroad ($110·6 million, U.S.), 33·6% was retained abroad; of nitrate and iodine sales ($47·7 million), 7·4%, and of iron-ore ($3·1 million), 55·0%.

The International Monetary Fund reports the sales abroad of the large mining companies in 1948 to have realized $284·6 million, U.S., of which $56·3 million were profits retained abroad, $40·4 million were expended on the companies' own imports, $27·5 million in capital movements, $10·9 million in freight and other expenses, leaving $149·5 million (52·5%) available to cover Chile's payments for general imports. Other exports realized $68·6 million, U.S. Imports (c.i.f.) took $235·2 million.

For the plan of a customs union with Argentina *see* p. 777.

Chile's foreign exchange resources in 1951 were forecast (31 Dec., 1950) at $331,600,000, of which copper would furnish 105·3 million; nitrate and iodine, 40·6 million, and agriculture, 51·3 million.

Total trade between Chile and United Kingdom for 5 years (Board of Trade figures, in £ sterling) :—

	1938	1947	1948	1949	1950
Imports from Chile to U.K. .	7,867,110	9,008,398	7,867,158	7,517,314	5,894,290
Exports to Chile from U.K. .	1,640,832	3,700,015	4,129,004	5,426,818	6,153,492
Re-exports to Chile from U.K..	26,529	45,599	54,957	148,036	98,314

Shipping and Communications.

The mercantile marine had, in 1948, 97 vessels with a gross registered tonnage of 188,000. Valparaiso is the chief port. In the overseas trade, 1949, 728 vessels of 2,909,000 net tons entered and cleared the ports of Chile. The trade agreements concluded in 1949 sharply discriminate against European shipping.

In 1947, there were in Chile 50,925 km. of highways, of which 8,302 km. were motor roads and 42,623 were cart roads. There were (1949) 39,444 automobiles; trucks and motor buses numbered 30,474. There are 2,185 km. of navigable rivers.

The [illegible] lines amounts to 5,277 miles; private railway lines, [illegible] (1948), amounted to 1,369 miles. The Chilean Transandine Line is now part of the State Railway system. A new line 550 miles long, connecting Salta, in Argentina, with Antofagasta, was opened in 1948. The first locomotive built in Chile went into service in 1943. Electrification of the railways is proceeding. Aviation is highly developed between interior points and abroad; a plant for the manufacture of aeroplanes was established in 1930. There are (1950) 5 customs airports, 7 military airports, 17 civilian airports, 89 landing grounds and 9 seaplane bases. In 1950, Chile was served by 9 commercial air companies (5 Chilean, 1 British, 2 Argentine and 1 American).

There are 1,147 post offices and agencies. The length of telegraph lines in 1947 was 25,486 kilometres; there were 732 telegraph offices. In 1949 there were 126,033 telephones in use, all under private companies, of which the largest is American-owned.

A chain of wireless [illegible] the coast for shore-to-ship transmission is operated by the Navy. The [illegible] international radio station was opened at Quilicura in 1928. A wireless station has been erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso. There are 3 large broadcasting stations.

Banking and Credit.

In January, 1926, the Government opened at Santiago the Central Bank of Chile, authorized to issue a new peso, value 6*d*., to be the basis of a new national currency; gold payments were re-established. In Jan., 1948, the bank revalued its gold stock at the new rate of 31 pesos = $1, U.S. (instead of the old rate of 4·855 to the dollar). On 31 Aug., 1950, the Central Bank had gold (revalued) amounting to 1,241 million pesos against, notes of 6,124 million pesos; bank deposits of 1,248 million pesos and other deposits of 250 million pesos; loans to credit institutions, which were only 72 million pesos in 1937, had risen to 1,900 million pesos; loans to the Government were 686 million pesos. Since 1936 the bank's gold stock has risen from $29 million, U.S., to $83 million in June, 1946, falling to $40 million in Dec., 1949, where it remained through 1950. The country's gold production, sold to the Central Bank, reached a peak of $11,999,000 in 1940, falling to $5,700,000 in 1948; in 1949, $6,300,000. Bank rate since June, 1935, has been 4½%.

On 31 Dec., 1949, the total deposits in the commercial banks stood at 11,171 million pesos, compared with 2,049 million pesos at the outbreak of war. The total 'money supply' of the Chilean economy (I.M.F. totals for currency and bank deposits) reached 17,055 million pesos in Sept., 1950, compared with 7,578 million at the end of the war.

The Caja Nacional de Ahorros (founded in 1884) is the chief custodian of

savings accounts; on 31 Dec., 1949, its 123 branches had deposits of 3,294 million pesos.

Money, Weights and Measures.

Chile in 1946 proposed to the International Monetary Fund that the unit of account shall be the peso, with a value of 3·22581 cents, U.S., or 31 to $1·00, U.S. The gold equivalent will be 0·0286668 gramme of fine gold, 1 troy oz. being equal to 1,085 pesos.

The old monetary unit was the gold *peso*, containing 0·183057 gramme of fine gold, with, originally, a par value of 6*d.* sterling gold or 12·17 cents U.S. (old U.S. gold dollar or 20·6 cents new U.S.). £1 sterling therefore equalled at par, 40 gold pesos. This is the rate at which the Central Bank until Jan., 1948, stated, in pesos, the value of its gold stock; since then, at 31 pesos to the dollar. On 10 Jan., 1950, a new rate of 60 pesos to $1 (168 pesos to £1) was announced, to apply to all transactions except a few important ones to which it is eventually to apply as well. Imports and exports, however, are still valued in the old peso at 6*d.* gold.

Ordinarily no gold circulates, but in Dec., 1943, the Government minted gold coins (for the bourses) valued at 100 (2 grammes of gold) and 1,000 pesos (20 grammes of gold). The silver coinage was mainly one coin, the peso, with formerly a fine silver content of 2·4 grammes, but in 1934 pesos of nickel (25%) and copper (75%) replaced the silver pesos; in 1948 new silver coins of 10 pesos (*condor*) and 5 pesos (*half-condor*) were minted, mainly to assist the silver mining industry. There are nickel–copper coins of 1 peso and of 20 centavos. Actually the currency in circulation is chiefly paper issued by the Central Bank, in denominations of 10,000, 5,000, 1,000, 500, 100, 50, 10 and 5 pesos. Domestically the Chilean paper currency has depreciated severely; in Dec., 1949, the registered exportable gold coin of 100 pesos commanded an average price of 3,321 paper pesos; in Jan.–March, 1951, of 2,900 pesos.

Foreign exchange is controlled by the Central Bank through an Exchange Control Commission. The greater part of foreign exchange transactions has taken place under the 'banking' rate at 43·10 pesos to the $. In 1950 the transferable account rate on London ranged between 139 and 185 pesos to the £. From 1934 to the outbreak of the war the conversion rate of the gold peso was around 24 to the £; subsequently it has been around 30 to the £.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent. Greenwich time has been adopted in place of Chilean time.

Diplomatic and Consular Representatives.

1. Of Chile in Great Britain (9 North Audley Street, W.1).

Ambassador Extraordinary and Minister Plenipotentiary.—Manuel Bianchi (accredited 25 June, 1941).

Minister-Counsellor.—Humberto Videla.

Commercial Counsellor.—Pedro Alvarez.

Secretaries.—Salvador Reyes (*Consul*); Jose Antonio Gandarillas.

Naval Attaché.—Capt. Rafael Calderón Silva.

Civil Attaché.—Calixto Rogers.

There are consular representatives at Liverpool and London.

2. Of Great Britain in Chile.

Ambassador [illegible] and Minister Plenipotentiary.—Sir Cecil Bertrand Jerram, K.C.M.G. (appointed 5 Sept., 1949).

First Secretaries.—W. J. M. Paterson; G. S. Littlejohn-Cook; I. C. Mackenzie (*Commercial*); D. R. Dick, O.B.E. (*Information*); W. E. Oakley-Evans (*Labour*); N. D. T. Sutton.

Naval Attaché.—Capt. J. Lee-Barber, D.S.O., R.N.

Air Attaché.—Group Capt. E. S. Finch.

Civil Air Attaché.—G. S. Hill.

Agricultural Attaché.—A. G. Mill.

Consul-General in Valparaiso.—A. Price.

There are consular representatives at Antofagasta (C.), Concepción (C.), Iquique (V.C.), Santiago (C.), Toccpilla (V C.) and other centres.

Books of Reference.

CHINA.

(CHUNG-HUA JEN-MIN KUNG-HO KUO, *i.e.* People's Republic of China; formerly CHUNG-HUA MIN-KUO, *i.e.* REPUBLIC OF CHINA.)

Owing to the change in regime and the dislocation of sources of statistical information, revision of this chapter has been possible only in parts.

Constitution and Government.

In the course of 1949, the Communists obtained full control of the mainland of China. During 1950, the People's Government extended its hold over most islands off the coast, including Hainan. The Kuomintang regime under Chiang Kai-shek is maintained by the American forces in Taiwan and a few small island groups.

On 21 Sept., 1949, the 'People's Republic of China' was proclaimed in Peking by the 'Chinese People's Political Consultative Conference.' The Conference passed the 'Organic Law of the Central People's Government

of the People's Republic of China,' elected Mao Tse-tung as chairman of the Central People's Government, elected the 'National Committee' (for summoning further triennial meetings of the Chinese People's P.C.C.) and incorporated the existing North China People's Government (which had been set up earlier by the Communists in North China) into the new Central Government. The Communist Party, in July, 1950, had 5 million members.

The Conference passed a 'Common Programme' of 60 articles, including the following :—

1. This Republic opposes imperialism, feudalism and bureaucratic capitalism and strives for the independence, democracy, peace, unification, prosperity and strength of China.—2. The Central People's Government . . . must . . . liberate all the territory of China and accomplish the cause of unification of China.—3. The Republic must abolish all prerogatives of imperialist countries in China, confiscate bureaucratic capital for ownership by the People's State; systematically transform the feudal and semi-feudal land ownership system into the system of peasant land ownership; . . . and steadily transform the country from an agricultural into an industrial country.—5. The people of the Republic shall have freedom of thought, speech, publication, assembly, association, correspondence, person, domicile, moving from one place to another, religious belief and the freedom of holding processions and demonstrations.—6. Women shall enjoy equal rights with men in political, economic, cultural, educational and social life.—9. All nationalities in the Republic have equal rights and duties.

11. The Republic unites with all peace and freedom loving countries and peoples throughout the world, first of all the Soviet Union, all People's Democracies and all oppressed nations, and stands in the camp for international peace and democracy to oppose jointly imperialistic aggression and to defend lasting world-peace.—17. All laws, decrees and judicial systems of the Kuomintang reactionary government oppressing the people are abolished.—55. The Central People's Government shall examine the treaties and agreements concluded between the Kuomintang and foreign governments and recognize or abrogate or revise or renew them according to their respective contents.—56. The Central People's Government may negotiate and establish diplomatic relations on the basis of equality, mutual benefit and mutual respect for territory and sovereignty with foreign governments which sever relations with the Kuomintang reactionaries and adopt a friendly attitude towards the People's Republic of China.

The Chinese People's P.C.C. also resolved that Peiping should revert to its former status as the national capital and to its former name, Peking (viz. Northern Capital), that 1 Oct. should be the National Day, that the National Anthem, pending final selection, should be 'The March of the Volunteers,' and that the National Flag should be a red ground with a 5-pointed golden star in the upper corner, near the staff, flanked by an arc of 4 smaller golden stars.

The first five articles of the 'Organic Law' are :—1. The People's Republic of China has the State form of the People's Democratic Dictatorship, led by the working class, based on the alliance of workers and peasants, and rallying all democratic classes and nationalities within the country.—2. The Government of the People's Republic of China takes the form of the People's Congress System based on the principle of democratic centralism.—3. Prior to the convocation of the All-China People's Congress through universal suffrage, the first session of the Chinese People's P.C.C. shall exercise the functions and powers of the All-China People's Congress, enact

the Organic Law of the Central People's Government of the People's Republic of China, elect the Central People's Government Council of the People's Republic of China and vest this Council with the power of exercising state authority.—4. The Central People's Government Council represents the People's Republic of China in international relations and is the prime organ of authority within the state.—5. The Central People's Government Council shall set up the State Administration Council as the highest executive organ of State administration; shall set up the People's Revolutionary Military Council as the supreme military command of the State; and shall set up the Supreme People's Court and the People's Procurator-General's Office as the highest judicial and supervisory organs of the country.

The following bodies were accordingly established :—

The Central People's Government Council (the chief legislative body).—*Chairman :* Mao Tse-Tung, 6 Vice-Chairmen (including Mme. Sun Yat-sen) and 56 Council Members, elected by the Chinese People's P.C.C.

The State Administration Council (the chief executive body).—*Premier :* Chou En-lai, 4 Vice-Premiers (Tung Pi-wu, Chen Yun, Kuo Mo-jo, Huang Yen-pei) and 15 members of Council.

The People's Revolutionary Military Council.—Chairman · Mao Tse-tung, 5 Vice-Chairmen (Chu Teh, Liu Shao-chi, Chou En-lai, Peng Teh-huai, Cheng Chien) and 32 Council members.

The Supreme People's Court.—Chief Justice : Shen Chun-ju, 2 Vice-Chief Justices (Wu Kai-chih and Chang Chih-jang) and 14 members.

The People's Procurator-General's Office.—Procurator-General · Lo Jung-huan, 2 Vice-Procurators-General (Li Liu-ju and Lan Kung-wu) and 11 members.

The State Administration Council, in its turn, has set up the following organs :—

Committee of Political and Legal Affairs which directs the work of the Ministry of the Interior, the Ministry of Public Security, the Ministry of Justice, the Commission of Law, and the Commission of the Affairs of Nationalities.

Committee of Finance and Economics which directs the work of the Ministry of Finance, the Ministry of Trade, the Ministry of Heavy Industry, the Ministry of Fuel Industry, the Ministry of Textile Industry, the Ministry of Food Industry, the Ministry of Light Industries, the Ministry of Railways, the Ministry of Posts and Telegraphs, the Ministry of Communications, the Ministry of Agriculture, the Ministry of Forestry and Land Reclamation, the Ministry of Water Conservancy, the Ministry of Labour, the People's Bank and the Maritime Customs Administration.

Committee of Culture and Education which directs the work of the Ministry of Culture, the Ministry of Education, the Ministry of Public Health, the Academy of Sciences, the News Administration, and the Publications Administration.

Committee of People's Supervision which is responsible for the supervision of the execution of duties by government institutions and government functionaries.

Ministry of Foreign Affairs (Chou En-lai) and
Commission of Overseas Chinese Affairs.

By the end of 1950, the new regime was recognized by 25 countries including the U.S.S.R., India, Pakistan, Great Britain, Ceylon, the Netherlands and Indonesia.

A 30-year treaty of ' friendship, alliance and mutual aid ' between the

U.S.S.R. and the People's Republic of China was signed in Moscow on 14 Feb., 1950, 'in order to prevent, with joint efforts, the recurrence of Japanese imperialism and any renewed aggression instigated by Japan or other nations which may take aggressive action by collaborating with Japan.' The treaty of 14 Aug., 1945, negotiated with the Nationalist Government, was declared invalid.

National emblem (Sept., 1950).—Five stars above Peking's Gate of Heavenly Peace, surrounded by a border of ears of grain entwined with drapings, which form a knot in the centre of a cogwheel at the base; the colours are red and gold.

Administration.—By 1 Oct., 1950, there had been established under the Central People's Government the following administrative units:—4 Military and Administrative Committees for major administrative areas; 28 Provincial People's Governments; 9 Administrative District People's Governments equivalent to provincial level; 12 People's Municipalities directly subordinate to the Central People's Government; 16 Municipal People's Governments under the provinces, and 2,087 Country People's Governments.

Area and Population.

China is composed of 32 provinces (including the 9 provinces of Manchuria) and 12 municipalities. Peking is again the capital, after the interlude from 1928 to 1949 when Nanking was the capital.

The following table shows the area and population of China (including Manchuria), according to data available in March, 1947:—

Provinces	Area: English square miles	Population	Capital
Anhwei	54,319	22,705,000	Hwaining
Antung	22,468	3,214,000	Tunghwa
Chekiang	39,486	21,776,000	Hangchow
Chinghai	269,187	1,513,000	Si-ning
Fukien	45,845	11,990,000	Minchow
Heilungkiang	70,969	2,469,000	Pehan
Hokiang	50,816	1,298,000	Kaimusze
Honan	64,545	31,806,000	Kaifeng
Hopei	51,154	28,644,000	Tsingyuan
Hsingan	103,918	1,293,000	Hulun
Hunan	79,378	28,092,000	Changsha
Hupeh	71,955	24,659,000	Wuchang
Jehol	74,297	2,185,000	Chengteh
Kansu	151,161	6,256,000	Kaolan
Kiangsi	66,600	13,794,000	Nanchang
Kiangsu	42,085	36,469,000	Chenkiang
Kirin	34,616	5,122,000	Changchun
Kwangsi	85,452	14,861,000	Kirin
Kwangtung	85,447	32,339,000	Canton
Kweichow	68,139	10,557,000	Kweiyang
Liaoning	29,200	12,460,000	Shenyang
Liaopei	40,498	4,030,000	Liaoyuan
Nunkiang	23,912	2,094,000	Lungkiang
Shansi	60,394	11,601,000	Taiyuan
Shantung	56,447	38,100,000	Tsi-nan
Shensi	72,919	9,389,000	Changan
Sikang	164,991	1,756,000	Kangting
Sinkiang	705,962	4,360,000	Tihua
Sungkiang	30,703	4,923,000	Mutankiang
Szechwan	144,996	45,846,000	Chengtu
Yunnan	162,342	10,853,000	Kunming
Taiwan (Formosa)	5,362	6,084,000	Taipei
Total	3,032,663	452,548,000	

The sex ratio was 110 males to 100 females. The populations of the 12 municipalities (July, 1946 were Nanking (807,000), Shanghai (3,599,000, of whom 47,800 were foreigners: 3,770 British and 2,068 Americans), Peking (1,688,000), Tientsin 1,718,000, Tsingtao (756,000), Chungking (1,062,000), Mukden (863,500), Dairen 600,000, Harbin (638,000).

Estimated population in Oct., 1949, was 475,000,000.

The total number of Chinese abroad was estimated in 1942 to be 8,717,416 persons (62,738 in Europe, 211,371 in North and South America, 9,064 in Africa, 63,835 in Oceania and 8,370,408 in Asia, of whom 2,500,000 were in Siam, 2,358,335 in British Malaya and 1,344,809 in Netherlands East Indies).

Manchuria.—Manchuria, comprising the 3 North-eastern Provinces (Liaoning, Kirin, Heilungkiang) was, on 9 Sept., 1945, divided into the 9 provinces of Liaonan, Kirin, Hsingan, Liaopeh, Nunkiang, Hsingan, Sungkiang, Hokiang and Antung; the area is 1,303,143 square km.; the population (1 Oct., 1940), 43,233,000. For further details *see* THE STATESMAN'S YEAR-BOOK, 1949, p. 830.

The Sino-Soviet treaty of Feb., 1950, recognized Manchuria as an integral part of the new People's Republic of China and provided for the transfer to China of the naval base of Port Arthur immediately upon the conclusion of a peace treaty with Japan or not later than 1952. The consideration of the status of Dairen was left over until the peace treaty with Japan.

Inner Mongolia.—Inner Mongolia was, in May, 1947, constituted an autonomous region. It comprises the 3 provinces of Ninghsia (106,140 square miles; population in 1947, 724,000; capital, Ninghsia), Suiyuan (134,180 square miles; population 2,080,000; capital, Kweisiu) and Chahar (107,700 square miles; population 2,034,000; capital, Changchiakow). Capital Ulanhoto (formerly Wangyehmiao).

Religion.

Three faiths have long been established in China, viz. Confucianism, Buddhism and Taoism. Confucianism is a philosophy, primarily of ethics and government. It has been indifferent or hostile to religions, and usually dominated the governmental administration from A.D. 618 to 1905. Buddhism and Taoism present a very gorgeous ceremonial, Taoism—of Chinese origin—having copied Buddhist ceremonial soon after the arrival of Buddhism 1,900 years ago. Buddhism in return adopted many Taoist magical beliefs and practices. Buddhists in China number perhaps 150,000,000 and Taoists 30,000,000.

Ceremonies of reverence to ancestors have been observed throughout the country by the whole population regardless of philosophical or religious beliefs.

Moslems are found in every province of China, being most numerous in Yunnan, Shensi, Kansu, Hopei, Honan, Shantung, Szechuan, Sinkiang and Shansi. The total is estimated at over 48,000,000.

Roman Catholicism has had a footing in China for more than three centuries. Protestant Missions date from 1807. Attached to Protestant Missions in 1934 were 19 colleges of university standing, 267 middle schools, with 37,714 pupils. Under Christian instruction were 239,655 pupils. There were 1,237 members of the Society of Friends in 1941. During 1951, more than 600 missionaries were being withdrawn from China.

Most of the aboriginal hill-tribes are still nature-worshippers and

ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'aifêng, capital of Honan.

Education.

The cultural and educational programme of the Central People's Government stipulates that 'universal education shall be carried out, middle and higher education strengthened, technical education stressed, education of workers and soldiers during their spare time shall be promoted, and revolutionary political education accorded to intellectuals in a planned and systematic manner.'

In Sept., 1950, there were 227 higher education establishments (including those in Taiwan and short-term training colleges), 65 of which were universities and 24 missionary schools; total enrolment, 134,000 students. One-fifth of these schools is located in Shanghai. There were also 40,000 primary schools with 30 million pupils, and 3,690 secondary schools with 1,090,000 pupils.

There were, in 1949, 334 cinemas with a seating capacity of 550,000.

Justice.

The People's Government has abolished the judicial system of the Nationalist Government. The Supreme People's Court is now the highest judicial organ of the country. The People's Procurator-General's Office has the responsibility of seeing that the laws are strictly observed by all government institutions and government functionaries.

Finance.

The budget of the People's Government is unbalanced. Military and administrative expenditure is absorbing 60% of the 1950 budget revenue on account of the 9,000,000 of army, government and educational personnel in the employ of the state. Increases in taxation have been drastic and unpopular. A balanced budget is to be 'gradually attained.'

On 30 Sept., 1949, 200,000,000 units of Victory Bonds were issued. One unit equals 6 catties of rice, or 1½ catties of wheat flour, or 16 catties of coal or 4 ft. of fine cloth. Payment was calculated from the average of wholesale prices in Shanghai, Tientsin, Hankow, Sian, Canton and Chungking.

Under the Sino-Soviet treaty of Feb., 1950, the U.S.S.R. granted the People's Republic commodity credits equivalent to $300,000,000 U.S. carrying 1% interest. The credits are to be drawn in 5 equal annual instalments and repaid over 10 years (1954–63).

Following the initiative of the United States of America in returning to China her share of the 1900 Indemnity, commonly known as 'boxer indemnity,' Great Britain exchanged Notes with China on 19 September and 22 September, 1930, by which it was agreed that Great Britain should also return her share of the 1900 Indemnity as from 1 December, 1922, to the control of the Chinese Government, stipulating that the bulk of the funds thus remitted be devoted to railway building and educational purposes. The funds to which the agreement refers amounted to £3,442,731 in April, 1931, when the Board of Trustees for the administration of these funds was instituted, while the instalments payable by the Chinese Government from April, 1931, to December, 1946, when all payments were due to cease, amounted to £7,743,816.

Before the Sino-Japanese war, the amount of foreign loans secured

on customs, salt and national treasury revenues totalled £59,059,200, $30,400,000 U.S., 3,300,000 yen and 1,340,000 Chinese dollars. The unpaid amount of principal and interest on these loans is £52,749,833, $22,885,100 U.S., 2,161,000 yen and 1,340,000 Chinese dollars.

During the Second World War the National Government raised twelve foreign loans, amounting to $870,000,000 U.S. and £58,047,000, as follows: (1) on 1 February, 1942, from the United States, $500,000,000; (2) on 2 May, 1944, from Great Britain, £50,000,000; (3) the Sino-American Tung Oil Loan of $25,000,000 U.S.; (4) the Sino-American Tin Loan of $20,000,000 U.S.; (5) the Sino-American Tungsten Loan of $25,000,000 U.S.; (6) the Sino-American Metal Reserve Loan of $50,000,000 U.S.; (7) the first Sino-Soviet Barter Credit Loan of $50,000,000 U.S.; (8) the second Sino-Soviet Barter Credit Loan of $50,000,000 U.S.; (9) the third Sino-Soviet Barter Credit Loan of $150,000,000 U.S.; (10) the first Sino-British Export Credit Loan of £188,000; (11) the second Sino-British Export Credit Loan of £2,859,000, and (12) the third Sino-British Export Credit Loan of £5,000,000.

The outstanding internal government loans totalled C.N. $12,701,350,000 at the end of 1947. These include loans expressed in Customs Gold Units totalling C.G.U. 100,000,000. (The Customs Gold Unit was a gold unit of account for expressing customs duty payments. During the war with Japan, it was made equivalent to C.N. $20.) During and since the war, the National Government floated a number of domestic loans in terms of foreign currencies: $250,000,000 U.S.; £20,500,000.

On 4 Sept., 1948, the National Government announced a revalorization of the C.N. $ bonds which had been converted into Gold Yuan bonds at the rate of C.N. $3,000,000 to 1 G.Y., in accordance with the August currency conversion. Domestic loans denominated in foreign currency were simultaneously consolidated into a single issue—Reorganized Bonds of 1948, Series A, B and C.

Defence.

Army.—(People's Government.) Commander-in-Chief: Chu Teh. The size of the Army is unknown but would seem to include about 70 good divisions. The army is mainly equipped with Japanese arms turned over by the U.S.S.R. occupation forces in Manchuria and with American war material captured from the Nationalist Government forces. The People's Militia Force, in Oct., 1950, was declared to number 5·5 million.

(National Government.) The formerly large Nationalist Army has disintegrated mainly by defection to the Communist forces. The present army consists entirely of the better-trained 'personal troops' of Chiang Kai-shek in Taiwan.

Navy.—Present strength including vessels being transferred from the British and U.S. Navies, or taken over from the surrendered tonnage of the Japanese fleet, comprises 7 destroyers, 23 destroyer escorts, 1 sloop, 8 patrol vessels, 20 [illegible], 14 minesweepers, 11 submarine chasers, and various auxiliary [illegible] craft, divided between Nationalists and Communists. In July 1950, the Nationalists had 7 destroyers, 13 destroyer escorts, 1 sloop, 4 patrol vessels, 12 minesweepers, 3 gunboats, 25 landing ships, 1 minelayer, 1 transport and 1 oiler. A number of Chinese naval officers have undergone training in the British Navy.

There are no naval bases of any importance. Existing dockyards are: Foochow, Taku, Kiangnan (Shanghai) and Amoy (Fukien).

Air Force.—The small National air force is equipped with aeroplanes of British or U.S. manufacture acquired under Lend-Lease. The People's

Government built up, in 1950–51, a tactical force of about 700–800 aircraft, including jet fighters. Equipment and instruction are provided by the Soviets.

Production and Industry.

Agriculture.—China is essentially an agricultural country. The distribution of farm tenancy in 1946 was :—Owners, 40%; part-owners, 25%; tenants, 35%. The standard of living of the farming population is low.

Total arable land in China is estimated at about 192,060 square miles. The holdings are in general small; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture has reached a high state of perfection, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Wheat, barley, maize, kaoliang and millet and other cereals, with peas and beans, are chiefly cultivated in the north; rice, sugar and indigo in the south. China's fibre crops are also important: chief are abutilon, hemp, jute, ramie and flax.

A law passed on 30 June, 1950, decreed the confiscation of land belonging to feudal lords and the requisition of land owned by churches, monasteries, schools and similar institutions; the land is to be taken over by the peasants' associations.

The production of the principal crops in 1942, 1943 and 1946 in the following 15 provinces (Shensi, Kansu, Ningshia, Chinghai, Honan, Hupeh, Szechwan, Yunnan, Kweichow, Hunan, Kiangsi, Chekiang, Fukien, Kwangtung and Kwangsi), and in 1947 for an unspecified area called 'China proper' was as follows, in 1,000 piculs (1 picul = 110 lb.) :—

	1942	1943	1946	1947
Rice	635,229	609,488	967,482	905,155
Wheat	209,729	199,196	467,762	492,850
Barley	89,363	81,042	125,947	138,099
Kaoliang	24,044	28,055	109,761	98,371
Maize	58,196	64,899	151,962	150,131
Millet	14,754	17,915	155,922	132,257
Oats	3,094	2,916	13,907	—
Sweet potatoes	242,606	290,284	508,176	487,687
Soya beans	—	—	90,692	94,512

Wheat yield, 1950, was estimated at 20 million tons.

Cotton is grown widely even as far north as the southern and central part of Hopei, the chief area of production being along the Yangtse and Yellow River valleys. China ranks after the United States and India as the third among the world producers of cotton. The average yearly production was 2,855,000 bales in 1935–39; production in 1946–47, 2,500,000 bales; in 1947–48, 2,030,000 bales; in 1948–49 (estimate), 1,850,000 bales; in 1949–50 (estimate), 1,955,000 bales (of 480 lb. net). Tea is cultivated exclusively in the west and south; silk culture is one of the oldest industries, but has much deteriorated in recent years. The production of silk cocoons is estimated at 3,300,000 *piculs*, of which about 40% is produced in the central provinces of Kiangsu, Chekiang and Anhwei. Raw-silk production in 1949 was estimated at 73,000 *piculs*.

The tobacco crop in 1949 was estimated at 140 million lb. in China (1948, 270 million lb.) and at 24 million lb. in Taiwan.

By the middle of 1950, 26·6 million hectares of farm land had been brought under irrigation.

Pigs are raised everywhere in China, and pigs' bristles have become

a foremost article of export. Livestock estimates, in 1946:—Oxen, 22,885,000; buffaloes, 9,203,000; goats, 17,859,000; sheep, 19,227,000; pigs, 55,605,000; horses, 4,967,000; donkeys, 6,847,000; mules, 2,828,000; chickens, 191,652,000; ducks, 56,187,000; geese, 6,878,000.

The chief forested areas are in Heilungkiang (Manchuria), Szechuen and Yunnan. The most important tree is the tung (*Jatropha Curcas L.*), from which oil is produced: it grows chiefly in Szechuen. Tung-oil production averaged 132,000 short tons in 1933–39 and amounted to 115,000 metric tons in 1948–49; tung-oil exports in 1947 totalled 82,494 tons.

The most important timber product is teak, which is used everywhere in China for building, furniture and coffins. Vast waste mountainous areas are suitable for re-afforestation.

Manufacture.—An important feature in the development of Chinese industries has been the erection of cotton and wool mills, and of silk filatures in Shanghai, Canton and elsewhere. Native looms are found in most districts. The cotton spinning industry, in 1947, had 3 million spindles operating, compared with 4 million pre-war. A large number of Japanese spindles, principally in Shanghai, was taken over as war reparations in 1945. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. At Hanyang, near Hankow, are large Chinese iron-works, supplied with ore from mines at Tayeh, about 60 miles distant. Electrical enterprises are making good progress. Water-works have been established in most of the big cities. The tanning industry has 116 factories principally in Kiangsu, Hopei and Shantung. Cement works number 12, with an annual output of 8,140,000 barrels. Match manufacturing is centred in Shantung, Kwantung and Kiangsu.

At the end of 1947, registered factories numbered 7,815:—Food, 1,888; chemical, 1,840, textiles, 1,679; machinery, 970; clothing, 385; metal works, 353; metallurgy, 169; electrical appliances, 146; others, 420. One third of these was in Shanghai.

Mining.—Coal, gold, iron, copper, lead, zinc, silver, tungsten, mercury, antimony and tin are all produced in Western China. Most of the provinces contain coal; output in 1946 was 18,457,000 metric tons; 1947, 17,200,000. The coal resources of China at the end of 1946 were estimated at 262,941,000,000 metric tons. Iron ores are abundant in the anthracite field of Shansi (where the iron industry is the oldest in the world), in Hopei, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. Three hundred million tons of ore are estimated to be in Shansi; the principal iron ore reserves total about 1,984,000,000 tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. Output of iron ore in 1948, 246,600 metric tons (estimate). Output of pig-iron (1948), 47,400 metric tons (estimate). The output of pyrites fell from 64,876 metric tons in 1947 to 42,907 metric tons in 1948.

On the Upper Yangtse and in Shensi petroleum is being worked; there are 91 wells. Oil is being extracted in South Manchuria, Shensi and Kansu Provinces. Tin ore is plentiful in Yunnan, where the tin-mining industry has long existed; production of tin in 1947, 1,279 metric tons. Tin and wolfram are the most important mineral exports. China used to produce 60% of the world's total production of antimony; but has been outpaced by Bolivia, Mexico, the United States and the Union of South Africa; output in 1948, 3,251 metric tons. Molybdenum ore has been found in Fukien and Kiangsi; bismuth has also been worked. China is the world's principal producer of tungsten, supplying 12,200 metric tons in 1948 out of the world's output of 32,000 metric tons. Mining for wolfram (tungsten

ore) is carried on in Hunan, Kwantung and Yunnan. Manganese output in 1947 and 1948 was 20,000 metric tons each year. Output of mercury in 1948 was 290 metric tons, compared with 4,293 in 1942.

Output of alumina rose from 15,000 metric tons in 1942 to 392,300 metric tons in 1945, fell to 138,000 tons in 1946 and was negligible in 1947.

On 27 March, 1950, two Chinese-Soviet joint-stock companies were established for developing oil and non-ferrous metals in Sinkiang province.

Trade Unions were given a legal status by the Guild Law of the National Government of 12 June, 1947. The Railwaymen's Union, founded 1 Dec., 1947, claimed a membership of 300,000; the Seamen's Union, founded 5 Dec., 1947, of 150,000; the Textile Workers' Union, formed 24 July, 1950, of 400,000. Total trade-union membership in 1950 was over 4 million.

In Aug., 1950, there were some 38,000 co-operative organizations with 20 million members, mostly peasants' supply and marketing co-operatives.

Commerce.

Foreign trade of China (exclusive of bullion), in Chinese dollars[1]:—

	1939	1943	1946[2]	1947[2]
Net imports . .	1,333,653,896	3,384,324,100	1,501,165,216,000	10,681,326,571,000
Net exports . .	1,027,246,508	164,459,288	412,111,811,000	6,376,504,297,000

[1] The Chinese foreign trade statistics are distorted by the depreciating value of the Chinese currency in recent years.

[2] Additional value of imports of UNRRA supplies, in 1946, 399,231,335,000 Chinese National dollars; in 1947, 3,696,520,677,000 Chinese National dollars.

Ever since the [illegible] China to foreign trade, China has had (with the exception of a [illegible] an unfavourable balance of trade, which was covered, in the main, by homeward remittances of overseas Chinese.

Of the total imports in 1947, the United States furnished 50·15%, India 9·04%, Great Britain 6·86%, Canada 3·80% and Persia 3·70%. Of the total exports 34·18% went to Hong Kong, 23·31 to U.S.A., 6·56% to Great Britain, 5·05% to Aden and 3·36% to the Philippines.

Principal imports in 1947 (in 1,000 Chinese National dollars):—Dyes, pigments, paints and varnishes, 491,691,123; books, maps, paper and wood pulp, 653,150,099; raw cotton, cotton yarn and thread, 1,982,264,167; metals and ores, 990,802,386; oils, fats, soap, etc., 1,657,026,493; vehicles and vessels, 569,708,082; chemicals and pharmaceuticals, 649,312,458. The principal exports were animals and animal products, 1,190,157,366; oils, 1,222,042,834, ores and metals, 342,791,082; tea, 230,172,101; piece-goods, 1,082,753,987; yarns and threads, 528,817,791. Tung oil (wood oil) has since 1936 become the chief item of export.

The total export of tea to foreign countries has been as follows (in lb.):—1895, 248,757,333; 1905, 182,573,064; 1915, 237,647,066; 1938, 91,764,493; 1947, 36,250,900 (including 10·5 million lb. from Taiwan); 1948, 38,583,600 lb. The export of tea and silk has been decreasing, due to competition from other countries and lack of improvement in production methods, marketing and sales technique in China

Total trade between the United Kingdom and China (in £ sterling):—

	1938	1947	1948	1949	1950
Imports into U.K. . .	7,137,935	7,172,090	8,201,085	3,622,320	10,364,370
Exports from U.K. .	4,357,581	12,777,090	8,649,844	2,257,077	3,588,863
Re-exports from U.K. .	104,935	47,168	67,496	148,925	3,833

In December, 1947, the following foreign firms were engaged in business in China :—140 export and import, 7 shipping, 80 insurance, 14 banking, 48 general traders, 42 engineering, 6 hotels, 10 film production, 1 press, 1 aviation. Nationality of the firms :—151 British, 142 American, 20 Swiss, 11 French, 7 Oversea Chinese, 6 Belgian, 6 Dutch, 4 Danish, 2 Canadian, and one each Australian, Cuban, Czech, Italian and Swedish.

Communications.

Although the Communist Government extended its authority southward during 1949, the Nationalist Government's blockade of the coast prevented all but a few small ships from entering Chinese ports. With the repairing of the Canton–Hankow Railway at the end of 1949, goods began to move in and out of South China increasingly *via* Hong Kong.

Shipping.—Total shipping under Chinese flag, in 1948, 1,179 vessels of 714,548 tons.

Vessels entered from and cleared for abroad in 1947 :—31,751 vessels of 9,979,421 tons. Of these, 2,640,528 tons were American, 2,445,705 British, 554,008 Norwegian and 517,844 Dutch.

All questions relating to navigation and port control were, in Aug., 1950, placed under the Bureau of Navigation, with regional centres at Tientsin, Shanghai, Tsingtao Dairen and Canton.

Roads.—China is traversed in all directions by numerous roads, and a vast internal trade is carried on partly over them, and partly by means of numerous canals and navigable rivers. The construction of modern roads in China has gained considerable impetus in recent years. In 1947 highway mileage was 81,382. Among the principal roads is one from Kunming to Lashio in Burma (the Burma road), 700 miles long; another, a motor road to the north-west, connects Szechwan with Sinkiang and runs through that province to the Turkestan–Siberian railway, a distance of 2,500 miles from the war-time capital, Chungking. A railway and a motor road connect China with Indo-China.

Railways.—Chinese railway history began in 1876 when the Woosung [illegible] line was opened. At the end of 1947, there were 7,812 miles of railway excluding the South Manchuria Railway and the Chinese Eastern Railway, of which about 1,300 miles has been constructed by British enterprise and British capital.

The principal railways in China are :—(1) Peking–Hankow Railway, 814 miles; (2) Tientsin–Pukow Railway, 686 miles; (3) Canton–Hankow Railway, 768 miles; (4) Peking–Mukden Railway, 832 miles, including 305 miles of branch line; (5) [illegible] Railway, 247 miles; (6) [illegible], (7) Lung-Hai Railway, [illegible] Railway, 285 miles; (9) Peking–Suiyuan Railway, 540 miles; (10) Chekiang–Kiangsi Railway, 403 miles; (11) Tatung–Puchow Railway, 389 miles; (12) Yunnan Railway, from the Tonkin border to Kunming, 288 miles; (13) South Manchuria Railway, from Changchun to Dairen, 696 miles; (14) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifenho (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok, and southerly from Harbin to [illegible], joining the South Manchuria Railway. This line was built by the Russians, and under agreements dated 2 August, 1896, and 6 March, 1898, was operated by Russians and Chinese. It runs for 1,470 miles in Chinese territory. The gauge is the Russian standard of

5 feet, whilst that of all the other railways is 4 feet 8½ inches, with the exception of the Yunnan Railway, which has a gauge of 1 metre.

According to the Treaty between China and the U.S.S.R. of 14 August, 1945, the trunk line of the Chinese Eastern Railway and the South Manchuria Railway are now combined into one line, the Chinese Changchun Railway, and were to be jointly owned and operated by China and the U.S.S.R. for a period of 30 years, after which the railway was to revert to China without compensation. The Sino-Soviet treaty of Feb., 1950, provides for the transfer to China of 'her rights of co-administration' of the Changchun Railway immediately upon the conclusion of a peace treaty with Japan or not later than 1952.

Aviation.—In September, 1947, there were about 57,000 miles of commercial aviation routes in China operated by 2 Chinese companies (China National Airways Corporation and Central Airways Transport Corporation). These 2 companies were, in 1950, merged and reorganized under the name of Civil Aviation Company. On 1 Aug., 1950, services on the lines Tientsin–Canton and Tientsin–Chungking were inaugurated.

All foreign air services have ceased. Previously many international airlines came to Shanghai, and Chinese airlines operated to U.S.A., Hong Kong and other countries in the Far East.

A Sino-Soviet Civil Aviation Joint Stock Co. was formed in 1950, it operates lines from Peking to Alma Ata, Urkutsk and Chita.

Post.—China has a fairly well developed telegraph service. Telegraphs connect all the principal cities in the country, and there are lines to all the neighbouring countries. The telegraph lines in 1947 had a length of 97,360 miles. Wireless telegraph stations have been installed at 673 centres. Telephones in use in 1948: 244,000; length of telephone lines, 1947, 70,770 miles. Radio telephone services to U.S.A. and Great Britain were opened in 1947, to Moscow and Berlin in 1950.

Number of post offices of all kinds 1946 was 68,808.

Banking and Credit.

Under the National Government there were 7 government or state banks:—The Central Bank of China, the Bank of China, the Bank of Communications, the Farmers' Bank of China, the Postal Savings and Remittances Bank, the Central Trust of China, and the Central Cooperative Bank (established 1 Oct., 1947). The most important, the Central Bank of China, was opened on 1 Nov., 1928, with a capital of $20,000,000 supplied by the Ministry of Finance. It had the right to issue bank-notes, to mint and issue coins, to serve as the National Treasury, and to direct the flotation of national loans and treasury notes. In 1934 its capital was increased to $100,000,000.

Shortly after the Communist army moved into Peking, the People's Bank, established in Dec., 1948, superseded the Central Bank of China and became the sole [illegible] authority for all areas controlled by the People's Government. [illegible] of the Central Bank of China was moved to Taiwan at the end of 1949.

After the revolution, the Ta Ching Bank was re-organized as the Bank of China. In 1928 the Bank of China Regulations made it an international exchange bank. Its capital was again increased to $40,000,000 in 1935 and to $60,000,000 in July, 1942. Under the People's Government, it has been made the foreign exchange controlling authority. It now has 190 branches

at home and abroad. In 1928, the Bank of Communications was converted into a bank specially devoted to the development of the industries. In 1935 and 1942, the capital was successively increased to $20,000,000 and $60,000,000. It has 102 branches.

The Farmers' Bank of China was entrusted with extending farm loans and assisting rural finance; its capital was also increased to $60,000,000 in 1942. Besides its banking business, the Central Trust of China was authorised to purchase and sell commodities, to dispose of alien and enemy properties and to conduct insurance, trust and real estate business on behalf of the government. The Postal Savings and Remittance Bank is mainly a savings bank.

At the end of 1946, there were 621 'modern-style' banks, with 3,049 branches; 859 native banks, with 65 branches; 17 trust companies; 112 insurance companies, with 352 branches, and 377 co-operative banks with 11 branches.

The People's Government has proclaimed that financial enterprises shall be strictly controlled by the state. Private financial enterprises are to be subjected to state supervision and direction. On 28 Dec., 1950, all assets of the U.S. Government and private American firms were placed under control of the People's Government.

The Post Office has operated a savings bank since 1 July, 1919. In Jan., 1930, the banking department was authorized to form an administration separate from that in charge of posts and mail. By 30 June, 1936, there were 679 establishments with savings facilities, with 236,646 depositors.

In order to encourage the deposit of funds with the banks, and thus permit a check to the inflation, the People's Government has introduced a system of Parity Deposit Units (contemplated earlier by the National Government) whereby bank deposits are constituted and repaid in fixed value units expressed in terms of commodities. Like the official exchange rate, the Parity Deposit Unit, in terms of People's Dollars, has increased considerably since its introduction.

Currency.

On 3 November, 1935, China left the silver standard. The notes of the 4 government banks, denominated in yuan, or Chinese National dollar (C.N. $), were declared legal tender (*fa pi*). A new token silver dollar 880/1,000 fine, of gross weight 26·6971 grammes and fine silver content of 23·493448 grammes, was to be minted, mainly at the Central Mint in Shanghai. The coins were never issued.

The Chinese dollar was given an exchange value of 1*s.* 2½*d.* and U.S. cents 30 at the time of the currency reform and this value was maintained until March, 1938. Since then progressive depreciation occurred under the impact of note issue financing of the budget deficit. Control of foreign exchange transactions was instituted when the Central Bank of China returned to Shanghai from Chungking soon after the end of hostilities. In Nov., 1946, licensing of imports was introduced. On 19 Aug., 1948, when prices were 6–10 million times the 1937 level and the U.S. $ exchange rate was nearly 4 million times the pre-war rate of 3·39, the Gold Yuan was introduced by decree. C.N. $ bank-notes and obligations were converted into Gold Yuan at C.N. $3,000,000 to 1 G.Y. The conversion rate for North Eastern Provinces notes was N.E.P. $300,000 to 1 G.Y. Taiwan currency was not affected. The Gold Yuan was given a value of U.S. cents 25. The new notes were backed 40% by gold, silver and foreign exchange, and 60%

by government industrial assets. A ceiling of G.Y. 2,000 millions was set to the new note issue. Prices and wages were pegged at the 19 Aug. level. For a month or two the currency conversion was successful in restoring confidence and bringing in substantial amounts of gold, silver and foreign exchange. The currency expansion resulting from these receipts, and the inability of the authorities to off-set this by sufficiently large sales of shares [illegible] industrial enterprises, led to a great redundancy of money. [illegible] developments in North China and Manchuria caused a wild rush of money into goods. On 1 Nov., 1948, the government was forced to lift the price and wage ceilings and ten days later to permit the legal circulation of silver coins and the holding of gold and foreign currencies, all of which had been banned under the 19 Aug. decree. The Gold Yuan was also devalued to one-fifth, viz. 20 G.Y. = U.S. $1.

As the Communists advanced during 1949, the Gold Yuan in the Nationalist Government areas rapidly and finally collapsed amidst all the manifestations of hyper-inflation. Whereas the former currency (*fa pi*) had lasted for the unprecedented period of 11 years of continuous war-time inflation, its successor endured for barely 9 months.

The new legal tender currency on the mainland of China is the 'Jen Min Piao' (People's Dollar) issued by the People's Bank. It has not escaped inflation on account of the continuing budget deficit. Prices throughout China have risen considerably and the official exchange rate of the People's Dollar has had to be adjusted frequently. The rates on 12 Sept., 1950, were :—U.S. $1 = P.B. $31,000 and £1 = P.B. $78,210. For the first time in recent years an official rouble exchange rate is being quoted (P.B. $4,340 on 23 Dec., 1949).

Weights and Measures.

In China, standards of weights, measures and length vary all over the country. Generally speaking, two kinds of standards are in use, namely, the old and the new. The old standard was formulated from the Weights and Measures Law promulgated in 1914, establishing a double system, the standard metric unit and that based on *ying tsao ch'ih*, or 'builder's foot' for length and Kuping tael or *liang* for weight. The law governing the new standard was promulgated by the National Government on 6 February, 1929, and was intended to be the legal standard of weights and measures throughout China. For convenience sake and customary usage it also established a double system; one is the standard metric unit, which came into operation in the Customs service on 1 February, 1934, and the other, which was temporary in nature and to be abolished as soon as the people were accustomed to the use of standard units, was designed only for market use. The latter was derived from the former by taking one litre of Kung Sheng as one *Shih Sheng*, which is nearest to the Chinese customary unit of capacity *Sheng*; one-half kilogramme as one *Shih Chin*, which is the average weight of the different varieties of *Chin* in different localities; and one-third of a metre of *Kung Ch'ih* as one *Shih Ch'ih*, which is the average length of different varieties of Chinese 'foot' in different localities, thus constituting the so-called 1-2-3-system of Chinese weights and measures based on international metric standard. Such a system as proclaimed by the National Government to be put into force may also have great bearing on the users of British 'foot-pound' system by taking the following approximate value: 1 quart = 1 litre, 1 lb. = ½ kilogramme and 1 yard = 1 metre. The Russian and Japanese systems can also be thus varied accordingly

so as to fit themselves to the international system. The following table shows the old units of weight, capacity and length :—

WEIGHT.

10 *Ssu*	.	= 1	*Hao*.
10 *Hao*	.	= 1	*Li*.
10 *Li*	.	= 1	*Fên* (*candareen*).
10 *Fên*	.	= 1	*Ch'ien* (*mace*).
10 *Ch'ien*.	.	= 1	*Liang* (*tael*) = 37 301 grammes.
16 *Liang*.	.	= 1	*Chin* (*catty*) = 596·816 grammes.
100 *Chin*	.	= 1	*Tan* (*picul*).

CAPACITY.

10 *Sho*	.	= 1	*Ko*.
10 *Ko*	.	= 1	*Sheng*.
10 *Sheng*.	.	= 1	*Tou* = 10·354688 litres.
10 *Tan*	.	= 1	*Tan*. Commodities, even liquids, such as oil, spirits, etc., are commonly bought and sold by *weight*.

LENGTH.

10 *Fen*	.	= 1	*Ts'un* (inch).
10 *Ts'un*.	.	= 1	*Ch'ih* (foot) = ·32 metre.
10 *Ch'ih*	.	= 1	*Chang* = 3·2 metres.
180 *Chang*.	.	= 1	*Li* = 576 metres = $\frac{1}{3}$ mile.

By treaty between Great Britain and China, the *Ch'ih* of $14\frac{1}{10}$ English inches has been adopted as the standard, the Tael, Catty and Picul have been fixed at $1\frac{1}{3}$ oz., $1\frac{1}{3}$ lb., $133\frac{1}{3}$ lb. avoirdupois respectively. 1 *Mow* = $\frac{1}{6}$ of an acre.

Diplomatic Representatives.

1. OF CHINA IN GREAT BRITAIN (49 Portland Place, W.1).

Ambassador.—(Vacant.)

There are consular representatives at Birmingham, Liverpool, London and Manchester.

2. OF GREAT BRITAIN IN CHINA.

Chargé d'Affaires.—Lionel Henry Lamb, C.M.G., O.B.E.

Counsellors.—W. G. C. Graham (*Chinese and Consular*); H. H. Thomas, C.B.E. (*Financial*).

First Secretaries.—C. T. Crowe; J. F. Ford, O.B.E. (*Chinese*); P. A. North (*Consular*).

Civil Air Attaché.—Group Capt. R. J. Bone, C.B., C.B.E., D.S.O.

There are British consular representatives at Amoy, Canton, Chungking, Hankow, Nanking, Peking, Shanghai, Tientsin, Tsingtao and other towns.

The Island of **Taiwan**, was ceded to Japan by China by the treaty of Shimonoseki, which was ratified on 8 May, 1895, and Japan took formal possession on 2 June of the same year. After the Second World War the island was *de facto* returned to China (Sept., 1945) and is now a province. It is controlled and administered by the remnants of the National Govern-

ment under Chiang Kai-shek who, on 1 March, 1950, resumed the presidency of the ' National Republic of China.'

Governor.—K. C. Wu.

The island, which was formally incorporated as part of China in 1683, has an area of 13,890 square miles, with a population, according to the census of 1946, of 6,083,617 exclusive of 4,318 foreigners, of whom 35 were British. The chief towns are Tai-pei (340,114 inhabitants in 1940 census), Tainan, Ki-lung (Kurun) and Taichu. The official language is Chinese (Amoy dialect).

The island is divided into five provinces (Taipei, Hsin-chu, Taichung, Tainan and Takao) and three districts (Hwa-Lien-Kang, Taitung and the Pescadores).

National and provincial taxes in 1950 yielded N.T.Y. 170 million.

The agricultural products of Taiwan are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a government monopoly. The cultivated area was estimated at 2,055,000 acres in 1949. Rice production in post-war years averaged 1,150,000 metric tons. Pineapple crop, 1946, 17,265 metric tons; 1948 (estimate), 16,000 metric tons. Bananas, 1938–44 average, 150,000 metric tons; 1948, 78,000 metric tons. The quantity of tea produced in 1935–40 [illegible] 10,350 metric tons; estimate for 1948, 9,600 metric tons; for [illegible] metric tons. Yield of sugar in 1948, 500,000 metric tons (nearly 1 million in 1938). The number of animals (13 Dec., 1937) was:—Horses, 924; goats, 70,384; cattle, 76,341; pigs, 1,849,195; buffaloes, 282,101. The industries comprise flour-milling, sugar, tobacco, oil, spirits, iron-work, glass, bricks, soap, and many other manufactures. Mining is making steady progress, gold, silver, copper and coal being the principal minerals; the output (in metric tons) of coal in 1948, was 1,649,000; aluminium, 2,500; copper, 1,183; sulphur, 1,000; gold, 12,000 troy oz.; silver, 6,870 fine oz.

Exports in 1948 included 72,000 metric tons of sugar and 32,350 tons of salt to Japan, and 32,150 metric tons of cement to the Philippines; exports to U.S.A., consisting chiefly of tea, canned pineapples, bamboo poles and aluminum, were valued at $1,728,179.

Taiwan exports to the United Kingdom, 1947, £19,791; 1948, £58,604; 1949, £124,029; 1950, £442,966; imports from United Kingdom, 1947, £100; 1948, £42,139; 1949 £100,784; 1950, £44,261. Taiwan exports to U.S.A., 1949, $1,708,000 (1948, $1,116,000); imports from U.S.A., $53,440,000 (1948, $5,962,000).

The total length of the Taiwan Railway, which is under provincial control, is approximately 1,000 kilometres; there are in addition approximately 3,000 kilometres of privately owned railways, most of them owned by the Taiwan Sugar Corporation. Taiwan railways have various gauges, ranging from 3 ft. 6 in. to 2 ft.

Roads have been and are being constructed throughout the island.

In 1937–38 there were 193 post offices. The telegraph service had 217 offices; length of line, 734 miles; of wire, 3,843 miles. Telephone line, 2,946 miles; length of wire, 71,112 miles. The Taiwan power plant had a capacity of 48,000 kw. in 1945.

On the return of Taiwan to Chinese sovereignty, the existing currency was converted into notes of the Bank of Taiwan. Taiwan dollars were linked to Chinese national currency at a fixed rate of exchange. Taiwan was not so affected by inflation as the mainland, and Taiwan dollars have maintained a premium over C.N. $. On 19 Aug., 1948, the rate was fixed at T. $1.835 to 1 G.Y. When the Gold Yuan entered upon its last phase

in early 1949, the Taiwan currency was detached and linked to the U.S. dollar. The New Taiwan Yuan, however, has also been unable to keep its original rate of exchange N.T.Y. 8 = $1, U.S.; on 14 June, 1950, the buying rate for $1, U.S., was N.T.Y. 14.30. Note circulation, 30 June, 1950, was N.T.Y. 195,740,471, plus an additional circulation of subsidiary notes and coins of about N.T.Y. 40 million.

Taiwan is normally linked with the mainland by daily air services. A shipping service continues between Taiwan and Hong Kong.

COLOMBIA.

(REPÚBLICA DE COLOMBIA.)

Constitution and Government.

THE Republic of Colombia, which in colonial days was called 'Viceroyalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted 17 Dec., 1819, together with the present territories of Panama, Venezuela and Ecuador, the state of 'Greater Colombia,' which continued for about 12 years. It then split up into Venezuela, Ecuador and the republic of New Granada in 1830. The constitution of 22 May, 1858, changed New Granada into a confederation of 8 states, under the name of Confederation Granadina. 8 May, 1863, saw another constitution, and the adoption of the name of the United States of Colombia. The revolution of 1885 led the National Council of Bogotá, composed of 2 delegates from each state, to promulgate the constitution of 5 Aug., 1886, forming the republic of Colombia, which abolished the sovereignty of the states, converting them into departments, with governors appointed by the President of the Republic, though they retained some of their old rights, such as the management of their own finances. A decree of May, 1928, abolished their right to borrow abroad without the sanction of the central Government

The legislative power rests with a Congress of 2 houses, the Senate, of 63 members, elected for 4 years, and the House of Representatives, of about 131 members, chosen for 2 years. By the Act of 1945 the senators are elected (1 for each 190,000 inhabitants) by direct vote of the electorate instead of, as previously, indirectly by departmental assemblies; the representatives are chosen by the people in each department (one for every 90,000). Voters at the 1941 elections numbered 1,933,345, or 46·16% of the electorate. Congress meets annually at Bogotá on 20 July; members are fined for non-attendance and receive 1,800 pesos monthly while in session. Women, though conceded citizenship, are expressly barred from voting (as are members of the Army and the police) and from elective office.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards. Congress elects, for a term of one year, two substitutes, one of whom occupies the presidency in the event of a vacancy during a presidential term. There are 13 Ministries. A National Economic Council, including 5 ministers and representatives of banking, [illegible] commerce, has been functioning since May, 1935. A Ministry [illegible] authorized in 1945, began to function in 1947.

The following is a list of presidents since 1898 :—

Dr. Manuel Antonio Sanclemente, 7 Aug., 1898–31 July, 1900.
Dr. José Manuel Marroquin, 31 July, 1900–7 Aug., 1904.
General Rafael Reyes, 7 Aug., 1904–April, 1909. Went abroad April, 1909, and resigned on his return 29 July, 1909.
General Jorge Holguin, April, 1909–7 Aug., 1909.
Dr. Ramón González Valencia, 7 Aug., 1909–7 Aug., 1910.
Dr. Carlos E. Restrepo, 7 Aug., 1910–7 Aug., 1914.
Dr. José Vicente Concha, 7 Aug., 1914–7 Aug., 1918
Dr. Marco Fidel Suárez, 7 Aug., 1918–11 Nov., 1921.
General Jorge Holguin, 11 Nov., 1921–7 Aug. 1922
General Pedro Nel Ospina, 7 Aug., 1922–7 Aug., 1926.
Dr. Miguel Abadia Méndez, 7 Aug., 1926–7 Aug., 1930.
Dr. Enrique Olaya Herrera, 7 Aug., 1930–7 Aug., 1934.
Dr. Alfonso López Pumarejo, 7 Aug., 1934–7 Aug., 1938.
Dr. Eduardo Santos, 7 Aug., 1938–7 Aug., 1942.
Dr. Alfonso López Pumarejo, 7 Aug., 1942–resigned in July, 1945.
Dr. Alberto Lléras Camargo, 7 Aug., 1945–7 Aug., 1946.
Dr. Mariano Ospina Peréz, 7 Aug., 1946–7 Aug., 1950.

President of the Republic (1950–54).—Dr. Laureano Gómez (a Conservative; elected on 27 Nov., 1949, without opposition as the Liberal party refused to take part in the election; he polled 956,000 votes). He was inaugurated 7 Aug., 1950; Congress had previously been dissolved by the out-going president who was also a Conservative. The Congress elected 5 June, 1949, was composed of 35 Liberals and 28 Conservatives in the Senate, and of 69 Liberals and 63 Conservatives in the House. Elections for a new Congress are scheduled for 5 June, 1951; an Electoral Mission from Canada will supervise the electoral rolls. On 26 Sept., 1950, President Gómez, then seriously ill, issued a decree naming the Minister of the Interior, Dr. Domingo Sarasty, as his successor in the event of his being forced to vacate the Presidency.

On 3 Nov., 1903, Panama asserted its independence and was formed into a separate republic. On 6 April, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognize the independence of Panama and receiving as indemnity for the Panama Canal zone $25 million, U.S., and certain rights in the zone. (*See* Introduction of THE STATESMAN'S YEAR-BOOK, 1915.) This treaty was ratified by both countries in 1921.

A boundary dispute with Peru, which lasted for over 100 years, was finally settled on 25 May, 1934, by a treaty signed in Rio de Janeiro adjusting the differences; that treaty has been ratified by the two [illegible].

On 5 April, 1941, Colombia signed a treaty with Venezuela delimiting the frontiers and establishing the free navigation of the rivers common to both countries.

National flag: yellow, blue, red (horizontal).

National anthem: Cesó la horrible noche (words by R. Nuñez; tune by O. Sindici).

Area and Population.

The area of the Republic is estimated at 1,139,155 sq. km. (439,829 square miles). It has a coastline of about 2,007 miles, of which 1,094 miles are on the Caribbean Sea and 913 miles on the Pacific Ocean. The estimated population on 1 July, 1949, was 11,015,210, with a density of 9·6 per sq. km. (25·0 per square mile). The area and population of the 15 departments, 2 intendencies and 7 commissaries, according to the census of 5 July, 1938, and as estimated for 5 July, 1949, were as follows (the capitals in brackets):—

	Area sq. miles	Census population, 5 July, 1938			Est. 1949
		Males	Females	Total	Total
Departments					
Antioquia (Medellín)	25,402	576,138	612,449	1,188,587	1,458,850
Atlántico (Barranquilla)	1,340	131,629	136,780	268,409	392,700
Bolívar (Cartagena)	22,981	379,062	386,132	765,194	1,020,280
Boyaca (Tunja)	24,928	351,478	385,890	737,368	786,660
Caldas (Manizales)	5,160	395,150	374,818	769,968	1,068,090
Cauca (Popayán)	11,657	175,122	180,918	356,040	445,080

[1] 1946.

Of the total population (including 105,807 Indians in 398 tribes) in 1938, 49·56% were males; urban population totalled 2,539,721, or 29·2%. The crude birth rate appears to be about 38·8 per 1,000 population; crude death rate, about 15·6; infant mortality rate, 163·0 per 1,000 live births (compared with 33·8 for the United States); crude marriage rate, 1946, was 5·3 per 1,000 population.

Foreigners in 1938 numbered 34,322, including:—Venezuelan, 9,942; German, 2,977; American, 2,887; British, 1,944; Italian, 1,448; Polish, 1,059; French, 1,055. In 1946 arrivals numbered 27,832, including 8,083 Americans, 6,403 Venezuelans and 1,274 British; departures were 23,776. Immigration of farmers and, up to a point, of technicians is encouraged but not that of the trading and commercial class. The immigrants are selected by a committee representing manufacturers, coffee growers, farmers and tradesmen.

The bulk of the population lives at altitudes of from 4,000 to 9,000 feet above sea level. In 1950, about 34% of the population was urban.

The capital, Bogotá (estimated population in 1950, 543,590), lies 8,703 feet above the sea. The chief commercial towns, with their population as estimated in 1950, are:—Medellín (264,570); Barranquilla (255,050); Cali, a coffee and mining centre (165,200); Manizales (130,060); Monteria (118,010); [illegible] (114,830); Pereira (103,405); Armenia (96,710); Ibagué (94 [illegible]). Barranquilla, which used to be connected with the coast at Puerto Colombia by 17 miles of railway and road, is now a seaport by the opening of the Bocas de Ceniza; the railway is no longer in service.

The language spoken is Spanish.

Religion, Education and Justice.

The religion of the nation is Roman Catholic. There are 4 Catholic archbishops, viz., of Bogotá, Cartagena, Medellín and Popayán, the first having 4 suffragans and the others 3 each. Other forms of religion are permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

Population over 7 years of age numbered 8,818,000 in 1947, of whom 2,741,613 adults and 1,170,458 children (7–14 years) or about 44% were literate.

Primary education is free but not compulsory, and facilities are limited. In 1948 public and private primary schools had 718,108 pupils out of a

primary school population (7 to 14 years old) estimated at 1,457,000. In 1946, there were 519 kindergartens, with 14,870 pupils; 12,886 elementary schools, with 17,539 teachers and 732,371 pupils; 37 vocational schools, with 3,513 pupils; 349 night schools, with 11,059 pupils; 188 commercial schools, with 6,527 pupils; 637 high schools, with 45,678 pupils; 38 agricultural schools, with 891 pupils; 28 art schools, with 2,485 pupils. The entire school system embraced 14,591 establishments with 26,092 teachers and 828,210 students; the Catholic Church is in charge of secondary education.

Besides the National University in Bogotá (founded 1572), there are four universities, that of Antioquia at Medellín, of Bolivar at Cartagena, of Cauca at Popoyán and Narino at Pasto. These and the private universities, in 1946, had 52 faculties with 1,200 teachers and 7,337 students (579 women). A law signed 17 Dec., 1934, requires that at least 10% of national government's revenue must be devoted to education; but an inquiry in 1950 showed that in 1948 only 5% (20·8 million pesos) out of a national expenditure of 414·6 million pesos went to education.

Motion-picture theatres numbered 641 in 1951 with seating capacity of 410,000. There are 34 daily newspapers (with aggregate daily circulation, 1947, of 340,000) and about 115 broadcasting stations.

The Supreme Court, at Bogotá, is divided into 3 chambers—civil cassation, criminal cassation, general business. Each judicial district has a superior court of 3 judges or more. Since 1932, married women have been granted full control of their property, and a share of property jointly acquired since marriage.

Finance.

Ordinary revenue and expenditure for 6 calendar years in paper pesos (worth about 57 cents, U.S.):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1946	277,342,538	281,919,910	1949 [1]	383,476,933	383,476,933
1947	373,519,000	329,511,000	1950 [1]	422,431,000	422,431,000
1948	399,261,000	391,425,000	1951 [1]	460,820,450	500,635,417

[1] Budget estimates.

With the declaration of martial law, 9 Nov., 1949, Congress adjourned without having passed the budget (389 million pesos) whereupon the government decreed a budget of 422 million. Beginning Jan., 1950, all receipts were pooled in a common fund, [illegible] previous system under which certain revenues were earmarked [illegible] expenditures.

In 1948 revenue from direct and indirect taxation was 246,765,000 pesos. Petroleum taxes furnish about 16% of total revenue. Expenditure:—Finance, 52,928,000 pesos; public debt service, 58,163,000 pesos; defence, 57,787,000 pesos; public works, 89,327,000 pesos; education, 20,957,000 pesos. Direct taxation has risen from 17 million in 1937 to 157·9 million in 1949 (budget); income tax, 1950, yielded 178 million pesos.

On 30 June, 1949, the total debt of the central government was 533,800,000 pesos, of which external debt (in dollars and sterling) was 165,900,000 pesos; internal debt was 368,800,000 pesos. Total debt of the departments was 106·8 million pesos (66·5 million external) and of the municipalities, 158·1 million (18·1 external). Only about 20% of the loans issued in the 1940s went into the hands of the public, including the commercial banks; there is no bond market of the usual type. The servicing

of the United Kingdom sterling debt was resumed in July, 1942, and a definite settlement reached in Dec., 1943. Nominal or par value of British investments, end of 1949, were £5,280,917, of which 18% were in default. American dollar loans outstanding at the end of 1941 were $123 million, of which 79·3% were in default, including $40 million in 11 bond issues of 6 departmental governments and 2 cities which have been in default since 1931. In Sept. 1949, service on the defaulted dollar bonds was resumed.

Defence.

Army.

Military service is compulsory between the years of 21 and 30. Service with the colours is for 1 year. From 30 to 45 years of age the citizens are on the reserved lists, classified in 1st, 2nd and 3rd classes, with the obligation of presenting themselves on being called up. The permanent Army consists of infantry, artillery, cavalry, engineers, motorized troops and the usual services. The peace effective varies between 12,000 and 15,000 men, according to the conditions established by the General Staff at each conscription period: the war effective is about 300,000 men, excluding the territorial army which would raise the figure to about 500,000. Number of national police, about 10,000.

Navy.

Colombia has 2 destroyers, the *Antioquia* (launched 1932) and *Caldas* (1933), refitted during the 1939–45 war, 1 frigate (*Almirante Padilla*), used as a cadets' sea-going training ship, 1 gunboat, 3 coastguard patrol vessels, 6 river gunboats, a transport, 2 oilers and some smaller craft. In 1934 the Colombian Navy was [illegible] by retired British naval officers. Personnel, 260 officers and [illegible]; the Navy has also a battalion of marines with 400 officers and men.

Air Force.

The Air Force, to which are attached several training schools, comprises fighting and training squadrons, including a paratroop company, and possesses an appreciable number of aircraft of various types.

Production and Industry.

Very little of the country is under cultivation but much of the soil is fertile and is coming into use as roads improve. The range of climate and crops is extraordinary; the [illegible] colleges have different courses for 'cold-climate farming' and '[illegible] farming.' Colombia is the second largest producer of coffee and ranks first in the output of mild coffee, demand for which is unaffected by over-production in Brazil. Crops are grown by smallholders, and are picked all the year round. Quality is carefully guarded: the coffee census of 1935 showed 150,000 plantations with 532,200,000 producing trees. Coffee output approaches 6,000,000 bags (of 60 kilos). Exports in 1950, were 4,472,000 bags valued at U.S. $357·8 million, compared with 5,410,000 bags in 1949, valued at $242·3 million. Exports are mainly to the United States. In 1948 coffee exports furnished 75% of the country's foreign exchange.

Rice, for domestic consumption, is increasingly important; output, 1949, 240,000 metric tons. Sugar output (exclusive of panela) in 1950 was 146,445 metric tons from 27 mills compared with 138,450 tons in 1949. Sugar plantations now cover 53,000 acres. Unrefined brown sugar, known as panela, is consumed locally; output, 1948, about 670,000 tons. Other

crops were (1949) maize, 635,000 tons; potatoes, 490,000 tons; plantain; and wheat, 118,000 tons. Banana exports reached the post-war record level of 6,000,000 stems in 1949. High-grade tobacco (about 19 million lb.) is an important crop. The rubber tree grows wild, and its cultivation has begun; output is a few hundred tons. Fibres are being exploited, notably the 'fique' fibre, which furnishes all the country's requirements for sacks and cordage; output, 1941, 38,428,500 lb. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena River, but little or no wood of any sort is exported. Forest lands total 180 million acres. An important agricultural colony has been established at Solano Bay in El Chocó Territory on the northern Pacific coast. Livestock census in 1947–48 showed 13,902,000 cattle, 2,070,000 pigs, 1,142,000 horses, 1,022,000 sheep, 400,000 goats and 772,000 mules and asses.

Colombia is rich in minerals; gold is found chiefly in Antioquia and moderately in Cauca, Caldas, Tolima, Nariño and Chocó; output in 1950, 406,320 fine oz. Foreign concessions produce about 60% of the gold. The domestic price for gold was raised in June, 1949, from 3·10 pesos per gramme to 6·30 pesos. Other minerals are silver (106,590 fine oz., in 1949), copper, lead, mercury, manganese, emeralds and platinum (first discovered in Colombia in 1735), which was long abundant in the alluvial deposits of the Chocó River; production, 1948, 40,047 fine oz. The working of the emerald mines is government-controlled, but exports have ceased. The chief mines are those of Muzo (government-owned) and Chivor (American-owned).

The country also has coal, iron, limestone, sand and fireclay deposits, and the 'National Steel Project' was launched in 1940 to develop an iron and steel industry in the Paz de Rio region; about 8 million tons of iron ore are available. The extraction of salt from the remarkable mines in Zipaquirá (several hundred feet thick and covering several hundred square miles) and the evaporation at the numerous natural salt pans along the Caribbean coast are a Government monopoly, leased to the Banco de la República; output of salt in 1949 was 126,000 tons. A new plant for caustic soda was opened nearby in Aug., 1950; output consists of caustic soda, soda ash, bicarbonate of soda and refined salt from the mines.

Petroleum production in 1950 amounted to 34,000,000 barrels; about half goes to Curaçao for refining. Exports, 1949, 23,672,000 barrels valued at $58,000,000, U.S. Investments in the petroleum industry amount to $176,159,720, of which Americans hold 70·54%, British 14·52%, Canadians 13·31%, Dutch 0·80% and Colombians 0·83%. But the petroleum companies are tending to withdraw from the country; proved reserves are still small (279,600,000 barrels as of Aug., 1951) and explorations have not been reassuring. Cement output, from 4 works in 1949, 475,000 tons; imports are about 100,000 tons.

Value of industrial output by 135,400 workers in 7,853 establishments (in the first census of manufactures in 1945) was 508,205,254 pesos, exclusive of salt, precious metals and petroleum. Capital investment was 399,940,643 pesos. Value of food products was 96,814,405 pesos; beverages 91,685,615 pesos, and textiles, 118,056,404 pesos. Of the workers employed, 90,111 were men; 45,289 were women; 1,659 were aliens. Colombia, 1949, had 447 electric power-plants of which 352 were hydro-electric. Electric power consumed in 1949, 625,000,000 kwh.

An expert mission from the International Bank in Washington studied the country's economy in 1949, and recommended in 1950 a 5,000 million pesos programme covering the years 1951–55.

New foreign investments in 1940 were $15,400,000; in 1945, $54,263,000. The total of foreign funds arriving in the 6 war years was $176,431,000.

The left-wing Colombian Federation of Labour (C.T.C.) had, in 1947, 109,000 members out of a total of 165,000 organized workers. The Jesuits in 1946 established a Catholic trade union, *Union de Trabajadores Colombianos*. In 1948 compulsory sharing of all profits exceeding 12% of a company's net worth was established for all concerns, domestic or foreign, employing 20 workers or more. Agricultural workers, though the lowest paid economic group, are specifically excluded from the minimum wage legislation on the grounds that they raise at least part of their food from their small plots of ground.

For distribution of population in 1938 as wage-earners, *see* THE STATESMAN'S YEAR-BOOK, 1944, p. 809

Commerce.

On 9 Aug., 1948, Colombia, Ecuador, Panama and Venezuela signed at Quito the 'Charter of Quito' pledging themselves to co-operate closely in trade and economic affairs with the ultimate goal of a 'Gran-Colombian Customs and Economic Union.' This was ratified by the Colombian Congress in Nov., 1949.

Exports and imports were placed in 1931 under Government control, to protect the foreign exchange value of the peso.

Imports (c.i.f. values) and exports (f.o.b. values) (excluding bullion and specie) for 6 years (in paper pesos, equal to 57 cents, U.S.):—

Year	Imports	Exports[1]	Year	Imports	Exports[1]
1944	174,666,000	227,299,000	1947	638,625,000	416,272,000
1945	281,182,399	216,175,441	1948	589,079,000	504,930,000
1946	403,013,029	351,836,381	1949	499,000,000	594,000,000

[1] Excluding export tax.

According to Washington figures, of Colombia's imports in 1949 the United States furnished 69·9%, Canada 5·4% and the United Kingdom 4·4%. Of Colombia's exports the United States took 100% of her gold and platinum, 90% of her coffee, 81% of her bananas and 50% of her petroleum.

Trade by principal countries in 1948, in paper pesos:—

Imports		Exports	
United States	410,978,000	United States	119,621,000
United Kingdom	33,162,000	Curaçao	22,461,000
Peru	16,848,000	Trinidad and Tobago	15,711,000
Sweden	11,551,000	Canada	11,519,000
Canada	11,281,000	Finland	7,012,000
Switzerland	13,258,000	Argentina	3,080,000
Belgium	10,890,000	Sweden	3,010,000
Brazil	8,736,000	United Kingdom	2,572,000

Important articles of export (1946) were, in pesos:—Coffee, 269,829,233 (76% of the total); petroleum, 41,749,266; leather, 4,208,862; cotton textiles, 5,682,851, and platinum, 2,554,684. The chief imports (1947) were, in pesos:—Machinery, 134,766,000; vehicles, 72,613,000; metals and

manufactures, 104,234,000; chemical products, 73,924,000. In 1947, exports of agricultural products totalled 349,814,000 pesos (nearly 80% of total) and minerals 65,663,000 pesos (14%).

Foreign exchange received in 1950 was nearly $58 million, U.S.

Total trade between United Kingdom and Colombia for 5 years (Board of Trade figures, in £ sterling):—

	1938	1947	1948	1949	1950
Imports into U.K. . . .	253,827	473,863	560,883	149,778	214,782
Exports from U.K. . . .	1,761,708	3,040,186	4,362,112	3,375,528	5,923,601
Re-exports from U.K. . .	19,557	36,089	16,369	12,424	38,457

Shipping and Communications.

Owing to the mountainous character of the country, the construction of arterial roads and railways is both costly and difficult. The Government has completed 60% of the 1931 programme for the construction of main roads and railways. The overhead ropeway connecting Mariquita with Manizales is the longest in the world (·72 kilometre). Total length of motor highways, 18,000 kilometres. Of the 2,300-mile Simon Bolivar highway which runs from Caracas in Venezuela to Guayaquil in Ecuador, the Colombian portion is complete. Buenaventura and Cali (Carretera al Mar) are linked by a highway. Motor vehicles numbered 55,800 in 1948.

In Colombia there are 17 lines of railway (8 national and state), with a total length of 3,467 kilometres, or 1,914 miles. Of the total, 1,606 miles have a gauge of 3 ft.; the rest a metre gauge. There is only one British-owned line in Colombia, La Dorada Railway Co. (111 kilometres). The national lines were placed in 1931 under the administration of a non-political council. Most of them are small disconnected lines serving principally as feeders to the Magdalena River which is the main traffic route between the Caribbean and the interior. The Pacific Railway connects Bogotá with the port of Buenaventura.

Venezuela, Colombia and Ecuador formed the Greater Colombia Merchant Marine (*Flota Mercante Grancolombiana*) on 8 June, 1946, with headquarters in Bogotá and sectional executive boards in Caracas and Quito. The corporation has an authorized capital of $20,000,000, of which Venezuela and Colombia propose to subscribe 45% each and Ecuador 10%. A fleet of 11 freighters (4,000 tons each) belonging to the company plus 22 chartered vessels in 1949 carried 729,695 metric tons of merchandise to and from the United States. Vessels entering Colombian ports in 1949 had a net registered tonnage of 6,960,000.

In civil aviation Colombia ranks either first or second among South American countries. In 1949 the 10 airlines flew 23,878,029 km., and carried 797,184 passengers and 143,598,384 kilos of cargo. Two lines, Avianca and Lansa, accounted for 93% of the total passenger traffic and 73% of the freight traffic. A daily aeroplane service connects Bogotá with the principal cities of the country.

The Magdalena River is subject to drought, and navigation is always impeded during the dry season. That river is navigable for 900 miles: steamers ascend to La Dorada, 592 miles from Barranquilla.

The length of telephone lines in service is 218,101 kilometres; instruments in use, 1 Jan., 1949, 70,300, of which 43% were automatic and about 88% under government operation. The All-American Cables Co., Inc., and the Marconi Wireless Company operate.

Money, Banking, Weights and Measures.

Colombia, in 1946, stated to the International Monetary Fund that the Colombian peso was equal to 57·1433 cents, U.S., or to 0·507816 gramme of fine gold; $1·00, U.S., was equal to 1·74999 pesos and 1 troy oz. of gold to 61·2495 pesos. But on 18 Dec., 1948, Colombia (with the consent of the I.M.F.) lowered the value of the peso to 0·50637 gramme of gold $\frac{9}{10}$th fine (compared with the previous level of 0·56424 gramme $\frac{9}{10}$th fine) representing a devaluation of 10 25%. The bank altered its buying rate for the dollar from 174·5 pesos to 194 9, making the peso equal to 51·282 cents, U.S.

After its devaluation, 18 Sept., 1949, the buying rate for sterling was 5·46 pesos to £1 compared with 7·86 before.

Under the law of 21 June, 1907, the monetary unit was a gold peso equal to one-fifth of a £ sterling and of proportionate weight, the fineness being the same; it equalled 97·3 cents, U.S. After some moderate fluctuations in the 1920s and 1930s it became stabilized at 57·143 cents in 1939.

Gold coins are 2½, 5 and 10 pesos. Silver coins are (900 fine) the half-peso and 20 and 10 centavos; but these are being replaced by 21 million new coins, half silver, half copper-nickel-zinc. Copper-nickel coins for 1, 2 and 5 centavos also circulate. There are also notes representing gold pesos of 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 pesos respectively. Gold coins are no longer in circulation.

On 23 July, 1923, the Banco de la República was inaugurated as a semi-official central bank, with the exclusive privilege of issuing bank-notes in Colombia. The capital amounts to 11,735,800 pesos. Its note issues must be covered by a reserve in gold or foreign exchange of 30% of their value; deposits are covered by a special currency reserve up to 12½% of their total. In 1948 the legal reserve was temporarily lowered to 25% to enable the authorities to buy abroad materials needed for the reconstruction of Bogotá following the destructive riots of 9 April. Gold stock has risen from $5,000,000, U.S., at the start, to $21,000,000 at the outbreak of the war and to $147,000,000 in Jan., 1947, falling rapidly thereafter to $63,000,000 in July, 1948, when publication of the gold figures ceased. On 31 Jan., 1950, the Central Bank had gold and foreign exchange valued at $127 million, U.S. (compared with $64 million in April, 1949); this was equal to 246,341,000 pesos against a note circulation of 424,371,000 (the latter compared with 270,933,000 pesos before the riots in Bogotá of April, 1948).

The Agricultural Mortgage Bank of Bogotá, formed by the consolidation of the mortgage departments of 5 principal banks in 1925, was supplemented in 1931 by the Agrarian Credit Bank with capital of 10 million pesos (later increased to 50 million) subscribed by Government departments, municipalities and others. It has 192 offices.

There are 10 domestic commercial banks of major size and 13 small ones; 4 foreign banks (British, Canadian, American); but 70% of all commercial bank deposits are with the 3 largest domestic banks which have branches throughout the country. In Nov., 1950, they were permitted to accept savings deposits, hitherto a government monopoly.

The metric system was introduced into the republic in 1857, but in ordinary commerce Spanish weights and measures are generally used.

Diplomatic and Consular Representatives.

1. Of Colombia in Great Britain (3, Hans Crescent, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—General Rafael Sánchez Amaya (accredited 22 June, 1950).

Minister-Counsellor.—Dr. José Joaquin Gori.
First Secretary.—Alfredo Taboada Buelvas.
Commercial Attaché.—Dr. Ernesto Anzola Cubides.

There are consular representatives at London, Glasgow and Liverpool.

2. Of Great Britain in Colombia.

Ambassador Extraordinary and Minister Plenipotentiary.—Gilbert MacKereth, C.M.G., M.C. (appointed 25 Nov., 1947).
First Secretaries.—F. F. Garner; T. E. Rogers, M.B.E. (*Commercial*); L. Boas (*Information*); C. A. Bryer (*Labour*),
Naval Attaché.—Capt. J. Lee-Barber, D.S.O., R.N.
Air Attaché.—Wing Cdr. A. F. Johnson, D.F.C.
Civil Air Attaché.—C. J. Lewin.

There are consular representatives at Barranquilla, Bogotá, Cartagena, Medellin, Santa Marta, Cali, Buenaventura and Mariquita.

COSTA RICA.

(República de Costa Rica.)

Constitution and Government.

The republic of Costa Rica (literally the 'Rich Coast') has been an independent state since the year 1821, although it formed, from 1824 to 1838, part of the Confederation of Central America. It has been governed under a constitution promulgated on 7 Dec., 1871, and modified very frequently since that date and as recently as 1949. The legislative power is normally vested in a single chamber called the Constitutional Congress, which since 1946 consists of 45 deputies, one for every 15,000 inhabitants.

The members of the chamber are elected for 4 years, one-half retiring every 2 years. The President is elected for 4 years; the candidate receiving the largest vote, provided it is over 40% of the total, is declared elected, but a second ballot is required if no candidate gets 40% of the total. By the election law of 18 Jan., 1946, all male citizens who are 20 years of age are entitled to vote; married men and teachers, from the age of 18. Barred are those deprived of civil rights, criminals, bankrupts and the insane; women over 21 were enfranchised in 1949, under the new constitution. Elections are held on the second Sunday in February. Voting for President, Deputies and Municipal Councillors is, by the law of 26 July, 1925, secret, and, by an amendment to the constitution in 1936, compulsory for all men under 70 years of age. Independent non-party candidates are barred from the ballot.

President.—Otilio Ulate, elected Feb., 1948, but his election was declared invalid by the Congress of that time. Following the revolution in March, 1948, and the establishment, in agreement with Ulate, of José Figueres as head of the Founding Junta which was to govern the country for a period of 18 months, a Constituent Assembly was elected in Dec., 1948, to revise the constitution. The election of President Ulate was confirmed by that assembly on 19 Jan., 1949, and on 8 Nov., 1949, Figueres formally handed over to Ulate.

Elections for Congress took place on 2 Oct., 1949, with the following results :—Unión Nacional (Ulate's party) 33 seats, 5 other parties, 12 seats between them.

The administration normally is carried on by 9 ministers, appointed by the President. The powers of the President are limited by the constitution, which leaves him the power to appoint and remove at will members of his cabinet. All other public appointments are made jointly in the names of the President and of the minister in charge of the department concerned.

National flag : blue, white, red.

National anthem : Nobile patria, tu hermosa bandera (words by J. M. Zeledón; tune by M. M. Gutierrez, 1821).

Area and Population.

The area of the republic is estimated at 51,011 square km. (19,695 square miles), divided into 7 provinces. The population at the census of 22 May, 1950, was 794,081, compared with 471,524 shown in the 1927 census. It is made up in the 7 provinces as follows :—San José, 281,252; Alajuela, 148,791; Cartago, 100,686; Heredia, 51,650; Guanacaste, 85,692; Puntarenas, 84,835; Limón, 41,088. The populations of the chief towns of the provinces are as follows :—San José, 86,718; Alajuela, 13,916; Cartago, 12,925; Heredia, 11,936; Puntarenas, 11,611; Limón, 11,302; Liberia (Guanacaste), 3,400. The census of May, 1950, covered agriculture as well as population; a housing census was taken on 28 Nov., 1949.

The vital statistics for 5 years were as follows :—

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1940	3,722	28,004	11,211	16,793	7,409	7,270
1945	4,813	32,529	10,768	21,761	15,340	15,715
1946	4,090	32,159	9,971	22,188	21,745	21,190
1947	5,568	41,930	10,967	30,963	22,833	22,215
1948	3,582	33,618	9,944	23,674	14,710	16,090

Crude birth rate, 1949, was 41·0 per 1,000 population; crude death rate, 11·8; infantile death rate, 97·4 per 1,000 live births; crude marriage rate, 6·5 per 1,000 population.

The population of European descent, many of them of pure Spanish blood, dwell mostly around the capital of the republic, San José, and in the principal towns of the provinces. Limón, on the Caribbean coast, and Puntarenas, on the Pacific coast, are the chief commercial ports. The United Fruit Company, who have abandoned their banana plantations on the Atlantic coast in favour of large new plantations on the Pacific coast, have constructed ports at Quepos and Golfito. There are some 15,000 coloured West Indians, mostly in Limón Province. The native Indian population is dwindling and is now estimated at 1,200.

Spanish is the language of the country.

Religion and Education.

Roman Catholicism is the religion of the state, but there is entire religious liberty under the constitution. The Archbishop of Costa Rica has under him the Bishops of Alajuela and Limón.

Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In Feb., 1950, there were 884 elementary schools with 4,331 teachers and 95,813 enrolled pupils. For secondary instruction there are 7 schools with 4,357 pupils and 253 teachers. There are also 59 private schools with 278 teachers and 6,456 pupils; and 7 technical schools with 37 teachers and 342 pupils. The University of Costa Rica, founded in San José in 1843, has 200 professors in 10 faculties. The budget for 1950 provides 10 million colones for public education. Since 1944, English has been taught in all secondary schools; the Assembly in Sept., 1949, voted that secondary education should be free.

Motion-picture theatres numbered 77 in 1949, with seating capacity of 36,013.

Labour and Social Security.

As Costa Rica is still essentially an agricultural country, the organization of labour has made progress only in the larger centres of population, and even there it is not a strong movement. Most of the unions are affiliated to an a-political confederation, the 'Rerum Novarum.' The Vanguardia Popular, formerly a Communist organization which made its peace with the Roman Catholic Church and, before the 1948 revolution, represented Labour in Congress, with 5 deputies in a house of 45, was banned in July, 1948.

As regards social legislation Costa Rica has possessed since 1943 an advanced labour code which provides considerable protection for the workers, while a system of social insurance against sickness, old age and death is gradually being extended throughout the country.

In 1946, there were 228 trade unions and 46 employers' organizations.

Justice.

Justice is administered by the Supreme Court of Justice, 4 appeal courts and the Court of Cassation. There are also subordinate courts in the separate provinces and local justices throughout the republic. Capital punishment cannot be inflicted. In 1948 there were 711 criminal cases and 11,121 cases of misdemeanour, including drink and traffic convictions.

Finance.

The revenue and expenditure (in colones) have been as follows (£ = 15·56 colones; $ = 5·60 colones):—

	1945	1946	1947	1948	1949[1]	1950[2]
Revenue .	60,549,229	62,922,712	88,047,783	90,079,514	113,008,650	108,168,365
Expenditure	74,438,760	78,726,614	92,491,327	114,796,553	113,008,650	108,168,365

[1] Actual revenue and expenditure are described as approximately the same as the Budget estimate herewith.
[2] Estimates.

The figures for 1949 are exclusive of an extraordinary budget of 107 million colones, comprising a 97 million colones bond issue for the national banking system and the co-ordination of the internal debt and a 10 million colones tax on capital to be devoted to various ministries.

The state finances steadily deteriorated, leading up to a political crisis in July, 1947, and finally to a revolution which overthrew the government in April, 1948. The new government decreed a capital levy of 10%, designed to raise 32 million colones, payable in 16 annual instalments; there has been a marked improvement in the finances of the state.

Estimated revenue for 1950 (in colones) includes customs receipts, 45,740,033; government commercial enterprises, 14,599,588; various taxes, 19,691,208, and capital levy, 12,997,059. The largest items of estimated expenditure for 1950 (in colones) are internal debt, 24,460,426; pensions and subventions, 17,319,865; public instruction, 10,192,842; public works, 9,693,000.

The public debt at the end of 1949, was 424,878,928 colones, including 157,117,139 colones external debt. Nearly 30% of the foreign debt represents unpaid interest (48,006,411 colones). Par value of British investments, 1949, was £4,459,960, of which 85·3% were in default. The only provision made in the 1950 budget for payments of external debt is 2,672,726 colones on a loan from the Export-Import Bank and £6,408 to a British construction firm.

Defence.

The Costa Rican army was abolished in 1948, and replaced by a Civil Guard reputed to be 1,200 strong.

The republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for revenue purposes.

Production and Industry.

Agriculture is the principal industry. The cultivated area is about 1,040,000 acres; grass lands cover 6,552,000 acres. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of rosewood, cedar, mahogany and other cabinet woods. Exports of logs and lumber, 1949, totalled 22,620 metric tons. The war temporarily stimulated the collection of wild rubber, the establishment of plantation rubber on 2,500 acres and the planting of some 11,500 acres to abaca or hemp. Rubber exports rose from 14 long tons in 1937 to 381 in 1943, falling to 25 long tons in 1946 and ceasing in 1948.

Output of dry abaca fibre, 1949, was 5,322 metric tons. The war also led to intensive cutting and shipping of balsa wood. The principal agricultural products are coffee (about 117,500 acres; average crop, 20,500 metric tons; exports, 1949, 16,590 metric tons, most of which went to U.S.A.); bananas (of which 223,459 metric tons were exported in 1949, practically all to the U.S.A.), and cocoa (exports, 5,510 metric tons). Maize, sugar cane (51,849,300 lb. of sugar in 1949), rice (41,313,000 lb. in 1948) and potatoes are [illegible] cultivated. About 5,000 acres are under tobacco. The [illegible] spirits is a government monopoly.

Soil erosion is serious; in some areas coffee cultivation has fallen to a fifth of its former output.

Dairy-farming and cattle-raising are substantial pursuits. In 1945, cattle numbered 401,104.

Gold is mined on the Pacific slope, but the mining of other mineral deposits is not very fully developed. Output of salt is between 3,000 and 4,000 tons annually.

Industry is still on a very small scale. Electricity, derived from water power in the highlands, is widely used as motive power; it was nationalized in 1928. Costa Rica is the seat of the Inter-American Institute of Agricultural Sciences, with headquarters at Turrialba.

Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows in U.S. dollars (5·60 colones = $1 U.S.):—

	1946	1947	1948	1949[1]	1950[2]
Imports	33,041,135	48,079,191	42,344,379	43,350,000	46,032,918
Exports	14,337,272	23,023,159	31,839,900	31,440,000	34,689,235

[1] Revised. [2] Provisional figures.

The quantity (in metric tons) and value (in U.S. dollars, at the rate of 5·60 colones = $1) of the principal imports and exports were as follows:—

Imports	1948		1949	
	Metric tons	Dollars	Metric tons	Dollars
Wheat flour	13,954	2,461,052	17,614	2,632,241
Copper sulphate	8,407	1,314,806	6,937	1,117,324
Cotton and rayon cloth	502	2,152,977	488	1,892,775
Petrol	22,864	993,344	22,589	967,217
Crude and Diesel oils	67,498	1,576,402	58,821	1,081,316
Motor vehicles	865 units	1,359,773	403 units	727,096
Fertilizers	9,685	674,991	10,827	852,838
Cement	21,111	573,223	28,357	833,960
Machinery	826	1,234,739	1,101	1,470,091
Total (all items)	214,062	42,344,379	225,307	43,351,519

Exports	1948		1949	
	Metric tons	Dollars	Metric tons	Dollars
Coffee	23,523	14,189,041	16,590	11,078,999
Bananas	190,460	8,036,729	223,459	11,815,410
Cocoa	4,304	3,378,925	5,511	2,319,090
Abaca (hemp)	6,264	3,240,225	5,322	2,534,661
Tunny fish	2,759	676,665	4,101	888,259
Sugar	5,704	608,921	9,284	1,038,043
Timber	28,261	562,712	22,621	250,568
Rice	736	155,909	nil	nil
Total (all items)	265,638	31,839,900	293,525	31,439,389

Imports from the United States were valued at $32,908,736 in 1948, and at $31,668,247 in 1949.

Imports from the British Commonwealth in 1949 were valued in dollars as follows:—United Kingdom, 1,833,145 (1,911,315 in 1948); Canada, 2,045,076 (808,645); India, 278,243 (450,181); Ceylon, 2,871 (4,133); Australia, 2,130 (3,857).

Exports to the United States, Canada and United Kingdom in 1949 and 1948, valued in dollars, were:—United States, 22,762,197 (in 1948, 25,034,418); Canada, 894,817 (480,787); United Kingdom, 97,787 (52,576).

By a law promulgated in April, 1950, imports are divided into one preferential and four other categories: importers of goods in the preferential category obtain foreign currency at the official rate of exchange; importers of goods in the other categories buy dollars auctioned on the open market (price March, 1951, *c.* 8·00 colones = $1). There is a surcharge on the official rate of exchange payable by importers as follows:—Preferential and first categories, 10%; second category, 55%; third, 75% and fourth, 100%.

Total trade between the United Kingdom and Costa Rica (Board of Trade returns) for 6 years (in £ sterling):—

	1938	1946	1947	1948	1949	1950
Imports into U.K.	807,372	38,460	113,455	53,157	11,791	8,641
Exports from U.K.	149,363	207,055	256,219	399,824	439,977	814,264
Re-exports from U.K.	2,877	104	2,323	3,172	2,107	3,922

Shipping and Communications.

In 1949, 1,000 ships entered the ports of the Republic (Port Limón, Puntarenas, Quepos and Golfito).

Passenger movement in and out of Costa Rica is almost entirely by air *via* Pan-American Airways, Taca and the Royal Dutch Airlines (K.L.M.). Subsidiary airlines controlled by these companies link San José by daily services with all the more important towns.

Two railway systems, totalling about 500 miles, connect San José with Limón, the Atlantic port (the Costa Rica Railway Company), and San José with Puntarenas, the Pacific port (the state-owned Ferrocarril Eléctrico al Pacífico). When the railway system is completed, through rail communication will be established between Port Limón and the port of Almirante in Panama. About 350 miles of motoring roads, in very fair repair, are now open. Of the Costa Rica section of the Inter-American highway, 204 kilometres have been

completed; 300 kilometres remain to be constructed. There is no road connecting with Panama, but in dry weather there is a rough road leading into Nicaragua. Motor vehicles, 1950, numbered 6,850.

A telephone service covering some 8,000 subscribers operates in and between San José and 6 other provincial centres. Cables were being laid (1947) to furnish service to another 10,000 subscribers.

The commercial wireless telegraph stations are operated by Cía. Radiográfica Internacional de Costa Rica. The stations are located at Cartago, Limón, Puntarenas, Quepos and Golfito. The Cartago station is remotely controlled from San José and offers international as well as local radiotelegraph and radiotelephone services. The station at Limón maintains coastal station service for communication with ships at sea. The stations at Limón, Puntarenas, Quepos and Golfito are mainly for local radiotelegraph and telephone service; Limón maintains radiotelegraph and telephone services to Almirante in Panama.

The Government has 19 wireless telegraph stations in its local network The principal or central station at San José also maintains international r[illegible] circuits to Nicaragua, Honduras, San Salvador and Mexico [illegible] has 202 telegraph offices and 88 official telephone stations. The official list of broadcasting stations shows 28 long-wave stations and 7 short-wave stations.

Banking and Credit.

By a law passed on 31 Jan., 1950, a Central Bank was established for the organization and direction of the national monetary system and of dealings in foreign exchange, the promotion of facilities for credit and the supervision of all banking operations in the country. The bank is an autonomous institution with a board of 7 directors appointed by the government, including *ex officio* the Minister of Economy and Finance. The initial capital is 3 million colones with reserves of 1½ million colones derived from the capital of the issue department of the National Bank which it replaced. On 31 Dec., 1950, it had gold amounting to 11,511,000 colones and foreign exchange, 9,353,000 colones; note circulation was 107,534,000 colones.

Preceding the Central Bank was the Banco Internacional de Costa Rica, established in Oct., 1914, as a Government bank of issue with an initial capital of 2,090,000 colones. In 1937 it was merged with the Credito Hipotecario to form the Banco Nacional, with an Exchange Equalization Board and control of coinage and currency for 99 years. The issue department on 31 Dec., 1950, held $2,055,533 (U.S.) in gold and $1,668,557 in foreign exchange. In June, 1948, the 3 small commercial banks were compulsorily nationalized.

The National Insurance Bank (Banco Nacional de Seguros)—a Government bank created in 1924 which has a monopoly of new insurance business—reported 30 June, 1949, total insurance written, 546,794,374 colones.

Money, Weights and Measures.

In 1946 Costa Rica informed the International Monetary Fund that the colon was equal to 17·8094 cents, U.S., or to 0·158267 gramme of fine gold; $1, U.S., equals 5·615 colones and 1 troy oz. of fine gold equals 196·525 colones. This was confirmed by an Act passed 18 March, 1947.

Gold coins have disappeared from circulation. Silver coins of 1 colon, 50 centimos and 25 centimos have also largely disappeared; in 1935 they were replaced by 1,200,000 colones of coins (2 and 1 colones and 50 and 25 centimos) made up of 3 parts copper and 1 part nickel, and given the same

value as the subsidiary silver currency. There are copper coins of 10 and 5 centimos.

The buying rate for dollars, March, 1951, was 5·60 colones and selling rate 5·67 colones. The free market rate, carrying a surcharge, was weak in 1950, reaching 9·50 colones in June. The total circulation of the country in Sept., 1950, was: notes, 98,031,000 colones; coins, 5,331,000.

The metric system is legally established and now in use; but in the country districts the following old Spanish weights and measures are found:—

libra = 1·014 lb. avoirdupois. *arroba* = 25·35 lb. avoirdupois.
quintal = 101·40 ,, *fanega* = 11 bushels (imperial bushel).

On 15 Jan., 1921, the republic adopted as its standard time that of the meridian 90° west of Greenwich. Time in San José is therefore 6 hours behind G.M.T.

Diplomatic and Consular Representatives.

1. Of Costa Rica in Great Britain

Chargé d'Affaires.—Dr. Guillermo Padilla Castro (95 Gresham Street, E.C.2).

There are consular representatives at Birmingham, Bristol, Cardiff, Manchester, Northampton, Southampton and Swansea.

2. Of Great Britain in Costa Rica.

Envoy Extraordinary and Minister Plenipotentiary.—H. B. Livingston, (appointed March, 1950).

First Secretary (Labour).—H. A. N. Brown (resident in Mexico).

Military Attaché.—Col. C. G. Irving-Bell (resident in Mexico).

Civil Air Attaché.—Wing Commander C. J. Lewin (resident in Kingston, Jamaica).

There are consular representatives at Port Limón and San José.

Books of Reference.

Statistical Information.—Official statistics are issued by the Director General de Estadistica (Ministero de Economia y Hacienda, San José) as they become available and are all incorporated in the 'Anuario de la Dirección General de Estadística' (latest volume, 1948). The compilation of statistics was started in 1861.

CUBA.

Constitution and Government.

Cuba, except for a brief period of British occupancy in 1762-63, remained a Spanish possession from the date of its discovery by Columbus in 1492 until 10 December, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris, which ended the armed intervention of the United

States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent state. A convention which assembled on 5 November, 1900, drew up a constitution which was adopted 21 February, 1901, under which the island assumed a republican form of government, with a President, Vice-President, a Senate and a House of Representatives.

See THE STATESMAN'S YEAR-BOOK, 1935, for subsequent developments.

Since the last representative in Cuba of the King of Spain, General Don Adolfo Jimenez Castellanos, handed over the island on 1 January, 1899, the following have been at the head of the administration :—

	Took office
United States Military Governors	
Major Gen. John Rutter Brooke	1 Jan., 1899
Major Gen. Leonard Wood	23 Dec., 1899
President of the Republic	
Don Tomas Estrada Palma	20 May, 1902 res. 28 Sept., 1906
United States Provisional Governors	
William Howard Taft	29 Sept., 1906
Charles Edward Magoon	13 Oct., 1906
Presidents of the Republic	
Gen. José Miguel Gomez	28 Jan., 1909
Gen. Mario Garcia Menocal	20 May, 1913
Dr. Alfredo Zayas y Alfonso	20 May, 1921
Gen. Gerardo Machado y Morales	20 May, 1925 dep. 12 Aug., 1933
Dr. Carlos Manuel de Cespedes	12 Aug., 1933 dep. 5 Sept., 1933
Provisional Junta, 5 Sept.–10 Sept., 1933	
Dr. Ramón Grau San Martin	10 Sept., 1933 res. 15 Jan., 1934
Col. Carlos Mendieta	Jan., 1934 res. 12 Dec., 1935
Dr. José A. Barnet	12 Dec., 1935
Dr. Miguel Mariano Gomez y Arias	20 May, 1936 impeached 23 Dec., 1936
Dr. Federico Laredo Brú	24 Dec., 1936
General Fulgencio Batistá	10 Oct., 1940
Dr. Ramón Grau San Martin	10 Oct., 1944

President.—Dr. Carlos Prio Socarras (elected 1 June, 1948; assumed office, 10 Oct., 1948, for 4 years).

Vice-President.—Guillermo Alonso Pujol.

President Prio was elected by an alliance of 3 parties, the Authentic Revolutionary, the Democratic and the Republican parties.

The President appoints the Cabinet, which consists of the Premier (selected by him), the President's secretary, 12 heads of departments and 3 ministers without portfolios.

The constitution of 12 June, 1935, based largely on that of 1901, provided for a 4-year term for the President (without re-election), restored the Vice-Presidency, gave representatives 4-year and senators 8-year terms of office and granted votes to women. The senate has 54 members and the lower house 140, one-half being elected every 2 years. Members of the lower house installed in Sept., 1950, included 5 members of the People's Socialist Party (Communist). Voters number about 2,500,000. A new constitution came into force in Oct., 1940. According to this the Cabinet is responsible to Congress; if it receives a vote of no confidence, the Cabinet must resign within 48 hours. The constitution also provides for a yearly 30 days' holiday with pay for all manual workers.

The country is divided into 6 provinces (each with a governor who is elected) and 119 municipalities.

National flag : 3 blue, 2 white (horizontal); a white five-pointed star in a red triangle at the hoist.

National anthem : Al combate corred bayameses (words and tune by P. Figueredo, 1868).

Area and Population.

The island of Cuba has an area of 44,206 square miles; the Isle of Pines has 1,180 square miles, and there are about 1,350 square miles in the

other islands. Census population, on 31 December, 1943, was 4,778,583, of whom 2,498,810 were males, 3,553,312 were white, 1,225,271 coloured or mixed and 201,177 were classified as foreigners. The area, population and density of population of each of the 6 provinces, on 31 December, 1943, were as follows :—

Province	Area (square miles)	Population (31 December, 1943)	Population per square mile
Havana	3,173	1,235,939	389·8
Pinar del Rio	5,211	398,794	76·5
Matanzas	3,259	361,079	110·7
Las Villas	8,264	938,581	113·5
Camaguey	10,169	487,076	47·8
Oriente	14,128	1,356,489	96 0
Total	44,206	4,778,583	108·1

Estimated (United Nations) population, 31 Dec., 1949, 5,199,000. Legislation provides for the taking of a national 'electoral census' in 1953. Vital statistics are undeveloped; the crude birth rate is known for some years ending in 1941 when the rate was 18·2 per 1,000 population.

The chief towns (with population, 1943) are :—Havana, 659,883 (including urban district, 673,376); Marianao, 124,918 (135,815); Holguín, 35,865 (171,997); Camaguey, 80,509 (155,827); Santa Clara, 53,981 (122,241); Santiago de Cuba, 118,266 (120,577); Sancti Spiritus, 28,262 (104,578); Cienfuegos, 52,910 (94,810); Guantánamo, 42,423 (91,737); Bayamo, 16,161 (90,124); Manzanillo, 36,295 (79,349); Ciego de Avila, 23,802 (78,508); Pinar del Rio, 26,241 (77,051), Matanzas, 54,844 (73,749), and Cárdenas, 37,059 (45,289).

Justice and Religion.

There is a Supreme Court in Havana and a Court of Appeal in each of the provinces. The provinces are divided into judicial districts, with courts for civil and criminal actions, with municipal courts for minor offences. The civil code guarantees aliens the same property and personal rights as are enjoyed by natives. There is no state Church, though Roman Catholics predominate; they are under a cardinal.

Education.

Education is compulsory (between the ages of 7 and 14) and free, but not available everywhere and juvenile illiteracy has increased; the 1943 census showed that 22% of all those over 10 years of age were illiterate, while the proportion among those between 10 and 14 years was 28·8%.

In the year ending 30 June, 1945, there were 498,286 children attending public schools (plus 72,000 at private schools) but the number attending no school was 481,000 or 45% of those of school age. There are about 9,000 classrooms and 9,500 teachers. There are also 11 travelling teachers, 140 night schools for working people and 587 private schools with 71,077 pupils. The Government maintains 21 institutes for advanced education and a normal school and a commercial school in each of the provinces. University instruction is given at the University of Havana (founded 12 Sept., 1721), the Oriente University at Santiago de Cuba, and the Catholic University of Villanova at Havana.

There were, in 1949, 521 cinemas with seating capacity of 316,573. In 1948 there were 33 daily newspapers with an estimated aggregate daily circulation of 448,000.

Finance.

Revenue and expenditure for 5 fiscal years ending 30 June (Cuban peso = $1, U.S.) were as follows :—

	1944	1945	1946	1948 [1]	1949-50 [1]
	Pesos	Pesos	Pesos	Pesos	Pesos
Revenue .	144,723,000	140,000,000	173,382,100	256,600,000	230,000,000
Expenditure .	143,391,000	140,000,000	173,367,575	256,600,000	223,000,000

[1] Budget estimate.

Failure of Congress to pass the 1947 budget resulted in the *de facto* adoption of the 1946 budget which, in turn, traces its legal powers back to laws passed in 1938.

The consolidated public debt of the republic (31 December, 1946) was 97,104,200 pesos, of which 89,986,900 pesos was the external debt. This is exclusive of the floating debt, estimated around 70,000,000 pesos. Treasury balance, 30 June, 1945, was 39,332,000 pesos. On 31 December, 1941, American dollar loans to Cuba outstanding amounted to $57,200,000. American direct investments, 1940, were $559,797,000, compared with $918,957,000 in 1929. British investments, end of 1949, had a par value of £24,345,029 (practically all in railways), of which 83·9% were in default; but investments in 2 tobacco companies (£849,400) yielded dividends of 18·4%. Income of United Kingdom residents from investments in Cuba, 1948, and for several preceding years, was about £100,000, from investments with a par value of £24 million (£28 million in 1938). All the Cuban Government's sterling loans were redeemed by 1940.

Defence.

The Army is composed of 946 officers and 14,116 men, organized in 7 regiments of mounted police, 1 infantry and 1 artillery regiment, with auxiliary services. The Navy consists of 1 sloop, 3 frigates, 5 submarine chasers, 1 training ship, 1 presidential yacht and 21 coastguard patrol vessels. Its strength is 582 officers and 4,473 men. The Air Force consists of 35 officers and 216 men, with 44 aircraft. The naval air force consists of 175 men, with 16 aircraft. Naval estimates, 1947, $3,224,956, plus an extraordinary credit of $5,996,708.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals and potatoes are grown, and a considerable trade is done in fruit and minerals. Cuba is the second largest producer of sugar in the world, with about 2·8 million acres devoted to sugar cane; 173 sugar mills manufacture sugar and high-test molasses. Americans own 59 mills with 54% of the capacity; Cubans, 82 mills (34%); Spaniards, 17 mills (7%). Production of raw sugar in recent crop years has been limited by presidential decree. Record output was in 1948 at 6,675,000 short tons; output, 1950, 6,126,000 short tons. Output of blackstrap molasses (used for synthetic rubber, explosives, etc.) is about 300 million gallons. The United States takes 90% of the sugar crop at a fixed price and under a preferential tariff agreement. Sugar and its products furnish 78% of the exports.

A law passed in Nov., 1948, forces owners of unused arable or pastoral land to lease it to native farmers at low rates; foreign interests object to their exclusion.

Tobacco is grown mainly in the Vuelta–Abajo district, near Pinar del Rio. Output in 1949 was 100 million lb. from 137,000 acres. Exports of leaf tobacco (1946) were 46,745,000 lb.; cigars, 59,695,000 (by number), valued at $8,371,000. Coffee production, chiefly from the province of Oriente, amounted in 1949–50 to 665,000 bags (60 kilos). Since 1946 export of the coffee crop has been prohibited except a small portion under license; coffee trees, 1950, about 266 million, but average output is small, only 0·3 lb. per tree. Output of henequen fibre in 1949 was 35,300,000 lb. A new fast-growing fibre, *kenaf*, originally from India, soft in texture, promises to replace jute for sacking; the tobacco industry uses *majagua*, another local fibre, while a third fibre, *yarey*, from palms, is also used. Rice production, 1947, was 62 million lb. of milled rice against imports of 620 million lb. Growing of bananas (originally but unsuccessfully for export) is giving place to the growing, for home consumption, of plantains (cooking bananas). Exports of Johnson bananas, 1949, were 1,700,000 stems, or about one-tenth of pre-war exports. The principal fruits exported, practically all to the United States, are pineapples, citrus fruit, tomatoes and pimentos. [illegible] 31 May, 1949, was 300 [illegible] Cuba is, curiously, [illegible] whom she exports grapefruit. Pineapple production, 1947, was a record at 5,250,000 crates (80 lb. each) or 210,000 short tons (average, 1940–46, was 2,968,000 crates). Output of canned pineapple was 1,200,000 cases.

In 1940, the livestock included 5,334,813 head of cattle, but slaughtering had reduced it to 3,884,158 head in 1945. Swine, in 1948, numbered 1,700,000.

Cuba has forest lands, many of which are in private ownership; State forests total about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins and oils. Cedar is used locally for cigar-boxes, and mahogany is exported; hard woods are used for railway sleepers, carts, ploughs and other local purposes.

Iron ore abounds, with deposits estimated at 3½ milliard tons, of which 90% are held as reserves by American steel interests; output, 1949, 11,961 metric tons, compared with 109,453 metric tons in 1940. Output of refractory chromite suffers from Philippine competition; in 1949 only 93,763 metric tons were mined, compared with 354,152 in 1943. Output, in metric tons, of copper (1949) was 17,400; manganese (1949), 62,503; nickel (1947), 2,014; silica (1940), 88,700; barytes (1940), 16,105. Exports of industrial diamonds, 1944, were 8,065 grammes valued at $6,036,571. Gold and silver are also worked; exports of gold, 1948, 334 fine oz., and of silver, including scrap, 185,216 fine oz. The government repealing the export tax on Cuban-mined gold in 1950, announced that a 'free' gold market on North African lines would be established. Cuba has a small annual output of petroleum, about 11,000 barrels. Twenty-four registered holders of salt deposits, resulting from the solar evaporation of sea water, produced 125 million lb. in 1946.

Cuba's 'economically active' population, 1943, numbered 1,520,851, of whom 656,151 were employers or self-employed and 479,660 were salaried or [illegible]; agriculture had 630,356, manufacturing 190,148 and trade [illegible] is a small textile industry.

For a mainly agricultural country, workers are highly unionized. In 1945, of the total of 1,292,786 workers, 440,791 or 33% were in trade unions. This was the highest proportion shown by any of the Latin-American countries. The Communists (who changed their name in 1943 to Popular Socialist party)

long controlled the unions but lost control in 1947. In 1949 the trade unions split up into 3 federations, the Confederation of Cuban Workers (recognized by the government), the Communist-led Confederation of Cuban Workers, and the General Confederation of Workers. Havana, 1949, became the seat of the anti-Communist C.I.T., the Inter-American Confederation of Labour.

Commerce.

The value of the imports and exports (including bullion and specie) for 5 years were as follows (the Cuban peso = the $, U.S.):—

	1945	1946	1947	1948	1949 [1]
Imports. .	238,935,000	307,247,000	519,890,000	527,456,000	451,400,000
Exports. .	409,925,000	475,864,000	746,592,000	709,872,000	578,300,000

[1] Excluding monetary gold and silver.

The United States in 1949 took exports valued at $387,500,000 (64%) and furnished imports valued at $380,300,000 (80%). The United Kingdom took 12% of her exports and furnished 1% of her imports.

Total trade between Cuba and the United Kingdom (Board of Trade returns) in £ sterling:—

	1938	1947	1948	1949	1950
Imports into U.K. .	4,835,687	40,242,331	29,225,756	22,933,121	38,309,846
Exports from U.K. .	847,464	1,691,354	1,981,802	1,570,483	3,402,052
Re-exports from U.K. .	14,061	33,391	31,184	32,095	54,373

Shipping and Communications.

The merchant marine, in 1949, had a registered gross tonnage of 36,100 tons. In 1947, vessels entering and clearing Cuban ports in the foreign trade had a net registered tonnage of 5,776,000 tons and 5,458,000 respectively.

In Cuba there were in 1943, 2,989 miles of public railway—the United Railways of Havana (British capital) and the Consolidated Railway of Cuba (American capital) being the greatest systems. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. In addition the large sugar estates have 2,892 miles of private lines connecting them with the main lines.

There are 2,040 miles of highways open to traffic, of which 846 miles are first-class. The new and impressive Central Highway, [illegible] island for 706 miles from Pinar del Rio to Santiago and costing $[illegible], was opened 24 February, 1931. On June 30, 1947, passenger automobiles numbered 36,800 and commercial vehicles, 26,000. There were (1938) 634 post, 358 telegraph offices and 150 radio and radio-telegraph stations (1940), of which 14 were operated by the Government. There are 3,545 miles of public and 8,902 miles of private telegraph wires. Cuba has 74 medium-wave and 6 short-wave [illegible] stations. The telephone system (1949) had 100,700 instruments (85% being in automatic systems) of which 70,000 were in Havana; all were operated by private companies except 503 in government hands. Direct telephone connexion with American and European cities has been maintained since 1921. Air-mail service between Cuba and Central America, and between Cuba and New York, was established 1930.

Currency and Banking.

In 1946 Cuba informed the International Monetary Fund that the unit of account was the peso, exactly equal to $1·00 U.S., or to 0·8886 gramme of fine gold; accordingly, 1 troy oz. of fine gold equals 35 pesos.

This parity dates from the law of 7 November, 1914, which established that the monetary unit was a gold peso (equal to the U.S. gold dollar) of 1·6718 grammes (1·5046 grammes fine) divided into 100 centavos. The Cuban gold coins were the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 peso pieces were of the same weight and value as the corresponding United States gold coins. The old gold pesos and U.S. gold coins are no longer legal tender, but may be sold only to the Government at the rate of 35 silver pesos per oz. troy.

There is no control of foreign exchange. Parity with the dollar is due to the predominance of American interests in Cuba's foreign trade. The Second World War made Cuba's gold stock rise from $1 million in 1939 to $191 million on 31 Dec., 1945; it rose to $311 million in Sept., 1949, and was $271 million in Nov., 1950.

On 23 Dec., 1948, the president signed the law creating a central bank (with capital of $10 million) and a national currency system replacing the dual system under which the peso and the dollar were both legal tender; the bank began operating on 27 April, 1950; on 31 Dec., 1950, it had $270,561,000 in gold and $59,097,000 in foreign exchange; note circulation was $341,792,000.

Silver is coined in pieces of 1 peso, 40 cents, 20 cents and 10 cents, while copper–zinc coins of 5, 2 and 1 cent pieces are also issued. There is no limit to the coinage of silver. Between 1933 and 1938 (inclusive), 66,300,000 silver pesos were minted in order to cover the national deficits. The money supply (including bank deposits) on 30 Nov., 1950, was 1,265,000,000 Cuban pesos, compared with 160,000,000 pesos, 31 Dec., 1940.

Banking is largely in the hands of the Royal Bank of Canada, the National City Bank of New York, the Chase National Bank of New York, the Bank of Nova Scotia and the Banco del Comercio. Total number of banks and branches is 169. Total assets, 31 December, 1946, of the 15 principal banks was $592 million.

The metric system of weights and measures is in use.

Diplomatic and Consular Representatives.

1. Of Cuba in Great Britain (19 Lowndes St., S.W.1).

Ambassador.—Dr. Roberto González de Mendoza y de la Torre (accredited as Ambassador 19 Dec., 1950).

Attachés.—Dr. J. Castelló Dumás; Erasmo Pellés.

There are consular representatives in Belfast, Birmingham, Glasgow, Liverpool, London, Newcastle-on-Tyne and Nottingham.

2. Of Great Britain in Cuba.

Ambassador.—Adrian Holman, C.M.G., M.C. (appointed 19 Dec., 1948).

First Secretaries.—T. Brimelow; J. T. Weir (*Consular*); H. A. N. Brown (*Labour*).

Military Attaché.—Col. C. G. Irving-Bell.

Air Attaché.—Wing Commander A. F. Johnson, D.F.C.

Civil Air Attaché.—Wing Commander C. J. Lewin.

There are Vice-Consuls at Havana and Santiago de Cuba.

CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA.)

THE Czechoslovak State came into existence on 28 Oct., 1918, when the Czech *Národní výbor* (National Committee) took over the government of the Czech lands. Two days later the Slovak National Council at Turč. Sv. Martin manifested the desire of the Slovak nation to unite politically with the Czechs for the purpose of forming a single [illegible] independent Czechoslovak State. On 14 Nov., 1918, the first [illegible] National Assembly met in Prague and formally declared the Czechoslovak State to be a republic with Professor T. G. Masaryk as its first President (1918–1935).

By the Treaty of St. Germain-en-Laye of 10 Sept., 1919, the Allied and Associated Powers formally recognized the Czechoslovak Republic consisting of the Czech lands of the ancient kingdom of Bohemia, Moravia, parts of Silesia and Slovakia. To these lands were added as a trust, under the name of the autonomous province of Subcarpathian Ruthenia, several counties of North-Eastern Hungary.

The territory of the Czechoslovak Republic was broken up for the benefit of Germany, Poland and Hungary by the decision of the Four Power Conference (Great Britain, France, Germany and Italy) at Munich, on 29 Sept., 1938, the Polish occupation of Těšín (Teschen) and certain border areas of Slovakia (10 Oct., 1938) and the Vienna Award (2 Nov., 1938). On 14 March, 1939, the German-sponsored Slovak government proclaimed Slovakia an independent State. Next day German troops invaded Bohemia and Moravia and Hungarians occupied what the Vienna Award left of Subcarpathian Ruthenia. On 16 March, 1939, the Reich Government incorporated the 'Protectorate of Bohemia and Moravia' as an integral part of the German Reich.

Great Britain, France, the United States of America and the U.S.S.R. refused to recognize this new status of the Czech lands as legal, and gave their support to the Czechoslovak Provisional Government, established by Dr. Beneš in London in July, 1940.

Military liberation by the Red Army and U.S. Forces was completed between Oct., 1944, and 9 May, 1945. The independent Slovak State

ceased to exist *de facto* in April, the Protectorate of Bohemia and Moravia on 5 May, following the armed rising staged by the Czech *Národní Rada* (National Council) in Prague. Territories taken by Germans, Poles and Hungarians were restored to Czechoslovak sovereignty between November, 1944, and June, 1945. Sovereignty over Subcarpathian Ruthenia was transferred to the Soviet Union by the Treaty of Moscow of 29 July, 1945.

Constitution and Government.—The new constitution, replacing that of 1920, was promulgated on 9 June, 1948. The Czechoslovak state is a people's democratic republic. It is a unitary state of two Slav nations, the Czechs and the Slovaks, possessing equal rights. The supreme organ of legislative power is the National Assembly of one chamber (300 members elected for a term of 6 years). The supreme organ of governmental and executive power is the government, appointed and recalled by the President of the Republic. Power in Slovakia, on principle, is vested in Slovak national organs; the legislature is the Slovak National Council (100 members elected for a term of 6 years), while government and executive are in the hands of the Board of Commissioners. Its appointment and recall rests with the Government of the Republic.

The constitution was passed on 9 May, 1948, by 246 votes to none, with 54 deputies absent.

On 22 Feb., 1948, a congress of Works and Employees Councils demanded further nationalisation measures. On 17 April, 1948, the Communist and Social Democratic parties agreed to merge into one party. On 30 May, 1948, elections for the National Assembly took place on a single unified list of candidates of the National Front. The National Front is composed of Czech and Slovak political parties (Communist Party of Czechoslovakia, Czechoslovak Socialist Party, People's Party, Freedom Party and National Regeneration Freedom) and certain mass organizations, such as the Revolutionary Trades Unions and the Union of Czechoslovak Youth.

President of the Republic.—Klement Gottwald (born 23 Nov., 1896), elected president 14 June, 1948, after President Dr. Edvard Beneš had tendered his resignation.

Following the general elections of 30 May, 1948, and the election of Prime Minister Gottwald to the presidency of the State, a Government of the National Front was formed on 15 June, 1948. It was composed as follows in May, 1951:—

Prime Minister.—Antonin Zápotocký (Revolutionary Trades Unions).
Deputy Prime Ministers. Viliam Široký (Communist), Dr. Ján Ševčík (Slovak Rehabilitation Party), General Ludvík Svoboda (non-party).
Minister of Foreign Affairs.—Viliam Siroky.
Minister of National Defence.—Dr. Alexej Čepička (Communist).
Minister of the Interior.—Václav Nosek (Communist).
Minister of Internal Trade.—František Krajčír (Communist).
Minister of Foreign Trade.—Antonín Gregor (Communist).
Minister of Finance.—Jaroslav Kabeš (Communist).
Minister of Heavy Industry.—Augustin Kliment (Revolutionary Trades Unions).
Minister of Light Industry.—Josef Jonas.
Minister of Education, Science and Art.—Dr. Zdeněk Nejedlý (Communist).
Minister of Information and Public Culture.—Václav Kopecký (Communist).

Minister of Agriculture.—Julius Ďuriš (Communist).
Minister of Food Industry.—(Mrs.) Ing. Ludmila Jankovcová (Communist).
Minister of Justice.—Dr. Stefan Rais.
Minister of Transport.—Alois Petr (People's Party).
Minister of Postal Services.—Dr. Alois Neuman (Czech Socialist).
Minister of Labour and Social Welfare.—Evžen Erban (Revolutionary Trades Unions).
Minister of Public Health.—Rev. Josef Plojhar (People's Party).
Minister of Building Industry.—Dr. Emanuel Šlechta (Czech Socialist).
Minister of Unification of Laws.—Dr. Vávro Šrobár (Slovak Rehabilitation Party).
Minister of National Security.—Ladislav Kopřiva (Communist).
Minister of Church Affairs.—Zdeněk Fierlinger (Communist).
President, State Planning Office.—Dr. Jaromír Dolanský (Communist).

There is a Board of 14 Commissioners, presided over by Karol Bacílek, who are carrying on the Slovak regional government in Bratislava.

National flag : white, red, blue (horizontal).

National anthem : Kde domov můj (words by J. K. Tyl; tune by Škroup, 1834); combined with, Nad Tatru sa blyska (words by J. Matuška, 1844).

Area and Population.—The Czechoslovak Republic consisted of Bohemia, Moravia and Silesia, and Slovakia. By decree of 21 Dec., 1948, which came into force on 1 Jan., 1949, the provinces were abolished and replaced by 19 administrative units, called ' regions '.

Region	Area (sq. km)	Population	Region	Area (sq. km)	Population
Prague	9,730	2,014,938	Bratislava	7,519	838,134
České Budějovice	8,968	493,730	Nitra	7,968	689,853
Plzeň	7,887	544,913	Žilina	8,269	509,403
Karlovy Vary	4,579	299,625	Banská Bystrica	9,266	486,683
Ústí	4,145	622,747	Košice	7,440	461,938
Liberec	4,237	479,874	Prešov	8,495	448,358
Hradec Králové	5,145	552,780			
Pardubice	4,232	422,950	*Slovakia*	48,957	3,434,369 [2]
Jihlava	6,651	422,533			
Brno	7,449	934,437	Czechoslovakia	127,827 [4]	12,409,000 [3]
Olomouce	6,214	584,973			
Gottwaldov	5,107	593,576			
Ostrava	4,526	790,285			
Bohemia and Moravia-Silesia	78,869	8,762,361 [1]			

[1] Census of 22 May, 1947.
[2] Census of 30 June, 1948.
[3] Estimate at 31 Dec., 1948.
[4] 49,381 English square miles.

The density of population per square mile is 293·6 in the Czech regions, 183·5 in the Slovak regions, and 251·4 in the whole of Czechoslovakia.

Estimated population, 31 Oct., 1949, 12,513,000.

Of the total population in 1930 on the present territory 9,721,402 were Czechoslovaks, 3,306,093 Germans, 596,911 Hungarians, 118,438 Russians and Ruthenians, 109,114 Jews, 99,712 Poles and 46,827 others; total, 13,998,497.

The population of the principal towns was as follows (numbers according to the census of 22 May, 1947):—

Praha	922,284	Hradec Králové	51,480	Děčín	30,753
Brno	273,127	Gottwaldov (Zlín)	45,737	Opava	30,191
Ostrava	180,960	Teplice	45,183	Chomutov	26,697
Bratislava	172,664	Pardubice	44,337	Frýdek-Místek	26,573
Plzeň	117,814	Kladno	40,692	Trnava	24,226
Olomouc	58,617	České Budějovice	38,194	Mladá Boleslav	23,731
Košice	58,089	Most	35,330	Jihlava	23,413
Ústí nad Labem	56,328	Prostějov	31,718	Jablonec n. N.	23,112
Liberec	52,798	Karlovy Vary	30,915	Karviná	21,080

According to the decree of the President and with the consent of the Allied Powers affirmed by the Potsdam conference, the German population has been transferred to the American and Russian zones of occupation in Germany. The depopulated border areas left by the transferred Germans have been colonized by Czechs from the interior or from abroad.

Vital statistics	Live Births	Marriages	Divorces	Deaths	Emigration
1945	276,062	106,143	8,107	252,449	—
1946	292,658	129,821	12,437	182,157	—
1947	293,182	134,155	11,227	146,256	2,137
1948	286,953	130,526	—	141,654	6,230

Religion.—The majority of the population in the Czechoslovak Republic are Catholic. In 1930 the division of the population according to religion within the present frontiers was:—Roman Catholics, [illegible]; Greek and Armenian Catholics, 224,772; Old Catholics, 22,693; Protestants, 1,051,447; Orthodox, 33,460; Jews, 253,526; without confession, 849,613. In [illegible] 1920, part of the Roman Catholic clergy withdrew from the [illegible] of the Pope and founded a Czechoslovak church, which had, according to the census of 1930, 791,103 adherents. Estimates, 1947; 9,300,000 Roman Catholics; 950,000 Czechoslovak Church; 900,000 Protestants (including 440,000 Lutherans and 354,000 Czech Brethren); 820,000 without confession; 50,000 Jews; 50,000 Orthodox.

On 14 Oct., 1949, the National Assembly passed two bills which place the administration of all churches under state control, provide for the payment of the salaries of all practising clergymen by the state and set up a government department for church affairs. By Feb., 1950, over 90% of the Roman Catholic priests had taken the oath of allegiance to the government.

Education.—The following table shows the number of elementary, higher grade and secondary schools and pupils as at 20 Nov., 1948:—

	Elementary		Higher grade		Secondary		Vocational education	
	No. of schools	No. of pupils	No. of schools	No. of pupils	No. of schools	No. of pupils	No of schools	No. of pupils
Czech regions	8,319	674,632	1,793	340,663	224	51,113	1,063	76,104
Slovak regions	3,700	384,378	487	122,632	68	19,327	180	15,056
Total	12,019	1,059,010	2,280	463,295	292	70,440	1,243	91,160

The number of students at universities and technical universities were in 1948 as follows:—Prague University, 16,904; Technical University,

Prague, 13,029; University, Brno, 6,221; Technical University, Brno, 3,368; University, Bratislava, 5,786; Technical University, Bratislava, 2,271; University, Olomouc, 1,421; University, Hradec Králové, 788; University, Plzeň, 613; University, České Budějovice, 36; Theological Faculty, Bratislava, 218; Protestant Theological Faculty, Prague, 145.

Special high schools and number of students:—Higher Veterinary Academy, Brno, 1,125; Mining Academy, Ostrava, 672; Higher Agricultural College, Košice, 648; Academy of Arts, Prague, 328; Commercial High School, Bratislava, 1,333.

A new Education Act was passed on 21 April, 1948; it provides for a uniform State system of education. Russian is the only foreign language taught within the curriculum; English, French, Polish and Serbo-Croat can be chosen as 'voluntary hobbies.'

There were, in 1949, 1,928 cinemas with a seating capacity of 611,000.

Justice.—A new criminal code which differs only in minor respects from the Russian came into force on 3 Aug., 1950. For serious crimes against the State its administration is to be entrusted to the State courts. Lesser offences, whether against the State or individuals, are dealt with by local committees of which there is one for every community of more than 500 inhabitants. The code provides heavier penalties for all crimes, whether of theft or anything else, when they are directed against State property. Cases of treason by soldiers go to State and not military courts. The death penalty and imprisonment for any period the court or local committee may decide are authorized. The code also institutes correctional punishment for periods not exceeding 6 months. In such cases the guilty person remains technically at liberty, but must perform prescribed work in a prescribed place and also suffer a reduction of pay. Other penalties include loss of civic rights, confiscation of property and fines.

Health.—There were, in 1948, 333 hospitals and sanatoria, with 96,158 beds; of these, 23 were psychiatric clinics, with 12,910 beds.

Finance.—Budget estimates since the liberation (in millions of crowns):—

	1946	1947	1948	1949
Revenue . .	37,792·1	48,400·7	56,895·5	89,320·3
Expenditure .	64,000·7	73,305·0	67,056·3	89,277·7

Development of internal national debt (in millions of crowns):—

	1946 (31 Dec.)	1947 (31 Dec.)	1948 (31 March)	1949 (31 Dec.)
Bohemia, Moravia and Silesia:				
Former Czechoslovak debt.	27,116·0	26,927 2	27,079·0	3,621
'Protectorate' debt .	33,416·9	33,416·9	33,416·9	18,191
Incurred since liberation [1] .	16,190·0	28,129·1	29,385·1	76,181
Total . . .	76,722·9	88,473·2	89,881·0	97,993
Slovakia—before liberation .	12,471·7	7,106·2	7,107·5	6,958
„ since liberation .	2,990·0	—	—	—
Grand total . .	92,184 6	95,579·4	96,988·5	104,951

[1] As from 1947 the debt incurred since liberation is not divided into debts of Bohemia-Moravia and Silesia and debts of Slovakia, but included in the group of common debts.

Defence.—Military service lasts 2 years, after which the soldier passes to the first reserve until he attains the age of 40, when he passes to the second reserve, where he remains until 50. Soviet military training was introduced in 1950. The army comprises 16 divisions, 1 armoured corps, 2 [illegible] of heavy artillery and 1 parachute brigade.

On 1 Oct., 1950, new regulations came into force which, on the basis of Soviet military law, strengthen the authority of officers and non-commissioned officers while, at the same time, making it obligatory for all soldiers to report to the Communist Party every irregularity and any inefficiency on the part of their superiors.

Production and Industry.—On 27 Oct., 1948, a Five-year Economic Plan of Development was enacted. Compared with 1948, the value of industrial production is, by 1953, to be increased by 57%; that of agriculture by 37%; transport capacity by 40%; volume of foreign trade by 40%. A sum not exceeding Kčs. 336·2 milliard shall be invested during the five-year period. A State Planning Office was set up on 22 Feb., 1949.

Agriculture is highly developed and intensive farming is carried on. In 1948, 5,304,329 hectares were arable land, 4,066,030 hectares were forests and 2,026,567 hectares were permanent grass and pastures.

Main crop harvest (in metric tons) was as follows:—

Crop	1945	1946	1947	1948
Rye . . .	992,704	1,149,088	998,825	1,142,286
Wheat . . .	1,121,540	1,320,231	853,601	1,397,790
Barley . . .	665,339	765,816	669,340	925,351
Oats . . .	691,042	824,740	714,044	908,129

In 1948–49 there were 103 sugar factories in the country, which produced 648,652 metric tons of raw sugar. Hops of excellent quality are also grown, both for export and beer production (Pilsener). The agricultural industries include also flourishing beer, spirit, malt and foodstuffs industries.

On 1 Jan., 1949, the number of livestock (provisional figures) was:—Cattle, 3,661,000 (including 1,869,000 cows); horses, 634,606; pigs, 3,239,000; sheep, 459,000; goats, 981,000; poultry, 16,378,000. Total milk production in 1948 was 25,043,000 hectolitres.

Czechoslovakia ranks among the most richly wooded countries in Europe, and the timber industry is important.

The mineral production of the Czechoslovak Republic comprises both soft and hard coal (chief coalfields Most, Chomutov, Teplice, Moravská Ostava and Sokolov), iron, graphite and garnets, silver (1,600,000 oz. in 1948), copper and lead (in Slovakia) and rock-salt (in Eastern Slovakia.)

The number of factories on 1 June, 1949, was 16,440, employing 1,393,279 workers. Of these 1,946 were textile mills (251,523 workers); 800 glass works (35,890 workers); 2,214 stone factories (89,734 workers); 3,986 food production (113,703 workers); 2,091 furniture and wood manufacture (78,561 workers); 1,769 metal and smelting works (460,304 workers).

Industrial production (1,000 metric tons) in 1948 included:—Coal (bituminous), 17,746; lignite, 23,589; iron ore, 1,428; lead and alloys, 8; phosphate fertilizers, 388; nitrate fertilizers, 160; soda, 102; staple fibre, 18; rayon, 5; hollow glass, 128; plate glass, 131; small glassware, 8; kaolin, 767; sanitary ceramic appliances, 6; paper, 260; cotton yarn, 68; woollen yarn, 32; flax yarn, 9. Timber sawn amounted to 2,948,000 cubic metres; plywood, 71,000 cubic metres; veneer, 11,279,000 square metres. Production of footwear, 64 million pairs.

Production of electricity, 6,663 million kwh. in 1947, 7,515 million kwh. in 1948.

Nationalization.—Nationalization of industry has been laid down in Article XII of the constitution and implemented in the Nationalization Laws of 24 Oct., 1945, and of 28 April, 1948. The inviolability of private ownership of small and medium-sized businesses with less than 50 employees has been guaranteed by section 158 of the constitution.

By decree of 24 October, 1945, unconditional nationalization, with compensation of individual owners, of the following industries was ordered :—Firms producing and distributing power (especially electricity, gas and steam); steel works; steel mills; cast iron works; metal working firms, such as rolling mills, welding works; precision instruments works; glass huts; cellulose works; chemical and pharmaceutical works; firms mining china clay, loam and valuable clays; cement works; firms producing timber dopes; factories of gramophone records; industrial distilleries and alcohol refineries; breweries producing over 150,000 hectolitres of beer in 1937; flour mills capable of a minimum daily output of 60 tons on 25 October, 1945, and certain sugar factories. The following industries were nationalized if the numbers of staff employed in the years 1938–42 exceeded the figures given in parentheses :—Foundries for non-ferrous metals (400); electrical equipment firms (500); firms producing industrial porcelain and ceramic building materials (150); tiles, plaster and bricks (200); firms producing pulp, paper, cardboard and mill board (300); sowing mills (150); timber works (300); cotton spinning works (400); cotton weaving mills (500); works for combed fibres, such as flax or jute fibre (400); weaving mills for wool, artificial fibre and silk (400); firms producing carpets, blankets, lace and textile goods, or working cotton waste (400); producing fibre, cotton-wool, artificial fibres and bandaging material (400); fine textile and textile printing works (200); clothing factories (500); works producing tannic acid or substitutes (400); enterprises manufacturing artificial edible fats (150); chocolate and sweets (500).

In March, 1948, the radio and film industry, and in March, 1949, the publishing and bookselling trades were nationalized.

The Act of 28 April, 1948, nationalized the following additional categories of industries as from 1 Jan., 1948, under compensation of owners :—

(*a*) Businesses engaged in digging or transforming peat, quarrying of quartzite, mining of talc, of baryta, plaster-stone, anhydrite, sands for glass and moulds as well as the deposits of these materials; businesses engaged in transforming and hewing stone, mechanical gravel production with a yearly capacity of at least 10,000 quintals;

(*b*) businesses engaged in chemical and pharmaceutic productions, in production of medicaments, serums, surgical instruments, ampoules, bandages, cotton-wool, cosmetics, photographic materials;

(*c*) refineries of precious metals, businesses engaged in production of radio-electric appliances;

(*d*) businesses engaged in cutting rock-crystal, production of porcelain for technical uses, and production of technical glass;

(*e*) businesses engaged in production of screws, bolts, screw-nuts, wire-ropes;

(*f*) businesses engaged [illegible] prefabricated constructions and parts, and tile works with a capacity of [illegible];

(*g*) saw-mills with a daily output exceeding 10 steres of round wood, enterprises for production of wood pulp and cardboard;

(*h*) tanneries, tawers' workshops;

(*i*) glass works equipped for mechanical production by at least 10 machinery units;

(*j*) businesses of any other category employing 50 or more people since 1 Jan., 1946.

Within the food industry : production of alcoholic drinks, refineries, breweries, maltings, dairies, production of edible fats, of vinegar fermented, of starch and its derivatives, production and transformation of grape fruit, malt and artificial wines, manufacture of essential oils,

refrigeration of food-stuffs, flour mills with a commercial turnover of at least 1,000 tons, factories of macaroni, biscuits, production of grain flakes, bakeries with an oven area exceeding 40 square metres, businesses engaged in processing of at least 25 tons of meat per month, paprika mills, as well as all businesses in the food trade which since 1 Jan., 1946, have employed at least 50 persons.

Before the second stage of nationalization there were in Czechoslovakia 19,547 industrial undertakings (local units) with 1,393,700 employees, representing 53·4% of [illegible] with 20·4% of employees. The share of private enterprise in the total number of industrial undertakings (local units) has now been reduced to 31·6% with 5·1% of employees.

In May, 1949, there were 68 consumers' co-operative societies, with a membership of 1,415,228.

Commerce.—The following figures (in millions of Kčs.) are, strictly speaking, not comparable with those of the pre-war period, as the areas covered and the value of the Kčs. are different.

	1937	1945 (May–Dec.)	1946	1947	1948	1949
Imports . .	10,982	777	10,308	28,920	37,869	39,400
Exports . .	11,983	500	14,283	28,550	37,653	40,308

Percentages of import, by main countries, in 1948 (figures for 1937 in brackets):—U.S.S.R., 15·6 (1·1); Great Britain, 10·1 (6·3); Yugoslavia, 6·3 (3·7); Netherlands, 5·4 (3·8); Poland, 5·4 (2·5); Sweden, 5·3 (3·8); Germany, 2·2 (17·3). Exports:—U.S.S.R., 16·0 (0·8); Poland, 7·0 (2·6); Yugoslavia, 6·9 (5·0); Netherlands, 6·4 (4·2); Great Britain, 3·6 (8·7); Germany, 3·2 (15·0).

Total trade between the United Kingdom and Czechoslovakia for 5 years (in £ sterling, according to Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports into U.K. . .	6,913,431	6,206,655	6,428,834	2,260,948	8,782,197
Exports from U.K. .	2,275,969	7,875,971	5,550,682	5,318,813	4,351,940
Re-exports from U.K. .	562,663	2,379,203	1,673,556	787,324	693,439

Communications.—At the end of 1947,[1] the following communications were in operation in the Czechoslovak Republic (in kilometres):—

Railways[2]	13,133	District roads[3] . . .	33,810
Main roads (first-class) . .	9,121	Streams navigable by steamers	463
Main roads (second-class) .	27,827	Streams navigable by rafts .	1,216

[1] Roads as at 31 Dec., 1946. [2] State-owned railways only.
[3] Includes 6,546 km. of local roads in Slovakia.

In 1948, railways carried 34·6 million passengers (1947, 29·1 million).

The mercantile marine, in 1947, consisted of 383 river craft of 236,874 registered tons, and 4 police launches.

Civil Aviation.—In 1948, 13,932 passengers and 5,614,000 kg. of freight were flown over 804,000 km.

Number of telephones in 1948: 350,708. On 31 Aug., 1949, 2,229,000 people held wireless licences.

Banking and Currency.—By Presidential decree of 24 Oct., 1945, joint-stock banks were nationalized; in 1948 they were merged into 2

institutes: the Živnostenská banka for Bohemia, Moravia and Silesia, and the Tatra banka for Slovakia. These two and the post office savings bank were, by decree of 9 March, 1950, fused into the State Bank of Czechoslovakia (Státní banka československá).

The deposi[illegible] of all the financial institutes in Czechoslovakia were [illegible] currency at 30 June, 1948, those on the current accounts of so-called first depositors (excluding mututal deposits of financial institutes) amounted to 46,433,000 Kčs.

A Currency Redemption Fund was created on 2 July, 1947. It took over the liabilities of the Czechoslovak National Bank and other financial institutes in respect of blocked deposits. At the same time the financial institutes ceded to the fund property values destined to cover such liabilities. This Act became operative on 11 Aug., 1947. The last statistics of blocked deposits in financial institutes were compiled on 31 Aug., 1947, when the blocked deposits of all financial institutes amounted to K.Ks 151,660,000,000 on savings books and to K.Ks 69,973,000,000 on the current accounts of first depositors (excluding mutual deposits of financial institutes).

The monetary unit in the Czechoslovak Republic is the *koruna* (Kčs) or crown of 100 *haler*. Notes in circulation: 5,000, 1,000, 500, 100, 50, 20, 10, 5 Kčs. Coin: 100, 50, 20, 10, 2, 1 Kčs., 50, 20, 10 halers. By Presidential decree of 20 Oct., 1945, a monetary reform was introduced aiming at the reduction to 30,000,000,000 Kčs. of the amount of paper money of 120,000,000,000 which was circulating on 31 October, 1945. Circulation of notes on 31 Jan., 1950: 71,823,000,000 Kčs. By a monetary agreement with Great Britain, concluded in London on 1 November, 1945, the new crown is stabilized at the rate of 201·50 Kčs. to the £ sterling.

Diplomatic Representatives.

1. Of Czechoslovakia in Great Britain (8 Grosvenor Place, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Dr. Rudolf Bystricky (accredited 21 Oct., 1949).

First Secretary.—František Roháč.

Military and Air Attaché.—Col. Mikuláš Langer.

Commercial Counsellor.—Dr. Karel Švec.

Commercial Attaché.—Miroslav Kadlec.

There are consular representatives at London, Aberdeen, Belfast, Bradford, Glasgow and Liverpool.

2. Of Great Britain in Czechoslovakia.

Ambassador Extraordinary and Minister Plenipotentiary.—Philip Mainwaring Broadmead, C.M.G., M.C.

First Secretaries.—G. W. Kirk; A. O. Bray (*Commercial*); B. C. L. Hockey.

Military Attaché.—Col. G. A. D. Young, D.S.O.

Air Attaché.—Wing-Commander V. A. Pope, D.S.O.

There is a consular representative at Prague.

DENMARK.

(KONGERIGET DANMARK.)

Reigning King.

Frederik IX, born 11 March, 1899; married 24 May, 1935, to Princess *Ingrid* of Sweden; offspring: Princess *Margrethe*, born 16 April, 1940: Princess *Benedikte*, born 29 April, 1944; Princess *Anne-Marie*, born 30 Aug., 1946. He succeeded to the throne on the death of his father, King Christian X, 20 April, 1947.

Brother of the King.

Prince *Knud* (heir presumptive), born 27 July, 1900; married 8 Sept., 1933, Princess *Caroline Mathilde* of Denmark; offspring: Princess *Elisabeth*, born 8 May, 1935; Prince *Ingolf*, born 17 Feb., 1940; Prince *Christian*, born 22 Oct., 1942.

Uncles and Aunts of the King.

I. Prince *Carl*, born 3 August, 1872; elected King of Norway, under the title of Haakon VII, November, 1905 (for further details *see* under NORWAY).

II. Prince *Harald*, born 8 Oct., 1876; died 30 March, 1949; married 28 April, 1909, to Princess Helena of Sonderborg-Glücksborg; offspring, Princess Feodora, born 3 July, 1910; married 9 Sept., 1937, to Prince Christian of Schaumburg-Lippe; Princess Caroline Mathilde, born 27 April, 1912; married 8 September, 1933, to Prince Knud, second son of King Christian X; Princess Alexandrine Louise, born 12 December, 1914; married 22 January, 1937, to Count Luitpold Alfred zu Castell-Castell (died 6 November, 1941); Prince Gorm, born 24 February, 1919; Prince Oluf, born 10 March, 1923.

III. Princess *Ingeborg*, born 2 August, 1878; married 27 August, 1897, to Prince Charles of Sweden.

IV. *Dagmar*, born 23 May, 1890; married 23 November, 1922, to Lieutenant Jörgen Castenskiold; offspring, Carl, born 1923; Christian, born 1926; Jurgen, born 1928; Dagmar, born 1931.

The crown of Denmark was elective from the earliest times. In 1448 after the death of the last male descendant of Swein Estridsen the Danish Diet elected to the throne Christian I, Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till 1660. The direct male line of the house of Oldenburg became extinct with King Frederik VII on 15 Nov., 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on 8 May, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse-Cassel, niece of King Christian VIII of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction 31 July, 1853.

King Frederik IX has a civil list of 1,975,000 kroner. Annuities to other members of the royal house amount to 554,059 kroner.

Subjoined is a list of the kings of Denmark, with the dates of their accession, from the time of election of Christian I of Oldenburg:—

House of Oldenburg.

	A.D.		A.D.
Christian I	1448	Christian V	1670
Hans	1481	Frederik IV	1699
Christian II	1513	Christian VI	1730
Frederik I	1523	Frederik V	1746
Christian III	1534	Christian VII	1766
Frederik II	1559	Frederik VI	1808
Christian IV	1588	Christian VIII	1839
Frederik III	1648	Frederik VII	1848

House of Schleswig-Holstein-Sonderburg-Glücksburg.

Christian IX	1863	Christian X	1912
Frederik VIII	1906	Frederik IX	1947

Constitution and Government.

The present constitution of Denmark is founded upon the 'Grundlov' (charter) of 5 June, 1915, as amended on 10 Sept., 1920; it is essentially a modernized adaptation of the 'Grundlov' of 5 June, 1849, the first Danish constitution. The amendments of 1920 are mostly of a formal character, necessitated by the incorporation of parts of Slesvig.

The legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical-Lutheran Church, the official Church of the state. The King has not the right of declaring war or signing peace without the consent of the Rigsdag. The Rigsdag is composed of two bodies: the 'Folketing' (House of Commons) and the 'Landsting' (Senate). All men and women of Danish nationality of more than 25 years of age and permanently resident in Denmark possess the

franchise and are eligible for election to the Folketing, which is at present composed of 151 members; 105 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 44 'Tillægsmandater' (additional seats) are divided among such parties which have not obtained sufficient returns at the district elections. Two members are elected for the Faroe Islands. The term of the legislature is 4 years, but the King has power to dissolve the Folketing.

The members of the Landsting are elected indirectly by the Folketing voters of 35 years of age in the following way. In every Folketing district electors in a number corresponding to the population are elected by the method of proportional representation. The country is divided into 6 Landsting districts, in which 56 members are elected; one is elected in the Faroe Islands, and 19 members are elected by the former Landsting, according to the system of proportional representation, making a total of 76 members. The members of the Landsting sit for a term of 8 years. There are elections every fourth year for half of those elected by the electors, while those elected by the Landsting go out all at once after an 8 years' term.

The members of the Rigsdag receive 5,700 kroner, 7,200 kroner or 8,700 kroner, according to whether their domicile is less than 20 kilometres, 20–75 kilometres or more than 75 kilometres from the capital. 87% is added at present (Dec., 1950) to meet the rise of prices.

The Rigsdag must meet every year on the first Tuesday in October. To the Folketing all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Höiesteret, form the Rigsret, a tribunal which can alone try parliamentary impeachments. The ministers have free access to both houses, but can vote only in the chamber of which they are members.

State of parties in the Landsting, after the election of 11 April, 1947:—33 Socialists, 21 Liberals, 13 Conservatives, 7 Radical Left, 1 Communist and 1 Faroe Islands' representative; total, 76.

Folketing, elected 5 Sept., 1950:—59 Socialists, 32 Liberals, 27 Conservatives, 12 Radical Left, 7 Communists, 12 Land Tax Party, 2 Faroe Islands' Representatives; total, 151.

The executive, acting under the king as president and called the State Council ('Statsraadet'), appointed on 30 Oct., 1950, as a minority government of Liberals and Conservatives, was, in March, 1951, composed as follows:—

Prime Minister.—Erik Eriksen.
Foreign Minister.—Ole Bjørn Kraft.
Minister of the Interior and of Housing.—Aksel Møller.
Minister of Justice.—Helga Pedersen.
Minister of Public Works.—Victor Larsen.
Minister of Trade.—Ove Weikop.
Minister of Agriculture.—H. Hauch.
Minister of Education.—Flemming Hvidberg.
Minister of Finance.—Thorkil Kristensen.
Minister of Labour and Social Affairs.—Poul Sørensen.
Minister of Defence.—Harald Petersen.
Minister of Fisheries.—Knud Rée.
Minister of Ecclesiastical Affairs.—Jens Sønderup.

The ministers are individually and collectively responsible for their acts, and if impeached and found guilty, cannot be pardoned without the consent of the Folketing.

On 9 July, 1920, there were incorporated the northern parts of Slesvig which had voted for Denmark at the plebiscite held in accordance with the Versailles Treaty of 28 June, 1919. The Slesvig territories are officially named 'Sønderjydske Landsdele' (South Jutland Provinces).

For administrative purposes Denmark is divided into 22 counties (Amter), each of which is administered by a governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,300). There are 88 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by univ[illegible] proportional representation. Copenhagen forms a distric[illegible] is its own form of administration.

National flag: White cross on red (Danebrog).

National anthem: Kong Kristian stod ved højen Mast (words by J. Ewald, 1778; tune by J. E. Hartmann, 1780).

Area and Population.

According to the census held on 15 June, 1945, the area of Denmark is 16,576 square miles (42,932 square kilometres) and the population 4,045,232.

Divisions	Area 1945 (square km.)	Population 1945	Population 1945 per square km.
City of Copenhagen, with suburbs . .	108	927,404	8,561
Islands in the Baltic	13,270	1,291,772	97
Peninsula of Jutland	29,554	1,826,056	62
Total	42,932	4,045,232	94

The area of the Faroe Islands is 540 square miles (1,399 square km.), and the population in 1945 was 29,198.

The total population at the census of 1945 showed an increase during 1940–45 of 1·11% per annum. In Denmark the town population increased from 2,459,571 in 1940 to 2,634,231 in 1945, while the rural population increased from 1,384,741 in 1940 to 1,411,001 in 1945. The population is almost entirely Scandinavian; in 1940, of the inhabitants of Denmark proper, 96·7% were born in Denmark.

Estimated population on 1 July, 1949, 4,230,500.

On 15 June, 1945, the population of the capital, Copenhagen (København), was 927,404; Aarhus, 107,393; Odense, 92,436; Aalborg, 60,880; Esbjerg, 43,241; Randers, 36,434; Horsens, 32,400.

Vital statistics for 4 years :—

Years	Total births (living)	Still births	Marriages	Divorces	Deaths	Surplus of births over deaths
1946	96,111	1,833	40,257	7,500	42,013	54,098
1947	91,714	1,628	39,910	6,943	40,043	51,671
1948	84,938	1,545	39,279	7,120	35,981	48,957
1949	79,919	1,368	37,496	6,991	37,793	42,126

Illegitimate births :—1946, 7·9; 1947, 8; 1948, 7·7; 1949, 7·4%.
Emigrants, 1946, 25,651; 1947, 28,556; 1948, 33,063; 1949, 25,873.

Religion.

The established religion of Denmark is the Lutheran, which was introduced in 1536. The affairs of the National Church are under the superintendence of 9 bishops, who have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1921 there were 3,221,843 Protestants, 22,137 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 535 Greek Catholics, 5,947 Jews, 17,369 others or of no confession. There were 40 members of the Society of Friends in 1949.

Education.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. In 1949 Denmark had 4,112 elementary schools; of these 35 were maintained by the Government, 3,713 by the local communities and 364 were private institutions. The instruction in the public schools is mostly free The number of pupils in the 4,112 schools on 1 Jan., 1949, was 494,905. In 1949, 1,647 students were admitted to the universities; of these 569 were women. For higher instruction there are furthermore (1949): a veterinary and agricultural college of Copenhagen with about 50 professors and teachers and about 1,000 students; about 340 technical schools with about 56,000 pupils; 18 training colleges for teachers with about 2,400 students; a high school of commerce with about 2,400 pupils; 206 commercial schools with about 32,000 pupils; 26 agricultural or horticultural schools with about 2,300 pupils; 56 *folkehöjskoler* or popular high schools (adult schools) with about 6,500 pupils; a college of pharmacy (founded 1892) with 13 teachers and 202 students; a school for dentists with 13 teachers and 426 students; a royal academy of arts (founded 1754) with 16 teachers and about 550 students; a Polytechnic Institution (founded 1829) with about 60 professors and teachers and about 1,780 students. The *folkehöjskoler* are all private, but to them and the agricultural schools the state annually makes a grant of about 3,000,000 kroner. The University of [illegible] founded in 1479, has about 200 professors and teachers, and a [illegible] The University of Aarhus, founded in 1928, and opened on 11 Sept., 1933, has about 70 professors and teachers and about 1,300 students.

There were, in 1950, 441 cinemas with a seating capacity of 139,082.

Social Welfare.

In 1933 the Danish Social Legislation was co-ordinated into four Acts ('The Social Reform'), dated 20 May, and put into force on 1 Oct., 1933. It was the intention to make these enactments integral parts of a common system, and to obviate every kind of double relief by means of co-operation between the various administrative units. The Social Reform comprises a Public Assistance Act and three Insurance Acts dealing with (1) labour exchanges and employment insurance, (2) accident insurance and (3) sickness, invalidity and old-age insurance.

The Public Assistance Act contains regulations for the protection of children and for child welfare, including children of widows and widowers, and children of unmarried mothers; also regulations for assistance for burial, sickness, cripples and the blind. In 1948–49 some 120,000 recipients exclusive of children, were supported, at a cost of 223·1 million kroner, of which 69·8 million kroner were spent on child welfare and child support,

79·5 million kroner on special relief, 33·2 million kroner on local relief and 2·0 million kroner on poor relief.

The Act named above under (3) concerning sickness, invalidity and old-age insurance (changed by an Act of 1946), grants an annual sum of money as old age pension (*Aldersrente*) to any person being 65 years of age and fulfilling certain conditions. The old age pension, which does not involve the loss of civil rights, varies according to whether the recipient lives in a town or a rural commune, and certain deductions are made for earned incomes. In Copenhagen, for example, the old age pension for a married couple, both 65 years of age, without any earned income, is 3,019 kroner per annum (plus fuel and, in individual cases other supplements). For the financial year ending 31 March, 1949, 234,000 persons were relieved. The total expenditure was 405 million kroner.

Justice and Crime.

The lowest courts of justice in Denmark are organized in 94 tribunals where cases of only small consequence are dealt with by a single judge. Cases of greater consequence are dealt with by the superior courts (*Landsretterne*); these courts are also courts of appeal for the above-named minor cases. Of superior courts there are two:—*Östre Landsret* in Copenhagen with 25 judges, *Vestre Landsret* in Viborg with 17 judges. From these an appeal lies to the supreme court (*Höjesteret*) in Copenhagen, composed of 13 judges. Judges under 65 years of age can be removed only by judicial sentence.

In 1948, 10,551 men and 1,378 women were convicted of crimes and delicts. On 31 Dec., 1949, 3,671 men and 121 women were in the penitentiaries of Denmark.

Finance.

The budget, called the 'Finanslovforslag,' must be laid before the Folketing at the beginning of each session, *i.e.* at the beginning of October. The annual financial accounts, called 'Statsregnskab,' must be examined by 4 paid revisers, 2 of whom are elected by the Folketing and 2 by the Landsting. Their report is submitted to both chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for 3 years ending 31 March and the estimates for 2 years (in 1,000 kroner):—

	1947–48	1948–49	1949–50	1950–51 [1]	1951–52 [1]
Current revenue .	2,019,587	2,169,931	2,188,865	2,348,684	2,163,422
Current expenditure	1,979,665	2,070,051	2,171,404	2,343,055	2,151,256

[1] Budget estimates.

The public debt on 31 March, 1950, amounted to 2,942,689,000 kroner.

Defence.

In accordance with the military defence act of 1950 a commander-in-chief of defence assisted by a defence staff leads the military defence.

All basic matters concerning the 3 armed forces are treated by a defence office consisting of the commander-in-chief of the defence, the chief of defence staff, and the commanders-in-chief of the Army, Navy and Air Force.

The military defence of Denmark is based upon national conscription,

which was introduced in 1849. At the age of 17 years the young recruits are entered upon the conscription rolls, and between the age of 19 and 25 they receive their first military training.

Army.—The army is being reorganized in corps. The men of the last 8 years' service form the troops of the line, while those of the previous 8 years form the reserve. During these 16 years the conscripts must keep the enlistment authorities informed of their whereabouts and may not leave the country without permission. The period of active service is 10–12 months.

The Army comprises regular officers, non-commissioned officers and reserve officers. The Army has schools for training of officers and N.C.O.'s, as well as arsenals for the manufacture of arms and munitions.

From 1947 the Army has taken part in the occupation of Germany.

Navy.—The Navy comprises the fleet and the coast-defence forces. It includes 9 torpedo-boats, 3 frigates (*Holger Danske*, *Niels Ebbesen* and *Thetis*), 3 submarines (chartered from the British Navy), 1 minelayer, 4 minesweepers, 3 motor torpedo-boats, 35 motor minesweepers, 3 depot ships, the Royal Yacht (*Dannebrog*), 2 surveying vessels (*Freja* and *Heimdal*), 2 mining tenders, 2 transport tenders and the training ship *Danmark*.

The coast defence includes several permanent fortifications. The recruits of the Navy are trained up to 365 days. Naval personnel total about 6,000 officers and men.

Air Force.—In process of complete reorganization in accordance with the military defence act of 1950. The former Army Flying Troops and the former Naval Air Service are now unified in a separate Air Force.

Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which forbids the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

As estimated in 1950 (actual figures for 1949 in brackets), the extent of the cultivated area was as follows (in thousand hectares):—Grain areas, 1,289 (1,338); root crops, 584 (563); other crops, 95 (86); green fodder and grass, 1,161 (1,161); fallow land, 9 (9); total cultivated area, 3,138 (3,157). The area and production of the chief crops for 3 years were as follows :—

Crops	Area (in 1,000 hectares)			Production (in 1,000 metric tons)		
	1948	1949	1950	1948	1949	1950 [1]
Wheat	69·0	83·0	84·5	252	300	299
Rye	167·3	195·8	153·9	400	469	330
Barley	441·3	454·0	493·4	1,459	1,571	1,613
Oats	329·7	308·0	278·3	988	982	831
Mixed grain	283·8	285·4	266·0	717	764	685
Potatoes	138·3	106·2	106·1	2,937	1,794	1,849
Root crops	437·7	457·0	480·8	20,217	22,851	25,969

[1] Preliminary figures.

In 1950, there were 503,000 horses, 3,044,000 head of cattle, 3,208,000 swine and 24,433,000 hens.

According to statistics collected on 1 June, 1948, there were 109,300 industrial factories employing altogether 641,400 persons; and about 88,200

commercial establishments with about 271,800 employees. Beet-sugar production in 1948, 246,000 tons; 1949, 300,500 tons. Milk production, 1948, 4,058,000 tons; 1949, 4,883,000 tons; 1950, 5,414,000 tons. Butter production, 1948, 120,400 tons; 1949, 155,900 tons; 1950, 179,500 tons. Cheese production, 1948, 56,700 tons; 1949, 63,800 tons; 1950, 60,400 tons.

In the Danish fisheries the total value of the fish caught was, 1948, 180 million kroner; 1949, 178 million kroner.

Commerce.

The following table shows the value, according to official returns, of special imports and exports (excluding precious metal) for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	1,000 kroner	1,000 kroner		1,000 kroner	1,000 kroner
1944	1,166,801	1,360,467	1947	3,090,236	2,313,290
1945	696,408	903,697	1948	3,423,684	2,730,706
1946	2,847,546	1,617,914	1949	4,212,484	3,559,945

Distribution of Danish foreign trade (in 1,000 kroner) :—

Countries	Imports			Exports		
	1947	1948	1949	1947	1948	1949
Belgium .	247,007	235,810	208,781	202,144	231,186	177,474
Finland .	135,230	139,050	152,629	107,567	154,437	108,286
France .	100,855	109,189	201,901	59,870	116,096	170,253
Germany .	107,584	130,360	141,357	36,571	48,516	266,889
Norway .	157,569	148,732	157,307	124,558	175,900	188,176
Sweden .	213,234	226,116	288,805	208,832	205,136	187,747
Switzerland	83,233	96,194	77,125	174,304	120,530	91,150

U.S.A. .	605,042	493,555	671,729	99,499	147,197	112,498

Total trade (Board of Trade returns) between Denmark (without the Faroe Islands) and the United Kingdom (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports to U.K. .	37,867,695	26,956,944	42,223,155	77,524,310	100,308,299
Exports from U.K. .	15,781,059	25,046,698	30,978,813	49,384,135	63,633,110
Re-exports from U.K.	585,920	708,334	729,663	1,206,716	1,782,147

Communications.

Shipping.—On 31 Dec., 1949, Denmark had 1,057 vessels (above 20 registered tons gross) of 1,168,319 registered tons gross in her mercantile marine.

Cargo movement to and from foreign countries through Danish ports in 1950 amounted to 14,584,000 metric tons; of this, 12,365,000 tons consisted of incoming and 2,219,000 tons of outgoing freight.

Roads.—Denmark proper had (1 Jan., 1950) 3,248 km. of streets, 8,162 km. of roads and 44,854 km. of by-ways. Motor vehicles registered at 31 Dec., 1949, comprised 104,863 passenger cars, 54,309 trucks, 6,554 taxicabs, 2,592 buses, 876 ambulances and fire-brigade vehicles, and 39,004 motor cycles.

Railways.—There were (1949) railways of a total length of 4,822 km. open for traffic. Of this total, 2,443 km. belong to the state. The revenue for the year 1948–49 amounted to 224 million kroner from passenger transport and 175 million kroner from freight.

Posts.—There were in 1949–50, 1,606 post offices. The length of state telegraph and telephone lines (31 March, 1950) was 325,834 km.; number of offices, 630. At the same date the railway telegraphs had 439 offices. On 31 Dec., 1949, the length of telephonic wires of private companies was 2,705,465 km. On 31 Dec., 1949, there were 542,000 telephones. Postal revenues 1949–50. 186,000,000 kroner; expenditure, 180,000,000 kroner.

The number of holders of wireless licences at 30 Sept., 1950, was 1,236,274 (28% of the population).

Air Traffic.—The number of kilometres flown in Denmark in 1949, according to information published by the Danish air transportation company 'Det Danske Luftfartsselskab,' was 4,835,000; passengers carried in 1949 was 108,189.

Banking and Credit.

On 31 Dec., 1950, the accounts of the National Bank balanced at 5,123 million kroner. The assets included 69·4 million kroner in bullion and specie. The liabilities included 1,709 million kroner note issue, 50 million kroner general capital fund and 17 million kroner reserve fund. On 31 Dec., 1950, notes in circulation amounted to 1,709 million kroner

On 31 Dec., 1950, there were 159 other banks for commercial, agricultural and industrial purposes; their deposits amounted to 5,718 million kroner; their advances to 4,645 million kroner.

Money, Weights and Measures.

The monetary unit, the *krone* of 100 öre, is of the value of 1*s.* 1½*d.* at par (about 18 kroner to the £ sterling). The krone contains 0·403226 gramme of gold. In 1950, 19 36 kroner = £1.

Gold coins are 20-kroner and 10-kroner pieces. The 20-kroner piece weighs 8,961 grammes ·900 fine, and thus contains 8·0645 grammes of fine gold. Small change: 2-kroner and 1-kroner pieces of copper–aluminium–nickel; 25-ore and 10-öre pieces of copper–nickel, and 5-ore, 2-ore and 1-öre pieces of copper–tin–zinc.

The standard of value is gold.

The use of the metric system of weights and measures has been obligatory in Denmark since 1 April, 1912.

Diplomatic and Consular Representatives.

1. Of Denmark in Great Britain (29 Pont Street, S.W.1).

Ambassador.—Count Eduard Reventlow appointed 1 Jan., 1938; raised to the status of Ambassador on 25 March, 1947.

Counsellor.—F. H. Henningsen.

Commercial Counsellor.—R. H. Kampp.

Secretaries.—T. Busck-Nielsen.

Attachés.—William Winther Schmidt; Uffe Himmelstrup.

Minister Plenipotentiary for Commercial Affairs.—J. A. Vestbirk.

Commercial Secretaries.—B. [illegible] Paulson.

Acting Military Attaché.—H.R.H. Prince Georg of Denmark.

Naval and Air Attaché.—Commodore J. A. J. Jegstrup.

Press Attaché.—Ebbe Munck, C.B.E.

Agricultural Counsellor.—P. A. Moltesen.

Fisheries Attaché.—J. C. Bogstad.

There are consular representatives at all important centres, including Aberdeen, Belfast, Birmingham, Cardiff, Edinburgh, Glasgow, Liverpool, London, Manchester, Newcastle-on-Tyne, Portsmouth and Southampton.

2. Of Great Britain in Denmark.

Ambassador.—Sir Alec Walter George Randall, K.C.M.G., O.B.E. (appointed 22 May, 1945; raised to ambassadorial status on 25 March, 1947).

Counsellors—Edward Albert Radice, C.B.E.; S. Simmonds, O.B.E.

First Secretaries.—Ronald Ede; T. C. Southworth; F. J. J. Day, O.B.E.

Naval Attaché.—Commander H. Maitland-Makgill-Crichton, D.S.O., D.S.C., R.N.

Military Attaché.—Lieut.-Col. E. L. Campbell Edlmann.

Air Attaché.—Wing Commander N. A. N. Bray, D.F.C.

Scientific Attaché.—J. Wardley Smith.

There are consular representatives at Copenhagen, Aarhus, Esbjerg, Horsens, Odense and Thorshavn and Klaksvig (Faroe Islands).

Greenland.

Greenland is the only colonial possession of Denmark. Its total area is 2,176,000 square km., made up of 1,834,000 square km. of ice cap and 342,000 square km. of ice-free land. The population in 1945 numbered 21,412. Of the total, 580 were Europeans and 20,832 natives; the latter numbered 9,967 men and 10,865 women. West Greenland had a population of 20,040, East Greenland of 1,372. The imports from Greenland into Denmark in 1949 amounted to 13,604,000 kroner, and the exports from Denmark to Greenland to 30,036,000 kroner. Exports to U.K. (Board of Trade returns), 1947, 1948, 1949, nil; 1950, £752. Imports from U.K., £4,515 in 1947; £15,517 in 1948; £44,601 in 1949; £53,385 in 1950. The trade of Greenland is a state monopoly.

In 1948, near Kit[illegible] on the east coast huge quantities of lead were found, estimated at 1 million tons.

A Danish-American agreement for the common defence of Greenland was signed on 27 April, 1951.

Books of Reference.

Statistical Information.—The Danish Statistical Department [illegible] 27, Copenhagen K.) was founded in 1849 and [illegible] in 1896 [illegible] placed under the Minister of Finance. *Chief.*—[illegible]. Statistics concerning banks and railways are outside its purview. Its main publications are:—Statistisk Aarbog—Statistiske Efterretninger.—Statistiske Meddelelser.—Statistisk Tabelvaerk.

DOMINICAN REPUBLIC.

(REPÚBLICA DOMINICANA.)

ON 5 Dec., 1492, Columbus discovered the island of Santo Domingo, which he called La Española; for a time it was called Hispaniola. The city of Santo Domingo, founded by his brother, Bartholomew, in 1496, is the oldest city in the Americas and was for long the centre of Spanish power in America. The western third of the island—now known as the Republic of Haiti—was later occupied and colonized by the French, to whom the Spanish colony of Santo Domingo was also ceded in 1795. In 1808 the Dominican population, aided by British troops, expelled the French, and the colony returned to the rule of Spain, from which it declared its independence in 1821. It was invaded and held by the Haitians from 1822 to 1844, when they were expelled, and the Dominican Republic was founded and a constitution adopted. Great Britain, in 1850, was the first country to recognize the Dominican Republic. The country was occupied by American marines from 1916 until the adoption of a new constitution in 1924. In 1936 the name of the capital city was changed from Santo Domingo to Ciudad Trujillo.

National flag: blue, red; quartered by a white cross.

National anthem: Quisqueyanos valientes, alzemos (words by E. Prud'homme; tune by J. Reyes, 1900).

Constitution and Government.—The republic is governed under the constitution proclaimed on 10 January, 1947.

Congress is composed of a senate of 20 members (1 from each of the 19 provinces and 1 from the district of Santo Domingo) chosen for 5 years by direct popular vote and a chamber of 45 deputies (1 for every 60,000 inhabitants or fraction above 30,000 in each province), with a minimum of 2 deputies for any one province, also for 5 years. The district of Santo Domingo, established from 1 Jan., 1935, returns 1 senator and 4 deputies. Senators and deputies receive the equivalent of $400 (U.S.) per month.

The executive power is vested in the President, who is elected for 5 years, by direct vote. In case of death, resignation or disability, the President is succeeded by the Secretary of State for War and Marine. There are 12 secretaries of state in charge of departments.

General elections under a revised constitution, at which women voted for the first time, were held on 16 May, 1942; 2 women were elected to the chamber and 1 to the senate.

In 1948 the President was given extraordinary powers to regulate by decree and without congressional approval all matters concerning national

security and welfare; in 1949 he was given powers to declare war on any country giving shelter to revolutionists against his regime, but relinquished them in March, 1950. In 1951 he was given power to declare a national emergency and to suspend the constitutional checks on the executive.

President of the Republic.—Rafael Leonidas Trujillo Molina (born 24 Oct., 1891; assumed office on 18 May, 1930, and again on 16 Aug., 1947, after his re-election on 16 May, 1947. In Feb., 1951, the Chamber of Deputies asked the President to accept a third term, 1952–57.

Area and Population.—The Dominican Republic occupies the eastern portion (about two-thirds) of the island of Hispaniola, Quisqueya or Santo Domingo, the western division forming the republic of Haiti. It consists of the District of Santo Domingo (containing the capital) and 19 provinces (formerly 12). Area is 49,542·72 square km. (19,128 square miles) with 870 miles of coastline, 193 miles of frontier line with Haiti (marked out in 1936), and an estimated population, on 1 July, 1949, of 2,277,264.

Density of population, 1949, was 119·0 per square mile. Of the estimated total, 1,121,706 were males; 408,771 were urban; 753,343 were under 10 years of age, and 101,656 were 60 years or older, including 692 centenarians. In 1949, marriages registered were 6,077; divorces, 923; live births, 88,035 (of which 51,740, mainly in the rural districts, were illegitimate); deaths, 21,235.

A census of the professions (with number of women members in parentheses) showed, as of 1 Jan., 1949:—663 lawyers (28); 597 doctors (12); 321 pharmacists (181); 162 engineers (4); 95 land surveyors (nil).

A census of population and housing was taken on 6 Aug., 1950, and of agriculture on 8–14 Aug.

The population (1935 census, with 1948 estimate in parentheses) of the principal cities was as follows:—Ciudad Trujilo, 71,091 (147,372); Santiago de los Caballeros, 34,175 (62,527); San Pedro de Macoris, 18,617 (24,200); Puerto Plata, 11,772 (17,059); San Francisco de Macoris, 10,100 (18,108); La Vega, 9,339 (12,721); Barahona, 8,367 (16,610); Bani, 7,374 (13,997).

The population is partly of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood. About 13% are white, 68% of mixed blood and 19% African. British residents number 8,200, of whom 8,000 are from the British West Indies; Americans number about 4,500 including a number of Puerto Ricans. Tax-exempt land has been set aside for the settlement of European refugees, both Jewish and non-Jewish, who are guaranteed full civic rights, the first settlements are being made on 26,000 acres at Sosúa, donated by President Trujillo. Refugees are barred from competing with the natives in raising sugar, cocoa, coffee, bananas and tobacco. The language is Spanish, but many educated Dominicans speak English.

The capital, Ciudad Trujillo, on the right bank of the river Ozama, was practically destroyed, except for a few historic buildings, by a disastrous hurricane on 3 September, 1930. It has been rebuilt and materially improved. The town of Matanzas was destroyed by earthquakes and tidal waves in August, 1946.

Religion and Education.—The religion of the state is Roman Catholic; other forms of religion are permitted. There is a papal nuncio with residence in Ciudad Trujillo, as well as an archbishop, known as the Primate of the Indies, in Ciudad Trujillo.

Primary instruction is gratuitous and obligatory for children between 7 and 14 years of age; there are also secondary, normal, vocational and special schools, the total at the end of 1948 being 2,576 (including 1,172 emergency schools), all of which were wholly maintained by the state, except 53 semi-official (state aided) and 136 private. The total enrolment of pupils was 242,545. Since the campaign against adult illiteracy started in 1941 illiteracy among those over 9 years of age has fallen by 17·9%. Illiteracy in 1941 was 77% of the population, compared with 75% in 1930. The University of Santo Domingo (founded 1538) has 9 schools for professional students. Budget estimate for education, 1947, $2,984,672. Agricultural education was reorganized in 1946.

Motion-picture theatres numbered 53 in 1949, with seating capacity of 23,000.

Great progress has been made in sanitation. Forty towns (1950) have complete waterworks. There are 62 hospitals (with 3,200 beds) and 133 aid stations or clinics.

Justice.—The judicial power resides in the Supreme Court of Justice, the courts of appeal, the courts of first instance, the communal courts and other tribunals created by special laws, such as the land courts. The Supreme Court consists of a president and 8 judges chosen by the Senate, and the [illegible] appointed by the executive; it supervises the lower courts. The republic is divided into 6 departments and, in all, 19 judicial districts, each having its own procurator fiscal and court of first instance (that of Ciudad Trujillo has 3 courts and La Vega 2); these districts are sub-divided, in all, into 66 communes, each with one or more local justices, a secretary and one or more bailiffs (*alguaciles*). Each department has a court of appeal of a president and 4 judges, appointed by the Senate, and a departmental procurator-general appointed by the President; these courts sit at Ciudad Trujillo and 5 other towns. The death penalty was abolished in 1924, but is imposed in war-time for treason or espionage.

Finance.—The receipts and disbursements for 6 years, in Dominican gold pesos, equal to the U.S. dollar (adopted in 1947 as the monetary standard, replacing the U.S. dollar which had been the official unit since 1897), were :—

	Revenue	Expenditure		Revenue	Expenditure
1944	24,605,524	26,410,031	1947	73,769,816	73,157,300
1945	29,575,585	29,840,669	1948	89,196,023	88,191,152
1946	43,900,620	42,934,206	1949[1]	66,735,260	66,735,260

[1] Budget estimates.

Expansion of revenue in 1948 was made possible by a loan of 23,981,312 gold pesos; the revenue from taxation was 62,188,876 pesos. Income tax was established in 1949.

Chief items of revenue in the 1947 budget were (in gold pesos) :—Internal revenue, 21,801,100; customs receipts, 12,129,000; licence fees, 1,500,000; miscellaneous taxes and income, 1,454,500; postal, telegraph and water service, 885,000. Chief items of expenditure (1947) were :—Defence, 5,500,144; education, 3,061,672; treasury and public credit (including Chamber of Accounts), 11,496,645; public works, 3,792,887; judiciary, 1,850,660; presidency, 558,200; interior and police, 2,264,064.

On 21 July, 1947, the entire external debt of $9,271,855 was redeemed, extinguishing the last of the $20 million loan made in 1922–26. Net internal debt, 31 Dec., 1948, was $25,302,544.

American direct investments, end of 1940, were $41,895,000.

Defence.—The armed forces, which are under the administration of the Secretary of State for War, Marine and Air, consist of the Army with a total strength of 12,000, navy personnel of 2,000, an aviation corps (with a strength, eventually, of 2,400) and a number of coastal patrol boats.

The navy includes 2 destroyers (H.M.S. *Fame* and *Hotspur* acquired in 1948–49 and renamed *Generalisimo* and *Trujillo*), 4 frigates, 5 corvettes, 3 patrol vessels, 2 landing craft and numerous smaller craft.

In 1947 compulsory military training for 1 year was decreed, aiming at an active reserve of men between 18 and 35, and those from 35 to 55 in the special reserve. A total of 50,000 is aimed at.

The municipal police forces were in 1936 organized into a single body as a national constabulary under direct supervision from the capital. In 1947, the National Police numbered 6,800 men.

Production and Industry.—Agriculture is the chief source of wealth, sugar cultivation being the principal industry. Of the total area, 9,900 square miles are cultivable, and about 3,700 are under cultivation. Some 37 canals irrigate about 12,000 acres. Twelve agricultural settlements were established in 1939, occupying 807,324 acres, of which 274,707 were cultivated; in 1943, 102,232 acres were ploughed. Most of the remainder is forest land, mainly pine-groves, which is useless for agriculture. Livestock in 1948–49, included 593,000 cattle, 533,000 pigs and 265,000 horses, mules and asses.

The largest sugar estates are in the south-eastern part of the republic. Sugar production, 1949–50, 453,000 metric tons; 1948–49, 476,485 tons. There are 14 sugar 'centrals,' of which 9 are owned and operated by American companies, although exports of sugar to the United States are barred by the quota established by the Cuban sugar. Exports, 1949 (all to the U.K.), were 436,806 metric tons; 1948, 383,956 metric tons.

Coffee, grown originally for the French market, is making headway in the United States, which takes 120,000 bags per annum. Output, 1948–49, 345,483 bags (of 60 kilos); 1947–48, 293,300 bags. Exports in 1948, 11,545 metric tons, of which 10,178 tons went to the United States. Production of rice is fostered; output in 1948–49, 56,000 metric tons. Cocoa is the second principal crop; output has increased tenfold since 1900; exports in 1949 were 20,032 metric tons, of which the United States took 19,902 tons. Other principal exports are leaf tobacco (output, 49,600,000 lb. in 1948–49), maize, molasses and bananas (exports in 1949, 1,599,571 stems).

In 1947, 2,989 industrial establishments had capital amounting to 91,387,013 gold pesos, of which 61,000,000 pesos was represented by United States interests, mainly vested in the sugar industry. These concerns employed 50,248 persons, paid 21,008,563 pesos in wages, used raw materials valued at 47,000,547 pesos and had an output valued at 120,489,008 pesos.

Various minerals are found, principal among which are gold and copper. Iron is found in the Hatillo area in the form of black magnetic oxide of iron (about 60 to 68% pure) and petroleum has been found in shallow pockets in the Azua region, but the pockets were drained by the oil-well drilling

machines set up to investigate. Silver and platinum have been found, and near Neiba there are several hills of rock salt covered with only a thin layer of soil. The Aluminium Company of America is surveying the Pedernales area for bauxite. Alluvial washing of gold by pans is allowed; exports of gold in 1946, 30 kilos, valued at $22,595.

Commerce.—The total imports and exports for 5 years were valued as follows (in gold pesos equal to U.S. dollars) :—

	1946	1947	1948	1949	1950
Imports. .	27,664,187	53,447,989	65,329,183	46,013,551	41,800,000
Exports. .	66,688,804	83,205,993	82,800,633	73,748,540	83,500,000

Exports of raw sugar, 1950, were valued at 37·5 million pesos or dollars (38,354,634 in 1949); of cocoa, 14·6 million pesos (7·5 million in 1949); of coffee, 12·3 million pesos (9·2 million in 1949).

The foreign trade for recent years was distributed as follows (in gold pesos equal to U.S. dollars) :—

Country	Imports		Exports	
	1948	1949	1948	1949
United States . . .	51,367,320	34,419,935	30,838,868	20,585,888
United Kingdom . . .	1,333,267	2,103,123	23,636,755	31,185,105
Belgium	697,623	582,246	686,391	1,042,772
Puerto Rico . . .	450,993	319,906	3,513,993	4,862,328
Dutch West Indies . .	2,637,699	2,600,795	910,125	1,171,587
Canada	2,231,565	2,280,990	16,780,236	3,137,242
Spain	428,334	272,801	949,605	2,884,944

In 1949 the chief imports were (in gold pesos or dollars) :—Cotton goods, 5,007,050; iron and steel manufactures, 6,151,523; food, 5,508,503; machinery, 7,773,656; vehicles, 2,753,457. Principal exports in 1948 were (in dollars) :—Raw sugar, 41,653,858 (381,200 tons); cocoa beans, 16,993,879; chocolate, 1,087,955; coffee beans, 5,604,073; processed coffee, 1,039,470; tobacco, 4,046,620; molasses, 4,238,775. Exports to the United Kingdom, in 1948, consisted chiefly of raw sugar, valued at $23,454,698.

Total trade between the Dominican Republic and the United Kingdom (in £ sterling, Board of Trade returns) :—

	1938	1946	1947	1948	1949	1950
Imports to U.K. .	1,447,614	8,136,210	10,033,379	6,407,740	9,282,692	14,564,520
Exports from U.K. .	91,966	105,177	242,354	670,963	549,969	526,632
Re-exports from U.K.	113	541	—	204	990	2,990

Shipping and Communications.—In 1948, 1,333 vessels of 1,847,827 tons entered the ports of the republic to discharge 297,818 tons of cargo, and 1,353 with a tonnage of 1,880,174 cleared with export cargo of 615,557 tons.

The mercantile marine of the republic which, at the outbreak of war, had a tonnage of about 6,700, suffered severely from enemy action. Since the war, a number of vessels have been built to replace these losses; a 2,500-ton cargo-passenger vessel and a 4,200-ton cargo vessel have been purchased.

The country is reached from the American continents and the Caribbean

islands by the Pan-American World Airways system; 4 other airlines also operate. A local aviation company connects Ciudad Trujillo with Santiago de los Caballeros, San Pedro de Marcoris and 5 other large towns.

Three main trunk highways, with branches, now extend from Ciudad Trujillo eastward to Higuey (106 miles), northward to Santiago and Montecristi and Dajabón (204 miles) and westward to San Juan (128 miles) and Elias Piña on the Haitian border (161 miles). At Elias Piña the road joins the Haitian road to Port-au-Prince. The journey between the Haitian and Dominican capitals is now possible by motor in 9 hours. In 1950 a new road was completed from Higuey to Miraveles, facilitating crop movements, and another from Sabana del Limpio to the Camu River, opening up the rice fields. Total highway system in 1949 was 1,767 miles, mainly second-class and inter-communal roads; there are 1,196 bridges. Road transport is the chief means of travel. Motor vehicles, Dec., 1948, were 6,050, including 1,930 private cars, 1,194 taxi-cabs, 2,389 trucks and 537 omnibuses. Bicycles (all British make) were 8,056.

There are 168 miles of railway lines Government owned and operated (serving a limited area in the Cibao region) and about 637 miles of private lines on the sugar and other large estates.

Number of post offices, 1948, 134; telephone or telegraph offices, 165; telephone instruments (1948), 4,742. The telephone system is operated by an American company. The telegraph has a total length of about 1,300 miles belonging to the government and 1,968 miles privately owned; they have been leased to All-America Cables, Inc., which also controls submarine cables connecting, in the north, Puerto Plata with Puerto Rico and New York, and in the south, Ciudad Trujillo with Puerto Rico, Cuba and Curaçao.

There are 26 broadcasting stations in Ciudad Trujillo, Santiago and 6 other towns.

Money, Banking, Weights and Measures.—In Oct., 1947, the *peso oro*, equal to the dollar, was formally made the unit of currency, replacing the United States gold dollar, which had been the standard since 1 July, 1897. The new bank-notes are backed by $4,000,000 in gold and by $48,215,000 in U.S. bank-notes and deposits in New York banks. Both currencies circulate, but only the peso has been legal tender since 1947. There are silver coins for 1 peso, 50, 25 and 10 centavos, a copper-nickel 5-centavo piece and a copper 1-centavo piece.

The Dominican Republic joined the International Monetary Fund in April, 1948, placing the peso at the same gold value (0·888671 gramme of fine gold) as the U.S. dollar.

On 24 October, 1941, a law was passed for the creation of the Banco de Reservas de la República Dominicana, with a capital of $1,000,000, increased in 1948 to $3,000,000. The new bank, starting with branches purchased from the National City Bank of New York, opened for business on 27 October, 1941. It is authorized to perform all customary banking transactions. On 30 June, 1949, its assets and liabilities totalled $35,070,019. There are 2 foreign banks—the Royal Bank of Canada with 5 branches and the Bank of Nova Scotia. An agricultural and mortgage bank, with paid-up capital of $500,000 was established in 1945.

In 1947 the Central Bank of the Dominican Republic was launched; its balance sheet on 31 Dec., 1950, showed gold reserves of 4,045,000 pesos or dollars and foreign exchange, 15,308,000 pesos. Chief liability item was note circulation of 23,115,000 pesos in Dominican currency, chiefly new bank-notes of 1, 5 and 10 pesos; total assets and liabilities were $28,372,000.

As of 31 Dec., 1949, there were 20 insurance companies—1 Dominican, 1 Cuban, 5 Canadian, 5 United States and 8 British; total premium income, 1948, was 2,045,262 pesos.

The metric system was adopted on 1 August, 1913, but English and Spanish units are quite common in ordinary commercial transactions.

Diplomatic and Consular Representatives.

1. Of the Dominican Republic in Great Britain (37, Eaton Square, S.W.1).

Ambassador.—Julio Vega Batlle (accredited as Ambassador 20 Feb., 1951).

First Secretary.—L. A. de Boyrie de Moya.

2. Of Great Britain in the Dominican Republic.

Ambassador and Consul-General.—Stanley Herbert Gudgeon, C.B.E. (accredited as Ambassador 3 March, 1951).

Second Secretary and Vice-Consul.—K. J. Collie.

Labour Secretary.—H. A. N. Brown.

Air Attaché.—Wing-Cdr. A. F. Johnson, D.F.C.

There are consular representatives at Ciudad Trujillo, San Pedro de Macoris and Puerto Plata.

ECUADOR.

(República del Ecuador.)

Constitution and Government.

The Republic of Ecuador is situated in the north-west of South America, with about one-fifth of its area lying north of the equator. It is bounded on the north by Colombia, on the south by Peru and Brazil, on the east by Colombia and Brazil and on the west by the Pacific Ocean and Peru.

The Spaniards under Francisco Pizarro founded a colonial empire in the territory after defeating the local ruler at the battle of Cajamarca on 16 November, 1532. Spanish rule continued until 10 August, 1809, when the Presidency of Quito, as it was known, became part of the original Republic of Colombia, founded by Simon Bolivar in 1819 by uniting it to the vice-royalty of New Granada (now Colombia) and the captaincy-general of Venezuela at the Congress of Angostura, 17 December, 1819. The Presidency of Quito became the Republic of Ecuador by amicable secession 13 May, 1830.

Border warfare between Ecuador and Peru, which has been intermittent for nearly a century, was resumed in 1941, when Peru invaded the coffee-growing province of El Oro, but on 10 July, 1941, the dispute was submitted to arbitration by Argentina, Brazil and the United States and an agreement was reached on 29 January, 1942; final notes ratifying the [illegible] agreement were signed on 22 May, 1944. (For map of the boundary, *see* THE STATESMAN'S YEAR-BOOK, 1942.)

Under the new constitution [illegible] 6 March, 1945, the President is elected directly by the people [illegible] of 4 years, and is eligible for re-election after an interval of 4 years; he must be a native Ecuadorean at least 40 years of age and not related by blood or marriage to the retiring President. Congress consists of a single Chamber of Deputies, elected for 2 years, by provinces, on a population basis. In addition special deputies are elected by professional, cultural, business and racial groups.

Citizens are all literate Ecuadoreans, men and women, over 18 years of age. Women voted for the first time in 1939, nominally under the constitution of 1906 but neither that constitution nor the electoral law of 1 March, 1939, clearly established their right to the franchise.

The following is a list of the presidents and provisional executives since 1934, with the date on which they took office :—

Dr. José Maria Velasco Ibarra, 1 Sept., 1934; deposed 20 Aug., 1935.
Dr. Antonio Pons, 20 Aug.–26 Sept., 1935 (resigned).
Federico Paez, 'Supreme Head of the State,' 26 Sept., 1935; elected Acting President, 10 Aug., 1937; resigned 23 Oct., 1937.
Gen. G. Alberto Enriquez. 'Supreme Head of the State,' 23 Oct., 1937; relinquished power on 10 Aug., 1938.
Dr. Manuel M. Borrero, Provisional President, 11 Aug.–3 Dec., 1938.
Dr. Aurelio Mosquera Narvaez, elected 3 Dec., 1938; died 19 Nov., 1939.
Carlos Alberto Arroyo del Rio, elected 12 Jan., 1940; relinquished power on 30 May, 1944.
Dr. José Maria Velasco Ibarra, elected by Constituent Assembly, August, 1944; re-elected 11 August, 1946, but deposed 24 August, 1947.
Col. Carlos Mancheno, seized power 24 August, 1947; deposed 3 September, 1947.
Mariano Suarez Veintimillo (Vice-President), 3–15 Sept., 1947.
Carlos Julio Arosemena (provisional), 15 Sept., 1947.

President of the Republic.—Galo Plaza Lasso, an Independent, supported by the Movimiento Civico Nacional, elected 6 June, 1948, assumed office 1 Sept., 1948. He was educated in the United States. His party was overwhelmingly defeated by the Conservatives in the congressional elections of 4 June, 1950.

The provinces are administered by [illegible], appointed by the Government; their subdivisions, or cantons, [illegible] chiefs and elected cantonal councillors; and the parishes by political lieutenants. The Galapagos Archipelago is administered by the Ministry of National Defence.

National flag : yellow (2), blue (1), red (1), horizontal.

National anthem : Salve, oh patria ! (words by J. L. Mera; tune by A. Neumann, 1866).

Area and Population.

Though the frontiers of Ecuador have now been settled, no definite figure of the area of the country can yet be given. One military estimate shows 455,454 square kilometres (175,851 square miles), including the Archipelago of Colon (the 13 Galapagos Islands) with 7,430 square kilometres (2,869 square miles). Calculations of the geographer Wolf, also officially adopted, show 714,860 square kilometres (276,008 square miles). The United Nations

Statistical Office, for its statistical purposes, excludes the 'Region Oriental' and the Galapagos Islands and gives the settled portion of Ecuador an area of 275,000 square kilometres (106,178 square miles) with an estimated population, mid-1948, of 3,324,000 and a density of 31·6 per square mile.

The country is divided into 18 provinces (two comprising the 'Region Oriental') and one territory—the Archipelago of Galapagos—officially called 'Colon,' situated in the Pacific Ocean about 600 miles to the west of Ecuador and comprising 15 islands. In Sept., 1942, naval bases were granted to the United States in the Galapagos Islands and on the Santa Elena peninsula.

A tract of rich virginal land, amounting to 124,000 acres, in Santo Domingo de los Colorados area has been set aside to be colonized exclusively by British and American settlers.

The first census of the population ever taken took place on 29 Nov., 1950. Housing and agriculture were not included. It was estimated (1938) that of the total population whites formed 8%; Indians, 27%; mixed, 54%; mulattos, 6%; negroes, 2%; others, 3%.; foreigners numbered about 20,000 persons. The language of the country is Spanish. The Indians, who speak what is called the Quechua language (in the Oriental Region the wild tribes have a language of their own—'Jibaro'), are organized in the Federation of Indians, with Miss Dolores Cacuango as president. The Constituent Assembly of 1944–45 had, for the first time in history, a representative elected by the Indians.

The estimated population of the republic (30 June, 1938) was distributed as follows among the provinces (capitals in brackets):—

Provinces	Area in square miles (Wolf's estimates)	Population (est. 1938)	Population per square mile
Esmeraldas (Esmeraldas)	5,464	58,950	10·8
Manabí (Puertoviejo)	7,891	312,850	39·6
Los Rios (Babahoyo)	2,295	150,830	65·7
Guayas (Guayaquil)	8,331	441,660	53·0
El Oro (Machala)	2,338	77,530	33·2
Carchi (Tulcán)	1,495	80,650	53·9
Imbabura (Ibarra)	2,414	146,230	60·6
Pichincha (Quito)	6,218	303,480	48·8
[illegible]	2,595	202,070	77·9
[illegible]	1,685	223,100	132·4
[illegible]	2,989	258,500	86·5
Bolivar (Guaranda)	1,159	99,800	86·1
Cañar (Azogues)	1,521	113,250	74·4
Azuay (Cuenca)	3,873	236,800	61·1
Loja (Loja)	3,705	198,100	53·5
[illegible] ra [1]	219,095	295,200	1·3
[illegible]	2,868	1,000	0·3
Totals	276,008	3,200,000	11·6

[1] These two provinces, formed in 1925, together constitute the 'Region Oriental'; of their combined areas only about 110,000 square miles have any inhabitants. The capital of the former is Tena, and of the latter, Macas.

There are 74 cantons, 119 urban parishes and 585 rural parishes. The chief towns are the capital, Quito (211,174; census of June, 1947), Guayaquil (81,893 as estimated in 1944) and Cuenca (53,871). Other towns with estimated 1938 figures are:—Ambato (25,200), Riobamba (19,500), Loja (19,000), Latacunga (17,800) and Azogues (8,200). A severe earthquake,

5 Aug., 1949, caused great destruction at Ambato and other places in central Ecuador resulting in 6,000 deaths; about 100,000 persons were homeless.

Vital statistics for 3 years were as follows :—

Year	Births	Deaths	Marriages
1943	122,514	56,052	18,398
1944	124,785	54,953	18,500
1945	128,326	59,874	18,668

The crude birth rate, 1947, was 40·4 per 1,000 population; the crude death rate, 16·1; the infant mortality rate, 1947, was 122·0 per 1,000 live births (peak was 162·1 in 1933); crude marriage rate, 1947, was 5·7 per 1,000 population.

Religion and Education.

The state recognizes no religion and grants freedom of worship to all. The Catholic Church has one archbishop (Quito) and 6 suffragan bishops. Since 1895 all state appropriations for the benefit of the Church have ceased. Members of the Episcopate must be Ecuadorean citizens. A modus vivendi was concluded by the Ecuadorean Government and the Holy See on 24 July, 1937, governing the relations between the Catholic Church and the state. Civil registration of births, deaths and marriages is obligatory. Divorce is permitted. Under the 1945 constitution illegitimate children have the same rights as legitimate ones with respect to rearing, education and inheritance.

Primary education is gratuitous and obligatory. Secondary education is carried on in 50 secondary schools or colleges and higher education in 6 universities at Quito, Guayaquil and Cuenca. The state maintains 3 music schools for vocal and instrumental music; tuition is free. There is also a law school at Loja. Private schools, both primary and secondary, are under some state supervision. There were (1947) 3,244 primary schools, with 6,999 teachers and 284,182 pupils; at the 71 secondary schools there were 1,497 teachers and 15,526 pupils; at the universities, 397 teachers and 3,384 students. There are no statistics on illiteracy. A campaign against adult illiteracy, started in 1944, had taught 131,800 adults by 1 Jan., 1948.

Motion-picture theatres increased from 37 in 1940 to 84 in 1949, with seating capacity of 85,000. In 1948 there were 25 daily newspapers with an aggregate daily circulation of 85,000.

Justice and Crime.

The Supreme Court in Quito is the highest tribunal and consists of 5 justices and the Minister Fiscal. Of the 8 superior courts, 3 are composed of 6 judges and 5 of 3 judges each. There are numerous and well distributed lower courts. The popular jury was abolished in 1928, and criminal cases are heard before a ' special jury ' consisting of 3 members of the Ecuadorean bar, or ' 3 citizens of recognized integrity ' appointed annually by the superior courts. Capital punishment and all forms of torture are prohibited under the constitution. Likewise imprisonment for debt and contracts involving personal servitude or slavery. Substantial amendments expediting judicial procedure were introduced in 1936 and salaries for all judicial officials replaced remuneration by fees.

Finance.

Revenue and expenditure for 6 years (including the ordinary and extraordinary budgets, the special accounts and the guaranteed budgets of the autonomous, self-financing entities) are, in sucrés, as follows :—

	1945	1946	1947	1948	1949	1950 [1]
Revenue .	405,103,800	536,782,200	669,664,700	669,206,000	714,080,900	850,885,000
Expenditure .	417,455,000	535,239,400	659,385,800	652,799,600	712,191,100	820,535,900

[1] Preliminary.

The 1951 budget proposed an ordinary budget of 470 million plus some 730 million to cover the extraordinary budget, special accounts and the total expenditures of the autonomous institutions.

Expenditures in the ordinary budgets (with revenues in parentheses) have been :—1945, 252,637,500 (252,716,600); 1946, 297,545,000 (298,812,700); 1947, 391,517,800 (394,521,400); 1948, 373,231,400 (373,403,100); 1949, 390,153,900 (390,647,500). Of the 1949 ordinary revenue, 61% was raised by indirect taxation imposed on consumers, 13% by income tax, and the remainder from other direct taxes and national properties and services. Of expenditure, defence took 80·1 million, education 76·8 million, public works 85·6 million, and debt service 23·3 million. Public debt took 19,996,423 sucrés in 1948.

The foreign debt on 31 Oct., 1950 (chiefly the bonds, in default, of the Guayaquil and Quito Railway), $41,342,000; internal debt, 121,034,000 sucrés, of which 49,199,000 sucrés had been advanced by the Central Bank, 63,454,000 by institutions and 8,381,000 by the public. American direct investments in Ecuadorean enterprises, 1940, amounted to $5,107,000. Par values of British investments, end of 1949, were £4,363,609, of which 51·2% were in default.

Defence.

The regular Army is composed of 4 regiments of artillery, 9 battalions of infantry, 1 regiment and 3 squadrons of cavalry, 3 battalions of sappers and 1 aviation company. The Army has about 30 tanks. Military service was made compulsory on 24 May, 1921, and was enforced for the first time in 1935. The country is divided into 4 military districts. A school of military engineering and artillery is established at Quito with 250 cadets.

The Navy consists of the frigate *Guayas*, 2 patrol vessels (*Manabi* and *Esmeraldas*), the training ship *Presidente Alfaro* and 5 smaller craft. Naval personnel totals about 2,400.

The Government has at Guayaquil an aviation school and a naval school in Salinas with United States instructors. Flying-fields have been established at Guayaquil, Quito, Latacunga, Loja, Manta and Riobamba.

Production and Industry.

Ecuador is divided into two agricultural zones : the coast regions and the lower river valleys, where tropical farming is carried on in an average temperature of from 18° C. to 25° C.; and the hill country, the foothills, and the mountain valleys, adapted to grazing, dairying and the production of cereals, potatoes and the fruits and vegetables suitable to temperate climes.

Excepting the inter-Andean plateau and a few arid spots on the Pacific

coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees and other valuable timber, including balsa wood. Only a third, in the Litoral region, is commercially accessible. Ecuador is the world's chief source of balsa supply; the tree (of the *Ochroma* or silk-cotton family) is found on the western coastal lowlands and also in the 'Orient' region. The lightest balsa weighs half of the same bulk of cork, but its strength is about half that of spruce. It is a prolific grower in suitable climate [illegible] than any other [illegible] vegetation except the wild [illegible] of balsa were [illegible] (2,795,381 sucrés) in 1947; [illegible] 7,125,649 sucrés) in 1946. Exports of hard wood, 1947, were 3,384 metric tons, valued at 4,257,147 sucrés.

Only about 11,480,000 acres are actually cultivated. The staple produce of Ecuador is excellent cocoa, sold chiefly to the United States, but output has declined. Production in 1950 was 27,100 metric tons, valued at U.S. $18·5 million, compared with 47,000 tons in 1914, valued at U.S. $9·8 million. Exports in 1949, 240,000 bags (175 lb.); 1948, 215,000 bags. Coffee is also grown, about 345,000 bags (of 60 kilos) in 1948–49; exports in 1950 realized U.S. $17·4 million compared with $5·4 million in 1949. Rice is becoming a valuable export; exports had to be prohibited throughout 1947; production, 1949, 2,388,500 quintals (101·4 lb.). Wild rubber is abundant, but the output has suffered from the competition of plantation rubber in the Orient; exports, 1949, 800 metric tons. Mangrove bark (for tanning), alligator skins and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities. Banana exports, 1948, were 3,593,617 stems. Considerable attention is being paid to the cultivation of cotton, especially in the province of Manabí, and to sugar; ivory nuts, or *tagua*, are produced and exported in [illegible] quantities; exports in 1947, 13,019 metric tons, valued at [illegible]. Sugar output, 1948, 950,000 quintals (101·4 lb.). Tobacco is being increasingly cultivated, especially in Esmeraldas; the manufacture of tobacco is a government monopoly.

Livestock, estimated in 1948:—Cattle, 1,520,000; (1939) horses, 1,200,000, sheep and goats, 3,500,000; pigs, 3,200,000.

Ecuador is auriferous. In 1949, 99,241 fine oz. of gold were produced (average output, 1941–45, 93,643 fine oz.). At Pillzhum, in Cañar, rich silver ore is found, but is not now worked. Output of silver (1949) amounted to 276,900 fine oz. Output of petroleum, normally about 2,700,000 barrels, fell to 2,563,890 barrels in 1949; exports (1949), 915,714 barrels, valued at 15,383,000 sucrés. The area of oil concessions in exploitation in the republic is 245,419 acres, located in the Santa Elana Peninsula, in the Province of Guayas. Results, up to 1949, have been disappointing. The country has some copper (output, metallic content, 1949, 708 metric tons, with exports (of concentrates) to the U.S. of 2,958 metric tons), iron, lead (output, 1949, 379 metric tons) and coal; sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands (output, 1948, 43 long tons). All salt mined must be sold to the Government, which has a monopoly of imports, exports and sales; output, 1947, 27,300 tons. Cement output, 1949, from the country's solitary plant (American) was 52,250 metric tons.

Numerous small hydro-electric plants have a potential of 969,150 kw., or 1,300,000 horse-power, but actual use in 1949 was only 58,782 horse-power.

Panama or 'Jipijapa' hats, made of *Toquilla* straw, are made very largely in Ecuador, the principal centres being Jipijapa, Montecristi, Tabacundo and

Cuenca. 3,116,387 hats were exported in 1947 (4,946,702, valued at 60,448,000 sucrés, in 1946).

Commerce.

Imports and exports for 5 years in sucrés (1 million sucrés = $74,074, U.S.) were as follows :—

	1945	1946	1947	1948	1949
Imports .	323,523,543	414,216,200	604,479,819	568,145,877	552,099,000
Exports .	377,894,393	598,975,000	619,859,000	656,928,744	481,685,268

Exports in 1948, 196,045 metric tons; in 1949, 175,179 metric tons. Imports, 1948, 107,755 metric tons; 1949, 124,311 metric tons.

Ecuador is more fortunate than most Latin-American countries in that her chief exports, by value, are not under alien ownership and the proceeds return to the country. By value, exports of rice in 1948 were 41% of the total; cocoa, 39%; coffee, 8%; petroleum (alien-owned), 5%.

The United States furnished 72·6% of imports in 1948 (412,803,000 sucrés), Belgium, 3·7%, and United Kingdom (35,596,000 sucrés), 6·2%. The United States took 38·8% of Ecuador's exports (191,775,000 sucrés) in 1948 and the Philippines (61,636,000 sucrés), 12·4%.

Total trade between Ecuador and the United Kingdom (in £ sterling, according to Board of Trade returns) :—

	1938	1946	1947	1948	1949	1950
Imports into U.K. .	188,318	30,048	148,303	157,929	72,551	224,277
Exports from U.K. .	131,216	604,570	1,148,115	996,780	998,040	1,379,870
Re-exports from U.K.	878	2,580	7,828	5,951	3,555	9,061

See p. 892 for the proposed 'Gran-Colombian Customs and Economic Union.'

Communications.

Shipping.—Ecuador has 10 seaports, of which Guayaquil is the chief. The merchant navy, in 1949–50, consisted of 67,000 tons of sea-going and 6,000 tons of river craft.

Roads.—There are now 1,591 miles of main trunk roads, 1,121 miles of branch roads and 2,227 miles of bridle-paths; most roads are narrow, the width of a motor car. The Pan-American Highway section (672 miles) will, when completed, extend from Rumichaca on the Colombian border to Macará in the south. There is river communication, improved by dredging, throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof. A highway is under construction from Latacunga to the port of Napo, on the river Napo, which flows into the Amazon. When completed, this will provide Ecuador with an outlet to the Atlantic Ocean.

Railways.—A railway is open from Durán (opposite Guayaquil) to Quito (288 miles). The total length of the 9 Ecuadorean railways in operation is 1,048 km. In 1949, 477,605 metric tons of freight and 1,845,500 passengers were carried.

Aviation.—An American air service is maintained from Cristobal to Quito, 6 hours; to Cali (Colombia), 2 hours; to Guayaquil, 1 hour, and

to New York, 36 hours. All the leading towns are connected by an almost daily air service.

Posts and Telegraphs.—Quito is connected by telegraph with Colombia and Peru, and by cable with the rest of the world. Wireless telegraphy has been installed for domestic use; there are 26 stations in Quito, Guayaquil and other principal towns, as well as in the Archipelago of Colon. In Dec., 1941, there were 27 broadcasting stations.

In 1949 there were 18,882 telephones in use, mainly in the capital; 13,927 were operated by the government; 26% were automatic.

Banking and Credit.

On 4 March, 1927, a decree was issued establishing at Quito the 'Central Bank of Ecuador,' with a capital of 10,000,000 sucrés, the only body authorized to issue currency. It is organized to protect the country's gold reserves, and its general functions resemble those of the Federal Reserve Banks of the United States. Its functions were expanded by a law, adopted 13 March, 1948, which had been drafted with the aid of the International Monetary Fund; through branches opened in 6 towns it now deals in mortgage bonds. On 31 Oct., 1950, the Central Bank had gold in its vaults, 252,968,000 sucrés and foreign exchange of 176,602,000 sucrés; note circulation, 496,631,000 sucrés.

All the commercial banks must be affiliated to the Central Bank; the commercial banks, 1 Jan., 1950, had capital and reserves of 131,161,000 sucrés and total assets of 811,562,000 sucrés.

Money, Weights and Measures.

Ecuador in Nov., 1950, informed the International Monetary Fund that the unit of account, the sucré, formerly equal to 7·40741 cents, U.S., or to 0·0658275 gramme of fine gold, would be devalued to 6·66667 cents, U.S., or to 0·0592117 gramme of fine gold, effective 1 Dec., 1950. Accordingly, $1·00, U.S., now equals 15·0 sucrés and 1 troy oz. of fine gold, 525 sucrés. Buying rate for the £ is 42 sucrés; selling rate, 42·42 sucrés.

On 4 March, 1927, Ecuador had returned to the gold standard with its currency stabilized at the rate of 1 sucré = 20 cents, U.S., compared with the previous par value of 10 sucrés = £1 or 1 sucré = 48·665 cents, U.S., but on 8 February, 1932, the gold standard was abandoned. After various devaluations the sucré, in 1945 and 1946, was pegged at 13·50 to the dollar. The sucré is divided into 100 centavos. In circulation are a small number of silver 5, 2 and 1 sucré coins plus a large number of pure nickel 1 sucré coins; there are 20, 10 and 5 centavo pieces, copper–nickel and copper–zinc. The currency consists mainly of the notes of the Central Bank in denominations of 5, 10, 20, 50 and 100 sucrés; notes of 500 and 1,000 sucrés were retired from circulation in 1949.

By a law of 6 December, 1856, the metric system of weights and measures was made the legal standard of the republic; but the Spanish measures are in general use. The quintal is equivalent to 101·4 lb.

The meridian of Quito has been adopted as the official time.

Diplomatic and Consular Representatives.

1. Of Ecuador in Great Britain (3 Hans Crescent, S.W.1).

Ambassador.—Carlos Manuel Larrea.

First Secretary.—José Luis Anderson.

Consular representatives at London, Birmingham, Glasgow, Liverpool and Southampton.

2. Of Great Britain in Ecuador.

Ambassador.—L. H. Foulds, C.B.E. (appointed Feb., 1951)
Secretaries.—J. McA. Clark, M.C.; C. A. Bryer (*Labour*).
Naval Attaché.—Capt. J. Lee Barber, D.S.O., R.N.
Civil Air Attaché.—Wing Commander C. J. Lewin.

There are consular officers at Quito and Guayaquil.

EGYPT.

(Misr.)

Egypt is an independent sovereign state. The British protectorate, declared on 18 Dec., 1914, terminated on 28 Feb., 1922, and the Sultan was proclaimed king on 15 March, 1922.

On 26 August, 1936, an Anglo-Egyptian Treaty of Alliance was signed in London (ratifications exchanged on 22 December, 1936) to continue for 20 years, whereby the military occupation by British forces was terminated, the special British interest in the defence of the Suez Canal zone recognized (the Government of the U.K. were authorized to station 400 pilots with ancillary personnel and 10,000 troops in the Canal zone) and the administration of the Sudan remains in accordance with the arrangement resulting from the Condominium Agreements of 1899. In accordance with its provisions, Egypt, in December, 1945, asked for a revision of the 1936 treaty, and negotiations began in May, 1946. By November, 1946, a draft treaty had been drawn up, but the negotiations finally failed owing to Egypt's assertion of the permanent unity of Egypt and the Sudan, the British Government maintaining that the Sudanese should, after they had become self-governing, have the right to choose their future status.

The Egyptian government broke off negotiations in January, 1947, and in July appealed to the Security Council to direct the total and immediate evacuation of British troops from Egypt and the Sudan, and the termination of the present administrative régime in the Sudan. The Security Council, after examining the dispute, failed to make any recommendation.

King.

Faruk I was born on 11 February, 1920; son of the late King Fuad I and of Queen Nazli; succeeded his father on 28 April, 1936; married 20 January, 1938, Farida Zulfikar, daughter of Yussuf Pasha Zulfikar, and granddaughter of Mohamed Pasha Said, Prime Minister 1910–14 and in 1919; [illegible], 1 Nov., 1948. *Offspring:* (1) Princess Ferial, born 17 Nov., 1938; (2) Princess Fawzieh, born 7 April, 1940; (3) Princess Fadia, born 15 Dec., 1943. The heir-presumptive is Prince Mohammed Aly (born 9 Nov., 1875), first cousin to the King and younger brother of the former Khedive Abbas Hilmi II.

Sisters to the King: (1) Princess Fewkieh, born 6 October, 1897 (stepsister); (2) Princess Fawzieh, born 5 November, 1921; married to the Shah of Persia, 15 March, 1939; divorced, 17 Nov., 1948; remarried Ismail Sherin Bey, 28 March, 1949; (3) Princess Faiza, born 8 Nov., 1923, married on 17 May, 1945, to H.E. Mohamed Aly Raouf; (4) Princess Faika, born 8 June, 1926, and (5) Princess Fathia, born 17 Dec., 1930.

According to Law No. 50 of 1938, the King's Civil List is fixed at £E100,000, and the royal family's allowances at £E100,000.

The present sovereign of Egypt is the tenth ruler of the dynasty of Mohamed Ali. On 13 April, 1922, the late King Fuad issued a rescript [illegible] the throne hereditary in the dynasty of Mohamed Ali and establ[illegible] succession of kings in the direct male line by primogeniture. Failing such direct line, it provides that the throne shall pass first to the King's brothers and their direct descendants by right of age, whom failing to the King's uncles and their direct descendants by right of age, it being laid down that each new king establishes a new house and that the succession is vested in his direct line. Females and their descendants are excluded, also anyone who is not in possession of full mental powers, who is not a Moslem, or who is not the son of Moslem parents.

National flag: green, with a white crescent and 3 white stars.

Constitution and Government.

For an account of the government before 1922, *see* THE STATESMAN'S YEAR-BOOK, 1924, pp. 834–835. For an account of the constitution which was [illegible] on 22 October, 1930, *see* THE STATESMAN'S YEAR-BOOK, 1934, pp. 937–938. This was [illegible] by royal decree on 30 November, 1934. On 12 December, 1937, the constitution of 19 April, 1923, was reintroduced. This provides for a parliament (*Barlaman*) composed of a Senate (*Maglis al Shuyukh*) two-fifths of whom are appointed by the King and the remaining three-fifths are elected for 10 years, and a Chamber of Deputies (*Maglis al Nuwwab*) composed of 264 members, at least 30 years of age. The Senate is composed of 147 members, at least 40 years of age. For both Houses the vote is based on universal male suffrage. Soldiers have no vote.

The monarchy is hereditary, and the King acts through a council of ministers appointed by him, but responsible to Parliament. The admini-

stration is divided into legislative, exercised by the King with the 2 Houses of Parliament; executive, by the King acting through his ministers, and judiciary. The last branch consists of (1) National courts and (2) National courts of personal status. Ministers need not be members of either House of the legislature, though in practice they generally have seats in either.

The elections held in Jan., 1950, resulted in the return of 225 Wafdists, 28 Saadists, 26 Liberals, 6 Nationalists, 1 Socialist and 33 independents.

The Wafdist Cabinet, appointed 12 Jan., 1950, is composed as follows:—

Prime Minister.—Mustafa el-Nahas Pasha.
Foreign Affairs.—Mohamed Salah ed-Din Bey.
Public Works.—Osman Moharram Pasha.
Interior and Finance.—Mohamed Fuad Serag ed-Din Pasha.
Education.—Dr. Taha Hussein Pasha.
War and Marine.—Mustafa Nosrat.
Communications.—Mohamed Mohamed el Wakil.
Justice.—Abdul Fattah el Tawil Pasha.
Commerce and Industry.—Mohamed Soliman Ghannam Bey.
Supply.—Ahmed Hamza.
Agriculture.—Abdul Latif Mahmud Bey.
National Economy.—Dr. Hamid Zaki.
Public Health.—Dr. Abdel Gawad Hussein.
Social Affairs.—Dr. Ahmed Hussein.
Municipal and Rural Affairs.—Ibrahim Farag.
Wakfs (Religious Foundations).—Ismail Ramzy Pasha.

Local Government.

The provincial councils were endowed in 1909 with the powers of applying bye-laws, authorizing public markets, fixing the number and pay of *ghafirs* (village watchmen), and authorizing the creation of *ezbas* (hamlets). They are the local authorities in connection with elementary vernacular education and trade schools. They consist of 2 elected representatives from each *markaz*. The *Mudir* is the *ex officio* president of the council.

In 1934 a law (Law No. 24, 1934) was passed by the Egyptian Parliament, extending the powers of the provincial councils, in particular with reference to educational, public health and agricultural matters. Elementary education, through all the villages and towns of the provinces, was made a duty exclusively of the councils.

Egypt proper is administratively divided into [illegible] of principal towns, and 15 *mudirias* or provinces, with [illegible] districts or *markazes*.

By Law No. 145, 1944, local councils were divided into municipal and rural. The number of members varies between 10 and 18 in municipal councils; in rural councils it varies between 6 and 9 according to area and population. Membership is restricted to Egyptians. Part of the members are elected, others are nominated *ex officio*. There are now about 70 municipal councils and about 120 rural councils. These local bodies have the right to impose local rates on all residents.

The municipality of Alexandria is now managed by a temporary commission of 16 members, all Egyptians, formed by a ministerial decision.

Area and Population.

The total area of Egypt proper, including the Libyan Desert, the region between the Nile and the Red Sea and the Sinai Peninsular is about 386,198 square miles, but the cultivated and settled area, that is, the Nile valley, delta and oases, covers only about 13,500 square miles. Canals, roads, date plantations, etc., cover 1,900 square miles; 2,850 square miles are comprised in the surface of the Nile, marshes and lakes. Egypt is divided into two great districts—'Wagh-el-Bahri,' or Lower Egypt, and 'El-Said,' or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census taken in 1937 and on 26–27 March, 1947:—

Administrative divisions	Area in sq. miles (approx.)	1937 census	1947 census			Population per sq. mile (1947)
		Total	Males	Females	Total	
Cairo	83	1,312,096	1,066,872	1,033,634	2,100,506	25,307
Alexandria	95	685,736	467,348	457,733	925,081	9,738

Total	13,496	15,920,694	9,416,731	9,621,253	19,037,984	1,398
Nomads (estimated)	—	12,000	—	—	49,320	—
Grand total	13,496	15,932,694	9,416,731	9,621,253	19,087,304	1,398

In 1925, Egypt ceded to Italian Cyrenaica the oasis of Gaghbub. (For the new frontier between Egypt and Cyrenaica, *see* map in the 1927 edition of THE STATESMAN'S YEAR-BOOK.)

In accordance with the armistice concluded with Israel on 24 Feb., 1949, the Egyptian forces hold a coastal strip in southwest Palestine, covering an area of 258 square km. and including the town of Gaza and the railway junction of Rafah.

The principal towns, with their populations, according to the census of 1947, are :—Cairo, 2,100,506; Alexandria, 925,081; Port Said, 178,432; Tanta, 139,965; Mahalla el Kubra, 115,509; Suez, 108,250; Mansûra, 102,709; Asyût, 90,378; Damanhûr, 84,983; Zagazig, 82,912; Faiyûm, 74,314; Minya, 69,667; Gîza, 68,520; Beni Suef, 57,464; Damietta, 53,620; Sohag, 43,234; Qena, 43,037; Shibîn el-Kôm, 41,836; Benha, 36,295; Rosetta, 28,698; Aswân, 25,397.

Vital statistics for 4 years :—

Year	Births	Marriages	Divorces	Deaths
1944	722,166	278,988	84,645	472,234
1945	787,502	275,685	79,892	512,003
1946	774,152	287,929	80,252	469,382
1947	834,557	260,586	75,404	408,577

Religion.

In 1937, the population (excluding Nomads) consisted of 14,552,695 Moslems; 1,099,186 Copts and Greek Orthodox; 78,203 Protestants; 126,581 Latins and Uniats; 62,953 Jews; 1,076 others and unknown. Thus Moslems formed 91·40% of the population; Christians, 8·19%; Jews, 0·40%; others, 0·01%. The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded in the year 361 of the Hegira, being 972 of the Christian era. The main centres of Higher Islamic learning under the supervision of the Council and the University of El-Azhar are the Faculty of Theology, the Faculty of Islamic Law (799 students in 1945–46), the Faculty of Arabic Language (1,257 students in 1945–46), the Faculty of Sources of Law (526 students in 1945–46), together with the following institutions of El-Azhar (with 11,535 students in 1945–46), at Cairo, at Alexandria, at Tanta, at Asyût, at Disûk, at Dămietta, at Zagazig, at Shibîn el-Kôm and at Kena.

There are in Egypt large numbers of native Christians connected with the various Oriental Churches; of these, the largest and most influential are the Copts, the descendants of those ancient Egyptians who adopted Christianity in the 4th century of the Christian era. Their head is the Coptic Patriarch. There are 15 metropolitans and 2 bishops in Egypt, and 1 bishop for Khartum; there are also archpriests, priests, deacons and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 284 years from the Gregorian calendar.

Education.

Education was made compulsory for all children between the ages of 7 and 12 by a law passed in April, 1933.

For elementary education there were in 1945–46, 577 government schools for boys, with 124,146 pupils, and 521 for girls, with 118,362 pupils; 95 *maktabs* for boys, with 1,904 pupils; 34 for girls, with 9,042 pupils, and 974 schools for both boys and girls, with 211,655 pupils. There were besides 1,755 elementary schools for both boys and girls, with 256,719 pupils; 79 rural schools for boys, with 8,211 pupils. Of kindergarten and primary schools there were, in 1945–46, 219 for boys, with 53,314 pupils, and 74 for girls, with 12,796 pupils; 36 private schools for boys with 4,531 pupils,

and 46 for girls with 1,956 pupils, besides 27 government kindergartens, with 5,566 pupils, and 23 private kindergartens, with 3,998 pupils.

For secondary education there were, in 1945–46, 50 government schools for boys, with 34,844 pupils, and 14 for girls, with 3,412 pupils, besides 20 private schools for boys, with 15,544 pupils, and 57 for girls, with 8,645 pupils.

For technical education (commercial, industrial and agricultural) there were altogether, in 1945–46, 47 schools, with 12,464 pupils.

There are 2 universities in Egypt. The University of Fuad I, in Cairo (founded in 1908 as a private institution and taken over by the Government in 1925), had, in 1945–46, 10,065 students (699 women); the University of Farouk I, founded by the Government in Alexandria in 1943, had, in 1945–46, 3,492 students (129 women). Expenditure on the 2 universities (1946–47) amounted to £E1,640,500.

There are also 4 training colleges for men (1,694 students in 1945–46) and 4 for women (460 students).

There were, in 1949, 194 cinemas with a seating capacity of 190,000.

Justice.

Before 1883 the only national tribunals in the country were the *Mehkemas*, presided over by the *Qâdis*. At the present time, they retain jurisdiction only in matters of personal law (marriage, succession, etc.), and *wakfs*—the latter being either charitable foundations, or family settlements with an ultimate remainder in favour of a charitable foundation—and also in certain non-religious cases (*e.g.* succession) between non-Moslem nationals The *Magalis Hasbiya* were abolished in 1947 and replaced by the 'Courts Hasby,' which are similar to the national courts and exclude both Qâdis and notables; the Magalis Hasbiya used to deal with the appointment of tutors; the interdiction of incapable persons and the nomination of guardians for them; the nomination of mandatories for the absent, and the control of the persons so appointed or nominated. In matters of personal law other than intestate succession, non-Moslems are, however, in general subject to their own Patriarchate, or any other recognized religious authority. In other matters, nationals are justiciable before the so-called national courts established in 1883. These now consist of 145 summary tribunals and of 15 judicial delegations, each presided over by a single judge, with civil jurisdiction in matters up to £E250 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to 3 years, except in cases relating to the trafficking in narcotics, where the period rises up to 5 years and a fine not exceeding £E1,000. That is, police offences and misdemeanours; 14 central tribunals, each of the chambers of which consists of 3 judges, and 4 courts of appeal, at Cairo, Asyût, Alexandria and Mansura. The Markaz Tribunals for the disposal of petty offences have been abolished. Civil cases not within the competence of the summary tribunals are heard in first instance by the central tribunals, with an appeal to one of the courts of appeal. The central tribunals also hear civil and criminal appeals from the summary tribunals. Since 1905 serious crimes (and, under a law of 1911, and a decree of 1925, all Press offences) are tried at the central tribunals by 3 judges of the court of appeal sitting as an assize court, assizes being held monthly. By a law of 1931 a separate court of cassation over and above the courts of appeal was set up. The new court of cassation is composed of 10 judges divided into 2 chambers of 5 judges each, one for civil and the other for criminal cases. The prosecution before summary tribunals and assize courts is entrusted to the *Parquet*, which is directed by a *Chef de Parquet*, having under him a substitut or substitut-adjoint at

each summary tribunal of the circumscription; the investigation of crime is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*; cases going before an assize court are further submitted to a special 'judge of investigation.' Offences against irrigation laws, etc., are tried by special administrative tribunals.

The so-called 'cantonal' courts (numbering approximately 240) composed of village notables, created in 1912, with a [illegible] in suits up to £E5 in value and a petty criminal [illegible] were suppressed by Law No. 34 of 1930, their jurisdiction being transferred to the summary tribunals.

The capitulations were abolished by the Convention of Montreux of 8 May, 1937, which came into force on 15 Oct., 1937. The convention laid down that the mixed courts, with a much amplified jurisdiction, should remain for another 12 years. They were abolished on 14 Oct., 1949, and the suits pending before mixed and consular courts have been transferred to the national courts which have therefore been increased in number and judges.

Under the Montreux Convention the Egyptian Government accepted an obligation to bring the national courts up to the standard of the mixed courts by the time that the latter were abolished. A step in this direction was taken by a law passed on 26 July, 1943, which [illegible] the complete independence of the Egyptian judicature by [illegible] the Minister of Justice the prerogatives of appointments, promotions and transfers of judges and handing over these powers to a professional judicial council.

Finance.

Revenue and expenditure in £E, for fiscal years ending 30 April up to 1947; 28 or 29 Feb. from 1948 :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
1946–47	112,793,278	102,492,123	1949–50 [2]	173,592,682	163,805,515
1947–48 [1]	101,495,312	94,547,624	1950–51 [2]	180,949,600	205,988,900
1948–49 [2]	170,476,297	157,691,643	1951–52 [2]	65,397,000	68,284,000

[1] For 10 months only. [2] Estimates. [3] For 4 months only.

The final accounts for the year 1948–49, and the budget estimates for the year 1949–50, are as follows (in £E) :—

Receipts	1949–50	1950–51	Expenditure	1949–50	1950–51
Direct taxes :			Civil list . .	998,710	1,155,218

The foreign debt of Egypt began in 1862, when loans amounting to £3.292,800 were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and France began in 1879. In January, 1880, the two Controllers-General reported that Egypt could not possibly meet her engagements in full, and in July the liquidation law, in accordance with the recommendation of an international commission of the Great Powers, was promulgated. By this law the Unified debt was reduced to 4% interest; further conversions were made, and the Unified debt thus increased to £57,776,340; certain unconsolidated liabilities were added to the Preference debt, which thus rose to £22,587,800, and the Daira Sania debt was increased to £9,512,900, the interest being reduced to 4%. In 1885 and subsequent years further loans and conversions were entered into.

The Daira Sania and the Domains loans were paid off on 15 October, 1905, and 1 June, 1913, respectively. The amount and the charge of the various debts on 1 May, 1943, were as follows :—

	Debt	Charge
	£ sterling	£E.
Consolidated debt—		
Guaranteed loan, 3%	785,400	307,125
Privileged debt, 3½%	30,633,980	1,045,384
Unified debt, 4%	55,250,460	2,154,768
Total	86,669,840	3,507,277
Egyptian tribute loans—		
Turkish Government loans (4%) of 1891 .	1,981,920	273,608
Turkish Government conversion loan (3½%)	3,375,260	321,018
Total	5,357,180	594,626
Grand total	92,927,020	4,101,903

These debts were converted into a national loan by Law 95 passed on 7 Sept., 1943. This new loan amounts to £E78,001,850 on 28 Feb., 1950, and the credits earmarked in 1950–51 budget for the payment of interest and redemption amount to £E4,420,114.

The General Reserve Fund amounted to £E80,161,525 on 28 Feb., 1950.

Defence.

Expenditure on defence, 1950–51 is estimated at £E38,231,010, exclusive of operation costs in Palestine.

ARMY.—According to Article 8 of the Anglo-Egyptian Treaty of Alliance, 1936, Egypt authorized, without prejudice to her sovereign rights, Great Britain to station 10,000 troops and 400 airmen with the necessary staff in the vicinity of the canal, to ensure, temporarily in co-operation with the Egyptian forces, the defence of the canal, until the Egyptian Army is in a position to ensure such defence by its own resources. On 7 May, 1946, the British Government announced its proposal to withdraw all British land, sea and air forces from Egypt. Alexandria was evacuated on 14 February, 1947, and Cairo on 31 March, 1947.

Service in the Army is compulsory and, owing to the proposed expansion of the Army, all men fit for service are enlisted on a large scale.

The Egyptian Army (and Air Force) has recently been expanded, reorganized and re-equipped with the most up-to-date weapons, with the assistance of a British Military Mission acting in an advisory capacity; it terminated its task at the end of 1947.

NAVY.—Egypt possesses 7 frigates (recently acquired from Britain), 3 fleet minesweepers, 8 motor minesweepers, 6 motor torpedo boats, 6 motor launches, H.M. yacht *Mahroussa*, a landing ship, 20 landing craft, the fishery research vessel *Mabahiss*, the lighthouse tender *Aida*, a transport, and 4 coastal craft. His Majesty's private yachts also fly the naval ensign.

A 3-year naval programme comprising frigates, fleet minesweepers, motor torpedo boats, harbour defence motor launches, air–sea rescue craft is being implemented.

Production and Industry.

A Higher Advisory Economic Council of 17 members was established by a royal decree dated 18 Dec., 1950; the Minister of National Economy is its president.

Rain seldom falls in Upper Egypt and only at irregular intervals in Cairo where the average for the year is no more than 1·2 in. At Alexandria the average is 8 in.

The cultivable area of Egypt proper was reckoned in 1946–47 at 8,142,461 feddâns (1 feddân = 1·038 acres), and of this 644,780 were taken up for public utility purposes and 2,381,072 were uncultivated for want of reclamation. The agricultural population (Fellahîn) forms about 62% of the whole. A large proportion of them are small landholders with under 5 feddâns, while others, almost or altogether landless, are labourers, the relation between the employers and the employed being mostly hereditary. The following table shows, on 31 December, 1948, the number of landholders and the distribution of the land among foreigners and Egyptians:—

Extent of holdings in feddâns	Foreigners		Egyptians		Total of area		Total of landowners	
	Area in feddâns	Land-owners	Area in feddâns	Land-owners	Feddâns	Per-centage	Land-owners	Per-centage
Up to 1	634	1,560	815,646	1,974,608	818,524	13 7	1,980,098	72·8
From 1–5	2,374	922	1,220,434	578,564	1,237,359	20·8	584,987	21·5
,, 5–10	2,930	441	508,650	76,526	529,642	8 9	79,483	2·9
,, 10–20	7,066	464	540,686	40,229	576,994	9·7	42,699	1·6
,, 20–30	5,960	207	266,849	11,123	296,319	4 9	12,309	0·5
,, 30–50	10,483	285	298,177	7,768	351,496	5·9	9,149	0·3
Over 50	305,567	683	1,382,509	9,034	2,127,883	36·1	11,960	0·4
Total .	335,014	4,562	5,032,951	2,697,852	5,938,217	100·0	2,720,677	100·0

Irrigation occupies a predominant place in the economic development of the country. The Aswân reservoir can now hold up to 5,500 million cubic metres of water, and the Gebel Aulia reservoir, completed in 1937, holds 2,000 million cubic metres. Barrages have been erected at Esna, Nag' Hammâdi, Assiut and Zifta, and at the bifurcation of the Nile below Cairo. Nag' Hammâdi barrage, completed in 1930, ensures full basin supplies even in low flood to Girga province, and will facilitate perennial irrigation when basin lands are converted. Assiut barrage having been remodelled will meet the greater demands of the area it now commands. The Esna barrage now secures basin irrigation to lands in Qena province. New barrages (Mohamed Ali barrages) have been completed at the bifurcation of the Nile below Cairo to replace the existing structures which, built in 1861, are now unable to meet the conditions following the increase in summer supplies, the reclamation of large areas of waste lands and the earlier watering of food crops. Expenditure on irrigation amounted to £E6,175,053 in 1948.

The area and production of cotton for 6 years were :—

Year	Area in feddâns	Crop in qantârs	Year	Area in feddâns	Crop in qantârs
1945	982,435	5,220,975	1948	1,441,455	8,898,732
1946	1,211,731	6,065,736	1949	1,692,004	8,704,430
1947	1,254,154	6,369,786	1950	1,974,559	—

In 1949–50, the area and yield of wheat were 1,371,997 feddâns and 6,785,000 ardebs; barley, 116,691 feddâns and 757,507 ardebs; beans, 355,506 feddâns and 1,276,577 ardebs; lentils, 81,213 feddâns and 319,501 ardebs; onions (1948–49), 40,422 feddâns and 6,213,195 qantârs. In the year 1949–50 the area and the yield of maize were 1,451,409 feddâns and 9,329,000 ardebs; millet, 392,974 feddâns and 3,040,000 ardebs; rice, undecorticated, 700,258 feddâns and 1,314,000 daribas (1 dariba = 945 kilos).

Production of sugar cane, in 1947–48, was 2,705,676 metric tons (195,818 tons refined sugar); in 1946–47, 2,530,480 metric tons (182,500 tons refined sugar).

In March, 1947, there were in Egypt 27,747 horses, 1,125,945 donkeys, 12,225 mules, 1,321,052 cows, 1,240,196 buffaloes, 1,875,338 sheep, 1,475,831 goats, 196,721 camels and 50,343 pigs.

The principal mineral products in 1949 were (in metric tons):— Phosphate rock, 350,480; petroleum, 2,288,972; asbestos, 117; chromite, 50. Other products are:—Ochres. sulphate of magnesia, talc, building

stones, clay, cement, gypsum, natron, carbonate and sulphate of sodium, nitrate of soda and salt. Salt exports in 1949 amounted to 443,951 metric tons. A big oilfield was discovered in 1949 south of Sudr in the Sinai peninsula. A small steel plant was set up in 1949 for the annual production of some 10,000 tons of finished bars.

The fishing industry is of some importance. The catch of the Egyptian seas and lakes fisheries in 1948 amounted to 36,075 metric tons, valued at £E4,508,050. During 1948 there were 48,350 men and 18,300 boys engaged in fishing and 12,669 boats used for fishing.

LABOUR.—Labour legislation began in 1909 with the prohibition of the employment of children under 9 years. In 1930 a Labour Office was set up. In 1933 the minimum working age was raised to twelve, except in agriculture and the textile industry, and the maximum working hours were decreased to seven for the 9–12 age group, and to nine for the 12–15 age group. Hours were fixed at nine in dangerous industries (1935), compensation for labour accidents was stipulated (1936 and 1942) and a law on employment of hired labour was passed (1944).

Statistics on trade unions :—

Year	Trade unions	Members	Year	Trade unions	Members
1943	180	79,955	1946	308	95,538
1944	210	103,876	1947	441	91,604
1945	189	89,560	1948	478	124,094

Commerce.

Imports and exports for 6 years (in £E) :—

Year	Imports	Exports [1]	Year	Imports	Exports [1]

Shipping and Navigation.

Egyptian shipping owned by Egyptians in 1947 : 50 steamers of 50,924 tons.

In 1947, excluding warships and vessels requisitioned by the military authorities, 13,154 steamers of a net registered tonnage of 53,167,338 entered at, and 13,182 steamers of a net registered tonnage of 53,171,746 departed from, all the Egyptian ports (Alexandria, Port Said, Suez, Tor, El Qoseir, Safâga, Hurghada, Ras Gharib, Abu Zenima, Sidi Barrani, Marsa Matrûh and Sollûm).

Suez Canal.

The Suez Canal is 103 miles long (including 4 miles of approach channels for the harbours), connecting the Mediterranean with the Red Sea. It has a depth of 34 feet, an average width of 197 feet and cost £29,725,000 to construct. It was opened for navigation on 17 November, 1869. The concession to the Suez Canal Company expires on 17 November, 1968. By the convention of Constantinople of 29 October, 1888, the canal is open to vessels of all nations and is free from blockade. The canal is owned by a French corporation, in which the British Government holds 295,026 shares out of a total of 652,932. The canal is governed by a board of 32 administrators, of whom 18 are French, 10 British (3 representing the British Government), 2 Egyptian, 1 American and 1 Dutch. According to the agreement of 7 March, 1949, the number of Egyptian representatives will be increased to 7 by filling the next 5 French and British vacancies.

Representatives of the British Government.—Sir Ronald Fraser, K.B.E., C.M.G.; Sir Francis Wylie, G.C.I.E., K.C.S.I.; Sir Alexander G. M. Cadogan, G.C.M.G., K.C.B.

An agreement between the Egyptian Government and the Suez Canal Company, signed on 7 March, 1949, provides for an improvement programme, estimated at £E5 million, which will take 5 years to complete. The canal will be deepened another 20 in., permitting the passage of ships of 36 ft.

draught, and a bypass 7½ miles long and of the same dimensions as the main canal, will be dug from El Ballah to El Ferdan.

By the same agreement the whole property reverts to the Eygptian Government at the end of the 99-year concession in 1968. Meanwhile Egypt will take annually 7% of the gross profits of each preceding year, with a minimum of £E350,000 if the gross profits fall below this amount.

Another provision that will mainly benefit Egypt, although it is applicable to all countries, is that ships under 300 tons burthen may use the Canal free of transit dues. Also Egyptians must be 95% of the labour employed on the improvements programme.

The following table shows the number and net tonnage of commercial vessels (excluding vessels requisitioned by the military authorities) of the principal nationalities that passed through the canal in 1948 :—

Nationality	No. of transits	Suez Canal net tonnage	Nationality	No. of transits	Suez Canal net tonnage
British . . .	3,394	20,726,246	Netherlands . .	473	3,191,324
American . .	1,066	8,302,296	Swedish . .	208	1,335,344
Norwegian . .	792	5,143,888	Greek . . .	201	1,060,249
Panamanian . .	759	5,153,298	Danish . . .	163	973,223
Italian . . .	724	4,040,951	Egyptian . .	72	187,515
French . . .	490	3,464,364	U.S.S.R. . .	29	140,502

The number of government vessels (warships and transports) that passed through the canal in 1947 was 388 of 3,336,166 net tonnage (including 338 British of 3,196,501 net tonnage).

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the gross receipts of the company (in French francs), have been as follows in 6 years :—

Year	No. of transits	Net tonnage	Receipts	Year	No. of transits	Net tonnage	Receipts
1938	6,127	34,249,745	1,784,278,091	1946	5,235	33,239,833	6,523,785,799
1939	5,222	29,265,344	1,491,635,891	1947	5,972	36,576,581	6,191,433,000
1940	2,459	13,092,615	—	1948	8,686	55,081,056	16,393,516,000

The number of passengers (civil and military) who went through the canal was, in 1938, 464,126; 1946, 925,924; 1947, 594,387.

Communications.

In 1945–46 there were 4,188 miles of rails belonging to and worked by the state, including 2,919 miles of main line, 192 miles of branch line and 1,077 miles of sidings. There were also 862 miles of agricultural light railways owned by private companies. The state railways have a gauge of 4 ft. 8½ in. inside rails (the line, 124 miles in length, from Luxor to Assuan being opened on wide gauge in December, 1926), except that to the Western Oases, which is 2 ft. 5½ in.

Total receipts of Egyptian State Railways in 1948–49 were £E13,264,905; total expenditures, £E11,389,121.

The British Army built a track from Haifa to Tripoli (Syria), 175 miles in length, providing for the first time a continuous line linking the Turkish rail system with Egypt and the Southern Mediterranean coast. It has put a modern steel swing bridge across the Suez Canal and extended the Egyptian coastal railway into Cyrenaica, so that it is possible to take train from Istanbul right through to the Libyan port of Tobruk. At the same time, a motor highway suitable for daily use by heavy transport has been built from Haifa across the Syrian desert through Northern Iraq to Baghdad

Egypt had 2,035 kilometres of macadamized surface roads at the end of 1947; non-macadamized surface roads totalled 12,245 kilometres. Motor vehicles as at 31 Dec., 1950 .—49,927 private cars, 9,948 taxis, 14,445 trucks, 3,512 buses.

The telephone service was taken over by the Egyptian Government in April, 1918. In 1945–46, the state telegraphs had a length of 12,289 miles of wire, and telephones, 491,131 miles. There were in 1949, 6,351 post offices and stations. Number of telephones in 1947, 99,814.

The internal telecommunications system is owned and operated by the Egyptian State Telegraphs and Telephones. Government landlines connect with those of Palestine, Syria, Lebanon and the Sudan. Egypt is connected by cable with Malta and thence with Great Britain and all parts of the world; with the Sudan, thence via Aden to India and the East; and with Greece and Cyprus, thence with Palestine. The cable circuits are operated by the Marconi Radio Telegraph Company of Egypt, S.A., by arrangement with Cable and Wireless, Ltd.

Before the Second World War, the Misr Airways S.A.E. was the National Air Transport Co. in Egypt. The company operated various air services within the country and a daily service between Egypt and Palestine and a service to Bagdad twice weekly.

Banks and Credit.

The National Bank founded in 1898 has the privilege of bank-notes issue. The position of the bank on 31 December, 1949, was (in thousand Egyptian pounds) :—Issue department, gold, 6,376; British treasury bills and British war loan, 121,334; Egyptian Government securities, 46,290; notes issued, 174,000. Banking department, assets, investments, 219,472; advances and bills, 17,574; cash, 7,983; sundry accounts, 362; liabilities, capital and reserve, 5,850; deposits, 88,479; bankers' accounts, 24,049; other liabilities, 127,013.

On 27 June, 1939, the shareholders of the bank agreed to the conversion of the bank into a central bank, and the Government approved this transformation on 8 Feb., 1950. The law was passed on 12 March, 1951.

The Agricultural Bank of Egypt was founded in November, 1930, with a capital of £E1,000,000 (half subscribed by the Government).

In 1901, a post office savings bank was opened; on 31 Dec., 1948, the depositors numbered 727,550, and their balances (including interest) amounted to £E29,771,274.

The balance (including interest) of deposits in the saving departments of the banks in Egypt at the end of 1948 amounted to £E7,794,225 and the number of depositors to 45,406.

Money, Weights and Measures.

Money.

By decree of 18 October, 1916 (20 Zi-l-Higga 1334), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8·5 grammes ·875 fine, and therefore contains 7·4375 grammes of fine gold. Its value in sterling is £1 0*s.* 6½*d.* A new coinage was introduced at the same time. Twenty piastres = 1 Tallari; or £E1 = 5 Tallaris.

The 10-piastre silver piece weighs 14 grammes ·833⅓ fine, and therefore contains 11·67 grammes of fine silver. The piastre is worth 2·46*d.* in English money. It is subdivided into tenths (ushr el girsh or millièmes).

Coins in circulation are the Egyptian pound (100 piastres) and half pound in gold; 20, 10, 5 and 2 piastre pieces in silver; 1, ½, ¼, ⅕, $\frac{1}{10}$ piastre pieces

in nickel and $\frac{1}{10}$, $\frac{2}{10}$ pieces in bronze. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively British sovereigns, which are legal tender at the rate of 97½ piastres. The gold pieces of the former Latin Monetary Union equivalent to the French 20-franc piece are permitted to circulate at a uniform rate of £E0·7715.

Bank-notes are issued by the National Bank in various denominations: P.T.25 and 50, £E1, 5, 10, 50, 100. They are in principle not legal tender, and the bank was compelled to keep a 50% gold cover for the issue. Soon after the outbreak of the great war of 1914 the notes were made legal tender, and in October, 1916, a further step was taken authorizing the bank to deposit British treasury bills and treasury bonds in lieu of gold for any extension of the then existing issue. The amount of notes issued on 31 December, 1947, was £E145,000,000. Gold cover was £6,375,874; Egyptian Government securities, British treasury bills and war loan, £138,624,126. Notes in circulation, 31 Dec., 1947, £E137,527,881.

The principal units of Egyptian weights and measures are as follows:—

Weights and Measures.

Capacity.—*Kadah* = 1/96th ardeb = 3·63 pints. *Rob* = 4 kadahs = 1·815 gallons. *Keila* = 8 kadahs = 3·63 gallons. *Ardeb* = 96 kadahs = 43 555 gallons, or 5·44439 bushels.

Weights.—*Rotl* = 144 dirhems = 0·9905 lb. *Oke* = 400 dirhems = 2·75137 lb. *Heml* = 200 okes = 550·274 lb. *Qantâr* or 100 rotls or 36 okes = 99·0493 lb. 1 *Qantâr* of unginned cotton = 315 lb. 1 *Qantâr* of ginned cotton = 100 *Rotls* = 99·05 lb. The approximate weight of the ardeb is as follows:—Wheat, 150 kg.; beans, 155 kg.; barley, 120 kg.; maize, 140 kg.; cotton seed, 121 kg.

Length.—*Diraa Baladi* (for textiles) = 22·8347 in. *Diraa Mimâri* (for building, etc.) = 29·5276 in. *Qasaba* (for agricultural land) = 3·8823 yards = 139·7639 in.

Surface.—*Feddân*, the unit of measure for land = 4,200⅔ square metres = 7,468·148 square pics = 1·03805 acres. 1 square pic = 6·0547 square ft. = 0·5625 square metre.

In March, 1939, a law was passed establishing the metre, the kilogramme and the litre as the weights and measures legal in Egypt. While in practice existing weights and measures will continue to be used, their metric equivalents will have to be indicated.

Diplomatic Representatives.

1. Of Egypt in Great Britain (75 South Audley Street, W.1).

Ambassador.—Abdel Fattah Amr Pasha (24 Aug., 1945).

Minister Plenipotentiary.—Albert Mansour.

Counsellors.—Mohamed Tawfik Ismail Katamish; Ahmed Fuad (*Commercial*).

First Secretaries.—Mohamed Zaki Kenawi (*Press*); Osman Tawfik (*Consul-General*).

Air Attaché.—Group Capt. Hassan Mahmoud.

Military Attaché.—Lieut.-Col. Mohamed Hamdi el-Maghrabi.

Agricultural Attaché.—Gamil Ali Abul Fetouh.

Labour Attaché.—Abdallah T. Darwish.

Attaché-Archivist.—Mahfouz Abdel-Latif Negm El-Din.

There is a consular representative at Liverpool.

2. Of Great Britain in Egypt.

Ambassador.—Sir Ralph Skrine Stevenson, G.C.M.G. (accredited 15 June, 1950).

Minister (Economic).—Sir Thomas C. Rapp, K.B.E., C.M.G., M.C.

Minister (Commercial).—A. N. Cumberbatch, C.B.E.

Counsellors.—J. H. Wardle Smith; J. W. Wall (*Oriental*); A. H. King (*Consular*); R. W. Parkes, O.B.E. (*Information*); M. T. Audsley, C.M.G. (*Labour*); M. W. Graham, C.M.G., C.B.E. (*Legal*); W. F. Crawford, O.B.E.; Sir H. Stewart, C.I.E. [illegible].

Naval Attaché.—Capt. H. P. H[illegible], D.S.O., R.N.

Military Attaché.—Brigadier C. Goulburn, D.S.O.

Air Attaché.—Group Capt. A. P. Campbell, C.B.E.

Civil Air Attaché.—R. M. S. Rayner, D.F.C.

First Secretaries.—R. A. Burroughs; E. A. Runnacres (*Commercial*); M. Henderson; A. C. I. Samuel (*Information*); J. Murray (*Information*); H. W. Gunningham, O.B.E.; S. W. Wood.

There are Consuls-General at Alexandria and Cairo, Consuls at Port Said and Suez, and Consular agents at 9 other places.

Books of Reference.

Statistical Information.—The Statistical Department, attached to the Ministry of National Economy (14, Rue Abdin, Cairo) was formed in 1905; *Director-General.*—Mansour Machah Bey. Previously, [illegible] their own statistical sections. Estimates of population w[illegible], the first census took place in 1873. Among the publications of the Statistical Departments are the following :—

Annuaire Statistique (Arabic and French).
Annual Return of [illegible] (Arabic and English).
Monthly Summary, [illegible] Statement of Foreign Trade (Arabic and English).
Monthly Bulletin of Agricultural and Economic Statistics (Arabic and English).

EL SALVADOR.

(República de El Salvador.)

Constitution and Government.—In 1839 the Central American Federation, which had comprised the states of Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, was dissolved, and El Salvador became an independent republic. Plans for a gradual federation with Guatemala were discussed between the presidents of both countries in March, 1945. A new constitution was promulgated 20 Jan., 1939, but in Nov., 1945, the 1886 constitution was reinstated though with numerous amendments. Legislative power is vested in a single Chamber, the National Assembly, consisting of 2 deputies, elected for 2 years by universal suffrage. Large powers are vested in the President, whose term is for 6 years; normally he cannot succeed himself. He has a cabinet of 10 members. Women in 1945 were conceded a limited suffrage, but in 1950 universal male and female suffrage was introduced for the elections of the president and the national assembly.

President.—Lt.-Col. Oscar Osorio, elected on 26 March, 1950, and assumed office 14 Sept.; he polled 345,239 votes against 266,271 for his opponent Colonel José Asencio Menéndez; his supporters secured 38 seats in a new Constituent Assembly (of 52 members) against 14 seats by the opposition. Lt.-Col. Osorio had been throughout 1949 the head of a junta of 4, styled the 'Council of Revolutionary Government.'

National flag: blue, white, blue (horizontal); the white stripe charged with the arms of the republic.

National anthem: Saludemos la patria orgullosos (words by J. J. Cañas; tune by J. Aberle).

Area and Population.—Salvador is the smallest and most densely populated of the Central American states. Its area is 34,126 square kilometres, or 13,176 square miles, with population density of about 163 people per square mile (Dec., 1949). It is divided into 14 departments, each under an appointed governor. Estimated population (31 Dec., 1950) was 1,858,656. The language of the country is Spanish. The capital is San Salvador, with (1950) 160,380 inhabitants. Other towns are Santa Ana, urban population 51,676; New San Salvador or Santa Tecla, 19,601; San Miguel, 26,831; Sonsonate, 17,661; Ahuachapán, 10,290; San Vicente, 10,945; [illegible] 10,005.

The number of marriages in 1949 was 7,299; number of births, 84,839

[illegible] births); deaths, 28,339 (infantile, 7,915). Crude birth rate, 1949, was 39·5 per 1,000 population; crude death rate, 13·2 (compared with 24·4 in 1934); infantile death rate, 100·4 per 1,000 live births (141·0 in 1933); crude marriage rate was 3·4 per 1,000 population.

Religion, Education and Justice.—The dominant religion is Roman Catholicism. Under the 1945 constitution churches are exempted from the property tax; the Catholic Church is recognized as a legal person and other churches are entitled to secure similar recognition. There is an archbishop in San Salvador and bishops at Santa Ana, San Miguel and San Vicente. Education is free and obligatory; in 1929 the state took over control of all schools, public and private, but the provision that the teaching in government schools must be wholly secular was removed in 1945.

The census of 1930 showed that 72·8% of those 8 years of age or older were illiterate, but some headway has been made. Of the 33,020 persons married in 1948, 48 8% were illiterate.

There were, in 1949, 1,980 primary schools (state, municipal and private), with 4,763 teachers and 110,901 pupils. There are 16 travelling teachers for the rural districts. Secondary education was given at 48 high schools (4,450 pupils in 1950) and commercial schools, with about 2,000 students. The national university had 1,120 students and 147 professors.

Motion-picture theatres decreased from 41 in 1940 to 29 in 1950, with seating capacity of 38,382. In 1950, there were 9 daily newspapers with an aggregate circulation of 65,000.

Justice is administered by the Supreme Court of Justice, 1 court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period. In 1947 the sale of 'aguardiente' (the drink of the poorer classes) was severely restricted; it may be sold only in sealed official containers and not by the drink, and must not be consumed on public roads or in public places.

A decree of Aug., 1950, permits the formation of trade unions except among agricultural workers and those engaged in seasonal work such as coffee-milling and sugar-refining; trade union posts must be filled by natives, not foreigners. In Jan., 1951, a 44-hour week was decreed for workers outside farming and seasonal work.

Finance.—Revenue and expenditure for 6 years in colones (2·5 colones = $1, U.S.):—

	1946	1947	1948	1949	1950 [1]	1951 [1]
Revenue	47,007,000	56,889,424	58,854,882	69,164,084	77,778,000	110,000,000
Expenditure	46,763,000	55,652,312	63,805,486	67,158,828	77,778,000	110,000,000

[1] Budget estimates.

The 1950 budget is expected to balance with the aid of the surplus carried over from 1949; heavier receipts from export and import taxes are anticipated. In Oct., 1950, the government floated a domestic loan of 10 million colones for a national development programme.

For 1949 the principal items of revenue were as follows (in colones):—Direct taxation, import duties, liquor taxes and miscellaneous, 57,288,831; administrative services, 5,258,830; public enterprises, 2,342,056. The most important items of expenditure were:—National defence, 9,251,093;

interior, 3,709,193; education, 8,590,571; treasury, 9,516,566; public works, 11,914,531; subsidies, 10,880,944.

External debt amounted to $8,361,000 and £721,600 on 31 December, 1950. It is being redeemed at the rate of $800,000 annually.

The total outstanding debt on 30 April, 1943, was 52,162,000 colones, of which 46,919,000 colones were external funded debt (suspended since January, 1938), and 5,243,000 colones internal debt.

British capital invested in Salvador amounted, in 1949, to £1,698,690 (par value), of which 44·2% were in default. American direct investments, 1940, amounted to $11,204,000 compared with $29,466,000 in 1929; American holdings of Salvadorean dollar bonds, 1941, were $4,100,000, all of which was in default.

Defence.—The Army is organized in 5 divisions of 15 infantry, 1 artillery and 1 cavalry regiments. There is 1 aviation corps and 1 national defence corps. The country is divided into 3 military zones of defence, with 15 regions corresponding each to 1 infantry regiment.

Production.—Salvador is predominantly agricultural; 60% of its total area is under cultivation. But it is a one-crop country, coffee alone furnishing, in value, about 80% of its exports. Two-thirds of the coffee is of the 'mild' variety. On 28 July, 1933, a Coffee Defence Law placed the entire industry, from cultivation to marketing, under the protection of a commission jointly controlled by the coffee growers and the Government. Coffee is sold in bags of 46 kilos, or 100 lb., but trade statistics use the international bag of 60 kilos. Production of coffee in 1934–38 averaged 64,000 metric tons; in 1948–49 it reached a record of 74,175 metric tons. Coffee (in 1950–51) pays an *ad valorem* export duty based on the f.o.b. value per quintal of 46 kilos. There is retained the provision for a contribution in kind of 4 kilos to the Government's stock. Exports in 1949 were 1,259,939 bags, mostly to the United States. Area devoted to coffee is about 320,000 acres, almost entirely owned by natives.

Cotton production is now about 6,000 metric tons, of which about 45% can now be consumed at home, by 10 new textile mills, including one owned by the Government. The 1949–50 crop was 6,719 metric tons, a record. Rice is important for home consumption; output, 1949, 13,496 metric tons of cleaned rice from 31,000 acres. Other agricultural products are maize (490,000 acres in 1948 produced 5,551,615 quintals), cacao, tobacco, indigo, henequén (40,000 quintals of 46 kilos in 1947–48 from 13,500 acres) and sugar cane (37,000 acres, 20,700 metric tons of sugar in 1948–49). Livestock census 1948, showed 183,000 horses, asses and mules, 765,000 cattle, 6,000 sheep, 17,500 goats and 348,000 pigs. A little rubber is exported. In the national forests are found dye woods and such woods as mahogany, cedar and walnut. Balsam trees also abound; Salvador is the world's principal source of this medicinal gum; exports, 1946, 91 tons. The mineral wealth of the republic includes gold (1949 production, 842·52 kilos), silver (8,717·61 kilos), coal, copper (1,025 kilos), iron, lead, zinc (459·27 kilos), sulphur and mercury. Chief local industry is that of cotton textiles, reputed to be one of the most efficient in Latin America. There is a factory monopolizing the supply of henequén bags for coffee; output, 1948, 1,825,000 sacks.

El Salvador's biggest national enterprise, begun in 1950, is the construction of a 200-ft. high dam across the (unnavigable) Lempa River, 35 miles north-east of San Salvador, designed to double the country's electric power resources, from 31,000 kw. to 61,000 kw.; cost is estimated at $16 million (U.S.).

Commerce.—The imports (including parcels post) and exports have been as follows in 6 years in colones (2·5 colones = $1, U.S.) :—

	1945	1946	1947	1948	1949	1950
Imports .	33,836,084	52,840,246	92,331,574	103,741,829	98,985,000	118,200,000
Exports .	53,329,077	65,379,504	100,146,951	114,014,696	137,403,000	173,700,000

Imports in 1948 were 173,129 metric tons; exports were 96,077 metric tons. Of total exports, coffee furnishes about 83% b[illegible] value. In 1949, the United States took 83% of exports [illegible] in 1948 it furnished 73% of the imports (76,201,000 colones). The chief imports are, normally, cottons, machinery, vehicles, iron and steel, flour and petroleum products.

Total trade between Salvador and the U.K. (Board of Trade returns) for 6 years (in £ sterling) :—

	1938	1946	1947	1948	1949	1950
Imports to U.K. . .	3,145	18,978	9,825	6,089	3,619	388,050
Exports from U.K. . .	123,027	148,890	205,397	316,782	318,495	584,068
Re-exports from U.K. .	954	485	811	421	1,702	3,068

Shipping and Communications.—The principal ports are: La Union, La Libertad and Acajutla. In 1948 vessels entering these ports had 844,000 net registered tons.

A British-owned railway connects the port of Acajutla with Santa Ana, Sonsonate and San Salvador, the capital. The American-owned International Railways of Central America runs from the eastern to the western boundary of Salvador, and extends into Guatemala to Guatemala City and Puerto Barrios on the north coast. Total length of railway open, about 384 miles, all of narrow gauge. There are 1,773 km. of national roads in the republic, including a fine highway completed in 1926 between San Salvador and La Libertad and one from Santa Ana to the Guatemalan frontier. Of these, 353 miles are suitable for motors. Motor vehicles, 1947, included 3,300 passenger cars and 1,100 trucks. In 1942 a suspension bridge 1,350 ft. long across the Lempa River at Puente Cascatlan was opened, and in July, 1949, a similar bridge over the Rio Paz, connecting El Salvador and Guatemala, was opened.

Air traffic, mainly in American hands, is expanding; in 1949, 6,147 scheduled flights (5,021 in 1948) carried 31,681 passengers (30,090) and 1,778 metric tons of freight (1,205).

In 1939, there were 225 post offices. In 1940 there were 257 telegraph offices and 2,778 miles of telegraph wires; 208 telephone exchanges and 6,385 miles of telephone wires. There are 2,552 miles of private telephone and telegraph wires; and in 1948, 6,047 telephone instruments. A radio transmitting and receiving station at San Salvador maintains communications with Latin America. El Salvador has about 14,500 wireless receiving sets.

Money, Weights and Measures.

Money.

There are 3 native commercial banks, including the Banco Salvadoreño (paid-up capital, 6,000,000 colones), the Banco Hipotecario and a new one (1949), the Banco de Commercio (capital, 3,000,000 colones). A fourth, the Banco Occidental, is in liquidation. The Bank of London and South

America is the only foreign institution. The Central Reserve Bank of Salvador was constructed in 1934 out of the Banco Agricola Commercial. Although El Salvador is a one-crop country, it owns that crop and the proceeds of its coffee exports strengthen its economy. Thus the Central Bank's gold stock has increased steadily from $6·6 million (U.S.) in 1937, to $20·07 million in Oct., 1950; its foreign exchange, similarly, from $1·3 million to $22·60 million. However, note circulation on 31 Dec., 1950, was 73 million colones compared with 65 million the previous year.

The monetary unit of Salvador is the *colon*, a coin theoretically (as registered with the I.M.F., 18 Dec., 1946) containing 0·355468 grammo of gold ·900 fine, and equal in value to 40 cents (U.S. currency) ; 1 troy oz. of gold is worth 87·5 colones. Its exchange value since July, 1934, had been kept at 40 cents (U.S.) and on 30 June, 1942, the bank's gold stock was revalued at 87·5 colones per fine oz. instead of 70 colones, equal to a 20% reduction in the value of the colon but making it exactly equal to the exchange value of 40 cents. The country left the gold standard on 9 Oct., 1931, but there is no control of foreign exchange, not even import licenses. The buying rate for the £, 1950, ranged between 6 15/16 and 7 3/16 colones.

The colon, which represents 100 centavos, is issued in denominations of 1, 2, 5, 10, 25, 50 and 100 colones. United States silver 10-cent pieces circulate with the same value as the local 25 centavo silver coin; copper-nickel and copper-zinc coins in denominations of 1, 3, 5 and 10 centavos each are also issued.

National gold coins and gold coins of the United States of all denominations are unlimited legal tender. National and United States silver coins are legal tender up to 10% of each payment, and national nickel coins in amounts up to 2% of each payment.

Weights and Measures.

On 1 Jan., 1886, the metric system of weights and measures was made obligatory. But other units are still commonly in use, of which the principal are as follows :—

Libra . .	= 1·014 lb. av.	*Arroba* . .	= 25·35 lb. av.
Quintal .	= 101·4 lb. av.	*Fanega* . .	= 1·5745 bushels

Diplomatic Representatives.

1. Of El Salvador in Great Britain (6 Weymouth Court, Weymouth St., W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Col. José Arturo Castellanos (accredited 19 Dec., 1950).

Consul-General and Secretary of Legation.—S. J. Dawson.

Attaché.—Dr. Luis Antonio Jiménez Escalante.

There are consular representatives at Birmingham, Liverpool and Rochester.

2. Of Great Britain in El Salvador.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—Ralph Henry Tottenham Smith, C.B.E.

Commercial Attaché.—S. M. Stadler, O.B.E.

Military Attaché.—Col. C. G. Irving Bell.

Air Attaché.—Wing-Commander A. F. Johnson, D.F.C.

Civil Air Attaché.—Wing Cdr. C. J. Lowin.

There is a consular representative at La Libertad.

ETHIOPIA.

(ABYSSINIA.)

THE ancient Empire of Ethiopia is a sovereign independent state. It has grown out of the combination of a number of kingdoms, such as Tigré, Gojjam, Gondar and Shoa, which used to recognize the 'King of Kings' as their suzerain but have now become mere provinces, as have formerly quasi-autonomous districts such as Harar, and the Galla, Shankalla and Dankali territories. The whole area is 350,000 square miles.

For treaties relating to the boundaries of Ethiopia *see* THE STATESMAN'S YEAR-BOOK, 1907, p. 667, and for 1923, p. 677. For the 1906 agreement between Great Britain, France and Italy, as well as the government prior to the Italian conquest of 1936, *see* THE STATESMAN'S YEAR-BOOK, 1936, p. 657. For the Italian conquest and rule, *see* THE STATESMAN'S YEAR-BOOK, 1941, p. 1060.

Government.

Emperor.—Haile Silassie I, born 23 July, 1891; crowned King (Negus) on 7 October, 1928, proclaimed Emperor, after the death of the Empress Zauditu, on 3 April, 1930, and crowned Emperor, 2 November, 1930. Married Woizero Menen in 1912, and has 3 sons and 1 daughter. On 25 January, 1931, the eldest son, Asfa Wassan, was proclaimed Crown Prince and heir to the throne He married first the daughter of Ras Seyum (governor of Tigré), whom he divorced in 1945, and secondly in 1945 the daughter of General Ababa Damtu.

When Italy declared war on Great Britain, on 10 June, 1940, British and Imperial troops, assisted by Ethiopian patriot forces, invaded Ethiopia, and by 27 November, 1941, the country was cleared of Italian forces.

The Emperor, Haile Silassie, returned to his capital on 5 May, 1941. On 31 January, 1942, an Agreement and Military Convention was signed between Great Britain and Ethiopia, recognizing the sovereign independence of Ethio[illegible] financial help and technical and administrative advisers, and [illegible] for the re-establishment of diplomatic relations.

As the Emperor on 25 May, 1944, gave notice of the termination of the Anglo-Ethiopian Agreement of 31 January, 1942, the British Government signed a new agreement with Ethiopia on 19 December, 1944, for a minimum period of 2 years, which continues in force.

Government is by a Council of Ministers and by a parliament consisting of a Senate and a Chamber of Deputies.

Prime Minister.—Bitwodded Makonnen Endalkatchew.

On 9 October, 1942, Ethiopia joined the United Nations.

Area and Population.

The most important race of Ethiopia, the Amhara, who number about 2 million, inhabit the central Ethiopian highlands. To the north of them are the Tigréans, akin to the Amhara and belonging to the same Christian church, but speaking a different, though related, language. Both these races are of mixed Hamitic and Semitic origin, and further mixed by intermarriage with Galla and other races. The Gallas, some of whom are Christian, some Moslem, and some Pagan, comprise more than one-half of the entire population, and are a pastoral and agricultural people of Hamitic origin. Ogaden, Issa and other Somalis inhabit Harar, the Somaliland plateau, and the south-east. These and most of the Danakil are Moslem. There are also Nilotic tribes in the south-west, and the Falashas (of Jewish religion) north of Lake Tana.

The official estimate (1947) of the population, 15 million, is quite improbable; cautious estimates vary from 8 million to 10 million.

Addis Ababa, the capital, has some 300,000 inhabitants, Dire Dawa about 30,000, and the old walled city of Harar has a population of about 25,000. Other important towns, politically or commercially, are: Debra Markos, 5,000; Gondar, capital of the Amhara province of Begemdir, 22,000. Gambeila, in Western Ethiopia, is a trading station leased to the Sudan Government.

The country is divided into 12 provinces, each under a Governor-General, under the direct control of the Minister of the Interior. Each province is divided into 3 or 4 sub-provinces under a Governor. All revenues collected in the provinces are under the control of the Minister of Finance.

The official language is Amharic.

Religion and Education.

Since the conversion of the Amharas to Christianity in the 4th century they have retained their connexion with the Alexandrian Church through the Abuna, or Metropolitan, who was always an Egyptian Copt, and who was appointed and consecrated by the Coptic Patriarch of Alexandria. Both the Egyptian and Ethiopian Coptic Churches are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451). After the restoration of the Emperor relations between the Ethiopian and Egyptian churches were strained until the summer of 1948, when an agreement was reached which envisaged the appointment of an Ethiopian Abuna as Patriarch. This clause became effective in Jan., 1951, when Abuna Basilios was elected Archbishop of Ethiopia. The clergy is very numerous and the Church holds a considerable proportion of the land. Christianity is diffused in the northern and central plateau, from the uplands of Eritrea to Shoa, and from the Setit (Tacazze) River to the Blue Nile, including all the Amhara territory.

Islam is practised in the north-west territories, in Harar, in Jimma, and in some territories of the Galla Sidamo province. Moslem minorities are found in Addis Ababa and in other commercial centres. The rite is mainly shafeitic. Harar is the most important Moslem centre for historical tradition and religious institutions, as well as for Arabic culture. There are government schools for Moslems in Addis Ababa, Harar, Jimma and elsewhere.

There are at Addis Ababa 2 secondary schools for 200 and 150 boys respectively; a secondary school for about 450 girls; a teachers' training college; technical, commercial and handicraft schools, and a number of

elementary schools for some 6,600 pupils. School attendance throughout the country is about 50,000.

In 1949, there were 7 cinemas with a seating capacity of 5,400.

Justice.

In the pre-Italian period justice was administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. Since 1930 the Ethiopian Penal Code has been in use. The legal system is said to be based on the Justinian Code. The penal code is based on the Mosaic law.

The extra territorial rights formerly enjoyed by foreigners have been abolished, but any foreigner has the right to bring his case before the High Court and to be heard by at least one judge with proven judicial experience in other lands. The position of British subjects is specifically safeguarded by the Anglo-Ethiopian Agreement of 1944. The Acting President of the High Court is at present British.

Provincial and district courts have been established and High Court judges visit the Provincial Courts on circuit. The Supreme Imperial Court at Addis Ababa is presided over by the Ethiopian Chief Justice. There is also a Political Court at Addis Ababa, a purely Ethiopian institution for the trial of political offences.

Finance.

Revenue and expenditure for the last financial years (the financial year coincides with the Ethiopian year beginning 10 Sept.) were as follows (in Ethiopian dollars) :—

Year	Revenue	Expenditure
1946–47	52,675,000	51,651,349,97
1947–48	57,608,000	57,192,265,62
1948–49 . . .	63,120,000	62,988,726,89
1949–50	63,255,000	63,179,385,84

Defence and Police

The new Ethiopian Army of 30 battalions and ancillary services, trained by British officers of the British Military Mission to Ethiopia, was formed after the restoration of Ethiopia's independence and was expanded by the incorporation of some 11,000 men from the former Ethiopian Territorial Army, which had been dissolved. The Holleta Military School, near Addis Ababa, was re-opened for the training of young Ethiopian officers. In Nov., 1950, the British Government decided to withdraw the Military Mission for the sake of economy in manpower.

Until 1948 the regular police force operated only in the capital, in some of the provincial cities and in the district of Borana, while in the rest of the country order was maintained by an irregular territorial force under the provincial governors and governors-general. In 1948 the latter force was amalgamated with the regular police force, and several British officers were engaged, in addition to the existing British Commissioner of Police. The total force numbers nearly 20,000 officers and other ranks.

Agriculture and Industry.

The chief industries are pastoral and agricultural. Cattle, sheep and goats are numerous. The horses of the country are small but hardy, and

make excellent polo ponies; mules are bred, being used as pack animals; donkeys are also small and serve for baggage animals. Cotton, the sugar-cane, coffee and rubber-vine thrive well in many districts, but, except coffee, are not yet extensively cultivated. Coffees produced are of three sorts, the Harari coffee (long berry Mocha), Jimma coffee and Sidamo coffee. Besides these, which are cultivated, there grows more especially in southern and western Ethiopia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, wax, barley, millet (dhurra), wheat, gesho (which serves as a substitute for hops) and tobacco; but, with the exception of hides, skins, wax, wheat and coffee, not in sufficient quantities for export. Manufacturing industries are beginning to appear. The forests abound in valuable trees, including the landolphia rubber vine.

Iron is found in some districts, also marble, mica, rock salt and cinnabar. Placer gold-mining and washing are carried on in the western districts; there is also a rich placer gold-mine worked by the Government at Adola in the south. Export, 1949, 15,391 fine oz. ($Eth.1,225,797). Output of platinum, 1948, 630 fine oz., valued at $Eth.106,981 (1947, 2,125 fine oz.). Coal, copper and sulphur have been found. There are deposits of potash salts in the Dankali salt plains in the north-eastern part of the country, but the amount of these deposits is very uncertain.

Commerce.

Exports consist mainly of hides and skins (cattle, goat, sheep, leopard and monkey), coffee, grain, wax, civet, bananas, gold, cotton and native butter. Imports are salt (from French Somaliland, Aden and Sudan), grey sheetings and other cotton piece-goods (from England, U.S.A. and India), cotton yarns (from England, India and France), building materials, petrol and kerosene (from England, U.S.A. and Persia), sugar, glass, motor cars and soap.

Coffee exports, 1950, were 21,151,696 kilos ($Eth.32,538,062), representing 47·6% by value of all exports.

Imports and exports (in £ sterling) for 4 years (to 10 Sept.):—

	1946–47	1947–48	1948–49	1949–50
Imports . .	6,899,684	11,212,040	9,088,480	10,664,268
Exports . .	6,905,372	8,917,299	7,719,120	9,955,506

The total trade between Ethiopia and Great Britain for 5 years (according to Board of Trade returns) was as follows (in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. .	98,869	76,298	141,771	582,639	851,634
Exports from U.K. .	1,347	1,007,675	901,325	677,770	729,821
Re-exports fromU.K.	62	2,313	2,792	15,240	2,069

Communications.

Roads in Ethiopia were formerly mere tracks, and transport was effected by means of porters, mules, pack-horses, donkeys, and, in some places, camels. There are said to be 69,700 km. of roads in the country, of which only 17,900 km. are suitable for motor vehicle transport. A loan of $5 million (U.S.) was made in Sept., 1950, to Ethiopia by the International

Bank for Reconstruction and Development for the purpose of improving and extending the road system. In 1908 the Franco-Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 486½ miles. Trains run three times weekly in each direction, covering the distance in two nights and one day. By the Franco-Italian agreement of 1935, a proportion of the shares of the railway were handed over to Italy. On 9 Sept., 1945, an agreement between France and Ethiopia restored to France her rights, as set forth in the concession of 1908.

Chief among the motor roads are the following:—Asmara–Addis Ababa; Assab–Dessie; Asmara-Gondar; Addis Ababa–Jimma; Addis Ababa–Lekemti; Addis [illegible]. Number of motor vehicles (1950):—Cars, 10,036; trucks, 2,543; buses, 37.

Ethiopian Air Lines, formed in 1946, which operates through a management contract with Trans-World Air Lines, provides services to Cairo, Asmara, Karachi, Jibuti, Nairobi, Dire-Dawa and Aden. Other lines operating are M.I.S.R. Air Lines, Aden Airways and Air Jibuti.

A telegraph line (about 1,229 kilometres) connected Addis Ababa with Massawa in Eritrea, but for external communication a wireless station at Addis Ababa had taken its place before the Italian war. A network of telephone lines, many of them installed by the Emperor Menelik II, covers the country. In 1947, Addis Ababa was joined by telephone to Dessie, Gondar, Axum, Makalle, Debra Markos, Dire-Dawa, Harar, Jimma and Lekemti. Internal communication is chiefly by wireless. There is a civil wireless telegraph link with Khartoum, Aden, Algiers, New York and Jibuti.

Money and Credit.

A new currency, the Ethiopian dollar, divided into 100 cents and valued at 2 shillings East African, was introduced on July 25, 1945. It consists of notes of 1, 5, 10, 100 and 500 dollar denominations; a silver 50 cents (800 fine) and bronze 1, 5, 10 and 25 cent coins. The East African currency remained legal tender for one year after the introduction of the new currency. The Maria Theresa dollar continued to circulate as bullion until the end of 1946, when its use was declared illegal. The State Bank of Ethiopia enjoys the sole right of issue of notes; currency is issued by the Imperial Treasury. Circulation of notes in Oct., 1950, was $Eth.49,650,000; of coins, $Eth.29,952,708. The note issue was backed by the following securities:—Gold bullion, $Eth.7·96 million; silver bullion, $Eth.13·38 million; foreign securities $Eth.6·59 million; balances abroad, $Eth.1·78 million; Ethiopian treasury bills, $Eth.5·83 million. The Ethiopian dollar equals 40·25 cents, U.S. (May, 1950).

Weights and Measures.

The metric system of weights and measures is officially in use.

The principal native weights and measures are as follows:—

WEIGHTS.

Ookia = weight of Maria Theresa–Menelik dollar = 28·067 grammes, approximately 1 oz. avoirdupois.
Natr = 30 *ookiat*, approximately 1 lb. 14 oz. avoirdupois.
Farasula = approximately 37½ lb.
Kantar = 100 lb.
1 *Waggia* (for ivory) = 480 dollars' weight.
1 ,, (for rubber) = 640 dollars' weight.

LENGTH MEASURES.

Tat = breadth of the index finger.
Gat = breadth of the four fingers placed flat.
Sinzer = span from thumb to tip of second finger.
Kend = length of arm from elbow to tip of second finger.
Khalad = 130 kends = 65 metres = 213½ feet, say 71 yards.

LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land and ranges between 15 *khalads* by 25 *khalads*, and 7 *khalads* by 11 *khalads*, the latter equalling roughly 400,000 square metres or 80 acres.

GRAIN MEASURES.

10 *kounna* = 1 *ladan*. 2 *ladan* = 1 *dawala* = 80 kilos

MEASURE FOR HONEY AND CIVET.

10 *wanche* (horn cups) = 1 *goundo* = about 3 litres.

Diplomatic Representatives.

1. OF ETHIOPIA IN GREAT BRITAIN (6 Princes Gate, S.W.7).

Ambassador.—Ato Abbebe Retta (accredited as Minister, 14 Oct., 1948; as Ambassador, 20 Oct., 1949).
First Secretary.—Petros Sahlou.
Press Attaché.—Mikael Imru.

2. OF GREAT BRITAIN IN ETHIOPIA.

Ambassador and Consul-General.—Daniel William Lascelles, C.M.G.
First Secretaries.—I. W. Bell; Lt.-Col. A. T. Curle, D.S.O., M.B.E. (*Consular*).
Military Attaché.—Major W. H. F. Wingate.
Civil Air Attaché.—R. M. S. Rayner.

There are consular posts at Gore, Harar, Mega, Dangilla and Maji.

FINLAND.

(SUOMEN TASAVALTA—REPUBLIKEN FINLAND.)

Constitution and Government.

FINLAND is a republic according to the Form of Government Act of 17 July, 1919.

Having been an integral part of the kingdom of Sweden from the 12th and 13th centuries onward, Finland was in 1809 united to the Russian Empire as an autonomous Grand-Duchy. On 6 December, 1917, the House of Representatives unanimously proclaimed Finland an independent and sovereign state, and she has been recognized as such by the powers. According to the Diet Act of 1906 (revised 1928), the House of Representatives consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached the 21st year. There are 15 electoral districts with a representation proportioned to the population, a rearrangement being required in the year before an election. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare lists of candidates, the votes for whom are in a falling scale according to the order in which the names of the candidates are printed on the list. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years.

The President is elected for 6 years by an electoral college elected by the votes of the citizens. He receives a salary of 1,500,000 marks and 1,500,000 marks for allowances. The Council of State (Ministry), appointed by the President, must enjoy the confidence of the House of Representatives.

At the elections held on 1–2 July, 1948, the following parties were returned:—Democratic Union (extreme Left group, including Communists), 38; Social-Democrats, 54; Agrarian, 56; National Union (Conservative), 33; Swedish People's Party, 14; Finnish Progressive Party, 5.

President of Finland.—Juho Kusti Paasikivi (elected 9 March, 1946; re-elected 16 Feb., 1950, until 1 March, 1956).

The Council of State, appointed on 17 Jan., 1951, is composed as follows:—

Prime Minister.—Dr. Urho Kekkonen (Agrarian).
Minister for Foreign Affairs.—Åke Gartz (Swedish).
Minister of Justice.—Teuvo Ensio Aura (Liberal).

Minister of the Interior.—V. J. Sukselainen (Agrarian).
Minister of Defence.—Emil Albert Skog (Soc.).
Minister of Finance.—Onni Alfred Hiltunen (Soc.).
Minister of Education.—The Rev. Lennart Heljas (Agrarian).
Minister of Agriculture.—Martti Juhani Miettunen (Agrarian).
Minister of Communications and Public Works.—Onni Ernst Peltoner (Soc.).
Minister of Commerce and Industry.—Penna Tervo (Soc.).
Minister for Social Affairs.—Vihtori Vesterinen (Agrarian).

National flag : blue cross on white.
National anthem : Oi maamme Suomi synnyinmaa (words by J. L. Runeberg, 1843; tune by F. Pacius, 1848).

Finnish and Swedish are the official languages of Finland.

Local Government.

For administrative purposes Finland is divided into ten departments. The provincial administration is entrusted in each of the departments to a prefect, who is appointed by the President. The unit of local government is the commune. Each rural parish and each town forms a commune in which all men and all women of 21 years of age are voters. In all communes a communal council is elected to decide questions of administration and local economy. The executive power is vested in rural communes in a college formed by the head of the commune and four or more aldermen elected by the council. In towns the executive authority is the town board with an appointed official as president and four or more members elected by the council. There were, in 1949, 35 towns, 28 boroughs and 484 rural communes in Finland. As executive officers of the prefects there are the bailiffs of 49 and sub-bailiffs of 271 districts.

The autonomous department of Aland has a county council (*landsting*) of one chamber which is elected on the basis of the same suffrage as the Parliament. The county council settles the internal affairs of the government. The executive authority is with an executive council, of which the *lantråd* is president.

Area and Population.

The area of Finland in 1950 and the population of Finland, according to the census taken on 31 Dec., 1930, and that taken on 31 Dec., 1940, were as follows (Swedish names in brackets):—

Departments	Area [1] (sq. km.), Jan., 1950	Population, 31 Dec., 1930	Population, 31 Dec., 1940	Population per sq. km., 1949
Uusimaa (Nyland) . . .	9,883	507,708	601,710	66·5
Turku-Pori (Åbo-Björneborg) .	22,014	522,222	536,079	28·5
Ahvenanmaa (Åland) . .	1,481	27,375	27,676	15·5
Häme (Tavastehus) . . .	18,436	389,056	420,438	29·7
Kymi (Kymmene) . . .	10,737	622,553	628,300	28·9
Mikkeli (St.-Michel) . .	17,477	208,901	203,627	13·8
Kuopio	35,857	381,100	398,512	13·1
Vaasa (Vasa)	39,009	582,874	599,774	15·6
Oulu (Uleåborg) . . .	56,686	425,278	327,422	6·3
Lappi (Lappland) . . .	93,870	—	143,679	1·8
Total . . .	305,450	3,667,067	3,887,217	13·1

[1] Excluding water area, which amounts to an additional 31,570 square km. (inland waters only).

Of the total on 31 December, 1940, 1,902,303 were males and 1,984,914 females. In 1940, 3,327,534 spoke Finnish, 353,985 Swedish, 7,210 Russian, 2,861 German, 2,345 Lapponic.

On 30 November, 1939, Soviet troops invaded Finland, after Finland had rejected territorial concessions demanded by the U.S.S.R. These, however, had to be made in the peace treaty of 12 March, 1940, amounting to 16,170 square miles and including the Carelian Isthmus, Viipuri and the shores of Lake Ladoga.

When on 22 June, 1941, the Germans launched their attack on Russia, the Finnish army co-operated with the Germans and took part in the invasion of Russia. On 19 Sept., 1944, an armistice was signed in Moscow between Finland on the one hand and Russia and Great Britain on the other. According to this, Finnish troops were to be withdrawn behind the frontier fixed by the Treaty of 12 March, 1940, between Russia and Finland; Finland agreed to cede to Russia the Petsamo area and to lease to Russia for 50 years the Porkkala headland, with a considerable stretch of sea and land, to be used as a military base. (*See* map in THE STATESMAN'S YEAR-BOOK, 1945.) Further, Finland undertook to pay 300 million gold dollars in reparations within 6 years (prolongation later to 8 years). The peace treaty was signed in Paris on 10 February, 1947.

The growth of the population is shown as follows :—

Years	In towns	In country	Total	Percentage in towns
1800	46,604	786,055	832,659	5·60
1900	339,613	2,372,949	2,712,562	12·52
1940	881,266	3,005,951	3,887,217	22·67
1948	1,079,034	3,096,702	4,175,736	25·84
1949	1,112,255	3,119,024	4,231,279	26·29

On 31 December, 1949, the population was 4,231,279 (2,045,693 males and 2,185,586 females).

The principal towns, with the number of their inhabitants at end of 1949, are :—Helsinki (Helsingfors), 399,288; Turku (Åbo), 107,148; Tampere (Tammerfors), 105,121; Pori (Björneborg), 45,723; Vaasa (Vasa), 41,142; Oulu (Uleåborg), 40,502; Lahti, 43,060; Kuopio, 33,705; Jyväskylä, 29,576, and Kotka, 25,861.

The movement of the population for 4 years was as follows :—

Year	Living births	Of which illegitimate	Still-born	Marriages	Deaths (exclusive of still-born)	Emigration
1947	108,168	6,036	2,107	43,519	47,441	331
1948	107,759	5,981	1,935	38,977	44,086	904
1949	103,615	5,724	1,821	34,806	45,183	4,273
1950	97,563[1]	—	—	—	41,415[1]	13,971

[1] Preliminary figures.

Religion and Education.

The National Church is the Evangelical Lutheran religion, but entire liberty of conscience is guaranteed to the members of all religions and

confessions. Ecclesiastically (the Evangelical Church of) Finland is divided into 6 bishoprics (Turku being the archiepiscopal see), 57 provostships and 541 parishes.

Of the total population there were at end of 1948 :—Lutherans, 3,996,442; English Church, 11; Greek-Catholics and Raskolnics, 71,123; Roman Catholics, 1,163; Baptists, etc., 12,598; Jews, 1,535; Moslems, 621; on the civil register, 90,341. The Greek-Catholics are under an archbishop, resident at Kuopio.

Finland has 3 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), with (1950) 449 teachers and 8,476 students (3,548 women); at Turku (Swedish, opened 1919), with 79 teachers and 464 students (77 women), and at Turku (Finnish, opened 1922), with 104 teachers and 500 students (228 women). In 1950, there were also a technical university at Helsinki, with 315 teachers and 2,185 students (179 women), a veterinary university (founded in 1946) with 19 teachers and 102 students, and 3 commercial universities, 1 Finnish with 32 teachers and 759 students, and 2 Swedish with 37 teachers and 482 students.

For secondary education there were, in 1950, 189 lyceums, leading to university, with 3,880 teachers and 69,615 pupils (37,806 girls); 147 middle schools (with a curriculum of 5 years), with 1,537 teachers and 22,062 pupils. There were in 1950, 9 training colleges for elementary school teachers, with 118 teachers and 1,597 students. There were also (1949) 76 people's high schools, with 707 teachers and 3,993 pupils (3,048 females). For elementary education (1950) there were in the towns 213 elementary schools, with 74,183 pupils; in the country there were 5,895 school districts, with 17,175 teachers and 407,285 pupils. There were (in 1949) 53 commercial schools, with 3,741 pupils; 4 navigation schools with 192 pupils, 17 technical schools, with 3,744 pupils; 118 schools for domestic arts and crafts, with 2,357 pupils; 97 agricultural schools, with 3,118 pupils; 62 schools of domestic science, with 2,151 pupils; 5 horticultural schools with 126 pupils; 7 forestry schools, with 403 pupils, and 95 other schools for arts and crafts, with 8,443 pupils. The school age in primary schools is from 7 to 15 years.

In 1949, there were published 1,043 newspapers and reviews in Finnish, 205 in Swedish, 81 in Finnish and Swedish, and 40 in other languages.

There were, in 1950, 487 cinemas with a seating capacity of 137,488.

Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the district. In towns these district courts are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Courts (*Hovioikeus*) in Turku, Vaasa and Kuopio. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1948, the prison population numbered 7,830 men and 1,005 women, while the number of sentences pronounced in 1946 was 161,393 for crimes and 13,821 in civil cases.

Social Welfare.

The Ministry of Social Affairs was founded on 8 November, 1917. Since 1945 it comprises 6 departments, viz., general (including research, housing, population), labour, insurance, welfare (including poor relief and child welfare), temperance and liquor trade, wages.

Direct expenditure by the Ministry of Social Affairs amounted to 16,455,811,000 marks in 1949. More than half of these sums were spent on social insurance; other large items being family allowances, maternity benefits, vocational training and rehabilitation.

The number of paupers in 1948 supported by the towns and the village communities was 93,633 (2·1% of the population), and the total cost of the care of the poor was 3,141,279,000 marks.

Finance.

Revenue and expenditure for 6 calendar years in thousands of marks according to balance of accounts :—

	1946	1947	1948	1949	1950 [1]	1951 [1]
Revenue	104,344,828	94,260,852	113,962,107	125,981,000	101,913,000	129,908,000
Expenditure.	100,105,968	87,811,267	104,587,201	132,827,000	101,846,000	129,868,500

[1] Estimates.

At the end of December, 1950, the foreign loans totalled 65,879,000,000 marks and the internal loans 69,826,000,000 marks, a total of 135,705,000,000 marks. Of the foreign loans, 61,426,000,000 marks, and of the internal loans, 38,584,000,000 marks were consolidated. On 31 December, 1950, the consolidated foreign and inland debt amounted to 100,010,000,000 marks.

Defence.

The peace treaty of Paris, signed on 10 February, 1947, stipulated that the Finnish land, sea and air armaments and fortifications should be closely restricted to meeting tasks of an internal character and local defence of frontiers.

Finland is therefore authorized to have armed forces consisting of not more than :—

(*a*) a land Army, including frontier troops and anti-aircraft artillery, with a total strength of 34,400 personnel;

(*b*) a Navy with a personnel strength of 4,500 and a total tonnage of 10,000 tons;

(*c*) an Air Force, including any naval air arm, of 60 aircraft, including reserves, with a total personnel strength of 3,000. Bombers with internal bomb-carrying facilities are expressly forbidden.

Military training outside the Army, Navy and Air Force is forbidden.

During the mine-clearance period Finland may retain additional naval units employed only for the specific purpose of minesweeping, with an additional personnel of 1,500 officers and men. Finland is to maintain these forces at the disposal of the International Organization for Mine Clearance of European Waters.

In 1951 the Navy comprised 3 patrol vessels, 3 old gunboats, 2 minelayers,

7 tenders, 27 motor minesweepers, 12 motor patrol boats, 7 icebreakers, a depot ship, a cadets' training ship and a sail training ship.

The military, naval and air clauses of the peace treaty are subject to modification by agreement between the Allies and Finland, or, after Finland becomes a member of the United Nations, by agreement between the Security Council and Finland.

Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area covers only 7·7% of the land. The land was divided in 1941 into 283,334 farms, and the landed property was distributed as follows :—Less than 3 hectares cultivated, number of farms, 104,324; 3–10 hectares, farms 107,183; 10–25 hectares, farms 56,308; 25–100 hectares, farms 14,788; over 100 hectares, farms 731 (1 hectare = 2·47 acres).

The principal crops of 1950 were as follows :—

Crop	Area in hectares	Yield in tons	Crop	Area in hectares	Yield in tons
Rye . .	141,996	233,867	Oats . .	453,141	722,307
Barley .	121,109	186,629	Potatoes .	84,900	1,210,080
Wheat .	184,710	291,416			

The hay area was 1,020,956 hectares. Total land under cultivation in 1950 was 2,472,367 hectares. Creamery butter production in 1949 was 29,300 tons.

Domestic animals in 1950 (preliminary) :—Horses, 427,000; milch cows, 1,135,000; other cattle, 709,000; sheep, 1,329,000; pigs, 470,000; poultry, 5,076,000.

The total forest land amounts to 21,670,000 hectares. The productive forest land covers 17,080,000 hectares (1949).

Finland had, in 1949, 5,924 large factories, employing an aggregate of 259,138 workers and yielding an aggregate product of 260,791 million marks.

In 1949, there were 659 saw-mills with 157 water, 277 steam, 49 oil and gas and 6,195 electric motors.

Commerce.

Imports and exports for 5 years, in thousands of Finnish marks :—

	1946	1947	1948	1949	1950
Imports .	24,274,000	46,971,000	66,369,000	66,278,000	89,111,900
Exports .	23,051,000	45,228,000	56,504,800	65,606,000	81,420,500

War reparations deliveries (in millions of Finnish marks) amounted to 8,171 in 1945; 8,775 in 1946; 10,405 in 1947; 11,546 in 1948; 12,226 in 1949; 7,845·8 in 1950.

Exports of timber products in 1950 were as follows:—Round timber, 3,266,000 cubic metres ; pitprops, 869,000 cubic metres ; sawn lumber, 683,000 standards; plywood, 195,000 cubic metres.

Total trade between the United Kingdom and Finland, in £ sterling (according to Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K. .	19,274,686	30,204,451	34,854,508	33,472,602	33,678,640
Exports from U.K. .	5,522,688	9,884,019	19,725,631	18,894,627	20,481,815
Re-exports from U.K.	327,481	367,067	550,447	398,746	504,622

Communications.

The mercantile marine of Finland on 31 December, 1950, [illegible] 1 652 vessels of 567,841 gross registered tons, and consisted of 7 [illegible] vessels of 6,013 tons, 376 steam vessels of 457,643 tons, 123 motor boats of 90,103 tons and 146 sailing vessels with subsidiary motors of 14,082 tons.

The total number of vessels entering and leaving Finnish ports were :— 1948, 7,227 and 7,257; 1949, 8,092 and 8,085; 1950, 7,130 and 7,075.

For internal communications Finland has a remarkable system of lakes connected with each other by canals, navigable at a length of about 2,700 miles and floatable at a length of about 26,500 miles. The number of vessels which passed along the canals in 1949 was 27,598, and the number of timber-rafts 21,050; the receipts from vessels, 27,959,000 marks.

In 1950, there were 32,807 km. of high roads and 25,961 km. of other public roads. Number of registered vehicles was 72,002, including 26,678 passenger cars, 31,835 lorries, 3,348 buses and 10,141 motor cycles.

Railway history in Finland begins in 1860, when the state built a line 66 miles long between Helsinki and Hameenlinna. On 1 Oct., 1950, there were 4,641 km. of railways, all but 254 km. belonging to the state. The gauge is 1·524 metres (4·9 feet). The traffic upon the state railways in 1950 was 13,538,000 [illegible] and 15,807,000 tons of goods. The total cost of the [illegible] of 1950 was 21,868,000,000 marks. The total revenue in 1950 was 13,200,000 marks and the total expenditure 15,708,000 marks.

Finland had 4,947 post offices in 1949, and revenue and expenditure of posts and telegraphs combined were respectively 4,656,918,000 and 4,440,521,000 marks. The number of telephones in 1950 was 313,975.

There were in 1950, 45,609 km. of telegraph wires belonging to the state in Finland. The telegraph system and part of the [illegible] are state property. The total length of the telephone wire [illegible] n.

The number of wireless licences was 721,500 at 31 Dec., 1950.

Banking, Money, Weights, etc.

The Bank of Finland (founded in 1811) is the state bank and the only bank of issue. The bank is under the guarantee of the House of Representatives; its capital and reserves are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and foreign correspondents, and the additional right of issue 1,800 million marks. Notes in circulation are: 5,000, 1,000, 500, 100, 50, 20, 10 and 5 markkaa. The paper currency of the Bank of Finland on 31 Dec., 1950, was 34,383 million marks, as against 5,551 million marks on 31 December, 1940. Finland had in 1949, besides the state bank, 6 joint stock banks with 459 offices. The deposits of all the commercial banks on 31 Dec., 1950, were 36,579 million marks.

The number of ordinary savings banks at the end of 1949 was 447; number of depositors 1,966,000, who had to their credit 35,337 million (Dec., 1950, 39,680 million) marks; in the post office savings banks 1,096,000 depositors had 12,273 million (Dec., 1950, 13,892 million)

marks, and on the savings accounts with various co-operative institutions 21,328 million (Dec., 1950, 25,638 million) marks were deposited.

The unit of currency is the *markka* of 100 *penni*.

According to the monetary law, gold coin is struck to the value of 100 and 200 marks. The former contains 4·21053 grammes of gold, 900 fine; the latter 8·42105 grammes, 900 fine. Aluminium bronze coins are 20, 10 and 5 markka; nickel, copper and iron coins, 1, ½ and ¼ markka pieces; copper and iron coins, 10 and 5 penni pieces.

The gold standard was suspended on 12 October, 1931.

The metric system of weights and measures is officially and universally employed in Finland.

Diplomatic Representatives.

1. Of Finland in Great Britain (65-66, Chester Square, S.W.1).

Envoy and Minister.—Eero A. Wuori (appointed 10 Oct., 1947).
Counsellor.—Ernst Sohlberg.
Commercial Secretary. Martti Ingman.
Commercial Attaché.—Oiva Veli Vilpponen.
Military, Air and Naval Attaché.—Major Birger Rolf Ek.
Press Attaché.—Juhani Antero Vartia.
Attaché.—Martti Salomies.

2. Of Great Britain in Finland.

Envoy and Minister.—Sir Andrew Noble, Bt., C.M.G., D.S.O.
Secretaries.—A. R. H. Kellas; J. H. Wright (*Commercial*); R. C. Hannah; J. McGhie (*Information*); M. S. Finnie (*Labour*).
Naval Attaché.—Capt. R. I. A. Sarell, D.S.O., R.N.
Military Attaché.—Lt.-Col. F. C. W. Walshe, M.C.
Air Attaché.—Wing-Commander D. H. Fleet, M.B.E.

There are a consul at Helsinki and vice-consuls at Kemi, Oulu, Tampere, Turku, Kotka and Gamlakarleby.

Books of Reference.

Statistical Information.—The Central Statistical Office (Tilastollinen päätoimisto), Helsinki, was founded in 1865 but there was already during the Swedish era some kind of statistical institute in Stockholm which computed also data from Finland. After the separation from Sweden the bishop's councils continued to collect data and send them to the economic department of the Senate until the foundation of the Statistical Office. *Director*:—Professor Martti Kovero. Its publications include: Annuaire statistique (from 1879). Recueil de statistique (monthly, from 1924).

FRENCH UNION.

(UNION FRANÇAISE.)

ACCORDING to the Constitution of the French Republic, passed on 29 September and confirmed by referendum on 13 October, 1946, 'the French Union consists, on the one hand, of the French Republic which comprises Metropolitan France, the overseas departments and territories, and on the other hand, of the associated territories and states' (Art. 60). Chapter VIII of the Constitution (Articles 60–82) defines the principles and organization of the Union; its most important provisions are as follows:—

The central organs of the French Union are: the Presidency, the High Council and the Assembly (Art. 63). The President of the French Republic is the President of the French Union of which he represents the permanent interests (Art. 64). The High Council is composed—under the [illegible] of the President of the Union—of a delegation of the French [illegible] of the representatives of the associated states, accredited to the President of the Union. Its function is to assist the Government in the general management of the Union (Art. 65). The Assembly consists half of members representing Metropolitan France and half of members representing the overseas departments and territories and the associated states (Art. 66). The overseas territories are endowed with a special statute, taking into account their particular interests within the framework of the general interests of the republic (Art. 74). An elected assembly is instituted in each territory (Art. 77). All French citizens and nationals of the French Union are citizens of the French Union (Art. 81).

FRANCE.

(RÉPUBLIQUE FRANÇAISE.)

Constitution and Government.

THE first Constituent National Assembly of the Fourth Republic, elected on 21 October, 1945, passed a constitution by 309 votes to 249, with 25 abstentions, on 19 April, 1946. This draft was rejected by a referendum which took place on 6 May, 1946 (9,284,820 Ayes; 10,458,578 Noes; 4,913,679 abstentions).

The second Constituent National Assembly, elected on 2 June, 1946, passed the text of a new constitution by 440 votes to 106, with 32 abstentions, on 29 September, 1946. This constitution was finally adopted by a referendum, held on 13 October, 1946 (9,297,470 Ayes; 8,165,459 Noes; 8,519,635 abstentions), and came into force on 24 December, 1946.

The 'Constitution of the French Republic' consists of a Preamble and 106 articles. The preamble 'solemnly reaffirms the rights and freedoms of man and citizen as set forth in the Declaration of Rights of 1789' and proclaims the following additional political, economic and social principles: Equal rights for women, the right of asylum for anybody 'persecuted by reason of his action in favour of freedom,' the duty to work and the right to obtain employment, the freedom to join a trade union of one's own choice, the right to strike, workmen's participation in the management of industrial undertakings, collective ownership of public services and monopolies.

The sovereignty of the 'indivisible, laic, democratic and social republic' (Art. 1) is vested in the French people and exercised through its representatives and by way of referendum (Art. 3). Parliament consists of the National Assembly and the Council of the Republic. The National Assembly is elected by equal, direct and secret universal suffrage; the Council of the Republic by communal and departmental bodies, by means of indirect universal suffrage; it numbers from 250 to 320 members (Art. 5 and 6). The Council of the Republic 'examines and gives its opinion upon the projects and proposals of laws voted after a first reading by the National Assembly'; in case of divergency, the National Assembly has the final decision, to be given 'by public ballot, at an absolute majority' (Art. 20). No one can belong both to the National Assembly and to the Council of the Republic. Members of Parliament can belong neither to the Economic Council nor to the Assembly of the French Union (Art. 24).

The Economic Council assists the National Assembly and the Council of Ministers in an advisory capacity on economic matters. It must be consulted on economic planning for full employment and nationalization (Art. 25). It will consist of 144 members representing the organizations of workers and employers, chambers of commerce and trade, the professions and other social and economic groups (Law of 27 October, 1946).

The President of the Republic is elected by Parliament; his tenure of office is 7 years; he can be re-elected only once (Art. 29). He presides over the Council of Ministers, the High Council of the French Union, the Committee of National Defence and the Supreme Council of Justice, and is the Chief of the Armed Forces (Art. 32–35). He communicates with Parliament through messages to the National Assembly (Art. 37). Members of families which have reigned over France are ineligible for the Presidency (Art. 44).

The President of the Republic designates the President of the Council of Ministers at the beginning of each legislature. The programme and policy of the Cabinet must be approved by public vote and an absolute majority of

the National Assembly, before the Council of Ministers can be appointed (Art. 45). The Ministers are collectively responsible to the National Assembly (not to the Council of the Republic) for the general policy of the Cabinet, and individually for their personal actions (Art. 48). The question of confidence can only be raised after a discussion by the Council of Ministers on the initiative of the President of the Council. A vote on it can be taken only one clear day after the question has been put to the Assembly. A vote of no confidence requires an absolute majority and entails the collective resignation of the Cabinet. The same procedure applies to a vote of censure (Art. 49–50). If during a period of 18 months two Cabinet crises occur, the dissolution of the National Assembly may be decided upon by the Council of Ministers after consultation with the President of the Assembly. In this case, the President of the Assembly has to be appointed President of the Council until the meeting of the new Assembly (Art. 51–52). The Ministers have access to both Chambers (Art. 53).

Any revision of the Constitution must be sanctioned by a two-thirds majority of the National Assembly or a three-fifths majority of both Chambers, failing which it must be submitted to a referendum (Art. 90).

The law concerning the election of members of the National Assembly was passed on 5 October, 1946. It provided for the election of candidates from party lists at a single ballot, with proportional representation. The number of seats was fixed at 544 for Metropolitan France, 30 for Algeria and 45 for the overseas departments and territories, together 619.

The elections for the National Assembly took place on 10 November, 1946. The result was as follows:—183 Communists, 173 Mouvement Républicain Populaire (M.R.P.), 104 Socialists, 38 Parti Républicain de la Liberté (P.R.L.), 28 Independent Republicans, 43 Radical Socialists, 27 Union Démocratique et Socialiste, 23 others.

The elections for the Council of the Republic, consisting of 320 members took place in Nov., 1948. Of these, 255 were elected by metropolitan territorial collectivities, 14 by the Algerian territorial collectivities and 51 by the overseas departments and territories. The final composition of the Council was as follows:—21 Communists, 19 M.R.P., 62 Socialists, 80 Rassemblement des Gauches, 38 Independent Republicans, 12 P.R.L., 57 R.P.F., 16 Peasant Party, 15 others.

On 16 January, 1947, both Chambers met for the election of the President of the Republic. In the first ballot M. Vincent Auriol (Socialist) received 452 votes out of 883, and the absolute majority being 442, was thus elected President of the Republic for a 7-year term, 1947–53.

Cabinets of the Fourth Republic:—

Gen. De Gaulle, 21 Nov., 1945–20 Jan. 1946.
Felix Gouin, 29 Jan.–11 June, 1946.
Georges Bidault, 13 June–13 Dec., 1946.
Léon Blum, 16 Dec., 1946–16 Jan., 1947.
Paul Ramadier, 21 Jan.–19 Nov., 1947.
Robert Schumann, 24 Nov., 1947–19 July, 1948.
André Marie, 26 July–28 Aug., 1948.
Henri Queuille, 12 Sept., 1948–5 Oct., 1949.
Georges Bidault, 27 Oct., 1949–1 July, 1950.
René Pleven, 12 July, 1950–28 Feb., 1951.
Henri Queuille, 9 March, 1951–

The Government was composed as follows in April, 1951:—

President of the Council of Ministers and Minister of the Interior.—Henri Queuille (Radical Socialist).

Deputy Prime Ministers.—Georges Bidault (M.R.P.); René Pleven (Union Démocratique et Socialiste de la Résistance); Guy Mollet (Socialist).

Keeper of the Seals, Minister of Justice.—René Mayer (Radical Socialist).
Minister of Foreign Affairs.—Robert Schuman (M.R.P.).
Minister of National Defence.—Jules Moch (Socialist).
Minister of Finance and Economic Affairs.—Maurice Petsche (U.D.S.R.).
Minister of National Education.—Pierre-Olivier Lapie (Socialist).
Minister of Treasury and Budget.—Edgar Fauré (Radical).
Minister of Public Works.—Antoine Pinay (Republican).
Minister of Industry and Commerce.—Jean-Marie Louvel (M.R.P.).
Minister of Agriculture.—Pierre Pflimlin (M.R.P.).
Minister for France beyond the Seas.—François Mitterand (Radical Socialist).
Minister of State for the Associated States.—Jean Letourneau (M.R.P.).
Minister of Labour and Social Security.—Paul Bacon (M.R.P.).
Minister of Reconstruction.—Eugène-Claudius Petit (U.D.S.R).
Minister for Ex-Servicemen and War-Victims.—Louis Jacquinot (Republican).
Minister of Health and Population.—Pierre Schneiter (M.R.P.).
Minister of Posts and Telegraphs.—Charles Brune (M.R.P.).
Minister of the Merchant Marine.—Gaston Deferre (Socialist).
Minister of Information.—Albert Gazier (Socialist).

Local Government.

For administrative purposes Metropolitan France is divided into 90 departments. Since 1881, the 3 departments of Algeria have also been treated for most purposes, as part of France proper. As from 1 January, 1947, the former colonies of Martinique, Guadeloupe, Réunion and Guyane have also been given the status of overseas departments.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1946, in the 90 metropolitan departments, 37,983 communes. Most of them (34,221) had less than 1,500 inhabitants, and 23,653 had even less than 500; while 185 communes had more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 6 years by Frenchmen of 21 years or over after 6 months' residence.

Each Municipal Council elects a mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the prefect.

In Paris the Municipal Council is composed of 90 members. The 20 *arrondissements* into which the city is subdivided have been grouped in 9 sectors, each of which has its own mayor. The president of the Municipal Council is Pierre de Gaulle. Lyons has an elected mayor, but the control of the police is vested in the Prefect of the department of the Rhône.

The next unit is the *canton* (3,028 in 1946), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons.

The district, or *arrondissement* (311 in 1946), has an elected *conseil d'arrondissement*, with as many members as there were cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General.

Area and Population.

I. Progress and Present Condition.

The legal population at the date of the last 3 enumerations was :—

Departments	Area: square km.	Population		
		March, 1931	March, 1936	March, 1946
Ain	5,826	322,918	316,710	306,778
Aisne	7,428	489,368	484,647	453,411
Allier	7,382	373,924	368,778	373,481
Alpes (Basses-)	6,988	87,893	85,090	83,354
Alpes (Hautes-)	5,643	87,566	88,210	84,932

Total	550,986	41,834,923 [1]	41,907,056 [1]	40,502,513 [1]

[1] Not including military, air and naval forces, crews of the commercial navy abroad and (1946) the personnel of the military government in Germany and Austria, numbering in 1931, 93,928; in 1936, 107,538; and in 1946, 312,105

The figures include 1,670,621 foreigners in 1946, compared with 2,453,524 in 1936 and 2,890,923 in 1931.

In the following table, the third, fourth and fifth columns give [in brackets] for the first 5 censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872–1911):—

Years	Area (sq. km.)	Domiciled population	Inhabitants per sq. km.	Annual increase per 10,000 inhabitants
1801	537,699	27,349,003	51	—
		[26,930,756]	[51]	—
1821	—	30,461,875	57	57
		[29,871,176	[57]	[55]
1841	—	34,230,178	64	62
		[33,400,864]	[64]	[58]
1861	550,986	37,386,313	68	
		[35,844,902]	[67]	[3672]
1866	—	38,067,064	69	36
		[36,495,489]	[68]	[36]
1872	536,464	36,102,921	67	− 96 [1]
				[− 17]

[1] Decrease.

Years	Area (sq. km.)	Domiciled population	Inhabitants per sq. km.	Annual increase per 10,000 inhabitants
1881	—	37,672,048	70	41
1891	—	38,343,192	71	6 5
1901	—	38,961,945	73	23
1911	—	39,604,992	70	18
1921	550,986	39,209,518	71	— 10 [1]
1931	—	41,834,923	76	53
1946	—	40,502,513	74	— 33 [1]

[1] Decrease.

Estimated population, on 31 Dec., 1950, was 42,000,000.

The peace treaty with Italy, signed on 10 February, 1947, added 4 smal frontier districts to the French territory, including the villages of Tenda and Briga, which voted by 2,603 to 218 votes for inclusion in France (12 October, 1947).

II. Vital Statistics.

(For 90 departments.)

Year	Marriages	Divorces	Living births	Still-born	Deaths
1945	385,258	24,359	641,324	19,369	658,488
1946	516,882	51,946	840,247	23,597	511,868
1947	427,113	57,113	866,616	23,046	534,301
1948	370,769	47,015	867,158	20,999	509,532
1949 [1]	339,000	39,000	865,000	22,000	568,000
1950 [1]	335,000	35,000	850,000	22,000	520,000

[1] Provisional figures.

III. Principal Towns.

The following towns, according to the census of 1936 and 1946, had each a population of over 100,000 :—

	1936	1946		1936	1946
Paris	2,829,746	2,725,374	Toulon	150,310	125,742
Marseilles	914,232	636,264	Rouen	122,832	107,739
Lyons	570,622	460,748	Nancy	121,301	113,477
Bordeaux	258,348	253,751	Reims	116,687	110,749
Nice	211,916	211,165	Roubaix	107,105	100,978
Toulouse	213,220	264,411	Clermont-Ferrand	101,128	108,090
Lille	200,607	188,871	Rennes	98,538	113,781
Nantes	195,185	200,265	Dijon	96,257	100,664
Strasbourg	192,863	175,515	Grenoble	95,806	102,161
St. Étienne	190,236	177,966	Limoges	95,217	107,857
Le Havre	164,083	106,934	Le Mans	84,525	100,455

The following towns had a population over 50,000, according to the census of 1946 :—

Angers	94,408	Asnières	72,273	Avignon	60,053
Montpellier	93,102	Orléans	70,240	Troyes	58,805
Nîmes	91,667	Versailles	70,141	Saint-Maur-des-Fossés	55,520
Mulhouse	87,655	Metz	70,105	Courbevoie	55,080
Amiens	84,774	St. Denis	69,939	Argenteuil	53,543
Villeurbanne	82,399	Montreuil-sous-Bois	69,838	Clichy	53,029
Tours	80,044	Béziers	64,561	Aubervilliers	53,010
Boulogne-Billancourt	79,410	Besançon	63,508	Caen	51,445
Tourcoing	76,080	Levallois-Perret	61,681	Bourges	51,040
Brest	74,991	Colombes	61,047	Calais	50,048
Perpignan	74,984	Neuilly-sur-Seine	60,172		

Religion.

No religion is officially recognized by the state.

Under the law promulgated on 9 December, 1905, the Churches were separated from the state, the adherents of all creeds were authorized to form associations for public worship (*associations cultuelles*).

The law of 2 January, 1907, provided (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, would continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there was required an administrative act drawn up by the *préfet* as regards buildings belonging to the state or the departments, and by the *maire* as regards buildings belonging to the communes.

There are 17 archbishops and 68 bishops of the Roman Catholic Church, with 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is in Paris. There are about a million Protestants. The Society of Friends had 67 members in 1949.

Education.

The state elementary schools constitute the University of France and are divided into 3 classes, primary, secondary and higher. The Supreme Council of 52 members has deliberative, administrative and judiciary functions, and a Consultative Committee advise respecting the working of the school system, but the i[illegible] are in direct communication with the Minister. For [illegible] administration France is divided into 17 academic areas, each of which has an Academic Council whose members include a certain number elected by the professors or teachers. The Academic Council deals with all grades of education. Each is under a Rector, and each is provided with academy inspectors, 1 for each department except Nord, which has 2 (1 being for elementary education), and Seine, which has 8 (1 being director of elementary education), besides inspectors of elementary schools, usually 1 for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine.

The law of 9 August, 1879, rendered obligatory for each department the maintenance of 2 elementary training schools, 1 for schoolmasters, the other for schoolmistresses. Future teachers, after studying for 3 years at a secondary school, receive training in all professional subjects, including ethics and handicraft, at *Instituts de Formation professionnelle*. In 1948-49 there were in the 90 departments 73 normal schools for male teachers (5,518 students), and 77 normal schools for female teachers (7,777 students). There were 2 higher normal schools for elementary education: 1 at Fontenay-aux-Roses for professors for normal schools for schoolmistresses, the other at St. Cloud for professors for normal schools for schoolmasters. The law of 16 June, 1881, made education absolutely free in all elementary state schools; that of 28 March, 1882, rendered it obligatory for all children from 6 to 13 years of age, and the law of 9 August, 1936, extended this age limit to 14 years of age. The law of 30 October, 1886, was the organic law of elementary education in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the school programmes and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of elementary education in all 90 departments:—

Description of schools	1947–48		1948–49		1949–50	
	Schools	Enrolled pupils	Schools	Enrolled pupils	Schools	Enrolled pupils
Infant Schools :						
State. . .	3,463	373,649	3,653	404,200	3,726	446,947
Private . .	185	14,271	217	13,300	188	23,116
Total . .	3,648	387,920	3,870	417,500	3,914	470,063
Elementary Schools :						
State. . .	70,014	3,735,657	69,838	3,921,000	69,843	3,775,775
Private . .	11,003	899,036	10,932	961,700	11,028	886,948
Total . .	81,017	4,634,693	80,770	4,882,700	80,871	4,662,723

In 1942, the *écoles primaires supérieures* (higher elementary schools) were transformed into modern schools (*collèges modernes*); their numbers are now included in those relating to secondary education. Higher elementary education is also given in continuation schools (*cours complémentaires*) attached to the elementary schools. On 15 November, 1949, there were 84,994 boys and 107,807 girls taking these courses in state schools and 18,356 boys and 40,560 girls in private schools.

Secondary Instruction : Boys.—Secondary instruction is supplied in 2 types of schools—by the state in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years. Since the beginning of the school year, 1934–35, secondary education has been free.

The number of state secondary schools and the number of pupils in 90 departments were as follows :—

	Nov., 1946		Nov., 1947		Nov., 1948	Nov., 1949
	No.	Pupils	No.	Pupils	Pupils	Pupils [1]
Boys' schools :						
Lycees . .	156	127,973	162	130,020	230,384	225,000
Classical schools .	222	63,323	221	47,831		
Modern schools . .	210	57,684	206	54,158		
Girls' schools :						
Lycees . . .	82	69,085	85	82,374	189,619	187,000
Classical schools .	108	38,605	107	50,093		
Modern schools . .	205	61,599	198	62,132		

[1] 28,809 girls attending boys' schools are included in the figures for girls' schools.

Higher Instruction is supplied by the state in the universities and in special schools, and by private individuals in the private faculties and schools. The law of 12 July, 1875, provided for higher education free of charge. This law was modified by that of 18 March, 1880, which granted the state faculties the exclusive right to confer degrees. A degree of 28 December, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of 10 July, 1896.

There are 17 universities in France. The following table shows the

year of foundation and the total number of students on 31 July, 1950 :—

Universities	Students	Universities	Students
Aix-Marseilles (1409)	7,186	Nancy (1572)	4,441
Algiers	5,175	Paris (1150)	56,829
Besançon (1485)	963	Poitiers	4,017
Bordeaux (1441)	7,951	Rennes (1735)	5,982
Caen (1432)	3,301	Strasbourg (1567)	5,327
Clermont-Ferrand (1808)	2,043	Toulouse (1229)	7,722
Dijon (1722)	1,729		
Grenoble (1339)	4,244	Total	136,744
Lille (1530)	6,162		
Lyons (1808)	8,342		
Montpellier (1125)	5,330	Total, 1949	129,035

The faculties are of four kinds :—15 faculties of law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyons, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse and Algiers); 9 faculties of medicine (Paris, Montpellier, Bordeaux, Lille, Lyons, Toulouse, Nancy, Strasbourg and Algiers); 17 faculties of science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyons, Marseilles, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg and Algiers); 17 faculties of letters (in the towns last named); 4 faculties of medicine and 4 faculties of pharmacy (Paris, Montpellier, Nancy and Strasbourg), and 5 mixed faculties of medicine and pharmacy (Algiers, Bordeaux, Lille, Lyons and Toulouse); 15 schools with full functions and preparatory schools of medicine and pharmacy.

The following statement shows the number of students in state institutions, by faculties or schools in July, for 5 years :—

Students of	1946	1947	1948	1949	1950
Law	42,267	40,465	38,734	37,551	39,056
Medicine	20,536	25,451	25,721	26,677	29,491
Science	22,915	22,883	22,732	23,515	25,306
Letters	28,793	30,620	32,694	33,710	35,279
Pharmacy	8,547	9,289	8,522	7,219	7,256
Theology	255	317	361	363	356
Total	123,313	129,025	128,764	129,035	136,744

There are free faculties :—Paris (the Catholic Institute of Paris comprising theology, law and advanced scientific and literary studies); Angers (theology, law, science, letters and agriculture); Lille (theology, law, medicine and pharmacy, science, letters, social science and politics); Lyon (theology, law, science and letters); Marseilles (law); Toulouse (the Catholic Institute with theological, literary and scientific instruction). There were, besides, in Paris a large institution for free higher education in political science, the École libre des Sciences Politiques, and also one for the study of international law, the Institut des Hautes Études Internationales.

The other higher institutions under the Ministry of Public Instruction are the Collège de France (founded by Francis I in 1530), which has courses of study bearing on various subjects (literature and language, archæology, mathematical, natural, psychology and social science, political economy, etc.); the Museum of Natural History, giving instruction in science and natural history; the École Pratique des Hautes Études (history and philology,

mathematical and physico-chemical sciences, natural science and theology), having its seat at the Sorbonne; the École Normale Supérieure, which prepares teachers for secondary education and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the École des Chartes, which trains the archivist paleographers; the École des Langues Orientales vivantes; the École du Louvre, devoted to art and archæology; the École des Beaux-Arts, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire de Paris; and the French Schools at Athens, Rome, Cairo and Indo-China.

Outside Paris there are 8 observatories (Meudon, Besançon, Bordeaux, etc.). The observatory at Nice was under the Academy of Sciences.

Professional and Technical Instruction.—The principal institutions of higher or technical instruction dependent on other ministries are:—The Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the École Centrale des Arts et Manufactures (740 students in 1948–49), the École des Hautes Études Commerciales, 15 higher schools of commerce (1,370 pupils in 1948–49), under the Ministry of Public Instruction; the National Agronomic Institute at Paris, the veterinary school at Alfort a school of forestry at Nancy, the higher national school of colonial agriculture, national agricultural schools at Grignon, Rennes, Montpellier, 44 schools of agriculture, etc., under the Ministry of Agriculture; the École Supérieure de Guerre, the École Polytechnique, the military school at St. Cyr, the École d'Artillerie at Fontainebleau, the École de Cavalerie at Saumur and other schools under the Ministry of War; the Naval School at Brest under the Ministry of Marine; the School of Mines at Paris, the School of Civil Engineering at Paris, the School of Mines at St. Etienne and the Schools of Miners at Alais and Douai; with other schools under the Ministry of Public Works; the École Coloniale at Paris, under the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs and the Conservatoire de Musique et de Déclamation under the Department of Fine Arts, which is attached to the Ministry of Public Instruction. The municipal school of Industrial Physics and Chemistry was under the City of Paris. In the provinces there are national schools of fine arts, and schools of music, and several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade under the Ministry of Public Instruction are very numerous, comprising in 1948–49, 6 national schools of arts and trades, with 1,230 pupils (Aix, Angers, Chalons, Cluny, Lille, Paris), 2 schools of clock-making, 12 national professional schools, schools of handicraft with 82,669 pupils (30,349 girls) and vocational training centres (116,190 pupils).

There were, in 1949, 5,163 cinemas with a seating capacity of 2,620,000.

Justice and Crime.

The courts of lowest jurisdiction are those of the Justices of Peace (*juges de paix*), one in each canton, who try civil cases. The Tribunals of First Instance (*Tribunaux de Première Instance* or *Tribunaux Civils*), one in each *arrondissement*, deal with more important civil cases and serve as Tribunals of Appeal for the Justices of Peace, when their decisions are susceptible of appeal. All petty offences (*contraventions*) are disposed of in the Police Courts (*Tribunaux de Simple Police*) presided over by the Justice of Peace of the *canton*. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have

no jury, and consist of 3 judges who administer both criminal and civil justice. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who either dismisses the case or sends it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Conciliation Boards (*Conseils de Prud'hommes*) composed of an equal number of employers and employees deal with small trade and industrial disputes. More important cases go to the Commercial Courts (*Tribunaux de Commerce*) composed of tradesmen and manufacturers elected for 2 years. When the decisions of the Tribunals of First Instance, of the Correctional Courts and of the Commercial Courts are susceptible of appeal, the cases go to the Courts of Appeal (*Cours d'Appel*). There are 27 Courts of Appeal, composed each of a president and a variable number of members.

The Courts of Assizes (*Cours d'Assises*), composed each of a president, assisted by two other magistrates who are members of the Courts of Appeal, and by a jury of 12 men, sit in every *département*, when called upon to try very important criminal cases. The decisions of the Courts of Appeal and the Courts of Assizes are final; however the Court of Cassation (*Cour de Cassation*) has discretion to verify if the law has been correctly interpreted and if the rules of procedure have been followed exactly. The Court of Cassation may annul any judgment and the cases have to be tried again by a Court of Appeal or a Court of Assizes.

The French penal institutions consist, first, of Houses of Detention. Next come Departmental Prisons, also styled *maisons d'arrêt, de justice* and *de correction*, where persons awaiting trial as well as those condemned to less than 1 year's imprisonment are kept, as also a number of boys and girls transferred from, or about to be transferred to, reformatories. There are 5 reformatories for boys and 3 for girls. The Central Prisons (*maisons de force et de correction*), in which all prisoners condemned to more than 1 year's imprisonment are kept, are provided with large industrial establishments for the work of prisoners, and number 9 for men and 2 for women. The average population in 1946 of all penal establishments was 44,915 men and 11,094 women.

Social Security.

An Order of 4 October, 1945, laid down the framework of a comprehensive plan of Social Security and created a single organization which took the place of the various sets of laws relating to social insurance, workmen's compensation, health insurance, family allowances, etc.

Social Insurance.—The status of insured persons, which was formerly confined to persons whose salary did not exceed a certain ceiling, has been extended to all wage earners without regard to the amount of their wages or remuneration. However, in the case of yearly salaries exceeding 324,000 francs, deductions for social insurance are made only in respect to that amount.

Health insurance, which formerly applied only to the insured persons, their spouses and children under 16 years of age, has been extended to children from 16 to 17, if apprenticed, to children from 17 to 20, if pursuing studies, to ascendants and descendants and other relatives who may be attending to household duties or the upbringing of children. Doctors' and surgeons' fees which, formerly, were fixed freely by the latter, are now determined, in each *departement*, in agreement with the regional Social Insurance Committee. An insurance covering cases of protracted illness has been created. Both for insured persons and for the members of their

family, the Ministry of Social Security will meet the cost of the medical attention required, up to a period of three years, including, where necessary, the cost of sending patients to sanatoria or to the country. If the insured person be in need of re-education before returning to his former profession, he will enjoy a special allowance for a further year. During the period of interruption of work, the insured person receives a monthly allowance equivalent to half his salary, or two-thirds if he has two children.

Insurance for invalids has been determined by dividing invalids into three categories :—(1) those who are capable of working; (2) those who cannot work; (3) those who, in addition, are in need of the help of another person. According to the category, the pension rate varies from 30 to 60% of the average salary for the last ten years, with a guaranteed minimum of 45,000 francs per year.

Family Allowances.—The system of family allowances has been completely overhauled by the law of 22 August, 1946. It includes a pre-natal allowance of 3,050 francs per month for the first and second pregnancies, and of 3,600 francs per month for the third and later pregnancies. The maternity allowance has been increased for the first child from 21,000 to 36,000 francs, and correspondingly for larger families. Illegitimate children are included in these benefits. Special provisions cover families with only one wage-earner. (The above figures apply to the Seine department, as from 1 Sept., 1948.)

Workmen's Compensation.—The law passed by the National Assembly on 5 October, 1946, supersedes the Act of 9 April, 1898. It is administered by the Social Security Funds, *i.e.*, the insured persons themselves. The Funds can invite employers to take preventive measures, ensure their application by inspectors from the Ministry of Labour, and impose fines on employers who fail to comply. They can also grant loans to employers who carry out the required improvements. The law also fixes the conditions in which the victims of accidents or occupational diseases will enjoy free medical attention by a doctor of their own choice, functional re-adaptation, professional re-education and financial compensation.

A law promulgated on 11 October, 1946, has created a medical labour service of doctors who will have to hold a diploma of 'industrial health specialists.' These doctors will be entrusted with the control of hygiene and health matters in all industrial undertakings or groups of undertakings. In addition, it will be the duty of this medical service to examine wage earners when they are engaged, to carry out periodical medical examinations, and to ensure the application of the existing rules relating to safety in work.

Old Age Pensions.—A law dated 14 March, 1941, and promulgated by the Vichy Government, recognized the right of aged wage earners to a pension. It was financed with money obtained from insurance contributions or with the help of the reserves built up by the social insurance funds and intended to cover risks of a different nature. After the Liberation, on 22 May, 1946, an Old Age Pension Fund was created and financed by means of a special contribution of 4% on salaries, and paid by all employers. This law was amended on 13 September, 1946, and a new scheme was introduced. From 1 January, 1947, all French people of a working age, and whose contributions finance the Old Age Pensions Fund, have to register. As from 1 April, 1947, all the aged people of France whose resources are insufficient are entitled to an allowance, and the first payments will be made on 1 July, 1947. Amongst the new beneficiaries of the old age pension scheme are

included the mass of agricultural workers, craftsmen, small business men and the liberal professions.

Finance.

The following figures show the budget estimates (in millions of francs for 6 years :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure [1]
1946	289,472	271,275	1949 [2]	1,250,456	749,961
1947	610,583	416,505	1950 [3]	1,792,945	933,065
1948	924,833	460,540	1951 [4]	1,875,189	1,039,183

[1] The figures are for the Civil Budget only.

[2] The *loi des maxima* provides a budget balanced at 1,870 milliard francs.

[3] The *loi des maxima* provides 2,217 milliards of revenues and 2,237 milliards of expenses (including 1,090 for civil defence, 420 for military defence, 329 for reconstruction and 398 for industrial equipment).

[4] The [illegible] for 1951 show 1,975,000 million of revenue and 2,615,000 million of expend[illegible] 640,000 million is to be met by taxes and loans. The revenue includes 115,000 million of Marshall Aid; the main items of expenditure are general services, 1,040,000 million; reconstruction, 155,000 million; military defence, 740,000 million; investments, 680,000 million.

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

Budget estimates in million francs for 5 years:—

Revenue	1947	1948	1949	1950	1951
Taxes and monopolies	493,586	769,244	1,069,466	1,554,387	1,646,676
State industries	58,436	65,943	82,216	84,585	69,983
State domains	13,344	9,480	26,930	18,870	13,500
Various	45,217	80,166	71,844	135,103	145,030
Total	610,583	924,833	1,250,456	1,792,945	1,875,189

Expenditure	1948	1949	1950	1951

Social services	42,056	58,909	84,237	85,834
Total (including all others)	445,733	749,961	933,065	1,039,183

The French national debt was as follows (in million francs):—

Public debt	31 Dec., 1947	31 Dec., 1948	31 Dec., 1949	30 June, 1950
Perpetual debt	182,137	181,854	349,171	349,132
Amortizable debt	456,743	572,780	612,988	662,381
Medium and short-term debt	813,521	951,694	989,816	1,098,563
Floating debt	665,196	744,553	771,642	758,514
Internal debt	2,117,597	2,450,881	2,723,617	2,868,590
External debt	381,476	960,928	1,182,104	1,235,718
Total national debt	2,499,073	3,411,809	3,905,721	4,104,308

Defence.

The President of the Republic exercises command over the armed forces. The President of the Council is responsible for the national defence; he is assisted by the Staff of National Defence. Army, Navy and Air Force are under the authority of the Minister of the Armed Forces, who is assisted by 3 Secretaries of State.

I. Land Defences.

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontiers extend over 1,665 miles, of which 1,246 miles are along the Belgian, German, Swiss and Italian frontiers, and 419 along the Spanish frontier.

The defence of the eastern frontier will largely depend on the final frontier with Germany and the possible internationalization of the Ruhr district.

II. Army.

The Army consists of regular officers, long-term non-commissioned officers and soldiers, conscripts serving 12 months, and reservists.

The High Command of the Army comprises the Chief of the General Staff and the Chief of the Army Staff.

The territory of the French Union is, for military purposes, divided into Military Regions, Subdivisions, Superior Commands, and Territorial Commands. There are 9 Military Regions in France and one in Algeria; Superior Commands in Morocco, Tunisia, the Far East, French West Africa, Madagascar, French Zone of Germany, etc.

The peace-time units are divided into Tactical Groups and Territorial Units. They comprise infantry, armoured troops and cavalry, artillery, engineers, pioneers, transport, and supply. Maintenance is supervised by the Commissariat, the Medical Service and the Veterinary Service.

The *Gendarmerie* constitutes a separate arm; its employment is regulated by the Army Minister.

The normal composition of a French army corps is 2 infantry divisions, 1 reconnaissance group, 1 regiment of artillery, 1 battalion of engineers, 1 group and 1 company of observation balloons and administrative services.

In Jan., 1948, the effectives were fixed at 525,000 officers and men:—Republican Guards and Gendarmerie, 60,000; metropolitan forces and occupation forces in Germany, 225,000; overseas forces, 240,000.

N.C.O.s are trained in cadre schools, while the Corps of Officers receives first a sol[illegible] in the school for all arms at Coet-Quidan in Brittany, suitable [illegible]aders of youth and for military leaders. Technical instruction is completed in separate schools for each arm of the service.

Higher military instruction is provided in the staff school (*Ecole d'Etat-major*) for officers of formation staffs and in the *Ecole Supérieure de Guerre* for officers destined for the higher command. *L'Institut des Hautes Etudes de Défense Nationale* al[illegible] officers and civilians to study together the problems of [illegible]

III. Navy.

Since the war ended, the renovation of the French Navy has been seriously retarded by financial stringency.

Construction of the 8,000-ton crusier *De Grasse*, begun in 1938, was suspended in Aug., 1947, as a measure of economy. A fast anti-aircraft escort vessel, 2 fast anti-submarine escort vessels, 2 new submarines and a river gunboat were authorized in 1949, and a fast anti-aircraft escort vessel, 2 fast anti-submarine escort vessels, 2 submarines and 2 river gunboats were authorized in 1950. Seven new minesweepers were begun in 1950.

Early in 1946 the flotillas were strengthened by the acquisition of 8 ex-German destroyers and torpedo boats which had been surrendered to the Royal Navy in the last year. Three more ex-German destroyers, 12 minesweepers and 16 [illegible] were handed over to France late in 1947 by the United States.

In 1948 2 cruisers, 4 destroyers, a sloop and some auxiliaries were acquired as France's share of surrendered Italian tonnage.

All naval aircraft and coastal defences are under the control of the Navy, and have been reorganized in 4 coast 'naval frontier' districts, in relation to the aircraft attached to the active fleet.

The Navy is under the supreme direction of the Minister of National Defence, being administered by the Secretary of State for Navy, the Chief of Naval Staff and 2 Deputy Chiefs of Naval Staff.

The French Navy is manned partly by conscription but mainly by voluntary enlistment. Through the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population,' France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet; now large numbers are taken from the shore for engine-room and other duties. The active personnel was 50,000 officers and men in 1950.

The following is a summary of the strength of the fleet at the periods shown :—

	Completed at end of				
	1946	1947	1948	1949	1950
Aircraft carriers	2	2	2	2	2
Battleships	2	1	1	1	2
Cruisers	9	9	11	11	8
Destroyers	28	24	28	20	17
Submarines	15	15	12	12	12

Below is a list of the principal ships in service at the end of 1948 :—

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Guns				
Aircraft Carrier (lent from Royal Navy for 5 years).								Knots
1943	Arromanches	13,190	—	—	Small A A.	—	40,000	25
Escort Aircraft Carrier (lent from U.S. Navy).								
1941	Dixmude	8,200	—	—	3 4-in.	—	8,500	16·5
Battleships.								
1950	Jean Bart	38,500	16	17	8 15-in.; 9 6-in.; 12 (Jean Bart 24) 4-in.	—	150,000	30
1940	Richelieu							
Cruisers.								
1943	Guichen	3,743	—	—	8 5·3 in.		110,000	39
1942	Chateaurenault							
1937	Gloire	7,600	4	5	9 6-in.; 8 3·5-in. A.A.	4	84,000	31
	Montcalm							
	Georges Leygues							
1934	Emile Bertin	5,886	—	—	9 6-in.; 8 3·5-in.		102,000	34
1931	Jeanne d'Arc	6,496	—	—	8 6·1-in.; 4 3-in. A.A.		32,500	25
1926	Duguay-Trouin	7,249	—	—	8 6·1-in.; 4 3-in. A.A.		102,000	33

There are also 17 destroyers of from 1,100 to 2,660 tons, with speeds ranging from 24 to 37 knots (4 being rated as light cruisers and 5 rated as torpedo boats), 12 submarines, of which 5 are ex-German, 4 sloops, 21 frigates of 1,300 to 1,400 tons (including 12 ex-U.S. destroyer escorts), 30 patrol vessels of 600 to 660 tons, 28 minesweepers, 14 motor torpedo boats and gunboats, 84 submarine chasers, 45 motor launches, 8 depot ships, 3 trawlers, 6 danlayers, 4 coastguard vessels, 12 surveying vessels and tenders, 3 aircraft tenders, 12 oilers, 19 transports, 2 water carriers, 4 boom defence vessels, 5 sail training vessels, 33 fleet tugs and 4 other vessels.

IV. French Air Force.

The *Armée de l'Air* and the French Naval Air Service, which is separate from it, are being reorganized. There is no lack of first-class personnel, and aircraft manufacture is in progress. New designs are in development. The Germans during the occupation used French factories, and these have been re-adapted. Aircraft are, however, being purchased from Britain and the United States, whilst British and American aircraft used by French squadrons during the war are still maintained in considerable numbers.

The future composition of the Air Forces cannot be determined without reference to the problems created by the atomic bomb and jet propulsion, and in consideration of the projected International Air Force.

Production and Industry.

On 3 Jan., 1946, the Government ordered the drawing-up of a 'First Over-all Plan for the Modernization and Economic Equipment of the Metropolitan and Overseas Territories.' Under the direction of M. Jean Monnet, this plan was worked out by a staff of more than a thousand experts and published on 10 Jan., 1947.

The Monnet Plan proposes the following increase of production by 1950 (figures in brackets denote the output in 1945):—Coal, 65 million tons (35·1 million); electricity, 37 milliard kwh (19·1 milliard); crude steel, 11 million tons (1 5 million); cast iron, 2·7 million tons (0 2 million); cement, 13·5 million tons (1·5 million); cars, 475,000 (33,700); cotton yarn, 280,000 tons (62,500 tons); silk and rayon, 46,000 tons (6,400 tons). Estimated expenditure, 2,251 milliard francs, of which 660 milliard are allotted to housing, 350 milliard to agriculture, 310 milliard to industry, 290 milliard to transport and communications; 581 milliard francs are to be expended on basic industries, of which electricity is to receive 198 milliard; railways, 125 milliard; road transport, 73 milliard; mining, 56·5 milliard.

I. Agriculture.

Of the total area of France (90 departments), in 1949, 55,104,054 hectares, 18,509,000 hectares are under cultivation, 12,238,000 hectares are pasture, 1,560,000 hectares are under vines, 11,031,000 hectares are forests and 5,898,000 hectares are moor and uncultivated land.

The following tables show the area under the leading crops and the production for 4 years :—

Crop	Area (1,000 hectares)				Produce (1,000 metric quintals)			
	1947	1948	1949	1950 [1]	1947	1948	1949	1950 [1]
Wheat	3,393	4,231	4,223	4,272	32,700	76,336	80,824	73,000
Mixed corn	40	39	34	32	355	456	413	400
Rye	444	565	522	498	3,842	6,380	6,196	5,900
Barley	959	820	896	955	11,227	12,731	14,314	15,700
Oats	2,611	2,439	2,136	2,300	28,133	33,800	32,215	32,200
Potatoes	1,006	1,047	982	980	109,636	156,820	96,196	129,300
Industrial beet	292	309	100	389	58,900	94,250	96,110	131,484

[1] Provisional.

The annual production of wine and cider appears as follows :—

Year	Under vines, 1,000 hectares	Wine produced, 1,000 hectolitres	Wine import, 1,000 hectolitres	Wine export, 1,000 hectolitres	Cider produced, 1,000 hectolitres
1938	1,513	60,332	16,257	1,032	34,601
1946	1,436	36,160	9,273	729	13,410
1947	1,440	44,170	6,463	552	17,068
1948	1,433	47,437	9,894	620	13,092
1949	1,437	42,935	10,302	743	22,400
1950 [1]	1,414	59,788	12,028	982	—

[1] Provisional.

The production of fruits (other than for cider making) and nuts for 1949 (and figures for 1948 in brackets), is given in thousands of quintals, as follows:—Apples and pears, 5,150 (3,970); plums, 1,032 (1,470); peaches, 1,295 (651); apricots, 361 (198); cherries, 751 (582), and nuts, 205 (226).

On 31 Dec., 1949, the numbers of farm animals were (provisional figures for 1950 in brackets):—Horses, 2,414,000 (2,394,000); mules, 90,000 (91,000); asses, 106,000 (104,000); cattle, 15,404,000 (15,722,000); sheep and lambs, 7,480,000 (7,470,000); pigs, 6,746,000 (6,735,000).

Silk culture, with government encouragement (*primes*). is carried on mainly in 17 departments of France—most extensively in Gard, Drôme, Ardèche, Var and Lozère. Silk production for 4 years :—

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce
		25 grammes	Quintals	1000 francs.
1946	11,308	9,127	4,219	93,400
1947	12,345	9,829	4,855	125,751
1948	11,738	9,325	4,425	154,874
1949 [1]	—	—	3,950	—

[1] Provisional.

II. Mining and Metallurgical Industries.

The following are the statistics of the principal minerals produced for 4 years, in thousands of metric tons :—

	1947	1948	1949	1950 [1]		1947	1948	1949	1950 [1]
Coal .	45,216	43,293	51,204	50,818	Rock salts.	2 148	2,273	1,826	2,045
Lignite .	2,093	1,838	1,848	1,690	Potash salts	715	769	896	1,018
Iron ore .	18,691	23,031	31,428	29,983	Pig-iron .	4,886	6,559	8,340	7,770
Bauxite .	676	789	766	810	Crude steel	5,733	7,236	9,156	8,654
Pyrites .	196	179	206	248	Aluminium	53·4	64 8	54	61

[1] Provisional figures.

III. Manufactures.

Plans are under consideration for the nationalization of the principal industries of the country. On 2 March, 1946, proposals were considered

by the Cabinet for the nationalization of the coal industry and of gas and electricity undertakings.

Sugar.—In 1945–46, there were 105 sugar works, employing 51,030 men and 4,170 women. The yield of sugar during 12 years (expressed in metric tons of refined sugar) was :—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1937–38	872,367	1942–43	616,311	1945–46	414,738	1948–49	864,100
1940–41	435,982	1943–44	583,201	1946–47	688,686	1949–50	792,800
1941–42	661,996	1944–45	298,996	1947–48	597,979	1950–51 [1]	1,200,000

[1] Provisional.

Alcohol.—Production totals of alcohol in hectolitres :—1946, 2,090,852; 1947, 2,032,176; 1948, 3,054,754; 1949, 3,328,422.

Cotton.—On 31 Dec., 1938, there were 9,140,000 spindles; in 1948, 8,275,000 spindles; in 1949, about 8,179,000 spindles.

IV. Fisheries.

French fisheries, including those of Algeria, in 1948 :—Sailing persons, 69,500; sailing-boats, 7,791; steamers, 135; motor-boats, 13,545. Value of products, 1945, 4,869 million francs; 1946, 8,655 million francs; 1947, 14,101 million francs; 1948, 28,403 million francs.

V. Electricity.

Production of electrical power (in millions of kwh.):—1939, 20,227; 1947, 26,677; 1948, 27,563 (52% hydro-electric); 1949, 30,026 (37% hydro-electric); 1950, 33,070 (49% hydro-electric).

Consumption of electrical power (in millions of kwh.):—1945, 15,141; 1946, 19,973; 1947, 23,064; 1948, 25,100; 1949, 26,565; 1950, 28,750.

Trade Unions.—On 1 October, 1947, there were 7,263 unions of employers and 8,540 trade unions. The Confédération Générale du Travail numbered, on 1 January, 1945, 5,100,000 members, and the Confédération des Travailleurs chrétiens, 750,000 members.

Commerce.

United with France in a customs union are the Principality of Monaco (treaty of 9 Nov., 1865) and the Saar Territory (decree of 30 March, 1948, effective as of 1 April, 1948). A treaty concluded with Italy on 20 March, 1948, envisages the establishment of a customs union in the near future.

Imports and exports, in million francs, for 6 years were :—

	1938	1946	1947	1948 [1]	1949 [1]	1950 [1]
Imports . .	46,065	264,737	397,135	672,673	926,326	1,072,730
Exports . .	30,590	101,388	223,321	434,047	783,906	1,072,640

[1] Including the Saarland.

The chief imports for home use and exports of home goods are to and from the following countries, in million francs:—

Countries	Imports		Exports	
	1949	195	1949	1950 [1]
French Colonies	240,650	280,257	326,706	386,926
United Kingdom	32,722	39,825	70,000	98,731
Germany	68,355	70,210	39,237	84,178
Belgium	32,175	19,076	45,103	68,808
Switzerland	15,382	28,783	27,473	54,394
Italy	17,663	37,419	15,715	27,977
United States	161,749	132,111	15,692	43,576
Brazil	9,071	18,642	5,692	17,163
Argentina	11,595	31,008	35,292	33,051
Australia & New Zealand	52,751 [2]	52,105	5,286 [3]	11,168
Canada	10,307	7,884	3,304	4,740
Sweden	14,116	17,258	16,040	24,707
Netherlands	22,523	23,955	36,212	37,481

[1] Provisional figures. [2] Revised figure for 1948. 37,196.
[3] Revised figure for 1948: 1,964.

Total trade between France and United Kingdom for 5 years (in £ sterling; Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports to U.K.	23,567,680	31,382,642	45,908,243	74,977,727	110,025,163
Exports from U.K.	15,126,890	23,766,774	34,135,862	33,672,534	44,116,453
Re-Exports from U.K.	8,207,487	5,441,898	10,480,816	8,415,179	11,166,404

Communications.

I. Shipping and Navigation.

On 1 Jan., 1951, the French mercantile marine possessed 700 vessels of more than 100 tons, with a gross tonnage of 2,965,609.

Shipping trade in 1949, is shown as follows with cargoes only:—Entered vessels of 36,188,659 tons; cleared, 15,570 vessels of 28,205,905 tons.

In 1948 there were 8,488 km. of navigable waterways with a total traffic of 37,233,000 tons; 1949, 39,065,000 tons.

II. Roads and Railways.

In 1949 the French road system consisted of 715,696 km., namely 80,231 km. of national roads, 263,300 km. of departmental and intercommunal roads and 372,165 km. of local roads.

According to a decree of 31 August, 1937, all the independent railway companies were merged with the existing state railway system in a Société Nationale des Chemins de Fer Français, in which the state holds 51% of the shares. As from 1 January, 1938, when the merger came into force, the railway system is divided into 5 regions:—Nord-Est (now including Alsace and Lorraine); Ouest (formerly the State Railway Company); Sud-Est (formerly P.L.M.), and Sud-Ouest (formerly P.O.-Midi).

The length of principal lines open for traffic on 1 January, 1938, was 26,427 miles, made up as follows:—State, 5,954 miles; Nord, 2,378 miles; Est, 3,187 miles; Paris–Orléans–Midi, 7,294 miles; Paris–Lyons—Mediterranean, 6,178 miles; Alsace-Lorraine, 1,436 miles. The total, in 1950,

was 41,272 kilometers, of which 4,026 kilometers were electrified. The railways, in 1950, carried 542,000,000 passengers and 152,000,000 tons of merchandise.

Railway receipts, 1949, were 341,447,000,000 francs.

III. Posts, Telegraphs and Telephones.

In 1949 the receipts on account of posts, telegraphs and telephones amounted to 96,610,028,000 francs (1948, 55,700,000,000 francs); the expenditure to 48,258,000,000 francs.

In 1948 the telephone systems in France had 2,232,536 subscribers.

As from 1 Nov., 1949, the Saarland has been included in the French postal system.

Banking and Credit.

The ordinary savings banks numbered 556 (with 2,289 branch offices) in 1945; the number of depositors was 11,934,000. Deposits on 31 Dec., 1949, 253,549 million francs; 1950, 322,144 million francs.

The national savings banks, on 31 Dec., 1948, held deposits and interest amounting to 192,500 million francs due to 12,920,000 depositors. Deposits on 31 Dec., 1949, 238,053 million francs; 1950, 293,486 million francs.

The Bank of France, founded in 1800, and placed under state control in 1806, has the monopoly (since 1848) of issuing bank-notes. The privileges of the bank were last renewed on 20 December, 1918, for a further 25 years, *i.e.*, until 31 December, 1945.

The capital of the bank is fixed at 182,500,000 francs. Its note circulation on 28 December, 1939, was 151,322 million francs (gold cover, 57·9%); on 31 Dec., 1948, 993 milliard francs; on 28 Dec., 1950, 1,561 milliard francs; on 1 March, 1951, 1,593 milliard francs.

The following are the principal banks:—The Crédit Foncier de France, founded in 1852, which lends money on mortgage; the Crédit Lyonnais, founded in 1863; the Société Générale, founded in 1864; the Comptoir-National d'Escompte de Paris; Banque de Paris et des Pays Bas, and the Banque Nationale pour le Commerce et l'Industrie.

On 2 December, 1945, a law was passed to nationalize the Banque de France and the 4 principal deposit banks—Crédit Lyonnais, Société Générale, Comptoir National d'Escompte and the Banque National pour le Commerce et l'Industrie. It also instituted strict Government control over the activities of all other banks and established a new body, the National Credit Council, composed of 35 members appointed by the state, to check the flow of credit in France.

The 12 directors of the nationalized banks are appointed by the state as follows:—3 by the Minister of Finance from persons in commerce, industry or agriculture; 3 by the trade unions, one of whom is an employee of the bank; 3 by the Minister of Finance in virtue of their bank experience; 3 representing the Bank of France or other semi-public credit concerns.

Money, Weights and Measures.

The French monetary unit is the franc.

The *franc* of 100 *centimes* was in normal pre-war (1914–18) conditions worth 9½*d.* or 25·225 francs to the £ sterling.

A new Monetary Law was introduced on 24 June, 1928, stabilizing the franc on a gold basis. According to this law, the franc consisted of 65½ milligrammes of gold, 900/1,000 fine. On 30 June, 1937, France went off the gold standard. By a decree dated 2 March, 1940, the gold content of the

franc was fixed at 23·34 grammes of gold, 900/1,000 fine. The mint has struck gold coins of 100 francs, 900/1,000 fine, and these coins are to be unlimited legal tender. To replace the 5, 10 and 20 franc notes of the Bank of France, which were withdrawn from circulation on 31 December, 1932 (from which date they ceased to be legal tender), the French Mint has issued coins of 10 and 20 francs in silver 500/1,000 fine and 5, 2, 1, 0·50, 0·25, 0·10 and 0·05 in nickel alloy. In March, 1947, the Minister of Finance decreed the withdrawal from circulation of 20-centimes, 10-centimes and 5-centimes coins.

The weight of the 10-franc silver coins is fixed at 10 grammes and of the 20-franc piece at 20 grammes, with a margin of five-thousandths both as regards weight and fineness.

In Sept., 1949, the value of the franc was fixed at 980 to the £. This change was put into effect without the approval of the International Monetary Fund; and since then no par value of the franc has been agreed with the I.M.F.

On 26 Dec., 1945, the price of a kilo of fine gold was fixed at 134,027·90 francs.

The metric system of weights and measures is in general use in France.

Diplomatic Representatives.

1. Of France in Great Britain (58 Knightsbridge, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—René Massigli, K.B.E (presented letters of credence on 23 Nov., 1944).

Minister Plenipotentiary and Counsellor.—Etienne M. R. de Croupy-Chanel.

Counsellors.—Jean Le Roy; René Varin, C.B.E.; Claude Lebel.

First Secretaries.—Michel Fontaine; Gérard André, C.V.O.

Military Attaché.—Général de Brigade Maurice Durosoy.

Naval Attaché.—Contre-Amiral Robert Blanchard.

Air Attaché.—Col. de Rancourt.

Financial Attaché.—René Sergent.

Commercial Counsellor.—Jean de Sailly.

Commercial Attaché.—Maurice Charlois.

Labour Counsellor.—Henry Hauck.

Press Attaché.—Bertrand de la Salle.

There are [illegible] in London, Edinburgh (with Glasgow), Liverpool (with [illegible]). There are consulates at Birmingham, Cardiff, Jersey, Newcastle and Southampton.

2. Of Great Britain in France.

Ambassador Extraordinary and Plenipotentiary.—Sir Oliver Charles Harvey, G.C.M.G., G.C.V.O., C.B. [illegible], 1948).

Ministers.—W. G. Hayter, C.M.G.; E. W. Meiklereid, C.M.G. (*Commercial*).

Counsellors.—Viscount Hood; H. S. Marchant, O.B.E. (*Information*); A. H. Marlow, C.B.E. (*Consular*); S. K. Millar, O.B.E.; C. A. Swindin (*Labour*).

First Secretaries.—F. D. W. Brown; J. L. W. Price; T. W. Dupree; W. I. Combs (*Commercial*); G. M. Herbert-Smith; P. I. Lake, M.C. (*Consular*); V. T. Bayley, O.B.E.; W. E. D. Massey, M.B.E. (*Information*); J. C. D. Scarlett, O.B.E. (*Financial*).

Naval Attaché.—Capt. K. L. Mackintosh, R.N.

Military Attaché.—Brig. G. A. C. McNab, C.B.

Air Attaché.—Air Vice-Marshal R. A. George, C.B., C.B.E., M.C.
Civil Air Attaché.—Air Marshal Douglas Colyer, C.B., D.F.C.
Scientific Attachés.—A. S. Hartshorn; A. H. Waterfield.

There are British consular posts at Bordeaux, Lille, Lyons, Marseilles, Nantes, Nice, Rouen, Strasbourg and elsewhere.

Books of Reference concerning France.

STATISTICAL INFORMATION.—The Institut national de la Statistique et des Études économiques pour La Métropole et la France d'Outre-Mer (11, Boulevard Haussmann, Paris 9e) is the central office of statistics. It was established by a law of 27 April, 1946, which [illegible] National des Statistiques (created in 1941 by merging the Direction [illegible] de la France and the Service de la Démographie) with the Institut de Conjoncture (set up in 1938) and some statistical services of the Ministry of National Economy. The Institut comprises the following depart[illegible] statistics, Overseas statistics, Market research and economic studies, [illegible].

The main publications of the Institut comprise :—

Annuaire statistique.
[illegible] la France d'Outre-Mer.
[illegible] (2 series, each bimonthly: Économie française, Économie mondiale).
Statistique et Études Financières. (Monthly, from Jan., 1949.)
Documentation économique (half-yearly).
Bulletin mensuel de statistique.
Bulletin mensuel de la statistique d'Outre-Mer.
Bulletin hebdomadaire de statistique.

Pilliet (G.), Inventaire économique de la France. (Annual, from 1945.) Paris.
Rapport Général sur le Premier Plan de Modernisation et d'équipement. Paris, 1946.
This report on the Monnet Plan is supplemented by the reports of the various commissions: Commission des Houillères, de l'Electricité, des Matériaux de Construction, des Transports intérieurs; de la Main-d'œuvre, de la Production Animale. All published Paris, 1946.

NON-OFFICIAL PUBLICATIONS.

FRENCH OVERSEAS DEPARTMENTS AND TERRITORIES.

THE constitutional and legal status of the overseas departments and territories within the French Union is regulated by Articles 73–82 of the French Constitution of 1946. The Electoral Law of 5 October, 1946, and the law on the composition and election of the Council of the Republic of 27 October, 1946, classify these territories as follows :—

I. Government-General of Algeria.

II. Overseas Departments.
1. Martinique.
2. Guadeloupe.
3. Réunion.
4. Guiana

III. Overseas Territories.
1. French West Africa.
(*a*) Senegal.
(*b*) Mauritania.
(*c*) Guinea.
(*d*) Sudan
(*e*) Niger.
(*f*) Ivory Coast.
(*g*) Dahomey.
(*h*) Upper Volta.
2. French Equatorial Africa.
(*a*) Gabon.
(*b*) Middle Congo.
(*c*) Ubangui-Chari.
(*d*) Chad.
3. Madagascar and dependencies.
4. Comoro Archipelago.
5. French Somaliland.
6. French Settlements in India.
7. New Caledonia and dependencies.
8. French Settlements in Oceania.
9. Saint-Pierre and Miquelon.

IV. Territories under Trusteeship.
1. Togoland.
2. Cameroons.

V. Anglo-French Condominium.
New Hebrides.

ALGERIA.

(L'ALGÉRIE.)

Government.

THE government and administration of Algeria are centralized at Algiers under the authority of the Governor-General, who represents the Government of the republic throughout Algerian territory. With the exception of justice and education, which are under the appropriate central ministries, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Government-General.

The political status of the so-called natives has been considerably modified by a decree of 7 March, 1944, embodied in the laws of 7 May and 5 October, 1946, and especially by the law of 20 September, 1947. According to this decree, special restrictions have been abolished and all civilian and military posts have been opened to Moslems. The personal and legal status of Moslems under the law of the Koran is not affected.

The elections for the Algerian Assembly, held on 4 and 11 Febr., 1951, had the following results:—First College: Communists, 1; Socialists, 7; M.R.P., 2; [illegible] Socialists, 8; Radicals and Independent Republicans, 42. Second College: Independents, 51; separatist parties, 9.

Governor-General.—Marcel Naegelen (appointed February, 1948).

Area and Population.

The census of 31 Oct., 1948, showed a population (including the military forces) amounting to 8,876,016, on an area of 847,500 square miles. Algeria is organized in 2 divisions called Northern Algeria (80,117 square miles) and Southern Territories (767,435 square miles).

Northern Algeria has three departments (Oran, Algiers, Constantine)

divided into 20 *arrondissements*, which include 329 *communes de plein exercice* with administration on French lines, and 78 *communes mixte* which are being abolished and replaced by *communes de plein exercice*. Natives elect representatives in all local and national assemblies.

Southern Territories consists of the 4 territories of Aïn-Sefra, Ghardaïa, Touggourt and the Saharan Oases; they contain 10 *communes mixtes* and 9 *annexes*. Southern Territories is to be reorganized in 5 *arrondissements*.

Population, according to departments and territories (census of 31 Oct., 1948):—

Northern Algeria (departments)	Population	Southern Algeria (territories)	Population
Algiers	2,765,898	Aïn Sefra	250,894
Oran	1,990,729	Ghardaïa	219,473
Constantine	3,102,396	[illegible]	284,940
		[illegible]	61,686
Total	7,859,023	Total	816,993

The chief towns with population in 1948 are:—Algiers, 315,210; Oran, 256,661; Constantine, 118,774; Bône, 102,823; Tlemcen, 69,668; Blida, 61,607; Sidi-Bel-Abbès, 61,355; Philippeville, 57,091; Mostaganem, 53,464; Sétif, 51,674; Mascara, 35,078; Bougie, 28,527.

Religion and Education.

The overwhelming part of the population are Moslems. The large Jewish community have, from 1871, been regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with some 400 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in government grants.

At Algiers (city) there is a university, attended in 1949 by 4,977 students (1,635 for law, 1,749 medicine and pharmacy, 678 science, 915 arts). There are also special schools for commerce, the fine arts, hydrography and agriculture. There were, in 1949, 128 establishments for secondary education for boys and 18 establishments for girls with 23,387 pupils (14,895 boys; 8,492 girls). The French and Moslem primary schools were amalgamated in 1949, when they numbered 2,188 with 331,684 pupils. There were also 6 teachers' training colleges with 509 students.

There are higher Moslem schools (*médersas*) at Algiers, Tlemçen and Constantine, with 174 students in 1946 (161 Arabs, 13 Kabyles).

There were, in 1949, 220 cinemas, with a seating capacity of 134,000.

Justice and Crime.

There is an appeal court at Algiers, and in the arrondissements are 17 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organized as in France. The criminal courts and special repressive tribunals for trying natives accused of crime, set up in 1902, were abolished, the latter in 1930 and the former in 1941.

Moslem justice is administered to natives by justices of the peace and cadis in the first instance with an appeal to French courts.

Finance.

The budget (including extraordinary budget) for 5 years were as follows (in francs) :—

	1946 [1]	1947	1948	1949 [1]	1950-51
Revenue .	14,268,906,954	26,577,696,796	38,253,903,000	56,401,000,000	72,529,000,000
Expenditure .	14,269,147,449	26,568,513,560	36,288,627,000	56,390,200,000	72,508,000,000

[1] Estimates.

There is a separate post office budget which is estimated to balance at 5,402,872,000 francs for 1949.

Defence.

The forces stationed in Algeria and the Territories of the South form the 10th Military Region, the Algiers Naval Command, and the Algerian Air Command. Parts of the 25th Airborne Division are also stationed in Algeria; they are liable to be called up for service in any territory of the French Union.

The 10th Military Region is divided into 3 territorial divisions with headquarters at Algiers, Oran and Constantine respectively. It includes the Gendarmerie, Republican Guard, Metropolitan Territorials, native troops and the Foreign Legion.

There is a military school at Cherchell for training French and Moslem officers, and a school for children of native soldiers at Miliana.

Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, etc., but the greater part of Algeria is of limited value for agricultural purposes. In the northern portion the mountains are generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is accessible only with difficulty.

The soil is, under various systems, held by proprietors, by farmers and by métayers or khammés. The area under cultivation is about 15,600,000 acres, of which about 5,000,000 acres are owned by European farmers and the balance by native farmers. The chief crops in 1949 were wheat (9,314,000 quintals), barley (8,658,000 quintals) and oats (1,416,000 quintals); maize, potatoes, artichokes, beans, peas and tomatoes. Flax and tobacco are also produced. In 1949, the area under tobacco cultivation was 31,000 hectares and the yield 198,500 quintals.

The yield of wine was 14,467,000 hectolitres from 335,000 hectares in 1949. Export of wine, etc., was 198,870,000 gallons in 1949. Dates (1,100,000 quintals in 1949), pomegranates, almonds, figs (500,000 quintals in 1949), oranges (1,501,020 quintals in 1950) and other fruits grow abundantly. The production of olive oil amounted to 3,570,000 gallons in 1949.

Eleven barrages with a capacity of 800 million cubic metres of water, in 1948, irrigated 75,000 hectares.

In 1949 the acreage of forests belonging to the state was 5,260,000 acres. The greater part is mere brushwood, but there are very large areas covered with cork-oak trees, Aleppo pine, evergreen oak and cedar. The dwarf-palm is grown on the plains, alfa on the table-lands. Timber is cut for fire-wood, also for industrial purposes, for railway sleepers, telegraph poles, etc., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle and sheep.

There were, in 1947, 505 agricultural co-operative societies with 44,573 members.

In 1949, there were in Algeria 201,000 horses, 229,000 mules, 309,000 asses, 797,000 cattle, 3,839,000 sheep, 2,596,000 goats, 160,000 pigs and 140,000 camels. The wool clip in 1945 was 6,886 metric tons.

There are extensive fisheries for sardines, anchovies, sprats, tunny-fish, etc., and also shell-fish. In 1949, 1,156 boats and 10,157 persons were employed in fishing. Fish taken in 1949 amounted to 26,280 tons. In 1945, local factories canned 3,080,021 kilos of the fish taken.

Algeria possesses deposits of iron, zinc, lead, mercury, copper and antimony. Kaolin, marble and onyx, salt and coal are also found.

Mineral output (in metric tons) :—

	1938	1949		1938	1949
Iron ore . .	3,000,033	2,536,872	Coal . .	13,200	258,000
Iron pyrites .	27,100	32,700	Lead . .	7,750	1,920
Zinc . .	17,712	15,420	Mercury .	0·5	1·2
Phosphates .	566,571	615,000			

Crude-oil production declined from 22 tons monthly in 1938 to 9 tons monthly in 1948. At the end of 1946 there were 12 wells, all in the Thouanet field.

Production of energy, in 1949, totalled 511·2 million kwh., of which 145·2 million were hydro-electric.

Commerce.

The foreign trade of Algiers was as follows (in 1,000 francs) :—

Year	Imports	Exports	Year	Imports	Exports
1937	4,083,383	4,333,599	1947	46,250,000	41,269,000
1938	4,995,178	5,638,787	1948	91,407,700	75,321,200
1946	26,354,000	25,585,000	1949	127,521,000	88,709,200

The principal imports in 1949 were :—Textiles, 80,000 metric tons; sugar, 88,600 metric tons; iron and steel, 161,600 metric tons; cereals, 72,000 metric tons; petrol, 2,126,700 hectolitres; coffee, 13,850 metric tons.

The principal exports in 1949 were :—Wines, 8,741,000 hectolitres; alfa, 202,600 metric tons; phosphate, 569,100 metric tons; iron ore, 2,624,000 metric tons; potatoes, 70,800 metric tons; fresh vegetables, 59,900 metric tons.

In 1949 the receipts of the customs authorities amounted to 1,073,512,000 francs.

Total trade between the United Kingdom and Algeria (Board of Trade returns, in £ sterling) :—

	1938	1947	1948	1949	1950
Imports into U.K. . .	2,895,761	5,324,214	9,101,266	10,889,948	10,351,757
Exports from U.K. .	1,016,818	2,327,986	1,536,809	1,876,312	2,282,158
Re-exports from U.K. .	3,249	2,624	21,660	12,176	7,458

Shipping and Communications.

In 1949, 18,432 ships of 26,097,000 tons entered and cleared the ports of Algeria, loading and discharging 8,648,000 tons of merchandise.

In 1937 the Algerian merchant fleet consisted of 13 vessels over 2,000 tons, 5 between 1,500 and 2,000 and 1,062 below 1,500 tons, with a total tonnage of 76,746 tons.

There were 39 national roads in 1949, with a length of 8,434 kilometres, 13,867 kilometres of departmental roads, 12,910 kilometres of main roads, 18,257 kilometres of by-roads and 11,213 kilometres of desert routes.

On 1 Jan., 1949, there were 4,478 kilometres of railway open for traffic (exclusive of lines on Tunisian territory), the railway receipts (1948) amounting to 7,692 million francs.

There is a regular postal and passenger air service between Algiers and Paris, and Algiers and Marseilles (800 kilometres), and a postal air service between Algiers and Brazzaville in the French Congo and between Oran and Elizabethville in the Belgian Congo. There is also a passenger air service locally between Algiers and Oran and Algiers and Tunis. Arrivals by air (1949), 116,500 [illegible] 9,450 tons of freight; departures, 141,500 passengers, 5,265 [illegible] freight.

There are 3 big (Algiers, Oran, Bône), 46 medium-sized and 24 minor airfields.

There were, in 1948, 850 post offices and 350 postal agencies; number of telephones, 1 Jan., 1949, was 81,800.

The postal receipts in 1949 were 1,380,000,000 francs, and there were 876 post offices on 31 Dec., 1949.

Postal cheque accounts were opened at Algiers on 1 February, 1921, and on 31 Dec., 1949, there were 564,834 accounts, with a total balance of 570,000 million francs.

Banking, Money, Weights and Measures.

The Bank of Algeria is a bank of issue, with a capital of 25,000,000 francs By ordinance of 18 Sept., 1950, its note circulation was limited to 75 billion francs. The Bank of Algeria was nationalized on 17 May, 1946. Several co-operative agricultural banks, assisted by government funds, are in operation; their capital exceeded 200 million francs in 1947. Barclays Bank (D., C. & O.) have branches at Algiers and Oran.

The money, weights and measures of France only are used.

OVERSEAS DEPARTMENTS.

MARTINIQUE.

On 19 March, 1946, the status of Martinique was changed to that of an overseas department. The department is under a prefect. An elected general council of 36 members votes the budget, and elective municipal councils administer the communes. Martinique is represented in the National Assembly by 3 deputies, in the Council of the Republic by 2 councillors and in the Assembly of the French Union by 1 delegate.

Area, 385 square miles, divided into 34 communes; population (estimate 1947), 264,219. Births (1949), 8,038; deaths, 3,682. Justice is administered by 5 justices of the peace, a tribunal of first instance, a regional court of appeal (with jurisdiction over Martinique and Guiana), a commercial court and a court of assizes. The military force consists of 1 battalion of infantry and a battery of artillery. In 1949, there was a law school (at Fort-de-France); 2 lycées for boys, with 1,408 pupils; a high school for girls, with 221 pupils; 139 primary schools, with 40,080 pupils; 16 higher primary schools (1,083 pupils); 8 private schools (834 pupils); a commercial school (434 pupils); an [illegible] ool (44 pupils). The capital and chief commercial town is [illegible] (population, 66,006), with a landlocked harbour some 15 square miles in extent. The budget for 1950 balanced at 1,116,072,500 francs. Sugar and rum are the chief productions, then come cocoa, pineapples, bananas and coffee. In 1950 there were 12,500 hectares under sugar cane, 3,500 hectares under bananas, 275 hectares under cocoa, 200 hectares under coffee, 200 hectares under pineapples and 3,670 hectares food-producing crops. In 1950 livestock in Martinique numbered 43,700 cattle, 22,500 sheep, 34,300 pigs, 14,000 goats and 9,300 horses and mules. There are 13 sugar works with distilleries attached, 107 agricultural distilleries, 2 industrial distilleries devoted to the production of rum and 56 establishments for canning bananas and pineapples. In 1949, 17,950 short tons of sugar, and 133,080 hectolitres of rum were exported. Sugar production averaged 23,000 metric tons in 1946–49, and was 27,000 metric tons in 1950.

Trade in 1,000 metric tons and millions of francs :—

	1947		1948		1949	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports .	130	3,667	124·6	6,304	144·5	8,533
Exports .	78	4,120	77·4	4,692	89·2	5,185

Vessels entered in 1949, 687, unloading 151,700 tons and taking 103,000 tons of goods. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidized mail coaches and motor cars, and subsidized steamers ply along the coast. There are 258 km. of national roads, about 300 km. of departmental roads and about 150 km. of local roads. A local savings bank is under the direction of the head of the post, telegraph and telephone services. The department is in communication with the rest of the world by cable and wireless. There were, in 1948, 47 post offices and 1,990 telephones.

The Bank of Martinique with a capital of 3,000,000 francs and a reserve fund of 22,140,000 francs, the Crédit Martiniquais with a capital of 25,000,000 francs, branches of the Royal Bank of Canada and of the Banque Nationale pour le Commerce et l'Industrie (Paris) are operating at Fort-de-France.

Prefect.—Christian Laigret.

GUADELOUPE AND DEPENDENCIES.

On 14 March, 1946, the status of Guadeloupe was changed to that of an overseas department.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper (population, 113,412), the principal town of which is Basse-Terre, the capital of the department, and that to the east Grande Terre (population, 113,545); the chief town of Grande Terre is Pointe-à-Pitre; the two islands have a united area of 1,510 square kilometres (583 square miles), and a circumference of 275 miles. There are 5 dependencies consisting of the smaller islands, Marie Galante (population, 29,349), Les Saintes (population, 2,358), Désirade (population, 1,581), St Barthélemy (population, 2,231) and St. Martin (population, 6,786); the total area with these is 688 square miles, and the total population (1946) is 271,262. The island dependencies of Guadeloupe are still inhabited by the white descendants of the Normans and Bretons who came there three hundred years ago. They live removed from the world, in patriarchal families of shipbuilders, fishermen and small farmers. St. Martin was occupied simultaneously by the French and the Dutch in 1648; by virtue of an agreement dated 23 March, 1648, the island was divided between the two peoples, France receiving about two-thirds of the island, the capital of which is Marigot, a free port. The department is under a prefect and an elected general council of 36 members, and is represented in the National Assembly by 3 deputies, in the Council of the Republic by 2 councillors and in the Assembly of the French Union by 1 delegate. In the scholastic year 1949–50, instruction was given in 2 lycées, at Pointe-à-Pitre and Basse-Terre, and a secondary course for girls at Pointe-à-Pitre, with together 1,188 pupils, and 128 public and private elementary schools. The public elementary schools had 683 teachers and 31,430 pupils. The seat of government is Basse-Terre (10,086 inhabitants). Pointe-à-Pitre (41,823 inhabitants) has a fine harbour. Revenue and expenditure balanced at1,049,313,000 francs for 1947. Outstanding debt at 31 Dec., 1947, 607,627,000 francs.

Chief products are sugar (about 36,000 tons exported in 1946, compared with an annual average of 70,000 tons before the war), bananas (about 48,000 tons in 1946), rum (202,324 hectolitres of pure alcohol in 1947), coffee and cocoa.

Trade in 1,000 metric tons and million francs :—

	1947		1948		1949	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports .	104	2,800	105	5,415	113	7,000
Exports .	91	3,588	94	3,834	110	6,842

Guadeloupe is in direct communication with France by means of 2 steam navigation companies; with America by 4 steam navigation companies, and (weekly) 2 Pan-American Airways system's planes (1 to West Indies Islands and Natal, southward; 1 northward to Miami). In 1949, 723 vessels of 748,000 tons entered the department.

In 1949 there were 61 post offices, 8 wireless stations, 379 miles of telegraph and telephone circuits, and 772 telephone subscribers. In 1950, there were 317 km. of national roads and 327 km. of departmental roads.

The Bank of Guadeloupe (founded 1851) with a capital of 3,000,000 francs and reserve funds amounting to 16,000,000 francs, advances loans chiefly for agricultural purposes. The Banque Nationale pour le Commerce et l'Industrie has 3 branches in the department. The Caisse Centrale de la France d' Outre Mer is (since 1 July, 1944) the official banking institution of the department, enjoying the privilege of issuing bank-notes. Silver coin has disappeared from circulation; nickel treasury tokens (bons) of 1 franc and of 50, 25, 10 and 5 centimes are authorized up to total emission of 1,000,000 francs.

Prefect.—M. Villéger.

ILE DE LA RÉUNION.

On 19 March, 1946, the status of Réunion was changed to that of an overseas department. Réunion is represented in the National Assembly by 3 deputies, in the Council of the Republic by 2 senators and in the Assembly of the French Union by 1 delegate.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a prefect and an elected council-general of 36 members. It has an area of 970 square miles and a population (1946) of 242,343. The chief towns are:—St. Denis, with 36,096 inhabitants; St. Paul, 25,959; St. Louis, 23,936; St. Pierre, 22,379. Elected municipal councils administer the communes. Réunion has two lycées, one for boys with (1946) 44 teachers and 762 pupils, and one for girls with 11 teachers and

302 pupils. Primary education is given at St. Denis in two schools, one for boys and one for girls with together 3,600 pupils and 70 teachers. There are besides three infant schools under state supervision and 14 private establishments with 39 teachers and 2,032 pupils. In the rest of the island, primary education is given in 192 schools with 23,558 pupils and in 31 private schools with 3,309 pupils. There is a teachers' training course attended by 75 pupils with 4 teachers. The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles, with St. Benoit on the one hand and St. Pierre on the other. The chief productions are sugar (62,000 acres), rum, manioc (12,000 acres), tapioca, vanilla, essences. The forests occupy about 150,000 acres. The production of spirits (expressed as 100% alcohol) in 1945 amounted to 36,115 hectolitres of rum and 18,175 hectolitres of industrial alcohol. The sugar production in 1949 was 110,000 metric tons.

Trade in 1,000 metric tons and millions of francs, C.F.A. :—

	1947		1948		1949	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports .	71·3	1,309	105	2,873	85	3,500
Exports .	78·4	1,299	81	2,248	106	3,020

The chief imports in 1946 were:—Rice, 10,703 tons; cotton goods, 324 tons; metals, 2,502 tons, wines and spirits, 11,204 hectolitres. Chief exports (1946):—Sugar, 112,994 tons; rum, 2,894 tons. U.K. imports from Réunion (Board of Trade figures), £44,569 in 1947; 126,209 in 1948; £51,814 in 1949; £78,662 in 1950; exports to Réunion, £82,227 in 1947, £41,746 in 1948; £33,032 in 1949; £34,887 in 1950. In 1946, 56 vessels entered and cleared the island.

The Tamatave–Réunion–Mauritius telegraph cable and the wireless station are open for public traffic. There are 49 post offices and 63 central telephone offices. There were, in 1950, 342 km. of national roads and about 300 km. of departmental roads.

The budget for 1946 balanced at 289·1 million francs. The currency consists of local bank-notes and token nickel coinage. The Réunion franc (franc C.F.A.) equals 2·00 metropolitan francs. The Bank of Réunion has a capital of 6 million francs.

Prefect.—Roland Béchoff.

GUIANA.

(Guyane Française.)

On 19 March, 1946, the status of Guiana was changed to that of an overseas department.

French Guiana, on the north-east coast of South America, is administered by a prefect. It has an elected council-general of 15 members and is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each. Area about 90,000 sq.

km., and population, census of 1946, 28,537. Cayenne, the chief town, has a population of 11,704, and the other 13 communes have 19,202. These figures are exclusive of the floating population of miners without any fixed abode, officials, troops and native tribes. At Cayenne there are a court of first instance, and a superior court of appeal, with jurisdiction in other localities. The military force consists of 353 officers and men of the Colonial Infantry. Primary education has been free since 1889 in lay schools for the two sexes in the communes and many villages. There is also (1944–45) a college and a normal course (159 students), a primary school (922 pupils) and a kindergarten school. There are also several church schools (1,000 pupils) and a private school for leprous children (52 pupils). The penal settlement has 3 schools with 126 pupils.

The country has immense forests (about 80,000 sq. km.) rich in many kinds of timber. Only about 3,200 hectares are under cultivation. The crops consist of rice, maize, manioc, cocoa, bananas and sugar cane. The most important industry is gold-mining (placer; 1948, 13,625 fine oz.). Head of cattle in 1946, 3,242. The exports consist of cocoa, bananas, various woods, gold, fish glue, rum, rose-wood essence, balata and hides.

Trade in 1,000 metric tons and millions of francs:—

	1947		1948		1949	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports .	11	433	13	878	12·22	1,031
Exports .	1	97	1	153	1·68	219

Exports to the United Kingdom, 1947, £1,573; 1948, £1,431; 1949, £2,429; 1950, £1,252; imports from U.K., 1947, £1,424; 1948, £9,374; 1949, £18,341; 1950, £26,695.

There are 3 ports:—Cayenne, St.-Laurent-du-Maroni and Oyapoc. Cayenne and St.-Laurent are visited once a month by a packet boat of the Compagnie Générale Transatlantique. There is also steamboat communication between the capital and the other towns of the department. Vessels entered and cleared in the department (1946), 126. The Pan-American Airways system visits Cayenne daily; S.A.T.A. airline calls twice weekly at St.-Laurent. Three chief and many secondary roads connect the capital with the interior by motor-car services. A telegraph system connects Cayenne with Macouria, Kourou, Sinnamary, Iracoubo and the penal settlement. There are wireless stations at Cayenne, Oyapoc, Régina and St.-Laurent. There were, in 1950, 260 km. of national roads.

Since 1854, Cayenne has had a penal settlement for habitual criminals and convicts sentenced to hard labour. Since April, 1946, transportation to Cayenne has ceased. On 1 Oct., 1945, the penal population consisted of 1,543 men, who are gradually being sent back to France.

The Bank of Guiana, under government control, with a capital of 1,200,000 francs, with statutory reserve fund amounting to 600,000 francs, advances loans for agricultural and other purposes.

The Territory of Inini was separated from French Guiana by a decree of 6 July, 1930, but has been re-united with the department of Guiana by law of 19 March, 1946. The area is 30,301 square miles and the population (1946), 5,024. The territory is connected with Guiana by waterways which, despite rapids, are navigable by local craft. The principal products are rose wood and cabinet wood. Gold is also found. The trade of the territory

is included in the Guiana returns. There are 3 post offices and 1 wireless station.

Prefect.—R. Vignon.

OVERSEAS TERRITORIES.

FRENCH WEST AFRICA.

(AFRIQUE OCCIDENTALE FRANÇAISE.)

French West Africa comprises the following territories:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) French Sudan, (6) Mauritania, (7) Niger, (8) Upper Volta.

The approximate area and population of French West Africa in 1941 and 1945, and in 1949 are shown as follows:—

Colony	Area (in sq. miles) 1941, 1945	Population		Area (in sq. km.) 1949	Population 1949
		1941	1945		
Senegal	77,730	1,723,068	1,895,000	209,500	1,764,000
Guinea	96,886	2,117,705	2,125,000	280,900	2,180,000
Ivory Coast	184,174	4,047,041	4,056,000	336,200	2,065,000
Upper Volta	—	—	—	315,700	3,069,000
Dahomey	43,232	1,424,220	1,458,000	115,700	1,505,000
French Sudan	590,966	3,794,270	3,797,000	1,195,000	3,177,000
Mauritania	323,310	366,853	497,000	943,000	518,000
Niger	499,410	1,944,190	2,168,000	1,279,000	2,029,000
Dakar and dependencies [1]	60	165,188	175,000	470	228,000
Total	1,815,768	15,582,535	16,171,000	4,675,700	16,535,000

[1] The 'circonscription' of Dakar and dependencies has been incorporated with Senegal (with effect from 1 July, 1946).

In 1949 Europeans numbered about 52,000, of whom 40,000 were French.

By decree of 5 July, 1944, which came into force on 1 Jan., 1945, the boundary between French Sudan and Mauritania was modified in that Mauritania received an additional area of 287 square kilometres and additional population of 188,500.

The principal tribes are the Ouolofs in Senegal (about 600,000, mostly Moslems); Bambaras and Mandingos in the Sudan, Senegal, Guinea and Ivory Coast (about 2,100,000); Peuls (Fulbés) in the Sudan, Senegal and Guinea (about 1,939,000); the Mossi in the Upper Volta (about 1,300,000), the Toucouleurs in Senegal, Guinea and Sudan (246,000), and the Baoules, Agnis, Gouros and Kroumen on the Ivory Coast.

A treaty of 19 Oct., 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912 and approved by the two governments in 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with

a river frontage not exceeding 432 yards; the lease, at first, to be for 30 years.

Under the Anglo-French Convention of 8 April, 1904, the river port of Yarbatenda on [illegible] to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By a convention between Great Britain and France the former recognized the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the state of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

The Governor-General, whose seat is at Dakar, is assisted by a government council, consisting almost entirely of the chiefs of the civil and military services, and a grand council, composed of members elected by the territorial councils (5 from each territory).

Each of the 8 territories is under a governor, who is assisted by a privy council, consisting of the chiefs of the civil and military services and 2 members nominated by the Governor-General, and a general council of elected European and African members.

There is a general budget for the whole of French West Africa, and a local budget for each territory.

There were in 1950, 827 elementary schools with 99,000 pupils, and 66 secondary schools with 6,613 pupils. 237 private schools had 33,000 pupils.

There were, in 1949, 60 cinemas with a seating capacity of 40,000.

In 1950, the estimated ordinary budget balanced at 12,329,489,000 francs, and the estimated extraordinary budget at 9,175,427,000 francs.

The imports into French West Africa are mostly textiles, fuel oil, mechanical implements, food substances and beverages.

The principal exports in 1949 were as follows :—

	Quantity (in metric tons)	Value (in millions C.F.A.)		Quantity (in metric tons)	Value (in millions C.F.A.)
Groundnuts .	211,287	6,719·4	Gum . .	3,496	121·4
Palm-kernels .	85,492	1,912·5	Palm-oil .	9,820	385·7
Coffee . .	63,742	4,240·9	Bananas .	61,051	813·4
Groundnut oil .	55,406	4,915·6	Cotton . .	2,367	203·5
Cocoa . .	56,132	4,137·3	Sisal . .	82	5·6
Cabinet wood .	80,814	376·7	Oil-cake .	91,805	893·3

The following is a comparative table (in thousand francs C.F.A.) of the imports and exports during 1948 and 1949 for each of the territories :—

Territories	Imports		Exports	
	1948	1949	1948	1949
Senegal, Mauritania, Sudan .	12,734,230	20,783,162	9,483,800	12,885,946
Guinea	1,766,590	3,104,398	1,157,520	1,663,487
Ivory Coast, Upper Volta .	3,881,336	7,693,083	5,196,937	10,267,956
Dahomey	1,116,284	2,241,682	1,515,124	1,880,783
Niger	342,880	657,415	715,083	702,562
Total . . .	19,841,320	34,479,740	18,068,464	27,400,734

More than two-thirds of the imports and exports came from and went to metropolitan France.

Total trade between Great Britain and French West and Equatorial Africa, according to Board of Trade returns for 5 years, was as follows (in £ sterling):—

	1938	1947	1948	1949	1950
Imports into U.K. . .	397,980	887,471	1,502,177	2,517,700	3,992,792
Exports from U.K. .	756,390	1,889,600	1,960,399	1,786,613	2,663,848
Re-exports from U.K. .	60,409	1,344	5,052	20,344	32,291

By decree of 17 July, 1947, a *Régie des chemins de fer de l'A.O.F.* has been set up which administers the railways and certain port installations of French West Africa.

In 1949, 3,141 vessels of 7,984,754 net tons entered and 3,204 vessels of 8,332,271 net tons cleared the ports of French West Africa. In 1949, 3,409 aeroplanes, carrying 20,344 passengers, 289 metric tons of mail and 1,471 metric tons of luggage, arrived at the airport of Yof.

Number of motor vehicles (1949):—1,128 passenger cars, 3,267 lorries, 66 motor cycles.

There were (1 Jan., 1948) 3,782 km. of railway in operation; 18,555 km. of telephone line, with 4,000 subscribers, and (in 1947) 43,610 km. of telegraph line. In 1949 there were 301 post offices, divided as follows:—Senegal and Dakar, 65; French Sudan, 54; Guinea, 38; Ivory Coast, 39; Dahomey, 37; Mauritania, 23; Niger, 25; Upper Volta, 20.

A savings bank was established by a decree of 22 July, 1920, and began to function on 1 Oct., 1922, with a single office at Dakar. In June, 1947, there were 64,022 depositors with 209,106,633 francs to their credit. The Banque de l'Afrique Occidentale Française has the exclusive right to issue notes, up to 16,000,000,000 francs. It has branches at Dakar, Bamako, Conakry, Abidjan, Kotonu, Lomé, Kaolak, Bobo-Dioulasso and Zinder. Its capital is 52,629,000 francs. The Banque Commerciale Africaine, Banque Nationale pour le Commerce et l'Industrie, Société Générale and Crédit Lyonnais are also important banking institutions in French West Africa. The use of French weights and measures is compulsory throughout French West Africa.

As from 26 Dec., 1945, the franc of French West Africa has been detached from the franc of metropolitan France. As from 18 Oct., 1948, 100 West African francs (franc C.F.A.) = 200 Metropolitan francs.

High Commissioner of the French Republic, Governor-General of French West Africa.—Paul Béchard (appointed Feb., 1948).

Senegal has a total area (with Dakar) of 200,530 square km. (77,405 square miles); the population in 1950 was 1,992,597. The capital is St. Louis, founded in 1658 (population, 63,000). The other important towns are Kaolak (33,000), Thiès (30,000), Diourbel (16,000) and Ziguinchor (16,000). By a decree of Dec., 1924, Dakar and its surroundings (including Gorée and Rufisque) were formed into a special territory called *circonscription de Dakar et Dependances.* The 'circonscription' was re-united with Senegal by decree of 17 May, 1946, which came into force on 1 July, 1946. Dakar, Gorée and Saint-Louis are *communes de plein exercice* analogous to French metropolitan communes. The Governor of Senegal is represented in Dakar by a delegate whose authority is imposed on the Delegation of Dakar.

The territory is represented in the National Assembly by 2 deputies, and in the Council of the Republic and the Assembly of the French Union by 3 delegates each. It is administered by a governor, assisted by a general council, and divided into 11 'circles,' each under the rule of an administrator. The budget for 1950 was 2,867,900,000 francs C.F.A.

Education is provided at 2 *lycées* (at Dakar and Saint-Louis), 5 modern colleges, 4 technical colleges, 2 *écoles normales*, 3 *cours normaux* and 201 elementary schools. Total pupils in the elementary schools in 1949 was 31,500, including 3,600 attending 21 private schools. Two examination centres in Dakar grant higher diplomas in law, arts and sciences. In 1949, 438,015,000 francs were provided for education and sports.

The soil is generally sandy. In 1947, there were 70,000 sheep and goats, 315,672 cattle, 48,000 asses and 35,000 horses. The natives cultivate groundnuts, millet, maize and some rice; other products are gum from Mauritania and rubber and palm-nuts from the Casamance River. Yield of groundnuts was 430,000 tons in 1949–50. The production of oil from groundnuts has risen from 800 tons in 1936 to 68,000 tons in 1949. A salt industry is being developed. Native industries comprise weaving, pottery, brick-making and jewellery; zircon and titanium-bearing sand is produced.

Imports in 1949 amounted to 613,000 tons, valued at 20,783,000,000 francs C.F.A.; exports, 354,000 tons, valued at 12,885,946,000 francs C.F.A. (including Sudan and Mauritania). The chief imports were textiles (15,000 tons, valued at 4,500,000,000 francs), foodstuffs (rice and flour), sugar, cement, petrol and coal. The chief exports in 1949 were groundnuts (175,000 tons, 5,800,000,000 francs), groundnut oil (55,400 tons, 4,900,000,000 francs), oil-cake (91,190 tons, 898,306,000 francs), and gums (3,375 tons, 117,749,000 francs).

In 1949 the colony had 12,413 kilometres of telegraph, 5,530 kilometres of telephone lines and 70 post offices. There are 2 French submarine cables, Brest–Dakar and Brest–Casablanca–Dakar. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles) and Louga [illegible], another one Thiès, Kayes and Bamako (French Sudan), [illegible], and a branch to Kaolak and another to Touba.

There is a river service on the Senegal from St. Louis to Podor (140 miles) open throughout the year. During the rainy season ships of 14 to 15 ft. draught can get as far as Kayes. The Senegal River is closed to foreign flags. The Saloum River is navigable in all seasons as far as Kaolack. In 1949, 2,234 vessels of 5,113,000 net tons entered the port of Dakar.

La Banque de l'Afrique Occidentale (established 29 June, 1901, and reorganized by a law of 29 Jan., 1929), with a capital of 52,629,000 francs and reserve funds of 36,750,000 francs (30 June, 1945) was founded for the purpose of carrying on financial, industrial or commercial operations; it has a branch at Dakar and an agency at Kaolak. The Banque Commerciale Africaine has several agencies, as have the Banque Nationale pour le Commerce et l'Industrie, the Crédit Lyonnais and the Société Générale.

Governor.—Camille Bailly.

Mauritania, formed into a protectorate in May, 1903, converted into a special 'Civilian Territory' in Oct., 1904, became a colony on 4 Dec., 1920, with a governor at its head. The governor is assisted by a general council of 2 Europeans and 18 natives. Mauritania consists of the districts of Trarza, Brakna, Gorgol, Assaba, Guidimaka, Adrar, Levrier

Bay, Akjoujt, Tagant and Aioun-el-Atrouss, with a total area of 943,000 square km. The boundary with Algeria runs from near Tanouchert, slightly to the north of latitude 27° N., south-eastward to Chegga, approximately on latitude 25° N. The population (1949) numbers 427,275 Moorish Moslems, 95,017 Africans (mostly in the south) and 267 French; total, 522,559.

Chief products are cattle, gum, salt and dried and salted fish. In 1949 there were 102,046 camels, 320,836 cattle, 100,000 asses, 2,392,225 sheep and goats and 3,500 horses. In 1947, there were 955 kilometres of telephone line and 22 post offices.

There were, in 1949, 60 primary schools with 1,924 pupils, and 2 secondary schools with 137 pupils.

The territory is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 member each.

Imports and exports of Mauritania are included in the figures for Senegal and Sudan. The budget of the colony for 1950 was 506,157,000 francs.

Governor.—Édouard Terrac.

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends some considerable distance inland. The area is about 280,920 square km., and the estimated population in 1950 was about 2,180,000 including 3,658 metropolitan French and 2,194 foreigners, mainly Lebanese and Syrians. Conakry, with 43,423 inhabitants, is the capital; other important towns are Kankan (20,000), Kindia (11,604), Labé (10,775), Siguiri (10,705) and Mamou (6,744).

The most important tribes are the Fullah (853,000), Malinké (570,000) and Soussou (234,000). The majority are Moslems, but fetishism is practised in some parts.

There are 104 primary schools with 12,459 pupils, 13 private primary schools with 1,577 pupils, 7 secondary schools with 387 pupils, 4 technical schools with 161 pupils, [illegible] schools.

The medical service [illegible], 8 medical posts and 20 health districts. There is an experimental quinquina station at Sérédou.

The chief products are rice, palm-nuts, bananas, rubber, coffee, pine-apples, palm-oil, earth-nuts, millet. Coffee is grown in forest districts. There are experimental gardens at Camayenne near Conakry, Kindia and Dalaba where the culture and selection of fruit trees and other plants is being tried. Fouta Djallon contains cattle in abundance. In 1949 there were 600,000 cattle, 245,000 sheep and goats, 600 horses, 2,950 pigs and 1,720 asses.

Gold is found mainly in the Siguiri district (4,000 kg. in 1949); diamonds in the Macenta district (58,330 carats in 1949). Bauxite and iron ore exist on the Kaloum peninsula, the Loos islands and in the Boké district; output, 1949, 20,000 metric tons of bauxite and 6,500 metric tons of iron ore. The principal imports in 1949 were:—Textiles (1,804 tons, valued at 745,720,000 francs C.F.A.), cars, lorries and spare parts (2,294 tons, 282,840,000 francs C.F.A.), foodstuff (10,265 tons, 285,711,000 francs C.F.A.), wines (1,558 tons, 43,461,000 francs C.F.A.). The principal exports in 1949 were:—Bananas (42,757 tons, 549,353,000 francs), palm-kernels (29,507 tons, 726,446,000 francs), honey (1,204 tons, 30 million francs), coffee (1,800 tons, 110 million francs).

There are a chamber of commerce and a chamber of agriculture and industry at Conakry.

A railway connects Conakry with Kankan (662 km.). There are 5,290

km. of all-weather roads and 3,500 km. of dry-season roads; 5,476 km. of telegraph and telephone lines and 39 post offices.

The territory is connected by cable with France and Pernambuco; also with Freetown, Monrovia and other places. There is a wireless station at Conakry affording communication with all territories of French West Africa.

The budget of the territory for 1950 balanced at 1,475 million francs C.F.A.; 1951, ordinary budget, 1,976 million francs C.F.A.; extraordinary budget, 1,698,330,000 francs C.F.A. In 1949 there were 26 branches of the savings bank with 9,060 depositors.

In 1949, 367 vessels of 972,212 tons entered and 365 vessels of 973,269 tons cleared the port of Conakry.

French Guinea is represented in the National Assembly by 2 deputies, in the Council of the Republic and in the Assembly of the French Union by 4 councillors each. At the end of 1946 a representative assembly of 40 members was set up at Conakry, with deliberative and advisory powers.

There are branches of the French West Africa Bank at Conakry, and of the National Bank for Trade and Industry at Conakry, Kindia, Kankan and Siguiri.

Governor.—Roland Pré.

The Colony of **French Sudan** was formed in 1904, from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal. Its old name of Upper Senegal-Niger was changed to French Sudan by decree of 4 December, 1920. On 1 Jan., 1933, a portion of Upper Volta was added to it but as from 1 January, 1945, it lost to Mauretania a district containing 118,500 nomads. On the reconstitution of the Territory of Upper Volta on 1 Jan., 1948, the districts of Tougan and Ouahigouya (20,304 square miles; 717,000 inhabitants) were added to it.

The area is 1,192,215 square kilometres, with a population of 3,350,000 in 1951, of whom 7,000 were Europeans. The most densely populated and richest of the 16 districts are those of San, Mopti, Sikasso, Koutiala, Bamako and Segou.

The governor is assisted by a privy council and a general council, the latter consisting of 20 French and 30 African members. The budget for 1951 provided for 1,944,077,000 francs, that for 1950 for 1,645,645,000 francs.

The Sudan is represented in the National Assembly by 3 deputies, in the Council of the Republic by 4 councillors, and in the Assembly of the French Union by 5 councillors.

The following are the most important towns in the French Sudan with population in 1951 shown in parentheses:—Bamako, the capital (84,600), Kayes (23,000), [illegible] isso (14,300), Gao (7,600), Mopti (9,100), Nioro (7,125), K[illegible] were, in 1950, 550 primary classes with 26,700 pupils, and 10 secondary schools.

The natives cultivate millet (650,000 metric tons in 1950), rice (150,000 metric tons), maize (60,000 metric tons), groundnuts (80,000 metric tons) and cotton (4,000 metric tons). In 1950, there were 3,000,000 head of cattle, 60,000 horses, 200,000 asses, 10,000,000 sheep and goats and 90,000 camels. Important irrigation schemes have been carried out in the Segon and Mopti districts on the Niger River, of which the Sansanding Barrage is the centre; 1·2 million hectares of cotton and rice lands are to be irrigated.

Native industries comprise pottery, brick-making, jewellery, weaving, leather-making. There are also 5 rice mills (3 opened in 1948) and 2 soap factories. Chief imports are cottons, foodstuffs, automobiles, petrol,

building material, sugar, salt, beer. Chief exports are [illegible], karité, millet, gum, kopak, sisal, skins and cattle (3 million head).

French Sudan is connected with the coast by a railway 760 miles in length, stretching from Dakar to Koulikoro by way of Thiès, Kayes and Bamako. For about 7 months in the year small steamboats perform the service from Koulikoro to Timbuktu and Gao, and from Bamako to Kourroussa. Two motor-car services connect the colony with North Africa (Cie. Générale Trans-saharienne and Société des Transports Tropicaux).

There are 13,000 km. of roads, not all of which are usable in all seasons; they include 669 km. of the metalled road Dakar–Niger (1,250 km.). The navigable length of the Niger in the Sudan is 1,782 km.

Two weekly air services, operated by Air France, connect the colony with Paris and Abidjan; a bi-monthly service (Cie. Transsaharienne) with Algiers. The chief airport is at Bamako.

Wireless telegraph connects all important towns with Paris, and with one another.

There were 3,204 km. of telegraph lines and 9,106 km. of telephone lines; 1,278 telephones and 55 post offices.

On 31 December, 1950, there were 44 branches of the savings bank, with 8,799 depositors (1,206 Europeans and 7,593 Africans).

There are chambers of commerce in Bamako and Kayes.

Governor.—Edmond Louveau.

The Territory of the **Niger** was formed by decrees of 13 Oct., 1922, and 28 Dec., 1926. The districts of Fada N'Gourma and Dori were separated from the Niger Territory by the law of 4 Sept., 1947, which reconstituted the former Territory of the Upper Volta. The frontier with Nigeria has been defined by the Anglo-French agreements of 1890, the Convention of Paris of 14 June, 1898, and the Conventions of London of 8 April, 1904, and 20 May, 1906.

Area (Jan., 1949), 1,276,627 square kilometres. Population (Jan., 1949), 1,050 Europeans, 2,040,000 natives. The country is composed of a zone in the north, which is largely desolate country; a central strip which is wooded, and the southern zone, richly wooded and abounding in cattle. In Jan., 1949, there were 72,000 horses, 1,525,000 cattle, 4,215,000 sheep and goats, 195,000 asses, 165,000 camels.

The native population is composed chiefly of Hausa, Jerma, Peulh and Tuareg. They cultivate millet, groundnuts, beans and manioc and, in the river districts, cotton and rice. In the east, close to the Komadugu River, sulphate of sodium of excellent quality is swept out of dried-up ponds. From 15 to 20 tons are provided every year for the health service of French West Africa. Salt is produced at Bilma and Agadez, natron at Manga, and gum arabic at Gouré, nearly all of which are exported to Nigeria. The country lacks water, with the exception of (1) the western districts which are watered by the Niger and its tributaries, (2) part of the southern zone where there are a number of wells, (3) the extreme south-east touching Lake Chad. Imports in 1949 were 11,637 tons, and exports (1949) 38,230 tons, of which nearly half were decorticated groundnuts. Local budget in 1949, 812,739,380 francs; estimates for 1950, 1,008,133,468 francs. The Banque de l'Afrique Occidentale has a branch at Zinder, in the eastern part of the colony. The colony is divided into 9 districts and 17 subdivisions. Niamey is the capital.

Length of telegraph lines (1948), 1,522 miles; of telephone lines, 1,425 miles. Telephone subscribers numbered 102. There were 26 post offices.

The towns of Niamey and Zinder are the termini of two trans-Sahara

motor routes; the Hoggar–Air–Zinder road extends to Kano and Fort Lamy. Niger Colony is also a favourite resort of hunters of big game (lions, elephants, buffalos, mufflons, oryx and addax).

The territory is represented in the National Assembly by 2 deputies, in the Council of the Republic by 2 senators and in the Assembly of the French Union by 3 councillors.

Governor.—Jean-François Toby.

Ivory Coast (Côte d'Ivoire) lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea, French Sudan and Upper Volta. France obtained rights on the coast in 1842, but did not actively and continuously occupy the territory till 1882. On 1 Jan., 1933, a portion of Upper Volta was added to the Ivory Coast, but on 1 Jan., 1948, the districts of Bobo-Dioulasso, Gaoua, K[illegible] Ouagadougou, Kaya, Tenkodogo and Dédougou were transferr[illegible] Coast to the reconstituted Upper Volta.

The governor is assisted by a Privy Council and a General Council comprising 18 Europeans and 27 Africans.

The territory is represented in the National Assembly by 2 deputies, in the Council of the Republic by 3 councillors, and in the Assembly of the French Union by 4 councillors.

Area, 319,455 square km. (123,310 square miles); native population (1950), 2,056,000; Europeans 8,155. The seat of administration is at Abidjan (population in 1948, 45,735, including 2,000 Europeans); the offices of agriculture and education are at Bingerville, that of justice at Grand Bassam and that of the veterinary service at Bouaké (20,534 inhabitants, including 390 Europeans). There are 120 public primary schools (16,200 pupils), 54 private primary schools (6,900 pupils) and 9 secondary schools (1,119 pupils). The chief ports, in respect of population and commerce, are Abidjan-Port-Bouet, Grand Bassam (population 5,743), Assinie (683), Grand Lahou (4,402), Sassandra and Tabou. The natives cultivate groundnuts, maize, rice, millet, bananas, pineapples, manioc and yam. They have also been taught to grow cocoa, the export of which increased from an average of 4 tons in 1904–08 to 223,542 in 1948. The cultivation of cotton is being developed; coconuts and a small quantity of rubber are collected. The mahogany forests inland are worked. Gold is found near Bouaké, on the Comoé and Man rivers, and in Indenie. Manganese deposits have also been located. The imports in 1949 amounted to 153,217 tons (7,693,033,000 francs), and the exports to 265,067 tons (10,267,957,000 francs). Chief imports were:—Textiles (1,422 tons), metal work (13,415 tons), beverages (2,787 tons); wine (31,306 hectolitres). Chief exports:—Coffee (61,088 tons), cocoa (56,026 tons), fresh bananas (18,254 tons), palm-kernels (11,741 tons), timber (81,006 tons). From Abidjan, on the north side of the lagoon, a railway runs to Bobo-Dioulasso (627 km.); minor railways cover 97 km. Roads suitable for motor traffic total 10,234 km. In 1948, there were 3,600 km. of telegraphic and 915 km. of telephonic lines, and 38 post offices. The telegraph connects principal the towns and extends to adjoining colonies. Telephonic communication exists between Abidjan, Aboisso, Assinie, Grand Bassam, Bingerville, Dabou and Tiassalé. There are 5 wireless stations. The budget for 1950 was 2,353,701,920 francs.

In 1949, 178,000 metric tons of cargo were unloaded (1948, 131,000) and 249,000 metric tons were loaded (1948, 239,000) at the ports of Ivory Coast.

Governor.—Laurent Pechoux.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and is bounded on the north-east by the river Niger, and on the north by the colony of Niger. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area is 115,800 square km., and the population, in 1950, 1,505,000. The seat of government is Porto Novo (the chief business centre, near Cotonou, the biggest port), which has 30,827 inhabitants. Dahomey is represented in the National Assembly by 1 deputy, and in the Council of the Republic and the Assembly of the French Union by 2 delegates each.

There were, in 1950, 102 public primary schools (11,740 pupils), 102 private primary schools (14,265 pupils) and 8 secondary schools (614 pupils). The natives are industrious agriculturists in the coast region, and grow maize, manioc and yams. In 1947, there were 211,900 cattle, 416,000 sheep and goats, 177,000 pigs and 2,000 horses. The forests contain oil palms, which have been profitably utilized. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces; coffee cultivation has given good results in the southern provinces. Imports in 1949, 63,667 tons (2,241,682,000 francs C.F.A.); exports 71,835 tons (1,810,783,000 francs C.F.A.). The principal imports were:—Textiles (828 tons; 426,609,000 francs), wines and spirits (11,175 hectolitres; 51,593,000 francs) and metalwork (2,380 tons; 171,369,000 francs). The principal exports were:—Palm-kernels (44,204 tons; 916,626,000 francs), palm-oil (9,205 tons; 363,663,000 francs), cotton fibre (2,116 tons; 176,928,000 francs), karité kernels (1,997 tons; 39,936,000 francs C.F.A.).

A metalled road for motor traffic, called the East Road (297 miles in length), runs from Savé to Malanville on the Niger. There is also a road from Tchaourou to Porga (281 miles), called the North-west Road. Other roads are Cotonou–Dassa-Zoumé–Savé (198 miles), Cotonou to Anecho (68 miles), Abomey to Ketou (75 miles), Tchaourou to Djougou (93 miles). There are now altogether more than 2,711 miles of carriage road, of which 871 miles are first-class roads. At Cotonou an iron pier has been erected, and from that port a railway runs into the interior to Parakou (257 miles), with a branch line to Whydah and Segborué on Lake Aheme (36 miles). The gauge is a metre. A metre-gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. A railway linking the capital with the port of Cotonou was opened to traffic on 1 June, 1930 (22 miles). On 1 Jan., 1935, a stretch of railway, 35 miles in length, was opened to traffic, connecting Tchaourou with Parakou. A telegraph line connects Cotonou with Abomey, Togoland, the Niger and Senegal. In the colony there were (in 1947) 2,500 kilometres of telegraph line, and 2,300 kilometres of telephone line, and 40 post offices. In 1948, 142 vessels of 439,552 net tons entered and cleared the port of Cotonou. French coins only are in circulation. The budget for 1950 was 943,230,000 francs C.F.A.

Acting Governor.—Claude Valluy.

Upper Volta. In 1919, the colony of Upper Volta was carved out of the colony of Upper Senegal and Niger, which had been established in 1904. It was suppressed in 1932 and its territory divided between Ivory Coast, Sudan

and Niger. On 4 Sept., 1947, the Territory of Upper Volta was re-established, comprising the area of the old colony of Upper Volta as at 5 Sept., 1932.

Area, about 290,000 square km. (109,940 square miles); population, over 3 million, with a density of 10 per square km. The most important towns are Bobo-Dioulasso (37,500 inhabitants) and Ouagadougou, the capital (25,000 inhabitants).

The [illegible] sted by a Privy Council and a General Council [illegible] and 40 Africans. The Territory is represented in [illegible] Assembly by 3 deputies, in the Council of the Republic by 3 councillors and in the Assembly of the French Union by 5 councillors.

There were, in 1949, 8,520 pupils in elementary schools and 405 in secondary schools; private schools had 5,117 elementary and 73 secondary pupils.

The natives grow maize, millet, rice, fonio, beans, batatas, yams and manioc. Edible fats (karité, sesame, groundnuts) are abundant. Cotton and sisal are of increasing importance. The native weavers, smiths and shoe-makers are notable.

Livestock (1949):—940,000 cattle, 620,000 sheep, 750,000 goats, 60,000 horses, 80,000 donkeys.

Principal exports:—Cattle, sheep, goats, karité (butter and kernels), decorticated groundnuts and sisal fibre.

Bobo-Dioulasso is the terminus of the Abidjan Niger railway; its extension to Ouagadougou is under construction. The road system of Upper Volta is very good; it comprises over 13,000 km., of which 6,000 km. are all-weather roads. Ouagadougou and Bobo-Dioulasso are regularly served by Air France. There are post and telegraph offices in every district capital.

The budget for 1950 balanced at 932,829,000 francs C.F.A.

Governor.—Albert-Jean Mouragues.

FRENCH EQUATORIAL AFRICA.

(Afrique Équatoriale Française.)

French Equatorial Africa extends along the Atlantic coast between the Cameroons and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. latitude to the Cameroons, and inland to the meridian of 11° 20′ E. of Greenwich, and the Kabinda region, which is Portuguese. Inland it is bounded by the Congo and Ubangi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad.

French settlement began on the Gabun river in 1839; Libreville was founded in 1848. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. The boundary between French Equatorial Africa and the Anglo-Egyptian Sudan was fixed by a protocol signed on 28 Feb., 1924.

By decrees issued on 15 Jan., 1910, the name of the French Congo was changed into French Equatorial Africa (Afrique Équatoriale Française).

By a decree of 16 Oct., 1946, French Equatorial Africa was reorganized as follows:—Under a governor-general (at Brazzaville) it comprises the four territories of Gabun (capital Libreville), Middle Congo (capital Pointe-Noire, from 28 Feb., 1950), Ubangi-Shari (capital Bangui) and Chad (capital Fort Lamy), each of which is administered by a governor.

The governor-general is assisted by a government council which consists of the chiefs of the civil and military services and 4 members nominated by the governor-general for a period of 2 years, and a grand council composed of members elected by the territorial councils (5 from each territory).

Each of the 4 governors is assisted by a privy council and a representative council whose composition corresponds on a smaller scale to that of the central bodies.

The general budget is passed by the general assembly. It balanced in 1950 at 3,711,412,000 francs C.F.A. (2,688,500,000 in 1949). Each of the four territories has its local budget, which is passed by the representative council; the local budgets balanced at 3,107,464,000 francs C.F.A. in 1950.

French Equatorial Africa sends 6 representatives to the National Assembly, 8 delegates to the Council of the Republic and 7 representatives to the Assembly of the French Union.

The area and population of the separate territories are shown as follows (1 Jan., 1950):—

Territory	Area (square km.)	European population			African population		
		Male [1]	Female [1]	Total	Male	Female	Total
Gabun .	267,000	2,213	779	3,378	192,200	213,200	405,400
Middle Congo	342,000	3,438	1,860	9,050	326,400	349,000	675,400

[1] 1948.

The density per square kilometre was 1·72 in 1949. The European population of Brazzaville was 6,505 at 1 Jan., 1951.

Vital statistics for Europeans in 1948:—Births, 453; marriages, 117; deaths, 110.

There were, in 1949, 220 public primary schools (26,300 pupils), 192 private primary schools (25,600 pupils), and 8 secondary schools (402 pupils).

The health services in 1950 included 5 hospitals, 92 infirmaries, 117 dispensaries, 25 institutions for lepers and 27 for sufferers from sleeping sickness.

There were, in 1949, 5 cinemas with a seating capacity of 1,000.

The general budget for 1950 balanced at 3,711,412,000 francs. Local budgets, 1950:—Gabun, 466,231,000 francs; Middle Congo, 590,019,000 francs; Ubangi-Shari, 912,844,000 francs; Chad, 1,138,370,000 francs.

The resources of French Equatorial Africa are quite undeveloped. There are about 300,000 square miles of tropical forest extending to the Gabun coast, containing many species of trees of industrial value. Wild rubber is the most important. Palm-oil (4,563 metric tons in 1949) and coconuts are also produced. Cotton is the most important product of Ubangi and Chad; exports, 1949, 23,612 metric tons; 1950, 23,959 metric tons.

Coffee, cacao, peanuts and sisal are also cultivated, and beeswax, copal and karite butter produced. In the Chad territory large numbers of cattle, sheep, asses, camels, horses and ostriches are raised, but there are no facilities for export. Ivory is an important article of export. Copper, zinc, gold (1,781·4 kilos in 1949), lead (1,405·4 tons in 1949), diamonds (135,600 carats exported in 1950), corundum and tantalum are found. The principal industries are centred in a tapioca factory, an oil refinery, a tannery and a match factory. Timber exports totalled 243,622 metric tons in 1950. Exports of sisal, planted first in 1930, were 583 metric tons in 1949, and 466 metric tons in 1950.

Livestock in 1944:—Horses, 125,000; asses, 175,000; camels, 200,000; cattle, 4,000,000; sheep and goats, 5,000,000.

Trade in 1,000 metric tons and million francs C.F.A.:—

	1948		1949		1950	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports .	198·763	6,010·278	309·101	11,309·566	306	13,393·6
Exports .	291·001	6,177·481	327·340	6,500·765	343	7,253·8

For trade with the United Kingdom, *see* FRENCH WEST AFRICA.

France and the French Union in 1950 accounted for 68% of the imports and 73·3% of the exports of French Equatorial Africa; Great Britain for 2·8% of the imports and 8% of the exports; U.S.A. for 12·9% of the imports and 0·2 of the exports.

The main ports are Port Gentil, Libreville and Pointe-Noire. In 1950, 854 vessels of 4,086,500 tons entered these ports; merchandise unloaded was 253,300 tons; loaded, 306,200 tons. At Loango steamers have to anchor about 3 miles off the coast. Whale fishing commenced in 1922.

It is intended to build 67 airfields:—1 for planes of 135 tons at Brazzaville–Maya-Maya; 5 for planes of 60 tons at Libreville, Pointe-Noire, Bangui, Fort Archambault, Fort Lamy; 16 for planes of 20 tons, and 45 for planes of 5 tons. Arrivals, 1950, 21,497 passengers and 6,016 metric tons of freight; departures, 21,858 passengers and 3,960 metric tons of freight.

A railway connects Brazzaville with the Atlantic at Pointe-Noire, a distance of 318 miles. The river port at Brazzaville, which facilitates traffic between the Congo and the railway, handled 156,200 tons in 1950.

Length of roads in 1946, 28,620 kilometres (first order), 7,860 kilometres (others).

The Central African telegraph line connects Brazzaville with Point-Noire, the terminus of the French cable from Brest via Dakar and Libreville, and is in communication with the English Atlantic cable. Several wireless lines connect Brazzaville with the rest of the colony and numerous radio stations have been constructed in the main post offices of the interior. Radio Brazzaville, built in 1942, with its 50 kilowatts capacity, is one of the most powerful stations in the world, and broadcasts in about a dozen languages. The total length of telegraph line in operation is about 3,253 miles.

The principal banks are Banque de l'Afrique Occidentale, Banque Commerciale Africaine, Banque Nationale pour le Commerce et l'Industrie, Société Générale and Banque Belge d'Afrique.

There is a British Consulate-General and a United States Consulate at Brazzaville.

High Commissioner of the French Republic, Governor-General of French Equatorial Africa.—Bernard Cornut-Gentille.

Governor of Middle Congo.—Paul Le Layec.

Governor of Gabun.—Pierre Pélieu.

Governor of Ubangi Shari.—Ignace Colombani.

Governor of Chad.—Henri de Mauduit.

MADAGASCAR AND DEPENDENCIES.

Madagascar was originally discovered by the Portuguese, Diego Diaz, in 1500. On the return of Diaz to Portugal the King concluded that the

island must be Madagascar, about which he had read in Marco Polo's 'Voyages.' Polo, however, had not been there, but believing his Arab informants, ascribed to an island what was really the kingdom of Mogadisho, on the east coast of Africa. Mispronouncing and mis-spelling the name, he coined the word Madagascar, by which name it has been known ever since.

The last native sovereign of Madagascar, Queen Ràvalona III (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882–84 against the Hovas, who refused to recognize the cession. In 1885 peace was made, Diégo-Suarez having been surrendered to France. By the agreement of 5 Aug., 1890, the protectorate of France over Madagascar was recognized by Great Britain; but the native government having refused to carry out the clauses of the treaty of 1885, a French expedition was dispatched in May, 1895, to enforce the claims of France, and on 1 Oct., a treaty was signed whereby the Queen accepted the protectorate. By a law promulgated 6 Aug., 1896, the island and its dependencies were declared a French colony.

Government.

High Commissioner.—Robert Bargues.

By decree of 9 Nov., 1946, the administration of Madagascar was reorganized as follows:—The territory is administered by a High Commissioner and is divided into the 5 provinces of Fianarantsoa, Majunga, Tamatave, Tuléar and Tananarive. The High Commissioner is assisted by a government council composed of the chiefs of the civil and military services and the presidents of the representative and provincial assemblies; a representative assembly of European and Madagascan members elected by the provincial assemblies; and a secretary-general.

Each province is under a provincial administrator-in-chief, who is appointed by the governor-general and assisted by an elected provincial assembly of European and Madagascan members.

The general and the provincial budgets are passed by the Representative and Provincial Assemblies respectively.

The provinces are subdivided into districts (under Colonial Administrators), *gouvernements* and *cantons* (both under Madagascan administrators); in certain cases, several districts are grouped together under an administrator.

In 1896, Diégo-Suarez (a French colony since 1885) and the islands of Nossi-Bé on the west coast (130 square miles) and Sainte-Marie on the east coast (64 square miles), and in 1914 the Comoro archipelago were placed under the authority of the governor-general of Madagascar.

The other dependencies surrounding Madagascar are the islands: Europa, Juan de Nova, Barren, Bassas da India, Glorieuses. Then half-way between Cape of Good Hope and Australia lie Amsterdam and St. Paul, also the archipelago of Kerguélen, whaling and fishing stations, and near the Antarctic pole Crozet islands and Terre Adélie. Amsterdam, St. Paul, Kerguelen (6,232 square km.), Crozet (476 square km.) and Terre Adélie were made dependencies of Madagascar by decrees of 26 March and 27 Nov., 1924.

The territories and islands in the Antarctic, situated to the south of the 60th parallel south latitude and between the 136th and 142nd meridian longitude east of Greenwich, styled 'Terre Adélie,' with an estimated area of 400,000 square km., were formally placed under French sovereignty by Presidential decree of 1 April, 1938.

M[illegible] is represented in the National Assembly by 2 deputies, in the [illegible], the Republic by 5 senators, and in the Assembly of the French Union by 6 deputies.

Area and Population.

Madagascar is situated off the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles, and it has a coast line of over 3,000 miles. The area is estimated at 589,900 square km. In 1950 the population (including that of the Mayotte and Comoro islands) was 4,350,700, of whom 44,517 were French and 19,912 other Europeans.

Vital statistics, 1950:—Births, 1,749 French, 763 foreigners, 110,600 natives; marriages, 786 French and foreigners; deaths, 594 French, 303 foreigners, 72,400 natives.

The M[illegible] or tribes are very numerous, the more important being the [illegible] the Betsimisáraka (638,800), the Bétsiléo (530,000), the Tsimihety (300,000), the Sakalava (278,600), the Antaisaka (266,600) and the Antandroy (257,000). Hindus, Chinese, Arabs and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova or Merina, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on 27 Sept., 1896. The system of forced labour in the public service was abolished on 1 Jan., 1901.

The populations of the chief towns were, in 1950, the capital, Tananarive, 174,153 (17,427 French, 2,677 [illegible] e, 28,747 (3,922 French, 1,757 foreigners); Majunga, [illegible], 18,210; Diégo-Suarez, 23,865; Marovoay, 12,215; Tuléar, 18,509; Antsirabe, 14,616; Antalaha, 10,291. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo-Suarez in the north and Tuléar in the south-west.

Religion and Education.

Since 1895, a large portion of the Hova and of the other tribes in the central districts have been Christianized. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission and the Anglican Mission); there is also a Norwegian Lutheran Mission and an American Mission. There are in the colony 4,080 Roman Catholic churches, 3,586 Protestant churches and 75 mosques. The outlying tribes are still mostly heathen.

Education is compulsory from 6 to 14 years of age in the primary schools for European children and from 8 to 14 years of age in native first-grade schools for native children. Instruction is given in secondary schools (Europeans and natives) and in higher grade schools (natives). In 1950, there were 1,313 public schools (128,062 pupils) and 631 private schools (70,191 pupils). At Tananarive there are schools of medicine, law and administration, including a special section for training natives for the various public services, and a school for applied arts. There are also 3 agricultural schools, at Nanisana, Ambatondrazaka and Ivoloina near Tamatave. There are 311 French teachers at 2 *lycées*, 1 technical college in Tananarive and several European schools; all these schools are open to Malagassans.

There were, in 1950, 36 cinemas with a seating capacity of 11,850.

Justice.

For the administration of French justice there are a court of appeal, 4 courts of first instance in the principal towns, and 5 justices of the peace with special powers at Fianarantsoa, Tuléar, Mananjary, Nossi-Bé and Mayotte, and 17 ordinary justices of the peace in the principal centres of the colony. For native justice there are tribunals in the districts, and the natives have the right of appeal from lower to higher tribunals. Native jurisdiction, however, has been abolished for criminal cases. There are also arbitration courts for settling labour disputes.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets and miscellaneous sources. The chief branches of expenditure are general administration, public works, health services, education, the post office and the public debt. The general budget for 1950 balanced at 4,714,863,000 francs. The provincial budgets for 1950 amounted to 2,944,550,000 francs. Expenditure, 1950–51, on economic, social and scientific development, 1,936,700,000 francs C.F.A.

Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 3,000 Europeans and 6,000 natives. The police and gendarmerie consist of 400 Europeans and 6,000 natives.

Part of the French naval forces in the Indian Ocean are based on Madagascar, Diégo-Suarez being the principal base.

There is an air force station at Ivato, 15 kilometres from Tananarive.

Production and Industry.

In 1896, on the completion of the French occupation of the island, the Malagasy system of land tenure was modified on the model of the Torrens Act of Australia. Since then, a decree issued in 1926, specifies that the French State is presumed to be the owner of any land not under cultivation, exploited nor put under registration. And in 1929 there was issued a new regulation concerning the native property and providing reserved zones for the local communities. The principal agricultural products in 1950 were (in thousands of metric tons):—Cassava (green), 897; rice, 750; maize, 61; potatoes, 56; coffee, 24·6; haricot beans, 14·5; French beans, 13·5; sugar, 13·5; tapioca, 9; peanuts, 8; sisal, 4·3; castor oil, 3·1; tobacco, 2·5; raffia, 2·5. The forests contain many valuable woods, while rubber, gum, resins and plants for tanning, dyeing and medicinal purposes abound.

Cattle breeding and agriculture are the chief occupations of the natives. There were in 1950, 5,633,000 cattle, 420,000 pigs, 243,000 sheep and 266,000 goats.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, etc., is being undertaken by Europeans, as well as the canning of meat. There are large meat-preserving factories at Boanamary (Majunga), Diégo-Suarez, Tamatave, Tananarive and Antsirabe.

The value of the total output of minerals in 1950 was 427,272,000 francs, graphite accounting for 199·8 million francs and mica for 182·1 million francs. The export of graphite was 8,438 metric tons in 1948; of these 2,011 went to France, 3,038 to the United Kingdom, and 2,804 to the

United States. The exports of precious stones in 1947 totalled 104·3 tons. Madagascar also produces gold (36,1 kg. in 1950), rock-crystal (16,4 kg. in 1950), agate and corundum (8,961 kg. in 1947). Mica exports in 1949 totalled 807 tons.

Commerce.

Trade in 1,000 metric tons and million francs:—

	1948		1949		1950 (Jan.–Sept.)	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports . .	249 793	8,941 9	242,735	11,789 4	231,200	11,835
Exports . .	142 317	6,121 5	137,663	7,369 5	142,000	7,607

In 1948, metropolitan France supplied 65·5% of the imports, France Overseas, 9·8%; U.S.A., 9·3%; U.K., 1·6%; metropolitan France received 70·2% of the exports, France Overseas, 22·4%; U.S.A., 3·2%; U.K., 1·7%. The most valuable exports in 1949 were vanilla (585 metric tons), coffee (25,625 metric tons) and frozen, salted and tinned meat (12,405 metric tons).

M[illegible]'s imports and exports of textiles and related products in 1[illegible] tons (value in million francs) were as follows. Imports:—Petrol and petrol products, 42,366 (736·6); empty jute bags, 2,257 (145·3); cotton cloth, 4,655 (2,258); silk and rayon cloth, 203 (223); clothes, 337 (224·2); machinery 5,990 (1,117·4); metal ware, 22,677 (629·8); cars (number), 1,688 (544·4). Exports:—Coffee, 25,625 (1,713); tinned meat, 7,329 (928·4); hides (cattle), 5,709 (481·3), (crocodile), 487 (266 3); vanilla 784 (463·3); cloves, 9,588 (394·4). Metropolitan France furnished 74·5% of the imports, France Overseas, 76%; U.S.A., 6·9%; U.K., 0·9%; metropolitan France took 80·5% of the exports, France Overseas, 1·1%; U.S.A., 3·1%; U.K., 0·2%.

According to Board of Trade returns, the imports from Madagascar into U.K. in 1950 amounted to £565,564; 1949, £239,815; 1948, £202,941, and the exports from U.K. amounted to £248,211 in 1950, £190,605 in 1949 and £301,731 in 1948. Re-exports from U.K. in 1948, £3,468; 1949, nil; 1950, £2,359.

Shipping and Communications.

Tamatave, Majunga and Diégo-Suarez are the principal ports. In 1948, 5,590 vessels entered, loading 245,000 metric tons and unloading 440,000 metric tons of cargo.

At the end of 1947, there were about 16,000 miles of roads suitable for motor traffic of which 6,000 miles are practicable all the year round. Four railways are at present worked in Madagascar, namely: between Tananarive and Tamatave (229 miles); between Tananarive and Antsirabe (noted for its thermal springs), 99 miles; the branch line of the Tamatave railway, from Moramanga to Lake Alaotra (105 miles), and the line from Fianarantsoa to the east coast (101 miles). There is also a motor-car service with a network of routes covering more than 1,375 miles.

An airline connects Tananarive with Paris (via Tunis, Khartum, Nairobi, Dar es Salam, Réunion and Mauritius); another with Lourenço Marques. Numerous services connect the capital with the ports and the chief inland towns. The main airfields are at Arivonimamo, Tamatave, Tuléar and Majunga.

There were in 1950, 193 post offices; 2 of them are situated in the Antarctic (Terre Adélie and St. Paul Amsterdam). The telegraph line has a length of 16,718 km. There is a cable communication to Mauritius, Réunion and Aden. In 1950 there were 16,132 km. of telephone line, 5,009 telephones and 37 wireless telegraph stations. The wireless station at T part of the French inter-colonial network of wireless stations, was opened towards the end of 1924.

Money and Banks.

By the decree of 22 Dec., 1925, a bank of issue was established—the Banque de Madagascar et des Comores, with (1950) a capital of 111,000,000 francs. It has a branch at Tananarive and agencies at Diégo-Suarez, Fianarantsoa, Fort Dauphin, Majunga, Manakara, Moroni, Mananjary, Nossi-Bé, Tamatave and Tuléar. The Comptoir National d'Escompte de Paris has a branch at Tananarive, and agencies at Tamatave, Majunga, Fianarantsoa, Morombe, Manakara, Morondava, Diégo-Suarez, Mananjary and Tuléar. The Crédit Foncier de Madagascar has 11 agencies in the island. On 1 Jan., 1920, a savings bank was established.

The monetary system is the same as that of France. The Madagascan franc (franc C.F.A.) = 2 metropolitan francs (from 18 Oct., 1948).

THE COMORO ARCHIPELAGO.

The archipelago of the Comoro Islands consists of the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, only Mayotte was a colony, but by a law of 25 July, 1912, the 3 other islands, hitherto protectorates, were also declared colonies. By a decree of 23 Feb., 1914, the whole archipelago was attached to the general government of Madagascar. As from 1 Jan., 1947, the archipelago has been given administrative and financial autonomy. The Superior-Administrator is assisted by a nominated privy council and an elected general council of 24 members.

The Comoro Archipelago is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each.

Area, about 650 square miles (2,171 sq. km.). In 1950, the population was 168,890, mainly Moslems; capital, Dzaoudzi (Mayotte).

The island of Mayotte (140 square miles) had a population (1950) of 19,013. The chief product was formerly sugar cane, but there are now only 2 sugar works and 2 distilleries for rum. Besides vanilla and sugar cane, cacao, sisal, aloes and perfume plants (citronella, ylang-ylang, patchouli, etc.) are cultivated.

Vanilla (export, in 1949, 163 metric tons), sisal (1,946 tons), copra (4,913 tons) and perfume plants are cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The budget for 1950 balanced at 107,118,000 francs.

Administrator-Superior.—Pierre Coudert.

FRENCH SOMALILAND.

(CÔTE FRANÇAISE DES SOMALIS.)

The colony of the Somali Coast is situated in the Gulf of Aden between British Somaliland and what was formerly Italian East Africa. The frontier starts from Loyada, on the coast, 23 kilometres east of Djibouti. It then passes by Djalelo, the Daguen Mountains, crosses the Addis Ababa railway at Kilometre 112, 6 to the south of the Daouenlé station, rejoins the Airoli Mountains, which on the south enclose the Gobad Plain, passes Lake Abbé, Lake Alli, the Damoli Wells, the peaks of Agheno and Daddato and terminates at Cape Doumeirah, opposite Perim, on the Straits of Bab el Mandeb. It is administered by a governor, assisted by a privy council and (since 9 Nov., 1945) a representative council which is composed of 25 elected members (law of 10 Aug., 1950). Somaliland is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each.

In 1888 a port was created at Djibouti, the seat of government since 1892.

The territory has an area of 23,500 square kilometres (9,071 square miles), and the native population was estimated at the census of 1949, at 48,210, of whom there were :—Somalis, 3,073; Arabs, 2,736; Danakils, 28,511; Issas, 13,890; Europeans, 2,034. Djibouti has (1949) 17,000 inhabitants.

There are 11 schools with 876 pupils and 17 (French) teachers. The local budget for 1950 balanced at 830,307,000 francs. Salt production is the only industry in the country; in 1949, 78,893 metric tons were exported; other minerals supposed to exist are gypsum, mica, amethyst, sulphur and petrol. The chief imports are cotton yarns and cotton goods, cattle, coal, sugar; the chief exports are hides and salt. Part of the traffic between Ethiopia and the outer world passes through Djibouti, utilizing the railway from Djibouti to Addis Ababa (496 miles).

The medical services include a hospital (300 beds), 4 dispensaries and 4 infirmaries.

Trade with the United Kingdom (Board of Trade figures):—Exports to the U[illegible] K[illegible], 1950, £93,998; 1949, £60,045; 1948, £2,831: imports from [illegible] K[illegible] 1950, £312,202; 1949, £99,598; 1948, £147,804; re-exports from the United Kingdom, 1950, £610; 1949, £74; 1948, £21.

In 1949, there entered at Djibouti, 1,550 merchant vessels. Of these vessels, 938 were sailing boats (260 English, 18 French) and 612 steamers (95 English, 190 French).

A new currency, the Djibuti franc, was introduced on 20 March, 1949. Defined in terms of gold, 100 Djibuti francs equal 0·414507 gramme of fine metal. The Djibuti franc is convertible into United States dollars at a fixed parity of 214·392 Djibuti francs for $1 U.S. The currency is covered 100% by a United States dollar fund. The Djibuti franc equals 1·63 metropolitan francs.

Governor.—Numa Sadoul.

FRENCH SETTLEMENTS IN INDIA.

(ÉTABLISSEMENTS FRANÇAIS DE L'INDE.)

Commissioner of the Republic.—Charles Chambon.

The chief French settlement in India is Pondichéry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; re-took it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814 and 1815, the French possessions in India consisted of 5 separate settlements, which covered an aggregate of 50,803 hectares (about 196 square miles), and had in 1948 the following population:—

Pondichéry . .	59,853	Karikal . .	23,008	*Chandernagor* .	44,786
Oulgareth . .	35,311	Tirnoular . .	14,632	*Mahé* . .	18,293
Villenour . .	27,991	Grand 'Aldée .	9,477	*Yanaon* . .	5,853
Tirbouvané .	23,232	Cotchéry . .	8,297		
Modéliarpeth .	22,396	Neravy . .	8,126	Total .	362,045
Bahour . .	20,591	Nédounkadou .	7,001		
Ariancoupom .	18,793				
Nettapacom .	14,423	*Karikal* . .	70,541		
Pondichéry	222,572				

At a referendum held on 19 June, 1949, [illegible] voted for union with India (7,473 votes to 114); the *de facto* transfer of authority from France took place on 2 May, 1950. The treaty of cession was signed in Paris on 2 Feb., 1951.

The settlements now consist of 4 *villes libres*, 2 of which are divided into 14 communes, having municipal institutions. There is also an elected representative assembly. The Commissioner of the Republic resides at Pondichéry. He is assisted by a government council of 6 members. In the settlements the birth rate in 1946 was 0·11% for Europeans and mixed, and 5·20% for Indians; and the death rate 0·05% for Europeans and mixed, and 7·58 for Indians. There were in 1950, 68 public primary schools (11,400 pupils), 60 private primary schools (4,500 pupils), 9 public secondary schools (574 pupils) and 5 private secondary schools (320 pupils).

Local revenue (budget 1950) was 8,676,900 rupees and expenditure 8,496,048 rupees. The principal crops are paddy, rice, manioc, groundnuts. On 31 Dec., 1946, there were 43,788 cattle, 23,099 sheep and 15,394 goats. There are at Pondichéry 3 cotton mills, and at Chandernagor 1 jute mill; the cotton mills have, in all, 2,631 looms and 84,332 spindles, employing 7,362 persons. There are also at work a few oil presses for groundnuts, and 1 ice factory. Two bone mills have also recently been established in Pondichéry. At the ports of Pondichéry and Karikal, in 1946, the imports amounted to 80,343,000 francs, and the exports to 7,748,000 francs. At these ports in 1946, 41 vessels entered and cleared. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal. The Banque de l'Indochine has a branch in Pondichéry.

United Kingdom exports to French India were £73,874 in 1948, £172,824 in 1949, £370,120 in 1950. French Indian exports to United Kingdom were £1,537 in 1950; nil in 1949 and 1948.

By a treaty concluded on 28 Jan., 1941, the French settlements in India were united with British India in a customs union. This union was denounced by the Dominion of India in 1948 and came to an end in 1949.

British Consul-General.—Lieut.-Col. Marsland.
Indian Consul-General.—Rashid Ali Baig.

NEW CALEDONIA AND DEPENDENCIES.

New Caledonia is administered by a governor, assisted by a privy council of two chiefs of services and four notables appointed by the governor. The colony has also an elected council-general of 19 members Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions.

The territory is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each.

The island is situated between the 20° 1′ and 22° 26′ parallels south latitude, and 161° 30′ and 164° 40′ east longitude. It has a total length exceeding 248 miles and an average breadth of 31 miles. Area, 8,548 square miles. In 1947, the population was estimated at 61,250, including 18,510 Europeans (mostly French), 30,034 native Melanesians and 12,706 immigrants (4,065 Tonkinese and 8,641 Javanese). Nouméa had (1946) 10,466 inhabitants. In 1950, there were 91 public primary schools (4,857 pupils), 72 private primary schools (4,675 pupils), 2 public secondary schools (344 pupils) and 6 private secondary schools (164 pupils).

Local budget for 1950 balanced at 350,855,000 francs ($1·00 U.S. = 63 francs C.F.P.). Of the total area one-third is not cultivable; about 1,600

square miles are pasture land; about the same area is cultivated or cultivable, and about 500 square miles contain forest, some of which is being worked. The land is divided into 2 domains: that of the French state and that of the territory. Parts of the state's domain have been instituted as native reserves; gratuitous concessions may be made in other parts. The chief agricultural products are coffee, copra, manioc (cassava), maize, bananas and . . . . There are 91,089 cattle, 2,300 sheep, 5,449 goats, 8,435 horse . . . 11,212 pigs. The mineral resources are very great; nickel, chrome and iron abound; silver, gold, cobalt, lead and copper have been mined at different times; manganese is being mined now. The nickel deposits are of special value, being without arsenic. Production in 1948:—Nickel ore, 96,415 tons; chrome ore, of very high grade, 75,021 tons. About 277,968 hectares of mining land are owned, and 65,288 hectares have been granted for prospecting. In 1948, the blast furnaces produced 2,208 tons matte of nickel, and the electric furnaces produced 4,407 tons of ferro-nickel. Local industries are developing; there are a chlorine and oxygen plant, meat-preserving works, barking mills for coffee and cotton and 1 blast and 4 electric furnaces melting nickel ore. A hydro-electric factory was established in 1926.

Trade in 1,000 metric tons and million francs [1]:—

Imports . .	82·9	539·7	76·1	554·1	165·5	711·3
Exports . .	53·1	195·8	89·0	328·0	119·5	426·1

[1] The 'franc du Pacifique' equals 5·50 metropolitan francs

Chief imports in 1949 were:—Coal, 127,556 tons; petrol, 10,299 tons. Chief exports:—Chrome, 102,914 tons; nickel, 5,886 tons; copra, 1,856 tons.

In 1948, 93 vessels with 184,431 tons of goods entered Nouméa, and 89 cleared with 94,196 tons. Nouméa is connected with Sydney, San Francisco and France by regular steamers and by air (Pan American Airways, Quantas Empire Airways; Transocéanic; Transports Aériens du Pacifique Sud, Trapas). There is a regular service by steamer along the coast. There are numerous motor services for mail and passengers. There are about 700 miles of good roads and 5,000 miles of telegraph and telephone lines.

Dependencies of New Caledonia are:—

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 570.

2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square miles and 4,243 inhabitants. The islands were placed under the French protectorate in 1842. There is a French Resident, and the ar[illegible] in regular communication with Nouméa *via* Port Vila. Bud[illegible] 1949, 800,000 francs.

3. Futuna and Alofi, south of the Wallis Islands, with about 2,000 inhabitants, were placed under French protectorate in 1842.

4. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou and Uvéa, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra.

5. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.

6. The Bélep Archipelago ,about 7 miles north-east of New Caledonia.

7. Chesterfield Islands are on the 20° parallel, south, about 342 miles west of the northern headland of New Caledonia.

8. Walpoole lies south-east of Maré (Loyalty Islands) and east of the Isle of Pines, about 93 miles from each of these islands.

High Commissioner of the Republic in the Pacific and the New Hebrides.—Pierre Cournarie.

FRENCH SETTLEMENTS IN OCEANIA.

(ÉTABLISSEMENTS FRANÇAIS DE L'OCÉANIE.)

Governor.—R. Petitbon.

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with a privy council and a representative assembly of 20 members elected every 5 years. They are represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and (census, 9 June, 1946) 24,820 inhabitants, the latter with an area of 50 square miles and 2,838 inhabitants. The principal products are phosphate (production in 1948, 187,000 metric tons) and copra (20,502 metric tons). Other groups are the **Marquezas Islands**, with a total area of 480 square miles and 2,988 inhabitants, the two largest islands being Nukahiva and Hivaoa; the **Tuámotu group**, [illegible] parallel ranges of islands from King Geroge's Island on the [illegible] Island on the south, their total population being 5,127; the **Leeward Islands** (Iles sous le Vent) (12,445 inhabitants), of which the more important are Huahiné Raiatéa and Tahaa and Bora-Bora-Maupiti; the **Gambier, Austral and Rapa Islands**; the Gambier group (of which Mangareva is the principal) having 6 square miles of area and 1,569 inhabitants; the Austral (or southern) Islands, of which Rurutu is the largest, Tubuai, Raivavae (or Vavitu), Rimatara and, far to the south, Rapa, having together an area of 115 square miles and 3,921 inhabitants; Makatea, 1,826 inhabitants; Island of Maiao, 200 inhabitants. The total area of the establishments is estimated at 1,520 square miles, and their population, according to the census of 9 June, 1946, was 55,734. There were 48,370 French, 6,390 Chinese, 503 English, 181 Indo-Chinese, 104 Americans, 40 Czech, 22 Japanese, 15 Germans, 9 Dutch and 100 floating population. Budget for 1950 balanced at 205,163,000 francs Pacifique.

Trade in 1,000 metric tons and million francs [1] :—

	1947		1948		1949	
	Quantity	Value	Quantity	Value	Quantity	Value
Imports . .	36·9	368·9	34·25	411·48	39·6	590·3
Exports . .	232·3	431·6	204 67	443·25	266·3	472·3

[1] The 'franc du Pacifique' equalled 5·31 metropolitan francs up to 18 Sept., 1949, and 5·50 metropolitan francs from 19 Sept., 1949.

United Kingdom exports to French Oceania were £11,247 in 1948, £23,472 in 1949, £69,330 in 1950.

The most important of the islands is **Tahiti**, whose chief town is Papeete with 12,428 inhabitants (1946 census), of whom about 8,000 are French. There were, in 1950, 82 public primary schools (8,186 pupils), 9 private primary schools (2,522 pupils), 1 public secondary school (111 pupils) and 3 private secondary schools (172 pupils).

Pearls and mother-o'-pearl are important products. The island is mountainous and picturesque with a fertile coastland bearing coconut, banana and orange trees, sugar cane, vanilla and other tropical fruits, besides vegetables grown in temperate climates. The chief industries are the preparation of copra, sugar and rum. The chief imports are tissues, wheat, flour, metalwork. The chief exports (1949) were copra (25,123 tons), vanilla (294 tons) and phosphates (239,532 tons). The New Zealand company (with a French subvention) has a service connecting San Francisco, New Zealand and Australia with Papeete. In 1948, direct passage to and from New York was established.

The shipping between the islands is carried on by sailing and motor boats. In 1948, 75 overseas vessels with a total tonnage of 205,833 entered the ports, unloading 37,823 tons of merchandise.

A French air service connects Papeete with Nouméa (New Caledonia) once a month, with connexion, by Air France, to Saigon and Paris.

ST. PIERRE AND MIQUELON.

The Territory consists of a group of 8 small islands off the south coast of Newfoundland. Area of St. Pierre group, 10 square miles; population (1 May, 1945) 3,804; area of Miquelon group, 83 square miles; population, 550; total area, 93 square miles; total population, 4,354. Vital statistics (1950):—Births, 129; marriages, 26; divorces, nil; deaths, 51.

The governor (Gouverneur, Chef du Territoire des Iles Saint-Pierre et Miquelon) is assisted by a privy council consisting of the service chiefs and 2 members appointed by the Minister of the Overseas Territories. A general council of 14 elected members was set up by decree of 25 Oct., 1946. Chief town, St. Pierre, is also the seat of the court of appeal and the see of the Apostolic Prefecture. Primary instruction is free. There are 4 public schools with 24 teachers and 3 private schools (Roman Catholic); children of school age numbered 1,145 in 1950.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing. The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried (2,583 tons in 1949) and fresh

(4,767 tons in 1949), and fish products. Silver fox breeding has successfully been taken up in recent years; production in 1950, 805 pelts, valued at 2,805,000 francs.

United Kingdom exports to St. Pierre and Miquelon, 1950, £9,528; 1949, £3,120; 1948, £107; 1947, £1,310.

St. Pierre is in regular steam communication with North Sydney and Halifax, and is connected by telegraph cable with Europe and the American continent. The Canadian company, Maritime Central Airways, runs an air service between St. Pierre and Sydney, N.S. The local budget for 1950 balanced at 188,700,600 francs.

The Territory is represented in the National Assembly, the Council of the Republic and the Assembly of the French Union by 1 deputy each.

TERRITORIES UNDER TRUSTEESHIP.

Togo.—Togo lies between the Gold Coast Colony on the west and French Dahomey on the east. It was surrendered unconditionally by the Germans to British and French forces in Aug., 1914, and is now divided between the French and British. The mandate, approved by the League of Nations on 20 July, 1922, was transformed into a territory under trusteeship on 14 Dec., 1946, when the United Nations sanctioned the French agreement. Of the total area of 33,700 square miles, the French have obtained 21,893 square miles, the boundary running from the north-east in a generally south-east and south direction to Lomé, in such a manner that no part of the coast is included in the British sphere. Lomé (population on 1 Jan., 1948, 29,300 natives and 763 Europeans) is the seat of the administration. The total population of the whole of Togo on 1 Jan., 1949, was 970,983 natives and 841 Europeans.

Chief of the administration is the Commissioner of the Republic. He is assisted by an advisory Privy Council and an elected Representative Local Assembly, the latter being especially concerned with the budget.

The southern half of Togoland is peopled by natives using several different languages, of which the principal are Ewe and Mina—these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking a fairly large number of different languages, of which Dagomba and Tim are the most important. The majority of the natives are

pagans, but many profess Mohammedanism, while Christianity has, latterly, been making some progress in the coast districts. By 1948, 104,844 natives had adopted the Roman Catholic faith and about 29,000 the Protestant faith.

In 1949, there were 216 primary and 4 secondary government classes, with 11,709 and 222 pupils respectively, and 267 teachers. There are also 212 primary and 5 secondary Catholic classes (10,365 and 57 pupils; 218 teachers) and 56 primary and 1 secondary Protestant classes (2,527 and 47 pupils; 59 teachers).

Inland the country is hilly, rising to 3,600 feet, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with arable land. Maize, yams, cassada, plantains, groundnuts, etc., are cultivated by the natives; oil palms and dye-woods grow in the forests; but the main commerce is the barter trade for palm-oil, palm-kernels, cocoa, rubber and copra carried on with the European factories. There are considerable plantations of oil and cocoa palms, coffee, cacao, kola and cassada. During recent years the natives have been increasingly engaged in the cultivation of cocoa and cotton. Products in 1947 were (in metric tons):—Cocoa, 2,704; cotton, 1,791; coffee, 2,448; maize, 39; palm-kernels, 2,859; palm-oil, 751; groundnuts, 2,008; karité (shea), 2,041; kapok, 395; tapioca, 2,821; copra, 1,781. Native industries are weaving, pottery, smith-work, straw-plaiting, wood-cutting, etc. There is no mining by Europeans, but the natives in the Sokodé and Klouto districts smelt iron, in which this territory is very rich. The principal exports (1949) were:—Palm-kernels, 5,026 tons; cocoa, 1,864 tons; coffee, 2,029 tons; groundnuts, 3,097 tons; copra, 3,017 tons.

Livestock (1 Jan., 1948):—Cattle, 75,000; sheep, 151,000; swine, 104,000; horses, 1,686; asses, 2,675; goats, 105,000.

	1947		1948		1949	
	Metric tons	Million francs	Metric tons	Million francs	Metric tons	Million francs
Imports .	22,499	959·8	25,255	821·2	38,131	1,451·4
Exports .	31,619	610·7	39,315	1,168·4	27,322	844·7

The local budget for 1949 balanced at 591,350,000 francs C.F.A., and the railway and wharf [illegible] 178,095,000 francs C.F.A. (estimates for 1950, 866,051,800 and [illegible] francs C.F.A. respectively).

There were, in 1948, 4,473 km. of roads, connecting the more important centres of the territory. There are 3 railways connecting Lomé with Anecho (Little Popo) (27 miles), with Palime (72 miles) and with Blitta (143 miles *via* Atakpamá, 103 miles); total, 266 miles, with 5 stations and sub-stations. There were (1948) 9 post offices and 9 postal agencies. Togo is connected by telegraph and telephone with the Gold Coast, Dahomey and Europe. Lomé has a radio telegraphic station.

The port of Lomé has a wharf with a capacity of 600 tons of traffic daily. In 1947, 113 vessels cleared at Lomé.

The territory is represented in the National Assembly by 1 deputy, in the Council of the Republic by 2 senators and in the Assembly of the French Union by 1 delegate.

Commissioner.—Yves Digo.

Cameroon.—The former German colony of Kamerun was occupied by French and British troops in 1916. The greater portion of the territory has

been placed under French administration, and a strip on the southern and northern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. Native population in 1950 was 2,997,164; Europeans, 8,998, of whom 7,536 were French. The portion of Cameroon placed under French mandate by the Treaty of Versailles has, by decrees of 23 March, 1921, and 21 Feb., 1925, been constituted an autonomous territory both administratively and financially. The High Commissioner is assisted by an elected representative assembly. The seat of government is Yaoundé (population, 1946, 50,000). The budget for 1950 balanced at 3,125,472,000 francs C.F.A.

Livestock (1950).—1,240,000 cattle, 14,620 horses, 34,500 asses, 70,000 pigs, 370,000 sheep.

Education (1950).—181 public primary schools had 478 teachers and 21,332 pupils; 1,071 private primary schools had 2,369 teachers and 92,825 pupils; 6 public secondary schools had 45 teachers and 1,254 pupils; 3 private secondary schools had 40 teachers and 561 pupils.

Imports .	77	2,197	151·7	4,888·1	212·0	8,776·1
Exports .	132·4	1,631	206·8	4,282·8	296·8	6,661·0

The principal exports (1949) were:—Cocoa, 51,256 tons; palm-kernels, 31,973 tons; timber, 59,846 tons; coffee, 8,076 tons; palm-oil, 6,695 tons; rubber, 2,246 tons; bananas, 34,884 tons.

In 1946, 314 vessels entered and cleared at the ports of Douala and Kribi. The country has 3,105 miles of roads and 314 miles of railway.

There is a chamber of commerce at Douala.

The territory is represented in the National Assembly by 3 deputies, in the Council of the Republic by 3 senators and in the Assembly of the French Union by 3 councillors.

High Commissioner.—André Soucadoux.

Books of Reference on Togoland and the Cameroons.

STATISTICAL INFORMATION.—The Service de la Statistique Générale, at Douala, set up in 1945, publishes a monthly Bulletin (from Nov., 1950), *Chief* - Pierre Simonet

Bulletin mensuel . . . Supplément No. 12: Le Togo et Cameroun, 1938-45. Paris.

ANGLO-FRENCH CONDOMINIUM.

NEW HEBRIDES.

The **New Hebrides**, in accordance with the Anglo-French convention of Feb. (ratified in Oct.), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. A second protocol of 1914, ratified by France and England on 18 March, 1922, [illegible] British, French and native interests. There are French and [illegible] courts, and a mixed court with a judge foreign to both nations.

French local budget for 1950, 14,486,000 francs. Maize, coffee, cotton, cocoa, vanilla and coconuts are grown, and are the chief articles of export. In some places sulphur is abundant.

(*See also* p. 530.)

FRENCH ASSOCIATED STATES AND PROTECTORATES.

ACCORDING to Article 60 of the French constitution of 1946 the Associated States form an integral part of the French Union. Article 61 states that their position within the Union 'is settled for each of them by the act which defines their relations with France.' The associated states 'can designate delegates to the Assembly of the Union within the limits and conditions defined by a law and an internal act of each state' (Art. 68).

I. Associated States.
1. Viet-Nam.
2. The Kingdom of Cambodia.
3. The Kingdom of Laos.

II. Protectorates.
1. Morocco.
2. Tunisia.

INDO-CHINA.

(INDOCHINE.)

Government, Area and Population.—Indo-China has an area of about 286,000 square miles and a population of 27,030,000, including 43,000 French and 600,000 other foreigners (estimate, 1949)

Until 1946, it consisted of 5 states, the colony of Cochin-China and the protectorates of Annam, Cambodia, Tonking and Laos. It now (1950) consists of the 3 Associated States of Viet-Nam, Cambodia and Laos.

On 9 March, 1945, the Japanese evicted the French authorities and proclaimed the 'independence' of Indo-China. In Aug., 1945, they allowed the revolutionary Viet Minh movement to seize power, dethrone Bao Dai, the Emperor of Annam, and establish a republic, known as Viet-Nam, including Tonking, Annam and Cochin-China, with Hanoi as capital. In Sept., 1945, the French re-established themselves in Cochin-China and on 6 March, 1946, an agreement was signed between the French Commissioner and President Ho Chi Minh, but on 19 Dec., 1946, the Viet Minh reopened hostilities. An [illegible] signed by the Emperor Bao Dai on behalf of Viet-Nam on 8 [illegible], 1949, recognized the independence of Viet-Nam within the French Union. The new State has been recognized by the United [illegible] the United States and most other members of the United Nations [illegible] Chi Minh regime was officially recognized by China (19 Jan., 1950), the Soviet Union (31 Jan., 1950) and the satellite states.

The High Commissioner, who has taken the place of the former Governor-General, represents the French Union. He is assisted by 8 counsellors, nominated by himself. The High Commissioner is represented in each state by a Commissioner of the Republic. The seat of the central government is Saigon.

High Commissioner and Commander-in-Chief.—General Jean de Lattre de Tassigny (appointed 6 Dec., 1950).

Education.—Instruction is given in public and private schools. The system of education for French children is like that of France and French instruction is given in 11 elementary schools (with 1,000 pupils) and in the

8 lycées at Hanoï (2), Saigon (2), Hué, Phnôm-Penh, Dalat and Vientane (with about 6,000 pupils).

Higher French education, in 1949, was provided at the Medical and Pharmaceutical Faculty, founded at Hanoï in 1909, with a branch at Saigon since 1947 (159 students); the Law Faculty at Saigon (1947), with a branch at Hanoï, founded in 1933 and reorganized in 1948 (436 students); the High School of Sciences at Saigon (1948), with a branch at Hanoï, founded in 1942 (108 students); arts courses at Saigon, established in 1948 (50 students); a school of architecture, set up at Hanoï in 1928 and reorganized at Dalat in 1946.

Private schools are of great importance; denominational schools have about 15,000 pupils, Chinese schools about 40,000.

The local authorities administer national education.

There were, in 1949, 63 cinemas with a seating capacity of 26,400.

Justice.—The Associated States have full jurisdiction in all civil, commercial and criminal matters within their territories. Law-suits between citizens of the Associated States and citizens of other members of the French Union or citizens of countries with which France has concluded special legal conventions, are submitted to mixed tribunals.

Finance.—The general budget for the whole of Indo-China was abolished in 1950. The national budgets of the Associated States, however, carry certain expenditures which used to be charged to the general budget, until the common services have been transferred to the States.

The general budget balanced as follows (in 1,000 piastres):—1944, 267,313; 1945, 299,702; 1946, 293,062; 1947, 742,105; 1948, 1,793,707; 1949, 1,891,500.

Defence.—The Associated States have their own national army for the maintenance of internal order and security and for the defence of the country, for which they can also rely upon the forces of the French Union.

Production.—Indo-China is divided into three main economic areas:—(1) The territory tributary to Saigon (Cochin-China, Cambodia, Southern Laos and Annam south of Cape Varella), which, apart from the fisheries on the coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haiphong (Tonking and the three northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Porte d'Annam and Cape Varella), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district; its main exports are cinnamon, sugar, tea, maize and manioc. High mountain ranges in the north provide valuable tropical hardwoods, bamboo, lacs, herbs (chiefly poppy) and essential oils. Fishing is a secondary but important native occupation. Fish forms a major article of diet, while a considerable surplus is exported to [illegible]as. The minerals of Indo-China are coal (output in North [illegible] 376,169 metric tons), zinc (in 1944, 3,087 metric tons), tin (in 1950, 95 metric tons), iron ore (in 1944, 21,975 metric tons). Output of sea-salt in Viet-Nam, 1949, 113,575 metric tons; cement in North Viet-Nam, 1949, 290,929 metric tons.

Commerce.—In 1887, the French possessions in Indo-China, including Annam, Tonking, Cochin-China and Cambodia, were united into a Customs Union. The 3 Associated States continue to form such a Union, under the Pau agreements of 1950.

Chief exports	1948		1949		1950	
	Metric tons	1,000 piastres	Metric tons	1,000 piastres	Metric tons	1,000 piastres
Rice and paddy	232,905	451,708	154,159	304,801	134,427	302,336
Rubber	12,066	309,081	41,535	363,171	52,836	775,558
Fish	4,976	21,734	3,723	11,230	1,874	12,561
Hides	1,103	15,188	766	12,679	947	16,673
Maize	46,784	74,051	29,290	34,562	40,059	55,651
Dried Vegetables	—	—	8,955	18,617	10,462	65,343

The principal imports in 1949 were textiles (Ps. 1,508 million), machinery (Ps. 340 million), metals and metal products (Ps. 365 million), cars and cycles (Ps. 279 million) and petrol (Ps. 50 million).

Total imports in 1950, amounted to Ps. 4,339 million; exports, Ps. 1,523 million.

In 1948 the imports into U.K. from Indo-China amounted to £7,084, and the exports from U.K. to £961,206; re-exports to Indo-China from U.K. were £75. The figures for 1949 were £103,345, £720,730 and £165 respectively; for 1950, £397,468, £664,342, £10,135.

Communications.—There were 5,602 kilometres of metalled roads and 14,453 kilometres of non-metalled roads on 31 Dec., 1942. Of these, 13,914 kilometres are usable by motor vehicles during at least 6 months of the year. Systematic repair work was begun in 1948; at the end of 1949, about 7,000 km. of bitumenized and metalled roads were open to traffic.

The principal railways, in working order in 1949, were :—Phnôm-Penh–Thai frontier (385 km.); Dieutri–Nhatrang (34 km.); Saigon–Nhatrang (515 km.); Hanoi–Haiphong (101 km.); Bendongso–Locninh (69 km.); Govap–Bendongso (49 km.); Tourane–Doughoi (172 km.). Number of passengers in 1949 was 1,333,124.

There were 161 post offices functioning in 1948; length of telephone lines, 30,181 km. (5,925 subscribers in 1949); length of telegraph lines, 5,120 km.

Money and Banking.—By decree of 31 May, 1930, the value of 1 piastre was fixed at 10 francs. This was changed on 27 Dec., 1945, to 17 francs = 1 piastre. On 31 Dec., 1949, the rate of the Indo-Chinese piastre was fixed at 20·51 piastres to the United States $.

The Bank of Indo-China had the monopoly of note-issue in Indo-China until 25 Sept., 1948, when it was transferred to the Institut Indochinois d'émission, on the board of which the Associated States are represented. Notes in circulation, 31 Dec, 1950, 4,755,618,584 piastres.

Diplomatic Representatives.

1. Of Viet-Nam in Great Britain (18 Half Moon St., W.1).

Minister Plenipotentiary.—Dr. Tran Van Don (accredited 8 May, 1951).

Counsellor.—Bui Quan-an.

2. Of Great Britain in Indo-China.

Minister Plenipotentiary and Envoy Extraordinary and Consul-General.—Hubert Ashton Graves, C.M.G., M.C.

Secretaries.—M. G. L. Joy; J. D. Lancaster; D. J. Stopford-Adams; J. L. Taylor.

Military Attachés.—Brig. I. F. Field, C.B.E.; Maj. M. E. F. Bell.
Air Attaché.—Wing-Cdr. N. P. Simmons.
Naval Attachés.—Cmdr. G. A. Tilney; Lt.-Cdr. E. I. Pilditch.

VIET-NAM.

The expression 'Viet-Nam' may be defined, in the geographical sense, as the group of territories where the majority of the population is of Annamite race and speaks the Annamite language.

The extent of these territories has considerably varied throughout the ages, for the Annamite people, which was originally concentrated in Tonkin and in the north of Annam, progressively colonized the Kingdom of Champa (at present Southern Annam, ceded to China, a Chinese province. At the present time, the Annamites mainly inhabit the deltas of the Red River (Lower Tonking) and of the Mekong (Cochin-China), as well as a narrow coastal strip along the Annamite Chain.

From the political point of view, the expression Viet-Nam is applied to-day to the three countries of Tonking, Annam and Cochin-China, now known as North, Central and South Viet-Nam.

A series of conventions, signed on 30 Dec., 1949, governed the transfer of certain services by the French to the Viet-Nam authorities. The remainder were transferred, with certain reservations, by agreements drawn up at Pau and signed on 23 Dec., 1950.

Chief of the State.—Emperor Bao Dai.

Prime Minister.—Tran Van Huu.

The Communist government of the Viet Minh party, under the presidency of Ho Chi Minh, is still entrenched in many parts of the country.

North Viet-Nam (formerly Tonking).

This territory, brought under France's protectorate in 1884, has an area of 115,700 square km. with 10,687 villages and a population in 1943 of 9,931,193, of whom 9,615 were French and 52,518 Chinese. The Chief of State is represented by a governor. The chief town is Hanoi, with a population (Feb., 1949) of 160,000, of whom 6,000 were French and 7,000 Chinese.

In 1949, there were in North Viet-Nam 420 primary national schools, with 33,900 pupils. Secondary education was provided at 2 lycées at Hanoi (1,350 boys, 610 girls) and at 4 secondary schools. There were also private primary schools (11,000 pupils) and 15 private secondary schools (2,650 pupils) at Hanoi.

The chief crop is rice (normal production, 1944, 1,696,000 tons), which is in normal times just sufficient to feed the population; but, owing to the present disturbances, considerable quantities of rice are now imported from the south. Other products are maize (production, 1944, 47,000 tons), arrowroot, sugar cane, coffee, tea (6,500 tons), various fruit trees and tobacco (2,200 tons). A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported. There are rich limestone quarries, calamine and tin-mines and also rich hard coal-beds.

Imports (1950), 120,770 tons; exports, 107,000 tons.

Chief imports in 1948 were tools and machinery, yarn and tissues, beverages, livestock, potatoes, mineral oils and paper. Chief exports, coal (average monthly export in 1939, 148,500 tons; in 1950, 4,877 tons), cement and beans. The principal port is Haiphong, which is visited

regularly by the steamers of French, British and American lines. As the port is silting up, it is planned to build a new port at Along Bay.

The number of vessels entering Haiphong in 1949 was 281, of 548,000 tons.

Commissioner of the French Republic and Commander-in-Chief.—Gen. Salan (appointed Jan., 1951).

Central Viet-Nam (formerly Annam).

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on 6 June, 1884, and ratified at Hué on 23 Feb., 1886, by which a French protectorate was established over Annam. The King, Bao-Dai, born in 1913, succeeded to the throne on 8 Jan., 1926; he abdicated when the Japanese capitulated, but resumed his authority on 1 July, 1949.

A Chamber of popular representatives was established in 1926. The ports of Tourane and Qui-Nhon are open to international commerce. The former French concession at Tourane (like those at Hanoi and Haiphong in North Viet-Nam) were retroceded to Viet-Nam by the agreement of 8 March, 1949.

The capital is Hué. The area is 59,973 square km., with a population in 1943 of 7,183,827, of whom 9,834 were French and 16,119 Chinese. The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts.

There were, in 1948, 263 national primary schools (32,748 pupils), 39 communal schools (1,821 pupils), 2 lycées at Hué (1,166 boys, 460 girls) and a primary high school at Nhatrang. There were also 55 private elementary schools (6,492 pupils) and 2 private secondary schools at Hué (421 pupils).

The Phanrang River has been utilized to irrigate about 6,900 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is the most important product. Others are cotton, maize and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye and medicinal plants. Raw silk is produced. There were about 1,500,000 head of cattle in 1945, and cattle-rearing is of some importance. There is a gold-mine at Bông-Miêu in the province of Quang-nam, worked by a French company. Copper, zinc, coal and iron ore are also found in various districts. In North, Central and South Annam there are salt works. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods and tobacco; chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea and paper. Imports (1950), 3,106 tons; exports, nil. In 1948, 124 French ships of 318,400 tons entered the port of Tourane; no foreign vessels called in 1947 and 1948.

South Viet-Nam (formerly Cochin-China).

Cochin-China was ceded by the King of Annam to France in 1862. It remained a French colony until 1 June, 1946, when an autonomous republic of Cochin-China was created as part of the Indo-Chinese Federation. On 4 June, 1949, the French parliament attached Cochin-China to Viet-Nam, a member state of the French Union, and thereby abolished its colonial status; at the same time the name of the country was changed to South Viet-Nam.

South Viet-Nam is administered by a governor, who is appointed by the Chief of State. Its area is estimated at 26,476 square miles.

In 1948, the population numbered 5,628,472, including 45,440 Europeans (civilians) and 410,200 Chinese, of whom 310,000 lived in the Saigon–Cholon

region. In 1948, the conurbation of Saigon–Cholon had 1,179,000 inhabitants, including 22,000 Europeans.

There were, in 1949, 682 national primary schools (130,600 pupils), 3 lycées at Saigon (2,200 boys, 2,000 girls), 4 high schools (2,200 pupils) and 4 technical schools (210 pupils). 275 private schools had 38,880 pupils. There are also 14 vocational and technical schools with a total of 681 pupils.

The principal produce in 1949 were rice (1,327,000 metric tons), haricots and soya (1,400 metric tons), manioc and batata (31,000 metric tons), sugar cane (198,000 metric tons), betel-nuts (47,200 metric tons), copra (14,000 metric tons), rubber (26,900 metric tons), tobacco (1,790 metric tons), groundnuts (1,300 metric tons).

Livestock (1947):—120,000 cattle, 224,000 buffaloes, 540,000 pigs.

River and coast fishing is carried on. There were, in 1948, 16 rice-mills working in Saigon and Cholon. In these towns are also 8 saw-mills, 18 soap factories, a varnish factory, 10 tyre factories, several rubber factories, several fruit and fruit-juice preserve factories and 5 cigarette factories. Commerce is mostly in the hands of Europeans and Chinese, but about 25,000 Annamites are small traders. Imports (1950), 402,195 metric tons; exports, 259,655 metric tons. The chief exports in 1949 were rice (231,370 tons), maize (29,290 metric tons), dried and salted fish (1,296 metric tons), rubber (41,500 metric tons). During 1950, 650 ships of 1,802,000 tons entered the port of Saigon; of these, 172 (303,900 tons) were British. There are about 5,500 miles of roads, of which nearly 5,000 miles are suitable for all weathers. There are also 3,480 miles of navigable waterways.

At Saigon there are 12 banks or bank-agencies, including the Franco-Chinese Bank, the Indo-China Bank, the Hongkong and Shanghai Bank and the Chartered Bank of India, Australia and China.

Ethnic Minorities.

The highlands of Tonking and South Annam are inhabited by peoples racially different from the Annamites. In Tonking, the region between the delta plain and the Chinese frontier is occupied by the Thai, Tho, Man, Méo, Nung, Nhang and Lolo tribes. The mountains of Southern Annam are peopled by the primitive Moi. These people enjoy a special status and are directly under the Head of the State.

There were, in 1949, 63 elementary schools, with 6,442 pupils, in the North Viet-Nam section; and 343 elementary schools, with 28,700 pupils, in the Central and South Viet-Nam sections.

CAMBODIA.

Cambodia is bounded on the south by Cochin-China, on the east by Annam, on the north by Laos and Thailand, on the west by Thailand and on the south-west by the Gulf of Siam. The French Protectorate was established in 1863. Independence within the French Union was granted on 16 Dec., 1948. Relations between France and Cambodia were provisionally governed by the *modus vivendi* of 7 Jan., 1946. By a treaty, signed at Paris on 8 Nov., 1949, France recognized the kingdom of Cambodia as an independent associated state within the French Union.

The King, Norodom Sihanouk, who succeeded on 26 April, 1941, promulgated a constitution on 6 May, 1947. The sovereign exercises his executive power through a council of ministers who are assisted by French

advisers. The legislative power rests with an elected assembly, which, however, was dissolved by the King in 1949.

Prime Minister.—Prince Monipong.

Commissioner of the French Republic.—De Raymond.

Area, 181,000 square km. In 1948, the population numbered 3,750,000, of whom 4,979 were Europeans, 140,000 Chinese, and 262,000 Indo-Chinese other than Cambodians. In Nov., 1945, Cambodia was granted internal autonomy. The country is divided into 14 provinces; their governors are assisted by French counsellors. The 4 chief towns are Phnôm-Penh (population about 260,000 in 1949), the capital, located at the crossing of Tonlé-Sap and Mékong rivers; Battambang, 189 miles farther north-east; Kampot (92 miles from the capital, and Kom[illegible]. Cham. The budget for 1949 balanced at 375,194,000 piastres, that for 1948 at 147,335,000 piastres.

There were, in 1949, 299 primary schools (34,498 boys, 6,999 girls), 1 lycée (602 [illegible] colleges (349 boys, 98 girls) and 3 vocational schools (150 pupils [illegible] education was provided at a high school, a Buddhist institute, th[illegible] Institute of Law and Economics (289 students) and the School for Health Officers (59 students).

The soil is fertile, but only a part of it is under cultivation owing to shortage of labour. The chief product of Cambodia is rice, which is exported by way of Cholon, where the rice is milled, and Saigon, where it is shipped. Amongst the other products are tobacco, kapok, cotton, pepper, maize, palm sugar, rubber and silk. Pepper is especially grown in the provinces of Kampot and Takéo; output in 1948–49, 1,000 tons. The production of maize in 1948–49 was 95,000 tons (pre-war average, 400,000). Rubber is cultivated on the basaltic red soils of the Kompong-Cham region; production in 1948–49 was 16,245 metric tons from 29,787 hectares. The output of rice was 1,200,000 metric tons in 1949–50.

Cattle-breeding is a flourishing native industry. Other native industries are weaving of silk and cotton, pottery and making of rush mats. There is a cotton-ginning mill and rice-mills at Phnôm-Penh, and a silk factory at Kampot. Valuable forests cover an area of about 25,000,000 acres. Phosphate is the principal mineral, but not worked very extensively. There are also precious stones and jet workings. The overflow of the [illegible] fills up the Great Lake, which occupies the middle of Weste[illegible]. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry. The imports comprise salt, beverages, textiles, chemicals, cigarettes, iron and opium; the exports comprise rice, salted fish, pepper, maize, cotton, tobacco, fish-oil, palm-sugar, sticklac, kapok, wood, resin, hides and cattle.

Imports (1949) 13,600 tons, valued at Ps. 64 million; exports 6,900 tons, valued at Ps. 56 million.

Cambodia possesses two little sea-harbours, Kep and Réam, both on the Gulf of Siam and connected to Bangkok by the steamers of the Siam Steam Navigation C[illegible]. The Mékong and the Great Lake, with their affluents, give a total [illegible] of waterways, of which about 370 are not navigable to launches during the low-water season. Steamers of under 2,500 tons can reach Phnôm-Penh, which has good quays and embankments.

Cambodia had, in 1949, 1,000 km. of asphalt roads, 2,500 km. of macadamized roads, 3,000 km. of dirt tracks. The chief roads are from Saigon to the Thai frontier, via Phnôm-Penh and Battambang, from Phnôm-Penh to the Gulf of Siam and Mount Bokor (hill-station), from Saigon to

Kratié (and on to Laos) and from Phnôm-Penh to Angkor via Kompong-Thom. The railway between Phnôm-Penh and Poipet is connected with the Thai railway system.

LAOS.

Laos (formerly **Lane Xang,** 'land of the millions of elephants') was given to France by Auguste Pavie, who traversed these regions from 1879 to 1895. The territory has been under French administration since 1893. It has an area of 236,800 square kilometres (91,405 square miles), and in March, 1948, the population was estimated to be 1·5 million, a mean density of 6 inhabitants per square kilometre. The inhabitants are Buddhist in culture and religion. The ethnical minorities are of 3 races: Thai (Neua, Dam, Lus), Indonesian (called Khas, *i.e.* savages), and Chinese (Hos, Yaos, Mèos). After a long period of government by direct administration, already appreciably attenuated in 1941, the status of Laos has been re-defined by a provisional agreement signed with France on 26 Aug., 1946. By virtue of this agreement North and South Laos are amalgamated into a single state under the Luang Prabang dynasty. By a treaty signed on 19 July, 1949, between the President of the Republic and the King of Laos, Sisavang Vong, Laos became an independent sovereign state within the French Union. The government administers the country with the help of French counsellors. The High Commissioner of the French Republic is represented by a Commissioner of the Republic.

On 15 May, 1947, the King promulgated a constitution analogous to that of the kingdom of Cambodia. The Legislative Assembly, elected by indirect universal suffrage, met on 25 Nov., 1947, and re-affirmed their allegiance to the French Union.

The kingdom is divided into 11 provinces (capitals in brackets):—Bassac (Paksé), Saravane (Saravane), Savannakhet (Savannakhet), Cammon (Thakhek), Vientiane (Vientiane, capital of the kingdom), Tranninh (Xieng Khouang), Houaphan (Samneua), Phongsaly (Phongsaly), Upper Mekong (Muong Namtha), Luang Prabang (Luang Prabang, residence of the king), Sayaboury (Sayaboury).

The territories of Bassac, Paklay and Sayaboury were annexed in 1941 by Siam and restored in Nov., 1946.

There were, in 1949, 489 primary schools (31,250 pupils), 1 French lycée (250 pupils), 1 French primary school (75 pupils) and 2 vocational schools (40 pupils).

The crops cultivated are rice (560,000 metric tons in 1948), coffee (1,500 metric tons in 1948) and tea (in the Bolovens mountains of Bassac), citrus fruits, stick-lac, gum benzoin, cardamom, cinchona and maize (14,000 metric tons in 1948). Two tin-mines are exploited in the province of Cammon, producing about 1,200 metric tons a year before the war; they are in process of rehabilitation. The forests in the north produce valuable woods, teak in particular; the logs are floated down south on the Mékong. Northern Laos and the districts near Cambodia and the Annamese Chain abound in game, and the elephant, gaur and tiger are hunted.

In 1948, the expenses of the national budget were about 63 million piastres.

Foreign trade (1949), imports, 4,100 metric tons, valued at Ps. 65 million; exports, 1,200 metric tons, valued at Ps. 7 million.

Laos has 20 aerodromes, only 6 of which are open to public aviation. Air France maintains a twice-weekly service Saigon–Vientiane, and Aigle Azur, a weekly service Hanoi–Vientiane. The road network comprises

the main roads Saigon–Paksé–Savannakhet–Thakhek (open to traffic in all seasons) and Thakhek–Vientiane–Luang Prabang (dry season track in course of transformation into a definite road). Crossroads link Paksé to Saravane, Savannakhet to Donga (Annam) *via* Tchépone, Thakhek to Vinh (Annam) *via* Napé, Luang Prabang to Vinh (Annam) *via* Xien Khouang. Northern Laos is served by abundant waterways, but numerous rapids and waterfalls make traffic difficult. Telecommunication is by radio, with stations installed in all main provincial places.

The King.—Sisavang Vong.
Prime Minister.—Phouy Sananikone.
Crown Prince.—Tiao Savang.
Commissioner of the French Republic.—M. de Pereyra.

MOROCCO.

(MOGHRER-EL-AKSA, *i.e.*, The Farthest West.)

THE introduction of Islam into Morocco about the end of the 7th century was followed by an exceedingly confused period, to the latter part of which belongs the great Arab influx of the 11th century known as the Hilalian

invasion. This period witnessed the rise and fall of various Arab and Berber dynasties, notably the Idrissids, under whom Fez was founded or refounded early in the 9th century, and the Almoravids, the first of whom, Youssef Ben Tashfin, founded Marrakesh in 1062, and later extended his power over the north of Morocco and into Spain. His dynasty was followed by the Almohads (12th and 13th centuries) and the Merinids (13th to 16th centuries), whose decline led up to the establishment of the Sherifian dynasties, the Saadians (16th and 17th centuries) and the Alaouis. The latter claim descent from Ali, the son-in-law of the Prophet, through the Filali Sherifs of Tafilelt. The present Sultan is the 18th of this dynasty.

Reigning Sultan.—**Sidi Mohammed**, third son of Moulay Youssef (reigned 1912–27), was proclaimed Sultan on 18 Nov., 1927, on the death of his father.

Government.

The Empire of Morocco is in principle an absolute monarchy, in which the Sultan exercises supreme civil and religious authority; the latter in his capacity of Emir-el-Muminin or Commander of the Faithful. The majority of the Moslems are Sunni Moslems of the Malekite school, the teachings of which formerly constituted the common law of Morocco. The country is now, however, divided into 3 zones, in each of which a different system of government prevails as the outcome of the protectorate treaty concluded between France and the Sultan at Fez on 30 March, 1912, the subsequent convention between France and Spain of 27 Nov., 1912, and the convention between Great Britain, France and Spain of 18 Dec., 1923 (modified 25 July, 1928), providing for a special statute in the Tangier Zone.

The Sultan resides in the French Zone, usually at Rabat, but occasionally in one of the other traditional capitals, Fez (founded in 808), Marrakesh (founded in 1062) and Meknes. His government, known as the Makhzen, as reorganized on 21 June, 1947, consists of the Grand Vizier, the Vizier of Justice, the Vizier of 'Habous' or Pious Foundations, the Director of the Protocol, and the Naïb, *i.e.* the Grand Vizier's Delegate for Public Instruction. The Grand Vizier is assisted by 5 delegates in charge of finances, public works and industrial production, health, agriculture and commerce, and social welfare respectively; and by a legal counsellor. The Naïb also looks after the special interests of the Moslem population in the French Zone.

In the French Zone, effective authority is exercised by the French power, which is represented by a resident general. The latter is Minister of Foreign Affairs to the Sultan and head of an elaborate French administration which has its headquarters at Rabat and which is divided into departments for finance, economic affairs, public instruction, etc. The Protectorate Authorities have created a large body of modern law in the form of Imperial Edicts of 'Dahirs' issued by the Sultan but promulgated and made executory by the Resident General, and decrees of minor importance, all of which similarly require French approval. Local administration of natives is in the hands of native Pashas or Caids under French controllers. Moroccan participation in the administration is increasing. A Moroccan School of Administration was established in 1950.

In the Spanish Zone the Sultan's powers are entirely delegated to a Khalifa, whom he chooses from a list of two candidates presented by the Spanish Government, and whose administration is controlled by a Spanish High Commissioner resident at Tetuán and assisted by a delegate general and 5 delegates in charge respectively of native affairs, economy, industry and commerce, education and culture, public works and communications, and finance. In Feb., 1948, the office of Grand Vizier was instituted,

with responsibility for native affairs. Spain effectively occupied Ifni in April, 1934, and the territory has acquired a certain importance on account of its transit trade with the interior. Spain has treaty rights in an area extending south from the river Dra and some distance inland from the coast about Cape Juby.

The 1923 Tangier Statute came into force on 1 June, 1925, but did not receive the adhesion of all the powers signatory of the Act of Algeciras of 7 April, 1906. It was modified by a protocol signed at Paris on 25 July, 1928, to which Italy, one of the previously non-adhering powers, was a party. The statute was concluded for a period of 12 years from the date of ratification (14 May, 1924), and was to be renewable automatically for one or more 12-year periods if none of the contracting powers demanded its revision.

The zone is permanently neutralized and demilitarized. The régime is one of autonomy, and legislative power is vested in an international Assembly of 27 members, but the parties to the statute agreed on certain [illegible] and fiscal enactments which were not to be modified for 2 years, as well as on a special code of law. A committee of control, composed of the Consuls General of the powers signatory of the Act of Algeciras, is invested with a right of veto and certain other powers. The administration of the zone is entrusted to an administrator, with assistant administrators for finance, health, etc., and justice. The Sultan is represented by a Mendoub, who is *ex-officio* President of the Assembly and who is in charge of the administration of native affairs.

On 14 June, 1940, Spanish Khalifan troops occupied Tangier, and Spain was in virtual control of the zone until Sept., 1945, when the Spanish Government was requested by Great Britain, the United States, the U.S.S.R. and France to evacuate the territory. International rule was restored on 11 Oct., 1945. Italy was re-admitted to the control committee on 8 March, 1948.

British capitulations in French Morocco, which existed since 1856, were abolished by the Anglo-French Convention of 29 July, 1937, including the British postal [illegible] and other towns in the French Zone. British subjects are now subject to the jurisdiction of the same tribunals as French citizens. British capitulations in Spanish Morocco continue in force, and there is a British postal agency at Tetuán, subordinate to the Central British Post Office at Tangier.

French Resident General.—Army General Juin (appointed 14 May, 1947).
Spanish High Commissioner.—Lieut.-Gen. Varela (appointed 4 March, 1945).
Khalifa for Spanish Zone.—Sidi Muley Hassan Ben el Mehedi
Mendoub at Tangier.—Si Ahmed Tazi.

Area and Population.

The French Zone comprises the whole of Morocco (except the Ifni enclave and the Cape Juby area) from the Atlantic to the Algerian frontier, and from the confines of the Sahara to the boundary of the Spanish Zone as agreed to in 1912. The Franco-Spanish boundary has not been fully delimited. It follows a generally eastern direction from a point on the Atlantic about 16 miles south of Larache to the river Moulouya, which completes the boundary to the Mediterranean. The Spanish Zone comprises the area between this line and the sea, with the exception of the small territory around Tangier which is included in the zone of international administration. The southern and eastern boundaries of Morocco being largely indeterminate, no exact estimate can be made of the total area, but it may be estimated as follows:—French Zone, 153,870 square miles;

Spanish Zone, 18,009 square miles; Tangier Zone, 225 square miles; total, 172,104 square miles.

The native population consists mainly of Islamized Berbers and Arabs dating from the great invasions of the Middle Ages. These elements have to some extent intermixed with each other and with negro stocks. There is a large native Jewish population, mostly in the towns. Since 1912 the European element has greatly increased, owing to the influx of French into the towns of the Protectorate and a number of agricultural settlers, also mostly French. At 1 Jan., 1950, the French Zone had an estimated non-Moroccan population of 360,000 (including 267,000 French; estimated Moroccan population, 8,180,000 (7,980,000 Moslems; 200,000 Jews). The 1945 census of the Spanish Zone shows a total population of 1,082,009 (995,329 Moslems, 72,184 Europeans and 14,196 Jews), and that of the Tangier Zone (1941) at about 100,000 (36,500 native Moslems, 16,500 Europeans and 7,000 native Jews).

The following table shows the population of the principal towns of the French Zone :—

	1936 (census)	1947 (census)		1949 (estimate)	
	Total	Total	Europeans	Total	Europeans
Casablanca	268,069	551,300	120,800	569,500	139,000
Fez	144,424	200,900	15,900	202,000	17,000
Marrakech	190,314	238,000	12,800	239,200	14,000
Mazagan	24,391	40,300	2,600	40,000	2,900
Meknès	74,702	160,000	23,600	162,400	26,000
Mogador	15,166	28,600	1,300	28,800	1,500
Oujda	34,523	88,600	26,500	90,100	28,000
Port Lyautey	17,601	56,600	7,800	57,800	9,000
Rabat	83,379	160,400	39,800	161,600	41,000
Safi	25,159	50,800	2,900	51,600	3,700
Salé	31,823	57,200	2,200	58,200	3,200

The principal towns in the Spanish Zone are Tetuan (population in 1945, 93,658), Larache (41,286), Alcazarquivir (35,786), Xauen (14,476), Arzila (17,201), Villa Nador (23,817), Villa Sanjurjo (10,770).

There are important British colonies at Casablanca (about 2,000) and Tangier (about 1,200). Spaniards form an important element in the European population of the coast towns.

The principal languages are Moorish-Arabic and numerous Berber dialects. The use of French for official and business purposes is very widespread, except in the Spanish Zone, where Spanish is chiefly used. In the Tangier Zone, French, Spanish and Arabic are recognized as the official languages.

Education.

The bulk of the native population is illiterate. There are numerous Koranic schools imparting a very elementary education, and a number of higher schools attached to mosques. The most notable is the Kairoween University at Fez, which is highly reputed in the Islamic world. In the French Zone, schools were, in 1950, attended by 120,042 Moslems, 72,367 Europeans and 31,821 Jews. The system is correlated with the French system, and pupils can take their baccalauréat in the French Zone. The Institut des Hautes Études Marocaines at Rabat was attended in 1949–50 by 522 students for Arabic and 174 students for the Berber language; 868 students were [illegible] courses in the faculty of law; 161 studied science. The Institut [illegible] Chérifien co-ordinates the research work done

in biology, botany, zoology, geology, etc. The boys' and girls' high schools at Rabat have sections for training teachers. For Moslem boys there were in the French Zone, in 1950, 824 primary schools, and 9 secondary schools. A training school for teachers in Moslem schools was reorganized in 1938 at Rabat. Jewish instruction is given in 81 primary schools, under the joint auspices of the Protectorate and the Alliance Israélite.

In 1950, there was 100 cinemas with a seating capacity of 56,000 in the French Zone; 18 with 13,500 seats in the Spanish Zone, and 8 with 5,435 seats in Tangier.

There are state schools in the chief towns of the Spanish Zone, also certain Hispano-Arabic schools for education of natives. Two institutes, the Moulay el Hassan and the Moulay el Mehdi, have been opened at Tetuan to improve education and to facilitate the study of Arabic culture. The Alliance Israélite has schools in Tetuán and Larache, and a native school of arts and industries exists in Tetuán, and a carpet-weaving school at Sheshawen.

In the Tangier Zone the education of native Moslems is mainly confined to the elementary Koranic schools. The Government of the French Protectorate and the Spanish Government, however, maintain several primary and elementary schools for natives, and there are French technical schools for boys and girls. There are several primary and secondary schools for Jews maintained by the Jewish community but connected with the Alliance Israélite. The French Protectorate and Spanish Government also maintain a number of primary and secondary schools for European boys and girls, to some of which natives are admitted, and there is an Italian school with primary and secondary classes for Europeans as well as natives.

Justice.

French Zone.—Native justice is administered by religious courts and in a large range of criminal and civil cases by the pashas and caids, supervised by a French Controller. Under the Protectorate 2 courts of appeal corresponding to these jurisdictions have been set up at Rabat. French courts modelled on those in France were created in 1913, and deal with cases brought by or against French and other foreigners. By a convention signed in London on 29 July, 1937, Great Britain renounced capitulatory rights in the French Zone as from the coming into force of the convention (1 Jan., 1938). The French courts are the court of appeal at Rabat; 6 courts of first instance at Rabat, Casablanca, Oujda, Marrakesh, Fez and Meknès, and 14 *tribunaux de paix*. Rabbinical courts deal with matters affecting the personal status of Jews.

It is intended to give a large share in the administration of justice to Moorish magistrates and a Moroccan penal code is being drawn up.

Spanish Zone.—Native and Jewish justice is similar to that in the French Zone, except that all criminal cases are tried in the Spanish courts. These consist of Audiencia, or supreme court, 3 courts of first instance, and 7 'Juzgados de Paz.' British subjects and American citizens are justiciable in their own consular courts. Autonomy has been granted to native courts for the practice and application of Islamic standards of justice to native affairs.

Tangier Zone.—Native justice is administered as in the French Zone, the Mendoub having a jurisdiction similar to that of pashas and caids. The statute provides for a mixed tribunal which deals with all cases involving foreigners, except the subjects of the U.S.A. which has not adhered to the convention and still have capitulatory rights.

Finance.

Estimates of revenue and expenditure (in 1,000 francs) of the French Zone (ordinary budget):—

	1946	1947	1948	1949	1950
Revenue . . .	6,656,000	10,951,000	22,580,000	29,769,000	33,346,000
Expenditure . . .	6,656,000	10,951,000	22,575,000	29,769,000	33,346,000

The main items of the 1950 budgets are on the revenue side:—Customs, 10·9 milliard francs; direct taxes, 7·8 milliard; monopolies, 7·1 milliard. Expenditure:—Education, 4·0 milliard; interior, 2·5 milliard; public debt, 2·7 milliard; public works, 2·7 milliard; public health and welfare, 1·8 milliard; agriculture, commerce and forestry, 2·1 milliard; security, 2·5 milliard.

The Moroccan debt consists of French loans (issued between 1904 and 1944). The 1904 loan amounted to 62,500,000 francs and bears interest at 5%. The 1910 loan was for 101,124,000 francs and also bore interest at 5%. The 1914 loan, guaranteed by the French Government, was for 70,250,000 francs. By a law dated 25 March, 1916, the 1914 loan was increased to 242,000,000 francs. The first issue of 70,250,000 francs in July, 1914, was 4%, and the second issue 171,750,000 francs in March, 1918, was at 5%. By the law of 19 Aug., 1920, a further loan, also guaranteed by the Government, was authorized for 744,140,000 francs. Of this amount 300 million francs had been issued by 1923, after which no further issue was made. Provision was made in 1928 for a new loan of 819,822,000 francs in which was to be merged the balance of the 1920 loan not already earmarked for expenditure. A first issue of 325,000,000 francs at 4½% (price of issue 925 francs for 1,000 francs) was made in May, 1929. The second issue of 425,000,000 francs at 4%, price 977·50 francs, followed in July, 1930. In April, 1932, a further loan of 1,535,676,000 francs was authorized mainly for public works and on 20 March, 1942, a further loan of 540,000,000 francs at 3½%, and on 21 August, 1944, another for a similar amount at the same rate of interest was issued. The total outstanding state loans amounted on 1 Jan., 1950, to 11,802,772,000 francs.

The budget of the Spanish Zone for 1947 balanced at 211,000,000 pesetas.

The principal revenue of the Tangier Zone is from customs and consumption duties. The budget estimates for 1948 showed receipts, 583,381,000 francs, and expenditure, 696,583,000 francs.

Defence.

The Sherifian Army as such no longer exists, except for the Black Guard or Sultan's bodyguard. The military forces in the French Zone are made up of drafts (consisting largely of African troops) from the French metropolitan army, a portion of the Foreign Legion and native levies of various kinds. Following on the termination of the Riff war a presidential decree of 3 Oct., 1926, placed the Army under the control of the Resident General for all purposes except actual operations, and directed that the regular land forces should be organized in 3 divisions and 2 mixed brigades. The present position is not clear. There is a military school for training Moroccan officers.

The Spanish forces in the Spanish Zone are said to consist of 5 divisions of all arms. The Tangier Zone is demilitarized.

Production and Industry.

French Zone.—Agriculture is by far the most important industry. The total cultivable area is estimated at 15,450,000 hectares, not including forests.

Forest land is estimated at about 3,520,000 hectares, of which one-third lies within the agricultural area. The principal crops are cereals, especially wheat and barley; beans, chickpeas, fenugreek and other legumens; canary seed; cumin and coriander; linseed; olives; vines and other fruits, especially almonds. Vineyards, in 1949, covered 50,035 hectares. The almost universal wild palmetto is put to various uses, including the manufacture of *crin végétal*. The trees include cork (covering some 750,000 acres), cedar, arar, argan, oak and various conifers. In 1949 there were 10,309,000 olive trees, 4,758,000 orange and lemon trees, 2,962,000 palm trees (dates), 8,401,000 almond trees. Olive oil yield, 1948–49, 7,500 metric tons; citrus yield, 120,000 metric tons; wine production, 499,000 hectolitres. Tizra wood is exported for tanning purposes. Gums are produced in considerable quantities. Stock-raising is an important industry. The number of animals in the zone in 1949 was :—Cattle (bovine), 1,762,000; sheep, 9,149,000; goats, 6,805,000; pigs, 103,000; horses, 165,000; mules, 144,000; asses, 615,000; camels, 183,000.

Principal crops	Yield (1,000 quintals)			Area (1,000 hectares)	
	Average 1936–39	1947–48	1948–49	1947–48	1948–49
Winter wheat	4,795	4,828	4,642	693	783
Summer wheat	3,539	1,972	1,738	293	264
Barley	13,617	14,310	13,678	1,573	1,832
Oats	550	464	391	42	43
Maize	2,133	4,159	3,999	548	503
Sorghum	478	373	434	148	134
Beans	299	38	55	6 5	9
Lentils	51	40	38	11	16
Chickpeas	179	317	303	58	79
Peas	238	534	410	73	89

The principal mineral exploited is phosphate, the output of which (under a state monopoly) was 3,692,958 metric tons in 1949. Other important minerals are (1949) :—Anthracite (341,400 metric tons), iron ore (356,818 metric tons), manganese (221,877 metric tons), manganese dioxide (11,948 metric tons), lead (50,999 metric tons), cobalt (1,739 metric tons), zinc (5,578 metric tons); copper (1,287 metric tons); antimony (1,202 metric tons); asbestos (402 metric tons); graphite (72 metric tons).

The coasts abound in fish. The chief fishing centres are at Casablanca, Agadir and Safi. The catch in 1949 was 92,968 tons.

The existing power-plants produced 434·2 million kwh. in 1949, of which 251·3 million kwh. were hydro-electric. Works under construction are to increase the output to 800 million kwh. by 1953, and simultaneously enlarge the irrigation area from 80,000 hectares (1948) to 300,000 hectares.

Spanish Zone.—Agriculture is potentially important, but undeveloped. A programme was announced (1939) for undertaking the drainage of low-lying ground along the main estuary areas; irrigation enterprises; state assistance to farmers in the form of subventions, provision of seed, importation of modern agricultural machinery, equipment, etc., but no statistics of results are available. European colonization, unlike the French Zone, is almost entirely confined to the towns. Iron ore is mined in the eastern region and, in 1948, 900,503 metric tons were exported; of these, 449,757 tons were shipped to the United Kingdom. Lead, antimony (production, 1948, 11 metric tons) and manganese ore and graphite (production, 1948, 25 metric tons) are exported on a small scale, but the zone is reported to be rich in minerals of various kinds.

Tangier Zone.—The agricultural output, consisting principally of wheat, barley and chickpeas, is insufficient for the needs of the population. There are also fisheries and preserving factories and a certain amount of market gardening for local requirements.

Commerce.

French Zone.—Imports and exports were (in millions of francs) :—

	1944	1945	1946	1947	1948	1949	1950
Imports . .	3,609	6,782	17,529	33,338	74,865	103,321	115,233
Exports . .	2,665	3,902	10,395	18,309	37,189	53,516	65,977

Imports and exports were (in thousands of tons) :—

	1944	1945	1946	1947	1948	1949	1950
Imports . .	559	917	1,192	1,417·7	1,639·6	1,732·0	1 836
Exports . .	1,531	1,657	2,981	4,163·4	4,448·9	5,391 7	6,066

Spanish Zone.—Imports in 1947 totalled 526,000,000 pesetas, of which Spain and Spanish colonies accounted for 392,254,000 pesetas, Tangier 111,283,000 pesetas and Argentina 9,007,000 pesetas. The principal imports are flour, semolina, sugar (refined), tea, seed oils, wines, liquid fuel, laundry soap, candles, cotton goods, automobiles and parts. The principal exports include iron ore, goatskins, canned and dried fish, esparto grass, crin vegetal (dwarf-palm fibre) and limited quantities of lumber and cork. Exports in 1947 totalled 168,200,000 pesetas, of which Spain and Spanish colonies took an amount equal to 92,508,000 pesetas, Great Britain 43,466,000 pesetas and Tangier 28,723,000 pesetas.

Tangier Zone.—Imports and exports for 6 years (in thousand francs) :—

	1938	1944	1945	1946	1948	1949
Imports .	94,694	181,357	248,773	3,561,466	7,727,632	8,651,690
Exports . .	11,380	14,630	20,888	486,696	881,891	960,731

Total trade between Morocco and the United Kingdom in £ sterling (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports to U.K. . .	759,590	3,680,713	4,731,120	9,084,356	12,157,351
Exports from U.K. .	313,042	1,449,318	2,215,804	1,775,832	2,667,398
Re-exports from U.K. .	19,980	93,700	341,222	158,253	88,469

Communications.

Shipping.—In 1949, 9,295 vessels of 11,796,000 tons entered and cleared the ports of the French Zone.

In 1938, 474 coast-wise vessels called at Spanish Zonal ports with a tonnage of 128,055; in the same year 475 ocean-going vessels were cleared with a tonnage of 121,084.

Railways.—On 31 Dec., 1949, there were 1,584 km. of railways in the French Zone, 93 in the Spanish Zone and 18 in the Tangier Zone. The principal standard-gauge lines are from Casablanca eastward to the Algerian border, forming part of the continuous rail line to Tunis; the French Moroccan portion of the line from Tangier (in the International Zone) to Petit-jean on the main east-west line; Casablanca to Marrakesh with two important branches, one eastward from a point slightly north of Settat to Oued Zem tapping the Khouribga phosphate mines, the other westward from Ben Guerir to the port of Safi passing about midway through the phosphate district of Louis Gentil and Oujda southward to Bou Arfa near the Djerada coal mines.

The existing railways in the Spanish Zone are Ceuta–Tetuán, Nador–Tistutin and Larache–Alcazar, besides the portion of the Tangier–Fez railway which crosses the zone; total, 173 km.

Roads.—On 31 Dec., 1949, there were 6,226 km. of main roads, 5,766 km. of secondary roads and 32,254 km. of tracks in the French Zone. Motor vehicles registered in the French Zone at the end of 1949 were 23,427 lorries and omnibuses, 31,443 passenger cars and 4,679 motor cycles. The Spanish Zone has about 540 miles of good roads suitable for traffic. The roads in the Tangier Zone have been considerably improved since the coming into force of the Statute. There are now about 65 miles of urban and rural roads.

Post.—A Sherifian service under French management exists in the French Zone. European letters and small parcels are conveyed by air, without surcharge; overland through Spain, and by daily steamers between Algeciras and Tangier and increasingly by air. The Spanish authorities maintain the ordinary postal service in the Spanish Zone. Spain retains a post office in Tangier, and Great Britain maintains the only foreign postal service still existing in Morocco, with offices at Tetuán and head office at Tangier.

The total length of telegraph lines open to the public in the French Zone on 31 Dec., 1950, was 17,784 km. All important centres in the Spanish Zone are connected by land lines. Communication between Morocco and Europe is maintained by cables between Casablanca and Brest, Tangier–Casablanca–Le Havre, Tangier–Gibraltar, Tangier–Cádiz, Larache–Cádiz *via* Algeciras.

Telephone systems exist in all towns of the French Zone and there is a complete urban and inter-urban connexion of 167,226 km. total length (1950), with 31,483 subscribers. Urban services exist in the principal towns of the Spanish Zone and at Tangier. There is telephone communication between Tangier and Madrid and between Tangier and Lisbon.

An inter-zonal system between the Spanish and French Zones of Morocco functions. Between French Morocco and Algiers the system is generally good.

Aviation.—Seven French and 2 other airlines serve in the French Zone. In 1949 they conveyed 64,420 passengers to Morocco, and 69,496 passengers from Morocco; freight and mail carried, 7,340,600 metric tons.

Currency, Weights and Measures.

Since the withdrawal of the Hassani currency in 1920 the *franc* has been the sole currency in the French Zone. The Moroccan franc (state bank-notes of all denominations from 5 francs upwards) was in 1928 placed on the same gold basis as the French franc.

On 30 June, 1949, the value of state bank-notes in circulation was

24,343 million francs. Coins in circulation are 10- and 20-franc pieces (copper–nickel), ½-, 1-, 2- and 5-franc pieces (copper–aluminium).

The basic currency in Spanish Morocco is the paper peseta, 3·577 paper pesetas being the equal of 1 gold peseta.

Moroccan francs are legal tender in the Tangier Zone; Spanish money, which is legal tender under the terms of the statute, is temporarily suspended.

The metric system of weights and measures became in 1923 the sole legal system in the French Zone.

The principal native measures in use are :—

Weight.—1 kantar = 100 rotls; 1 rotl = 16 ookeyas. The rotl varies widely round about 2 lb. *Capacity.*—The mudd, which varies by locality. *Length.*—1 kama = 50 inches; 1 dra = 20 inches; 1 kala = 22 inches.

Consular Representatives of Great Britain in Morocco.

French Protectorate.

Consul-General in Rabat.—Sir Cyril H. Cane, K.B.E.

Consul in Casablanca.—H. N. Pullar.

Spanish Zone.

Consul-General in Tetuan.—C. G. Hope Gill.

Tangier Zone.

Consul-General.—Charles Norman Stirling, C.M.G.

Consular posts at Ceuta, Fez, Melilla, Larache and Tangier.

TUNISIA.

(AFRIKIYA; TUNISIE.)

Bey.—**Sidi Mohammed al-Amin**, born 4 Sept., 1881, succeeded his cousin, Sidi Mohammed al-Monsif, 15 May, 1943, after his deposition by General Giraud (died in exile at Pau, 1 Sept., 1948).

The reigning family of Tunis, occupants of the throne since 1705, descend from Hussein ben Ali, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

Government.—After the French invasion of the country in the spring of 1881, the treaty of Bardo (12 May, 1881), confirmed by the convention of La Marsa, 8 June, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 5 being French directors and 6 Tunisian ministers. The country is divided into 20 districts (*contrôles civils*)

and 6 military circles; in each district the Bey is represented by native officials (caids, kahias and sheiks), who are under the supervision of French *Contrôleurs civils* representing the Resident-General. French tribunals administer justice between subjects of European powers, and also between them and natives; there are native courts for cases between natives. In 1914, the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens with the regency.

The Great Council is an elected assembly, consisting half of French and half of Tunisian delegates. Its function is consultative on financial, economic and social matters.

French Resident-General.—Louis Périllier.

Area and Population.—The present boundaries are: on the north and east the Mediterranean sea, on the west the Algerian province of Constantine, and on the south the Sahara and Libya. The area is about 125,180 square km. (48,195 square miles), including that portion of the Sahara which is to the east of the Djerid, extending towards Gadamès.

According to the census of 1946, the total European population was 239,549, composed of 143,977 French (exclusive of the army and navy), 84,935 Italians, 6,459 Maltese and 4,178 other foreigners. The total native population in 1946 was 2,903,949, of whom 2,832,978 were Arabs and Bedouins and 70,971 Jews. The capital, the city of Tunis, had, in 1946, a population of 364,593, of whom 189,393 were Moslems and 34,193 Jews, besides 66,422 French, 46,629 Italians and 4,312 Maltese.

Vital statistics [illegible] European population in 1950:—Births, 6,415 [illegible] 1,041, [illegible] 203; deaths, 2,891. Infantile mortality rate, 1949, [illegible] 1,000 live births (total population, 151).

By means of the channel, which was opened in 1893, Tunis is directly accessible to ocean-going vessels. Other towns are Sfax with (1946) 54,637 inhabitants including 8,634 Europeans); Bizerta with 39,327 (9,893 Europeans); Sousse with 36,566 (8,350 Europeans); Kairouan, the Holy City of the Moslems, with 32,299; Gabès with 22,512 (1,548 Europeans); Béja with 22,208 (1,832 Europeans); Moknine with 15,699; Nefta with 14,167 and Ferryville with 29,353 inhabitants (11,814 Europeans).

The bulk of the population is Moslem. The revenue from the 'Habus' lands, like that from the 'Wakf' lands in Egypt, is applied to religious, educational and charitable purposes. There are about 200,000 Roman Catholics, under the ministration of the Archbishop of Carthage, and about 125 other clergymen. The Greek Church (400), the French Protestants and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—There were in 1949–50, 552 primary, 15 secondary and 61 technical schools, 2 teachers' training colleges, 1 high school, 1 art school and 1 conservatoire. Private schools numbered 42 French (including 30 Catholic, 2 Protestant and 2 Jewish schools), 106 Moslem, 5 Jewish. Number of pupils 175,262, of whom 122,290 are boys. Of the total number of pupils, 37,597 are French, 113,301 Moslem, 14,392 Jewish and 9,972 other nationals. In the Great Mosque at Tunis there is a Moslem university. Almost all the Moslem primary and apprenticeship schools have been taken over by the government.

There were, in 1949, 49 cinemas with a seating capacity of 25,700.

Finance.—Receipts and expenditure (in millions of francs):—

	1945	1946	1947	1948	1949–50	1950–51
Revenue	4,922	11,183·5	14,077	20,815 0	29,266	36,058
Expenditure	4,922	11,182 5	14,076	20,812·8	29,262 9	36,045

At 31 March, 1950, the public debt amounted to 26,509 million francs.

Defence.—The army of occupation consisted of 25,000 men, including 1,145 officers. There were also native regiments (*tirailleurs* and *spahis*) and the Foreign Legion.

Production and Industry.—Tunisia may be divided into 5 districts—the north, characterized by its mountainous formation, having large and fertile valleys (*e.g.*, the valley of the Medjerdah and the plains of Mornag, Mateur and Beja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures, and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. Of the total area of nearly 31 million acres, about 22½ million acres are productive in the following proportions: 33% arable; 11·2% forests; 9% orchards and vineyards; 1·1% meadow and grass land; 45·7% common and uncultivated.

Products	1938	1945	1946	1947	1948	1949 [1]
Wheat (in 1,000 metric tons)	380	192	325	250	252	540
Barley (in 1,000 metric tons)	100	117	150	100	100	400
Oats (in 1,000 metric tons)	30	13 2	10	6	6	25
Olive oil (in 1,000 metric tons)	25	3·6	14·8	10 6	42	105
Wine (in hectolitres)	1,975	645	549	467	726	885

[1] Estimates.

Other products are dates, almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna and cork.

Livestock in 1949:—Horses, asses and mules, 222,000; cattle, 359,000; sheep, 1,885,000; goats, 1,315,000; camels, 156,000; pigs, 41,700.

Minerals	1949	1950	Minerals	1949	1950
	metric tons	metric tons		metric tons	metric tons
Phosphate	1,442,000	1,525,000	Lignite	47,800	41,460
Iron ore	679,000	758,000	Pig lead	19,500	23,536
Lead ore	23,800	30,658	Zinc ore	6,600	5,744

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style) and copper ware; tanning and silk weaving are declining.

In 1950, 4,000 boats with 11,100 men were engaged in fishing. The catch amounted to 11,522 tons. Sponge fishing is also carried on—production in 1950 was 94 tons.

Electrical energy increased from 67 million kwh. in 1938 to 93 million

kwh. in 1946, to 119·7 million kwh. in 1948, and to 126 million kwh. in 1949.

Commerce.—The imports and exports for 6 years (in thousands of francs) were as follows :—

	1939	1945	1946	1947	1948	1949
Imports .	1,482,949	3,518,738	10,766,835	17,478,010	34,191,581	42,368,000
Exports .	1,265,798	1,927,971	3,889,681	6,475,904	12,690,225	27,396,000

In 1949, 74% of all imports came from France and 47% of all exports went to France; 7% came from and 2% went to the U.S.A.

Exports of phosphate rock (in metric tons), 1939, 1,816,480; 1947, 1,704,512; 1948, 1,911,000; 1949, 1,888,000; 1950, 1,688,000.

Total trade between Tunis and the United Kingdom (according to Board of Trade returns, in £ sterling) was :—

	1938	1947	1948	1949	1950
Imports from Tunis into U.K. .	1,668,082	4,107,008	4,995,759	5,942,233	5,973,381
Exports to Tunis from U.K. .	272,433	451,876	535,744	510,162	995,118
Re-exports to Tunis from U.K.	3,981	5,223	4,519	15,457	20,514

Communications.—In the year 1949, there entered the ports of the regency 2,805 steam vessels of 3,487,000 tons.

In 1950 there were 8,768 km. of roads, of which 5,570 km. were main roads, 2,554 km. second-class roads and 644 km. local roads. Of the total, 7,057 km. were bitumenized or otherwise metalled.

Number of motor vehicles, 31 Dec., 1949, was 26,282, including 13,276 passenger cars, 7,203 lorries and 3,763 motor cycles.

In 1950 there were 2,099 km. of railways, of which 1,658 belonged to the state and 441 km. to the Cie des Phosphates (Sfax–Gafsa system).

There were in 1948, 3,747 km. of telegraphs. The telephone systems had 48,000 km. of inter-urban lines in 1950, the number of telephones being 25,207. There were in 1950, 561 post offices, including telegraph offices, and a wireless transmitting station.

Civil Aviation.—In 1950, 2,692 planes arrived with 35,479 passengers, 78 metric tons of mail, 1,001 metric tons of freight and 612 metric tons of luggage; 2,692 planes left with 33,648 [illegible] metric tons of mail, 1,039 metric tons of freight and 620 me[illegible]

Money, Weights and Measures.—In 1947 there were 22 banks operating in Tunis, excluding the Banque d'Algérie, which is the bank of issue. The note circulation at 31 Dec., 1950, was 21,033 million francs.

There were 136,000 savings accounts in the savings bank, deposits standing at 2,518 million francs at 31 Dec., 1950.

The legal coinage since 1892 consists of pieces similar to the French, the pieces (0·50, 1, 2, 5 fr.) being coined in France.

The *ounce* = 31·487 grammes; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 oz.

The *kfiz* (of 16 *wiba*, each of 12 *sa'*) = 16 bushels.

The principal measure of length is the *pik*: the *pik Arbi* for linen = ·5392 yd.; the *pik Turki* for silk = ·7058 yd.; the *pik Andoulsi* for cloth = ·7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

Books of Reference.

GERMANY.

(BUNDESREPUBLIK DEUTSCHLAND.)

Constitution and Government.

GERMANY'S unconditional surrender came into force on 5 June, 1945. On that day all power in Germany was taken over by the four principal Allies, and by the Potsdam decisions (17 July, 1945) that power was exercised by the commanders-in-chief of the armed forces of the United States, the United Kingdom, the Soviet Union and France, each in his own zone of occupation and also jointly, in matters affecting Germany as a whole, in their capacity as members of the Control Council.

By the Potsdam decisions the northern part of the Province of East Prussia, including its capital Königsberg (renamed Kaliningrad), has been transferred to the Soviet Union [illegible] the final settlement by a peace treaty. The lines of demarcation run within the territory of the Reich as follows (*see* MAP in THE STATESMAN'S YEAR-BOOK, 1947):—

United Kingdom.—The former Prussian Provinces of Schleswig-Holstein, Hanover, Westphalia, the [illegible] districts of Cologne, Aachen and Düsseldorf of the former Prussian Rhine Province, the former states of Brunswick, Oldenburg, Lippe, Schaumburg-Lippe and Hamburg.

United States:—Bavaria (except town and rural district of Lindau), Baden and Württemberg from their northern frontiers southward to a line extending from West to East south of Karlsruhe to south of Ulm, the former

Land Hessen on the right bank of the Rhine, the former Prussian Province of Hessen-Nassau (except the rural districts Oberwesterwald, Unterwesterwald, Unterlahn and St. Goarshausen) and the Land Bremen.

France :—The Palatinate, the former Land Hessen on the left bank of the Rhine, the Saar District, the governmental districts Koblenz and Trier of the former Prussian Rhine Province, Baden and Württemberg from a line extending from West to East south of Karlsruhe to south of Ulm to their southern frontiers, and the town and rural district of Lindau in Bavaria.

Soviet Union :—The portions of the former Prussian Provinces of Pomerania, Brandenburg and Silesia situated on the west bank of the rivers Oder and Western Neisse, the former Prussian Province of Saxony and the former Länder Saxony, Thuringia, Mecklenburg and Anhalt.

According to the Potsdam declaration it was agreed, subject to the final peace settlement, that Poland should be allowed to occupy and administer those parts of Germany lying east of a line running from the Baltic Sea immediately west of Swinemunde along the Oder River to its confluence with the Western Neisse and thence along the Western Neisse to the Czechoslovak frontier. This includes that portion of East Prussia not transferred to the Soviet Union, the former Prussian Province of Upper Silesia, most of the former Prussian Provinces of Pomerania and Lower Silesia and part of the former Prussian Province of Brandenburg.

Under British command an area round Cologne is occupied by Belgian forces, the North Sea coast from Emden to Oldenburg by Danish troops, the Harz district by Norwegian forces, whilst the rural district of Bitburg in the French Zone is occupied by Luxemburg troops.

Western Germany.

The Potsdam Agreement laid it down that ' for the time being no central German government shall be established. Nevertheless, certain essential central German administrative departments, particularly in the fields of finance, transport, communications, foreign trade and industry, shall be set up and shall act under the direction of the Control Council.'

This decision has not been carried out. Therefore the United Kingdom and United States Governments on 6 Feb., 1948, gave the Anglo-American Zone a unified economic, financial and legal administration, with legislative bodies having competence in economic and financial spheres (*see* The Statesman's Year-Book, 1949, pp. 1008–09).

Constitution.—The Constituent Assembly (known as the ' Parliamentary Council ') met in Bonn on 1 Sept., 1948, and worked out a Basic Law which was approved by a two-thirds majority of the parliaments of the participating Lander and came into force on 23 May, 1949.

The **Basic Law** consists of a preamble and 146 articles. The first section deals with the basic rights which are legally binding for legislation, administration and jurisdiction.

The Federal Republic of Germany is a democratic and social federal state. The federal flag is black, red and gold. For the time being the Basic Law applies to the Länder Bavaria, Bremen, Greater Berlin (temporarily suspended), Hamburg, Hesse, Lower Saxony, North Rhine-Westphalia, Rhineland-Palatinate, Schleswig-Holstein, Württemberg-Baden and Württemberg-Hohenzollern. The general rules of international law form part of the federal law. The constitutions of the Länder must conform to the principles of the republican, democratic and social state

based on the rule of law. Executive power is vested in the Länder, unless the Basic Law prescribes or permits otherwise. Federal law supersedes Land law.

The organs of the Federal Republic are:—

The Federal Diet (*Bundestag*), elected in universal, direct, free, equal and secret elections for a term of 4 years.

The Federal Council (*Bundesrat*), consisting of members of the governments of the Länder. Each Land has at least 3 votes. Lander with more than 2 million inhabitants have 4, Länder with more than 6 million inhabitants have 5 votes.

The Federal President (*Bundespräsident*) is elected by the Federal Convention for a term of 5 years and represents the Federation in matters [illegible] national law. Re-election is admissible only once.

[illegible] Convention consists of the members of the Federal Diet and an equal number of members elected by the popular representative bodies of the Länder according to the principles of proportional representation.

The Federal Government consists of the Federal Chancellor, elected by the Federal Diet on the proposal of the Federal President, and the Federal Ministers who are appointed and dismissed by the Federal President upon the proposal of the Federal Chancellor.

The Federation has exclusive legislation on:—(1) foreign affairs; (2) federal citizenship; (3) freedom of movement, passports, immigration and emigration, and extradition; (4) currency, money and coinage, weights and measures and regulation of time and calendar; (5) customs, commercial and navigation agreements, traffic in goods and payments with foreign countries, [illegible] customs and frontier protection; (6) federal railways and air [illegible] post and telecommunications; (8) the legal status of persons in the employment of the Federation and of public law corporations under direct supervision of the Federal Government; (9) trade marks, copyright and publishing rights; (10) co-operation of the Federation and the Länder in the criminal police and in matters concerning the protection of the constitution, the establishment of a Federal Office of Criminal Police, as well as the combating of international crime; (11) federal statistics.

Concurrent legislation (in this field the Länder have legislative rights if the Federation does not exercise its legislative powers) extends to the following fields:—(1) civil law, criminal law and execution of sentences, constitution of courts, court procedure, the bar, notaries and legal advice; (2) census and registry matters; (3) associations and assemblies; (4) the right of sojourn and settlement of aliens; (5) the protection of works of art against removal abroad; (6) matters relating to refugees and expellees; (7) public welfare; (8) citizenship of the Länder; (9) war damages and compensation; (10) provision for war-disabled persons and surviving dependants; (11) laws relating to mining, industry, power supply, crafts, trades, commerce, banking and [illegible] private insurances; (12) labour law, including the legal [illegible] enterprises, protection of workers and provision of employment, as well as social insurance including unemployment insurance; (13) the promotion of scientific research; (14) expropriation; (15) transfer of land and landed property, natural resources and means of production to public ownership or to other forms of publicly controlled economy; (16) prevention of the abuse of economic power; (17) promotion of agricultural and forestry production, safeguarding of food supply, import and export of agricultural and forestry products, deep-sea

and coastal fisheries and coast protection; (18) transactions in landed property, laws concerning land and agricultural lease, housing, settlements and homesteads; (19) measures against epidemic and infectious diseases, the licensing for medical and [illegible] professions, and the trade and traffic in drugs, medicines, narcotics and poisons; (20) traffic in food, stimulants, fodder, seeds and seedlings, and protection of trees and plants against diseases and pests; (21) ocean and coastal shipping and aids to navigation, inland shipping, meteorological service, ocean channels and inland waterways used for general traffic; (22) road traffic, motor transport and the construction and maintenance of highways used for long-distance transport; (23) railways other than federal railways, except mountain railways.

Federal laws are passed by the Federal Diet and after their adoption submitted to the Federal Council, which has a limited veto. The Basic Law may only be amended upon the approval of two-thirds of the members of the Federal Diet and two-thirds of the votes of the Federal Council.

The foreign service,[1] federal finance, federal railways, federal postal services, and federal waterways and shipping are under direct federal administration.

In the field of finance, the Federation has exclusive legislation on customs and financial monopolies and concurrent legislation on:—(1) excise taxes and taxes on transactions, in particular taxes on real estate acquisition, incremental value and on fire protection; (2) taxes on income, property, inheritance and donations; (3) taxes on real estate and on businesses with the exception of the determining of the tax rates.

Customs, the yield of monopolies, excise taxes with the exception of the beer tax, the transportation tax, the turnover tax and [illegible] serving non-recurrent purposes accrue to the Federation. [illegible] can, by means of a federal law, claim part of the income and corporation taxes to cover its expenditures not covered by other revenues. The final distribution of the taxes subject to concurrent [illegible] between the Federation and the Länder must be effected not [illegible] 31 Dec., 1952. Financial jurisdiction is uniformly regulated by federal [illegible].

The Basic Law is valid within the framework of the **Occupation Statute** proclaimed in the exercise of the [illegible] which is retained by the governments of France, the United States of America and the United Kingdom. It came into force on 21 Sept., 1949, but was modified by the New York decisions of March, 1951, which permitted the setting-up of a Ministry of Foreign Affairs.

According to the Occupation Statute the Federal State and the participating Länder have, subject only to the limitations contained therein, full legislative, executive and judicial powers in accordance with the Basic Law and with the constitutions of the Länder.

Powers [illegible] fields are specially reserved, including the right to request [illegible] statistics needed by the Occupation Authorities: (*a*) Disarmament and demilitarization, including related fields of scientific research, prohibitions and restrictions on industry and civil aviation; (*b*) Controls in regard to the Ruhr, restitution, reparations, decartelization, deconcentration, non-discrimination in trade matters, foreign interests in Germany and claims against Germany; (*c*) Foreign affairs, including international agreements made by or on behalf of Germany[2]; (*d*) Displaced

[1] Of 31 principal officials, appointed by April, 1950, 14 were former Nazis.

[2] Pursuant to the Petersberg Agreement of Nov., 1949, the Allied High Commission has transferred to the Federal Government [illegible] of consulates and, after approval by the Allied High Commission,

persons and the admission of refugees; (*e*) Protection, protection and security of Allied Forces, dependents, employees and representatives, their immunities and satisfaction of Occupation costs and their other requirements; (*f*) Respect for the Basic Law and the Land constitutions; (*g*) Control over foreign trade and exchange; (*h*) Control over internal action, only to the minimum extent necessary to ensure use of funds, food and other supplies in such manner as to reduce to a minimum the need for external assistance to Germany; (*i*) Control of the care and treatment in German prisons of persons charged before or sentenced by the courts or tribunals of the Occupying Powers or Occupation Authorities, over the carrying out of sentences imposed on them, and over questions of amnesty, pardon or release in relation to them.

The Occupation Authorities also reserve the right, acting under instructions of their governments, to resume, in whole or in part, the exercise of full authority if they consider that to do so is essential to security or to preserve democratic government in Germany or in pursuance of the international [illegible] of their governments.

The German Federal Government and the governments of the Länder have the power, after due notification to the Occupation Authorities, to legislate and act in fields reserved to these authorities, unless the Occupation Authorities otherwise specifically direct or such legislation or action would be inconsistent with decisions or actions taken by the Occupation Authorities themselves.

Any amendment of the Basic Law requires the express approval of the Occupation Authorities before becoming effective. Land constitutions, amendments thereof, all other legislation, and any agreements made between the Federal State and foreign governments will become effective 21 days after its official receipt by the Occupation Authorities unless previously disapproved by them, provisionally or finally. The Occupation Authorities will not disapprove legislation unless in their opinion it is inconsistent with the Basic Law, a Land constitution, legislation or other directives of the Occupation Authorities themselves or the provisions of the Statute, or unless it constitutes a grave threat to the basic purpose of the occupation.

Subject only to the requirements of their security the Occupation Authorities guarantee that all agencies of the Occupation will respect the civil rights of every person to be protected against arbitrary arrest, search or seizure, to be represented by counsel, to be admitted to bail as circumstances warrant, to communicate with relatives, and to have a fair and prompt trial.

Government.—An *Allied High Commission* has been established for the exercise of supreme Allied authority in the Federal Republic of Germany. This High Commission is headed by three High Commissioners, John J. McCloy for the United States of America, Sir Ivone Kirkpatrick, K.C.B., K.C.M.G., for the United Kingdom, André François-Poncet for France.

On 21 Sept., 1949, all authority with respect to the control of Germany, vested in or exercised by the respective commanders-in-chief of the occupation forces was transferred to the three High Commissioners. The headquarters of the High Commission is at the seat of the German Federal Government, which constitutes a special area directly under the High Commission and excluded from any individual zone of occupation. The organization of the High Commission at its headquarters is tripartite. All powers of the High Commission are uniformly exercised in the constituent Länder, in accordance with tripartite policies, by Allied Land Commissioners,

who have observers from the other two elements of the High Commission to advise and consult with them.

The *Federal Diet*, elected on 14 Aug., 1949 is composed of 402 members :—Christian Democrats (CDU; CSU), 139; Social Democrats (SPD), 131; Liberal parties (FDP; DVP; BDV), 52; Bavarian Party (BP), 17; German Party (DP), 17; Communists (KPD), 15; Economic Reconstruction Party (WAV), 12; Centre Party (ZP), 10; Conservatives (DKP; DRP), 5; South Schleswig Party (SSW), 1; Independent, 3.

Bonn on the Rhine is the capital of the Federal Republic.

Federal President.—Dr. Theodor Heuss (elected 12 Sept., 1949; to serve until Sept., 1954).

On 20 Sept., 1949, the Federal Diet elected, upon the proposal of the Federal President, Dr. Conrad Adenauer (CDU) Federal Chancellor.

The cabinet was, in April, 1951, composed as follows :—

Federal Chancellor and Minister of Foreign Affairs.—Dr. Conrad Adenauer (CDU).
Deputy Chancellor and Minister for ERP.—Franz Blücher (FDP).
Minister of Economic Affairs.—Dr. Ludwig Erhard (CSU).
Minister of Interior.—Dr. Robert Lehr (CDU).
Minister of Justice.—Dr. Thomas Dehler (FDP).
Minister of Finance.—Fritz Schaffer (CSU).
Minister of Food, Agriculture and Forestry.—Wilhelm Niklas (CSU).
Minister of Labour.—Anton Storch (CDU).
Minister of Transport.—Dr. Hans Christoph Seebohm (DP).
Minister of Posts.—Dipl.-Ing. Hans Schuberth (CSU).
Minister of Housing.—Eberhard Wildermuth (FDP).
Minister of Expellee Matters.—Dr. Hans Lukaschek (CDU).
Minister for Matters Concerning Germany as a Whole.—Jakob Kaiser (CDU).
Minister for Matters Concerning the Federal Council.—Heinrich Hellwege (DP).

Eastern Germany.

(Deutsche Demokratische Republik.)

Upon the establishment of the Federal Republic of Germany, the People's Council of the Soviet zone, appointed in 1948, was converted into a provisional People's Chamber.

On 7 Oct., 1949, the provisional People's Chamber enacted a constitution of the 'German Democratic Republic' (Soviet Zone of Germany). A provisional Land Chamber was also established, which consists of 50 deputies appointed by the Diets of the Lander of the Soviet Zone.

The cabinet, appointed on 15 Nov., 1950, is composed as follows :—

Prime Minister.—Otto Grotewohl (Socialist Unity Party).
Deputy Prime Ministers.—Walter Ulbricht (SUP); *President of the State Planning Commission,* Heinrich Rau (SUP); Otto Nuschke (Christian Democratic Union); *Minister of Finance,* Dr. Hans Loch (Liberal Democratic Party); *Minister for Reconstruction,* Lothar Bolz (National Democratic Party).
Foreign Affairs.—G[illegible] (CDU).
Interior.—Dr. Karl [illegible] (SUP).
State Security.—Wilhelm Zaisser (SUP).
Heavy Industry.—Fritz Selbmann (SUP).
Machine Construction.—Gerhard Ziller (SUP).

Light Industry.—Dr. Wilhelm Feldmann (NDP).
Agriculture and Forestry.—Paul Scholz (Democratic Farmers' Party).
Foreign and German Trade.—Georg Handke (SUP).
Commerce and Supply.—Dr. Karl Hamann (LDP).
Labour.—Roman Chwalek (SUP).
Health.—Col. Luitpold Steidle (CDU).
Transport.—Dr. Hans [illegible] (NDP party).
Posts and Telegraphs. [illegible] (CDU).
Education.—Paul Wandel (SUP).
Justice.—Max Fechner (SUP).

Area and Population.

I. Progress and Present Conditions.

According to the census held on 13 Sept., 1950, the distribution (in thousands of persons) was as follows (preliminary results):—

Länder	Area in sq. km.	Population			Per sq. km.
		Male	Female	Total	
British Zone	*97,645*	*11,392,225*	*12,748,186*	*24,140,411*	*247·2*
North Rhine-Westphalia	33,918	6,230,119	6,916,947	13,147,066	387·3
Lower Saxony	47,282	3,199,283	3,595,845	6,795,128	143·7
Schleswig-Holstein	15,668	1,210,891	1,382,726	2,593,617	165·5
Hamburg	747	751,932	852,668	1,604,600	2,148·1
American Zone	*107,418*	*8,321,492*	*9,543,646*	*17,865,138*	*166·3*
Bavaria	70,238	4,232,887	4,885,748	9,118,635	129·8
Württemberg-Baden	15,705	1,806,521	2,077,941	3,884,462	247·3
Hessen	21,101	2,017,495	2,286,425	4,303,920	204·0
Bremen	404	264,589	293,352	558,121	1,381·5
French Zone	*40,182*	*2,585,706*	*2,984,403*	*5,570,109*	*138·6*
Rhineland-Palatinate	19,824	1,396,651	1,597,001	2,993,652	151·0
Württemberg-Hohenzollern	10,406	572,152	668,847	1,240,999	119·3
Baden	9,952	616,903	718,555	1,335,458	134·2
Soviet Zone[3]	*107,173*	*7,379,546*	*9,934,188*	*17,313,734*	*161·5*
Saxony-Anhalt	24,669	1,801,800	2,358,739	4,160,539	168·7
Brandenburg	26,976	1,066,405	1,461,087	2,527,492	93·7
Mecklenburg	22,938	912,385	1,227,255	2,139,640	93·3
Saxony	16,992	2,336,630	3,221,936	5,558,566	327·1
Thuringia	15,598	1,262,326	1,665,171	2,927,497	187·7
Berlin[3]	*890*	*1,299,701*	*1,900,237*	*3,199,938*	*3,595·4*
Federal Republic (13 Sept., 1950)	245,275	22,299,423	25,276,235	47,575,658	194·0
Germany (29 Oct., 1946)	353,435	28,939,814	36,211,118	65,150,932	184·3
Germany (17 May, 1939)[1]	470,524	33,910,922	35,103,190	69,314,112	147·3
Germany (17 May, 1939)[2]	353,435	28,776,914	30,068,998	58,845,912	166·5

[1] Within the boundaries of 1 Jan., 1938. [2] Calculated for the 4 zones of occupation. [3] Census of 29 Oct., 1946.

On 23 April, 1949, some minor frontier rectifications were carried out in favour of the Netherlands (30 sq. miles), Belgium (8 sq. miles), Luxemburg and France.

An agreement [illegible] the Oder–Neisse line the permanent frontier between Germany and Poland was concluded between the German Democratic Republic (Soviet Zone) and Poland on 6 July, 1950. A protocol on the delimitation of the frontier was signed on 26 Jan., 1951; it extends the

Polish territory on the island of Usedom and in M[illegible] beyond the borders fixed in the Potsdam agreement. The Western Allies and the Federal German Republic do not recognize this agreement.

The following table shows the increase in population at various periods, with the annual rate of increase per cent. :—

Year	Increase	Annual rate per cent.	Year	Increase	Annual rate per cent.
1871 [1]	970,171	0 60	1900	4,087,277	1 56
1880	4,175,269	1·13	1905	4,274,100	1·52
1885	1,621,643	0 72	1910	4,284,715	1 41
1890	2,572,766	1 10	1933	2,807,842 [2]	0·56
1895	2,851,431	1·15	1939	3,154,152	0 67

[1] Since 1867. [2] Excluding the Saarland.

II. Vital Statistics.

Year	Marriages	Live births	Deaths	Divorces
1939 [1]	946,279	1,639,126	1,011,009	62,992
1946 [2]	380,575	708,659	533,971	48,896
1947 [2]	451,398	748,975	525,482	77,109
1948 [2]	493,606	769,111	476,808	88,374
1949 [2]	476,806	793,095	479,931	80,937

[1] Germany. [2] Federal Republic.

III. Principal Towns.

According to the preliminary results of the census of 13 Sept., 1950, the resident population of the principal towns was as follows :—

Town	Land	Population	Town	Land	Population
Berlin [1]	Berlin	3,187,470	Chemnitz [1]	Saxony	250,188
Hamburg	Hamburg	1,604,600	Mannheim	Wurttemberg-Baden	244,000
Munich	Bavaria	831,017			
Leipzig [1]	Saxony	607,655	Lubeck	Schleswig-Holstein	237,860
Essen	North Rhine-Westphalia	605,125	Magdeburg [1]	Saxony-Anhalt	236,326
Cologne	North Rhine-Westphalia	590,825	Brunswick	Lower Saxony	223,263
			Halle [1]	Saxony-Anhalt	222,505
Frankfurt	Hessen	523,923	Wiesbaden	Hessen	218,255
Dortmund	North Rhine-Westphalia	500,150	Oberhausen	North Rhine-Westphalia	202,343
Dusseldorf	North Rhine-Westphalia	498,347	Karlsruhe	Wurttemberg-Baden	198,014
Stuttgart	Wurttemberg-Baden	481,845	Augsburg	Bavaria	184,712
			Erfurt [1]	Thuringia	174,633
Dresden [1]	Saxony	467,966	Krefeld	North Rhine-Westphalia	170,482
Bremen	Bremen	444,196			
Hanover	Lower Saxony	441,615	Kassel	Hessen	161,322
Duisburg	North Rhine-Westphalia	408,877	Bielefeld	North Rhine-Westphalia	153,111
Wuppertal	North Rhine-Westphalia	362,125	Mulheim-on-Ruhr	North Rhine-Westphalia	148,606

Potsdam[1]	Brandenburg	113,568			
Bremerhaven	Bremen	113,025	Watenstedt-Salzgitter	Lower Saxony	100,630
Bonn	North Rhine-Westphalia	111,287			

[1] Census of 29 Oct., 1946.

Religion.

The Nazi-influenced constitution of the German Evangelical Church of July, 1933, was abrogated in August, 1946, and a new Evangelical Church in Germany was elected. The president of this Church is Dr. Otto Dibelius, Bishop of Berlin Brandenburg (elected 12 Jan., 1949). The Evangelical Church was admitted to the World Council of Churches in Feb., 1946. There were 445 members of the Society of Friends in 1949.

There are 5 Roman Catholic archbishoprics and 17 suffragan bishoprics The 'Old Catholics' have a bishop at Bonn. A concordat between Germany and the Holy See was signed on 20 July, 1933, and was ratified on 10 Sept., 1933.

Le Bras (G.) Les Églises en Allemagne. London, 1949.

Education.

Education is general throughout Germany, all children between the ages of 6 and 14 being bound to attend some recognized school.

Since Sept., 1941, the Latin script has replaced the Gothic in all German schools.

Since 1945 the educational system has been in process of a thorough reform in every Land, and no comprehensive survey can as yet be given.

In May, 1950, there were 27,689 public and private elementary schools with 127,140 teachers (78,050 males and 49,090 females) and 6,135,450 pupils (3,112,584 boys and 3,022,866 girls) in the Federal Republic except Baden. There were 579 public and private middle schools (*Mittelschulen*) with 6,011 teachers and 196,067 pupils (89,926 boys and 106,141 girls) and 1,488 secondary schools with 28,872 teachers and 620,488 students (369,460 boys and 251,028 girls).

During the summer semester 1950 there were in the Federal Republic 16 universities with 74,258 German and foreign students; 10 philosophical-theological colleges (Bamberg, Dillingen, Eichstätt, Frankfurt-on-Main, Freising, Fulda, Paderborn, Passau, Regensburg, Trier) with 3,778 students in the Roman Catholic theological and philosophical faculties; and 7 technical colleges with 21,640 students.

There were, besides: the Mining Academy in Clausthal-Zellerfeld, the Agricultural and Veterinary College in Giessen (former university), the Veterinary and Horticultural Colleges in Hanover, the Agricultural College in Hohenheim, the commercial colleges in Mannheim and Nuremberg, the

Philosophical College in Augsburg, 4 Roman Catholic and 4 Protestant training colleges, academies for music in Cologne, Detmold and Munich, the Academies of Art in Dusseldorf and Munich, the Academy for Athletics in Cologne.

There were, in 1950, 3,314 cinemas with a seating capacity of 1,322,000.

Samuel (R. H.) and *Thomas* (R. H.), Education and Society in Modern Germany. London, 1949.

Justice and Crime.

On 22 Oct., 1945, the Allied Control Council published 'the fundamental principles of judicial reform which shall be applied throughout Germany.' According to these, all persons are equal before the law, and no person, whatever his race, nationality or religion, is to be deprived of his legal rights. No person is to be deprived of life, liberty or property without the process of the law.

Judicial authority is exercised by the Federal Constitutional Court, by the Supreme Federal Court, by the federal courts provided for in the Basic Law and by the courts of the Lander. Judges are independent and subject only to the law. Extraordinary courts are inadmissible. The death sentence is abolished.

Manual of German Law, I. Civil and Commercial Law. H.M.S.O., 1950

Social Welfare.

Public assistance is given to all persons who are not able to earn their living and have no or not sufficient income from other sources or pensions. It does not include pensions of social insurance, of war-disabled, widows etc., unemployment relief, and juvenile welfare and education.

Public assistance has greatly increased since the war, mainly for people expelled from the German territories east of the Oder–Neisse line, for immigrants from the Soviet Zone or Berlin, for evacuees from the bombed cities, for families of prisoners of war and of missing persons, for war-disabled, war-widows and orphans. It also includes relief for recipients of social insurance pensions, for foster-children and other persons in need of assistance.

In the fiscal year 1 April, 1949–31 March, 1950, public assistance in the Federal Republic, including assistance in homes and hospitals, was given to 1,926,986 persons (as at 31 March, 1950) and amounted to DM1,206,412,000 or DM25·33 per head of population, divided as follows:—

Lander	Number of persons relieved [1]	Expenditure (in DM) [2]	Charge per head of population
Schleswig-Holstein	128,331	73,168,000	27·22
Hamburg	59,061	39,169,000	25·13
Lower Saxony	248,762	169,237,000	24·52
North Rhine-Westphalia	556,351	373,895,000	28·71
Bremen	28,830	16,611,000	30 60
Hessen	173,810	112,335,000	26 01
Wurttemberg-Baden	145,728	78,079,000	19 90
Bavaria	119,327	245,274,000	26·60
Rhineland-Palatinate	95,211	50,797,000	17·39
Baden	42,000 [3]	31,115,000	23·91
Württemberg-Hohenzollern	29,515	16,131,000	13 56

[1] Only persons receiving regular cash assistance and assisted in homes and hospitals.
[2] Total of regular and casual cash assistance and of assistance in homes and hospitals.
[3] Estimated.

Finance.

Revenue and expenditure in the administration of the bizonal area (fiscal year 1 April to 31 March), in RM/DM 1,000 :—

	1947–48	1948–49	1949–50
Revenue, grand total	325,189·4	650,629·5	1,216,779
Railways	151,500·0	174,500·0	29,000
Posts	109,300·0	120,000·0	105,000
Länder	15,382 6	15,120·0	—
Expenditure, grand total	228,814 6	641,587·3	1,354,470
Of which economic aid to Berlin	—	218,500·0	299,000

The federal budget for 1950–51 envisages revenues of DM 11,452 million and expenditures of DM 12,672 million. The deficit is to be financed by DM 500 million from the issue of coins and by DM 720 million in loans.

Customs and tax revenue (including trade taxes) in the British-American and French Zones were as follows (in millions of RM/DM) :—

	1936–37	1946–47	1947–48	1948–49 [1]	1949–50 [1]
Former Deutsches Reich	11,552 9	—	—	—	—
British-American Zone	—	11,502 9	13,426·6	13,111 2	11,701·5
French Zone	—	1,185 9	1,651 4	1,387 4	1,512·1

[1] Including aid for Berlin.

All titles on public debts have been cancelled by the currency reform of 18 June, 1948.

The budget of the Eastern 'German Democratic Republic' shows, for the year 1950 revenues of DM (East) 13,586·2 million and expenditures of DM (East) 13,481·4 million. The main items of expenditure, in million DM (East) are :—Finances, 5,469·3; subsidies to the Länder, 1,904·2; transport, 1,507; industry, 980); administration, 825·3; food supply, 683; trade, 580·8. The main items of revenue :—Taxes, 10,205·1; transport, 1,675·9; post and telegraph, 648·3; financial services, 605·9. The budget of the nationalized industries balances at DM (East) 2,543·5. The budget of the 5 Länder balance at DM (East) 2,756·1, led by Saxony with 757 2 million.

Reparations.—An Inter-Allied Reparations Agency was established by the Paris agreement signed on 14 Jan., 1946. The following 19 countries have been declared entitled to reparations to compensate for the loss and suffering caused by Germany :—Albania, Union of South Africa, Australia, Belgium, Canada, Denmark, Egypt, United States, France, United Kingdom, Greece, India, Luxemburg, Norway, New Zealand, Netherlands, [illegible], Yugoslavia, Pakistan. By the end of 1949, German assets allocated among the Allies comprised : 701,990 gross tons of merchant shipping and 53,435 tons allotted as scrap; 701 plants and part plants, with a residual value of 430,089,136 marks (1938 value, $1 = 4 marks).

Defence.

Army.—The German Army surrendered unconditionally on 8 May, 1945.

There exists, however, a para-military police force in the Soviet Zone, nominally under the Minister of the Interior, but in reality controlled by Deputy Prime Minister Ulbricht, secretary of the Politburo of the Socialist

Unity Party. It consisted, in Dec., 1949, of about 35 units (*Bereitschaften*) of 1,200 men each and is to be brought up to a strength of 50 units comprising 60,000 men. These units are not employed in ordinary police duties; they are staffed by former German generals, and recruiting is chiefly done among former members of the *Wehrmacht* and the Communist Free German Youth organization.

Navy.—There is no longer any German Navy, its surviving ships having been distributed between the British, United States, French and Soviet fleets. These included only two seaworthy ships of large size, the cruisers *Prinz Eugen* and *Nürnberg*, of which the former was used by the United States Navy for atom-bomb experiments, while the latter was taken over by Russia.

Production and Industry.

I. Agriculture.

Generally speaking, small estates and peasant proprietorship prevail in the west and south, while large estates prevail in the north and north-east of the Federal Republic. In the Russian Zone the large estates have been divided up without compensation and distributed among more than a million [illegible] workers and refugees from the area under Polish administration. In 1949, the arable land of the 4 zones was 13,043,000 hectares, of which 5,027,000 hectares were in the Soviet, 3,540,000 in the American, 3,403,000 in the British and 1,073,000 in the French Zones.

The total number of estates under agriculture and forestry, and their division by size were as follows in the Federal Republic (as at 18 Jan., 1950):—

Land	Total	0·5–5 hectares	5–20 hectares	20–100 hectares	over 100 hectares
Schleswig-Holstein	67,689	23,249	22,368	21,182	890
Hamburg	4,791	3,504	833	444	10
Lower Saxony	304,547	151,522	104,948	44,931	3,116
North Rhine-Westphalia	272,255	156,986	85,062	28,423	1,784
Bremen	2,277	1,325	570	378	4
Hessen	213,492	147,933	57,371	6,724	1,464
Wurttemberg-Baden	206,684	143,322	56,065	6,352	945
Bavaria	503,707	206,980	228,781	65,259	2,887
Brit./U.S. Zones	*1,575,642*	*834,851*	*555,998*	*173,693*	*11,100*
Baden	105,045	70,748	28,970	4,600	727
Rhineland-Palatinate	220,783	152,187	62,965	4,333	1,298
Wurttemberg-Hohenzollern	108,962	66,495	36,843	5,009	615
French Zone	*434,790*	*289,430*	*128,778*	*13,942*	*2,640*
Federal Area	*2,010,432*	*1,121,281*	*684,776*	*187,635*	*13,740*

Area (in 1,000 hectares) and yield (in 1,000 metric tons) of the main crops in the Federal Republic were as follows:—

	Area				Yield			
	1939–43	1948	1949	1950	1939–43	1948	1949	1950
Wheat	1,013·7	907·0	922·1	1,013	2,178·1	1,953·6	2,471·0	2,614
Rye	1,483 5	1,533·6	1,491·3	1 431	2,814 7	2,874 6	3,483·3	3,178
Barley	757·7	459 6	495·5	613	1,558·4	854·3	1,213·2	1,473
Oats	1,519·2	1,291·7	1,321 5	1,340	3,090·8	2,217·0	3,033·4	2,924
Potatoes	1,081·0	1,151·1	1,123·7	1,141	18,654·4	23,547 1	20,875.0	27,959
Sugar beet	157·8	157·5	166 9	193	5,173·6	4,700·0	4,735·0	6,975

Wine production in the Federal Republic was 2·18 million hectolitres in 1948 and 1·36 million hectolitres in 1949; preliminary estimate for 1950, 3·24 million hectolitres.

Livestock in the Federal Republic on 2 Dec., 1950, were as follows:—Cattle, 11,150,000 (including 5,734,000 milch cows); horses, 1,570,000; sheep, 1,642,000; pigs, 11,890,000; goats, 1,347,000; poultry, 51,801,000.

II. Forestry.

Forestry in Germany was an industry of great importance, conducted under the care of the state on scientific methods. The forest area of Germany in 1946 was 9·6 million hectares, of which (in 1950) 6·9 million were in the Federal Republic. In 1949-50, cuttings amounted to 29·5 million cubic meters in the Federal Republic.

III. Fisheries.

The yield of sea and coastal fishing in the Federal Republic was 471,400 metric tons in 1949, valued at DM 154 million.

On 1 Jan., 1950, the number of vessels of the fishing fleet was 224 (76,600 gross registered tons).

As Germany is not permitted to operate whaling vessels, a Hamburg firm in 1950–51 operated in the Antarctic under the Panamanian flag.

IV. Mining.

The great bulk of the minerals raised in Germany is produced in North Rhine-Westphalia (for coal, iron and metal smelting-works), Central Germany (for brown coal), the Harz (for iron and copper ore) and the Westerwald (for iron ore).

The quantities of the principal minerals raised in the Federal Republic were as follows (in 1,000 metric tons):—

Minerals	1938	1946	1947	1948	1949	1950
Coal [1] .	136,956	53,946	71,124	87,033	103,238	110,754
Lignite [2] .	68,535	51,588	58,727	64,855	72,264	75,840
Iron ore	10,796	3,877	4,444	7,275	9,112	10,883
Potash	4,179	2,608 [4]	3,317 [4]	5,084 [4]	7,291	8,927
Crude oil	551 [3]	650	578	631	812	1,119

[1] Output for Germany (incl. Austria), in 1938, was 186,700,000 metric tons; for the 4 zones of occupation (incl. Saar territory), in 1946, 64,300,000, and in 1947, 84,000,000.

[2] Output for Germany (incl. Austria) in 1938 was 195,000,000 metric tons; for the 4 zones of occupation, in 1946, 160,200,000, and in 1947, 161,700,000.

[3] 1936.

[4] Combined British-American Zones.

The production of iron and steel in the Federal Republic was (in 1,000 metric tons):—

	1938	1946	1947	1948	1949	1950
Pig-iron. . .	15,176	2,083	2,264	4,663	7,140	9,473
Steel ingots and castings .	17,902	2,551	3,060	5,561	9,156	12,121
Rolled products finished .	11,730	1,970	2,161	3,721	6,359	8,166

In Aug., 1947, the commanders-in-chief of the British and American Zones fixed for the united Bizone a new maximum annual steel production

of 10,700,000 tons (11,100,000 tons for three western zones). Production of steel ingots and steel for casting during the year 1 Oct., 1949–30 Sept., 1950, was 11,218,657 metric tons.

Large uranium mines in Saxony, stretching from Aue to Annaberg in the Erzgebirge, have been worked from 1945 under Soviet direction; they employ between 40,000 and 50,000 miners.

V. Manufactures.

The chief seat of the German iron production is the Ruhr and Saarland; to a less extent also in Sieg, Lahn and Dill districts. Steel is chiefly made in the Ruhr and Saarland. The manufacture of both iron and steel is carried on in the vicinity of the coal mines in the district of the Lower Rhine, Saarland and in Westphalia. The electrical industry was found principally in Berlin; the chemical industry in North Rhine–Westphalia, Rhineland-Palatinate, Hessen and Saxony-Anhalt. Saxony is the leading state in the production of textiles, but Westphalia also produces linen; Saxony, Westphalia, Wurttemberg and Bavaria produce cotton goods. Woollens are manufactured in Saxony, Brandenburg, North Rhine Westphalia and Thuringia; silk in North Rhine–Westphalia and Baden. Beetroot sugar in an important manufacture in Saxony-Anhalt, Silesia, Hanover and Mecklenburg-Pommern. Potash is produced mainly in Saxony–Anhalt, Thuringia and Lower Saxony; glass, porcelain and earthenware in Bavaria, Thuringia, Brandenburg and Saxony; clocks and wooden ware in Baden, Wurttemberg and Bavaria, and beer principally in Bavaria.

The production of important industrial products in the British–American Zones and, for 1949 and 1950, in the Federal Republic was as follows:—

Products	1936	1947	1948	1949	1950
Electricity (million kwh.)	—	16,017	17,799	23,840	—
Gasoline (1,000 tons)	492·0	71·8	120·0	410	973
Diesel oil (1,000 tons)	94·3	78·5	91·4	301	562
Potassium fertilizers, K_2O (1,000 tons)	528·0	317·3	510·0	749	912
Sulphuric acid, SO_3 (1,000 tons)	821·0	421·8	621·1	930	1,180
Soda, Na_2CO_3 (1,000 tons)	375·0	253·8	380·6	569	735
Cement (1,000 tons)	7,509·0	2,695·4	5,113·2	8,460	10,877
Rayon:					
Staple fibre (1,000 tons)	22·3	15·7	37·9	84	113
Continuous rayon filament (1,000 tons)	21·9	10·9	25·7	45	49
Cotton yarn (1,000 tons)	233·7	65·7	102·6	228	282
Woollen yarn (1,000 tons)	41·5	24·7	34·8	65	85
Passenger cars	174,072	9,541	30,019	103,998	216,107
Commercial cars	36,118	12,787	26,567	51,750	81,677
Bicycles (1,000's)	859·1	297·2	893·7	1,435	1,319

Commerce.

The distribution of the imports and exports of the Federal Republic according to principal countries, compared with the 1936 figures for the German Reich, was as follows (in millions of RM/DM):—

Country	Imports			Exports		
	1936	1949	1950	1936	1949	1950
Argentina	118·5	163·4	271·9	97·7	7·0	104·5
Australia	42·7	111·5	268·2	34·7	11·8	111·5
Austria	76·6	17·2	178·3	108·5	233·9	311·6
[illegible]	138·6	139·7	104·8	211·5	425·8	677·0
[illegible]	131·4	84·4	86·9	133·4	37·8	147·4
Canada	18·8	71·3	42·5	35·1	22·0	41·4
Chile	58·8	18·6	57·6	19·4	7·7	29·8
Columbia	41·5	9·1	56·1	45·3	7·8	75·8
Cuba	7·7	95·4	115·6	11·1	3·1	30·7
Denmark	154·3	171·0	490·7	182·3	62·3	353·4
France	98·9	173·9	691·2	254·5	678·7	613·9
Indonesia	112·9	91·6	233·7	38·6	32·9	52·2
Italy	208·5	328·5	507·3	240·6	224·2	486·4

Netherlands	168·5	423·3	1,246·1	395·5	388·0	1,164·1
New Zealand	6·7	75·1	81·5	5·5	3·4	3·0
Norway	87·9	98·5	277·1	91·3	74·1	119·1
Saar Territory	—	80·1	181·2	—	90·1	152·8
Sweden	191·7	297·6	637·0	230·4	241·0	551·2
Switzerland	106·2	238·7	350·3	225·5	263·8	492·3
Turkey	118·5	94·1	218·6	79·4	50·1	236·9
Union of South Africa	39·5	84·1	128·6	56·5	23·7	83·8
United Kingdom	263·7	185·9	188·8	105·8	391·5	360·8
U.S.A.	232·2	2,819·0	1,734·5	172·0	169·6	430·1

The main items of German imports in 1950 were foodstuffs ($1,041 million), and raw materials ($801 million); exports, finished manufactures ($1,280 million) and semi-finished manufactures ($376 million).

Total trade between Germany and the United Kingdom for 5 years, according to the Board of Trade returns (in £ sterling):—

	1938	47	1948	1949	1950
Imports into U.K.	30,137,614	19,285,293	29,577,263	37,573,173	41,714,910
Exports to Germany	20,549,196	21,105,687	25,175,686	26,700,172	41,009,473
Re-exports from U.K.	6,158,030	6,894,376	5,973,218	6,948,148	11,814,349

Der Aussenhandel der Bundesrepublik Deutschland. (Published by Statistisches Bundesamt.)

Communications.

I. Roads and Railways.

On 31 Dec., 1950, the total length of roads in the Federal Republic was 127,621 km., including 2,116 km. *autobahn*, 24,251 km. highways, 49,327 km. first-class and 51,927 km. second-class country roads. Motor vehicles licensed in the Federal Republic on 31 Dec., 1950, numbered 2,155,355 (including 987,583 motor cycles).

The total length of railway line in the Federal Republic was 30,734 km. on 31 Dec., 1950. In 1950 the railways carried 1,297 million passengers and 232 million metric tons of freight.

II. Navigation.

On 31 Dec., 1950, the tonnage of the West-German mercantile marine was 762,263 registered gross tons (4,492,708 in 1939 for the whole of Germany).

The inland-waterways fleet in the Federal Republic on 31 Dec., 1950, comprised 3,096,909 tons. The length of the navigable rivers and canals in the Federal Republic is 4,576 km.

Total goods traffic by sea-going ships in 1950 was 9,851,000 metric tons entering (14,492,000 in 1936) and 13,420,000 metric tons clearing (21,638,000 in 1936) in the ports of the Federal Republic.

III. Posts and Telegraphs.

The following statistics refer to the whole of Germany for the year 1937–38:—Length of telegraph and telephone lines, 397,200 km. or 236,260 miles; of telegraph wire, 28,256,500 km. or 17,519,300 miles; number of telephone boxes, 3,623,700.

Number of telephones in the Federal Republic on 31 Dec., 1950, was 2,313,000; in the Soviet Zone (1949), 250,000. Number of wireless licences in the Federal Republic on 31 Jan., 1951, was 9,075,962.

Currency, Banking and Credit.

Pursuant to the laws issued on the monetary reform by the military governors of the British, American and French Zones, from 18 to 26 June, 1948, the 'Reichsmark' was replaced by the 'Deutsche Mark.' The RM notes circulated by the former Reichsbank were exchanged for DMs at the ratio of 1 to 1 up to the amount of RM 60, and all amounts exceeding RM 600 as well as all bank and saving deposits at the ratio of RM 100 to DM 6·5. All RM [illegible] urities were depreciated at the ratio of 10 to 1.

On 1 [illegible], 1948, the Bank of German Länder (Bank Deutscher Länder) was established in Frankfurt as the central bank of issue for the 3 western zones and designated the exclusive agency for issuing notes and coins. The Bank of German Lander is the central reserve bank of the Land Central Banks (Landeszentralbanken) set up in the 11 Lander of the 3 western zones, and maintains business connexions only with them and with the Federal Administration. The Land Central Banks in the 11 Länder are 'reserve banks' for the credit and saving banks existing in the Länder concerned.

The most important items of the balance sheets of the Bank of German Länder in Frankfurt and the 11 Land Central Banks in the 3 western zones, on 31 Oct., 1950, were as follows (in millions of DM):—

	Bank of German Länder	11 Land Central Banks	Total [1]
Assets			
Credit balances in foreign currency [2]	1,262·5	—	1,262·5
Foreign notes, coin, bills and cheques [2]	57·8	—	57·8
Claims arising from settlement of foreign trade	24·9	—	24·9

[1] Without the credit balances between the Bank of German Lander and the Land Central Banks.
[2] Controlled by the Allied High Commission.
[3] From the monetary reform.
[4] Including notes issued in Berlin.

On 8 July, 1950, the right of coinage was transferred to the Federal Republic. On 31 Oct., 1950, the circulation of coins in the Federal Republic amounted to DM 145 million and is not included in the circulation of notes as shown by the Bank deutscher Lander.

In the Soviet Zone the circulating RM notes were exchanged for 'Deutsche Mark' (East) in June, 1948. A 'German Bank of Issue' was set up in Berlin and empowered to issue the new notes. This bank is the central institute for the 'Emissions- und Girobanken' established in April, 1947, in the 5 Lander of the Soviet Zone. Statement of the 'German Bank of Issue' was first published on 30 Sept., 1949. The amount of the issued notes at 31 Oct., 1950, was DM (East) 4,102 million and of coins DM (East) 67 million.

The legal tender of Berlin is the German Mark (DM), viz. the DM (East) in the Soviet Sector and the DM (West) in the Western Sectors. Originally, a restricted circulation of the DM (East) was permitted in the Western Sectors. On 20 March, 1949, when the DM (West) became the only legal tender of the Western Sectors the Zentralbank of Berlin was established. Its functions are similar to those of the Zentralbanks of the Lander of the Federal Republic. The legal tender for the Western Sectors of Berlin is being issued by the Bank deutscher Lander. On 30 Sept., 1950, it amounted to DM (West) 432 million which are included in the circulation of notes shown by the Bank deutscher Lander.

On 31 Oct., 1950, 1 DM (West) was exchanged for 5 DM.

Money, Weights and Measures.

The rate of exchange for DM (West) has been fixed at 11·76 to the £ and 4·20 to the $.

The metric system of weights and measures is in force.

Diplomatic Representatives.

No diplomatic relations exist between the Federal Republic and other countries. The 'German Democratic Republic' has established diplomatic relations with the Soviet Union and the satellite states.

The Federal Republic is represented by Consuls-General in London, Paris, Washington, Amsterdam, Athens, Brussels, Chicago, Copenhagen, Istanbul, Ottawa, Pretoria, Rome and Stockholm.

There are British consular representatives at Berlin, Bremen, Dusseldorf, Frankfurt, Hamburg, Munich and Stuttgart.

Books of Reference concerning Germany.

STATISTICAL INFORMATION.—The central statistical agency for the Federal Republic is the Statistisches Bundesamt (Rhein St. 25, Wiesbaden-Biebrich), that for the German Democratic Republic, the Statistisches Zentralamt (Kloster St. 80, Berlin, C.2).

The Länder.

In 1946, the state of Prussia was liquidated, and a number of territorial re-divisions have taken its place As a result the zones are now composed of the following states (Länder):—

British Zone:—Schleswig-Holstein, including the former Prussian Province of [illegible] capital: Kiel. Lower Saxony, including the former [illegible] of Hanover and the former Länder of Brunswick, Oldenburg and Schaumburg-Lippe; capital: Hanover. North Rhine-Westphalia, including the former Prussian Province of Westphalia, the former [illegible] districts of Köln, Aachen and Dusseldorf and the former [illegible]; capital: Düsseldorf. Hamburg, including the former Land Hamburg.

United States Zone:—Bavaria, corresponding to the former Land Bavaria, except the Palatinate on the left bank of the Rhine and the town and rural district of Lindau; capital: Munich. Württemberg-Baden, including the U.S. Occupation Zone of the former Länder of Württemberg and Baden; capital: Stuttgart. Hessen, including the territory of the former Land Hessen on the right bank of the Rhine and the former Prussian Province of Hessen-Nassau except the four rural districts Oberwesterwald, Unterwesterwald, Unterlahnkreis and St. Goarshausen; capital: Wiesbaden. Bremen, corresponding approximately with the former Land Bremen.

French Zone:—Rhineland-Palatinate, including the Palatinate, the territory of the former Land Hessen on the left bank of the Rhine, the governmental districts of Koblenz and Trier of the former Prussian Rhine Province and the rural districts of Oberwesterwald, Unterwesterwald, Unterlahn and St. Goarshausen of the former Prussian Province of Hessen-Nassau; capital: Koblenz. Baden, including the French occupied part of the former Land Baden; capital: Freiburg. Württemberg-Hohenzollern, [illegible] the French occupied part of the former Land Württemberg [illegible] Prussian district of Hohenzollern; capital: Tübingen. Saar District, including the Saar Territory as defined by the Treaty of

Versailles enlarged in October, 1946, by a number of adjacent rural districts of the former Prussian Rhine Province; capital: Saarbrücken.

Soviet Zone:—BRANDENBURG, including the former Province of Brandenburg on the left bank of the rivers Oder and Western Neisse; capital: Potsdam. SAXONY [illegible] the former Land Saxony and the part of the former Province of [illegible] left bank of the Western Neisse; capital: Dresden. SAXONY–ANHALT, including the former Prussian Province of Saxony except the [illegible] district of Erfurt, and the former Land Anhalt; capital: [illegible], including the former Land Thuringia and the governmental district Erfurt of the former Prussian Province of Saxony; capital: Weimar. MECKLENBURG, including the former Land Mecklenburg and the part of the former Province of Pomerania on the left bank of the river Oder; capital: Schwerin.

BADEN.

Government.—Baden is governed by a Christian Democrat government, headed by Leo Wohleb.

The Constitution of the Land was approved by a popular referendum on 18 May, 1947, by 297,031 against 140,216 votes.

The elections for the Diet, held on 18 May, 1947, gave the Christian Democrats 34 seats, Social Democrats 13, Democrats 9, Communists 4.

Area and Population.—Baden, consisting of the southern portion of the former Land Baden, comprises 9,952 square kilometres (3,842 square miles). Capital, Freiburg (Breisgau). Population (census of 13 Sept., 1950, preliminary), 1,335,458 (616,903 males, 718,555 females); an increase of 13% over the census population of 29 Oct., 1946.

Vital statistics, 1949:—Live births, 23,530, including 2,490 illegitimate; marriages, 12,336; deaths, 14,509; still births, 501.

Religion and Education.—Of the 1946 census population, 851,462 were Roman Catholics, 305,460 Protestants, 183 Jews and 24,937 others or undefined.

In 1950 there were 1,055 primary schools with 177,283 pupils and 3,835 teachers; 75 secondary schools with 18,152 pupils and 1,013 teachers; 118 commercial and industrial schools with 28,254 pupils and 477 teachers; 578 agricultural schools with 28,175 pupils and 408 teachers; 3 teachers' training colleges with 325 students and 28 teachers; a conservatorium with 212 students; an art school with 44 students, and the University of Freiburg with 3,500 students and 178 professors and lecturers.

Justice.—There were, in 1951, 38 county courts, 5 district courts and 1 court of appeal.

Production and Industry.—Acreage of the most important crops (1,000 hectares) in 1950:—Wheat, 28·1; rye, 15·2; barley, 18·4; oats, 15·7; maize, 2·1; potatoes, 25·7; sugar beet, 0·2; vineyards, 5·5; pastures, 38·1; total agricultural land, 476·9.

Livestock (June, 1950):—24,926 horses (1949); 394,987 cattle (including 214,955 milch cows); 195,800 pigs; 31,603 sheep; 69,625 goats (1949); 500,292 poultry (1949).

There were (Nov., 1950), 2,000 industrial undertakings, employing 151,060 workers, of whom 93,773 were men.

Roads.—Baden comprises 1,096 km. of federal roads, 1,963 first-class roads and 2,139 second-class roads. Number of motor vehicles (1 Aug.,

1950), 18,505 passenger cars, 453 buses, 4,382 agricultural tractors, 40,117 motor cycles.

Books of Reference.

STATISTICAL INFORMATION.—The Statistisches Landesamt (39, Urach St., Freiburg) was set up in 1947 as the successor of the Statistical Office of the former Land Baden. *Director.*—Dr. Wolters. Main publications —

Statistik in Baden. Quarterly, from 1949.
Beiträge zur Statistik und Landeskunde.
Statistische Mitteilungen für Baden.

BAVARIA.

(BAYERN.)

Constitution.—The Constituent Assembly, elected on 30 June, 1946, passed a constitution on the lines of the democratic constitution of 1919, but with greater emphasis on state rights; this was agreed upon by the Christian Social Union and the Social Democrats.

The elections for the Diet, held on 26 Nov., 1950, had the following results:—64 Christian Social Union, 63 Social Democrats, 39 Bavarian Party, 26 Refugee Association, 12 Free Democratic Party.

The cabinet, formed on 18 Dec., 1950, is a coalition of the Christian Social Union, the Social Democratic Party and the Refugee Association, and is headed by Minister President Dr. Hans Ehard.

Area and Population.—Bavaria within the U.S. Zone of occupation, *i.e.*, without the Palatinate and the district of Lindau (both in the French Zone), has an area of 70,237·90 square kilometres (27,111·83 square miles). The capital is Munich. The population (census of 13 Sept., 1950, preliminary) numbered 9,118,635 (4,232,887 males, 4,885,748 females); an increase of 328,985 over the census of 29 Oct., 1946.

Vital statistics, 1949:- M[illegible] 90,060; births, 156,253, including 20,698 illegitimate; deaths, [illegible]; divorces, 15,381.

Religion and Education.—On 29 Oct., 1946, there were 6,271,648 Roman Catholics (71·35%), 2,325,663 Protestants (26·46%), 37,693 other Christians (0·43%), 22,770 Jews (0·26%), 123,447 without denominational allegiance (1·40%). Compared with 1939, the Roman Catholic population has decreased by 1·83%, Protestants have increased by 1·6% and Jews by 0·05%.

In May, 1950, there were 6,680 elementary schools, with 28,365 teachers and 1,237,523 pupils (625,236 boys, 612,287 girls); 339 secondary schools, with 5,519 teachers and 121,359 pupils (72,415 boys, 48,944 girls); 3,239 farmers' vocational centres, with 112,772 pupils (48,125 boys, 64,647 girls); 267 technical and commercial colleges, with 2,154 teachers and 238,777 pupils (145,482 boys, 93,295 girls); 25 teachers' training colleges, with 403 teachers and 4,711 pupils (1,884 boys, 2,827 girls). In summer term, 1950, the University of Munich had 10,499 students; the University of Erlangen, 4,107; the University of Wurzburg, 3,152; the Technical University of Munich, 4,054; the Nuremberg School of Economics and Social Sciences, 816; the Roman Catholic Theological Colleges at Augsburg, Bamberg, Dillingen, Eichstatt, Freising, Passau and Regensburg, 3,000; the Protestant Theological College at Neuendettelsau, 111 students.

Justice and Crime.—There were in 1950, 162 county courts, 21 district courts, 3 courts of appeal and 1 supreme court. Convictions in 1949 numbered 82,951, of which 23,957 concerned theft and embezzlement, 13,204 economic regulations, and 10,043 occupation regulations.

Social Welfare.—In the year ended 31 March, 1950, an average of 487,581 persons received public assistance amounting to DM 165,211,000 or DM 355·6 per head.

Finance.—Revenue and expenditure (estimates) in million marks :—

Ordinary	1948	1949	1950 [2]	Extraordinary	1948	1949	1950
Revenue .	3,020	2,999·8	1,621·6	Revenue .	—	185·0	407·9
Expenditure .	3,020 [1]	2,999·8 [1]	1,621·6	Expenditure .	—	185·0	407·9

[1] Including RM 668 million for occupation and RM 442 million for refugees and displaced persons in 1948; and DM 751·9 million and DM 650·5 million respectively in 1949.

[2] Occupation and refugee accounts have been transferred to the Federal Government. Bavaria shares in these accounts only with a quota of DM 78·5 million and DM 111·8 million respectively.

Production and Industry.—Acreage and yield of the most important agricultural products were as follows :—

	Area (1,000 hectares)				Yield (1,000 metric tons)			
	1947	1948	1949	1950 [1]	1947	1948	1949	1950 [1]
Wheat . .	298·2	307·6	301·4	348·3	331·5	483·2	663.6	773·3
Rye . .	334·0	351·5	344·0	360·9	388·6	495·6	616·1	753·4
Barley . .	196·8	178·0	199·4	266·5	222·7	256·6	402·3	588·1
Oats . .	275·8	265·1	273·2	287·2	268·4	325·6	454·3	496·9
Potatoes .	277·5	315·7	306·1	304·2	2,222·2	5,869·1	3,318·4	8,088·2
Sugar beet .	17·0	15·8	15·0	17·2	242·0	399·7	328·9	399·8

[1] Owing to changes of census methods these figures are not exactly comparable with the earlier ones.

Livestock (2 Dec., 1950) :—3,431,000 cattle (including 1,707,000 milch and draught cows); 336,000 horses; 390,000 sheep; 257,000 goats; 2,467,000 pigs; 12,179,000 poultry.

Mineral production (in metric tons) in 1950 amounted to 17,952 coal (19,533 in 1938), 3,214,481 lignite (2,881,422), 497,764 iron ore (1,237,930), 54,844 pyrites (29,497), 60,454 salt (55,075), 182,340 kaolin (218,181). The number of miners was 15,850 (12,635 in 1938).

The electrical production in 1950 was 6,634 million kwh., of which 4,960 million kwh. were hydro-electric.

Labour.—The number of workers in industrial undertakings employing 10 or more persons was 547,436 in Dec., 1950; the number of unemployed in Dec., 1950, was 320,487. Of the gainfully employed (census, 1946), 37·2% were engaged in agriculture and forestry, 33·6% in industry and trade, 13·5% in commerce and transport.

Roads.—There were, in 1950, 26,480 km. of ' classified ' roads, including 572 km. autobahn. Number of motor vehicles, at 1 Oct., 1950, was 484,612, including 109,286 cars, 57,767 lorries, 44,342 tractors, 267,525 motor cycles.

Books of Reference.

STATISTICAL INFORMATION.—The Bavarian Statistical Office (130, Rosenheimer St., Munich 8) was founded in 1833; *President.*—Dr. Karl Wagner. It publishes :—

Statistisches Jahrbuch für Bayern.
Statistisches Taschenbuch fur Bayern. Annual.
Bayern in Zahlen. Monthly (from January, 1947).

Zeitschrift des Bayerischen Statistischen Landesamts. 1868–1943; 1948 ff.
Beitrage zur Statistik Bayerns, 142 and 151 (Refugees), 143, 153, 155, 156 (Agriculture), 145 and 146 (Census), 150 (Federal Elections), 152 (Schools), 141, 159, 162 (Health). 1949 ff.

Nawiasky (H.) and *Leusser* (C.), Die Verfassung des Freistaates Bayern vom 2. Dez. 1946. Munich, 1948.

BERLIN.

Government.—Berlin was under quadripartite Allied government (Kommandatura) until 1 July, 1948, when the Soviet element withdrew. Subsequently, separate [illegible] labour, transport, public utilities) and, on 30 Nov., a [illegible] Government were set up in the Soviet sector. On 21 Dec. the three Western Powers resumed the sittings of the Kommandatura. (For the blockade and air-lift, 18 June, 1948–6 Oct., 1949, *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 1062.)

Area.—The total area of Greater Berlin is 889·9 sq. km. Berlin is divided into 4 sectors of occupation. The *British Sector* (165·5 sq. km.) includes the administrative districts of Tiergarten, Charlottenburg, Wilmersdorf and Spandau; the *American Sector* (210·8 sq. km.) those of Kreuzberg, Neukolln, Tempelhof, Schoneberg, Zehlendorf and Steglitz; the *French Sector* (110·8 sq. km.) covers the administrative districts of Wedding and Reinickendorf, and the *Russian Sector* (402·8 sq. km.) those of Mitte, Friedrichshain, Prenzlauer Berg, Pankow, Weissensee, Lichtenberg, Treptow and Kopenick.

WESTERN BERLIN.

Constitution and Government. According to the constitution of 1 Oct., 1950, Berlin is simultaneously a *Land* of the Federal Republic (though not represented in the Bonn parliament) and a city. It is governed by a House of Representatives (200 members); the executive power is vested in a Senate, consisting of the Ruling Burgomaster, the deputy Burgomaster and not more than 16 senators.

In the municipal elections, held on 3 Dec., 1950, the Social Democrats obtained 44·6% of the votes and 61 seats; the Christian Socialists, 24·6% and 34 seats; the Free Democrats, 23·1% and 32 seats; 73 unallotted seats remain reserved for the Soviet Sector.

Head of the Administration.—Regierender Bürgermeister Prof. Ernst Reuter (Social Democrat).

Population.—Census [illegible] of 13 Sept., 1950, 2,145,912 (911,509 males, 1,234,403 females). According to the 1946 census, 71·9% were Protestants, 11·2% Roman [illegible], 0·3% Jews.

Vital statistics, 1950:—Births, 21,614 (inclusive of 3,575 illegitimate; exclusive of 485 still-born); marriages, 18,289; divorces (1949), 11,921; deaths, 26,220.

Education.—Western Berlin, in Dec., 1950, had in elementary and intermediate schools, 6,103 teachers and 251,986 pupils; in secondary schools, 1,379 teachers and 28,329 pupils; in vocational schools 949 teachers and 60,151 pupils.

There are in Western Berlin a Free University (with 5,200 students in winter term, 1950–51), a Technical University (3,200), High Schools of Fine Arts (740), Music (635), Politics (510), a Teachers' Training College (958), and an independent Theological High School (418).

Justice and Crime.—There are 9 county courts, 1 district court and 1 court of appeal (*Kammergericht*).

Finance.—The Budget for 1950–51 provides for DM 919·6 million revenue and DM 1,575 million expenditure; of the expenditure DM 597·4 million are earmarked for war damage, occupation costs, after-effects of the blockade and currency reform.

Banking.—The Berlin Central Bank, set up in March, 1949, is the central Land bank; the Berlin Bank is the central City bank. There are also the co-operative Berlin People's Bank and the City Savings Office.

SOVIET SECTOR.

Head of the Administration.—Friedrich Ebert (Soc. Unity Party).

Population.—Census (preliminary) of 31 Aug., 1950, 1,189,523 (506,636 males, 682,887 females). In 1946, 70·7% were Protestants, 10·5% Roman Catholics, 0·2% Jews. Vital statistics (1950):—Births, 13,345 (including 2,162 illegitimate); marriages, 12,331; deaths, 16,666.

BREMEN.

(FREIE HANSESTADT BREMEN.)

Constitution.—Political power is vested in the House of Burgesses (*Bürgerschaft*), which appoints the executive, called the Senate.

The elections of 12 Oct., 1947, had the following result:—46 Social Democratic Party, 24 Christian Democratic Union, 15 Democratic People's Party, 10 Communists, 3 German Party, 2 Free Democratic Party. The Senate is formed by a coalition of 5 Social Democrats, 4 members of the Democratic People's Party and 1 Independent; its president is Wilhelm Kaisen (Socialist).

Area and Population.—The area of the town and port of Bremen is 403·77 square kilometres (155·86 square miles). Population (census of 13 Sept., 1950) numbered 558,121 (264,589 males, 293,532 females), an increase of 73,647 (15·2%) over the census population of 29 Oct., 1946. Estimated population, 1 Jan., 1951, 564,397.

Marriages, 1950, 5,665 (1949, 5,360); births, 7,518 (711 illegitimate) (1949, 7,772; 720 illegitimate); deaths, 5,471 (1949, 4,940); divorces (1948), 1,646 (1949, 1,353).

Religion and Education.—On 29 Oct., 1946, there were 416,559 Protestants (85·3%), 43,220 Roman Catholics (8·8%), 127 Jews, 4,772 members of other denominations, and 23,707 (4·9%) without religious affiliation.

On 15 May, 1950, there were 121 primary schools (67,979 pupils), 21 secondary schools (8,533 pupils) and (1949) 27 vocational schools (24,654 pupils).

Justice.—There are 3 district courts, 1 court of appeal and 1 supreme court.

Social Welfare.—There were (1950) 16 hospitals with 7,768 beds.

In 1949, public assistance was given to an average of 28,642 persons, amounting to DM 12,985,029 or DM 24·07 per head of population.

Finance.—The ordinary budget for 1950 balanced at DM 195,704,020. Public debt of the city of Bremen on 31 March, 1950, was DM 231,324,700.

Industry.—The most important industries are shipbuilding (9,319 employees in Sept., 1950, compared with 26,000 in 1939), motor car industry (9,989), engineering (6,832), textiles (6,370) and fish processing (3,440).

Agriculture.—Arable land (1950), 24,430 hectares; yield of grain crops, 5,344 metric tons; turnips, etc., 40,705 metric tons.

Livestock (2 Dec., 1950):—18,745 cattle; 23,078 pigs; 1,530 sheep; 3,735 horses; 2,505 goats.

Roads.—On 31 March, 1949, there were 921·6 km. surfaced roads, of which 876·5 km. were maintained by Land Bremen. Registered motor vehicles on 1 Jan., 1951, numbered 20,253, including 8,733 private cars, 6,695 trucks, 699 lorries, 231 buses and 3,749 motor cycles.

Shipping.—Vessels entered in 1950, 5,492 of 7,588,717 net tons (compared with 9,555 of 10,259,175 in 1938); cleared, 5,447 of 7,580,758 net tons (9,560 of 10,268,952 in 1938). Overseas imports, 1950, 2,883,396 metric tons (4,111,500 in 1938); exports, 1,[illegible] metric tons (4,961,600 in 1938).

HAMBURG.

(HANSESTADT HAMBURG.)

Constitution.—The provisional constitution of 15 May, 1946, vests the supreme power in the House of Burgesses (*Bürgerschaft*) of 120 members. The executive is in the hands of the Senate whose 12 members are elected by the Burgerschaft.

The elections of 16 Oct., 1949, had the following results:—Social Democrats, 65; Christian Democratic Union, 22; Free Democratic Party, 17; German Party, 9; Communists, 5; other Parties, 2. The Senate consisted, in March, 1951, of 12 Social Democrats; the First Burgomaster is Max Brauer (Soc.).

By a law of 21 Sept., 1949, the territory has been divided into 7 administrative districts, each with a mayor and council.

Area and Population.—In 1938, the territory of the Free Hanse Town was reorganized by the amalgamation of the city and its 18 rural districts with 3 urban and 27 rural districts ceded by Prussia. Total area, 74,661·8 hectares (184,489 acres). Population (census, 13 Sept., 1950, preliminary), 1,604,600 (751,932 males, 852,668 females), an increase of 12·7% since 1946.

Vital statistics, 1949:—Marriages, 16,143; births, 18,503 (including 310 still births and 1,844 illegitimate births); deaths, 15,598; divorces, 5,313.

Religion and Education.—On 29 Oct., 1946, the Evangelical Church and Free Churches had 1,132,367 members (80·53%), the Roman Catholic Church 88,613 (6·3%), the Jewish community 953 (0·07%), other denominations 16,144 (1·15%); 168,081 (11·95%) did not belong to any religious body.

There were, on 1 May, 1950, 304 public primary schools with 4,908 teachers (2,304 male, 2,604 female) and 189,767 pupils; 39 public secondary schools with 955 teachers and 15,638 pupils, and 15 private schools with

211 teachers and 6,924 pupils. The University of Hamburg had 3,465 male and 993 female German and 48 foreign students in summer term, 1950.

Justice and Crime.—There are 6 district courts, 1 court of appeal and 1 supreme court. Convictions (1949), 26,967, including 11,371 for theft and embezzlement and 2,232 for black-marketeering.

Social Welfare.—Public assistance (1949) was given to an average of 47,889 persons, amounting to DM 24,160,483 : DM 42·04 monthly per head.

Finance.—The ordinary budget for 1949 balanced at DM 1,394,440,000. Public debt, at 31 March, 1950, amounted to DM 112,050,000.

Production and Industry.—Industry is chiefly dependent on trade, shipping and local consumption. There were, in Aug., 1950, 1,319 industrial undertakings (with 10 or more employees), employing about 119,000 persons and producing goods valued at DM 212 million (monthly average), *i.e.*, 82% of the pre-war production.

The agricultural area comprised 39,619 hectares (97,603 acres) in 1950. Yield (1950) of cereals, 11,312 metric tons; potatoes, turnips, etc., 88,871 metric tons.

Livestock (2 Dec., 1950):—Cattle, 18,073; pigs, 33,356; horses 6,586; sheep, 4,486; goats, 5,207.

Labour.—The numbers of workmen, clerks and officials in full employment at 30 Sept., 1950, were 393,116 males and 199,925 females; unemployed, 48,823 male, 33,705 female workers.

Shipping.—Before the war, Hamburg was the third largest port in the world; it is still the biggest German port.

Vessels	1938	1946	1947	1948	1949
Entered: Number .	18,149	3,041	5,406	8,416	9,874
Tonnage .	20,567,311	2,387,207	3,508,388	5,771,371	8,717,312
Cleared: Number .	19,316	3,628	5,951	9,847	11,221
Tonnage .	20,547,148	2,368,413	3,562,442	5,865,527	8,877,174

By Sept., 1950, 90 trans-Atlantic, 63 European and 13 German coastal shipping companies had resumed traffic with Hamburg.

Banking.—By Ordinance No. 132 of Military Government, which became effective on 14 Feb., 1948, a Land Central Bank was established in Hamburg and charged with the general control of banking. Barclays Bank (D., C. & O.) has a branch in Hamburg.

HESSEN.

Constitution.—The constitution was put into force by popular referendum on 1 Dec., 1946. The Diet, elected on 19 Nov., 1950, consists of 47 Social Democrats, 12 Christian Democrats and 21 Liberal Democrats.

The cabinet, formed on 14 Jan., 1951, is Socialist and headed by Minister President Georg August Zinn.

Area and Population.—Hessen, within the American Zone of occupation, *i.e.*, excluding the districts incorporated in the French Zone, has an area of 21,100·5 square kilometres (8,146·91 square miles). Its capital is Wiesbaden. There are 3 counties, 48 urban and rural districts and 2,708 communes. The census population, 13 Sept., 1950, numbered 4,324,101 (2,024,171 males, 2,299,930 females), and 2,900 displaced persons living in assembly centres, an increase of 262,922 persons (6·5%) over the census population of 29 Oct., 1946.

Vital statistics	Live births	Still births	Marriages	Divorces	Deaths
1948	72,077	1,556	49,548	8,917	44,229
1949	72,835	1,662	45,360	7,491	45,193
1950 [1]	69,210	1,580	46,142	6,750	45,542

[1] Preliminary.

Religion.—On 29 Oct., 1946, there were 2,532,615 Protestants (63·4%), 1,301,510 Roman Catholics (32·6%) and 161,523 others (4·0%). 68,401 foreigners living in assembly centres were not included in this denomination census.

Education.—In May, 1950, there were 2,688 primary schools (11,978 teachers, 552,050 pupils), 186 middle and secondary schools (3,486 teachers, 83,748 pupils), 199 vocational schools (2,072 teachers, 149,269 pupils) and 49 [illegible] schools (240 teachers, 3,505 students). In summer term, 1950, the University of Frankfurt had 4,331 students, the University of Marburg 3,192 students, the Agricultural and Veterinary College at Giessen 1,034 students, the Technical University of Darmstadt 2,526 students. Two Roman Catholic theological colleges had 380 students; 6 teachers' training colleges had 940 students.

Justice.—There are 1 state court, 1 supreme administrative court, 3 administrative courts, 1 Land labour court, 12 labour courts, 1 supreme court, 9 courts of appeal, 83 district courts.

Finances.—In the fiscal year 1949–50 revenues of the Land budget amounted to DM 1,414,179,000, expenditures to DM 1,529,976,000.

Agriculture.—Area (in 1,000 hectares) and yield (in 1,000 metric tons) of the most important crops in 1950 were as follows :—

	Area	Yield		Area	Yield
Wheat . . .	87·6	238 0	Oats . . .	118 3	276 6
Rye . . .	127·8	305·0	Potatoes . . .	103 7	2,146·1
Barley . . .	30·2	73·3	Sugar beet . .	13·0	460·1

Livestock, Dec, 1950 :—Cattle, 770,989 (including 439,510 milch cows); horses, 114,628; sheep, 206,633; goats, 258,406; pigs, 1,015,505; poultry, 4,368,727.

Industry.—Hessian industry comprised in 1950 about 4,100 firms with approximately 361,000 workers. The most important industries are engineering (42,300 workers), chemicals (38,900), vehicles (25,500), electrical engineering (25,000), textiles (20,300).

Roads.—The total length of Hessian roads was 19,444 km. in April, 1950, including 2,524 km. national highways, 5,033 km. highways 1st class and 11,887 km. highways 2nd class. The number of motor vehicles licensed in Oct., 1950, totalled 201,120, including 56,207 cars, 1,147 motor buses, 30,127 motor trucks, 9,680 tractors and [illegible] tor bicycles.

LOWER SAXONY.

(NIEDERSACHSEN.)

Government.—The Land Niedersachsen was formed on 1 Nov., 1946 by merging the former Prussian province of Hanover and the *Lander* Brunswick, Oldenburg and Schaumburg-Lippe. The Diet, elected on 6 May, 1951, consists of 64 Social Democrats, 25 Christian Democratic Union, 27 German Party, 12 Free Democratic Party, 2 Communists, 4 Centre (Roman Catholic) Party, 3 German Reich Party, 1 German Social Party, 21 Refugees Association, and 16 Socialist Reich Party (Nazis).

Area and Population.—Lower Saxony (excluding the town of Bremerhaven in the American Zone, and the districts on the right bank of the Elbe in the Soviet Zone) comprises 47,282 square km., and is divided into 8 administrative districts; capital, Hanover.

Population (census of 13 Sept., 1950), 6,795,128 (3,199,283 males), an increase of 8·7% over the census population of 29 Oct., 1946.

Vital Statistics	Live births	Marriages	Divorces	Deaths
1947 . . .	107,325	60,214	9,580	73,519
1948 . . .	117,833	71,872	12,040	64,325
1949	121,114	68,688	11,482	63,908

Justice.—There are 126 district courts, 11 courts of appeal and 3 high courts.

Social Welfare.—In 1949–50, DM 157,446,000 was expended on public assistance; number of recipients, 31 March, 1950, was 211 602. There were, in Dec., 1949, 454 hospitals with 68,405 beds, of which 13,528 were reserved for tuberculosis cases.

Religion and Education.—On 29 Oct., 1946, there were 4,799,112 Protestants, 1,195,339 Roman Catholics, 52,289 other Christians, 1,963 Jews, and 201,143 unbelievers.

On 15 May, 1950, there were 4,615 elementary schools with 1,002,769 pupils and 18,511 teachers, 171 middle schools (64,461 pupils, 1,794 teachers), 165 secondary schools (76,588 pupils, 3,463 teachers), 507 vocational and continuation schools (200,540 pupils, 2,182 teachers);

summer term, 1950, the University of Göttingen (4,762 students), 2 technical high schools (4,140 students), a veterinary high school (501 students), a mining academy (710 students), 10 teachers' training colleges and 2 vocational academies.

Agriculture (excluding Bremen).—Area (1,000 hectares) and yield (1,000 metric tons) of the most important crops in 1950:—Rye, 368·3 and 757·8; oats, 243·2 and 591·5; wheat, 112·7 and 339·3; barley, 48·8 and 137·3; potatoes, 277·8 and 6,506·4; sugar beet, 82·2 and 2,954·3.

Livestock, 2 Dec., 1950 (excluding Bremen):—Cattle, 2,134,970 (including milch cows, 940,924); pigs, 3,317,137; sheep, 361,896; horses, 412,449.

Roads.—At 31 Dec., 1949, there were in Lower Saxony 22,092 km. of roads, including 297 km. autobahn, 4,133 federal roads, 8,383 km. of first-class Land roads; 542 km. unfit for traffic. Number of motor vehicles, 1 July, 1950, was 239,628, including 60,035 passenger cars, 42,919 lorries, 1,523 buses, 22,729 tractors, 109,870 motor cycles.

Books of Reference.

STATISTICAL INFORMATION.—The Niedersachsisches Amt fur Landesplanung und Statistik (Berta St. 2, Hanover) is the statistical office of Lower Saxony; *Director*—Professor Dr Kurt Bruning. The office was set up in 1945 by merging the statistical departments of the provincial administration of Hanover, the statistical offices of the Lander Oldenburg, Brunswick and Schaumburg-Lippe, the Hanoverian *Archiv fur Landeskunde*, the Lower Saxony *Institut fur Landes- und Volkskunde*, and the Country Development of Hanover. Its main publications are:—Atlas Niedersachsen (1950); Handbuch fur Niedersachsen (1950); Forschungen zur Landes- und Volkskunde (50 vols.).—Statistische Monatshefte fur Niedersachsen.—Neues Archiv fur Niedersachsen (bimonthly, from 1947).

NORTH RHINE-WESTPHALIA.

(NORDRHEIN-WESTFALEN.)

Government.—The Land Nordrhein Westfalen is governed by a coalition of Christian Democrats and Centre Party; Minister President, Karl Arnold (Christian Democrat). The Diet, elected on 18 June, 1950, consists of 93 Christian Democrats, 68 Social Democrats, 26 Free Democrats, 16 Centre Party and 12 Communists.

Area and Population.—The Land comprises 33,948 square km. (13,102 square miles), after the cession, in 1949, of 93 square km. to the Netherlands and Belgium. Capital, Dusseldorf. Population (census, 13 Sept., 1950), 13,147,066 (6,230,119 males, 6,916,947 females).

Vital statistics, 1950 (and 1949):—Live births, 203,527 (209,670); deaths, 135,651 (127,506); marriages, 151,191 (133,668); divorces, 19,516 (21,143).

Religion and Education.—In 1950, 41% of the population were Protestants and 54% Roman Catholics.

There were, in 1950, 5,824 primary schools with 33,340 teachers and 1,681,775 pupils, and 600 secondary schools with 10,920 teachers and 259,324 pupils.

The Universities of Cologne, Bonn and Munster, the Technical University of Aachen and the Medical Academy of Dusseldorf had 18,773 students in winter term 1949-50.

Justice.—There are 176 district courts, 19 courts of appeal and 3 high courts, with together 1,777 judges (31 Dec., 1949).

Social Welfare.—In 1949-50, public assistance of DM 247 million was given to 454,215 persons; in addition, 73,277 persons received special

assistance of DM 55 million, and DM 19·4 million was spent for the care of about 40,000 tuberculosis cases.

Industry.—Output and/or production in tons (monthly average, 1950, and, in brackets, monthly average, 1949):—Iron ore, 106,010 (95,893); iron ore Fe-content, 22,327 (20,476); pig-iron, 627,504 (462,703); raw steel ingots, 837,518 (634,340), rolled steel, 570,333 (440,165); castings (iron, steel and malleable castings), 96,757 (76,379); coal, 9,168,827 (8,447,000); [illegible] 100 (5,061,917); electric power, 1,943·5 million kwh. (1,704·9); [illegible] cokery-gas of industry), 1,041 million cubic metres (924·4 million). Of the total population, 14·4% were engaged in industry (1949).

Ruhr Control Area.—7,659·6 square kilometres, population, 50% of the total of North Rhine-Westphalia. Out of the total production of the 3 western zones the Ruhr Control Area produces 93% of the hard coal output, 83% of raw steel and 71% rolled products (excluding semi-finished products).

Agriculture.—Area (1,000 hectares) and yield (1,000 metric tons) of the most important crops in 1950:—Rye, 225·4 and 557·2, oats, 210·3 and 521·6; wheat, 143·6 and 434·2; barley, 62·2 and 177·1; potatoes, 169·6 and 4,051·9; sugar beet, 48·7 and 1,789·1.

Expropriation of all landed estates [illegible] ha. 250 acres or DM 130,000 of assessed value was provided in the [illegible] law passed in May, 1949. The estimated 272,000 acres to be expropriated will be used to resettle 2,000 to 3,000 farmers.

Livestock, 2 Dec., 1950:—Cattle, 1,425,923 (including 820,629 milch cows); pigs, 2,129,608; sheep, 234,353, goats, 169,075; horses, 292,079.

Books of Reference.

RHINELAND PALATINATE.

(RHEINLAND-PFALZ.)

Constitution.—The constitution of the Land Rheinland-Pfalz was approved by the Consultative Assembly on 25 April, 1947, and by referendum on 18 May, 1947, when 579,002 voted for and 514,338 against its acceptance.

The cabinet is a coalition of Social Democrats and Christian Democrats, headed by Peter Altmeier (Christian Democrat).

Area and Population.—Rheinland-Pfalz comprises 19,825·68 square kilometres (7,651·9 square miles). Capital, Mainz. Population (census, of 13 Sept., 1950), 2,993,652 (1,396,651 males, 1,597,001 females), an increase of 8·8% since 1946.

Vital statistics	Live births	Marriages	Divorces	Deaths
1948 . .	46,445	29,885	3,323	33,166
1949 . . .	54,565	31,156	3,399	31,887
1950 . . .	56,059	32,633	3,319	31,972

Education.—There were, in 1950, 3,068 primary schools with 8,476 teachers and 403,167 pupils; 119 secondary schools with 1,900 teachers

and 41,689 pupils; 15 teachers' training colleges with 118 teachers and 1,715 students; a theological high school at Trier with 17 professors and 245 students, and a university at Mainz with (winter term, 1950–51) 245 professors and assistants and 5,404 students.

Agriculture.—Area (in 1,000 hectares) and yield (in 1,000 metric tons) in 1950 were as follows:—

	Area	Yield		Area	Yield
Wheat . . .	63·7	187·1	Potatoes . .	90·2	2,246 2
Rye . . .	96·2	257 1	Sugar beet . .	12·7	485 8
Barley . . .	54·7	151·0	Wine (hectolitres) .	41 2	2,443 4
Oats . . .	99·7	241 3	Tobacco . . .	2 7	7 8

Livestock (2 Dec., 1950):—Cattle, 678,200 (including 366,000 cows); horses, 87,800; sheep, 79,300; goats, 166,100; pigs, 628,100; poultry, 3,006,000.

Roads.—There were (1 Jan., 1951) 134 km. of autobahn, 2,367 km. of federal roads, 4,794 km. of first-class and 5,243 km. of [illegible]. Number of motor vehicles, 31 Dec., 1950, was 141,1[illegible] 31,[illegible] passenger cars, 23,013 lorries, 701 buses, 9,464 tractors and 72,391 motor cycles.

SCHLESWIG-HOLSTEIN.

Government.—Owing to the complicated electoral system (a combination of majority and proportional representations), the elections of 9 July, 1950, gave the *bloc* of Christian Democratic Union, Free Democratic Party and German Party 31 seats (36% of the votes), the Social Democratic Party, 19, the Refugee Association 15 and the South Schleswig Association (Danes) 4 seats. The government is a coalition of the *bloc* parties and the Refugee Association; Minister President, Dr. Bartram (Christian Democrat).

Area and Population.—The area of [illegible], in 1950, was 15,668 square kilometres (6,049 3 square [illegible] and into 4 urban and 17 rural districts. The capital is Kiel. The population (census, 13 Sept., 1950) numbered 2,593,617 (1,210,891 males, 1,382,726 females), of whom refugees accounted for 38·5%.

	Marriages	Births	Deaths	Surplus of births	Divorces
1947 . .	26,364	44,973	31,321	13,652	6,173
1948 . .	27,734	45,730	25,101	20,629	6,230
1949 . .	24,744	44,486	23,935	20,551	5,755
1950 . .	24,934	41,370	24,705	16,665	5,888

Religion and Education.—In 1946, 88% of the population were Protestants and 7% Roman Catholics.

In 1950, there were 1,754 elementary schools with 8,686 teachers and 436,735 pupils; 117 secondary schools with 1,893 teachers and 43,666 pupils; 87 evening schools with 780 teachers and 15,969 students; 2 teachers' training colleges with 477 students; the University of Kiel with 3,247 students, and 69 vocational colleges, including 30 agricultural colleges.

Justice.—There are 56 district courts, 4 courts of appeal, 1 supreme court and a high court for administrative litigation.

Social Welfare.—In 1950, a monthly average of 97,000 received public assistance.

Finance.—The budget for the fiscal year 1 April, 1949–31 March, 1950, showed DM 876·6 million revenue and DM 898 million expenditure. At 31 March, 1950, the debts of the urban and rural districts amounted to DM 53·6 million.

Agriculture.—In 1950, the arable area of Schleswig-Holstein was 670,900 hectares, the forest area 126,900 hectares, meadows and pastures 466,800 hectares and horticultural area 47,900 hectares.

Area, 1,000 hectares (and yield, 1,000 metric tons), of the most important crops in 1950:—Rye, 117·7 (238·7); oats, 88·5 (201·0); wheat, 48·0 (132·5); barley, 26·8 (71·7); potatoes, 72·3 (1,562·3); sugar beet 7·6 (23·5).

Livestock, 2 Dec., 1950:—167,343 horses, 999,887 cattle (including 458,399 milch cows), 1,031,449 pigs, 129,366 sheep, 4,178,205 poultry.

Industry.—The most important industries of the Land are shipbuilding, engineering and textiles.

Labour.—On 31 Dec., 1950, out of 607,890 manual and clerical workers, 235,077 were engaged in industry, 93,152 in agriculture and forestry, 127,117 in trade and commerce, 109,775 in public service and the professions, 42,769 in domestic service. There were 217,220 unemployed.

Roads.—In 1950, the Land had 6,112 km. of roads. Number of motor vehicles, 1 Dec., 1950, was 75,703, including 22,126 passenger cars, 18,426 lorries and buses, 8,311 tractors, 26,840 motor cycles.

Kiel Canal.—The Kiel Canal, 98·7 kilometres (61 miles) long, is on Schleswig-Holstein territory. In 1938, 53,530 vessels of 22·58 million net tons passed through it (Panama Canal: 5,524 vessels of 25·95 million net tons); in 1947, 34,609 vessels of 9·427 million net tons; in 1948, 47,069 vessels of 12·9 million net tons; in 1949, 44,979 vessels of 16·8 million net tons; in 1950, 47,271 vessels of 17·8 million net tons.

Books of Reference.

STATISTICAL INFORMATION.—The Statistical Office (54 Mecklenburger St., Kiel-Wik) has taken over the functions of the Provincial Statistical Office, founded in 1939; *Director:* Dr. Horn. Publications:—

WÜRTTEMBERG-BADEN.

Constitution.—The constitution was put into force by a referendum held on 24 Nov., 1946, when 87% of the electorate voted for and 13% against it. Elections for the Diet, held on 19 Nov., 1950, returned 28 Christian Democratic Union, 34 Social Democrats, 22 Democratic People's Party, 16 Refugee Party. National flag: black, red, gold (horizontal).

The cabinet, appointed on 11 Jan., 1951, is a coalition headed by Dr. Reinhold Maier (Democrat) and includes 4 Socialists and 3 Democrats. Baden has a separate administration under a president at Karlsruhe.

Area and Population.—Wurttemberg-Baden has an area of 15,700·12 square kilometres (5,960·25 square miles), consisting of the northern halves of the former Länder Wurttemberg (10,561·42 square kilometres) and Baden

(5,138·7 square kilometres). Its capital is Stuttgart. The population (census of 13 Sept., 1950) numbered 3,884,195 (1,806,352 males, 2,077,843 females), an increase of 7·7% over the census population of 29 Oct., 1946.

The province of Wurttemberg comprises 3 urban and 19 rural districts; the province of Baden, 4 urban and 9 rural districts.

31·1% of the population were engaged in agriculture and forestry, 39·7% in industry and trade, 13·6% in commerce and transport, 12·8% in civil service and the professions, 2·8% in domestic service (census of 1946).

Vital statistics, 1949 :—Births, 64,809 (of which 1,317 still births); marriages, 37,670; divorces, 6,120; deaths, 39,618.

Religion.—On 29 Oct., 1946, there were 2,108,734 Protestants (58·5%), 1,360,524 Roman Catholics (37·8%) and 138,046 others (3·7%).

Education (1950).—There were 1,858 primary schools (484,990 pupils), 167 secondary schools (71,727 pupils), 3 Protestant seminaries (148 students), 14 teachers' training colleges (1,185 students), 2 technical high schools (6,918 students), 1 agricultural college (594 students), 1 commercial academy (638 students) and the University of Heidelberg (4,241 students, including 1,107 females).

Finance.—The budget estimates for the year 1 April, 1948–31 March, 1949, balanced at RM 1,433,240,100; that for 1949–50 at DM 1,769,592,700, that for 1950–51 at DM 1,028,052,800.

Agriculture.—Area (in 1,000 hectares) and yield (in 1,000 metric tons) of the most important crops in 1950 were as follows :—

	Area	Yield		Area	Yield
Wheat . .	120·8	300 1	Oats . . .	60 8	124·0
Rye . . .	28 0	64 7	Potatoes[1] . .	63·9	1,185·2
Barley . . .	67·7	156 2	Sugar beet[1] . .	10 9	398 2

[1] Preliminary figures.

Livestock, June, 1950 :—Cattle, 705,757 (including 377,287 cows); horses, 78,230; sheep, 181,325; goats, 138,482; pigs, 573,188; poultry, 3,539,595.

Books of Reference.

STATISTICAL INFORMATION.—The W[illegible] Landesamt (Neckar St. 18B., Stuttgart), established in 1820, a[illegible] Landesamt (Akademie St. 5, Karlsruhe) publish the following periodicals :—

Statistische Monatshefte Württemberg-Baden (From Jan., 1947.)
Monatszahlen Württemberg-Baden. (From Oct., 1948.)

WÜRTTEMBERG-HOHENZOLLERN.

Constitution.—The Consultative Assembly, elected on 17 Nov., 1946, passed a constitution for the southern portion of the former Land Württemberg and the former Prussian district of Hohenzollern. This was accepted by a popular referendum on 18 May, 1947, and thus the Land Wurttemberg-Hohenzollern came into existence. The capital is Tubingen. On the same day, the following Diet was elected :—32 Christian Democratic Union, 12 Social Democrats, 11 Democrats, 5 Communists.

The cabinet, in 1951, was a coalition of 4 Christian Democrats and 1 Social Democrat, headed by Dr. G. Müller (Christian Democrat), who is at the same time State President.

Area and Population.—Area 10,405·9 square km. (4,016·6 square miles). Estimated population on 31 Dec., 1949, was 1,216,048 (555,649

males, 660,399 females), an increase of 10·0% over the census of 29 Oct., 1946.

The Land is divided into 17 administrative districts. The Bavarian district of Lindau (311 square km., 57,112 inhabitants), which forms part of the French zone of occupation, is affiliated to Wur[illegible]; it [illegible] for certain administrative purposes. Larger towns [illegible] Tubingen, 37,609; Ravensburg, 25,499; Schwenningen, 25,[illegible].

Vital statistics, 1949:—Live births, 20,169 (+Lindau, 1,016); still births, 408 (+22); marriages, 10,825 (+496); divorces, 917 (+75); deaths, 12,780 (+584).

Religion and Education.—W[illegible] and Lindau had, at 31 Dec., 1949, 634,160 Ror[illegible] Protestants, 26,348 others and unspecified.

There were, in May, 1950, 1,087 primary schools (3,279 teachers; 163,467 pupils), 84 secondary schools (875 teachers; 20,206 pupils), 5 teachers' training colleges (81 teachers; 837 students); a technical school for textile industry (22 teachers; 528 students); the University of Tubingen (220 professors and instructors; 4,187 students, including 107 foreigners).

Agriculture.—Area (in 1,000 hectares) and yield (in 1,000 metric tons) in 1950 were estimated as follows (including Lindau):—

	Area	Yield		Area	Yield
Wheat	47·5	115·8	Oats	28·0	51·9
Rye	12·9	30·1	Potatoes	31·2	713·4
Barley	36·2	76·4	Sugar beet	0·3	9·2

45·1% of the population are engaged in agriculture and forestry.

Livestock (2 Dec., 1950):—Cattle, 547,849 (including 300,765 milch cows); horses, 44,213; sheep, 54,085; goats, 52,395; pigs, 348,021; poultry, 1,243,559.

Württemberg-Hohenzollern in Zahlen. (Published by Statistisches Landesamt, Tübingen Bimonthly, from March, 1946.)

GREECE.

(Vasilion tis Ellados; Kingdom of Hellas.)

Greece gained her independence from Turkey in 1821-29, and by the Protocol of London, of 3 February, 1830, was declared a kingdom, under the guarantee of Great Britain, France and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne 18 Jan., 1833, as Otho I. He was expelled on 23 Oct., 1862, which event was followed by the election, in 1863, of Prince William, younger son of Christian IX of Denmark, as George I, King of the Hellenes. George I, who was assassinated on 18 March, 1913, was succeeded by his son Constantine, who reigned until 11 June, 1917, when the Allied Powers forced him to leave the country. Alexander, second son of King Constantine, who succeeded him, died on 25 October, 1920. Constantine was recalled on 19 December, 1920, reigned until his abdication on 27 September, 1922, and died in exile at Palermo on 11 January, 1923

George II, King Constantine's eldest son, immediately succeeded to the throne, but was deposed and forced to leave Greece on 19 December, 1923; a plebiscite on 13 April, 1924, established a republic. The republic continued until 3 November, 1935, when in a plebiscite 1,491,992 voted for the restoration of the monarchy and 32,454 for the continuance of the republic. King George II accordingly returned to Greece on 25 November, 1935, as King of the Hellenes. On 4 August, 1936, he suspended certain articles of the Constitution, prorogued Parliament (initially for 6 months) and thereafter supported the dictatorship of his Prime Minister, General Ioannis Metaxas, who governed until his death, on 29 January, 1941.

On 28 Oct., 1940, Italy sent an ultimatum to Greece, which implied the complete surrender of national sovereignty. Premier Metaxas rejected it and the Greek army, repelling the Italians who had advanced from Albania, drove them so far back that by March, 1941, Greek forces were in occupation of a quarter of Albania. But on 6 April, 1941, the Germans came to the assistance of the Italians in Albania, forced the Greek army there to capitulate on 20 April, and on 27 April German troops marched into Athens. Three years later the Germans had to evacuate Greece, and by 15 October, 1944, the whole of the country was liberated.

The invasion of Greece by the Germans forced the King in April, 1941, to move his Government, first to Crete, then to Cairo, and later to London.

On 30 December, 1944, the King delegated his powers to the Archbishop of Athens, Damaskinos, whom he appointed Regent pending the holding of a plebiscite on the question of his return. The plebiscite, held on 1 September, 1946, gave 1,170,470 votes in favour of the King's return and 523,086 against. The King returned to Athens on 28 September, 1946. He died from heart failure on 1 April, 1947.

National flag: blue and white striped, horizontal; with white cross in top-left corner.

National anthem: Se gnorizo apo tin kofsi (words by Dionysios Solomos, 1824; tune by N. Mantzaros, 1873).

Government.

Paul I, born 14 December, 1901, married 9 January, 1938, Princess Frederika Louise, daughter of the Duke of Brunswick; succeeded his brother George II on 1 April, 1947.

Offspring: Princess *Sophia*, born 2 November, 1938; Prince *Constantine*, the Diadoch (heir apparent), born 2 June, 1940; Princess *Irene*, born at Capetown on 11 May, 1942.

Sisters of the King.—(1) Princess *Helen*, born 3 May, 1896, married 10 March, 1921, Carol II, former King of Rumania (from whom she obtained a divorce 21 June, 1928); (2) Princess *Irene*, born 13 Feb., 1904, widow of Aymon, Duke of Aosta (died 29 Jan., 1948); (3) Princess *Katherine*, born 4 May, 1913, married 21 April, 1947, Major Richard C. A. Brandram, M.C., R.A.

Elections held on 5 March, 1950, resulted in the return of 63 Populists, 63 Liberals and Nationals, 46 Progressive Unionists, 34 Democratic Socialists, 12 Democrats, 10 Independents and 22 members of 4 small parties. In Jan., 1951, 27 Populists and 7 Unionists merged into the 'Populist Unionist Party.'

The Cabinet formed on 2 Feb., 1951, is a coalition of Liberals and Democratic Socialists and composed as follows:—

Prime Minister, Minister of Foreign Affairs and Minister of Defence.—Sophocles Venizelos (Lib.).

Deputy Prime Minister, Minister of Co-ordination and Minister of Education.—George Papandreou (Dem. Soc.).
Minister of Justice.—Elie Lagakos (Dem. Soc.).
Minister of the Interior.—Nicholas Bacopoulos (Lib.).
Minister of Finance.—George Mavros (Lib.).
Minister of Commerce.—John Glavanis (Lib.).
Minister of Industry.—Leon Maccas (Dem. Soc.).
Minister of Public Works.—Napoleon Zervas (National).
Minister of Communications.—John Yianopoulos (Dem. Soc.).
Minister of Agriculture.—Andreas Lambropoulos (Dem. Soc.).
Minister of Social Welfare.—Phocion Zaimis (Lib.).
Minister of Merchant Marine.—Efstathios Malamidas (Lib.)
Minister of Labour.—George Bacatsellos (Lib.).

Area and Population.

The total area of the country (including the Dodecanese) is 132,728 square km. or 51,246 square miles, of which the islands account for 34,850 square km. Athens is the capital and largest city; with its port, Piræus, it is the largest city in the Eastern Mediterranean.

The population of the country was 7,344,642 according to the census of 16 Oct., 1940. The 1950 population (including the Dodecanese) is estimated at about 8·07 million.

The following table shows the prefectures (Nomoi) and their population figures: –

Nomos	Area in sq. miles	Population 1940	Capital	Population (1940)
Central Greece and Euboea	9,701			
Aetolia and Acarnania		197,968	Missolonghi	10,565

[1] Commonly known as Salonika. [2] Population, 19 Oct., 1947.

There were 3,658,393 males and 3,686,467 females according to the 1940 census, while the urban population (of places with 5,000+ inhabitants) was shown as 36% and rural population 64%.

Mount Athos, the easternmost of the three prongs of the peninsula of Chalcidice, is a self-governing community composed of 20 monasteries. (*See* THE STATESMAN'S YEAR-BOOK, 1945, p. 983.) For centuries the peninsula has been administered by a Council of 4 members and an Assembly of 20 members, one deputy from each monastery. The Greek Government on 10 September, 1926, recognized this autonomous form of government and ratified it by Articles 109–112 of the Constitution of 1927, which also gave legal sanction to the Charter of Mount Athos, drawn up by representatives of the 20 monasteries on 20 May, 1924.

Since 1925, there has been a fiscal Free Zone in the town and port of Thessaloniki covering (1937) an area of 268,505 square yards on land and 191,354 square yards on water with 7,655 yards of railway and, since 1924, a Yugoslav Free Zone in the same port with an area of 72,623 square yards on land and 40,512 square yards on water with 2,461 yards of railway. Since 1932 there has been a Free Zone in the town of Piræus, covering (1937) an area of 217,067 square yards on land, with a frontage on the sea of 1,941 yards and 1,094 yards of railway.

Religion.

According to the census of 1940, there were 7,090,192 adherents of the Greek Orthodox Church, 29,139 Roman Catholics, 6,335 Protestants, 134,722 Moslems, 67,591 Jews, 16,350 Armenians and 531 belonging to other religions. By the Constitution of 1864, Orthodoxy was declared the religion of the state, but complete toleration and liberty of worship was guaranteed to all other sects. The government of the Church of Greece is vested in a permanent council, called the Holy Synod, consisting of the Archbishop of Athens as president and 12 metropolitans, who must during their year of office reside at Athens. The Church of Greece has 34 metropolitans in the old territory, 33 in the new territories and 4 in the Dodecanese. By agreement with the Œcumenical Patriarchate of Constantinople in 1929 the sees within the spiritual jurisdiction of the Patriarchate in the new territories were provisionally attached to that of the Holy Synod of Greece for convenience in administration.

The Roman Catholic Church has 3 archbishops (Athens, Naxos, Corfu) and 6 bishops. The Greek Evangelical Church has 9 churches. Out of 67,591 Jews in 1940, only 8,500 have survived the German occupation. The Moslems have 300 mosques.

Education.

All children between the ages of seven and twelve years must attend school.

There were (1948–49) 9,986 primary schools with 1,218,000 pupils and 507 secondary schools with 169,836 pupils. In 1948–49 there were for higher studies 2 universities: one in Athens, founded 1837, with 213 professors and 11,755 students (10,080 men and 1,675 women), and one in Thessaloniki with 76 professors and 1,582 students (1,416 men and 166 women). The Polytechnic in Athens, with 5 faculties and 3 annexed schools, had 54 professors and 1,004 students; the School of Fine Arts, providing instruction in painting, sculpture, etc., had 14 professors and 258 students (113 boys and 145 girls). There are also in Athens High Schools of Economic and Commercial Sciences, of Political Sciences, of Industrial Studies, and of Agriculture; a state and 2 private conservatoires, and a state conservatoire at Thessaloniki.

Illiteracy declined from 41% of the population in 1928 to 27% in 1940.

The Ministry of Education is also charged with the Service of Antiquities, which is responsible for the preservation and repair of ancient monuments of all periods (prehistoric, classical, Byzantine and mediæval), the upkeep of museums and the conduct of excavations; the Direction of Arts, responsible for music and the graphic arts; and the Direction of Letters in charge of theatres, cinemas, libraries and archives.

British scholarship is represented in Athens by the British Institute, the Byron Chair at the University of Athens and the British School of Archæology, which receives grants from the British Government, universities and private subscribers. There are also similar French and American institutions.

In 1949, there were 170 cinemas with a seating capacity of 100,000.

Finance.

The estimates of revenue and expenditure for 6 financial years (ending 31 March) were as follows in drachmai (the drachma in 1940 = 0·67 cents U.S.):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1939–40	11,014,821,680	14,653,841,014	1948–49	3,043,300,000,000	4,387,009,018,000
1946–47	1,572,000,000,000	1,655,000,000,000	1949–50[1]	3,953,000,000,000	5,717,995,700,000
1947–48	2,898,277,000,000	3,105,277,000,000	1950–51[1,2]	4,7[illegible]	[illegible]0,000

[1] Estimates. [2] The financial year was changed to 1 July–30 June.

The capital-of-interest-bearing funded debt as at 31 Dec., 1948, consisted of gold francs 933,528,625, £30,310,908, $70,728,754, francs 138,955,803, gold marks 8,324,000, Swedish crowns 1,414,164, Bulgarian leva 1,012,222,623.

The capital-of-non-interest-bearing funded debt at the same date consisted of (internal) drachmai 649,162,075; (external) £10,000,000, £T1,940,210, drachmai 5,083,530,297.

The floating debt as at 31 Dec., 1948, amounted to $7,132,227.

The International Financial Commission (composed of delegates from Great Britain and France) established in February, 1908, to collect and disburse, with the collaboration of the Finance Minister, such revenues as are available for the service of the external debt is to be superseded by some other [illegible], according to the Anglo-Greek agreement of Jan., 1946. [illegible] are assigned the revenues (for the most part in Old Greece) from certain government monopolies, the stamp duty, and the import duties at the port of the Piraeus. The total income from these sources was in 1939, 4,909,413,713 drachmai, and the payments made by the commission in 1938–39 for the service of the foreign debts totalled 1,975,608,708 drachmai. The German occupation of 1941–44 interrupted the service of the debt, which has not been resumed since the Liberation.

Defence.

Army, Navy, Air Force and Security Forces are parts of a unified command under the Commander-in-chief at the head of the General Staff of National Defence.

I. Army.

Military service in Greece is compulsory and universal. Liability begins in the 21st year and lasts up to the 50th. The normal term of service in the active army is 24 months for all arms, followed by 19 years in the first reserve of the active Army and 10 years in the second. The normal annual contingent of recruits in peace time is about 50,000. Each annual contingent is called up for service in the active Army every 3 months.

Before the Second World War the Army was organized in 5 army corps, with headquarters at Athens, Larissa, Thessaloniki, Cavalla and Alexandroupolis, and comprised 13 divisions and 1 cavalry division. Each division contained 2 or 3 regiments of infantry (6 or 9 battalions) and 1 regiment of mountain artillery (4 batteries). The Army Corps had 1 field-artillery regiment, 1 heavy-artillery regiment, 1 A.A. artillery regiment, 1 mountain artillery regiment and 1 reconnaissance group.

During the war against the Italians and Germans in 1940–41, Greece mobilized 600,000 men.

Since 1945, the organization and establishment of the Army units have been adapted to British models. A British Military Mission is responsible for training the Greek Army; an American Mission looks after supplies. In Feb., 1950, there were 3 Army Corps with headquarters in Athens, Larissa and Thessaloniki.

II. Navy.

The Royal Hellenic Navy includes one cruiser of 7,789 tons, the former Italian *Eugenio di Savoia*, armed with 8 6-inch guns. There are 10 modern destroyers and 2 of older type, used for training; 6 submarines, 8 corvettes, 7 gunboats, 22 motor minesweepers, 30 coastal craft, 8 oilers, 2 repair ships, 9 landing ships and some miscellaneous craft. The old cruiser *Averoff* still heads the official navy list. Four more destroyers are to be delivered in 1951.

III. Air Force.

The Royal Hellenic Air Force is comprised of 2 Fighter Squadrons, one bomber Squadron, 3 Reconnaissance Flights, one Transport Squadron, one A.O.P. Squadron and an Air-Sea Rescue Squadron. The main bases are at Sedes, Larissa and Eleusis for operational units, and at Tatoi (near Athens) for flying training.

Production, Industry and Labour.

Greece is a food-importing agricultural country. Of the total area only one-fifth is cultivable, but it supports 53·7% of the working population. The total area under cultivation in 1938 was 2,409,553 hectares (6,023,882 acres); forest area was 2,406,502 hectares (5,944,059 acres), of which 4,121,119 acres were state owned. In 1948 the area under cultivation was considerably reduced owing to Communist guerilla activities.

In 1944, 49·5% of the population were peasants, 25% workers and artisans, 10% employees, 8·5% liberal professions, and 7% pensioners and rentiers.

Greek economy was completely ruined as the result of the occupation of the country by the Italians, Germans and Bulgarians from 1941 to 1944.

Acreage (1,000 hectares) and yield (1,000 metric tons) of the chief crops: —

Crop	Average 1935–39		1946–47		1947–48	1948–49
	Area	Yield	Area	Yield	Yield	Yield
Wheat	850	767	765	734	770	800
Rye	68	55	55	50	40	40
Maize	261	255	266	217	229	229
Barley	205	197	162	198	190	130
Oats	138	116	106	147	150	85
Meslin	56	41	52	46	30	—
Rice (milled)	2	4	2	5	9	9

Farming is concentrated on export crops, such as tobacco and currants, to pay for essential imports, including meat, wheat and flour. Agriculture suffers from soil-erosion and the inadequate use of fertilizers. Wheat yields per acre are the lowest in south-eastern Europe. The use of tractors and other agricultural machinery, imported by UNRRA and under the Marshall Plan, has made considerable progress.

Output of currants, 1949, was 90,000 metric tons; sultana raisins, 26,500 tons, dried figs, 22,800 tons. Currants and raisins furnished, by value, about 12·5% of total exports before the war.

Production of edible oilseeds (cottonseed and sesame seed) in 1949 was 43,000 metric tons, as compared with the annual average of 50,000 tons in 1936–40. Production of linseed in 1947 was 3,000 metric tons, as compared with the annual average of 5,000 tons in 1936–40.

Production of rosin in 1949 totalled 1,800 metric tons, compared with 18,500 tons in 1939–40. Output of turpentine in 1949 was 6,700 tons, compared with 5,200 tons in 1939–40.

The harvest of sponges was about 240,000 lb. in pre-war years and 286,000 lb. in 1949. Export of sponges in 1946 was 86,044 lb., of which 50,120 lb. went to the United States and 14,120 lb. to the United Kingdom.

In 1949 the tobacco yield was 46,000 metric tons (normally about 2·8% of world output and furnishing, by value, 45% of Greece's total exports). The harvested area was 75,000 hectares in 1949.

Olives are abundant, about 380,000 acres being under cultivation; output, 1949, 86,000 metric tons. Olive oil production, 1935-38 averaged 114,000 metric tons; it was 46,700 metric tons in 1948 and 172,000 metric tons in 1949.

Rice is cultivated in Macedonia—Yannitsa, near Thessaloniki, being the principal centre—the Peloponnese and Central Greece. Successful experiments have been made in growing rice on alkaline land previously regarded as unfit for cultivation. Two kinds of cheese are produced—sliced cheese in brine (commercially known as Fetta) and head-cheese.

There were in Greece (1949) 234,000 horses, 148,000 mules, 380,000 asses, 677,670 cattle, 6,656,000 sheep, 3,438,000 goats, 530,000 pigs, 9,700,000 poultry. Wool production in 1947 and 1948 was nearly 17,000 tons each.

Cotton output in 1950 was 77,308 metric tons (raw) and 22,500 metric tons (ginned).

Greece has a great variety of mineral deposits, including iron (of high content, 43%, mainly exported), iron-pyrites, emery, copper, zinc, lead, silver, manganese, aluminium, antimony, nickel, magnesite ore, lignite, sulphur, ochre, bitumen, marble (white and coloured), and various other earths, chiefly from the Laurium district, Thessaly, Euboea and the Aegean islands. There is no coal, only lignite of indifferent quality; reserves are about 10,000,000 tons; output in 1947, 154,000 short tons. Greece imports coal and oil for fuel.

Principal mineral output for 3 years was as follows (in metric tons):—

	1938	1948	1949		1938	1948	1949
Iron ore .	348,613	49,720	21,815	Magnesite (raw)	168,243	2,513	800
Iron pyrites	244,000	29,980	5,070	Chromite	42,464	1,000	nil
Lead (ore)	14,889	not available	not available	Emery .	3,078	5,359	5,096
				Lignite . .	108,010	—	—

Bauxite production, 1947, 22,420 metric tons (export, 6,000); 1948, 40,200 metric tons (export, 48,550). Magnesite production, 1948, 12,168 metric tons; lead and zinc, 9,824 metric tons; baryte, 18,706 metric tons; emery, 12,000 metric tons; iron pyrites, 14,805 metric tons; salt, 52,000 metric tons; talc, 1,800 metric tons.

Greece is a country of small industries, but output is slowly increasing. Establishments employing fewer than 5 persons numbered 70,644 in 1939, employing 145,391 persons. The leading industrial products are olive oil, wine, textiles, chemicals, articles of food. In 1948 the value of the production of industries was 4,600,000 million drachmai; 1949, 5,900,000 million drachmai.

Trade Unions.—The status of trade unions in Greece is regulated by the Associations Act 1914. Trade union liberties are guaranteed under the Constitution of 1911 and the right to strike is subject to the Settlement of Collective Labour Disputes Act of 21 Nov., 1935, which, while not making strikes illegal, introduced the principal of compulsory arbitration.

The national body of trade unions in Greece is the Greek General Confederation of Labour.

Commerce.

Foreign trade (in thousands of drachmai) for 5 years was :—

	1938	1941	1947 [1]	1948	1949
Imports	14,761,395	4,838,264	$137,415,977	1,822,275,391,000	2,018,035,925,000
Exports .	10,149,180	3,904,166	$55,287,069	469,861,214,000	574,736,921,000

[1] Owing to the instability of the drachma, the returns for 1947 have been given in U.S. dollars.

The trade was distributed, by principal countries, as follows :—

Countries	Imports from				Exports to			
	1947 [1]	1947 [1]	1948	1948	1947	1947	1948	1948
	U.S. dollars	Metric tons	U.S. dollars	Metric tons	U.S. dollars	Metric tons	U.S. dollars	Metric tons
U.K. .	14,916,277	46,020	27,492,900	65,068	19,999,191	93,615	20,152,417	123,348
Egypt .	3,668,987	16,466	4,354,958	32,937	1,248,423	1,889	4,955,076	10,467

France .	2,197,252	4,831	5,756,365	29,552	1,944,719	2,611	5,207,593	33,969
Germany	2,271,063 [2]	142,592	16,939,964	205,775	—	—	2,798,031	2,683
Switzerland	2,173,990	1,709	2,069,954	719	1,293,584	7,567	1,171,021	3,791
Italy . .	7,829,492	6,358	16,541,316	17,253	10,043,710	25,235	13,491,540	38,755
Netherlands	1,469,105	5,887	3,830,192	18,823	1,255,638	4,562	1,635,836	6,867
Turkey .	11,384,042	60,219	11,192,564	84,221	292,027	2,092	1,992 675	23,762
Sweden .	1,065,197	20,740	6,936,401	51,422	1,028,978	6,971	1,970,706	3,231
Czecho-slovakia .	3,474,329	17,381	6,160,164	25,801	3,542,859	3,275	8,392,076	5,580

[1] Excluding UNRRA imports. [2] Western zones only.

Exports of minerals (in metric tons), 1948 :—Iron ore, 49,720; iron pyrites, 29,980; magnesite, 12,002; baryte, 18,643; emery, 5,359.

Exports of agricultural products (in metric tons), 1948:—Currants, 39,054; sultanas, 21,768; tobacco, 18,042; spongos, 32·2.

In 1948, the United Kingdom's imports from Greece included :—Currants (£2,324,000), sultanas (£1,208,000), grapes (£758,000) and tobacco (£26,000; 1947, £2,653,000). Principal U.K. exports to Greece were :—Machinery (£1,177,000), foodstuffs (£1,081,000), textiles (£897,000) and iron and steel manufactures (£231,000).

Total trade (in £ sterling) between Greece (from 1947 including the Dodecanese) and the United Kingdom for 5 years was :—

	1938	1947	1948	1949	1950
Imports from Greece to U.K. .	1,960,442	7,076,147	5,923,368	6,075,330	3,588,922
Exports to Greece from U.K. .	3,752,123	7,913,015	13,353 090	13,779,969	14,753,660
Re-exports to Greece from U.K.	115,753	352,698	303,885	478,125	780,215

Communications.

Great damage was done during the enemy occupation, 1941-44, to the roads, railways, bridges, ports, telegraphs and the Corinth Canal.

Shipping.—The merchant navy on 30 June, 1939, had 589 steam and motor ships of 1,812,723 tons (including one passenger liner of 16,900 tons)

and 710 sailing vessels of 55,417 tons. Almost three-quarters of the tonnage was lost during the war; out of 69 passenger ships only 17 survived, and only 113 of 188 cargo boats. In July, 1950, the total tonnage had reached 1,348,874 tons (including 302 steamers, 84 motor boats, 13 oil tankers, 5 trawlers). Normally about 92% of exports and 90% of imports are seaborne.

There is a canal (opened 9 November, 1893) across the Isthmus of Corinth (about 4 miles). In 1938, 6,943 steamers of 2,736,298 tons and 863 sailing vessels of 11,791 tons passed through the canal. The canal was rebuilt in 1948 with American aid and re-opened on 5 July, 1948.

Roads and Rail.—There are 8,440 miles of roads, of which 7,064 are improved earth, gravel and water-bound macadam; 1,191 of surface treated and penetration macadam, and 185 of bituminous concrete and asphalt surfaced concrete roads. Number of motor vehicles at 31 Dec., 1949:—3,028 buses, 14,968 lorries, 7,181 passenger cars.

Total length of the Greek railway system in 1940 was 2,679 km. of which 1,325 km. belonged to the State Railways (SEK) and 1,354 to the various private companies, the most important being the Piraeus-Athens-Peloponnese Company (SPAP).

During the war the railways suffered great losses especially during the departure of German troops, who systematically destroyed all the railway installations and equipment. Only 670 km. were left fit for use after the liberation in 1944. The railway system is now (1951) restored.

Aviation.—Air services are run by 3 Greek companies, which connect Athens with Thessaloniki, Jannina, Larissa, Kavalla, Volos, Corfu, and with Rhodes and Crete. Thirty foreign companies connect Athens with the principal cities of the world. The principal airport is at Elliniko near Athens.

Post.—The telegraph lines on 31 Dec., 1938, had a length of 24,101 km., with 59,123 km. of wire. The number of offices was 5,423.

At 30 June, 1949, there were 59,431 km. of telephone lines in service. The number of telephones was 65,078 in 1949.

There were 1,368 post offices (1937).

Cable and Wireless, Ltd., operate, from a wireless station at Athens, circuits with London and Cairo.

Banking, Money, Weights and Measures.

The National Bank of Greece (founded in 1841) was authorized to issue bank-notes, the amount being increased each time the privilege of the bank was extended. According to a decree of 12 May, 1928, the note issuing privilege of the National Bank was transferred to the new issuing bank, the Bank of Greece, as from 14 May, 1928, in accordance with the conditions of the Geneva Protocol of 15 September, 1927. By the same decree, the drachma was stabilized, its gold content being fixed at 0·01952634 gramme of gold, corresponding to 77·02 drachmai to the U.S. dollar, but the stabilization has been suspended since 26 April, 1932. On 31 December, 1939, the total bank-note circulation amounted to 9,453,000,000 drachmai; total gold, 4,223,000,000 drachmai. In September, 1943, during the German, Italian and Bulgarian occupation, the note circulation, without gold backing, had soared to 1,276,000 thousand milliards; it stood at 1,864,000 million drachmai on 2 Jan., 1950.

On 11 November, 1944, the Greek currency was stabilized at 600 drachmai to the £ sterling (the 'new' drachma equal to 50,000 million 'old' drachmai), but although the new notes were to be backed 100% by

gold and foreign exchange, deterioration continued and by January, 1946, the gold sovereign commanded for a time 172,000 drachmai.

A second stabilization took place in January, 1946, which fixed the £ sterling at 20,000 drachmai and the $ at 5,000 drachmai. After the devaluation of the £ sterling, the value of the drachma was readjusted on 20 Sept., 1949, the new parity being fixed at 42,000 drachmai to the £ sterling and 15,000 drachmai to the $ U.S. Purchasers of sterling and dollars must buy exchange certificates in the open market; their prices were, on 13 Sept., 1950, 22,000 and 10,000 drachmai respectively.

On 30 April, 1940, the 29 banks in Greece had deposits amounting to 19,119 million drachmai and capital of 1,970 million drachmai.

On 31 July, 1940, the balance standing to the credit of depositors in the post office savings bank totalled 3,713 million drachmai.

The metric system is used in official publications but not compulsory in every-day transactions.

The principal old weights and measures are :—

1 *oke* = 400 drams = 2·832 lb. 1 *pic* = 27 inches.
1 *kantar* = 44 okes = 124·08 lb. 1 *stremma* = ·2471 acre.

The Great Venetian pound (G.V. lb.) is used universally in the currant trade; 2,128 G.V. lb = 1 long ton; 1 G.V. lb. = 0·480 kg.

Diplomatic Representatives.

1. Of Greece in Great Britain (51 Upper Brook St., W.1).

Ambassador Extraordinary and Plenipotentiary.—Leon V. Melas (accredited 7 Aug., 1947).

Minister Counsellor.—Basile Mostras.

First Secretaries.—A. Pilavachi; D. Bitzios.

Military and Air Attaché.—Col. Kyriakos Papageorgopoulos.

Naval Attaché.—Capt. George Zeppos, R.H.N.

Commercial Counsellor.—N. D. Pierracos.

Press and Information.—A. A. Pallis (*Minister Plenipotentiary*).

Hon. Attachés.—S. X. Constantinidis; Philip P. Argenti.

There are consular officers of Greece at London, Belfast, Birmingham, Bradford, Bristol, Cardiff, Glasgow, Manchester, Liverpool, Newcastle, Portsmouth and Southampton.

2. Of Great Britain in Greece.

Ambassador Extraordinary and Plenipotentiary.—Sir Clifford John Norton, K.C.M.G., C.V.O. (appointed 15 Feb., 1946).

Counsellors.—P. M. Crosthwaite, C.M.G.; R. S. Isaacson (*Commercial*); F. Hampton (*Labour*).

Military Attaché.—Col. J. A. S. Crum, O.B.E.

First Secretaries.—J. C. A. Roper, M.C.; S. H. Hebblethwaite (*Information*); W. F. Redmond, M.B.E. (*Consul*); C. N. Halkias, M.B.E.; H. P. L. Attlee (*Commercial*); P. Whinney, D.S.C.

There are consular officers at Athens, Patras, Piraeus, Rhodes, Thessaloniki, Kawalla, Samos, Canea and Heraklion.

Books of Reference.

Statistical Information.—The General Statistical Service of Greece is a division of the Ministry of National [illegible] (Athens). It consists of 4 sections :—Commercial; Popula[illegible], Census of Population (offices in Odos Mavromataion, Kyvelis).

1. Official Publications.

Annuaire Statistique de la Grèce. 1931–1939.

The Statistical Bureau also publishes many monthly and annual returns, among others :—Recensements de la population. Resultats statistiques généraux des recensements.—Statistique du mouvement de la population —Statistique des causes de décès.—Statistique des élections.—Statistique annuelle du Rendement Agricole etc. de la Grèce.—(Effectif du [illegible] les arbres.)—Bulletins du mouvement de la navigation de la Grèce [illegible] mensuels et annuels du commerce spécial de la Grèce avec les pays étrangers.—Statistique des Postes, Télégraphes et Téléphones.—Bulletin mensuel de Statistique.

(República de Guatemala.)

Constitution and Government.

The Republic of Guatemala was established on 17 April, 1839, after having formed for 18 years part of the Confederation of Central America. The present Constitution came into effect 15 March, 1945. The legislative

ower is vested in a single-chambered National Assembly or Congress, consisting of representatives (one for every 50,000 inhabitants) chosen by direct opular vote for 4 years; one-half of Congress is renewed every 2 years. Deputies may not be re-elected until after one term has elapsed. The President is normally elected for 6 years, and barred from re-election for a eriod of 12 years, but President Ubico's term, which expired in 1937, was, s the result of a plebiscite held in June, 1935, and through an amendment o the Constitution in Sept., 1941, extended to 15 March, 1949. A evolt in July, 1944, overthrew President Ubico, and in the 1945 Constitution he principle that no President shall immediately succeed himself is reffirmed; in the event of any attempted transgression of it, the right of ebellion is expressly sanctioned. No member of the armed forces on the mployed list may be elected to the presidency or to Congress.

The new Constitution enfranchises women over 18 who can read and rite; they may also hold office. For men the age remains 18, but there no literacy test; male illiterates may vote and hold municipal (but not ational) offices. All voting is by secret ballot, except that male illiterates ust indicate publicly their choice. Voting is compulsory for literate males ut optional for women and illiterates.

President of the Republic.—Colonel Jacobo Arbenz Guzman (born 1913), lected 11–13 Nov., 1950; a career Army officer; inaugurated 15 March, 951. He polled 267,234 votes out of a total of 407,596.

The administration is carried on, under the President, by the heads of departments: Foreign Affairs, Communications and Public Works, inance and Pu[illegible], Education, National Defence, Internal Affairs, griculture, Public Health and Social Assistance, and Economy and Labour. layors of municipalities, with their councils, are now elected directly by the eople instead of being appointed by the President.

National flag: blue, white, blue (vertical).

National anthem: Guatemala feliz! (words by J. J. Palma; tune by . Alvarez).

Area and Population.

The area is 108,889 square km. (42,042 square miles). In March, 1936, uatemala, Salvador and Honduras agreed to accept the peak of Mt. Iontecristo as the common boundary point.

The population, according to the April, 1950, census, was 2,787,030, compared with 3,284,269 at the 1940 census. About 54% are pure Indians, of 1 different groups descended from the Maya-Quiché tribe; most of the emainder are mixed Indian and Spanish (*ladinos*); the ruling classes are f European descent. Density of population, 1950, about 25·6 per square ilometre. Crude birth rate, 1947, 36·8 per 1,000 population; crude death ate, 17·4; crude marriage rate, 2·1. Infantile death rate, 109·9 per 1,000 ve births.

Guatemala is administratively divided into 22 departments, each with a overnor appointed by the President.

The capital is Guatemala City with 293,998 inhabitants (April, 1950), most all *ladinos* or descendants of Europeans. Other towns are Quezaltenango (36,209), Coban (29,242) and Zacapa (24,033).

Ever since the republic was established in 1839 it has claimed that ritish Honduras is Guatemalan territory. It renewed this claim in ept., 1945; on 14 Jan., 1946, Britain invited it to bring the dispute before he International Court of Justice. In Feb., 1948, Guatemala closed the ontiers with British Honduras.

Religion and Education.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

In the fiscal year 1947-48 there were 3,626 primary schools with 9,554 teachers and an attendance of 195,463 pupils; 62 secondary schools with 1,139 teachers and an attendance of 9,000 pupils; the University of Guatemala (originally founded in 1678 as the University of San Carlos de Borromeo) was reopened in 1910 with seven faculties and schools. All education is free. The 1940 census showed that 65·4% of those 7 years of age and older were illiterate. In 1948, 47,569 adults were taught to read and write. The literacy index of the army (1947) was stated to be 83%.

There are 39 public libraries in the country. Motion-picture theatres numbered 52 in 1950, with seating capacity of 37,100.

Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts and 28 courts of first instance. Under the 1945 amendments to the constitution, judges of first instance are appointed directly by the chief justice, but supreme court and appeal court judges continue to be appointed by the National Assembly as before.

All holders of public office have to show on entering office, and again on leaving, a full account of their private property and income.

Finance.

Ordinary revenue and expenditure in quetzales (1 quetzal = $1, U.S.):—

	1945-46	1947-48	1948-49	1949-50 [1]	1950-51 [1]
Revenue	29,393,399	52,412,082	54,063,687	51,098,011	44,975,781
Expenditure	28,880,921	45,941,008	49,142,018	51,098,011	44,975,781

[1] Budget estimates.

Budgeted expenditures, 1950–51, in million quetzales, included extraordinary investments, 7·9; education, 6·7; communications and public works, 5·3, and defence, 4·8.

Principal items of actual expenditure in quetzales (fiscal year 1948–49) were :—Public debt service, 671,736; ministries, 38,441,437; presidency, 441,860; judiciary, 758,557; legislature, 259,444.

As of 30 June, 1949, the internal public debt was 23,653,245 quetzales, and the external debt, 747,551 quetzales. British investments, at their par values, 1949, were £9,796,829, of which 64·1% was in default. American direct investments, 1950, were about $250 million, chiefly those of 3 large American corporations operating in bananas, railways and power.

Defence.

Military service is compulsory between the ages of 18 and 50 (from 18 to 30 in the special reserves), and conscripts may be called upon for work in communications, reforestation and agriculture. Service in the active Army is for 1 year for infantry and cavalry and 2 years for artillery and engineer corps; in addition, there are 80 companies of volunteers. The effectives for 1944 were 21,148 for the fighting services and 575 for auxiliary services. There is a small Air Force. New airports were built during 1944 at Puerto Barrios and San José. The military estimates for 1948–49 were

4,550,000 quetzales. The chief of the armed forces is chosen by Congress for a term of 6 years; Congress may remove him for any cause.

Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the larger. The Pacific slope, though comparatively narrow, is well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the republic. The Atlantic slope is sparsely populated, and has little of commercial importance beyond the chicle and timber cutting of the Petén, coffee cultivation of Coban region, and banana-raising of the Motagua Valley and Lake Izabal district.

The soil in general is exceedingly fertile and agriculture is the most important industry. But soil erosion is serious and a single week of heavy rains suffices to cause flooding of fields and much crop destruction.

The principal crop is coffee; there were 10,841 coffee plantations in 1943, employing 425,544 persons, occupying one-fifth of the cultivated land and accounting for 70% of total exports (1949, about 60%). Germans normally owned and controlled between 30% and 40% of the coffee plantations of Guatemala, but in 1942 the Government took over the German plantations, which are now owned by the nation and administered by the Central Bank. Output, 1949–50, 1,075,000 bags (of 60 kilos); exports, 900,277 bags.

Bananas are the next most important export crop, accounting usually for 21% of total value; exports, 1949, were small, 6·9 million stems compared with 12·3 million in 1948. Sugar production in 1949–50 amounted to 33,479 metric tons; maize, rice, beans and wheat are important domestic crops. Guatemala is, after Mexico, the largest producer of chicle gum (used for chewing-gum manufacture in the United States); output, 1949, only 10,000 quintals compared with 40,000 in 1948; exports in 1949 were valued at 1,844,000 quetzales. Twenty-five nurseries for rubber trees and cinchona plantations for the production of quinine were established, but the alkaloid content of the succirubra seedlings grown in Guatemala (for quinine) proved too low to justify the effort, though exports, 1946, of 495 tons, valued at $134,396, have aroused hopes. 160 tons of rubber were produced 1944–45, of which 95 tons were exported. Tobacco output (all for home consumption) in 1947 was 5 million lb. grown on 8,300 acres. Abacá fibre, 1947, amounted to 8,127,040 lb.; output for 1948 is estimated at 13,361,000 lb. She is the largest source of the essential oils (oils of citronella and lemon grass); exports, 1950, 1,200,000 lb., valued at $2 million. Cacao exports, 1948, were 751,280 lb. Cattle-grounds (*potreros*) occupy about 758,640 acres. Livestock in 1947 (census) included 911,000 cattle, 618,000 sheep and 374,000 pigs.

The forest area has an extent of 17,784,000 acres. The department of Petén is rich in mahogany and dye woods; exports of fine cabinet woods (1949) were nearly 3 million square feet.

Owing to the lack of transport, general mining is little developed, but in March, 1948, a 40-year concession was granted to a company reputed to enjoy American backing to explore for minerals, including radio-active substances. Three American oil companies surrendered their concessions in May, 1949, through failure to agree on terms. Chromite is mined in small quantities; output, 1949, 300 metric tons.

Trade unions are small; they were organized in 1950 in a Left-wing national federation, the Guatemalan Autonomous Labor Federation (FLAG), which was refused official recognition. A federation of farm workers (CNCG) was organized in May, 1950.

Commerce.

Value (in thousands of quetzales; 1 quetzal = $1, U.S.) and volume (in metric tons) of the commerce were :—

	1945	1946		1947		1948		1949
	Value	Value	Volume	Value	Volume	Value	Volume	Value
Imports .	23,349	36,204	259,181	57,319	325,961	68,350	387,373	67,984
Exports .	30,436	36,680	300,755	52,033	358,074	50,165	347,701	52,272

Import values are c.i.f. and export values f.o.b. but, since 1942, inclusive of the export duty, if any.

Preliminary figures for 1950 show imports at 71·2 million and exports at 67·6 million quetzales.

Value of chief imports, 1949 :—Textiles, 11,207,000 colones; foodstuffs [illegible] 7,625,000; vehicles, 7,558,000. Chief exports :—Coffee, [illegible] nes (71% of the total); bananas and other fruits, 7,612,000; vegetable fibre, 1,910,000, and chicle, 1,844,000 colones.

In 1949, 73·4% of the imports (1948, 76·2%) came from the United States and 91·5% of the exports (1948, 88·9%) went to the United States.

Exports include gold, hides, essential oils and timber.

Guatemala's economy, though based almost entirely upon agriculture, is semi-colonial. Her trade balance with her biggest customer, the United States, is, on paper, strongly 'favourable'; but the proceeds of much of her exports are retained abroad and thus reduce her ability to import. Her trade balance in 1949, according to data published by the I.M.F., was adverse by 15,757,000 quetzales.

Total trade between Guatemala and the U.K. for 6 years (in £ sterling, according to Board of Trade returns) :—

	1938	1946	1947	1948	1949	1950
Imports to U.K. . .	42,930	8,139	144,799	361,334	93,434	518
Exports from U.K. . .	170,653	175,564	247,845	372,986	392,352	795,458
Re-exports from U.K. .	1,623	137	2,042	2,589	2,181	10,496

Social Welfare.

A comprehensive system of social security was outlined in a law of 30 Oct., 1946. Medical personnel, 1947, included 408 doctors and 130 nurses.

Shipping and Communications.

The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, San José and Champerico. There is a monthly steamship service between eastern Canada ports and Puerto Barrios.

The principal railway system is the American-owned International Railways of Central America, which represents a consolidation of 4 small companies, with total mileage, 652. The lines extend from Puerto Barrios to Guatemala City, thence to San José, on the Pacific Ocean. The system extends westward to Ayutla, on the Mexican border, where it connects with the Mexican state railways. All railways are of 3 ft. gauge. Total mileage of all lines is 720 miles. The opening of a new bridge in 1942 across the Suchiate River between Mexico and Guatemala has completed the linking by railway of North and South America, though differences in gauge make it necessary to change trains at Ayutla.

There were (1943) 4,320 miles of main and secondary highways in good condition for motor traffic. A new highway connecting Escuintla with San José, on the Pacific coast, was opened in April, 1949. The incomplete Pan-American highway crosses the country from Mexico to El Salvador. Motor vehicles numbered 8,500 in 1948.

There were (1938) 385 post offices. The national telegraph lines had (31 December, 1934) a length of 4,079 miles, and the telephones, 4,172 miles. There are 235 telegraph offices and 12 central and 79 subordinate telephone stations; instruments, 1949, numbered 3,000. Radio stations have been opened at Quezaltenango, Guatemala City, Puerto Barrios and Livingston, which communicate with Mexico City. There are 9 broadcasting stations at Guatemala City; wireless sets in use, 1949, 29,798.

Air travel is expanding rapidly; for example, chicle from the northern province of Petén is exported entirely by air. In 1949, air cargo (in international trade) amounted to 5,849,198 lb.; number of passengers, 54,496.

Air-mail and passenger services connects Guatemala City with Tegucigalpa (Honduras), San Salvador, Managua, San José (Costa Rica), Panama, Belize (via San Salvador and Tegucigalpa), Mexico City and New Orleans. A local aviation company connects Guatemala City, Quezaltenango, Puerto Barrios and Coban.

Banking, Money, Weights and Measures.

By an Act passed 11 Dec., 1945, the Central Bank of Guatemala (founded in 1926 as a mixed central and commercial bank) was superseded by a new institution, the Banco de Guatemala, to operate solely as a central bank. The Act, which became effective on 4 Feb., 1946, covers the reconstruction of the entire commercial and banking system on novel lines worked out by an expert loaned by the U.S. Federal Reserve system; the plan aims to prevent banks of small capital from jeopardizing their deposits by excessive loans on commodities, such as coffee and bananas, which are subject to severe fluctuations in supply or in prices. Total circulation of bank-notes (backed by a gold reserve fixed by law at a minimum of 40%) on 31 Dec., 1950, was 37,355,000 quetzales; gold stocks were 27,229,000 quetzales, mostly deposited with the U.S. Federal Reserve; foreign exchange amounted to 9,834,000 quetzales. There are 5 banks, besides the original Central Bank, which has been renamed the Banco Agricola Mercantil. There is no exchange control.

Guatemala in 1946 notified the International Monetary Fund that its unit of currency, the quetzal, was equal to $1·00, or 0·888671 gramme of fine gold; one troy oz. of fine gold was accordingly worth 35 quetzales. The gold *quetzal* was established 7 May, 1925, equal to 60 old Guatemala paper pesos, with a gold content equal to that of the U.S. dollar. The exchange rate has remained at $1 since 1926. Gold coins have been withdrawn from circulation. Silver coins in active circulation, 1948, are of 25, 10 and 5 centavos; there are copper coins of 1 centavo and ½ centavo, and paper notes of 1,000, 500, 100, 20, 10, 5, 1 and 0·50 quetzales (50 centavos).

Libra of 16 oz. .	= 1·014 lb.	*League*	= 3 miles.
Arroba of 25 libras	= 25·35 lb.	*Vara*	= 32 inches.
Quintal of 4 arrobas	= 101·40 lb.	*Manzana* . . .	= 100 varas sq.
Tonelada of 20 quintals	= 18·10 cwt.	*Caballeria* of 64 manzanas . . .	= 110 acres.
Fanega	= 1½ imp. bshl.		

The metric system has been officially adopted.

Diplomatic and Consular Representatives.

1. Of Guatemala in Great Britain (82 Portland Place, W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Francisco Linares Aranda (accredited 26 June, 1950).

Counsellor and Consul.—Francisco Palomo.

First Secretary.—Lorenzo Montúfar Navas.

There are also consular representatives at Glasgow, Liverpool (C.G.) and Belfast.

2. Of Great Britain in Guatemala.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General.—W. H. Gallienne, C.B.E. (appointed 20 Oct., 1947).

First Secretaries.—R. J. P. Sedgwick (*Commercial*); H. A. N. Brown (*Labour*).

Military Attaché.—Col. C. G. Irving-Bell.

There is a salaried Consul at Guatemala City and an unsalaried Consul at Quezaltenango.

Books of Reference.

The official gazette is called *Diario de Centro América*.

HAITI.

(République d'Haiti.)

After the discovery of Hispaniola by Columbus in 1492, Spain took possession of the island and of its native Indians. Owing to war and other causes, the natives disappeared, and to repopulate the island, Bishop Las Casas in 1517 obtained permission from the Spanish Crown to bring over African Negroes, thus establishing the African-American slave traffic. The name is Indian and means 'Land of Mountains.'

Constitution and Government.

The Republic of Haiti, which had been a French colony since 1677, was proclaimed independent on 1 January, 1804, under the leadership of a black chieftain, Jean-Jacques Dessalines, who founded an empire which lasted until 1806. Since then Haiti has been a republic, governed under a centralized system finally expressed in the constitution of 1935, to which, however, further centralizing amendments were added in 1939 and 1944. A Constituent Assembly, elected on 18 May, 1946, drafted a new constitution,

which came into force on 23 Dec., 1946. This constitution was abrogated on 10 May, 1950, when the government of President Estimé was overthrown by a Military Junta, following an attempt by the President to secure a second term of office. In Nov., 1950, a new constitution was drafted by a Constituent Assembly and came into force when the new government assumed office on 6 Dec., 1950. This retained the President's term of 6 years and the provision making him ineligible for immediate re-election, and provided, for the first time, that he is to be elected by direct popular vote (instead of indirectly, by the National Assembly as heretofore). Legislative authority (and sole power to amend the constitution) remains with the National Assembly of 21 senators and 37 deputies. Deputies are elected for 4 years and senators for 6 years; both are elected by the primary assemblies of each department.

The new 1950 constitution contemplates full political rights for women before Dec., 1953; meantime women of 30 years of age are eligible for all public offices and may vote in municipal elections.

President of the Republic.—Colonel Paul [illegible] Magloire. Elected by popular vote 8 Oct., and assumed office 6 [illegible], when he formed a government in succession to that of the Military Junta of which he himself had been one of the 3 members. The first President to be elected by direct popular franchise, he polled 151,115 votes, or all except about 2,000. His party was called 'the Movement of Workers and Peasants.'

The administration of the republic is carried on, under the President and ministers, by departments.

National flag : blue, red (horizontal); in the centre, the coat of arms on a white square.

National anthem : 'La Dessalienne': Pour le pays, pour les ancêtres (words by J. Lhérisson; tune by N. Geffrard, 1905).

Independence Day is celebrated on 1 Jan. and 'Discovery of Haiti' on 6 Dec.

Area and Population.

The area of the republic, which embraces the western portion of the island of Hispaniola, formerly known as Haiti—the larger but less populated eastern division forming the Dominican Republic—is estimated at 27,750 square km. (10,714 square miles). A census taken on 7 to 19 Aug., 1950, under an American technical adviser, gave a population figure (provisional) of 3,111,973; density, 290 per square mile. The previous census, in 1919, showed a population of 1,631,250. The majority of the population are Negroes; there are also great numbers of mulatto Haitians, the descendants of the former French settlers, and about 2,000 foreign white residents. The capital, Port-au-Prince, with (1950) 424,168 inhabitants, situated on a large bay and possessed of an excellent harbour, celebrated its bi-centenary in 1949–50, by an international exhibition. Aux Cayes has (1950) a population of 195,539; Gonaives, 165,635; Cap Haitien, 119,039; Port de Paix, 115,850. The official language is French, though most of the common people speak a dialect known as Creole French. Haiti is the only French-speaking republic in the Americas. There are no vital statistics.

Religion and Education.

The predominant religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are mostly Bretons and Canadians. Protestant churches are also largely represented.

Elementary education is free and compulsory; the school system is modelled after that of France, under the direction of the Secretary of National Education with the country divided into 24 inspectors' districts. The teaching of English was made obligatory in all schools, beginning 1 Oct., 1942. Primary schools (about 1,060) have 1,190 teachers and are attended by approximately 54,000 boys and 33,000 girls. There are 6 national lycées and 15 private secondary schools, with about 10,000 pupils. Agricultural and industrial education is provided by 60 farm schools for boys and 8 urban schools for boys and girls with a total registration of 12,200. There are 2 normal schools at Port-au-Prince. Higher education (free) is offered at the National School of Medicine, the National School of Law, the Central School of Agriculture and the new state-controlled University of Haiti, to which the Polytechnic Institute (until 1947 called School of Applied Science) has been affiliated. In addition there are numerous schools maintained by the Catholic teaching orders and a small group under Protestant direction.

A United Nations investigation (1949) found about 85% of the population illiterate, with only one-fifth or one-sixth of the children attending school.

Marbial, a rural region with a population of 26,000, largely illiterate, has been chosen by the United Nations Educational, Scientific and Cultural Organisation as the subject of a concentrated campaign against illiteracy, utilizing the most advanced technique.

There were, in 1950, 8 cinemas with a seating capacity of 3,900, and 6 daily newspapers with a combined circulation of 24,000.

Justice.

Justice is administered by a Court of Cassation and by lower courts, all appointed for 10 years by the President, and irremovable, unless impeached. The legal system is basically French.

Finance.

About 80% of the revenue of Haiti is derived from customs, paid in American currency on exports and imports. Debt charges absorb about 10% of revenue.

Revenue and expenditure (fiscal year ending September 30) for 6 years, in United States dollars (5 gourdes = $1, U.S.) were :—

	1944–45	1945–46	1946–47	1947–48	1948–49	1949–50 [1]
Revenue	8,378,000	8,911,455	13,053,283	15,760,000	16,619,771	14,643,270
Expenditure	8,503,200	8,075,400	12,087,683	16,740,000	18,663,061	14,643,263

[1] Estimates.

The 1949–50 budget included an appropriation of $760,000 for the Artibonite engineering project, an increase for the armed forces amounting to $260,000, and a special allocation for the international exhibition.

Of the expenditures proposed for 1949–50, public debt will take $2,229,250; the Department of the Interior, $878,530; education, $2,025,631, and the Armée d'Haiti, $2,937,255.

On 30 Sept., 1948, the Treasury had a clear surplus, over all current claims, of $228,600 compared with $2,305,842 the previous year. Total public debt in Sept., 1949, was $7,960,000, compared with $14,083,800 in 1943. Debt service is being met in full.

The fiscal control, by the United States, of the revenues of Haiti ended officially on 1 October, 1947, when the Haitian government redeemed the outstanding balance of the 1922 Loan, amounting to 26,924,051 gourdes. There remains an external Public Works Loan (1938) amounting to 11,350,000 gourdes. A compulsory domestic loan for $3,000,000 was imposed in 1949.

American direct investments in Haitian enterprises, 1940, $12,479,000.

Defence.

An armed force (Armée d'Haiti) of 3,440 officers and men has the functions of a gendarmerie and soldiery. The President is commander-in-chief and appoints the officers. It possesses 6 75-mm. guns and a few 37-mm. cannons for coast defence, 4 tanks and a few scout cars. There is also an Air Force of 55 men and 17 officers, with 15 aircraft for reconnaissance and passenger transport. There is a Navy of about 300 officers and men, with 5 vessels, which are now manned by the newly formed coastguards. Control vessels are also maintained for customs purposes. The military budget for 1949–50 amounted to 14,686,277 gourdes.

In 1949 the Republic secured the services of American air and naval missions for training the personnel.

Production.

Only one-third of the country is arable; the resulting pressure of population is the main cause of rural poverty.

The industries of Haiti are mainly agricultural, carried on in 7 large plains, from 200,000 to 25,000 acres, and in 15 smaller plains down to 2,000 acres. Irrigation is extensively used. Haiti has a greater diversity of export crops than any other West Indian area. The most important product is coffee of excellent quality, classified as 'mild,' grown by peasants. Estimated production in 1949–50, 25,620,000 kilos; as in pre-war years, Europe took the major part of the crop. Coffee pays an export tax. Cocoa is grown extensively, and cotton and sisal are exported in increasing quantities. Cocoa exports, 1948–49, amounted to 1,560 metric tons, chiefly to the United States. The sisal crop, 1948, was 57,487,148 lb. The cultivation of tobacco and bananas (brought to Haiti in 1515) is extending. The government in 1947 became sole buyer of bananas for export. Output of rice (about 40 million lb.) is enough for domestic consumption, leaving 1 or 2 million lb. for exports. Sugar is grown; output 1948–49, from one large American sugar central 42,900 metric tons; exports, 1947–48, 20,092 short tons of raw sugar. Molasses output, 1947–48, was 2,413,123 gallons, all to the United States. Rum and other spirits are distilled but not exported. Logwood is an important product, and other valuable woods are now exported. Handicraft exports, mainly sisal [illegible] and mahogany wares, are a recent feature, reaching a value of [illegible] in 1947–48. Essential oils from lime, vetiver, neroli and amyris are becoming important; exports in 1948–49, all to the United States, amounted to 196,575 lb. Cattle breeding is encouraged. In 1945, there were 200,250 cattle, 13,800 sheep and 1,010,000 goats.

Haiti possesses undeveloped mineral resources of gold, silver, copper, iron, antimony, tin, sulphur, coal, nickel, gypsum and porphyry.

Trade Unions were recognized in Feb., 1946, when 23 unions were registered. A Domestic Servants Union is the largest. A minimum wage of 70 cents a day was secured in 1947.

Commerce.

Imports and exports for 6 fiscal years ending 30 September (in U.S. dollars):—

	Imports	Exports		Imports	Exports
1943	10,972,622	10,628,356	1948	32,208,543	30,884,927
1945	13,153,941	17,112,336	1949	31,426,822	31,019,850
1947	27,230,401	31,498,410	1950	36,200,000	38,480,000

In 1947–48 the principal exports were 22,732,810 kilos of coffee, valued at $10,775,131; 26,077 metric tons of sisal, $8,112,957; 20,092 metric tons of raw sugar, $2,215,300; 3,547,000 stems of bananas, $2,840,299, and 3,290 tons of cotton, $1,860,897.

In 1948–49, exports of coffee amounted to 27,824 metric tons ($13,448,847); raw sugar, 17,558 metric tons; molasses, 13,415 metric tons; sisal, 29,710 metric tons ($9,310,717); mahogany and sisal handicraft, $1,025,403.

The United States is the most important market for Haitian exports (taking about 60% in 1947–48) and the principal supplier of Haitian imports (supplying 81·6%).

The leading imports are cotton manufactured goods, foodstuffs, machinery and apparatus, mineral oils, soap and cotton textiles.

Total trade between Haiti and the U.K. in £ sterling (Board of Trade returns):—

	1938	1946	1947	1948	1949	1950
Imports to U.K. .	210,774	502,582	1,039,065	768,398	666,659	535,007
Exports from U.K.	193,172	58,578	112,860	387,450	306,121	651,222
Re-exports from U.K.	417	605	305	212	139	1,000

Shipping and Communications.

Several lines of steamers (American and Dutch) connect the ports of Haiti with New York, and others (British, French, Dutch and German) with Europe. In 1946–47, 734 steam and motor vessels of 774,025 tons entered and cleared at Haitian ports; in 1947–48 the entering and departing tonnage was 728,133 net tons. U.S. vessels led in the import trade and Dutch vessels in export trade.

Port-au-Prince is connected with Cap Haitien by a road 169 miles long, and with Mirebalais and Lascahobas by a road 33 miles long. Total length of motor road is about 975 miles, including a new 40-mile road from Port-au-Prince to the Dominican frontier. A light railway has been constructed from Port-au-Prince to Lake Assuéi (28 miles), and to Léogane (22 miles), but the traffic is small. The 'National Railroad of Haiti' runs from Port-au-Prince to Verrettes, distance 85 miles. Total mileage, about 158 miles. Port-au-Prince can be reached by air from New York via Miami; there is also an air service with Jamaica, Cuba, Dominican Republic, Puerto Rico and most of the other islands, while a government airline operates between Port-au-Prince and the towns in the interior.

The principal towns are connected by the Government telegraph system, with 1,500 miles of wire. Cables run from the Mole St. Nicholas to Santiago

de Cuba, Port-au-Prince, Cap Haitien, Puerto Plata (Santo Domingo) and to New York and South America. There are 92 post offices.

Port-au-Prince has a modern automatic telephone exchange; 1,200 miles of telephone cables connect 46 commercial and 17 local exchanges with 3,500 instruments. Wireless telephony was established between Haiti and Puerto Rico, Santo Domingo, New York and Europe in 1937.

Money, Weights and Measures.

The Banque Nationale de la République d'Haiti, owned by the state, was established 21 Oct., 1910, with a capital of 10,000,000 francs (present capital, $2,000,000), and has a monopoly of the note issue until 1960. Note issue is limited to three times the bank's paid-up capital. U.S. dollars may be included in the minimum required reserves. Notes are covered one-third by U.S. currency and the balance by trade bills. Authorized note issue is 60,000,000 gourdes. The Royal Bank of Canada has a branch at Port-au-Prince.

The unit of currency is the *gourde*, which has a fixed value in relation to United States currency, *i.e.*, 1 gourde is equivalent to 20 cents U.S. currency. The total currency in circulation on 30 Sept., 1946, was 27,851,451 gourdes in notes, 3,622,500 gourdes in fractional nickel currency and between $1,800,000 and $2,000,000 in United States currency. United States coins circulate; there are also copper–nickel coins for 50, 20, 10 and 5 centimes. To reduce the use of American money, the Banque Nationale was authorized in April, 1928, to issue notes of 20, 50 and 100 gourdes.

Use of the metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1. Of Haiti in Great Britain (41 Cadogan Gardens, S.W.3).

Envoy Extraordinary and Minister Plenipotentiary.—Love O. Léger (accredited 11 March, 1941).

First Secretary (and Consul-General).—Jacques Désinor.

2. Of Great Britain in Haiti.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General.—D. J. Mill Irving.

First Secretaries.—S. H. Anstey (*Consular*); H. A. N. Brown (*Labour*).

Air Attaché.—Wing-Commander A. F. Johnson, D.F.C. (resident at Mexico City).

There is a consular representative at Port-au-Prince.

HONDURAS.

(REPÚBLICA DE HONDURAS.)

Constitution and Government.

IN 1838 Honduras declared itself an independent sovereign state, free from the Federation of Central America, of which it had formed a part. The present constitution became effective in 1936. Legislative power is vested in a single chamber, the Congress of Deputies, consisting of 49 members, chosen for 6 years by popular vote, in the ratio of one per 25,000 inhabitants. It meets for 60 days (may be extended to 100 days) on 5 Dec. each year. A Permanent Commission of 5 members sits whilst Congress is not in session for the transaction of routine or emergency business. The President is elected by popular vote for 6 years, holding office from 1 Jan. In March, 1937, the Congress of Deputies extended its own term to 4 Dec., 1942, and subsequently to 1949.

President.—Dr. Juan Manuel Galvez, lawyer, elected 10 Oct., 1948, member of the Nationalist party. He was the sole candidate; assumed office 1 Jan., 1949, for 6 years.

The administration of the republic is carried on by a Council of 6 ministers, to whom are entrusted the departments of Foreign Affairs, Interior and Justice, War, Navy and Air, Finance and Public Credit, Public Works and Agriculture, and Education.

National flag: blue, white, blue (horizontal); 5 blue stars arranged saltire-wise in the middle.

National anthem: Compatriotas, de Honduras los fueros (words by A. C. Coello; tune by C. Hartling).

Area and Population.

Area is 153,226 square km. (59,161 square miles), with a population, census of 30 June, 1950, of 1,533,625 (10 per sq. km. or 25·9 per square mile); this was an increase of 333,083, or nearly 25%, since 1945. A census of dwelling-houses in Jan., 1950, showed the population housed in 213,011 dwelling units, of which 104,202 were made of mud and wattle. Aboriginal tribes number over 35,000, principally Mosquito, Zumo, Payas and Xicaques Indians, all speaking different languages. The Spanish-speaking inhabitants are chiefly *mestizos*, Indians with an admixture of Spanish blood. On the Atlantic coast there is a considerable proportion

of Negroes, chiefly employed by the fruit exporting companies, of whom about 2,000 are British subjects; their immigration is now forbidden. The republic is divided into 17 departments and one territory; Francisco Morazán, with 220,409 inhabitants, is by far the largest. La Mosquitia is still practically unexplored and is inhabited by pure native races who speak little or no Spanish. In the year ending 30 June, 1949, there were 53,434 births, 19,064 deaths and 4,834 marriages. Crude birth rate (year ended 30 June, 1949), 36·8 per 1,000 population; crude death rate, 14·4; marriage rate, 3·6; infant mortality rate, 89·1 per 1,000 live births.

The capital of Honduras is Tegucigalpa, with (1950) a population of 92,951. The other most important town is San Pedro Sula, 24,425. The main ports are Amapala on the Pacific, and, on the Atlantic, La Ceiba (14,537), Tela (12,829), Puerto Cortez (10,636) and Trujillo (3,265). The port of entry for the Bay Islands is Roatan.

Religion, Education, Justice.

Roman Catholicism is the prevailing religion, but the constitution guarantees freedom to all creeds, and the state does not contribute to the support of any.

Instruction is free, compulsory (from 7 to 15 years of age) and entirely secular. The school census shows 191,680 children of school age, of whom 97,209 were receiving education from 3,200 teachers in June, 1950. The 26 secondary schools had 2,458 pupils and the 23 normal schools had 1,489. At Tegucigalpa there is a National University with faculties of law, medicine, pharmacy and engineering (653 students in June, 1949). The illiteracy rate was 63·0% of those 7 years of age and older in 1950.

Motion-picture theatres numbered 34 in 1950, with seating capacity of 22,000. In 1949, there were 5 daily newspapers with total daily circulation of 16,000.

The judicial power resides in the Supreme Court, with 5 judges elected by the National Congress for 6 years; there are 5 appeal courts, and departmental and local judges.

There are no trade unions.

Finance.

Revenue and expenditure for fiscal years ending 30 June were as follows in lempiras (the lempira was legally fixed in 1931 at one-half the value of an American dollar):—

	1946–47	1947–48	1948–49	1949–50	1950–51 [1]
Revenue	23,168,372	26,125,558	27,792,221	33,400,863	25,809,639
Expenditure	20,554,919	27,694,660	26,360,478	32,103,375	24,980,814

[1] Budget estimates.

The largest sources of income anticipated (1950–51) were (in lempiras):—Customs duties, 4,824,908; national services, 5,216,108; monopolies, 5,878,005; special taxes, 4,625,388, and stamp tax, 2,225,456. The income tax on individuals and commercial enterprises was established in 1950. The largest items of expenditure proposed were:—Department of development, agriculture and labour, 3,589,761; public credit, 1,559,000; interior, 2,093,258; national defence, 4,023,872; treasury, 2,979,305; education, 2,551,079, and special accounts, 4,625,388.

Total external debt stood on 30 June, 1950, at 1,123,875 lempiras, and internal debt at 8,892,822 lempiras. The external debt, held principally in England and unpaid as to principal or interest since 1872, was scaled down from £30,000,000 in 1925 to £1,200,000, to be repaid in 60 semi-annual instalments of £20,000 each; these semi-annual instalments have been punctually remitted.

Defence.

Every citizen of Honduras is liable to serve in the Army from the age of 18 to 55. Service in the active Army is for 8 months and in the reserves from the age of 32 to 55. Foreigners are exempt from service. Under the terms of the Washington Central American Conventions of 1923 the size of the regular Army is fixed at 2,500 men, including the National Guard, organized in 23 companies of infantry and 1 battery of artillery.

The Government possesses 46 aeroplanes. A school of military aviation has been established.

The navy consists of 4 coastguard vedettes, one of which is in service.

Production and Industry.

The chief culture is that of bananas and coconuts on the Atlantic coast. Two large companies dominate the banana industry, which in 1949 had 69,677 acres under cultivation. Exports (1949–50) of bananas, mostly to the United States and Canada, were valued at 13,801,334 lempiras. Coco- [illegible] grown mainly in the Bay islands; exports in 1948–49 were valued at 1,121,111 lempiras. Coffee of fine quality is grown, generally by small farmers (exports in 1949–50, were valued at 6,398,397 lempiras). Exports of rice, 1948–49, were valued at 200,837 lempiras. A second large sugar plantation and refinery, under construction in 1949, is expected to raise the country's annual output to 19 million lb. Most small farmers are tenants on government-owned land. A good quality of Panama hat is manufactured in the departments of Copan and Santa Barbara. Honduras is also a cattle-producing country. There are some oil-driven electric power-plants.

Honduras has an abundance of hard and soft woods. Large stands of mahogany and other hardwoods grow in the north-eastern part of the country, in the interior valleys, and near the southern coast. The most important hardwoods other than mahogany are grenadino, guayacan, walnut and rosewood. Stands of pine occur almost everywhere in the interior. The prevalent type is described as an excellent long-leaf yellow pine with a high resin content. White pine is also found, and the amount of cedar, of which there are several species, runs into many millions of feet. Exports, 1948–49, of pine and mahogany were valued at 3,109,442 and 1,791,293 lempiras, respectively.

The mineral resources of Honduras are gold, silver, copper, lead, zinc, iron, antimony, some of them being found in almost every department, but only gold, silver and lead are now (1949) being mined. The rivers still yield gold to the native workers, using primitive utensils, but no statistics covering this are available. The 3 principal mines are American-owned. Output, 1948–49 was:—Silver, 3,390,864 fine oz.; gold, 14,341 fine oz.; lead, 365·79 metric tons.

In 1948 the law regarding concessions was stiffened: concessionaries must employ Honduran citizens up to one-half of their labour force and may not import Negroes or persons of the yellow races. Concessions may not be sold.

Commerce.

Imports and exports for 6 fiscal years ending 30 June in lempiras (the lempira = 50 cents, U.S.):—

	1944-45	1945-46	1946-47	1947-48	1948-49	1949-50
Imports .	30,394,972	39,151,535	58,860,596	71,207,534	67,950,539	68,334,659
Exports .	24,266,139	28,218,682	35,003,907	39,021,506	41,525,119	43,486,315

The United States took 69·5% (30,158,005 lempiras) of the exports of Honduras in 1949–50 and furnished 78·7% (53,820,930 lempiras) of its imports. Bananas constituted about 31·7% of the value of total exports.

Total trade between Honduras and United Kingdom (in £ sterling) was (according to Board of Trade returns) as follows:—

	1938	1947	1948	1949	1950
Imports from Honduras . .	68,984	12	13,052	21,465	12
Exports to Honduras . .	69,906	83,570	116,013	179,168	265,834
Re-exports to Honduras . .	705	438	474	377	911

Communications.

Travelling and transport is now accomplished by motor buses and lorries, but over a large part of the country the aeroplane is the normal means of transport for both passengers and freight. There are 15 unpretentious local airports and 1 large international one; fares are low, distances short, and the planes are treated as casually as buses. In the aviation division, in 1948–49, T.A.C.A. and S.A.H.S.A. local services carried 54,961 passengers and 10,539,305 lb. of air freight and 38,392 passengers and 7,155,606 lb. of freight, respectively.

Honduras is connected with the highway systems of Guatemala, El Salvador and Nicaragua by the Pan-American Highway. An Inter-Ocean Highway, connecting Tegucigalpa, the capital, with both the Caribbean Sea and the Pacific Ocean, is being mooted. Road mileage in 1950 was 1,300.

Only 3 railways exist, and they are confined to the north coastal region, where they are used mainly for transportation of bananas. Tegucigalpa, the capital, is not served by any railway, and there are no international railway connections. The total railway mileage now operating is 796.

The government operates 2,770 miles of telephone lines and 4,760 miles of telegraph lines. Number of government telephones in use, 1950, 2,347; telephone offices, 55; number of telegraph offices, 207; combined telephone and telegraph offices, 98. Fruit, railway and mining companies own 1,192 miles of telephone lines and 1,804 instruments. There are 348 post offices and agencies, 7 government and 38 private wireless stations and 6 broadcasting stations; wireless sets in use, 1949, 16,585.

Money, Weights and Measures.

By a decree of 9 March, 1931, the gold *lempira* (named after a native chief) is the monetary unit; its value is that of 0·836 gramme of gold, 900 fine, or 50 cents, U.S. currency. It is backed by a reserve fund of U.S. deposits and securities; the fund stood at $2,952,176 on 30 June, 1950. Silver coins of 1 *lempira*, 50 and 20 centavos; copper-nickel, 10 and 5 centavos; copper, 2 centavos and 1 centavo are in circulation. The value

of the silver *lempira* was legally fixed in 1931 at 50 cents U.S. There are also 1, 2, 5, 10 and 20 *lempira* notes in circulation, and United States 50-cent, 25-cent and 10-cent silver coins and 5-cent nickel coins have been declared legal tender; the banks have been instructed to withdraw slowly the U.S. 50-cent pieces. The monetary circulation in June, 1950, amounted to 20,446,365 *lempiras*; it included U.S. currency to the value of 13,220,000 *lempiras*.

During the 1947–48 fiscal year the Exchange Control reported total acquisition of foreign exchange equivalent to $25,630,660 U.S. (of which $25,257,168 was in dollars). Exports furnished $14,809,665 and other sources $10,347,502. Exchange sold was equivalent to $25,220,861, of which $24,748,557 was in U.S. currency.

The power to issue notes has been taken over from the 2 private banks—Banco de Honduras and Banco Atlantida—by the new government bank, Banco Central de Honduras, which was inaugurated on 1 July, 1950, with a capital of $250,000, U.S. New notes are being printed in the United Kingdom, and eventually all private bank-notes will be withdrawn. The Banco Central immediately restored complete freedom in foreign exchange transactions, controlled since 1934. Another government bank, the National Development Bank, founded in 1950 with a capital of $750,000, has [illegible] novel practice of sending its credit men into the coffee [illegible] long-term loans with the planters.

The metric system of weights and measures has been legal since 1 April, 1897, but English pounds and yards and the old Spanish system are still in use :—1 *vara* = 32 inches; 1 *arroba* = 25 lb.; 1 *quintal* = 100 lb.; 1 *tonelada* = 2,000 lb.

Diplomatic and Consular Representatives.

1. Of Honduras in Great Britain (4 Fountain House, Park St., Park Lane, W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Tiburcio Carías, Jr. (accredited 14 Oct., 1948).

Chargé d'Affaires.—Dr. Carlos A. Suazo.

There are consular representatives at London, Manchester, Liverpool, Birmingham, Newcastle-on-Tyne and Glasgow.

2. Of Great Britain in Honduras.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—Gerald Ernest Stockley (resident in Tegucigalpa).

First Secretary.—H. A. N. Brown (resident in Mexico City).

Military Attaché.—Col. C. G. Irving-Bell (resident in Mexico City).

Air Attaché.—Wing Cdr. A. Forbes Johnson, D.F.C. (resident in Caracas).

There are consular representatives at Trujillo, Tela and Tegucigalpa.

HUNGARY.

(MAGYAR NÉPKOZTÁRSASÁG.)

Constitution and Government.

I. CENTRAL GOVERNMENT.

HUNGARY first became an independent kingdom in 1001. The first written Constitution is the 'Golden Bull,' issued in 1222. For events in Hungary since 1918 *see* THE STATESMAN'S YEAR-BOOK, 1945, pp. 1006–7.

In the Second World War Hungary joined Germany. On 19 March, 1944, German forces occupied Hungary, and on 23 March, 1944, a pro-German quisling government was appointed. By 4 April, 1945, Russian troops had cleared the country of all German forces. A new Government, set up in Debrecen on 23 Dec., 1944, signed, in Moscow, on 20 Jan., 1945, an armistice with the United Nations. Under the terms of the armistice the Vienna awards of 2 November, 1938, and of 30 August, 1940, were declared null and void, and the frontiers as they existed on 1 January, 1938, were restored. This decision was confirmed by the peace treaty of 10 February, 1947, which further stipulated the cession to Czechoslovakia of three villages on the right bank of the Danube opposite Bratislava.

The Allied Control Commission ceased to function when the peace treaty came into force on 15 September, 1947. The Soviet Union is keeping an unspecified number of troops in Hungary, for the maintenance of communications with the Soviet occupation forces in Austria.

On 2 April, 1949, the British and American governments stated that the Hungarian government had violated the peace treaty by denying their people the human rights and fundamental freedoms which it was pledged to secure. The protest was renewed on 19 Sept., 1949.

On 1 February, 1946, the National Assembly proclaimed the Hungarian Republic.

A new constitution of a 'republic of workers and [illegible] unts' was adopted in Aug., 1949. Supreme power is vested i[illegible] Parliament elects a Presidential Council of 21 members, which exercises the functions of Parliament in between sessions of Parliament. The Presidential Council can dissolve government bodies and annul legislation if they 'infringe the constitution or are detrimental to the interests of the working people.'

Private property, 'if it does not violate the public interest,' and right of inheritance are guaranteed, but the chief means of production and natural resources, banking, transport, etc., are in the hands of the State or of the Co-operatives.

The Church is separated from the State 'in order to ensure freedom of conscience and the free practice of religion.' Nationality groups are assured equal rights with Magyars, and are guaranteed education in their mother tongue, and the right to develop their national culture.

National flag: red, white and green; in the centre, the new national emblem of a rising star encircled by sheaves of wheat and, underneath the star, a hammer crossed with an ear of wheat.

National anthem: God bless the Hungarians—Isten áldd meg a magyart (words by Ferenc Kölcsey, tune by B. Egressy).

President of the Presidential Council.—Sándor Rónai, a member of the Politburo of the Hungarian Working People's Party, elected 8 May, 1950.

On 1 Feb., 1949, the Hungarian Working People's Party (Communists), the Smallholders' Party, the National Peasant Party, the Trade Union Federation, the Association of Working Peasants, the Democratic Women's Association and the National Youth Organization were merged in a single organization, called the Hungarian People's Independence Front.

At the elections held on 15 May, 1949, 5,478,515 votes were cast for the list of the People's Front candidates, 165,283 votes against it; 86,721 ballot papers were invalid. Parliament consists of 402 deputies.

The government was in May, 1951, composed as follows:—

Chairman of the Council of Ministers.—István Dobi (Smallholder).
Deputy Chairman of the Council.—Mátyás Rákosi.
Minister of State.—Ernö Gerö.
Foreign Affairs.—Károlyi Kiss.
Home Affairs.—Árpád Hazi.
Defence.—Mihály Farkas.
Finance.—Károly Olt.
Justice.—Dr. Erik Molnár.
Metallurgy and Machine Industry.—Mihály Zsofinyec.
Light Industry.—Árpád Kiss.
Agriculture.—Ferenc Erdei.
Foreign Trade.—Andras Szobek.
Home Trade.—József Bognár.
Building.—László Sándor.
Communications and Postal Services.—Lajos Bebrics.
People's Culture.—József Révai.
Religion and Public Education.—József Darvas.
Public Health.—Anna Ratkó.
Mines and Electric Power.—Sándor Czottner.
Food.—Imre Nagy.

II. Local Government.

For the purposes of administration the territory of the Hungarian People's Republic is divided into counties, districts, towns and boroughs.

The local councils form the basis of local administration. They are elected for a term of 4 years and 'exercise their functions in close contact with the population, ensure the active participation of the workers in the work of local government and encourage initiative and vigilance on their part.'

The local councils elect from among their own members the Executive Committees which manage the daily affairs of administration and direct the work of the local government apparatus. All local councils can issue regulations within the area of their jurisdiction and within the provisions of the law.

The work of the local councils is done by clerks and officials appointed by them.

Area and Population.

According to the latest census taken on 31 January, 1941, the population of the present territory of Hungary settled by the Armistice, *i.e.* on 93,011 square kilometres (35,912 square miles), was 9,316,613, against a population of 8,688,319 in 1930. Of the 1941 total, 4,562,868 were males and 4,757,124 were females. According to the mother tongue the population consisted of: 8,657,102 Magyars (92·8%); 477,057 Germans (5·1%); 75,920 Slovaks (0·8%); 22,269 Croats (0·2%); 18,661 Gipsies (0·2%); 14,161 Rumanians (0·2%); 5,444 Serbs (0·1%) and 23,420 others. Estimated population, 31 Dec., 1948, 9,201,158.

o o

Budapest, the capital of the country, had, in 1941, 1,164,963 inhabitants; Great Budapest, *i.e.*, Budapest and its suburbs, 1,693,130. According to the census taken on March 31, 1945, after the siege of Budapest, the population of the capital had decreased to 832,800. The estimated population of the capital on 31 Dec., 1948, was 1,058,288.

According to the census of 1941 there were 3 towns with a population over 100,000:—Szeged (136,752), Debrecen (125,933) and Miskolc (109,433).

Vital statistics [1] for 1940–1946:—

	1940	1941	1942	1943	First half of 1944	1946 [2]
Births .	185,562	177,047	187,187	173,295	98,723	156,545
Marriages .	71,938	79,074	73,375	74,149	37,144	91,418
Deaths .	132,436	123,349	136,844	127,158	72,027	129,858

[1] Figures refer to the territory according to the Armistice.
[2] Preliminary figures; returns for the second half of 1944 and for 1945 not yet available.

An exchange of their respective Magyar and Slovak populations was agreed upon between Czechoslovakia and Hungary on 27 Feb., 1946; the transfer was officially stated to be completed by mid-Sept., 1949.

Religion.

The Constitution of 1949 has abolished the former distinction between the standing and recognized religions (*see* The Statesman's Year-Book, 1949, p. 1061). Since 20 Aug., 1949, all religions have equal standing. The Constitution 'in order to ensure the liberty of conscience' separated the Church from the State.

In 1949 Cardinal Mindszenty, Primate of the Roman Catholic Church, was sentenced, on charges of political treason, to life imprisonment.

In Sept., 1950, 59 Roman Catholic orders with more than 10,000 monks and nuns were dissolved and their monasteries taken over by the State.

In 1941 (census), the population according to religion was estimated as follows:—Roman Catholics, [illegible]); Greek Catholics, 233,672 (2·5%); Reformed Church, 1,934,892 (20·8%); Lutheran Church, 557,647 (6·0%); Greek-Orientals, 39,839 (0·5%); Unitarians, 8,465 (0·1%); Baptists, 17,917 (0·2%); Jews, 400,980 (4·3%); others, 5,515. (Revised figures, excluding the territory ceded to Czechoslovakia in 1947.)

Education.

Public education in Hungary comprises the following grades:—(1) Infant schools; (2) elementary education; (3) secondary and intermediate education; (4) vocational and technical education; (5) higher education.

In 1941, 7·1% of the population over 6 years of age was illiterate.

In the school year 1945–46 a new type of school was introduced—the general school. Attendance is compulsory for children of 6 to 14. In consequence of the establishment of this new [illegible]y schools, primary schools and the lower classes of the middle schools have been transformed into general schools.

On 16 June, 1948, the denominational schools were nationalized (against the votes of the Roman Catholic parties) with the exception of 9 Calvinist, 2 Lutheran and 2 Jewish secondary schools. In 1950, 3 male and 1 female teaching orders were permitted to continue to staff the 8 licensed Roman Catholic schools. In 1946, there had been 4,322 denominational schools with 12,978 teachers, out of a total of 6,669 schools with 25,896 teachers.

There were, in the school year 1946–47, altogether 1,173 infants' schools

with 2,544 female teachers and 77,031 infants, and 4 training colleges for female teachers of infant schools.

There were, in 1946–47, 175 middle (secondary) schools of the grammar school type; 37 agricultural and horticultural, 26 industrial and 75 commercial (secondary) schools.

Elementary school teachers are being trained in 58 training colleges.

Vocational education is carried on in the economical, mining, industrial and other vocational schools and courses. Their grades and periods of curriculum greatly differ according to the special purposes and destination of the schools.

There were about 500 state colleges (students' homes) in 1950, and four universities, besides the Technical University and the University for Agronomical Studies. The last-named, founded in 1945, comprises the former agricultural and veterinary faculty and the forestry engineering section of the mining, metallurgy and forestry faculty of the Technical University, it also comprises the [illegible] colleges of Moson-Magyaróvár, Debrecen and Keszthely, besides [illegible] for horticulture and viticulture.

The total number of university students was about 25,000. Best attended are the University of Budapest and the Technical University, with about 8,000 students each.

There were also 26 theological colleges, 3 academies of law and 9 other academies (4 teachers' training colleges, 4 academies of art and a commercial academy).

There were, in 1949, 555 cinemas with a seating capacity of 194,000.

Justice and Crime.

All civil and criminal cases fall under the jurisdiction of the district courts, county courts, high courts (in Budapest, Debrecen, Győr, Pécs and Szeged) and the Supreme Court in Budapest. Guidance and directives relating to matters of principle may be given by the Supreme Court. Since 1949 justice has been administered in all criminal proceedings by district courts through 3-member councils and by county courts, high courts and the Supreme Court in 5-member councils.

District courts handle criminal cases through a professional judge and 2 lay members; in county courts, the council in criminal procedures consists of 2 professional judges and 3 lay members. In appellate procedures, the high courts and the Supreme Court sit in councils consisting of 3 professiona[illegible]nd 2 lay members. Lay members are drawn by lot. In civil [illegible] a simular reform is now being prepared. Court martial procedures, where justice is also administered in two instances—only one appeal is possible—are organized much on the same lines; lay members, sitting with the professional judges, are chosen from the People's Army.

This system has been introduced to replace the old system of judicature in civil and criminal cases, when a single professional judge held court and also brought the verdict, and also to take the place of the People's Courts specially established in 1945 to pass judgement on war criminals and those guilty of crimes against the people, which consisted of a professional judge and delegates from the political parties.

Professional judges are, at present, appointed; however, according to the stipulations of the Constitution of the Hungarian People's Republic, judges will be elected for a period of 5 or 3 years. Members of the Supreme Court and the presidents of high courts will be elected by Parliament, and other judges by the proper local organs.

Social Welfare.

In 1927 and 1928, two fundamental laws were passed to regulate optional and obligatory social insurance, and called into existence the National Social Insurance Institute. The Institute affords its members medical and hospital treatment gratuitously and pays a subsidy to any member during the period of his illness, and grants, moreover, an old age and disability pension. All employees, members of producers' co-operatives and their dependants and students living in student homes are included in the scheme. The full insurance fees are paid by the employer. In 1950, the functions of the Institute were taken over by the Trade Unions Council.

In 1938 there were 50,059 hospital beds. As a result of war destruction their number dropped to 33,162 in 1945. By the end of 1949 the number of hospital beds increased to 50,000.

The taxes of all employees are paid by the employer. Low-cost mid-day meals are provided. All employees are entitled to paid holidays.

Finance.

Budget	1913	1944	1946–47	1947–48	1949 [1]
	1,000 pengös	1,000 pengös	1,000 forints	1,000 forints	1,000 forints
Revenue .	4,046,902	5,866,696	5,237,961	15,208,521	11,640,018
Expenditure .	4,217,453	6,147,104	5,610,307	15,002,346	11,521,782

[1] Calendar year.

Under the terms of the armistice, Hungary has over a period of 6 years (extended to 8 years by the U.S.S.R.) to deliver goods to the value of $200 million to the Soviet Union, $70 million to Yugoslavia and $30 million to Czechoslovakia. The reparation due to the U.S.S.R. was, in 1948, halved for the remaining period.

Defence.

The military organization and armed forces of Hungary, from 1 March, 1946, have been settled by the Allied Control Commission as follows:—Hungary is divided into 7 army districts—Budapest, Székesfehérvár, Szombathely, Pécs, Szeged, Debrecen, Miskolc—[illegible] maintains 2 infantry brigades, each of 5,000 men, 1 pioneer [illegible] 5,045 men, a frontier guard with 10,000 men and the indispensable necessary institutes and organizations.

The Ministry of National Defence with the help of the district commands also carries out the liquidation work of the past war.

The peace treaty has authorized Hungary to have an army up to a total strength of 65,000 personnel, and an air force of 90 aircraft, of which not more than 70 may be combat types, with a personnel strength of 5,000.

Hungary has 4 patrol vessels for police duty on the Danube.

Production and Industry.

On 1 Jan., 1950, a 5-year plan was put into operation, designed 'to transform Hungary from an agrarian industrial country into an industrial agrarian country.'

Under the post-war regime the greatest change has been the land reform, according to which large holdings and forests have been appropriated for the creation of small holdings. By April, 1950, 5,599,645 acres had been distributed—58·2% (arable land) among individual holders and 41·8% (forest) for public purposes.

The area and production of crops for three years was as follows :—

Crop	1944–45		1945–46		1946–47	
	Area in acres	Yield in quintals	Area in acres	Yield in quintals	Area in acres	Yield in quintals
Wheat	1,815,996	6,578,015	2,698,457	11,266,888	3,149,312	11,515,014
Rye	913,611	3,036,361	1,121,752	4,242,375	1,256,380	4,890,660
Barley	1,284,050	4,421,632	1,146,886	4,412,596	1,192,536	3,986,022
Oats	521,491	1,709,266	499,837	1,979,777	599,236	1,674,383
Maize	3,017,274	18,711,473	2,867,295	13,635,448	3,184,320	17,806,469
Potatoes	746,182	16,907,932	634,294	11,431,932	693,367	10,611,495
Sugar-beet	37,548	1,774,856	132,846	5,158,655	219,024	11,588,733
Grapes	590,033	3,335,139	586,965	3,845,893	data not available	
Tobacco	20,423	79,667	35,131	129,386	43,040	171,226
Turnips for fodder	288,694	16,372,394	301,363	13,585,429	327,711	18,727,159

Chief crops in 1948 were (in metric tons):—Wheat 1,579,387; rye, 748,450; barley, 696,031; oats, 331,798; maize, 320,097.

There were, in 1946, 424,364 horses, 1,222,835 cattle, 396,910 sheep, 1,716,828 pigs.

The total area under forest in Hungary (1946) was 2,682,300 acres.

Hungary retains important fishery preserves in the Danube and Tisza rivers and in lake Balaton. The latter contains plentiful supplies of perch, carp, pike, sheatfish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the hilly country, 'Tokaj,' in the north-east.

In 1946, the coal mines, electric power plants with a capacity of 20,000 kw or more, and the three biggest iron and steel works, with their subsidiary companies, were nationalised.

All privately owned industrial, communication, mining and foundry enterprises, and electric power plants having 100 or more employees at any time since 1 Aug., 1946, and their related enterprises; all enterprises distributing electric current; and, in addition 47 specified enterprises employing under 100 workers, were nationalized on 26 March, 1948. By decree of 28 Dec., 1949, all industries and shops still in private ownership which employed more than 10 workers or were financed by foreign capital were nationalized.

In accordance with the Hungarian–Soviet agreement for economic co-operation, several special mixed companies have been organized, to liquidate former German assets; the stock holdings of Soviet Russia range from 33 to 50%. These companies are concerned primarily with exploitation of oil and natural gas, bauxite, aluminium, and shipping and air transport.

Industrial production (in 1,000 quintals) :—

	1938	1946		1938	1946
Coal	10,400	7,200	Steel	6,500	3,500
Lignite	83,100	56,300	Mineral oil	428	6,800
Pig-iron	3,300	1,600	Bauxite	5,400	1,000

Production (1948) of bauxite was 340,000 metric tons; coal, 1,200,000 metric tons; lignite, 9,400,000 metric tons.

Production, in 1946, of crude petroleum, 684,700 metric tons; of natural gas, 91,271,000 cubic metres.

The industries of Hungary are based mainly on agriculture. They include

milling, distilling, the manufacture of sugar, hemp and flax, and also iron and steel works. In 1945 there were in Hungary 4,631 factories, employing on an average 197,870 workmen, with a capacity of 1,924,975 horse-power.

Commerce.

Trade for 6 years is shown as follows (in thousands of pengös/forints) :—

	1943	1944	1945 [1]	1946 [2]	1947 [2]	1948 [2]
Imports [3]	1,147,499	808,306	2,384	370,519	1,453,460	1,975,381
Exports [4]	1,288,597	946,798	1,369	420,032	1,041,690	1,932,728

[1] Computed on the 1938 value of foreign trade units.
[2] In thousands of forints.
[3] Relief gifts excluded.
[4] Reparation shipments excluded.

The principal items of import in 1947 were cotton (226,583,000 forints) and coal (104,052,000 forints); principal items of export: poultry (95,210,000 forints), and cotton fabrics (94,168,000 forints).

The percentage of trade was distributed among the principal countries as follows :—

Countries	Imports				Exports			
	1946	1947	1948	1949	1946	1947	1948	1949
Germany .	0·1	0·06	1 1	6 4	0 0	0·22	3 6	9·2
Austria . .	2·34	3 4	4 2	6 8	3·3	4 5	6 5	7 0
Rumania .	8·3	3·9	2·5	4·7	2 6	2·4	1·4	5·6
Czechoslovakia	25·3	9·9	12·6	10 3	17 2	13·8	12 6	10·1
Great Britain	0·74	6·9	13·8	13 2	6 8	17·3	17·2	8·1
Italy . .	0 8	3·4	1·9	2·4	0 07	3 6	1 3	2·1
United States.	12·4	18 4	5·1	1 6	1·83	1·3	1·0	0·6
Poland . .	7·6	3·9	2·7	5 3	4 3	4·2	2·4	4·1
U.S.S.R. .	28 1	11·7	14 7	21 1	31·9	15·0	17·3	24·9
Others . .	14·32	38·41	41 4	27 9	32·0	37·68	36·7	28·0

Total trade between Hungary and the United Kingdom according to Board of Trade returns (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports from Hungary .	2,450,411	2,411,044	6,093,010	6,803,966	374,271
Exports to Hungary .	584,199	1,179,069	2,189,459	4,241,286	1,820,876
Re-exports to Hungary .	76,842	613,759	327,009	441,592	126,757

Communications.

In 1946 there were 4,728 km. of state roads, 20,280 km. of municipal roads and 5,786 km. of inferior roads.

Registered motor vehicles (1 Jan., 1949) included 8,941 passengers cars 2,017 taxis, 9,340 trucks, 633 buses, 26,239 motor cycles.

The length of railways in Hungary in 1946 was 8,715 km., of which 7,096 km. are owned by the state. Of the total, 2,107 km. are double track. The passengers carried in 1946 on state railways were 2,947,348 and freight 1,660,095 metric tons.

Number of post offices (1946), 2,152. On 31 Dec., 1946, the length of telegraph lines was 7,355 km.; of telegraph wires, 187,105 km. Number of telephones in 1948, 106,768.

At the end of 1947, the Hungarian mercantile marine consisted of 514 vessels of 118,717 gross tons.

Currency and Banking.

[illegible]e, issued on 23 April, 1948, all banking activities of the [illegible] of Banking Institutes are to be handled by the National Bank of Hungary. The National Bank will assume control also of the checking-account section of the Postal Savings Bank. A network of branch savings banks is to be established under the leadership of the Postal Savings Bank. It will include branches of the Hungarian Commercial Bank of Pest, of the Discount Bank, and of the National Savings Bank of Pest. All credits for investments in the Three-Year Economic Plan will be granted by the Hungarian General Credit Bank. The Hungarian Commercial Bank of Pest, on the other hand, will be reorganized as a foreign-trade banking institution, with exclusive right to grant letters of credit for imports. The National Credit Institute of Co-operatives will handle all credit transactions for farmers, artisans, and co-operatives.

A Hungarian Investment Bank was established on 24 Sept., 1948. The functions of the bank are: Granting of credits for investment in accordance with directives of the National Planning Office and administering controls connected with these credits; paying appropriations by the Government for investment purposes; and administering financial investments by municipalities, national enterprises, and other enterprises. The Bank operates under supervision by the Minister of Finance, and its activity in connexion with the financial implementation of the Government's economic plan is directed by the National Planning Office.

A decree of 26 July, 1946, instituted a new monetary unit, the 'forint,' subdivided into 100 'fillér.' This new unit came into use on 1 [illegible] 400,000 quadrillion of paper pengös [illegible] The value of one kilogram of fine gold is 13,210 forints, so that one forint corresponds to 0·0757 grammes of fine gold. The state in 1947 brought in circulation silver and other coins to a nominal value of not more than 70 million forints—5 forint pieces made of silver, and 2 and 1 forint pieces and 20, 10 and 2 fillér pieces of other metal. The National Bank must keep reserves of 25% (in gold or foreign exchange or [illegible] liabilities [illegible] over [illegible].

The amount of the bank notes in circulation, issued by the National Bank of Hungary, was 1,868,500,920 forints on 31 October, 1947.

In February, 1947, the total saving deposits in the Postal Savings Bank and the largest banks in Budapest amounted to 518,984,000 forints.

The metric system of weights and measures is in use. For land measure a cadastral yoke (1·422 acres) is used.

Diplomatic Representatives.

1. Of Hungary in Great Britain (46 Eaton Place, S.W1.).

Envoy Extraordinary and Minister Plenipotentiary.—Elek Bolgár (accredited 21 Oct., 1949).

Counsellor.—András Kovács.

Secretary.—János Nagy.

Attachés.—János Boldog; Béla Nyitrai; Sándor Szamos; Vencel Hazi.

2. Of Great Britain in Hungary.

Envoy Extraordinary and Minister Plenipotentiary.—R. M. Alers Hankey, C.M.G.

First Secretaries.—L. C. Glass; D. C. Hopson, D.S.O., M.C. (*Commercial*).
Naval Attaché.—Capt. R. G. Mills, D.S.O., D.S.C., R.N.
Military Attaché.—Col. R. D. Blackie, D.S.O.
Air Attaché.—Wing-Commander A. N. Davies, D.S.O., D.F.C.

There is a consular representative in Budapest.

ICELAND.

(ÍSLAND.)

ICELAND is a large island in the North Atlantic, close to the Arctic Circle, and comprises an area of about 103,000 square kilometres (39,758 square miles), with its extreme northern point (the Rifstangi) lying in latitude 66° 32′ north, and its most southerly point (Dyrhólaey, Portland) in latitude 63° 24′ north, not including the islands north and south of the land; if these are counted in, the country extends from 67° 10′ north (the Kolbeinsey) to 63° 19′ north (Geirfuglasker, one of the Westman Islands). With longitudinal direction east–west, it stretches from 13° 30′ west of Greenwich (the Gerpir) to 24° 32′ west of Greenwich (Látrabjarg). The skerry *Hvalbakur* (The Whaleback) lies 13° 16′ west of Greenwich, or a little farther east than the Gerpir.

The first settlers came to Iceland in 874. Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognized the rule of the King of Norway. In 1381, Iceland, together with Norway, came under the rule of the Danish kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since 1 Dec., 1918, it has been acknowledged as a sovereign state. It was united with Denmark only through the common sovereign until it was proclaimed an independant republic on 17 June, 1944.

National flag: red cross, with white borders, on blue.
National anthem: O Gud vors lands (words by M. Jochumsson, 1874; tune by S. Sveinbjørnsson).

Constitution and Government.—On 24 May, 1944, the people of Iceland decided in a referendum to sever all ties with the Danish Crown. The voters were asked whether they were in favour of the abrogation of the

Union Act, and whether they approved of the bill for a republican constitution. The referendum brought 98% of the electorate to the polls, and showed that 70,725 voters were for severance of all political ties with Denmark and only 370 against it; 69,048 were in favour of the republican constitution, 1,042 against it, and 2,550 cast votes that were declared invalid. On 17 June, 1944, the republic was formally proclaimed, and as the republic's first president the Althing elected Sveinn Bjornsson for a 1-year term. Thereafter the president is elected for a 4-year term.

The republic became a member of the United Nations in Nov., 1946.

President of the Republic of Iceland.—Sveinn Björnsson (elected on 17 June, 1944; re-elected on 7 June, 1945; re-elected for another 4-year term from 1 Aug., 1949).

The Althing or Parliament (52 members) is divided into two Houses, the Upper House and the Lower House. The former is composed of one-third of the members elected by the whole Althing in common sitting. The remaining two-thirds of the members form the Lower House. The members of the Althing receive payment for their services, besides travelling expenses.

At the elections held on 23 Oct., 1949, the following parties were returned:—Independence Party, 19; Progressives, 17; Communists, 9; Labour, 7.

The budget bills must be laid before the two Houses in joint session, but all other bills can be introduced in either of the Houses. If the Houses do not agree, they assemble in a common sitting and the final decision is given by a majority of two-thirds of the voters, with the exception of budget bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can vote only in the House of which they are members.

The executive power is exercised under the President by a ministry divided into 6 departments. The Ministry, appointed 14 March, 1950, is as follows:—

Prime Minister and Minister for Social Affairs.—Steingrímur Steinthórsson (Progressive).

Minister of Foreign Affairs and of Justice.—Bjarni Benediktsson (Independent).

Minister of Commerce and Education.—Björn Ólafsson (Independent).

Minister of Fisheries and Industries.—Ólafur Thors (Independent).

Minister of Agriculture and Communications.—Hermann Jónasson (Progressive).

Minister of Finance.—Eysteinn Jónsson (Progressive).

The ministers are responsible for their acts. They can be impeached by the Althing, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can try only parliamentary impeachments.

For administrative purposes Iceland is divided into 16 provinces (*sýslur*), each governed by a chief executive functionary (*sýslumadur*). Each province includes one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 11 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 21 years of age), in urban municipalities by proportional representation, but in rural municipalities by simple majority.

Area and Population.—The following table gives the area and population of Iceland according to the census in 1940 :—

Divisions	Area in square km.	Population, 1940	Population, 1940, per square km.
The South-West	10,700	57,396	5·4
The Western Peninsula	9,500	12,953	1·4
The North	35,500	27,406	0·8
The East	15,500	10,123	0·7
The South	31,800	13,596	0·4
Total . . .	103,000	121,474	1·2

Population on 31 Dec., 1949, 141,042.

In 1949, 40,626 were domiciled in rural districts and 100,126 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1940, the foreign-born population numbered only 1,562, or 1·3% of the whole; 650 were born in Denmark, 357 in Norway and 555 in other countries.

The capital of Iceland, Reykjavík, had in 1949 a population of 54,707; other towns are Akureyri, 7,017; Hafnarfjordur, 4,904; Vestmannaeyjar, 3,548; Siglufjördur, 3,069; Isafjordur, 2,857; Akranes, 2,540; Nes, 1,320; Saudárkrókur, 1,003; Olafsjordur, 941, and Seydisfjordur, 772.

The following table gives the vital statistics for 3 years:—

Years	Marriages	Divorces	Total living births	Still-born	Deaths	Surplus of births over deaths
1947	1,121	111	3,703	56	1,162	2,541
1948	1,162	92	3,820	81	1,115	2,705
1949	1,075	83	3,890	62	1,106	2,784

Religion.—The national Church, and the only one endowed by the state, is Evangelical Lutheran. But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of a bishop. At the census of 1940, 2,859 or 2·4%, were returned as Dissenters.

Education.—There is a university in Reykjavík, inaugurated on 17 June, 1911. There are 2 grammar schools, several public high schools, besides 2 girls' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school and several other special schools. Elementary instruction is compulsory for a period of 9 years, the school age being from 7 to 15 years. There are also several continuation schools for young people.

There were, in 1949, 43 cinemas with a seating capacity of 11,865.

Social Insurance.—In 1946 there was enacted a new national insurance scheme, covering the whole nation, and operative from 1947. It falls into two main classes of activities, health service (including health protection and medical treatment and the care of sick persons) and income insurance (securing for the insured persons a living wage when they are no longer able to earn their bread themselves, as, for instance, owing to old-age disablement, sickness, accident or want of support). The health service division, however, was not yet operative in 1950.

Justice and Crime.—The lower courts of justice in Iceland are those of the provincial magistrates (*sýslumenn*) and town judges (*bæjarfógetar*). From these there is an appeal to the Supreme Court (*hæstirjettur*) in Reykjavík, which has 5 judges.

Finance.—Revenue and expenditure for 6 years (£1 = 26·22 kr.) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Krónur	Krónur		Krónur	Krónur
1945	165,845,370	143,211,504	1948	264,697,827	256,471,235
1946	198,649,913	170,257,819	1949	294,930,759	295,740,708
1947	242,826,742	255,245,746	1950 [1]	298,833,919	262,065,973

[1] Budget estimate.

Budget estimates for the year 1950 :—

Revenue	Krónur	Expenditure	Krónur
Taxes	115,000,000	Interest on state debt.	10,169,070
Customs and excise	108,900,000	Central Government	414,357
Balance on state undertakings	71,110,382	Althing	2,315,576
Balance of domain revenue	10,000	The central administration.	8,503,306
Interest on state assets	1,813,537	Justice, police, etc.	21,168,977
Other revenues	1,500,000	Sanitary affairs	15,841,162
		Communications	41,259,198
		Ecclesiastical affairs and instruction	36,120,039
		Science, literature and art	6,547,572
		Agriculture, fisheries and industries	37,305,300
		Social welfare	27,687,310
		Pensions	6,509,106
		Other expenditure	48,225,000
Total revenue	298,333,919	Total expenditure	262,065,973

The public debt of Iceland was on 31 Dec., 1949, 271,665,000 krónur, of which the foreign debt amounted to 31,524,000 krónur, and the internal debt to 240,141,000 krónur.

The state assets amounted on 31 Dec., 1948, to 180,157,000 krónur.

Defence.—Iceland possesses neither an army nor a navy, nor any fortifications. Five fishery protection vessels are maintained by the Government.

Production.—Of the total area of Iceland, about six-sevenths is unproductive, but only about ¼% is under cultivation, which is confined to hay, potatoes and turnips. In 1948 the total hay crop from cultivated and uncultivated land was about 220,700 metric tons, the crop of potatoes 7,000 metric tons and of turnips 780 metric tons. At the end of 1948 the livestock was as follows:—Horses, 44,000; cattle, 43,000; sheep, 445,000; goats, 550.

The total value of the fisheries in 1947 was estimated at 253,000,000 krónur (about £9,650,000), whereof the cod fishery was valued at 166,000,000 krónur and the herring fishery at 87,000,000 krónur. Fishing vessels in 1950 numbered 100 (over 100 tons) and 217 (30 to 100 tons); total tonnage, 56,559.

The installed capacity of power plants at the end of 1949 totalled 54,000 kw., of which 33,000 kw. comprised hydro-electric plants. Total production of electric power in 1949 amounted to 190 million kwh.

Commerce.—Total value of imports and exports for 6 years in 1,000 krónur:—

	1945	1946	1947	1948	1949	1950
Imports	319,772	418,703	519,015	457,956	425,696	513,251
Exports	267,540	291,368	290,776	395,699	289,224	421,145

The value of the leading imports and exports for 2 years was as follows (in 1,000 krónur):—

	1949		1950	
	Imports	Exports	Imports	Exports
Food products, beverages, tobacco	61,002	241,948	97,781	298,628
Animal and vegetable oils, fats, etc.	8,478	41,639	10,927	82,564
Chemicals and allied products	20,308	—	27,628	—
Rubber	4,084	—	5,375	—
Wood and cork	20,856	—	23,524	—
Paper	14,577	—	14,892	—
Hides, skins and leather	1,710	2,131	2,108	24,958
Textiles	35,398	1,614	34,058	5,296
Articles of clothing and miscellaneous made-up textile goods	10,880	—	34,116	—
Products for heating, lighting and power, lubricants and related products	62,985	—	113,119	—
Non-metallic minerals and manufactures thereof	20,126	—	30,317	—
Metals and manufactures thereof	40,025	—	40,989	67
Machinery, apparatus and appliances, vehicles	115,599	—	95,877	5,877

The following table shows the value of the trade with principal countries for 2 years (in 1,000 krónur):—

	1948		1949		1950	
	Imports	Exports	Imports	Exports	Imports	Exports
Argentina	86	—	21	—	22	—
Austria	33	1,103	367	3,077	4,019	10,144
Belgium	11,390	181	11,053	340	7,031	971
Brazil	4,507	997	4,068	572	10,201	5,887
Canada	19,749	58	9,733	71	12,396	1,873
Czechoslovakia	23,217	29,751	20,185	13,361	18,732	15,027
Denmark	41,536	15,662	44,269	7,680	40,749	10,105
Faroe Islands	4	337	2	27	8	1,281
Finland	11,842	17,630	18,676	7,451	18,294	22,560
France	4,675	16,836	9,565	3,568	5,880	2,674
Germany	1,130	67,571	4,207	66,114	17,538	28,644

Switzerland	1,534	682	2,948	1,102	4,222	692
U.S.S.R.	695	6,142	12	—	4	—
U.K.	137,613	118,718	113,953	104,227	122,039	49,570
U.S.A.	86,521	26,349	71,475	17,826	107,878	55,652
West Indies	26,734	—	27,018	—	74,681	—

Total trade (Board of Trade returns) between Iceland and the United Kingdom (in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. . .	442,593	2,422 608	3,241,444	2,973 995	894,485
Exports from U.K. .	462,659	5,689,611	3,995,526	3,493,136	2,270,383
Re-exports from U.K. .	33,322	107,802	68,533	42,527	50,584

Shipping and Navigation.—The mercantile marine of Iceland (above 12 gross tons) was, in 1950, 62 steam vessels of 37,401 gross tons and 492 motor vessels of 53,164 gross tons; total, 554 vessels of 90,565 gross tons.

Communications.—There are no railways in Iceland. Iceland possesses some 5,500 km. of high roads, whereof the greater part has been made carriageable. In 1949 there were registered 10,608 automobiles, of which 6,163 were passenger vehicles and 4,445 trucks.

There are 3 aeronautical companies keeping up regular air service between Reykjavík and various places in Iceland. There is also a regular air service between Iceland and other countries.

The length of the telegraph and telephone lines at the end of 1949 was 5,700 km. and of wires, 40,000 km. There were 330 post offices and 320 telegraph and telephone offices. Number of telephones in 1949 was 19,500.

Banking and Credit.—There are 3 banks in Iceland, *Landsbanki Islands* (the National Bank), a note-issuing bank which belongs entirely to the state; *Búnadarbanki Íslands* (the Rural Bank of Iceland), a state bank, founded in 1930, and *Utvegsbanki Íslands* (the Fishing Trade Bank), a private joint-stock bank, founded in 1930, the majority of shares being held by the Government. On 31 Dec., 1950, the accounts of the issue department of the National Bank balanced at 452,169,000 krónur. A special department for loans on mortgage is connected with the National Bank.

At the end of 1949 there were 57 savings banks with deposits amounting to 120,000,000 krónur.

Money, Weights and Measures.—The Icelandic name of the monetary unit is *króna*, pl. *krónur*. From Oct., 1925, to March, 1939, the relation of the value of the Icelandic króna to £ was unaltered (£1 = kr. 22·15), but this value was not stipulated by law. Under a law of 4 April, 1939, the Icelandic króna was devalued by 22%, as the rate of the £ was raised from kr. 22·15 to kr. 27·00. This rate was unaltered till Sept., 1939. But a law of 18 Sept., 1939, provided that when the rate of £ expressed in dollars falls below 4·15, the value of the Icelandic króna shall be adjusted to the $ instead of the £. From 20 June, 1940, to 20 Sept., 1949, the exchange rate of the £ was kr. 26·22, and that of $100 650 50. A law of 21 Sept., 1949, provided that the Icelandic króna is again to be adjusted to the £ instead of the $; consequently, the exchange rate of the $ was raised to kr. 936·50 = $100. A law of 19 March, 1950, devalued the króna by 42½%; exchange rates, £1 = kr. 45·70, $1 = kr. 16·32.

The metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1. OF ICELAND IN GREAT BRITAIN (17 Buckingham Gate, S.W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Agnar Klemens Jónsson (accredited 14 March, 1951).

Counsellor.—Gunnlaugur Pétursson.

Secretary.—Eirikur Benedikz.

There are consular representatives in Aberdeen, Edinburgh, Fleetwood, Glasgow, Grimsby, Hull, Liverpool, Manchester and Newcastle-on-Tyne.

2. OF GREAT BRITAIN IN ICELAND.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—John D. Greenway, C.M.G. (appointed Dec., 1950).

First Secretary and Consul.—C. H. M. Toy.

There are also consular representatives at Akureyri and Vestmannaeyjar.

Books of Reference.

STATISTICAL INFORMATION.—The Icelandic Statistical Office, Hagstofa Íslands (Reykjavík) was founded in 1914; *Director.*—Klemens Tryggvason. Its main publications are :—

REPUBLIC OF INDONESIA.

(REPUBLIK INDONESIA.)

THE Republic of Indonesia is a sovereign independent state, co-operating with the Kingdom of the Netherlands on a voluntary and equal basis under the provisions of the statute of the Netherlands Union.

In the first centuries after Christ, the Hindus from India invaded several of the islands and established a number of kingdoms. In the 15th century Moslem invaders converted practically the whole Archipelago (the island of Bali was an important exception). In the 16th century Portuguese traders in quest of spices settled in some of the islands, only to be ejected fifty years later by the British and the Dutch (1595). The latter finally ousted the former. In 1602 the Netherlands created their East India Company. This company conquered successively the Netherlands Indies, and ruled them during nearly two centuries. After the dissolution of the company

in 1798 the Netherlands possessions were governed by the mother-country from 1816 to 1949. The transfer of sovereignty from the Netherlands to the United States of Indonesia took place on 28 Dec., 1949.

Government and Constitution.

As a result of the round-table conference, held at The Hague from 23 Aug. to 2 Nov., 1949, complete and unconditional sovereignty was transferred to the Republic of the United States of Indonesia.

Excluded from this transfer was the Netherlands part of the isle of New Guinea, the status of which part will, within a year from the date of transfer, be determined through negotiations between the Republic of the United States of Indonesia and the Kingdom of the Netherlands.

It was further decided at this conference that the Kingdom of the Netherlands and the Republic of the United States of Indonesia would co-operate with each other on a basis of free will, equality and complete independence. The basis of this mutual relationship was laid down in a Statute of the Union. At the head of this Union shall be Queen Juliana and her lawful successors to the crown of the Netherlands.

During 1950, the federal system which had [illegible] in 1946–48 (*see* THE STATESMAN'S YEAR-BOOK, 1950, p. 1233) was [illegible], and Indonesia was made a unitary state, comprising the whole Indonesian archipelago with the exception of West Irian (Netherlands New Guinea). The provisional constitution was passed by the House of Assembly on 14 Aug., 1950. Indonesia was admitted to the United Nations on 28 Sept., 1950.

Indonesia is divided into the following 10 provinces:—East, Central and West Java; North, Central and South Sumatra; Borneo; Celebes; the Moluccas; the Lesser Sunda Islands.

Legislative power is vested in the House of Representatives. The state of the parties in Parliament, after the establishment of the unitary state, was as follows:—49 Masjumi (Moslem Party), 37 Partai Nasional Indonesia (Indonesian National Party), 14 Democrats, 13 Partai Komunis Indonesia (Communist Party), 16 Partai Sosialis Indonesia (Indonesian Socialist Parties), 9 Catholic Parties, 7 Labour Party, and some smaller parties; total 229.

President of Indonesia.—Dr. Ahmed Sukarno.

High Commissioner of the Kingdom of the Netherlands in Jakarta.—A. T. Lamping.

High Commissioner of Indonesia in The Hague.—Dr. Djumhana (*Acting*).

The Cabinet formed on 26 April, 1951, is composed as follows:—

Prime Minister.—Dr. Sukiman Wirjosanjojo.
Vice-Premier.—Suwirjo.
Minister for Foreign Affairs.—Dr. Ahmad Subarjo.
Minister for Home Affairs.—Dr. Iskat Tjokrohadisurjo.
Minister of Defence.—Sumitro Kolopaking.
Minister of Justice.—Arnold Mononutu.
Minister of Finance.—Dr. Yusuf Wibisono.
Minister of Agriculture.—Dr. Suwarto.
Minister of Commerce and Industry.—Dr. Sujono Hadinoto.
Minister of Communications.—Dr. Djuanda.
Minister of Works.—Dr. Ikor Pratakusumah.
Minister of Labour.—Tejasukmana.
Minister of Social Affairs.—Dr. Sjamsudin.
Minister of Education.—Dr. Wongsonegoro.

Minister of Religious Affairs.—Dr. Wahid Hashim.
Minister of Health.—Dr. Johannes Leimena.
Minister of General Affairs.—A. Pellaupessy.
Minister of Personnel Affairs.—Raden Pandji Suroso.

Area and Population.

Indonesia comprises 4 large islands:—Java, Sumatra, Borneo and Celebes, besides some 15 minor but still important islands, and thousands of small ones. Area and population are shown as follows:—

		Area (square miles)	Population 7 Oct., 1930 (census)	Population 1920 (census)	Population per sq. mile 1930
Java and Madura		51,032·4	41,718,364	34,984,171	817·5

[1] Including New Guinea.

The population of Java and Madura on 7 Oct., 1930 (census), consisted of 20,424,225 males and 21,294,139 females; 192,571 were Europeans, 40,891,093 Indonesians, and 634,700 other Orientals, chiefly Chinese and Arabs (582,431 Chinese). The population of the outer provinces (census 1930) was 19,008,869 (including an estimate of 135,350), with 9,580,325 males and 9,293,194 females; 47,846 were Europeans, 18,246,974 Indonesians, 650,783 Chinese and 63,266 other Asiatics. The estimated population in 1950 was 78 million. The principal races are the Achinese, Bataks and Menangkabaus in Sumatra, the Javanese and Sundanese in Java, the Madurese in Madura, the Balinese in Bali, the Sasaks in Lombok, the Menadonese in Celebes, the Dayaks in Borneo and the Papuas in New Guinea.

Some 25 main languages are spoken, of which Javanese, Sundanese and Madurese are the most important, but Malay (now called *Bahasa Indonesia* = Indonesian language) is understood in most islands and has been made the official [illegible] the Republic.

Religion.

Religious liberty is granted to all denominations. The bulk of the Indonesians are Moslems. There are about two and a half million Christians; in Bali and the western part of Lombok there are a million and a quarter Brahmins; in the outer territories there are heathen tribes. There are also about a million Buddhists.

The Protestant Church counted, at the end of 1939, 41 ministers, 38 preachers and assistant preachers and 343 Indonesian preachers paid by the Government, and in addition 1,154 Indonesian assistants not paid out of public funds; the Roman Catholics had 37 priests and 14 Indonesian preachers paid by the Government, 507 priests and 16 Indonesian preachers not paid out of the public funds. During 1940, 57 societies were allowed to practise their missionary work.

Education.

The following table shows the number of schools, students and teaching staff in 1950 :—

Schools	Number	Students	Teachers
Primary schools	23,700	4,171,031	72,891
Chinese schools	681	162,315	3,421
Secondary schools . . .	1,250	165,399	7,500
Training schools for teachers .	397	21,023	—
University faculties . . .	14	3,238	—

Higher education is given at the Government University at Jakarta and Jogja with 14 faculties (Law, Medicine, Economics, Agriculture, Mathematics and Physics, Veterinary Science, Literature, Military Academy, Police Academy, Islam University, Protestant Theological Faculty, Roman Catholic Seminary, Dentistry, Political Science).

There were, in 1950, 289 cinemas with a seating capacity of 181,000.

Justice.

The judicial organization is under the direction of the Minister of Justice, and is divided into two sections, viz. the government administration of justice and the native administration of justice. In the government administration of justice there are courts of first instance, courts of appeal in the larger towns and a high court of justice for the whole of Indonesia in the capital.

Although in principle the administration of justice is uniform for all groups, there are important differences between the law prevailing for the various groups in Indonesia. These differences are based on difference in the social conditions, backgrounds and needs of the various groups.

The population is divided into three main groups. These are: the indigenous population, the Europeans and the foreign Orientals. To these various groups various law systems are applicable. When, however, people from two or more different groups are involved, a system of the so-called 'intergentile' law is applied.

The present Criminal Law, which has been in force since 1918, is codified and is based on European penal law. This law is equally applicable to all groups of the population. For private and commercial law, however, there are various systems applicable for the various groups of the population. For the indigenous group, a system of private and agrarian law is applicable; this is called Adat Law, and is mainly uncodified. For the other groups, the prevailing private and commercial law system is codified in the Private Law Act (1847) and the Commercial Law Act (1847). These acts have their origins in the French *Code Civile* and *Code du Commerce* through the similar Dutch codifications. These Acts are entirely applicable to Europeans, whereas to foreign Orientals they are applicable with some exceptions, mainly in the fields of family law and inheritance.

Finance.

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Guilders	Guilders		Guilders	Guilders
1942 [1]	737,678,373	723,018,969	1949 [1]	2,602,200,000	3,907,000,000
1947 [1]	1,063,000,000	2,412,000,000	1950 [1]	6,990,000,000	8,726,000,000
1948 [1]	1,937,000,000	3,654,000,000	1951 [1]	8,050,000,000	9,037,000,000

[1] Estimates.

The sources of revenue in 1948 (and 1947) were as follows (in million guilders):—From direct and indirect taxes, 558 (327); salt monopolies, 7 (1); all other sources, 80 (16), including net surplus of state business enterprises (as government agricultural estates, government printing office, tin, coal, harbours, electric enterprises and railways). Net receipts of government agricultural estates, 6 (1); tin, 48 (15); coal, 3 (0); harbours, −3 (+2); railways, 5 (−7).

The public debt, on 1 Nov., 1950, totalled 5,682 [illegible] 4,339 million was internal debt and was financed by [illegible] by the Java Bank (50·8%), the compulsory loan of March, 1950 (36·5%), government currency issues (9·9%), and treasury bond issues (2·8%).

Defence.

The Indonesian Armed Forces were formally set up on 5 Oct., 1945.

Each of the 3 branches of the Armed Forces (Army, Navy and Air Force) has its own Chief of Staff; they are responsible in tactical command to the Commander-in-Chief, but in the field of administration they are under the direct supervision of the Minister of Defence. The President of the Republic is the Supreme Commander. There is no compulsory service.

Apart from the Territorial units, the Army consists of 5 divisions, including [illegible] artillery, engineers and technical services.

The Navy, in 1951, included a destroyer, 4 corvettes and a number of patrol launches.

Production and Industry.

Scattered all over the isle of Java are many agricultural estates chiefly owned by [illegible] companies, Europeans and Chinese. Yet the greater part of the [illegible] belongs to and is cultivated by the Indonesians.

The harvested area under various 'native' cultures in Java and Madura was in 1949 as follows, in acres:—Irrigated and non-irrigated rice, 4,689,600; maize, 1,996,000; cassava, 681,600; 1948 statistics: sweet potatoes, 233,877; groundnuts, 257,990; soya beans, 513,779; other pulses, 80,921; tobacco (native), 28,304; other secondary crops, 284,399.

In 1948, the harvested areas of the principal 'other secondary crops' were chillies, 4,381 acres; onions, 3,242 acres; cotton, 14,565 acres; potatoes, 9,052 acres, and native sugar cane, 4,930 acres.

The total for area in use for estate agriculture in Indonesia in 1948 was 2,685,310 acres, of which 1,261,040 acres were cultivated.

The annual output of black and white pepper (1935–39 average) was 135 million lb., about 85% of the world's supply. The Japanese almost completely destroyed the pepper vines. Output in 1948 and 1949, about 11 million lb. each.

The following table gives the production of sugar for 5 years:—

		1937	1938	1939	1940	1948 [1]
Harvested area	acres	208,782	209,617	234,519	224,277	—[2]
Total production [3]	metric tons	1,379,924	1,376,510	1,562,462	1,587,364	40,585 [4]
Factories working	number	81	80	84	85	—[2]

[1] Federal territories only. [2] Not available. [3] Crystal sugar.
[4] Telquel telquel production, 1937, 1,414,654; 1938, 1,400,340; 1939, 1,575,905; 1940, 1,606,595 tons.

Sugar production in 1949 amounted to 233,517 metric tons.

Other products of peasants and estates are shown as follows (metric tons):—

	1940	1949		1940	1949
Coffee	77,647 [1]	10,633 [6]	Tea	81,986 [5]	27,159
Rubber [1]	548,904 [3]	170,611	Cocoa	1,553	844
Cinchona	16,371	6,502	Palm oil	239,887	118,615
Tobacco	27,411 [4]	8,351 [7]			

[1] *Hevea* only
[2] Including 38,371 tons native coffee
[3] Including 266,276 tons native rubber.
[4] Including 6,618 tons native tobacco.
[5] Including 13,008 tons native tea.
[6] Estate production only; 1950 estimate, 35,000 metric tons, including 11,000 from estate production.
[7] Total exports; production figures not available.

Number of animals in the federal territories in 1948:—Cattle, 3,578,000; buffaloes, 2,746,000.

The tin-mines of Bangka are worked by the Government; those of Billiton by a combined governmental and private undertaking, and those of Riau and Sumatra by private enterprise. Their total yield was, in metric tons:—1949, 29,427; 1948, 41,763. Export in 1949, 30,459 metric tons; 1948, 45,567 long tons. Export of bauxite ore, 1949, 678,138 metric tons, of which 598,498 tons were shipped to U.S.A.

The yield of the principal coal-mines in the federal territories was, in metric tons:—1947, 298,908; 1948, 537,669; 1949, 662,451.

The production of crude petroleum in 1949 was estimated at 5,929,500 metric tons (7,938,993 in 1940); output of refinery products (1948), 1,543,316 metric tons (6,303,684 in 1940); exports of petroleum products (1949), 5,692,267 metric tons (6,347,664 in 1940).

During the last 10 years before the Japanese occupation the development of industry has been intensive. There are shipyards at Tandjung Priok, Surabaya, Semarang and Amboina. There are many textile factories, 2 large paper factories, an automobile assembly works, large construction works, a tyre factory, a glass factory, a chemical factory, a cement factory, breweries, etc. Many of these works have been destroyed, but rehabilitation is progressing steadily.

Commerce.

Imports and exports in thousand guilders:—

	1939	1940	1946	1947 [1]	1948 [1]	1949	1950
Imports [2]	529,867	437,678	280,889	804,417	1,137,955	1,573,612	1,430,000
Exports [2]	787,080	940,309	154,736	347,265	1,043,002	1,477,557	2,750,000

[1] Revised provisional figures.
[2] Exclusive of war material, gold and silver (1940–48), inclusive of parcels, passenger goods goods for ships' use.
[3] Exclusive of gold and silver (1940–48); inclusive of export duties.

Exports in 1949 (in metric tons):—Tea, 23,924; petroleum, 5,929,642; rubber, 406,861; copra, 308,285; tin ore and metal, 43,290; pepper, 12,141.

The distribution of trade is shown as follows (in thousands of guilders):—

Country	Imports [1]			Exports [2]		
	1940	1948 [3]	1949	1940	1948 [3]	1949
Australia and New Zealand	16,380	32,239	5,497	38,416	12,026	21,306
British Malaya	1,361	470	2,210	5,985	14,111	27,294
China	17,345	27,392	29,760	16,543	4,187	106
Denmark	180	1,278	4,126	2,565	3,395	30,090
France	4,196	5,465	27,540	2,591	11,610	7,308
Germany	8,571	2,681	27,081	—	17,386	19,076
Great Britain	36,105	95,312	161,354	57,119	21,000	66,377
Hong Kong	4,225	25,666	38,406	18,503	19,592	12,422
India and Pakistan	14,546	14,324	21,629	11,957	1 685	6,574
Japan	100,759	187,099	388	53,612	25,426	33,168
Netherlands	54,070	220,873	336,092	49,589	372,156	493,930
Norway	732	1 554	1,573	3,873	3 157	2,967
Singapore	13,634	28,835	29,661	200,775	176,304	319,749
Union of South Africa	634	919	1,881	5,851	3,034	5,212
United States	99,726	254,955	398,863	320,963	182,068	232,509

[1] Excluding boat and post-parcels, passenger goods, goods for ship's use, gold, silver, coin bullion, and war materials.
[2] Including export duties.
[3] Revised provisional figures.

Total trade between the United Kingdom and Indonesia (Board of Trade figures) in £ sterling:—

	1938	1947	1948	1949	1950
Imports to U.K.	6,352,069	986,179	1,900,313	7,103,696	12,759,748
Exports from U.K.	3,504,751	5,739,096	8,526,822	12,538,204	8,548,805
Re-exports from U.K.	71,223	12,477	20,917	84,225	51,150

Shipping and Communications.

Year	Type of vessel	Entered		Whereof, under British flag	
		Number	Reg. tons	Number	Reg. tons
1938	Steamers	11,220	12,717,531	6,505	3,602,012
	Sailing vessels	2,678	279,576	1,351	91,074
1939	Steamers	10,872	12,456,664	6,101	3,690,615
	Sailing vessels	3,303	167,675	1,936	90,015
1940	Steamers	9,836	10,156,516	4,906	1,688,399
	Sailing vessels	3,070	165,557	1,631	85.779

On 31 Dec., 1940, the Netherlands Indies had about 43,700 miles of roads. The highway mileages of some of the larger islands are reported as follows:—Java and Madura, 16,850; Sumatra, 15,800; Borneo, 2,250; Celebes, 5,090; Bali and Lombok, 1,250; Timor, 2,100, and the Moluccas, 250.

At the end of 1940 the total length of rail and tramways (state and private) was about 4,611 miles (3,378 in Java and 1,233 in Sumatra); the gross

receipts (1940) about 60,218,000 guilders; working expenses (1940) about 39,915,000 guilders; number of passengers (1940) about 90,589,000.

In 1940 the postal and telegraph services of the Netherlands Indies included 676 post offices, 1,380 rural postal agencies, 481 telegraph offices, 629 rural telegraph agencies and 66 fixed, 7 coast and 12 aeronautical radio stations. Moreover, there were 722 telegraph offices and 37 fixed, 3 coast and 4 aeronautical radio stations of other government services and private companies; 220 of the above-mentioned 722 telegraph offices are situated in places where also a telegraph office of the postal and telegraph services has been established. The government telegraph lines extended in 1940 over 4,573 miles, the government telegraph cables over 252 miles, making a total of 4,625 miles.

The government telephone aerial lines extended in 1940 over 16,921 miles, the government telephone cables over 1,479 miles. At the end of 1940 there were 340 government telephone exchanges and 51,606 telephones.

The Government have set up a new enterprise in co-operation with K.L.M., the 'Garuda Indonesian Airways,' which is a mixed enterprise on a 50-50 capital basis and under K.L.M. [illegible]. The contract concluded in the beginning of 1951, was made [illegible] with the possibility to nationalize aviation within 10 years.

Banking and Credit.

The Java Bank, established in 1828, has a capital of 9,000,000 guilders. The other large Netherlands [illegible] institutions are the Netherlands Trading Society, the National [illegible] Bank and the Netherlands-Indonesian Escompto Company.

Bank N[illegible] is a state bank and is designed to act as a source of credit [illegible] purposes.

Gold assets as of Jan., 1951, amounted to $228 million, U.S.

The legal coins of 10, 5, 2½, 1 and ½ guilders, as well as the weights and measures, are those of the Netherlands, but the country has coins of its own, viz., 25, 10, 5, 2½, 1 and ½ cent pieces. A new currency, the New Guinea guilder, equalling the Netherlands guilder, was introduced in Netherlands New Guinea on 30 March, 1950.

Weights and Measures.

The introduction of the metric system of weights and measures was officially started in Feb., 1923, and gradually continued; it came into full operation on 1 Jan., 1938.

The following are the old weights and measures:—

Picul	= 136·16 lb. avoirdupois	*Tjengkal*	= 4 yards
Katti	= 1·36 lb. avoirdupois	*Paal* (Java)	= 1,506 metres
Bouw	= 1·7536 acres	*Paal* (Sumatra)	= 1,852 metres
Square Paal	= 227 hectares = 561·16 acres		

Diplomatic Representatives.

1. Of the Republic of Indonesia in Great Britain (29 Rutland Gate, S.W.7.)

Ambassador.—Dr. Subandrio (accredited 23 March, 1950).
Counsellor.—Dr. Sudjarwo Tjondronegoro.
First Secretary.—Dr. Nugroho.
Cultural Attaché.—Madame Dr. Hurustiati Subandrio.

Commercial Counsellors.—P. H. Westermann; Jonkheer Dr. C. H. V. de Villeneuve.
Commercial Secretary.—F. Heckman.
Attaché.—Hardjoko.

2. OF GREAT BRITAIN IN THE REPUBLIC OF INDONESIA.

Ambassador.—Derwent William Kermode, C.M.G.
Counsellors.—A. C. Stewart, O.B.E.; R. G. Stone, O.B.E. (*Commercial*).
First Secretaries.—G. C. Harcourt (*Consul*); H. D. V. Pakenham (*Information*).
Military Attaché.—Lieut.-Col. J. F. Whidborne.
Air Attaché.—Sqn. Ldr. H. W. A. Andrews, D.F.C.

There are a consul-general at Jakarta and consuls at Surabaya and Medan.

IRAQ.

IRAQ was freed from the Turks during the war of 1914–18. It was recognized as an independent state, to be placed under a Mandatory Power, and the mandate was allotted to Great Britain. Relations between the two countries were defined by a treaty concluded in June, 1930, which provided that Great Britain should as soon as possible recommend Iraq for admission to membership of the League of Nations. This recommendation was made and accepted in Oct., 1932, whereupon the mandate was terminated and Iraq became an independent sovereign state member of the League of Nations (4 Oct., 1932).

Iraq took an important part in founding the Arab League and is a member of the United Nations, having signed the Charter on 26 June, 1945.

A 20-year treaty of alliance and mutual assistance with Great Britain was initialled on 15 Jan., 1948, supplementing the covenant of the League of Arab States signed on 22 March, 1945, and the Saadabad Pact between Iran, Iraq, Turkey and Afghanistan signed on 8 July, 1937 (Cmd. 7309). This treaty was, however, rejected by the Iraqi Government.

National flag: a vertical red stripe near the hoist, the inner corners slanted off, with 2 white stars on it; black, white, green (horizontal).

Reigning King.—Faisal II, born 2 May, 1935, succeeded his father, Ghazi, second King of Iraq, who died as the result of an accident on 4 April, 1939. There is a Regency under the King's relative, Emir Abdul Illah, G.C.M.G., G.C.V.O. (appointed 4 April, 1939).

Government.—In 1920 a Council of State was formed, as a provisional measure, to conduct the administration of the country. On 23 Aug., 1921, the High Commissioner proclaimed the Emir Faisal King of Iraq, by election of the people, as the result of a plebicite in which 96% of the inhabitants of the country voted in his favour.

The Organic Law passed by the Constituent Assembly in June, 1924, provides for a limited monarchy and a responsible government. The legislative body consists of a Senate (Majlis al A'Ayan) of 29 'elder statesmen,' nominated for 8 years, and the Lower House (Majlis al Nuwwab) of 138 elected deputies. The first Parliament under the constitution was opened by King Faisal on 16 July, 1925. The Organic Law was slightly modified in 1944 giving the king power to dismiss his Government, and the

Electoral Law was modified in 1946 to enable any Iraqi to be nominated for election to Parliament if he could secure 12 signatures.

The Cabinet in April, 1951, was composed as follows :—

Prime Minister and Minister of the Interior.—Nuri al Said.
Ministers without Portfolio.—Mustafa Al-Umari; Umar Nadhmi; Hassan Kubbah.
Minister of Social Affairs.—Majid Mustafa.
Minister of Defence and Foreign Affairs.—Shaker Al-Wadi.
Minister of Economics.—Abdul Masid Mahmud.
Minister of Finance.—Abdul Wahab Murjan.
Minister of Justice.—Hasan Sami Tatar.
Minister of Education.—Khalil Kanna.
Minister of Communications and Works.—Dhia Jaafar.

The country is divided into the following liwas :—Mosul, Arbil, Kirkuk, Sulaimani, Diyala, Baghdad, Dulaim, Kut, Karbala, Hillah, Diwaniyah, Muntafiq, Amara, Basrah. Each liwa is administered by a Mutasarrif, and is subdivided into qadhas (under Qaimmaqams) and nahyahs (under Mudirs)

Area and Population.— The country has an area of 116,600 square miles and a population, according to the census of 1947, of 4,799,500. The following are the figures for each liwa :—

Amara	308,108	Hilla	261,903
Baghdad	805,293	Karbala	276,670
Basrah	352,039	Kirkuk	285,878
Diwaniyah	333,787	Kut	224,792
Diyala	273,336	Mosul	601,589
Dulaim	193,291	Muntafiq	369,806
Erbil	240,273	Sulaimani	222,732

Of the total population there were in 1935, 3,136,632 Moslems (Sunni and Shiite, in proportion of roughly 5 : 8); 101,375 Christians (Orthodox, 20,668; Roman Catholics, 33,098; Protestants, 7,740; others, 39,869); 90,970 Jews and 41,134 other religions (Mandaeans, Yazidis, Bahais, etc.).

On 25 Nov., 1933, the Council of the League of Nations fixed the boundary between Iraq and Syria, including the whole of the Jebel Sinjar in Iraq.

Education.—Primary education is free and compulsory, but attendance has not yet been enforced everywhere. Primary school age is 6 to 12. Intermediate and secondary education was made free from 1946. Secondary education is for 5 years, of which the first 3 are termed intermediate. The medium of instruction is Arabic; Kurdish is used in primary schools in some northern districts. The figures for the school year 1949–50 are as follows :—Government primary schools, 1,070, of which 805 are for boys, 185 for girls and 80 co-educational, with 130,008 boys and 39,860 girls. Private primary schools, 119, with 16,727 boys and 8,618 girls. Foreign primary schools, 5, with 1,123 boys.

There are 79 government intermediate schools, 52 for boys with 11,638 students and 27 for girls with 3,563 students. National private intermediate schools number 51, 42 for boys (6,282 students) and 9 for girls (868 students). The 3 foreign intermediate schools, 2 for boys and 1 for girls, have 521 boy students and 27 girls.

There are 29 government secondary schools (22 for boys with 3,304 students and 7 for girls with 845 students), 40 national private secondary schools (34 for boys with 2,688 students, 6 for girls with 256 students) and 2 foreign secondary schools (1 for boys with 95 students, 1 for girls with 34 students).

Government vocational schools coming under either the Ministry of Education or other Ministries include 4 for technical subjects and 1 each for domestic science, agriculture, health services, nursing and midwifery, and police training; students total 1,275.

There are 5 colleges for training primary school teachers, 3 for men and 2 for women. In 1950, there were 3 teachers' training sections attached to existing schools, providing a 1-year post-secondary course.

Iraq has no university, but there are higher colleges for engineering, medicine, pharmacy, arts and sciences, commerce, chemistry, economics and law, and an institute of fine arts. The higher teachers' college and the Queen Aliyah College train teachers for intermediate and secondary schools. All the higher colleges, with the exception of the Police and Military Colleges (for men) and the Queen Aliyah College (for women), are co-educational. Students at higher colleges number 4,332 men and 868 women.

Teachers in primary schools number 4,597 men and 2,152 women; in intermediate schools, 295 men and 197 women; in secondary schools, 853 men and 130 women; in vocational schools, 50 men and 14 women; in higher colleges, 114 men and 10 women.

Expenditure on education in 1949–50 amounted to 2,453,062 dinars (= 9% of the total budget).

There were, in 1950, 70 cinemas, with a seating capacity of 65,300.

Justice.—The courts are established throughout the country as follows:—For civil matters: the Court of Cassation in Baghdad with a British President; 4 Courts of Appeal at Baghdad, Basra, Mosul and Kirkuk; 14 Courts of First Instance with unlimited powers and 44 Courts of First Instance with limited powers, all being courts of single judges. In addition, 6 Peace Courts have peace court jurisdiction only.

For *Shara'* [illegible] the Sunni and Shia Benches of Revision in Baghdad; Sh[illegible] places where there are civil courts, constituted in some places of specially appointed Qadhis (religious judges) and in other places of the Judges of the Civil Courts For criminal matters: the Court of Cassation; 6 Sessions Courts (2 being presided over by the Judge of the Local Court of First Instance and 4 being identical with the Courts of Appeal). Magistrates Courts at all places where there are civil courts, constituted of Civil Judges exercising magisterial powers of the First and Second Class. There are also a number of Third Class Magistrates Courts, powers for this purpose being granted to municipal councils and a number of administrative officials. Some administrative officials are granted the powers of a Peace Judge to deal with cases of debts due from cultivators.

Special Religious Courts for Christians and Jews [illegible] and Mosul deal with matters of personal status such as [illegible] and maintenance between husband and wife.

The prison population at the end of 1948, was 6,317, including persons on remand and 46 persons in the reformatory school.

Finance.—Revenue and expenditure (in 'Iraqi dinars), including receipts from oil royalties and expenditure on capital works:—

	1945–46	1946–47	1947–48	1948–49	1949–50[1]
Revenue .	20,220,881	25,097,387	26,011,880	26,722,404	27,194,755
Expenditure .	21,323,719	25,522,019	26,561,016	32,003,044	28,492,724

[1] Provisional.

Defence.—Military training is compulsory for all men when they reach the age of 18. In addition to conscript service, which is, for most arms, for 2 years, a man may volunteer for service in the army or change his conscript service into voluntary service. Under such circumstances, voluntary service is for 2 years and he may extend it by periods of 2 years until he reaches the age of 45. When a man, whether conscript or volunteer, has completed his colour service, he will serve in the reserve until he reaches the age of 45.

Army.—The establishment of the Iraqi Army in Jan., 1950, was as follows:—3 divisions, comprising the plains division, the mountain division and the training division. The plains and mountain division each consists of 3 infantry brigades, the training brigade, 3 artillery regiments, 1 signal battalion, 1 engineer battalion, second-line transport companies and ancillary services. The mountain division has an additional armoured car regiment. Each brigade consists of 3 infantry battalions and 1 regiment of artillery.

The training division is responsible for the administration of certain training units, the mechanized force and 1 independent armoured car regiment.

Mechanized force consists of 1 armoured car regiment, 1 lorried infantry regiment, 1 mechanized field artillery regiment, 1 engineer squadron, and 1 signal squadron.

In addition to the normal service training schools, there is a staff college and cadet college.

Air Force.—At present the Royal Iraqi Air Force is composed of 1 squadron of Sea Furies, 1 training squadron and a communication flight.

Navy.—There is a river flotilla of 4 river gunboats manned by artillery personnel, a lighthouse tender and a tug.

Police.—On 31 Oct., 1947, the 'Iraqi police force consisted of 267 gazetted officers, 827 inspectors, 194 sub-inspectors, 4,275 mounted police, 14,262 foot police (including 5,200 mobile force), 710 armoured car force, 611 traffic police, 309 signals and wireless personnel, 122 field hospital personnel; total strength, 21,577. The inspectorate staff consists of 2 'Iraqi inspectors. Police budget for the year 1949–50 was 2,559,508 dinars.

There is a camel corps of 260 men which patrols and garrisons the western and south-western deserts and the Jezirah desert in co-operation with 27 armoured cars equipped with Lewis and Vickers guns. This force is in wireless communication with its bases and frontiers. Moreover every liwa has its complement of armoured patrol cars.

The mobile police was, in 1950, 3,500 men strong, organized in 4 infantry battalions which are grouped in 2 brigades.

The whole 'Iraqi police force is armed with the British ·303 rifle with the exception of railway police and port police, which are armed with the French Libel rifle, and the customs and excise police force, which is partly equipped with the British ·303 rifle and partly with the French Libel rifle.

Production.—Iraq is a land of great potentialities. The soil of the country is rich, but there are vast areas which can only be cultivated if irrigated by canals or pumps. The Irrigation Department operates several canal systems, and new irrigation works are under consideration.

The chief winter crops are wheat and barley. The date crop is important, the country furnishing about 80% of the world's trade in dates; the chief producing area is the tidally irrigated riverain belt of the Shatt-el-Arab.

Wool is also an important export; the 1950 clip (washed) is estimated at 7,400 metric tons; in 1949, 3,718 metric tons were exported. From the cotton crop in 1949, 5,731 tons of ginned cotton were produced; crop estimate, 1950, about 15,000 tons.

An oilfield, 30 miles south of Khanaqin, in the area known as the Transferred Territories near the Persian frontier, is operated by the Khanaqin Oil Company, a subsidiary of the Anglo Iranian Oil Company, and there is a pipe-line to a refinery near Khanaqin. Oil for consumption in Iraq is refined at this refinery and distributed and marketed by an associated company, the Rafidain Oil Company in all parts of Iraq at cheap prices controlled by an agreement between the company and the Government. The greater part of Iraq's oil production comes from the Iraq Petroleum Company's field at Kirkuk. This company, an international group, has constructed pipelines to the Mediterranean and has also started to lay a new pipeline to Banias on the Syrian coast, with an initial throughput of about 13 million tons annually. The British Oil Development Company (Mosul Petroleum Co. Ltd.) holds a concession for oil covering 'Iraqi territory west of the Tigris and north of the 33rd parallel of latitude. Several wells have been drilled but no oil has yet been marketed. The Basra Petroleum Company have been granted a concession for oil covering the southernmost part of Iraq (the old Basra vilayet). High-grade quality oil has been found here, but production has not yet started. Oil production in 1944 was 4,140,073; in 1945, 4,606,899; in 1946, 4,674,262; in 1947, 4,648,554; in 1948, 3,384,085 metric tons.

Commerce.—Imports and exports for 5 calendar years were as follows (in 'Iraqi dinars) :—

	1945	1946	1947	1948	1949
Imports. .	18,859,634	28,039,962	39,946,140	45,523,279	40,501,372
Local Exports	9,817,868	12,722,456	13,800,538	7,584,480	11,207,588
Transit . .	9,868,879	5,601,284	3,342,039	3,864,640	2,714,172

Movements of gold bullion and currency are excluded from the above table. Import values are C.I.F. plus landing charges, and include all goods cleared for home consumption whether subsequently re-exported or not. Exports do not include shipments of oil or re-exports, and are valued F.O.B.

Customs and excise receipts for 1948–49, 9,800,513 dinars.

The principal imports and exports for 2 years were as follows (in thousands of dinars) :—

Imports	1948	1949	Imports	1948	1949
Cotton piece-goods .	7,296	5,514	Paper and cardboard	593	641
Iron and steel . .	4,997	4,880	Cement . . .	1,009	633
Boilers and machinery	4,111	4,527	Clothing . . .	755	598
Tea	2,123	2,837	Coffee . . .	245	372
Automobiles and parts	2,176	2,311	Timber . . .	623	348
Sugar . . .	3,661	2,227			
Electrical machinery .	1,890	1,967	Exports		
Woollen piece-goods .	1,287	1,111			
Soap	837	768	Barley . . .	102	5,291
Chemicals and pharmaceuticals . .	829	745	Dates . . .	4,742	2,961
Artificial silk piece-goods . . .	374	706	Wool (raw) . .	1,027	534
			Animals (living) .	151	359

Date exports amounted in 1948 to 214,395 metric tons; in 1949 to 131,428 metric tons. Barley exports, 1948, 2,928 metric tons; 1949, 326,852 metric tons.

The distribution of trade in 1949 was as follows (in thousands of dinars): Imports :—United Kingdom, 17,593; U.S.A., 4,625; Italy, 3,070; Ceylon, 2,555; India and Pakistan, 2,152; Syria, 2,104; Persia, 1,278; Sweden, 845; Brazil, 754; Netherlands, 741. Exports :—India and Pakistan, 2,344; United Kingdom, 1,763; Japan, 1,454; Netherlands, 951.

The total trade between Iraq and United Kingdom, according to the Board of Trade returns, was as follows for 5 years (in £ sterling) :—

	1946	1947	1948	1949	1950
Imports from Iraq .	2,019,191	3,241,755	7,239,273	6,649,095	8,681,441
Exports to Iraq .	10,574,099	14,424,641	17,551,373	14,292,683	14,533,587
Re-exports to Iraq .	140,104	83,669	58,687	76,698	38,360

Communications.—The 'Iraqi state railway system consists of a metre gauge line from Basrah, at the head of the Persian Gulf, to Baghdad, 669·2 km. (353·4 miles). At Baghdad the line crosses the river Tigris by a combined road and rail bridge which is now open for traffic. The line then extends through Juloula (Qaraghan) which is 147·8 km. from Baghdad on to Kirkuk 321·8 km. (200 miles) thence to the terminal station of Erbil 104·9 km. (65·2 miles). Khanaqin on the Iraq-Persian frontier is served by a branch line from Juloula 27·9 km. (17·3 miles). There is also a standard gauge (4 ft. 8½ in.) line from Baghdad to Tel-Kotchek (328 miles) on the Syrian frontier, following the right bank of the Tigris via Mosul. The main Basrah–Baghdad line passes the ancient cities of Ur of the Chaldees, Babylon and Kish, and special facilities are provided to enable travellers to visit them. A daily service for passenger and goods is run between Basrah–Baghdad and Baghdad–Kirkuk and Erbil, and Khanaqin, whence goods are transferred by road to the markets in Northern and Central Iraq, as well as Persia. The standard gauge line links with the Syrian railway system at Tel Kotchek, thus establishing a through goods and passenger service from the Persian Gulf to Turkey, Egypt and Europe. The total route mileage open on 1 July, 1949, was 1,027 miles (1,652 km.). There also exist 217 miles (350 km.) of sidings. A central railway station is being built in Baghdad.

Since the 1914–18 war about 1,500 miles of roads and tracks have been developed for vehicular traffic. Of this total, about 1,400 miles are surfaced about 250 miles are metalled but not surface dressed, and the remainder are earth roads and tracks. The main surfaced roads are (1) the road north from Baghdad via Kirkuk, Erbil and Mosul to a point near the Turkish frontier at Zakho, with branches from Kirkuk to the Kurdish province of Sulaimani, from Erbil to the Persian frontier, and rom Mosul to Sinjar; (2) about 350 miles of the main road west from Baghdad to the Jordan frontier; (3) the road east of Baghdad, which connects the road system of Persia near Khanaqin; and (4) the road south from Baghdad to Hilla and the holy city of Kerbala.

At the close of the financial year 1948–49 there were 175 post and telegraph offices in Iraq. At most of these money orders are issued and paid. A restricted number of offices also issue and pay postal orders and accept and deliver insured and value payable postal packets.

Mail communication is maintained over distances totalling 17,142 miles as follows :—11,753 miles by air, 1,000 miles by rail, 3,000 miles by

mechanical road transport, 649 miles by pack animals and runner services, 240 miles by river.

Air-mail correspondence is both despatched and received in mails conveyed by the British Overseas Airways Corporation Ltd., 5 times a week. The transit period between Iraq and England by this service takes normally 3 days, and between Iraq and India about 2 days. Air-mail communication with U.S.A. and Canada is maintained by the T.W.A. and Pan American Air Services, 5 times weekly. Air-mail communications are also maintained with Egypt, Syria, Lebanon, Persia, Kuwait and Bahrain, by the Iraqi Airways services; with Persia also by the Iranian Airways and Misr Air-lines.

On 31 March, 1949, the line and wire mileage of the Iraq telegraph and telephone system amounted to 6,493 miles and 73,876 miles respectively. At the end of March, 1949, there were 136 departmental public telephone exchanges, and 122 sub-exchanges operating private systems. The number of connexions in the public system was 14,595. The administration operates wireless telegraph services with Egypt, Syria, Yemen and Saudi Arabia. There is a broadcasting station at Baghdad.

In the year 1947–48, 275 ocean-going steamers of a gross registered tonnage of 1,639,490 (in 1946–47, 244 steamers of 1,434,178 gross tons) entered the port of Basra.

Currency, Banking, Weights and Measures.—The rupee currency was displaced by a national Iraqi currency and note issue, by a Currency Law published on 19 April, 1931. By this law, which came into effect on 1 July, 1931, but was suspended until 1 April, 1932, the monetary unit became the *'Iraqi dinar* (I.D.) = 1,000 fils = 5 riyals = 20 dirhams = £1 sterling. Silver coins for 50 fils (*Dirham*) and 20 fils are in circulation, and other coins for 10, 4 (nickel), 10, 4, 2 and 1 (bronze) fils. Notes are for a ¼, a ½ and 1 dinar, and for 5, 10 and 100 dinars. The 50 fils coins are of a silver alloy, the fineness of which is 500 parts of pure silver in 1,000 parts, and of a weight of 9·00 grammes, while the 20-fils coin is of a silver alloy, the fineness of which is the same, but of a weight of 3·60 grammes. A larger coin of 200 fils was put into circulation in June, 1933. The total currency in circulation on 30 June, 1950, amounted to 40,318,122 dinars. The currency was formerly controlled by an Iraqi Currency Board sitting in London, but was taken over by the National Bank of Iraq on 1 July, 1949.

The principal banks are the Ottoman Bank, the British Bank of Iran, and the Eastern Bank, with branches in the chief towns. In 1936 an Agricultural and Industrial Bank, financed by the 'Iraqi Government was instituted to make advances to cultivators and otherwise to promote the agricultural and industrial development of the country. In 1941 the Rafidain Bank, financed by the 'Iraqi Government, was instituted to carry out normal banking transactions and act as government bankers. Head office in Baghdad, with branches in Basra and Mosul.

The metric system is gradually being introduced, but native weights and measures are still met with, the principal ones being:—*Hogya* = 2·8 lb.; *man* = 56 lb.; *wazna* = 224 lb.; *tughar* = 4,480 lb.; *dhra* = 29·38 inches (27 inches in Aleppo); *mishara* = 0·62 acres.

Diplomatic Representatives.

1. Of Iraq in Great Britain (22 Queen's Gate, S.W.7).

Ambassador Extraordinary and Plenipotentiary.—H.R.H. Amir Zaid ibn al-Hussein, G.B.E. (accredited 18 Dec., 1946).

Minister.—Abdul Malik Khudhairi.
Secretary.—Mohamed Adib Fuad Al-Sulaiman.
Attachés.—Ahmed T. M. Al-Gailani (*Press*); Muhsin Al-Jazairi; Mohammad Ismail Ramadhan.
Military Attaché.—Lieut.-Col. Ahmed Marie.
Air Attaché,—Major Abdul Khalik Al-Saadoon.

2. Of Great Britain in Iraq.

Ambassador.—Sir John Munro Troutbeck, K.C.M.G. (appointed March, 1951).
Counsellors.—H. Beeley, C.B.E.; J. C. B. Richmond (*Oriental*); F. H. Gamble (*Commercial*).
First Secretaries.—T. E. Bromley; E. R. D. Sworder, O.B.E., D.S.C. (*Commercial*); G. R. Gauntlett (*Consular*); M. L. Fitzgerald (*Information*); P. L. V. Mallet.
Military Attaché.—Brig. A. Boyce, D.S.O.
Civil Air Attaché.—B. G. Barnard.
British Consul-General, Basra.—F. A. G. Cook, O.B.E.
British Consul, Kirkuk.—G. H. Clarke.
British Vice-Consul, Mosul.—A. R. Sinclair.
British Vice-Consul, Amara.—D. L. L. Stewart.

Books of Reference.

Statistical Information.—The Principal Bureau of Statistics, Ministry of Economics, Baghdad, publishes an Annual Statistical Abstract (latest issue 1948). A central statistical office is being set up, but the collection of statistics is still done by the separate ministries. Foreign Trade statistics are published annually by the Directorate-General of Customs and Excise (latest issue, 1948).

IRISH REPUBLIC.

(Poblacht na hÉireann.)

The Irish Republic is a sovereign independent state. Its parliament exercises jurisdiction in 26 of the 32 counties of Ireland.

In April, 1916, an insurrection against British rule took place and a

republic was proclaimed. The armed struggle was renewed in 1919 and continued until 1921.

The independence of Ireland was reaffirmed in January, 1919, by the National Parliament (*Dáil Eireann*) elected in December, 1918.

In 1920 an Act was passed by the British Parliament, under which separate Parliaments were set up for 'Southern Ireland' (26 counties) and 'Northern Ireland' (6 counties). The Unionists of the 6 counties accepted this scheme, and a Northern Parliament was duly elected on 24 May, 1921. The rest of Ireland, however, having already proclaimed a republic, ignored the Act.

On 6 December, 1921, a treaty was signed between Great Britain and Ireland by which Ireland accepted dominion status subject to the right of Northern Ireland to opt out. This right was exercised, and the border between *Saorstát Eireann* (26 counties) and Northern Ireland (6 counties) was fixed in Dec., 1925, as the outcome of an agreement between Great Britain, the Irish Free State and Northern Ireland. The agreement was ratified by the three parliaments.

Subsequently the constitutional links between Saorstát Eireann and the United Kingdom were gradually removed by the Dáil. The final separation was brought about by the Republic of Ireland Act, 1948, which came into operation on 18 April, 1949.

National flag: green, white, orange (vertical).

National anthem: A Soldier's Song (Words by P. Kearney; tune by P. Heaney.)

Constitution.

The first constitution of the Irish Free State came into operation on 6 Dec., 1922. On 14 June, 1937, a new constitution was approved by Parliament (*Dail Eireann*) and enacted by a plebiscite on 1 July, 1937. This constitution came into operation on 29 Dec., 1937. Under it the name Ireland (Eire) was restored.

National Status.—The constitution declares that Ireland is a sovereign independent, democratic state. It affirms the inalienable, indefeasible and sovereign right of the Irish nation to choose its own form of government, to determine its relations with other nations, and to develop its life, political, economic and cultural, in accordance with its own genius and traditions.

The constitution applies in theory to the whole of Ireland, but it provides that, pending the reintegration of the national territory, the laws enacted by the Parliament established by the constitution shall have the same area and extent of application as those of the Irish Free State.

The President of the Republic.—It provides for a President elected by direct vote of the people, who holds office for a period of 7 years. On the advice of the Head of the Government he summons and dissolves *Dáil Eireann*. He signs and promulgates laws. On the nomination of *Dáil Eireann*, he appoints the *Taoiseach* or Prime Minister. On the nomination of the *Taoiseach* and with the previous approval of *Dáil Eireann* he appoints the other members of the Government. The supreme command of the Defence Forces is vested in the President, its exercise being regulated by law.

In addition, the President has power to refer certain Bills to the Supreme Court for decision as to whether they are repugnant to any provisions of the constitution. He can, at the instance of a prescribed proportion of the members of the Houses of the *Oireachtas*, refer certain Bills to the people for decision at a referendum.

The President, in the exercise and performance of certain of his constitutional powers and functions, is aided and advised by a council of state.

By the Republic of Ireland Act, 1948, it is provided that the President, on the authority and on the advice of the government, may exercise the executive power or any executive function of the state in, or in connexion with, its external relations.

The Parliament.—The *Oireachtas* or National Parliament consists of the President and two Houses, viz. a House of Representatives, called *Dáil Eireann*, and a Senate, called *Seanad Eireann*, consisting of 60 members. The *Dáil*, consisting, since 1947, of 147 members, is elected by adult suffrage. Of the 60 members of the Senate, 11 are nominated by the *Taoiseach* (Prime Minister), 6 are elected by the universities, and the remaining 43 are elected from 5 panels of candidates established on a vocational basis, representing the following public services and interests:—(1) National language and culture, literature, art, education and such professional interests as may be defined by law for the purpose of this panel; (2) Agriculture and allied interests, and fisheries; (3) Labour, whether organized or unorganized; (4) Industry and commerce, including banking, finance, accountancy, engineering and architecture; (5) Public administration and social services, including voluntary social activities.

Powers of the Senate.—A maximum period of 90 days is afforded to the Senate for the consideration or amendment of Bills sent to that House by the *Dáil*, but the Senate has no power to veto legislative proposals.

Executive Power.—The Executive Power of the state is exercised by the Government, which is responsible to *Dáil Eireann*, and consists of not less than 7 and not more than 15 members. The head of the Government is the *Taoiseach* or Prime Minister.

Fundamental Rights.—The state recognizes the family as the natural, primary and fundamental unit group of society, possessing inalienable and imprescriptable rights antecedent and superior to all positive law. It acknowledges the right and duty of parents to provide for the education of their children, and, with due regard to that right, undertakes to provide free primary education. It pledges itself to guard with special care the institution of marriage.

The constitution contains special provision for the recognition and protection of the fundamental rights of citizens such as personal liberty, free expression of opinion, peaceable assembly and the formation of associations and unions.

Freedom of conscience and the free practice and profession of religion are, subject to public order and morality, guaranteed to every citizen. No religion may be endowed or subjected to discriminatory disability. The special position of the Catholic Church as the guardian of the faith professed by the majority of the citizens is recognized by the state. The other religious denominations existing at the date of the coming into operation of the constitution are also recognized.

Directive Principles of Social Policy.—Certain principles of social policy which are intended for the general guidance of the *Oireachtas*, but whose application in the making of laws is not cognisable by the Courts, are set forth in the constitution. Among their objects is the direction of the policy of the state towards securing the distribution of property so as to subserve the common good, the regulation of credit so as to serve the welfare of the people as a whole, the establishment of families in economic security on the land, and the right to an adequate means of livelihood for all citizens.

Language.—Irish as the national language is the first official language; English is recognized as a second official language.

No amendment of the constitution can be effected except with the approval of the people given at a referendum.

Government.

President of the Republic.—Seán Tomás Ô Ceallaigh (Sean T. O'Kelly).

The President was installed on 25 June, 1945. He holds office for 7 years. Remuneration £5,000 per annum. The office carries a pension of £1,200 per annum.

Dr. Douglas Hyde, the first President, held office from 25 June, 1938, to 24 June, 1945.

At the general election held on 4/10 February, 1948, the following parties were returned to the *Dáil* (1944 strengths in brackets):—Fianna Fáil, 68 (76); Fine Gael, 31 (30); Labour Party, 14 (8); Clann na Poblachta, 10; Farmers, 7 (10); National Labour Party, 5 (4); Independents, 12 (10); total 147 (138).

There are no formal party divisions in the Senate, whose total of 60 members is made up of (*a*) 43 members elected by an electoral college comprising members of *Dáil*, Senate, council boroughs and county councils —990 electors in all; (*b*) 6 members elected by the universities, (*c*) 11 members nominated by the *Taoiseach*.

The Government consists of the following members (elected 18 Feb., 1948):—

Taoiseach (Prime Minister).—John A. Costello, S.C. (Fine Gael).
Tánaiste (Deputy Prime Minister) and Minister for Social Welfare.—William Norton (Labour).
Minister for Education.—General Richard Mulcahy (Fine Gael).
Minister for External Affairs.—Seán MacBride, S.C. (Clann na Poblachta).
Minister for Lands.—J. Blowick (Farmer).
Minister for Posts and T [illegible] T. Everett (Labour).
Minister for Agriculture [illegible] (Independent).
Minister for Finance. P. McGilligan, S.C. (Fine Gael).
Minister for Justice.—Daniel Morrissey (Fine Gael).
Minister for Defence.—General Seán MacEoin (Fine Gael).
Minister for Industry and Commerce.—Dr. T. F. O'Higgins (Fine Gael).
Minister for Health.—Dr. Noel C. Browne (Clann na Poblachta).
Minister for Local Government.—Michael J. Keyes (Labour).

The Attorney-General, Charles F. Casey, S.C., is not a member of the Government.

Local Government.

There are 27 administrative counties and 4 county boroughs governed by councils which are elected triennially. The county councils administer county affairs generally, can hold property, levy rates and borrow money. The county borough council possesses with certain exceptions the powers of a county council.

The administrative counties include the urban county districts which are urban areas that have been constituted sanitary districts. Each such district is governed by an elected council that administers the Acts relating to sanitary services, housing, libraries, etc., and is the sole rating authority

within its area. There are 60 urban sanitary districts, comprising the 4 county boroughs, 7 municipal boroughs, 1 town constituted under a special Act and 48 towns under the Towns Improvement Act, 1854. There are 28 towns constituted under the Towns Improvement Act, 1854, which are not urban sanitary districts. These towns have elected town commissioners who exercise certain minor powers. There are, therefore, altogether 88 areas under municipal government.

An enlarged rural sanitary district, called the county health district, was created by the Local Government Act, 1925. This district generally extends over the county with the urban districts excluded. The county council performs its duties as a health authority directly, and is required to appoint a county medical officer for the effective administration of the health and sanitary codes.

The county council is also as a rule the public assistance authority. County homes have been established for the aged and infirm and chronic invalids, and county and district hospitals for the sick. Home assistance is the normal method of poor relief. Old age pensions are a charge on state funds, but local authorities assist in the administration. The insane poor are under care in 19 mental hospitals maintained by county and county borough councils. Industrial and reformatory schools are managed by religious communities, but maintained principally out of capitation grants from state and local funds. Religious communities and voluntary associations also maintain schools for the deaf and dumb, the blind, the mentally deficient and other afflicted classes which local authorities have power to utilize and subsidize.

The county and county borough councils, the urban district councils and other elective bodies have a system of government which combines an elected council with a manager. These councils have certain specified functions, including the making of a rate, raising loans, and making bye-laws. All functions formerly exercised by the councils other than those now specifically reserved by law are exercised by the manager, a paid official, who has control over all officers, and whose removal from office is subject to the sanction of the central authority.

Elected members of local authorities are not paid, but provision is made for payment of travelling expenses and subsistence allowances.

Elections to public bodies are held according to the principle of proportional representation. A person who is of full age is entitled to be registered as a local government elector at the place of ordinary residence on the qualifying date and also in respect of lands or premises occupied as owner or tenant during a qualifying period; but an elector may not vote more than once at an election of members to a local authority. Women are eligible for election as members of all local government bodies in the same manner and on the same conditions as men.

A central body called the Local Appointments Commissioners is charged with the duty of selecting suitable persons to be appointed by local authorities to chief executive offices, to professional and technical offices and to other prescribed offices. Before making an appointment to a prescribed office which cannot be filled by promotion, the local authority must request the Commissioners to recommend to them a suitable person. The Commissioners select persons for appointment by means of competitive examinations or by the machinery of selection boards.

A scheme of combined purchasing has been established in order to enable local authorities to obtain commodities of standard quality at the lowest possible price. The central authority appoints official contractors after obtaining competitive tenders.

Area and Population.

According to the census of May, 1946, the following are the figures of area and population :—

Counties and county boroughs	Area in statute acres [1]	Population 1946		
		Males	Females	Total
Province of Leinster				
Carlow	221,486	17,702	16,379	34,081

[1] Exclusive of larger rivers, lakes and tideways. [2] Including the County Borough.

Vital statistics for 4 years :—

Year	Births	Marriages	Deaths	Year	Births	Marriages	Deaths
1946	67,922	17,525	41,457	1948	65,930	16,115	36,357
1947	68,978	16,290	44,061	1949	63,954	16,299	38,098

New Travel Identity cards and passports granted in 1949 to persons going to employment and permanent residence were :—Men, 12,499; women, 12,992; total, 25,491.

Passenger movements by sea were, in 1949, outward, 653,405; inward, 636,798; in 1948, outward, 639,152; inward, 611,912.

Religion.—According to the census of population taken in May, 1946, the principal religious professions were as follows :—

	Leinster	Munster	Ulster (part of)	Connacht	Total
Roman Catholics . .	1,185,106	892,971	225,018	482,938	2,786,033
Protestant Episcopalians.	75,225	19,868	21,244	8,492	124,829
Presbyterians. . .	7,031	838	15,405	596	23,870
Methodists . . .	4,839	1,758	1,285	473	8,355
Other professions . .	8,916	1,871	935	298	12,020

There were 688 members of the Society of Friends in 1949.

Education.—*Elementary Education.*—Elementary education is free and is given in the national schools. In 1949, the number of schools in operation was 4,896. The average number of pupils enrolled in the schools was 445,183; the percentage average daily attendance 84·8; the number of teachers of all classes 12,821.

There are 4 state-aided training colleges and 2 training centres (to which only a limited grant is payable).

The estimated state expenditure on elementary education for the year 1950–51 is £6,400,000, excluding the cost of administration.

Since the establishment of the state in 1922, the Irish language became an essential part of the curriculum for all schools subsidized by the Government. Of the teachers serving in national schools, 12,510 have already qualified to teach the language. In 204 national schools in the Dublin and Gaeltacht areas, Irish is the medium of instruction in all subjects except [illegible]. In 1934–35, 10,226 schoolchildren spoke Irish at home; in 1948–49, the number was 9,654.

Secondary Education.—The secondary schools are under private control and are conducted in many cases by religious orders; all schools receiving grants from the state are open to inspection by inspectors of the Department of Education. The number of recognized secondary schools during the school year 1949–50 was 416, and the number of pupils between the ages of 12 and 20 years in attendance was 47,065. Estimated total state expenditure for 1950–51, £926,330, excluding the cost of administration.

Continuation and Technical Education.—Vocational schools are established in all cities, the principal towns and some rural areas. These schools are controlled by the local Vocational Education Committees, and are maintained partly by the rates and partly by state grants. The estimated state expenditure for 1950–51 is £704,730, excluding the cost of administration, and the expenditure from local rates—£368,413.

Agricultural Education.—Winter agricultural classes for the sons of farmers are provided by statutory County Committees of Agriculture, which are financed partly out of state grants and partly out of the rates. Residential courses of agricultural instruction for farmers' sons and courses of instruction in rural domestic economy for farmers' [illegible] provided at institutions of which the principal are managed by the

Department of Agriculture or are managed by religious orders, and receive grants from state funds. Higher agricultural education is provided for in the universities.

University Education is given at the University of Dublin (Trinity College), founded in 1591, and at the National University of Ireland, founded in Dublin in 1909. The latter has three constituent colleges, namely, the University Colleges of Cork, Galway and Dublin. The numbers of professors, etc., and students, in 1949–50, were as follows :—

Universities	Professors, lecturers and assistants	Students
Trinity College, Dublin	176	2,442
University College, Cork	79	954
,, ,, Galway	90	852
,, ,, Dublin	154	3,200

There were, in 1949, 260 cinemas, with a seating capacity of 168,500.

Justice.

Justice is administered by courts set up by the Courts of Justice Act, 1924, pursuant to the constitution. They consist of a Supreme Court, a High Court, a Court of Criminal Appeal, a Central Criminal Court, a Circuit Court and a District Court. The Courts of Justice Act, 1924, has been amended by a number of Acts, the latest being the Courts of Justice Act, 1949. The most important of the amending Acts, however, is the Courts of Justice Act, 1936.

The Supreme Court, which consists of the Chief Justice (who is *ex-officio* an additional Judge of the High Court) and 4 other Judges, has appellate jurisdiction from all decisions of the High Court, and on questions of law in Workmen's Compensation Act cases from the Circuit Court. The High Court, which consists of a President (who [illegible] of the Supreme Court) and 5 ordinary Judges, has full original jurisdiction in and power to determine all matters and questions, whether of law or fact, civil or criminal. In all cases in which questions arise touching the validity of any law having regard to the provisions of the constitution, the High Court alone exercises original jurisdiction. The Court of Criminal Appeal consists of the Chief Justice or some other Judge of the Supreme Court and 2 ordinary Judges of the High Court. It deals with appeals by persons convicted on indictment where the appellant obtains a certificate from the trial Judge that the case is a fit one for appeal, or, in case such certificate is refused, where the court itself, on appeal from such refusal, grants leave. Where leave to appeal is granted, the appeal is heard and determined by the Court of Criminal Appeal on the report of the official stenographer present at the trial, with power to the court to hear further evidence or to refer any matter back for report by the trial Judge. The decisions of the Court of Criminal Appeal are final, unless that court or the Attorney-General certifies that the decision involves a point of law of exceptional public importance, and that it is desirable that an appeal should be taken to the Supreme Court. The Central Criminal Court consists of a Judge of the High Court, to whom is assigned, for the time being, the duty of acting as such court. It is held at such times and in such places as the President of the High Court may direct, and at it are tried criminal cases which are

outside the jurisdiction of the Circuit Court or which may be sent forward to it for trial from the Circuit Court.

The Republic is divided into 9 circuits for the purposes of the Circuit Court, to each of which, other than the Dublin Circuit, a Judge of the Circuit Court has been assigned. Two judges are assigned to the Dublin Circuit, one being President of the Circuit Court. The President is *ex officio* an additional judge of the High Court and takes precedence over all other circuit judges. The jurisdiction of this court in civil proceedings is limited as to amount, save by consent of the parties, in which event the jurisdiction is unlimited. In criminal matters, it has jurisdiction in all cases except murder, attempt to murder, conspiracy to murder, high treason, treason felony, treasonable conspiracy or piracy.

The District Court consists of 42 Justices of the District Court. Eight of such justices are assigned to the Dublin Metropolitan area; the remainder of the country is divided into 30 districts, to each of which a Justice of the District Court is assigned. Four justices [illegible] The District Court is a court of summary jurisdiction with [illegible] diction—in contract cases up to £25, and in cases of tort, with certain exceptions, up to £10.

All Judges and Justices of the District Court are appointed by the President.

Finance.

Receipts	1949–50 Actual	1950–51 Estimated
	£	£
Customs	25,445,000	25,755,000

All other	27,191,000	28,337,000
Total	81,212,000	87,790,000

Expenditure on items treated as proper to be defrayed from [illegible] 1949–50 was £4,521,000 and the estimate for such items i[illegible] £12,114,000.

On 31 March, 1950, the liabilities were as follows:—Exchequer Bills, nil; Ways and Means Advances, £15,278,000; 5% Second National Loan,

1950–60, £4,834,000; 4½% Third National Loan, 1950–70, £4,910,000; 3½% Fourth National Loan, 1950–70, £5,192,000; 4% Conversion Loan, 1950–70, £6,021,000; 3¾% Finance Loan, 1953–58, £9,178,000; 4% Exchequer Bonds, 1950–60, £[illegible], 3½% National Security Loan, 1956–61, £7,371,000; 3% Exchequer Bonds, 1965–70, £23,829,000; Savings Certificates, £12,756,000; other liabilities, £44,941,000; total, £140,546,000.

The assets on the same date were:—Electricity scheme, £22,811,000; local loans fund, £18,594,000; purchase of creameries, £874,000; national loan sinking funds, £3,426,000; shares in companies established under state auspices (sugar, industrial credit, agricultural credit, industrial alcohol, national stud, air transport, shipping, insurance), £4,392,000; exchequer balance, £503,000; other assets, £42,467,000; total, £83,067,000.

Defence.

The supreme command of the Defence Forces is vested in the President. There is a Council of Defence consisting of the Minister for Defence, his Parliamentary Secretary, the Chief of Staff, the Adjutant-General and the Quartermaster General, with the Permanent Secretary of the Department of Defence as secretary.

The Defence Forces estimates provide for a permanent force of 13,000 officers and men and 36,000 officers and men first- and second-line reserves. The first-line reserve is composed of officers and men who have already been trained during service in the permanent force, who normally perform training annually. The second-line reserve is a territorial force.

Recruitment is on a voluntary basis. Minimum service for the Army is 3 years' permanent and 9 with the Reserve. Suitable men may complete 21 years' permanent service. Enlistment for the Navy is 6 years' permanent service and 6 with the Reserve.

The Air Corps and Naval Service strengths are included in the above figures.

The Naval Service comprises 3 corvettes, named *Macha*, *Cliona*, *Maev*; and 4 tenders. Estimates provide for a permanent force of 560 all ranks.

The defence estimates for the year ended 31 March, 1951, are £4,131,522.

Production.

Agriculture.—General distribution of surface (in acres) in 1949:—Crops and pasture, 11,583,396; woods and plantations, 288,799; other land, including mountain, 5,151,921; total, 17,024,116.

The following table shows the area under the principal crops, with the estimated yield:—

Crops	Extent in statute acres			Total produce in tons		
	1947	1948	1949	1947	1948	1949
Wheat	579,646	518,383	362,805	313,009	409,523	360,991
Oats	826,362	880,083	686,220	652,826	792,075	559,269
Barley	145,983	119,793	157,027	88,320	100,626	159,382

Agricultural output for the year 1949 was valued at £127,752,000.

The number of livestock at 1 June, 1950, was:—Cattle, 4,321,582; sheep, 2,384,639; pigs, 644,914; horses, 390,613; poultry, 21,131,644.

Fisheries.—The number of vessels and men engaged in fishing in the year 1949 were:—4 steam, 619 motor, 730 sail and 1,976 row boats; total, 3,329 vessels; men, 10,063.

The quantities and values of fish landed during 1949 were:—Demersal fish, 151,537 cwt., value £416,275; pelagic fish, 83,137 cwt., value £91,067; shell fish, value, £108,487. Total value, £615,829.

Industrial Production.—The census of industrial production for 1948 gives the following details of the gross value of output for the principal industries (figures in brackets are the gross values minus cost of materials, including fuel, light and power):—Grain milling, £12,579,674 (£2,222,757); bread, flour, confectionery, biscuits, etc., £10,106,056 (£4,220,551); butter, cheese, margarine, condensed milk, £16,715,707 (£1,636,890); bacon curing, £6,380,714 (£891,899); brewing, £9,348,137 (£5,195,811); malting, £657,147 (£300,062); sugar, sugar confectionery, jam-making, £14,105,815 (£3,633,764); tobacco, £19,144,555 (£1,631,033); clothing (wholesale factories), £9,231,909 (£3,690,069); woollen and worsted, £5,714,519 (£1,807,906); wood furniture, upholstery, brushes and brooms, £2,381,763 (£1,206,838); soap and candles, £1,304,510 (£316,639); timber, £3,937,183 (£1,724,035); distilling, £1,031,573[1] (£471,325); bricks, glass, cement and monumental masonry, £3,689,404 (£1,638,081); assembly, construction and repair of vehicles, £10,638,908 (£2,929,411); metals, £4,336,490 (£1,868,970); engineering and implements, £3,452,551 (£1,614,558); linen, cotton, jute and canvas, £3,985,341 (£1,218,086); boot and shoe (wholesale factories), £5,019,810 (£2,075,894); hosiery, £3,034,773 (£1,235,177); paper-making and manufactured stationery, £3,388,964 (£1,339,790); printing, publishing, bookbinding, £5,298,841 (£3,701,345); fellmongery and leather, £2,527,253 (£802,371); oils, paints and polishes, £3,369,412 (£744,897).

[1] Exclusive excise duty.

Commerce.

Value of imports and exports of merchandise (excluding bullion and specie and goods transhipped under bond) for 5 years (in £):—

	1946	1947	1948	1949	1950
Imports .	72,043,372	131,334,517	136,315,884	129,783,300	159,586,028
Exports .	38,612,429	38,568,136	47,851,019	58,946,349	70,457,516
Re-exports .	395,082	942,998	1,475,504	1,580,250	1,939,055

The values of the chief trading classes (exclusive of parcel post) are shown in the following table (in £):—

Class	Imports		Exports	
	1949	1950	1949	1950
Live animals . . .	3,685,293	3,476,771	27,101,797	29,278,831
Food, drink and tobacco .	28,043,783	38,624,457	22,019,897	29,390,957
Other raw materials and manufactured goods . . .	95,773,953	114,782,908	7,791,846	11,131,211

The following table shows the distribution of trade, by principal countries of origin in the case of imports and consignment in the case of exports :—

Country	Imports		Domestic exports

Trade with the United Kingdom (Board of Trade returns) in £ sterling :—

	1938	1948	1949	1950
Imports to U.K.	22,965,064	43,334,472	55,533,885	62,924,548
Exports from U.K.	20,281,525	76,008,522	76,814,967	86,936,184
Re-exports from U.K.	5,703,016	3,192,090	2,889,017	3,489,721

Communications.

Shipping.—Net tonnage of vessels entered and cleared in the foreign trade during the year 1949 :—Entered, 8,085, of 7,718,880 tons; cleared, 8,083, of 7,716,645 tons.

The principal ports are Dublin, Cobh, Dun Laoghaire, Cork, Galway, Waterford, Rosslare, Limerick and Dundalk.

Air Services.—During the year ended 31 March, 1950, 202,030 passengers, 4,544,071 lb. of cargo and 317,405 lb. of mail were carried on the air services operated by Aer Lingus.

Waterways.—There are 566 miles of inland navigation, including the Grand Canal, 208 miles; the Royal Canal, 96 miles, and the Shannon navigation, 139 miles. The traffic carried during 1949 was (in tons) :—Grand Canal, 142,676; Royal Canal, 567; Shannon navigation, 64,679.

Railways.—The total length of road, first track, of railways open for traffic at the end of the year 1949, including the mileage of railways situated partly in Northern Ireland, was 2,782. The length of road, first track, actually situated in the state is 2,440 miles, of which 88% is constructed to standard gauge.

Railway statistics	1947	1948	1949
Number of passengers	24,936,937	23,147,889	21,283,154
Number of miles run by coaching trains	5,964,937	6,985,763	7,259,228
Merchandise and mineral traffic conveyed (tons)	3,928,548	3,630,810	3,613,814
Number of livestock conveyed	1,586,228	1,369,598	1,404,226
Number of miles run by freight trains	4,104,049	4,105,844	4,062,296
Gross receipts * (£)	12,579,862	13,921,265	14,370,159
Expenditure * (£)	12,899,837	14,854,123	15,050,377
Net receipts * (£)	Dr. 319,975	Dr. 932,858	Dr. 680,218
Other receipts * (£)	135,327	79,461	70,872
Total net income * (£)	Dr. 184,648	Dr. 853,397	Dr. 609,346

* Relates to the entire transport undertaking of railway companies, including road services.

The authorized capital [1] in 1949 amounted to £31,407,685. The capital receipts were £29,938,379 and the capital expenditure was £28,124,698.

Tramways.—There were 13 miles of electric tramway worked in 1949. The number of miles run was 893,785; number of passengers carried 9,236,984. The gross receipts from passengers were £102,526.

Roads and Road Transport.—In 1948–49, a total of 49,170 miles of roads were maintained out of local funds, including 9,428 miles of main roads and 38,782 miles of county roads; amount spent on their upkeep, £6,440,674.

Number of licensed motor vehicles in 1949:—Private cars, 71,911; public service vehicles, 8,187; commercial goods vehicles, 23,698; agricultural tractors, 9,714; motor cycles, 5,291.

The total number of miles run by road motor passenger vehicles of the omnibus type in 1949 was 40,509,727. The number of passengers carried was [illegible] and the gross receipts from passengers were £3,962,830.

Post, Telegraph and Telephones (1950).—Number of post offices, 2,030; telegraph offices, 1,234; telephone subscribers 49,426; public telephones, 1,838; telephone exchanges, 895.

The Department of Posts and Telegraphs also administers the Wireless Broadcasting Service. There were in 1950, 296,388 holders of wireless receiving licenses.

Banking and Currency.

The unit of currency is the Irish *pound*, which has the same value as the pound sterling. The circulating medium consists of legal tender notes, consolidated bank-notes, which are liabilities of the issuing banks, and token coinage. The Central Bank has the sole right of issuing legal tender notes and token coinage is issued by the Minister for Finance through the bank. The Central Bank, which was established as from 1 February, 1943, in accordance with the Central Bank Act, 1942, replaced the Currency Commission which was set up under the Currency Act, 1927, and had been responsible *inter alia* for the regulation of the note issue. In

[1] Excluding capital figures relating to Fishguard and Rosslare Railways & Harbours Co.

addition to the powers and functions of the Currency Commission the Central Bank has the power of receiving non-interest-bearing deposits from banks and public authorities, of rediscounting Exchequer bills and bills of exchange, of making advances to banks against such bills or against Government securities, of fixing and publishing rates of interest for rediscounting bills, of buying and selling certain Government securities and of collecting and publishing information relating to monetary and credit problems. The capital of the bank is £40,000, of which £24,000 has been paid up and is held by the Minister for Finance. On the dissolution of the Currency Commission its paid-up capital was returned to the shareholding banks.

The Board of Directors of the Central Bank consists of a Governor, appointed by the President of the Republic on the advice of the Government, and 8 directors, all appointed by the Minister for Finance, 5 directly and 3 from a panel prepared by the Associated Banks (the term applied to the 8 shareholding banks associated with the former Currency Commission).

The report of the Central Bank for 1949–50 shows that the volume of the [illegible] note issue fluctuated during the year between a minimum of £45,817,000 on 27 Aug., 1949, and a maximum of £52,605,000 on 17 Dec., 1949.

The aggregate withdrawals for repatriation through the Central Bank and the Associated Banks of Bank of England notes in 1949–50 amounted to £20,491,000. Out of the total assets of the legal-tender note fund, amounting to £50,907,000 on 31 March, 1950, the holdings of securities of maturity exceeding 12 months amounted to £14,984,000.

Consolidated bank-notes are a first charge on all the assets of the responsible banks, and are also secured by a reserve held by the Central Bank. They are convertible into legal tender notes which in turn are convertible into equivalent British legal tender at the Bank of England. Limits are set by the Central Bank Act to the amounts of consolidated bank-notes which may be outstanding at certain future dates and provision is made for their total extinction by 1957.

Total notes in circulation in June, 1950, amounted to £51,900,000, as against £48,677,000 in June, 1949.

Banking returns (representing an average of figures for a selected date in each of the 3 months, April–June, 1950):—Liabilities: capital, £8,262,000; reserves, £11,295,000; notes in circulation, £9,641,000; current, deposit and other accounts, £352,040,000; acceptances, £4,129,000; other liabilities, £9,966,000; total, £395,333,000. Assets, cash, £44,195,000; money at call, £24,730,000; bills, £4,475,000; loans and advances, £131,364,000; investments, £176,644,000; premises, £2,732,000; other assets, £11,194,000; total, £395,334,000.

The Bank of Ireland, founded in 1783, had on 31 Dec., 1949, a capital of £2,769,231; rest, £3,690,000; deposits [illegible] ounts), £68,057,761. Other banks are Hibernian [illegible] Bank, Provincial Bank of Ireland, the Royal Bank, the Ulster Bank, the Northern Bank, the National City Bank (affiliated to the Bank of Ireland) and the National Bank. The latter is a London clearing bank.

The post office savings bank has about [illegible] depositors and the amount due to them at 31 Dec., 1949, was £13,920,000. The Trustee Savings Bank has approximately 46,000 depositors and the amount due to them at 31 Dec., 1949, was £6,543,000.

STATISTICAL INFORMATION.—The Central Statistics Office (The Castle, Dublin) was established in June, 1949, and is attached to the Department of the Taoiseach; *Director*:—R. C. Geary, D Sc.; Deputy Director, M. D. McCarthy, M.A., Ph.D.

The Central Statistics Office took over the work carried out since 1922 by the Statistics Branch, Department of Industry and Commerce, which in turn had continued the statistical work carried out by the Department of Agriculture and Technical Instruction (since 1900) and by the Irish Department of the Ministry of Labour, London (since 1919). Vital statistics from 1864, annual agricultural statistics prior to 1900 and decennial census of population were compiled by the [illegible] Ireland. The population censuses were carried out in 1926, 1936 and [illegible] Branch of the Department of Industry and Commerce and are now the responsibility of the Central Statistics Office which has also, as from July, 1950, taken over from the Registrar-General the compilation of Vital Statistics. The Statistics Act 1926 confers wide powers for the collection, compilation and publication of statistics. Other Acts under which statistics are collected are Workmen's Compensation Act, Merchant Shipping Act, Customs Consolidation Act and Road Transport Act.

Principal publications of the Central Statistics Office are Census of Population Reports, Census of Industrial Production Reports, Statistical Abstract (annually), White Paper on National Income and Expenditure, Trade and Shipping Statistics (annually and monthly), Irish Trade Journal and Statistical Bulletin (quarterly), and Irish Statistical Survey.

ISRAEL.

(MEDINAT ISRAEL—STATE OF ISRAEL.)

ISRAEL is an independent sovereign state, established by proclamation on 14 May, 1948. On the eve of the expiration of the British mandate, the National Council, representing the Jewish population of Palestine and the World Zionist Movement, met in Tel Aviv. With reference to the resolution passed by the United Nations on 29 Nov., 1947, the National Council proclaimed 'the establishment of the Jewish state in Palestine to be called Israel' and assumed the functions of a provisional state council, with its executive as the provisional government. For the history of the British Mandate, *see* THE STATESMAN'S YEAR-BOOK, 1920–49, under PALESTINE.

National Flag: White with 2 horizontal blue stripes, the blue Shield of David in the centre.

National Anthem: Hatikvah (The Hope). Words by N. H. Imber (1878); tune by H. Busato.

Government and Constitution.

The provisional government, proclaimed on 14 May, 1948, was in office until 3 March, 1949.

Under its auspices, general elections, on the basis of general suffrage and proportional representation, were held on 25 Jan., 1949. The Constituent Assembly, later called the First Knesset, is composed as follows:—Mapai (Israel Labour Party), 46; Mapam (United Labour Party of Israel), 20; United Religious Front, 16; Heruth (Freedom Movement), 14; General Zionists, 7; Progressives, 5; Sephardim (Oriental Jewish Community), 4; Communists, 4; Democrats, 2; Israel Women's Zionist Organization, 1; Yemenites, 1; Fighters (Stern Group), 1; total, 120.

On 16 Feb., 1949, the Knesset passed its first law, known as the Transition Law, 5709/1949, laying the foundations for the permanent organs of

the State. According to that law, the President of the State is to be elected by the Knesset by secret ballot and his term of office will be the period of the duration of the first Knesset and thereafter until the expiration of 3 months after the new Knesset has assembled.

President of the State.—Dr. Chaim Weizmann (elected by the Constituent Assembly, 17 Feb., 1949).

The coalition government, formed on 1 Nov., 1950, was in March, 1951, composed as follows :—

Prime Minister and Minister of Defence.—D. Ben-Gurion (Mapai).
Minister of Trade and Industry.—Yaakov Geri (non-party).
Minister of Transport and Communications.—Dr. Dov Joseph (Mapai).
Minister of Finance.—Eliezer Kaplan (Mapai).
Minister of Social Welfare.—Rabbi Y. M. Levin (Religious Front).
Minister of Agriculture.—Pinhas Lavon (Mapai).
Minister of Religious Affairs and for War Sufferers.—Rabbi J. L. Maimon (Religious Front).
Minister of Labour.—Mrs. Golda Myerson (Mapai).
Minister of Education and Culture.—David Remez (Mapai).
Minister of Justice.—Pinhas Rosen [illegible].
Minister of the Interior, of Immigration and of Health.—Moshe Shapira (Religious Front).
Minister for Foreign Affairs.—M. Sharett (Mapai).
Minister of Police.—B. S. Shitreet (Sephardim).

Local Government.

Local authorities are of three kinds, namely, municipal corporations, local councils and regional councils. Their status, powers and duties are prescribed by statute. Regional Councils are local authorities set up in agricultural areas and include all the agricultural settlements in the area under their jurisdiction. All local authorities exercise their authority mainly by means of bye-laws approved by the Minister of the Interior. Their revenue is derived from rates imposed with the approval of that Minister.

Area and Population.

The area of Israel, within the boundaries defined by the armistice agreements with Egypt, Jordan, the Lebanon and Syria, is 20,850 square km. (8,084 sq. miles), with a total population (1 Feb., 1951) of 1,390,000, of whom about 1,220,000 are Jews, 120,000 Moslems, 35,000 Christians and 15,000 Druzes.

The boundaries run as follows :—On the west, along the Mediterranean coast from Ras-en-Nakura on the Lebanese border, to a point a few miles north of Gaza; then slightly inland in a south-westerly direction to the Egyptian frontier. Thence the boundary follows the old international boundary between Palestine and Egypt down to the Gulf of Akaba. Eight miles of the coast of that gulf is Israel territory called Coast of Eilath. On the east, the line follows the old boundary between Palestine and Jordan up the Wadi Araba, through the Dead Sea, to a point east of Ein Geddi; thence it cuts through the hills south of Hebron, turning north-east to include in Israel the New City of Jerusalem. From Jerusalem, the line turns north-west, following the slopes of the Samarian Hills, east of the Lydda–Haifa railway line. Some 10 miles north-west of Jenin, the line bends south-east to reach the river Jordan south of Beisan. The northern

section of the eastern border follows the river Jordan, as did the old frontier between Palestine, Jordan and Syria. On the north, the frontier follows the old international frontier with the Lebanon.

On 23 Jan., 1950, the Knesset proclaimed Jerusalem the capital of the state.

The 3 main towns account for about 50% of the total population, as follows :—Jerusalem (Israeli part only), 127,000; Haifa, 160,000; Tel-Aviv/Jaffa, 350,000.

The official language is Hebrew, with Arabic as a secondary language for government transactions with Arab citizens.

Immigration.

On 5 July, 1950, the Knesset passed the Law of the Return, which proclaims that ' every Jew has the right to immigrate to Israel.'

The following table shows the numbers of Jewish immigrants entering Palestine (Israel), including persons entering as travellers who subsequently registered as immigrants.

1919	1,806	1927	3,595	1935	64,147	1943	9,867
1920	8,223	1928	3,086	1936	31,671	1944	16,476
1921	9,339	1929	6,566	1937	12,475	1945	13,984
1922	8,128	1930	6,433	1938	15,253	1946	17,761
1923	7,991	1931	5,533	1939	18,433	1947	21,542
1924	13,553	1932	11,289	1940	5,611	1948	120,332
1925	34,641	1933	31,977	1941	4,270	1949	239,038
1926	13,910	1934	44,143	1942	3,052	1950	170,000

The Jewish Agency for Palestine which, in accordance with Article IV of the Palestine Mandate, was recognized as ' a public body for the purposes of advising and co-operating with the administration of Palestine in such economic, social and other matters as may affect the establishment of the Jewish National Home and the Jewish population in Palestine,' played a leading role in laying the political, economic and social foundations on which the State of Israel was established. It continues to be instrumental in organizing immigration and ensuring the absorption of immigrants in Israel.

The Agency, whose headquarters are divided between Jerusalem and New York, maintains special departments for immigration, absorption of immigrants, agricultural settlements, industrial development, marine expansion, etc. in Israel, as well as education and training departments for would-be immigrants in other countries.

Religion.

Religious affairs are under the supervision of a special Ministry, with departments for the Christian and Moslem communities. The religious affairs of each community remain under the full control of the respective ecclesiastical authorities concerned : in the case of the Jews, the Sephardic and Ashkenasic Chief Rabbis, in the case of the Christians, the heads of the various communities, and in the case of the Moslems, the Kadi.

The Jewish Sabbath and Holy Days are observed as days of rest in the public services. Full provision is, however, made for the free exercise of other faiths, and for the observance by their adherents of their respective days of rest and Holy Days.

The General Assembly of the United Nations proposed, in its resolution of 29 Nov., 1947, the establishment of an international regime for the Jerusalem area. The Israel Government made the counter-proposal of an

international regime concerning itself exclusively with the supervision and protection of, and access to, the holy places and sites. Most of these are situated in Jordan-held territory. The matter was discussed at the General Assembly in Dec., 1950, but no conclusion was reached.

Education.

The school system in Israel is under the direction of the Ministry of Education, and comprises kindergarten, primary, secondary and technical schools. The Hebrew University, founded in 1925, is an independent centre of higher education and research.

A law passed by the Knesset on 12 Sept., 1949, provides for free and compulsory primary education—to the extent of one year kindergarten (age group 5–6) and 8 years elementary school (age group 6–14). Children in the age groups 14–17, who have not completed their primary schooling, are required to attend evening schools. Most secondary schools are municipal or, in agricultural settlements, are maintained by the Settlement Movement; in some cases, grants-in-aid are given by the government.

Statistics relating to government schools, 1950–51 :—

Type of school	Schools	Teachers	Pupils
Kindergartens	1,325	1,748	51,485
Elementary	703	6,175	130,721
Secondary	113	1,234	12,923
Teachers' training college	16	—	—
Vocational schools	37	390	4,027
Agricultural schools	31	344	4,425
Arab schools	97	536	24,240
Theological schools	135	—	7,337

There are also a number of private schools maintained by religious foundations—Jewish, Christian and Moslem—and also by private societies.

There were, in 1950, 37 Jewish religious schools with some 4,300 pupils, 2 secondary schools, 1 teachers' college and 8 trade schools.

The Hebrew University in Jerusalem comprises faculties of the humanities and science, a faculty of law, a pre-faculty an[illegible] school of medicine, and a school of agriculture. In [illegible] professors, lecturers and instructors, and 1,862 students.

The Haifa Technical Institute comprises departments of civil engineering, architecture, industrial engineering and chemical engineering. In 1951 it had 960 students. Affiliated are a nautical school (130 students) and a technical high school (483 pupils). The Weizmann Institute of Science in Rehoveth is engaged mainly in research in synthetic chemistry and biochemistry. There is also a high school of law and economics in Tel-Aviv.

Justice.

Law.—Under the Law and Administrative Ordinance, 5708/1948, the first law passed by the Provisional Council of State, the law of Israel is the law which was [illegible] Palestine on 14 May, 1948, in so far as it is not in conflict with [illegible] or any other law passed by the Israel legislature and with such modifications as result from the establishment of the State and its authorities. Restrictions regarding illegal immigration and land transfers, were immediately repealed.

The law of Palestine was derived from three main sources, namely, Ottoman law, English law (Common Law and Equity), and the law enacted

by the Palestine legislature, which to a great extent was modelled on English law. The Ottoman law in its turn was derived from three main sources, namely, Moslem law which had survived in the Ottoman Empire, French law adapted by the Ottomans, and the personal law of the non-Moslem communities.

Since 1948, except in constitutional matters, the law has not been substantially changed, although legislation has provided for the imposition of certain new taxes, such as a luxuries tax, absorption tax, land increment tax, and inheritance tax, and the introduction of compulsory and free education and compulsory security service.

COURTS.—The courts are either civil or religious courts.

The following are the civil courts :—

Municipal courts, established in certain municipal areas, have criminal jurisdiction over offences against municipal regulations and bye-laws and certain specified offences committed within a municipal area.

Magistrates' courts, established in each district and sub-district, have jurisdiction in both civil and criminal matters.

District courts, sitting at Jerusalem, Tel-Aviv and Haifa, have jurisdiction, as courts of first instance, in all civil matters not within the jurisdiction of magistrates' courts, and in all criminal matters, and as appellate courts from magistrates' courts and municipal courts.

The Supreme Court has jurisdiction as a court of first instance (sitting as a High Court of Justice dealing mainly with administrative matters) and as an appellate court from the district courts (sitting as a Court of Civil Appeal or as a Court of Criminal Appeal).

In addition, there are various tribunals for special classes of cases, such as the Rents Tribunals and the Tribunals for the Prevention of Profiteering and Speculation. Settlement Officers deal with disputes with regard to the ownership or possession of land in settlement areas constituted under the Land (Settlement of Title) Ordinance.

The religious courts are :—

The Rabbinical courts of the Jewish community, have exclusive jurisdiction in matters of marriage and divorce, alimony and confirmation of wills of members of their community other than foreigners, concurrent jurisdiction with the civil courts in such matters of members of their community who are foreigners if they consent to the jurisdiction, and concurrent jurisdiction with the civil courts in all other matters of personal status of all members of their community, whether foreigners or not, with the consent of all parties to the action, save that such courts may not grant a decree of dissolution of marriage to a foreign subject.

The courts of the several recognized Christian communities, have a similar jurisdiction over members of their respective communities.

The Moslem religious courts have exclusive jurisdiction in all matters of personal status of Moslems who are not foreigners, and over Moslems who are foreigners, if under the law of their nationality they are subject in such matters to the jurisdiction of Moslem religious courts.

Where any action of personal status involves persons of different religious communities, the President of the Supreme Court will decide which court shall have jurisdiction, and whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a religious court, the matter must be referred to a special tribunal composed of 2 judges of the Supreme Court and the president of the highest court of the religious community concerned in Israel.

Finance.

The budget year runs from 1 April to 31 March. The main items are as follows (in I£ = £ sterling) :—

Revenue	Actual 1949–50	Estimates 1950–51	Expenditure	Actual 1949–50	Estimates 1950–51
Income tax	10,350,000	13,500,000	President's office	30,000	29,000
Customs	8,400,000	9,250,000	First Knesset	300,000	360,000
Fuel	3,000,000	3,600,000	Prime Minister's office	780,000	1,056,000
Excise:			Finance	1,138,000	1,560,000
Tobacco	4,000,000	4,750,000	Defence	7,500,000	10,000,000
Alcoholic drinks	1,475,000	2,600,000	Health	3,150,000	4,000,000
Urban property tax	1,000,000	1,300,000	Religions	435,000	500,000
Rural property tax	150,000	200,000	Foreign affairs	1,213,000	1,460,000
Duties stamps	1,000,000	1,300,000	Agriculture	1,200,000	1,500,000
Licences	1,000,000	1,250,000	War sufferers	255,000	150,000
Luxury tax	1,000,000	3,500,000	Trade and industry	220,000	240,000
Land betterment tax	800,000	400,000	Supply and rationing	1,225,000	1,450,000
Inheritance tax	500,000	100,000	Police	2,550,000	3,350,000
Receipt for services:			Justice	575,000	725,000
Land registration	900,000	1,000,000	Social welfare	1,235,000	1,900,000
Other services	600,000	750,000	Labour	2,131,000	2,800,000
Collections:			Immigration	275,000	350,000
Government property	250,000	1,700,000	Interior	354,000	400,000
Government loans			Education and culture	2,386,000	4,100,000
Receipts of the food section	1,200,000	2,000,000	Local authorities	1,515,000	1,400,000
Posts and telegraphs	2,410,000	3,023,000	Subsidy on food	1,500,000	2,000,000
Railways	767,000	1,503,000	Rehabilitation of soldiers	3,500,000	3,600,000
Harbours	1,988,000	2,613,000	Debts and interest	1,500,000	3,300,000
Ordinary budget total (all items)	41,365,000	56,840,000	General reserve	378,000	1,132,000
			Posts and telegraphs	2,182,000	2,721,000
Loan from Export-Import Bank	—	23,000,000	Railways	949,000	1,565,000
Other sources	—	32,000,000	Harbours	1,700,000	2,250,000
Extraordinary budget total	—	55,000,000	Total (all items)	42,405,000	56,840,000

Defence.

The Defence Army of Israel was formally established in June, 1948. Its nucleus was the Hagana, the Jewish underground force which had operated throughout the period of the British Mandate. During the Second World War, co-operated with the British Army. The Defence Army was in 1948 transformed into a regular army. The defence forces deriving from Hagana have been divided into this regular cadre, and a general reserve. Israel now imposes compulsory military service of 2 years for men, aged 18–29, and for single women and married women without children, aged 18–26, including a 9-month agricultural training. Men who have completed their term of army service, and those above military age, are placed on the reserve, and serve for a period of 31 days annually, plus one day a month. Married women are not conscripted; and special provision is made for women whose religious outlook debars them from military service (*e.g.*, Moslems). The Army includes some Arab units, chiefly Druse and Bedouin. The residents of frontier villages form a voluntary territorial force.

The highest army rank is that of Major-General (*Rav Alouf*), and the

Chief-of-Staff, who is the Commander-in-Chief, holds that rank. A divisional commander is a Brigadier (*Alouf*), and a brigade commander a Colonel (*Alouf Mishne*).

The Navy includes a number of former British and U.S. ships of the frigate, corvette and coastguard cutter categories.

Production and Industry.

Agriculture.—The main [illegible] divisions of Israel are:—(1) The plains (coastal plain; vale [illegible] nek); Huleh and Jordan valleys); (2) The hills of Galilee and Samaria, and the Gilboa and Carmel ranges; (3) The Negev. The plains are the most intensively cultivated portion and contain the bulk of the citrus-groves and vineyards. The vale of Jezreel (Emek) is largely under mix[illegible]. Mixed farming, cereals and fruit-growing form the basis of [illegible] in Galilee. The Negev—constituting more than half the area of Israel—is at present largely desert, but contains a growing number of settlements, where, with irrigation or [illegible] arrangements, crops are being grown or tried out.

The area under cultivation in 1950 was 625,000 acres, of which field crops occupied 462,000 acres, olives 44,250 acres, vineyards 12,500 acres, citrus 31,250 acres, vegetables 35,000 acres, forest land 118,700 acres, irrigated fodder crops 18,250 acres and fishponds 4,750 acres.

Characteristic types of rural settlement are, among others, the following:—(1) The *Kibbutz* and *Kvutza* (communal collective settlements) where all property and [illegible] collectively owned and work is collectively organized. (2) [illegible] co-operative smallholders' settlement) which are founded on the principles of mutual aid and equality of opportunity between the members, all farms being equal in size; hired labour is prohibited. (3) The *Moshav Shitufi* (non-communal settlement) which are complete collectives, closely resembling the kibbutz, except that they maintain no communal institutions other than a village school and a social and cultural centre for the village; the moshav shitufi tends to develop industrial undertakings alongside its agricultural enterprises. (4) The *Moshava* (village) in which land and property are privately owned and every resident is responsible for his own well-being. At the end of 1950, of the rural settlements in Israel, 216 were kibbutzim, 172 were moshavim, 26 moshavim shitufiim, 89 moshavoth, 102 Arab villages, and 55 various types of new immigrant settlements.

Industry.—Industry is rapidly developing and is playing an important role in absorbing the mass immigration.

Although lacking coal and iron, Israel has other resources which offer possibilities of successful industrial and commercial development, notably the potash and bromine of the Dead Sea (whose southern shores lie within Israel's borders); the oil refineries at Haifa for which crude oil was in former years supplied through the pipeline from Iraq and by tanker from Kuweit; and a highly modernized and steadily expanding electric supply system with plans for extension through water-generation.

A law for the encouragement of capital investment was passed in March, 1950, which grants substantial privileges to foreign investors. An Investment Centre was established in May, 1950, and had by the end of 1950, approved about 270 and recommended about 80 fresh undertakings involving a total investment of about I£40 million.

Labour.—The General Federation of Jewish Labour (Histadruth), founded in 1920, has 250,000 members; including workers' families, this

membership represents nearly 50% of the total population. Several trades unions of lesser importance also exist.

Arab labour in Israel is organized in the Palestine Labour League (which is affiliated to the Histadruth), and in the Congress of Arab workers. A union of Arab peasants was formed in 1949 under the name of 'The Union of Working Fellaheen in the State of Israel.'

The total number of registrations at Employment Exchanges in 1950 was 28,102, of whom 17,234 were men, and 10,868 women.

Commerce.

The main exportable commodities are the citrus crop, fruit concentrates and other citrus by-products, wine and other [illegible] oducts; potash and bromine from the Dead Sea, and small [illegible] goods of high quality such as cut diamonds, chemicals and porcelain teeth.

Imports in 1949 amounted to I£87,712,333; exports to I£10,599,543.

Exports from Palestine to the United Kingdom (Board of Trade returns), 1938, £1,534,244 (including Transjordan); 1947, £17,363,452; 1948, £7,359,322; 1949, £6,291,957; 1950, £9,490,849; imports from the United Kingdom, 1938, £3,131,852 (including Transjordan); 1947, £13,054,288; 1948, £12,854,771; 1949, £5,629,210; 1950, £5,181,399. Re-exports, 1947, £221,340; 1948, £2,797,193, 1949, £299,839; 1950, £571,330.

Communications.

Shipping.—Israel has 2 main ports, Haifa and Tel-Aviv/Jaffa. Haifa port handled about 1·3 million tons of cargo during 1950. In June, 1950, the number of vessels of the Israel Merchant Marine was 30 with a total tonnage of about 82,000.

Aviation.—Air communications are centred in the airport of Lydda, near Tel-Aviv. Lydda airport was handling, in 1950, 236 planes a month, which include all the main international airlines. During 1950, 100,000 passengers passed through the airport. The Israeli air line ELAL maintains regular flights to London, Paris, Rome, Athens, Vienna and Johannesburg.

Rail and Road.—Internal communications are provided by 418 km. of standard and narrow gauge railways, and by a network of excellent roads (2,126 km. in 1951). Work is in progress on the new direct railway line from Tel-Aviv to Hedera which will considerably reduce the distance on the important Tel-Aviv–Haifa line.

Post.—The Ministry of Communications controls the postal, telegraph and telephone service. The broadcasting system, called Shidurei Israel, operates from Jerusalem; the station is called Kol Israel (Voice of Israel).

Currency and Banking.

The unit of currency is the Israel £ (I£), divided into 1,000 *prutot*. I£1 = £1 sterling or $2·80. Copper coins of 10 prutot, nickel coins of 1 prutah, 25, 50, 100 and 250 prutot, and notes for 500 prutot, I£5 and higher denominations, have been introduced to replace the coins and notes of the Palestine Currency Board. Currency in circulation :—

	Government land bonds	Treasury bills and other govt. obligations	Currency notes of the Palestine Currency Board	Foreign exchange balances	Total bank-notes in circulation
6.10.48 . .	—	—	26,539,000	1,736,000	28,275,000
1.12.48 . .	—	2,000,000	23,478,000	3,777,000	29,255,000
1.6.49 . .	—	12,200,000	775,150	27,223,850	40,199,000
7.9.49 . .	4,248,000	15,850,000	346,771	24,445,829	44,890,600
6.12.50 .	38,040,000	22,380,000	—	12,409,238	72,839,238
7.3.51 . .	52,080,000	20,070,000	—	7,733,239	79,883,239

The principal banks in Israel are The Bank Leumi Le Israel (Israel National Bank; formerly the Anglo-Palestine Bank), Barclays Bank (D., C. & O.), the Palestine Discount Bank Ltd., and the Workers' Bank Ltd. Deposits in the 18 local and 5 foreign banks increased from £68,000,000 in Nov., 1948, to £88,000,000 in Nov., 1949.

Weights, Measures, Calendar.

The metric system is in general use. The (metrical) *dunam* = 1,000 square metres (about 0·25 acre).

The Jewish year 5712 corresponds to 1 Oct., 1951–19 Sept., 1952.

Diplomatic Representatives.

1. Of Israel in Great Britain (18 Manchester Square, W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Eliahu Elath (accredited 13 July, 1950).

Counsellor.—Mordecai R. Kidron.

First Secretaries.—Dr. Eliezer Yapou (*Press*); Perez Leshem (*Consular*).

Military, Air and Naval Attaché.—Lt.-Col. K. P. Salmon.

Economic Counsellor.—Jacob A. Brin.

Attaché (Consular Section).—Itzhak Vardi.

2. Of Great Britain in Israel.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Knox Helm, K.C.M.G., C.B.E.

First Secretaries.—J. E. Chadwick; A. B. Horn; J. R. Wraight (*Commercial*); David Woodward, O.B.E. (*Information*); I. H. Thomas, M.B.E. (*Labour*).

Military Attaché.—Lieut.-Col. Peter Pender-Cudlip.

Air Attaché.—Wing Cdr. J. A. O'Neill, D.F.C.

There are consular representatives at Haifa and Tel-Aviv.

ITALY.

(REPUBBLICA ITALIANA.)

Constitution and Government.

ON 10 June, 1946, Italy became a republic on the announcement by the Court of Cassation, [illegible] Hall of the She Wolf at Montecitorio (seat of the Italian [illegible], that a majority of the voters at the referendum held on 2 June had voted for a republic. King Umberto II, who had agreed to abide by the results of the referendum, protested strongly against such an announcement being formally made when returns were admittedly incomplete, but he left the country for Portugal on 13 June in accordance with his pledge. The final figures, announced by the Court of Cassation on 18 June, showed:—For a republic, 12,718,641 (54·3% of the valid votes cast, which numbered 23,437,143); for the retention of the monarchy, 10,718,502 (45·7%); invalid and contested, 1,509,735. Total 24,946,878, or 89·1% of the registered electors, who numbered 28,005,449. Voting was compulsory, open to both men and women 21 years of age or older, and included specifically the members of the Civil Service and the armed forces; active Fascists and a few other categories were excluded from registration.

On 18 June, the then Provisional Government without specifically proclaiming the republic, issued an 'Order of the Day' decreeing that all court verdicts should in future be handed down 'in the name of the Italian people,' that the *Official Gazette* should be re-named the *Official Gazette of*

the Republic, that all references to the monarchy should be deleted from legal and governmental statements and that the shield of the House of Savoy should be removed from the Italian flag, retaining its green, white and red tricolour.

Thus ended the reign of the House of Savoy whose kings had ruled over Piedmont for nine centuries and as Kings of Italy since 18 February, 1861. (For fuller account of the House of Savoy, *see* THE STATESMAN'S YEAR-BOOK, 1946, p. 1021). The Crown Prince Umberto, son of King Vittorio Emanuele III, became Lieut.-Gen. (*i.e.*, Regent) of the kingdom on 5 June, 1944. Following the abdication and retirement to Egypt of his father on 9 May, 1946, Umberto was declared King Umberto II; this reign lasted to 13 June when he left the country. King Victor Emmanuel III died in Alexandria on 28 December, 1947.

The referendum of 2 June showed that the republic was strongest in the north, and the monarchy in the south. Results of the referendum in the leading cities (communes) was as follows:—

	Republic	Monarchy		Republic	Monarchy
Rome . .	353,715	412,439	Venice . .	101,084	61,245
Naples . .	87,448	348,429	Verona . .	64,751	34,590
Milan . .	487,125	231,711	Bari . . .	28,326	84,110
Turin . .	252,001	158,368	Palermo (Sicily) .	30,092	160,186
Genoa . .	294,254	105,291	Catania (Sicily) .	22,609	99,261
Florence . .	148,763	85,753	Cagliari (Sardinia)	15,209	39,478
Bologna . .	137,093	65,359			

General elections for the Senate and Chamber of Deputies took place on 18–19 April, 1948.

Senate.—Christian Democrats, 133 (plus 18 appointed by the Head of State); Communists, 37 (plus 31); United Socialists, 10 (plus 13); Left-wing Democrats, 6 (plus 4); Liberals, 5 (plus 5); Italian Socialist Party, 30 (plus 11); Republican Party, 6 (plus 6); other groups, 10 (plus 19). Total: 237 elected, 107 appointed senators.

Chamber.—Christian Democrats, 306; Popular Democratic Front, 183; United Socialists, 33; National Bloc, 18; Republican Party, 9; Monarchist Party, 14; Italian Socialist Movement, 6; Peasant Party, 1; Sardinian Action Party, 1; South Tirol Popular Party, 3. Total: 574 deputies. In the Constituent Assembly, which was elected on 2 June, 1946, the major parties had the following numbers of seats: Christian Democrats, 207; Socialists, 115; Communists, 104; National Democratic Union, 41.

The new constitution was passed by the constituent assembly by 453 votes to 62 on 22 December, 1947; it came into force on 1 January, 1948. The constitution consists of 139 articles and 18 transitional clauses. Its main dispositions are as follows:—

Italy is described as 'a democratic republic founded on work.' Parliament consists of the Chamber of Deputies and the Senate. The Chamber is elected for 5 years by universal and direct suffrage; one deputy, who must be 25 years or over, for 80,000 inhabitants. The Senate is elected for 6 years on a regional basis; each Region having at least 6 senators, one for 200,000 inhabitants; the Valle d'Aosta is represented by one senator only. The President of the Republic can nominate 5 senators for life from eminent men in the social, scientific, artistic and literary spheres. On the expiry of his term of office, the President of the Republic becomes a senator by right and for life, unless he declines.

The President of the Republic is elected in a joint session of Chamber and Senate, to which are added 3 delegates from each Regional Council (1 from the Valle d'Aosta). A two-thirds majority is required for the election, but, after a third indecisive scrutiny, the absolute majority of votes is sufficient. The President must be 50 years or over; his term lasts for 7 years. The President of the Senate acts as his deputy. The President can dissolve the chambers of parliament, except during the last six months of his term of office.

The Cabinet can be forced to resign only on a motivated motion of censure; the defeat of a government bill does not involve the resignation of the government.

For administrative purposes the republic is divided into 19 Regions, each Region being subdivided into Provinces and Communes. The organs of the Regions are the Regional Council, the Junta (executive) and the President of the Junta. A government Commissioner supervises the state administration and co-ordinates it with the regional administration. Article 117 defines the legislative functions of the regional bodies. Sicily, Sardinia, Trentino–Alto Adige, Friuli–Venezia Giulia and Valle d'Aosta have been granted special statutes of autonomy.

A Constitutional Court, consisting of 15 judges who are appointed, five each, by the President of the Republic, Parliament (in joint session) and the highest law and administrative courts, has rights similar to those of the Supreme Court of the United States. It can decide on the constitutionality of laws and decrees, define the powers of the State and Regions, judge conflicts between the State and Regions and between the Regions, and try the President of the Republic and the Ministers.

The re-organization of the Fascist Party is forbidden. Members and descendants of the house of Savoy are excluded from all public offices, have no right to vote or to be elected, and are banned from Italian territory; their estates are forfeit to the State. Titles of nobility are no longer recognized, but those existing before 28 October, 1922, are incorporated as part of the name.

Head of State.—On 10 May, 1948, Chamber and Senate in joint session elected by an absolute majority (451 votes out of 871 votes cast) Luigi Einaudi to the Presidency of the Republic. Professor Einaudi, born 24 March, 1874, entered the Senate as a Liberal in 1919 and was for many years Professor of Political Economy at the University of Turin. He fled the country in 1942, but returned after the fall of Fascism and was appointed Governor of the Bank of Italy in Jan., 1945. On 1 June, 1947, he took office as Vice-Premier and Minister of the Budget. He was sworn in as President on 12 May, 1948.

The Cabinet, reconstituted on 5 April, 1951, consists of 11 Christian Democrats and 2 Republicans.

Prime Minister and Minister ad interim for Italian Africa.—Alcide de Gasperi (Christian Democrat).
Minister for Foreign Affairs.—Count Carlo Sforza (Independent Republican).
Minister of the Interior.—Mario Scelba (Christian Democrat).
Minister of the Treasury.—Giuseppe Pella (Christian Democrat).
Minister of Finance.—Ezio Vanoni (Christian Democrat).
Minister of Defence.—Randolfo Pacciardi (Republican).
Minister of Education.—Guido Gonella (Christian Democrat).
Minister of Agriculture.—Antonio Segni (Christian Democrat).

Minister of Justice.—Attilio Piccioni (Christian Democrat).
Minister of Public Works.—Salvatore Aldisio (Christian Democrat).
Minister of Mercantile Marine.—Raffaele Pio Petrilli (Christian Democrat).
Minister of Posts and Telegraphs.—Giuseppe Spataro (Christian Democrat).
Minister of Industry and Commerce.—Giuseppe Togni (Christian Democrat).
Minister of Labour.—Achille Marazza (Christian Democrat).
Minister of Foreign Trade.—Ugo La Malfa (Republican).
Minister of Transport.—Pietro Campilli (Christian Democrat).

Local elections between March, 1946, and Dec., 1948, resulted in the election of 44,564 of the Left-wing group, 44,057 Christian Democrats, 8,937 of the Centre group, [illegible] Socialists, 3,971 Communists, 2,458 of the Right-wing group, 2,319 Liberals, 1,301 Uomo qualunque, 1,121 Republicans and 21,352 others.

In the local elections in Rome, held on 12 October, 1947, Communists, Socialists and Action Party obtained 33·5% of the votes, Christian Democrats, 32·8%, Uomo Qualunque 10·2%, Republicans 5·8%, [illegible] 5·6%, Right-wing Socialists 3·9%, Social Movement 3·9% [illegible].

The peace treaty was signed in Paris on 10 February, 1947, and ratified on 15 September, 1947. Italy ceded to France 4 frontier districts on the Little St. Bernard Pass, the Mont-Cenis Plateau, the Mont-Thabor and Chaberton areas, and the upper valleys of the Tinée, Vésubie and Roya; to Yugoslavia, nearly the whole of the province of Venezia Giulia, the commune of Zara and the island of Pelagosa; to Greece, the Dodecanese; to Albania, the island of Saseno; to China, the Italian concession at Tientsin. Italy also gave up the Free Territory of Trieste (*see* p. 1431) and her former colonies. Italy is to pay reparations during a period of 7 years to the following states:—

Albania	$5,000,000
Ethiopia	$25,000,000
Greece	$105,000,000
U.S.S.R.	$100,000,000
Yugoslavia	$125,000,000

Area and Population.

Following figures show the development of the population of Italy:—

Census	Pop. present in actual boundaries	Increase % per annum	Estimate (end of the year)	Population present
31 December, 1871	27,436,806	—	1942	45,209,000
31 December, 1881	29,115,614	0·59	1944	45,517,000
10 February, 1901	33,172,067	0·68	1946	46,126,000
10 June, 1911	35,441,918	0·64	1947 [1]	45,540,000
1 December, 1921	37,143,102	0·45	1948 [1]	45,871,000
21 April, 1931	40,309,621	0·87	1949 [1]	46,121,000
21 April, 1936	42,024,843	0·81	1950 [1]	46,423,000

[1] In actual boundaries.

The following table gives area and population of the Regions (census of 21 April, 1936, and estimates for 1 Jan., 1950):—

Regions	Area in square km. (1949)	Resident pop. census, 1936	Density per sq. km. (1936)	Present pop 1 Jan., 1950
Piedmont	25,414·20	3,118,300	135	3,422,811
Valle d'Aosta	3,262·52	83,455	26	93,128
Lombardy	23,801·36	5,836,479	245	6,268,102
Trentino-Alto Adige	13,602 11	669,029	49	695,653
Veneto	18,384 68	3,566,156	194	3,854,727
Friuli-Venezia Giulia	7,634·19	836,922	110	922,431
Liguria	5,410·68	1,466,820	271	1,523,736
Emilia-Romagna	22,123 45	3,338,721	151	3,477,930
Tuscany	22,986·17	2,978,013	130	3,097,103
Umbria	8,171·68	722,544	85	792,807
Marches	9,691 94	1,278,071	132	1,338,295
Latium [1]	17,180·09	2,654,924	155	3,275,894
Abruzzi and Molise	15,232·29	1,589,804	104	1,660,439
Campania	13,594·80	3,696,632	272	4,275,545
Apulia	19,346·24	2,642,076	137	3,154,622
Basilicata	9,987 33	543,262	54	614,822
Calabria	15,101·53	1,771,651	117	2,000,001
Sicily	25,706·91	4,000,078	156	4,413,009
Sardinia	24,089·00	1,034,206	43	1,239,571
Total	301,021·17	42,127,123 [2]	140	46,120,926

[1] Includes the Vatican City.

[2] The total represents the *legal* population, *i.e.* those normally domiciled in the country; the totals shown in the preceding table (from 1871 to 1936, inclusive) are the *de facto* population, *i.e.* those actually present and counted.

For area and population of the provinces *see* THE STATESMAN'S YEAR-BOOK, 1935, p. 1042; for population of the capitals of the (now 91) provinces *see* THE STATESMAN'S YEAR-BOOK, 1945, p. 1033.

MOVEMENT OF POPULATION.

Births, deaths and marriages :—

Year	Marriages	Births living			Still-born	Deaths [1] exclusive of the still-born	Surplus of births
		Legitimate	Illegitimate and exposed	Total			
1942	287,375	890,083	35,980	926,063	26,772	643,607	282,456
1945 [2]	305,436	—	—	824,836	26,320	619,815	205,021
1947	427,047	—	—	994,674	32,757	516,501	478,170
1948	377,325	—	—	989,041	33,219	481,936	507,105
1949	350,506	—	—	919,791	30,020	479,577	440,214
1950 [3]	318,574	—	—	890,317	29,401	448,100	442,217

[1] Exclusive, also, of those killed in war in the operational zones.

[2] Figures, relating to area defined in the peace treaty. [3] Provisional figures.

Emigrants.—Total number in 1938, 99,842;[1] in 1940, 146,689;[1] in 1942, 8,246; in 1946, 48,979. In 1948, 80,795 (1947, 98,151) went to European countries, and 111,031 (1947, 59,710) to other countries.

Communes of more than 100,000 inhabitants, with population present on 1 July, 1950 :—

Rome	1,665,667	Catania	294,964	Cagliari	138,212
Milan	1,289,289	Bari	271,773	Ferrara	137,834
Naples	1,029,805	Messina	228,624	Spezia	124,494
Turin	730,570	Verona	198,156	Parma	123,252

Palermo	497,000	Padua	169,396	Bergamo	107,153
Florence	384,789	Brescia	151,847	Reggio nell' Emilia	105,196
Bologna	346,102	Livorno	147,157	(All figures provisional)	
Venice	321,120	Reggio di Calabria	142,722		

[1] Including the workers sent to Germany under the Italo-German agreement of 1938.

Religion.

The treaty between the Holy See and Italy, of 11 February, 1929, confirmed by article 7 of the constitution of the Republic, lays down that the Catholic Apostolic Roman Religion is the only religion of the state. Other creeds are permitted, provided always they do not profess principles, or follow rites, contrary to public order or to moral behaviour The profession of such creeds is free, and discussion on religious matters is freely admitted. In practice, however, Protestants suffer many disabilities.

The appointment of archbishops and of bishops is made by the Holy See; but before proceeding to such appointments the Holy See submits to the Italian Government the name of the person to be appointed in order to obtain an assurance that the latter will not raise objections of a political nature.

Catholic religious teaching is given in elementary and intermediate schools. Marriages may be celebrated before a Catholic clergyman in accordance with the rules of Canon Law, or before a clergyman of other religions admitted by the state. Marriages can also be concluded before a Registrar.

According to the census of 1931, 99·6% of the Italians were Catholics (41,014,096); 83,618 were Protestants; 47,825 Jews; Orthodox, 6,801; other religions, 1,475; atheists, 17,283; religion not disclosed 5,573.

Education.

Education is compulsory from the age of 6 up to the age of 14. Elementary education is given in 3 grades: free kindergarten (from the age of 3 up to the age of 5), in the so-called 'maternal schools' or 'Asili' maintained by the municipalities; lower (3 years), and higher (2 years).

Secondary education is given by the secondary or middle schools, by the classical schools, the science schools and by the institute for teachers. Secondary technical education is given by the technical institutes and by other schools (agricultural, commercial, industrial, nautical)

Higher instruction is given in the universities and higher institutes, and also in the free universities and free higher institutes ('free' denotes that they are self-supporting).

Statistics of various classes of schools (1948–49):—

Elementary schools	No.	Teachers	Pupils
Asili for infants	11,692	22,533	918,445
Public elementary schools	36,563	157,723	4,627,244
Private elementary schools	2,203	7,676	250,905

Government secondary schools	No.	Teachers	Students		
			Males	Females	Total

Padova	1222	6,670	172				

[1] Including students of schools for commercial education, of agriculture, the engineering colleges, the schools of architecture and veterinary colleges, and schools for teachers, the higher naval college and the schools for oriental languages at the universities

There were, in 1949, 8,138 cinemas with a seating capacity of 3,119,000.

Justice and Crime.

Italy has 1 court of cassation, in Rome, and is divided for the administration of justice into 22 appeal court districts (with 1 detached section), subdivided into 153 tribunal districts, and these again into *mandamenti* each with its own magistracy (*Pretura*), 977 in all. There are also 101 assize courts. For civil business, besides the magistracy above mentioned, *Conciliatori* have jurisdiction in petty plaints.

On 31 December, 1949, there were 961 establishments for imprisonment before trial (with 37,126 male and 2,228 female prisoners), 69 penal establishments (with 15,488 male and 690 female prisoners) and 22 establishments for the execution of preventive measures of safety (with 2,502 male and 299 female prisoners)

Social Welfare.

The main public welfare acts undertaken during the past 30 years were the establishment of a *Patronato Scolastico* for the benefit of children in primary schools (22 Jan., 1925) and of the national institution for the protection of maternity and infancy (*Opera Nazionale per la protezione della Maternità e dell' Infanzia*; 10 Dec., 1925), which in 1947 spent in relief 3,449 million lire. On 3 June, 1937, there was set up in every commune an assistance body (*Ente Comunale di Assistenza*), to dispense charity to the needy, out of funds provided partly by the assets of the provinces, communes and other public and private *Enti* and partly by special taxation.

In the financial year 1948–49, government expenditure on social welfare amounted to 102,563 million lire.

Finance.

Total revenue and expenditure for 6 fiscal years (ending 30 June), in millions of lire (1 million lire = roughly $10,000 in the second half of 1945; $4,450 in 1946; $2,850 from 2 Aug., 1947 (official rate of exchange) :—

Years ending 30 June	Revenue	Expenditure	Years ending 30 June	Revenue	Expenditure
1946-47 . .	352,006	932,059	1949-50 . .	1,448,510	1,771,572
1947-48 . .	827,802	1,547,152	1950-51 [1] . .	1,227,000	1,397,000
1948-49 . .	1,015,324	1,519,222	1951-52 [1] . .	1,455,000	1,824,000

[1] Budget estimates.

Exceptional expenditure (included in the above) were (in millions of lire):—1945-46, 293,181; 1946-47, 487,190; 1947-48, 694,359; 1948-49, 443,656; 1949-50, 428,189.

The public debt by 30 June, 1950, totalled 2,543,336 million lire, including consolidated debt of 52,976 million lire and the floating debt 1,894,842 million lire.

Defence.

Part IV of the peace treaty signed on 10 February, 1947, contains the following military, naval and air provisions. The fortifications and military installations along the French and Yugoslav frontiers are to be destroyed, and reconstruction is prohibited. Pantelleria, the Pelagian Islands and Pianosa shall be demilitarized; naval installations on Sardinia and Sicily are restricted. Italy is not to possess, construct or experiment with atomic weapons, self-propelled or guided missiles, long-range guns and certain kinds of sea mines and torpedoes.

Army.

The Italian Army is composed of 8 infantry, 1 parachute, 1 armoured and 1 Alpini divisions; 2 more Alpini and 2 armoured divisions are in process of being formed. The total strength in 1950 was about 170,000. The number of heavy and medium tanks must not exceed 200.

Air Force.

The Air Force is limited to 200 fighter and reconnaissance aircraft and 150 transport, rescue, training and liaison aircraft. The personnel must not exceed 25,000 effectives.

Navy.

The coast line of the peninsula is divided into zones, with headquarters at Spezia, Naples, Taranto and Venice. The three former are under the jurisdiction of flag officers with the status of commanders-in-chief; but the admiral commanding at Venice does not rank as a commander-in-chief. Nor do the admirals commanding on the coasts of Sardinia and Sicily. Other localities of strategic importance under naval administration are Brindisi, where there is an admiral commanding, and Genoa, Leghorn, Augusta and Ancona, each of which is under a senior naval officer.

The personnel of the Navy was limited to 22,500 officers and ratings, plus 2,500 serving until mine clearance operations were completed.

The merchant service comes under the direction of the Ministry of Mercantile Marine.

Summary of the Italian Navy:—2 battleships, 4 cruisers, 4 destroyers, 16 torpedo boats, 22 corvettes, 16 minesweeping trawlers (on loan from Britain), 35 coastal minesweepers, 13 vedettes, 2 surveying vessels, 3 repair ships, 2 transports, 1 training ship, 3 oilers, 13 landing craft, 19 water carriers, a cable ship, 3 auxiliaries, 16 tugs, a hospital ship and a tender. Of the ships to be surrendered under the Peace Treaty, those allotted to the United Kingdom and the U.S.A. were left in Italian hands for scrapping. France received 2 cruisers, 4 destroyers, 1 sloop and some auxiliaries. Greece was allotted a cruiser.

Particulars of the principal ships in the Italian Navy are as follows :—

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Big guns				
			Battleships.					
Year		Tons	Inches	Inches				knots
1916 1915	Andrea Doria Caio Duilio	23,622	9¾	9½	10 12·6-in.; 12 5·3-in.; 10 3 5-in. AA	—	75,000	27
			Cruisers.					
1937	Giuseppe Garibaldi Duca degli Abruzzi	8,131 8,605	1½	4	10 6-in.; 10 3 9 m.	6	100,000	32
1935	Raimondo Montecuccoli	6,941	—	—	8 6-in.; 6 3·9-in. AA	—	106,000	34
1933	Luigi Cadorna	5,008	—	—	8 6-in.; 6 3·9-in. AA	—	95,000	37

Note.—Cruiser *Muzio Attendolo*, sunk by bombing during the war has been refloated and will be reconstructed and rearmed as an anti-aircraft cruiser. Under the new 5-year naval [illegible] s *Giulio Germanico* (refloated) and *Pompeo Magno* will also be [illegible]

Under the conditions of the Peace Treaty, 1947, no warship was to be constructed or acquired before 1 Jan., 1950, except in replacement of accidental losses; but now 6 large destroyers with special anti-submarine and improved anti-aircraft armament, and an escort vessel with a speed of 30 knots are projected. A number of warships are being acquired, including 8 destroyer escorts from the United States. Two more corvettes may be completed.

Production and Industry.

I. Agriculture.

The area of Italy on 30 June, 1950, comprised 301,031 square km., of which 277,583 square km. was agricultural and forestal land and 23,448 square km. was unproductive; the former was mainly distributed as follows (the figures are in hectares):—Cereals, 6,921,000; leguminous plants, 1,243,000; industrial plants, 351,000; garden produce, 717,000; vines, 1,021,000; olive trees, 840,000; woods, 5,620,000; forage and pasture, 5,070,000. In addition to the areas devoted solely to vines, the latter were also grown among other crops on 2,834,000 hectares, while olive trees, similarly, were grown on 1,398,000 hectares.

In 1930, agricultural holdings numbered 4,196,266 and covered 26,25,7441 hectares. Estates numbering 3,505 and exceeding 500 hectares each, covered in the aggregate 5,620,891 hectares (an average of 1,604 hectares per holding); this was 21·4% of the total. There were 2,478,412 owners who tilled 15,084,452 hectares or an average of 6 hectares. 36% of the total land under cultivation is held by 0·5% of the total of private owners.

According to the population census taken on 21 April, 1936, the number of persons engaged in agriculture as their main occupation numbered 8,756,064 (6,328,531 males and 2,427,533 females).

The production of the principal crops (in thousands of metric quintals) in 1949 was as follows :—Wheat, 70,213; barley, 2,265; oats, 4,149; rye, 1,250; maize, 22,024; sugar beet, 34,512; potatoes, 26,125; tomatoes, 10,768; olive oil, 1,793; hemp, 722. Provisional figures for 1950 :—Wheat, 75,620; barley, 2,909; oats, 5,534; rye, 1,305; sugar beet, 43,500; potatoes, 23,828; tomatoes, 12,330; olive oil, 1,656; rice, 6,500.

Citrus fruit crop in 1949 (in metric tons):—Oranges, 262,795; tangerines, 49,873; lemons, 233,300; other citrus, 20,996.

Production of wine, 1949, 36,229,980 hectolitres; 1950, 36,333,920 hectolitres.

Tobacco production averaged 425,277 quintals in 1936-39, and was 744,248 quintals in 1948, 717,811 in 1949 and provisional 1950, 713,000.

In 1949, consumption of chemical fertilizers in Italy was as follows (in thousands of quintals):—Perphosphate, 12,577; milled phosphate for agricultural uses, 31; deposed slags, 269; sulphurate of ammonium, 3,051; calciocianamide, 904; nitrate of ammonia, 356; nitrate of calcium $\frac{1}{14}$, 194; nitrate of calcium $\frac{1}{16}$, 1,654; nitrate of sodium, 63; potash salts, 415; potassic salts, 17; phoshate biammonium, 116; others 21.

Livestock, estimated in 1949:—Cattle, 8,161,550; pigs, 4,374,721; sheep and goats, 10,375,985; horses, 790,828; donkeys, 748,244; mules, 390,861.

II. Mines and Minerals.

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence and Grosseto), in Sardinia (Cagliari, Sassari and Iglesias), in Lombardy (particularly near Bergamo and Brescia) and in Piedmont.

Italy's fuel and mineral resources are wholly inadequate. Output of coal and similar fuels, 1938, was 2,358,514 metric tons (imports were 12,139,658 tons); petroleum output, 13,220 tons (against imports of 1,476,519 tons of crude oil and of 1,159,660 tons of petroleum products). In 1938, her production of iron ore had a metallic content of only 407,199 tons which she eked out with imports of 400,617 tons of pyrites and iron ore to furnish a pig-iron output of 862,829 tons; aided by iron and steel scrap (domestic) and scrap imports of 621,327 tons, she produced 2,322,856 tons of ingot and casting steel (exclusive of foundry iron). Only sulphur and mercury outputs yield a substantial surplus for exports. In 1950 output of coal and similar fuels was, in metric tons, 1,812,988; petroleum, 8,170; pig-iron from blast-furnaces and electric furnaces, 501,832; ingot and casting steel, 2,325,442.

Italy has greatly developed her water-power resources. In 1949, the total power generated was 20,782 million kwh. (1947, 20,574 million; 1948, 22,694 million), of which 17,383 million kwh. were generated by hydro-electric plants (1947, 18,904 million; 1948, 20,853 million).

Production of metals and minerals (in metric tons) was as follows:—

Metals and minerals	1941	1946 [1]	1947 [1]	1948 [1]	1949 [1]	1950 [1, 2]
Mining output						
Iron pyrites	1,023,068	400,977	612,445	835,027	866,179	895,459
Iron ore	1,310,410	130,911	226,251	543,241	520,812	442,121
Manganese	59,773	7,735	26,530	24,689	24,219	16,208
Lead	66,974	23,875	37,358	47,381	57,642	63,213
Zinc	192,178	64,658	116,073	146,760	150,461	180,005
Sulphur	299,009	143,305	148,657	173,646	188,544	213,132
Bauxite	536,881	65,747	171,083	153,117	104,852	153,433
Smelter output						
Mercury	3,246	1,752	1,858	1,318	1,535	1,839
Lead	36,993	14,269	17,702	26,749	28,460	37,469
Zinc	38,800	15,706	23,114	26,398	26,151	38,119
Aluminium	48,195	11,037	24,859	33,083	25,647	37,070
Copper	2,917	—	—	—	—	—

[1] Excluding Venezia Giulia. [2] Provisional figures.

III. Manufactures.

The textile industry is the largest and most important. In the cotton industry 1,007 factories had, in Dec., 1949, 5,602,164 spindles and 141,724 looms. Silk culture, while flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. The silk industry, Dec., 1949, had 1,616,000 spindles and 32,000 looms; output of raw silk in 1948, 1,966 tons; 1947, 1,653 tons. The production of artificial silk (including staple fibre and waste) in 1949 was 90,473 tons, in 24 factories with 715,000 spindles. The woollen industry had, in Dec. 1949, 508 combing and spinning factories with 1,840 combers, 830,000 carding spindles and 735,000 combing spindles; woollen weaving was done in 357 factories with 22,000 looms. Output, 1949 (in metric tons):—Pure cotton yarns, 208,511; pure cotton fabrics, 144,211; jute yarns (1948), 50,299; wool yarns (1948), 41,000. The chemical industry has greatly developed; in 1949 the production of sulphuric acid (at 50 Be) was 1,753,876 metric tons; mineral superphosphate (1948), 1,003,541 metric tons; copper sulphate (1948), 56,710 metric tons. Sugar output in 1949, 454,065 metric tons.

Production of motor cars was 54,016 in 1948 (32,053 in 1947), of which 11,477 (9,674) were exported; in 1949, 65,379, of which 16,529 were exported.

Industrial workers in 1937–39 averaged 4,273,530, of whom 1,342,532 were employed in 1,921 large-scale concerns (with over 250 workers).

Commerce.

Italy has been united in a customs union with San Marino on the basis of a treaty concluded on 22 March, 1862. On 20 March, 1948, a treaty was concluded with France for the purpose of establishing a customs union in the near future.

Italy's imports normally exceed her exports, leaving an adverse balance to be made up, if possible, by receipts from shipping, tourists' expenditures and remittances from Italians abroad. Her balance of trade (in millions of current lire) has been estimated as follows :—

Years	Goods and services			Income from investments and work		Donations	Net balance
	Total	Merchandise	Tourism	Total	Remittances from emigrants		
1938	— 1,330	— 2,270	1,310	310	720	—	— 1,020
1947	—618,500	—532,710	14,840	180,240	37,870	148,630	—438,260
1948	—213,410	—201,850	28,190	237,320	78,190	179,710	— 6,090
1949	—207,320	—186,810	57,220	165,960	69,370	123,970	— 41,360

The following table shows the value of Italy's foreign trade (in millions of paper lire), excluding gold coins and bullion :—

Year	1938	1942	1946 [1]	1947 [1, 2]	1948 [2]	1949	1950
Imports . .	11,273·1	14,037·8	91,483·6 [3]	413,726·9	822,832	857,020	897,626
Exports . .	10,497·5	16,047·3	64,577·5	205,632·5	570,624	634,621	746,369

[1] For 1946, import and export values have been obtained by converting values declared in foreign exchange on the basis of the official rate (1 dollar = 100 lire).

For the months from 1 Jan. to 31 July, 1947, the above values have been calculated by applying official rate plus an additional 125% to the amounts declared in foreign exchange; the new official rate, established on 1 Aug., 1947, has been used for the months from 1 Aug. to 31 Dec., 1947.

[2] For 1948, import and export values have been obtained by applying to the amounts declared in foreign exchange the clearing and reciprocity rates for transactions carried out under these agreements, and the average exchange rate to all other agreements. Values for 1947, obtained by [illegible] —Imports, 930,634 million lire; exports, 339,238 million lire.

[3] Excluding the value of 329,456 metric tons out of a total of 9,968,940 metric tons.

The following table shows trade by countries in 1,000 lire [1] :—

Countries	Imports into Italy from			Exports from Italy to		
	1948	1949	1950	1948	1949	1950
Germany	17,585,100	37,994,000	74,168,300	16,576,300	54,254,200	73,167,600
United States	309,613,800	302,747,200	210,345,100	51,273,100	26,363,800	47,675,900
Argentina	103,211,100	44,315,100	48,214,900	90,458,800	77,838,900	40,286,800
Great Britain	27,537,300	34,328,500	50,434,800	45,183,600	66,995,900	85,667,200
Switzerland	25,153,900	26,105,100	32,701,300	13,548,800	35,203,100	47,682,000
France	7,881,100	21,427,900	41,579,200	23,058,100	36,180,700	65,243,100
Rumania	129,400	751,500	137,700	2,141,100	1,108,400	1,955,000
Poland	10,511,600	19,579,800	10,949,000	10,142,800	7,821,800	10,224,400
Hungary	917,800	3,000,600	6,006,800	1,193,200	3,640,600	5,204,700
Yugoslavia	10,065,900	9,299,900	8,453,200	12,619,900	14,958,000	12,214,300
Turkey	5,076,500	3,303,500	7,152,200	7,011,000	4,887,400	11,123,900

[1] Values calculated on the basis shown in note 1 of the preceding table.

Total trade between Italy and the United Kingdom (Board of Trade returns in £ sterling) :—

	1938	1947	1948	1949	1950
Imports to U.K.	7,122,360	25,079,357	30,171,786	37,465,917	51,368,009
Exports from U.K.	5,718,979	5,073,534	12,703,930	17,979,813	28,150,944
Re-exports from U.K.	439,622	4,086,799	2,690,498	2,894,857	3,241,178

On 20 March, 1948, a customs union was concluded with France.

Shipping and Communications.

The mercantile marine at the end of 1949, consisted of 4,203 vessels of 2,655,000 gross tons; of these, 1,132 were steam or motor-driven (2,536,000 gross tons), and 3,071 sailing vessels (119,000 gross tons).

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of railways (31 Dec., 1950), 21,643 kilometres, including 16,316 kilometres of state railways, of which 5,327 had been electrified. In 1949 the state railways carried 349,948,000 passengers and 44,638,000 metric tons of goods.

Italy's roads totalled (30 June, 1950) 173,153 kilometres, of which 21,572 kilometres were state roads, 43,616 kilometres provincial roads, 107,965 kilometres communal roads. Motor vehicles, 1949 :—Cars, 266,928; buses, 5,028; trucks, 208,821.

On 30 June, 1949, there were 11,479 post offices; telegraph lines had a length of 61,062 kilometres; there were 10,337 telegraph offices. The telephone service in 1949 had 831,434 subscribers.

On 30 June, 1949, there was a maritime radio-telegraphic service, with 9 coast stations and a system of local continental radio stations.

Civil Aviation.—By the end of 1950, 3 Italian airlines (A.L.I., Alitalia, L.A.I.) were operating. Their services included scheduled [illegible] Tripoli, Athens, Cairo, Beirut, Istanbul, Haifa, New York, Montreal, Buenos Aires, Caracas, Amsterdam and Prague.

Banking and Currency.

According to the law of 6 May, 1926, there is only one bank of issue, the Banca d'Italia; however, the state has issued 10-, 5-, 2-lire and 1-lira notes not included in note circulation figures.

The gold and foreign credits reserve of the Bank of Italy amounted to

3,131,600,000 lire on 31 Dec., 1939, and to 4,224 million lire in Dec., 1950. Bank-note circulation (in millions of lire) at the end of 1939 was 24,432; at 31 Dec., 1947, 722,264; at 31 Dec., 1948, 911,943; at 31 Dec., 1949, 1,033,319; at 31 Dec., 1950, 1,162,536.

Remittances from Italian emigrants contributed to foreign exchange in 1946, $36,421,000 and £2,023,000; in 1947, $19,675,000 and £1,151,000.

From 19 Sept., 1949, the exchange rate of the £ sterling has been fixed on the dollar basis (£1 = $2·80).

Since 1936, all credit institutions have been under the control of a state organ, named 'Inspectorate of Credit'; the Bank of Italy has been converted into a 'public institution,' whose capital is held exclusively by corporate bodies of a public nature. Other credit institutions are classified as :—(1) Public-law credit institutions (such being the Banco di Napoli, Banco di Sicilia, Banca Nazionale del Lavoro, Monte dei Paschi di Siena, Istituto di S. Paolo in Turin); (2) Banks of national interest (such being at present the three joint stock companies working on a national scale, viz. the Banca Commerciale Italiana in Milan, the Credito Italiano in Genoa and the Banco di Roma in Rome); (3) Banks and credit concerns in general, including co-operative banks with limited liability of associates; (4) Savings banks; (5) Monti di Credito on pegno (institutions granting loans against personal chattels as security), and (6) Casse rurali e agrarie (rural mutual banks, established as co-operative institutions with unlimited liability of associates).

At the end of 1949, there were 1,194 credit institutes with capital and reserves of 39,049 million lire and deposits of 1,036,937 million lire.

On 31 Dec, 1950, the post office savings banks had deposits of 660,990 million lire; ordinary savings banks 1,172,391 million lire.

By a decree of 29 April, 1923, life assurance business is carried on only by the National Insurance Institute and by other institutions, national and foreign, authorized by the Government. At 31 Dec., 1949, the insurances vested in the *Istituto Nazionale Assicurazioni* amounted to 230,000 million lire, including the decuple of life annuities.

Money, Weights and Measures.

The standard coin is the *Lira* of 100 *Centesimi*, normally equal to 0·04677 grammes of gold. The gold standard was never formally suspended, but exchange control was established in 1934. The rate in New York was kept fairly stable between 5·26 cents and 5·04 cents until the United States entered the war in 1941.

Before the war the coin in circulation consisted of silver, 5-lire, 10-lire and 20-lire pieces; nickel and steel alloy, 20-cent, 50-cent, 1-lira and 2-lire pieces, and bronze, 5-cent and 10-cent pieces. On 19 December, 1946, the issue of 'Italma' coins was authorized in denominations of £1, £2, £5 and £10. There are also in circulation state notes of the denomination of 5 lire and 10 lire, and bank-notes of denominations of 50, 100, 500 and 1,000 lire; they are neither convertible into gold or foreign moneys nor exportable abroad, nor importable from abroad into Italy (except for certain specified small amounts). 10-lire currency notes were being issued (maximum, 2,500 million lire) to replace the 10 and 10-lire silver coins, withdrawn from circulation in 1938. In addition to bank-notes, provisional titles of 5,000 and 10,000 lire are in circulation.

Circulation of money at the end of Dec., 1950, was as follows:—State notes, 8,995 million lire; coins, 2,225 million lire; bank-notes, 1,162,536 million lire; Amlire, 2,692 million lire; total, 1,176,448 million lire.

The metric system of weights and measures is in general use.

Diplomatic Representatives.

1. Of Italy in Great Britain (14 Three Kings Yard, W.1).

Ambassador.—Duca Tommaso Gallarati-Scotti (accredited 23 Oct., 1947).
Counsellor.—Livio Theodoli.
Commercial Counsellor.—Ugo Morabito.
First Secretaries.—Antonio Toscani-Millo; Gian Luigi Milesi-Ferretti; Alessandro Farace.
Naval Attaché.—Capt. Paolo Mengarini.
Military Attaché.—Lieut.-Col. Melchiorre Jannelli.
Air Attaché.—Lieut.-Col. Duilio Fanali.
Press Attaché.—Francesco Antinori.
Labour Attaché.—Romualdo Massa-Bernucci.
Commercial Attaché.—Enrico Macchia.
Financial Attaché.—Antonino Zecchi.

There are consular representatives at London, Liverpool, Cardiff and Glasgow.

2. Of Great Britain in Italy.

Ambassador.—Sir Victor Mallet, K.C.M.G., C.V.O. (appointed 20 Oct., 1947).
Ministers.—P. H. Dean, C.M.G.; E. R. Lingeman (*Commercial*).
Counsellor.—W. H. Braine, C.B.E. (*Labour*).
First Secretaries.—J. W. Russell; C. C. B. Stewart; G. F. N. Reddaway, M.B.E.; R. A. Daniell (*Commercial*); J. C. W. Bushell (*Commercial*); W. B. Neville-Terry (*Consular*); K. C. Benton; J. A. Pilcher (*Information*); G. G. Hannaford (*Legal*); M. C. Adams (*Property*).
Naval Attaché.—Capt. N. S Henderson, O.B.E., R.N.
Military Attaché.—Col. E. R. Colwill.
Air Attaché.—Group Capt. P. H. Hamley, A.F.C.
Civil Air Attaché.—Air Marshall D. Colyer, C.B., D.F.C.

There are consular representatives at Florence, Genoa, Milan, Naples, Bari, Venice, Turin, Palermo, Bologna, and Rome.

Books of Reference.

Statistical Information.—The Istituto Centrale di Statistica (Via Cesare Balbo 16, Rome) was set up by law of 9 July, 1926, as the central institute in charge of census and other statistical information, and as a co-ordinating and controlling office for the statistics supplied by other departments. *President.*—Professor Lanfranco Maroi; *Director-General.*—Professor Benedetto Beri. Its publications include:—

Annuario Statistico Italiano: 1st series, 1878–1907; 2nd series, 1911–25; 3rd series, 1927–33; 4th series, 1934–43; 5th series, vol. I (1944–48); vol. II (1949–50).
Compendio Statistico Italiano, 1949–50.
Italia, 1938–48: Sintesi grafico-statistiche. 1950.
Censimento industriale e commerciale, 1937–39. 9 vols.

FORMER ITALIAN COLONIAL EMPIRE.

The Italian Colonial Empire consisted of (1) I. [illegible] Cyrenaica, Tripolitania and the Fezzan; (2) Italian East [illegible] Ethiopia, Eritrea and Italian Somaliland; (3) the Dodecanese. Libya was completely conquered by Allied Forces in Jan., 1943; Ethiopia became an independent state in Jan., 1942; Eritrea was conquered by the Allies in April, 1941, and Somaliland in Feb., 1941. In Article 23 of the peace treaty, Italy renounced all right and title to these possessions.

Cyrenaica, Tripolitania, Eritrea and Somalia were placed under British administration, Fezzan under French administration. On 21 Nov., 1949, the United Nations General Assembly recommended that:—(*a*) Libya (Cyrenaica, Tripolitania and the Fezzan) should become an independent and sovereign state not later than 1 Jan., 1952; (*b*) Italian Somaliland should be an independent sovereign state in 10 years; meantime it should be placed under international trusteeship with Italy as the administering authority. (*c*) On 2 Dec., 1950, the General Assembly resolved that sovereignty over Eritrea will be handed over by the British authorities not later than 15 Sept., 1952, after an autonomous state has been established, federated to Ethiopia, and under the Ethiopian crown.

Libya.

Libya is situated along the north coast of Africa between Ras Agedir, frontier point in Tunis on the west and Egypt on the east, in longitude from about 9° to 25° east. The extreme northerly point of Libya is at about the parallel of latitude 33° north. According to an agreement with France (12 September, 1919) as a result of the Treaty of 1915, the western frontier extends in a curve from west of Ghadames to south of Tummo, including Ghat. According to the agreement with France of 7 January, 1935, the southern frontier with French West Africa runs along a line between Tummo and a cross-point indicated by 24° long. east from Greenwich and 18° 45′ lat. north. On the Egyptian frontier Italy had obtained Jarabub from Britain. The eastern boundary is Mt. Tibesti.

Tripoli fell under Turkish domination in the 16th century, and though, in 1711, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter occupied Tripoli and established an army there. On 5 November, 1911, a decree was issued annexing Tripoli, and on 23 February, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until 18 October, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established.

The oasis of Jarabub, on the eastern border of Cyrenaica, was ceded by Egypt to Italy, and Italian troops occupied it on 7 February, 1926. On the other hand, the frontier in the neighbourhood of Sollum on the sea was rectified in favour of Egypt.

After the expulsion of the Germans and Italians in 1942, Tripoli and Cyrenaica were placed under British, and the Fezzan under French, military administration.

The British Government recognized the Amir Mohammed Idris el Senussi as Amir of Cyrenaica in June, 1949. On 18 Sept., 1949, the Amir promulgated a constitution and set up a government with authority over internal affairs. There is a council of ministers consisting of a Prime Minister and 5 other Ministers, and an Assembly of 60 representatives elected in June, 1950. The Libyan National Assembly at its inaugural meeting on 25 Nov., 1950, proclaimed its desire to have the Amir as King of all Libya.

Prime Minister and Minister of Justice and Education.—Mahmud Bey Muntasser.

Minister of Foreign Affairs and Health.—Ali Bey Jerbi.

Area and Population.—The area of the territory is estimated at 1,759,540 square km., or 679,358 square miles. On 31 Dec., 1938, the population was 888,401 (89,098 Italians, 6,078 other Europeans and 793,225 natives, of whom 763,179 were Moslems and 30,046 Jews). Of the Moslem population, the Negroes of various races form about 35%.

Tripolitania has an area of about 353,000 square km. and a population (1950) of 796,900, including 46,400 Italians and 20,700 Jews. The Fezzan has 49,950 inhabitants. The estimated area of Cyrenaica is about 855,000 square km. with a population of 327,000; principal towns: Benghazi, 60,000 (including small Jewish and foreign communities); Derna, 15,000; Barce, 7,500, and Tobruk, 2,500.

Justice.—In so far as personal status or family or succession matters are concerned, justice is administered by Moslem tribunals for Moslems according to their own religious law, and by regional tribunals according to Italian law in civil and commercial matters, whether the parties concerned be Italians, foreigners or natives.

Judicial tribunals include arbitrators (*arbitri conciliatori*); Ahliya (or native) courts for certain minor matters; civil and penal courts in Tripoli and Benghazi, with subsidiary courts at Misurata and Derna; courts of assize in Tripoli and Benghazi, and courts of appeal in Tripoli and Benghazi.

Education.—In Tripolitania there are, for Arabs, 125 primary schools and 2 secondary schools, with a total of 19,558 pupils. There are also Koranic and Jewish schools. For Italians, there are 82 primary and 8 secondary schools, with a total of 10,005 pupils. There are 2 teachers' training colleges for Arabs.

In Cyrenaica there is a teachers' training centre, an evening institute, a secondary school, a trade school, 10 primary schools, 44 elementary schools and 41 Koranic schools. The number of students in 1949 was 8,249.

Production and Industry.—Libya has 3 zones from the coast inland—the Mediterranean, the sub-desert and the desert. The first, which covers an area of about 17,231 square miles, is the only one properly suited for agriculture, and may be further subdivided into (1) the oases along the coast, the richest in North Africa, in which thrive the date-palm, the olive, the orange and all Mediterranean plants; (2) the steppe district, suitable for cereals (barley and wheat) and pasture. This district is the one where Italian colonization has chiefly spread; it has olive, almond, vine, orange and mulberry trees and ricinus plants; (3) the dunes, which are being gradually afforested with acacia, robinia, poplar and pine; (4) the Jebel (the mountain district, Tarhuna, Garian, Nalut-Yefren), in which thrive the olive, the fig, the vine and other fruit trees, and which on the east slopes down to the sea with the fertile hills of Msellata. Output of olive oil, 1947, 936 metric tons. The sub-desert zone produces the alfa plant. The desert zone and the Fezzan contain some fertile oases, such as those of Ghadames, Ghat, Socna, Sebha, Brak. It is estimated that in Tripolitania and Fezzan there are about 2·5 million date palms and about 500,000 in Cyrenaica. In 1949, there were in Tripolitania:—194,000 sheep, 221,000 goats, 35,300 cattle, 52,000 camels, 29,800 donkeys, mules and horses and 1,370 pigs. Cyrenaica had in 1949:—363,600 sheep, 436,000 goats, 31,400 cattle, 22,500 camels, 18,000 horses, mules and donkeys and 100 pigs.

Industry.—Amongst the more important industries of Tripolitania and Cyrenaica are sponge fishing, tunny fishing, tobacco growing and processing, dyeing and weaving of local wool and imported cotton yarn, and olive oil.

Tripolitania also produces bricks, salt, leather and esparto grass for paper making. Home industries of both territories include the making of matting, carpets, leather articles and fabrics embroidered with gold and silver.

Production of electric power in Tripolitania was 31,800,000 kwh. in 1949.

Commerce.—The trade of Libya was:—Imports, 1938, 882,057,532 lire; exports, 1938, 108,961,545 lire. United Kingdom imports from Libya (Board of Trade returns) were £7,126 in 1938; £247,778 in 1947; £525,913 in 1948; £484,242 in 1949; £1,108,296 in 1950; exports to Libya, £14,278 in 1938; £435,817 in 1947; £1,265,188 in 1948, £2,645,269 in 1949; £2,908,229 in 1950; re-exports, £2,893 in 1938; £8,601 in 1947; £74,033 in 1948; £56,390 in 1949; £61,363 in 1950.

Communications.—Tripoli (town) is connected by telegraph cable with Malta and by telephone lines with Bengardane (Tunis). There are overseas wireless telegraph stations at Benghazi and Tripoli.

The Tripolitania railway (123 miles) serves the districts of Tripoli, Tellil, Garian, Zuara, Azizia and Tagiura. In Cyrenaica, the railway covers the lines Benghazi–Barce, 66 miles, and Benghazi–Soluch, 34 miles. The principal means of communication inland are the caravans, which follow long-frequented routes. There are 3,544 kilometres of carriage road. Motor roads connect Tripoli to Zuara, to Tarhuna, to Nalut, to Gadames, to Hon, to Homs and Misurata; and Benghazi and Tobruk.

Benghazi is linked with Cairo, Tripoli and Malta by a weekly air service provided by Air Malta, and a weekly service with Cairo and Tripoli by SAIDE air service. Surface communication between Benghazi and Tripoli is by twice-weekly bus service, and between Benghazi and Alexandria by weekly bus service to Sollum and thence by rail. Internal communication between Benghazi, Barce, Derna and Tobruk is by frequent bus services.

Banking and Currency.—In Tripolitania British military authority money is in circulation at the rate of 480 lire to the £ sterling. The Egyptian pound is the official currency in Cyrenaica. There are branches of Barclays Bank (D., C. & O.) in Tripoli, Benghazi and Derna.

Weights and Measures.—Although the metric system has been officially adopted, the following native weights and measures are still used: *oke* = 1·282 kilograms; *kantar* = 40 okes = 51·28 kilograms; *draa* = 46 centimetres; *handaza* = 68 centimetres.

Eritrea.

This territory, whose name derives from the Mare Erythraeum (Red Sea) of the Roman geographers, was Italy's oldest colony. Her dominion over

it was established by the Treaty of Uccialli of 2 May, 1889. It was occupied by British Empire forces in 1941 and has since then been under temporary British administration. In accordance with the decision made by the United Nations, Eritrea is to be federated to Ethiopia by 15 Sept., 1952.

Eritrea lies along the west coast of the Red Sea, stretching for 670 miles from Cape Kasar (18° 2′ N.) to Cape Dumeirah (12° 30′ N.) on the strait of Bab el Mandeb. The narrow coastal strip is flanked by the escarpment of the high inland plateau, some 8,000 ft. above sea-level, which extends into Ethiopia on the west and south-west, and shelves down to the Nile valley level along the Sudanese border to the west and north-west. Eritrea covers an area of 119,472 sq. km. and has a population of about 1,086,000. Italians still there number 21,000, most of them centred in the capital, Asmara (7,765 ft. above sea-level), which has a population of about 117,000. Massawa, 70 miles by road or rail from Asmara, is the main port of the territory and has the best harbour on the Red Sea.

The two main religions of the natives are Christian (Coptic rite) and Moslem. The Copts inhabit the plateau and the Moslems, with a few pagans, the lowlands of the Western Province and the Red Sea coastal area. The principal languages of Eritrea are Tigrinya and Tigré, two [illegible] deriving from the ancient Ghe-ez, the ecclesiastical language [illegible] Church.

There were, in 1949, 17 cinemas with a seating capacity of 17,000.

The country is divided roughly into two geographical zones; the lowlands along the Red Sea, with a tropical climate and winter rainfall, and the uplands where the climate is temperate and sometimes cold, with a summer rainfall. The rainfall is not abundant and often erratic, so that, without irrigation works—of which there are not many—only a minimum of crops can be raised. The wealth of the natives is represented by their flocks, which move from uplands to lowlands and vice versa, following the rains.

There are big saltpans at Massawa and Assab. The former produces some 100,000 tons per year. The Assab plant is now being put into operation again and should soon be producing from 150,000 to 200,000 tons per year. Fish-meal, hides and skins, trocas and mother-of-pearl buttons, are other important exports. Asmara has a match factory, a china manufactory and a brewery, all of which export a certain proportion of their products. There are several small goldmines in the Asmara povince.

The main line of communication with Eritrea is by sea through the port of Massawa, and there is a railway from Tessenei (on the Sudan border of Eritrea) to Khartoum. First-class roads radiate from Asmara to Massawa, Solcotom, Ponte Maro and Keren. Eritrea's main airport is at Asmara and is regularly used by Aden Airways, Ethiopian Air Lines, Alitalia, Sudan Airways and Misrair.

The railway system runs from Massawa, *via* Asmara, to Keren and Agordat.

Barclays Bank (D., C. & O.) has branches in Asmara and Massawa.

United Nations Commissioner.—Eduardo Matienzo (Bolivia).
Chief Administrator.—D. C. Cumming (Great Britain).

Books of Reference.

[illegible], La Popolazioni Indigene Dell'Eritrea. Bologna, 1935.

Somalia.

The total area is about 490,000 square km., extending along the east coast of Africa from British Somaliland to Dick's Head in Kenya Colony. Population (1950), 1,000,000, including 4,500 Italians.

As a result of the Treaty of 1915 and the colonial rearrangements consequent on the First World War, Britain ceded Italy territories on the right bank of the Juba with the port of Kismayu (Chisimaio). Mogadiscio (population 70,000, of whom 3,500 are Italians) is the capital.

During the East African campaign of the Second World War Somalia was occupied by British and Commonwealth Forces. British Military Administration lasted from 1941 to April, 1949, when Somalia passed under the control of the Foreign Office Administration of African Territories, until Italy took over the trusteeship on 1 April, 1950.

The Administrator is assisted by a United Nations Advisory Council composed of the representatives of Colombia, Egypt and the Philippines. On 2 Dec., 1950, the General Assembly of the United Nations approved the t[illegible] for the Territory; the 10-year period of Trusteeship [illegible] by United Nations begins from this date.

The principal occupations of the people are cattle-rearing and agriculture. Livestock (camels, cattle, sheep and goats) numbers 5–6 million heads. In southern Somalia along the Webi Shebeli and Juba rivers there are Italian plantations with a cultivated area of some 10,000 hectares. Output of sugar from sugar cane at Villaggio Duca degli Abruzzi is 50,000 quintals per year; export of bananas, 150,000 quintals per year. In 1949 imports amounted to £1,381,068 and exports to £883,748.

In 1947 United Kingdom imports from all of Italian East Africa (Board of Trade returns) amounted to £182,832; in 1948, £145,991; in 1949, £145,607; in 1950, £303,339; exports, 1947, were £460,690; 1948, £585,837; 1949, £778,561; 1950, £1,082,755; re-exports, 1947, £2,731; 1948, £7,836; 1949, £2,416; 1950, £11,635.

In May, 1950, East African currency was replaced by the 'Somalo' (gold parity = 0·124414) issued in coins and notes of denomination up to 100 'Somali.' In addition to the Bank of Italy there are branches of the Bank of Naples and the Bank of Rome in Mogadiscio.

Administrator.—Ambassador Giovanni Fornari.

JAPAN.

(NIPPON.)

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. From 1186 until 1867 the emperors remained in a spiritual seclusion while successive families of S[illegible] the temporal power on their behalf. In 1867 the Empero[illegible] nominally the imperial power after the abdication on 14 October, 1867, of the fifteenth and last Tokugawa Shogun Keiki, known historically as Yoshinobu. In 1871 the feudal system

(Hōken Seiji) was abolished; this was the beginning of the rapid westernization undertaken by the new government, then mainly controlled by the western clans of Satsuma and Chōshu. The Emperor bears title of Dai Nippon Teikoku Tennō (' Imperial Son of Heaven of Great Japan '). Only foreigners make use of the poetical title ' Mikado.'

Emperor of Japan.—**Hirohito**, born at Tokyo, 29 April, 1901; succeeded his father, Yoshihito, 25 December, 1926; married, 26 January, 1924, to Princess Nagako, born 6 March, 1903, daughter of H.I.H. Prince Kuninomiya (died 27 January, 1929). Offspring:—I, Princess Shigeko (Terunomiya), born 6 December, 1925. II, Princess Sachiko (Hisanomiya), born 10 September, 1927; died 8 March, 1928. III, Princess Kazuko (Takanomiya), born 30 September, 1929. IV, Princess Atsuko (Yorinomia), born 7 March, 1931. V, Prince Akihito (the Crown Prince) of Tsugunomiya, born 23 December, 1933. VI, Prince Masahito of Y[illegible], born 28 November, 1935. VII, Princess Takeko Suga, born 2 M[illegible], 1939.

National flag: white, with a red sun (without rays).

By the Imperial House Law of 11 February, 1889, the succession to the throne was definitely fixed upon the male descendants. In case of failure of direct descendants, the throne was to devolve upon the nearest prince and his descendants; there are four princely families from which an Emperor could be chosen. The civil list, pre-war, was fixed at 4,500,000 yen. The Japanese Government informed the Allied H.Q. on 30 October, 1945, that the Emperor's private fortune, [illegible] securities, timber, etc., amounted to 1,590,615,000 yen (abou[illegible]). The Emperor's assets were ' frozen ' on 20 November, 1945, and are, under the new constitution, entirely vested in the State. He now pays taxes.

On 7 December, 1941, Japan attacked United States and British bases in the Pacific, and then declared war on these two countries. By March, 1944, she held the greater part of Eastern Asia, including the occupied territory of China, Burma, Malaya, the Philippines and numerous islands of the Pacific. But during 1944 [illegible] ed the Japanese from islands in the south-w[illegible] Islands, Guam and Leyte, and also forced them back in Burma, while Manila was captured on 5 Feb., 1945, and the Island of Okinawa, less than 400 miles south of Tokyo, on 22 June, 1945, marking the beginning of the end. On 6 Aug., the first atomic bomb (Uranium 235) was dropped by a Super-Fortress over Hiroshima; on 9 Aug., another (Plutonium bomb) was dropped over Nagasaki. On 10 Aug., the Emperor broadcast an appeal for terms of surrender. The surrender of the Japanese armed forces was signed on the U.S. battleship *Missouri* on 2 Sept., 1945.

Official statistics for World War II, corrected to May, 1948, give deaths in the armed forces 1,555,308, and total casualties of 1,864,710; civilian deaths (mainly by air attack) in Japan proper were 299,485, and total casualties, 668,315; Tōkyō had 97,031 killed and 119,957 injured; Hiroshima, 86,141 killed and 61,066 injured; Nagasaki, 26,238 killed and 43,060 injured.

Constitution and Government.

By the constitution of 11 February, 1889, drafted by Duke Ito (after a tour of Europe) and modelled mainly upon that of Prussia, the Emperor was presented to the nation as a sovereign who exercised the whole of the executive powers with the advice of Cabinet Ministers, who were appointed by himself. In reality, power rested mostly with the ' elder statesmen.'

Article I of the new constitution of 1946 says: 'The Emperor shall be the symbol of the state and of the unity of the people, deriving his position from the sovereign will of the people.' Later the Article was amended to include a more emphatic statement: 'We proclaim that sovereignty resides in the people.' The Emperor himself, in a New Year's broadcast, at the end of 1945, explicitly divested himself of the attributes of divinity ascribed to him in [illegible] beliefs. His functions now are purely ceremonial.

Until the peace treaty provides for the withdrawal of the Allied Powers, the latter aim to exercise full, but self-limited, government, sufficient to ensure that Japan is completely demilitarized, purged of all militarist, plutocratic and authoritarian forces, and on the way to becoming a democracy. To this end the Allies are represented by the Supreme Command of the Allied Powers (SCAP), of which the chief executive is General Matthew B. Ridgway, U.S. Army (appointed 11 April, 1951), advised by an Allied Council for Japan in Tokyo, consisting of his deputy as chairman and representatives of the U.S.S.R., China and the British Empire. Larger questions of policy are discussed by the Far Eastern Commission, sitting usually in Washington and consisting of representatives of Australia, Canada, China, France, India, the Netherlands, New Zealand, the Philippines, the U.S.S.R., the United Kingdom and the United States.

The new constitution passed the Lower House on 24 August, 1946, by 421 votes to 8 (of whom 6 were Communists) and was re-passed (with some amendments suggested by the Upper House) on 7 October with 5 dissenting votes. It was promulgated by the Emperor on 3 November, 1946, and came into force on 3 May, 1947, 'Constitution Day.'

The constitution of 1946, outlined, if not drafted, by Americans, is modelled more on American and British than (like the previous one) on Prussian lines. It deprived the Emperor of executive powers, abolished the [illegible] votes to women (previously decreed by the Shidehara [illegible] the voting age for men from 25 to 20, abolished conscription, stripped the country of Army, Navy and Air Force, pledged it to renounce war 'for ever,' abolished the secret police, guaranteed complete academic freedom to teachers, and outlined a 'Bill of Rights' on Western lines.

[illegible] a House of Representatives (of 466 members), to [illegible] than 4 years, and an elective House of Councillors of 250 members (100 elected at large and 150 from prefectural districts) one-half its members being elected every 3 years. The Lower House controls the Budget and approves treaties with foreign powers.

Executive powers rest with the Prime Minister and his Cabinet, who are chosen by the Diet from its own members. Prime Ministers must be civilians and not former Army or Navy officers.

For an account of the 'Zaibatsu' or 'wealth cliques' which dominated Japan's economy, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 1047. The Allied Supreme Command on 6 Nov., 1945, ordered these to be broken up and the subsidiary units sold; on 3 Aug., 1949, SCAP announced that the task was completed after 1,200 firms had been removed from the control of 11 huge concerns.

The following is a list of recent prime ministers:—

Lieut.-General Hideki Tojo	18 Oct., 1941–22 July, 1944
Gen. Kuniaki Koiso	22 July, 1944–5 April, 1945
Admiral Kantaro Suzuki	5 April, 1945–15 Aug., 1945
Prince Naruhiko Higashi-Kuni	17 Aug., 1945–9 Oct., 1945
Baron Kijuro Shidehara	9 Oct., 1945–20 May, 1946
Shigeru Yoshida	20 May, 1946–23 May, 1947
Tatsu Katayama	23 May, 1947–9 Feb., 1948
Hitoshi Ashida	9 March, 1948–6 Oct, 1948

The elections, held on 23 Jan., 1949, resulted in the Liberal-Democrats winning 264 seats (previously 133), Democrats 68 (126), Social Democrats 49 (143), Communists 35 (4), Co-operative Party 14 (31); others, 50.

The Cabinet, appointed on 11 Feb., 1949, following the general election, consisted of 12 Liberal-Democrats, representing a fusion of two right-wing parties, and 4 others; it was revised 28 June, 1950, as follows:—

Prime Minister and Minister for Foreign Affairs.—Shigeru Yoshida, former Prime Minister, leader of the Liberal-Democratic Party.

Deputy Prime Minister and Minister without Portfolio.—Joji Hayashi (Liberal-Democrat).

Minister of Finance.—Hayato Ikeda (Liberal-Democrat).

Attorney-General.—Takeo Ohashi

Director of Economic Stabilization Board.—Hideo Sudō (Liberal-Democrat).

Minister of Social Welfare.—Takeo Kurokawa (Liberal-Democrat).

Minister of Construction.—Koshihichi Masuda (Liberal-Democrat).

Minister of Education.—Teiyū Amano.

Minister of International Trade and Industry.—Ryū Yokoo (Liberal-Democrat).

Minister of Agriculture.—Kōzen Hirokawa (Liberal-Democrat).

Minister of Transport.—Takeshi Yamazaki (Liberal-Democrat).

Minister of Posts and Communications.—Bunkichi Jamura (Ryokufū-kai).

Minister of Labour.—Shigeru Yasutoshi (Liberal-Democrat).

Minister Without Portfolio.—Seigo Okano (Liberal-Democrat).

On 12 Oct., 1950, the government, with SCAP's approval, 'depurged' 10,900 men who, in 1946, had been removed from public office or barred from any political activity on account of their active support of the pre-war militarist regime. The list included some 650 leading politicians and financial figures (about 70 former members of the Diet) and 2,300 members of the Imperial Rule Association. On 30 Oct. 3,250 retired Army and Navy officers belonging to the extreme right-wing 'Society of Japanese Reservists' were similarly brought back into Japanese politics.

Local Government.

Japan's system of local government has been revised. The country (except Hokkaidō) is divided into prefectures (*To, Fu* and *Ken*), and the prefectures into municipalities (*Shi*), towns (*Cho*) and villages (*Son* or *Mura*). As formerly, each prefecture, city, town and village has a representative assembly elected by the same franchise as in parliamentary elections. Each city, town and village elects, as before, a mayor, while the governor of a prefecture (formerly appointed by the Home Office) is now elected by the voters in the area. The prefectural governments have charge of all health measures and (outside the cities) of the school systems, and of various matters affecting the area as a whole. The police—purged in the upper levels and with the 'political police' abolished—is now divided into city police, administered by a local 'watch committee,' and rural police, with the latter under the Home Office. Administratively there were on 1 Oct., 1938, 47 prefectures (now, 1 Oct., 1950, 46, with the removal of Okinawa from Japan's jurisdiction), 552 rural districts (*Gun*) (now 543), 148 cities (now 248), 1,715 towns (now 1,871) and 9,514 villages (now 8,295).

Area and Population.

Japan, as constituted after World War II, consists of 4 islands with a total area of 368,474 square kilometres (141,529 square miles) and a population (census, 1 Oct., 1950) of 83,199,637 (preliminary) with a density of 587·8 per square mile. The 4 islands are Honshū (mainland), Kyūshyū, Hokaidō and Shikoku.

For details of the former Empire *see* THE STATESMAN'S YEAR-BOOK, 1949, pp. 1117 and 1118.

A census of the present area on 1 Aug., 1948, showed a resident population of 80,216,896 (an imperfect census, hence a second one in 1950), an increase of 7,848,000 since V-J Day, of whom 6,037,000 were repatriated from overseas; there were 39,365,452 men and 40,851,444 women, a ratio of 96 men to 100 women. Number of households, 16,088 855 of 4·99 members. Foreigners registered, March, 1949, were 648,503, of whom 601,069 were Koreans, 3,158 Americans, 752 Germans, and 586 British.

By 31 December, 1946, the Americans had completed repatriation of all Japanese nationals living in territories under U.S. control. They numbered 922,570, including 132,303 from the Philippines, and 591,665 from Southern Korea. By 20 June, 1949, the Russians had returned 489,046 Japanese prisoners of war out of the total of 594,000.

For the population of Japan (excluding Korea), according to the census of 1 Oct., 1935, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 1050; for the census population on the same date, of the 33 cities having more than 100,000 inhabitants, *see* THE STATESMAN'S YEAR-BOOK, 1947, p. 1040.

On 1 October, 1948, population of Tōkyō was 4,555,565 (1950, preliminary, 5,385,071); Osaka, 1,689,961; Kyōto, 1,040,127; Nagoya, 915,725; Yokohama, 859,324; Kōbe, 644,217; Fukuoka, 348,052; Hiroshima, 246,134; Yawata, 180,984, and Kokura, 176,322.

Vital statistics ('000s)	1939	1941	1942	1943	1944	1945	1946	1947	1948
Births . . .	1,902	2,277	2,234	2,267	2,172	1,688	1,943	2,679	2,710
Civilian deaths . .	1,269	1,150	1,167	1,219	1,291	2,184	1,569	1,138	959

Crude birth rate of Japanese nationals in present area, 1949, was 33·20 per 1,000 population; 1948, 33·78. Crude death rate, 1949, 11·60; 1948, 11·96; crude marriage rate, 10·3; infant mortality rate per 1,000 live births, 62·0 (125·3 in 1934). Marriages, 1948, numbered 960.285 (11·97 per 1,000 population) which was the highest ever recorded; divorces, 1948, 79,416 (0·99).

Religion.

There has normally been religious freedom, but Shinto, originally a matter of individual concern, became part of the totalitarian apparatus in the 1930s; all Japanese were compelled to acknowledge State Shinto and to worship at State Shinto shrines, [illegible] whether their personal religion was Buddhism, Christianity or [illegible] Shinto, originally a simple animist cult absorbed by Buddhism in the 7th and 8th centuries, was deliberately revived at the time of the Imperial restoration (1867) as a means of arousing national pride and respect for the Emperor. After Japan's defeat, the Allied Supreme Command ordered the Government to discontinue state support of Shinto and its use as a weapon for control of the masses. State subsidies have ceased for all religions and all religious teachings are

forbidden in the schools. As a personal religion, Shinto had 13 sects (increasing to 85 in the post-war religious revival in 1948) and Buddhism 12 sects (56 denominations, increasing to nearly 100 in 1948). *Bushido*, the way of the Bushi or Samurai, that is, the warriors' way, was professed, not as a religion but as a code of behaviour, by the military caste. In 1937, Shinto shrines numbered 49,728 (besides 60,703 minor shrines), and the priests, 15,873; Buddhist temples (1936), 71,326 (besides 35,308 minor temples); high priests and priestesses, 55,930. There were, in 1936, 3,081 licensed preachers and 2,104 churches and preaching stations of the Roman Catholic, Greek Catholic and Protestant Churches. The last-named are now represented by 16 denominations compared with 3 pre-war. Since 1891 the Roman Catholics have had an episcopate of 1 archbishop and 3 suffragan bishops. In May, 1941, Roman Catholicism was accorded legal recognition; Nagasaki was its chief centre. The Society of Friends had 750 members in 1941, before it was virtually suppressed by the government. Post-war phenomenon is the emergence of some 30 new sects, some of a messianic pattern, others with claims to prophetic inspiration and 'faith-healing.'

Education.

Modern education began in Japan in 1872, mainly under educators borrowed from the United States. Elementary education was compulsory. Before the second world war, there was a good system of secondary education for both boys and girls, as well as technical and special schools. After those schools there was, for boys only, the *Koto Gakko*, or high school, which gave a 3 or 4 years' course, followed, in turn, by the *Daigaku*, or university, with a course of 3 or 4 years and offering its graduates the bachelor's degree and, after 2 years more of study, the doctor's degree. Though in the pre-Meiji era higher education (or indeed any kind of education) for girls was practically non-existent, there was a rapid growth of secondary education for girls after World War I, and of higher education after World War II.

During the Occupation the school system was officially purged of those teachers who were charged with being nationalistic and militarist, and all school books containing such material were scrapped. With 641,575 teachers working in 1948, from the kindergartens to the universities, there was a shortage of about 110,000. Education is compulsory and free up to the age of 15; 6 years are spent in the primary schools and 3 in the middle schools; a further 3 years in high schools is optional. The new system started in April, 1947. In Dec., 1949, there were 21,081 primary schools with 11,136,966 pupils and 12,363 middle schools with 5,321,590 pupils.

For the educational statistics for 1936–37, *see* THE STATESMAN'S YEAR-BOOK, 1948, p. 1051.

Japan has 6 main universities, formerly known as the Imperial Universities:—Tōkyō University (1877); Kyōto University (1897); Tohoku University, Sendai (1907); Kyushu University, Fukuoka (1910); Hokkaidō University, Sapporo (1918), and Osaka University (1931). There are 39 other institutions of university rank, with about 4,000 teachers and 51,000 students. By 1946, 36 universities had become co-educational, compared with 10 before the war.

Although the constitution specifically guarantees complete 'academic freedom' to teachers, the Liberal-Democratic government in 1949 decreed that as employees of the State they must be politically neutral. This was followed by the dismissal of Communist instructors from the universities.

Motion-picture theatres increased from 1,875 in 1940 to 2,157 in 1949, with seating capacity of 1,223,914. Newspapers, 1948, numbered 2,978,

with 38,319,000 subscribers; there were 199 dailies, 313 weekly and 454 monthly giving general coverage, and 2,012 of trade or other special interest.

Justice.

Chief innovation in post-war Japan's judicial machinery is the establishment of a Supreme Court, appointed by the cabinet but enjoying a conditional life tenure—at the first general election following his appointment a justice must submit himself to the electorate. Unless he receives a majority of the votes, he must retire. This is repeated at intervals of 10 years. All justices and judges of the lower courts serve until they are 70 years of age.

Below the Supreme Court are the courts of cassation, the courts of appeal, the district courts (*Chihōsaibansho*) and the local courts (*Kusaibansho*).

All courts are bound to defend against the Executive those provisions of the constitution devolving powers from the centre to local or regional authorities, restricting the powers of the police and granting civil liberties and freedom of speech, press and public meetings, etc. The Supreme Court is authorized to declare unconstitutional any act of the Legislature or the Executive which violates the constitution.

In 1949, General MacArthur authorized the establishment of a police force under the command of former officers of the imperial army and navy; its strength, early in 1951, was about 125,000, excluding the National Police Reserve (*see* p. 1200).

There are workhouses established by local corporations and private persons. The number of hospitals in 1948 was 3,412, with 211,101 beds.

Finance.

I. Imperial.

Revenue and expenditure, ordinary and extraordinary for fiscal year ending 31 March, in 1,000 yen (the yen is nominally worth 84·4 cents U.S. but its exchange value since April, 1949, has been 360 = $1, U.S.):—

	1947–48	1948–49 [1]	1949–50 [1]	1950–51 [1]	1951–52 [1]
Revenue . .	214,467,252	473,145,604	741,314,000	661,406,000	673,000,000
Expenditure . .	205,841,065	473,115,604	741,047,000	661,406,000	598,000,000

[1] Budget estimates.

The general budgets include the net results of public undertakings. Closed accounts, *i.e.*, actual receipts and expenditures as in 1947–48 above, show cash payments and expenditures for the year and the additional period of one month.

The 1949–50 ordinary bud[illegible] officially, as 23·0% of the national income, estimated at [illegible] yen (equal to $9,000 million at 360 yen = $1, U.S.). Of the revenue (in millions of yen), 444,600 (67·2%) are to come from taxes and stamp duties and 132,147 (20%) from state enterprises. On the expenditure side the leading items are 'war termination costs' of 109,062 (16%); debt redemption, 127,604; local government, 105,000; price subsidies, 90,000; reconstruction of areas damaged by earthquakes, floods, etc., 47,000; education, 14,538; social and labour welfare, 12,337.

The national debt on 1 April, 1950, was 517,919 million yen.

According to the Corporation of Foreign Bondholders, the par value of

Japan's external debt (1949) was £88,582,157, $283,267,700 and 502,799,000 French francs; this excludes arrears of interest.

According to the Bank of England, in 1948 residents of the U.K. (thus excluding securities which have been repatriated to Japan) held Japanese investments with a nominal value of £46 million (£50 million in 1938) on which the income in 1948 was £100,000 (£2 million in 1941, the last previous year; and £2·6 million in 1938).

A Japanese calculation, June, 1948, puts the external debt at 1,624,502,370 yen (the old gold yen in which the debt was contracted) of which Japanese government bonds were 1,221,472,370 yen, municipal loans, 159,110,000 yen and borrowings by banks and other companies, 243,920,000 yen. The original total of loans floated abroad was 2,700 million yen but Japanese nationals acquired some 1,100 million yen, leaving the above total outstanding in foreign hands.

II. Local.

The 1949 budgets of the prefectures and other local authorities forecast revenues aggregating 346,564 million yen, to be made up partly by local taxes on land, houses, occupations, and partly by government grants; expenditures were estimated at 108,769 million yen.

Defence.

Under the constitution, adopted in Oct., 1946, and effective 3 May, 1947, Japan renounced war 'for ever.' The baldness of this declaration was unpopular and the Article was amended to include the explanation that 'the Japanese people sincerely aspire to international peace based on justice and order' and that the renunciation of force was made 'for the purpose of attaining the above aim.'

In his New Year message of 1 Jan., 1950, General MacArthur declared that the Japanese constitution 'can by no sophistry or [illegible] be interpreted as complete negation of the inalienable right of [illegible] against unprovoked attack.' Premier Yoshida on 10 Feb., 1951, accepted this view, stating 'We realize fully our responsibility to protect ourselves and defend our land.' On the same day he announced that Japan had agreed to the establishment of American military bases in and around Japan and that this must be recognized in future peace treaties with Japan.

I. Army.

For an account of the pre-war Army and Air Force, *see* The Statesman's Year-Book, 1947, p 1043.

In July, 1950, General MacArthur established a 'National Police Reserve' of 75,000 men, including 6,000 officers and n.c.o.s and 30,000 other ranks of the former imperial army.

II. Navy.

A fleet of 125 vessels has been formed to police Japanese waters for fishery protection and coastguard duty. These include ex-minesweepers and other war-built vessels. No ship may exceed 1,500 tons displacement or 15 knots speed. Total tonnage is limited to 50,000. Personnel is limited to 10,000 officers and ratings. Vessels so far reported are 5 destroyer escorts displacing 1,000 tons, 15 coastguard cutters of 500 tons displacement with a speed of 15 knots, 40 patrol vessels, 30 minesweepers and 9 other craft.

Production and Industry.

Agriculture.—Farm population, 1946, was 34,245,027, of whom 14,470,979 were engaged solely in farming; 14,723,657 were employed on farms not belonging to their own household.

Arable land, 1949, totalled 5,992,000 hectares, or 16% of the land area; 7,185,000 acres were in rice. About 779,000 acres were devoted to industrial crops, of which mulberry trees (for silkworm rearing), tea, tobacco, flax and pyrothrum are the chief. According to SCAP's directive to the Japanese government, 9 Dec., 1945, the agrarian evils to be uprooted are: 'the intense over-crowding of the land; widespread tenancy under onerous conditions; heavy farm indebtedness with high interest rates; government discrimination against agriculture in favour of industry.'

On 9 December, 1945, General MacArthur ordered the larger estates in Japan to be divided up for sale to the peasants. By July, 1949, the government had bought from 2,440,000 landlords some 5,184,200 acres, of which 4,925,000 acres had been re-sold to 4,260,000 tenant farmers. However, little headway had been made by 1950 towards consolidating some 90 million separate strips of land into holdings of economic size. In 1947, 1,831,350 peasant households were farming no more than 1·2 acres; another 1,647,680 households were farming plots between 1·2 acres and 2·4 acres.

The forest area on 1 January, 1946, was 51,138,027 acres, of which 18,901,538 acres belonged to the state, and 3,015,357 acres to the Imperial household. In 1949, of the total standing timber, estimated at 1,681 million cubic metres (1 cubic metre = 282·5 board feet), 52·7% was in national forests, 32·7% was privately owned and the remainder was owned by communities, temples, schools and other small groups. Timber production, in the year ending 31 March, 1947, was 5,468 million board feet, including 609 million for pit props, 87 million for railway sleepers and 74 million in veneer logs.

Output of rough rice in millions of lb. averaged 26,793·1 in 1936–40 and 25,003·9 in 1941–45; it was 26,438·9 in 1948, 27,837·9 in 1949, and 26,700 in 1950. Yield per acre in 1949 was 35,000 lb., by far the largest in Asia, but well below that in Australia (45,000 lb.) and Italy (40,000 lb.). In pre-war years the annual deficit (made up by imports from Korea and Formosa) averaged 4,000 million lb.

Output, in 1949, of barley, 1,051,800 metric tons, of naked barley, 926,400 metric tons, and wheat, 1,140,300 tons. Wheat has become an important crop. Sweet potatoes for several decades have mitigated the effects of rice famines; average crop is about 243,000 metric tons, while potatoes have crops averaging 73 million bushels. Fruit production is important:—Peaches, pears, apples, grapes, persimmons and mandarins.

Before the war, Japanese catch represented one half to two-thirds of the world's total fishing; annual average, 1935–37, 7,055,000 short tons; 1949, 2,980,000 metric tons. In Sept., 1949, SCAP increased Japan's legal fishing grounds to cover the area of waters between E. Long. 165° and 180° and between the N. Lat. 24° and 40°, thereby increasing the potential catch by about 312,000 tons. The 2 whaling expeditions (15 Dec., 1948–25 March, 1949) caught 1,645 whales yielding 54,600 metric tons of products including 20,200 tons of edible whale oil and 32,600 tons of meat.

In 1949, the livestock census showed 2,293,000 cattle, 1,072,000 horses and 327,000 sheep, The 1947 census showed 100,349 pigs and 2,807,572 fur rabbits. Small stocks of goats, wool rabbits and fur-bearing foxes are also maintained. Milk output is small—in 1946, 29,000,000 imperial gallons of cows' milk and 4,000,000 gallons of goats' milk.

Industry.—Japan's industrial equipment, 1948 fiscal year, numbered 100,116 plants employing 3,060,000 workers and producing goods valued at 817,136 million yen. In 1947, chemicals led, by value, with 17·8%; metal goods, 12·3%; lumber and wooden articles, 11·4%; textiles, 11·0%.

Japan's textile industry before the war had 13 million cotton yarn spindles and 362,000 looms. After the war she resumed with 2,780,000 spindles and 120,000 looms; in Dec., 1949, 3,700,964 spindles were operating. Output of cotton yarn, 1949, 345·7 million lb. (exports, 23·1 million), and of cotton cloth, 923·4 million square yards (exports, 404·2 million square yards). Her exports were of grey cloth sent to the United States and the United Kingdom for finishing.

In wool, Japan aims at wool exports sufficient to pay for the imports of raw wool. In July, 1949, Japan had 810 woollen cards in operating condition (732 in 1939), 655,000 worsted spindles (1,628,454) and 14,260 looms (28,812). Output, 1949, 23·2 million lb. of woollen yarns, 13·0 million lb. of worsted yarns and 34·4 million square yards of woollen and worsted cloth.

Japan's output of silk, in 1950, was about 148,100 bales; exports, 1950, 94,451 bales plus 57 million square yards of silk tissues. The Ministry of Agriculture has been ordered to plant 50,000,000 mulberry trees, to provide a production of 247,000 bales by 1952. The rayon industry (the world's largest in 1936) was heavily stripped during the war, only about 30% surviving. Monthly output, 1949, was 5,561,000 lb. of filament yarn (monthly average, 1937, over 25,000,000 lb.), while output of staple fibre was 4,964,000 lb. (pre-war, 25,000,000 lb.). Output, 1947, of filament-rayon cloth, 46·2 million square yards (exports, 3·7 million linear yards) and of spun-rayon cloth, 32·0 million square yards (exports, nil.)

Open-hearth steel capacity during the war was 9,400,000 tons, of which, despite air-bombing, 7,700,000 tons is intact, and 6,900,000 tons of the former steel-rolling capacity (7,900,000 tons) is still intact. The Far Eastern Commission has recommended that Japan's capacity be limited to 3,500,000 tons of ingot steel and 2,000,000 tons of pig-iron. There are 31 iron and steel firms, of whom 5 process from pig-iron to steel. The largest firm, Nippon Seitetsu, alone has a capacity of 2,100,000 tons of pig-iron. Output of iron ore, 1949, 779,674 metric tons (war-time peak, from Empire resources, 1944, 4,367,879 metric tons); of pig-iron, 1,602,200 metric tons (1943, 4,109,900 metric tons); of crude steel, 3,111,400 metric tons (1938, 6,360,000 tons). Coal-mining is inefficient; output, 1950, 38,450,000 metric tons (1938, 44,952,000 metric tons; peak output, 1941 fiscal year, 57,318,000 metric tons). Output of aluminium, 1949, was 21,218 metric tons.

Industrial production (the United Nations' index, based on 1937 = 100) reached its war-time peak, in 1944, of 146, falling thereafter as follows:—1945, 61; 1946, 34; 1947, 40; 1948, 52; 1949, 65; March, 1950, 71. Another index, favoured by SCAP, takes 1932–36 = 100; it stood at 34·3 in 1946; in 1947, 40·8; in 1948, 49·4, and in Dec., 1949, 100·0.

Electric power capacity, Dec., 1949, was 10,485 kw., of which 6,478 was hydro-electric; consumption was 40,976 million kwh., of which 32,542 million kwh. came from hydro-electric plants.

Mine production in 1949 included (in metric tons):—

Asbestos	5,446	Gold (kilos)	2,815	Pyrite	535,082
Chromite	27,003	Graphite	16,816	Sulphur	62,480
Copper (smelter)	74,036	Manganese ore	92,947	Silver (kilos)	89,804
Copper (mines)	32,741	Mercury	94	Tungsten	17

Output of crude petroleum and natu[illegible] 1949 was 1,393,000 barrels; imports of petroleum products (1[illegible] barrels.

Foreign enterprises which had opened offices or branches in Japan (Dec., 1949) numbered 217 including 16 steamship companies, 3 aviation (2 American and 1 British), 10 banks, 4 insurance companies, 3 film companies, 13 newspapers and 9 publishers. Of these, 54 firms were American, 34 Netherlands, 32 British, 32 Indian, 14 Chinese.

Foreign direct investments as of 31 Dec., 1941, according to the Industrial Bank, totalled 106,068,000 yen (old gold yen) of which American were 82,377,000 yen, British 21,808,000 and Dutch 1,883,000 yen. This total excludes German investments which appear to have been substantial.

Labour and Trade Unionism.

Total labour force, July, 1950, was 37,840,000 (excluding 480,000 unemployed) of which 20,690,000 were in agriculture, forestry and fishing; 520,000 in mining; 1,140,000 in construction; 4,730,000 in manufacturing alone; 1,150,000 in manufacturing combined with retailing; 3,760,000 in commerce and finance; 1,720,000 in transport and other public utilities; 2,780,000 in services (including the professions), and 1,220,000 in government work. Proprietors numbered 10,870,000; family workers, 14,580,000, and employees, 12,370,000; total, 37,840,000.

For detailed figures from the census of 1947, showing the 'economically active' (including employers and employed) by type of activity and by industries, *see* THE STATESMAN'S YEAR-BOOK, 1950, p. 1171.

Trade unions are protected by Article 26 of the new constitution. They were completely suppressed from 1940–45 (period of the Japanese Patriotic Industrial Society, 'Sampo,' which claimed in 1945 a [illegible] 5 million) and their recovery is confined mainly to the [illegible] industries. On 30 June, 1949, there were 34,688 trade unions, with 6,655,483 members. The largest single union is the teachers' union with 450,000 members.

There are 3 rival federations and numerous independent unions, which in 1947 formed a common National Council of Labour Unions. The oldest federation is the General Federation of Labour Unions (Zen-Nippon Rodokumiai Sodomei, usually called 'Sōdōmei'), with 3,522 unions and 913,827 members in June, 1949; this includes the miners, textile and tobacco workers and part of the transport workers. The left-wing National Congress of Industrial Unions (known as 'Sanbetsu' from its name, Zekoku Sangyo-Betsu Kumiai Togi) is larger with membership in June, 1949, of 4,120 unions with 1,020,190 members. Transport workers and Communists are prominent. The third federation is the new All-Japan Council of Labour Unions with some 300,000 members in 1949; in Dec., 1950, about half the unions of the Sōdōmei left this federation and joined the All-Japan Council.

In the fiscal year ending 31 March, 1949, 3,932,722 persons had received welfare aid amounting to 7,231,572,000 yen ($20,087,700, U.S.).

The census of 1947 showed a potential 'submerged unemployed' of 3,980,000 (farming, 1,590,000, manufacturing, 867,000, commerce, 405,000), that is, those considered to be chronically on the verge of unemployment, Actual number wholly unemployed, 30 June, 1950, was 470,000, while those on part-time (less than 34 hours per week) numbered 5,590,000 or 14% of the employed.

Commerce.

Trade, excluding bullion and specie (in 1,000 yen = $289, U.S., in 1936, Japan's last pre-war year, and $234 in 1940; no rates subsequently, until 25 April, 1949, when 360 yen = $1, U.S.) :—

	1936	1940	1947	1948	1949
Imports .	2,763,681	3,452,725	20,264,787	60,287,221	156,695,158
Exports .	2,692,976	3,655,850	10,150,918	52,022,100	112,202,722

The Bank of Japan gives the dollar value of Japan-originating trade in 1949 as :—Imports, $731,413,000 and exports, $389,336,000. In 1950 :—Imports, $645 million and exports $772 million, including goods and services sold to the United Nations in connexion with the Korean war.

For 1949 the American authorities calculate (from shipping documents) imports at $906,000,000; 1948, at $682,613,000 ($526,139,000 in 1947 and $305,393,000 in 1946), and exports, 1949, at $510,000,000; 1948, at $258,621,000 ($173,568,000 in 1947 and $103,292,000 in 1946). These figures include the estimated value of goods procured with funds appropriated by the U.S. government and surplus military goods transferred to the Japanese government. The U.S.A. furnished 62·2% of imports, followed by China, 5·1%; of exports, 18·2% went to the U.S.A., 11·5% to India and 7·4% to the United Kingdom. Compared with the years 1930–34, the *volume* of imports in 1948 was only 40% and that of exports only 16%. The Japanese Ministry of International Trade states that in 1930–34 the ratio of exports to national income was 17·3%; in 1948, it was 3·2%.

SCAP's Scientific and Economic Section, 21 Nov., 1949, said Japan must export more than $1,000 million annually (based on a 25% increase in production) in order to be self-supporting.

Distribution of the 1948 trade by countries together with the average for 1930–34, (value in $ U.S.) was :—

	Imports (c.i.f. at Japanese ports)				Exports (f.o.b. at Japanese ports)			
	Average 1930–34 value, $'000	% of total	1948 value, $'000	% of total	Average 1930–34 value, $'000	% of total	1948 value, $'000	% of total

[1] Including Kwantung.

Principal items in Japanese trade in 1947 were :—

Imports	Value in $U.S.	Exports	Value in $U S
Grains, flours and starches	231,750,000	Cotton fabrics	85,606,000
Raw cotton	70,011,000	Cotton yarns	17,653,000
Phosphate fertilizers	34,841,000	Raw silk	10,782,000
Nitrate fertilizers	27,832,000	Coal	8,130,000
Pulses	26,080,000	Silk fabric	6,409,000
Salt	11,228,000	Logs and casts	5,611,000
Sugar	9,507,000	Rayon yarns	5,148,000
Clothing	6,107,000	All others	34,226,000
Rubber	6,042,000		
All others	102,557,000		
Total	525,956,000	Total	173,568,000

Although the volume of exports was small, the distribution followed closely the pre-war pattern with textiles furnishing 61·6%, foodstuffs 4·7%, metals and minerals 4·6% and machinery 5·0%.

Japan's trade balance with the United States, her biggest customer next to Manchuria, has been (according to U.S. customs' figures) as follows (in thousands of $ U.S.) :—

Yearly average	Imports from U.S.	Exports to U.S.	Trade balance + or −
1926–30	246,036	379,632	+133,596
1931–35	169,567	148,186	− 21,381
1936–40	238,390	164,459	− 73,931
1946	101,873	83,430	− 18,443
1947	414,454	35,403	−379,051
1948	324,739	62,634	−262,105
1949	467,521	81,972	−385,549

Total trade between Japan and U.K. for 4 years in £ sterling (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports to U.K.	9,213,353	5,195,256	5,273,201	10,796,574	7,876,290
Imports from U.K.	1,807,549	65,029	346,128	1,170,801	2,720,698
Re-exports from U.K.	303,364	4,886	31,061	27,481	152,692

Shipping and Communications.

On 30 June, 1946, Japan's merchant navy had 327 sea-going vessels (of 1,000 gross tons or over) of 1,432,100 deadweight tons compared with 1,180 vessels (on 1 Sept., 1939) of 7,145,400 deadweight tons. The fishing fleet in 1948 had 19,981 vessels, compared with 255,000 before the war.

On 31 Oct., 1950, the fleet consisted of 1,003 vessels (over 100 gross tons) of 1,728,000 gross tons—721 ships for overseas passenger and freight transport, 127 coastal vessels, 35 railway ferry boats, 107 oil tankers and 13 miscellaneous.

The total length of roads in Japan was 867,748 kilometres in 1946; only the 'national' roads (7,854 kilometres) were fit for heavy motor traffic. Motor vehicles, 1950, numbered 153,456, including 106,175 trucks, 24,994 passenger cars and 12,287 buses.

The first railway was completed in 1872, between Tōkyō and Yokohama, a distance of 18 miles. In 1948 the state railways covered 19,593

km. of which 17,260 km. were [illegible]. Steam locomotives numbered 5,612 and electric, 351; there were 11,000 passenger coaches, 108,155 freight cars and 2,324 electric cars. In 1948 the state railways carried 3,223·3 million passengers, 115,660,000 tons of revenue-freight and 8,617,000 tons of free-freight.

Aviation was not much developed before the war. Six companies, operating over 10,000 route miles, were nationalized in 1939; they have been replaced by 6 foreign firms licensed in Feb., 1951.

The telephone service, a government monopoly, in 1949 had 1,681,279 instruments, of which 33·5% were automatic; users are mainly business firms and government bureaux.

Number of wireless sets on 31 July, 1949, was estimated at 8·5 million.

Currency and Banking.

The modern banking system dates from 1872. The Nippon Ginko (Bank of Japan) was founded in 1882, closely patterned upon the German Reichsbank, but it was Japanese in barring foreigners from owning stock or making deposits in the bank. Its capital of 60 million yen has been increased to 100 million. It ceased publication of monthly reports in Sept., 1941, just two months before Pearl Harbour. It then had gold stock amounting to $164 million, U.S. Other banks are the Yokohama Specie Bank (specializing in foreign exchange), the Hypothec Bank, the Industrial Bank of Japan, and the Hokkaidō Colonization Bank. There were 70 banks in 1948 (484 in 1934). The great private banks formerly belonging to the 'Zaibatsu' remain active in banking but under new names, the former Mitsui bank is now the 'Imperial Bank' and the former Yasuda bank is now the 'Fuji Bank,' etc.

Bank of Japan notes (a new issue dating from March, 1946) in circulation at 31 Aug., 1950, totalled 324,618 million yen or 84% of its total liabilities of 382,859 million yen. It has no reserves; even its 'cash and bullion' of 1,153 million was only 0·3% of its liabilities. Short term assets, official and private, in the United States totalled $434 million on 31 Oct., 1950.

Index of wholesale prices (1937 = 100) rose from 278 in 1945 to 3,837 in 1947 and 18,080 in Jan., 1950. The cost-of-living index had to be drastically revised in 1948, at which time it started with 100 and rose to 138 in 1949.

The post office savings bank is modelled upon the British; deposits amounted to 100,954 million yen at 30 Sept., 1949.

In November, 1947, SCAP licensed the following 9 foreign banks to operate branches in Japan:—Bank of Indo-China, Hongkong and Shanghai Banking Corporation, Chartered Bank of India, Australia and China, Netherlands Trading Society, Netherlands-Indie Commercial Bank, Bank of China, Bank of America, National City Bank of New York and Chase National Bank of New York. In Oct., 1949, 11 Japanese and 10 foreign banks were licensed to handle foreign exchange, previously in the hands of SCAP.

Money, Weights and Measures.

The pre-war yen had an exchange value of 23 cents, U.S. On 25 April, 1949, an official rate of 360 yen per U.S. $ (and 1,450 to 1,480 for the £ sterling, later 1,008 yen for the devalued £) was established for all permitted foreign trade and exchange transactions. Prior to this no true rate of exchange had existed since the war. A military rate, which had no bearing on commercial payments, was established in Aug., 1945 (at 15 yen

per dollar), solely for the expenses of the occupation forces in Japan and for certain types of remittance; it was raised to 50 yen on 12 March, 1947, and to 270 yen on 5 July, 1948, where it remained until abolished in favour of the new official rate on 25 April, 1949.

Private trade was resumed in Aug., 1947, through a Trade Board which bought for yen in Japan and sold abroad for dollars, similarly buying abroad with dollars and selling at home for yen. The rates implicit in these transactions varied widely, ranging as high as 800 yen per dollar. This system ceased in April, 1949.

In October, 1897, the gold standard was adopted with a unit of value of 0·75 gramme of [illegible] ed the yen, then equal to 2*s.* 0½*d.* The pieces coined were as [illegible] coins (20, 10 and 5 yen pieces), silver coins (50, 20 and 10 sen pieces), nickel coins (10 and 5 sen pieces) and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen and the rin is the tenth part of a sen. The gold coins were ·990 fine, and the silver coins ·720 fine. Eventually the gold coins (20, 10 and 5 yen pieces) were used at double their face value. The 1 yen silver was finally withdrawn. In circulation now are copper coins of 5 and 1 yen and of 50 sen; aluminium, tin and copper coins (some with a round hole in the centre) for 10, 5 and 1 sen.

The notes of the Bank of Japan are of 6 denominations, 1, 5, 10, 20, 100 and (1949) 1,000 yen; notes of 50 sen were recalled in 1948.

The bank's buying price of gold (since July, 1949) is 385 yen per gramme, or 11,974·8 yen per troy oz. Price of silver was 8,600 yen per kilo on 23 Jan., 1951.

Weights and measures are as follows:—

The *Kin*	= 160 *mommé*	= 1·323 lb. avoirdupois.
„ *Kwan* or *Kan*	= 1,000 „	= 8·267 lb. „
„ *Picul*	= 100 *kin*	= 132·27 lb. „
„ *Sūn*		= 1·193 inches.
„ *Shaku*	= 10 *sūn*	= 11·930 inches.
„ *Ken*	= 6 *shaku*	= 5·965 feet.
„ *Chô*	= 60 *ken*	= $\frac{1}{5}$ mile, 5·4229 chains.
„ *Ri*	= 36 *chô*	= 2·44 miles.
„ *Ri* square		= 5·9552 square miles.
„ *Tsubo*		= 3·9538 square yards.
„ *Chô* or *Chobu*, land measure		= 2·45 acres.
„ *Koku*, liquid		= 39·6804 imperial gallons.
„ „ dry		= 4·9601 imperial bushels.
„ „ timber		= about 10 cubic feet.
„ *To*, liquid = $\frac{1}{10}$ *koku*		= 3·9680 imperial gallons.
„ „ dry		= 1 9851 pecks.

Bale = 500 lb. raw cotton; 400 lb. cotton yarn; 100 *kin* or 132 3 lb. of raw silk.

The metric system was made obligatory by a law passed in March, 1921, the period of grace for its compulsory use has been extended until 31 December, 1958. The following rates are recognized:—

metre = 3·3 *shaku*. gramme = 0·266667 *mommé* ($\frac{4}{15}$ *mommé*).

Pacific Islands.—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These consisted of 3 groups of some 98 islands and islets with a total land mass of

2,149 square km. or 829·7 square miles and about 50,000 native inhabitants (1947). Japan fortified them and established air and sea bases among them.

On 7 February, 1944, the whole island chain which forms the great atoll of Kwajalein, in the Marshall Group, fell into American hands, and the Commander of the U.S. Navy in the area was appointed Military Governor of the Marshall Islands. The Allied Powers agreed in Cairo, 1943, that they should not be returned to Japan. The United States in 1946 proposed to the United Nations that she be made 'trustee' for all of them. This was accepted and on 19 July, 1947, she formally took over rule of the mandated islands under trusteeship. President Truman on 3 Jan., 1951, appointed ex-Senator Elbert Thomas as High Commissi[illegible] 1 July, 1951, the islands passed under the care of the U.S. D[illegible]he Interior.

(1) *The Marianne (or Ladrone) Islands.*—By treaty of 12 Feb., 1899, these islands, with the exception of Guam (the largest of the Marianne Islands which had been ceded to the United States in 1898), passed on 1 October, 1899, from Spanish to German possession for payment of £840,000. There are 14 islands with an area of 246 square miles. Saipan is the seat of government. Rota and Tinian produce cotton. The Japanese population of the islands at 1 October, 1935, numbered 39,728, and the natives 4,297. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands.*—The Carolines consist of about 549 coral islets, Ponapé having 11,467 inhabitants, Yap 6,650 and Parao 12,798 (each at 1 October, 1935). The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into 2 groups: (*a*) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There were (1935) in Truk 1,980 Japanese, 24 foreigners and 15,129 natives; in Ponapé there were 2,486 Japanese, 28 foreigners and 8,953 natives. (*b*) The Western Carolines, with Palau and Yap as administrative centres. Palau had 6,553 Japanese, 6,230 natives and 15 foreigners; Yap, 633 Japanese, 6,006 natives and 11 foreigners.

(3) *Marshall Islands.*—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratack (with 13 islands) and Ralick (with 11 islands), first came under German rule in 1885. The population on 1 October, 1935, consisted of 481 Japanese, 7 foreigners and 9,958 natives. The chief island and administrative centre is Jaluit; Protestant (American) and Catholic missions have long been at work. There are plantations of coco-palm (32,072 hectares in 1936); sugar cane and cotton are grown. The chief export is copra.

Diplomatic Representatives.

No diplomatic relations exist between the United Kingdom and Japan, but the United Kingdom Liaison Mission functions as an Embassy, except that it is accredited to SCAP. There are consular posts at Tōkyō, Kōbe and Yokohama.

THE HASHIMITE KINGDOM OF THE JORDAN.

(AL-MAMLAKA AL-HASHIMIYA AL-URDUNIYA.)

THIS territory, which roughly corresponds to the area of the old Seljuk Kingdom of Kerak and of the Lordship of Montreal or Oultrejourdain in the Latin Kingdom of Jerusalem, is governed by His Majesty King **Abdullah Ibn Hussein**, G.C.M.G., G.B.E., born in Mecca, 1882, second son of the late King Hussein of the Hejaz and elder brother of the late King Feisal of Iraq, assisted by a Council of Ministers which was set up on 6 August, 1939. In April, 1923, a Declaration was made that subject to the approval of the League of Nations, His Majesty's Government would recognize the existence of an independent Government in Transjordan, under the rule of His Highness the Amir Abdullah, provided such government was constitutional and placed His Britannic Majesty's Government in a position to fulfil its international obligations in respect of the territory by means of an Agreement to be concluded between the two Governments. This agreement was signed in Jerusalem on 20 February, 1928, and having been accepted by the Legislative Assembly set up under Article 11, was ratified by the High Contracting Parties on 31 October, 1929. It was replaced, on 22 March, 1946, by a treaty signed in London between the Governments of Great Britain and Transjordan whereby Great Britain recognizes Transjordan as a sovereign independent state (Cmd. 6779). A new Anglo-Transjordan treaty was signed in Amman on 15 March, 1948. The treaty will remain in force for 20 years, but at the request of either party a revised treaty may be negotiated after 15 years (Cmd. 7404).

On 25 May, 1946, the Amir Abdullah assumed the title of King, and when the treaty was ratified on 17 June, 1946, the name of the territory was changed to that of 'The Hashimite Kingdom of the Jordan.' This name, instead of 'Transjordan,' however, came into general use only in 1949. The legislature consists of a lower house of 40 members elected by manhood suffrage (20 from Jordan and 20 from Palestine), and a senate of 24 members nominated by the King. Elections took place on 11 April, 1950.

The cabinet in May, 1951, was composed as follows :—

Prime Minister.—Samir Pasha Rifai.
Minister of Foreign Affairs.—Anastas Bey Hanania.
Minister of Education.—Ahmed Bey Touqan.
Minister of Justice.—Hazza Bey Al-Majali.
Minister of the Interior.—Abbas Pasha Mirza.
Minister of Defence.—Omar Pasha Matar.
Minister of Finance and National Economy.—Suleiman Pasha Nabulsi.
Minister of Reconstruction and Agriculture.—Hashim Al-Jayyusi Bey.
Minister of Commerce.—Anwar Bey Al-Khatib.
Minister of Health and Social Affairs.—Dr. Jamil Pasha Toutunji.

National flag : same as Iraq, but with one star only.

The part of Palestine held under the terms of the armistice with Israel 3 April, 1949, was in Dec., 1949, placed under the Minister of the Interior : all customs duties were abolished. Arab Palestine was formally incorporated in Jordan on 24 April, 1950; for the frontier lines see

p. 1166. Amman, the capital had, in 1950, an estimated population of 170,000. The official language of the country is Arabic.

Area, 34,750 sq. miles; population about 1,250,000. Of these, 400,000 live in the former territory of Palestine, 450,000 in the former Transjordan, and 400,000 are refugees from Israel. The country is divided into the Desert Area and 8 districts, viz., Ajlun, Amman, Belqa, Karak, Ma'an, Nablus, Jerusalem and Hebron. Government schools (1950), 328; number of pupils, 56,425; number of teachers, 1,462. Budget provision for education in 1950–51 is JD.208,360. The Arab Legion, which comprises military units, police and prisons, and a specially recruited Desert Patrol, was stated in 1949 to have about 14,000 all ranks. Detachments of the Royal Air Force are located at Amman. An annex to the treaty of 15 March, 1948, provides for the maintenance of R.A.F. units at Amman and Mafrak airfields, and for the setting up of an Anglo-Jordan Joint Defence Board to co-ordinate defence matters.

The part of country situated to the east of the Hedjaz Railway line is largely desert, but to the west of this line is potentially of high agricultural value. The density of the population is 10·1 per square mile in the whole country and 44·3 per square mile in the fertile western part. The resources of the country are agricultural and pastoral products; hillsides are being terraced, fruit-trees planted, irrigation planned. The most notable of several antiquity sites are Amman, Jerash, Kerak and Petra. There are phosphate deposits now under development. Potash is found in the Dead Sea, and possibly there is oil in the southern area. Metalled roads connect Amman with Jerusalem, Mafrak, Nablus and Madaba. The Haifa–Baghdad road runs through Jisr Majami, Irbid and Mafrak. Unmetalled roads have been constructed, making motor traffic possible from Amman to all the chief towns in the country. The road running from Amman to Ma'an has been continued to Aqaba, and, from this main road, branches run to Madaba, Kerak, Tafileh and Wadi Musa (Petra). The towns of Jerash, Irbid, Ajloun, Kufrinji, Remte and Deraa, the last named being in Syrian territory, are joined by good roads to Amman. The normal route from Amman to Deraa is through Zerka and Mafrak. From this latter, a branch road runs to Remte, El Husn and Irbid. The oasis of Azrak may be reached by motor car from Mafrak, Zerka or Amman. A regular mail service has been established by motor car between Palestine and Iraq across Jordan. Total length of all-weather roads, 422 miles (1950). The Hedjaz Railway from Deraa to Kalaat Mudawara runs, with the exception of the first few miles, through Jordan territory. South of Ma'an, however, the railway is in disrepair. The Cairo–Baghdad air route traverses the country from west to east. Two Jordan airlines maintain services of small aircraft from Amman and Jerusalem to Baghdad and Cairo. The local revenue in 1949–50 was JD.3,400,000.

Exports and re-exports totalled JD. 3·5 million in 1950 (JD. 5·7 million in 1949).

On 1 July, 1950, Jordan began to issue its own currency, the Jordan dinar, divided into 1,000 fils. The Jordan dinar equals £1 sterling. Jordan is a member of the sterling area. The following bank-notes and coins are in circulation:—50, 10, 5 dinars, 1 dinar, 500 fils (notes), 100, 50, 20 fils (cupro-nickel), 10 and 5 fils, 1 fil (bronze.)

Imports into the United Kingdom amounted to £302 in 1947; £7,667 in 1948; £10,917 in 1949; £2,950 in 1950; exports from the United Kingdom to £750,166 in 1947; £2,307,476 in 1948; £2,114,504 in 1949; £3.112,471 in 1950; re-exports from the United Kingdom to £3,020 in 1947; £7,705 in 1948; £15,691 in 1949; £13,135 in 1950.

Diplomatic Representatives.

1. Of Jordan in Great Britain (6 Upper Phillimore Gardens, W.8).

Envoy Extraordinary and Minister Plenipotentiary.—H.R.H. Emir Abdul Majeed Haider (appointed Dec., 1946).

Counsellor.—Hani Bey Hashim.

Military Attaché.—Maj. Selim D. Karadshi.

Attaché.—Iklil Sati.

2. Of Great Britain in Jordan.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Alec Seath Kirkbride, K.C.M.G., O B.E., M.C. (appointed 13 June, 1946).

First Secretary and Consul.—M. T. Walker.

Naval Attaché.—Capt. H. P. Henderson, D.S.O., R.N.

Civil Air Attaché.—R. M. S. Rayner.

There is a consular representative at Amman.

KOREA.

(Tai Han; Japanese name Chōsen.)

Korea, which had for many centuries been regarded as a subject kingdom by China and had been closed to foreigners, entered into treaty relations with Japan in 1876. Between 1882 and 1886 treaty relations with the United States of America, Great Britain, Germany, Italy, Russia and France were established. After the Russo-Japanese war of 1904–05 Korea was virtually a Japanese protectorate until its annexation by Japan as a result of a formal treaty between the two countries on 22 Aug., 1910.

Following the collapse of Japan in 1945, American and Russian forces entered Korea to enforce the surrender of the Japanese troops there, dividing the country for mutual military convenience into two portions separated by the 38th parallel of latitude.

The Allied Powers pledged themselves to restore Korea to complete independence after a 5-year period of Allied tutelage and trusteeship, but negotiations between the American and Russians regarding the initial steps broke down in May, 1946.

On 25 June, 1950, the North Korean forces crossed the 38th parallel and invaded South Korea. The same day, the Security Council of the United Nations asked all member states to render assistance to the Republic of Korea. On 7–8 July, the U.N. forces in Korea were placed under the command of General Douglas MacArthur (U.S.A.). After the U.N. forces had reached the Manchurian border, some 200,000 Chinese troops entered

the war on the side of the North Koreans on 26 Nov. and penetrated deep into the south. By the beginning of April, 1951, however, the U.N. forces had regained the 38th parallel. On 11 April, 1951, General MacArthur was superseded by Gen. Matthew B. Ridgway.

Government.—In the north, the Russians, arriving on 8 Aug., 1945, one month ahead of the Americans who landed 8 Sept., established a Communist-led 'Provisional Government.' This evolved into the the Supreme National Assembly, which, on 12 Sept., 1948, proclaimed the 'Korean People's Republic,' with Kim Ir Sen (or Kim Il-sung) as Prime Minister. The Constitution is said to be modelled closely on that of Bulgaria which had been adopted 4 Dec., 1947. The U.S.S.R. established full diplomatic relations on 13 Oct., 1948, and had withdrawn its armed forces by 25 Dec., 1948. The North thereafter was governed by a coalition of 3 parties, the Communists, the 'Chondoists' and the 'Democrats.' President of North Korea is 60-year-old Kim Du-bong. Foreign Minister is Pak Heun-Yong (sometimes spelled Pak Hen Yen).

South Korea held a general election (under the observation of a commission from the United Nations) on 10 May, 1948, at which about 90% of the electorate voted for 200 members of a National Assembly. On 17 July the Assembly adopted a constitution - the first Korean Constitution in 4,000 years of history—and, on 20 July, elected Dr. Syngman Rhee as President, by a vote of 180 out of 196 votes cast. Lee Si Yung was made Vice-President. On 2 Aug., Lee Bum Suk, aged 49, was elected the first Prime Minister. He has a cabinet of eight. He resigned on 3 April, 1950, and the post was vacant until 23 Nov. when John Chang (ambassador to the U.S.) was elected Premier by 148 to 6. Provision had been made for a National Assembly of 300 members, but 100 seats were reserved for the one-third of the population living north of the 38th parallel if and when North Korea joined the South in a united country.

On 25 July, 1948, President Rhee was inaugurated, and on 15 Aug. the Republic of Korea was proclaimed. U.S. military government ceased at midnight. On 22 Nov., 1948, the National Assembly, by 88 to 3 votes with 117 abstentions, requested the U.S.A. troops to stay.

Area and Population.—The area of North and South Korea is 220,840 square kilometres (85,266 square miles) with population (1944) of 25,120,174. Vital statistics, 1944, were:—Crude birth rate, 31·8 per 1,000 population; death rate, 21·2; marriage rate, 14·5; infantile death rate, 115·6 per 1,000 live births.

North Korea covers an estimated 127,206 square km. (49,114 square miles) with a (1939) population of 8,229,000; such heavy industry as Korea has is in the north. In 1940 the city of Heijo (Pyeng-Yuang), the capital, had 285,965 inhabitants.

South Korea, primarily agricultural, but with several thousand small factories, covers an estimated 93,931 square km. (36,152 square miles) with an estimated population, as of 30 June, 1948, of 20,300,000, and an approximate density of 561·5 per square mile; it includes 9 provinces and Seoul City, which was given provincial status during the occupation.

A census in September, 1946, of South Korea showed a population of 19,369,270 (15,879,110 in May, 1944), of whom 9,791,707 (50·5%) were males. The population of the largest cities in South Korea was as follows: Seoul (Keijo), the capital, 1,141,766; Pusan, 400,156; Taegu, 269,113, and Inchon, 215,784.

The Korean language belongs to the Ural-Altaic group, is polysyllabic,

agglutinative and highly developed syntactically. The modern Korean alphabet of ten vowels and fourteen consonants forms a script known as Eunmoon, said to be one of the most perfect in the world. This alphabet was developed during the fifteenth century under the Yi dynasty. The scholars have looked down on its general adoption and continued to use Chinese ideographs.

Religion and Education.—Basically the religions of Korea have been Animism, Buddhism (introduced 374 A.D.) and Confucianism, which was the official faith from 1392 to 1910. The South Korean government after 1945 ordered every district to build a Buddhist temple; Buddhist temples had been banned in towns since 1469. Catholic converts from China introduced Christianity in 1784, but the ban was not lifted until 1882; the first missionaries arrived in 1884. Estimated Christian population as of 1 March, 1948, was 666,660.

South Korea, in Dec., 1948, had 3,415 elementary schools, with 2,708,301 pupils; 240 middle schools (a few are co-educational), with 266,784 pupils; 202 technical schools, with 122,547 pupils; 18 normal schools, with 14,000 pupils. For higher education there were 41 colleges and universities, with 21,250 students (March, 1948); in Seoul, 9 government colleges and one graduate school were united in the Seoul National University, with, Dec., 1948, 6,989 students. For adult education (the campaign against illiteracy) there were 8,287 folk schools, with 777,868 pupils. Illiteracy in the South has been reduced from 44% in March, 1947, to 29% in Dec., 1948.

There were, in 1949, 116 cinemas in South Korea, with a seating capacity of 55,100.

Finance.—On 13 June, 1949, a presidential decree established a dual rate of exchange for the (South Korea) *won*, one of 450 won = $1·00 U.S. for government transactions and another of 900–950 won = $1·00 for all other transactions. But by Oct., U.S. notes sold at the rate of 2,450 won for $1·00.

For South Korea the actual figures for the fiscal years 1946–47 and 1947–48 and the estimates for 1948–49 were as follows (in Korean *won*, which, until mid-June, 1949, had no exchange rate):—

	1946–7	1947–48	1948–49[1]
Revenue . . .	5,133,372,000	15,335,971,000	28,491,000,000
Expenditure . . .	10,925,176,000	22,623,398,000	50,728,000,000

[1] Estimates.

Production.—Korea is essentially an agricultural country with a cultivated area of [illegible] 11·0 million acres. In South Korea more than 1,400,000 farm [illegible] owned by Japanese (18·3% of all the rice land and 8·7% of dry-crop land) were sold to Korean farm families in 1948; the buyers paid for them in grain, the total price being 3 times the annual yield. About 3,300,000 people benefited. This was followed by a decree, June, 1949, giving some 1 million tenants and part-tenant farmers the opportunity to purchase the land they till.

The chief crops are rice (about 27% of the cultivated area, in the past largely exported, and providing Japan with 10% of her consumption), barley, wheat, beans, grain of all kinds, besides tobacco and cotton. The rice crops (for all Korea) reached their pre-war peak in 1937 at 2,712,752 metric tons; annual average, 1940–44, 2,024,202 metric tons; 1947 (rough estimate), 3,200,000 metric tons. Ginned cotton production, for all Korea, 1934–38, 37,000 metric tons.

South Korean crops, with their 1949 output (in metric tons) are :—Barley, including naked barley (640,000), millet (134,279 in 1947), soybeans (188,000) and wheat (60,000). In 1949, 18,000 metric tons of ginned cotton were produced for 700 spinning, weaving and knitting mills in South Korea. 38,727 metric tons of fruit and 1,598,716 tons of vegetables were grown in 1947. Silkworm rearing is also carried on; output of cocoons in South Korea was 12,883,834 lb. in 1946 and 5,800,303 lb. in 1947. Raw silk output was 325 tons in 1946. Output of tobacco, a government monopoly, was 32,700,000 kilos in 1948. Livestock is raised as a by-product of agriculture, but numbers have decreased. The cattle are well known for their size and quality. In 1947 there were 1,339 milch cattle, 640,572 work cattle, 35,663 work horses, mules and donkeys, 373,882 pigs, 3,226 sheep; in Dec., 1949, there were 545,000 pigs and 31,000 horses. The fishing industry was intensively developed by the Japanese; the catch in 1949 was 294,500 metric tons. Whale fishing is carried on off the coast.

Although Korea is highly mineralized, deposits are mostly small with the exception of tungsten; South Korea in the Sandong mine has one of the world's largest deposits of tungsten (869 metric tons in 1949). All Korea furnished the Japanese Empire in the years 1933–45 with 36,000 tons of tungsten, about 19,000 coming from South Korea. The latter is also, potentially, an important supplier of graphite, 40,670 metric tons in 1949. But North Korea has the iron ore (3,387,000 metric tons in 1944) and almost all the important metallurgical works. South Korea's output, 1949, included (in metric tons) :—Copper (smelter output), 808; manganese ore, 32,377; salt, 188,812; kaolin, 9,735; gold, 3,149 fine oz.; silver, 18,932 fine oz.; talc, 2,773; bismuth, 179, and fluorite, 1,230.

Industry.—Industries in the North were intensively developed by the big Japanese concerns, notably cotton spinning, hydro-electric power and cotton, silk and rayon weaving, and the leading industry, the nitrogeneous fertilizer works of the Chōsen Chisso Company and its allied chemical factories at Konan, on the east coast. The 5 biggest power stations and the projected station on the Yalu River, to be one of the largest in the world, are all in the North, as is Korea's sole petroleum refinery and 7 out of the 8 major cement works.

North Korea's recovery, both agricultural and industrial, appears to have outstripped that of the South. By 1948 it was self-sufficient in food (helped by the exodus to the South of the propertied classes) while industrial output was said to be four times that of 1946.

South Korea had in Oct., 1948, 7,429 plants, with 140,310 employees, compared with 9,323 plants and 300,520 employees in June, 1944. The silk industry in Dec., 1948, had in operation 12,809 power looms, 1,468 foot looms and 4,031 hand looms. Monthly output of silk cloth was 525,430 square yards. Cotton manufacturing industry is fairly well developed. In Dec., 1948, there was 286,256 active cotton spindles in 9 factories and 8,920 looms in 11 factories; production, 1947, was 12,451,600 lb. of yarn and 33,189,240 yards of cloth. Cement output, 1948, was 17,352 metric tons.

Commerce.—Trade between Korea and Japan proper amounted in 1939 to 25% of Japan's total foreign and colonial trade. Rice amounted to 50% and metals and minerals to 15% of Korean exports. Imports were swollen by supplies for the Japanese-owned industries.

North Korea's trade is mainly with the U.S.S.R., rising from 74 million roubles in 1946 to 264 million in 1948; trade in 1949 was forecast at 337 million.

For details of foreign trade in 1947 and 1948, *see* THE STATESMAN'S YEAR-BOOK, 1950, page 1188.

Figures furnished by the South Korean government to the United Nations, stated in millions of U.S. dollars, show :—Imports, 1946, 51; 1947, 197; 1948, 206, and 1949, 139. Exports were :—1946, 1; 1947, 8; 1948, 19, and 1949, 14.

Value of private foreign trade (excluding government to government imports and exports) for the calendar years 1947 and 1948 were :—1947, imports 2,088,125,000 won (originally calculated, on an inadequate exchange rate, at 615,140,250 won) and exports 1,111,133,000 won (originally published as 457,169,685 won); 1948, imports, 8,774,603,000 won and exports, 5,978,611,000. In 1948 more than 90% of the private trade, both ways, was with Hong Kong. There was some legal authorized trade with North Korea which is not included in these totals and some illegal trade with North Korea, China, Japan and Manchuria.

Trade on the government level for 1946, 1947 and 1948 (with the normal trade figures, 1937, for comparison) was as follows (in thousands of $, U.S.):—

Country	Exports				Imports			
	1937 [1]	1946	1947	1948	1937 [1]	1946	1947	1948
United States .	425	—	2,076	2,057	6,136	32,610	139,573	126,927
Japan .	164,807	360	2,528	6,500	211,726	15,026	20,844	22,766
Other . .	30,346	—	392	308	30,755	1,860	14,954	29,900
Total .	195,578	360	4,996	8,865	248,617	49,496	175,371	179,593

[1] In 1937 Korea included both South and North Korea.

On the government level exports were chiefly tungsten ores and concentrates, marine products and ginseng; imports were mainly [illegible], petroleum, coal and machinery.

[illegible] exports to Korea (Board of Trade returns) were in 1938, [illegible],879; 1948, £697; 1949, £4,950, and 1950, £66,937 plus re-exports of £2,192. United Kingdom imports were in 1938, £5,946; 1947 and 1948, nil; 1949, £45,858, and 1950, £281,466.

Shipping and Communications.—Shipping entered at Korean ports engaged in foreign trade amounted to 2,171,268 tons in 1939, and in the domestic trade to 11,474,445 tons. In December, 1939, there were 738 steamships, of 106,712 tons, and 1,125 sailing ships, of 45,431 tons, registered in Korea. As of Aug., 1947, 6 commercial shipping companies had established regular runs between Korea and overseas ports. In 1950, [illegible] sed only the ports of Inchon and Pusan but other shipping, [illegible] danger of mines, used the ports of Kansan, Mokpo, Cheju, [illegible] nd Masan. Warehouse facilities (Japanese-built) are reported excellent.

Transport in the interior is by rail, road (motor car, oxen, pack-horses, etc.) and river. Vehicles on 31 March, 1948, included 905 taxicabs, 6,817 trucks, 697 buses, 548 privately-owned motor cars and 682 government-owned sedans; drivers' licenses issued, 33,490. In 1939, there were 27,887 kilometres of roads (including third-class roads). In 1940, there were 2,919 miles of government railways and 1,234 miles of private railways; in 1948, 1,676 miles of railways were in operation.

Post offices in South Korea total 623; telegraph stations, 525; telephone

subscribers, 1949, 42,500, served by 164 telephone exchanges; some 80% of telegraph and telephone lines must be replaced within 5 years.

Currency and Banking.—In Sept., 1948, there were 8 banks, semi-government and ordinary, registered in South Korea, with 136,140,740 *won* paid-up capital. There are also 550 'financial associations' which handle co-operative buying and selling and furnish banking facilities for their members. On 30 June, 1948, deposits of banks and 'financial associations' were 23,766 million *won*. For the exchange value of the *won* see p. 1186.

The central government bank for South Korea is the Bank of Chosen with a paid-up capital of 50 million *won*. It is the only note-issuing bank in its territory. In October, 1946, there were notes outstanding amounting to 12,198 million *won*, rising in Dec., 1947, to 33,388 million and declining to 30,913 million in Sept., 1948. Bank of Japan notes are no longer valid.

Diplomatic Representatives.

1. Of Korea in Great Britain (49 Bryanston Sq., W.1.)

Chargé d'Affaires.—Yun Young Lim.
Secretary.—You Doug Han.

2. Of Great Britain in Korea.

Chargé d'Affaires.—A. C. S. Adams.
First Secretary and Consul.—S. E. Faithful, O.B.E.
Acting Military Attaché.—Maj. W. R. L. Turp, M.B.E.
Air Attaché.—Group Capt. R. A. C. Barclay, A.F.C.

LEBANON.

(Lubnān.)

Lebanon is an independent republic and a member of the United Nations and the Arab League. After 20 years' French mandatory régime, its independence was proclaimed at Beirut on 26 Nov., 1941. On 27 Dec., 1943, an agreement was signed between representatives of the French National Committee of Liberation and of Lebanon, by which most of the powers and capacities exercised hitherto by France under mandate were transferred as from 1 Jan., 1944, to the Lebanese government. The evacuation of foreign troops was completed in Dec., 1946.

President of the Republic.—Beshara al-Khoury (elected 21 Sept., 1943; re-elected May, 1948).

Prime Minister and Minister of the Interior, Finance, Defence and Foreign Affairs.—Hussein Bey Aoueini.

National flag: red, white, red (horizontal), with a green cedar on the white stripe.

Elections were held on 15 April, 1951; the Constitutionalist Party retained its majority though diminished.

Area and Population.—The Lebanon is a mountainous country about 135 miles long and varying between 25 and 50 miles wide, bounded on the north and east by Syria, on the west by the Mediterranean and on the south by Israel. Between the two parallel mountain ranges of Lebanon and Anti-Lebanon lies the fertile Bekaa Valley. About one-half of the country lies at an altitude of over 3,000 feet.

The area of Lebanon is estimated at 3,400 square miles. The population was, in 1949, estimated at 1,246,580. The principal towns, with registered citizens, are:—Beirut, 201,451; Tripoli, 65,137; Zahlé, 24,776; Saida, 19,296.

Vital statistics, 1950:—Births, 28,953; deaths, 9,714; marriages, 7,930; divorces, 515.

Religion and Education—The majority of the population are Christians, who have been indigenous since the earliest time of Christianity. There were, in 1949, 672,388 Christians, of whom 359,182 were Maronites, 123,219 Greek Orthodox, 77,497 Armenians, 73,447 Greek and Roman Catholics, 12,010 Protestants. Moslems numbered 557,207, of whom 253,020 were Sunnis, 224,468 Shiites and 79,719 Druzes. The Society of Friends had 60 members in 1949.

Government schools in 1949 comprised 734 primary schools (60,019 pupils), a technical and 4 trade schools (456 pupils), a teachers' training college (173 students), an agricultural school (43 students), a conservatory of music (336 students) and a reformatory (48 boys). There were also 808 private schools (75,475 pupils), and 279 foreign schools of all grades (53,208 pupils).

There are two universities in Beirut, one French and one American. The American university has 4 schools, with a total of 730 students in 1949. The French university of St. Joseph (founded in 1875) has 3 faculties and 3 schools; total students, 1,417 in 1949.

The Lebanese Academy of Fine Arts includes schools of architecture (47), letters (22), painting and sculpture (29), and music (179), and a section on political and social science (30).

There were, in 1950, 53 cinemas with a seating capacity of about 30,000.

Finance.—The 1950 budget for Lebanon balanced at £Leb.85,300,000, that for 1951 at £Leb.89,450,000. Indirect taxation normally accounts for 85% of the revenue. Main items of expenses in 1949: Ministry of Public Works, £Leb.18,055,402; Interior, £Leb.11,577,100; Defence, £Leb.15,596,363; Education, £Leb.7,346,000.

Defence.—The Army strength is about 5,000, the gendarmerie about 2,500, and the police force 800 men. The Army uses mainly equipment of French type, and the gendarmerie of British type. There is a small air force, equipped with British and Italian training machines.

Production and Industry—Lebanon is essentially an agricultural country, although owing to its physical character only about 22% of the total area of the country is at present cultivated. The forests of the past have been denuded by exploitation and the unrestricted grazing of goats, and only about 74,000 hectares of indifferent timber remain, and soil erosion is considerable.

The estimated yield in 1,000's of metric tons of the main crops in 1949 were as follows (1948 figures in brackets):—Wheat, 54 (?); maize, 24 (50);

barley, 23 (26); potatoes, 47 (35); onions, 42 (37); water-melons, 23 (22); olives, 35 (80); tomatoes, 26 (26); citrus fruits, 55 (69); grapes, 81 (80).

Iron ore has been mined in parts of Lebanon in the past, and evidence exists of possible further deposits. Galena has also been mined but there is no evidence of occurrence in quantity. Lignite is found in the North Lebanon and Mount Lebanon areas but the quality is poor and mining unprofitable in normal times. The deposits of asphalt in Mount Lebanon appear to be small and difficult of access.

Industry as a whole is on a small scale. The most important local industries are cotton spinning and weaving and cement production. Silk yarn and silk piece-goods are also produced, and woollen cloth from imported yarn. Other industries include olive-oil production, tobacco growing and cigarette manufacture, soap-making, match-making and tanning. In 1950 the production of cement amounted to 263,197 tons and of cotton yarn to 1,950 tons.

Tripoli is the terminal of the Iraq Petroleum Company's pipeline bringing crude oil from Iraq, and there the company also operate a refinery which produces sufficient refined products to meet the country's requirements. 303,697 tons of crude oil were processed at the refinery in 1949, giving 61,583 tons of gasolene, 33,482 of kerosene, 45,348 of gas-oil, 134,089 of fuel oil and 865 of diesel oil. Saida is the terminal of the Trans-Arabian Pipeline Company's pipeline now completed, to bring oil from Saudi Arabia to the Mediterranean coast.

Commerce.—From 1943 to 13 March, 1950, Lebanon was linked with Syria by a customs union. The basis of Lebanon's prosperity is commerce and Beirut may be termed the market of the Levant. Despite the dissolution of the customs union, Beirut still remained in 1950 the main port of entry into Syria, and there is also a large transit trade with Iraq, Jordan and elsewhere.

For trade statistics up to 1949, *see* SYRIA. In 1950, Lebanese imports to the U.K. amounted to £278,767, U.K. exports to the Lebanon to £8,057,834, re-exports to £45,123.

Customs duties are high and are usually imposed on an *ad valorem* basis; the receipts from this source are the Lebanese government's main source of income. The considerable adverse balance of trade is to a certain extent offset by receipts from the tourist trade, and remittances from émigrés.

Communications.—*Shipping.* Beirut is far the largest and busiest port, 1,317 ships (total tonnage 2,496,732) having loaded 185,726 tons and unloaded 782,301 tons in 1950. Tripoli is now of little consequence, except for tankers, but the small port of Saida in the south may be expected to become more important with the opening of the oil pipeline.

Aviation.—The old airport at Beirut receives a considerable volume of traffic between Lebanon and Cairo, Cyprus, Baghdad, Amman, Istanbul, Ankara and Jedda, but the new international airport at Khaldé, near Beirut, was opened in 1950 and is used by B.O.A.C. and other trunk-line operators offering direct services with London, European capitals, the Far East and the U.S.A. There are 2 national airlines, Middle East Airlines and Compagnie Générale des Transports.

Roads.—The main roads in Lebanon are good. The surface is normally of asphalt and they are normally well maintained. The arterial roads are as follows:—Coastal north/south trunk route, Lebanon/Syria frontier–Tripoli–Beirut–Saida–Nakoura (Israel frontier), 228 km.; west/east trunk route (for Damascus, 112 km.), Beirut–Aley–Chtaura–Lebanon/

Syria frontier, 65 km.; Inland north/south trunk route, Lebanon/Syria frontier (Homs)–Baalbeck–Zahlé-Chtaura, 105 km.

The network of main roads and secondary roads for intercommunication and connexion with the arterial routes is adequate and in general attains a reasonable standard of efficiency.

Passenger transport elsewhere than within the town of Beirut is provided for by a great number of small private operating companies running cheap but irregular bus services, and long-distance taxi services. The greater proportion of goods traffic is hauled by road.

At the end of Dec., 1950 (Dec., 1949, figures in brackets), the following numbers of vehicles were registered :—Private cars, 10,723 (9,187); buses, 679 (680); goods vehicles, 3,019 (2,967); motor cycles, 850 (741).

Beirut is the western terminus of Nairn Transport Ltd. who run a bus service to Damascus to connect with their trans-desert coach service to Baghdad.

Railways.—The railways of Lebanon and Syria are operated by a single concessionary company, Les Chemins de Fer Damas & Hama et Prolongements (D.H.P.). Two gauges are in use, a narrow gauge (1·05 metres) track railway, now used only for goods traffic, connecting Beirut (*via* Rayak) with Damascus (147 km.), thence *via* Deraa with Haifa (at present not in use) and with Amman and Maan, and a standard gauge line (1·435 metres) Israel frontier–Nakoura–Beirut–Tripoli (192 km.) and thence to Homs (102 km.) and Aleppo in Syria [illegible] to Mosul, Baghdad, Ankara and Istanbul. Another branch [illegible] gauge line connects Rayak, in the Bekaa Valley, with Homs (332 km.). The port area of Beirut is now directly connected with the standard gauge line.

The railway system is operated at a considerable annual loss, attributable largely to unrestricted competition from road transport. On the Lebanese sectors of the D.H.P. Railway 67,000 passengers and 516,000 tons of goods traffic were carried in 1949.

Posts.—An automatic telephone system is shortly to be installed in Beirut. There is at present (May, 1951) no telegraph, postal or telephone communication with Israel.

Currency, Banking, Weights and Measures —The official currency since 1 May, 1920, is the Lebanese pound, divided into 100 piastres. Under the Anglo-French Financial Agreement, concluded at Algiers in Feb., 1944, the rate of the Syrian–Lebanese pound was fixed at 8·83 Syrian-Lebanese pounds to the pound sterling. Since the devaluation of sterling the official parity has become £Leb.6·13 = £1 sterling, as the Lebanon did not devalue.

In Nov., 1948, the Lebanese Government ratified a decree legalising the 'free market' in foreign exchange, and all imports effected by Lebanese merchants from the United Kingdom are paid for in free market sterling, the premium on which varies, but in March, 1951, was quoted at £Leb.9 50 to £ sterling. Until the middle of 1949, Lebanon formed part of the French franc area. At that time the British Government established a separate Lebanese account; all sterling transfers between Lebanon and the scheduled territories are now subject to authorization.

At 31 Dec., 1950, the notes in circulation amounted to £Leb.196,000,000.

Coins in circulation :—2, 2½, 5 piastres (bronze–aluminium), 10, 25, 50 piastres (silver–copper). The Banque de Syrie et du Liban has the sole right of note issue. The concession is for 25 years by an agreement signed on 29 May, 1937. The British Bank of Persia and the Middle East has branches in Beirut and Tripoli.

A decree dated 22 Aug., 1935, makes the use of the metric system legal and obligatory throughout the whole of the country. In outlying districts, the former weights and measures may still be in use. They are: 1 *okiya* = 0·47 lb.; 6 *okiyas* = 1 *oke* = 2·82 lb.; 2 *okes* = 1 *rottol* = 5·64 lb.; 200 *okes* = 1 *kantar*.

Diplomatic Representatives.

1. Of The Lebanon in Great Britain (21 Kensington Palace Gardens, W.8.).

Minister.—Victor Khoury (accredited 11 July, 1947).
Counsellor.—Mohamed Fathalla.
Secretary.—Nabih Noussair.

2. Of Great Britain in the Lebanon.

British Envoy Extraordinary and Minister Plenipotentiary.—Edwin Arthur Chapman-Andrews, C.M.G., O.B.E.

First Secretaries.—R. W. Bailey (*Head of Chancery and Oriental Secretary*); M. Arab, M.B.E. (*Oriental*); E. P. Southby (*Consul and Commercial Secretary*); H. O. V. Verney, O.B.E. [illegible]
Military Attaché.—Lt.-Col. G. P. H[illegible], M.C.
Naval Attaché.—Capt. H. P. H[illegible], D.S.O., R.N.
Civil Air Attaché.—R. M. S. Rayner.

There are consular representatives at Beirut and Tripoli.

LIBERIA.

Constitution and Government.—The Republic of Liberia had its origin in the efforts of several American philanthropic societies to make permanent provision for freed American slaves by establishing them in a colony on the West African coast. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On 26 July, 1847, the state was constituted as the Free and Independent Republic of Liberia. The new state was first recognized by Great Britain and France, and ultimately by other powers. The constitution of the Republic is on the model of that of the United States, with important differences. The executive is vested in a President and Cabinet, and the legislative power in a legislature of 2 Houses, called the Senate and the House of Representatives. The President is elected for 8, the House of Representatives for 4 and the Senate for 6 years. Under legislation enacted in 1949, the President may be re-elected for a period of 4 years The President must be a citizen of the Republic by birth or a naturalized citizen of over 25 years' residence and have unencumbered real estate to the value of $2,500. Electors must be of negro blood and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres

of civilization, take little part in political life. By the end of 1945, legislation was passed granting manhood suffrage to the natives in the 3 hinterland provinces, which will be represented in the legislature by one member each. In 1947, the franchise was extended to women.

National flag: Eleven horizontal stripes, 6 red ones [illegible], 5 white. In the upper corner, nearest the staff, is a square [illegible] a depth of 5 stripes. In the centre of this blue field is a five-pointed white star.

National anthem: All hail, Liberia, hail! (words by President Warner; tune by O. Luca, 1860).

The official language is English.

President of Liberia.—William V. S. Tubman (elected on 6 May, 1943, for the period, 1944–52).

Vice-President.—Charles Lorenzo Simpson.

On 31 March, 1942, an [illegible] s signed between the United States and Liberia by which the [illegible] were given the right to construct, control, operate and defend airports in Liberia for the duration of the war. All the U.S. armed forces have now been withdrawn from Liberia. On 8 June, 1943, a further mutual aid agreement was concluded with the United States, which extended lend-lease aid to Liberia for the purpose of defence and enabled it to increase its armed forces.

At the end of 1944, the United States Government sent a Public Health Service Mission to Liberia for an initial term of five years, and they also sent a Mission of the Foreign Economic Administration to advise the Liberian Government on the economic development of the country. Both missions continue in operation.

Area and Population.—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre-Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 43,000 square miles. The total population is estimated to be over 1½ millions, all of the African race. Since the organization of the frontier force the Government has obtained complete control of Northern Liberia and of the Kru countries in Southern Liberia. The indigenous natives belong in the main to 6 principal stocks:—(1) The Mandingos (Muhammadan), (2) the Gissi, (3) the Gola, (4) the Kpwesi, (5) the Kru negroes and their allies, and (6) the Greboes. The other principal tribes in the Republic are:—Vai, Mendi, Belle, Dey, Manoh, Geo, Bassa, Buzzi, Gbandi, Krahn and Geh.

The Kru tribes are mostly pagan. The number of Americo-Liberians is estimated at between 12,000 and 20,000. About 60,000 of the coast negroes may be considered civilized. There is a British negro colony of a thousand or so, and there are about 400 Europeans and Americans, excluding the harbour construction personnel at Monrovia. The coast region is divided into counties, Grand Bassa, Sino, Maryland, Cape Mount, and one territory (Marshall), each under a government superintendent, and Montserrado,

subdivided into 2 districts, each under a superintendent. Monrovia, the capital, has an estimated population of over 20,000, and is administered as a commonwealth district by a Municipal Board appointed by the President. It is one of the 9 ports of entry along the 350 miles of coast, the other being Robertsport (Cape Mount), Marshall (Junk), Buchanan, River Cess, Greenville, Sinoe, Sasstown, Grand Cess and Harper (Cape Palmas). Other towns are Royesville, Arthington, Careysburg, Millsburg, Whiteplains, Bopora (native), Rocktown (native), Garraway, Upper Buchanan, Edina, Salala, Gbanga, Konolah, Dobli Island, Kakata, Paynesville, Clay Ashland.

Religion, Education and Justice.—Religious institutions in Liberia are mainly Baptist, Methodist, Episcopalian, African Methodist, Pentecostal, Seventh Day Adventist and Lutheran. There are several American, Canadian and Roman Catholic missions at work.

Education is under the direct supervision of a department of public instruction with a secretary as the head and 8 supervising teachers, one for each county and the three hinterland provinces.

There are at present (1950) 270 schools, of which 117 are government, 116 maintained by missions, 22 private schools, 2 philanthropic schools, 6 tribal schools, 5 professional and technical and 2 schools maintained by churches. The total number of pupils receiving instruction is over 24,500.

The Government has a college at Monrovia (Liberia College), with 6 professors, 4 instructors, 3 tutors and 196 students. There are 6 high schools maintained by government, one by the Methodist Mission and another by the Protestant Episcopal Mission.

Justice is administered by a supreme court, circuit courts and lower courts.

A criminal code was enacted in 1914; the customs laws were codified in 1907 and revised in 1940.

Finance.—The revenue and expenditure for 5 years, in $ (U.S.), was as follows :—

	1944-45	1945-46	1946-47	1947-48	1949-50
Revenue[1] . .	1,881,622	2,197,879	3,215,726	3,056,691	3,818,741
Expenditure . .	2,041,999	2,307,114	2,784,060	3,577,667	4,437,852

[1] Revised figures from the President's Seventh Annual Message, 7 Nov., 1950.

Revenue for 1948-49, $3,735,354.

The customs revenues were for 1946, $1,197,208; for 1947, $1,962,571; for 1948, $2,181,251; for 1949, $2,309,244; for 1950, $2,020,094.

Important sources of revenue (1948) :—Hut tax, $298,692, total internal revenues, $1,146,447; centennial tax, $161,272. Main expenditures (1948) :—Government operational expenses, $2,722,817. Funded debt (1948), $61,525; floating debt (1948), $1,708.

In 1926 arrangements were made with the Finance Corporation of America for a loan of $5,000,000, of which approximately half has been issued. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which was originally secured by a first lien on customs revenues and headmoneys. Since 1943 the service of the loan is a first lien on all revenues in excess of a basic Budget, which is variable according to the total revenue, and is at present fixed at 85 to 90% of the estimated revenue, depending on whether the estimate is below or above a million dollars.

The Loan Agreement also provides for financial supervision by American

officials and additional experts to be employed by the Liberian Government. The external bonded debt on 1 Sept., 1950, was $549,000.

The internal floating debt as at 31 Dec., 1949, amounted to $5,794.

Defence.—For defence every citizen from 16 to 45 years of age capable of bearing arms is liable to serve. The establishment organized on a militia basis numbers 4,000, divided into 10 infantry regiments. There is in addition an enlisted frontier force of 60 officers and 1,200 men.

Production, Commerce.—The agricultural, mineral and industrial resources of Liberia are comparatively undeveloped. The soil is productive, but due to excessive rainfall (from 160–180 inches per year), there are large swamp areas. The forests are mainly of the jungle variety, not well adapted to production of timber. Many forest products are gathered for export, of which piassava (1949–50 output, 4,854,080 lb.), fibre and palm kernels are the most important, and the collection of wild rubber is once more being undertaken. Rice, cassava, coffee and sugar cane are cultivated.

However, rice production does not equal consumption, and sugar cane is grown for manufacture of locally consumed rum. Coffee production is increasing. The Firestone Plantations Company have large rubber plantations, employing about 25,000 men and producing annually 25,000 tons of crêpe rubber and concentrated latex. Their concession comprises about 1 million acres and expires in the year 2025.

Gold-mining from alluvial deposits is of increasing importance; diamonds have been found in certain sections. Mineral resources have, however, not been completely surveyed; but development of iron-ore deposits (known to exceed 25 million tons of good quality) at Bomi Hills has been started by the (American) Liberia Mining Company. There are no important manufacturing industries.

Foreign trade for 5 years was as follows (in dollars):—

	1945	1946	1947	1948–49 [1]	1949–50[1]
Imports . . .	5,829,252	4,731,715	8,762,728	—	—
Exports . .	11,342,625	12,312,982	13,092,039	14,327,865	17,772,121

[1] Year ending 31 Aug.

The principal imports in 1947 were (in dollars):—Metals and manufactures of (except machinery and vehicles), 461,686; machinery and vehicles, 790,212; non-metallic minerals (including petroleum products), 781,555; vegetable food products and beverages, 1,041,889; textile fibres and manufactures, 3,433,392; chemicals and related products, 325,041; vegetable products (inedible), 494,670. No later import statistics have been issued.

The principal exports in 1949–50 were (in dollars):—Plantation rubber, 15,005,603; palm-kernels, 1,806,883; palm-oil, 307,870; raw gold, 339,089; piassava, 158,177. The principal port for exports was Marshall, adjacent to the rubber plantations, about 40 miles east of Monrovia, the capital.

According to Board of Trade returns, the value of the trade between the United Kingdom and Liberia was as follows (in £ sterling):—

	1938	1947	1948	1949	1950
Imports into U.K. .	7,184	3,214	6,316	1,851	537
Exports from U.K. .	77,644	161,309	340,470	1,116,590	996,604
Re-exports from U.K. .	7,871	1,251	4,780	6,364	8,852

Communications.—In 1950, 346 ships entered the ports. Of these, 84 were Dutch, 81 were American, 69 British and 25 Norwegian.

There are no railways and means of transport are extremely limited. There are about 400 miles of state roads and 195 miles of private roads in the rubber plantations fit for light motor traffic, all of which are in the coastal area. The state has, with lend-lease aid, extended the highway system towards the interior, and there is now a road from Monrovia to Zerekore in French Guinea. In the interior, communication is maintained between villages by tracks, all goods being carried by native porters, except in the districts of Gbanga and Saniquellie, where transportation is done by vehicles.

Motor roads are being constructed by native chiefs with state assistance, and transportation by vehicle is becoming much more common. A new bridge over the St. Paul River, completed in Nov., 1949, carries road and rail traffic to the iron-ore mines at Bomi Hills.

A harbour development has been planned for Monrovia, and the port works, including a submarine base, were, in 1945–47, constructed under the auspices of the United States Government under lend-lease terms. The port, a free port, was opened on 26 July, 1948.

The Farrell Lines Inc. operate a coastal service between the several counties and with Freetown, Sierra Leone.

The river St. Paul is navigable for a distance of 25 miles from its mouth for small craft of shallow draught, and a service of motor launches runs between Monrovia and White Plains. The Cavalla River is navigable for 50 miles.

The airport for Liberia is Robertsfield (over 50 miles from Monrovia); Fisherman's Lake has been closed down. Air services are maintained by Air France, Pan American Airways, and Transaereos Portuguesas.

There is cable communication (Compagnie des Cables Sud-Américaine) with Europe and America via Dakar and a wireless station is maintained by the Government at Monrovia. There is no telephone or telegraph service in the country, except in the government departments and on the Firestone plantations.

There are wireless stations at Monrovia, Bassa, Harper, Kolahun, Cape Mount and Sinoe. The wireless stations at Harbel and Gedetarbo, near Cape Palmas, have since 1928 been operated as a public utility by the United States–Liberia Radio Corporation, a subsidiary of Firestone Plantations Company.

Postal agencies have been organized throughout the interior service of the country. This establishment has improved and facilitated the system of mail despatched throughout the Liberian hinterland.

Money, Weights and Measures.—The money in circulation is United States currency since 3 November, 1942, but there is a Liberian coinage in silver and copper. Official accounts are kept in dollars and cents. The Liberian coins are as follows:—Silver, 50-, 25- and 10-cent pieces; alloy, 2-, 1- and ½-cent pieces.

British currency ceased to be legal tender after the end of 1943, and on 1 January, 1944, the Liberian dollar was raised to parity with the United States.

Weights and measures are the same as Great Britain and the United States.

The Firestone Plantations Company have established a bank at Monrovia under the title of 'The Bank of Monrovia, Inc.'

Diplomatic and Consular Representatives.

1. Of Liberia in Great Britain (37 Pont St., S.W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Baron Robert Aernout de Lynden (accredited 26 Sept., 1944).

First Secretary and Consul-General in London.—Wilmot A. David.

2. Of Great Britain in Liberia.

Minister and Consul-General.—John Gilroy Baillie.

Vice-Consul.—W. F. M. Davies, O.B.E.

LIECHTENSTEIN.

The Principality of Liechtenstein, situated between the Austrian province of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign state, whose history dates back to 3 May, 1342, when Count Hartmann I became ruler of the Principality of Vaduz. Additions were later on made to the count's domains, and by 1434 the territory reached its present boundaries. It consists of the two counties of Schellenberg and Vaduz (until 1806 immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of 23 Jan., 1719, granted by the Emperor Charles VI, the two counties were constituted as the Principality of Liechtenstein.

The reigning Prince is **Francis Joseph II,** born 16 Aug., 1906; succeeded his great uncle, 25 July, 1938; married on 7 March, 1943, to Countess Gina von Wilczek; there are three sons, Princes Hans Adam, Philip Erasmus and Nikolaus Ferdinand, and one daughter, Princess Nora Elisabeth. The monarchy is hereditary in the male line.

The constitution, adopted on 5 Oct., 1921, provides for a Diet of 15 members elected for 4 years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of government is Vaduz (population, 1950, 2,772), and there are 10 more villages all connected by modern roads. The principality has a High Court and its own penal and civil code. Since Feb., 1921, Liechtenstein has had the Swiss

currency, and since Jan., 1924, has been united with Switzerland in a customs union; the post and telegraphs are administered by Switzerland.

Area, 158 square kilometres, or 62 square miles; population, of Alemannic race (census, 1 Dec., 1950), 13,571. In 1930 there were Catholics, 9,494; Protestants, 253. In 1947 there were 314 births and 174 deaths. In 1947 there were 14 elementary schools and 3 continuation schools, with 1,700 pupils and 42 teachers (26 men and 16 women). Budget estimates for 1951:—Revenue, 5,024,100 francs; expenditure, 5,071,893 francs. Public debt on 31 Dec., 1950, 8,033,800 francs.

The principality has no army (since 1868). Police force, 9; auxiliary police, 50. The population is mainly agricultural, the chief products being corn, wine, fruit and wood. On 21 April, 1947, there were 5,294 cattle, 357 horses, 601 sheep, 782 goats, 3,327 pigs and 32,892 chickens. The industries are cotton weaving and spinning, leather goods, pottery, artificial teeth and ironmongery. The rearing of cattle, for which the fine alpine pastures are well suited, is highly developed. Number of telephones (in 1949) 1,642.

Exports from the United Kingdom (Board of Trade returns) in 1938, £174; 1947, £1,501; 1948, £12,309; 1949, £25,118; 1950, £75,792. Imports into U.K., 1938, £483; 1947, £1,609; 1948, £1; 1949, £12,746; 1950, £2,170.

On 3 April, 1943, a canal for irrigating the valley, 26 kilometres in length, was opened. In Dec., 1947, a tunnel, 1,100 metres long and connecting the Rhine and Samina valleys, was opened. An electricity power station was completed in Dec., 1949. The Arlberg express (Paris to Vienna) passes through the principality at Schaan-Vaduz.

Head of the Government.—Alexander Frick (3 Sept., 1945).

National flag: blue, red, with golden crown in the blue strip.

National anthem: Oben am deutschen Rhein (words by H. H. Jauch, 1850; tune, 'God save the King').

LUXEMBURG.

(GRAND-DUCHÉ DE LUXEMBOURG.)

THE Grand Duchy of Luxemburg, situated between Belgium, France and Germany, is a constitutional monarchy, the hereditary sovereignty being in the Nassau family.

Reigning Grand Duchess.—Charlotte, born 23 Jan., 1896, was the daughter of William, Grand Duke of Luxemburg, Duke of Nassau (died 25 Feb., 1912) and of Marie-Anne, Princess of Braganza, born 13 July, 1861 (died 7 July, 1942), succeeded on the abdication of her sister Marie-Adelaide, on 9 Jan., 1919; married to Prince Felix of Bourbon-Parma on 6 Nov., 1919. Offspring:—Prince Jean, Hereditary Grand Duke, born 5 Jan.,

1921, Princess Elisabeth, born 22 Dec., 1922, Princess Marie-Adelaide, born 21 May, 1924, Princess Marie-Gabrielle, born 2 Aug., 1925, Prince Charles, born 7 Aug., 1927, and Princess Alix, born 24 Aug., 1929, married 17 Aug., 1950, Prince Antoine de Ligne. Sisters of the Grand Duchess:—Princess Marie-Adelaide, born 14 June, 1894, died 24 Jan., 1924; Princess Hilda, born 15 Feb., 1897, married 29 October, 1930, Adolf Prince Schwarzenberg; Princess Antoinette, born 7 October, 1899, married 7 April, 1921, Crown Prince Rupprecht of Bavaria; Princess Elisabeth, born 7 March, 1901, married 14 November, 1922, Prince Ludwig Philipp of Thurn and Taxis, who died 22 April, 1933; Princess Sophie, born 14 Feb., 1902, died 24 Dec., 1941.

The civil list is fixed at 300,000 gold francs per annum, to be reconsidered at the beginning of each reign.

On 28 Sept., 1919, a referendum was taken in Luxemburg to decide on the political and economic future of the country. The voting resulted as follows:—For the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium and negotiations to this end between Belgium and Luxemburg were concluded on 22 Dec., 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian, in addition to Luxemburg, currency as legal tender in the Grand Duchy. It came into force on 1 May, 1922.

By treaty of 5 Sept., 1944, signed in London, and the treaty of 14 March, 1947, signed in The Hague, the Grand Duchy, together with Belgium and the Netherlands, became a party to the Benelux Customs Union, which came into force on 1 Jan., 1948.

The Grand Duchy was under German occupation from 10 May, 1940, to 10 September, 1944. The Grand Duchess and the Government carried on an independent administration in London. Civil government was restored in Oct., 1944.

National flag: red, white, blue (horizontal).

National anthem: Ons Hemecht (words by M. Lentz, 1859; tune by J. A. Zinnen).

Constitution and Government.—The constitution of 17 Oct., 1868, was revised in 1919 and 1948. The latest revision has abolished the 'perpetually neutral' status of the country; introduced the concepts of right to work, social security, health services, freedom of trade and industry, and recognition of trade unions; and re-affirmed parliamentary democracy.

The country is divided into four electoral districts—the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg, to have completed 21 years of age; to be eligible for election to have completed 25 years of age and to fulfil the conditions required for active electorate. The members of the Chamber of Deputies are elected for 6 years; half are renewed every 3 years (Article 56); they receive a salary and a travelling allowance (Article 75).

The Chamber of Deputies consists of 51 members, namely, 22 Christian Social, 14 Socialists, 9 Democrats, 5 Communists and 1 Independent (elections of 6 June, 1948).

The head of the state takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The constitution leaves to the sovereign the right [illegible] the Government, which consists of a Minister of State, who is [illegible] the Government, and of at least 3 Ministers.

The Cabinet was, in 1951, composed as follows :—

Prime Minister, President of the Government, Minister of Finance, Labour and the Armed Forces.—Pierre Dupong (Christian Social).

Minister of Foreign Affairs and Viticulture.—Joseph Bech (Christian Social).

Minister of Education and Social Services.—Pierre Frieden (Christian Social).

Minister of the Interior and Justice.—Eugène Schaus (Democrat).

Minister of Food, Economic Affairs and Agriculture.—François Simon (Christian Social).

Minister of War Damage, Public Health and Repatriation.—Alphonse Osch (Democrat).

Minister of Public Works, Transport, Reconstruction and Power.—Robert Schaffner (Democrat).

Besides the Government there is a Council of State. It deliberates on proposed laws and Bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duchess or the government. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president from among them each year.

Area and Population.—Luxemburg has an area of 2,586 square km., and a population (1 Jan., 1948) of 290,992. The population is Catholic, save (31 Dec., 1935), 3,216 Protestants, 3,144 Jews, 450 belonging to other sects, and 5,653 without religion (or having given no indication on this subject). The chief town, Luxemburg, has 61,996 inhabitants (1948). Other towns are Esch-Alzette, the centre of the mining district, 26,851 inhabitants; Differdange, 15,179 inhabitants; Dudelange, 12,680 inhabitants, and Petange, 10,446 inhabitants.

In 1949 there were 4,243 births, 3,708 deaths and 2,566 marriages.

The Protestant Church is organized on an inter-denominational basis; 3,800 members (1950).

Education.—Education is compulsory for all children between the ages of 6 and 13. In 1948–49 the primary schools had 971 teachers (495 women); there are 22 higher elementary schools, 6 classical schools, 2 commercial and industrial colleges, 2 girls' colleges, 4 technical schools, 2 teachers' training colleges (male and female), a mining school, a college of agriculture and an academy of music.

There were, in 1950, 35 cinemas with a seating capacity of 22,000.

Finance.—Revenue and expenditure (including extraordinary) for 5 years (in francs):—

	1947	1948	1949 [1]	1950 [1]	1951 [1]
Revenue .	4,720,291,680	5,115,051,000	3,083,086,000	3,496,265,000	3,431,028,000
Expenditure .	3,724,976,240	4,639,571,054	3,338,878,440	3,601,092,058	3,992,039,000

[1] Estimates.

Consolidated debt in Oct., 1950, amounted to 2,155,054,505 francs (long-term), and 4,686,378,635 francs (short-term).

Defence.—The Treaty of London of 1867 imposed disarmed neutrality on Luxemburg. Luxemburg has, however, *de facto* abandoned its traditional neutral status and by decree of 30 Nov., 1944, has adopted obligatory military service. The constitutional changes necessitated by this decision were passed by parliament on 28 April, 1948.

The armed forces are included in the military organizations set up under the Brussels Treaty (17 March, 1948) and the North Atlantic Treaty (4 April, 1949). The defence estimates for 1950 amounted to 134,533,000 francs. The army consists of about 3,000 men.

Production and Industry.—Agriculture is carried on by about 65,000 of the population (about 22%); 80,944 hectares were under cultivation in 1949. The principal crops are oats and potatoes.

According to the census of Dec., 1948, the country possesses 16,605 horses, 111,425 head of cattle, 106,585 pigs, 2,748 sheep and 1,240 goats.

The mining and metallurgical industries are the most important. In 1949 production (in metric tons) of iron ore was 4,137,324; of pig-iron, 2,372,076; of steel, 2,271,852.

The number of blast furnaces in 1949 was 22, that of steelworks, 7; number of workers in the mining and metallurgical industries, 21,484.

Power production was 620,934,636 kwh. in 1949, and 574,987,410 kwh. in 1948.

Commerce.—Total trade between Luxemburg and the United Kingdom (Board of Trade returns), in £ sterling :—

	1938	1947	1948	1949	1950
Imports to U.K. .	568,173	447,335	877,960	4,679,234	1,092,041
Exports from U.K. .	24,811	247,311	352,111	460,249	321,726
Re-exports from U.K.	6,315	17,241	11,065	13,912	18,093

Communications.—In 1949, there were 1,320 miles of state roads and 1,353 miles of local roads. In 1949 there were 340 miles of railway (250 miles normal gauge and 90 miles secondary gauge) and 465 telegraph offices. There were also 52 telephone systems, with 5,900 miles of telegraph and telephone line and 20,287 telephones. In 1949 there were 144 post offices.

Motor vehicles registered in Luxemburg on 30 June, 1950, included 9,204 passenger cars, 4,365 trucks, 160 buses and 4,880 motor cycles.

Currency.—According to a decree of 14 Oct., 1944, the Luxemburg franc was fixed at par value with the Belgian franc. Belgian bank-notes are received in payment in the Grand Duchy. Notes of the Belgian National Bank are legal tender in Luxemburg. On 31 Dec., 1948, there were 184,432 depositors in the State Savings Bank, with a total of 2,045,273,000 francs to their credit.

Diplomatic Representatives.

1. Of Luxemburg in Great Britain (27 Wilton Crescent, S.W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Andrew J. Clasen (accredited 30 Nov., 1944).

Secretary.—Georges Heisbourg.

2. Of Great Britain in Luxemburg.

Envoy Extraordinary and Minister Plenipotentiary.—Geoffrey Cuthbert Allchin, C.M.G., M.C. (appointed Jan., 1949).

Counsellor.—A. H. Tandy, C.B.E. (*Commercial*).

First Secretaries.—R. T. Landale; C. F. Heron (*Labour*).

Military Attaché.—Col. R. H. C. Drummond-Wolff.

Air Attaché.—Group Capt. L. C. Slee, D.S.O., D.F.C.

There is a consular representative in Luxemburg.

MEXICO.

(Estados Unidos Mexicanos.)

Constitution and Government.

Mexico's history falls into four epochs : the era of the Indian empire (before 1521), the Spanish colonial phase (1521–1810), the period of national formation (1810–1910) which includes the war of independence (1810–21) and the long presidency of Porfirio Diaz (1876–80, 1884–1911), and the present period which began with the social revolution of 1911–21 and is regarded by Mexicans as the period of social and national consolidation. The names of the presidents from 1920 are shown in the following table :—

Gen. Alvaro Obregón	1 Dec., 1920–30 Nov., 1924.
Gen. Plutarco Elías Calles	1 Dec., 1924–30 Nov., 1928.
Emilio Portes Gil (Provisional)[1]	1 Dec., 1928–4 Feb., 1930.
Pascual Ortiz Rubio	5 Feb., 1930–3 Sept., 1932.[2]
Gen. Abelardo Rodriguez	4 Sept., 1932–30 Nov., 1934.
Gen. Lázaro Cárdenas	1 Dec. 1934–30 Nov., 1940.
Gen. Manuel Ávila Camacho	1 Dec., 1940–30 Nov., 1946.

[1] Took office after the assassination, on 17 July, 1928, of General Obregón, the President-elect.

[2] Resigned.

President.— Miguel Alemán Valdés (born in 1900), formerly Minister of the Interior, elected 7 July, 1946, to serve for 6 years. He polled 1,786,901 votes out of the total of 2,294,774 (assumed office on 1 Dec., 1946).

A new constitution, amending the constitution of 1857, was promulgated on 5 February, 1917, and amended frequently from 1929 to 1946. By its terms Mexico is declared a federative republic, divided into 28 states, each of which has the right to manage its own local affairs. Citizenship, including the right of suffrage, is vested in all male nationals who are 18 years old if married or 21 years old if unmarried and having 'an honourable means of livelihood'; in July, 1938, Congress passed a constitutional amendment giving women equal citizenship and suffrage with men, but only 2 of the 28 states had ratified this by the end of 1940; two-thirds must do so before the amendment is effective. Thumb-prints are taken of registered voters.

Congress consists of a Chamber of Deputies (147 members) elected for 3 years by universal suffrage, at the rate of 1 member for 150,000 inhabitants (an amendment changing this to 170,000 is, 1951, in process of ratification), and a Senate of 58 members, 2 for each state and the federal district, elected for 6 years. Senators and deputies are ineligible for re-election until another term has elapsed. Congress sits from 1 September to 31 December. During the recess there is a permanent committee consisting of 14 senators and 15 representatives appointed by the respective Houses.

The President is elected by direct popular vote in a general election, and holds office for 6 years. He can never be re-elected. If the office falls vacant during the first 2 years, a general election must be held; if after the first 2 years, then Congress acts as an electoral college for the election of a successor who completes the term. The administration is carried on under the direction of the President and a council formed by the secretaries of 13 ministries and the head of one department.

National flag: green, white, red (vertical); the national coat of arms on white.

National anthem: Mexicanos, al grito de guerra (words by F. Gonzáles Bocanegra; tune by Jaime Nunó, 1854).

Local Government.

Mexico is divided into 28 states, 1 federal district (comprising Mexico City and 12 surrounding villages) and 3 territories (2 occupying the peninsula of Lower California, and the third, Quintana Roo). Each state has its own constitution, government, taxes and laws; but inter-state customs duties are not permitted. Each state has its governor, legislature and judicial officers popularly elected under rules similar to those of the federation. All the states must publish and enforce laws issued by the Federal Government (that is, on federal matters). The President appoints the governors of the territories and the chief of the federal district.

Area and Population.

Mexico is situated between the parallels of 14° 33′ and 32° 43′ north, and 86° 43′ and 117° 8′ west and comprises 1,969,367 square km. (760,375 square miles), including inland waters and uninhabited islands off-shore.

The census taken on 6 June, 1950, showed a population of 25,564,218, revised in Dec. to 25,581,250, showing an increase of 5,927,698 or 30% over 1940's total (19,653,552) and of 54% over 1930's total (16,552,722).

Density of population, 1950, was 33·3 per sq. mile, excluding the uninhabited Federal Islands. A census of agriculture was taken from 2 May to 15 June, 1950.

Census results are shown in the following table (capitals of states and territories in brackets):—

States and territories	Area, in square miles	Census population		
		1940	1950	% Increase
[illegible]	2,499	161,693	187,036	15 67
[illegible] (Mexicali)	27,653	78,907	224,333	184 30

Grand total	760,375	19,653,552	25,564,218	30 07

In 1937 it was estimated that 2,251,000 of the population were Indian. In 1940, there were 1,237,018 aborigines who spoke only their native language. There were 33 different language groups, and 21 minor linguistic divisions. Urban population (census of 1940) numbered 6,896,669 (35·1%); gainfully employed, 5,858,116 (29·8% of the total), of whom 3,830,871 (65·4%) were in agriculture, 639,607 in industry, 552,467 in commerce, 149,470 in transport and 685,701 in all other occupations. The language is Spanish.

Foreign born, 1940, numbered 67,548, including 21,022 Spaniards, 9,585 [illegible], 3,[illegible] Canadians, 4,856 Chinese, 3,358 Guatemalians, 2,987 British, 2,852 Germans, 2,454 Levantines, 1,550 Japanese. Of the alien groups who in 1940 had acquired Mexican nationality, the Americans led with 9,892, followed by 8,322 Spaniards, 4,357 Guatemalans, 1,805 Chinese and 1,427 Germans.

The chief cities, with population at the census of 1950, are:—Mexico City (capital), 2,113,451; Monterrey, 339,634; Guadalajara, 337,000; Pue-

bla, 229,976; San Luis Potosí, 156,324; Mérida, 155,899; Culiacáu, 144,550; Mexicali, 141,189; León, 140,000; Torreón, 132,101; Ciudad Juárez, 128,782; Veracruz, 123,368; Matamoros, 118.215; Aguascalientes, 117,409; Toluca, 115,422 ; Chihuahua, 110,779; Morelia, 103,516.

Movement of population for 5 years :—

Year	Marriages	Births	Deaths	Migration	
				Entered	Departed
1943	159,845	963,317	474,950	168,623	153,737
1944	149,490	958,119	447,198	162,656	151,260
1945	151,075	999,093	433,694	207,826	192,147
1946	137,468	994,838	442,035	319,576	303,260
1947	138,345	1,079,816	390,087	308,121	293,062

Crude birth rate, 1949, was 45·4 per 1,000 population; crude death rate, 16 7 (compared with 26·1 in 1932); infant mortality rate (1948), 102·3 (compared with 139·3 in 1933); crude marriage rate (1948), 6 0 per 1,000 population. Of the deaths in 1949, 118,300 or 27% were of children under 1 year of age.

Persons who wish to live permanently in Mexico must obtain special permits from the Mexican authorities after proving that they fulfil all the legal requirements of the law of 1948, which gives to the Mexican Secretary of the Interior discretionary power to accept foreign immigrants either according to quotas, nationalities, migratory status or the class of work desired by the prospective immigrant.

Religion, Education and Justice.

The prevailing [illegible] Roman Catholic (8 archbishops, 25 bishops and 1 vicar apostol[illegible] as a bishop in Lower California), but by the constitution of 1857, the Church was separated from the state, and the constitution of 1917 provided strict regulation of this and all other religions. No ecclesiastical body may acquire landed property and since 1917 the property of the Church has been held to belong to the state. In the second half of the 1920s, the government suppressed the political influence of the priesthood and temporarily (1929–31) closed the churches. An understanding between State and Church was, however, reached, and all churches eschewing public affairs flourish freely.

Primary education is free and compulsory (up to 15 years of age), and secular. Clergy are forbidden to set up primary schools. All private schools must conform to government standards. Military drill is compulsory for boys of 18 years. In the federal district and in the territories education is controlled by the National Government; elsewhere by the state authorities.

In Sept., 1948, there were 777 kindergarten schools, 2,311 teachers and 84,043 pupils; 23,244 primary schools, 63,731 teachers, 2,864,808 pupils; 377 secondary schools, 7,936 teachers, 59,989 pupils; 17 colleges, 1,873 teachers, 8,074 pupils; 57 teachers' training schools, 2,788 teachers, 16,890 pupils; 43 technical colleges, 2,556 teachers, 16,556 pupils; 22 schools specializing in agriculture, fine arts etc., 1,325 teachers, 5,139 pupils; 63 universities, 3,795 teachers, 33,524 pupils.

The census of 1940 showed 7,198,756 or 51·6% of those over 10 years old to be illiterate; in the federal district, 21%. Adult illiteracy is being attacked at 21,283 centres of instruction (1949); by 30 Nov., 1949, 1,478,134 persons had not yet completed their reading and writing courses.

There are 14 universities with 61 faculties enjoying considerable autonomy, including 2 in the federal district, 2 in Jalisco (founded 1792), and 1 each in Michoacán, Nuevo León (1933), San Luis Potosí, Puebla, Veracruz and Yucatán (1922). Of these the most important is the National University at Mexico City, re-organized in 1910, and with full autonomy granted in 1929; it has 30 faculties and produced 62,584 graduates in 1940-50. The first university exclusively for women was opened 1 March, 1943.

Motion-picture theatres numbered 1,666 (including 85 mobile units) in 1949, with seating capacity of 1,500,000.

In 1948 there were 98 daily newspapers with an aggregate circulation of 1,185,000.

Magistrates of the various courts are appointed by Congress for 6 years; but the judges of the Supreme Court can only be removed on impeachment. The courts include the Supreme Court with 21 judges, 6 circuit courts with 6 judges, and district courts with 46 judges. The penal code of 1 January, 1930, abolished the death penalty, except for the Army, and set up a commission of alienists and other specialists, in place of the courts, to pass on criminal cases; there is no appeal from their recommendations as to the proper treatment.

Federal Finance.

The ordinary receipts expenditure (in pesos equal to 20·5 cents, U.S. until June, 1949, when devalued to 11·5 cents) for 5 years :—

	1947	1948	1949 [1]	1950 [2]	1951 [2]
Revenue	2,618,200,000	2,948,000,000	3,957,700,000	2,597,000,000	3,101,715,300
Expenditure	3,072,400,000	3,403,700,000	4,041,800,000	2,746,000,000	3,101,713,000

[1] Provisional. [2] Budget estimates.

Government's revenue figures are inflated by counting as revenue the proceeds of export taxes where, in actual fact, the tax has been suspended; these are not offset on the expenditure side. The budget includes the gross receipts and expenses of public undertakings and the net receipts of the national railways.

The largest expenditure item of the 1951 budget was debt service, 702 million. Others (in millions) were communications, 537 (including roads and conservation); education, 358; hydraulic enterprises, 326; defence, 275; investments, 175; health, 139.

For revenue, Mexico leans heavily on export duties, 516·2 million in 1949 or 16% of total revenue; income tax furnished 681·7; taxes on industry, 451.

The powers of federal, state and municipal authorities to contract debt are circumscribed by the constitution.

Between 1941 and the end of 1949 Mexico has borrowed $200·2 million for economically useful projects; chief lenders have been the Export-Import Bank and the International Bank.

The national debt (in default since 1914) on 31 Dec., 1949, was (in millions of pesos) :—Funded domestic debt, 2,041·2 for capital and 1,275·1 for interest; debts of the States, capital, 30·3 and interest, 4·8; external debt, capital, 806·3 (taking the peso = 11·5 cents) and interest, 554·4. Since 1942 the external debt has been reduced (from 564 million, capital, and 780 million, interest) to the figures shown, but the internal debt has doubled. External debt, 30 June, 1948, included £38,690,480, $278,082,024

and 139,594,450 peso bonds accepted by foreign holders under the 1942 agreement. A debt settlement was reached in Dec., 1942, between the Government and the International Committee of Bankers in New York, which scaled down the payments to one-fifth of their dollar value; the total is to be repaid by 1963 and 1968. London bondholders did not participate.

The Bank of Mexico, 1945, estimated total foreign direct investments in 443 leading concerns at 2,900 million pesos, of which 60% belonged to Americans, with Canada and the U.K. ranking next. The bank reported 1,332 million in public utilities and transport, 1,024 million in mining, 247 million in manufactures, 116 million in trade and 110 million in agriculture and livestock. The Bank of England's 1950 study of foreign investments reported that U.K. residents, end of 1948, had investments in Mexico with a nominal value of £30 million (£66 million in 1938); their total 1948 income was £900,000 (£400,000 in 1938). British direct investments in 1949, according to the Bank of Mexico, were 153,638,000 pesos, of which 105,815,000 pesos were in mining.

Defence.

Supreme command is vested in the President, exercised through the 3 ministries of Defence, Marine and Aviation.

The Mexican Army is being reorganized and follows to a large extent the U.S. pattern. The country is divided into 8 regions in which both the regular army and the conscripts are trained. Every citizen is liable to service in the active Army or in the National Guard. The active Army in 1949 had a strength of 3,405 officers and 38,430 other ranks, organized in 50 battalions of infantry, 40 regiments of cavalry, 2 regiments of military police, 5 companies of marines, 2 regiments of artillery and 3 detached companies. Military education is provided at a military college and in officers' training schools, and is compulsory in the colleges. To combat illiteracy in the Army, 165 regimental schools have been established. The Air Force comprises 2 regiments each of 3 squadrons with 51 aeroplanes.

The Navy consists of 3 sloops, 4 frigates, a training ship and 20 coast-guard patrol craft. On 1 Aug., 1949, 8 naval districts were organized, 4 on the Atlantic and 4 on the Pacific coast.

Estimated expenditures for national defence, 1951, were 275,372,000 pesos and for the Ministry of Marine, 77·7 million pesos.

Production and Industry.

Mexico is well [illegible] obliged to import food. Grains [illegible] of [illegible] 60% given to maize and about 9% to wheat. Irrigation is needed. In 1948, about 17,007,700 acres of arable land were actively farmed; this was less than 1 acre *per capita*. Of this total, 2,355,607 acres were irrigated, the federal government [illegible] 1,828,600 acres, companies 308,391, and other groups the remainder; there are 17,000,000 acres under irrigation, it is estimated, will Mexico be self-supporting; about 24 million acres in all might eventually be brought under cultivation. Soil conservation work has been started; it includes teaching contour ploughing, terracing, crop rotation, [illegible] of the maguey and re-forestation (2,060,000 trees planted in 1947).

Up to 1 September, 1945, 65,000,000 acres of confiscated lands (much of it belonging to foreigners) had been distributed to 2,135,000 families in accordance with the agrarian laws, which made the rural village, the *ejido*, the unit for holding land in common. The Laguna region in north-central

Mexico is the seat of the largest experiment of this type. The *ejido* is [illegible] land; the title to the land is held by the state on behalf of [illegible] is inalienable. The fertile portion was divided into small [illegible] size, which were assigned by lot to the heads of families [illegible] these might hold for life and bequeath to their heirs, but they lost their rights if they failed to farm 2 years in succession. The land cannot be rented. Parallel with this collective farming is the practice, initiated by the President on 11 December, 1941, of issuing to peasant owners certifi[illegible] inst all claimants their absolute ownership of their lands.

[illegible], Mexico had 12,419,696 cattle, a sharp fall, due to foot-and-mouth disease, from the 17,588,000 reported in 1939. The figure had risen to 14,492,882 by Feb., 1950, due to inspection and vaccination. In 1948, there were 4,965,326 sheep, 6,945,722 goats, 2,722,235 horses, 1,222,034 mules, 2,635,828 asses. In 1947 production of hides and skins included 2,470,136 cattle hides, 2,063,760 goat and kid skins and 684,252 sheep and lamb skins.

Mexico's basic food crop is maize, but output, owing to antiquated methods, has always been low (10 U.S. bushels per acre, 1941–45, compared with the U.S. average of 32·8 bushels). Imports have been necessary until the year 1948 when production reached 2,738,800 metric tons compared with an average, 1939–44, of 2,157,100 metric tons; the 1948 crop rendered imports unnecessary. Expansion of this crop is the chief aim of Mexican agriculture, balanced by the demand for 'cash crops' for export, such as cotton, sugar, garbanzos (chick peas), bananas, winter [illegible] coffee.

Principal products in metric tons for 1950 were:—Maize, 3,427,000; rice, 152,000; sugar, 703,000; wheat, 814,600; beans, 323,371; barley, 160,000; coffee, 69,000. Sugar output since 1946 has left surpluses for export (150,000 tons in 1949). Production of alcohol, 1948, was 29,465,538 litres.

The Yucatán peninsula produces about 50% of the world's supply of sisal (known locally as henequen); plantations are almost wholly Mexican-owned and the crop is handled exclusively by the state of Yucatán. The 1949 sisal crop amounted to 104,056 tons of fibre, compared with 117,105 in 1947. Exports, 1949, 43,881 metric tons. Banana production started in 1895 in the state of Tabasco, reaching a peak in 1937, when 14,752,424 stems were exported; exports, 1949, 5,221,135 stems. The west coast ships fresh vegetables, mostly tomatoes, to the United States. Production, 1949, of tomatoes, 286,444 tons; of fruit, 1,315,275 tons. The cotton production, 1950, was a record at 1,110,000 bales (of 230 kilos); exports, 1949, 533,000 bales. Rubber production, 1949, was 300 metric tons.

Timber lands are estimated to extend over 70,000,000 acres (about 50 million containing stands of commercial importance) and to contain pine, spruce, cedar, mahogany, logwood and rosewood. Reckless lumbering has destroyed the timber stands on many watersheds, resulting in spring floods and lowered water supplies in summer.

The chief Mexican oilfields (with reserves estimated in 1949 at 7,800,000,000 barrels) [illegible] districts, which were controlled mainly by 3 big companies [illegible] by government decree, 18 March, 1938. Crude petroleum output, after years of difficulty following nationalization, is now expanding; output for 1950 was 71,665,561 barrels, highest since 1926; refinery output, 52,362,261 barrels. Exports, 1949, 12,386,244 barrels. The petroleum fields have 17 plants and 14 refineries, employing 23,900 men; refining capacity (1949), 230,000 barrels per day; Mexican refineries handle about 90% of total output. There were 887 productive oil wells in 1947.

Mining is the principal industry in Mexico, but practically 97% of the 31,000 mining properties are foreign-owned. Of the annual output (from 189 active mines and 127 metallurgical plants), measured in pesos, probably less than 10% is Mexican-owned. The industry complains of frequent strikes (frequently on full pay if the Minister of Labour pronounces them 'legal'), limited smelter capacity, taxes on production, expensive rail transport. Nearly all the mines yield silver; output is about 57% of world production. Silver output has declined from 86,371,556 fine oz. in 1943 to 50,028,000 oz. in 1949; exports, 1949, of bar and scrap silver, 1,396 metric tons. About half the production is minted, including (1949) a 'token' coin weighing 1 troy oz. Gold output in 1949, 417,468 fine oz.; shipments of gold to the United States were valued at $15,800,000 in 1948.

Coal is produced only from 7 mines in 3 states; 1,059,000 metric tons in 1948. Opals are mined in Querétaro. There are large undeveloped reserves of iron ore; output, 1949, 362,600 metric tons. Production of steel, 1949, was 355,760 metric tons.

The following table shows the quantities of mineral products for 4 years:—

Metals	1940	1947	1948	1949
	Metric tons	Metric tons	Metric tons	Metric tons
Copper	37,602	64,811	59,073	57,246
Lead	196,253	217,827	193,317	220,764
Zinc	114,955	195,814	179,048	178,402
Antimony	12,267	6,371	7,120	5,753
Graphite	12,327	27,984	35,261	23,813
Quicksilver	402	334	169	181
Arsenic	9,268	9,686	7,631	3,577
Molybdenum	516	227	13	—
Bismuth	185	255	154	309
Cadmium	826	779	906	820
Tin	351	174	201	364
Tungsten	103	46	81	39
Manganese	307	14,182	24,117	23,772

Mine production of minerals, 1949, was valued at 1,748 million pesos.

The industrial census of 1944 showed 51,128 manufacturing establishments with invested capital of 4,351,593,041 pesos; number of employees, 593,970; wages and salaries, 1,125,135,504 pesos; value of output, 5,341,763,866 pesos.

In 1948 there were 1,294 generating plants with installed capacity of 951,909 kw.

Mexico's national income has risen from 6·0 billion (milliard) pesos in 1939 to 29·8 billion in 1950.

Commerce.

The trade of Mexico for 5 years (in pesos ranging from 22 cents, U.S., to 18 cents) is shown as follows:—

	1945	1946	1947	1948	1949
Imports	1,603,404,473	2,636,786,960	3,230,294,498	2,951,495,000	3,527,320,760
Exports[1]	1,332,666,344	1,915,260,677	2,150,935,916	2,661,271,000	3,623,081,194

[1] Exports include gold bullion valued at 268 million pesos in 1946, 145 million in 1947; their value is excluded in 1948.

Imports, 1949, valued in U.S. dollars, were $519·5 million and exports, $394·1 million.

Of total imports in 1949, 3,068,287,000 pesos (86·9%) came from the

United States, 79,001,000 from Great Britain, 99,267,000 from Canada; 50,046,000 from Switzerland, and 40,543,000 from Sweden. Leading imports, 1949, were motor vehicles, 243,000,000 pesos; wheat, 179,000,000 pesos; machinery and parts, 189,000,000.

Of total exports, 2,850,720,000 pesos (78·6%) went to the United States, 110,176,000 to China, 70,695,000 to Great Britain, and 56,947,000 to Belgium. Value of chief exports, in thousands of pesos, 1949, were:—Raw cotton, 473,334; lead bars, 445,719; silver, bars and scrap, 239,815; fresh fish and shell fish, 239,426; coffee, 229,017; copper bars, 146,686; zinc concentrates, 108,258.

Tourism is Mexico's largest single source of dollar income, amounting to $125 million in 1949.

Total trade between the United Kingdom and Mexico, in £ sterling (according to Board of Trade returns):—

	1938	1946	1947	1948	1949	1950
Imports to U.K.	2,109,093	952,868	1,859,569	4,870,695	3,786,990	5,627,211
Exports from U.K.	854,186	2,461,267	2,926,732	3,701,524	2,437,871	5,117,271
Re-exports from U.K.	11,480	169,558	31,757	13,182	12,978	36,927

Communications.

Mexico has 39 ocean ports, of which the most important are Veracruz and Tampico, both on the Gulf of Mexico. Shipping under Mexican flag on 31 Dec., 1950, included 9 steamers of 16,362 net tons, and numerous small craft of 12,000 net tons; in addition the oil fleet included 19 tankers and 200 vessels [illegible] 230,000 dead weight tons.

Total road [illegible], 37,314 miles, of which 17,000 miles are usable throughout the year. The last Mexican portion of the Pan-American Highway (covering altogether 1,745 miles) was opened on 5 May, 1950. Motor vehicles, 1 Dec., 1948, numbered 235,067, including 117,005 passenger motor cars, 86,198 trucks, 14,790 omnibuses and 17,074 taxicabs.

In 1937 the main railway lines were nationalized. In June, 1946, the Government purchased the British-owned Mexican Railway Company for $8,600,000, U.S. In April, 1948, a new railway connecting Sonora with Lower California, 324 miles, was opened for traffic. The system has 1,350 locomotives and 25,000 wagons (passenger and freight). Total railway tracks, 14,981 miles (1947).

On 31 December, 1945, the federal telegraph and telephone system had 1,079 offices and 96,929 miles of line. Systems belonging to individual states and private companies had 1,115 offices and 17,066 miles of line. Telephones in use, 1 Jan., 1949, 248,000; private [illegible] operated all except 835 instruments; 68·4% were automatic. [illegible] had 133,114 instruments. The General Bureau of Posts and Telegraphs, 1950, had 3,825 regular offices and 3,139 auxiliary offices. There are 1,850 radio stations including 2 television stations.

Mexico has an excellent air service. Each of the larger states has a local airline which links them with main airports, which, in turn, furnish service to the United States, Central and South America and Europe. Forty-four companies in 1950 maintained scheduled services over 65,264 km. There are 36 main airports and 210 auxiliary ones.

Banking and Credit.

On 30 June, 1950, the banks of the republic (mostly national but excluding the Bank of Mexico) had total resources of 10,791,000,000 pesos.

An export-credits bank, under Government control, was started in July, 1937.

The Bank of Mexico, established 1 Sept., 1925, is the central bank of the government. It succeeded a number of former banks of issue, and under Article 28 of the constitution it has the sole right to issue notes. It has 5 branches, but discontinued commercial banking in April, 1932, becoming solely a central reserve and issue bank. The Government holds 51% of the capital stock. The bank is now closely modelled on the Federal Reserve system, with large powers to 'manage' the currency.

On 30 Nov., 1950, metallic monetary reserves (gold, silver and foreign exchange forming the required 25% reserve against notes and other demand liabilities) were 1,000 million pesos; 'authorized' holdings of securities, 2,937 million pesos; note circulation (outside the Bank of Mexico) was 2,552 million pesos. The gold stock has fluctuated from as little as $28 million, U.S., in Feb., 1942, to as high as $294 million on 31 Dec., 1945; it fell to $44,000,000 in Aug., 1948, when the bank ceased to publish separate figures for gold stock. Total supply of money, 30 Sept., 1950, was 5,227 million pesos, divided between currency (2,551 million) and bank deposits (2,676 million). On 31 July, 1949, gold and dollar reserves were $159,043,471.

Money is very 'tight'; the discount rate for first-class commercial paper, 1949 and 1950, has ranged between 8% and 12%, while loans secured on real estate (up to 50% of the value of the property) has cost up to 18% per annum.

Money, Weights and Measures.

On 17 June, 1949, Mexico informed the International Monetary Fund that the unit of account was the peso, equal to 11·5607 cents U.S., or 0·102737 gramme of fine gold; $1·00, U.S., equals 8 650 pesos and 1 troy oz. of fine gold equals 302·750 pesos. This superseded the rate established on 18 Dec., 1946—1 peso = 20·5973 cents, U.S.

Between 1925 and 1931 the monetary unit was the gold peso or dollar of ·75 gramme of pure gold. A decree of 26 July, 1931, established the silver peso as the unit and full legal tender at a fixed value of ·75 gramme of gold. This system broke down in April, 1935. Silver coins were re-monetized in 1947 and new coins minted :—1 peso (0·5 fine) and 5 pesos (0·9 fine), and for 50 and 25 centavos. There are copper or copper–nickel coins for 20, 5 and 1 centavo. Since 1931, the old gold coins of 50, 20, 10, 2½ and 2 peso denominations have figured in foreign exchange transactions at their gold value. There are notes for 10,000, 1,000, 500, 100, 50, 20, 10, 5 and 1 peso.

The weights and measures of the metric system were introduced in 1884 and their use is enjoined by law of 14 December, 1928, though the old Spanish measures are still in use.

Diplomatic and Consular Representatives.

1. Of Mexico in Great Britain (48 Belgrave Square, S.W.1).

Ambassador.—Señor Dr. Don Federico Jiménez O'Farrill (presented letters of credence on 15 Feb., 1945).

Secretaries.—Carlos Chapoy Vidaurri; Fernando Cuen Barragán.

There are consular representatives at London, Birmingham, Cardiff, Glasgow, Hull and Newcastle-on-Tyne.

2. Of Great Britain in Mexico.

Ambassador.—John William Taylor, C.M.G., M.B.E. (appointed Sept., 1950).

First Secretaries.—J. M. Fisher; M. J. V. Blood-Smyth (*Consular*); H. A. N. Brown (*Labour*).

Commercial Councillor.—W. W. McVittie.

Military Attaché—Col. C. G. Irving-Bell.

Air Attaché.—Wing-Cdr. A. F. Johnson, D.F.C.

Civil Air Attaché.—Wing-Cdr. C. J. Lewin.

There are also consular posts at Chihuahua, Coatzacoalos, Durango, Guadalajara, Guaymas, Mazatlan, Merida and Progresso, Monterey, Pachuco, Puebla, Tampico, Tapachula, Torreon and Veracruz.

MONACO.

Prince Rainier III, born 31 May, 1923, son of Princess *Charlotte*, Duchess of Valentinois, daughter of Prince Louis II, born 30 September, 1898 (married 19 March, 1920, to Pierre Comte de Polignac, who had taken the name Grimaldi, from whom she was divorced 18 February, 1933). Prince

Rainier succeeded his grandfather Louis II, who died on 9 May, 1949. He has a sister, Princess *Antoinette*, born 28 Dec., 1920.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 1297 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antoine I, heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I, who also succeeded Antony I as Duc de Valentinois, and was in his turn succeeded by his son Honoré III. This Prince reigned from 1731 until 1793, when his dominions were annexed by France. He died in 1795 and in 1814 his son Honoré IV recovered the Principality, which was placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna, 1815. Honoré V, who had acted as Regent for his invalid father since the Restoration, became Prince in 1819. He was succeeded in 1841 by Florestan, against whom, in 1848, Mentone and Roccabruna revolted, and declared themselves free towns, only to be occupied by the Sardinians. His son Charles III (reigned 1856–89) sold his rights over these two towns in 1861 to France, while Sardinia abandoned her protectorate over Monaco. Prince Albert I (reigned 1889–1922) acquired fame as an oceanographer.

On January 5, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a State Ministry assisted by 3 Government Counsellors. The legislative power is exercised by the Prince and the National Council, which consists of 10 members elected for 4 years.

Minister of State.—Pierre Voizard (1950).

The territory of the Principality is divided into three sections—Monaco-Ville, La Condamine and Monte Carlo—which are administered by a municipal body, elected by vote. Women were given the vote in 1945.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality issues its own separate postage-stamps and has its own flag. It is united with France in a customs union (treaty of 9 Nov., 1865).

The small harbour, absolutely sheltered, has an area of 47 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France. Number of telephones in use at 1 Jan., 1949, was 2,519.

The area is 149 hectares or 368 acres. Population (census 1 January, 1946), 19,242.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained.

Budget (in francs)	1946	1947	1948	1949
Revenue	308,538,666	481,868,896	629,376,150	878,076,152
Expenditure	269,386,010	499,493,617	622,342,685	935,296,568

British Consul-General.—J. Bowering (Sept., 1949).
Consulate General for Monaco in London.—18 Austin Friars, E.C.2.

MONGOLIAN PEOPLE'S REPUBLIC.

(BUGHUT NAIRAMDUKHO MONGGOL ARAT ULUS.)

THE vast and indefinite tract of country called Mongolia stretches from the Khinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtish river. On the north it is bounded by Siberia and on the south and east by China. A wide tract in the heart of this region is occupied by the Desert of Gobi, which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses and sheep. Even in fertile districts they are little given to agriculture. Area, about 1,531,000 sq. km.; population, about 900,000.

Mongolia is divided into two sections: Inner Mongolia (*see* p. 872), and Outer Mongolia, which is now an independent republic.

Outer Mongolia came under Chinese suzerainty at the end of the 17th century. Subsequently Russia, Japan and China competed with one another for influence in or possession of the country. In 1920, Baron von Ungern-Sternberg, armed with Japanese weapons and controlled by Japanese advisers, marched into Outer Mongolia, and, having seized Urga, formed a puppet Mongolian government there in February, 1921. On 1 March, a group of Mongolians led by Suhé-Bator, Choi-Balsan and others summoned the first congress of the Mongolian People's Revolutionary Party, and on 13 March, 1921, a Provisional People's Government was established which declared the independence of Mongolia. In April, 1921, the Provisional Government appealed for help from Moscow against the Japanese and Ungern-Sternberg. This was granted and finally Ungern-Sternberg and his Japanese and White Russian supporters were [illegible] by the Mongolian and Red Army troops.

The Mongolian People's Government took office in June, 1921, but the monarchy under Bogdo Gegen Khan remained intact though limited in power. In November, 1921, the government signed a treaty with Soviet Russia annulling all previous unequal treaties and establishing friendly relations. In 1924, on the death of Bogdo Gegen Khan, the government proclaimed the country as the Mongolian People's Republic.

According to the constitution adopted in 1940 (full text available in [illegible] tion in Friters' book), power is vested in a parliament (the [illegible] which is elected by universal suffrage, male and female, over 18 years of age. It has to meet once a year at least, and alone has the power to amend the constitution. It elects from its number 30 members, who form the executive committee (the *Little Huruldan*), which is responsible to it. This committee elects five of its members to a board which carries on current state affairs.

In the Treaty between China and the U.S.S.R. of 14 August, 1945, China declared her willingness to recognize the independence of the Mongolian People's Republic (Outer Mongolia) if a plebescite of the inhabitants indicated their wish for independence. The plebiscite was duly held on 30 October, 1945, and showed an almost unanimous vote in favour of independence, and on 5 January, 1946, China formally recognized Outer

Mongolia as an independent republic. The Sino-Soviet treaty of Feb., 1950, [illegible] e independence of the Mongolian People's Republic.

On [illegible], 1946, a treaty of amity and mutual aid between the Soviet Union and the Mongolian People's Republic (Outer Mongolia) was signed in Moscow.

In 1945, there were 494,960 people on the electoral roll. The Mongols are mainly herdsmen, and in 1941 were estimated to have 2,600,000 horses, 700,000 camels, 2,800,000 cattle and 15,900,000 sheep.

A 5-year plan to cover the period 1948–52 was adopted in 1947. Under it, industry and mechanized transport are to be developed, including a meat packing plant and engineering works in Ulan Bator, and 5 to 6 million hectares of desert are to be irrigated.

There are some gold-mines in the country, as well as other mineral deposits of unascertained value. Coal pits at Nalaikha are being developed. Wool, skins and furs are exported, chiefly to the Soviet Union. In 1945, about 163,000 acres (74,000 hectares) were under cultivation.

Communications are chiefly by caravan route. Railways connect Ulan Bator with Nalaikha and Altan Bulak. An air service has been established between Verkhneudinsk and Ulan Bator, and there are steamer services on the Selenga and Orkhon rivers. There is telegraphic communication with the Soviet Union, and a wireless station has been established at Ulan Bator.

The capital is Ulan Bator (formerly Urga; population, about 100,000). It has a university with about 600 students and 60 teachers, of whom half are Russians. In 1950 there were 412 primary and secondary schools, 14 technical schools and 3 higher educational institutions.

Buddhist Lamaism is the prevalent form of religion.

Since March, 1915, Mongolia has had a legal currency of its own. The present currency, introduced in 1925, is based on the *Tughrik*, a silver coin equivalent theoretically to half an American gold dollar, and divided into 100 *Mongo*. In 1924 a state note-issuing bank, the Commercial and Industrial Bank (Mongolbank), was founded, with a capital of 175,000 Mexican dollars, which has since been increased to 3,000,000 Mexican dollars. The Soviet State Bank holds 50% of the capital.

NEPÁL.

An independent kingdom in the [illegible] between 26° 25′ and 30° 17′ N. lat., and between 80° 6′ and 88° [illegible] its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by India.

The sovereign is His Majesty Mahárájadhirája **Tribhuvana Bir Bikram** Jang Bahádur Shah Bahádur Shamsher Jang, who was born on 30 June, 1906, and succeeded his father on 11 Dec., 1911. The Crown Prince Mahendra Bir Bikram was born on 11 June, 1920. The government of Nepál is a modified aristocracy based on birth and is military in organization. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájádhirája Surendra Bikram Shah

under pressure of the Bharadárs or nobles in 1867. Prime Minister (and, until April, 1950, Supreme Commander-in-Chief) is His Highness Máhárája Mohun Shamsher Jang Bahádur Ráná, G.C.B., G.C.I.E. (Hon.), G.B.E. (Hon.), Hon. Lieut.-General, Indian Army, Hon. Colonel-in-Chief The Brigade of Gurkhas, British Army, and Hon. Colonel of all Gurkha Rifle Regiments, Indian Army (born 23 Dec., 1885), who was installed in office on 30 April, 1948. The office of Prime Minister is always held by a member of the ruling family, the succession being determined by special rules.

The first Parliament of Nepál consisting of the Bharadari Sabha (Upper House) and the Rastra Sabha (Lower House) was inaugurated by the Maharaja on 22 Sept., 1950.

On 18 Feb., 1951, the King announced far-reaching constitutional reforms and the formation of an interim council [illegible] of 10 ministers. A constituent assembly, formed on the basis of [illegible] is to meet before the end of 1952 and frame a democratic constitution.

A commercial treaty between India and Nepál was signed in 1792, and a British Resident was sent to reside at Kátmándu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war, and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Sagauli signed in December, 1815. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a treaty was concluded between the Nepalese and Tibetan Governments. The Tibetans bound themselves to pay an annual sum of Rs. 10,000 to Nepál to encourage trade between the two countries and to receive a Nepalese Representative of high rank at Lhasa in place of a headman as heretofore. Besides, [illegible] Kuti, Kerrong and other trade marts in Tibet.

A fresh treaty was signed on 21 December, 1923. By it all previous treaties, agreements and engagements since and including the Treaty of Sagauli were confirmed, and the British and Nepalese Governments acknowledged one another's independence, internal and external. In 1947, the legations in the two capitals, established in 1934, were raised to embassies.

An agreement of commerce and friendship between Nepál and the United States of America was signed at Kátmándu on 25 April, 1947, and the Nepalese ambassador in London was accredited as Minister to the U.S., and the U.S. ambassador in Delhi as Minister to Nepál.

Diplomatic relations at embassy level were established with India in 1947, and with France in 1949 (the Nepalese ambassador in London being accredited to France, and the French ambassador in New Delhi to Nepál).

On 31 July, 1950, a treaty of peace and friendship and a treaty of trade and commerce were signed between India and Nepál.

Area and Population.—Area about 54,000 square miles; population (census of 1941), 6,282,000.

The aboriginal stock is Mongolian with a considerable admixture of Hindu blood from India. They were originally divided into numerous hill clans and petty principalities, one of which, Gorkha or Gurkha, became predominant about 1769 and has since given its name to men from all parts of Nepál. The ruling family are Hindu Rajputs.

Capital, Kátmándu, 75 miles from the Indian frontier; population about 108,805, and of the surrounding valley 450,000, including Patan with a population of 104,928, and Bhatgaon with 93,176.

Religion and Education.—Sanatan or Pauranic, *i.e.* traditional or ancient Hinduism, is the religion of the bulk of the people, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants.

Facilities for education are being improved, and a scheme for compulsory primary education is under consideration. A commission to draw up a plan for establishing a university was set up in Sept., 1948.

Defence.—The Army consists of about 45,000 men, mainly infantry, of whom about 20,000 are regulars. The armament comprises about 15,000 magazine ·303 rifles, 25,000 Martini-Henry rifles, 110 machine or Lewis guns, 30 modern, 12 fairly modern and about 240 old-fashioned guns.

Trade and Industry.—The principal articles of export are food grains, jute, timber, oilseeds, ghee (clarified butter), potatoes, medicinal herbs, hides and skins, musk. The chief imports are textiles, cigarettes, salt, paraffin, sugar, spices, machinery, medicines, boots and shoes, paper, cement, iron and steel, tea.

Nepál has valuable forests in the southern part of the country, and in the northern part, on the slopes of the Himálayas, there grow large quantities of medicinal herbs which find a world-wide market. New industries, such as jute and sugar mills, match and glass and ceramic factories, and chemical works are being established. In 1947, 7,680,000 acres of land were under cultivation.

Three hydro-electric plants (one in Morang and two in the valley of Kátmándu) are in operation.

The estimated annual revenue is Rs. 12,500,000. In 1944–45, exports amounted to Rs. 37,376,000, and imports to Rs. 32,520,000.

Exports to Nepál from the United Kingdom (Board of Trade returns) were £17,069 in 1938; £4,371 in 1947; £30,985 in 1948; £24,460 in 1949; £30,286 in 1950; Nepalese exports to United Kingdom, £102 in 1950.

A national economic planning committee was formed on 17 Sept., 1948, to draw up a 15-year development plan to be carried out in three stages.

Communications.—A telephone connects the capital with Birganj and Raxaul (Oudh and Tirhut Railway) on the southern frontier with Bihar. A second telephone line connects Kátmándu with the eastern part of the Terai foothills. An extension of the telephone service to the western districts is being completed. In Feb., 1927, the first railway (2′ 6″ gauge), from Raxaul on the Oudh and Tirhut Railway to Amlekganj, a distance of 29 miles, and in 1940 the second railway (also narrow gauge) from Jayanagar on the Oudh and Tirhut Railway to Janakpur and thence to Bijulpura, a distance of 35 miles, was opened. There are 237 miles of motorable roads. A ropeway for the carriage of goods covers the 14 miles from Dhursing above Bhimphedi into the Kátmándu valley; it is being extended to Kátmándu. A topographical survey of the country by Indian personnel of the Government of India was completed in 1927.

Money.—The Nepálese rupee is 171 grains in weight as compared with the Indian rupee which weighs 180 grains. The present rate of exchange is about 115 Nepálese rupees for 100 Indian rupees. 100 Nepálese pice make one Nepálese rupee. Coins of all denominations are minted. In 1945, the Government of Nepál, for the first time in the history of the country, issued paper currency, which has proved very successful.

The trade is mostly financed by the Nepál Bank Ltd., established in 1937.

Diplomatic Representatives.

1. Of Nepál in Great Britain (12a Kensington Palace Gardens, W.8).

Ambassador Extraordinary and Plenipotentiary.—General Shanker Shamsher Jang Bahádur Ráná, G.B.E. (accredited 26 May, 1949).

Counsellor.—Prof. Rama Prasad Manandhar, C.B.E.

Counsellor, specially attached.—Maj.-Gen. Sridhar Shamsher Jang Bahádur Ráná.

First Secretary.—Subba Iswary Raj Misra.

Military Attaché.—Lieut.-Col. Surya Jang Thapa, C.B.E.

2. Of Great Britain in Nepál.

Ambassador Extraordinary and Plenipotentiary.—C. H. Summerhayes, C.M.G., M.B.E. (appointed April, 1951).

First Secretary.—Lieut.-Col. R. R. Proud.

There is a consular representative at Kátmándu.

Books of Reference.

Statistical Information.—A Department of Statistics was set up in Kátmándu on 25 Oct, 1950, *Director-General.*—Maj.-Gen. Bijaya Shamsher Jang Bahadur Rana.

THE NETHERLANDS.

(Koninkrijk der Nederlanden.)

Reigning Sovereign.

Juliana Louise Emma Marie Wilhelmina, born 30 April, 1909, daughter of Queen Wilhelmina (born 31 Aug., 1880) and Prince Henry of Mecklenburg-Schwerin (born 19 April, 1876, died 3 July, 1934); succeeded to the throne on the abdication of her mother (who assumed the title of Princess of the Netherlands), 4 Sept., 1948, and was crowned on 6 Sept.; married to Prince Bernhard Leopold Frederik Eberhard Julius Coert Karel Godfried Pieter of Lippe-Biesterfeld (born 29 June, 1911), on 7 Jan., 1937. *Offspring:* Princess Beatrix Wilhelmina Armgard, born 31 Jan., 1938; Princess Irene Emma Elisabeth, born 5 Aug., 1939; Princess Margriet Francisca, born in Ottawa, 19 Jan., 1943; Princess Maria Christina, born 18 Feb., 1947.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the 11th century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda and settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France; and a third matrimonial union, that of Prince Willem III of Orange with Mary, the eldest daughter of King James II, led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the title of 'stadhouders,' or governors. In 1747 the dignity was formally conferred on Willem IV and his heirs; but his successor, Willem V, had to take refuge

in England, in 1795, at the invasion of the French army. The family did not return till Nov., 1813, when the United Provinces were freed from French domination. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress of Vienna to be joined to the Northern Netherlands, thus constituting one kingdom. Willem I was proclaimed King of the Netherlands at The Hague on 16 March, 1815, and the succession to the crown settled on his heirs. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, 19 April, 1839, which constituted Belgium an independent kingdom.

NETHERLANDS SOVEREIGNS.

Willem I . . .	1815–40 (died 1843)	Willem III	1849–90
Willem II . . .	1840–49	Wilhelmina	1890–1948

National flag: red, white, blue (horizontal).

National anthem: Wilhelmus van Nassauwe (words by Philip van Marnix, *c.* 1570).

Government and Constitution.

I. CENTRAL GOVERNMENT.

The first Constitution of the Netherlands after its restoration as a Sovereign State was promulgated in 1814, and was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King); in 1840 (after the secession of the Belgian provinces); in 1848, 1884, 1887, 1917, 1922, 1938, 1947 and 1948. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of [illegible] in default of male heirs, the female line ascends the throne. [illegible] comes of age on reaching his 18th year. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the Council of State.

The central executive power of the State rests with the Crown, while the central legislative power is vested in the Crown and Parliament, the latter—called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the members of the Provincial States. The Second Chamber of the States-General consists of 100 deputies, who are elected directly. Members of the States-General must be Netherlanders or recognized as Netherlands subjects and may be men or women.

First Chamber (elected 8 July, 1948):—Catholics, 17; Labour Party, 14; Anti-Revolutionaries, 7; Christian Historicals, 5; Communists, 4; Liberals, 3.

Second Chamber (elected 7 July, 1948):—Catholics, 32; Labour Party, 27; Anti-Revolutionaries, 13; Christian Historicals, 9; Communists, 8; Liberals, 8; other parties, 3.

The revised constitution of 1917 has introduced an electoral system based on universal suffrage and proportional representation. Under its provisions, members of the Second Chamber are directly elected by citizens of both sexes who are Netherlands subjects not under 23 years (since March 11, 1946). Criminals, lunatics and certain others are disqualified; for certain crimes and misdemeanours there may be temporary disqualification.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 6 years, and every 3 years one half retires by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, subject to the condition that

new elections take place within 40 days, and the new House or Houses be convoked to meet within 3 months.

The Sovereign and the Second Chamber may introduce new Bills; the First Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them may by a majority vote decide on a secret session. The ministers may attend at the meetings of both Chambers, but only in an advisory capacity as, since the 1938 revision of the constitution, a member of the States-General cannot be a Minister.

The Constitution can be revised only by a Bill declaring that there is reason for introducing such revision and containing the proposed alterations. The passing of this Bill is followed by a dissolution of both Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly stated, all laws concern only the realm in Europe, and not the Overseas Territories. Every act of the Sovereign has to be covered by a responsible Minister.

The Ministry, appointed 14 March, 1951, is composed as follows :—

Prime Minister and Minister for General Affairs.—Dr. W. Drees (Labour).
Deputy Prime Minister.—Dr. F. G. C. J. M. Teulings (Cath.).
Minister of Justice.—Dr. H. Mulderije (Cath.).
Minister for Foreign Affairs.—Dr. D. U. Stikker (Lib.).
Minister of Home Affairs.—Dr. J. H. van Maarseveen (Cath.).
Minister of Education, Arts and Science.—Dr. F. J. T. Rutten (Cath.).
Minister of Finance.—Prof. Dr. P. Lieftinck (Labour).
Minister for War and the Navy.—C. Staf.
Minister of Public Works and Reconstruction.—Dr. J. in't Veld (Labour).
Minister of Transport and Shipping.—H. H. Wemmers.
Minister of Economic Affairs.—Dr. J. R. M. van den Brink (Cath.).
Minister of Agriculture, Fisheries and Food.—S. L. Mansholt (Labour).
Minister of [illegible] —Dr. A. M. Joekes (Labour).
Minister for Union Affairs.—L. A. H. Peters.
Minister without Portfolio.—Prof. A. H. M. Albregts.

The Council of State—*Raad van State*—appointed and presided over by the Sovereign, is composed of a deputy chairman and not more than 14 members and is consulted on all legislative matters. Decisions of the crown in administrative disputes are prepared by a special committee of the Council.

II. Local Government.

The territory is divided into 11 provinces and 1,014 municipalities. Each province has its own representative body, the Provincial States. The members are elected for 4 years, directly from the Netherlands inhabitants of the province who are 23 years of age. The electoral register is the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for South Holland to 35 for Drenthe. The Provincial States are entitled to issue ordinances concerning the welfare of the province, and to raise taxes pursuant to legal provisions. All provincial ordinances must be approved by the Crown. The members of the Provincial States elect the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 of their members, called the 'Deputy States,' is charged with the executive power and, if required, with the enforcement of the law in the province.

Deputy as well as Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but attends the latter in only a deliberative capacity. He is the chief magistrate in the province. The Commissioner and the members of the Deputy States receive an allowance.

Each municipality forms a Corporation with its own interests and rights, subject to the general law, and is governed by a Municipal Council, directly elected for four years, by the electorate registered for the Provincial States, provided they are residents of the municipality. All Netherlands inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Municipal Council has the right to issue bye-laws concerning the communal welfare. The Council may levy taxes pursuant to legal provisions. All bye-laws may be vetoed by the Sovereign. The Municipal Budget and resolutions to alienate municipal property require the approbation of the Deputy States of the province. The Council meets in public as often as may be necessary, and is presided over by a Burgomaster, appointed by the Sovereign for 6 years. The day-to-day administration is carried out by the Burgomaster and 2—6 Aldermen (*wethouders*), elected by and from the Council; this body is also charged with the enforcement of the law. The Burgomaster may suspend the execution of a resolution of the Council for 30 days, but is bound to notify the Deputy States of the province. In maintaining public order, the Burgomaster acts as the chief of police.

Area and Population.

I. Progress and Present Condition.

Population at various census periods :—

1829 .	2,613,298	1889 .	4,511,415	1920 .	6,865,314
1849 .	3,056,879	1899 .	5,104,137	1930 .	7,935,565
1869 .	3,579,529	1909 .	5,858,175	1947 .	9,625,499

Area, density and estimated population on 31 Dec., 1939 and 1949 :—

Provinces	Area (land): square km. (31 Dec., 1949)	Population		Density per square km. (31 Dec., 1949)
		31 Dec., 1939	31 Dec., 1949	
Groningen	2,245·40	423,678	459,819	204·8
Friesland	3,234·98	424,462	465,267	143·8
Drenthe	2,618·38	247,055	280,798	107·2
Overijssel	3,249·61	576,961	665,362	204·8
Guelders	4,987·37	923,615	1,074,316	215·7
Utrecht	1,323·30	480,028	573,422	433·3
North Holland	2,632·70	1,691,674	1,847,272	701·7
South Holland	2,811·46	2,168,251	2,382,898	847·6
Zeeland	1,685·33	254,965	268,609	159·4
North Brabant	4,904·83	1,033,692	1,242,638	253·4
Limburg	2,175·09	608,837	722,137	332·0
Noordoostelijke polder [1]	475·36	—	5,217	11·0
[illegible] [2]	59·89	—	9,033	150·8
Central Population Register [3]	—	729	29,985	—
Total	32,395·70	8,833,977	10,026,773	309·5

[1] The 'Noordoostelijke polder' is part of what used to be the Zuiderzee, now called IJsselmeer; it was reclaimed in 1942 and has not yet been incorporated into any province.

[2] Frontier correction with Germany (23 April, 1949), not yet incorporated in any province.

[3] The Central Register of Population includes persons who [illegible] the Netherlands but who have no [illegible] (persons living in caravans and house-boats, shipping population on the water, etc.).

Of the total population on 31 Dec., 1949, 4,998,251 were males, 5,028,522 females.

The total area of the Netherlands up to the low water line (*i.e.*, sea-level at low tide) is 40,892·84 square km., of which 32,395·70 square km. is land area (according to the fixation of this area at the census of 31 May, 1947, and subsequent changes).

On June 14, 1918, a law was passed concerning the reclamation of the Zuiderzee. The work was begun in 1923; the following sections have been completed (1946):—

1. The Noordholland–Wieringen Barrage (2 km.), 1925.
2. The Wieringermeer Polder (194·78 square km.), 1930 (inundated by the Germans in 1945, but drained again in the same year).
3. The Wieringen–Friesland Barrage (30 km.), 1932.
4. The Noordoost Polder (473·36 square km.), 1942.

Planning for the Zuidwest Polder (545 square km.) is in progress; the embanking of the Zuidoost Polder (965 square km.) has begun. A portion of what used to be the Zuiderzee behind the barrage will remain a fresh water lake: IJsselmeer (1,200 square km.).

The sums spent on barrages and accessory works amounted to about 200 million guilders; those for the Wieringermeer Polder to about 100 million guilders. The Second World War is responsible for the original estimate of about 120 million guilders for the Noordoost Polder being exceeded (*see* map in THE STATESMAN'S YEAR-BOOK, 1932).

II. MOVEMENT OF THE POPULATION.

Year	Live births		Still births	Marriages	Divorces	Deaths
	Total	Illegitimate				
1947	267,348	5,155	5,479	98,683	8,847	77,646
1948	247,923	4,211	4,775	87,719	8,038	72,459
1949	236,177	3,773	4,650	82,261	7,004	81,077
1950[1]	229,332	3,369	4,511	87,060	—	75,534

Roermond	22,451	Geleen	21,194		

Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and a great part of the inhabitants belong to the Dutch Reformed Church.

The number of adherents of the different Churches according to the census of 1947 was :—Dutch Reformed Church, 2,988,558; other Protestants, 1,261,744; Roman Catholics, 3,703,526; Jews, 14,347; other creeds, 5,251; no religion, 1,641,214; unknown, 10,859.

The government of the Reformed Church is Presbyterian. At the end of 1950 the Dutch Reformed Church had 1 synod, 11 provincial districts, 45 classes and 1,326 parishes. Their clergy numbered about 1,800. The Roman Catholic Church had, March, 1950, 1 archbishop (of Utrecht), 4 bishops and 1,541 parishes and rectorships. The Old Catholics had (end of 1949) 1 archbishop, 2 bishops and 28 parishes. The Jews had, in 1949, 58 communities. The Society of Friends had 74 members in 1949.

Education.

The following table gives preliminary details of educational institutions for 1949–50 :—

Institutions	Number	Teaching staff	Pupils or students	
			Total	Female
Public universities [1]	4	684 [7]	17,928	4,084
Voluntary universities [2]	2	99 [7]	2,271	313
Technical university	1	149 [7]	5,510	73
Agricultural university [3]	1	61 [7]	988	57
Economical universities [4]	2	64 [7]	1,869	50
Secondary schools [5] :				
Day schools	1,281	11,611	209,818	89,792
Evening schools	126	1,095 [8]	15,905	4,969
Technical and housewifery schools [5]	892	11,405	236,278	108,208
Agricultural schools [5, 6]	236	— [8]	50,380	1,241
Elementary schools :				
Public (governmental)	2,401	9,685	319,680	152,738
Private	4,697	24,939	860,478	419,716
Schools for mentally and physically defective children	217	1,675	26,565	10,273
Infant schools :				
Public (governmental)	294	1,240	48,206	23,107
Private	2,720	6,245	267,478	130,854
Training colleges [9]	89	1,152	10,545	5,600

[1] Leiden (founded 1575), Utrecht (1636), Groningen (1614), Amsterdam (1877).
[2] The Calvinist University of Amsterdam (1905) and the Roman Catholic University of Nijmegen (1923).
[3] In 1918 the Agricultural School at Wageningen was created an agricultural university.
[4] One at Rotterdam (1913) and the other at Tilburg (Roman Catholic High School of Commerce, founded 1927).
[5] The number of pupils taught in secondary, technical, housewifery and agricultural schools includes a number of part-time students.
[6] 1947. [7] 1948. [8] Unknown. [9] 1950.

There were, in 1950, 488 cinemas with a seating capacity of 225,000

Justice and Crime.

As from 1 January, 1934, justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 19 district courts, and by 62 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district courts, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts of appeal are constituted of 3 and the High Court of 5 judges. All judges are appointed for life by the Sovereign (the judges of the High Court from a list prepared by the Second Chamber) or the States-General. They can be removed only by a decision of the High Court.

Juvenile courts were called into existence in 1922. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless imprisonment of six months or more ought to be inflicted, in which case the judge of the juvenile court acts as judge-examiner.

Number of persons convicted (offenders concerning taxes not included):—

	1944	1945	1946	1947	1948	1949
Major offences:						
Males	— [1]	— [1]	40,903	45,452	41,382	34,501
Females	— [1]	— [1]	6,923	8,754	9,450	6,714
Minor offences:						
Males	43,965	42,602	112,986	187,778	254,820	267,261
Females	9,362	7,638	15,323	23,144	32,351	32,094

[1] Not available.

There are both State and Municipal police. The State Police, about 7,000 men strong, serves 886 and the Municipal Police, about 13,000 men strong, serves 127 municipalities. The State Police includes ordinary as well as water, mounted and motor police. The State Police Corps is under the jurisdiction of the Police Department of the Ministry of Justice, which also includes the National Criminal Investigation Office, which controls serious crimes throughout the country, and the International Criminal Investigation Office, which informs foreign countries of international crimes.

Finance.

The revenue and expenditure (ordinary and extraordinary) were, in millions of guilders:—

	1945 [2]	1946 [2]	1947 [2]	1948 [2]	1949 [2]	1950 [3]	1951 [3]
Revenue [1]	1,145	3,721	4,173	6,346	5,312	3,942	3,992
Expenditure	4,069	4,211	4,739	6,806	4,883	4,487	4,312

[1] Without the revenues of loans. [2] Preliminary accounts. [3] Estimates.

The national debt, in millions of guilders, was on 1 Jan. :—

	1945	1946	1947	1948	1949	1950	1951 [1]
Internal funded debt .	5,880	5,767	7,160	7,099	7,206	7,732	8,418
„ floating „ .	6,739	16,389	14,170	18,098	16,249	16,366	—
External funded „ .	5	576	1,022	1,021	1,875	2,923	3,089
„ floating „ .	142	463	321	984	399	450	265
Total . .	12,766	23,195	22,673	27,202	25,729	27,471	—

[1] Preliminary figures or not yet available.

Defence.

I. Frontier.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On both sides the country is quite level and there are no natural defences along the frontiers, except the big rivers running parallel about 20–30 miles inside the Netherlands frontier. The bridges across them are defended by a few pillboxes.

II. Army.

According to an Act of 1922, service in the Army is partly voluntary and partly compulsory; the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, any other resident in the Netherlands, is liable to personal service in the army (or navy) from the age of 20 up to 40. A National Reserve of volunteers was set up in March, 1948.

The armed forces are in the process of being reorganized. The reorganization is hampered by the lack of equipment and the need for restoring and maintaining peace and order in Indonesia.

III. Navy.

The Royal Netherlands Navy has its bases in Holland, in the South-west Pacific (Indonesia) and in the Caribbean (Netherlands West Indies).

Following is a list of principal ships of the Royal Netherlands Navy :—

Completed	Name	Standard displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Guns				
		Tons	Inches	Inches				Knots
	Aircraft Carrier							
1945	Karel Doorman (19 aircraft, capacity 35)	13,190	—	—	Light AA	—	40,000	25
	Cruisers							
1940	Heemskerck	4,150	2½	shields	10 4-inch	—	56,000	32
1938	Tromp	4,200	2	open turret	6 5·9-inch, 4 2·9-inch AA	—	56,000	32

There are also 6 destroyers, 5 submarines, 5 frigates, 2 gunboats, 1 technical training ship, 4 patrol vessels (rated as corvettes), 2 minelayers, 38 minesweepers, 2 depot ships, 5 surveying vessels, a submarine detection ship, a patrol vessel (submarine chaser), 12 seaward defence motor launches, 2 air/sea rescue boats, 3 shallow-draught motor minesweepers, 3 surveying

motor launches, 12 landing craft, a supply ship, a salvage vessel, a sail training vessel, 37 other vessels and 100 patrol launches.

Six frigates (destroyer escorts) were acquired from the United States in 1950. Two cruisers of 8,350 tons, the *De Ruyter* and *Zeven Provincien*, 12 destroyers and 4 submarines are under construction.

Twelve escort destroyers are projected.

In 1950, a destroyer, 4 patrol vessels (corvettes), 12 diesel patrol vessels, 8 seaward defence motor launches and other vessels were transferred to the Indonesian Navy.

Naval estimates, 1951, 279,000,000 guilders.

IV. Air Force.

The Navy and the Army each have their own air force. British and American aircraft are mainly used.

Production and Industry.

I. Agriculture.

The acreage of all holdings was divided as follows (in hectares) :—

	1947 [1]	1948 [1]	1949 [1]	1949 [2]	1950 [2]
Arable land	970,937	963,983	955,727	917,826	925,576
Grass land	1,334,837	1,344,512	1,352,807	1,303,719	1,317,852
Land for flower bulbs	6,860	6,428	6,528	6,015	6,509
[illegible]	74,761	80,969	82,645	79,186	84,211
[illegible]	1,429	1,482	1,315	1,209	1,151
Nurseries	3,343	3,302	3,379	3,157	3,086
Total of cultivated land	2,392,157	2,400,736	2,402,401	2,311,112	2,338,385

[1] Cadastral area. [2] Net area.

The areas under the special crops were as follows (in hectares, net area) :—

Products	1949	1950	Products	1949	1950
Autumn wheat	86,625	82,325	Flax	19,495	17,792
Spring wheat	13,231	8,899	Agricultural and mar-		
Rye	182,489	175,190	[illegible]	20,387	12,317
Autumn barley	8,378	12,348	[illegible]	124,679	120,503
Spring barley	38,956	56,887	Potatoes, industrial	50,476	45,350
Oats	129,627	140,990	Sugarbeets	64,862	66,903
Peas	20,359	25,592	Fodderbeets, turnips		
Colza	21,159	31,980	and carrots	56,613	56,395

The yield of the more important products, in metric tons, was as follows:—

Crop	Average 1930/39	1947	1948	1949	1950
Wheat	367,012	194,089	305,774	425,314	294,593
Rye	458,008	317,678	382,187	516,837	420,950
Barley	101,552	178,914	137,938	188,625	232,252
Oats	337,367	338,467	315,864	423,840	381,548
Field beans	25,087	9,941	7,739	12,470	12,436
Peas	103,872	44,937	31,908	67,490	72,850
Colza	3,841	1,145	26,824	58,723	44,464
Potatoes, edible	2,219,213	3,012,047	4,154,437	3,063,746	2,846,418
Potatoes, industrial	701,792	1,598,728	1,715,594	1,541,428	1,205,430
Sugarbeets	1,653,866	1,577,467	1,892,901	2,943,064	2,716,915

Livestock, May, 1950:—2,723,000 cattle, 1,860,000 pigs, 252,000 horses (for agricultural purposes), 390,000 sheep, 23,443,000 poultry.

In 1950, the production of butter, under state control, amounted to 93.513 metric tons; that of cheese, under state control, to 128,000 metric tons (provisional figures). Export value of arable crops amounted to 284,100,000 guilders; animal produce, 919,200,000 guilders, and horticultural produce, 392,800,000 guilders.

II. Mining and Manufactures.

Twelve coal-mines are found in the province of Limburg, of which 8 are in private ownership and 4 under state management. The daily average of coal-workers was 32,200 in 1938 and 41,100 in 1949 (of whom 26,400 worked underground).

Production of coal in thousands of metric tons:—

1938	13,488	1945	5,097	1948	11,032
1942	12,330	1946	8,314	1949	11,705
1944	8,313	1947	10,102	1950	12,247

The production of crude petroleum amounted in 1943 (first year) to 200 tons; 1948, 495,500 tons; 1949, 620,900 tons; 1950, 704,800 tons.

There are 2 salt-mines at Boekelo and Hengelo; they produced 246,063 metric tons in 1948; 327,134 metric tons in 1949; 413,000 metric tons in 1950 (provisional figure).

Electricity delivered in 1950 was 5,478 million kwh.; gas delivered in 1950 was 1,591 million cubic metres.

Numbers employed (in thousands) and turnover (in million guilders) in about 10,000 manufacturing enterprises with 10 workers and more, excluding building and public utilities:—

Class of industry	Numbers employed		Turnover	
	1948	1949	1948	1949
Earthenware, glass, lime and stoneware	40·2	42 4	299·1	337 1
Cutting and polishing of diamond and other precious stones	1·0	0 9	30·6	27·5
Graphic industry	24·3	25·4	221·4	233·9
Chemical industries	41·1	42·2	805·1	836·8

[illegible] carrying	49·2	50·5	338·5	452·5
[illegible]	237·2	246·4	2,498·1	2,799·5
[illegible]	24 1	25·0	395·9	382·4
[illegible]y	101·5	111·5	1,467·1	1,735 0
Manufacture of foodstuffs	124·3	130·5	3,372·3	4,259·5
Total	783 0	818·0	10,945 5	12,643·1

III. Fisheries.

The total produce of fish landed from the North Sea in 1950 was valued at 51,819,280 guilders; the total weight amounted to 154,007 tons. Included in the total is the produce of the herring fishery to a value of 30,402,428 guilders and a weight of 112,342 tons.

The quantity of oysters produced in 1950 amounted to 1,537 tons.

Commerce.

On 5 Sept., 1944, and on 14 March, 1947, the Netherlands signed agreements with Belgium and Luxemburg for the establishment of a customs union. On 1 Jan., 1948, this union came into force and the existing customs tariffs of the Belgium–Luxemburg Economic Union and of the Netherlands were superseded by a joint tariff, the Benelux Customs Union Tariff. It applies to imports into the three countries from outside sources, and exempts from customs duties all imports into each of the three countries from the other two. The Benelux tariff has 991 items and 2,440 separate specifications.

The following are the returns of the special imports (exclusive of gold and silver coins and bullion) and the special exports for 6 years (in thousands of guilders) :—

Year	Imports	Exports	Year	Imports	Exports
1939	1,516,515	966,206	1947	4,251,243	1,859,265
1943	411,967 [1]	695,300 [1]	1948	4,918,728	2,669,629
1946	2,145,548	784,844	1949	5,296,631	3,794,135

[1] Including goods for which no customs forms were submitted.

Value of the trade (excluding gold and silver coins and bullion) with the leading countries (in thousands of guilders) :—

Country	Imports			Exports		
	1948	1949	1950	1948	1949	1950
Argentina	263,174	174,357	170,889	32,137	43,097	61,003
Belgium [2]	730,407	759,945	1,430,388	421,825	506,937	721,528
France	238,529	364,141	373,255	216,209	271,661	240,119
Germany	267,199	359,335	934,198 [1]	159,672	409,969	1,105,141 [1]
Indonesia	334,419	403,263	509,833	200,187	391,761	299,514
Sweden	196,000	174,489	260,746	164,080	149,205	190,814
Switzerland	128,721	121,318	103,019	111,604	104,254	134,579
United Kingdom	461,557	581,591	759,613	382,303	615,064	781,158
United States	860,669	877,913	898,877	73,421	111,156	226,824

[1] Western Germany only. [2] Including Luxemburg.

Total trade between the Netherlands and the United Kingdom (in £ sterling) for 5 years (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports to U.K.	29,304,454	26,164,235	44,319,269	65,380,094	85,910,621
Exports from U.K.	13,134,791	31,267,191	45,267,785	52,942,672	71,650,453
Re-exports from U.K.	1,663,055	1,716,080	3,129,412	3,000,322	4,582,416

Shipping.

Sea-going Shipping.—Survey of the Netherlands mercantile marine.

Ships with Netherlands certificates of registry (excluding Indonesia, Netherlands Antilles and Surinam)	1 January, 1949		1 January, 1950	
	Number	Capacity in 1,000 G.R.T.	Number	Capacity in 1,000 G.R.T.
Passenger ships	29	312	30	323
Freight-passenger ships	90	459	114	577
Freighters (500 G.R.T. and over)	278	1,308	282	1,354
Freighters (under 500 G.R.T.)	428	116	492	143
Tankers	64	340	74	370
Tugs	40	9	51	11
Dredgers	36	14	38	15
Total	965	2,558	1,081	2,793

In 1949, 16,463 sea-going ships of 36,061,000 gross tons entered Netherlands ports (1938, 21,096 ships of 52,990,000 gross tons; 1948, 12,552 ships of 28,892,000 gross tons).

Total goods traffic by sea-going ships in 1949 (in 1,000 metric tons) amounted to 18,669 unloaded, of which 13,304 were imports and 5,365 transit (1938, respectively 33,062, 12,212 and 20,850), and 10,343 loaded, of which 4,335 were exports and 6,008 transit (1938, respectively 22,853, 5,802 and 17,051).

Inland Shipping.—The total length of navigable rivers and canals is 6,975 km., of which about 1,610 km. is for ships with a capacity of 1,000 and more metric tons. On 1 Jan., 1950, the Netherlands inland fleet was composed as follows:—

Class of tonnage	Number of vessels	Carrying capacity in 1,000 M.T.	Class of tonnage	Number of vessels	Carrying capacity in 1,000 M.T.
21–99 tons .	7,955	450	600–999 tons .	927	718
100–199 tons .	4,117	546	1,000–1,499 tons .	572	732
200–299 tons .	1,159	281	1,500 tons and over	265	527
300–399 tons .	751	257			
400–599 tons .	1,309	661	Total . .	17,055	4,171

In 1949, 60·5 million metric tons of goods were transported on rivers and canals, of which 26·7 million in international traffic (1948, 53·9 million and 21·6 million). Goods transport on the Rhine (Lobith) in 1949 amounted to 12·9 million metric tons downstream and 8·2 million upstream (1948, 9·9 million and 6·3 million).

Communications.

Railways. All railways are run by the mixed company 'The Netherlands Railways N.V.' Length of route (gauge 4 ft. 11 in.) in 1950 was 3,201 km., of which 893 km. were electrified. Passengers carried (1949), 166·6 million; goods transported, 19·9 million metric tons.

Road Traffic.—On 1 Jan., 1950, the length of the Netherlands network of roads was 2,774 km. of main (state) roads, 4,335 km. of secondary roads, 5,240 km. of third-class roads, and about 12,000 to 15,000 km. of unclassified local roads. Buses transported in 1949, 394 million passengers, of whom 171 million in local traffic. Number of motor vehicles on 1 Aug., 1950:—Motor cycles and tricycles, 154,875; cars, 138,625; buses, 5,973; trucks, 75,065; others, 2,636.

Civil Aviation.—The Royal Dutch Airlines (K.L.M.) was founded with government aid as a monopolistic enterprise on 7 Oct, 1919. The company now has a capital of 100 million guilders, 51% of which is owned by the government. Figures (excl. West-Indies division):—Passenger km., 1950, 792·1 million; 1949, 564·7 million; transport of goods (freight, excess baggage and mail in ton-miles), 1950, 31·6 million; 1949, 23·2 million. K.L.M. maintain regular services with every part of the world.

Post, Telegraphs and Telephones.—On 31 Dec., 1946, there were 2,093 post offices and 2,235 telegraph offices.

On 1 Jan., 1950, there were 468,000 connexions and 692,000 apparatus. Total length of telephone cables, 682,000 km., of which 591,887 km. were for public use. Length of telegraph circuits, 66,240 km.

Wireless receiving sets totalled, 1,471,000 on 1 Dec., 1950; in addition, 486,000 persons have distribution wireless.

Banking and Credit.

The Bank of the Netherlands, founded as a private institution, was nationalized on 1 Aug., 1948, the shareholders receiving, for a share of 1,000 guilders, a security of 2,000 guilders on the 2½% National Debt. Since 1863 the bank has the sole right of issuing bank-notes. The bank does the same business as other banks, but with more guarantees. The capital amounts to 20,000,000 guilders. Note circulation, 31 Dec., 1949, 3,036,000,000 guilders, and on 31 Dec., 1950, 2,911,000,000 guilders (new issue). A currency reorganization was carried out on 25 Sept., 1945.

A National Recovery Bank has been set up, with a capital of 300 million guilders.

For the year 1949 the state post office savings bank had deposits of 288,175,000 guilders and withdrawals of 322,660,000 guilders: the figures for the private banks were: deposits, 401,275,000 guilders; withdrawals, 359,530,000 guilders.

Money, Weights and Measures.

The monetary unit is the *gulden* (guilder, florin) of 100 cents. The golden 10-florin piece, weighing 6·720 grammes, 0·900 fine, and containing 6·048 grammes of fine gold; thus the *gulden* theoretically equals 0·6048 gramme of fine gold. The silver *gulden* weighs 10 grammes, 0·720 fine. The rate of exchange is £1 = 10·64 guilders since [illegible], 1949.

Legal tender are:—Notes, issued by De Nederlandsche Bank N.V.; treasury notes.

Subsidiary coins, being legal tender to limited amounts only, are the silver *rijksdaalder* (= 2½ guilders) and *gulden*, nickel 25-cent pieces, silver and nickel 10-cent pieces, bronze 5-cent pieces, and bronze 1-cent pieces. Zinc coins in denominations of 1 and 10 cents, minted during the German occupation, are maintained as legal tender for the present. There are also notes of 2½ and 1 guilders.

The metric system of weights and measures, and the metric denominations are adopted in the Netherlands.

Diplomatic and Consular Representatives.

1. Of the Netherlands in Great Britain (Hereford House, Park Street, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Jonkheer E. F. M. J. Michiels van Verduynen, G.C.V.O. (appointed 8 May, 1942).

Counsellors.—W. J. G. Baron Gevers, C.V.O.; Jhr. A. P. C. van Karnebeek, C.V.O.

First Secretaries.—H. C. Schoch, C.V.O.; N. Brat (*Consular Section*).

Chief of Economic Section (Netherlands).—D. M. de Smit.

Financial Attaché.—J. M. Fehmers.

Military Attaché.—Col. J. K. H. de Roo van Alderwerelt, C.V.O.

Naval Attaché.—Commander P. A. Mulock van der Vlies Bik, C.V.O.

Air Attaché.—Col. H. F. C. Holtz, C.V.O.

Agricultural Attaché.—Dr. Tj. Bakker.

Press Attaché.—R. C. Pekelharing.

Civil Air Attaché.—Dr. D. Goedhuis.

Cultural Attaché.—Dr. Jane de Iongh.

There are consular representatives at Belfast, Birmingham, Cardiff, Dundee, Edinburgh, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Southampton, Sunderland and other places.

2. Of Great Britain in the Netherlands.

Ambassador Extraordinary and Plenipotentiary.—Sir Philip Nichols, K.C.M.G., M.C. [illegible], 1948).

Counsellors.—I. P. Garran; L. B. S. Larkins, O.B.E. (*Commercial*).

First Secretaries.—R. W. Selby; J. H. Mockford; J. M. Vincent-Smith (*Labour*).

Naval Attaché.—Commander W. E. J. Eames, D.S.C., R.N.

Military Attaché.—Col. T. C. Williamson, D.S.O.

Air Attaché.—Group Capt. J. M. D. Ker.

Civil Air Attaché.—Air Marshal D. Colyer, C.B., D.F.C.

Consul-General in Amsterdam.—A. W. Robertson.

Consul-General in Rotterdam.—R. Darell-Wilson.

Books of Reference.

Statistical Information.—The 'Centraal Bureau voor de Statistiek' at the Hague, is the official Netherlands statistical service, *Director-General of Statistics*:—Dr. Ph. J. [illegible].

[illegible] was founded in 1899. Prior to that year, statistical publications were compiled by the 'Centrale Commissie voor de Statistiek,' the 'Vereniging voor Staathuishoudkunde en Statistiek' and [illegible] departments. These activities have gradually been taken over and [illegible] Central Bureau which now compiles practically all [illegible]

Its current [illegible]:—

Jaarcijfers voor Nederland (Statistical Year Book). From 1923/24 (preceded by Jaarcijfers voor het Koninkrijk der Nederlanden, 1898–1922); latest issue, 1943/46.

Statistisch zakboek (Pocket Year Book). From 1899/1924 (1 vol.); latest issue 1950.

Maandschrift van het C.B.S. (Monthly Bulletin). From 1906.

Results of the Twelfth Census, Population and Housing, 31 May, 1947.

Maandstatistiek van de [illegible] (monthly statement of the import, export and transit trade). From 1917.
