Overseas Territories.

The overseas territories of the Netherlands, situated in the West Indies and on the western part of New Guinea, embrace an area of 169,834 square miles, with an estimated population of about 1,600,000.

NETHERLANDS GUIANA and NETHERLANDS WEST INDIES.

The overseas parts of the Kingdom of the Netherlands in America are (*a*) Surinam, or Netherlands Guiana, and (*b*) the Netherlands West Indies.

Surinam.

Netherlands Guiana or Surinam is situated on the north coast of South America between 1° 50′ and 6° 7′ N. lat., and 53° 59′ and 58° 2′ W. long., and bounded on the north by the Atlantic Ocean, on the east by the rivers Marowijne, Lawa, Litani and the Koelé-Koelé creek, which separate it from French Guiana, on the west by the rivers Corantijne, Coeroeni and Koetari, which separate it from British Guiana, and on the south by inaccessible forests and savannas, which separate it from Brazil. (According to the report of a recent expedition into the interior, the alleged Tumac Humac mountains do not exist.)

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assigned to the Netherlands in exchange for the colony of New Netherland in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the possession of England, 1799 till 1802, when it was restored at the peace of Amiens, and 1804 to 1816, when it was returned according to the Convention of London of 13 August, 1814, confirmed at the peace of Paris of 20 November, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo and the Cape of Good Hope.

According to the Netherlands constitution as amended in Sept., 1948, Surinam is an autonomous part of the Netherlands Kingdom. It is divided into 7 districts.

By an interim order of 22 Dec., 1949, which came into force on 20 Jan.,

1950, Surinam obtained self-government. The Governor is the representative of the sovereign and the head of the government. The ministers are responsible to the States of Surinam. There is a ministry of 6 ministers, appointed by the Governor, and an Advisory Council of 5 members also appointed by the Governor.

The States of Surinam (21 members) form the representative body; they are elected by the people for a 4-year period.

Governor.—J. Klaasesz (appointed 1 Oct., 1949).

Area, 55,000 English square miles. Population (31 Dec., 1949), about 216,000, inclusive of the Bush Negroes and Indians living in the forests. The capital, Paramaribo, has about 78,000 inhabitants.

Vital statistics:—

	Births	Deaths	Marriages [1]	Divorces [2]		Births	Deaths	Marriages [1]	Divorces [2]
1946	6,098	2,026	1,353	99	1948	6,476	2,217	2,108	104
1947	5,983	2,338	1,592	88	1949	6,473	2,213	557 [3]	127

[1] Including Mohammedan and Hindu marriages, 1946, 951; 1947, 1,134, 1948, 1,596.
[2] Including Mohammedan and Hindu divorces, 1946, 31; 1947, 23; 1948, 34; 1949, 48. Number of Mohammedan marriages, 1946, 264; 1947, 176; 1948, 280. [3] Civil marriages only.

There is entire religious liberty. At the end of 1949 the numbers of the different religious bodies were:—Reformed and Lutheran, 14,200; Moravian Brethren, 36,000; Roman Catholic, 35,500; Jews, 500; Moslems, 50,000; Hindus, 47,000; Confucians, 4,000; others, 3,200.

There were, in 1949, 46 public and 83 private schools with together 33,265 pupils. There are also 32 mission schools for Indians and Bush Negroes, with 1,000 pupils; a medical school, a law school, a technical school, 3 training colleges and 2 housewifery schools.

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts.

For relieving pauperism the government not only subsidizes orphanages and other religious or philanthropical institutions, but itself maintains an almshouse.

The Netherlands forces in Surinam consist of artillery, tanks and infantry.

The expenditure and the local revenue (derived from import, export and excise duties, taxes on houses and estates, personal imposts and some indirect taxes), are shown as follows (in thousands of Surinam guilders):—

	1946	1947	1948	1949 [1]	1950 [1]	1951 [1]
Revenue	12,586	16,744	21,446	28,199	31,966	27,895
Expenditure	12,457	18,041	19,354	26,262	32,434	27,863

[1] Preliminary.

Principal products for 2 years:—

	1948	1949		1948	1949
Sugar (kilos)	5,374,000	4,405,000	Rum 50% (litres)	534,000	420,000
Cocoa (kilos)	7,400	49,000	Molasses (litres)	2,009,000	1,674,000
Coffee (kilos)	447,000	349,000	Oranges (pieces)	36,800,000	45,100,000
Paddy (kilos)	58,395,000	50,204,000	Grapefruit (pieces)	10,600,000	7,600,000
Maize (kilos)	616,000	295,000	Sweet potatoes (kilos)	581,000	1,253,000
Bananas (bunches)	502,000	590,000	Coconuts (pieces)	9,741,000	11,525,000

The production of gold in 1950 was 141 kilos; of balata, 172,867 kilos, and of bauxite, 2,045,362 metric tons. Practically the whole of the bauxite production was exported to the United States.

In 1949 there were 43,000 head of cattle, 5,200 sheep and goats, 6,500 pigs, 139 buffaloes, 900 horses, 1,200 mules and donkeys.

Imports and exports for 6 years (in Surinam guilders) :—

Year	Imports	Exports	Year	Imports	Exports
1945	12,626,652	7,432,264	1948	36,172,232	27,382,685
1946	15,710,868	11,513,612	1949	37,812,004	34,077,650
1947	30,982,018	24,581,839	1950	39,319,567	31,477,000[1]

[1] Provisional figure.

Principal exports in 1950 :—Rice, 4,245 tons; oranges, 71,345 crates; grapefruit, 26,564 crates; other citrus fruit, 4,468 crates; coffee, 302 tons; balata, 180 tons; hides, 72,000 kilos; gold, 1,000 grammes; bauxite, 2,083,607 metric tons; timber, 23,000 cubic metres.

U.K. imports from Netherlands Guiana, 1950, £408,739; 1949, £234,379; 1948, £175,883; 1947, £176,047; U.K. exports to Netherlands Guiana, 1950, £75,723; 1949, £85,969; 1948, £27,946; 1947, £43,778 (British Board of Trade returns).

Shipping.—The Royal Netherlands Steamship Co. plies between Amsterdam and Paramaribo, and New York and Paramaribo. The Alcoa Steamship Co. plies from New Orleans or Mobile and from Trinidad to Paramaribo. The Surinam Steamship Co. has services between Paramaribo and Georgetown, and between Paramaribo and Cayenne.

In 1950 there entered 586 vessels of 1,551,050 net register tons, and cleared 577 vessels of 1,553,167 net register tons.

Aviation.—The Pan American World Airways Inc. has a regular service New York–Buenos Aires *via* Paramaribo. K.L.M. (Royal Dutch Air Lines) have regular services between Paramaribo *via* Trinidad to Curaçao twice a week and from Curaçao *via* New York to Amsterdam once a week; also once a week from Amsterdam *via* Dakar and Paramaribo to Curaçao. Empreza de Transportes Aerovias Brasil maintains a regular service, twice a week, between Rio and Miami *via* Paramaribo. I-Lati has a fortnightly service Rome–Paramaribo–Caracas. The airport is at Zandery, 27 miles south of Paramaribo.

Roads.—There are about 250 miles of main roads, principally in the vicinity of Paramaribo and the settlements along the rivers. There are two roads leading from Paramaribo, one to the bauxite centre of Smalkalden (18 miles) and Paranam (19 miles) and the other to the airport of Zandery (27 miles). Another main road runs across the districts of Saramacca (44 miles) and Coronie (43 miles), a fourth across the Commewijne district (26 miles) and a fifth in the Marowijne district, from the bauxite centre Moengo to Albina (28 miles).

At the end of 1949, there were 1,453 registered motor vehicles in Surinam, consisting of 908 passenger cars, 418 lorries and 127 buses.

Railway.—There is only one railway, with a single track extending 83 miles from Paramaribo to Kabelstation.

Rate of exchange for 100 Netherlands guilders was 101 Surinam guilders up to 9 May, 1940; there was no fixed rate from 10 May, 1940, to 9 Sept., 1945; 72·25 from 10 Sept. to 27 Dec., 1945; 71·50 from 28 Dec., 1945, to

20 Jan., 1947; 71·43 from 21 Jan., 1947 (£1 = 7·68 Surinam guilders), to 28 Sept., 1949; and 50·13 from 29 Sept., 1949 (£1 = 5·33 Surinam guilders).

Books of Reference.

STATISTICAL INFORMATION.—The [illegible] Statistiek in Paramaribo was established on 1 Jan., 1947. Its [illegible] to trade statistics, and the 'Synoptical Report of Government and State' (2 parts, with explanation in English).

Warren Nystrom (J.), Surinam. New York, 1942.

The Netherlands West Indies.

The Netherlands West Indies consists of two groups of 3 islands each, situated in the Caribbean Sea, about 550 miles apart. The total area is 403 square miles and the population, on 1 Jan., 1950, numbered 160,324.

Netherlands Windward Islands	Square km.	Population 1 Jan., 1950	Netherlands Leeward Islands	Square km.	Population 1 Jan., 1950
Curaçao . . .	447	98,161	St. Maarten (St. Martin) [1]	34	1,513
Aruba . . .	181	53,574	St. Eustatius . . .	31	955
Bonaire . . .	290	5,011	Saba	9	1,110

[1] The southern part belongs to the Netherlands, the northern to France.

In 1949, 5,387 births were registered and 1,063 deaths. Schools in 1949 numbered 111, with 30,214 pupils and 813 teachers. Curaçao and Aruba had, in 1949, 14 cinemas with a seating capacity of 9,000.

Dutch is the official language. Spanish and English are also spoken. In addition a 'lingua franca,' *Papiamento*, has evolved out of Spanish, Dutch and some other languages.

Government.—The Netherlands West Indies form part of the Kingdom of the Netherlands, which is represented by the Governor.

The executive power in external affairs is vested in the Governor.

In 1950, an Interim Regulation gave the Netherlands West Indies, and each island, autonomy in internal affairs and regulated its relations with the Netherlands in external matters of common interest.

The executive power in internal affairs is vested in a nominated Council (*Regeringsraad*) which is responsible to the representative body, the *Staten*. This consists of 22 members (12 from Curaçao, 8 from Aruba, 1 from Bonaire, 1 from the Leeward Islands) and is elected by general suffrage.

Governor.—Dr. A. A. M. Struycken (appointed March, 1951).

Economy.—The economy of the Netherlands West Indies is almost entirely a 'one-commodity' economy, as it is based on the refining of oil imported from Venezuela to the Windward islands of Curaçao and Aruba. About 40% and 70% of the gainfully occupied are working at the refineries or

their shipping establishments. On account of the activities of the oil companies (affiliated to the Royal Dutch/Shell and the Standard Oil of New Jersey), the welfare level on Curaçao and Aruba is high in comparison with the other islands.

In addition to oil refining and owing to its geographical situation and form, Curaçao ranks high in shipping and trade. Almost all products needed for consumption and production are imported, mostly from U.S.A.

Bonaire and the 3 Leeward islands are of little importance.

There were in 1947, 186 horses, 4,254 cattle, 20,891 sheep, 72,003 goats, 3,650 pigs, 2,297 donkeys and 15 mules.

Finance and Trade.—In the budget for 1951 the revenue and expenditure are estimated at 51,274,044 guilders and 51,205,502 guilders respectively.

Imports in 1949 were valued at 973,922,125 guilders; exports at 813,511,506 guilders. Exports of refined oil amounted to 46,276,480 metric tons.

Total trade between the Netherlands Antilles and the United Kingdom in £ sterling (Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports into the U.K.	14,465,456	34,608,902	59,527,139	42,594,206	42,503,779
Exports from U.K.	646,520	2,772,961	2,533,105	2,470,457	3,527,872
Re-exports from U.K.	22,569	10,829	14,002	27,302	44,347

There entered the ports of Curaçao and Aruba, in 1949, 16,522 vessels (including schooners) of 37,392,483 (1948, 44,337,261) registered tonnage.

In 1950 the Netherlands West Indies had 689 km. of surfaced highway, distributed as follows:—Curaçao, 340·6; Aruba, 258·2; Bonaire, 32; St. Maarten, 27; St. Eustatius, 4·2; Saba, 7. Number of motor vehicles (31 Dec., 1949):—Passenger cars, 4,633 in Curaçao, 2,830 in Aruba; commercial vehicles, 1,798 in Curaçao, 863 in Aruba. Number of telephones, 1949, 2,469.

British Consul at Curaçao.—C. W. Woodforde-Booth; *Vice-Consul at Aruba.*—V. F. Houghton-Berry.

Books of Reference.

STATISTICAL INFORMATION.—A statistical office is being established under the supervision of the Administrator of Finance (1 Pietermaai, Willemstad, Curaçao). Its mimeographed publications (on population, trade, etc.) are obtainable on request

NICARAGUA.

(REPÚBLICA DE NICARAGUA.)

Constitution and Government.

THE new constitution of Nicaragua of 22 Jan., 1948, vests the legislative power in a Congress of 2 houses consisting of 44 deputies elected for 6 years, and 15 senators (plus ex-presidents of the republic, who are appointed for life) elected for 6 years, all by popular vote. The President is, nominally, elected for 6 years. The constitution grants citizenship to women over 18 years of age who can read and write, but leaves the granting of the franchise to the decision of the legislature. A new constitution (1951) is being drafted.

President.—General Anastasio Somoza (elected by Congress on 7 May, 1950, following the sudden death of President Román y Reyes, and re-elected at the general election, 21 May, 1950, to serve for 6 years. He had been President from 1936 to 1947).

The President exercises his functions through the ministers, who are heads of the departments. He may form, when occasion requires, a council of state to advise on public contracts and other matters.

The republic is divided into 16 'departments' and one 'comarca,' each of which is under a political head, who has supervision of finance, instruction and other matters. The Mosquito Reserve now forms part of a department named Zelaya.

On 18 Feb., 1916, the Bryan–Chamarro treaty between Nicaragua and the United States was signed, under which the United States in return for $3,000,000 acquired the option for a canal route through Nicaragua and also a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. It was ratified by Nicaragua on 7 April, 1916, and by the United States on 24 June, 1926. Two commissions of American Army engineers began in August, 1939, to survey the route for a canal.

National flag: blue, white, blue; with the coat of arms on the white stripe.

National anthem: Salve a te Nicaragua (words by S. Ibarra Mayorga, 1917).

Area and Population.

Area estimated at 148,000 sq. km. (57,143 square miles), with a coastline of 336 miles on the Atlantic and 219 miles on the Pacific. The 1950 census showed a population (preliminary) of 1,053,189; density, 7·1 per sq. km. or 18·4 per square mile. Nicaragua is the largest in area and most thinly populated of the Central American republics. Crude birth rate, 1949, 35·4 per 1,000 population; crude death rate, 10·1; infantile mortality rate [illegible]. 95·1 per 1,000 live births; crude marriage rate, 3·6 per 1,000 [illegible].

About 69% of the inhabitants live in the western half of the country. The two halves of the republic differ greatly in many respects and there is little communication between them, the journey by trail and river being slow and difficult, though progress is being made, especially in canalizing the San Juan River connecting Lake Nicaragua with the Atlantic. A paved highway is being built between Managua and Bluefields.

The people of the western half of the republic are principally of mixed Spanish and Indian extraction, some of pure Spanish descent and many

Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and Negroes from Jamaica and other islands of the Carribbean. Immigration has been severely restricted since 1930, for Chinese, Turks, Arabs, Negroes and Jews.

There are 123 municipalities, of which 98 have from 2,000 to 30,000 inhabitants. The capital is Managua, situated on the lake of the same name, with (1950 census) 107,444 inhabitants. Matagalpa has a population, estimated in 1947, of 52,073; León, 51,726; Jinotega, 39,896; Granada, 38,918; Masaya, 37,606; Chinandega, 25,538, and Bluefields, 20,278.

Religion, Education and Justice.

The prevailing form of religion is Roman Catholic, but there is complete religious liberty. The [illegible] one archbishopric and ecclesiastical province (Nicaragua) with the seat at Managua. There are 4 bishoprics, León, Granada, Bluefields and Matagalpa.

There were (1949) 1,091 state elementary schools, 2 normal schools, 29 secondary schools, 6 professional schools, 1,014 mixed (urban and rural) schools, 54 other schools and 2 universities. The total number of teachers was 3,474. Illiterate persons, of all ages, number about 60% of the population. Secondary education, neither obligatory nor free, is being carried on by private individuals, with government assistance in the form of grants and numerous scholarships. Nicaragua's 2 universities are at Léon and Granada, with a school of engineering at Managua. There is also a military academy.

Motion-picture theatres numbered 51 in 1949, with seating capacity of 47,565.

The judicial power is vested in a Supreme Court of Justice at Managua, 5 chambers of second instance (León, Masaya, Granada, Matagalpa and Bluefields), and 153 judges of inferior tribunals.

Finance.

Revenue and expenditure for 5 fiscal years, ending 30 June, in córdobas (nominally 4·86 córdobas = £1; 1 córdoba = $1·00, U.S., but exchange rate since 1939 has been 5 córdobas = $1):—

	1946–47	1947–48	1948–49	1949–50	1950–51 [1]
Revenue .	92,531,688	92,312,871	113,781,974	94,719,498	63,724,600
Expenditure .	93,090,194	97,102,812	110,726,570	89,615,214	65,992,197

[1] Estimate.

The practice of borrowing heavily from the National Bank resulted in a debt of 28,250,000 córdobas, which, 1950, was funded for 25 years.

By an agreement reached in 1911 between the Government and the British bondholders, modified and extended in 1917 and 1920, customs receipts and certain other revenues are collected by the Collector-General of Customs (who must be an American) and applied by a High Commission of 2 members (the Nicaraguan Minister of Finance, as President, and the Collector-General of Customs) to the payment of the external debt, the balance being turned over to the Government.

Nicaragua's external debt on 30 June 1950, consisted of £150,580 and $1,226,500. In córdobas, the total debt on 31 Dec., 1949, was 54,350,942, of which 38,811,047 córdobas was internal and 15,539,895 external. Debt service, 1948–49, took 5,725,000 córdobas.

Defence.

The National Guard numbers (1939) 220 officers and 3,318 other ranks, besides 4,000 in the trained reserve. Period of enlistment, 3 years. During period of enlistment soldiers cannot vote.

Coastguard boats patrol the east and west coast to prevent smuggling.

Aviation has received considerable attention, and many good airports have been opened for commercial and military purposes.

Production and Industry.

Of the total land area (about 30,000,000 acres), about 10,000,000 acres are under timber, 900,000 acres are used for grazing and about 2,00,000 acres are cultivated. Five-sevenths of the working population are in agriculture.

Agriculture is the principal source of national wealth. The principal product of the eastern part of the republic was formerly bananas, but the crop in 1943 was nil, due to a blight, and exports in 1948 were only 678,598 stems, valued at $659,293 or gold córdobas. An American company, in 1949, laid out banana plantations on the west coast on new soil which should be free of the Panama disease. Cotton production was 31 metric tons in 1948. Plantains, oranges, pineapples and yucca are raised for home consumption. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn and beans. Sugar producers have a combine, under government control, which fixes the price for internal sales; output, 1948–49, 16,100 metric tons; 1949–50 only 5,520 metric tons. Rice is grown abundantly and some wheat in the hilly Jinotega district, while tobacco is cultivated round Masaya. Output of sesame seeds, 1947, was 10,884 metric tons, of which 7,468 tons, valued at $2,185,040, U.S., were exported. This is the country's only oilseed of importance but it has expanded until it is second only to coffee as an agricultural export. The coffee crop (from 154,950 acres in 1949) usually averages 15,000 metric tons; exports in the crop year ending 30 June, 1950, were a record at 17,298 metric tons. With the exception of plantains and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food. In 1947 there were 939,012 head of cattle.

Timber production is declining, though the forests contain mahogany and cedar, which were formerly largely exported, three varieties of rose-woods, guayacan (*lignum vitæ*), dye-woods, gums and medicinal plants. Wild rubber is abundant in the virgin forests on the Atlantic watershed, but there are very few rubber plantations owing to the labour shortage. Exports, 1947, 302,990 kilos. Exports, 1949, of dye-woods were 834,958 kilos, and of timber, 22,197,867 board feet.

There are several gold-mines. Production has risen from 44,500 fine oz. in 1938 to 224,714 oz. in 1944; output, 1949, 218,109 fine oz. Exports, 6,816 kilos, value $7,659,242 (U.S.), constituted 29% of total exports in 1948, and all went to the United States; gold, however, is worked by foreigners under concession and only about 60% of the proceeds remains in Nicaragua. Exports of silver, 1949, were 200,845 fine oz. Copper and precious stones are also found.

In 1948, power companies in 19 cities produced 22,447,118 kwh. of electricity for public consumption, and industrial and mining companies produced 43,539,145 kwh. Chief local industries are matches, cigarettes, beer, soap, leather and cement.

Commerce.

The foreign trade of Nicaragua, in córdobas, was as follows in 5 years (nominally and for purposes of trade statistics 1 córdoba = $1, U.S., hence these 'gold córdobas' should be multiplied by 5 to show the value in the national currency) :—

	1945	1946	1947	1948	1949
Imports .	11,961,081	14,989,431	21,085,850	24,133,703	21,329,519
Exports .	13,962,728	18,082,177	20,979,627	26,682,607	23,663,602

[illegible] with the fiscal year, 1949–50, all imports (divided into essential, semi-essential and non-essential) require licences in advance.

The net customs collections in 1948 were 26,620,832 córdobas (ordinary córdobas, not the statistical unit used above).

In 1949 the value of the principal imports (in gold córdobas equal to $1·00, U.S.) was :—Textiles, 3,461,308; iron and steel goods, 2,283,892; cotton goods, 2,307,037; machinery, 4,861,534; chemicals, drugs and medicines, 1,444,316. Of imports in 1949 the United States supplied 16,789,634 córdobas (78·7%).

In 1949 the value of the principal exports was :—Coffee, 4,361,969 córdobas; gold, 7,659,242 córdobas. The United States took exports valued at 15,091,886 córdobas (63·7%).

Total trade between Nicaragua and United Kingdom (Board of Trade returns) in £ sterling :—

	1938	1947	1948	1949	1950
Imports to U.K. . . .	52,417	120,302	45,124	161,783	233,133
Exports from U.K. . . .	54,483	106,643	111,827	103,895	328,931
Re-exports from U.K. . .	187	597	1,613	75	1,310

Shipping and Communications.

Western Nicaragua has 3 seaports, Corinto (the largest), San Juan del Sur and Puerto Somoza through which pass most of the imports and exports. The eastern ports are Bluefields, Cabo Gracias, Puerto Cabezas and San Juan del Norte. In 1948, 874 vessels of 476,394 tonnage entered and 873 of 474,861 tons cleared Nicaragua's ports. Plans have been made for the canalization of the River San Juan, which divides Nicaragua and Costa Rica, and which would give both countries a clear waterway from the Carribean Sea to the Pacific.

Most of the roads are still mere tracks over which ox-carts alone can travel in the wet season, but some good roads are under construction. The east coast, hitherto practically shut off from the west coast, will be joined by a highway built with local and American capital. The Nicaraguan section of the Trans-Continental Highway, between Puerto Díaz and Bluefields, is under construction, as well as the Pan-American highway. There is also a paved highway linking Puerto Somoza to the Pan-American highway. Motor vehicles, Dec., 1948, were 1,443 passenger cars, 672 trucks, 14 truck trailers, 151 buses and 202 motor cycles.

The Pacific Railroad of Nicaragua, owned and operated by the Government and the principal line in the republic, has a total length of 431 kilometres,

all single-track. The line runs from Granada to Corinto (190 kilometres); Masaya–Diriamba (44 kilometres); León–Rio Grande (86 kilometres); San Jorge–San Juan del Sur (32 kilometres). There is a recently completed line, Chinandegan–Puerto Morazán (30 kilometres).

There is a regular daily air service (Pan-American World Airways) to the Central and South American republics and the United States. T.A.C.A. (Transportes Aereos Centro Americano), an American airline, have a twice-weekly service to Costa Rica, Honduras and El Salvador from Managua. N.I.C.A. (Lineas Aéreas de Nicaragua) is Nicaraguan-owned, devoted to local freight and passenger transport with, irregularly, service abroad.

There are (1948) 3,159 miles of telegraph wire, and 155 offices; also 1,964 miles of telephone wire and 102 telephone stations serving 2,564 instruments. There are 135 post offices, and good service between the chief towns of the western section; service into the interior is carried by air mail. All-America Cable Co. connects with New York and has a powerful station at San Juan del Sur.

The Tropical Radio Telegraph Company maintains a powerful station at Managua, and branch stations at Bluefields and Cabo Gracias a Dios. The Government operates the National Radio with 50 broadcasting stations; wireless sets in use, 1950, were 10,000.

Money and Banking.

In 1946, Nicaragua informed the International Monetary Fund that the national unit of account, the córdoba, would be maintained equal to exactly 20 cents, U.S., or 0·177734 gramme of fine gold; thus $1·00, U.S., would be equal to 5 córdobas and 1 troy oz. of fine gold to 175 córdobas. But in Oct., 1950, the International Monetary Fund agreed that this rate should be reserved for government transactions (limited in volume to 20% of total exchange receipts) and the remaining 80% should be at the rate of 7 córdobas, making the effective rate 6·60 to the dollar.

Following the devaluation of sterling the new buying rate for the proceeds of exports was (nominally) 13·95 córdobas = £1. Previously the rate was 20·05 = £1.

Under the Act of 26 Oct., 1940, the monetary unit was made the *córdoba*, divided into 100 centavos. Its exchange parity with gold is maintained by the issue department of the National Bank of Nicaragua. No gold or silver coins are minted. On 31 Dec., 1950, total money supply was 59,700,000 paper córdobas in currency and bank deposits of 63,100,000 córdobas. Gold coins provided by law (1912) are 10, 5 and 2½ córdobas, but no gold coins have ever been struck. National bank-notes form the greater part of the currency, in denominations from 500 córdobas to 1 córdoba. New fractional currency, minted in England and amounting to 900,000 córdobas, were placed in circulation in May, 1947. Silver coins in circulation are 1 córdoba, 50, 25 and 10 centavos; copper-nickel coins, 5 centavos; copper coins, 1 and ½ centavo.

The National Bank of Nicaragua at Managua, founded in 1912, owned by the Government since 1924 was completely reorganized in May, 1940. Its directorate was transferred from the United States to Managua. The banking department, with (31 December, 1948) assets of [illegible], functions as a commercial bank and the issue department (with assets of 101,630,727 córdobas) is the sole bank of issue. The latter had on 31 Dec., 1950, $2,770,000 in gold and $660,000 in foreign exchange.

Since 7 Jan., 1893, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives.

1. Of Nicaragua in Great Britain (21 Cavendish Square, W.1).

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Constantino Herdocia (absent; the Guatemalan Minister is in charge of Nicaraguan interests).

Vice-Consul, in charge at London.—F. V. Cock.

There are consular representatives at Liverpool and Manchester.

2. Of Great Britain in Nicaragua.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General.—N: O. W. Steward, O.B.E.

First Secretary.—H. A. N. Brown (*Labour*).

Military Attaché.—Col. C. G. Irving-Bell.

Air Attaché.—Wing-Cdr. A. F. Johnson, D.F.C.

Civil Air Attaché.—Wing-Cdr. C. J. Lewin.

There is a vice-consul at Managua.

NORWAY.

(Norge.)

Reigning King.

Haakon VII, born 3 August, 1872; second son of Frederik VIII, King of Denmark, elected King of Norway by the Storting, 18 November, 1905; accepted the crown, 18 November, 1905; landed in Norway, 25 November, 1905; married, 22 July, 1896, to Princess Maud, born 26 November, 1869 (died 20 November, 1938), the third daughter of the late Edward VII, King of Great Britain and Ireland.

Son.—Olav, Crown Prince, born 2 July, 1903, married on 21 March, 1929, to Princess Märtha of Sweden, born 28 March, 1901, daughter of Prince Carl (second son of Oscar II, late King of Sweden). Offspring: Princess Ragnhild Alexandra, born 9 June, 1930; Princess Astrid Maud Ingeborg, born 12 February, 1932; Prince Harald, born 21 February, 1937.

Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By the Treaty of 14 January, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederik of Denmark as

their King. The foreign Powers refused to recognize this election, and on 14 August a convention proclaimed the independence of Norway in a personal union with Sweden. This was followed on 4 November by the election of Karl XIII (II) as King of Norway. Norway declared this union dissolved, 7 June, 1905, and Sweden agreed to the repeal of the union on 26 October, 1905. The throne was offered to a prince of the reigning house of Sweden, who declined. After a plebiscite, Prince Carl of Denmark was formally elected King, and took the name of Haakon VII.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession :—

Inge Baardsson	1204	Margreta	1388
Haakon Haakonsson	1217	Erik of Pomerania	1389
Magnus Lagabøter	1263	Kristofer af Bavaria	1449
Erik Magnusson	1280	Karl Knutsson	1441
Haakon V Magnusson	1299	Same Sovereigns as in Denmark	1450–1814
Magnus Eriksson	1319	[illegible]	1814
Haakon VI Magnusson	1355	Same Sovereigns as in Sweden	1814–1905
Olav Haakonsson	1381	Haakon VII	1905

National flag : a blue cross with white borders on red.

National anthem : Ja, vi elsker dette landet (words by B. Björnson, 1865; tune by R. Nordraak, 1865).

Constitution and Government.

The constitution of Norway bears date 17 May, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the *Storting* (Parliament), the representative of the sovereign people. Only the Storting can vote supplies and has the power of the purse. The royal veto in regard to acts may be exercised twice; but if the same Bill passes three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land, sea and air forces, and makes all appointments.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after 10 Jan. each year, and the Storting remains assembled as long as it may find it necessary. Every Norwegian subject of 21 years of age (provided that he resides and has resided for 5 years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men. The mode of election is direct and the method of election is proportional. Since 5 April, 1938, the people choose their 150 representatives every fourth year. The country is divided into districts, each electing from 3 to 8 representatives. Representatives must not be less than 21 years of age, must have resided in Norway for 10 years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the kingdom without regard to their residence. By a law which came into force in June, 1938, all branches of the Government service, including the state Church, are now open to women.

At the elections for the Storting held on 10 October, 1949, the following parties were elected:—Labour, 85; Conservative, 23; Liberal, 21; Agrarian, 12, and Christian Popular, 9.

The Storting, when assembled, divides itself by election into two sections, the *Lagting* and the *Odelsting*. The former is composed of one-fourth of

the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. Most other matters are settled by both sections in common sitting. The Storting elects 5 delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the constitution. The Lagting and the ordinary members of the supreme court of justice (*Höyesterett*) form a High Court of the Realm (the *Riksrett*) for the impeachment and trial of ministers, members of the Höyesterett and members of the Storting.

The executive is represented by the King, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*) and at least 7 ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The Cabinet, appointed 10 Oct., 1949, is as follows (all Labour Party) :—

Prime Minister.—Einar Gerhardsen.
Minister of Foreign Affairs.—Halvard Lange.
Minister of Defence.—Jens C. Hauge.
Minister of Finance.—Olav Meisdalshagen.
Minister of Trade.—Erik Brofoss.
Minister of Industry.—Lars Evensen.
Minister of Ecclesiastical Affairs and Education.—Lars Moen.
Minister of Social Welfare.—Fru Aaslaug Aasland.
Minister of Communications.—Nils Langhelle.
Minister of Justice.—O. C. Gundersen.
Minister of Agriculture.—Kristian Fjeld.
Minister of Fisheries.—Reidar Carlsen.
Minister of Municipal Affairs and Labour.—Ulrik Olsen.

Local Government.

The administrative division of the country is into 20 districts, each governed by a chief executive functionary (*Fylkesmann*), viz., the towns of Oslo and Bergen, and 18 *Fylker* (counties). There are 44 municipalities, 22 towns and 680 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Formannskap*), elected by and from among the representatives, who are four times the number of the Formannskap. The representatives elect conjointly every fourth year from among the Formannskap a chairman and a deputy chairman. All the chairmen of the rural communes of a Fylke form with the [illegible] the *Fylkesting* (county diet) which meets yearly to settle the budget of the Fylke. The municipalities and the towns form 64 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected under the same conditions as men.

Area and Population.

I. Progress and Present Condition.

Fylker	Area: square km.	Census population 1 Dec., 1930	Census population 3 Dec., 1946	Pop. per square km. (land) 1946
Oslo (town)[1] . .	453·28	340,096	417,238	—
Akershus[1] . .	4,908·56	149,967	170,133	—
Östfold . . .	4,179·78	167,030	178,449	45·9
Hedmark . .	27,433·29	157,942	169,525	6·5
Opland . . .	25,318·37	137,710	154,734	6·4
Buskerud . .	14,763·67	143,073	149,948	10·8
Vestfold . . .	2,339·28	134,107	147,555	65·4
Telemark . .	15,217·46	127,754	131,679	9·3
Aust-Agder . .	9,347·90	73,816	74,861	8·5
Vest-Agder . .	7,291·30	81,233	93,980	13·7
Rogaland . .	9,177·13	173,258	202,252	23·2
Hordaland . .	15,865·38	164,376	188,389	12·4
Bergen (town) . .	37·14	98,303	110,424	3,081·0
Sogn og Fjordane .	18,498·53	91,808	96,849	5·4
More og Romsdal .	15,046·70	165,064	182,859	12·5
Sör-Trondelag . .	18,823·07	174,946	193,912	10·7
Nord-Trondelag .	22,422·56	96,016	105,679	5·0
Nordland . .	38,324·74	186,920	215,972	6·0
Troms . . .	26,083·99	97,467	113,722	4·5
Finnmark . .	48,690·17	53,308	58,790	1·3
Total . .	324,222·27	2,814,194	3,156,950	10·2

[1] As from 1 Jan., 1918, part of Akershus fylke has been included in Oslo (town); the figures refer to the new administrative division.

In 1946, 2,141,837 lived in rural districts and 1,015,113 in towns.

Conjugal condition of the domiciled population over 15 years of age, 1946 (provisional figures):—

	Unmarried	Married	Widowed or divorced
Males	470,376	654,629	64,379
Females . . .	450,234	655,113	142,562

The distribution of the population according to professions in 1946, showed 784,000 (24·9%) dependent on agriculture, forestry and gardening; 992,000 (31·4%) on industry; 313,000 (9·9%) on trading; [illegible] on transportation; 184,000 (5·8%) on fishery and whaling; 233,000 (7·4%) on public administration and liberal professions.

II. Vital Statistics.

Year	Marriages	Divorces	Births (exc. still-born)	Still-born	Illegitimate, living	Deaths (exc. still-born)	Excess of Births
1946	29,688	2,063	70,727	1,357	4,080	29,220	41,507
1947	29,923	2,236	67,625	1,266	3,598	29,894	37,731
1948	29,558	2,128	65,618	1,179	3,222	28,375	37,243
1949	27,469	2,347	63,062	1,051	2,689	29,082	33,970
1950[1]	27,090	—	63,094	—	—	29,148	33,946

[1] Provisional figures.

III. Principal Towns.

At the census taken 3 Dec., 1946, the number of towns with a population of above 100,000 was two, above 20,000 six, above 10,000 nineteen, above 5,000 twenty-eight (in all). The population of the principal towns was :—

Oslo	418,449	Aalesund	18,143	Arendal	11,570
Bergen	110,424	Moss	17,415	Tromso	10,990
Trondheim	57,128	Skien	15,006	Horten	10,964
Stavanger	50,320	Fredrikstad	14,369	Narvik	10,281
Drammen	26,994	Kristiansund	13,152	Hamar	10,183
Kristiansand	24,343	Sarpsborg	12,943		
Haugesund	18,407	Tönsberg	11,883		

As from 1 Jan., 1925, the name of the capital, Kristiania, was changed to Oslo. As from 1 Jan., 1948, part of Akershus fylke has been included in Oslo; the population figure (1946) refers to the new administrative division.

Religion and Education.

The evangelical Lutheran religion is the national Church and the only one endowed by the state. Its clergy are nominated by the King. All religions are tolerated, but Jesuits are, according to the constitution, not admitted into the country. Ecclesiastically Norway is divided into 8 *Bispedömmer* (bishopries), 91 *Prostier* (provostships or archdeaconries), and 532 *Prestegjeld* (clerical districts). In 1946 there were 120,106 dissenters, including 4,905 Roman Catholics, 293 Greek Catholics, 11,186 Methodists, 8,968 Baptists, 4,642 Adventists, 719 Mormons, 60 Quakers, 559 Jews, 303 Church of England and 23 members of German churches. The Roman Catholics are under a Vicar Apostolic resident at Oslo.

Education is compulsory, the school age being from 7 to 14. In 1947–48 there were 3,101 rural school districts with 224,789 pupils, and in the towns 71,414 pupils; the amount expended on both by the state was, in 1947–48, 53,000,994 kroner, the rest being provided locally. Teachers' colleges had, in 1947–48, 1,468 students. There were, in 1947–48, 295 secondary schools—30 state schools, 114 communal and 5 private schools entitled to give certificates, and 146 private schools not having this right, with, respectively, 9,004, 25,424, 876 and 6,854 pupils. Most of the secondary schools are co-educational.

Norway has 2 universities, at Oslo (founded 1811), attended in 1949 by 4,898 students, and at Bergen (established in 1946, opened 30 Aug., 1948), attended in 1949 by 396 students. There is a technical university at Trondheim attended in 1949 by 1,014 students, a college of agriculture and forestry in Aas, with 223 students, a teachers' training college at Lade with 52 students, a college of dentistry with 261 students, the state academy of arts with 62 students, a veterinary college with 120 students and a commercial high school with 156 students. There are also several special schools, particularly continuation schools for young people between 15 and 18, and industrial, crafts, technical and arts schools for both sexes.

In 1950, there were 452 cinemas with a seating capacity of 125,770.

Norwegian is an independent language closely related to Danish and Swedish. As to the written language, there exist two idioms, and both may be officially used.

Justice and Crime.

The judicature in Norway is common to both civil and criminal cases The same judges, who are state officials, preside over both kinds of cases

The participation of lay assessor and jurors, summoned for each case, varies, however, according to the civil or criminal nature of the case.

The ordinary Court of First Instance (*Herreds- og byrett*) is presided over by a judge who, as a general rule, is assisted by two lay assessors, chosen by ballot from a panel elected by the district council. In criminal matters the Court of First Instance is competent in cases where the maximum penalty incurred is 5 years imprisonment. Altogether there are 101 Courts of First Instance. There is a Court of Mediation (*Forliksraad*) for each community, consisting of three men or women, elected by the district council, before which, as a general rule, civil cases must first be brought for mediation.

The Court of Second Instance (*Lagmannsrett*) is presided over by a judge, together with two other judges, all of them being state officials. In civil matters there is participation by lay assessors, ordinarily 4 but in some cases 2, chosen and elected in the same way as mentioned above. In criminal cases the lay element is a jury composed of 10 jurors. This court is a court of appeal in both civil and criminal cases. In addition, as a court of first instance, it takes cognizance of all criminal cases (other than military or those coming under the *Riksrett*—the court for impeachments) which do not come under the competence of the Court of First Instance. The kingdom is divided into 5 districts (*Lagdömmer*) for the purpose of the Courts of Second Instance. Each district is divided into circuits in which courts are held at specific times.

The Supreme Court (*Höyesterett*) is the ultimate court of appeal. In criminal cases the competence of the court, however, is limited to the complaints against the application of laws, the measuring out of the penalty and the trial of the case of the subordinate courts. The Supreme Court consists of a president and 17 judges. In each single case the court consists of 5 judges.

There are 5 prisons for convicts from all parts of the country; inmates (1 July, 1950), 404 males and 8 females. There are also 55 local prisons in which were detained (1 July, 1950), 760 males and 43 females. For Nazis there are special prisons and prison camps. On 1 July, 1950, there were 4 of these with 383 male and 7 female prisoners.

Social Security.

General [illegible] rance, established by act of the Storting in 1938, is compulsory [illegible] included in the health insurance programme, with the exception of workers in agriculture, forestry, fisheries and domestic servants. Premiums are paid primarily by the insured and their employers, but the local authorities and the government also make payments, and the government guarantees all liabilities toward the insured. The weekly premium ranges from 0·18 to 0·50 kroner, and the daily allowance from 2 to 6 kroner, according to the annual income from work.

Health insurance (covering loss of income due to illness, free medical attention and hospital treatment), in operation since 1911, is compulsory for all workers and employees over 15 years of age having an annual income not in excess of 15,000 kroner, except that such maximum does not apply to fishermen and sailors in foreign service; voluntary insurance is also provided for anyone regardless of his income. Dependents of the insured also receive the assistance. In 1949, 1,349,278 persons were insured, of whom 383,731 were voluntary contributors, so that, including dependents, about 75% of the population is estimated to be insured. Premiums to the insurance fund are paid partly by the insured, partly by employers and also

by the local authorities and the state. The weekly premium ranges from 0·30 to 2·40 kroner, and the daily allowance in cash from 2 to 6 kroner according to the annual income.

Workmen's compensation insurance is provided for industrial workers (since 1895), sailors (since 1913) and fishermen (since 1909), with 300,000, 50,000 and 120,000 persons in these respective categories being covered in 1947. Insurance for sailors covers the entire personnel of the Norwegian merchant marine. The insured in all three groups are entitled to free hospital treatment and special compensation corresponding to the assistance given in the cases of health insurance for any loss of income caused by accident. In case of physical disability, payments are also made in an amount depending on the income previously received by the insured and the degree of his disability. Premiums paid into the insurance fund are made in the case of industrial workers and sailors by the employer and are calculated on the basis of the risk involved and income received in the case of industrial workers, and on the basis of tonnage and income in the case of sailors. Premiums for fishermen are paid partly by the beneficiaries, partly by the state and partly by a fund specially created for this purpose, which amounts to approximately 6,500,000 kroner.

Family allowances.—Under a law of 24 October, 1946, allowances are paid to families having more than one child, provided the child is less than 16 years of age, is the child of a Norwegian resident, and one of the parents is a Norwegian subject. The allowance is 180 kroner per annum per child, excluding the first, with the costs borne in the ratio of seven-eighths by the state and one-eighth by the local authorities. It is estimated that this programme affects 430,000 children and that the cost was 64,300,000 kroner for the fiscal year 1949–50.

Old-age pensions were introduced in 1936 and are paid to Norwegian citizens over 70 years of age or married couples when one spouse is over that age, provided their income does not exceed a certain level. Such payments are made to 184,000 beneficiaries, including 70% of that age group of the population. Payments are provided by the local authorities to the extent of 12½%, by the state for 37½% and by the Old Age Fund (which, as at 30 June, 1950, had a capital of 156,800,000 kroner) to the extent of 50%.

War disability pensions are provided for civil and military personnel under a law of 13 December, 1946, as amended. Civilians who have suffered owing to their participation in the war, receive such pensions according to their contribution to the war effort, and, in the case of seamen, according to their rank. These pensions include free medical treatment, daily pay and allowances for children, with additional allowances for other dependents. Military pensions and those paid to persons in government employ are provided for by the state. Expenses for civilian personnel are covered by a special tax, which amounts to 1 per mille on assessed income.

Finance.

Revenue and expenditure for 5 years ending 30 June (in 1,000 kroner):—

	1946–47	1947–48	1948–49	1949–50	1950–51 [1]
Revenue . .	2,176,693	2,329,625	2,692,726	2,669,592	2,510,315
Expenditure . .	2,145,424	2,154,440	2,565,360	2,547,004	2,235,681

[1] Budget estimates.

The following gives the national liabilities for 6 years (in 1,000 kroner):—

Year ending 30 June	Total debt [1]	Year ending 30 June	Total debt [1]
1938	1,428,744	1948	6,303,622
1946	6,958,188	1949	6,165,458
1947	6,693,085	1950	4,704,962

[1] At the rate of par on foreign loans; including treasury bills (in [illegible] to 3,654,360 in 1916; 2,393,200 in 1947; 1,940,944 in 1948; 1,445,[illegible] 1950. The proceeds of the treasury bills do not appear in the ordinary budget; the government maintains on deposit with the Bank of Norway a sum equalling the outstanding treasury bills.

Defence.

The main fortifications are Oskarsborg, in Oslofjord, Kristiansand, Stavanger, Bergen, Agdenes, Narvik and Harstad.

ARMY.—The Army is a national militia. Service is universal and compulsory, liability commencing at the age of 18 and continuing till the age of 55. The organization, strength and training of the Army is under consideration.

COASTAL DEFENCE.—The Coastal Defence consists of the Navy and the coastal artillery.

The Navy consists of the following seagoing warships:—6 fleet destroyers (5 purchased from Great Britain), 5 frigates (all ex-British), 5 torpedo boats, 5 submarines (ex-British), 11 minesweepers, 12 motor torpedo boats, 2 coastal minelayers, 3 motor launches, 1 transport, 1 depot ship and 3 fishery protection vessels. Some ex-German warships are being refitted. A royal yacht, the *Norge*, was bought in England in 1947.

The naval personnel comprises 4,000 officers and men; coastal artillery, 897 men.

AIR DEFENCE.—The Air Defence consists of the Royal Norwegian Air Force and the Air Defence Artillery. Its headquarters is in Oslo, and the forces are divided into 4 separate commands. The equipment is largely British. The Norwegian Air Force is operating with Vampires, Spitfires, Mosquitoes, Sunderland flying-boats and Catalinas; other types are used for training.

Production and Industry.

In 1946, 25% of the population lived on agriculture and forestry, 31% on industry, 10% on navigation and other transportation, 9% on trading and 6% on fishery and whaling.

I. AGRICULTURE.

Norway is a barren and mountainous country. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 72·0% is unproductive, 24·2% forest and 3·6% under cultivation and other used soils.

The acreage and products of the principal crops for 3 years were as follows:—

Crops	Acreage (hectares)			Produce (metric tons)		
	1948	1949	1950	1948	1949	1950
Wheat	32,722	30,828	31,615	75,632	66,991	66,218
Rye	1,344	990	1,156	2,963	2,062	2,471
Barley	36,755	39,956	41,793	89,188	86,144	98,934
Oats	73,755	75,850	77,845	176,926	163,257	179,816
Mixed corn	4,062	3,898	3,830	10,323	9,669	9,560
Potatoes	64,883	58,241	58,961	1,454,457	1,008,718	1,115,685
Hay	535,379	542,226	541,433	2,955,670	3,060,225	3,205,352

Livestock, 20 June, 1950:—Horses, 190,514; cattle, 1,236,600 (milch cows, 766,268); sheep, 1,811,748; goats, 130,045; swine, 422,156; poultry, 3,911,996.

Fur production in 1948–49 was estimated as follows (1947–48 actual production in brackets):—Silver fox, 102,000 (147,000); blue fox, 65,000 (116,000); platinum fox, 9,000 (11,000), and mink, 51,000 (43,000).

II. Forestry.

The forests are one of the chief natural sources of wealth. The total area covered with forests is estimated at 74,943 square km., of which 70% is under pine trees. The state forests occupy 13,809 square km. The productive forest area covers 24·2% of the land area. An inconsiderable part of the coniferous growth is exported as timber. Beyond the home consumption of timber and fuel wood, the essential part of the growth is consumed as raw material in the paper industry, most of which is exported. The annual natural increase is about 12,000,000 cubic metres. In 1949–50, 6·5 million cubic metres were felled for production of pulp and other industrial wood products. In 1949 the export value of timber produce was 27% of the country's total export.

III. Fisheries.

The number of persons in 1948 engaged in cod fisheries was 41,512; in winter herring fisheries, 14,065; the total number of persons engaged in the fisheries was 114,108, of which 36,423 had another chief occupation.

The value of the sea fisheries (based on the prices paid at the fishing places) in kroner in 1948 was:—Cod, 73,779,000; mackerel, 5,908,000; coalfish saithe, 16,726,000; salmon and sea trout, 5,043,000; lobsters, 4,529,000; herring, 163,364,000; total, 336,270,000. The output of the sea fisheries in tons totalled in 1948, 1,317,811, of which herring yielded 956,619 tons and cod, 199,147 tons; 1949, 1,060,000 tons, valued at 290 million kroner; 1950, 1,230,000 tons, valued at 320 million kroner.

Whale oil production (in 1,000 barrels):—1,062 in 1948; 1,120 in 1949; 1,106 in 1950. Total value of oil production was, in 1948, 334 million kroner; in 1949, 313 million kroner; in 1950, about 282 million kroner.

IV. Manufactures.

Industry is chiefly based on raw materials produced within the country (wood, fish, etc.), and on water power, of which the country possesses an enormous amount. The pulp and paper industry, the canning industry and the electro-chemical and electro-metallurgical industries are the most important export manufactures. In the following table are given figures for all industrial establishments in 1949 employing 5 workers or more (electrical plants, construction and building industry are not included).

Industries	Establishments	Number of		Gross value of production (1,000 kroner)	Value added by manufacture (1,000 kroner)
		Salaried staff	Workers		
Metal mining	19	419	3,438	64,634	59,640
Stone quarrying	20	5	141	1,340	1,250
Non-metallic mining and quarrying not elsewhere classified	55	59	872	12,593	11,025
Food industries	624	2,704	14,569	587,299	266,434
Beverage	95	727	2,436	390,765	318,409
Tobacco	29	594	1,652	277,119	217,818
Textiles	261	2,170	16,743	507,524	220,826
Clothing, etc.	650	2,894	19,031	427,465	190,588
Wood	747	1,295	11,598	388,966	129,150
Furniture and fixtures	619	1,157	9,994	192,567	105,985
Pulp and paper	224	2,597	17,958	994,621	396,428
Printing	378	1,218	7,945	158,266	110,378
Leather	84	384	2,315	91,908	34,686
Rubber	25	524	3,061	86,168	54,017
Chemicals and chemical products	343	3,366	11,356	876,358	310,622
Products of petroleum and coal	8	41	91	6,690	2,029
Non-metallic mineral products	391	1,250	8,866	188,053	119,283
Basic metal industries	101	2,026	11,730	561,102	218,813
Metal products	309	2,298	12,951	365,725	202,491
Machinery	188	1,931	7,302	187,617	115,046
Electrical machinery, etc.	112	2,456	7,088	242,437	116,817
Transport equipment	681	5,245	31,940	623,470	361,288
Miscellaneous	170	657	3,352	77,557	49,554
Gas works	13	195	521	18,280	6,219
Total	6,176	36,212	206,950	7,328,524	3,618,796

V. Minerals and Metals.

Production and value of the chief concentrates, metals and alloys were :—

Concentrates and minerals	1948		1949	
	Tons	1,000 kroner	Tons	1,000 kroner
Silver concentrates	7,063	600	8,663	650
Copper concentrates	21,064	8,661	21,870	9,307
Pyrites	735,021	34,195	744,762	35,030
Iron ore and titaniferrous concentrates	289,316	11,601	374,305	16,371
Zinc and lead concentrates	10,462	2,438	11,287	2,343
Rutile	—	—	15	23
Molybdenum concentrates	142	792	128	910
Total	—	58,302	—	64,634

Metals and alloys	1948		1949	
	Tons	1,000 kroner	Tons	1,000 kroner
Silver	5·2	770	4·2	630
Copper	8,935	21,527	9,306	23,268
Nickel	8,401	35,400	9,915	52,630
Aluminium	31,041	—	35,697	78,467
Ferro-alloys	139,015	107,791	171,924	125,733

Metals and alloys	1948		1949	
	Tons	1,000 kroner	Tons	1,000 kroner
Pig-iron	63,404	18,700	61,686	19,339
Zinc	42,000	59,363	41,090	59,727
Lead and tin	502	3,400	425	2,603
Sulphur	79,236	125,787 [1]	81,184	139,578
Other products	—		—	
Total	—	372,738	—	501,975

[1] Including the value of aluminium.

VI. Supply of Electricity.

Norway is one of the world's largest producers of hydro-electric energy. The total available hydro-electric power, by minimum water flow, after future regulation and by 75% efficiency, is estimated at 9 2 million kw. or about 80,000 million kwh. annually. About 60% of the water power capable of development consists of waterfalls with a height of at least 900 feet.

At the end of 1949, 1,864,000 kw. (about 20%) of the available water power were developed for production of electricity. At the same time the turbine installations for production of thermo-electric energy amounted to only 112,800 kw. As at 31 Dec., 1949, the total capacity of generators (of hydro-electric and thermo-electric plants) was 3,643,000 kva.

In 1950 the total production of electricity amounted to 17,328 million kwh., of which more than 99% was produced by hydro-electric plants.

Most of the electricity is used for industrial purposes, especially by the electro-chemical and electro-metallurgical industries for production of nitrate of calcium and other nitrogen products, carbide, ferrosilicium and other ferro-alloys, aluminium and zinc. The paper and pulp industries are also big consumers of electricity.

About 84% of the population are supplied with electricity in their homes.

Commerce.

Total imports and exports in 5 years (in 1,000 kroner):—

	1946	1947	1948	1949	1950
Imports (foreign)	2,196,800	3,820,185	3,720,877	4,217,966	4,864,455
Exports (Norwegian)	1,201,566	1,819,782	2,061,239	2,138,347	2,787,243

Trade according to countries was as follows (in 1,000 kroner):—

Countries	1949		1950	
	Imports	Exports	Imports	Exports
Argentina	24,121	12,427	49,520	31,422
Australia and New Zealand	30,206	57,021	69,743	69,112
Belgium and Luxembourg	275,033	66,915	99,901	65,952
Brazil	44,596	45,271	115,024	80,655
Canada	114,954	6,395	88,059	8,959
Czechoslovakia	87,123	68,158	62,650	40,257
Denmark	182,094	149,925	186,342	197,910
Finland	27,355	32,452	39,906	40,473
France	217,672	130,253	313,909	128,529
Germany	162,799	156,379	231,580	337,664
Great Britain and Northern Ireland	899,926	387,434	1,073,022	505,085

Countries	1949		1950	
	Imports	Exports	Imports	Exports
India	19,965	31,314	22,965	26,371
Italy	100,900	47,030	82,416	93,995
Netherlands	154,021	83,339	218,631	126,041
Poland	87,994	72,909	85,246	51,217
Portugal	8,595	19,399	15,982	19,429
Spain	40,531	33,099	53,518	54,307
Sweden	592,860	194,005	701,381	217,125
Switzerland	38,355	16,142	43,036	26,788
United States of America	551,664	149,351	589,319	272,984
U.S.S.R.	120,707	115,327	74,206	57,736
Total (including all items)	4,217,966	2,138,347	4,846,455	2,787,243

Principal items of import in 1950 (in 1,000 kroner) :—Machinery, transport equipment, etc., 1,449,450, of which ships, 844,500; base metals and manufactures thereof, 736,555; fuel, oil, etc., 488,320; textiles, 672,797; cereals, 333,483.

Principal items of export in 1950 (in 1,000 kroner) :—Pulp and paper, 651,188; edible animal products, 498,148; base metals and manufactures thereof, 547,413; oil seeds, fats, etc., 381,107.

Total trade between Norway and United Kingdom for 5 years (Board of Trade returns in £ sterling) :—

	1938	1947	1948	1949	1950
Imports to U.K.	11,019,806	14,437,399	18,448,030	21,614,542	27,846,886
Exports from U.K.	7,562,014	29,361,467	31,571,555	43,719,306	52,087,585
Re-exports from U.K.	268,826	673,753	942,035	723,094	1,223,082

Shipping and Navigation.

The total registered Norwegian mercantile marine on 1 Jan., 1951, was (ships above 100 gross tons only) 2,170 vessels, 5,500,000 gross tons. Ships under construction or on order on 1 Jan., 1951, totalled 1,346,000 gross tons.

On 30 June, 1939, according to Lloyd's Register, the tonnage of ships above 100 tons was 4,834,900 gross tons.

The vessels entered from and cleared for foreign countries in 1949 were as follows :—

	With cargoes		In ballast		Total	
	No.	Net tonnage	No.	Net tonnage	No.	Net tonnage
Entered :						
Norwegian	2,584	2,883,552	1,155	1,628,766	3,739	4,512,318

Foreign	3,731	3,051,524	685	895,335	4,416	3,946,859
Total cleared	6,708	6,326,193	1,509	1,961,164	8,217	8,287,357

National Income.

The following table sets forth the estimated national income, at market prices, by major divisions, in millions of kroner. For the war years the table includes only national income in occupied Norway, and therefore does not show income, such as from shipping, earned as a result of activities carried on outside Norway.

	1936	1937	1938	1939	1940	1941	1942	1943	1946	1947	1948	1949

[1] Reduction to eliminate duplication under various headings.

Communications.

On 30 June, 1949, the length of public roads was 44,247 kilometres. Of these, 21,568 kilometres were main roads and 22,679 kilometres local roads; about 1,600 kilometres had some kind of pa[illegible] bituminous treatment, nearly all the rest being gravel-surfaced. [illegible] workmen are being employed on maintenance.

Number of registered motor vehicles (1 Jan., 1950) was 138,000, including 66,544 passenger cars, 48,136 trucks, 23,420 motor cycles. The scheduled bus services in 1948 comprised 2,200 routes with a total length of 74,315 km.; 4,830 buses and other cars performed 1,215 million passenger-km. and carried freight of 35,078,000 net ton-km.

The length of state railways on 30 June, 1949, was 4,392 kilometres; of private companies, 82 kilometres; total 4,474 kilometres. Total receipts year ending 30 June, 1948:—State railways, 243,039,000 kroner; companies, 3,770,000 kroner. Total expenses (interest on capital excluded):—State railways, 278,639,000 kroner; companies, 3,532,000 kroner. Goods carried:—State railways, 5,503,000 metric tons; companies, 1,069,000 metric tons. Passengers carried:—State railways, 40,264,000; companies, 368,000. On 692 km. of state and 42 km. of private railways electric power is installed.

Length of telegraph and telephone lines and wires, 1949 (state, 30 June; private, 1 Jan.):—67,835 kilometres of line, 1,889,000 kilometres of wires (state, 59,621 and 1,618,000 kilometres respectively). Number of telephones, 425,240; state telegraph and telephone offices, 2,720. Receipts, 112,144,000 kroner; expenses, 112,080,000 kroner (interest on capital included).

Aviation.—Det Norske Luftfartselskap (DNL) started its post-war activities on 1 April, 1946. On 1 Aug., 1946, DNL, together with DDL (Danish Airlines) and ABA/SILA (Swedish Airlines), formed the 'Scandinavian Airlines System'—SAS—for inter-continental traffic and services between Scandinavia and the Americas. On 18 April, 1948, the three companies extended their co-operation to all European traffic as well as traffic between Scandinavia and other continents. The three companies still exist as independent units, but all services are co-ordinated.

On 1 Oct., 1950, SAS had an airfleet of 53 planes.

During the summer, 1950, the regular lines of SAS covered 140,000 kilometres and the planes of the company were flying on routes to 55 cities in Europe, Africa, the Middle East, the Far East and the Americas.

Total operations by DNL on domestic and international lines (including its share of two-sevenths of the co-operative Scandinavian traffic):—

Year	'000 km. flown	Passengers carried	'000 Passenger-km.	Freight and post	
				Tons	Ton-km.
1947	6,072	108,154	85,422	986	1,528,000
1948	7,013	119,091	98,560	1,208	1,680,000
1949	6,576	108,854	134,765	3,198	3,376,000

Currency, Credit and Banking.

On 31 Dec., 1938, the nominal value of the coin in circulation was 26,668,000 kroner (gold coin, which is not in circulation, excluded).

There is no government paper money.

The Norges Bank is a joint-stock bank; in 1949, the state acquired

all the shares hitherto owned. The bank is governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorized to issue bank-notes for circulation. At the end of March, 1940, *i.e.*, just before the German invasion, the note circulation amounted to 599 million kroner.

During the war the monetary and banking system was influenced by the enormous payments made by the occupying power. On 7 May, 1945, the note circulation was 3,039,000,000 kroner. The position of the banks since April, 1940, has largely been one of increasing deposits and declining loans. The call-in of old notes on 6 Oct., 1945, brought in 1,277,270,000 kroner. At the end of 1950 the note circulation was 2,397 million kroner.

At the end of 1949 there were 93 private joint-stock banks. The total amount of capital and funds possessed by these banks was 348,000,000 kroner (capital 204,000,000, funds 144,000,000). Deposits amounted to 3,998,000,000 kroner, of which 1,907,000,000 kroner were deposits on demand, and 2,091,000,000 kroner deposits on time.

The number of savings banks at the end of 1949 was 606. The total amount of the funds of the savings banks amounted to 270,000,000 kroner, and total deposits 4,488,000,000 kroner, of which 667,000,000 kroner were on demand and 3,822,000,000 kroner on time. The number of depositors on time was 2,712,120.

As from 1 Jan., 1925, all private joint-stock banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance.

Money, Weights and Measures.

By a treaty signed 16 Oct., 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 ore, is of the value of 1*s.* 1½*d.* at par, or about 18 kroner to the £ sterling. The gold 20-kroner piece weighs 8·960572 grammes, ·900 fine containing 8·0645 grammes of fine gold. The standard of value is gold. National bank-notes of 5, 10, 50, 100, 500 and 1,000 kroner are legal means of payment, and the bank is ordinarily bound to exchange them for gold on presentation. By a royal decree of 27 Sept., 1931, the gold standard was suspended and there was placed an embargo on gold.

The metric system of weights and measures is obligatory.

SPITSBERGEN, BEAR ISLAND AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° long. east of Greenwich and between 74° and 81° lat. north. The distance from Norway to Bear Island is about 345 km. and to Spitsbergen (South Cape) about 565 km.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitsbergen in 1607. In the 17th century a very lucrative whale-hunting was started and for some time there were Dutch, British and Norwegian claims to sovereignty and quarrels about the hunting-places. But when in the 18th century the whale-hunting ended, the question of the sovereignty of Spitsbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a treaty, signed on 9 Feb., 1920, at Paris, in which

Norway's sovereignty over the archipelago was recognized. On 14 Aug., 1925, the archipelago was officially taken possession of by Norway.

In the autumn of 1944 the Soviet Government approached the Norwegian Government on the question of revising the treaty of 1920. Both governments agreed that any modification could be made only with the approval of the other signatory powers. On 15 Feb., 1947, the Storting reiterated Norway's willingness to discuss with the Soviet Union the revision of the 1920 treaty and economic questions concerning Svalbard, but refused bilateral discussions of the defence of Svalbard.

Total area, 62,105 sq. km. The chief islands are West Spitsbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island and Bear Island (area, 178 square km.). The climate is essentially arctic, tempered by the Gulf Stream.

Coal is the principal product. There are 6 mining camps (3 Norwegian and 3 Russian) inhabited all the year round. Number of workers in Norwegian mining camps during the winter 1949–50, 1,025. In 1938, 606,000 metric tons of coal were exported; in 1948, 420,324; in 1949, 531,313.

U.K. exports to Spitsbergen in 1938 (Board of Trade returns), £354; 1946, £27,232; 1947, £9,107; 1948, 1949 and 1950, nil.

JAN MAYEN ISLAND.

This is a bleak and desolate island between Greenland and Northern Norway, and about 300 miles north of Iceland. It is 55 km. long and its greatest breadth is 15 km. The total area is 372 square km. It is of volcanic origin and is mountainous, Beerenberg in the north reaching a height of 8,350 ft. It is uninhabited, but is occasionally visited by seal hunters, whalers and fishermen. In 1921 the Norwegian Meteorological Institute established a weather forecast station there, and the decision of the Norwegian Government to annex the island was largely due to this action.

The island was discovered by Henry Hudson in 1607, and it was first named Hudson's Tutches (Touches). It was again and again rediscovered and renamed. Its present name was taken from that of a Dutch navigator of the early 17th century, whose claim to have visited the island cannot be substantiated. For the period of a year (1882–83) an Austrian station for scientific observations was maintained there. On 8 May, 1929, Jan Mayen Island was officially proclaimed as incorporated in the Norwegian state, and at the same time the manager of the meteorological station on the island was invested with magisterial authority. The final relation to Norway was settled by law of 27 Feb., 1930. Norwegian sovereignty over the island has been officially recognized by the British Government.

BOUVET ISLAND.

This uninhabited island in the Southern Atlantic was discovered in 1739 by a Frenchman, Pierre Bouvet, but no flag was hoisted till, in 1825, Captain Norris raised the Union Jack. A neighbouring island, Thompson Island, has been reported but its existence is seriously doubted. In 1928 a diplomatic dispute arose between Great Britain and Norway as to the claim to Bouvet, particularly in connexion with the occupation since Dec., 1927, by a Norwegian whaling expedition, and the Norwegian decision to erect a wireless station on the island. Great Britain decided in Nov., 1928, to waive its claim. By law of 27 Feb., 1930, it is stated that Bouvet Island belongs to Norway as a dependency. The area is 58 square km.

PETER I ISLAND.

This uninhabited island in the Antarctic Ocean was discovered in 1821 by the Russian explorer, Admiral von Bellinghousen, who got a sight of it at a distance. The first landing was made in 1929 by a Norwegina expedition which hoisted the Norwegian flag and took possession of the island. On 23 April, 1931, Peter I Island was proclaimed as incorporated in the Norwegian state. The area is 243 square km.

NORWEGIAN ANTARCTIC CONTINENT DEPENDENCY.

On 14 Jan., 1939, the Norwegian Cabinet resolved to place that part of the Antarctic Continent from the border of Falkland Islands dependency in the west to the border of the Australian Antarctic dependency in the east (between 20° west and 45° east) under Norwegian sovereignty. The territory was explored only by Norwegians and had hitherto been ownerless.

Diplomatic Representatives.

1. Of Norway in Great Britain (25 Belgrave Square, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Per P. Prebensen, C.B.E. (accredite[illegible]).

Counsellor.—S. B. Hersleb Vogt.

First Secretary.—Soren Christian Sommerfelt.

Attaché.—Knut Hedemann.

Minister (representing the Minister of Foreign Affairs at the North Atlantic Treaty Council).—Dag Bryn.

Military Attaché.—Col. Adolph Fredrik Munthe.

Air Attaché.—Col. Birger Frederik Motzfeldt, O.B.E.

Commercial Counsellor.—Erling Borresen.

Counsellor for Press and Foreign Information.—H. K. Lehmkuhl.

Shipping Counsellor.—Ingolf Hysing Olsen, K.B.E.

Attaché for Fisheries.—Carsten Hansen.

Cultural Attaché.—Fredrik Wulfsberg.

There are consular representatives at Bradford, Belfast, Cardiff, Edinburgh, Glasgow, Hull, Leith, Liverpool, London, Manchester, Newcastle-on-Tyne.

2. Of Great Britain in Norway.

Ambassador Extraordinary and Plenipotentiary.—Michael Robert Wright, C.M.G. (appointed Jan., 1951).

Counsellors.—E. E. Crowe; A. Goodden (*Commercial*).

Naval Attaché.—Cdr. R. H. Mills, R.N.

Military Attaché.—Lieut.-Col. D. I. Robertson, O.B.E., M.C.

Air Attaché.—Lieut.-Col. W. V. Crawford-Compton, D.S.O., D.F.C.

Scientific Attaché.—J. Wardley Smith.

First Secretaries.—J. E. D. Street; J. C. Aird, M.B.E. (*Consular*); M. F. Cullis (*Information*); R. Ede (*Agricultural*).

There are consular representatives at Bergen, Kristiansand, Oslo, Narvik, Stavanger, Tönsberg, Tromsö and Trondheim.

Books of Reference concerning Norway.

Statistical Information.—The central Norwegian bureau of statistics, Statistisk Sentralbyrå (Dronningensgate 16, Oslo), was founded in 1876 as an independent state

institution, *Director*.—Petter Jakob Bjerve. The earliest census of population was taken in 1769. The main publications of the Sentralbyrå are the following :—

PANAMA.

(República de Panamá.)

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on 3 Nov., 1903, and the *de facto*

Government was on 13 Nov. recognized by the Government of the United States, and soon afterwards by the other Powers. In 1914, Colombia, in the Treaty of Bogota entered into with the United States, agreed to recognize the independence of Panama. This treaty was ratified by the United States and Colombia in 1921, and on 8 May, 1924, diplomatic relations between Colombia and Panama were established.

On 2 March, 1936, a new treaty between the United States and Panama, ratified by the United States Senate on 25 July, 1939, annulled the old provision by which the United States 'guaranteed the independence of Panama,' but permitted the United States, in the event of war, to defend the canal in any way necessary.

The new constitution of 1 March, 1946, continued the existing provisions for a National Assembly of 42 members (1 for every 15,000 inhabitants; provinces with fewer may elect 1 deputy). The deputies' mandate is for 4 years. The Assembly meets annually on 1 Oct. The term of the President of the Republic, elected by direct vote, is 4 years, and he is not eligible for the succeeding term. Women have equal rights with men.

President of the Republic.—Arnulfo Arias, an ex-president and leader of the Authentic Revolutionary Party, was installed as president by the police on 24 Nov., 1949, following 4 days of political turbulence. On 6 May, 1951, he abolished the 1946 Constitution, dissolved the National Assembly and assumed dictatorial powers. The national police, however, removed him from the presidency on 10 May, and the National Assembly installed Domingo Diaz Arosemena, the Vice-president and a former President.

There are normally 2 vice-presidents, elected every 4 years by direct popular vote, and a cabinet of 7 ministers nominated by the President. The Comptroller General is elected by the National Assembly for 4 years. The first woman minister (Labour, Social Welfare and Health) was appointed 22 June, 1950.

Area and Population.—Extreme length is about 480 miles; breadth between 37 and 110 miles; coastline, 426 miles on the Atlantic and 767 on the Pacific; total area is 28,575 square miles (74,010 square km.); population (excluding the Canal Zone) according to the 1950 census was 802,290. There are approximately 10,000 British subjects on the isthmus, chiefly coloured people from the West Indies. A law of 24 Dec., 1938, prohibits the immigration of Negroes whose original language was not Spanish, members of the yellow races and of the original races of India, Asia Minor and Northern Africa.

There are now 9 provinces with census populations (Dec., 1950) as follows (the capitals in brackets):—Bocas del Toro (Bocas del Toro), 22,027; Chiriquí (David), 137,422; Coclé (Penonomé), 72,670; Colón (Colón), 89,643; Los Santos (Las Tablas), 61,174; Herrera (Chitré), 49,960; Darien (La Palma; transferred to El Real by Presidential decree in 1951), 15,108; Panama (Panama City), 247,027; Veraguas (Santiago), 107,209. The capital, Panama City, founded in 1519 on the Pacific coast, had (1940) 111,893 inhabitants, and Colón on the Atlantic coast (1940) 44,393. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, Puerto Mutis and Puerto Armuelles; on the Atlantic, Bocas del Toro, Portobello, Mandinga and Permé.

Number of live births in 1949 was 23,332 (355·1 per 10,000 population), in 1945, 24,496 (384·2). Number of deaths, 1949, was 5,054 (76·9 per 10,000 population) and in 1945, 7,656 (120·1). Number of marriages, 1950, was 2,319 (32 per 10,000), in 1949, 2,385 (33·7), in 1948, 2,299 (33·3), in

1947, 2,402 (36). The figures exclude the tribal Indians and only take into account marriages taking place in the district of Panama.

Religion.—The 1940 census showed that 93% of the population was Roman Catholic and 6% Protestant. There is freedom of religious worship.

Education.—Elementary education is obligatory for all children from 7 to 15 years of age, with 105,884 children enrolled in 1949–50. The Government maintained 883 primary schools throughout the provinces; there are also 81 private primary schools. 274 primary schools are in cities; the remaining 690 are in rural districts. There are 78 secondary schools and commercial and technical colleges. The National University of Panama at Panama City, inaugurated on 7 Oct., 1935, had a total enrolment (1950–51) of 1,678 students in the schools of law, science and other professional subjects; the university was granted autonomy on 28 Sept., 1946. A new site, called University City on the outskirts of Panama City was inaugurated in June, 1950. The 1940 census showed that 35·3% of the population over 10 years old were illiterate, excluding the tribal Indians.

The official language is Spanish but of the 5 daily newspapers published in the capital, 3 appear in both Spanish and English.

There were, in 1950, 60 motion-picture theatres with seating capacity of 48,933. All films must have Spanish subtitles.

Justice.—The laws were codified—civil, penal, commercial, judicial, administrative, fiscal and mining—in 1916 and 1917; these codes are now (1951) being revised. The death penalty has never existed. The Supreme Court consists of 5 justices appointed by the executive with the approval of the National Assembly, one every 2 years to serve 10 years.

Finance.—All the revenue collected on importations into the republic belongs to the Panamanian Government; the United States have the right to import into the zone supplies of all descriptions required for canal construction, maintenance and protection and for the use of their employees, free of all taxes.

For recent years revenues and expenditures, in balboas, have been as follows for years ending 30 June (1 balboa = $1, U.S.):—

	1946	1947	1948	1949	1950[1]
Revenue	36,895,200	38,525,200	34,276,853	33,401,152	32,244,316
Expenditure	37,790,500	37,595,700	35,037,302	34,514,333	32,245,919

[1] Budget estimates.

In the 1950 budget, import duties and consular fees were counted upon to furnish 35% of the revenue; internal taxes, 37%; lottery receipts, 16%, and other sources, 12%. The expenditure proposed assigned 25% to education, 18% to government (including police), 13% to public works, 15% to social service and public health, 9% to debt service and 20% to other purposes.

The revenue, under the treaty signed at Washington on 2 March, 1936, includes an annual rental of 430,000 balboas or dollars (equivalent to 250,000 old gold dollars as originally provided in the treaty of 1903) from the United States so long as the latter maintains and operates the Canal.

The funded internal debt on 1 Jan., 1950, amounted to 9,928,663 balboas or dollars, and an external debt of 15,361,529 balboas; floating debt was 2,191,033 balboas. A loan of 10,500,000 balboas was raised in Sept.,

1950, to redeem that part of the external debt held abroad; security for the loan was the annual income from the U.S. mentioned above. American direct investments in miscellaneous enterprises outside the Canal Zone amounted in 1940 to $36,815,000; American holdings of Panamanian dollar bonds on 31 Dec., 1941, were $12,300,000, of which 61·8% were in default.

Defence.—The republic has no Army or Navy to support. The National Police Force has an authorized strength of 3,370 officers and men. In 1941 the republic granted 134 air and anti-aircraft bases to the United States for the defence of the Canal Zone. A treaty permitting the United States to occupy for 5 years 13 sites and for 10 years the base at Rio Hato (with option for another 10 years extension) was signed on 10 Dec., 1947, but rejected by the Panamanian National Assembly on 23 Dec. The United States thereupon relinquished the bases and withdrew its forces.

Production.— Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is cultivated, though the land is rich in resources. About 60% of the country's food requirements are imported. The most important product is bananas (grown by an affiliate of the United Fruit Company) and exported to the United States. Exports, 1950, 9·8 million stems. Other products are cocoa, abacá fibres and abacá seeds, coconuts and rice. Output of abacá fibre by the United Fruit Company in Bocas del Toro, 1949, was 3 million kilos. About 6 million coconuts are annually exported. Rubber was prominent up to 1925, but since then exports have been very small. The 1949 rice crop was 80,000 metric tons. Beer production in 1950 amounted to 13,095,860 litres; other liquor production included whisky, rum, 'seco,' anise, gin, etc. Coffee (1948, 81,691 quintals) is grown in the province of Chiriquí, near the Costa Rican frontier; the home market consumes almost the entire output. Other products of the soil of Panama are mahogany and other woods, notably copaiba, sarsaparilla and ipecacuanha. The country has great timber resources. Sugar (exports 286,025 quintals in 1950) is assuming importance. According to the livestock census of Dec., 1950, there were 576,598 cattle, 199,968 pigs, and 1,831,140 chickens. Hides are among minor articles of export.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama.

On 19 Sept., 1946, the National Assembly approved a contract with the Sinclair Panama Oil Corporation, granting a 3-year concession to explore for oil in an area of 17,900,000 acres against payment to the government of $25,000 a year; drilling was started in 1947 in the Bocas del Toro area, but discontinued in 1948,when no oil deposits were found.

Consumption of electric energy, 1950, amounted to 61 million kwh., chiefly in Panama City. Apart from a cement factory, there are few industries; foreign firms are being encouraged to establish industries.

Commerce.—The imports and exports (excluding re-exports), in balboas, for 6 calendar years are as follows (1 balboa = $1, U.S.):—

Year	Imports	Exports	Year	Imports	Exports
1945	45,648,124	4,501,843	1948	63,292,657	10,492,765
1946	56,060,000	6,800,000	1949	61,998,965	11,050,305
1947	75,704,205	11,300,269	1950	66,432,477	9,856,790

The huge adverse trade balance is mainly with the United States and is due to the heavy import of consumers' goods for sale to the Canal Zone

employees and to the big transient population. An extensive investigation completed in 1946 estimated that of the country's national income in 1945 ($129,176,000) 37% or $47,424,000, originated in the Canal Zone; in 1944 the Canal Zone contributed 40% of the national income; the reduction (1947) in U.S. military activity in Panama had a serious economic effect.

On 17 June, 1948, a Free Zone was authorized to be constructed at Colón for the storage, exhibition, [illegible] or sale of goods in transit. However, nothing had been done by [illegible].

Chief exports (virtually all to the U.S.) in 1950 were:—Bananas (B. 5,819,534); cacao (B. 1,092,953); abacá fibre (B. 1,375,415).

Of total exports the United States took B. 9,005,914 or 91%.

Of the imports (1950) B. 66,432,477 or 66 6% came from the United States. Chief imports, 1949, were:—Machinery (including automobiles), B. 12,349,945; foodstuffs, B. 9,574,126; textiles, B. 9,734,491; chemicals, B. 4,883,970.

A law of 24 March, 1941, placed virtually all retail trade in the hands of Panamanians, but the constitution, signed on 1 March, 1946, relaxed the ban somewhat.

Total trade between Panama (including Canal Zone) and the United Kingdom (Board of Trade returns, in £ sterling):—

	1938	1947	1948	1949	1950
Imports to U.K. . . .	17,662	61,962	8,410	3,738	3,226
Exports from U.K. . . .	458,954	331,168	1,068,730[1]	2,136,076[1]	5,051,442[1]
Re-exports from U.K. . .	12,384	6,802	4,978	6,030	13,727

[1] Included are new ships built for foreign owners and registered in Panama.

Communications.—*Shipping.* All the international maritime traffic for Colón and Panama runs through the Canal Zone ports of Cristobal and Balboa; Bocas del Toro is used for both the provincial and international trade. The port of Puerto Armuellés, opened in 1928, provides an outlet for bananas from plantations on the Pacific Coast. Shipping under Panamanian registry has increased during the war. It totalled on 31 Dec., 1950, 800 vessels of 4,300,000 gross tons, of which 162 vessels were of 1,000 tons or less; 38 ships had been transferred from the U.S. flag and 25 from the British flag.

Railways.—The Panama Railroad, which connects Panama City on the Pacific with Colón on the Atlantic, is the principal railway. It is 47·61 miles long and, with the exception of the termini at Panama and Colón, passes through Canal Zone territory. As most vessels unload their cargo at Cristobal (Colón), [illegible] on of the merchandise destined for Panama City is brought [illegible] Railroad. In the province of Chiriquí there is a narrow-gauge railway, 32 miles long, connecting the port of Pedregal with Boquete, and passing through David, the provincial capital. Between David and La Concepción there is a line 18 miles long, which has now been extended to the port of Puerto Armuellés. In Bocas del Toro, between the Atlantic port of Almirante and Guabito (property of the United Fruit Company), a railway 51 miles long extends up to Suretka on the Costa Rican border.

Roads.—Panama has 1,090 miles of highway, about one-third of which is paved.

There is a road from Panama City westward as far as the city of David,

with a branch to the mountain resort of Boquete, A concrete highway, maintained by the United States, connects Panama City and Colón. On 1 Jan., 1950, registered motor vehicles numbered 26,689, of which 11,158 were in Panama City.

Aviation.—Commercial aviation has developed rapidly. British South American Airways, Pan-American World Airways, Panagra Airways and other international companies operate at Tocumen Airport (17 miles from Panama City). The Compania Panameña de Aviacion provides a local service between Panama City and the provincial towns.

Post.—There are telegraph cables from Panama to North American and Central and South American ports, and from Colón to the United States and Europe. There are now 36 commercial broadcasting stations functioning in Panama and 3 in the Canal Zone. About 60,000 radio receivers were in use 31 Dec., 1949; about 42,000 were short-wave receivers. Number of telephones in 1950 was about 12,000.

Money and Credit.—The present monetary unit is the *balboa*, which is of the same size and fineness as the United States silver dollar but is maintained equivalent to the gold dollar. Panama has officially recorded this with the International Monetary Fund. Other silver coins are the half-balboa (of 12·5 grammes ·900 fine, and equal to 50 cents, U.S.); the quarter and tenth of a balboa piece; cupro-nickel coins of 5 and 2½ cents, and copper coins of 1½ and 1 cent. U.S. silver coinage is also legal tender. Altogether 1,145,000 balboas of the new Panamanian silver currency is in circulation. The only paper currency used is that of the United States.

Gold and short-term assets in the United States (both official and private) on 31 Dec., 1950, were $59·9 million.

Of the $10,000,000 paid by the United States to the Republic of Panama for the right to construct the Panama Canal, $6,000,000 were invested in the United States, particularly in New York real estate. As part of the refunding operations of the External Debt, which were carried out in 1950, this sum was 'released' and the balance brought to Panama.

The National Bank of Panama on 30 June, 1950, had capital of B. 2,500,000, reserves of B. 1,329,763, current deposits of B. 12,190,354 and loans of B. 9,911,666. There were 8 other Panamanian banks; in June, 1940, 4 small provincial banks were merged into a single 'Bank of the Central Provinces' at Chitré, with a capital of B. 1,300,000. The National City Bank and the Chase National Bank of New York City have branches.

English weights and measures are in general use; those of the metric system are little used.

Diplomatic and Consular Representatives.

1. Of Panama in Great Britain (3 Portsea Hall, W.2).

First Secretary and Chargé d'Affaires.—Ernesto Bellino.

Attaché.—Ricardo E. Soto.

There are consular representatives at Birmingham, Cardiff, Glasgow, Grimsby, Hull, London, Liverpool and Newcastle-on-Tyne.

2. Of Great Britain in Panama.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.—Eric Arthur Cleugh, C.M.G., M.V.O., O.B.E. (appointed 24 Oct., 1950).

First Secretary (and Consul at Panama City).—A. H. B. Hermann.
First Secretary (Information).—Jasper M. Leadbitter.
Naval Attaché.—Capt. J. R. B. Longden, O.B.E., R.N.
Labour Attaché.—H. A. N. Brown (resides in Mexico).
Air Attaché.—Wing-Commander A. F. Johnson, D.F.C. (resides in Carácas).

There is a consul at Colón and a vice-consul at Bocas del Toro.

Books of Reference.

STATISTICAL INFORMATION.—The Comptroller General of the Republic (Edificio Banco Nacional, Panama City) publishes a monthly bulletin of statistics (Estadistica Panameña) and other statistical publications, including the result of the 1940 census (Censo de Poblacion· 1940, 10 vols).

The Legal Codes (in Spanish). 7 vols. Panama City, 1917.
Marsh (R. O.), White Indians of Darien. New York, 1935.
McCain (W. D.), The United States and the Republic of Panama. Cambridge, 1937.

The Panama Canal and the Canal Zone.

On 18 Nov., 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic canal. In this treaty Panama granted in perpetuity the use, occupation and control of a zone (Canal Zone) 5 miles wide on each side of the canal route, and within this zone the exclusive right to exercise sovereign power and authority. For the needs of the Panama Canal other territory was granted, including certain islands in Panama Bay. The cities of Panama and Colón remain under the authority of Panama, but certain jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and public health. In return for these grants the United States paid $10,000,000 and $250,000 (gold dollars) yearly (beginning 9 years after the date of the treaty). The treaty was ratified on 26 Feb., 1904, and in July, 1904, the agreement for the provisional delimitation of the boundaries of the United States territory on the isthmus was signed. Later, in Sept., 1914, a boundary convention was signed. A new treaty, ratified by Panama in Dec., 1936, and by the United States on 25 July, 1939, made various concessions to Panama, increasing the annual payment to Panama to $430,000, U.S., and containing various provisions designed to remove sources of friction.

Governor of Panama Canal Zone.—Brig.-General Francis K. Newcomer, U.S.A. (retired). He is in direct charge of the operation and maintenance of the Canal and the civil government of the Canal Zone.

On 26 Sept., 1950, legislation was approved which (*a*) authorizes the transfer of the Panama Canal to the Panama Railroad Company, excepting subdivisions relating to civil government, health and [illegible]; (*b*) changes the name of the Panama Railroad Company to the Panama Canal Company; (*c*) authorizes the Company's Board of Directors to establish toll rates subject to the President's approval; (*d*) permits the Company to retain and utilize tolls revenue; and (*e*) authorizes appropriations to the Company to cover losses which might result from changes in economic conditions. This legislation became effective 1 July, 1951.

There are 120 miles of paved highways in the zone, exclusive of those within military and navy posts. Motor vehicles, 1950, number 15,531.

The area of the Canal Zone, including land and water, is 648·01 square

miles. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 163·38 square miles. The water area of the zone, including the water area within the 3-mile limit from the Atlantic and Pacific ends, is 275·52 square miles.

The canal has a summit elevation of 85 feet above the sea. It is 50·72 statute miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean, and from shore to shore is approximately 40½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel is 649 feet, and the minimum 300 feet, with a minimum depth of 41 feet. The average time of passage through the canal is from 7 to 8 hours; the record passage is 4 hours 10 minutes. The maximum traffic capacity of the canal is estimated at 48 ships of usual size in a day or about 17,000 in a year.

The Gatun dam along the crest is 8,400 feet long, including the spillway, or over 1½ miles, and ½ mile wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i.e.*, 85 feet above sea level, is about 388 feet. The Madden Dam, 974 feet long and 223 feet high, across the Chagres River at Alhajuela, was completed in 1935, creating Madden Lake, which at its maximum level covers 20 square miles at 260 feet above sea level; this provides a reserve of 33 milliard cubic feet of water for maintaining the level of Gatun Lake during dry seasons. The length of the cut through the Continental divide (Culebra, now Gaillard Cut) is 8 statute miles.

On 1 July, 1940, construction was begun on a new set of locks located approximately parallel to the existing locks at Gatun, Miraflores and Pedro Miguel. Work was suspended in the early months of the war and Congress on 28 Dec., 1945, authorized a re-study of the third locks project, including an investigation of the over-all problem (including a canal or canals at other locations or any new means of transporting ships across land) of inter-oceanic commerce and national security. In Dec., 1947, the governor of the Canal Zone recommended that the Canal be converted to sea level.

The total population of the Canal Zone, according to the census of 1 April, 1950, was 52,300. The total force employed by the canal and the Panama Railroad on that date numbered 4,584 American citizens and 15,018 of other nationalities (chiefly natives of the tropics). No land in the zone is privately owned, and the zone is, in effect, a government-owned reservation dedicated to the operation, maintenance and protection of the canal and its appurtenances.

The gross capital investment for the construction, operation and maintenance of the canal to 30 June, 1950, totalled $734,125,223, and the net capital investment, after depreciation, was $672,962,143, including $128,991,063 interest on funds borrowed to construct the canal up to the opening of 12 July, 1920. The net revenues, in excess of all operating expenses, but excluding any interest charges on the investments, have totalled $276,826,571 since that date. After deduction of interest charges at 3% there was a deficit of $179,912,121. There was a net revenue (excluding interest) from tolls and other sources during the year ending 30 June, 1950, of $2,830,184; the deficit for 1950, after deducting interest, was $13,104,569.

The canal was informally opened to commerce by the passage of the 9,000-ton steamer *Ancon* on 15 Aug., 1914. The journey was made without mishap in 10 hours. It was formally opened to commerce by proclamation of the President of the United States on 12 July, 1920. The canal has been in use since 1914, except for various short periods in 1915 and

from 18 Sept., 1915, to 15 April, 1916, when the channel was entirely blocked by slides in the banks of Gaillard Cut. There has been no appreciable interruption since 11 Jan., 1917.

Particulars of the traffic through the canal for 5 fiscal years are given as follows (cargo in long tons) :—

Fiscal year ending 30 June	North-bound (Pacific to Atlantic)		South-bound (Atlantic to Pacific)		Total		Tolls levied (in dollars)
	Vessels[1]	Cargo	Vessels[1]	Cargo	Vessels[1]	Cargo	
1945	1,016	4,368,672	924	4,234,935	1,939	8,603,607	7,243,602
1947	2,239	13,375,698	2,021	8,294,820	4,260	21,670,518	17,596,602
1948	2,392	15,438,648	2,286	8,679,140	4,678	24,117,788	19,956,593
1949	2,406	15,406,070	2,387	9,899 088	4,793	25,305,158	20,541.230
1950	2,759	19,388,130	2,689	9,483,863	5,448	28,872,293	24,430,206

[1] *I.e.* ocean-going commercial vessels, over 300 net tons Panama Canal measurements (excluding canal vessels and launches), and U.S., Panamanian and Colombian Government vessels.

In the fiscal year of 1950, of the total number (5,448), 2,452 vessels were American, 876 British, 452 Norwegian, 372 Honduran, 194 Panamanian, 157 Danish, 153 Swedish, 119 Dutch, 104 Colombian, 104 Greek, 101 French, and the remaining 364 of 17 other nationalities.

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spain on 14 May, 1811. In 1814, Dr. José Gaspar Rodriguez Francia was elected dictator and in 1816 perpetual dictator, by the National Assembly. He died 20 Sept., 1840. In 1844, a new constitution was adopted, under which Carlos Antonio López (first elected in 1842) and his son, Francisco Solano López ruled until 1870. During a devastating war against Brazil, Argentina and

Uruguay (1865–70) Paraguay lost probably 500,000 men. Argentina in Aug., 1942, and Brazil in May, 1943, voided the reparations debt imposed upon Paraguay, which Paraguay had never paid.

A new constitution was adopted in 1870. The following is a list of past presidents since 1898, with the date on which each took office :—

Emilio Aceval, 25 Nov., 1898.[1]
Hector Carvallo, 9 Jan, 1902.[2]
Juan Escurra, 25 Nov., 1902.
Juan Gaona, 18 Oct., 1904.[2]
Dr. Cecilio Baez, 8 Dec., 1905.[3]
Dr. Benigno Ferreira, 25 Nov., 1906.
Emiliano Gonzalez Navero, 5 July, 1908.[3]
Manuel Gondra, 25 Nov., 1910.
Col. Albino Jara, 11 Jan., 1911.[4]
Liberato Marcial Rojas, 6 July, 1911.[2]
Dr. Pedro Peña, 29 Feb., 1912.[5]
Emiliano Gonzalez Navero, 22 Mar., 1912.[3]
Eduardo Schaerer, 15 Aug., 1912.
Dr. Manuel Franco, 15 Aug., 1916.[4]
Dr. José Montero, 7 June, 1916.[3]
Manuel Gondra, 15 Aug., 1920.
Dr. Felix Paiva, 31 Oct., 1921.[2]
Dr. Eusebio Ayala, 3 Nov., 1921.[2]
Dr. Eligio Ayala, 1 April, 1923.[3]
Dr. Luis Riart, 12 April, 1924.[3]
Dr. Eligio Ayala, 15 Aug., 1924.
Dr. José Guggiari, 15 Aug., 1928.
Emiliano Gonzalez Navero, 26 Oct., 1931.[3]
Dr. José Guggiari, 28 Jan., 1932.
Dr. Eusebio Ayala, 15 Aug, 1932.[4]
Col. Rafael Franco, 18 Feb., 1936.[3]
Dr. D. Félix Paiva, 15 Aug, 1937.
General José Félix Estigarribia, 15 Aug. 1939.[6]
General Higinio Morinigo, 7 Sept., 1940.[7]
Dr. Juan Manuel Frutos, 3 June, 1948.[8]
Dr. J. Natalicio González, 15 Aug., 1948.[8]
General Raimundo Rolon, 30 Jan., 1949.
Dr. Felipe Molas López, 14 May, 1949.[9]

[1] Died 9 Jan., 1902.
[2] Succeeded as Vice-President.
[3] Deposed 17 Feb., 1936.
[4] Resigned 3 June, 1948.
[5] Provisional, *i.e.*, following a *coup d'etat*.
[6] Died 5 June, 1919.
[7] Killed in aeroplane accident.
[8] Deposed 30 Jan, 1949.
[9] Resigned 10 Sept., 1949.

President.—Dr. Federico Chaves, elected 16 July, 1950; he had previously been appointed Provisional President by the National Assembly on 10 Sept., 1949, following the resignation of Dr. Felipe Molas López, who had been elected by the National Assembly on 26 Feb., 1949, and confirmed at an election on 17 April. The dominant party is the Colorado, all others having been suppressed in the 5-months civil war in 1947.

The President has a cabinet of 8 ministers; he receives a salary of 2,000 guaranies per month, and each of the ministers receives 1,200 guaranies.

The new constitution, which was ratified at a plebiscite on 4 August, 1940, is democratic in character, but has authoritarian tendencies. The President is accorded larger powers than in the old constitution; the Diet is composed of one chamber only, with the number of members reduced, only one for every 25,000 inhabitants being elected. The place of the Senate is taken by a Council of State, the members of which are nominated by the Government on a corporative basis. The President is elected for 5 years, and he appoints the Cabinet, which exercises all the functions of government, and need only inform the Chamber and the Council of State of its policy. The constitution guarantees private property, but the state is given the right to regulate economic activities.

The country is divided into 2 sections: the 'Oriental,' east of Paraguay river, and the 'Occidental,' west of the same river. The Oriental section is divided into 13 departments, subdivided into 133 *partidos*; the Occidental section (the Chaco) is divided into 3 departments with 4 *partidos*.

The 16 departments of the republic are now officially numbered and named as follows :—1, Concepción (capital, Concepción); 2, San Pedro (capital, San Pedro); 3, Cordillera (capital, Caacupé); 4, Guairá (capital, Villarrica); 5, Caaguazú (capital, Coronel Oviedo); 6, Caazapá (capital, Caazapá); 7, Itapua (capital, Encarnación); 8, Las Misiones (capital, San Juan Bautista); 9, Paraguarí (capital, Paraguarí); 10, Alto Paraná (capital, Hernandarias); 11, Central (capital, Ipacaraí); 12, Neembecú (capital,

Pilar); 13, Amambay (capital, Pedro Juan Caballero); 14, Presidente Hayes (capital, Villa Hayes); 15, Boquerón; 16, Olimpo.

The civil authority is exercised by a *comisario de policía* in each of the departments. The capital, Asunción, forms a district subdivided into 'secciones policiales.'

National flag: red, white, blue (horizontal); the white stripe charged with the arms of the republic on the obverse, and, on the reverse, with a lion and the inscription *Paz y Justicia*—the only flag in the world with different obverse and reverse.

National anthem: Paraguayos, republica ó muerte! (words by F. Acuna de Figueroa; tune by F. Dupoy).

Area and Population.

The approximate area of Paraguay proper or 'Oriental' section, which is situated between the rivers Paraguay and Alto Paraná is officially estimated at 159,807 square kilometres, or 61,705 square miles. The boundary between Paraguay and Bolivia, in the section known as Chaco, was in dispute since 1870, culminating in open warfare in Sept., 1932. This was terminated by a treaty of peace signed July, 1938, and the boundary was fixed by arbitration Oct., 1938. The area of Paraguay's 'Occidental section', as thus increased, is now officially estimated at 246,925 square kilometres (95,337 square miles), making the total area of the republic 406,732 square kilometres or 157,039 square miles.

A census of the population was taken on 28 Oct., 1950.

On 1 July, 1948, the total population was estimated at 1,270,000, with a density of 8 per square mile. The population of Paraguay ('Oriental' section) consists of people of Spanish descent and mestizos (mixed European and Indian). There are no Negroes. On 28 Oct., 1950 (preliminary, census), the population of the capital district, Asunción (founded 1537), was 205,605, of which 99,042 were males; dwelling units were 40,900. Population of the 13 departments (in the 'Oriental' section), as estimated in 1945, was as follows:—Central, 154,070; Cordillera, 151,303; Paraguarí, 144,578; Itapua, 96,924; Guairá, 87,735; Caaguazú, 72,506; Caazapá, 70,197; San Pedro, 53,951; Neembucú, 51,009; Las Misions, 46,669; Concepción, 44,304; Amambay, 17,355, and Alto Paraná, 3,850. The population of the principal towns of the 'Oriental' region in 1945 was as follows:—Coronel Oviedo, 33,098; Villarrica, 31,081; Jesus y Trinidad, 23,677; Caazapá, 19,953; [illegible] 18,907; Concepción, 16,487; Encarnación, 16,078; San Pedro, 11,[illegible]; S. Pedro del Paraná, 14,667; Quiindy, 14,485; Arroyosy Esteros, 13,453; Paraguarí, 11,775; Coronel Bogado, 11,159; Pilar, 9,593, and Ypacaraí, 8,214. Chief towns of the 'Occidental' region:—Lopes de Filippis, 8,688; Puerto Pinasco, 7,015; Puerto Casado, 6,367; Villa Hayes, 4,397, and Fuerte Olimpo, 2,888.

In 1947 the crude birth rate was 32·1 per 1,000 population; crude death rate, 9·1; infant mortality rate (1946), 52·0 per 1,000 live births (compared with 98·1 in 1938); crude marriage rate, 2·7 per 1,000 population.

Paraguayans are bi-lingual, speaking both Spanish and Guaraní, the language of the now extinct Guaraní Indians, who held the country at the time of the Spanish conquest.

Immigration from 1905 up to January, 1939, totalled 34,000, including 3,900 Mennonite farmers from Canada, Russia and Poland. Most of the immigrants settled in the 27 state-aided colonies. Immigrants arriving in 1948 included 4,800 Mennonite farmers from Germany and several hundred from Canada; 165 Dutch farmers (not Mennonites) also arrived. In Aug.,

1948, immigration was restricted to citizens of American countries, but in 1951 Paraguay agreed to admit some 50,000 Italians over a period of 3 years.

Religion and Education.

The Roman Catholic Church is the established religion of the state, but the free exercise of other religions is permitted. The seat of the Paraguayan archbishopric is Asunción; there are bishoprics at Villarrica and Concepción. Religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage.

Education is free and nominally compulsory, but schools are not everywhere available, and the system has been extensively revised to provide, *inter alia*, primary education for adults. There are no statistics of illiteracy. In 1947 there were 1,293 government primary schools with 176,465 pupils and 4,157 teachers; 19 private schools with 8,148 pupils and 202 teachers. There were 14 secondary schools (11 in the capital) with 2,054 pupils and 14 commercial colleages with 3,296 pupils. There were 115 vocational schools (56 in the capital). The National University had, in 1940, 890 students and 115 professors; complete autonomy in appropriate spheres of university affairs was granted in 1929 to a body including students, alumni and faculties. In all, 8 universities had, in 1947, 165 professors and 1,221 students. The number of students inscribed at the higher facilities was returned in 1944 as follows:—Medicine, 391; law and social science, 370; economic sciences, 319; chemistry and pharmacology, 183; physics and mathematics, 162, and odontology, 153. Paraguay opened in 1944 the first *preventorium* for the healthy children of leprous parents.

A contributory national insurance scheme for all salary and wage earners except civil servants and railway employees went into effect 1 Jan., 1951.

Motion-picture theatres numbered 30 in 1950, with seating capacity of 19,500 Paraguay, in 1949, had 3 daily newspapers with an aggregate circulation of 17,000.

Justice.

The highest court of justice is the Supreme Court with 3 members. There are special Chambers of Appeal for civil and commercial cases, and criminal cases. Judges of first instance deal with civil, commercial and criminal cases in six departments. Minor cases are dealt with by Justices of the Peace.

The Attorney-General represents the state in all jurisdictions, with representatives in each judicial department and in every jurisdiction. In matters of revenue, taxes, etc., the state is represented by the Abogado del Tesoro.

Finance.

For 6 calendar years, revenue and expenditure, in the new unit of account, the guarani, officially valued at 32·36 cents (U.S.), have been as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1945	24,477,602	31,302,575	1948	45,574,000	—[1]
1946	33,233,792	35,559,883	1949[2]	54,878,320	74,332,000
1947	41,682,000	51,354,000	1950[3]	102,071,000	118,052,000

[1] Unavailable.
[2] Budget estimates; the actual figures are not available.
[3] Budget estimates.

The 1950 budget provided for expenditure of 90,398,000 for national defence, 28,719,000 for debt service and [illegible]. Taxes were expected to furnish 33,626,000 guaranies, and customs duties, 23,740,000 guaranies.

On 31 December, 1941, the external debt of Paraguay was 15,272,422 gold pesos; the internal debt was 24,001,134 gold pesos. In 1936 proceeds of the export tax on *yerba maté* and hides were earmarked for service of the external debt; the latter yielded 882,191 guaranies in 1948. Paraguay agreed, beginning 1 Jan., 1945, to resume service on the external sterling debt, in default since 1934; coupons in arrears were to be paid off at the rate of 7*s.* 9*d.* per £1 nominal. Balance outstanding was £652,150. During 1949 and 1950 payments of interest and repayment of external loans amounted to £105,144, U.S. $1,850,232 and 4,500,000 Argentine pesos. British investments, end of 1949, had a par value of £3,300,290, of which 85·1% was in default. Foreign investments, 1950, in millions of guaranies, were 181·8, of which Argentina furnished 77·7 (42·7% of the total), Britain 51·2 (28·2%) and the United States 45·9 (25·3%). Since 1947 U.S. investments have risen by 6·9 million and those of Argentina and Britain have fallen by 2·3 million and 2·8 million, respectively.

Defence.

The military establishment is about 350 officers and 5,500 men. The Army consists of 3 divisions of infantry, each one of 2 regiments of infantry, 1 group of artillery, 1 group of cavalry and 1 battalion of engineers (all motorized), and 1 division of cavalry of 2 regiments mechanized and 1 regiment mounted. There are 5 training schools for officers and technical specialists; a U.S. military mission directs the training in one of the schools.

There are 3 squadrons of aircraft.

In the event of war, service is compulsory in the active Army for 2 years between the ages of 18 and 20; between 20 and 29 in the reserve of active Army; between 29 and 39 in the national guard, and between 39 and 45 in the territorial guard.

The Navy consists of 2 armoured river gunboats of 745 tons (built in Italy) and 4 patrol boats, river craft armed with modern guns. The largest of the latter displaces about 180 tons. There are also 6 American-built picket boats.

Production and Industry.

The soil of Paraguay is productive and the climate suitable for many sub-tropical products, but only some 1,550,000 hectares are cultivated out of 41 million hectares of cultivable land. Much of the country is admirably suited to pastoral purposes; large estates are the rule, in one instance amounting to 2 million hectares. It is estimated (1949) that there are about 4,087,000 head of cattle in the country, but normally, in addition, cattle has to be imported from Argentina for the packing plants. There are 3 packing plants (including 1 American and 1 British), encouraged by the Government; hides, jerked beef, corned beef and other animal products are exported. In 1950 a combined government and private corporation took over the sale and distribution of meat. Exports of meat products in 1946 were 47,700,000 lb.; in 1947, about 30,000,000 lb.; in 1949, 28,652,000 lb. Paraguay produces salted and dry cattle hides; exports in 1949, about 10,000 metric tons.

Yerba maté, or strong-flavoured Paraguay tea, which is a plantation product as well as a natural product of the virgin forests, is one of the chief articles of export; exports range from 4,000 to 8,000 metric tons; in 1949, 5,000 tons. The 1946–47 tobacco output reached 28 million lb.

compared with an average of 14 million in 1940–44; exports totalled 15,428,000 lb. in 1949.

Timber resources of excellent quality are enormous, the cedars and hardwoods being a particularly valuable article of export; timber exports, 1949, were 196,000 metric tons. Paraguay produces in the Chaco region quebracho logs, of which a small tonnage is exported. The chief product is quebracho extract (tannin); exports were 40,000 metric tons in 1949. Fruit growing, especially of tangerines, is general. Grapefruit has been grown for export to London. Yaguaron is the chief source of petit-grain oil, distilled from the leaves of a bitter orange tree and used in the manufacture of many perfumes; the oil is widely exported; exports, 1949, were valued at 1,841,000 guaranies.

About 25,000 acres are devoted to sugar cultivation, largely for the manufacture of spirit (sugar production, 1950, 19,000 metric tons, compared with pre-war average of 7,000 tons), but substantial quantities are usually imported. There are 10 sugar factories in Paraguay, the most important of which is at Tebicuari. 39,700 metric tons of rice were grown in 1949–50. Banana production (1941) was 5,426,796 stems. Harvest of peanuts averaged 19,400 tons (1935–39) but output in 1949 was only about 2,300 tons. Production (1944) of manioc was 1,018,885 metric tons.

Agriculture is primitive, but the training of smallholders for settlement in rural colonies was expanded in 1942. About 80% of the peasants are landless; only 20% (1949) use iron ploughs. About 134,000 acres are planted to maize. The cultivation of cotton of the American uplands type from about 140,000 acres is encouraged by the authorities; it matures early and reaches the market when the American crop is scarce; production in the crop year ending 28 Feb., 1950, was 40,000 metric tons. It is commonly sold, however, as Argentine cotton, chiefly to the United Kingdom; about 8,000 metric tons of cottonseed oil is produced annually. Lace-making, of the 'spider-web' variety, is a thriving industry.

Iron, manganese, copper and other minerals are encountered in abundance. The Ibicui iron mines were worked as early as 1863. The Quiquió and Ibicuí manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel, Concepción and Quiquió.

Fourteen power-plants, with a total estimated capacity of 12,000 k.w. supply electric energy to 18 cities and towns.

The national income, 1946, at factor cost (in million guaranies) was 452, of which crops furnished, 85·6; animals, 64·3; manufactures and handicrafts, 138·8; trade, transport and communications, 89·8; services, rent, banking and insurance, 35·5 [illegible] '. 38·0.

Trade unionists number about [illegible] groups struggle for control of the labour movement—the Communists ('Paraguayan Workers' Council' which is illegal) and the 'Partido Febrerista' (similar to the Apista movement in Peru), which is reformist, anti-Communist and inclined to regard foreign capital rather than native employers as 'the enemy.' A third organization is the semi-official 'Republican Workers' Organization', (O.R.O.).

Commerce.

Imports and exports, stated in guaranies at the official rate, adopted in 1943, 1 guarani equals 32·3 cents, U.S.; 1 million guaranies equals $323,625.

	1944	1945	1946	1947	1948	1949
Imports .	40,038,140	54,660,809	66,387,451	68,086,794	75,237,770	87,866,000
Exports .	42,334,308	68,933,050	82,678,601	65,703,073	87,097,995	101,615,000

In millions of U.S. dollars, imports for the above years (valued f.o.b. at the point of shipment) and exports, were as follows :—1944, imports $13·0 and exports 13·7; 1945, $17·5 and $22·0; 1946, $21·1 and $26·5; 1947, $21·8 and $21·1; 1948, $24·3 and $28·2; 1949, $28·4 and $32·9.

Chief exports in 1949 included timber, valued (in guaranies) at 24,442,000; quebracho extract, 21,265,000; cotton, 14,734,000; hides, 11,447,000, and canned meats, 9,748,000. The most important imports were food, cotton goods and vehicles.

Of the imports in 1949 (in guaranies), 19,384,000 came from Argentina, 29,164,000 from the United States, 15,826,000 from the United Kingdom and 6,627,000 from Brazil. Of the exports, Argentina took 35,461,000 (plus 50,176,000 in goods in transit); Uruguay, 1,703,000 (plus 1,567,000 in transit); the United Kingdom, 4,328,000, and the United States, 1,452,000. Goods in transit, through Argentina and Uruguay, go mainly to the United Kingdom and the United States.

The trade between Paraguay and the United Kingdom (Board of Trade returns) in £ sterling for 6 years was as follows :—

	1938	1946	1947	1948	1949	1950
Imports to U.K. .	224,638	2,265,831	1,784,094	1,742,490	1,340,764	1,396,619
Exports from U.K. .	72,308	302,691	304,846	968,376	890,800	533,913
Re-exports from U.K.	714	886	3,600	2,823	2,267	3,855

Communications.

Paraguay is enclosed in the centre of the South American Continent, from 800 to 1,600 miles up La Plata River and its tributaries. The Paraguay River divides the country into two distinct parts and is navigable for 12-foot draft vessels as far as Concepción, 180 miles north of Asunción, and for smaller vessels for a further distance of 600 miles northward. The Paraná River is navigable by large boats from Corrientes up to Puerto Aguirre, at the mouth of the Yguazu River. Boats of a few hundred tons capacity navigate the tributary rivers in Paraguay, the largest of which are the Tebicuary, south of Ascunción, the Manduvire, Jejuaguazu and the Aquidabana rivers, north of Asunción.

Asuncion, the chief port, is 950 miles from the sea. In June, 1945, the Government formed—after a break of 80 years—a national merchant marine with a capital of 20,000,000 guaranies. About 4,000 steam vessels enter annually at the port of Asunción. The principal companies engaged in the river service on the Paraguay and the Alto Paraná are the Argentine Navigation Company, Ltd., the controlling interest in which is British, and the Lloyd Brasileiro. All imports and exports for ocean shipment have to be transhipped at Montevideo or Buenos Aires.

There is a British-owned railway (the Paraguay Central Railway) from Asunción to Encarnación, on the Rio Alto Paraná. This railway has a total main-track length (1941) of 274 miles. There is now a through train service without break of bulk from Asunción to Buenos Aires. El Ferrocarril del Norte, owned by a Paraguay company, runs from Concepción as far as Horqueta, a distance of 33 miles. This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. Total length of railways, 713 miles. The country roads are in general mere bullock tracks and transport is difficult. Highways, 1940, had a mileage of 3,759 miles; in

1945 there were 120 miles of paved and 150 miles of all-weather roads. There are 29 miles of tramway lines.

Air services are furnished by 5 airlines (domestic and foreign), one of which uses seaplanes, following the river between Asunción and Buenos Aires.

The national telegraph (137 offices) connects Asunción with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; in addition 34 stations are operated by the Paraguay Central Railway; total, 2,070 miles. Three companies offer radio-telegraph service. The telephone system has been under government control since 5 Oct., 1945; a new government agency, the National Telephone Administration, took over the telecommunication services in July, 1947. Telephone lines, 1949, 5,225 miles; instruments, 4,986. Long-distance telephone communication with Posadas was established in 1932. Twelve wireless-telegraph stations have been erected. Wireless sets in use, 1950, numbered about 80,000. Paraguay joined the postal union in 1881; the number of post offices (1941) was 155.

Money, Weights and Measures.

In 1946, Paraguay notified the International Monetary Fund that the unit of account, the guarani, is equal to 32·3625 cents, U.S., or 0·287595 gramme of fine gold; $1·00, U.S., equals 3·09 guaranies and 1 troy oz. of fine gold, 108·15 guaranies. But on 3 March, 1951, the unit was devalued to 16·67 cents, U.S., and new rates were established, 6 guaranies and 9 guaranies equal to $1·00, and 16·80 and 25·20 equal to £1.

The guarani was established on 5 October, 1943, equal to 100 of the old paper pesos. The old gold peso, no longer used, is nominally valued at 1·75 guaranies. The latter is divided into 100 centimos, and is symbolized by the letter G with a line through it, similar to the dollar sign. At the then buying rate of 300 paper pesos per U.S. dollar, it was worth 33⅓ cents, U.S., but was adjusted to 32·36 cents. Under the new law the Banco del Paraguay is placed in charge of all paper and metallic currency.

The old unit of value was the gold peso, which had been based since 1923 on the Argentine gold peso. Actually there was no gold or silver current, and the paper peso (worth in 1942 three-tenths of 1 cent, U.S., or 5 pesos = 1 penny, U.K.) was the chief circulating medium. There are copper–aluminium coins representing 50, 25, 10 and 5 centimos and 1 centimo.

For previous currency history, *see* THE STATESMAN'S YEAR-BOOK, 1943, p. 1162

The National Bank of Paraguay (now called Banco del Paraguay) opened in March, 1943, and was reorganized as the Bank of Paraguay (in Sept., 1944), with a monetary, a banking and a mortgage department. On 31 Oct., 1950, the monetary department had gold valued at 600,000 guaranies, and foreign exchange of 12,457,000 guaranies, while note and coin circulation was 130,463,000 guaranies. It has no legal gold reserve. The Banco Agricola, practically a department of the Government, charged with agricultural development, was merged into the Bank of Paraguay in 1948.

The other banks in Paraguay are a branch of the Bank of London and South America, Ltd.; Banco Germanico de la America del Sud; the Banco del Hogar Argentino; Banco de la Nacion Argentina; Banco del Brazil.

The metric system was officially adopted on 1 Jan., 1901.

Diplomatic and Consular Representatives.

1. Of Paraguay in Great Britain (51 Cornwall Gardens, S.W.7).

Envoy Extraordinary and Minister Plenipotentiary.—(Vacant).

First Secretary.—Dr. Luis M. Ramirez Boettner.

There are consuls at Birmingham, Cardiff, Glasgow, Liverpool, London and Southampton.

2. Of Great Britain in Paraguay.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General. Ian Leslie Henderson.

First Secretary.—W. M. Wylie (*Labour*).

Naval Attaché.—Capt. C. B. Alers-Hankey, D.S.C., R.N.

Military Attaché.—Brig. R. G. Fullerton.

Air Attaché.—Air Commodore W. E. Oulton, D.S.O., D.F.C.

Civil Air Attaché.—G. S. Hill.

There is a consular representative at Asunción.

PERSIA.

(Irân.)

Reigning King (Shah).

On 31 October, 1925, the Majlis, 'in the name of the national welfare,' proclaimed the deposition of the Shah, Sultan Ahmad, and the overthrow of the Kajar dynasty. On 13 December the Constituent Assembly elected Riza Khan Pahlevi Shah of Persia and made the crown of Darius hereditary in his family. On 15 Dec. the new Shah took the oath to defend the constitution, and on 16 December he was publicly proclaimed. On 16 September, 1941, Riza Shah abdicated and left the country. He died in Johannesburg on 26 July, 1944. He was succeeded by his son, **Muhammed Riza Pahlevi** (born 26 October, 1919), who was sworn before the Majlis on 18 September, 1941. On 15 March, 1939, the Shah married Princess Fawzieh, eldest sister of King Farouk of Egypt; they were divorced on 19 Nov., 1948. They have a daughter, born in 1940. On 12 Feb., 1951, the Shah married Miss Surava Isfandiari Bakhtiari.

Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shah, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahid*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious [illegible] In Jan., 1906, the Shah gave his consent to the establishment [illegible] Assembly, or 'Majlis,' which drew up a constitution, which received the Shah's approval on 30 Dec., 1906. The Constitution also provided for the establishment of a Senate, but this body was only constituted in Feb., 1950. In the meanwhile a Constituent Assembly was summoned by the Shah in April, 1949. As a result of its findings the Shah obtained the right to dissolve the two Houses of Parliament and the new Majlis and Senate were charged with amending certain provisions in the Constitution and in particular an article which debars the Shah from delaying legislation passed by parliament.

The government of the country is in the hands of the Cabinet, which is responsible to the Majlis.

The Cabinet, appointed on 2 May, 1951, was as follows :—

Prime Minister.—Dr. Mossadeq.
Minister of the Interior.—General Zahedi.
Minister of War.—General Naghdi.
Minister for Foreign Affairs.—Nagher Kazemi.
Minister of Education.—Dr. Sanjabi.
Minister of National Economy.—Amir Alai.
Minister of Finance.—Mohammed Ali Varasteh.
Minister of Health.—Dr. Adham.
Minister of Justice.—Ali Hayat.
Minister of Agriculture.—Ibrahim Farmand.
Minister of Labour.—Amir Teymour.

The country is divided into 10 *ustâns*, each under an *ustândâr*. Each *ustân* is subdivided into a number of *shahristâns*, varying in size and governed each by a *farmândâr*. The *shahristân* is in turn subdivided into *bakhshes*, each under a *bakhshdâr*; and the *bakhsh* into *dehistâns*, each under a *dehdâr*. This final subdivision consists of a village or group of villages. The number of *shahristâns* is at present fixed at 76. All the above mentioned officials are appointed, directly or indirectly, by the central Government.

In September, 1945, a 'democratic' party appeared in Persian Azerbaijan, springing apparently from the *Tudeh* party founded in 1941, which quickly came under Russian influence and demanded provincial autonomy for Azerbaijan. A large measure of autonomy was granted to Azerbaijan on 13 June, 1946, but the authority of the central Government was re-established in Dec., 1946. After an unsuccessful attempt on the life of the Shah, the Tudeh Party was dissolved on 5 Feb., 1949.

Towns generally have a municipality, the director of which is nominated by the central Government from 3 persons proposed by the municipal council.

On 29 Jan., 1942, a treaty of alliance was signed in Tehran between Great Britain, the U.S.S.R. and Persia. The British and Soviet Governments undertook to respect the territorial integrity, sovereignty and political independence of Persia.

At the Tehran conference, 27 November to 2 December, 1943, Mr.

Churchill, President Roosevelt and Marshal Stalin issued a 'Declaration of the Three Powers concerning Iran,' dated 1 December, 1943, pledging respect for the integrity and independence of Persia and economic assistance both in the war period and in the period after the war.

Relations with Russia were regulated by the Treaty of Peace of 26 Feb., 1921, and relations with Persia's other neighbours by the Non-aggression Pact of Saadabad of 8 July, 1937, between Turkey, Iraq, Persia and Afghanistan.

Treaties of friendship have been concluded with India, Pakistan, Jordan and Italy.

Area and Population.

Persia, which has an area of about 1,603,000 square km., lies between 25° and 40° north latitude and between 44° and 63° 30′ east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as to approximate, on the average, 20-25 inhabitants to the square mile.

The total population of Persia was estimated by the Ministry of the Interior, in March 1949, at 18,387,502, of whom 9,120,360 were men; but it is probable that the country's total population lies between 14 and 16 million.

The principal cities and districts are:—Tehran and district, with a population, according to official figures of 1949, of 1,010,000; Tabriz, 272,000; Isfahan, 192,000; Meshhed, 191,000; Shiraz, 114,000; Resht, 110,000; Hamadan, 122,000; Kermanshah, 106,000; Ardebil, 86,000; Yezd, 56,000; Kazvin, 80,000; Arak, 64,000; Kerman, 53,000; Kashan, 55,000; Abadan and Khorramshahr, 201,000; Pahlevi, 48,000; Ahwaz, 53,000; Babol, 38,000; Qum, 86,000; Zanjan, 53,000; Rezaieh, 51,000; Bushire, 25,000.

Religion.

The official religion of Persia is the *Ithna-'Asharyya*, which recognizes twelve Imáms or spiritual successors of the Prophet Mahomet. Of the total population, 850,000 are of the Sunnî sect; 10,000 are Parsîs (Gabrs), 40,000 Jews, 50,000 Armenians and 20,000 Nestorians; there are also some other Christians, and 'Bahais,' whose number cannot, however, be estimated.

The Moslems of the sect called Shî'a differ to some extent in religious doctrine (especially in their rejection of the *Sunna* or traditional body of rules, as distinct from the actual text of the Koran), from the Moslems of the former Ottoman Empire, who are called Sunnî. The power of the Persian priesthood has disappeared in recent years, as the result of the increased power of the centralized Government. The highest authority is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the representative of the Imâm.

All mosques and shrines have some endowments (*waqf*), now devoted to charitable and educational institutions and administered by the Ministry of Public Instruction. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants and dependants.

The Gregorian National Armenians form two dioceses, each under a bishop, the one residing at Tabriz and the other at Isfahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urmia. The Anglican bishop in Persia resides at Isfahan, the headquarters of the Church Missionary Society.

Education

In recent years public instruction has made rapid strides; the old system of instruction, which was generally religious, has been entirely changed, and at present adequate education can be obtained in elementary and secondary schools and universities.

In 1938 there were 8,381 schools of all categories, with 457,236 pupils, as compared with 612 schools, with 55,000 pupils, in 1921.

A law providing for the gradual establishment of compulsory, general, primary education was passed in July, 1943.

The influence of the French educational system has been prominent. As in France, education is highly centralized. The curricula for the different types of primary and secondary schools are drawn up by the Ministry of Education.

The great majority of primary and secondary schools are state schools and the whole budget is paid by the Ministry of Education. Grants are made to private schools. Elementary and secondary education in state schools and University education is free.

Higher education is provided by universities, university colleges and technical colleges. The University of Teheran, established on modern European models, is of recent origin and more recent is the University of Tabriz. There are Univ[illegible] Ispahan, Mashad and Shiraz. In 1949 there were 5,919 [illegible]

There were, in 1949, 60 cinemas, with a seating capacity of 32,800.

Justice.

The judicial system of Persia is modelled on that of France. There are justices of the peace in villages and small towns, higher courts in the larger towns, police magistrates in all important places, courts of appeal in Tehran, Tabriz, Shiraz, Kermanshah, Ispahan, Meshed, Kerman and Ahwaz, and a court of cassation, or supreme court, in Tehran. The courts are supervised by the Ministry of Justice. New civil, criminal and commercial codes based on French and Swiss codes have been introduced into the Courts of Justice.

Finance.

Budget estimates for recent years (ending March 20) were as follows (in 1,000 rials) :—

	1946–47	1947–48	1948–49	1949–50	1950–51	1951–52
Revenue .	5,427,000	5,559,068	6,844,338	7,785,691	8,950,000	9,552,846
Expenditure	6,094,000	8,311,931	7,972,947	11,117,398	11,470,000	9,549,595

	1944–45	1945–46	1946–47	1947–48	1948–49
Actual receipts . .	5,226,888	4,977,929	5,797,366	6,716,529	7,384,523
Actual expenditure .	5,951,429	4,932,427	5,931,312	6,773,639	7,606,021

The main items of estimated revenue in the Budget for 1949–50 are (in millions of rials) :—Direct taxation, 1,160; indirect taxation, 587·2: tobacco and opium mon[illegible]oly, 1,810; customs, 1,869; concessions, southern oil-fields, 919; public domains, 189. The main items of estimated expenditure in 1949–50 are (in millions of rials) :—Ministries of War (including Gendar-

merie), 2,478; Education, 960; Interior, 770; Finance (including monopolies), 1,499; allowance to government employees, 1,350; development plan, 910; loans and interest, 480.

At the end of 1949, Persia's foreign debts consisted of (1) Debt to U.S.A. for purchase of camps, equipment and wagons, $2,792,758, repayable in three instalments of $192,769 at 2-yearly intervals to Dec., 1952; one instalment has been paid. (2) Debt to U.S.A. for purchase of Abadan aerodrome, $136,682, repayable in three instalments of $45,561 up to March, 1954; nothing yet repaid. (3) Debt to U.S.A. for purchase of arms and ammunition, $26,000,000, repayable in 10 years. A debt to U.S.A. for the purchase of goods on Lend Lease of $8,541,041 has been repaid as has the sterling 5% 1911 loan originally of £1,250,000. On the same date the Government debt to the National Bank was 5,163 million rials and its total internal debt 5,668 million rials.

Defence.

The Persian Army consists of about 130,000 men, organized in 10 infantry divisions and 4 brigade groups. Two years' military service is [illegible]. The Persian Gendarmerie was in 1949 reduced to about 6,000 [illegible] of internal security being taken over by the Army. A U.S. Military Mission is attached, in an advisory capacity, to the Army, and another to the Gendarmerie.

The Persian Air Force consists of some 250 machines.

The Navy comprises 2 frigates, 3 gunboats and some motor launches in the Persian Gulf, 2 sm [illegible] and the Imperial yacht in the Caspian Sea, a tug and a MFV [illegible]. Great Britain in 1949.

Production and Industry.

Persia's chief products are oil, wool, cotton, skins, casings, gum, opium, fruit, carpets, textiles and leather. Oil shipments in 1948–49 totalled 20,184,947 metric tons.

Reliable statistics of agricultural production are not available. It is estimated, however, that out of the 163·6 million hectares of land area only 10% is crop land including fallow (which may be as much as three-quarters of the cropped area), 17% is forests and ranges, 20% is potentially cultivable waste and 50% is desert and other wastes.

Wheat crop in 1947–48 was estimated at 1,925,000 metric tons (1946–47, 2,083,000 metric tons) and in 1948–49 at 2,000,000 metric tons. Rice crop was estimated at 294,000 metric tons in 1946–47; 223,000 in 1947–48; 280,000 in 1948–49. The barley was estimated at 776,000 tons in 1947–48. Production of fruits and nuts may be as much as 1,700,000 metric tons per annum and production of sugar beet in 1947–48 was about 353,000 tons.

Wool comes principally from Khorrasan, Kermanshah, Mazanderan and Azerbaijan. The most popular carpets are manufactured in the environs of Tabriz, Kerman, Sultanabad, Kashan, Isfahan, Shiraz and Hamadan. Factories making woollen and cotton cloth and yarns are centred mainly is Isfahan. Exports of raw wool and hair in 1946–47 was 2,192 metric tons; in 1947–48, 2,756 metric tons; in 1948–49, 725 metric tons. Up to 1948–49 the bulk of these exports went to U.S.S.R. Glass, small arms, ammunition and chemicals are manufactured in Tehran. Matches are made in Tabriz, Z[illegible], Tehran and Isfahan. Silk textiles are manufactured at Chalous in M[illegible]

Production of the government textile mills was 11·3 million square metres of cotton and 593,000 metres of silk in 1946–47; 15·3 million metres of

cotton and 821,000 metres of silk in 1947–48; 13·9 million metres of cotton and 394,000 metres of silk in 1948–49. There is, however, an extensive production of cotton as well as wool in private industries, chiefly in Isfahan.

Beet-sugar production according to the records of the government factories (which hold a monopoly) was 30,247 metric tons in 1946–47. Production in 1947–48 was about 52,000 metric tons and in 1948–49 was estimated to be 42,000 metric tons.

Tea production by government factories was 268 tons in 1946–47, 324 tons in 1947–48, 258 tons in 1948–49. This is, however, a comparatively small proportion of the Iranian tea production which was estimated at 66,000 metric tons in 1946–47, 7,000 in 1947–48, 7,660 in 1948–49.

Production of ginned cotton in the government cotton gins was 5,282 metric tons in 1946–47, 17,008 metric tons in 1947–48, 7,972 metric tons in 1948–49. Total production has, however, been estimated at 14,000, 17,500 and 22,000 metric tons respectively. Nearly all of this is consumed at home and the total raw cotton exports in the 3 years were 1,057, 1,055 and 2,818 metric tons respectively.

The rice crop was estimated at 308,000 metric tons in 1948–49 (223,000 metric tons in 1947–48), grown largely on the Caspian shores. Exports of rice was 61,136 metric tons in 1946–47, of which more than half went to the U.S.S.R. in 1947–48. With the virtual cession of trade with U.S.S.R. in 1948–49 the total exports fell to 1,458 metric tons.

Tobacco is grown along the shores of the Caspian. Area planted in 1947–48 was 15,200 hectares; crop, 17,806 metric tons. It is all purchased by the government and manufactured in the government tobacco factory at Tehran.

Persia has substantial mineral deposits relatively undeveloped, including coal, iron, copper, lead, manganese, marble, borax, nickel, cobalt, iron oxide, sulphur, sodium sulphate and other sodium salts, and rock salt. In 1939 a concession was granted to a Dutch company, the Algemeen Exploratie Mattschappij, to explore the mineral resources in two areas in the region of Bandar Abbas. Turquoise mines are worked at Nishapour. Coal production in government-controlled mines was about 110,000 metric tons in 1948–49.

The crude oil production of the Anglo-Iranian Oil Company, which holds a concession for a large area in S. Persia, was (in metric tons):—1946, 19,858,471; 1947, 21,737,949; 1948, 26,042,247; 1950, 31,750,000.

In contravention of the agreement between the Persian Government and the Anglo-Iranian Oil Company, which expires in 1993, the Shah, on 2 May, 1951, signed two decrees, passed by parliament, to nationalize the oil industry.

A 7-year economic development programme was approved by the Majlis in July, 1949. It proposes expenditures of 21,000 million rials, one-third of which is to be spent abroad. A report on the plan was submitted to the Government in Aug., 1949, by American and British experts under the auspices of a consortium of American firms bearing the title of Overseas Consultants Incorporated. There is now a permanent body administering the plan, which, until 1 Jan., 1951, employed as advisors a group of specialists from O.C.I. and other experts chiefly American and British.

The Majlis on 7 June, 1949, passed a bill which introduces the 8-hour working day, fixes minimum wages, allows 10 days' holidays with pay, provides for conciliation in disputes, regulates working conditions, guarantees freedom to trade unions, and establishes a system of social security benefits covering sickness, maternity, children's allowances, funerals and marriages. The Bill is limited to industrial workers.

Commerce.

The Government monopoly of foreign trade established in 1931 was abolished in 1941–42.

The principal centres of commerce are Tabriz, Tehran, Hamadan, Meshhed and Isfahan; the principal ports, Bandar Abbas, Khorramshahr, Bushire and Bandar Shahpur on the Persian Gulf, and Astara, Pahlavi (Enzeli), Babol Sar, Bandar-i-Gaz and Bandar Shah on the Caspian.

The quantity and value of the imports and exports (excluding oil exports and duty-free imports) were as follows (pre-devaluation rate, (fixed) 130 rials = £1, (free) 180–200 rials; post-devaluation rate, (fixed) 90 rials = £1, (free) 120 rials) :—

Years	Imports		Exports	
	Weight (metric tons)	Value (1,000 rials)	Weight (metric tons)	Value (1,000 rials)
1943–44	153,810	1,527,234	57,439	703,986
1944–45	126,348	2,956,789	61,447	792,066
1945–46	151,241	3,106,601	117,085	1,698,269
1946–47	245,814	4,114,844	208,303	2,570,130
1947–48	262,403	4,705,536	176,074	2,324,203
1948–49	247,329	4,218,718	131,217	1,802,239

The following table shows, in thousands of rials, the value of the chief imports into and exports from Persia during the year 21 March, 1948, to 20 March, 1949 (exclusive of duty-free imports and oil exports of the Anglo-Iranian Oil Company) :—

Imports		Exports	
Food and drink	856,600	Carpets	558,090
Textiles	1,221,517	Food	52,226
Skins and leather	20,875	Fruit	435,091
Machinery and electrical apparatus	319,463	Plant products	356,445
Metals	402,954	Casings and other animal products	28,969
Vehicles	297,340		
Rubber	140,277		
Paper	107,178		
Drugs	232,720		

In the year ending 20 March, 1949, the distribution of the trade of Persia to and from the principal countries was as follows (excluding duty-free imports and oil exports), in million rials :—

Country	Imports	Exports	Country	Imports	Exports
Australia	110	2	Iraq	25	94
Belgium	179	43	Pakistan	4	37
Czechoslovakia	113	3	Sweden	67	16
France	134	74	Switzerland	122	34
Germany	33	27	U.S.S.R.	22	28
India	375	280	United Kingdom	1,155	392
Italy	288	132	U.S.A.	1,251	274

The total of duty-free imports amounted to 1,261,386,660 rials, of which 1,201,539,280 rials were imports by the Anglo-Iranian Oil Co.

Total trade between Persia and United Kingdom (Board of Trade returns) in £ sterling :—

	1938	1947	1948	1949	1950
Imports to U.K. . .	9,072,688	16,045,517	36,107,893	34,478,628	47,693,687
Exports from U.K. .	5,431,013	15,850,590	24,566,836	30,989,394	30,224,620
Re-exports from U.K. .	96,986	99,487	59,413	58,218	117,161

Communications.

Tonnage entered at Bushire, Lingah, Bandar Abbas, Khorramshahr, Bandar Shahpur and other ports on the Persian Gulf in the year ending 20 March, 1949, was 11,957,000 tons, of which 6,750,000 tons were British 785,000 tons U.S.A., 1,787,000 Norwegian, 433,000 Dutch, 547,000 Italian, 237,000 Swedish, 89,000 Persian and 219,000 French.

Tonnage entered at Caspian ports in 1948–49 was 36,400 tons, of which 36,250 tons were U.S.S.R.

Navigation on the Lake of Urumiah, from Sharafkhaneh to Golmankhaneh is served by some 5 tugs and 9 barges for the transport of goods and passengers. The service runs twice a week. On the River Karun likewise, from Khorramshahr to Ahwaz (Nasseri), an irregular service for cargo only both ways is run by the Iran Transport Co. and the Karun Navigation Co., and some native firms run daily trips by motor boat, for passengers and merchandise. By changing into lighter draught boats at Ahwaz both can be taken up to Shallili near Shushtar.

The Government continues its programme of road construction, and new roads are under construction and existing roads being improved. A tunnel of about 1,850 metres has been pierced through the top of the Khandovan Pass on the Chalus Road, bringing the highest altitude of the road down from 3,006 metres to 2,600 metres and reducing the length of the road by about 10 miles. The Trans-Persian railway line was completed and inaugurated in August, 1938. A branch line of 314 kilometres, joining Shahrud with the northern section, at Garmsar, was carried on towards Meshed in May, 1941. Length of the Trans-Persian is 870 miles: Garmsar to Shahrud, 194 miles; Tabriz to Julfa, 96 miles; Sofian to Sharafkhaneh, 36 miles. Other railway lines connect Qum with Kashan (61 miles), Ahwar with Korramshahr (76 miles), Dar-i-Khazineu with Chasmen-i-Ali (36 miles) and Mirjawa with Zahidan (51 miles). New lines are under construction from Tehran to Tabriz (on which rails have been laid as far as Mianeh (275 miles from Tehran), from Semnan to Meshed (line complete to Shahrud, 300 miles from Tehran), and from Qum to Yezd. The roads Tehran–Qum (147 kilometres) and Tehran–Qazvin were asphalted in 1947.

The telegraph system on 20 March, 1943, was stated to extend 18,214 kilometres (11,385 miles), with about 31,488 kilometres (19,680 miles) of wire. In virtue of several conventions, dating from 1863, between the British and Persian Governments, the Indian Government constructed, and until March, 1931, maintained and worked with its own staffs: the Indo-European Telegraph Department line from Tehran–Qum–Kashan–Isfahan–Shiraz to Bushire, and thence to Fao and also Karachi; this line is 669 miles in length with 2,292 miles of wire and 7 stations; and the Central Persia Telegraphs from Tehran via Kashan–Yezd–Kerman–Bam to the Beluchistan frontier and thence to India with a mileage of 1,467 line and 4,183 wire and 10 stations. The Indo-European Telegraph Co. maintained communication between Tehran and Tabriz and on to Julfa, which connects with the European systems.

The Indo-European Telegraph Company, as well as the Indo-European Telegraph Department, relinquished all their telegraph lines in Persia on 28 Feb., 1931; thenceforward all these lines came under the direct control of the Persian Telegraph Administration.

There are Government wireless stations at Tehran, Tabriz, Meshed, Kermanshah, Kerman, Khorramshahr, Bushire, Jask, Shiraz and Lingah. Tehran is in wireless communication with Europe (Radio Pahlevi).

The telephone system in practically the whole of Persia is run by the Société Générale Anonyme Iranienne des Téléphones. Automatic telephones are installed in Tehran and are being installed in Isfahan. In 1947, a telephone line was opened to Baghdad, and in Sept., 1948, direct communication by wireless-telephone from Tehran was established to London and Bern.

Air services have been established between Europe and Tehran by B.O.A.C., K.L.M., Air France and S.A.S. Iraqi Airways also operates from Cairo to Tehran *via* Baghdad. Internal services are operated by Iranian Airways; it maintains a fortnightly service Tehran–Kabul and Tehran–Karachi–Bombay and also sends aircraft to other Middle Eastern capitals and occasionally to Europe.

Banking and Credit.

The following banks are established in Persia :—(1) The British Bank of Persia and the Middle East (formerly the Imperial Bank of Iran), founded in 1889. The bank conceded its sole right of note issue to the Government in 1930. The bank has branches in the principal towns in Persia, and at Baghdad, Basra, Kuwait, Jedda, Amman, Beirut and elsewhere. It redeposits with the National Bank of Persia, free of interest, all deposits in excess of two and a quarter times the amount of capital employed in Persia by the bank, whose buildings are counted as capital to about £1 million. Its paid-up capital is 300 million rials, with reserves of 2,030 million rials. (2) Bank Melli Iran founded in 1927 as the National Bank of Persia by the Government. Since 1930 the Bank Melli Iran has the sole right to issue notes. It has branches all over Persia. (3) The agricultural section of the Bank Melli Iran was made a separate establishment with its own capital in 1933 and is now called the Agricultural and Industrial Bank of Iran. Branches are being opened at the principal agricultural centres in Persia. The bank gives assistance for the agricultural development of the country. Similarly, the industrial section of the Bank Melli has been separately established as the Industrial and Mining Bank. (4) The Banque Sepah, under the direction of the Ministry of Finance, deals principally in inland exchange and army accounts. (5) The Russian Bank is mainly interested in financing Soviet–Persian trade. (6) On 15 Jan., 1939, the Majlis sanctioned the forming of a Mortgage Bank. (7) The first private commercial bank, Bank Bazergani Iran, opened on 25 Feb., 1950; authorized capital 100 million rials.

On 9 May, 1939, a National Savings Bank was inaugurated.

By the currency law passed by the Majlis in November, 1942, the fiduciary issue is limited to 1,400 million rials, and all notes issued in excess of a total of 3,500 million rials must be covered as to 60% by gold, or by foreign exchange convertible into gold, and as to 40% by sterling or United States dollars, valued at the official rate of exchange.

The liabilities and assets of the Bank Melli on 20 March, 1950, were as follows (in rials):—Liabilities: notes in circulation, 6,286,191,370; in banking department, 1,513,808,630; total liabilities, 7,800,000,000. The assets were: gold, 4,031,938,920; gold subscription to the International Monetary Fund, 282,187,499; subscription to International Bank,

23,622,480; foreign exchange, 1,718,049,520; crown jewels, up to 344,201,581; Government liability secured by excess value of crown jewels, 1,400,000,000; deposits in banking department, 1,000,000,000; total assets, 7,800,000,000.

Money, Weights and Measures.

The Persian unit of currency is the rial subdivided into 100 dinars. Notes in circulation are of denominations of 5, 10, 20, 50, 100, 500 and 1,000 rial notes. The coins in circulation are bronze-aluminium 50, 10 and 5 dinars pieces, and silver alloy 1, 2, 5 and 10 rial pieces. There are also gold pahlavi and ½ pahlavi pieces containing 7·322382 and 3·661191 grams of gold respectively which do not constitute part of monetary circulation, but have a market value as any other commodity.

Government control of foreign exchange was first introduced on 1 March, 1936.

Before the devaluation of sterling on 18 Sept., 1949, the official buying rate of sterling was 128 rials and the official selling rate, 130 rials; the official buying rate for United States dollar was 32 rials, and that of selling, 32·50 rials. After devaluation, it is 89·40 rials buying and 91 rials selling for sterling, whilst the rates for United States dollars have remained unchanged.

By a law passed on 8 January, 1933, the official weights and measures of Persia correspond to those of the metric system. For the old Persian weights and measures, *see* THE STATESMAN'S YEAR-BOOK, 1933, p. 1191.

Diplomatic Representatives.

1. OF PERSIA IN GREAT BRITAIN (26 Princes Gate, S.W.7).

Ambassador.—Ali Soheili (accredited 20 Oct., 1950).

Minister-Counsellor.—Hadjeb Davallou.

First Secretaries.—Tahmouress Adamiyat; Ahmed Zahir.

Attachés.—Mohammad Reza Amir Teymour; Manoutchehr Zelli; A. A. Tavakoli; Homayoun Ardalan.

Press Counsellor.—A. H. Hamzavi.

Air Attaché.—Brig.-Gen. Mahmoud Khosrovani.

Economic and Commercial Attaché.—Hedayatollah Mossadeghi.

Financial Counsellors (Honorary).—Nezameddin Emami; Khosrow Eghbal.

Commercial Attaché (Honorary).—Nubar Sarkis Gulbenkian.

2. OF GREAT BRITAIN IN PERSIA.

Ambassador.—Sir Francis Michie Shepherd, K.B.E., C.M.G. (appointed 1 March, 1950).

Counsellors.—G. H. Middleton, C.M.G.; L. F. L. Pyman (*Oriental*); J. Walker, O.B.E. (*Commercial*).

First Secretaries.—A. H. Hughes (*Consular*); E. J. F. Scott (*Information*); W. E. Thomas (*Labour*).

Military Attaché.—Col. H. G. M. Dunn.

Air Attaché.—Wing-Cdr. W. I. C. Inness.

There are consular representatives at Ahwaz (C.-G.), Bushire (V.-C.), Isfahan (C.), Kermanshah (C.), Khorramshahr (C.), Meshed (C.-G.), Resht (C.), Shiraz (C.), Tabriz (C.-G.), Tehran (C.).

Books of Reference.

STATISTICAL INFORMATION.—The principal statistical [illegible] government are:—(1) Department of Census, Civil Registration, and [illegible] of the Interior); *Director-General.*—Dr. Afkhan Hekmat. Publications on demographical statistics, in

Persian. (2) Statistical Department of the Seven-year-plan Administration; *Director.*—Dr. Khosran Shabahang. Publications on industry, labour, agriculture, in English and Persian. (3) Statistical and Economic Research Department of the Bank Melli Iran; *Director.*—Gazim Kheradjou. Publishes 'Monthly Bulletin,' in English and Persian. (4) Customs Department (Ministry of Finance), publishes monthly and annual reports, in French and Persian. (5) Ministry of Labour, publishes a statistical year-book.

(REPÚBLICA PERUANA).

Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish viceroyalties in South America, issued its declaration of independence on 28 July, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule.

The following table gives a list of presidents from 1899 to 1948:—

Eduardo Lopez de Romaña, 8 Sept., 1899–8 Sept., 1903.
Manuel Candamo, 8 Sept., 1903–7 May, 1904.[1]
Serapio Calderón (Acting), 7 May, 1904–24 Sept., 1904.
José Pardo y Barreda, 24 Sept., 1904–24 Sept., 1908.
Augusto Bernardino Leguia, 24 Sept., 1908–24 Sept., 1912.
Dr. Guillermo Enrique Billinghurst, 24 Sept., 1912–4 Feb., 1914.[2]
General Oscar Raimundo Benavides (Acting), 4 Feb., 1914–24 Sept., 1915.
José Pardo y Barreda, 18 Aug., 1915–4 July, 1919.[3]

[1] Died. [2] Deposed. [3] Resigned. [4] Assassinated.

According to the constitution of 9 April, 1933, the legislative power is vested in a Senate and a Chamber of Deputies. The Senate now has 49 members and the Chamber of Deputies 153 members elected together for 6 years. Voters are males, at least 21 years old, who are able to read and write; in 1945 the number of registered voters was 779,197. Voting is compulsory for all literate males between 21 and 60 years of age; women nominally have the municipal franchise but do not vote. Members of 'political parties of an international character' are disqualified from holding public office.

The executive power is entrusted to a president, elected for 5 years and not eligible for a consecutive term. He receives 30,000 soles a year, plus 12,000 soles for official expenses. The constitution gives him an economic advisory council, but such a body had never been established; the Klein Mission (of U.S. experts) strongly urged in June, 1950, that it be created and given substantial planning duties. On 1 April, 1936, the constitution was amended to provide for first and second vice-presidents to be elected simultaneously with the President. Further amendments passed in Nov., 1945, tend to increase the power of Congress, at the expense of the executive.

President.—General Manuel A. Odría, leader of a successful military coup on 27 Oct., 1948; assumed office, 2 Nov., 1948; was elected (unopposed) on 2 July, 1950, and again assumed office on 28 July.

First Vice-President.—Hector Boza. *Second Vice-President.*—Federico R. Bolognesi.

Congress on 1 Sept., 1950, passed a law giving full validity to the 594 decrees issued by the Military Junta from 1 Nov., 1948, to 27 July, 1950.

The President exercises his executive functions through a cabinet of 12 ministers, holding office at his pleasure. Each minister receives 24,000 soles a year.

The 23 departments are divided into 134 provinces; in addition the constitutional province of Callao has some of the functions of a department; these are subdivided into 1,259 districts. Each department is administered by a prefect, and each province by a sub-prefect. Municipal councillors are nominally elected by direct vote, and foreigners are eligible, but for some years municipal bodies have been selected without recourse to the popular vote.

National flag: red, white, red (vertical).

National anthem: Somos Libres, seámos lo siempre (words by J. de la Torre Ugarte; tune by J. B. Alcedo, 1821).

Area and Population.

According to the Geographical Society of Lima, the area of Peru is 1,331,410 square km. (514,060 square miles); this computation has been accepted as official (1949). The figure previously used—1,249,049 square km. (482,259 square miles)—is an estimate made in 1930 and attempts to allow for the cession of 43,870 square miles to Colombia (Salomon–Lozano Treaty, 1927), and of 7,670 square miles to Chile in 1928, but could not include the boundary adjustments with Ecuador in Feb., 1942.

A census of population and of housing was taken in Sept., 1950.

An official census taken on 9 June, 1940, gave the population as 6,207,967 of whom, 3,283,360 were white or mestizo, 29,054 Negroes, 2,847,196 Indian, 41,945 Asiatics and 6,412 miscellaneous. There were 3,067,868 men and

3,140,099 women. Revision of the 1940 census figures makes the total 7,023,111, including 350,000 Indians in forests and islands. The language is Spanish, but the Indian population has its own language, either Quechua or Aymara.

To promote the assimilation of the Indian population, estimated at 3,000,000, the Government in 1930 declared 24 June of each year to be a national holiday, 'day of the indigene,' to be celebrated with appropriate ceremonies. By a decree issued in 1927, the Indians were freed from the peonage system which existed in some regions.

The census population (1940) of Lima City was 562,885 (estimate, 1948, 767,054). The estimated population (1948) of Arequipa was 93,389; of Callao City, 84,232; Cusco, 53,242; Trujillo, 45,899; Iquitos, 40,408; Chiclayo, 38,517; Huancayo, 33,790; Ica, 25,273; Piura, 23,678; Cerro de Pasco, 22,688 and Ayacucho, 21,531.

The areas of 23 departments (and total area of the various islands) are given below with the population, according to the official census (revised) of 1940 and the official estimate for 31 Dec., 1948. The department of Pasco, created in Nov., 1944 from the department of Junín, is shown with its present area and 1948 population. The chief towns are shown in brackets :—

Departments	Area : square km. 1940	Population		Pop. per square km. 1948
		1940 (census) (revised)	1948 (estimated)	
Departments :				
Amazonas (Chachapoyas)	36,122	89,560	100,527	2·7
Ancash (Huaráz)	38,085	465,135	521,661	13·6

Tacna (Tacna)	12,747	37,512	42,874	3·0
Tumbes (Tumbes)	4,120	26,473	30,035	7·2
Lake Titicaca	4,440	—	—	—
Various islands	32	—	—	—
Grand total	1,249,049	7,023,111	8,132,793	6·5

[1] Present area and 1948 population shown but the population for 1940 is that of the larger area (22,814 square miles) from which Pasco was carved in 1944.

The long standing dispute with Chile over the provinces of Tacna and Arica (*see* THE STATESMAN'S YEAR-BOOK, 1928, p. 1198) reached an amicable settlement on 3 June, 1929, at Lima, Tacna going to Peru and Arica to Chile. For an account of the settlement of other boundary disputes,

see the STATESMAN'S YEAR-BOOK for 1948, p. 1173. A map of the boundary with Ecuador is to be found in the STATESMAN'S YEAR-BOOK, 1942.

Religion.

Religious liberty exists, but the Roman Catholic religion is protected by the state, and in 1929 a decree was issued permitting only Roman Catholic religious instruction in schools, state or private. There are 4 Roman Catholic archbishops (the archbishropric of Lima, dating from 1545, takes precedence), 11 bishops, 4 vicars-general, 2 apostolic prefects, 1,189 priests, 777 members of religious orders, 601 monks and 1,906 nuns. There are 1,606 churches, 2,365 chapels, 58 convents and 167 religious houses. The Junta of Government in Oct., 1930, decreed that all marriages must be civil, regardless of religion and preceded by medical examination; there are liberal divorce regulations, including divorce for 'absence without just cause for 2 years,' by mutual consent and for 'incompatibility of temperaments.' Divorcees may re-marry immediately.

Education and Justice.

Elementary education is compulsory for both sexes between the ages of 7 and 16, and is free; beginning in 1946, secondary education is also free. But schools, despite substantial increases, are still too few. In 1940, with 1,523,135 children between the ages of 7 and 16, the percentage attending school was 40·9%. In 1948, of the 1,795,750 children of school age, again only 40·9% were attending school. The system is highly centralized; all teaching appointments are made by the Ministry of Education for the public schools; for the private schools he supervises plant and equipment but does not appoint teachers. In 1948 there were 9,338 public elementary schools, and 901 state-aided private schools, with 20,239 teachers and 908,695 pupils between the ages of 6 and 16 years. There were 103 secondary state schools, with 2,816 teachers, offering 5-year courses to 37,256 students between ages of 12 and 17. Religious orders, etc., conduct 103 secondary schools, with 1,597 teachers and 20,215 students. Training in technical schools (some 99) is also free. Budget appropriations for education in 1948, included 77,236,375 soles for primary education, 28,082,203 for secondary and 11,019,317 soles for technical training. Thirty-one rural schools for the Indians give primary school education and instruction in agriculture and livestock. There are also 27 normal schools for teachers. Higher education is provided at the central university in Lima, called 'Universidad Nacional de San Marcos,' founded by Charles V in 1551. Students in 1947 numbered 8,102; teachers, 1,189. There are 3 other state universities at Arequipa (founded in 1827), with (1947) 882 students and 123 teachers, Cuzco (1916) with 757 students, Trujillo, 1,226 students and 166 teachers, while the Catholic University (Lima) had (1947) 1,144 students. The state maintains the National College for Engineering (1,050 students) and the National College of Agriculture (477 students).

Motion-picture theatres numbered 253 in 1949, with seating capacity of 235,000. In 1949, there were 41 daily newspapers with an aggregate circulation of 320,000.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 5 fiscals, and in 19 superior courts composed of 134 judges and 33 fiscals throughout the republic. There are 220 courts of first instance, 107 fiscals and 26 minor courts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the superior courts and of the minor courts are chosen by the Government

from lists of names presented by the supreme and superior courts, respectively.

Finance.

The revenue and expenditure for 5 years were as follows in soles (1 sole = 15·38 cents, U.S.; 1 million soles = $153,846, U.S.):—

	1947	1948	1949	1950 [1]	1951 [1]
Revenue .	929,784,241	1,021,106,206	1,175,197,405	1,644,500,000	1,938,683,950
Expenditure .	934,839,765	1,051,088,248	1,139,995,308	1,641,500,000	1,938,683,950

[1] Budget estimates.

The 1950 budget included special receipts and expenditures of 2845. million soles; the 1949 (actual) included special receipts and expenditures of 186 million.

In the 1951 budget proposed expenditures include (in millions of soles): Defence, 440·1; finance, 376·7; interior (including police), 295·2; education, 292·9; public works, 247·6; public health, 134·1.

In the 1950 ordinary budget (1,360 million soles) indirect taxes were expected to furnish 40·5%; direct taxes, 16·8%; monopolies and state undertakings, 12·7%.

The total debt of Peru (31 Dec., 1948) amounted to 1,678,242,897 soles, of which the internal debt amounted to 550,886,238 soles, the floating debt to 613,164,548 soles, the foreign sterling debt to 86,866,058 soles and the foreign dollar debt to 427,326,051 soles. The external debt on that date amounted to $119,641,867 (U.S.) and £4,997,492. In May, 1931, Peru suspended interest and sinking-fund payments on external debt until economic conditions improve; some loans have received partial service since then. According to the Bank of England, residents of the United Kingdom in 1948 held investments in Peru with a nominal value of £22 million (1938, £25 million), from which the income received was £300,000 (1938, £400,000). American direct investments, 1940, totalled $81,597,000, compared with $123,742,000 in 1929; American holdings of Peruvian dollar bonds, 1941, were $54,000,000, all in default.

Defence.

Army.

Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours. The term of service is 2 years in the active army, 5 years in the first reserve, 5 years in the second reserve and 20 years in the National Guard.

The country is divided into 7 military districts, each furnishing a complete division. The division is made up of 2 regiments of infantry of 2 battalions each, with 1 machine-gun company; 1 topographical section, 1 medical section, 1 commissariat section, 1 or 2 regiments of cavalry (2 squadrons), 1 regiment of mountain artillery.

The Army in 1938 consisted of 9 regiments of infantry, 5 regiments of artillery, 5 regiments of cavalry, 4 battalions of sappers, 1 anti-aircraft battalion and 1 signalling battalion; the authorized establishment, 1940, was over 2,000 officers and over 30,000 other ranks. Rifle instruction is given in Peruvian schools and universities. There is a military academy and war college at Chorillos, near Lima.

The infantry is armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of the same type and model, artillery with the

Schneider-Canet gun and machine-gun battalion with Danish light machine guns, 'Maatsan.'

Police and gendarmerie amount to about 10,000, including civil guards and mounted police. The civil guard has been reorganized into 11 cavalry regiments, 1 infantry regiment of 4 battalions, 1 independent battalion and 1 machine-gun battalion.

Aviation is controlled by a Director-General of Aviation, under the Ministry of Aviation.

NAVY.

The Peruvian Navy consists of the following units:—2 obsolete light cruisers, *Almirante Grau* and *Coronel Bolognesi*, 3,200 tons, 24 knots speed, launched 1906, but re-boilered in 1934–35; 1 old destroyer; 3 frigates; 4 submarines, all overhauled in United States in 1950; 2 minesweepers; 4 landing craft; 6 river gunboats; 2 transports; 1 oiler and 6 motor launches. There is a naval school for cadets at La Punta and a submarine base on San Lorenzo Island, both being close to Callao.

Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 80 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. Of the total arable area of 29,460,000 acres, only 3,600,000 are under active cultivation. In the arid coast region the Government has brought under irrigation 62,400 acres during the last few years.

Peru is a substantial importer of foodstuffs, chiefly wheat, but including also rice, fats and oil, meat and dairy products, which use up over 30% of the available foreign exchange.

About 80% of the population is dependent on agriculture, mainly with the help of irrigation. The chief agricultural productions of Peru are, in the order named:—Cotton, sugar, wool, hides, skins and coffee.

Cotton production (1949) was 65,000 metric tons (about 90% was the famous Tanguis strain) from about 321,100 acres. Exports of ginned cotton in 1947–48, 275,982 bales (478 lb.), compared with 340,353 bales (a high record) in the 1946–47 season. Britain took 57,581 bales. Exports, calendar year 1948, 49,703 metric tons.

The sugar industry is carried on chiefly by irrigation in the river valleys of the coast region and by sinking wells (1 lb. of sugar is estimated to require 500 gallons of water). Peru is a low-cost producer. About 50 large estates covering 75,000 acres raise 95% of the crop; production (1949), 493,074 metric tons plus about 25,000 tons of coarse sugar; exports in 1948 were 351,526 tons, one-third going to Chile. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in central Peru, where the Peruvian Corporation has done much useful colonizing work on about 2,750,000 acres. Output is about 5,000 metric tons. Exports are small and chiefly to United States. Cocoa cultivation is extending, especially in the Perené region. Wheat-growing on the plateaux of the Andes is encouraged. Wheat production (1948) was 127,729 metric tons from 355,000 acres (a record). Imports in recent years have been about 130,000 tons. Rice production, 1950, was 95,454 metric tons (62,000 tons milled).

The gathering of wild rubber, once the most important industry in the Amazon region of Peru, is again being stimulated; output, 1950, 1,449 metric tons. Exports of balata (7 tons in 1948), quinine, quinoa, kapok and rotenone from this region are being pushed. Tobacco (in northern Peru; 1,363 metric tons, 1950), wines and spirits, olives, ramie and maize are also

produced. Silk culture is being tried in the coast region. Coca (made a government monopoly in 1949) is grown for the Indian population, which chews the leaf, but cocaine is manufactured in Lima, Otuzco and several other towns, principally for export; exports are about 1,000 kilos. In addition there are dyes, cinchona and other medicinal plants. Output of cattle hides, 1948, 309,433; sheepskins, 1,400,000; goatskins, 840,000. Export of hides and skins, 1949, 1,098 metric tons. Output of sheep wool in 1948 was 7,791 tons; of alpaca and llama wool and vicuna hair, 2,393 tons; total exports of wool and hair, 1948, 2,493 metric tons. Peru (1950) had 2,639,000 cattle, 517,000 horses, 149,800 mules, 432,000 burros, 3,350,000 llamas, alpacas, etc., and 17,748,000 sheep. Fishing industry, 1948, employed 5,850 fishermen (1949 catch, 45,300 metric tons); 23 canneries employed about 2,000.

The guano deposits on Huanillos, Punta Lobos and other islands, amounting to 40,000 or 50,000 tons, once granted to the Peruvian Corporation, have now reverted to the Government. The 1949 production (from these and other sources) was 194,000 metric tons, about one-third of the country's requirements; exports have been forbidden since 1941. There was increased production of 'cube' or 'barbasco,' a root used by the Indians, which is said to be valuable as an insecticide; export in 1948 was 1,814 metric tons.

Copper and petroleum are the chief minerals exploited. Crude petroleum output in 1949, from 3,600 wells, was 13,853,000 barrels; of natural gasoline and liquified gases, 1,100,000 barrels; total output was valued at nearly $41 million (U.S.). Mine production of copper, 1949, was 28,373 metric tons; lead, 57,000 tons; zinc, 68,000 tons. Output, 1949, of antimony, 750 tons; tungsten, 236 metric tons; cadmium, 800 kilos; white arsenic, 500 metric tons; bismuth, 213,137 tons; gold, 137,963 fine oz.; silver, 10,627,717 fine oz. Peru is one of the world's largest sources of vanadium; exports, 1949, 250 tons. Salt output, 1949, 60,000 metric tons. Iron deposits (unworked) are large; the government-owned field at Marcona has about 500,000,000 tons. Excellent coal deposits, with an ash content of from 5 to 7%, lie near by. Output, 1949, 142,000 metric tons. An iron-and-steel plant is under construction.

The following table shows the mineral production for 2 years (value in soles, of which about 6·50 soles = $1 (U.S.)):—

	1947		1948	
	Quantity	Value	Quantity	Value
		Soles		Soles
Copper . . . metric tons	22,492	67,375,518	18,069	57,864,998
Petroleum, crude . . barrels	12,763,809	154,314,451	14,068,880	242,336,458
Silver . . . . kilos.	335,386	50,338,085	288,911	44,896,374
Gold . . . troy oz.	116,017	26,269,938	111,174	25,289,582
Lead . . . metric tons	54,814	110,769,919	47,971	120,577,021
Zinc . . . „ „	58,181	54,865,408	58,842	67,805,146

Total mineral production (including combustibles), which is largely controlled by foreign interests, in 1947, was valued at 550,024,344 soles. Mine concessions, 1947, numbered 8,315, with 43,909 mine workers. Two smelters, both American-owned, and a Canadian-owned petroleum refinery are the largest industrial plants in Peru. There are 2 aeroplane contruction plants at Lima, using imported engines; several firms make motor bodies.

Peru's potential hydro-electric capacity is estimated at 6,400,000 horsepower, but the capacity of existing hydro-electric plants is only 275,000

horse-power (205,012 kw.): in addition there were in 1945, 336 thermal plants with a capacity of 74,325 kw.

The most important industry is cotton textiles—8 spinning mills furnishing yarn to 11 weaving mills—which together employ some 6,000 workers. Seven woollen mills—one now making worsteds—and 6 rayon plants employ 5,600, while 55 small hosiery and knitting mills have 2,000 workers.

The government has a monopoly in the import and/or local manufacture and sale of guano, tobacco, salt, matches, alcohol, explosives and playing cards.

Trade Unions.—Trade unions have about 350,000 members, mainly textile workers (specializing in sick and other benefits), maritime workers, copper miners (finally organized in 1945), railway workers and oil workers. The labour movement has been highly political, part controlled by the Communists and part by the native 'Aprista Party' or 'Partido del Pueblo' which urged labour to combine with native industrialists and peasants against foreign capital and the country's 'colonial' position. The 'Apristas' were active in the Workers' Confederation.

Commerce.

The value of the trade of Peru has been as follows (in soles; 1 sole = 15·38 cents, U.S.; 1 million soles = $153,846, U.S.):—

	1945	1946	1947 [1]	1948	1949
Imports. .	549,882,943	802,305,862	1,092,321,899	1,090,619,923	2,692,800,000
Exports. .	674,530,261	983,583,386	1,002,943,010	1,055,832,787	2,107,518,000

[1] First unfavourable trade balance in Peruvian history.

Peru's foreign trade, converted into (millions of) dollars, is officially stated to have been:—1949, imports 167·1 and exports 150·7; 1948, imports 167·7 and exports 156·8; 1947, imports 167·9 and exports 147·0.

Imports in 1948, 507,847 metric tons; 1947, 575,600 metric tons (543,948 in 1946); exports in 1948, 1,726,086 tons; 1947, 1,582,748 tons.

The values of the principal imports and exports for 2 years are shown in the following table (in thousands of soles; 1 sole = 15·38 cents, U.S.):—

Imports	1948	1949	Exports	1948	1949
Machinery and vehicles . .	299,998	956,226	Cotton . . .	277,906	628,428
Foodstuffs, drinks and tobacco .	275,945	351,162	Sugar . . .	223,858	346,378
Metals and mfrs. .	112,165	412,632	Minerals, coal, etc. .	290,674	551,443
Textiles . .	104,138	242,877	Petroleum and derivatives . .	156,569	305,289
Chemicals and drugs	99,487	262,115	Wool . .	12,588	50,363
Oils, seeds and wax.	41,408	47,674	Fish (fresh, canned)	18,389	50,026
Paper, cardboard .	28,815	78,952	Hides and skins .	5,165	12,027
[illegible]	20,874	57,525			
[illegible]	19,802	56,185			

The distribution of the trade (in 1,000 soles) was mainly as follows:—

Imports from	1948	1949	Exports to	1948	1949
Argentina . .	192,178	127,704	Belgium . .	43,308	130,223
Canada . .	20,726	105,914	Bolivia . .	39,470	70,129
Chile. . .	34,544	42,950	Chile . .	200,103	363,824
Switzerland .	23,445	61,341	Colombia . .	62,209	75,582
United Kingdom	75,201	249,827	United Kingdom.	170,567	318,022
United States	590,677	1,696,034	United States .	260,004	607,665

In 1949 the United Kingdom took 15·0% of exports, the United States 28·8% and Chile 17 4%. Peru drew 63 0% of her imports from the United States, 4 7% from Argentina and 9 2% from the United Kingdom.

Peru's trade balance with her largest customer, the United States, is distorted by the flow of American investments (swelling imports) while of Peru's exports to the United States, much of the proceeds is retained abroad.

Total trade between Peru and United Kingdom in £ sterling for 6 years (Board of Trade returns) :—

	1938	1946	1947	1948	1949	1950
Imports to U.K. .	3,420,594	4,825,422	4,140,958	7,690,901	8,476,985	13,553,509
Exports from U.K. .	1,033,139	2,175,518	2,296,009	1,898,444	4,321,329	10,521,053
Re-exports from U.K.	31,877	15,277	11,199	4,545	29,012	85,867

Shipping and Navigation.

In 1948 6,279 vessels of 8,311,329 tons entered, and 6,278 of 8,254,554 tons cleared the ports of the republic, chief of which is Callao. Since Dec., 1928, the coasting trade has been largely reserved for Peruvian-owned vessels with Peruvian crews; coasting trade, 1948, handled 1,420,376 tons, valued at 316,196,444 soles. The merchant marine, 1949, consisted of 9 vessels (52,100 tons) in international trade, 15 (of 19,944 tons) in coastal trade and 18 units (3,628 tons) in inland waters.

Communications.

There were in 1948 about 21,680 miles of roads suitable for motor traffic. Toll roads were freed in May, 1936. The Central Highway over the Andes from Lima to Oroya was completed in 1935; the Callao–Huanuco–Pucallpa Highway, completed in 1943, opens up the rich eastern portion of Peru and makes possible a land and water journey (*via* the Ucayali and Amazon rivers) from the Pacific Ocean to the Atlantic Ocean. In 1944 the Lima–Pucallpa Highway, 522 miles in length, was completed, joining Lima with Iquitos.

In 1950 there were 23,036 motor cars, 16,744 motor lorries, 2,235 buses in Peru, a total of 42,015 vehicles, of which 28,000 were in Lima and Callao districts. Interprovincial bus companies numbering 29 operated 264 buses in 1948.

In 1948 the total working length of the Peruvian railways was 1,898 miles, including 511 miles retained by the state. These are standard gauge (4 ft. 8½ in.), with the exception of 5 small lines. A 50-mile railway and 10-mile aerial tramway, completed in 1948, carry ore from the Yaurcoche copper-mine to the smelter at Oroya. A railway linking the new port of Matarani with the south (78 km.) was opened in Jan., 1951. Number of passengers (including those carried on the electric railways) in 1948, 103,707,049; goods, 3,331,185 metric tons; gross revenue, 65,277,332 soles.

Since 1 May, 1942, the administration of the posts, telegraphs and wireless services has been in the hands of the Government. In 1948 there were 1,622 post offices, 248 telegraph and 317 telephone stations and 45 radiotelegraph offices. Length of telegraph lines is 12,880 miles (1947). The telephone system (1950) had 44,400 instruments, of which 31,460 were in Lima; radio-telephone circuits connect Lima with distant towns. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the republics to the north. There is a short-wave and

long-wave national broadcasting station of modern type in Peru, and a number of private broadcasting stations.

In 1949, 171,879 passengers used the commercial aviation routes, covering 9,720,358 kilometres with 227,316 kilos of mail and 8,197,564 kilos of cargo. Air-mail and passenger service between Lima and the capitals of every South American republic has been established. B.O.A.C. maintain a fast service Lima–New York.

Money and Credit.

In Nov., 1946, the Central Bank notified the International Monetary Fund that the 'official' value of the sole was 15·3846 cents (U.S.) or 0·136719 gramme of fine gold; thus $1·00 (U.S.) equalled 6·5 soles, £1 equalled 26·16 soles and 1 troy oz. of fine gold was worth 227·5 soles, *i.e.*, $35; this had been the effective rate since Oct., 1940. But on 14 Nov., 1949, this official parity of the gold sol was suspended and the Central Bank instructed to revalue annually its gold and foreign exchange at the lowest quotation for Exchange Certificates during the preceding period. The free rate, legal even before 14 Nov. for certain transactions such as the sale of mined gold to the Central Bank, was 6·99 soles to the $ in 1946, 12·54 in 1947, 14·05 in 1948, 18 21 in 1949 and 15·47 in 1950.

Peru's currency unit, the Peruvian gold *sol* (by law of 18 April, 1931), was equal to one-tenth of the old Peruvian *libra* or pound; the gold sol was not then minted but contained, theoretically, 42·1264 centigrams of fine gold. Eventually, in 1950, gold 10-sole and 50-sole pieces were minted for the account of gold producers, out of the gold they had been required to deliver to the Bank; the coins were then exported and sold, the proceeds being handed to the gold producer less minting and selling costs. Peru abandoned the gold standard on 18 May, 1932, but refrained from attempting to control foreign exchange until an acute shortage of dollars compelled her to attempt it, beginning in 1945.

The buying rate for £1 sterling on 31 Dec., 1950, was 42·5 soles; selling rate, 44·5 soles.

Silver is legal tender up to 10% of the amount, but silver coins—the sol, and half-sol, 5/10ths fine—disappeared beginning in 1935 and were replaced by coins, including the sol and half-sol (copper–zinc), the 20, 10 and 5 centavos (copper–zinc and copper–nickel) and 2 and 1 centavo (copper). Peru has a paper currency issued by the Banco Central of Lp. 10, Lp. 5, Lp. 1 and 5 soles denomination which still circulate; the new notes are in denominations of 100, 50, 10 and 5 soles.

The Government bank of issue, known as the Banco Central de Reserve del Perú, was established 9 March, 1922, and in Sept., 1931, was re- [illegible] the advice of the Kemmerer Financial Mission, as the Central [illegible] with a 30-year charter and authorized capital of 30,000,000 soles (reduced to 10,000,000 soles in May, 1932). It is bound to hold not less than 50% of cover in gold, first-class bankers' acceptances and silver (not more than one-fifth) for deposits, notes in circulation and net foreign items in process of collection. The bulk of the gold stock is under-valued; some 525,289 oz. are carried on the books at a valuation equivalent to $11·35 a fine oz. instead of $35. Gold stock rose steadily from $20,000,000 (U.S.) in 1941 to $32,000,000 in Sept., 1944, declining to $20,000,000 in May, 1947, at which level it remained until Nov., 1949, when revaluation of part of the gold stock raised the total to $28 million. Of this gold stock, $12,045,111 worth was withdrawn from New York to Lima in Jan., 1951; it amounted to nearly 11 metric tons. The bank had on 31 Dec., 1950, $24·6 million

in foreign exchange (including gold). The bank's transactions in 1950 [illegible] 14·3 million in sterling and $161·4 million in dollars. Note circulation on 30 Nov., 1950, was 892 million soles. A mining bank, to promote mining under native ownership, began operations in Feb., 1941; capital and reserves, Jan., 1948, were 19,119,474 soles.

Banks, domestic and foreign, are supervised by the Superintendent of Banks. There are, 1948, 6 important domestic banks and 3 foreign—1 British, 1 Canadian and 1 American—with capital and reserves of 155,079,141 soles and deposits (Jan.) of 1,431,462,963 soles.

Weights and Measures.

The metric system of weights and measures was established by law in 1869, and since 1916 has come into general use. Spanish measures are still in use.

Diplomatic Representatives.

1. Of Peru in Great Britain (37, Porchester Terrace, W.2).

Ambassador.—Ricardo Rivera Schreiber, K.B.E. (accredited 20 July, 1949.

First Secretary.—Aníbal Ponce.

Commercial Attaché.—Benjamin de la Torre.

There are consular representatives at Belfast, Birmingham, Bradford, Cardiff, Glasgow, Hull, Liverpool, London, Newcastle, Sheffield and Southampton.

2. Of Great Britain in Peru.

Ambassador.—Sir Oswald Scott, K.C.M.G. (accredited March, 1951).

First Secretaries.—R. H. K. Marett, O.B.E.; G. F. Hiller, D.S.C. (*Commercial*); R. A. F. Wallis (*Information*); W. E. Oakley Evans (*Labour*).

Naval Attaché.—Capt. J. Lee-Barber, D.S.O., R.N.

Air Attaché.—Group Capt. E. S. Finch.

There are consuls at Iquitos and Arequipa, and vice-consuls at Callao, Lima, Mollendo, Paita and Talara.

REPUBLIC OF THE PHILIPPINES.

(REPÚBLICA DE FILIPINAS—REPUBLIKA NG FILIPINAS.)

THE Philippines form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude. They were ceded by Spain to the United States of America on 10 Dec., 1898 for $20 million; an additional payment of $100,000 was agreed upon on 7 Nov., 1900 for certain outlying islands not included in the first treaty of cession.

President.—Elpidio Quirino; succeeded as Vice-President to the Presidency 17 April, 1948, following the death of President Manuel Roxas; was re-elected on 8 Nov., 1949, with a four-fifth majority over José P. Laurel, former President during the Japanese regime.

Vice-President.—Fernando Lopez.

Government.—The Republic of the Philippines came into existence on 4 July, 1946, by agreement with the United States Government embodied in an Act of Congress signed by President Roosevelt on 24 March, 1934, accepted by the Philippine Legislature on 1 May, 1934, and overwhelmingly ratified by the Philippine electorate (both men and women) at a plebiscite on 14 May, 1935. This Act established a 10-year transitional period, designated as that of the 'Philippine Commonwealth,' at the end of which complete independence was automatically effective. For details of the 'Commonwealth' period, *see* THE STATESMAN'S YEAR-BOOK, 1946, pp. 674 *et seq.*

However, despite independence, close relations with the United States remain. In March, 1947, an agreement was signed under which the United States leased for 99 years 5 major bases and 18 auxiliary establishments for the Army, Navy and Air Force; Filipinos may enlist voluntarily in the U.S. forces.

The Philippine Trade Act, signed by President Truman on 30 April, 1946, assures complete free trade between the two countries for 8 years ending 3 July, 1954; thereafter, to the end of 1954, Filipino exports to the United States pay a duty equal to 5% of the existing American duties, and the duty continues to increase by 5% annually until the full duty is payable after 3 July, 1974. However, the American system of import quotas (*i.e.*, limiting imports) is maintained for Filipino sugar, tobacco and rice. The republic agrees to admit 1,000 Americans annually for residence, and the United States, on 2 July, 1946, agreed to grant admission to 100 Filipinos annually for residence and eventual citizenship.

The republic is governed by a constitution adopted on 14 May, 1935, and amended in 1940 and 1948. The President and Vice-President are elected for 4 years; the former may be re-elected for another term. The President is assisted by 11 departmental secretaries in charge of:—Foreign Affairs; Interior; Finance; Justice; National Defence; Health; Education; Public Works and Communications; Labour; Commerce and Industry; Agriculture and Natural Resources. In addition, the Executive Secretary, the Commissioner of the Budget and the Social Welfare Commissioner (all three ranking as secretaries of department) also attend the Cabinet. The

bicameral Legislature consists of a Senate of 24 members and a House of Representatives of 100 members. Suffrage is enjoyed by male and female citizens 21 years of age or older who can read or write Spanish, English or a native dialect and who meet certain residential qualifications. But rural illiteracy is high, [illegible] the most depressed (and restless) sections of the population. [illegible] 1946 elections numbered 2,471,926; at the republic's first general elections, on 11 Nov., 1947, the electorate numbered 4,333,955. Registered voters at the Presidential election, 1949, numbered 5,156,342.

The constitution vests in the republic all ownership of the country's natural resources, which, apart from public agricultural land, may not be alienated. Exploitation of natural resources was originally limited by the constitution to citizens of the Philippines or of the United States and to corporations or associations 60% of whose capital is owned by Filipinos or Americans. However, under American pressure, an agreement was signed on 4 July, 1946, throwing open to American interests or companies the exploitation of any resources and public utility business open to Filipinos. The agreement expires in 1974. It was ratified at a plebiscite on 11 March, 1948. Concessions and leases are limited to 25 years, renewable for another 25 years. Maximum area of agricultural land which any corporation may acquire or lease is 2,500 acres.

National flag: blue and red (horizontal), with a white canton charged with a gold sun (with 8 rays) and 3 gold stars.

Area and Population.—The group is composed of 7,097 islands and islets, of which only 462 have areas of 1 square mile or over. Total area, 115,600 square miles (about that of Italy); land area, 114,830 square miles. The 11 most important islands with their areas are:—Luzon, 40,420 square miles; Mindanao, 36,537; Samar, 5,050; Negros, 4,905; Palawan, 4,550; Panay, 4,446; Mindoro, 3,759; Leyte, 2,785; Cebu, 1,707; Bohol, 1,492, and Masbate, 1,262 square miles.

In July, 1948, the Philippine government took over from the British North Borneo Company the Turtle Islands, a small group off the northern tip of Borneo about 400 miles away.

The total population, according to the census of October, 1948, was 19,234,182, or 164 persons per square mile of land area.

The population of Manila, the capital, in Oct., 1948, was 1,024,557. A new capital to be known as Quezon City, is being built on 38,000 acres just north-east of Manila.

Other cities, with their population in Oct. 1948 (census), are:—Iloilo on Panay, 110,122; Cebu on Cebu, 167,503; Zamboanga on Mindanao, 103,317, and Davao on Mindanao, 111,263. Baguio, in the Mountain Province, had a population of 29,262.

On 7 June, 1940, the President of the Philippines approved a law, effective 4 July, 1946, making a new language based on Tagalog (a Malayan dialect) the official national language of the republic. About 4,260,000 people speak English and about 417,000 Spanish; for Government and commercial purposes these two languages are commonly used. About 87 native languages and dialects are spoken in the Philippines, of which 8 are of leading importance.

Justice.—The judiciary is headed by the supreme court, with a chief justice and 10 associate justices (all Filipinos) appointed by the President; it cannot declare a law or treaty unconstitutional except by a two-thirds vote. There is a court of appeal, headed by a presiding justice, with 14

associates justices. A court of industrial relations has a presiding judge and 3 members. There are 16 judicial districts, each with several judges of first instance, judges of first instance at large, cadastral judges and justices of the peace courts.

Defence.—On 14 March, 1947, the Philippine and U.S. governments signed a 99-year military-base arrangement. The United States was granted the use of a series of army, navy and air bases, with the right to use a number of others if required by military necessity. On 21 March a second agreement provided for a United States Military Advisory Group in the islands, as well as military assistance (training, weapons, and so forth) for the Philippine forces.

The navy includes 5 landing ships, 4 surveying vessels, 3 patrol boats and 8 coastguard cutters, all ex-U.S.A.

Public order is maintained partly through the Philippine Constabulary, under the direction of the Secretary of the Interior, and partly through the local police forces. Filipino anti-Japanese guerillas, organized under Communist leadership as *Hukbalahap* (*Hukbo ng Bayan Laban sa Hapon*, People's Army against Japan), have returned underground in central Luzon despite an [illegible] med by President Quirino in 1948. Allied with them is the [illegible] Peasants' Union) which maintains effective control over part of the country; the 'capital' of the PKM is at Candaba in Pampanga province, 50 miles north-east of Manila.

Religion.—The dominant religion of the islands is Roman Catholic, having 12,603,000 followers, or about 80% of the population; the archipelago is divided into 2 archbishoprics, 11 bishoprics and 3 apostolic prefectures. The Dominican Order (owner of very large estates) maintains the University of Santo Tomas, established in 1611 and made a pontifical university in 1645. In 1902 the Filipino Independent Church was founded by Isabelo de los Reyes, Sr.; Mgr. Gregorio Aglipay, a former Catholic priest, was chosen as its head. He was succeeded by Mgr. Santiago Fonacier and Mgr. Isabelo de los Reyes, Jr., whose position, however, is being contested by Mgr. Juan Jamias, the last survivor of the original founders. It adheres to modern science, which it holds to be superior to Biblical tradition, *e.g.* denying the possibility of miracles. The ritual resembles somewhat that of the Roman Church. Marriage is allowed to its apostles. According to the government census of 1939, the independent Filipino Church had 1,573,608 followers, or about 10% of the then population. Several Protestant denominations had extensive organizations and 378,361 communicants. Buddhists numbered 47,852; the Moslems, numbering 677,903, are chiefly to be found in the districts of Mindanao and Sulu. Shintoists numbered 13,681; Pagans, 626,008, and others, 67,157.

Education.—Education in the public schools is free and co-educational. In all schools, English is the medium of instruction and continues to be the main official language. In 1939, out of the 10,903,879 persons 10 years old and over, only 5,316,116 or 48·8% were literate. In 1948–49 there were 3,850,217 pupils in the 18,810 public schools, and 72,736 Filipino teachers; expenditure on public-school education was $59,239,354. Many schools were destroyed during the Japanese occupation and in the Battle of the Philippines. Special schools included the Philippine normal school and 7 regional normal schools, as well as trade schools, agricultural schools and some 182 farm settlement schools. For higher education there is the state-supported University of the Philippines with (1941) 714 professors and 7,567 students, and 89 accredited private institutions of higher learning

-among them the University of Santo Tomas. There were (1949) 1,684 rivate schools accredited by the government with 361,879 pupils. Since ıe expulsion of the Japanese the University of the Philippines (students ın)47–48, 5,417) and a few other institutions have re-opened.

In 1946 there were 260 newspapers with a circulation of 1,584,140. otion-picture theatres in 1949, numbered 275, with seating capacity of)0,000.

Social Welfare.—The government programme includes the purchase ıd subdivision of big landed estates for resale on easy instalment plans to nants, the opening of virgin lands and settlement of landless families, the anting of bank loans to such families for seeds and the building of homes, [illegible] of rural roads and rural schools, the setting up of travelling , and the distribution of relief goods, including food, clothing ıd medicine, to families who have been displaced due to the depredations lawless elements.

Finance.—The revenues and expenditures of the central government r 5 fiscal years (June 30) were (1 Philippine peso = 50 cents U.S. rrency):—

	1939–40	1946–47	1947–48	1948–49	1949–50 [1]
	Pesos	Peso	Pesos	Pesos	Pesos
venues .	158,029,870	433,771,323	263,200,000	270,000,000	301,000,000
penditures	183,616,273	384,512,588	367,423,470	349,000,000	302,700,000

[1] Budget estimate.

The gap between revenue and expenditure in 1947–48 was covered by rrowing and savings from authorized expenditures. Expenditure in- ıded:—National defence, 52,800,000 pesos; education, 74,800,000 pesos; ,ernal security, 33,200,000 pesos; public works, 54,600,000 pesos; public bt, 11,900,000 pesos. License, business and occupation taxes furnished ,500,000 pesos; internal excise taxes on imports, 62,800,000 pesos;)ome taxes, 40,700,000 pesos; customs, 24,500,000 pesos.

Bonded debt on 30 June, 1946, was 132,507,000 pesos, including Metro- litan Water District, provinces, cities and municipalities; against it were set sinking fund contributions aggregating 63,152,938 pesos, leaving a t indebtedness of 69,354,062 pesos.

The Japanese left the Commonwealth's public finances in complete dis- ler. Total war damage, both public and private, was estimated (1946) at)0,000,000 (U.S.), including private property, $464,000,000, public)perty, $195,000,000, Catholic Church, $125,000,000 and other churches, 4,000,000. The United States Congress appropriated in April, 1946, the n of $520,000,000 for the rehabilitation of the Philippines; $400,000,000 s earmarked to restore private property and $120,000,000 for public)perty. The fund is administered by a commission of two Americans l one Filipino.

Investments by foreigners, 1938, were about $425,000,000 of which 60% 58,000,000) were American. The latter had $39,000,000 in the sugar lustry, $36,600,000 in government bonds, $13,900,000 in coconut lustry, $70,000,000 in mining and $31,800,000 in public utilities. reigners owned about one-fourth of the earning assets of the country.

Production and Industry.—The Philippines has a total area of 489,940 acres, of which 32,613,260 acres are commercial forests; 10,479,830 es non-commercial forests; 1,499,430 acres fresh-water marsh and

mangrove, and 28,757,420 acres open and cultivated lands. About 98·4% of the total cultivated area is owned by Filipinos; about 51% of the farms are less than 5 acres. The principal products are unhusked rice (' palay '), Manila hemp (' abacá '), copra, sugar cane, maize (525,000 metric tons in 1948), tobacco and maguey. In 1948–49 output of rough rice was 5,212·3 million lb. Output, 1948, of Manila hemp, 73,332 metric tons; copra, 1,042,330 metric tons.

Before the war 46 sugar centrals exported usually about 900,000 metric tons of centrifugal sugar and 53,000 tons of refined. In 1948–49 the mills produced 414,795 short tons of raw sugar. Tobacco output, 1948–49, was 18,170,000 kilos. The principal fruit is the banana; there are also mangoes, papaya, lanzones, pilinut (*Canarium commune*), chico, mandarins and oranges. The cultivation of rubber was mainly in the southern provinces where the large plantations were located, covering about 8,380 acres; exports of crude rubber (1940) were 1,200,296 kilos.

In the production of copra and coconut oil the islands are classed among the foremost countries in the world. The United States take all copra, copra cake, coconut oil and desiccated coconut.

On 31 Dec., 1945, there were 1,317,130 carabaos (water buffaloes); 559,970 cattle; 170,010 horses; 1,983,720 hogs; 196,640 goats, and 19,350 sheep.

The forests (covering 60% of the area and with an estimated stand of 465 milliard board feet) furnish cabinet and construction timber, gums and resins, vegetable oils, rattan and bamboo, tan and dye barks and dye woods. About 92·5% of this belongs to the Government. In 1947, 207 saw-mills with a daily capacity of 1,300,000 board feet were operating.

Gold is produced chiefly from districts in northern and southern Luzon, Mindanao and Masbate; it is mostly a low-grade bullion sold to small Chinese refiners; output from 43 mines in 1940 was 1,096,745 fine oz.; in 1948, 209,225 oz. Silver output, 1948, 150,760 fine oz. Chromite mines in Zambales and Pangasinan provinces have also suffered; output in 1948, 206,853 metric tons. Copper output in 1948 was 3,350 metric tons. Iron ore production in 1940 was 1,221,126 long tons; in 1948, 18,289 tons. Manganese ore (58,038 tons shipped in 1940; 25,565 long tons in 1948), coal, asbestos, rock asphalt, guano and silica deposits have been found; seepages of petroleum have been reported from Tayabas, Marinduque, Cebu, Leyte, Abra and Mindanao; drilling for oil was resumed in 1947. Cement, 1948, 703,938 barrels.

Manufacturing is largely carried on in homes (chiefly embroidery, bunta hats, woven cloths, mats and pottery) but the number of factories is increasing; before the invasion it included 46 sugar centrals, 4 sugar refineries, textile mills, distilleries, 8 coconut oil mills, 6 desiccated cocoa factories, 92 large cigar and cigarette factories, and 2,391 rice mills. In 1947, only one [illegible] mill, with 30,000 spindles, was operating.

In 1949, a number of industrial enterprises were started, including the manufacture of glass, veneer, aluminium utensils and cosmetics.

A United States Mission which went to the Philippines in July, 1950, at the invitation of the Philippine Government, expressed itself very critically of the unsatisfactory economic situation and noted the deterioration that had taken place during the two preceding years. The report recommended U.S. financial assistance of $250 million through loans and grants, to help in carrying out a 5-year programme of economic development. A U.S. technical mission would assist the Philippine Government in its agricultural and industrial development, land reform, fiscal administration, and the health, education and labour programmes.

Commerce.—The values of imports and exports (excluding gold and silver ore, bullion and coin) for recent calendar years are stated as follows in millions of pesos (1 peso = 50 cents, U.S. currency):—

	1941	1946	1947	1948	1949	1950
Imports	223	895	1,197	1,172	1,137	679
Exports	192	161	529	636	508	663

The United States imported from the Philippines goods valued at $227,925,000 in 1948 and $204,738,000 in 1949; it exported and re-exported to the Philippines for $467,776,000 in 1948 and $439,220,000 in 1949.

Since the end of the war coconut and abacá products have accounted for 93% of all exports. Exports of copra in 1948 amounted to 625,630 long tons (968,432 tons in 1947); coconut-oil exports in 1948 totaled 41,985 long tons (23,251 tons in 1947).

Owing to the commercializing of agriculture for export, foodstuffs have to be imported, representing normally from 15 to 20% of all imports, chiefly rice from French Indo-China, wheat products and dairy products from the United States.

Drastic import and exchange controls were introduced in Dec., 1949. The allowable imports in 1950 of certain products, expressed in percentages of imports in 1948, are:—Passenger cars, 20; soap, 10; fabrics, 25 (except nylon, silk and khahi, the quota for which is 5); cigarettes, 20; electric refrigerators, 50; chewing gum, 50%.

Total trade between the Philippines and the United Kingdom (Board of Trade returns, in £ sterling) for 6 years:—

	1938	1946	1947	1948	1949	1950
Imports to U.K.	992,523	622,260	2,810,860	979,898	1,151,656	1,549,742
Exports from U.K.	747,003	349,041	1,441,111	2,697,296	1,359,981	1,873,270
Re-exports from U.K.	11,899	438	8,213	9,248	7,322	3,122

Shipping and Communications.—The overseas [illegible] 1946 was carried by 218 vessels, of which 134 were American, 28 [illegible], 18 Norwegian, 12 Dutch, 9 Danish and 7 Filipino. The coastwise trade is carried exclusively by domestic vessels.

On 30 June, 1946, there were in operation, 1,031 post offices (and 890 municipalities with free delivery services), 849 miles of telegraph lines and 3,262 miles of cable, with 35 telegraph offices. There were 6,917 telephones in 1948 and 419 radio and telegraph stations.

In 1946 highways extended 14,933 miles and railways 563 miles of which 490 miles were on Luzon and 73 miles on Cebu and Panay; locomotives numbered 81. In July, 1949, there were 34,591 motor cars and 51,404 trucks registered.

Manila is an important and expanding centre of commercial air travel in the Far East. In Sept., 1948, there were 113 large passenger and freight transport planes in operation.

Banking and Coinage.—The Philippine National Bank, which, in 1948, had 10 branches, 48 agencies and 1,009 sub-agencies, was given a special charter in 1916. Between 1 July, 1916 and 1 Jan., 1949, the bank was the sole Government depository, and the only bank of issue.

Under a law passed 15 June, 1948, the Philippine Central Bank was

created to have sole control of the credit and monetary supply, independent of the Treasury. It has a capital of 10 million pesos furnished solely by the government. It began to operate on 2 Jan., 1949.

The post office savings bank in 1946 had 15,737 depositors with deposits of 4,104,223 pesos.

The republic is on the [illegible]ndard, with the peso equivalent to 50 cents, U.S. The [illegible] rate (resumed November, 26, 1946) is (1950) 5·63 to £1. Total money supply, 30 Nov., 1950, was 1,298 million pesos, of which 636 million was currency. The peso contains 20 grammes of silver, ·800 fine. The coins used are:—Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), all in silver of ·750 fine; 5 centavo, in cupro-nickel, and 1 centavo, in bronze. Treasury certificates and bank-notes are issued in 1, 2, 5, 10, 20, 50, 100 and 500 peso denominations. The Philippine coins are normally coined at the mint in Manila.

Diplomatic Representatives.

1. Of the Philippines in Great Britain (38 Hans Place, S.W.1).

Minister.—Ambassador José E. Romero (accredited 9 Nov., 1949).

First Secretary.—Mariano Ezpeleta.

Second Secretary.—Romeo S. Busuego.

2. Of Great Britain in the Philippines.

Minister.—Frank Stannard Gibbs, C.M.G., O.B.E.

First Secretaries.—R. A. Clinton-Thomas; R. Milburn, O.B.E. (*Commercial*).

Civil Air Attaché.—Group Capt. R. J. Bone, C.B., C.B.E., D.S.O.

There are consular representatives at Manila, Cebu, Davao and Iloilo.

POLAND.

(RZECZPOSPOLITA POLSKA.)

POLAND became a state by the union of a number of Slavonic tribes settled in the basins of the Vistula, the Warta and the Oder. The nation was converted to Christianity in 966. Under the Piast dynasty (10th–14th centuries) German 'eastward expansion' (Drang nach Osten) deprived Poland of her north-western and western borderlands. After the defeat of the Teutonic Order at Tannenberg (1410) and the partial recovery of Prussia, Poland's political interests turned eastward. Temporary successes in White Russia and the Ukraine were bought by a permanent weakness on her western front. Poland reached the height of her power in the period between the 14th and 16th centuries under the rule of the Jagiellon dynasty. On its extinction the crown became elective and this, leading to an overgrowth of special rights granted to the nobility and gentry, resulted in the permanent weakness of the central authority. During the 17th and 18th centuries the position of Poland rapidly declined, and eventually, by the three partition of 1772, 1793 and 1795, the Polish Commonwealth, as it was then called, was divided between Prussia, Russia and Austria.

In 1807, Napoleon formed a small part of the old commonwealth into an independent state under the title of the Duchy of Warsaw, but in 1815, at the Congress of Vienna, Poland was re-partitioned between Prussia, Austria and Russia, except the small district of Cracow, which was constituted an independent republic, but in 1846 was annexed by Austria.

During the war of 1914–18 Russian Poland was occupied by the Austro-German forces. On 5 Nov., 1916, the German and Austrian emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the state had been defined when the Central Powers collapsed in Nov., 1918.

On 9 Nov., 1918, the independence of Poland was proclaimed and a workers' and peasants' council was formed in Lublin, which issued a programme of radical social and constitutional reforms. But on 10 Nov., Joseph Pilsudski, a politician of anti-Russian proclivities, who during the war set up and commanded military units in support of the Central Powers, returned to Poland, assumed supreme power and convoked the constituent assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On 28 June, 1919, the Treaty of Versailles recognized the independence of Poland.

In 1926, as a result of a *coup d'état*, political power passed into the hands of a party headed by Pilsudski. His policy soon became a one-party system, and these tendencies were officially recognized by the constitution of 1935, which extended the President's prerogatives and strengthened his authority. The Government of the state based on semi-fascist principles lasted unchanged until the outbreak of the Second World War.

On 1 Sept., 1939, Germany invaded Poland, on 17 Sept., 1939, Russian troops entered eastern Poland, and on 29 Sept., 1939, the Germans and the Russians signed a treaty establishing the line of demarcation between the two occupations. After the German attack on Russia, launched on 22 June, 1941, the Germans got possession of the whole of Poland, but by March, 1945, the Russian armies, together with the Polish forces formed in the U.S.S.R., had liberated the entire country. Poles at home and abroad continued the fight against the Germans throughout the war, by land, sea and in the air. War casualties and victims of German terror amount to 6–7 millions of people. The country and especially Warsaw were systematically ruined.

Presidents since the establishment of the republic were :—

Marshal Joseph Pilsudski (Chief of State), 14 November, 1918—11 December, 1922.
Gabriel Narutowicz, 11 December—16 December, 1922 (assassinated).
Stanislaw Wojciechowski, 20 December, 1922—15 May, 1926.
Ignacy Moscicki, 1 June, 1926—30 September, 1939.

Government and Constitution.

In July, 1944, the Soviet Union recognized the Polish Committee of National Liberation (*Polski Komitet Wyzwolenia Narodowego*) established in Lublin as an executive organ of the National Council of the Homeland (*Krajowa Rada Narodowa*). This council had been constituted in Warsaw at the end of 1943 as the Provisional Polish Parliament. The Committee was transformed into the Provisional Government in Dec., 1944, and on 28 June, 1945, supplemented by Polish democratic leaders, who had been living abroad as political exiles since 1939, it was re-established as the Polish Provisional Government of National Unity.

On 5 Feb., 1947, the Diet by 408 votes with 36 abstentions elected Bolesław Bierut President of the Republic for 7 years.

The following Cabinet was in office in May, 1951 :—

Prime Minister.—Józef Cyrankiewicz (United Workers' Party).
Deputy Prime Ministers. Hilary Minc (U.W.P.); Aleksander Zawadzki (U.W.P.); Hilary Chełchowski.
Minister of National Defence.—Marshal Konstanty Rokossowski (a former general of the Red Army, appointed 7 Nov., 1949).
Minister of Foreign Affairs.—Dr. Stanisław Skrzeszewski.
Minister for Local Government Affairs.—Kazimierz Mijal (U.W.P.).
Minister of Public Security.—Gen. Stanisław Radkiewicz (U.W.P.).
Minister of Finance.—Konstanty Dąbrowski (U.W.P.).
Minister of Justice.—Henryk Świątkowski.
Minister of Education.—Władisław Jarosinski.
Minister of Foreign Trade.—Tadeusz Gede (U.W.P.).
Minister of Internal Trade.—Tadeusz Dietrich (U.W.P.).
Minister of Heavy Industry.—Julian Tokarski.
Minister of Light Industry.—Eugeniusz Sławinski (U.W.P.).
Minister of Mining and Power.—Ryszrad Nieszporek (U.W.P.).
Minister of Food and Agricultural Industry.—Mieczysław Hoffmann.
Minister of Agriculture and Land Reform.—Jan Dąb-Kocioł (Peasants' Party).
Minister of Labour and Social Welfare.—Kazimierz Rusinek (U.W.P.).
Minister of Culture and Arts.—Stefan Dybowski (Peasants' Party).
Minister of Shipping.—Adam Popiel.
Minister of Forestry.—Bolesław Podedworny (U.W.P.).
Minister of Railways.—Jan Rabanowski (Democratic Party).
Minister of Posts and Telegraphs.—Wacław Szymanowski (Peasants' Party).
Minister of the Chemical Industry.—Bolesław Rumiński.
Minister of Road and Air Transport.—Jan Rusteckı.
Minister of Institutions of Learning and Science.—Adam Rapacki.
Minister of Health.—Jerzy Sztachelski.
Minister of Building.—Roman Piotrowski (U.W.P.).
Minister without Portfolio.—Wincenty Baranowski (Peasants' Party).

On 19 Jan., 1947, the first general elections were held, the result of which was as follows:—Democratic bloc, 392; Polish Peasants' Party

(Opposition), 27; Christian Labour Party, 15; Peasant Party 'New Liberation,' 7; Catholic Independents, 3.

On 15 Dec., 1948, the Socialist and Communist parties merged into the United Workers' Party, of which President Bierut is the secretary-general. In Dec., 1949, the Peasants' Party and the Polish Peasants' Party merged into the United Peasants' Party.

On 18 Feb., 1947, the Diet, by 330 votes to 17, adopted an interim Constitution, entitled 'the little charter.' The 32 articles divide the power between the Legislative Sejm, the Executive and the President of the Republic. The President is elected by the Sejm for 7 years by an absolute majority of votes. His prerogatives are mainly identical with those laid down in the 1921 constitution. The Council of State consists of the President of the Republic, the president and three vice-presidents of the Diet, the chairmen of the Supreme Auditing Board and of the Central Council of Trade Unions and 3 other members. In time of war the Commander-in-Chief also would be a member. By article 4 the Diet is to be summoned twice yearly—in October for at least 60 days and in the spring for not less than a month. The Diet may empower the Government to enact decrees in the intervals between Parliamentary sessions, but not for the introduction of new taxes or conscription.

National flag: white, red (horizontal).

National anthem: Jeszcze Polska nie zginęła (words by J. Wybicki, 1797: tune by M. Ogiński, 1796).

Area and Population.

The republic comprises an area of 311,730 square kilometres, or 121,131 square miles, and a population (census, 3 Dec., 1950) of 24,976,926 (11,912,514 men and 13,064,012 women). The present territory is about one-fifth smaller than in 1939. (*See* map in THE STATESMAN'S YEAR-BOOK, 1946.)

The republic is for administrative purposes divided into 19 voivodships:—Warsaw City (141 sq. km.), Warsaw (28,299 sq. km.), Łódź City (212 sq. km.), Łódź (20,234 sq. km.), Kielce (18,053 sq. km.), Lublin (27,742 sq. km.), Białystok (22,552 sq. km.), Olsztyn (= Allenstein; 19,319 sq. km.), Gdańsk (= Danzig; 10,7[illegible] sq. km.), [illegible] (= Stettin; 30,252 sq. km.), Poznań (39,244 sq. km.), Wrocław (= Breslau; 24,740 sq. km.), Katowice (15,369 sq. km.), Kraków (15,918 sq. km.), Rzeszów (18,201 sq. km.); Koszalin, Zielona Góra, Opole. The 3 last-named were formed in June, 1950; statistical details concerning their area and population are not yet available.

Estimated population (1 Jan., 1950) of principal towns:—

Warsaw (Warszawa)	600,767	Bydgoszcz	156,108
Łódź	592,559	Chorzów	130,901
Cracow (Kraków)	347,048	Zabrze (Hindenburg)	128,005
Poznań	291,577	Częstochowa	115,084
Wrocław (Breslau)	279,373	Gliwice (Gleiwitz)	113,517
[illegible]	169,675	Bytom (Beuthen)	112,336
[illegible]	159,122	Gdynia	111,147
Katowice	156,001	Lublin	101,888

Vital statistics of marriages, births and deaths are incomplete; the rate of registered live births was 28·8 and that of registered deaths 11·5 per 1,000 population in 1949.

Religion.

The great majority of the population is Roman Catholic. The census of 1946 did not take religion into consideration. On 14 April, 1950, the Roman Catholic bishops concluded an agreement with the government, by which the Church accepted the Communist régime in return for guarantees concerning the papal authority and religious education.

Education.

Education up to the age of 18 is free and compulsory. The figures for 1949–50 (provisional) were as follows :—3,242,062 pupils in 22,195 7-year elementary schools; 198,322 pupils in 345 11-year basic schools; 136,685 pupils in 481 secondary schools.

There were (1949–50) 26 universities and other institutions of university rank, with 1,497 professors and 96,762 students. The University of Warsaw had 9,793 students; the University of Łódź, 8,658 students; the University of Poznań, 8,809 students, the University of Cracow, 11,301 students, and the University of Wrocław, 8,385 students.

Instruction in the Russian language is compulsory in all schools from the 5th class upward and in the universities.

The number of cinemas, 1949, was 571, with a seating capacity of 236,281.

Justice and Crime.

The legal system was reorganized by a number of laws passed by the Sejm in July, 1950. The Minister of Justice described the main objectives of the reform as follows : closer connexion of Courts of Law and Prosecutors' offices with the popular masses and other organs of the people's government, in particular with the public security organs and the Special Commission; accelerated administration of justice; an appropriate standard of uniformity in legal pronouncem · · · · · · f the people's element in legal pronouncements; · · · prosecutor's authority and concentration on preliminary legal proceedings; better safeguarding of individuals' rights in investigation and court proceedings; higher efficiency of simplified procedure courts for special offences; and an extension of the existing apparatus of juvenile courts.

There are 14 courts of appeal and a supreme national court. The office of the Prosecutor General is separated from the judiciary and placed under the State Council. The Special Commission deals with economic crimes.

The total strength of the Polish security police is kept secret, but the numbers of reserve police, drawn mainly from workers and peasants who assist the regular police force, were given at 105,000 at the end of 1947.

Social Welfare.

In 1948, there were in Poland 61 regional institutions of social insurance (the Institute of Social Insurance and its 4 branches, 49 social insurance centres and their 5 branches), 943 health centres, and (in 1949) 545 hospitals with 93,048 beds. The number of workers insured in May, 1950, was 5,459,000. In March, 1950, 1,356,300 families were in receipt of family allowances, averaging 3,736 zlotys per family.

Finance.

Budget for 6 years, in millions of zlotys :—

	1938–39	1946 [2]	1947	1948	1949	1950 [1]
Revenue . .	2,474	57,838	223,872	451,186	603,910	843,300
Expenditure .	2,458	50,053	208,879	406,126	581,059	843,300

[1] Estimates. [2] April–Dec.

In the 1949 budget the main items of expenditure were (in millions of zlotys) :—State enterprises, 2,849; defence, 59,684; education, 52,455; public security, 36,586; capital investment, 251,452. Of the revenue, 242,297 million came from turnover tax, and 74,408 from income tax.

Defence.

Poland is divided into 6 military districts with regional clearing centres subordinated to them :—The coastal district; Poznan; Silesia; Cracow; Warsaw, and Lublin.

In 1950 the army was completely remodelled on Soviet lines. It is divided into a territorial army (2-year service), air force (3 years), navy (3 years), anti-aircraft [illegible] (2 years), and internal security force (27 months); the latter [illegible] into frontier guards and security police. Women serve for 6 months. The military age extends from the 20th to the 50th year. The strength of the armed forces is about 500,000. Officers are required to learn Russian.

Army estimates, 1950, 130,000 million zlotys.

The Polish fleet comprises 2 destroyers, 4 submarines, 2 motor torpedo boats, 13 motor minesweepers and 12 submarine chasers.

Anders (W.), An Army in Exile. London, 1949.
Destiny can Wait : The Polish Air Force in the Second World War. London, 1949.

Production and Industry.

Whereas before the Second World War the republic of Poland was a predominantly agricultural country, only 45·75% of the census population, 1950, made their living by agriculture. An internal transformation of Poland's economic structure has taken place; the key industries have been nationalized or are under state control; in all branches of industry planned economy has been introduced. According to the law of 3 Jan., 1946, all industrial undertakings employing over 50 workers are placed under the control of the Central Industrial Boards. There were 12,214 private industrial enterprises employing approximately 106,000 workers at the end of 1948.

The 3-year plan for economic development (1947–49) has been succeeded by a 6-year plan covering the years 1950–55. In 1955 the value of production of the whole of socialist industry should amount to 43,800 million zlotys in constant prices, an increase of 158% over 1949. The value of output of big and middle industry is to increase to 36,500 million zlotys in constant prices, that is, by 136%, while that of small socialist industry is to increase to 7·300 million zlotys, *i.e.*, by 384%.

During 1948, the cotton industry produced 80,000 tons of cotton yarn and 343,000,000 metres of fabrics. The production of woollen fabrics amounted to 32,500,000 metres of woollen yarn and 42 million metres of fabric.

In 1947, production was as follows :—59,130,335 tons of coal, 3,946,000

tons of coke, 128,000 tons of crude petroleum, 867,121 tons of pig-iron and 1,579,120 tons of raw steel. Output, 1948, of iron ore, 602,000 tons; of pig-iron, 1,133,000 tons; of coal, 70,262,000 tons; of coke, 5,091,000 tons.

The following table shows the area and yield of the principal crops :—

Crops	Area (1,000 hectares)				Yield (1,000 metric tons)			
	1937-38	1947	1948	1949	1937-38	1947	1948	1949
Wheat . .	1,754	1,112	1,384	1,445	2,172	986	1,620	1,781
Rye . .	5,895	4,632	5,088	5,166	7,253	4,306	6,300	6,759
Barley . .	1,178	930	863	841	1,371	1,035	1,010	1,028
Oats . .	2,277	1,562	1,756	1,775	2,657	1,763	2,402	2,333
Potatoes .	3,030	2,303	2,478	2,538	34,558	30,821	26,756	30,901
Sugar beet .	150	210	224	261	3,162	3,493	4,226	—

The 6-year plan envisages for 1955 an increase over the 1949 harvest of 158% for wheat, 102% for rye, 190% for barley, 121% for oats, 129% for potatoes and 163% for sugar beet.

In June, 1947, of the total area of Poland (30,760,000 hectares) arable land occupied 14,363,600 hectares (53·6%); orchards and gardens, 345,800 hectares (1·1%); meadows, 2,410,100 hectares (7·8%); pastures, 1,629,700 hectares (5·3%); waste land, 2,356,400 hectares (9·7%), and forests, 7,083,100 (22·5%). Of the total area, 1,326,399 hectares were parcelled out to smallholders.

The tobacco crop in 1947 amounted to 1,500,000 tons (1938, 1,400,000 tons) from about 11,800 hectares.

Livestock (census, 3 Dec., 1950) :—2,797,424 horses, 7,163,938 cattle, 2,194,207 sheep, 9,928,418 pigs; in 1949 there were 667,300 goats and 78,000,000 poultry. The 6-year plan envisages for 1955 (in million heads) : Horses, 3; cattle, 9·5; sheep, 3·8; pigs, 10·5; poultry, 105·7.

Electric power generated in 1948 amounted to 7,400,000,000 kwh.

Trade Unions.—There were, in 1950, 22 unions with more than 50,000 members each. Total membership of all trade unions (May, 1950) was 4,243,000; the biggest were builders (425,000), textile workers (357,000), railway workers (353,000), co-operatives (339,000), miners (303,000).

Commerce.

Trade statistics (in million dollars, U.S.) :—

	1945	1946	1947	1948	1949
Imports . .	33·9	145·8	472	519	633
Exports . .	38·0	127 2	308	594	679

Imports in 1949 totalled 5,343,600 metric tons; exports, 35,214,600 metric tons; of the latter, coal accounted for 26,808,000 tons.

In 1947, 26·3% of the imports came from U.S.S.R., 13·3% from U.S.A., 10·2% from Denmark, 9·0% from the United Kingdom, 8·9% from Sweden; of the exports, 28·7% went to U.S.S.R., 16·7% to Sweden, 5·9% to Czechoslovakia, 5·8% to Denmark, 5·1% to Switzerland, 5·0% to the United Kingdom.

Total trade between Poland and the United Kingdom for 5 years (according to Board of Trade returns) was (in £ sterling) :—

	1938	1947	1948	1949	1950
Imports into U.K. .	9,533,332	1,458,191	8,986,821	14,839,256	19,164,030
Exports from U.K. .	5,365,842	7,583,376	7,118,142	8,734,325	6,915,498
Re-exports from U.K. .	2,109,838	2,516,457	4,475,625	2,072,160	1,030,860

On 14 Jan., 1949, a 5-year trade agreement was signed in Warsaw between Poland and Britain. Polish exports during the whole 5-year period will total £150 million.

Communications.

In 1948, Poland had 60,216 miles of hard surface roads. In 1946 there were 3,089 miles of inland waterways, including 2,285 miles of navigable rivers and 148 miles of canals.

The length of the normal gauge railway system is (1948) 14,407 miles. The total of narrow-gauge lines for public use was 2,673 miles in 1946. In 1949, the railways carried 446,313,000 passengers and 122,543,900 metric tons of freight.

Number of motor vehicles, June, 1948 :—Passenger cars, 28,200; motor trucks, 40,765; motor cycles, 28,500.

At the end of 1948 there were 4,546 post offices. 7,192 telephone exchanges and 207,026 telephone instruments. The length of telephone lines was 1,516,600 kilometres and of telegraph wire 33,580 kilometres.

Wireless licences, on 31 Dec., 1949, numbered 1,175,609.

The Polish State Air Service, 'Lot,' carried 79,785 passengers, 419 tons of uggage, 598 tons of goods and 137 tons of mail in 1949.

Shipping and Navigation.

The principal ports are Gdańsk (Danzig), Gdynia, Szczecin (Stettin) and Kolobrzeg (Kolberg). Elblag (Elbing) is an inland river harbour and can serve sea-goi[illegible] to a limited extent.

In June, [illegible] mercantile marine numbered 43 vessels with a tonnage of 161,312 gross tons.

Total shipping entered Polish ports in 1949 was 8,014,000 tons. Total turnover of Polish ports in 1949 was 16·9 million metric tons. Of the 4,117 ships clearing Polish ports in the first half of 1950, 968 were Swedish, 895 Danish, 495 Polish, 448 Finnish, 402 Russian, 339 Norwegian, 73 British and 27 American.

Currency and Banking.

The Polish national currency is the *zloty*, subdivided into 100 *groszy*. As from 30 Oct., 1950, the zloty equals the Soviet rouble, being the equivalent of 0·222168 gramme of fine gold (4 zlotys = $1·00, U.S.). The new currency consists of notes of 2, 5, 10, 20, 50, 100 and 500 zlotys; and of coins of 1 grosz, 2, 10, 20 and 50 groszy and 1 zloty. The rate of exchange was 100 old zlotys to one new zloty; but savings accounts and all bank deposits up to 100,000 zlotys were revalued at the rate of 100 old to 3 new zlotys; and wages were also reduced at this special rate of 100 to 3.

Possession of foreign currency is forbidden; illegal trade in foreign currency is subject to death penalty.

The whole banking system was reorganized on 25 Oct., 1948, with effect from 12 Nov., 1948. The National Bank of Poland, established on 15 Jan., 1945, continues to be the central bank, retains exclusive authority

to issue currency, is charged with control of money and credit, and has responsibility for financial implementation of the national economic plan. The national Investment Bank (Bank Inwestycyjny) has the exclusive right to issue bonds, and exercises centralized control over investment financing.

The [illegible] Bank (Bank Rolny) has exclusive responsibility for direct [illegible] rural areas through both short-term and investment loans. It [illegible]ate through a comprehensive network of branch offices and communal co-operative banks. The Municipal Bank finances all municipal [illegible] their enterprises and establishments. The Bank for Commerce and Trade (Bank Rzemiosła i Handlu) serves labour co-operatives, handicraft, private industry and trade, including investments in these fields as decreed by the Investment Bank. The General Savings Bank (Powszechna Kasa Oszczędności) exercises central control over [illegible] activities, transfers, and checking transactions including activities [illegible] co-operative banks. The Bank for Foreign Trade (Bank Handlu Zagranicznego), a joint-stock company, finances imports, exports, port services, and certain other items.

In addition to the National Bank of Poland, other authorized foreign-exchange banks are:—Bank for the [illegible], Bank, the Polish Welfare Bank (B[illegible]k [illegible], mercial Bank of Warsaw (Bank Handlowy w Warszawie SA) and the Bank of Co-operative Economy (Bank Gospodarstwa [illegible]).

Deposits in credit and savings institutions amounte[illegible], illion zlotys in Dec., 1948.

The weights and measures are those of the metric system.

Diplomatic and Consular Representatives.

1. Of Poland in Great Britain (47 Portland Place, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Jerzy Michałowski (accredited 12 Dec., 1946).

Commercial Counsellor.—Jarosław Stroczan.

First Secretary.—Romuald Spasowski.

Military Attaché.—Lt.-Col. Adam Paszt.

Attachés.—Czesław Pobozy; Henryk Jaroszek; Eugeniusz Kulaga.

2. Of Great Britain in Poland.

Ambassador.—Sir Charles H. Bateman, K.C.M.G., M.C. (appointed 21 March, 1950).

First Secretaries.—R. H. Mason: T. O. Rennie (*Commercial*); S. G. Yorston (*Consular*); C. D. Insall; R. B. Kirby (*Labour*).

Commercial Secretary.—R. S. Smith.

Naval Attaché—Capt. R. G. Mills, D.S.O., D.S.C., R.N..

Military Attaché.—Col. J. E. F. Meadmore.

Air Attaché.—Group Capt. C. E. S. Lockett.

There are consular representatives at Danzig (C.G.), Gydnia (V.C.), Katowice (C.), Łódź (V.C.), Poznań (C.) and Warsaw (C.).

PORTUGAL.

(República Portuguesa.)

Portugal has been an independent state since the 12th century; until 1910 it was a monarchy. The last King was Manoel II of the house of Braganza-Coburg, born 15 Nov., 1889, younger son of King Carlos I and Queen Mary Amélie, daughter of Philippe Count of Paris; he died 2 July, 1932. On Oct. 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Teophilo Braga as the provisional president (5 Oct., 1910, to 24 Aug., 1911). Thereafter there were duly elected Presidents, as follows:—

Dr. Manuel de Arriaga, 24 Aug., 1911–29 May, 1915.[1]
Dr. Joaquim Teophilo Braga, 29 May, 1915–5 Oct., 1915.
Dr. Bernardino Luiz Machado Guimaraes, 5 Oct., 1915–11 Dec., 1917.[2]
Dr. Sidónio Bernardino Cardoso da Silva Paes, 11 Dec., 1917–14 Dec., 1918.[3]
Senhor João de Canto e Castro Silva Antunes, 16 Dec., 1918–5 Oct., 1919.
Dr. Antonio José de Almeida, 5 Oct., 1919–5 Oct., 1923.
Senhor Manuel Teixeira Gomes, 5 Oct., 1923–11 Dec., 1925.[1]
Dr. Bernardino Luiz Machado Guimarães, 11 Dec., 1925–1 June, 1926.[1]
Provisional government, 1 June–29 Nov., 1926.
Marshal António Oscar Fragoso Carmona, 29 Nov., 1926–18 April, 1951.

[1] Resigned. [2] Deposed. [3] Assassinated.

The Powers formally recognized the republic on 11 Sept., 1911.

National flag: green, red.

National anthem: A Portuguesa (words by Lopes de Mendonça, 1890; tune by Alfredo Keil).

On 19 March, 1933, the present constitution, which declares that the Portuguese state is a unitary and corporative republic, was adopted by plebiscite. This constitution provides for a president, to be elected for 7 years by direct suffrage by Portuguese citizens, male, of age or emancipated, able to read or write, and those unable to read or write being taxpayers to the state or administrative corporations for direct taxes, and Portuguese citizens, females, of age or emancipated, with a special, secondary school or university diploma; and for a National Assembly (one chamber) of 120 Deputies elected for 4 years by direct suffrage.

In the four elections for the National Assembly (1934, 1938, 1942 and 18 Nov., 1945) the only lists presented were those organized by the National Union, an association legally recognized, but without the character of a party, whose aim is to defend the principles contained in the constitution. The electoral law permits, however, the presentation of more than one list of the deputies to be elected, and at the elections of 13 Nov., 1949, the opposition put up lists in 2 districts. A Privy Council of 10 members assists the president. A Corporative Chamber functions alongside the National Assembly. Capital punishment is abolished, except, in the case of war with a foreign power, in the field of battle.

Acting President of the Republic.—Dr. Antonio de Oliveira Salazar.

The Cabinet, which was formed on 1 Aug., 1950, is as follows :—

Prime Minister—Dr. Antonio de Oliveira Salazar.
Minister of the Presidency.—Dr. João Pinto da Costa Leite.
Minister of Defence.—Col. Fernando dos Santos Costa.
Minister of the Interior.—Dr. Joaquim Trigo de Negreiros.
Minister of Justice.—Dr. Manuel Gonçalves Cavaleiro de Ferreira.
Minister for the Army.—Brig. Adolfo do Amaral Abranches Pinto.
Minister of Finance.—Dr. Artur Águedo de Oliveira.
Minister of Marine.—Com. Américo Deus Rodrigues Tomas.
Minister of Public Works.—Ing. José Frederico do Casal Ribeiro Ulrich.
Minister of Colonies.—Com. Manuel Maria Sarmento Rodrigues.
Minister of National Economy.—Dr. Ulisses Cruz de Aguiar Cortês.
Minister of Education.—Dr. Fernando Andrade Pires de Lima.
Minister of Foreign Affairs.—Dr. Paulo Arsénio Verissimo Cunha.
Minister of Communications.—Col. Manuel Gomes de Araujo.
Minister of Corporations and Social Security.—Dr. José Soares da Fonseca.

In square miles the area of Portugal was :—Continental Portugal, 34,207 ; islands, 1,197; total 35,404.

In 1940 the population consisted of 3,711,748 males and 4,010.404 females, or 108 females to every 100 males.

Estimated population, 30 June, 1950, 8,618,421.

The Azores islands are divided into three widely separated groups, with clear channels between, San Miguel together with Santa Maria being in the most easterly. About 100 miles north-west of them lies the central cluster of Terceira, Graciosa, São Jorge, Pico and Faial. Still another 150 miles to the north-west are Flores and Corvo, the latter being the most isolated and primitive of the islands. São Miguel, Terceira and Pico are the largest, the first measuring 41 miles in length and 9 in breadth, and containing over half the total population of the archipelago. For political and administrative purposes they are divided into three districts, each sending its representatives to the Chamber at Lisbon. The capitals of the three districts are the chief seaports, Ponta Delgada on San Miguel Island, Horta on Fayal Island and Angra do Heroismo on Terceira Island.

Vital statistics for 4 years :—

Year	Births	Still births	Marriages	Deaths	Divorces
1946	205,825	9,101	62,460	120,800	1,181
1947	200,488	8,887	67,486	110,437	1,109
1948	220,981	9,881	64,638	107,576	1,110
1949	212,260	9,008	65,388	117,499	1,032

In 1949 the births included 110,466 boys and 101,794 girls; the deaths, 59,873 males and 57,626 females.

At the census of 12 Dec., 1940, the population of Lisbon was 709,179; Oporto, 262,309; Funchal, 54,033; Coimbra, 35,437; Setúbal, 35,071; Braga, 29,875; Evora, 21,851; Ponta Delgada, 21,048; Faro, 19,695.

The number of emigrants in 1949 was 17,296, of whom 11,974 went to Brazil, 1,505 to North America and 3,817 to other countries.

Religion.

There is freedom of worship in Portugal, both in public and private, with the exception of creeds incompatible with morals and the life and physical integrity of the people; the predominant faith is the Roman Catholic.

On 7 May, 1940, a Concordat and a Missionary Agreement with the Vatican were signed. The Concordat recognizes the lawful existence of the Catholic Church and the exercise of its spiritual mission according to the Canon Law. Religious marriages are civilly recognized, and divorce is forbidden to parties married by the Church. Church property which had come into the possession of the state is restored, except that used for public services or classified as immovable property of public interest, or national monuments.

The Missionary Agreement regulates religious activities in the Portuguese Colonies. Since the 16th century, Portugal has had the privilege of the Roman Catholic jurisdiction in the Orient (Padroado), which had by 1947 been reduced to Portuguese India and part of British India; an agreement, signed 18 July, 1950, adapts the Concordat to the changed political situation in India.

Portuguese territory is divided into 6 ecclesiastical provinces, with their sees respectively at Lisbon, Braga, Evora, Luanda (Angola), Lourenço Marques (Moçambique) and Goa (Portuguese India). The Archbishop of Lisbon (Patriarch since 1716 and Cardinal since 1737) has the following suffragans: Guarda, Leiria and Portalegre on the continent; Angra do Heroismo and Funchal in the adjacent islands, and Cabo Verde in Africa. The Archbishop of Braga (Primate of the Iberian Peninsula) has as suffragans: Aveiro, Bragança, Coimbra, Lamego, Porto, Vila Real and Viseu. The Archbishop of Evora has two suffragans: Beja and Faro. By the Concordat of 1940 the metropolitan sees of Luanda (Angola) and Lourenço Marques (Moçambique) were created. The former has as suffragans, besides the see of S. Tomé, the two new dioceses of Nova Lisboa and Silva Porto; the second has as suffragans the two new dioceses of Beira and Nampula. The Archbishop of Goa and Damão (who also holds the titles of Archbishop of Cranganor, Primate of the East and Patriarch of Eastern India) has jurisdiction over the diocese of Goa. The privilege of the Far East is constituted by the suffragan sees of Macau and Timor (the latter created by the new Concordat), and by the vicariats of Shiu-Hing, Singapore and Malacca.

Education.

The latest census, 1940, show that 47·5% of the population over 7 years could read and write; 49% are still unable to read or write. The remaining 3·5% comprises the 'population with unknown instruction.' Compulsory education has been in force since 1911, and many new measures have been introduced in later years to decrease the number of illiterates. In 1948–49 there were 10,646 primary schools with 598,190 pupils and 14,445 teachers. In private elementary schools 60,158 pupils attended in 1948–49. Secondary instruction is supplied in two types of schools: in the *liceus* and in schools of technical instruction. There were 42 *liceus*, with 19,997 pupils and 1,096 teachers. In private schools 25,316 attended. Professional and technical secondary instruction is supplied in 67 schools of the State, with 36,533 pupils and 1,591 teachers. Vocational education (commercial, industrial and agricultural) is supplied in 8 schools, with 3,095 pupils and 217 teachers. For higher education there are 3 universities: at Lisbon (founded in 1911), Coimbra (founded 1290) and Oporto (founded 1911). In 1948–49 the number of students

and teachers at the universities was 8,883 and 475. There is also the Technical University at Lisbon (founded in 1930), which in 1948–49 had 191 professors and 2,710 students. There are also special colleges for music and art (Lisbon, Coimbra and Oporto) with 2,866 pupils and 87 teachers in 1948–49, and a military school and a naval school (both at Lisbon) and a colonial high school, with 15 professors and 113 students.

In 1949 there were 431 cinemas with a seating capacity of 242,128.

Justice and Crime.

Portuguese law distinguishes civil (including commercial) and penal, administrative and fiscal law, each branch having its lower courts, courts of appeal and supreme courts.

The republic is divided for civil and penal cases into 157 'comarcas'; in every comarca there is a lower court. In the comarca of Lisbon there are 22 lower courts (10 for criminal procedure and 12 for civil or commercial cases); in the comarca of Oporto there are 13 lower courts (7 for criminal procedure and 6 for civil or commercial cases); at Braga, Coimbra, Setúbal, Aveiro, Viseu and Funchal there are 2 courts. There are 3 courts of appeal (Tribunais de Relação) at Lisbon, Coimbra and Oporto, and a Supreme Court in Lisbon (Supremo Tribunal de Justiça). There are also 44 municipal courts. The municipal courts are also lower courts, similar to those of the comarcas; their service is, however, limited.

Finance.

The revenue and expenditure for 5 years are shown as follows (in 1000 escudos):—

	1946	1947	1948	1949	1950[1]
Revenue .	4,684,943	5,745,126	5,761,207	5,708,096	5,271,522
Expenditure .	4,623,940	5,693,989	5,699,070	5,660,772	5,268,318

[1] Estimates.

The items of estimated revenue and expenditure for 1950 were as follows (in 1,000 escudos):—

Revenue	1950	Expenditure	1950
Ordinary:—		Ordinary:—	
Direct taxes	1,426,230	General charges—	
Indirect taxes	1,609,520	Public debt . . .	463,827
Industries under special tax régime	291,904	Presidency, legislative bodies and pensions . . .	374,962
Yields of various services .	250,146	Ministries—	
State domain and industries and participation in profits .	239,844	Finance	308,565
Yield of capital, shares, etc. .	21,021	Interior	577,477
Reimbursements, etc. . .	344,594	Justice	134,531
Consignment of receipts . .	245,394	War	620,973
		Navy	350,807
Total ordinary . .	4,478,653	Foreign affairs . . .	82,649
Extraordinary . .	792,869	Public works . . .	380,299
		Colonies	46,480
		Education	483,508
		Economy	195,857
		Communications . .	325,514
		Total ordinary . .	4,345,449
		Extraordinary (trade, interior, war, navy, public works and communications, economy)	922,869
Grand total . . .	5,271,522	Grand total . .	5,268,318

On 31 Dec., 1949, the public debt was as follows:—Consolidated debt: 4% (1940) (centenários) 1,443,864 contos; 3½% (1941) 470,261 contos; 3% (1942) 3,298,942 contos; 2¾% (1943) 1,330,842 contos. Internal redeemable debt:—Titles 1,698,804 contos. Caixa Geral de Depósitos 159,291 contos (1949); Bank of Portugal 1,010,129 contos (1949). External redeemable debt: 803,155 contos; grand total (1949), 10,215,288 contos; settlements, 131,921 contos; debt value, 10,083,367 contos.

Defence.

Army.

Continental Portugal is divided into 5 military regions: Oporto, Coimbra, Tomar, Evora and Lisbon.

Insular Portugal comprises the military commands of Madeira and the Azores, with headquarters at Funchal and Pc[illegible]

Colonial Portugal comprises the military [illegible]: Angola, Moçambique and Cape Verde, and the military departments of Portuguese Guinea, India, Macau and Timor.

Pre-military training is entrusted to the *Mocidade Portuguesa* (Portuguese Youth Movement), with particular emphasis on physical and moral training of youths aged from 7 to 18 years.

Every Portuguese citizen is subject to compulsory military service. The period of [illegible] training is 28 years, of which 6 are with the active units, 16 with the reserves and 6 with the territorials. Permanent officers are trained in the Army School (*Escola do Exército*) and the Central School for Sergeants (*Escola Central de Sargentos*).

The permanent effectives of the Portuguese Army consist of 16 regiments of infantry, 3 independent battalions of infantry, 10 battalions of sappers, [illegible] battalions, 1 battalion of 'engenhos,' 5 regiments of light [illegible], [illegible] uments of heavy artillery, 1 regiment of coastal artillery, 8 groups of A.A. artillery, 1 group of mountain artillery, 1 group of motorized artillery, 3 independent batteries of coastal artillery, 4 mixed regiments of cavalry, 1 motorized rifle regiment, 2 regiments of armoured cars, 1 motorized machine-gun regiment, 2 regiments of engineers, 1 battalion of [illegible], 1 group of motorized transport, 1 railway battalion, 1 ponto [illegible], 4 air bases, 2 fighter squadrons, 3 health service companies, 2 groups of supply companies.

The Republican Guard (*Guarda Nacional Republicana*) consists of 5 infantry battalions and 1 cavalry regiment, with a total of 220 officers and 6,689 other ranks.

The Fiscal Guard (*Guarda Fiscal*) consists of 3 battalions on the Continent and 4 independent companies in the islands, with a strength of 97 officers and 5,232 other ranks.

There is also a voluntary force named *Legião Portuguesa* with 3,400 officers and 49,000 other ranks.

Navy.

The Portuguese navy comprises:—5 destroyers (*Vouga, Dão, Douro, Tejo* and *Lima*, 1,238 tons, all British built or designed and refitted and modernized by British yards in 1946–49); 6 sloops (*Afonso de Albuquerque, Bartolomeu Dias, Pedro Nunes, João de Lisboa, Gonçalo Velho* and *Gonçalves Zarco*, all but 2 built in Britain); 2 frigates (both British built); 6 submarines (all British built); 6 patrol vessels (all British built), 7 submarine chasers; 4 gunboats (*Diu, Zaire*, 397 tons; *Faro, Lagos*, 295 tons); 6 motor launches, 1 sailing training ship (*Sagres*, 3,067 tons); 5 surveying vessels; 5

fishery protection vessels; 1 [illegible] 1 oiler and 2 tenders. A naval air service was established i [illegible]. The naval personnel in 1950, included 761 officers and 6,159 ratings.

Production and Industry.

The following figures show the area (in hectares) and yield (in metric tons) of the chief crops :—

Crop	1948		1949		1950	
	Area	Yield	Area	Yield	Area	Yield
Wheat . .	697,743	355,548	687,653	401,884	684,899	530,010
Maize . .	523,257	511,109	483,338	342,339	524,197	454,946
Oats . .	312,383	192,558	316,047	219,491	317,068	129,543
Barley . .	130,356	118,004	139,494	134,475	145,361	123,170
Rye . . .	279,871	123,633	269,589	148,940	269,589	188,919
Rice . .	27,330	91,632	28,251	77,535	49,315	137,157
French beans .	385,399	62,320	353,997	36,433	366,688	43,575
Potatoes . .	88,593	1,018,245	83,161	790,368	94,460	971,117

Wine production (1950), 7,811,000 hectolitres, and olive oil, 434,498 hectolitres. In 1950, 232,104 hectolitres of port wine were exported.

In 1940 Portugal (continental and islands) possessed 85,040 horses, 122,832 mules, 245,448 asses, 973,226 oxen, 3,948,320 sheep, 1,243,890 goats and 1,252,975 pigs.

The forest area covers 2,467,000 hectares, of which 1,161,000 are pine, 690,000 cork oak, 798,000 other oak, 80,000 chestnut and 68,000 other species (largely eucalyptus).

The production of cork in Portugal surpasses that of the rest of the world (1947, 147,783; 1948, 132,760; 1949, 103,108 metric tons). Most of it is exported in the crude condition; exports of cork and cork products totalled 209,970 metric tons in 1950, and 149,803 metric tons in 1949. The exports of resin and turpentine were in 1950, 53,660 and 11,282 metric tons respectively; in 1949, 48,428 and 12,131 metric tons respectively.

Portugal possesses considerable mineral wealth, but for want of electric power, valuable mines remain unworked. The mineral production in 1949 included coal, 558,595 metric tons; cupriferous pyrites, 622,930 metric tons; copper (precipitated), 249 metric tons; tin ores, 2,654 metric tons; kaolin, 20,246 metric tons; cement, 521,435 metric tons; wolframite, 2,406 metric tons.

The fishing industry is of importance. In 1949 there were 42,511 men and boys employed, with 16,211 boats. The sardine catch was 58,986 metric tons, valued at 202,991,000 escudos. Exports of tinned sardines in 1950 amounted to 17,427 tons. The most important centres of the sardine industry are at Matozinhos, Setúbal, about 26 miles south of Lisbon, Portimão and Olhão.

Total production of electrical power in 1949 was 836,298,000 kwh.; the installed capacity totalled 339,570 kw., of which 147,176 kw. were hydro-electric. A new power plant at Castelo de Bode was inaugurated in Jan., 1951.

Trade Unions.—The organization of trade unions is based on the Labour Charter (*Estatuto do Trabalho Nacional*), implemented by the decree no 23 : 050 of 23 Sept., 1933. Some 309 unions (*sindicatos nacionais*) had, in 1949, a membership of 559,787 (428,891 men; 130,896 women).

Commerce.

Imports for consumption and exports (exclusive of coin and bullion and re-exports) for 6 years, in 1,000 escudos :—

Year	Imports	Exports	Year	Imports	Exports
1945	4,055,983	3,237,481	1948	10,350,683	4,295,340
1946	6,859,511	4,586,543	1949	9,042,761	4,089,697
1947	9,462,219	4,306,935	1950	7,878,850	5,333,703

[1] Provisional.

Total trade (in £ sterling) between Portugal (excluding the Azores and Madeira) and the United Kingdom for 5 years (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K. . .	3,658,763	7,529,937	8,318,532	8,844,128	11,613,367
Exports from U.K. .	2,956,271	11,180,278	23,904,126	18,698,614	16,132,625
Re-exports from U.K. .	270,501	359,533	121,042	139,223	178,941

Shipping and Communications.

In 1949, 10,183 vessels of 20,058,570 tons entered the ports of Portugal (continental and islands). Of those entering, 6,724 (7,068,948 tons) were Portuguese, 979 (5,325,751 tons) British and 206 (572,252 tons) Spanish. In Jan., 1950, the merchant marine of Portugal consisted of 363 vessels of 501,868 tons.

Portugal has 1,656 km. of state-owned railways, 1,396 km. being normal gauge and 260 km. narrow gauge. According to the law of 7 Sept., 1945, all the Portuguese railways are operated by a single company, the Companhia dos Caminhos de Ferro Portugueses, except the Estoril railway (Lisbon–Cascais), of 25 km. length. In 1949, total railway mileage was 3,615 km. (2,837 km. of broad gauge and 778 km. of narrow gauge). In 1949, 61,518,000 passengers were carried and 3,609,384 tons of merchandise transported. There were in 1949, 26,870 km. of road. Length of telegraph lines in 1949 was 9,551 km.; number of offices, 932. The state owned 90,561 km. of telephone line in 1949, and the Anglo-Portuguese Telephone Co. Ltd. owned 276,814 km. of lines. Number of telephones in 1949, 134,426, of which 39,244 were government-owned.

Cable and Wireless, Ltd. operate in Portugal (Carcavelos), the Azores, Madeira and the Cape Verde Islands, providing Portugal with Great Britain, North and South America, and West Africa.

Aviation.—The service Lisbon–Tangier-Casablanca carried 1,834 passengers and 11,874 kg. of freight in 1949. The service Lisbon–Porto carried 10,533 passengers and 53,643 kg. of freight; Lisbon–Madrid, 2,198 passengers and 5,821 kg. of freight; Lisbon–Luanda–Lourenço Marques, 288 passengers and 3,213 kg. of freight; Lisbon–Seville, 172 passengers and 617 kg. of freight; Lisbon–Paris, 2,007 passengers and 21,502 kg. of freight; Lisbon–London, 335 passengers and 5,863 kg. of freight; Lisbon–Tangier, 138 passengers and 860 kg. of freight. There are also in the Azores the following air services:—S. Miguel–Sta. Maria carried 3,016 passengers and 16,939 kg. of freight; S. Miguel–Terceira, 65 passengers and 489 kg. of freight; Sta. Maria–Terceira, 408 passengers and 2,715 kg. of freight.

Banking, Money, Weights and Measures.

The unit of currency is the *escudo* of 100 centavos, which contains 0·066567 gramme of fine gold. It was stabilized on 9 June, 1931, and the paper currency re-linked to gold when the notes of the Bank of Portugal became payable in gold or its equivalent in foreign currency. The mint par of the escudo with the British sovereign was fixed at 110 escudos = 1 sovereign; when Great Britain devalued the £, in Sept., 1949, Portugal fixed the value of the escudo at 80·65 escudos = £1 sterling.

At present there are silver coins of 10, 5 and 2½ escudos; Alpaca coins of 1 and ½ escudo (50 centavos), and bronze coins of 20 and 10 centavos. New 20- and 10-centavo coins, issued in 1943, were made of an alloy of 95% copper, 3% zinc and 2% tin, and were of a size, composition and design entirely new in Portugal.

The one bank of issue for the mainland of the country and adjacent islands is the Bank of Portugal, founded 19 Nov., 1846. By decree of 29 June, 1931, its constitution was modified and its privileges were prolonged until 30 June, 1961. The capital of the bank was fixed at 100,000,000 escudos. The bank is the treasury of the State and its reserve must be not less than 50% of the total amount of its notes in circulation and other sight liabilities. Not less than 25% of the amount of the notes in circulation and other sight liabilities must be represented by gold (coin or bullion). The

bank issues notes of 1,000, 500, 100, 50 and 20 escudos. The cash on hand of the bank on 31 Dec., 1950, was: gold and bullion, 3,204,104,580 escudos. The notes in circulation amounted to 8,455,974,680 escudos.

There are 35 other banks registered on the mainland and 5 in the islands, with cash in hand on 31 Dec., 1949, 4,508,889,000 escudos; bills, 5,582,922,000 escudos; deposits, 10,654,556,000 escudos. The deposits in the Savings Banks and General Deposit Bank (State) amounted to 6,898,822,000 escudos.

The metric system of weights and measures is the legal standard. The chief old measures still in use are:—The *Almude* of Lisbon = 3·7 imperial gallons, of Oporto = 5·6 imperial gallons; the *Alqueire* = 0·36 imperial bushel; the *Moio* = 2·78 imperial quarters.

Diplomatic Representatives.

1. Of Portugal in Great Britain (103 Sloane Street, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Dr. Ruy Ennes Ulrich (accredited 5 May, 1950).

Counsellors.—Henrique Bacelar de Caldeira Queiroz; Emilio Patricio.

Commercial Counsellor.—Miguel de Almeida Pile.

Naval and Naval Air Attaché.—Commander Jacinto Neto Milheiriço.

Military and Air Attaché.—Lieut.-Col. L. M. de Camara Pina, O.B.E.

Commercial Attaché.—Antonio Bento Franco Mendes.

There are consular representatives at Cardiff, Newcastle, Liverpool, Glasgow, Aberdeen, Dundee, Leith, Glasgow, Hull, Southampton, Bristol, Dartmouth, Falmouth, Plymouth, Port Talbot, Swansea, Barrow-in-Furness, Manchester, Birmingham, Dover, Middlesbrough, Belfast, Leeds and London.

2. Of Great Britain in Portugal.

Ambassador.—Sir Nigel B. Ronald, K.C.M.G., C.V.O. (appointed 20 Feb., 1947).

Counsellor.—P. F. Grey.

First Secretaries.—M. S. Henderson (*Commercial*); J. R. Colville, C.V.O.; H. K. Matthews; J. S. A. Selwyn, M.B.E. (*Consular*); F. B. G. Bevan (*Information*).

Naval Attaché.—Cdr. C. S. Battersby, R.N.

Military Attaché.—Lieut.-Col. W. L. Consett, M.C.

Air Attaché.—Wing-Cdr. C. E. A. Garton.

Civil Air Attaché.—Air Marshal D. Colyer, C.B., D.F.C.

There are consular representatives at Villa Real de San Antonio, Setubal, Horta and Ponta Delgada (Azores), St. Vincent (Cape Verde).

Consul-General at Lourenço Marques.—G. E. Vaughan, O.B.E.

There are consuls at Oporto, Loanda, Beira and Funchal (Madeira) and a vice-consul at Lobito.

Books of Reference.

Statistical Information.—The Instituto Nacional de Estatística (Avenida Dr. António José de Almeida, Lisbon) was set up in 1935 in succession to the Direcção-Geral de Estatística. The Centro de Estudos Económicos and the Centro de Estudos Demográficos were affiliated to the Instatuto in 1944. *Acting Director.*—António dos Reis Rumina (for Antómo Maria Diogo Tovar de Lemos, at present president of the Technical Commission of O.E.E.C.). The main publications are:—

Colonies.

The Portuguese colonial empire in Africa, Asia and Oceania consists of:—

Colonies	Area: English sq. miles	Population	Colonies	Area: English sq. miles	Population
Possessions in Africa:			Possessions in Asia:		
Cape Verde Islands (1940) .	1,557	181,286	In India (1940) .	1,538	624,177
Guinea (1940) .	13,948	351,089	China: Macao, etc. (1940) . .	6	374,737
Principe and S. Tomé Islands (1940) . .	372	60,490	Total, Asia .	1,544	998,914
[illegible] (1940) .	481,351	3,738,010	Possessions in Oceania:		
[illegible] (1941)	297,731	5,085,630	Timor (1936) .	7,332	463,996
Total, Africa .	794,959	9,416,505	Total, colonies .	803,835	10,879,415

[illegible] Colonial Act, published on 8 July, 1930, and included in t[illegible] ved by plebiscite on 19 March, 1933, the Portuguese colonies are under control of the Metropolis. Each one has a Governor and enjoys financial and administrative autonomy. Their budgets are under approval of the Minister for the Colonies. The Portuguese colonies are not allowed to contract public loans in foreign countries. The Portuguese state defends and protects the natives and the ownership of the lands and cultivations. Forced labour of natives is forbidden, except for public service, punishments or payment of taxes.

The **Cape Verde Islands** consist of ten islands and five islets which are administered by a Governor, whose seat is at Praia, the capital. The islands are divided into two groups, named Barlavento (windward) and Sotavento (leeward); the prevailing wind being north-east. The former is constituted by the islands of São Vicente, Santo Antão, São Nicolau, Santa Luzia, Sal and Boa Vista, and the small islands named Branco and Raso. The latter is constituted by the islands of Santiago, Maio, Fogo and Brava, and the small islands named Rei and Rombo. São Vicente is a coaling station which supplies all navigation to South America. The total area is 4,033 square kilometres (1,557 square miles). The population (census of 1 Dec., 1940) was 181,286 (5,580 Europeans, 116,910 half-castes, 57,718 Negroes, 167 other races and 911 unknown). There were in 1949, 111 primary schools with 5,234 pupils and one secondary school with 317 pupils in the island of São Vicente. The chief products are castor oil, coffee, mustard, brandy, oranges and hides. Other products are maize, manioc, beans, tobacco, cane sugar, sweet potatoes. The coffee is of excellent quality; exports in 1949 were 13 tons. In 1945 there were 22,253 goats, 21,779 oxen, 14,184 pigs and 7,897 asses. In 1949, revenue was 67,442,000 escudos, expenditure 63,581,000 escudos; public debt, 59,403,000 escudos. The budget estimates for 1950 balanced at 33,550,000 escudos. Imports in 1949, 252,464,000 escudos (special commerce); exports, 179,112,000 escudos (special commerce). The metric system of weights and measures is used. The currency is Portuguese. In 1949, 4,126 steamers entered the ports of the colony; total shipping, 2,807,822 net tons. In the coasting trade, 2,497 steamers of 81,602 net tons entered the ports. There were 550 kilometres of roads in 1948. An airport was opened at Ilha do Sal on 15 May, 1949.

Governor.—Major Carlos Alves Roçadas.

Portuguese **Guinea,** on the coast of Guinea, was discovered in 1446 by Nuno Tristão. It became a separate colony in 1879. It is bounded by the limits fixed by the convention of 12 May, 1886, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent archipelago of Bijagoz, with the island of Bolama. The capital and principal port of the colony is, since 1942, Bissau. Area is 36,125 square kilometres (13,948 square miles); population (census, 1940), 351,089 (1,419 Europeans, 3 yellow races, 2,200 half-castes, 10 Indians and 347,457 negroes). There were in 1949, 52 elementary schools with 3,573 pupils and 4 technical schools with 69 pupils. Chief commercial products are rice, palm-oil, seeds, hides. The budget estimates for 1950 balanced at 74,650,000 escudos. Military force consists of 12 officers and 46 other ranks (European). Imports in 1948, 185,162,000 escudos; exports, 1948, 129,114,000 escudos (special commerce). The chief port is Bissau. Other ports:—Bolama, Cacheu and Bubaque. In 1949, 83 steamers of 103,502 net tons entered

the ports of the colony. There were 1,100 kilometres of telegraph lines and 2,925 kilometres of roads (1948).

Governor.—Capt. Raimundo António Rodrigues Serrão.

The islands of **S. Tomé** and **Principe,** which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor. Area of the islands 372 square miles. According to the census of 1940 the population of the two islands was 60,[illegible]095 Europeans, 2,794 half-castes, 12 Indians, 13 yellows [illegible] There were in 1949, 17 elementary schools with 2,289 pupils and a technical school with 58 pupils. The chief commercial products are cacao, coffee, coconut and copra, palm-oil and cinchona. In 1948 there were 19,103 animals. In 1949, revenue was 36,405,000 escudos and expenditure 34,968,000 escudos; public debt, 1,841,000 escudos. The budget estimates for 1950 balanced at 41,996,000 escudos. Imports (1949), 126,703,000 escudos; exports, 140,472,000 escudos (special commerce). On S. Tomé a railway of 10 miles is open for traffic. There are 28 miles in course of construction. There were 329 km. of roads in 1949. In 1948, 3,584 steamers of 575,189 net tons entered the ports. There were 237 kilometres of telegraph lines, 2 wireless stations, 2 telegraph offices, 418 kilometres of telephone lines and 1 telephone exchange in 1948.

Governor.—Major Carlos de Sousa Gorgulho.

Angola (Portuguese West Africa), with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of 12 May, 1886; from the Belgian Congo by those fixed by the convention of 22 July, 1927; from British South Africa in accordance with the convention of 11 June, 1891, and from South-West Africa in accordance with that of 30 Dec., 1886. The Congo region was discovered by the Portuguese in 1482, and the first settlers arrived there in 1491. Luanda was founded in 1575. It was taken by the Dutch in 1641, and occupied by them until 1648. The area is 1,246,700 square km. (481,351 square miles). It is under a Governor-General, who resides at Luanda. By a decree of July, 1946, it is divided into 5 provinces with 16 administrative districts. The important towns are S. Paulo de Luanda (capital), Benguela, Moçâmedes, Lobito, Sá da Bandeira, Malange and Huambo (Nova Lisboa), the future capital. The population numbered 3,738,010 in 1940 (44,083 Europeans, 28,035 half-castes, 3,665,829 negroes and 63 other races).

For primary education there were (1949) 187 elementary schools with 12,935 pupils; 22 secondary schools with 2,166 pupils; 51 professional schools with 911 pupils, and a normal school with 12 pupils.

There were, in 1949, 20 cinemas with a seating capacity of 7,337.

The military force is composed (1949) of 129 officers and 383 other ranks (Europeans).

Th[illegible]s for 1949 balanced at 798,938,000 escudos; those for [illegible] escudos. The public debt on 31 Dec., 1948, stood at 1,071,044,000 escudos. This included the colony's debt to Portugal amounting to 846,229,000 escudos.

An advisory Council for Economic Co-ordination was set up on 10 Nov., 1948.

The principal crops are:—Coffee, maize, sugar, palm-oil and palm kernels. Other products are cotton, wheat, tobacco, cocoa, sisal (17,683 metric tons in 1949) and wax. The country possesses valuable diamond deposits. Exports of diamonds during 1949 totalled 889,377 carats valued at

258,742,000 escudos. Copper and lignite exist but are not worked. Salt is also found. Coffee export amounted to 46,379 metric tons in 1949, of which 14,475 tons were exported to U.S.A.

Imports, 1949, 1,337,024,000 escudos; exports, 1,793,012,000 escudos. The chief imports of the province are:—Textiles, coal and foodstuffs, and the chief exports are coffee, maize, diamonds, sugar, wax and groundnuts. The trade is largely with P[illegible] Exports to United Kingdom (Board of Trade figures), £19,446 in 1[illegible], £[illegible] in 1948; £[illegible] in 1949; £151,023 in 1950. Imports from Unit[illegible] K[illegible] £407,940 in 1947; £1,092,817 in 1948; £1,747,623 in 1949; £[illegible] in 1950.

The Portuguese National Navigation Company has most of the carrying trade to and from Europe. The length of railways open for traffic is 1,711 miles. The Benguela Railway runs from Lobito through the Belgian Congo and Rhodesia, ending at Beira in Moçambique; total length of track, 4,711 km. (2,920 miles). There is a further extension in the direction of Lourenço Marques; the line goes through Rhodesia, as far as Mafeking, and from thence to Komati Port, in the South African Union territory. There it connects with the Lourenço Marques Railway. The total length of railroad, from Lobito to Lourenço Marques, is 5,638 km. (3,295 miles). There were in 1949, 35,756 km. of roads. Angola is connected by cable with East, West and South African telegraph systems. There are 8,958 km. of telegraph lines, 2,571 km. of telephone lines, 7 telephone stations, 139 telegraph stations and 27 wireless stations (1949).

In 1949, 3,748 vessels of 3,855,905 net tons entered Angolan ports.

Regular air service is maintained by the Divisão de Transportes Aéreos from Luanda to: (south) Mocamedes via Porto Amboim, Novo Redondo, Lobito, and Benguela, with connexions for Porto Alexandre and Lucira; (east) Vila Luso via Lobito, Nova Lisboa, Silva Porto, and General Machado; (north) Pointe Noire (French Equatorial Africa) via Ambrizette, Toto, Damba, Sazaire, and Cabinda; and to Léopoldville (Belgian Congo). The Sabena (Société Anonyme Belge d'Exploitation de la Navigation Aerienne) also maintains a weekly service between Léopoldville and Luanda.

As from 1 July, 1928, the Angolan escudo has been superseded by a new unit the 'angolar,' of 100 centavos, 80 angolares being the equivalent of 100 Angolan escudos. The angolar is equal to the Portuguese escudo. A new coin has also been introduced, called a 'macuta,' equal to 5 centavos.

Governor-General.—Capt. José Agapito da Silva Carvalho.

Moçambique (Portuguese East Africa) was discovered by Vasco da Gama's fleet on 1 March, 1498, and was first colonized in 1505. It is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from Tanganyika Territory [illegible] reements of October and December, 1886, and July, 1890, b[illegible] from Cape Delgado at 10° 40′ S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyas[illegible] parallel of latitude of this point. In accordance with the Treaty o[illegible] the Peace Conference on 23 Sept., 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the 'Kionga Triangle' (formerly part of German East Africa).

Moçambique, with an area of 297,731 square miles, is now completely administered by the state, since 19 July, 1942, when the state took over the territory of Manica and Sofala, which was incorporated as a fourth province of the colony, with Beira (population, 12,988) as its capital. The

Companhia de Moçambique was then wound up on the expiration of its charter. Lourenço Marques (population 69,861 in 1940) is the capital of the colony. The administrative organization of the colony was established by decree of 4 July, 1946. It is divided into four provinces:—Sul do Save, Manica and Sofala, Zambezia and Niassa. Sul do Save comprises the districts of Gaza and Inhambane; the chief town is Lourenço Marques. The province of Manica and Sofala, comprising the districts of Beira and Tete, is 'limited to the south of the River Save, to the east by the Indian Ocean, the River Ghire (Shire), and the frontier of Nyasaland, to the west by the frontier of Southern Rhodesia, to the north-east by the River Zambese, from the sea to the confluence of the Ghire, and to the north by the frontier of Northern Rhodesia.' The province of Zambezia consists of the district of Quelimane; the chief town is Quelimane. The province of Niassa comprises the districts of Nampula, Lago and Cabo Delgado.

There is a government council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and also an executive council. The population of the colony, according to the census of 1940, was 5,085,630, of which 27,438 were Europeans, 15,641 half-castes, 1,449 yellows, 9,147 Indians and 5,031,955 negroes. In 1949 there were 1,086 primary schools with 153,639 pupils, 6 secondary schools with 784 pupils, 54 technical and professional schools with 6,395 pupil[illegible] 13 missionary professional schools), 3 normal schools with 298 [illegible] logical school with 59 pupils.

There were, in 1950, 19 cinemas with a seating [illegible] of 7,364.

The military force of the colony consists of [illegible] and 726 other ranks (Europeans).

11 gold and 26 samarskite deposits, and many silver, uranium and asbestos deposits were discovered in 1947. 6 uranium and 3 asbestos deposits were found in the Tete district.

Revenue, 1949, was 1,622,346,000 escudos; expenditure, 1,641,247,000 escudos. Public debt on 31 Dec., 1948, was 667,906,000 escudos.

The chief products are sugar, maize, cotton, copra, sisal and mining products. In 1949 there were 699,823 oxen, 348,125 goats, 66,951 sheep and 81,800 pigs. The principal ports are:—Lourenço Marques (1,090 vessels of 3,912,568 net tons entered in 1949); Beira (660 vessels with 2,213,590 net tons entered in 1949), and Moçambique (238 vessels of 779,310 net tons entered in 1949). Imports in 1949 amounted to 1,750,563,893 escudos; exports to 965,599,000 escudos.

Trade with United Kingdom (Board of Trade figures):—Exports to United Kingdom, £1,690,362 in 1947; £2,695,714 in 1948; £3,027,622 in 1949; £3,404,441 in 1950. Imports from United Kingdom, £160,248 in 1947; £348,729 in 1948; £451,882 in 1949; £570,448 in 1950. Re-exports from United Kingdom, £6,600 in 1947; £4,290 in 1948; £11,587 in 1949; £8,834 in 1950.

There were in 1949, 2,659 km. of railway and 29,092 km. of road, of which 4,686 km. are main roads. Motor vehicles, in 1949, included 8,904 passenger cars, 3,392 lorries and buses, and 779 motor cycles.

The Delagoa Bay Railway has a length of 57 miles in Portuguese territory and is continued for 290 miles to Pretoria. The Beira Railway has a length of 200 miles in the territory formerly administered by the Moçambique Co., and links up at the frontier with the Rhodesian Railway system. The Trans-Zambesia Railway, 175 miles in length, from Dondo, on the Beira Junction Railway, to Murraça, on the southern bank of the Zambesi, was opened for traffic on 1 July, 1922. On the northern bank of the Zambesi, the Central Africa Railway (61 miles long, of which 45 miles are in Portuguese territory)

connects at Port Herald with the Shiré Highlands Railway. With the opening of the Lower Zambesi Bridge on 14 Jan., 1935 (3,677 metres, one of the longest bridges in the world), these three railways give a continuous connexion between British Nyasaland and the port of Beira.

Regular air service is maintained between Lourenço Marques and Mocímboa da Praia–Tete (6,587 passengers in 1949), Johannesburg (1,025), Salisbury (178) and Durban (218).

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1949 there were 12,572 kilometres of telegraph line, 19 wireless stations, 29 telephone stations and 217 telegraph stations; length of telephone lines, 8,465 kilometres.

Barclays Bank (D., C. & O.) has branches in Beira and Lourenço Marques.

By decree of 22 July, 1939, only the escudo currency is in use in Portuguese East Africa. The metric system is used.

Governor-General.—Commander Gabriel Teixeira.

Portuguese India consists of Goa, the capital, Gôa, or Pangim, together with the islands of Santo Estevão, São Jorge and Morcegos, on the Malabar coast; Damão, with the territories of Dadará and Nagar-Aveli, on the Gulf of Cambaia; and Diu, with the continental territories of Gogolá and Simbor, on the coast of Gujerat. The total area of the colony is 3,[illegible] (1,537 square miles), with a population in 1940 of 624,177. In 1949 there were 278 elementary schools with 9,970 pupils, 4 secondary schools with 762 pupils, a medical school with 152 students and a teachers' training college with 21 students. There are 507 salt works employing 1,968 men, the production (1945) amounting to about 26,230 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and 6 concerns with 21 mines are at work. The Mormugão Railway (51 miles) connects this port with the lines of India. The estimated revenue and expenditure in 1950 balanced at 86,098,000 escudos. The debt of the colony on 31 Dec., 1948, was 8,212,000 escudos. The trade is largely transit. In 1947 the imports by sea and land amounted to 338,858,881 escudos, the exports to 50,523,603 escudos. Chief exports are:—Coconuts, fish (fresh and salted), spices, caju-nuts, salt and copra. Roads, 734 km. (1949). There are in Portuguese India 56 telegraph offices and 547 km. of telegraph line and 1,401 km. of telephone line. In 1949 there entered at the ports of this colony 3,931 ships; total tonnage, 1,119,678 gross tons.

Exports to the United Kingdom, 1947, £77,945; 1948, £38,761; 1949, £803; 1950, £12,530. Imports from the U.K., 1947, £287,364; 1948, £355,650; 1949, £596,889; 1950, £889,814 (British Board of Trade returns).

Governor-General.—Commander Fernando Quintanilha Mendonça e Dias.

Macao, in China, situated on a peninsula of the same name at the mouth of the Canton river, which came into possession of the Portuguese in 1557, forms with the two small adjacent islands of Taipa and Colôane a province, divided into two wards, each having its own administrator. The boundaries have not yet been definitely agreed upon; at present Portugal holds the territory in virtue of the treaty with China of 1 Dec., 1887. The area of the colony is 16 square kilometres (6 square miles). The population, according to the census of 1940, is 374,737 (8,989 Portuguese, 365,748 of various nationalities, 2,037 being Europeans, 419 Indians, 2,204 half-castes,

361 negroes and 369,716 of the yellow races). Estimated revenue and expenditure in 1950 balanced at 87,301,000 escudos. For education there are the Seminary of S. José, 1 secondary school and 22 elementary and professional schools. The trade, mostly transit, is handled by Chinese merchants. Imports in 1948, 82,419,677 patacas; exports, 16,612,479 patacas. The colony has 169 km. of telephone line, 3 telegraph stations and 2 wireless stations. It is served by various British and Dutch steamship lines. In 1948, 12,265 steamers of 1,897,125 net tons entered and 12,300 steamers of 1,898,790 net tons cleared the port.

In Aug., 1949, the garrison was reinforced to the strength of nearly 5,000 officers and men.

Governor.—Commander Albano de Oliveira.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring islands of Pulo Cambing and Pulo Jako, a total area of 7,330 square miles. By treaty of April, 1859, ratified 18 Aug., 1860, the island was divided between Portugal and Holland; by convention of 1 Oct., 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896 (confirmed in 1926) made an independent province. Population in 1936, 463,996. There were (1949) 3 secondary schools with 45 pupils and 30 primary schools with 2,877 pupils. In 1949 revenue was 62,047,000 escudos and expenditure 48,353,000 escudos. Public debt on 31 Dec., 1948, was 31,829,000 escudos. Imports (1949), 37,618,000 escudos; exports, 13,413,000 escudos. Chief exports are :—Coffee, sandal wood, sandal root, copra and wax. The port is Dilly, the capital. In 1949, 115 ships of 29,096 net tons entered and cleared the ports of the colony. There is a good road system of 1,981 km., telephone lines of 1,289 km., 15 telegraph stations, 20 telephone stations and a wireless station at Dilly (1948).

Governor.—Capt. Cesar Maria Serpa Rosa.

RUMANIA.

(Republica Populara Română.)

Constitution and Government.

For the history and constitution of the principality and Kingdom of Rumania from 1859 to 1947, *see* The Statesman's Year-Book, 1947, pp. 1187–89.

On 30 Dec., 1947, King Michael abdicated under Communist pressure and shortly afterwards left the country. On the same day, the Rumanian parliament proclaimed Rumania a 'People's Republic.'

President of the Presidium of the Republic.—C. I. Parhon (elected 13 April, 1948).

On 29 Nov., 1946, a coalition Cabinet was formed by the Ploughmen's Front, Social Democrats, Communists and Liberals, with the additional support of the National Popular Party and a wing of the National Peasant Party.

After the elections of 28 March, 1948, the cabinet was reconstructed on 15 April, 1948, as follows:—

Prime Minister.—Dr. Petre Groza (Ploughmen's Front).
First Vice-Premier.—Gheorghe Gheorghiu-Dej (Communist).
Vice-Premier and Minister of Foreign Affairs.—Anna Pauker (Communist).
Vice-Premier and Minister of Finance.—Vasile Luca (Communist).
Minister of the Interior.—Teohari Georgescu (Communist).
Minister of Labour.—Lotar Rădăceanu (Social-Democrat).
Minister of Justice.—Stelian Nitzulescu (Communist).
Minister of Public Works.—Teodor Gordakescu (Socialist).
Minister of Oil and Mines.—Gheorghe Vasilighi.
Minister of Arts and Information.—Dr. Eduard Mezincescu.
Minister of Co-operatives.—Romulus Zaroni (Ploughmen's Front).
Minister of Foreign Trade.—Alexander Barladeanu.
Minister of Communications.—Nicolae Profiri (Communist).
Minister of Education.—Popescu Doreanu.
Minister of Health.—Dr. Vasile Marza.
Minister of Food.—Dumitru Diaconescu.
Minister of Defence.—Bodnaras.
Minister of Religious Affairs.—Stanciu Stoian (Peasant Party).
President of the State Control Commission.—Avram Bunaciu (Communist).

The elections which took place on 28 March, 1948, resulted in 405 members of the Government parties and 9 members of the Opposition (including 7 National Peasant Party); total, 414.

In Aug., 1947, the National Peasant Party was dissolved and banned and its deputies were expelled from parliament.

The peace treaty was signed in Paris on 10 Feb., 1947. It fixed the frontiers as on 1 Jan., 1941, with the exception of the frontier with Hungary which was restored as on 1 Jan., 1938, thereby annulling the Vienna Award. The political clauses stipulate that the Rumanian citizens shall enjoy all personal liberties (freedom of expression, religious worship, political opinion, public meetings, etc.). Losses caused to the Soviet Union are to be made good by the delivery over a period of 8 years beginning from 12 Sept., 1944, of oil products, grain, timber, seagoing and river craft, machinery and other commodities, to the total value of $300,000,000. Rumania is to restore to the United Nations and their nationals all legal rights and interests in Rumania as they existed on 1 Sept., 1939, and to return to them all property situated in Rumania. For the military and shipping clauses, *see* below under DEFENCE and SHIPPING.

On 2 April, 1949, the British and American governments protested against the violation of the peace treaty by the Rumanian government, which, the notes stated, had systematically curtailed the fundamental freedoms of expression, press and publication, of political opinion and of religious worship. These protests were renewed on 19 Sept., 1949.

National flag: blue, yellow, red (vertical), with the coat of arms of the republic in the middle.

LOCAL GOVERNMENT.

In Rumania there are 58 districts, 6,662 communes (16 municipal, 139 urban, 27 suburban and 6,480 rural). In the rural communes there are 13,418 villages and hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but are given by law. The most important towns, called *municipii* ('municipalities') have autonomous communal organizations.

Area and Population.

As a result of the changes since 1940, the area and estimated population of Rumania on 1 July of each year are shown as follows:—

Years	Area in square miles	Urban	Rural	Total
1939 . .	113,884	3,621,666	16,312,136	19,933,802
1940 . .	94,532	3,109,364	13,209,505	16,318,869
1941 . .	75,366	3,296,979	10,254,777	13,551,756
1945 . .	91,671	3,609,382	12,799,485	16,409,367

In 1945 Rumania had the following provinces:—Oltenia, Muntenia (Wallachia), Dobrogea (Dobruja), Moldova (Moldavia), South Bucovina, Transylvania, Banat, Crisana and Maramureş.

Census of population in 1948, 15,873,000; population of Bucharest, 1,041,807.

In 1930 the races in the country were returned as follows:—Rumanians, 12,980,033 (72%); Magyars, 1,426,178 (8%); Germans, 740,169 (4%); Jews, 725,318 (4%); Ruthenians, 577,693; Russians, 415,217; Bulgarians, 361,058; Turks, 288,793, and Gypsies, 278,793.

The number of births, deaths and marriages was as follows :—

Years	Births	Deaths	Marriages	Years	Births	Deaths	Marriages
1941 .	371,826	283,591	110,556	1944 .	291,368	245,026	—
1942 .	411,391	327,835	138,103	1945 [1] .	243,359	224,703	—
1943	276,534	228,326	93,408	1946 .	391,200	296,100	—

[1] Without Northern Transylvania.

The estimated populations of the principal towns (*municipii*) of Rumania on 1 July, 1945, were [1] :—

Bucureşti (Bucharest) . .	984,619	Braşov	85,192
Cluj	110,356*	Arad . . .	82,882
Iaşi . . .	108,387	Constanţa . .	79,716
Timişoara . .	108,296	Craiova . .	74,786
Ploeşti	105,114	Sibiu . . .	63,738
Brăila	97,293	Satu Mare . . .	52,006*
Galaţi	93,229	Târgul Mureş . . .	41,946*
Oradea	92,943*	Alba Iulia . . .	15,216

[1] These figures are based on the 1941 census data corrected by the surplus of births over deaths since. For the Northern Transylvania towns (marked *) the figures are based on the estimated populations of 1939, corrected for each year since by the surplus of births over deaths of 1939. The above figures do not show the normal increase due to immigration.

Religion, Education, Justice.

Of the population of Rumania about 69·6% belonged to the Orthodox Church, 9·8% were Greek Catholics, 8·1% Roman Catholics, 5·0% Reformists, 3·3% Jews, 2·2% Lutherans, 0·5% Unitarians and 0·3% Moslems (figures based on 1930 census).

A 'law [illegible] of all religions,' published on 5 Aug., 1948, placed [illegible] teaching under state control.

The Nat[illegible]f Rumania is administered by a Holy Synod formed by the Patriarch, all the metropolitans (of Bucureşti, Iaşi, Sibiu and Suceava), all the bishops (of Arad, Curtea de Arges, Buzau, Caransebes, Cluj, Constanţa, Galaţi, Husi, Sighet, Oradea, Roman, Timişoara) and of all vicars (one or two for each metropolitan and one for the most important bishopric). The Uniate (Greek Catholic) Church, which has about 1,320,000 members, severed its connexion with the Vatican and was re-admitted to the Orthodox Church on 3 Oct., 1948; it has a Metropolitan, 4 bishops and some 700 priests.

The Serbians have an Orthodox Vicarage at Timisoara. There is a Roman Catholic bishop in Bucuresti with diocesan bishoprics at Alba Iulia, Timisoara, Satu Mare-Oradea and Iaşi. There are Reformed bishops at Cluj and Oradea, a German Lutheran bishop at Sibiu and a Hungarian Lutheran superintendent at Arad and a Unitarian bishop at Cluj. The Baptist Church is recognized as a rightful organization since 1 November, 1944. There is an Armenian Gregorian bishop in Bucuresti and an apostolical administration for the Catholic Armenians with the see at Gherla. The Jews are organized in communities of orthodox, occidental and Spanish rites. There is a Muftiate for the Moslems at Constanţa. The Adventists and Jehovah's Witnesses are also legally recognized.

The clergy of the Christian Orthodox, Greek Catholic, Roman Catholic, Reformist, Lutheran, Unitarian, Catholic Armenian and Moslem Churches

is paid by the state. The Jewish communities receive a substantial subsidy from the state.

All Roman Catholic Orders were dissolved on 1 Aug., 1949.

Education is free and compulsory. In 1942–43 there were 1,094 infant schools with 1,494 teachers and 57,512 pupils, and 11,041 elementary schools with 32,724 teachers and 1,607,879 pupils. There were also 151 private and confessional schools for children with 8,449 pupils, and 612 confessional and private elementary schools with 1,786 teachers and 67,081 pupils. There were in 1937–38, 716 secondary public schools with 13,343 teachers and 168,331 pupils, and 209 secondary private and confessional schools with 3,784 teachers and 35,923 pupils. All church schools were placed under state control in Aug., 1948.

There are 4 universities:—In Bucharest, founded in 1864; in Jassy, (Iaşi), founded in 1860; in Cluj (with the faculty of medicine in Târgul-Mureş) and Timişoara, founded in 1945. Students at the universities in 1944–45 numbered 27,082; professors and teachers, 2,985.

There were, in 1949, 350 cinemas, with a seating capacity of 108,000.

Justice is administered by 13 appeal courts, 63 tribunals and 393 justices of the peace, 23 labour justices and 13 criminal courts. Private legal practice has been abolished as from 1 April, 1950, and all lawyers have been placed under the control of the Ministry of Justice.

Assistance is given to the sick in 392 hospitals and *hospices* (departmental, communal, rural and private).

Finance.

Ordinary revenue and expenditure (in millions of lei) for years ending 31 March :—

	1942–43	1943–44	1944–45	1945–46	1948 [1]	1949 [2]	1950 [2]
Revenue	141,589	214,448	222,501	1,060,769	103,800	192,961	353,900
Expenditure	68,873	166,938	191,297	1,423,269	103,300	192,961	352,000

[1] April–December. [2] Estimates for calendar year.

Estimated revenue, 1948–49, was 108,682 million lei, of which stamp tax was to supply 28,600; direct taxation, 25,310; luxury and turnover tax, 24,100; state monopolies, 10,130 million lei.

Estimated expenditure, 1948–49, was 70,572 million lei, of which the Ministry of Finance was to spend 13,862; Defence, 13,613; Interior, 12,600; Education, 8,850 million lei.

On 31 March, 1947, the internal debt amounted to 79,734,196,285 lei, the external debt to 45,226,229,184 lei. The external debt, 31 Dec., 1945, included £27,331,132; $83,854,450 (U.S.); 2,016,608,640 French francs and 19,077,300 Swiss francs; plus a portion of the old Austro-Hungarian state debt.

Defence.

The military clauses of the Peace Treaty allow (*a*) Land Army, including frontier troops, of 120,000 men; (*b*) A.A. artillery of 5,000 men; (*c*) Air Force of 150 aircraft of which not more than 100 may be of combat type. Personnel strength 8,000. (*d*) Navy of 15,000 tons; personnel 5,000.

At the end of 1948, the Rumanian armed forces were reported to consist of 150,000 men in the Army and 20,000 frontier gendarmie. The army includes 2 motorized divisions.

In 1951 there were in the Black Sea 2 old destroyers, 1 submarine, 2 old torpedo boats, 2 motor gunboats, 10 motor torpedo boats, a minelayer, a submarine depot ship (*Constanţa*) and a sail training ship. The Danube force comprised 4 monitors, armed with 4·7-in. guns, and some small craft. The naval school is in Constanţa.

Production and Industry.

An agreement, signed on 8 May, 1945, provides closer economic collaboration between Rumania and the U.S.S.R. 'Sovroms,' Rumanian-Soviet companies, have been established 'for the purpose of strengthening the economic structure of both countries.' These grant to the U.S.S.R. control over important Rumanian enterprises. The two partners share the capital of these companies on an equal basis, but a Soviet managing director decides on capacity and distribution of production.

Sovrompetrol has taken over Concordia, Columbia, Petrol-Block, I.R.D.P., Transpetrol, Buna speranta, S.A.R.D., Sarpetrol, Meotica, Explora, Interova, and Redeventa. In 1947, this company produced 29·8% of all Rumanian petroleum.

The Sovromlemn of the woodworking industry owns more than 12% of the total capacity of the Rumanian wood-working industry.

A 5-year plan, covering the years 1951–55, was enacted by the National Assembly on 15 Dec., 1950. It envisages a capital investment of 1,330,000 million lei, of which 42·1% will go to the capital-goods industry and 9·3% to the consumer-goods industry. The 1955 targets compared with the 1938 production are as follows :—

Product	1955 Target	1938 Production
Crude oil (1,000 metric tons)	10,000	6,594
Electric energy (1,000,000 kwh.)	4,700	568
Aluminum (metric tons)	5,500	—
Steel (1,000 metric tons)	1,250	277
Sulphuric acid (1,000 metric tons)	143	43
Coal (1,000 metric tons)	8,533	2,396
Natural gas (1,000,000 cubic metres)	3,900	1,860
Bread grains (1,000 metric tons)	3,710	5,410
Maize (1,000 metric tons)	4,030	5,223
Sugar beet (1,000 metric tons)	2,125	720
Cotton (1,000 metric tons)	230	1·4

According to a statistical estimate, the distribution of the soil of Rumania in 1945 was as follows :—Ploughed land, 9,628,000 hectares; meadows and pasture, 4,287,000 hectares; vineyards and fruit trees, 458,000 hectares; forests, 6,327,000 hectares.

Estimates of the 1947 harvest were as follows :—

Crop	Area sown (hectares)	Yield (metric tons)	Crop	Area sown (hectares)	Yield (metric tons)
Wheat	1,680,847	1,279,000	Oats	520,932	22,000
Rye	89,992	66,000	Maize	4,370,451	527,900
Barley	413,930	286,000			

Production of sugar beet, 1948, 467,000 short tons; 1949, 500,000 short tons.

The areas planted to hemp and flax amounted to 55,588 hectares and 15,000 hectares, respectively, in 1948, as compared with 50,339 hectares of hemp and 13,050 hectares of flax in 1947.

In Sept., 1945, there were in Rumania 868,000 horses; 3,398,000 cattle; 1,493.000 pigs; 7,039,000 sheep.

All resources of the subsoil which were formerly in private hands, and virtually all manufacturing or processing enterprises of importance in Rumania—as well as banking, insurance, mining transportation and telecommunications enterprises—were nationalized by a law published 12 June, 1948, effective immediately. To compensate former owners of nationalized enterprises, this law provides for a 'Fund of Nationalized Industry,' which will issue bonds to former owners, to be redeemed from profits of nationalized enterprises.

The principal minerals are salt, lignite, iron and copper ores, petroleum and natural gas. Petroleum wells, both government and private, are worked at Prahova, Dambovitza, Bacau and Buzan. The total output of crude oil in 1947 was 3,810,000 metric tons; in 1945, 4.636,000 metric tons; in 1938, 6,868,000 metric tons. Workers in the oil industry numbered 50,200 in 1947, compared with 23,600 in 1938. The output of natural gas in 1944 was 2,129,792,000 cubic metres; in 1945, 1,774,000,000 cubic metres. The salt-mines are situated in the region of the lower Carpathians, from Bukovina to the west of Otlenia, an area of over 250 square miles. Salt-mining has been a state monopoly since 1863; production in 1944 was 164,863 metric tons; in 1943, 383,353 metric tons. Coal production in 1947 was estimated at 2,498,440 short tons. Output of pig-iron in 1948, 80,000 metric tons; of iron ore in 1947, 120,870 metric tons. Other mineral metals were (in tons):—

	1942	1943		1942	1943
Gold and silver ore	437,482	405,623	Silver metal [1]	2,787	2,457
Other mineral ore	47,722	51,514	Steel	300,897	294,359
Gold metal [1]	2,811	2,562			

[1] Kilos.

Commerce.

A decree published on 6 May, 1948, lays down that the Ministry of Trade is to supervise Rumania's domestic merchandise exchange, the fixing of prices, wages and fees, as well as foreign-trade relations of the country either directly between States, or through nationalized export and import corporations and [illegible] owned export and import enterprises. This decree brings [illegible] of Rumania's domestic and foreign trade under state control not only with regard to business transactions, but also regarding planning, procurement and distribution of merchandise within the country and abroad.

Imports and exports exclusive of gold and silver (in million lei) were valued at:—

	1942	1943	1944	1945	1946	1947 [1]	1948 [1]
Imports	44,907	89,984	30,016	16,422	334,208	80	96
Exports	52,816	71,132	32,176	177,036	1,025,686	113	116

[1] In million dollars, U.S.

The trade by main countries was distributed as follows :—

Country	Imports into Rumania		Exports from Rumania	
	1944	1947	1944	1947
	Million lei	Million $U.S.	Million lei	Million $U.S.
Bulgaria	—	2 18	—	3 73
Czechoslovakia	4,885	6 17	321	5 78
France	374	—	515	—
Germany	28,770	—	37,877	—
Hungary	—	3 25	—	3 31
Italy	3,889	—	59	—
Switzerland	—	2 42	—	0 68
Union of Soviet Socialist Republics	—	20 92	—	17 18
United States of America	—	11 40	—	—

Total trade between Rumania and United Kingdom for 6 years (Board of Trade returns) in £ sterling :—

	1938	1946	1947	1948	1949	1950
Imports to U.K.	3,837,960	9	123,665	3,277,914	1,955,125	569,708
Exports from U.K.	1,352,017	8,920	109,952	932,171	1,669,327	706,282
Re-exports from U.K.	53,991	46	4,590	26,938	697,404	686,605

Shipping and Communications.

The European Commission of the Danube, called into being by the Treaty of Paris of 30 March, 1856, consisted before the First World War of 8 delegates, one representing each of the following Powers :—Austria-Hungary, France, Germany, Great Britain, Italy, Rumania, Russia and Turkey. By the Convention of the Danube of 23 July, 1921, as modified on 2 March, 1939, it is composed of representatives of Great Britain, France, Italy and Rumania.

The commission had its seat at Galați. By the operations of the commission, the voyage from Sulina to Brăila has been shortened by 21·9 kilometres; the minimum depth in the Sulina branch has been increased from 8 ft. to 24 ft., and the minimum depth over the bar at Sulina has been raised from 9 ft. to 24 ft. The income of the commission was derived entirely from taxes levied on shipping leaving the river. The commission had its own flag

After the agreement of Sinaia of 18 Aug., 1938, which came into force on 13 May, 1939, all the ships belonging to the C.E.D. (European Commission of the Danube) became the Rumanian state's property, under the style 'Direction of the Maritime Danube' (D.D.M.), and many of the powers of the commission, including the control of Danube maritime navigation from Brăila to the sea, passed over to the Rumanian state.

The peace treaty of 10 Feb., 1947, stipulates that navigation on the Danube shall be free and open to all nationals, mercantile vessels, and trade of all states, on a footing of equality.

Rumanian tonnage, in 1948, amounted to 15 vessels of 32,962 tons; the state operates the largest fleet on the Danube; 127 tugs in 1940 (33% of the total) and 553 barges (27% of the total) with a capacity of 469,546 metric tons. She also had 66 tankers with a capacity of 41,603 metric tons. In 1945 the State Navigation Service (S.M.R. for the sea and N.F.R. for the Danube) was incorporated in Sovromtransport, a Russian–Rumanian joint company, which operates 199 river boats and 5 sea-going vessels.

Railway history in Rumania commenced in 1860. All the main railway lines are owned and operated by the state. The length of Rumanian state

railways (4 ft. 8½ in. gauge track) in 1945 was 5,962 miles. There are 1,997 miles of pipeline in Rumania.

The Rumanian Airways Co. (Liniile Aeriene Romane Exploatate de Stat) (LARES) in 1944 flew 448,408 miles and carried 12,679 passengers and 269,443 kilos of freight. The LARES was incorporated in 1945 in TARS, a Russian–Rumanian joint company.

Within Rumania there were 7,499 miles of national roads in 1945, 15,940 miles of departmental roads, 19,724 miles of commercial roads, making a total of 43,163 miles of roads.

The post and telegraph administration was [illegible] 1938, as a department in the Ministry of Public Wor[illegible] In 1944 there were 94,189 miles of telegraph wire and cable and 91,327 miles of telephone wire. A Rumanian company called S.A. de Telefoane took over the whole telephone system on 1 January, 1931. Number of telephones in 1949, 135,000. There are radio stations at Banease and Bod.

Banking, Money, Weights and Measures.

The majority of Rumanian banks, including the partly British-owned Bank of Rumania, were dissolved by the government on 13 Aug., 1948. Among the few exempted from this regulation are the joint Soviet–Rumanian Sovrom-bank, the National Bank of Rumania, and certain co-operative and professional banks.

Funds of the previously German-controlled Societatea Bancara Romana, Banca Commerciala, Roma and Banca Agrivola, were taken over by the Sovrom-bank.

The National Bank of Rumania (founded in 1880) was transformed into the Bank of the Rumanian Peoples' Republic on 13 Nov., 1948. The new bank is controlled by the Ministry of Finance, and half of its net profits will be alloted to the State budget. Its capital has been established at 2,000,000,000 lei.

A National Savings Institute was established in 1930. At the end of 1945 total deposits amounted to 28,370,200,000 lei. Other public credit institutions are a deposit and consignment bank, a rural *Crédit Foncier*, 2 urban *Crédit Foncier* (at Bucharest and Iași), an agricultural bank and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants.

The unit of the monetary system is the *leu* (of 100 *bani*).

On 21 Aug., 1947, the currency was stabilized at the rate of 1 new leu for 20,000 old lei. The new currency is backed by 230,000 kilogrammes of gold. New legal tender consists of bank bills in the denominations of 100, 500 and 1,000 lei issued by the National Bank, copper–zinc coins of ½, 1, 2 and (aluminium) 5 lei, and 20-lei paper notes issued by the Ministry of Finance to the limit of 10% of the National Bank issue.

The official foreign currency exchange has been fixed at £1 = 605·21 lei, $1 U.S. = 150 lei, £T 1 = 51·97 lei, £E 1 = 624·42 lei, £P 1 = 603·40 lei, 1 Swiss franc = 34·88 lei, 1 Dutch florin = 56 lei.

The metric system for weights and measures was introduced in 1876.

Diplomatic Representatives.

1. Of Rumania in Great Britain (4 Cromwell Place, S.W.7).

Envoy Extraordinary and Minister Plenipotentiary.—Nicolae Cioroiu (accredited 13 July, 1950).

First Counsellor.—Nicolae Gonda.

Commercial Secretary.—Ion Albu.

2. Of Great Britain in Rumania.

Minister.—William John Sullivan, C.M.G., C.B.E.
First Secretaries.—R. G. H. Watts; Sir Ian Pritchett (*Commercial*).
Naval Attaché.—Capt. R. G. Mills, D.S.O., D.S.C., R.N.
Military Attaché.—Col. J. A. Stevens, O.B.E.
Air Attaché.—Wing-Cdr. R. E. G. Brittain.

There is a consular representative at Bucharest.

SAAR.

Constitution.—The Saar Diet, elected on 5 Oct., 1947, is composed of 28 members of the Christian People's Party, 17 Social Democrats, 3 Democrats, 1 Communist and 1 Independent.

The Government consists of members of the Christian People's Party and is headed by Johannes Hoffmann, who is also in charge of the ministries of the interior and reconstruction.

French High Commissioner.—M. Grandval.

A series of [illegible], signed in Paris on 3 March, 1950, regulates the relations between the Saar Territory and France, pending the conclusion of a peace treaty between Germany and Allies.

A *general convention* lays down that the Saar is autonomous in legislative, administrative and juridical matters, and that this autonomy is exercised within the framework of the Saar constitution and of the existing agreements between the two countries. These establish economic, customs

and monetary union between the two countries, and France undertakes the responsibility for the foreign policy and the external security of the Saar.

The *convention on the coal-mines* supersedes both the existing arrangement and the French claim made in 1946 to the eventual [illegible] of the mines. This claim is dropped, and France undertakes to [illegible] claim of the Saar Government to the ownership of the mines when a peace settlement with Germany is negotiated. This convention shall run until such time as a peace settlement is signed. If this settlement gives the Saar Government the ownership of the mines, the convention will be prolonged until its total duration is 50 years. The convention, while entrusting the responsibility for the mines to the French and their [illegible] to the mines directorate at Saarbrucken, provides for supervision [illegible] of 18, under a French official chairman, on which Saarlanders and French are equally represented. A mixed board, called the Office Sarrois des Mines, to deal with matters of legislation concerning the mines, is also set up.

The French Government, in return for control and management of the mines, will pay the Saar Government an annual sum based on the total annual production and the current price.

Under the *economic convention* both governments undertake to make no discrimination against the products of the other. In negotiations with third parties the Saar Government's interests will be taken into account, and Saar officials will be invited to take part in the preparatory work. The Saar Government undertakes to refrain from any measures which would give Saar producers an unfair advantage. A mixed economic committee is to be set up, under the chairmanship of the French Foreign Minister or his representative, with 3 French and 4 Saar members.

A fourth convention provides for the setting up of a mixed board to run the *Saar railways*. It will be composed of 6 Saarlanders and 6 French-[illegible] their respective governments, the chairman being a [illegible] and passenger charges will be the same as in France; any exceptions are to be made after consultation with the French authorities.

The *establishment convention* allows nationals of either country to settle and exercise [illegible] or profession in the other, enjoying the same rights as the [illegible] country in which they are settled.

In addition four 'arrangements' regulate road transport, water transport, weights and measures, and the sale of pharmaceutical products.

SAN MARINO.

The independent Republic of San Marino is embraced in the area of Italy. A treaty of friendship with Italy was concluded 28 June, 1897, and renewed on 31 March, 1939. The republic has extradition treaties with Great Britain, Belgium, France, the Netherlands and United States. The fascist regime was overthrown in 1943, and the ancient democracy restored.

By treaty of 22 March, 1862, San Marino is united in a customs union with Italy.

The legislative power is vested in the Grand Council of 60 members elected every 4 years by popular vote, 2 of whom are appointed every 6 months to act as regents (*Capitani reggenti*). The regents exercise

executive power together with the Council of State (*Consiglio di Stato*), which comprises 10 departments. Other organs of government are the *Consiglio dei XII* (juridical authority) and various commissions for art, sports, tourism, etc. There are 35 elementary schools, a technical school and a high school, the diplomas of which are recognized by Italian universities. Civil marriage was legalized in Sept., 1950.

The frontier line is 24 miles in length, area is 38 square miles and the census population (28 Sept., 1947) 12,100.

The revenue and expenditure for 1939–40 balanced at 6,009,919 lire and has risen to about 500 million lire in 1949–50. There is no public debt. The militia consists of all able-bodied citizens between the ages of 16 and 55, with the exception of teachers and students. The chief exports are wine, woollen goods, hides, ceramics and the building stone quarried on Mount Titano. Italian and Vatican City currency is in general use, but the republic issues copper coins (5 and 10 centesimi), silver coins (1, 2, 5 lire) and gold coins (10 and 20 lire), and separate postage stamps. An electric railway from Rimini to the city of San Marino (length, 20 miles) was completed in June, 1932, but partly destroyed during the war. Connexion with Rimini is by bus service.

Consul-General in London.—G. T. MacEwan (20 Moorgate, E.C.2).

SAUDI ARABIA.

(AL-MAMLAKA AL-'ARABIYA AS-SA'UDIYA.)

SAUDI ARABIA is now a single kingdom under the rule of King Abdul-Aziz ibn Abdur-Rahman al-Faisal Al Sa'ud, G.C.B., G.C.I.E. (born in 1880), who had been proclaimed King of the Hejaz on 8 Jan., 1926, and had in 1927 changed his title of Sultan of Nejd and its dependencies to that of king, thus becoming 'King of the Hejaz and of Nejd and its Dependencies.' On 20 May, 1927, a treaty was signed at Jedda between Great Britain and Ibn Sa'ud, by which the former recognized the complete independence of the dominions of the latter. The name of the state was changed to 'The Saudi Arabian Kingdom' by decree of 18 Sept., 1932.

Reigning King.—**Abdul-Aziz.** The king has over 30 sons, of whom the following are most prominent:—Saud, born 1905, the heir apparent; Faisal, born 1907, the Minister for Foreign Affairs and Viceroy in the Hejaz; Mansur, born 1921, the Minister of Defence; Mohammed, born 1913, the Amir of Medina.

Royal flag: green, with white crossed swords and the Koranic text 'There is no God but God and Mohammed is his prophet' in white Arabic characters.

For a short account of the rise of the Wahhabis under Ibn Sa'ud, and of the latter's conquest of Hejaz, *see* THE STATESMAN'S YEAR-BOOK, 1929, pp. 645–47.

Ibn Sa'ud has placed his state in a dominant position among the states

of Arabia. The dual character of his realm is maintained provisionally, and there are still two capitals, Mecca and Riyadh. There are four ministers. The king's eldest son, the Amir Sa'ud, who was formally declared heir apparent on 15 June, 1933, normally resides in Nejd and exercises there the functions of Viceroy and commander-in-chief of the armed forces. It was proposed in 1932 to provide a single constitution for the whole country. This has not yet been done, and the Hejaz is still technically governed under a 'constitution' issued on 29 Aug., 1926, and subsequently amended. In its present form this constitution provides for a Council of Ministers under the Presidency of the Amir Faisal, the King's second son, who is also Minister for Foreign Affairs, and in whose office the Ministry of the Interior has been merged. He acts as Viceroy of the Hejaz in his father's absence. The religious law of Islam is the common law of the land, and is administered by religious courts at the head of which is a chief judge, who is responsible for the Department of Sharia (legal) Affairs. The constitution also provides for the setting up of certain advisory councils, comprising a consultative Legislative Assembly in Mecca, municipal councils in each of the towns of Mecca, Medina and Jedda, and village and tribal councils throughout the provinces. The members of these councils consist of chief officials and of notables nominated or approved of by the King.

The frontiers of the Hejaz are not sufficiently definite to allow of anything like an accurate estimate of its area, which probably does not exceed 150,000 square miles. The population is probably about 2,000,000, of whom Mecca, the capital, accounts for some 200,000, Medina for 50,000, Jedda for 50,000, and Taif for 40,000. The chief port is Jedda, the seaport of Mecca; Yanbu occupies a similar position in relation to Medina; ports of less importance are El Wejh, Rabigh, Lith and Kunfida. Taif, about 5,200 ft. above sea-level and some 50 miles from Mecca, is a summer resort.

Medina produces excellent dates in abundance; Taif and other oases in the mountains and valleys produce honey and a fair variety of fruit: while Beduin products are hides, wool, charcoal and clarified butter. But the exports of the Hejaz are insignificant, and the country depends for existence almost entirely on oil royalties and the annual pilgrimage which brings large numbers of pilgrims from abroad each year. The Saudi Arabian Mining Syndicate operate a gold-mine at Mahad Dhahab, between Mecca and Medina. Their product is shipped from Jedda to the U.S.A. for refining.

The products of Nejd are dates, wheat, barley, coffee, limes, henna, pearls, hides, wool, oil, clarified butter (*saman* or ghi) and abaas (Arab cloaks), besides camels, horses, donkeys and sheep. Oil is exploited by an American concessionary company, the Arabian–American Oil Company, a subsidiary of several major American oil companies, whose principal field is at Dhahran in the Hasa province on the Persian Gulf. Crude oil is shipped from there to Bahrain for refining. A new large refinery has been built at Ras Tannura. The export trade (apart from oil) is still insignificant, though capable of development, especially as regards dates, hides and clarified butter. The export of Arab horses to Bombay is not as active as it was in the past, and the annual export of camels to Syria and Egypt, formerly a steady source of income to the Beduin, is now much reduced owing, *inter alia*, to the rapid development of motor transport in those countries. The chief imports of Nejd are piece-goods, cereals, tea, coffee, sugar, rice and motor vehicles, mostly *via* Jedda, but some *via* the ports on the Persian Gulf.

The population of Nejd is about 4 million. Towns with a population exceeding 10,000 inhabitants are:—Hufuf (about 30,000), Mubarraz,

Riyadh (about 60,000), Shaqra, Anaiza (25,000), Buraida (30,000), Haïl, Jauf, Sakaka and Hauta.

The imports from the United Kingdom into Saudi Arabia according to Board of Trade figures amounted in 1948 to £1,624,306; £3,438,466 in 1949; £2,835,297 in 1950. They included (1948) foodstuffs and beverages (£331,959), machinery (£174,135), vehicles including ships and aircraft (£168,592), tobacco (£146,121), iron and steel and manufactures thereof (£142,190), pottery, glass, etc. (£127,153), electrical goods (£113,527). Exports to United Kingdom were £5,296,854 in 1948, including crude petroleum, 176,900 [illegible], £6,834,513 in 1949; £8,197,761 in 1950. Re-exports in 1948, £2,379; 1949, £22,294; 1950, £28,546.

For defence Ibn Sa'ud depends mainly on a small regular army in the Hejaz. In 1937 a Ministry of Defence and a training school for officers were established. In June, 1938, the King announced his intention to form an army on modern lines, and the policy is now being carried out. A British Military Mission, composed of 40 officers and other ranks, was sent to Saudi Arabia at the beginning of 1947 to help in organizing and training the Saudi regular army. It was followed later in the year by a small British Civil Air Training Mission, which completed its prescribed task in Sept., 1950.

There are no roads, properly so called, in the Hejaz, except the road from Jedda to Mecca (45 miles), which was completed in the autumn of 1941 and was asphalted [illegible] its whole length. There is also a track from Mecca eastward through Ruddi. to Uqair and Dhahran on the Persian Gulf, a distance of 829 miles, which is used for motor transport. A similar route connects Jedda with Medina via Rabigh and Rabigh with Wejh via Yanbu. A road from Jedda to Medina is being built (1950) by a British firm. Motor cars can travel between Riyadh and Kuwait and between Riyadh and Hail, Jauf and the northern frontier towns and also between Jedda and Dhaba and Muwailih and between Jedda and Jizan and Sabya.

A railway is being planned between Riyadh and Ras Tannura on the Persian Gulf. It was begun at the Persian Gulf, and that part of it which lies in the oilfield area is already working. That section of the Hejaz Railway which is in Saudi Arabian territory is not now in working order. At present motor omnibuses ply between Jedda and Mecca and belong to a unified motor-car company, in which all previously privately owned companies have merged their identities. A water supply for Jedda, built by a British firm, was completed in 1947. An American group has been charged with the execution of public works and road building in various parts of the country; the programme includes a deep-water pier at Damman on the Persian Gulf and a deep-water pier at Jedda, both of which were completed in 1950.

Saudi Arabian Air Lines, a government-owned company, operate regular internal air services, a twice-weekly service to Cairo and a weekly service to Beirut, as well as special flights for pilgrims. The pilots are British, Americans and Saudi Arabians.

The English gold sovereign is in practice if not in theory the basis of the currency. On 22 Jan., 1928, a new silver currency, the *riyal*, weighing 24·055 grammes, ·830 fine, was introduced in place of the Turkish *mejidie* currency; ten *riyals* = £1 (gold) at par. The *riyal* is subdivided into 11 *qursh* (piastres) *mini*, and each Q.M. contains 2 *qursh dari*. The Q.D., ½ and ¼ Q.D. are nickel coins. In 1936 the *riyal* described above began to be replaced by a *riyal* of 11·664 grammes, 916·6 fine, the same size, weight and fineness as the Indian rupee and fractions thereof, the new par being 20 *riyals* = £1 (gold). Accounts have to be kept in *riyals*; but a considerable amount of gold coin is in circulation. In July, 1948, the value of the sovereign was fixed at 65 *riyals*; this was amended to 62 *riyals* on 4 Sept.

The same decree made the sovereign legal tender, but its value in relation to the *riyal* has continued to fluctuate. There are in practice no fixed currency rates in Saudi Arabia. A branch of the Netherlands Trading Society of Amsterdam, Messrs. Gellatly, Hankey & Co. (Saudi Arabia), Ltd., a branch of the French Banque de l'Indochine, the British Bank of Iran and the Middle East, and the Arab Bank (of Jerusalem) conduct banking business in Jedda. The Banque de l'Indochine and the British Bank of Iran and the Middle East have branches in Al Khobar.

The oil royalties, paid by the American Oil Company, have greatly increased the financial strength of the Saudi Arabian Government.

A treaty of Arab brotherhood and alliance between Iraq, Saudi Arabia and the Yemen, signed in 1936, was ratified in 1937. On 23 March, 1945, the Arab League was formally set up when the constitution was signed by Saudi Arabia, Egypt, Jordan, Syria, Lebanon and Iraq.

In Nov., 1937, a general agreement between Saudi Arabia and the Yemen concerning the settlement of disputes was ratified, and at the same time and place an agreement regarding the delimitation of the frontiers between Saudi Arabia and the Yemen was negotiated.

In May, 1942, Saudi Arabia and His Majesty's Government, acting on behalf of the Sheikh of Kuwait, signed agreements for friendship and neighbourly relations, for the extradition of offenders and for the regulation of trade between Saudi Arabia and Kuwait.

On 20 June, 1945, at San Francisco, Saudi Arabia signed the Charter of the United Nations.

Diplomatic Representatives.

1. Of Great Britain in Saudi Arabia.

Ambassador Extraordinary and Plenipotentiary.—Alan Charles Trott, C.M.G., O.B.E. (appointed Oct., 1947).

Counsellor.—R. D. J. Scott Fox.

Consul and Oriental Secretary.—E. F. G. Maynard.

Secretaries.—D. J. McCarthy; W. N. Hugh-Jones.

Vice-Consul.—C. Ousman, M.B.E.

2. Of Saudi Arabia in Great Britain (30 Belgrave Square, S.W.1).

Ambassador Extraordinary and Plenipotentiary.—Sheikh Hafiz Wahba, K.C.V.O. (accredited 19 Feb., 1948).

Counsellor.—Shaher El Samman.

Second Secretaries.—Ahmed Safei El-Din, Abdul Rahman Saleh Helaissi.

The United States of America maintain an embassy and the following powers maintain legations at Jedda:—Egypt, France, Iraq, Indonesia, Persia, Turkey, Syria, Lebanon, Italy, Pakistan, Argentina and Jordan. Belgium, India and the Netherlands are represented by consuls.

SPAIN.

(ESTADO ESPAÑOL.)

THE Spanish State was established by General Franco's victory on 1 April, 1939.

Government and Constitution.

I. CENTRAL GOVERNMENT.

For a short account of the Civil War in Spain, 17 July, 1936, to 28 March, 1939, *see* THE STATESMAN'S YEAR-BOOK, 1939. pp. 1325–1326.

On 1 Feb., 1938, the first civil government was proclaimed, with General Franco, possessing dictatorial powers, at its head. On 9 Aug., 1939, the second government of the new state was formed; it was re-constituted on 20 May, 1941, on 3 Sept., 1942, on 21 July, 1945, and is now composed as follows :—

Leader (Caudillo) of the Empire, Chief of the State, Commander-in-Chief of the Armed Forces, Prime Minister and Head of the Falange Party.—General Francisco Franco Bahamonde (born 4 Dec., 1892).

Minister of Foreign Affairs.—Don Alberto Martin Artajo.
Minister of War.—General Fidel Davila Arrondo.
Minister of Marine.—Vice-Admiral Francisco Regalado Rodriguez.
Minister of Air.—General Eduardo Gonzalez Gallarza.
Minister of Justice and (6 Nov., 1948) *Secretary General of the Falange.*—Don Raimundo Fernández Cuesta y Merelo.
Minister of Finance.—Don Joaquin Benjumea Burin.
Minister of Industry and Commerce.—Don Juan Antonio Suanzes Fernández.
Minister of Agriculture.—Don Carlos Rein Segura.
Minister of Education.—Don José Ibañez Martin.
Minister of Public Works.—Don José Maria Fernández Ladreda.
Minister of Labour.—Don José Giron de Velasco.
Minister of Interior.—Don Blas Perez Gonzalez.

On 31 March, 1947, General Franco announced that Spain is to become a monarchy, wit[illegible] council and himself as the head of state. In the case of the [illegible] or death of the chief of state, the regency council is to propose, by a two-thirds majority, a king or regent, who must be accepted by a two-thirds majority of the Cortes. On 6 July, 1947, this 'Law of Succession' was approved by a referendum; out of a total of

17,178,812 electors, 14,145,163 voted for, and 722,656 against it; 351,744 votes were invalid.

National flag : red, yellow, red (horizontal).
National anthem : Marcha granadera.

On 19 April, 1937, the various political groups in the Nationalist Movement were united by General Franco into one single political party, under the title *Falange Española Tradicionalista y de las J.O.N.S.* (generally named *F.E.T. y de las J.O.N.S.*, the last four letters signifying *Juntas de Ofensiva Nacional Sindicalistas*), comprising the *falange española* or falangists created on 29 Oct., 1933, by José Antonio Primo de Rivera, eldest son of the general who was Dictator of Spain from 1923 to 1930, and the traditionalists with the remaining monarchical groups under Goicoechea. The followers of Gil Robles, the right leader of *Acción Popular*, who with his party 'C.E.D.A.' had taken such an active part in the affairs of the Republic, merged into one or other of the above classifications.

This single party is ruled by a National Council composed of 100 members, or *Consejeros Nacionales*. The Government is further assisted by a *Junta Política*, presided over by the Chief Executive of the Movement.

The law of July, 1942, re-established the Spanish *Cortes* (on corporative lines) as the supreme organ of state for the preparation and enactment of laws. The Cortes is composed of *Procuradores* (attorneys), either by election or by virtue of the state office or position held, as follows :—(1) The Cabinet Ministers, 13; (2) the Members of the National Council, 103; (3) the Presidents of the State Council, of the Supreme Court of Justice and of the High Court of Military Justice, 3; (4) the representatives of the National Syndicates, elected from among their bodies, not to exceed one third of the total number of attorneys in the Cortes, 142; (5) the *Alcaldes* or mayors of each of the 50 capitals of provinces, and a representative for the remaining municipalities of each province appointed by the respective Provincial Assembly or *Diputación Provincial*, 102; (6) the heads of the universities, 12; (7) the Presidents of the Institute of Spain and of each of the royal academies composing it, and the 'Chancellor of Hispanity,' 6; (8) the President of the Institute of Civil Engineers, 1; (9) two barristers to represent the inns of court, and one representative each for the medical, pharmaceutical, veterinary and architectural professions, 6; and lastly (10) members appointed by the chief of state, not to exceed 50 in number, among persons of high standing in the ecclesiastical, military, administrative or social life who have rendered eminent services to Spain, 50; making a total of 438.

The Cortes have approved the law known as *Fuero de los Españoles*, proclaimed by General Franco on 18 July, 1945, by which civil rights are granted to the people. The *Fuero*, the Law of Succession, the constitution of [illegible] and similar fundamental laws which may be promulgated at some future date can only be modified or abrogated by a national referendum.

II. Local Government.

The provinces are constituted by the association of municipalities (9,255 in 1940). All municipalities are autonomous in their respective spheres, and at their heads stands the *Ayuntamiento*. The municipal councils are elected by the heads of family; the last elections took place on 21 Nov., 1948. The *Alcalde* or Mayor, together with the *Regidores* or councillors (in Madrid and Barcelona, 34 in numbers), are likewise appointed by the Government. The *Diputaciónes Provinciales* have entire jurisdiction over their own province and are their sole administrators. Each island of the Canaries has a corporation known as *Cabildo Insular*, to rule their

special interests; the Balearic Islands have the same provincial administration as the mainland. Each province of Spain has its own Assembly, the *Diputación Provincial.*

The reconstruction of devastated regions is under the care of the *Direccion General de Regiones Devastadas*, a government department under the Ministry of the Interior, assisted by the *Junta de Reconstruccion*, the *Instituto de la Vivienda* and by the *Instituto de Crédito para la Reconstruccion Nacional*, created by law of March 16, 1939, whose duty is to grant and administer loans approved for reconstructing buildings, industries, [illegible], commerce and mining, and merchant vessels. On 7 Oct., 1939, the chief of the state was authorized to adopt towns, villages and other localities severely damaged by the civil war, and the state was given special powers for expropriation.

Area and Population.

Continental Spain has an area of 490,525 square km., but including the Balearic and Canary Islands, the total area is 503,061 square km. (194,232 square miles). The growth of the population has been as follows :—

Census year	Population	Rate of annual increase	Census year	Population	Rate of annual increase
1857	15,495,212	—	1910	19,927,150	0·42
1860	15,655,467	·340	1920	21,303,162	0·69

In the census of 1940, there were 12,414,490 males and 13,463,481 females.

On 1 Jan., 1950, the population of the two principal towns in Spanish North Africa was: Melilla, 95,841, and Ceuta, 69,652.

By decree of 21 Sept., 1927, the islands which form the Canary Archipelago were divided into two provinces, under the name of their respective capitals: Santa Cruz de Tenerife and Las Palmas de Gran Canaria. The province of Santa Cruz de Tenerife is constituted by the islands of Tenerife, Palma, Gomera and Hierro, and that of Las Palmas by Gran Canaria, Lanzarote and Fuerteventura, with the small barren islands of Alegranza, Roque del Este, Roque del Oeste, Graciosa, Montaña Clara y Lobos. The area of the islands is 7,273 square km.; population (1 Jan., 1950), 818,326.

The following were the registered populations of the principal towns on 1 Jan., 1950, viz.:—

Town	Pop.	Town	Pop.	Town	Pop.
Madrid	1,511,695	S. Cruz de Tenerife	108,657	Albacete	70,009
Barcelona	1,285,920	Alicante	107,596	Huelva	65,633
Valencia	534,866	Santander	107,226	Jaén	64,395
Sevilla	390,755	Gijón	107,156	Sabadell	62,286
Málaga	295,757	Jerez de la Frontera	107,040	Tarrasa	60,080
Zaragoza	271,587	Oviedo	106,825	Badalona	58,617
Bilbao	235,508	Cádiz	99,910	Santiago	58,049
Murcia	220,290	Badajoz	87,941	Elche	57,246
Granada	174,663	Salamanca	87,417	Castellon	56,734
Córdoba	164,415	Vallecas	87,171	Vitoria	55,382
Las Palmas (Canarias)	151,411	Almeria	84,719	Mieres	55,207
Palma de Mallorca	140,966	Lorca	80,952	León	54,287
Vigo	139,170	Pamplona	75,283	Lugo	54,174
Valladolid	130,475	Hospitalet	73,605	Logroño	53,925
La Coruña	129,562	El Ferrol del Caudillo	72,678	Langreo	52,851
[illegible]	120,208	Burgos	72,610	Orense	52,837
[illegible]	116,285			Lérida	52,122
				Linares	52,022

The movement of population for 3 years was as follows:—

Years	Marriages	Births	Deaths	Surplus of births
1947	224,714	582,063	325,289	256,774
1948	213,868	634,924	299,822	335,107
1949	196,473	594,936	316,058	278,878

Number of emigrants (1949), 41,910; immigrants, 5,394.

Religion.

Under the Franco régime Catholicism is again established as the religion of the state. Religious bodies have recovered their legal status; confiscated property has been returned; allowances to clergy are again paid by the state; divorce is suppressed; cemeteries are brought back to ecclesiastical jurisdiction. There are 9 metropolitan sees and 61 suffragan sees, the chief being Toledo, where the Primate resides.

There are about 26,000 Protestants, with 211 churches and chapels outside which no public ceremonies are permitted. There is no liberty for propaganda, and the circulation of Holy Scripture, except in annotated Roman Catholic editions, is forbidden.

Education.

The latest returns (1947) show that 5,064,225 persons over 5 years of age (20·8%) could not read or write.

Primary education is compulsory and free, and religious teaching has been brought back again to its former standing. Educational administration is now controlled by the *Sindicado Español Universitario* (S.E.U.), under which all scholars are invited to syndicate. The *Frente de Juventudes* (Juvenile Front) was created by law of 6 Dec., 1940; it comprises 3 sections (educational, labour, rural) and had, in 1947, 844,663 members. There is also the University Militia for army training under conscription.

The country is divided into 12 educational districts, with the universities as centres.

In 1947–48 there were 55,111 public schools attended by 2,121,958 boys and 2,099,480 girls, with 55,833 teachers (30,030 women). Secondary education is conducted in 'institutos,' or middle-class schools. There were, in 1948, 119 institutos with 212,210 pupils (74,319 girls). These schools prepare for the universities, of which there are 12, attended by 46,926 students (6,474 women), with about 3,280 professors. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, Zaragoza and La Laguna (Canaries). There is, besides, a medical and science faculty at Cádiz in connexion with the University of Seville. There were also (1948) 53 training colleges for elementary teachers, with 24,171 students (17,575 women).

There were 3,583 cinemas in 1949, with a seating capacity of 1,715,000.

Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed (1946) of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 554 *Juzgados de Primera Instancia* (Courts of First Instance), and 9,342 *Juzgados Municipales, Comarcales y de paz* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President (appointed by the Government) and various magistrates distributed among five courts of justice: one for trying civil matters, two for administrative purposes, one for criminal trials and lastly one for social matters. The court for trying military cases is the *Tribunal Supremo de Justicia Militar*, under military jurisdiction. The *Tribunal Supremo* is empowered with disciplinary faculties; is court of cassation in civil and criminal trials; for administrative purposes decides in first and second instance disputes arising between private individuals and the state, and in social matters resolves in the last instance all cases involving over 20,000 pesetas.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters.

The *Audiencias Provinciales* are courts competent to try and pass sentence in first instance on all cases filed for delinquency. The jury system is in operation excepting for military trials.

The *Juzgados Municipales* try small civil cases and petty offences. The

Juzgados Comarcales deal with the same charges, but their jurisdiction embraces larger districts.

The prison population was, in 1949, 37,451.

Social Welfare and Labour.

The Franco administration embodies schemes of wide social range, chief among them is the Labour Charter (*Fuero del Trabajo*), proclaimed on 9 March, 1938, for a better distribution and remuneration of the working classes, with uninterrupted Sunday and feast-day wages. The law of Family Subsidy (*Subsidio Familiar*), which came into force on 1 March, 1939, makes all working people contribute 1% of their earnings, plus an additional 5% from the employers, in a system of social insurance which entitles all families with from 2 to 12 children under 14 years of age to a proportional monthly allowance ranging from 40 to 1,080 pesetas, with an additional 200 pesetas for each child in excess of 12 (1 Aug., 1943). Married workers receive an additional bonus. A decree, published 28 Dec., 1948, extended the system so as to comprise, in addition to family subsidy, also old-age pensions and health and maternity insurances; workers contribute 5% and employers 13%. A decree of 22 Feb., 1941, established state loans on marriage to help large families, and the institution known as *Auxilio Social*, the funds of which are derived among other channels from a fortnightly public collection throughout the country for supplying food and clothing to needy persons and the maintenance of nurseries and infirmaries. A national health insurance for all workers is now also in operation.

By a law dated 27 Feb., 1908, the *Instituto Nacional de Previsión* was founded for the purpose of granting Old Age Pensions and administering a system of social insurance. The family allowance and health insurance schemes, described above, have been incorporated to this Institution. In 1949, 1,040,329,000 pesetas were paid out in family subsidies to 4,657,218 persons; 20,530,000 pesetas were paid out in sickness benefits; 497,035,000 pesetas for old age pensions; 232,526,865 pesetas in injury benefits, and 72,395,193 pesetas for health assistance.

The economic policy is centred on vertical syndicates (trade unions), created under the Charter of Labour by the law of 8 Aug., 1939, substituting the local and provincial syndicates of pre-war days. The law of 23 June, 1941, classified these syndicates into 26 branches of production, each working within its own respective economic sphere, without interrupting their unity or formation. The individual is replaced by the producing concern as a whole, made up of the capitalists, managers, experts and all those rendering some sort of labour, whether intellectual or manual. The vertical syndicate is invested with authority and hierarchy. The appointments are made from top to bottom. At the top stands the National Delegate of Syndicates, who is responsible for his conduct to the Minister who appoints him. Production, wages, prices and the distribution of domestic and foreign merchandise are controlled and legislation has been adopted requiring government permission for the establishment of new industries.

Finance.

Revenue and expenditure for 5 years, in thousands of pesetas :—

	1946	1947	1948	1949	1950
Revenue . .	10,221,286	12,963,524	15,115,035	16,070,570	17,847,974
Expenditure . .	13,638,843	14,223,255	15,196,094	16,628,675	18,652,138

By a law of 18 Dec., 1950, the budgetary period has been made biennial.

The budget for the fiscal years 1950 and 1951 is made up as follows :—

Revenue	Pesetas	Expenditure	Pesetas
Direct taxes	6,944,900,000	Chief of State	4,194,389
Indirect taxes	7,492,500,000	Regency Council	720,000
Monopolies	2,511,750,000	Spanish Cortes	13,016,500
State properties	95,362,000	National Council	49,976,859
Resources of the Treasury	803,462,398	Public debt	2,685,983,085
		Pensions	724,586,920
		High Court of Finance	5,117,585
		Presidency of the Governm't	150,551,642
		Ministry of Foreign Affairs	211,142,142
		" " Interior	2,560,216,579
		" " War	3,166,329,526
		" " Marine	1,146,942,375
		" " Air	1,390,520,763
		" " Justice	648,863,837
		" " Ind. & Commerce	218,346,488
		" " Agriculture	166,823,808
		" " National Education	1,414,098,825
		" " Public Works	1,716,353,391
		" " Labour	265,915,240
		" " Finance	119,618,598
		Cost of collecting revenue	302,324,753
		Expenditure in Morocco	859,998,947
		Special expenditures	230,495,850

The total state debt on 1 Jan., 1950, was 57,458,682,000 pesetas, of which 7,726,304,000 pesetas were Treasury bonds.

Defence.

ARMY.

The Army was reorganized by a decree published on 24 July, 1939, to be constituted by 8 army corps in the Peninsula and 2 in Morocco, in addition to the two *Comandancias Generales* in the Balearic and Canary Islands as heretofore. A decree of 30 Aug., 1939, created the High General Staff of the Army as the highest military authority.

On 21 Aug., 1940, military service was made compulsory for 2 years.

On 20 Dec., 1943, the Falangist Militia were dissolved.

On 1 Jan., 1944, a slight reorganization was made by withdrawing from the 2nd Región Militar the eastern provinces of Granada, Malaga and Almeria which were to form the 9th Región Militar. After this reorganization there were 8 army corps attached to the 8 original military regions; 1 Región Militar, the 9th, with 1 division only and the Capitanias Generales on the Balearic and Canary Islands as heretofore.

The army corps are as follows :—I, Madrid, 2 divisions; II, Sevilla, 2 divisions; III, Valencia, 2 divisions; IV, Barcelona, 2 divisions; V, Zaragoza, 2 divisions; VI, Burgos, 2 divisions; VII, Valladolid, 2 divisions; VIII, Coruña, 2 divisions; 9th Región Militar, 1 division. There are also 1 armoured division and 1 independent cavalry division attached to the 1st Región Militar (Madrid).

In Morocco the army corps are as follows :—IX (Ceuta), 2 divisions; X (Melilla), 2 divisions. There is also 1 armoured brigade and 1 independent cavalry brigade.

NAVY.

Completed	Name	Standard Displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Turrets				
Cruisers								
		Tons	Inches	Inches		21-in.		Kts.
1936	Canarias . .	10,670	2	1	8 8-in.; 8 4·7-in. A.A.	12	90,000	33
1931	Miguel de Cervantes	8,250	3	—	8 6-in.; 8 3·5-in. .	6	80,000	33
1927	Almirante Cervera.	7,976						
1925	Galicia. . .	8,250						
1924	Mendez Nuñez .	4,680	3	—	8 4·7-in. . . .	6	45,000	29
1923	Navarra . .	4,857	3	—	6 6-in.; 4 3·5-in. .	—	25,500	25·5

There are 22 destroyers, 9 sloops, 6 minelayers, 6 submarines, 7 minesweepers, 16 motor torpedo-boats, 26 motor launches, 9 coastguard patrol vessels, 3 training ships, 3 surveying vessels 3 patrol craft, a river patrol boat, 3 oilers, 2 transports, 3 tenders and 12 sea-going tugs. 14 destroyers, 4 submarines, 7 minesweepers, 2 coastguard patrol vessels and 1 training ship are in various stages of construction. Shipbuilding is mainly carried on at the dockyards at Ferrol and Cartagena, Cádiz having a smaller share in it.

There are naval wireless telegraphic stations at Cádiz, Barcelona, Mahon, Pontevedra, Cartagena and Ferrol.

The strength of the naval personnel is 22,300 officers and ratings, including marines.

AIR FORCE.

The Air Force is organized as an independent service, dating from 1939. It consists of the Air Branch and the Air Infantry, the latter for ground duties, including aerodrome defence. The Air Branch includes specialist sections, including parachutists. Commands are regional, viz., the Centre, Straits, Levante, Pyrenees, Atlantic, Baleares, Canaries and West Africa, and the Morocco Zones. There is a small aircraft industry.

The budget for 1951 provided 5,703,792,664 pesetas for the three defence ministries, being 31·6% of the total ordinary budget.

Production and Industry.

Spain is a preponderatingly agricultural country. The General Land Reform Bill, voted by the Republican Cortes on 15 Sept., 1932, providing for expropriation of land on a large scale, is no longer in force; its main principles are being embodied in the newly formed *Instituto de Colonizacion*, for land development.

Land under cultivation in 1948 (in hectares) was :—

Cereals . .	6,978,000	Sugar beet . .	97,000	Fallow . .	4,937,000
Vegetables .	1,249,000	Fruit . . .	557,000	Pasture . .	23,320,000
Vineyards .	1,556,000	Textile crops .	668,000		
Olives . .	2,190,000	Artificial meadows	520,000	Total . .	42,526,000
Potatoes . .	358,000	Kitchen gardens .	86,000		

The area under the principal crops and the yield (for 5 years) were as follows :—

	Area (in 1,000 hectares)					Yield (in 1,000 metric quintals)				
	1945	1946	1947	1948	1949	1945	1946	1947	1948	1949
Wheat .	3,587	3,771	3,838	3,861	—	16,803	36,181	23,617	23,222	—
Barley .	1,524	1,499	1,474	1,434	—	7,110	19,309	11,896	14,246	—
Oats. .	633	634	600	589	—	2,235	6,036	3,535	4,021	—
Rye . .	599	598	607	618	—	2,290	4,770	3,569	3,670	—
Rice .	35	50	51	52	—	2,064	2,064	2,368	2,347	—
Oranges .	81	80	77	77	—	10,599	9,101	5,970	7,536	8,344
Olives (oil)	1,967	1,976	1,989	2,190	—	2,753	1,885	3,883	5,430	1,489
Potatoes .	370	362	359	358	—	26,641	25,576	28,346	27,017	—

In 1948, 1,556,812 hectares were under vines; production of wine in 1949, 14,184,000 hectolitres. In 1948, the area of onions planted was 15,061 hectares, yielding 2,831,112 quintals. Other products are esparto (1,222,498 quintals in 1947), flax, hemp and pulse. Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Murcia, Alicante and other provinces (424 tons were produced in 1949). Spain produces yearly some 6,000 tons of honey and 1,200 tons of beeswax; in 1942, the number of beehives was 752,513. The production of colophony in 1949 was 31,652 metric tons, and that of turpentine was 10,200 metric tons. Alcohol factories in 1948 produced brandy and spirituous liquors to the extent of 69,878,000 litres. Beer factories in operation produced 50,313,000 litres in 1948.

Tobacco crop in 1949 was 29,069 tons.

The number of farm animals in 1948 was estimated as follows :— Horses, 537,546; mules, 915,101; asses, 746,749; cows, 2,069,843; sheep, 25,921,303; goats, 4,221,759; pigs, 2,688,111; domestic rabbits, 4,227,463; fowls, 18,093,372.

Spain is rich in minerals. The quantities and values of the more important minerals in 1949 were as follows :—

Minerals	Metric tons	Value, pesetas	Minerals	Metric tons	Value, pesetas
Anthracite .	1,439,217	188,637,182	Manganese ore	19,304	10,805,505
Coal . .	9,393,275	1,546,075,604	Potash ore .	918,156	45,907,800
Lignite . .	1,338,174	245,523,995	Rock salt .	288,896	5,001,381
Copper ore .	304,235	21,066,723	Sulphur ore .	38,284	2,951,000
Iron ore . .	2,769,301	198,880,957	Tin ore . .	815	28,938,772
Iron pyrites .	1,254,809	101,509,912	Zinc ore .	92,837	44,109,510
Lead ore .	44,034	153,189,357	Wolfram ore .	819	23,202,597

Preliminary figures of output for 1950 (in 1,000 metric tons) :—Anthracite, 1,468; lignite, 1,344; iron ore, 3,013; pyrites, 1,320; potassic salts, 1,039; lead ore, 45·4; tin ore, 1·3; zinc ore, 119·2; wolfram, 0·8.

In 1949, 250.115 workers were employed in the mining and metallurgical industries, of whom 152,757 worked in mines. The total value of the mining and metallurgical production was 8,422,251,768 pesetas, of which 2,865,628,388 pesetas came from mines and quarries.

Spain has considerable manufactures of cotton and woollen goods, principally in Catalonia. It is estimated that there are 2,703 factories in operation, with 79,684 looms and 2,341,526 spindles, employing 161,478 labourers (120,794 women), producing yearly 98,000 tons of manufactured articles. There are in Spain 203 paper mills, which produced in 1949

140,207 tons of writing, printing, packing and cigarette paper. The production of cork in 1949 was 55,195 tons.

Electric power-stations numbered 1,232 (1,002 hydraulic) with a total horse-power of 2,836,293 and the total output registered amounted to 5,629 million kwh. in 1949.

The production of cement reached 2,247,607 tons in 1949.

In the Spanish fisheries the most important catches are those of sardines, tunny fish and cod. The total production of the fishing industry amounted in 1949 to 550,953 tons, representing a value of 2,309,993,000 pesetas. In the tinned fish industry there were 1,201 factories, producing 91,407 tons. The Spanish fishing fleet consists of 40,161 vessels, including 8,581 steam or motor boats.

Commerce.

Imports and exports (in thousands of pesetas, gold) :—

Year	Imports	Exports	Year	Imports	Exports
1937	344,259	192,745	1946	923,416	880,656
1940	620,309	391,052	1947	1,214,454	938,096
1942	609,605	630,756	1948	1,440,687	1,114,343
1944	826,605	878,334	1949	1,399,425	1,176,654

The trade for 1948 and 1949 was made up as follows (in metric tons, and 1,000 gold pesetas):—

	1948				1949			
	Imports		Exports		Imports		Exports	
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value
Raw material	1,290,872	401,426	2,476,281	110,610	1,828,292	445,867	2,510,053	116,474
Manufactured goods	1,009,027	398,357	268,989	249,209	1,196,460	426,258	329,905	224,798
Foodstuffs	513,705	373,941	541,823	445,498	621,077	251,283	791,660	538,186
All other	2,078	15,125	236	15,830	2,088	17,708	134	14,151
Canaries, and possessions in Africa	654,874	251,836	378,404	293,194	811,462	258,309	310,462	290,741
Total	3,470,556	1,440,687	3,365,733	1,114,343	4,459,373	1,399,425	3,942,211	1,176,653

In 1949 Spain exported 426,104 metric tons of oranges: to the United Kingdom 109,325, to Belgium and Luxemburg 39,998, to the Netherlands 35,324, to Sweden 31,694, to Switzerland 10,285, to France 126,516, to Norway 7,060, to Germany, 32,306.

Total trade between Spain and the United Kingdom in £ sterling Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K.	5,675,604	14,939,381	17,468,086	18,697,563	25,512,002
Exports from U.K.	3,444,259	6,140,756	10,456,954	9,695,876	9,396,624
Re-exports from U.K.	710,604	348,142	413,945	479,961	690,954

Imports into the United Kingdom from the Canary Islands amounted to £8,950,383 in 1947; £12,228,221 in 1948; £15,026,307 in 1949. Exports

from the United Kingdom to the Canaries, 1947, £887,904; 1948, £2,727,292; 1949, £1,758,494.

In Dec., 1948, special exchange rates were established to facilitate Spanish exports to the sterling and dollar countries, Belgium, Denmark, the Netherlands, Portugal, Sweden and Switzerland.

Shipping and Navigation.

The merchant navy on 1 Jan., 1950, contained 1,392 vessels of a gross tonnage of 1,198,253.

Barcelona, Bilbao, Seville and Cadiz are the chief of the 26 naval yards.

The ships entered and cleared in the foreign and national trade in 3 recent years were as follows :—

Year	Entered			Cleared		
	Number of ships	Tonnage registered	Tons discharged	Number of ships	Tonnage registered	Tons charged
1947	8,380	10,768,912	3,012,950	8,380	10,768,912	3,569,901
1948	9,179	12,500,624	3,900,070	9,179	12,500,624	3,881,917
1949	7,425	9,153,886	4,821 217	7,425	9,153,886	3,974,639

Communications.

In 1949 the total length of highways and roads in Spain was 110,478 km., of which 82,398 km. were macadamized. Number of motor cars was 118,112.

The total length of the railways in Spain in 1949 was 17,823 kilometres (11,068 miles), of which 12,899 kilometres (8,010 miles) are of a broad gauge (1·67 metres or 5·48 feet) and 4,782 kilometres (2,972 miles) are of varying gauges, chiefly 1 metre (3·28 feet). There are 1,541 kilometres (925 miles) of lines electrified. On 1 Feb., 1941, the Spanish railways, of normal gauge only, passed into state ownership, irrespective of the date of the expiration of the concession, and became controlled by a government board known as the *Red Nacional de Ferrocarriles Españoles* (R.E.N.F.E.). The gauge of the principal Spanish railways has hitherto, for strategic reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful.

Number of passengers carried in 1949 by government owned lines was 110,054,000; operating revenue was 2,815,421,000 (1948, 2,786,184,000) pesetas; operating expenditure, 3,495,258,000 (1948, 3,067,487,000) pesetas.

There were 22 main lines of normal gauge and 55 of narrow gauge, the most important being those in the North, with 3,803 kilometres (2,362 miles); M[illegible] S[illegible] (system Antigua and Catalana), 3,670 kilometres [illegible], 1,644 kilometres (1,021 miles); Madrid–Caceres–Portugal and West, 1,587 kilometres (985 miles); South of Spain, 397 kilometres (246 miles); La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (194 miles), and Calatayud–Teruel–Valencia (Central de Aragon), 299 kilometres (186 miles). Length of subways in Madrid (1944) was 32 kilometres (20 miles); in Barcelona 17 kilometres (10½ miles).

The receipts of the post office in 1949, were 306,987,000 pesetas; expenses, 278,663,000 pesetas. There were 12,451 post offices.

The length of lines of telegraphs in Spain in 1949 was 41,187 kilometres

(25,066 miles). The number of telegraph offices was 2,118; receipts, 138,400,000 pesetas; expenses, 175,300,000 pesetas.

In Oct., 1924, the entire telephone system of Spain was taken over by the 'International Telephone and Telegraph Corporation' of New York, and a Spanish company constituted 'Compania Telefonica Nacional de España,' whose purpose is to provide an automatic service throughout the urban system. The service came in exclusively Spanish ownership in July, 1946. At the end of 1949 there were in service 3,558 exchanges, with 591,948 telephones.

The 'Compañia Nacional de Telegrafia sin Hilos' holds the Government concession for the public service with ships, and between the Peninsula and the Canary Islands, and the international service with England, Italy, France, Switzerland and America, as well as various special press services. The National Radio Service 'Redera' operates a broadcasting station at Arganda, 15 miles from Madrid.

The overseas radiotelegraph circuits are operated in Spain mainly by Transradio Española, S.A. Under an agreement with Cable and Wireless Ltd., London, Transradio Española lease and operate the Bilbao end of the Bilbao–Great Britain cable and the Barcelona end of the Barcelona–Marseilles cable.

Civil Aviation.—The most important Spanish airline is "Iberia"; it maintains a regular service with Tangier, Spanish Morocco, the Balearic and Canary Islands, Lisbon, Switzerland, London, Buenos Aires, Venezuela, Cuba and the U.S.A.

In 1949, 19,426 aircraft entered Spain, carrying 234,790 passengers and 3,576 tons of merchandise; 249,460 passengers and 4,070 tons of merchandise left Spain by air.

Banking and Credit.

On 1 Jan., 1922, the Bank of Spain came under the Bank Ordinance Law, according to which the Government participates in the net profits of the bank, up to certain limits. The monopoly of note issue was prorogued for another 25 years, up to 31 Dec., 1946. The capital of the bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. The bank is now authorized further to increase the capital, up to the limit of 250,000,000 pesetas. The law of 13 March, 1942, regulates the balance of the Bank of Spain after the civil war, and provides for the issue of Treasury bonds amounting to 4,437,782,014 pesetas as a guarantee to offset liabilities of the war period entered by the Republican Government—notes in circulation and readjustment of current accounts among other matters. On 31 Dec., 1946, a bank ordinance was issued, regulating the activities of private banks. On 30 Sept., 1950, the note circulation totalled 29,490,585,418 pesetas and the gold holdings of the Bank of Spain amounted to 186,796,405 pesetas (gold), valued in 668,170,742 pesetas (paper). The total silver holdings amounted to 411,848,096 pesetas (paper). A decree of 11 July, 1941, established the voluntary nationalization of foreign banks in Spain, and the transference and amalgamation of the business of national banks.

On 18 Dec., 1950, the authorized issue of bank-notes was raised from 28,000 million (11 Jan., 1948) to 35,000 million pesetas.

Gold reserves in Jan., 1950, consisted of:—Revalued gold of Bank of Spain, 471,935,535 pesetas; authorized gold acquisition, 28,279,165 pesetas; treasury gold, 147,115,600 pesetas; gold of institute of foreign exchange, 19,929,562 pesetas; gold in current accounts, 910,764 pesetas.

Savings bank deposits (Popular Savings Banks) in Spain, 31 Dec., 1949, amounted to 21,314,500,000 pesetas. Post office savings banks, which were created under the law of 4 June, 1909, were opened on 12 March, 1916. Deposits in Dec., 1949, amounted to 905 3 million pesetas. Private banks saving deposits amounted in Dec., 1949, to 8,377 million pesetas.

By a decree of 20 Nov., 1941, the post office savings bank opens a savings account with an initial entry of one peseta for every Spanish child born.

Money, Weights and Measures.

The *peseta* of 100 *centesimos* is of the nominal value of a pre-war franc, 9½*d.*, or 25·22 pesetas to the pound sterling. The exchange value of the peseta has not been restored to parity since the war.

Bank-notes of 1,000, 500, 100, 50, 25, 5, 2 and 1 peseta value are in circulation. In Feb., 1941, new coins made of aluminium, tin and copper were put in circulation, consisting of 10 and 5 centime pieces. In Oct., 1944, 1 peseta coins made of copper (90%) and aluminium (10%) and in Oct., 1949, 5-peseta coins made of nickel were put in circulation.

On 1 Jan., 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are:—The *quintal* = 220·4 lb. avoirdupois; the *libra* = 1·014 lb. avoirdupois; the *arroba*, for wine = 3½ imperial gallons; or oil = 2¾ imperial gallons; the *square vara* = 1·09 vara = 1 yard; the *fanega* = 1½ imperial bushel.

Diplomatic and Consular Representatives.

1. Of Spain in Great Britain (24 Belgrave Square, S.W.1).

Ambassador.—Duke Miguel Primo de Rivera, Marques de Estella (accredited 12 April, 1951).

Minister Counsellor.—Luis Olivares y Bruguera Conde de Artaza.

Economic Counsellor.—Jaime Alba.

Counsellor.—Diego Buigas de Dalmau.

First Secretary.—Guillermo Nadal.

Secretaries.—Antonio Cirera; Aurelio Valls.

Military Attaché.—Col. Joaquin de Ysasi-Ysasmendi y Arostegui.

Naval Attaché.—Capt. Rafael Fernández de Bobadilla.

Air Attaché.—Lieut.-Col. Carlos Rute Villanova.

Commercial Attachés.—Rafael Jaume; Juan José Rovira.

Agricultural Attaché.—Serafin Sabucedo del Arenal.

Press Attaché.—José J. Brugada.

There are consular representatives at Cardiff, Glasgow, Liverpool, Newcastle and Southampton, and Consular agents in all the principal towns.

2. Of Great Britain in Spain.

Ambassador.—Sir John Balfour, K.C.M.G. (appointed March, 1950).

Minister-Counsellor.—F. R. H. Murray, C.M.G.

Counsellor.—B. Malley, M.B.E.

Secretaries.—R. P. Heppel; S. S. C. Simmons; E. U. Penrose-Fitzgerald, O.B.E.

Commercial Counsellor.—G. C. Pelham, C.M.G.

Commercial Secretary.—W. C. Hacon.

Naval and Air Attaché.—Cdr. W. F. R. Segrave, D.S.C., R.N.

Military Attaché.—Brig. A. Murray.

Civil Air Attaché.—Air Marshal D. Colyer, C.B., D.F.C.

Attaché.—Professor W. F. Starkie, C.B.E.

Shipping Attaché.—G. D. Leinster, M.B.E.
Consul-General at Barcelona.—H. C. McClelland, C.B.E.

There are consular representatives at Bilbao, Cádiz, Coruña, Fernando Pó, Málaga, Seville, Valencia, Vigo and other places.

Colonies.

The area and population of the colonial possessions of Spain are approximately as follows :—

Colonial possessions	Area : English square miles	Population (1945)
Possessions in Africa :		
Morocco		
Places of Spanish sovereignty in the Northern Zone : Alhucemas, Ceuta, Chafarinas, Melilla, Peñon de Velez	82	167,693
Ifni Territory (Spanish sovereignty) . . .	741	40,000
Spanish Protectorate of the Northern Zone . .	7,592	1,082,009
Spanish Protectorate of the Southern Zone . .	10,039	20,000
Total, Morocco	18,454	1,309,702
Spanish Sahara		
Territories of Rio de Oro and Seika el Hamra (estimated)	105,409	40,000 [1]
Spanish Guinea		
With the islands of Fernando Pó, Corisco, Elobey and Annobon	10,852	170,582
Total, Africa	134,715	1,520,284

[1] Exclusive of 31,000 nomads who, with their flocks, enter the Spanish Sahara after the rainy season.

The establishment of new foreign enterprises of any kind in the territories of Spanish West Africa has been prohibited by a presidential order of 27 Nov., 1950. Foreign enterprises already established may continue their activities, but without the possibility of extending the scope or increasing the capital.

The Spanish **Territory of Ifni** is situated on the Atlantic coast at 1,300 kilometres from Tetuan. It is bounded to the south by the Asaka River (called Nun by France). Its area is 1,920 square kilometres (741 square miles), the population 35,000 inhabitants, of which the capital is Sidi Ifni. Ifni was ceded to Spain by Morocco is 1860, but the occupation was purely nominal until 6 April, 1934; on that date the Spanish flag was hoisted for the first time. The limits of the colony fixed by the treaty with France in 1912 were reduced by the French Government to an area of 1,920 square kilometres (approximately) in 1935. There is a politico-military government for Ifni and the Spanish Sahara which resides in Cabo Juby and depends from the High Commissioner of Morocco, who resides in Tetuan. There are two sub-governors, one for Ifni and the other for Cabo Juby, who have under their jurisdiction the territories of Rio de Oro and Sekia el Hamra.

For the **Spanish Northern Zone of Morocco**, *see* p. 1047.

The **Southern Protectorate of Morocco** is situated between the Atlantic on the west, from the Cabo Juby to the Wad Nun or Draa on the north, the meridian 11° (Paris) on the east, and the latitude 27° 40′ in the south, according to the Hispano-French Agreement of 1904. The area of the protectorate is 26,000 square kilometres (10,039 square miles), and the population about 13,000 inhabitants. The chief towns are Cabo Juby and Puerto Cansado.

The Spanish **Sahara** in the south of the Southern Protectorate includes two zones: Rio de Oro, 190,000 square kilometres (73,362 square miles) in extent), and Sekia el Hamra, 83,000 square kilometres (32,047 square miles) in extent. It begins in Cabo Blanco, 20° 46′ N. and 17° 3′ W. The frontier line goes through the centre of the peninsula of the Cabo Blanco to the latitude 21° 20′ N. which follows up to the meridian 15° 20′ W. T[illegible] to the Treaty of 1900 with France. Then the line frontier [illegible] around the Adrar Temar, leaving to France the Yjil salt-mines. After that it goes up to the Tropic of Cancer and to its intersection with the meridian 14° 20′ W. (Paris), and to the north to the latitude 27° 40′ N., which is the southern limit of the Spanish Southern Protectorate of Morocco. The chief towns are Villa Cisneros in Rio de Oro on the Atlantic and Smara in Sekia el Hamara.

Spanish **Guinea** has an area of 28,051 square kilometres (10,852 square miles) and a population of 170,582 (4,124 whites). Continental Guinea has an area of 26,000 square kilometres, with about 134,000 inhabitants. The chief town is Bata. The islands have an area of 2,105 square kilometres (813 square miles), with a population of 36,144 inhabitants (1,635 whites). The chief island is Fernando Pó, area 2,017 square kilometres (800 square miles), and 33,980 inhabitants, half of whom reside in the district of Santa Isabel, the capital. The Governor of the whole colony resides in Santa Isabel. The other islands are Annobon (7 square miles), Corisco (5½ square miles), Little Elobey (22 acres) and Great Elobey (¾ square mile). There is a sub-governor in Bata and another in Elobey.

In 1947, Guinea exported to Spain 129,142 metric quintals of cocoa valued at 36 million pesetas (gold), 45,823 metric quintals of coffee valued at 24 million pesetas (gold), 50,000 metric quintals of vegetables and fruits valued at 2 million pesetas [illegible], and 56,875 metric tons of wood valued at 7 million pesetas (gold). [illegible] production in 1948 was about 14,000 metric tons, and in 1949, 16,000 metric tons; two-thirds come from Fernando Pó.

According to a decree of 16 April, 1935, the Spanish territory on the Gulf of Guinea is divided into two districts, Fernando Pó and Continental Guinea. The first includes the island of Fernando Pó; the second the continental zone, together with the archipelago of islands from Great Elobey to Little Elobey and Corisco and the island of Annobon, the whole under a governor-general, assisted by a sub-governor and a secretary-general. Each of the districts (*demarcaciones*) into which the colony is divided (three for Fernando Pó and ten for Continental Guinea), is under a 'territorial administrator,' who has at his disposal the colonial guard. The aborigines of Fernando Pó are called Bubis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives.

SWEDEN

(SVERIGE)

Reigning King.

Gustaf VI Adolf, born 11 Nov., 1882, succeeded on the death of his father, King Gustaf V, 29 Oct., 1950. Married: (1) 15 June, 1905, to Princess Margaret Victoria, born 15 Jan., 1882, died 1 May, 1920, daughter of Prince Arthur, Duke of Connaught; (2) 3 Nov., 1923, to Lady Louise Mountbatten, born 13 July, 1889, daughter of Prince Louis of Battenberg, afterwards 1st Marquess of Milford Haven.

Children of the King by his first Marriage.

(1) Prince Gustaf Adolf, born 22 April, 1906, died 26 Jan., 1947; married, 19 Oct., 1932, to Princess Sibylla, born 18 Jan., 1908, daughter of Duke Karl Eduard of Saxe-Coburg-Gotha; issue: Princess Margaretha, born 31 Oct., 1934, Princess Birgitta, born 19 Jan., 1937, Princess Désirée, born 2 June, 1938, Princess Christina, born 3 Aug., 1943; Prince Carl Gustaf, Duke of Jamtland, *heir apparent*, born 30 April, 1946; (2) Princess Ingrid, born 28 March, 1910; married, 24 May, 1935, to Frederick, Crown Prince of Denmark (King Frederick IX), born 11 March, 1899; (3) Prince Bertil, Duke of Halland, born 28 Feb., 1912.

Brother of the King.

Prince Wilhelm, Duke of Södermanland, born 17 June, 1884, married 3 May, 1908, to Grand Duchess Maria Pavlovna, born 19 April, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced 17 March, 1914;

Uncles of the King

I. Prince *Oscar* Bernadotte, Count of Wisborg, born 15 Nov., 1859. Renounced his succession to the throne and married, 15 March, 1888, Ebba Munck of Fulkila, born 24 Oct., 1858, died 16 Oct., 1946. One of his sons, Count Folke Bernadotte (born 2 Jan., 1895), [illegible] of the Swedish Red [illegible] rld War and as [illegible] alestine in 1948; he [illegible] in Jerusalem, 17 Sept., 1948.

II. Prince *Carl*, Duke of Västergötland, born 27 Feb., 1861. Married 27 Aug., 1897, to Princess Ingeborg, born 2 Aug., 1878, daughter of King Frederik VIII of Denmark. Issue, Princess Margaretha, born 25 June, 1899, married 22 May, 1919, to Prince Axel of Denmark, Princess Märtha, born 28 March, 1901, married 21 March, 1929, to the Crown Prince Olaf of Norway.

King Gustaf VI Adolf is the sixth sovereign of the House of Bernadotte and great-great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Riksdag, 21 Aug., 1810, and ascended the throne 5 Feb., 1818, under the name of Carl XIV Johan. He was succeeded, 8 March, 1844, by his only son Oscar. The latter died 8 July, 1859, and was succeeded by his eldest son Carl XV, at whose death in 1872 without male children, the crown fell to his next surviving brother, Oscar II, who was succeeded in 1907 by his son Gustaf V, the father of the present king.

The royal family of Sweden have a civil list of 2,632,500 kronor. The sovereign, besides, has an annuity of 300,000 kronor, voted to King Carl XIV Johan and his successors on the throne of Sweden.

The following is a list of the kings and queens of Sweden, with the dates of their accession from the accession of the House of Vasa:—

House of Vasa.	
Gustaf I	1523
Eric XIV	1560
Johan III	1568
Sigismund	1592
Carl IX	1599
Gustaf II Adolf	1611
Christina	1632
House of Pfalz-Zweibrucken	
Carl X Gustaf	1654
Carl XI	1660
Carl XII	1697
Ulrica Eleonora	1718
House of Hesse.	
Fredrik I	1720
House of Holstein-Gottorp.	
Adolf Fredrik	1751
Gustaf III	1771
Gustaf IV Adolf	1792
Carl XIII	1809
House of Bernadotte.	
Carl XIV Johan	1818
Oscar I	1844
Carl XV	1859
Oscar II	1872
Gustaf V	1907
Gustaf VI Adolf	1950

Constitution and Government.

The fundamental laws of the kingdom of Sweden are:—1, the constitution or *Regerings-formen* of 6 June, 1809; 2, the amended regulations for the formation of the *Riksdag* (Diet) of 22 June, 1866 (modified by Acts passed in 1909 and 1921); 3, the law of royal succession of 26 September, 1810, and 4, the law on the liberty of the Press of 5 April 1949. The King must be a member of the Lutheran Church. His constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the Crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and the councillors of six towns, not represented in the 'Landstings.' The constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. All members of the First Chamber, men or women, must be above 35 years of age, and must have the right to vote in municipal affairs. They are elected for the term of eight years. A candidate to the First Chamber may stand for election in any constituency. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 21 years of age and not under wardship having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the kingdom it contains. All men and women who are entitled to vote and are above 25 years of age have the right to stand for election, but only in their own constituencies. The manner of election to both chambers is proportional and regulated by a special election law. The places to be given to the different groups of voters are decided according to the d'Hondt rule. The members of both chambers obtain salaries for their services, at the rate of 750 kronor or 1,000 kronor per month for members living in or outside the capital, besides travelling expenses. Former members of the Riksdag receive a pension when 65 years old, if they have been members for at least 8 years.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Prime Minister The Ministry (Social Democratic Cabinet) appointed on 31 July, 1945, is composed as follows:—

Prime Minister.—Tage Erlander.
Minister for Foreign Affairs.—Dr. Östen Undén.
Minister of Justice.—Herman Zetterberg.
Minister of Defence.—Allan Vougt.
Minister for Social Affairs.—Dr. F. Gustav Moller.
Minister of Communications.—Torsten Nilsson.
Minister of Finance.—Dr. P. Edvin Sköld.
Minister of Education and Ecclesiastical Affairs.—Miss Hildur Nygren.
Minister of Agriculture.—Gunnar Sträng.
Minister of Commerce.—John Ericsson.
Minister of the Interior and Health.—Eije Mossberg.
Minister for Wages and Pensions of Government Employees.—John Lingman.
Ministers without Portfolio.—Nils Y. E. Quensel, Gunnar Danielson, Sven O. M. Andersson, Dag H. A. C. Hammarskjöld.

All the members of the Council of State are responsible for the acts of the Government.

The Second Chamber, elected 19 September, 1948, has 112 Social Democrats, 23 Conservatives, 30 of the Peasant Party, 57 of the People's Party and 8 Communists. The Upper Chamber is composed as follows for 1951:—79 Social Democrats, 22 Conservatives, 25 of the Peasant Party, 20 of the People's Party and 4 Communists.

The provincial administration is entrusted in Stockholm to a governor, and in each of the 24 counties to a prefect, who is nominated by the King. As executive officers of the prefects there are 411 sub-bailiffs. The right of the people to regulate their own local affairs is based on the municipal laws of 6 June, 1930. Each rural parish, and each town, forms a commune or municipality in which all men and women over 21 years of age, and not under wardship, are entitled to vote. In small communes and towns the parish or town assembly may itself decide on all questions of administration, police and communal economy. It may, however, elect a parish or town council to decide on the questions, and all communes with more than 700 inhabitants have to do so. These councils are named *Kommunalfullmaktige* in the country and *Stadsfullmaktige* in the towns. Ecclesiastical affairs are in all communes with more than 1,500 inhabitants, dealt with by councils, named *Kyrkofullmäktige*, and smaller communes may make the same arrangement. An act of parliament, effective in 1952, has reduced the number of communes from 2,500 to 1,032 (including 133 towns and cities). Each county has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage. Towns having a population of at least 100,000 are in their right to separate from the 'Landstings.' Towns which are administered separately by their municipal councils are Stockholm, Goteborg, Malmö, Norrkoping, Halsingborg and Gavle. All elections are conducted on the proportional system.

National flag: yellow cross on blue.

National anthem: Du gamla, du fria, du fjällhöga Nord (words by R. Dybeck; folk-song).

Area and Population.

I. Progress and Present Condition.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. Since 1860 a general census has been taken every 10 years and, from 1935, at intervals of 5 years.

The area and population of Sweden, according to estimates for 31 Dec., 1948 and 1949, are as follows:—

Counties (Län)	Area: square kilometres (land and inland water)	Population 31 Dec., 1948	Population 31 Dec., 1949	Pop. per square km (land) 1949
Stockholm (city)	187	710,591	733,615	4,044
Stockholm (rural district)	7,690	358,654	350,924	48
Uppsala	5,320	151,662	153,384	30

Lakes Vanern, Vattern, Mälaren, Hjalmaren	9,078	—	—	—
Total	449,166	6,924,888	6,986,181	17·0

On 31 Dec., 1949, there were 3,480,604 males and 3,505,577 females. The growth of the population has been as follows :—

Census year	Population	Intercensal increase % per annum	Census year	Population	Intercensal increase % per annum
1930	6,142,191	0·39	1940	6,371,432	0·38
1935	6,250,506	0·35	1945	6,673,749	0·93

On 1 Jan., 1951, there were 99,588 foreigners in Sweden, including subjects of the Baltic states 21,926, Denmark 14,643, Norway 12,121, Finland 16,839, Germany 11,527, Poland 6,146, U.S.A. 1,258, Hungary 1,388, Czechoslovakia 1,262, Great Britain 915. These figures refer only to persons who have been granted a permit of residence; children under 16 years of age are not included.

Movement of the Population.

1. *Vital Statistics.*

Year	Total living births	Of which illegitimate	Still-born	Marriages	Divorces	Deaths exclusive of still-born
1946	132,597	12,383	2,935	63,800	6,988	70,635
1947	131,565	12,082	2,786	59,670	7,058	73,579
1948 [1]	126,392	11,780	2,468	56,709	6,748	67,740
1949 [1]	120,917	11,082	2,479	54,430	7,602	69,222
1950 [1]	115,359	—	2,310	54,185	—	70,009

[1] Provisional.

2. *Migration.*

Year	Immigrants	Total emigrants	To U.S.A.	Year	Immigrants	Total emigrants	To U.S.A.
1944	13,340	549	30	1947	31,399	6,451	1,813
1945	21,126	8,261	160	1948	32,935	9,784	3,184
1946	31,422	6,915	1,057	1949	23,997	14,174	3,395

II. Principal Towns.

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and at the beginning of 1950, 3,225,830, showing an increase of from 11% of the whole population of Sweden (in 1860) to 46·2% (in 1950).

Towns over 20,000 inhabitants at the beginning of 1950:—

Stockholm	733,615	Jonkoping	43,240	Uddevalla	24,219
Göteborg	349,145	Solna	36,476	Sundbyberg	24,098
Malmö	189,232	Karlstad	35,047	Kristianstad	23,920
Norrkoping	84,035	Halmstad	34,886	Trollhättan	23,703
Hälsingborg	71,151	Lund	33,636	Borlänge	20,947
Örebro	65,690	Karlskoga	30,830	Östersund	20,905
Uppsala	61,539	Karlskrona	30,817	Luleå	20,828
Västerås	57,829	Kalmar	26,520	Mölndal	20,544
Borås	57,043	Sundsvall	25,386	Lidingo	20,048
Linkoping	53,232	Landskrona	25,019	Nykoping	20,045
Eskilstuna	52,742	Sodertälje	24,663		
Gavle	46,180	Motala	24,298		

Religion and Education.

The mass of the population belong to the Lutheran Protestant Church, recognized as the State religion. There were 13 bishoprics (Uppsala being the metropolitan see) and 2,549 parishes at the beginning of 1951. At the census of 1930, 'Evangelical Lutherans' (the National Church) were more than 99% of the population. However, the Protestant Dissenters (Baptists, 56,898; Methodists, 11,450; members of the 'Missions-forbundet,' 101,171, and of the 'Filadelfia,' 31,969) nearly all at that time belonged to the National Church. Of other creeds, there were 4,818 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,653 Jews and 5,984 others. A few civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The kingdom has 2 universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 3,435 and the latter 2,813 students in the autumn of 1949. There are also state faculties of medicine in Stockholm (founded in 1810), with 911 students, and in Göteborg (founded in 1949), with 41 students, and private but subsidized universities in Stockholm (founded in 1877), philosophical and law faculties, with 2,416 students, and Goteborg (founded in 1889), philosophical faculty, with 657 students. In Stockholm and Göteborg there are also academies of commerce. Near Uppsala there is an academy of agriculture. In 1949 there were 393 secondary schools, with 124,622 pupils (including 219 state schools with 82,862 pupils); 70 people's high schools, 8,255 pupils; 2 high and 15 elementary technical schools, 6,400 pupils; military schools, navigation schools, agricultural schools, veterinary and other special schools; besides institutions and schools for the deaf mutes and the blind. Public elementary instruction is free and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. School attendance is compulsory for 7, in certain districts, *e.g.*, the main cities, for 8, years. In 1949 there were in the elementary schools, 28,382 teachers and 589,775 pupils. A course in the continuation schools is also compulsory for those not entering any other school; the pupils in 1948–9 were 51,466; the instruction is carried on either in the day or in the evening. There are also municipal apprentice schools in many towns.

A great number of children in elementary and secondary schools receive one free meal per day.

There were, in 1950, 2,532 cinemas with a seating capacity of 590,000.

Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the *Justitie-Kansler*, or Chancellor of Justice, and the *Justitie-Ombudsman*, or Attorney-General, exercise a control over the administration. The former also acted as chief public prosecutor, but this office now is a separate one (the *Riksadklagaren*); both are royal appointments. The *Justitie-Ombudsman*, appointed by the Diet, has to extend a general supervision over all the courts of law and the civil service. Since 1915 a *Militie-Ombudsman*, also appointed by the Diet, exercises control over military laws and the military services. The kingdom, which possesses one Supreme Court of Judicature, is divided into 6 high court districts and 165 district courts divisions, of which 49 are urban districts and 116 country circuits.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors (or, in case of severe crimes, in the same way as in the country); in the country by a judge and a number of jurors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. Trial by jury exists only for affairs of the liberty of the Press. New regulations for legal procedure came into force in 1948.

Social Insurance.

Old-age and Disablement Pension.—The national pensions scheme entitles all persons aged 67, irrespective of their income, to an old-age pension amounting to 1,000 kronor for single persons and to 1,600 kronor for married couples. Before the age of 67, persons incapable of work receive a disablement pension or sickness allowance, which consists of a basic pension of 200 kronor irrespective of the pensioner's income, and of a supplementary pension depending on the pensioner's income and amounting up to 800 kronor for single persons and up to 600 kronor for married persons. Widows receive under certain circumstances a pension up to 600 kronor.

The pension benefits are in certain cases raised by housing increment, special housing increment, wife's allowance, extra allowance for blindness, etc. The housing increments vary in size between 100 and 600 kronor. Special housing increment is subject to the decision of the local authorities. Wife's allowance consists of supplementary pension and housing increment, amounting to the same sum as the wife would have received, in the form of those benefits had she been entitled to a disablement pension. Extra allowance for blindness amounts to 700 kronor per annum irrespective of the size of other incomes.

The total cost, in 1949, amounted to 840 million kronor, of which 90 million were paid by the communes.

Health Insurance.—The sickness funds which have in their present voluntary form 3 million members, grant a daily allowance varying between 1 and 6 kronor. Their expenses amounted to 136·2 million kronor in 1948, 42·9 million of which were paid by the state. In 1946, a law was passed making health insurance compulsory, which will gradually come into force within the next few years.

Unemployment Insurance, which is voluntary, grants a daily benefit of 2 to 8 kronor, plus allowances of 1·25 kronor for wife, husband or housekeeper, and 1 krona for each child. In 1949, about 1,063,000 persons were insured and the expenses amounted to 28·5 million kronor (including 5·3 million for administration), 13·7 million of which were paid by the state. The contributions of the insured persons amounted to 28·6 million kronor.

Workmen's Compensation Insurance provides medical treatment, medicine and necessary artificial appliances etc. In case of temporary incapacity for work the injured person is entitled to a daily allowance. In case of permanent loss of capacity for work, annuities are paid, and in case of death funeral benefit and pensions to the dependants. All employed persons are compulsorily insured. Insurance is mainly financed by employers' contributions, and operates through the National Insurance Office or one of the employers' mutual accident-insurance companies. The total expenses of the National Insurance Office and the companies amounted to 126 million kronor in 1949 (including transfers to funds, but excluding cost of administration).

Maternity Benefit.—About 95% of all mothers receive maternity allowances, amounting to an annual total of 25 million kronor. Three sorts of allowance exist, only one of which is dependent on the mother's income.

Public Child Welfare.—Its central task is to take care of ill-treated, neglected, distressed or sick children, as well as of depraved youths. Besides control is exerted over children in foster homes. Its activities extended in 1949 to about 63,000 children; expenses amounted to 33 million kronor net.

General Child Allowances have been paid from 1 Jan., 1948, amounting to 260 kronor per child annually for all children under 16 years of age, irrespective of the parents' economic situation. During 1949 the mothers of 1·67 million children received a total of 435 million kronor.

Special Child Allowances are granted to children below the age of 16 when the parents or one of them has died or when the father is an invalid, etc. This allowance is granted after an investigation into the income of the parent and of the child. The maximum amount per child is 420 kronor for orphans and 250 kronor (in certain cases 420) for others. Besides, widows and widowers with children get special allowances. The annual expenses for the special child allowances and the allowances to widows and widowers with children were about 10 million kronor in 1949.

Public Poor Relief.—Aid is given to persons living in their homes or kept in charitable institutions or in hospitals. The number of relief cases amounted in 1948 to 163,000 (about 4·4% of the population), and the expenses to about 85 million kronor net.

A supplementary form of *unemployment relief* is granted by the state or by municipalities supported by the state, mostly in the form of 'reserve' work. The expenses of the state amounted to 31 million kronor in 1949.

Total social expenditure, including also hygiene and care of the sick, amounted to 2,192 million kronor in 1948 and 2,417 million kronor in 1949. The share of the state rose from 52% in 1946 to 60% in 1949.

Finance.

Revenue and expenditure (in 1,000 kronor):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1946–47	3,605,836	3,154,977	1949–50	4,839,100	5,001,700
1947–48	4,437,798	3,971,444	1950–51 [1]	4,998,077	4,838,715
1948–49	4,953,957	4,643,043	1951–52 [1]	5,709,395	5,367,386

[1] Estimates.

The ordinary working budget of revenue and expenditure for the financial year 1 July, 1949, to 30 June, 1950, was as follows (in 1,000 kronor):—

Revenue		Expenditure	
(a) Current Revenue:		*(a) Current Expenditure.*	
Taxes:		Royal household	2,610·8
Tax on incomes and property, etc.	2,212,150·0	Justice	39,050·3
Succession duty and other stamp-duties	146,000·0	Foreign affairs	25,426·0
Motor-car duty	435,000·0	Defence	796,534·1
Customs	225,000·0	Social affairs, etc.	1,395,734·0
Excise on spirits, malt, liquors, tobacco, etc.	1,391,700·0	Communications	275,649·3
Civil service fees, etc.	74,984·0	Finance	92,304·8
Contributions to the Old Age Pensions Fund	140,000·0	Education and ecclesiastical affairs	519,059·3
Miscellaneous	120,000·0	Agriculture	390,950·9
		Commerce	56,767·6
		Interior and health	288,074·4
		Supply	210,643·3
		Pensions	164,456·0
		Expenses for the Diet, etc.	10,653·2
		Unexpected expenses	1,000·0
Net receipts from productive funds of the state:		*(b) Expenses for the state funds:*	
Business of the state:		Civil aviation fund	6,700·0
Railways	60,000·0	National debt fund (interest, etc.)	313,000·0
Posts, telegraphs and telephones	52,000·0	Losses on investments	62,428·6
Waterfall works	15,000·0		
Domains	30,000·0		
Real estate funds	34,767·0		
Interest on state-owned shares	30,000·0		
Interest on outstanding loans	53,348·3		
Other funds	53,990·0		
(c) Shares in the profits of Bank of Sweden	0·1		
Total revenue	5,073,939·4	Total expenditure	4,651,612·6
		Surplus	422,296·8

The net capital investments during recent years amounted to:—1945–46, 339,670,000 kronor; 1946–47, 661,150,000 kronor; 1947–48, 373,640,000 kronor; 1948–49, 470,050,000 kronor; 1949–50, 263,600,000 kronor; 1950–51 (estimate), 262,000,000 kronor.

The self-balancing revenue of the total business of the state (railways, post office, telegraphs, telephones, waterfall works, domains and bank) was in 1945, 1,262,044,000 kronor; July, 1946–June, 1947, 1,464,182,000 kronor; 1947–48, 1,635,592,000 kronor; 1948–49, 1,809,251,000 kronor.

On 30 June, 1950, the national debt amounted to 12,073,000,000 kronor.

Defence.

A supreme commander is, under the King, in command of the three services. He is assisted by the Defence Staff.

Army.

The Commander-in-Chief of the Royal Swedish Army has at his disposal an army staff under a special chief.

The military forces are recruited on the principle of national service,

supplemented by a voluntarily enlisted personnel, which form the permanent cadres for training purposes.

Liability to service commences at the age of 19, and lasts till the end of the 47th year. From 1948 the period of training for most conscripts is 360 days. This duty is performed in a first period of 270 days at a training centre, and later on in 3 periods of a month each in combat units. Some conscripts receive an additional year's training as officers.

Sweden is divided into 7 territorial districts, each subordinated to a district commander. There are, in time of peace, 20 infantry, 3 cavalry, 4 tank, 9 artillery, 7 A.A. defence, 3 engineer, 3 signal and 4 Army Service Corps units, most of which are called 'regiments.'

The Army is organized and equipped with regard to the geographical and climatic conditions of the country. Mechanization has been allowed for. The Home Guard (*Hemvärnet*) raised during the war continues to be in force.

NAVY.

The Commander-in-Chief of the Royal Swedish Navy has at his disposal a naval staff under a special chief. This staff is responsible for the mobilization, organization and training of the fleet. Subordinate to the Commander-in-Chief of the Navy are, among others, the Chief of the Coastal Fleet, the Inspector of the Coast Artillery, and inspecting officers of naval gunnery, submarines, torpedo, mining, minesweeping and communications. There is also a Technical and Financial Board.

The following is a list of the principal ships :—

Completed	Name	Displacement	Armour		Principal armament	Torpedo tubes	Shaft horse-power	Designed speed
			Belt	Guns				
	Cruisers	Tons	Inches	Inches		21-in		Knots
1947	Tre Kronor	7,400	5	3	7 6-in.	6	100,000	33
1947	Göta Lejon							
1931	Gotland	4,750	2	2	6 6-in ; 4 3-in A.A.	6	33,000	27
1907	Fylgia	4,300	4	5	8 6-in.	2	13,000	21
	Armoured Ships							
1922	Gustaf V	7,275	8	8	4 11-in.; 6 6-in.; 4 3-in. A.A.	—	22,000	22·5
1921	Drottning Victoria	7,120					22,000	
1917	Sverige	7,080					20,000	

There are 13 destroyers, 2 fast anti-submarine frigates (converted from destroyers), 6 [illegible] torpedo boats (small destroyers), 24 submarines, 46 minesweepers, [illegible] torpedo boats, 2 minelayers and 2 surveying vessels, a depot ship, a radar training ship, a salvage vessel, 24 patrol vessels, 5 patrol launches, 15 tenders, 3 icebreakers, 3 oilers and 2 sail training ships. Four destroyers, 3 submarines, 4 submarine chasers of 600 tons, 11 motor torpedo boats, 2 minesweepers, a surveying vessel and an icebreaker are under construction.

Warships are allotted between the sea-going fleet, local defence forces and the reserve.

There are 6 naval districts under maritime command: those of the southern, eastern and western coasts, coasts of Norrland, Gotland and Öresund. The 3 naval stations are situated at Karlskrona, Stockholm and Gothenburg (Göteborg).

The active personnel of the Navy comprises 13,500 officers and men, including the Royal Coast Artillery attached to the Navy. The coast fortresses are those of the Stockholm archipelago, Karlskrona, Älvsborg (outside Gothenburg), Gotland and Hemso (outside Härnosand). There are 5 coastal artillery regiments.

Air Force.

The combat units consist of 10 day-fighter, one all-weather-fighter and 4 ground-attack wings ('flottiljer'), together with 5 reconnaissance squadrons. The strength of 6 day-fighter wings will be increased by 50%.

The Air Force is organized in 4 groups ('eskadrar'), and the territorial organization is divided in 5 districts. The Swedish Air Force is largely equipped with Swedish and British aircraft. Standard types of jet-propelled day fighters are the Swedish-built J29 (maximum speed exceeding 620 miles per hour), and the British De Havilland Vampire (J28). In addition, the Swedish jet fighter J21R is in service. A certain number of North American Mustang (J26) is still in use, as well as the British all-weather fighter De Havilland Mosquito (J30). The ground-attack wings are equipped with Swedish-built A21s (single-engined) and B18s (twin-engined). Supermarine Spitfire (S31) is used as photo-reconnaissance plane.

The flying personnel are officers and long-term enlisted pilots. Included in the Air Force is the Air Warning System.

Aircraft and engines are manufactured at Svenska Aeroplan AB (SAAB), Linköping, and Svenska Flygmotor AB, Trollhättan.

Production and Industry.

I. Agriculture.

Sweden has always been an agricultural country. In 1751 only 9·5% of the population depended for a livelihood on the various industries and commerce; in 1870 the percentage had advanced to 19·8, in 1900 to 38·2, in 1920 to 50·2 and in 1940 to 57·6.

According to the census of agriculture taken in the autumn of 1944, the number of farms in cultivation was 414,441; of these there were of 2 hectares and under, 118,214; 2 to 20 hectares, 261,079; 20 to 100 hectares, 32,805; above 100, 2,325. Of the total land area of Sweden (41,048,000 hectares), 3,715,000 hectares (except kitchen gardens and fruit gardens) were under cultivation, 942,000 hectares under natural meadows, and 22,269,000 hectares under forests, the products of which form a staple export. An estimation of the forest area, founded on sampling in 1923–48, gave it as 22,870,000 hectares, and the total amount of wood as 1,282 million cubic metres from 10 cm. breast height diameter upwards.

Chief Crops	Area (hectares)		Produce (metric tons)	
	1949	1950	1949	1950
Wheat	307,200	339,130	698,394	738,870
Rye	134,868	126,670	276,676	243,670
Barley	86,084	93,750	177,900	209,530
Oats	501,794	503,180	840,216	806,980
Mixed corn	309,377	318,080	647,981	653,630
Leguminous crops [1]	28,080	23,090	40,055	35,840
Potatoes	134,566	130,490	1,719,744	1,734,170
Sugar beet	49,287	54,440	1,779,052	1,962,500 [2]
Fodder-roots	53,950	49,700	1,897,428	1,668,550
Hay	1,297,499	1,274,540	4,758,542	4,628,060
Oil seed	141,836	168,810	173,175	218,000 [2]

[1] Peas and vetches. [2] Preliminary figures.

Area of rotation meadows for pasture and [illegible]lder was 333,000 hectares in 1948, 317,000 in 1949, 306,000 in [illegible] from permanent meadows, 1948, 286,000 metric tons; 1949, 309,000; 1950, 316,000.

Milk delivered to dairies was 3,913,000 metric tons in 1950. Butter production in the same year was 109,000 metric tons, and cheese 52,000 tons.

According to the livestock census of 1 June, 1950, the livestock was returned as follows :—Horses, 439,757; head of cattle, 2,648,189; sheep and lambs, 279,167; goats and kids, 14,835 (1949); pigs, 1,267,680.

Number of farm tractors in use in 1950 was estimated at 65,800.

II. Mines and Minerals.

Mining has from time immemorial been one of the leading industries of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why mining in Lapland is limited to the raw products. Since 1943, however, an increasing part of the Swedish pig-iron is produced by electric methods from Lapland ore, near the town of Luleå. There were raised in 1948, throughout the kingdom, 13,287,000 tons of iron ore. The pig-iron produced amounted in 1947 to 698,000 tons, and in 1948 to 767,000 tons. Of iron ore, in 1947, 8,504,000 and in 1948, 11,518,000 tons were exported. There were also produced in 1948, 30,100 tons of silver and lead ore, 57,800 tons of copper ore, 59,200 tons of zinc ore, 9,000 tons of manganese ore, 71,300 tons of auriferous arsenic ore, and 392,000 tons of sulphur pyrites. The gold produced in metal works in 1948 amounted to 2,007 kilograms, silver to 19,960 kilograms, copper to 17,180 tons, lead to 6,228 tons, and aluminium to 3,279 tons (scrap generally excluded). There are not inconsiderable veins of coal in southern Sweden, giving 374,446 tons of coal in 1948. One of the most important products of the Swedish quarries is paving stone; the amount produced for sale in 1948 had a value of 5,664,000 kronor. In 1948 there were 60,445 workers (1,892 young people under 18) engaged in the mining and metallurgical industries.

III. Industries.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest development north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig-iron is produced chiefly in Domnarvet, Luleå, Oxelosund, Uddeholm and Fagersta. Cream separators, ball-bearings, lighthouse apparatus, telephone supplies, motors, cargo and tank vessels and many kinds of electrical machinery are among the highly specialized products of the metallurgical industries. The porcelain factories of Gustavsberg and Uppsala-Ekeby and the glass factories of Kosta and Orrefors produce wares that have achieved a high reputation in the markets of the world.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 7,516,000 hectares (but only 5,186,000 hectares commercial forest land) of which crown and ecclesiastical forests extend to 6,260,000 hectares. The latter yielded, in 1948, 5,330,000 cubic metres of timber. In 1948 there were in Sweden 1,114 saw-mills and planing mills with 24,939 workers who turned out sawn or planed timber to the value of 598,000,000 kronor; 1,928 factories for joinery and furniture with 32,272 workers, the output for the year being valued at 508,624,000 kronor;

74 factories for wood-pulp with 18,900 workers, output 1,178,259,000 kronor, and 75 paper and pasteboard mills with 19,363 workers, output 779,403,000 kronor.

The number of pelts in 1949 was as follows :—Silver fox and its varieties, 34,000; blue fox and white fox, 28,000; mink, 140,000.

The following are some data for the most important Swedish industries [1]:—

Branch of industry	No. of establishments		Average no. of workers		Value of output (1,000 kronor)	
	1947	1948	1947	1948	1947	1948
Wood and paper industry	3,908	3,780	116,440	113,559	3,124,237	3,526,797
Iron and steel works	57	57	28,808	29,332	756,390	878 245
Iron, steel and metal goods factories	1,464	1,520	51,076	52,615	1,140,702	1,314,273
Mechanical workshops	2,869	2,908	118,695	121,263	2,555,237	2,818,504
Brick, porcelain & glass factrs	387	385	19,682	19,852	233,640	264,463
Flour and grain mills	76	66	1,885	1,779	231,481	252,762
Sugar refineries	5	5	1,738	1,569	161,952	180,584
Tobacco factories	7	8	1,746	1,910	344,435	420,815
Dairies	485	411	6,494	6,507	1,039,006	1,056,130
Textiles	1,465	1,516	91,961	96,252	1,906,141	2,293,611
Tanneries and shoe factories	294	293	13,520	13,815	316,341	353,657
Match factories	7	7	1,572	1,585	23,866	26,993
Other chemicals	501	509	19,145	19,593	924,119	1,107,911
Electric power and gas works	742	564	9,983	10,523	558,399	579,603

[1] Not comparable with figures before 1947, as a number of small establishments are now being omitted from the census.

The total number of industrial factories (including mines and quarries) was 17,491 in 1948. The total power used in industry amounted to 8,925,557 effective h.p.

In 1948, 509,932 men, 116,238 women, 30,895 boys and 12,210 girls (under 18 years of age) were employed in factories.

IV. Fisheries.

The total value of the catches of the Goteborg and Bohus fishing industry in 1948 was estimated at 70,910,000 kronor.

V. Power Supply.

The production of power is based almost exclusively on water, which normally covers about 95% of the total requirements. The power supply is administered by the state (about 35%), the municipalities and a number of private companies. The total available water power resources are 43,000 million kwh. a year. The harnessed water power resources amounted in 1949 to about 3·01 million turbine kw. with a generator capacity of 3·4 million kVA. The increase of power production by about 5 or 7% yearly is shown in the following table (the setback in 1947 was due to low precipitation): —

Year	Power production (millions of kwh.)	Year	Power production (millions of kwh.)
1920	2,605	1944	12,427
1930	5,121	1946	14,197
1940	8,624	1947	13,461
1942	9,795	1948	14,084
1943	11,035	1949 [1]	16,041

[1] Estimate.

The power consumption for various purposes is distributed as follows : Industries 70%, railways 10%, towns and communities 15% and country districts 5%.

Commerce.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (in 1,000 kronor) :—

	1945	1946	1947	1948	1949	1950 [1]
Imports	1,084,341	3,385,598	5,220,114	4,944,859	4,333,244	6,101,383
Exports	1,758,073	2,546,732	3,239 762	3,979,098	4,249,726	5,709,783

[1] Preliminary figures.

The following were the values of the leading imports and exports for 2 years (in 1,000 kronor) :—

	Imports		Exports	
	1948	1949	1948	1949
Animal and vegetable products .	854,836	736,624	142,366	231,144
Minerals and metals (including manufacturers) . . .	1,725,008	1,621,544	794,688	945,224
Chemical products and pharmaceutical products, dyes, lacquers, soaps and fertilizers . .	336,565	283,187	105,493	117,014
Hides and skins, rubber, textile materials and products . .	1,023,685	935,808	54,454	58,421
Wood goods, pulp, paper and products thereof [1] . . .	100,185	76,180	2,022,010	1,905,732
Machinery, transportation equipment, instruments . .	904,580	679,901	860,088	992,191

[1] Exports included, in 1948, 176,846 metric tons of newsprint (1949 : 201,277) and 13,355 metric tons (each equivalent to 86,000 boxes) of matches (1949 16,265).

Principal import countries in 1950 (preliminary) were (in millions of kronor) :—Great Britain, 1,218; Western Germany, 653; U.S.A., 537; France, 383; Netherlands, 276; Belgium-Luxemburg, 240. Principal export countries :—Great Britain, 812; Western Germany, 730; Norway, 512; Netherlands, 348; U.S.A., 345; Denmark, 335; France, 249; Brazil, 229.

Total trade between Sweden and U.K. (in £ sterling) for 5 years (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports to U.K. . .	24,542,217	42,203,683	55,536,955	61,428,669	65,971,138
Exports from U.K. .	11,720,315	29,886,766	55,013,171	46,978,621	79,583,535
Re-exports from U.K. .	1,107,974	823,974	3,581,376	1,507,704	2,306,125

Shipping and Navigation.

The Swedish mercantile marine consisted on 1 July, 1950, of 2,216 vessels of 2,089,473 gross tons (only vessels of at least 20 net tons included).

The port of Göteborg had the largest tonnage in the beginning of 1950, namely, 310 vessels of 737,871 gross tons, and next to it came Stockholm with 375 vessels of 711,056 gross tons.

Vessels entered from and cleared for foreign countries with cargoes and in ballast, in 1949 (preliminary figures), as follows (only vessels of at least 10 net tons included):—With cargoes, 48,864 of 32,554,190 net tons; in ballast, 12,881 of 9,339,831 net tons; total, 61,745 of 41,894,021 net tons.

Communications.

On 1 Jan., 1950, there were 90,400 km. of public roads in Sweden, of which 5,200 km. were surfaced. Motor vehicles in 1949 included 194,454 passenger cars, 86,517 buses and lorries, and 172,338 heavy motor cycles.

At the end of 1949 the total length of railways in Sweden was 16,657 km. of which 14,782 km. belonged to the state. In 1939 legislation was passed to enable the state to take over all the lines in the country over a period of 5 years, but the period has been extended. During 1949, 203 km. of private lines were taken over by the state railways. The receipts of the state railways were 800 8 million kronor in 1949, and expenses 756 5 million, including 66·4 to the depreciation account. The total cost of construction for the state railways to 1 July, 1949, was 2,685 million kronor, and for private railways, to the end of 1949, 196 million kronor. In 1949 the total number of passengers on the state railways was 130,000,000; weight of goods, including Lapland ore, 36,670,000 tons; private railways, 21,063,000 passengers; goods, 5,964,000 tons. Total electrified lines, 1949, 6,176 km., of which 5,766 km. were state lines, being 39% of the state system.

The length of the circuits of the telegraph at the end of 1948 was 169,033 km. (and of the railway telegraph 3,739 km.). The circuits of the telephone had a length of 3,701,000 km. (and of the railway telephone 123,000 km.). At the end of 1949 there were 1,617,859 instruments employed in the telephone service, coming, with 22·8% per population, next to the U.S.A. (26·1%).

Number of wireless licence holders at 1 Jan., 1950, was 2,095,474.

The overseas radiotelegraph and radiotelephone services are conducted by the Swedish Telegraph Administration.

The number of post offices at the end of 1949 was 4,629. The total receipts of the post office in 1949 amounted to 250,036,000 kronor and the total expenditure to 219,725,000 kronor.

Civil Aviation.—Commercial air traffic is maintained in Sweden and other parts of the world by Scandinavian Airlines System (SAS), of which AB Aerotransport (ABA = Swedish Air Lines) is the Swedish partner (DDL = Danish Air Lines and DNL = Norwegian Air Lines being the other two). Scandinavian Airlines System have a joint pay-up capital of about Sw. kronor 125,000,000. Capitalization of ABA, Sw. kronor 50,000,000, of which 50% is owned by the government and 50% by private enterprises. ABA is responsible for the domestic air services within Sweden. Internationally SAS maintains regular scheduled services from Sweden to every part of the world.

In 1949 the total number of km. flown was 9,965,000; passenger-km., [illegible]; goods ton-km., 5,104,000; mail ton-km., 1,271,000. These figures include the Swedish share (three-sevenths) of the SAS traffic. The regular lines in March, 1951, covered 96,000 unduplicated km.

Banking and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the state and is managed by directors elected for 3 years by the Diet, except the

governor, who is designated by the King. The bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution. The note circulation is limited by the value of the gold reserve plus secondary cover; for the current year, however, the limit is fixed at 3,500 million kronor. Since 1904, only the Riksbank has the right to issue notes. On 31 Dec., 1950, its note circulation amounted to 3,513,000,000 kronor. Its combined gold and net foreign exchange holdings (including surplus value of gold) on 31 Dec., 1950, totalled 1,154,000,000 kronor.

There are 21 commercial banks. On 31 Dec., 1950, their total deposits (excluding interest) amounted to 8,930 million kronor; domestic bills and loans to 9,155 million kronor.

The savings-banks statistics (exclusive of post office) are as follows :—

	1945	1946	1947	1948
Number of accounts at end of year	4,596,352	4,697,771	4,816,429	4,960,000
Deposits at end of year, kronor[1]	5,605,821,439	6,034,341,841	6,356,838,000	6,750,892,000
Capital and reserve funds, kronor	356,460,289	366,768,734	376,890,000	384,003,000

[1] Including interest.

At the end of 1949 the post office savings bank had 4,406,416 depositors and 2,083,184,000 kronor of deposits (1948: 4,327,159 depositors and 1,923,237,000 kronor of deposits).

The commercial banks also act as savings banks. Their statistics of depositors and deposits are as follows :—

	1947	1948	1949	1950
Number of accounts at end of year	1,659,971	1,664,680	1,649,805	1,636,000
Deposits at end of year, kronor[1]	1,331,193,000	1,406,541,000	1,520,145,000	1,565,000,000

[1] Excluding interest.

Money, Weights and Measures.

The Swedish krona, of 100 öre, was in 1949 of the value of approximately 15 kronor to the £ sterling.

Gold coins do not exist as a currency. National bank-notes for 5, 10, 50, 100, 1,000 and 10,000 kronor are legal means of payment, and the bank is normally bound to exchange them for gold on presentation, but the obligation to redemption is suspended.

The metric system of weights and measures is obligatory.

Diplomatic Representatives.

1. Of Sweden in Great Britain (29 Portland Place, W.1).

Ambassador.—Bo Gunnar Richardsson Hägglof (accredited 13 Oct., 1948).

Counsellors.—L. Ö. M. Lundborg; C. A. M. Hallenborg; S. M. A. Unger.

Secretaries.—P. O. G. Rathsman; L. P. F. von Celsing; C. G. Luthman; Olof Ripa.

Attachés.—C. A. E. Rosenblad; B. G. Borglund.

Military Attaché.—Col. Tor Hedqvist.

Air Attaché.—Col. Artur Valdemar Falk.

Naval Attaché.—Commodore B. F. G. E. Thermaenius.

Agricultural Counsellor.—W. M. F. de Wachenfelt.

Press Counsellor.—K. V. Hammarling.

Assistant Press Attaché.—S. A. Sundfeldt.

There are consular representatives at the following places :—Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, London, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Sunderland, and many other places.

2. Of Great Britain in Sweden.

Ambassador.—Sir Harold Lister Farquhar, K.C.M.G., M.C. (appointed Feb., 1948).

Counsellor.—A. E. Lambert.

Commercial Counsellor.—W. G. R. Howell, O.B.E.

First Secretaries.—J. S. Bennett (*Information*); P. R. Williamson (*Labour*); E. E. M. Nielsen (*Commercial*); G. M. E. Paulson, O.B.E.

Naval Attaché.—Capt. D. B. Wyburd, D.S.O., D.S.C., R.N.

Military Attaché.—Lieut.-Col. H. C. Carden, O.B.E.

Air Attaché.—Wing-Cdr. P. Burnett, D.S.O., D.F.C.

Scientific Attaché.—J. Wardley Smith.

There are consular representatives at Stockholm, Göteborg, Luleå, Malmö, Norrköping, Sundsvall and Halsingborg.

Books of Reference.

Statistical Information.—The Central Bureau of Statistics (Kungl. Statistiska Centralbyrån, Stockholm 2) was founded in 1858, in succession to the Kungl. Tabellkommissionen which had been set up in 1756; *Director-General*.—(Mrs.) Dr. Karin Kock. Its main publications include :—

Statistisk årsbok for Sverige (Annuaire statistique de la Suède). (First year, 1914.)

Bidrag til[illegible] 1857–1920.

Sveriges [illegible]ummaries in French.) From 1911.

Statistiska meddelanden. From 1912. Including: Occasional Statistical Investigations (*a*), not yet arranged for (*b*), Monthly Trade Statistics (*c*), Railway Statistical Returns (*d*), Banking Returns (*e*), Social Returns (*f*).

The Swedish Economic Review. Compiled by the Swedish Board of Trade. Published by the Swedish Foreign Office. Issued quarterly, 1922–40.

Årsbok for Sveriges kommuner. First issue, 1918. (For distribution, as a rule, only within Scandinavia.)

Statistisk tidskrift. 1862–1913.

Lönestatistisk Årsbok [Salaries and wages; with summary in French]. From 1929

Meddelanden från Konjunkturinstitutet. Series A (from 1938) and B (from 1939); both with summaries in English.

Sveriges riksbank. Published by the Bank of Sweden. Annual. Stockholm, from 1908.

The Swedish national debt office. Report. Annual. (First issue 1920.) Stockholm.

Riksräkenskapsverkets Årsbok [State finances]. Annual. Stockholm, from 1929–30.

SWITZERLAND.

(SCHWEIZ.—SUISSE.—SVIZZERA.)

Constitution and Government.

I. CENTRAL.

ON 1 Aug., 1291, the men of Uri, Schwyz and Lower Unterwalden entered into a defensive league. In 1353 the league included eight members and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the league became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia and Russia, and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution was passed without foreign interference. This, in turn, was, on 29 May, 1874, superseded by the constitution which is now in force.

National flag : a white cross on red.

National anthem : Rufst du, mein Vaterland (words by J. H. Wyss, 1811; tune, ' God save the King ').

The constitution of the Swiss Confederation may be revised either in the ordinary forms of federal legislation with compulsory *referendum*, or by direct popular demand (*popular initiative*), a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand of 50,000 citizens with the right to vote. The Federal Government (*i.e.*, the Parliament and the Federal Council) is supreme in matters of peace, war and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes and the weights and measures of the republic. The Federal Parliament legislates on matters of copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidize, besides the Polytechnic School at Zürich, a federal university and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests and the construction of railways. By referendum of 13 Nov., 1898, it is also the authority in the entire spheres of common law.

The supreme legislative authority is vested in a parliament of two chambers, a *Ständerat*, or Council of States, and a *Nationalrat*, or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land, Appenzell into Ausser Rhoden and Inner Rhoden, and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as

o the undivided cantons. The *Nationalrat* consists (based on the 1941 ensus) of 194 representatives, chosen in direct election for 4 years, at the rate of one deputy for every 24,000 souls. The members are paid from federal unds at the rate of 40 francs for each day on which they are present. The members are distributed amongst the various cantons as follows:—

Canton[1]	Number of representatives	Canton[1]	Number of representatives
Zürich (Zurich)	31	Appenzell—Outer and Inner Rhoden	3
Bern (Berne)	33	St. Gallen (St. Gall)	13
Luzern (Lucerne)	9	Graubunden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	3	Thurgau (Thurgovie)	6
Unterwalden—Upper and Lower	2	Ticino (Tessin)	7
Glarus (Glaris)	2	Vaud (Waadt)	16
Zug (Zoug)	2	Valais (Wallis)	7
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	5
Solothurn (Soleure)	7	Genève (Genf)	8
Basel (Bâle)—town and country	12	Total	194
Schaffhausen (Schaffhouse)	2		

[1] The name of the canton is given in German, French or Italian, according to the language most spoken in it, and alternative names are given in brackets.

At the elections held on 26 Oct., 1947, the following parties were returned:—National Council: Radicals, 52; Social Democrats, 48; Catholic Conservatives, 44; Peasant Party, 21; Landesring and Liberal-Socialist Party, 9; Liberals, 7; Communists, 7; Democrats, 5; independent, 1.

Council of States (March, 1951):—Catholic Conservatives, 18; Radicals, 11; Socialists, 4; Peasant Party, 3; Liberals, 3; Democrats, 2; Landesring, 1; independent, 2.

A general election of representatives takes place by ballot every four years. Every citizen of the republic who has entered on his twenty-first year is entitled to a vote, and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the *Bundes-Versammlung*, or Federal Assembly, and as such represent the supreme Government of the republic. Laws passed by the Federal Assembly may be vetoed by the popular voice, which means in effect that 30,000 citizens or eight cantons may demand that the law in question should be submitted to the direct vote of the nation, which can say only 'Yes' or 'No.' This principle, called the *referendum*, is frequently acted on.

The chief executive authority is deputed to a *Bundesrat*, or Federal Council, consisting of seven members, elected for four years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. In the Federal Parliament legislation may be introduced either by a member, or by either House, or by the Federal Council (but not by the people). Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State Councils

for the term of one year, 1 Jan. to 31 Dec., and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1951.—Eduard von Steiger (Bern); born 2 July, 1881.

Vice-President of the Federal Council for 1951.—Karl Kobelt (St. Gallen); born 1 Aug., 1891.

The 7 members of the Federal Council—each of whom has a salary of 48,000 francs per annum, while the President has 51,000 francs—act as ministers, or chiefs of the 7 administrative departments of the republic. The city of Berne is the seat of the Federal Council and the central administrative authorities.

The Federal Council is composed as follows (1951):—

Foreign Affairs.—Max Petitpierre (Neuchâtel), Radical.

Interior.—Philipp Etter (Zug), Catholic Conservative.

Justice and Police.—Eduard von Steiger (Bern), Peasant and Middle Class Party.

Military.—Karl Kobelt (St. Gallen), Radical.

Finance.—Ernst Nobs (Zurich), Socialist.

Agriculture and Industry.—Rodolphe Rubattel (Vaud), Radical.

Posts and Railways.— Joseph Escher (Valais), Catholic Conservative.

II. Local Government.

Each of the cantons and demi-cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organization in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus and Unterwalden. In all the larger cantons there is a body chosen by universal suffrage, usually called *der Grosse Rat*, or *Kantonsrat*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. By this principle, where it is most fully developed, as in Zurich, all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In all the cantons, the *popular initiative* for constitutional affairs, as well as for legislation, has been introduced, except in Lucerne, where the *initiative* exists only for constitutional affairs. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In most cantons there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the cantonal Government. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, maire or syndic, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I. Progress and Present Condition.

Area and population, according to the census held on 1 Dec., 1950, and the census held on 1 Dec., 1941, are shown in the following table. The cantons are given in the official order and the year of the entrance of each into the league or confederation is stated :—

Canton	Area : sq. km.	Population		Pop. per sq. km., 1 Dec., 1950 (census)
		1 Dec., 1950 (census) [1]	1 Dec., 1941 (census)	
Zurich (Zurich) (1351)	1,729	772,617	674,505	447
Bern (Berne) (1353)	6,883	798,264	728,916	116
Luzern (Lucerne) (1332)	1,492	223,409	206,608	150
Uri (1291)	1,074	28,569	27,302	27
Schwyz (1291)	908	71,246	66,555	79
Obwalden (Obwald) (1291)	493	22,075	20,340	45
Nidwalden (Nidwald) (1291)	275	19,459	17,348	71
Glarus (Glaris) (1352)	685	37,674	34,771	55
Zug (Zoug) (1352)	240	42,268	36,643	176
Fribourg (Freiburg) (1481)	1,671	157,919	152,053	95
Solothurn (Soleure) (1481)	791	170 325	154,944	215
Basel-Stadt (Bâle-V.) (1501)	37	196,658	169,961	5.315
Basel-Land (Bâle-C.) (1501)	427	107,393	94,459	252
Schaffhausen (Schaffhouse) (1501)	298	57,448	53,772	193
Appenzell A.-Rh. (Ext.) (1513)	243	48,026	44,756	198
Appenzell I.-Rh. (Int.) (1513)	173	13,448	13,383	78
St. Gallen (St. Gall) (1803)	2,014	308,483	286,201	153
Graubünden (Grisons) (1803)	7,113	136,050	128,247	19
Aargau (Argovie) (1803)	1,404	300,442	270,463	214
Thurgau (Thurgovie) (1803)	1,006	149,360	138,122	148
Ticino (Tessin) (1803)	2,813	175,520	161,882	62
Vaud (Waadt) (1803)	3,209	376,707	343,398	117
Valais (Wallis) (1815)	5,235	158,227	148,319	30
Neuchâtel (Neuenburg) (1815)	800	127,205	117,900	159
Genève (Genf) (1815)	282	201,505	174,855	715
Total	41,295	4,700,297	4,265,703	114

[1] Preliminary results.

On 1 Dec., 1950, the population of the principal towns was as follows (preliminary census figures) :—Zürich, 386,485; Basel, 183,742; Berne, 145,740; Geneva, 144,422; Lausanne, 107,225; St. Gallen, 67,865, Winterthur, 66,971; Luzern, 60,365; Biel, 48,401; La Chaux-de-Fonds, 33,154.

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons (French names given in brackets), the French in five (Fribourg, Vaud, Valais, Neuchâtel and Genève, for which the German names are given in brackets), the Italian in one (Ticino), the Romansch in one (Graubünden). In 1941, 3,097,060 spoke German, 884,669 French, 220,530 Italian, 46,456 Romansch and 16,988 other languages. On 8 July, 1937, Romansch was made the fourth national language.

The number of foreigners resident in Switzerland in 1941 was 223,554. The number of Swiss resident outside Switzerland on 1 Jan., 1950, was 204,097 (in France, 69,300; the United States, 27,600; Germany (Western zones), 20,600; Great Britain and Northern Ireland, 13,780; Italy, 11,900).

II. MOVEMENT OF POPULATION.

Years	Total births	Illegitimate births	Still births	Marriages	Divorces	Deaths and still births
1945	89,969	3,065	1,447	35,610	3,726	52,533
1946	90,537	3,008	1,411	38,768	4,298	51,687
1947	89,149	3,080	1,425	39,401	4,280	52,809
1948	89,282	3,217	1,519	39,274	4,292	51,198
1949	86,751	3,059	1,443	36,993	4,111	50,940

The number of emigrants to overseas countries was :—1945, 313; 1946, 1,839; 1947, 2,599; 1948, 3,622; 1949, 2,930; 1950, 2,672.

Visitors to holiday resorts :—1948, 2,675,514 Swiss and 1,695,441 foreigners (including 316,834 British and Irish); 1949, 2,622,030 Swiss and 1,737,457 foreigners (including 391,389 British and Irish).

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The Society of Jesus and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action [illegible] interferes with the peace of different creeds. The [illegible] ts or religious orders is forbidden.

According to the census of 1 Dec., 1941, the number of Protestants amounted to 2,457,242 (58% of the population), of Roman Catholics to 1,724,205 (41%) and of Jews to 19,429 (0·5%). Protestants are in a majority in twelve of the cantons and Catholics in ten. Of the more populous cantons, Zürich, Berne, Vaud, Neuchâtel and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 3,500 regular and secular priests. They are under 5 bishops, viz., of Basel–Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne–Geneva–Fribourg (resident at Fribourg) and Sitten (Sion), all of them immediately subject to the Holy See. The Society of Friends had 62 members in 1949.

Education.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organized a system of primary schools and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons) and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen.

The following are the statistics of the various classes of educational

institutions for 1948-49 :—Primary schools with 14,136 teachers (8,676 men and 5,460 women, excluding women teachers for needlework), and 434,498 pupils; the secondary schools and lower middle schools (progymnasia included) had 42,321 boys and 36,266 girls, with 2,848 men and 427 women teachers. There are also cantonal schools, gymnasia, higher schools for girls, complementary schools, teachers' seminaries, commercial and administrative schools, trade schools, art schools, technical schools, schools for the instruction of girls in domestic economy and other subjects, agricultural schools, schools for horticulture, for viticulture, for arboriculture and for dairy management. There are also institutions for the blind, the deaf and dumb and the feeble-minded.

There are 7 universities in Switzerland. These universities are organized on the model of those of Germany, governed by a rector and a senate, and divided into four faculties of theology, jurisprudence, philosophy and medicine. There is a Federal Institute of Technology at Zurich (founded in 1855), with 375 teachers and 3,554 matriculated students in 1949–50. The School of Economics and Public Administration at St. Gall, founded in 1898, had 78 teachers and 403 matriculated students in 1949–50. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the 7 universities in the winter of 1949–50 :—

	Theology	Law	Medicine	Arts and science	Total	Teaching staff
Basel (1460) . .	161	284	608	1,323	2,376	231
Zürich (1523 & 1833) .	136	797	1,116	1,497	3,546	297
Bern (1834) . . .	73	1,133	758	780	2,744	232
Genève (1559[1] & 1892[2])	50	907	740	1,172	2,869	260
Lausanne (1537[1] & 1890[2])	33	375	561	865	1,834	177
Fribourg (1889) . .	275	210	—	594	1,079	106
Neuchâtel (1866[1] & 1909[2])	9	200	—	246	455	76

[1] As an academy. [2] As a university.

These numbers are exclusive of 'visitors,' but inclusive of women students. There were, in 1949, 405 cinemas with a seating capacity of 150,000.

Justice and Crime.

The *Bundes-Gericht*, or Federal Tribunal, which sits at Lausanne, consists of 26–28 members, with 11–13 supplementary judges, appointed by the Federal Assembly for 6 years and are eligibile for re-election; the President and Vice-President, as such, for 2 years and cannot be re-elected. The President has a salary of 46,000 francs a year, and the other members 43,000 francs. The Tribunal has eight sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 4,000 francs; between parties who refer their case to it, the value in dispute being at least 10,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a court of appeal against decisions of other federal authorities, and of cantonal authorities applying federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into 4 chambers : the Chamber of Accusation, the

Criminal Chamber (*Cour d'Assises*), the Federal Penal Court and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid 35 francs a day when serving.

On 3 July, 1938, the Swiss electorate accepted by 358,400 votes to 312,000 a new federal penal code, to take the place of the separate cantonal penal codes. The new code came into force on 1 Jan., 1942.

As from 1 Jan., 1942, capital punishment was abolished in Switzerland.

By decree of the Federal Council of 29 Oct., 1948, several articles of the penal code concerning crime against the independence of the state have been amended with a view to reinforcing the security of the state.

Social Insurance.

The Federal Insurance Law against illness and accident, as passed by both Chambers on 13 June, 1911, was accepted by a referendum when 287,583 votes were cast for and 241,418 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees. In 1948 the 1,151 societies insuring against illness had 2,856,000 members.

Insurance against accident is compulsory for all officials, employees and workmen of all the factories, trades, etc., which are under the federal liability law. The Swiss Accident Insurance Institution commenced operations on 1 April, 1918.

On 6 July, 1947, a federal law was accepted by a referendum (with 862,036 votes for, and 215,496 against), providing compulsory old age and widows and widowers insurance for the whole population, as from 1 January, 1948.

Finance.

Revenue and expenditure (ordinary and extraordinary accounts), in 1,000 francs, for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1944	1,343,645	2,558,338	1947	2,154,430	1,933,461
1945	1,294,122	2,346,092	1948	2,091,089	1,891,871
1946	2,220,819	2,140,126	1949	1,563,499	1,551,599

The budget estimates, in 1,000 francs, for 1951 :—

Revenue		Expenditure	
General administration .	4,073	General administration .	17,733
Departments :—		Departments :—	
Political	1,966	Political	28,404
Interior	5,999	Interior	120,493
Justice and Police . .	5,274	Justice and Police . .	20,854
Military	7,839	Military	720,342
Finance and Customs .	1,435,627	Finance and Customs .	586,926
Commerce, Industry and Agriculture . .	75,371	Commerce, Industry and Agriculture . .	362,803
Posts and Railways . .	41,201	Posts and Railways . .	43,995
Total	1,577,350	Total	1,901,550

The consolidated debt of the Confederation, on 1 Jan., 1950, amounted to 7,734,319,000 francs. The floating debt was 242 million francs.

Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley and at Sargans in the Rhine Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 60th year. The first 16 years are spent in the first line, called the *Auszug*, or *Élite*, the next 12 in the *Landwehr* and 12 in the *Landsturm*. The unarmed *Hilfsdienst* comprises all other males between 20 and 60 whose services can be made available for non-combatant duties of any description.

In peace-time the Swiss army has no general; only in time of war the Federal Assembly in joint session of both Houses appoints a general.

The initial training of the Swiss militia soldier is carried out in recruits' schools and the periods are 118 days for infantry, engineers and artillery, and 132 days for cavalry. The subsequent trainings, called 'repetition courses,' are 20 days *annually*; but after going through 8 courses further attendance is excused for all under the rank of sergeant. The *Landwehr* men can be called up for training for not more than 36 days within 12 years.

The country is divided into 9 divisional districts and 3 mountain brigades. There is a staff organization for 4 army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, and an air force of 25 squadrons with 500 fighter planes. The mobilization strength is 720,000, including 270,000 auxiliary (men and women) services.

The fortress troops man the fortifications which close the St. Gothard Pass, the Rhine Valley and the Rhone Valley to a possible invader. They amount to about 21,000 men.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who can promote officers up to the rank of captain. But the Federal Government is concerned with all general questions and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle and with machine-guns and light machine-guns. Special infantry-guns and trench-mortars have been introduced. The field artillery is armed with a Q.F. shielded 10·5 Bofors and field howitzers of 12 cm. calibre. The heavy artillery is armed with guns of 12 cm. and howitzers of 15 cm. calibre.

Military expenditure (ordinary and extraordinary), 1949, 485 million francs.

Production and Industry.

According to the census of 1941, the agricultural population amounted to 866,720 or 22·1% of the total population of Switzerland. 480,903 were men and 385,817 women. Of the total area of the country of 4,129,490 hectares, about 931,180 hectares (22·5%) are unproductive. Of the productive area of 3,198,310 hectares, 1,023,770 hectares are forest land, 1,000,130 hectares grass and pasture land and 1,174,410 hectares arable land. In 1939 there were 238,481 farms with a total area of 1,342,697

hectares. The gross value of agricultural products was estimated at 2,121·2 million francs in 1946, at 2,073·6 million francs in 1947, at 2,130·5 million francs in 1948, and at 2,195·5 million francs in 1949.

In 1949, 174,510 hectares were planted with cereals, of which 83,190 hectares were wheat; potatoes, 52,860 hectares; sugar beet, 5,480 hectares; vegetables, 11,560 hectares; tobacco, 980 hectares. Milk production (in million quintals): 1947, 20·6; 1948, 22·9; 1949, 24·4. Production of cheese (in thousand quintals): 1947, 407; 1948, 503; 1949, 538.

The total fruit production in 1949 was 5,552,000 quintals, of which apples amounted to 2,600,000 quintals and pears to 2,200,000 quintals.

Wine is produced in eighteen of the cantons. In 1949, Swiss vineyards yielded 550,756 hectolitres of wine, valued at 57,478,000 francs. Tobacco is produced in 12 cantons. In 1949, there were in Switzerland, 138,000 horses, 182,467 sheep, 189,018 goats, 1,478,000 cattle (including 838,600 cows) and 877,000 pigs.

The Swiss Confederation has the right of supervision over the police of the forests and of framing regulations for their maintenance. The entire forest area in 1948, was 1,021,546 hectares in extent (comprising 49,652 hectares of cantonal forest and 693,644 hectares belonging to municipalities). In the forests owned by the cantons and [illegible] 2,727,934 cubic metres of timber were utilized in 1948.

Many industries flourish in Switzerland. The chief agricultural industries are the manufacture of cheese and butter. There are 2 salt-mining districts; that in Bex (Vaud) belongs to the canton, but is worked by a private company, and those at Schweizerhalle, Rheinfelden and Ryburg are worked by a joint-stock company formed by the cantons interested. The output of salt of all kinds in 1949 reached 986,500 quintals. In the canton of St. Gall (Gonzen mine) iron ore and manganese ore are mined. In 1949 there were 11,568 establishments subject to the factory law, with 497,386 workpeople. Watch and clock making is an important branch of manufacture; number of factories in 1949, 1,049; employees, 46,372; the export of watches accounts for about one-fifth to one-sixth of the total export value. In 1949, 58 breweries produced 1,895,000 hectolitres of beer.

In 1949, there were 6,091 electrical power plants with a capacity of 2,742,000 kw. The total production of energy amounted to 9,745 million kwh. in 1948–49, and to 10,479 million kwh. in 1949–50 (Oct.–Sept.).

The Swiss Federation of Trade Unions had, in 1949, a membership of 380,904 Other organizations of employees had about 315,000 members.

Commerce.

The special commerce, excluding gold (bullion and coins) and silver (coins), was (in 1,000 Swiss francs) as follows :—

	1943	1944	1945	1946	1947	1948	1949
Imports .	1,727,100	1,185,900	1,225,400	3,422,500	4,820,000	4,998,900	3,791,000
Exports .	1,628,900	1,131,800	1,473,700	2,675,500	3,267,600	3,434,500	3,456,700

The following table, in 1,000 francs, shows the distribution of the special trade of Switzerland among the principal countries :—

	Imports from			Exports to		
	1947	1948	1949	1947	1948	1949
Argentina . .	276,400	382,400	89,300	175,300	116,100	75,400
France . .	458,800	391,400	353,100	298,200	329,400	240,100
Germany . .	133,400	322,700	364,600	15,500	68,900	313,800
Italy . . .	320,600	299,000	251,000	209,500	227,000	259,800
Spain . . .	46,700	71,000	62,400	59,400	61,500	55,400
Sweden . .	132,600	134,100	65,500	218,000	89,700	66,500
Turkey . .	54,800	27,500	15,800	43,100	35,900	25,400
United Kingdom .	322,700	355,700	276,200	117,000	139,900	158,400
United States .	1,031,800	954,300	766,200	394,800	456,000	430,100

Customs receipts: 1946, 250,099,000 francs; 1947, 377,440,000 francs; 1948, 375,414,000 francs; 1949, 329,833,000 francs.

Total trade between Switzerland and the United Kingdom (in £ sterling) for 5 years (Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports into U.K. . .	7,376,141	6,804,641	9,648,525	11,705,589	12,758,041
Exports from U.K. .	3,474,677	16,772,488	20,609,327	19,337,330	29,160,601
Re-exports from U.K. .	786,947	2,045,904	1,167,197	1,177,288	1,677,263

Communications.

Railway history in Switzerland began in 1847. At the end of 1946 the railways (excluding tramways and funiculars) had a length of 3,245 miles. The operating receipts from traffic of the Swiss federal railways amounted in 1949 to 635,529,000 francs; operating expenses 503,546,000 francs. The state railways are gradually being electrified; by the beginning of 1947, 1,708 miles out of a total of 1,844 miles had been electrified. Traffic in 1949 was 16,041,000 metric tons and 201,586,000 passengers.

There are about 10,200 miles of main road. There is a postal autobus service, which, in 1949, carried 20,583,000 passengers. Motor vehicles at the end of 1949 numbered 219,234, including 123,009 private cars, 33,597 trucks, 57,713 motor cycles, 1,915 buses and 3,000 non-agricultural tractors and special cars.

A merchant marine was created by a decree of the Swiss Government dated 9 April, 1941, the place of registry of its vessels being Basel. On 31 Dec., 1949, it consisted of 16 vessels with a total of 48,372 gross registered tons. In 1949, 2,252,020 metric tons of goods entered and left the port of Basel.

Aerial service is being developed. In 1949 civil aviation on domestic and international routes carried 365,326 passengers, 7,240,600 kilos of postal packets, freight and luggage, and flew 17,305,000 km.

The air transport organization 'Swissair' (founded in 1931), in 1950, carried 196,625 passengers, 9,349 metric tons of freight and 1,554 metric tons of mail, and flew 9,017,761 km. Swissair is a mixed enterprise with a capital of 14 million francs.

In 1949 there were in Switzerland 4,010 post offices. Receipts, 1949, 268,548,000 francs; expenditure, 300,222,000 francs.

Switzerland has a very complete system of telegraphs and telephones, consisting (1946) of 2,025,929 miles of wire. Number of offices, 3,804; number of telephones, 845,471. The telegraph and telephone gross receipts

in 1949 amounted to 288,743,000 francs; the expenditure to 216,126,000 francs, including amortization; the net profits to 71,983,000 francs.

Wireless communication is furnished by 3 main stations and one local station. Radio-telegraph circuits are operated by Radio Suisse, S.A.; radio-telephone circuits by the Swiss Posts and Telegraphs administration.

Banking and Credit.

On 31 Dec., 1949, the coin minted in Switzerland was as follows :— 62,401,000 gold coins of the nominal value of 1,223,980,000 francs; 185,789,000 silver coins of the nominal value of 292,207,000 francs; 374,752,000 nickel coins of the nominal value of 36,838,000 francs, and 294,523,000 bronze and zinc coins of the nominal value of 3,794,000 francs; total, 917,465,000 coins of the nominal value of 1,556,819,000 francs.

The National Bank, with headquarters divided between Bern and Zurich, opened on 20 June, 1907. It has the exclusive right to issue bank-notes. On 31 Dec., 1949, the condition of the bank was as follows :—

	Francs		Francs
Gold	6,240,200,000	Securities	39,700,000
Gold exchange	259,900,000	Notes in circulation	4,566,300,000
Discounts	84,100,000	Deposits	1,731,000,000
Advances	31,000,000		

On 31 Dec., 1949, the total amount of saving deposits in Swiss banks was 8,893 million francs, with 5,333,449 depositors.

Money, Weights and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the federal law of 3 July, 1875, and since 1 January, 1887, no other units than the metric units have been legal. By the federal law of 24 June, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sevres (France), were adopted as the legal standards for Switzerland.

The *franc* of 100 *Rappen* or *centimes* is the monetary unit. By decision of the Swiss Federal Council of 26 September, 1936, the content of fine gold of the franc was reduced from 290·3225 milligrams to a level of between 190 and 215 milligrams. This corresponds to an average devaluation of 30%. Gold coins are the 20- and 10-franc pieces. Silver coins in circulation are 5, 2, 1 and ½ franc; nickel coins, 20, 10 and 5 centimes; bronze, 2 centimes and 1 centime.

The *centner* of 50 *kilogrammes* and 100 *pfund* = 110 lb. avoirdupois. The *quintal* = 100 *kilogrammes* = 220 lb. avoirdupois. The *arpent* (land) = ⅞ acre.

Diplomatic and Consular Representatives.

1. Of Switzerland in Great Britain (18 Montagu Place, W.1).

Envoy and Minister.—Henri de Torrenté (accredited 2 June, 1948).

Counsellors.—August Lindt (*Press*); Paul Clottu (*Social and Labour*); Erwin Bernath.

First Secretaries.—V. Umbricht (*Economic*); H. Steffen (*Commercial*); René Keller.

Military and Air Attaché.—Col. J. G. Rieser.

There are consular representatives at Liverpool and Manchester.

2. Of Great Britain in Switzerland.

Envoy and Minister.—Patrick Stratford Scrivener, C.M.G. (accredited 10 Jan., 1950).
First Secretary.—B. C. MacDermot.
Commercial Counsellor.—L. J. Holliday
Commercial Secretary.—Jackson Smith, M.B.E.
Information Secretary.—A. G. Michelson.
Military Attaché.—Lieut.-Col. D. J. R. Parker.
Air Attaché.—Wing-Cdr. I. J. Spencer, D.F.C.
Civil Air Attaché.—Air Marshal D. Colyer, C.B., D.F.C.

There are consuls-general at Geneva and Zurich; consuls at Basel, Berne and Lugano; vice-consuls at Lucerne and Montreux.

Books of Reference.

Statistical Information.—The Bureau fédéral de statistique (15, Hallwyl St., Bern) was established in 1860; *Director.*—A. Koller. Its principal publications are:—

SYRIA.

(SŪRIYA.)

SYRIA is an independent republic and a member of the United Nations and of the Arab League.

From 1920 to 1941 Syria was a mandated territory under French administration. On 27 Sept., 1941, General Catroux, the Free French Commander-in-Chief, in the name of the Allies, proclaimed the independence of Syria at Damascus. On 27 Dec., 1943, an agreement was signed between representatives of the French National Committee of Liberation and of Syria, by which most of the powers and capacities exercised hitherto by France under mandate were transferred as from 1 Jan., 1944, to the Syrian government. The evacuation of all foreign troops in April, 1946, marked the complete independence of Syria.

After three military *coups d'état* in March, Aug. and Dec., 1949 (*see* THE STATESMAN'S YEAR-BOOK, 1950, p. 1390), the Constituent Assembly, elected in Nov., 1949, passed a new constitution on 5 Sept., 1950. This constitution strengthens the power of the Chamber of Deputies against the President; the President must be a Moslem although there is no state religion.

President of the Republic.—Hashim Bey Atassi (elected 5 Sept., 1950).
Prime Minister and Minister for Foreign Affairs.—Khaled el Azm Bey (27 March, 1951).

National flag: green, white, black (horizontal), with 3 red stars on the white stripe.

Area and Population.—The territory formerly under the French Mandate is bounded by the Mediterranean and the Lebanese Republic on the west, by Israel and Jordan on the south, by Iraq on the east and by Turkey on the north.

For details of the frontier between Syria and Iraq and Palestine, *see* THE STATESMAN'S YEAR-BOOK, 1928, p. 893, and MAP in 1934. The frontier between Syria and Turkey (Nisibin-Jezıret ibn Omar) was settled by the Franco-Turkish agreement of 22 June, 1929.

The country was originally organized into 5 territories (*états*), but since 1 Jan., 1925, two of these, viz. Damascus and Aleppo, were united to form the single State, now the Republic of Syria (Sanjaks of Hama, Homs, Damascus, Hauran, Aleppo and Deir ez Zor, and the Autonomous Sanjak of Alexandretta, which was formed 1 Jan., 1925). By agreement between France and Turkey in June, 1939, the Sanjak of Alexandretta was ceded to Turkey and formally handed over on 23 July, 1939. The territories of the Alawites (formerly Sanjaks of Latakia and Tartous) and of Jebel Druze (south-east of Hauran) were formally incorporated in the Syrian Republic on 12 Jan., 1942.

In 1950, the administrative districts of Syria consisted of the *mohafazets* of Damascus, Hama, Homs, Hauran, Aleppo, Latakia, Euphrates, Jebel Druze and Jezireh.

The area of Syria is 171,104 sq. km. (66,046 square miles). The population was, in 1948, estimated at 3,092,203. Arabic is the prevailing language, with many dialectical varieties, but there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews and a certain number of Europeans. The principal towns, with population in Dec., 1943, are:—Aleppo, 320,167; Damascus, 286,310; Homs, 100,142; Hama, 71,391; Latakia, 36,687. There are no statistics of births and deaths.

Up to Oct., 1946, some 20,000 Armenians had left Syria and the Lebanon for Soviet Armenia; and a further 16,000 may have left in the following 3 years.

Religion and Education.—The population is composed mainly of Moslems, of whom there were 2,504,599 in 1946. The majority are Sunni Moslems (2,033,734). The Druzes numbered 89,796, the Alawites 335,454 and Ismailites 29,856. Christians numbered 419,512, of whom 143,037 were Greek Orthodox, 48,773 Greek Catholics, 104,072 Armenian Orthodox, 42,555 Syrian Orthodox, 17,258 Armenian Catholics, 11,806 Protestants, 13,986 Maronites, 17,392 Syrian Catholics. There are also 30,618 Jews. There are now one Orthodox, one Gregorian Armenian, one Latin and 3 Uniat Patriarchs (Melkite, Syrian and Maronite) of Antioch, none of whom reside in that city.

The Syrian University was founded in 1924, although the faculties of law and of medicine had existed previously. In 1950 the University comprised faculties of law, medicine, arts, science and engineering. The faculty of engineering is at Aleppo. The Higher Teacher's College at Damascus is associated with the University. Damascus is also the seat of an Arab Academy, founded in 1919.

In 1950 there were 1,612 primary schools in Syria, of which 298 were private and 40 foreign; 121 secondary schools, of which 56 were private and 18 foreign; and 8 technical schools, of which 2 were private. Students totalled 263,504.

There were, in 1949, 44 cinemas with a seating capacity of 22,700.

Finance.—The 1950 budget amounted to £Syr.142,800,000, of which £Syr.48,443,000 were allocated to defence. An additional appropriation of £Syr.14 million was made for defence in Jan., 1951. In the same month a budget totalling £Syr.67,750,000 was introduced for the first 6 months of 1951. Of this sum £Syr.22,677,200 were allocated to defence, £Syr.10,641,632 to education and £Syr.1,328,862 to agriculture. Direct taxes are expected to yield £Syr.5,800,000 and indirect £Syr.45,600,000.

Defence.—The Army is composed of about 20,000 trained men and some 12,000 recruits under training, the gendarmerie of 5,200, the Bedouin Control Force of about 1,500 and the civil police of 1,800. Syria also has a small air force and a few small coastal craft.

Production and Industry.—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding. The acreage and production of the principal crops in 1949 were as follows :—

	Area under cultivation	Production		Area under cultivation	Production
	Hectares	Metric tons		Hectares	Metric tons
Wheat . . .	741,800	779,400	Sesamé . .	8,200	6,700
Barley . . .	347,900	357,500	Chickpeas .	26,200	20,250
Maize . . .	25,900	39,100	Lentils . .	51,400	54,800
Sorghum . .	92,900	57,300	Cotton (ginned)	27,800	23,400

In 1949 there were in Syria 2,750,000 sheep, 1,200,000 goats, 143,500 camels, 97,500 horses, 368,500 cattle, 267,000 asses and 2,610,000 domestic fowls.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. There are indications of petroleum in the Latakia and Deir ez Zor regions. A branch of the Iraq Petroleum Company's oil pipeline from Kirkuk crosses Syria between Makaleb in the east and Nahr el Kebir valley in the west. The Iraq Petroleum Company is constructing a new pipeline from Kirkuk to the small Syrian fishing port of Banias (south of Lattakia); the Trans-Arabian Pipeline Company's new line to Sidon crosses southern Syria. There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. Manganese ore was mined before 1914. Sodium chloride and bitumen deposits are being worked. There is abundance of good calcareous building stone and basalt.

The most important industries are flour, olive oil, soap, cement, tanning, tobacco and textiles. New factories constructed in 1949 include 2 oil seed crushing mills, 2 cotton spinning and weaving mills, a porcelain and glass factory, and a beet sugar mill.

Commerce.—Total imports into Syria and the Lebanon in 1949 amounted to £Syr.516,188,000, and exports to £Syr.111,104,000. Re-exports were valued at £Syr.1,697,000. The principal imports were (in thousands of £Syr.) :—Textiles, 89,768; agricultural produce, 49,619; chemicals and pharmaceuticals, 21,925; metals and metal products,

62,769; vehicles, 39,058; machinery, tools and electrical goods, 78,795; food and drinks, 21,058; mineral products, 36,472; precious metals and stones, 42,039. Principal exports were:- Agricultural produce, 52,155 (including cereals, 30,685); textiles, 24,462; animal products, 2,355; food, drink and tobacco, 4,985.

The distribution of trade in 1949 was as follows (in thousands of £Syr.):— Imports from United Kingdom, 108,117; U.S.A., 118,969; France, 70,823; Italy, 26,872; Belgium, 13,012; Iraq, 26,813; Turkey, 12,298; Egypt, 6,784; Holland, 4,476; Persia, 5,940; Switzerland, 7,314; Czechoslovakia, 5,896; Arab Palestine, 1,228; India, 11,257; Sweden, 2,320; Yugoslavia, 910; Jordan, 1,626; U.S.S.R., 1,649; Germany, 1,876; Rumania, 3,540; Saudi Arabia, 12,757; Austria, 2,423. Exports to Iraq, 22,353; Jordan, 21,066; France, 6,417; U.S.A., 3,759; Egypt, 3,388; Arab Palestine, 8,069; Italy, 13,219; United Kingdom, 9,694; Belgium, 2,864; Saudi Arabia, 5,787.

Total trade of Syria and Lebanon with the United Kingdom (Board of Trade returns, in £ sterling):—

	(1947 Syria)	1947 (Leb.)	1948 (Syria)	1948 (Leb.)	1949 (Syria)	1949 (Leb.)	1950 (Syria)
Imports to U.K. .	253,445	11,531	297,166	28,935	939,592	73,133	2,015,166
Exports from U.K.	1,935,575	3,925,830	1,895,480	5,558,739	2,430,922	8,523,140	2,973,133
Re-exports from U.K.	27,979	21,044	26,337	15,130	5,154	32,980	35,724

Supreme Council of Common Interests.—Due to the close economic unity of Syria and the Lebanon there had existed, since the commencement of the French Mandate in 1920, a Council of Common Interests. After the termination of the Mandate and as a result of a conference held at Shtaura in 1943, the Supreme Council of Common Interests of the two republics was officially constituted by Decree No. 545 of 29 Dec., 1943.

The functions of this Council were: (1) Supervision of the division of the customs revenues between the two countries in the proportion of 56% for Syria and 44% for the Lebanon; (2) Preparation of economic and trade statistics; (3) Enactment and amendment of legislation concerning customs tariffs and concessionary companies; (4) Drawing up of draft agreements with foreign countries. The Council was composed of 3 Syrian and 3 Lebanese members.

On 13 March, 1950, the Syrian Government announced the rupture of customs relations with the Lebanon, and the Supreme Council of Common Interests was subsequently dissolved.

Communications.—Latakia and Tartous can be described only as large fishing ports, the bulk of Syria's imports being transited *via* Beirut (Lebanon).

Number of telephones, in 1948, was 6,200. In 1949, an automatic telephone system was installed in Damascus; automatic exchanges are being installed at Aleppo, Homs, Hama and Lattakia.

Railways.—In Syria the following railways are open (in addition to those listed under LEBANON (p. 1220):—Standard gauge from Aleppo to Meidan-Ekbes (Turkish frontier), 72 miles; Aleppo to Tel-Kotchek (Iraq frontier), 325 miles; narrow gauge from Damascus to El Hammé, 120 miles.

Roads.—In Syria there are 4,862 km. of first-class asphalted roads, 2,114 km. of second-class macadamized roads and 8,698 km. of tracks. The first-class roads are capable of carrying all types of modern motor transport and are usable all the year round, while the second-class roads

are usable during the dry season only, *i.e.*, for about 9 months. The Nairn Transport Company operate a trans-desert pullman motor coach service between Damascus and Baghdad. The motor vehicles registered at the end of 1949 were as follows:—Private cars, 2,322; lorries, 3,286; buses, 1,207; taxis, 797.

Damascus airport is served by British Overseas Airways Corporation, K.L.M., Scandinavian Airlines and other companies.

Currency, Banking, Weights and Measures.—The official currency since 1 May, 1920, is the Syrian bank-note, issued by the Bank of Syria and the Lebanon. The monetary unit is the Syrian £, divided into 100 piastres. Since the devaluation of the £ sterling in Sept., 1949, the official exchange rate has been £Syr.6·13 to the £ sterling. The free rate has fluctuated between £Syr.8 and 10.

On 31 Oct., 1950, the notes in circulation amounted to £Syr.214,000,000.

The Banque de Syrie et du Liban has the sole right of note issue. The concession is for 25 years by an agreement signed on 29 May, 1937. Other banks in operation are the Arab Bank, the Cie. Algérienne, the Crédit Foncier d'Algérie et de Tunisie (winding up), the British Bank of Iran and the Middle East, the Zilkha Bank and the Rafidain Bank.

A decree dated 22 Aug., 1935, makes the use of the metric system legal and obligatory throughout the whole of the country. In outlying districts the former weights and measures may still be in use. They are:—1 *okiya* = 0·47 lb.; 6 *okiyas* = 1 *oke* = 2·82 lb.; 2 *okes* = 1 *rottol* = 5·64 lb.; 200 *okes* = 1 *kantar*.

Diplomatic Representatives.

1. Of Syria in Great Britain (19 Kensington Palace Gdns., W.8).

Envoy Extraordinary and Minister Plenipotentiary.—Edmond Bey Homsy, C.B.E. (accredited 5 July, 1949).

Counsellor.—Assad Mohaffel.

Attachés.—Rafik Jwejati; Taher Atassi; Ibrahim Tabbah.

Military Attaché.—Col. Abdel-Rahman Mardam Bey.

There are consular representatives in London and Manchester.

2. Of Great Britain in Syria.

Envoy Extraordinary and Minister Plenipoteniary.—William H. Montagu-Pollock, C.M.G. (29 April, 1950).

Secretaries.—M. C. G. Man; A. Halsey, M.B.E. (*Commercial*); W. H. G. Fletcher (*Information*).

Naval Attaché.—Capt. H. P. Henderson, D.S.O., R.N.

Military Attaché.—Lieut.-Col. G. R. Heyland, M.C.

Civil Air Attaché.—R. M. S. Rayner.

There are consular representatives at Aleppo and Damascus.

Books of Reference.

Statistical Information.—In 1948, a Department of Statistics was established in the Ministry of National Economy, Damascus. It publishes an annual bulletin (in Arabic).

THAILAND.

(PRADES THAI, OR MUANG-THAI.)

ON 11 May, 1949, the President of the Council of Ministers issued a declaration that the name of the country, hitherto known as Siam, should henceforward be Thailand, and of the people and nationality, Thai.

Reigning King.

Bhumibol Adulyadet, born 5 Dec., 1927, younger brother of King Ananda Mahidol who died on 9 June, 1946. King Bhumibol married on 28 April, 1950, Princess Kitiyakara, daughter of the Thai Ambassador in London. His coronation took place on 5 May, 1950. A daughter was born on 6 April, 1951.

Government.

Until 24 June, 1932, the constitution of Siam was an absolute monarchy. On that date a *coup d'état* was effected and a Provisional Constitution Act was promulgated on 27 June. This was replaced by the constitution of 10 Dec., 1932, which in turn was superseded by a new constitution on 10 May, 1946. A military *coup d'état* on 8 Nov., 1947, which put Marshal Pibul Songgram into power again, was followed by a revision of the constitution, which was promulgated on 23 March, 1949. Under this constitution supreme power belongs to the nation, and the King, who is the head of the nation, exercises the legislative power by and with the advice and consent of parliament. Parliament consists of a Senate (100 members, appointed by the King) and a House of Representatives (100 members popularly elected). The executive power is exercised by the state council, which is composed of 14 to 24 members, and the juridical power through the courts. Men and women over 20 years of age enjoy the franchise.

The state council, appointed by the King, is charged with the duty of conducting the government of the state.

Prime Minister and Minister of Defence.—Field-Marshal Pibul Songgram.
Foreign Minister.—Nai Worakan Bancha.

For purposes of administration Thailand is divided into 71 provinces (*changwads*), each under the control of a commissioner who is directly responsible to the Minister of the Interior. The *changwads* are subdivided into 412 districts (*amphurs*) and 4,533 communes (*tambons*). Local legislative and executive bodies with limited powers are being established with functions, procedure and method of election closely modelled on those of the central Assembly.

In Nov., 1936, Thailand denounced all her existing treaties with foreign powers and new treaties were concluded and later ratified with Switzerland, Belgium, Sweden, Denmark, United States of America, Norway, Great Britain, Italy, France, Japan, Germany, the Netherlands and Portugal.

By these new treaties Thailand regained her full juridical and fiscal autonomy.

On 1 Jan., 1946, a peace agreement was signed between Britain and India on the one hand and Thailand on the other, bringing to an end the state of war which had lasted since Dec., 1941, when Thailand became an ally of Japan. The new treaty provided for the return to Britain of the four Malay and two Shan states ceded to Thailand by Japan in July, 1945; and Thailand pledged herself not to cut a canal through the isthmus of Kra. The peace treaty between Thailand and Australia was signed at Bangkok on 3 April, 1946.

France, too, concluded a treaty with Thailand (17 Nov., 1946) by which Thailand restored the Indo-Chinese territories ceded by the Vichy Government in 1941, and annulled the convention of Tokyo of 9 May 1941.

Area and Population.

The area of Thailand is 514,000 square km., about 77,800 square km. being in the Malay Peninsula. Bangkok is the capital.

The census taken on 24 Nov., 1947, gave a population of 17,517,742 (1937 census 14,464,489).

Religion and Education.

The prevailing religion is Buddhism. In 1945 there were 13,752,091 Buddhists, 626,907 Moslems, 69,227 Christians and 15,880 others. In 1945, there were 19,759 Buddhist temples, 113,644 priests and 60,058 novices.

Primary education is compulsory for children between the ages of 7–14, and, in the local public and municipal schools, free. In 1948, government schools numbered 440, with 63,581 boys and girls. Local public and municipal schools numbered 18,670, with 948,124 boys and 1,133,290 girls, and with 50,523 male and 11,505 female teachers. Private schools numbered 1,501, with 167,629 boys and girls.

The Chulalongkorn University was founded at Bangkok in 1917, and the University of Moral and Political Sciences in June, 1934. Other recent foundations, all in Bangkok, are the University of Medical Sciences, the University of Agriculture, and the University of Fine Arts. The total enrolment of university students was 10,494 in 1948.

The budget for 1948 of the Ministry of Education amounted to £2,205,667.

There were, in 1949, 90 cinemas with a seating capacity of 68,000.

Finance.

Revenue and expenditure for 4 financial years (£1 = 11 bahts, pre-war; 35 bahts in 1951):—

Financial Year	Revenue	Expenditure	Capital Expenditure
	£	£	£
1 April, 1938, to 31 March, 1939	10,759,212	10,068,933	2,014,067
1 April, 1939, to 30 Sept., 1939	5,419,230	5,525,559	1,219,744
1 Oct., 1939, to 30 Sept., 1940	13,316,188	12,594,546	2,085,467
1 Oct., 1940, to 31 Dec., 1940	3,380,042	2,479,417	104,144
	Bahts	Bahts	Bahts
1947	685,000,000	938,793,245	321,934,922
1948	1,677,015,000	1,666,088,493	182,104,971

Ordinary expenditures in 1948 provide 147,291,185 bahts for the Ministry of Defence; 108,893,678 bahts for the Ministry of Interior; 81,971,730 for the Ministry of Communications; 88,266,704 for the Ministry of Education; 30,325,187 for the Ministry of Public Health; 24,103,242 for the Ministry of Agriculture, and 58,564,816 for the Ministry of Finance.

Extraordinary capital expenditures in 1948 include more than 90,000,000 bahts for railways, nearly 15,000,000 bahts for shares in the Thai Airways Co., Ltd., 16,642,964 bahts for a reserve fund for highway construction, and 13,776,456 bahts for irrigation works.

The sources of estimated revenue for 1948 comprise the following items: Direct taxes, 56,370,000 bahts; indirect taxes, 613,485,200 bahts; excise, 30,587,003 bahts; State commercial enterprises, 369,479,978 bahts; fees, fines and licences, 61,145,334 bahts, and special revenue 522,100,000 bahts.

On 30 Sept., 1941, the National Debt was as follows:—4½% loan of 1907, £886,200; 4% loan of 1909, £1,950,388; 4% conversion loan of 1936, £2,141,400. Internal loans amounted to 28,236,380 bahts.

The International Bank for Reconstruction and Development in Oct., 1950, [illegible] loans totalling $25·4 million for the rehabilitation of the Royal [illegible] ($3 million), the development of the port of Bangkok ($4·4 million), and for irrigation, drainage and water communications in the Central Plain ($18 million). The railway and port loans are for a term of 15 years each and carry an interest rate of 2¾% per annum, plus commission at the rate of 1%. Amortization payments will start on 15 April, 1954. The irrigation loan is for a term of 20 years and carries an interest rate of 3% per annum, plus 1% commission. Amortization payments will start on 15 April, 1956.

Defence.

Under the National Defence Act, the Ministry of Defence has assumed the control of the Thai Army, Navy and Air Force through the War Council headed by the Minister of Defence with two deputies. Each branch of the service is controlled by its commander-in-chief and the corresponding service council.

Under the Military Service Act which came into force on 1 June, 1937, every able-bodied man between the ages of 18 and 30 is liable to serve 2 years with the colours; 7 years in the first reserve; 10 years in the second reserve; 6 years in the third reserve.

Each branch of the armed forces provides its own training and education. Apart from the Military and Naval Cadet schools, the Department of Inspector General has set up various schools of Arms. There is also the General Staff College modelled on those of the British and American systems.

ARMY.—The Army has the Army Council as its consultative body. Its commander-in-chief is the President of the Army Council, with senior officers as its members.

The Army is organized in two army corps, and one separate division; total number of units is 28 infantry battalions, 4 cavalry regiments, 10 groups of artillery, 5 battalions of signals, 1 anti-aircraft regiment (of two battalions), 1 tank regiment (of two battalions) and 1 transport battalion.

NAVY.—At the beginning of 1951 the Navy included 3 coast defence ships, 4 frigates, 10 torpedo boats, 4 submarines, 2 training ships, 5 motor torpedo boats, 3 patrol vessels, 1 fleet minesweeper, 2 coastal minelayers, 3 motor minesweepers, 8 motor launches and 23 other vessels. The strength of personnel was 10,000 officers and men. There is a Royal Naval College at Kled Keo, Cholburi.

At the mouth of the Ménam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. A project for dredging the bar is now being put into operation, it being hoped to cut a channel which will eventually be 26 feet deep. The naval dockyard has recently been reconstructed and a large new graving dock is under consideration.

AIR FORCE.—The Air Force consists of 5 wings.

Production and Industry.

A National Economic Council, responsible for planning, was set up by parliament in Dec., 1949.

According to the 1937 census 83·35% of the occupied persons (6,028,795) were engaged in agriculture and in fishery, 1·90% in industrial pursuits.

The chief produce of the country is rice, which forms the national food and the staple article of export. The figures of the rice crop are as follows :—1934–38 average, 3,040,000 hectares, 4,357,000 metric tons; 1946–47, 3,655,000 hectares, 4,642,000 metric tons; 1947–48, 4,107,000 hectares, 5,174,000 metric tons; 1948–49, 4,150,000 hectares, 5,250,000 metric tons.

Sugar output averaged 65,000 metric tons in 1934–38, and was 161,000 metric tons in 1947–48.

The harvested area and yield of certain other crops in 1937–38 was as follows:—Coconuts, 123,806 acres, 160,094,599 nuts; tobacco, 30,836 acres, 153,008 piculs; pepper, 1,285 acres, 3,250 piculs; cotton, 19,242 acres, 118,047 piculs. The livestock in 1938, consisted of 10,970 (1945, 3,583) elephants, 385,565 (1945, 203,013) horses, 5,711,720 (1945, 5,798,435) bullocks and 5,551,232 (1945, 5,230,278) buffaloes.

The project for irrigation of rice lands in the Central Plain, launched in 1950, envisages the construction of a barrage across the Chao Phya River near Chainat, about 100 miles above Bangkok, and of canals and water distribution systems, which are designed to provide an assured water supply to an area of about 2,260,000 acres in the Central Plain.

About 60 to 70% of the land area of Thailand is under forest. In the north, mixed deciduous forests with teak (*Tectona grandis, Linn.*), growing in mixture with several other species, predominate. In the north-eastern section *Pentacme Siamensis, Kurz* exist in most parts. In all other regions of the country tropical evergreen forests are found, with the well known timber of commerce, Yang (*Dipterocarpus alatus, Roxb,* and *Dipterocarpus spp.*) as the outstanding crops. Most of the teak timber exploited in northern Thailand is floated down to Bangkok. Some of them, however, are exported through Me Khong into French Indochina and through the Salween into Burma.

About 45% of the teak trade is in British hands, 40% is worked out departmentally, leaving only about 15% in the local lessees' hands. Comparative values (in ticals) of the various classes of timbers and other forest products exported during the pre-war and post-war periods are as follows :—

	1941	1946	1947	1948
Teak	5,905,017	27,728,795	54,955,231	81,998,560
Other wood . . .	800,634	2,459,500	29,118,541	29,872,296
Other forest products .	1,834,095	2,870,268	7,180,783	38,845,221
Total . . .	8,539,746	33,058,563	91,254,555	150,716,077

Rubber shipments in 1946 amounted to 14,440 long tons, valued at 45,124,137 baht; in 1947 to 51,962 tons; in 1948 to 96,000 long tons.

The mineral resources are extensive and varied, including cassiterite (tin ore), wolfram, scheelite, antimony, coal, copper, gold, iron, lead, manganese, molybdenum, rubies, sapphires, silver, zinc and zircons. By far the most important are tin and wolfram. The output of tin ore declined from 17,447 long tons in 1940 (peak year) to 15,247 in 1941 and 5,889 in 1948. Mining of antimony began in 1943 with 40 tons annual output; production in 1948 was 181·7 long tons.

Commerce.

The foreign trade of the kingdom for 4 years is as follows:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1938–39	11,784,611	18,583,826	1947	34,890,021	24,361,515
1946	13,729,791	11,494,127	1948	39,688,578	42,374,973

Rice (milled) exports averaged 1,388,000 metric tons in 1934–38, and were 812,226 metric tons in 1948, and 1,215,853 in 1949.

Total trade between Siam and United Kingdom for 5 years (Board of Trade returns) in £ sterling:—

	1938	1947	1948	1949	1950
Imports into U.K. .	369,748	639,365	1,237,563	2,979,872	3,805,764
Exports from U.K. .	1,195,233	1,585,889	2,758,082	4,689,592	6,850,234
Re-exports from U.K.	14,718	11,713	4,742	14,331	22,548

Shipping and Communications.

In 1948, 1,156 vessels of 494,991 tons entered and 1,119 of 497,487 tons cleared the port of Bangkok. Of those entering 172 (156,060 tons) were British.

In 1949, Thailand had 13 vessels of over 200 tons; total tonnage, 4,709.

On 31 Dec., 1946, there were 3,272 kilometres (2,032 miles) of state railways open to traffic and 218 kilometres (135 miles) were under construction. The northern line runs from Ban Phachi to Chiangmai (410 miles), the extreme northern terminus. The southern line (615 miles) runs from Bangkok down the Peninsula to the frontier station of Padant Besa, where it connects with the Malayan railway from Penang, and to Singapore. Another line (134 miles) branching off from Haad Yai on the southern line runs along the east coast of the peninsula to Su-gnai Kolok, where it connects with the Malayan railway line. There are branch lines (totalling 97·5 miles) to Songkhla, Nakon-Srithamrat and Kantang. The extensions of the north-eastern line (164 miles) from Nakhon Ratsima (Korat) to Khonkaen (115 miles) and from Khonkaen to Udon Thani (75 miles) have been completed. The Nakhon Ratsima–Ubol line (194 miles) has been completed as far as Ubol Rat Thani, 357 miles distant from Bangkok. The extension from Kabinburi to Aran Pradet on the Cambodian frontier (58 miles) was completed in 1926. The northern and southern railway systems are linked together by a railway bridge over the Menam Chao Phya (opened 1 Jan., 1927), and both systems terminate in the central railway station of Hua Lam Phong at Bangkok. But during the war, Rama VI Bridge was

partly destroyed by bombing and since then the terminal station for the southern railway system has been temporarily changed over from Hua Lam Phong to Dhonburi on the west bank of the Menam. All state railways are under one management. Gross receipts of the state railways in 1946 were 68,650,218 baht; working expenses, 13,082,277 baht; contribution to renovation fund, 1,066,628 baht, and net profits, 54,501,313 baht. The railroad, in 1948, a passenger traffic of 1,307,033,917 passenger-

On 1 Jan., 1949, the length of highways open to traffic was 6,725 kilometres, of which 357 kilometres were first-class roads, 5,194 kilometres were second-class and 194 kilometres were third-class. In addition there were 979 kilometres of provincial highways.

Civil Aviation.—After the end of the war, three air transport companies were established, viz.:—(1) The Thai Airways Co., Ltd. (TAC). This company established in 1947 operates all internal routes (4,000 kms.), and serves also internationally on Bangkok–Penang-Singapore; Bangkok–Saigon; Bangkok–Hong Kong and Bangkok–Calcutta routes. (2) The Pacific Overseas Airlines (Thailand), Ltd., (POAS), established in 1947, operates two routes: Bangkok–Penang–Singapore and Bangkok–Singapore. (3) The International Aviation Corporation, Ltd., (IAAS), established in 1948, is operating internationally on charter basis.

The following foreign airlines call at Bangkok:—Pan American World Airways, British Overseas Airways Corporation, KLM Royal Dutch Airlines, Central Air Transport Corporation (Chinese), Air France, Indian Overseas Airways, Braathen's South American and Far East Airtransport A/S (Norwegian) and Philippine Air Lines.

Posts.—In 1948 there were 123 post offices proper, 73 licensed post offices, 278 Amphur post offices and 351 railway station post offices. Length of telegraph lines is 11,702 km. There were two automatic exchanges in Bangkok with 5,586 subscribers.

Twenty-two wireless stations have been installed for dealing with inland traffic; one high-power transmitting station on telefunken system at Laksi and one receiving station situated in the vicinity serve foreign traffic.

Money, Weights and Measures.

The unit of currency is the *baht*, generally referred to in English as the *tical*, which is divided into 100 *satang*. At one time the coins is use were of silver in denominations of 1 *baht*, 50, 25, 20, 10 and 5 *satang* and subsidiary nickel coins of 10 and 5 *satang* and bronze coins of 1 *satang* and ½ *satang*. In 1902 the Government began to issue currency notes (5, 10, 20, 100 and 1,000 *baht*); in 1918 the 1 *baht* note was first issued and in 1943 the 50 *satang* note was issued. Silver, nickel and bronze coins have gone out of circulation and are no longer minted. Only tin coins are minted to-day, in denominations of 50, 25, 20, 10, 5 and 1 *satang*. A small amount of bronze ½ *satang* coins was minted in 1937 but they are now out of circulation.

The currency law is based on the Currency Act of April, B.E. 2471 (1928). The currency was formerly based on the gold standard and the baht was equivalent to 0·66567 gramme of fine gold, corresponding to the rate of exchange of 11 baht to £1 sterling. Thailand departed from the gold standard on the 11 May, 1932, and based the currency on sterling at the rate of 11 baht to £1. On 26 Sept., 1949, the gold value of the baht was fixed at 0·0710937 gramme of fine gold, corresponding to the rate of exchange of 35 baht to £1 and 12·50 baht to U.S. $1.

Notes and silver coins of 20 satang and above are legal tender without limit as to amount. Silver coins of 10 and 5 satang, nickel coins of 10 and 5 satang and tin coins of 50, 25, 20, 10 and 5 satang are legal tender up to 10 baht. Tin coins and bronze coins of 1 and ½ satang are legal tender up to 5 baht. The 1,000 baht notes were demonetized in Feb., 1945, but they were allowed to be surrendered in exchange for inscribed Savings Bonds of the same value with one year maturity, which have now been repaid. Circulation of notes in Dec., 1950, was 3,256 million baht, compared with 297 million baht in Dec., 1941.

In 1942, the Bank of Thailand was established under the Bank of Thailand Act, B.E. 2485 (1942) and began operations on 10 Dec., 1942, with the functions of a central bank. The Bank was organized on similar lines as the Bank of England, having its banking activities entirely separate from the [illegible] the note issue. The Bank also took over the note issue previously performed by the Treasury Department of the Ministry of Finance. Although the entire capital is owned by the Government, the Bank is an independent body. Its gold holdings, end of 1950, amounted to $118 million, U.S.; foreign exchange, $163 million, U.S. (including $109 million in sterling).

The first Thai bank, the Siam Commercial Bank, was established by a Royal Charter in 1906; it has been under Thai [illegible] since 1942. In 1937 and 1941 two more Thai banks were [illegible]. Bank of Asia for Industry and Commerce and the City Bank of Siam.

In Bangkok, there were, before the Second World War, branches of the Hong Kong and Shanghai Banking Corporation, the Chartered Bank of India, Australia and China, the Mercantile Bank of India and the Banque de l'Indochine. In addition, there were 2 branches of Chinese banks, besides 2 local Chinese banks established under Thai law. The Chartered Bank of India, Australia and China also had a branch in the tin-mining town of Phuket in southern Thailand.

Since the end of the war, all foreign banks, closed by the Japanese, have re-opened. The Bank of China established a branch in Bangkok in 1947; the Bank of America National Trust and Savings Association and the Netherland Indische Handelsbank opened branches in 1949. Since 1941, six new Thai banks were established. At the end of 1948 there were eleven banks incorporated under Thai law (two more are expected to open in 1949) and eight branches of foreign banks. Altogether there were forty-eight commercial bank offices in Bangkok and the provinces, compared with fifteen at the end of 1941.

On 1 April, 1913, the Government Savings Bank was opened with 529 depositors. By 31 Dec., 1940, the number was 143,284, with a total deposit of £1,484,470.

The metric system was made compulsory by a law promulgated on 17 Dec., 1923. The actual weights and measures prescribed by law are:—Units of weight: 1 *standard picul* = 60 kilograms; 1 *standard catty* ($\frac{1}{100}$ picul) = 600 grammes; 1 *standard carat* = 20 centigrammes. Units of length: 1 *sen* = 40 metres; 1 *wah* ($\frac{1}{20}$ sen) = 2 metres; 1 *sawk* (½ wah) = 0·50 metre; 1 *keup* (½ sawk) = 0·25 metre. Units of square measure:—1 *rai* (1 square sen) = 1,600 square metres; 1 *ngan* (¼ rai) = 400 square metres; 1 *square wah* ($\frac{1}{100}$ ngan) = 4 square metres. Units of capacity:—1 *standard kwien* = 2,000 litres; 1 *standard ban* (½ kwien) = 1,000 litres; 1 *standard sat* ($\frac{1}{20}$ ban) = 20 litres; 1 *standard tanan* ($\frac{1}{20}$ sat) = 1 litre.

Legislation passed in 1940 provided that the calendar year shall coincide with the Christian year, and that the year of the Buddhist era 2484 shall

begin on 1 Jan., 1941. (The Siamese New Year's Day was previously 1 April.)

Diplomatic and Consular Representatives.

1. Of Thailand in Great Britain (23 Ashburn Place, S.W.7).

Ambassador.—Phra Bahiddha Nukara (accredited 19 Oct., 1950).
Counsellor.—Phra Suvabandh Bidayakara.
Naval Attaché.—Capt. Sawasdi Kongsiri.
Military Attaché.—Col. Amnuay Chyarochana.
Air Attaché.—Group Capt. Harin Hongsakul.
Financial Attaché.—Nai Chaloke Komarakul Na Nakara.

2. Of Great Britain in Thailand.

Ambassador.—Geoffrey Arnold Wallinger, C.M.G., C.B.E.
Counsellor.—R. Whittington, C.B.E
Secretaries.—E. T. D. Lambert; B. J. Garnett, O.B.E. (*Commercial*); J. T. Mulvenny, O.B.E.; D. C. Rivett-Carnac (*Information*).
Naval Attaché.—Cmdr. G. A. Tilney, R.N.
Military Attaché.—Col. V. L. M. Wainwright, O.B.E., M.C.
Air Attaché.—Group Capt. K. N. Sayers, A.F.C.
Civil Air Attaché.—Group Capt. R. J. Bone, C.B., C.B.E., D.S.O.

There are consular representatives at Bangkok, Songkhla (Singora), Chiengmai and Phuket.

TIBET.

(Pó.)

Tibet, extending from Kashmir in the west to China on the east, forms a narrow enclave, between the Himalayas and the Kunlun mountains to the north. Its area is about 470,000 square miles; its population is estimated to be about 3 million. The capital is Lhasa. In the past it was not an exclusive and isolated region as it is to-day; a regular route from China to Nepal passed through it. Tibet became a powerful kingdom in the 7th century A.D., and in the following century exacted tribute from China. King Song-tsen Gam-po introduced Buddhism from India; an alphabet based on Sanskrit was elaborated, thus making it possible to translate Indian Buddhist sacred books into Tibetan. Some ten centuries later the Manchu Empire, taking advantage of dissensions between Mongols and Tibetans regarding the succession to the 6th Dalai Lama, sent an army to Lhasa which established, along with the 7th Dalai Lama, effective Chinese rule at Lhasa. From that time until the Chinese revolution in 1912 the Manchu dynasty maintained officers at Lhasa, though their authority decreased to a merely nominal suzerainty.

In the latter part of the 18th century Warren Hastings established friendly contacts with the then Regent of Tibet. But this led to nothing

of a permanent nature owing to Tibetan suspicion that the British had encouraged a Nepalese invasion of Tibet in 1792, and throughout the 19th century it was impossible to get the Tibetans to come to any sort of terms at all. A treaty and trade regulations were concluded with the Chinese in 1890 to regulate the frontier, but the Tibetans had no intention of acknowledging any such agreement, and the Chinese were unable to secure respect for it. At the same time the Dalai Lama was in direct intercourse with the Tsar of Russia. Eventually the Younghusband expedition of 1904 penetrated to Lhasa to secure a working agreement, the Convention of 1904. The British having secured this convention, immediately retired and before long reduced the indemnity imposed and evacuated the territory occupied as a security for its payment. The moderation then shown has engendered friendly relations ever since. The Manchu Empire immediately proceeded to convert Tibet from a loose form of vassalage into a province of China. The Dalai Lama, who had fled to China at the time of the British expedition in 1904, returned in 1909, but it was evident that the Chinese intended to deprive him of all temporal power, and the Dalai Lama fled to India. Following the Chinese revolution of 1912, the Tibetans evicted all Chinese officials and troops; Great Britain repudiated the claim of the President of the new Chinese Republic to regard Tibet as on a footing with other provinces of China.

In 1914 a conference of representatives of Tibet, China and Great Britain at Simla initialled a Convention recognizing the autonomy of Tibet proper (outer Tibet) and created a zone (inner Tibet) under Chinese authority subject to certain already existing Tibetan rights. The Chinese were unable to accept the boundaries between inner and outer Tibet laid down, and refrained from ratifying it, though they accepted the terms of the Convention in all other respects; but the two remaining parties, Great Britain and Tibet, accepted the Convention as binding between themselves. Upon this Convention all subsequent intercourse between Britain and Tibet has been based. In 1918 Chinese aggression led to strong and successful Tibetan retaliation. At a time of Chinese weakness Great Britain did its utmost to urge moderation on Tibet, and deputed Mr. (afterwards Sir) E. Teichman to the scene of hostilities. He succeeded in effecting a truce in Sept., 1918. At the invitation of the Dalai Lama, Sir Charles Bell visited Lhasa in 1920 with a view to assisting in settlement between Tibet and China. However, the British Government and the Government of India did not succeed in effecting a permanent settlement, although they brought about a state of practical equilibrium between China and Tibet.

In 1933, the 13th Dalai Lama died, and a Regent was appointed. A new Dalai Lama—aged about 5—was discovered in Chinghai and brought to Lhasa in 1939. He was installed in Feb., 1940, and assumed full powers as the temporal and spiritual head of the country on 17 Nov., 1950, when the Regency ended.

The Tibetan Government admitted to Lhasa a Chinese mission of condolence on the death of the 13th Dalai Lama and a complimentary mission on the occasion of the installation of the 14th Dalai Lama, and the Kuomintang government of China had a representative at Lhasa from 1934 to 1949, when their mission left Tibet at the request of the Tibetan Government.

In Feb., 1950, after the establishment of the Chinese People's Government at Peking, a mission was despatched from Tibet to India with instructions to establish contact with representatives of the new Chinese Government. While arrangements for the mission's journey to China were under way, the Chinese People's Liberation Army invaded Tibetan territory in force in Oct., 1950. Chinese forces occupied Chiamdo, the headquarters

of the province of Kham, and other localities in south-eastern Tibet, capturing Ngapho Shape, Commissioner of Kham, an official with the rank of a Cabinet Minister, and the bulk of the Tibetan army. Some Chinese forces, operating from Sinkiang, appeared in north-western Tibet. The Tibetan Government addressed two appeals to the United Nations, which, however, took no action. The Chinese made overtures to the Tibetans for a settlement by negotiation. The Dalai Lama left Lhasa in Dec., 1950, and established his temporary headquarters in the Chumbi Valley. A provisional Cabinet was appointed to handle affairs at Lhasa. At the same time, the Dalai Lama appointed a delegation, with Ngapho Shape as leader, to continue negotiations with the Chinese at Peking.

Relations between Tibet and Nepál are regulated by a treaty of 1856, since which date Nepál has maintained a representative at Lhasa, at present (1951), Maj. Nayan Bahadur Khattry. The conduct of British relations with Tibet is the responsibility of the High Commissioner for the United Kingdom in India. Indian relations with Tibet are conducted through the agency of the Political Officer in Sikkim with the assistance of a Mission at Lhasa (from 1936) and of Trade Agents at Gyantse, Yatung and Gartok. In the spring of 1947 observers from the Tibetan Government attended the Inter-Asian Relations Conference at New Delhi. In 1947–48, a small trade mission of the Tibetan Government visited India, China, the United Kingdom and the United States, with brief halts in Paris, Berne and Rome. In 1950, the Tibetan Government sent 2 officials to India to continue these trade talks.

The main trade route between India and Tibet lies from Bengal through Sikkim. The value of the trade is estimated as between rupees one to 2 crores. The Tibetan *sang* (paper, copper and silver currency) is valued at about 4 *sangs* to the rupee (1951); there is considerable fluctuation.

The government of the country is conducted by the Dalai Lama, assisted by a Council (*Kashag*) of 4 ministers (*Shapes*). There is also a National Assembly (*Tsongdu*), an advisory body containing most of the monk and lay officials.

TRIESTE.

THE Free Territory of Trieste was constituted by Section III (Articles 21 and 22) of the peace treaty with Italy, signed in Paris on 10 Feb., 1947, as a compromise between the conflicting interests of the western powers and Soviet Russia, without regard to the composition and wishes of the population.

However, because the Security Council of the United Nations could not agree on the selection of a governor, and because the zone occupied by the Yugoslavs was virtually incorporated in Yugoslavia, the governments of the United States, Great Britain and France, on 20 March, 1948, sought the approval of the Soviet Union for a recommendation to the Security Council that the Free Territory should return to Italian sovereignty. The Soviet government, on 13 April, considered the suggested procedure 'unacceptable'; but the western powers are continuing their efforts.

For the provisions of the provisional and permanent statutes under which the Free Territory was meant to be governed, *see* THE STATESMAN'S YEAR-BOOK, 1947, p. 1260. Meanwhile internal order is maintained by the Allied troops stationed in the Territory (5,000 men for the United Kingdom, the United States and Yugoslavia respectively). Italian currency continues to be the legal tender.

Boundaries.—The frontier line of the Free Territory has been defined in Articles 4 and 22 of the peace treaty with Italy. It starts from a point in the Gulf of Panzano, 2 kilometres north-west of the town of Duino, runs north-eastward to a point on the boundary between the former Italian provinces of Gorizia and Trieste, approximately 2 kilometres north-east of the village of San Giovanni, turns in a semi-circle south-eastward to a point on the river Dragogna, about 1 kilometre north of the village of Cernova, and then south-westward to a point approximately 1·6 kilometre south-west of the town of Castagna, thence [illegible] main channel of the river Quieto to its mouth (*see* MAP in THE STATESMAN'S YEAR-BOOK, 1948).

The Free Territory has an area of 83,077 hectares (205,200 acres). The city and port are in the British–U.S. zone (222·74 sq. km.).

The zone occupied by Yugoslav troops was, in March, 1950, incorporated in the Yugoslav customs system.

Population.—On 1 Oct., 1949, the commune of Trieste had a present population of 278,555. According to the Austrian census of 1910, the town numbered 95,730 Austrian subjects of Italian language, 27,924 Italian citizens, 20,358 Slovenes, 9,580 Germans, 2,171 Croats, 641 other Austro-Hungarians and 4,859 foreigners. The 1921 census of the commune counted 238,655 inhabitants of whom 202,382 were Italians and 26,457 Slovenes.

The population of the Free Territory, according to the Italian census of 1936, was 348,798. In 1940 there were counted 294,292 Italians, 57,718 Slovenes, 2,326 Croats and 1,225 others.

In June, 1949, the present population of the Anglo-American zone of the Free Territory was 298,970; resident population, 295,619.

There were, in 1949, 33 cinemas with a seating capacity of 12,633.

Commerce.—Imports and exports (in metric tons) :—

	1938	1946	1947	1948
Imports by sea . . .	2,408,965	1,669,628	1,723,152	2,175,960
„ „ land . . .	864,781	235,257	504,334	494,739
Exports by sea . . .	971,901	66,050	319,648	588,282
„ „ land . . .	1,133,027	1,607,956	1,109,233	1,523,726
Total . . .	5,378,674	3,578,891	3,656,367	4,782,707

In 1948, the principal items of sea-borne trade were (in metric tons) :— Imports: raw mineral oils, 667,964; cereals, 446,221; coal, 241,592; flour, 182,319. Exports: processed mineral oils, 320,730; timber, 98,405; cast iron and steel, 69,008.

Exports to United Kingdom in 1948 were £2,504; 1949, £2,265; 1950, £184,759; imports from U.K., 1948, £264,517; 1949, £376,070; 1950, £898,979; re-exports from U.K., 1948, £7,364; 1949, £26,180; 1950, £9,507.

Number of ships (including coastal traffic) entered in 1948, 10,378 (19,746 in 1938); cleared, 10,354 (19,508); excluding coastal traffic, there entered, in 1948, 1,208 ships (182 Italian) and cleared 1,283 (256 Italian); in 1938, 1,492 vessels (986 Italian) entered and 1,548 (1,037 Italian) cleared the port.

There were in 1947, 135·5 km. of railway lines within the Free Territory, of which 101 km. were electrified. In the British-American zone there were, in 1949, 94 km. of railway and 935 km. of roads of which 90 km. were state-controlled first-class roads.

TURKEY.

(Türkiye Cümhuriyeti.)

Turkey is a sovereign, independent republic, embracing an Asiatic (Anadolu) and a European (Trakya) territory, with Ankara as the capital.

On 1 Nov., 1922, the Grand National Assembly at Ankara, convened on

23 April, 1920, abolished the office of Sultan and provided that the office of Caliph, hitherto vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. On 4 Nov., 1922, the administration of Istanbul passed into the hands of the Ankara Government. On 29 Oct., 1923, the national leader, Gazi Mustafa Kemal Pasha, who had been born at Salonica in 1881, was elected first President of the Turkish Republic.

On 3 March, 1924, the Grand National Assembly abolished the Turkish Caliphate and expelled from Turkey all the members of the House of Osman, at the same time depriving them of their Turkish citizenship. On 1 Nov., 1927, Mustafa Kemal Pasha (Kemal Atatürk) was re-elected President of the Republic by the unanimous vote of the new Assembly which met on that day. On the death of Kemal Atatürk, on 10 Nov., 1938, Ismet Inonü (born 1884), who had been Premier for 12 years, was nominated second President of the Turkish Republic.

President of the Republic.—Celal Bayar, leader of the Democratic Party, born 1884 (elected 22 May, 1950, by 387 to 66 votes.)

In June 1934, a law made it obligatory for every family to adopt a distinct family name. The titles Pasha, Bey, Effendi, Hazretleri (Excellency), etc., were abolished about the same time.

By a decision of the Grand National Assembly on 13 Oct., 1923, Ankara was declared to be the capital of Turkey. All central departments of state are now established there.

The Eastern (Sadabad) Pact which was signed on 8 July, 1937, between Turkey, Persia, Afghanistan and Iraq, was automatically renewed to continue until 25 June, 1948.

Until 1945, Turco-Russian relations were governed by the Treaty of Neutrality, Non-Aggression and International Co-operation which was signed on 17 Dec., 1925, to operate for 10 years and was later extended till 1945. On 19 March, 1945, the Soviet Government denounced this treaty with effect from 7 Nov., 1945. No fresh instrument has been signed.

A treaty of alliance with Great Britain and France was signed at Ankara on 19 Oct., 1939.

A treaty of financial assistance to be provided by the U.S.A. was signed in Ankara on 12 July, 1947.

National flag: a white crescent and star on red.

National anthem: Korkma! Sönmez bu şafaklarda yüzen al sancak (words by Mehmed Akıf; tune by Zeki; officially adopted 12 March, 1921).

Constitution and Government.

The Grand National Assembly of Ankara voted, on 20 Jan., 1921, a constitution which declared that all sovereignty belonged to the people, and that all power, both executive and legislative, was vested in the Grand National Assembly as being the sole representative of the people. The old name 'Ottoman Empire' was discarded in favour of the designation 'Turkey.' A revision of the constitution was effected by the law of 20 April, 1924, which declared the Turkish State to be a republic, the religion of which was Islam, the official language Turkish and the capital Ankara. The new law provided for the election of the Assembly every four years, while according to article 7 'the Assembly exercises the executive power through the President of the Republic elected by itself and through the Council of Ministers chosen by him,' with the proviso that the Assembly may at any time control the actions of the Government and at any time dismiss it. The President of

The Republic is chosen from among the deputies constituting the National Assembly, and his term of office is identical with the life of each Assembly.

Women were granted the franchise on 5 Dec., 1934. The electoral law of 1946 was revised in 1948 and again in 1950. Turkish men and women are entitled to vote at the age of 22 and to become deputies at the age of 30. Secret ballot was introduced by law on 10 July, 1948.

On 5 Feb., 1937, the Grand National Assembly accepted the principles of the Republican People's Party—namely, nationalism, democracy, revolutionism (dynamism or adaptation to circumstances), laicism (separation of State and religion), and 'etatism' (State ownership or control of the principal means of communications, industries, mines and public utility services)—as part of the Constitution of the Republic.

Up to 1945, the Republican People's Party was in power with virtually no other parties existing; from that date onward, opposition parties came into being.

The Cabinet was, in April, 1951, constituted as follows :—

Prime Minister.—Adnan Menderes.
Deputy Prime Minister.—Samet Agaoglu.
Minister of Justice.—Ruknettin Nasuhoğlu.
Minister of Defence.—Hulusi Koymen.
Minister of the Interior.—Halel Özyoruk.
Minister of Foreign Affairs.—Fuat Koprulu.
Minister of Finance.—Hasan Polatkan.
Minister of Education.—Tevfik Ileri.
Minister of Public Works.—Kemal Zeytinoğlu.
Minister of Economy and Commerce.—Muhlis Etc.
Minister of Health.—Dr. Ekrem Hayrı Ustundag.
Minister of Customs and Monopolies.—Rıfki Salem Burçak.
Minister of Agriculture.—Nedim Ökmen.
Minister of Communications.—Seyfi Kurtbek.
Minister of Labour.—Nuri Özsan.
Minister of Industrial Development.—Hakkı Gedik.
Minister of State (in charge of Marshall Aid).—Refik Sevket Ince.

The Grand National Assembly, which was elected on 14 May, 1950, consists of 408 Democrats, 69 members of the People's Party, 1 National Party, and 9 Independents; total 487.

Local Government.

The constitution, voted at Ankara in Jan., 1921 (*see* above) altered the system in force up to 1920 by providing that the [illegible] be divided into Il (now 63 in number), sub-divided into [illegible] in their turn into Bucak. At the head of each Il is a Vali representing the Government. The system aimed at is one of centralization. Each Il has an elective council of its own. The Ilce is regarded as a mere grouping of Bucaks for certain purposes of general administration. The Bucak or Commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

According to the municipal law passed in 1930, Turkish women have the right to be electors and to be elected at municipal elections.

Area and Population.

The Treaty of Peace between the Allied Powers and Turkey which was signed at Lausanne on 24 July, 1923, defined the European frontier of the new Turkey and to some extent her Asiatic frontiers. This treaty was ratified by the Grand National Assembly on 23 Aug., 1923, and entered into force 6 Aug., 1924, on its ratification by three of the four Allied Powers.

The Treaty of Lausanne and the conventions attached to it provided for the demilitarization of zones adjoining the European frontier, the Dardanelles and the Bosphorus, subject to the right to maintain a garrison at Constantinople, for the demilitarization of Imbros, Tenedos and Rabbit Islands, as well as the islands in the Sea of Marmara with one exception, and for a special administrative regime in Imbros and Tenedos.

On 10 July, 1936, a new Straits Convention was signed at Montreux (ratified on 9 Nov., 1936) to take the place of the 1923 Convention, whereby Turkey obtained the right of re-militarizing the zone of the Straits, and this area was re-occupied by troops on 21 July, 1936. The International Commission of the Straits ceased to function on 30 Sept., 1936.

By an agreement between the Turkish and French Governments concluded at Ankara on 23 June, 1939, the Sanjak of Alexandretta (the Hatay) was incorporated in the territory of the Turkish Republic. Its population is 254,141.

The area of the Republic of Turkey is 767,119 square kilometres or 296,185 square miles.

Area of Turkey in Europe, 23,485 square kilometres; population, 1945, 1,496,612. Area of Turkey in Asia, 743,634 square kilometres; population, 1945, 17,293,562.

The population of Turkey is given as follows :—

Census	Males	Females	Total	Increase %
28 October, 1927 .	6,563,879	7,084,391	13,648,270	—
20 October, 1935 .	7,936,770	8,221,248	16,158,018	18·4
20 October, 1940 .	8,898,912	8,922,038	17,820,950	10·6
21 October, 1945 .	9,446,580	9,343,591	18,790,174	5 8
22 October, 1950 .	—	—	20,934,670 [1]	—

[1] Provisional.

The population of the Ils, at the census of 22 Oct., 1950, was given as follows (provisional figures) :—

Afyon . .	372,566	Erzincan . .	197,460	Manisa . .	519,319
Ağri (Karakö e) .	155,545	Erzurum . .	461,673	Maraş . .	288,631
Amasya . .	163,491	Eskişehir . .	274,571	Mardin . .	269,080
Ankara. . .	818,271	Gaziantep . .	328,082	Muğla . .	240,704
Antalya . .	312,102	Giresun . .	299,243	Muş . .	107,306
Aydin . . .	337,977	Gümüşane . .	203,474	Niğde . .	331,061
Balikesir . .	563,100	Hakâri . .	44,204	Ordu . .	372,492
Bilecik . .	136,844	Hatay . .	296,277	Rize . .	181,084
Bingöl . . .	97,225	Içel . . .	317,853	Samsun . .	475,953
Bitlis . . .	88,422	Isparta . .	186,152	Seyhan . .	509,600
Bolu . . .	302,805	Istanbul . .	1,179,666	Siirt . .	158,838
Burdur . .	136,359	Izmir (Smyrna) .	767,374	Sinop . .	225,427
Bursa . . .	541,987	Kars . . .	409,138	Sivas . .	540,412
Çanakkale . .	288,813	Kastamonu . .	411,576	Tekirdağ . .	222,916
Çankiri . .	218,289	Kayseri . .	404,650	Tokat . .	387,456
Çoruh (Artvin) .	174,511	Kirklareli . .	192,333	Trabzon . .	419,148
Çorum . . .	342,290	Kirşehir . .	182,141	Tunceli . .	105,663
Denizli . .	340,010	Kocaeli . .	474,716	Urfa . .	295,734
Diyarbakir . .	294,618	Konya . .	740,595	Van . .	143,949
Edirne (Adrianople)	221,125	Kütahya . .	419,100	Yozgat . .	323,506
Elâziğ . . .	211,400	Malatya . .	481,386	Zonguldak . .	425,974

The population of the principal towns was given as follows (census 21 Oct., 1945):—

Istanbul (Constantinople)	860,558	Gaziantep	62,873	Samsun	38,725
Ankara	226,712	Konya	58,457	Urfa	36,356
Izmir (Smyrna)	198,396	Kayseri	57,864	Balıkesır	33,894
Adana	100,780	Erzerum	50,875	Mersin	33,148
Bursa	85,919	Sivas	44,856	Maraş	33,104
Eskişehir	80,030	Malatya	41,530	Zonguldak	32,978
		Diyarbakir	41,087		

The Moslem population of Turkey comprises besides the Turks of Asia Minor a large number of Kurds in the eastern provinces, Lazes in the eastern section of the Pontic coast, and a few Circassians. There is a notable but diminishing Jewish element in the towns. There has of late been a considerable immigration of Turks from Rumania, Bulgaria and Yugoslavia, the majority of whom are being settled in Thrace.

Religion.

Although Islam is no longer recognized as the religion of the State, Moslems form 98 03% of the population. Turkish has been to some extent substituted for Arabic as the liturgical language. Under the imperial system the non-Moslem communities were recognized as organized communities or *millets*, the heads of which exercised not only spiritual but civil functions. The scope of these civil functions varied. They were in some cases, and more especially in that of the Œcumenical Patriarch, of great importance. The Treaty of Lausanne has restricted the administrative prerogatives of the spiritual heads of the communities, and their authority is now purely ecclesiastical.

Istanbul is the seat of the Œcumenical Patriarchate, who is the head of the Orthodox Church in Turkey. The Armenian Church (Gregorian) is ruled by a Patriarch in Istanbul who is subordinate to the Katholikos of Etchmiadzin. The Uniat Armenian Church is ruled by the Patriarch of Cilicia. The Chaldaeans (Nestorian Uniats) have one Bishop at Mardin. The Syrian Uniats have a See of Mardin and Amida, but it is united with their Patriarchate of Antioch, whose incumbent resides in Damascus. The Greek Uniats (Byzantine Rite) have as their Ordinary in Istanbul the Titular Bishop of Gratianopolis. The Latins have an Apostolic Delegate in Istanbul and an Archbishop in Izmir, but their Patriarch of Istanbul is titular and non-resident. There is a Grand Rabbi (Hahambaşi) in Istanbul for the Jews, who are nearly all Sephardim.

According to the census of 21 Oct., 1945, there were in Turkey 18,497,801 Moslems, 103,839 Orthodox, 76,965 Jews, 60,260 Gregorians, 10,782 Roman Catholics and Armenians, 5,213 Protestants, 12,582 adherents of other religions, 561 without religion and 221 undeclared.

On 10 April, 1928, the Grand National Assembly passed a law amending the constitution in such a way that Islam ceased to be the State religion of the Republic. An oath of allegiance to the Republic, taken by the President and Deputies, took the place of the former religious formula.

A law passed in Dec., 1934, forbids the wearing of clerical garb except in places of worship and during divine service. An exception is made for one representative of each religion or sect. This law applies to foreigners as well as to Turkish citizens.

Education.

According to the census of 20 Oct., 1935, in 29 Ils, with a population of 8,889,217, only 2,606,382 of the population were literate in Latin characters.

Only 40·1% of the male population and 18·2% of the female population could read and write. The analysis of other Ils is in hand.

In Turkey, elementary education is obligatory for all children of both sexes. According to the Provisional Law of 6 October, 1913, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction. They include not only primary schools, but also secondary schools, 'preparatory' schools (for students intending to enter higher schools) and a certain number of lycées or secondary schools of a superior kind. There are also training schools for male and female teachers, and a certain number of higher technical schools, besides the University of Istanbul, founded in 1900 and completely reorganized in 1933. Number of students of the University of Istanbul and Ankara, 1948–49: men, 16,402; women, 3,780. Number of teachers, 1948–49, 874 (133 women). The important non-Moslem communities in Istanbul maintain their own schools, which, like all 'private' schools, are subject to the supervision of the Ministry of Public Instruction.

Religious instruction in schools, hitherto prohibited, was made optional in May, 1948.

The following table gives statistics of education for 1949–50:—

	Number	Teachers		Students	
		Male	Female	Male	Female
Primary schools	17,029	25,195	8,841	1,015,469	610,030
Secondary schools	383	2,286	1,777	50,718	18,508
Lycées	88	1,072	765	17,404	4,541
Normal schools	8	63	33	918	576
Village institutes [1]	21	503	164	11,788	651
Professional schools	289	2,913	1,189	33,272	10,951
The university and higher education institutions	34	1,279	288	21,422	5,203
Total	17,352	33,311	13,057	1,150 991	650,460

[1] Giving 5-year courses in farming and handicraft to boys and girls after their primary schooling.

On 1 Nov., 1928, the Grand National Assembly voted a law for the adoption of Latin characters as from 1 Dec., 1928. The publication of books in Arabic characters was forbidden after 1 January, 1929.

A British Institute of Archaeology was opened in Ankara on 15 Jan., 1948.

There were, in 1950, 234 cinemas with a seating capacity of 138,000.

Justice.

Since the beginning of the work of secularization some years ago, nothing now remains of the old Ottoman laws based on the religious principles. The Turkish Government began by suppressing the religious courts (Sheri) in 1924, in order to obtain this result. The system which was thus unified consists of (1) *juges de paix* (single judges with limited but summary penal and civil jurisdiction); (2) *tribunaux de base* (a president and two assistant judges with wider powers); (3) assize courts (a president and four assistant judges who hear serious penal cases). Appeal has been abolished. The Court of Cassation sits at Ankara.

The laws applied by these courts have been recently drawn up and adopted. The Turkish Civil Code is, with the exception of a few modifica-

tions, a reproduction of the Swiss Civil Code, as also the Code of Obligations, and both entered into force towards the end of 1926. The new Penal Code is based in great measure upon the Italian Penal Code, and the Code of Civil Procedure, without being identical, nevertheless closely resembles that of the Canton of Neuchâtel. The new Commercial Code is based on the German.

On 31 Dec., 1948, the prison population consisted of 11,511 men and 348 women awaiting trial, 18,593 men and 748 women under sentence, a total of 31,200.

Social Insurance.

An act, covering occupational diseases, industrial accidents and maternity insurance, came into force on 1 July, 1946. Old-age insurance was introduced as from 2 June, 1946. It is intended to build up a complete system of insurance, covering death, unemployment, etc. The budget of the Workers' Insurance Institute amounted to £T4,436,000 in 1946.

Finance.

Estimates of revenue and expenditure (in £T) were as follows :—

	1947	1948	1949	1950	1951
Revenue .	1,021,200,000	1,115,600,000	1,251,802,894	1,312,381,043	1,313,269,563
Expenditure .	1,136,200,000	1,243,563,197	1,371,875,627	1,467,330,043	1,487,208,563

From 1 Jan , 1946, the financial year corresponds with the calendar year.

The approved budget estimates for the financial year ending 31 Dec., 1951, are as follows :—

Revenue	£T	Expenditure	£T
Income tax . . .	348,350,000	Grand National Assembly .	10,144,371
Indirect taxation . .	591,531,000	Presidency of the Republic .	793,091
Monopolies	197,402,235	Court of Accounts . .	1,973,215
Fees, stamps, etc. .	90,290,000	Prime Ministry . . .	3,198,138
State property . . .	10,500,000	The Supreme Council . .	969,240
Nationalized organizations .	48,195,000	Press and Publication . .	4,912,838
Other sources . . .	58,720,000	Statistics Department . .	1,963,065
		[illegible]	2,104,655
		[illegible]	7,819,071
		Ministry of Justice . .	45,441,989

		.	7,136,920
		Ministry of Communications	2,903,548
		Ministry of Labour . .	1,709,449
		State enterprises . .	9,225,428
Total . . .	1,344,988,235	Total . . .	1,274,746,465

Extraordinary expenditure for 1951 was estimated at £T305,012,272, of which £T120,132,098 was assigned to public works and £T21,669,150 to defence.

At 31 Dec., 1949, the public debt totalled £T2,148,887,498, of which £T1,294,999,671 was consolidated and £T853,887,827 floating debt.

The Ottoman Public Debt was redeemed on the date provided for—25 May, 1944. For the history of this debt, *see* THE STATESMAN'S YEAR-BOOK, 1944, pp. 1939–40.

On 22 Oct., 1940, the Turkish Government took over the liabilities of the Ottoman Debt Council (Unified Debt) set up in virtue of the Agreement of 22 April, 1933. The Government's reasons were :—(1) Impossibility for members of the Council to arrange for a full meeting in conformity with the provisions of the Agreement; or to carry out the duties of the Council. (2) Of a total of 1,839,453 Ottoman Debt Bonds, 854,398 were found to be in possession of holders in France, United Kingdom, Belgium, Holland, Switzerland and Italy; 29,821 in Germany, and the balance, *i.e.*, 865,692, to be held by Turks with 89,845 not due for issue until 1 Oct., 1943. On the above showing the Government claimed the debt to have become an internal liability. It was further decided that Belgian, French, Dutch, Swiss and Italian bondholders would in future be paid on the same system as German and Turkish holders; and also in future British bondholders' annuities would be paid into a 'Special Account.' The method of transfer of these funds is to be decided later by the British and Turkish Governments The Ottoman Bank was entrusted with the archives, duties and responsibilities of the former Debt Council, whose members were compensated on retirement.

Defence.

Several bills for the [illegible] of the armed forces were passed in June, 1949, by the Grand National Assembly. One of these placed all organizations connected with national defence under the authority of the Minister of National Defence. Another created a Supreme Council of National Defence, under the chairmanship of the Prime Minister, with the object of co-ordinating the resources of the country in case of war. Besides the Minister of National Defence and the Chief of the General Staff, the heads of economic Ministries are members of this council.

Military service in the land, air and naval forces is 2 years; in extraordinary conditions this term may be increased to 3 years. Men are called up when they are over 20. The average number of men liable to be called up is 175,000 every year. The strength of the forces in 1950 was about 22,000 officers and 350,000 men. The total number that could be mobilized is estimated at over 2,000,000.

In the budget of 1950 the allocations for national defence were distributed as follows :

	£T
Land Forces	334,252,597
Air Forces	49,727,902
Naval Forces	47,195,531
Military Factories Department	23,210,524
Cartographical Department	3,851,050

ARMY.

The Turkish land forces contain 22 infantry, 6 armoured and 3 cavalry units. There are 6 fortified places. The land forces are divided into 3 army and 9 army-corps regions. Infantry retains the most important place

in the Army; it is equipped with up-to-date arms. Cavalry is being equipped with modern arms and partly motorized. Artillery is being motorized to a large extent. The units are largely equipped with 10·5 cm. howitzer guns.

Navy.

The Turkish Navy includes the battle cruiser *Yavuz*, formerly the German *Goeben*, launched in 1911, displacing 23,100 tons, and armed with ten 11-in. guns; 10 destroyers, 11 submarines, 13 fleet minesweepers, 5 small minelayers, 2 surveying vessels, 12 motor minesweepers, 8 motor torpedo boats, 28 coastal craft, a submarine depot ship, a repair ship, a large yacht, a submarine rescue ship, a collier, 4 oilers, 4 boom defence vessels and 3 tenders. It is proposed to acquire 2 cruisers and 4 frigates from the U.S. Navy, which has already transferred 4 destroyers and 6 submarines to the Turkish Navy.

There is a modern naval base at Gölçuk in the Gulf of Izmit; a scheme for enlarging and improving this base comprises the provision of docks and building-slips which will replace the former government dockyard in the Golden Horn. Only merchant ships will then be built in the old establishment.

Personnel strength, in 1951, was about 1,250 officers and 18,000 men.

Air Force.

The Turkish Air Force comes under the direct control of the Turkish General Staff. The Air Force strength was, in 1950, approximately 1000 aircraft and a total personnel of about 8,500. There were 3 units. Equipment and methods are chiefly American.

Production and Industry.

Agriculture.—Agriculture is primitive, but modern methods are now being adopted. Number of people engaged in agriculture is, according to the census of 1935, 10,546,846, being 65·2% of the total population. The soil for the most part is very fertile; the principal products are tobacco, cereals, figs, silk, olives and olive oil, dried fruits, licorice root, nuts and almonds, mohair, skins and hides, furs, wool, gums, canary seed, linseed, sesame and cotton. Opium is an important crop in Konya and Afyonkarahisar. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun (the most important), Bafra, Izmit, Carşamba and Izmir (Smyrna). In 1946, tobacco was grown by 182,501 cultivators on 98,049 hectares. The tobacco crop in 1946 was 69,599 metric tons; half of the exports of leaf tobacco goes to the United States. The principal centre for silk production is Bursa. The production of olive oil, mainly confined to the Il of Aydin, is very important. Sugar production in 1949, 134,000 tons. Production of dried figs in 1948, 35,200 short tons.

The area under cultivation in 1945 was (in hectares) :—Cereals, 6,803,886; leguminous plants, 335,901; industrial plants, 562,614.

Turkey produced 5,000 metric tons of flax fibre and 10,000 tons of hemp fibre in 1948 as compared with 2,478 tons of flax fibre and 9,948 tons of hemp fibre in 1947.

Cotton production in 1948 was 58,000 metric tons of lint from 319,000 hectares; estimate, 1949, 68,000 metric tons from 354,000 hectares. Raw-cotton exports in 1948–49 totalled 29,385 tons, of which 7,440 tons went to Germany, 5,134 tons to Czechoslovakia and 3,982 tons to France.

The following table gives the area and yield of the principal products for 2 years :—

Product	1949		1950	
	Area in hectares	Yield in metric tons	Area in hectares	Yield in metric tons
Wheat . .	4,007,810	2,516,623	4,477,191	3,871,926
Barley . .	1,758,719	1,246,536	1,901,910	2,017,018
Oats . .	293,658	235,524	302,376	315,601
Maize . .	600,579	724,479	593,161	627,987
Rye . .	422,763	274,339	487,536	412,879
Rice . .	26,376	57,691	24,125	51,358

Wheat exports in 1947 amounted to 171,450 tons, whereas Turkey had imported 56,593 tons in 1942, 39,109 tons in 1943 and 3,935 tons in 1944.

On 7 June, 1945, the Grand National Assembly passed the Land Reform Bill under which large tracts of agricultural land will be distributed to peasants without land or with insufficient for their subsistence.

On 8 Feb., 1937, a new forest law was voted, providing for State control of all forests, including those under private ownership. It contains measures for planting, protection against fire, marauders and insects, and lays down penalties for infringements of any of its clauses. About 9,169,859 hectares (22,924,647 acres) are under forest. The most wooded Ils are Kastamonu, Aydin, Bursa, Bolu, Trabzon, Konya and Balikesir. Of the forest land, about 88% belongs to the State, 6% to private persons, and the rest to communes and vakifs (pious foundations). Wood pulp production in 1947 amounted to 12,157 metric tons.

At the end of 1947 there were in Turkey 24,496,000 sheep, 12,884,000 ordinary goats, 4,162,000 mohair goats, 9,761,000 cattle, 1,725,000 asses, 1,066,000 horses, 947,000 buffaloes, 104,000 camels and 96,000 mules.

In 1948 Turkey produced 32,319 metric tons of wool, 5,882 tons of mohair, and 7,702 tons of goat's hair.

Mining.—The Turkish provinces, especially those in Asia, are reported rich in minerals, which are little worked. In 1936, the Government acquired the Zonguldak coal-mines. Production of principal minerals (in 1,000 metric tons) was :—

Mineral	1946	1947	1948	1949	Mineral	1946	1947	1948	1949
Coal [1] .	3,830	3,946	4,023	4,183	Cement . .	323	350	345	377
Lignite .	604	840	1,010	1,259	Sulphur . .	3	2·7	2·9	3·1
Copper .	10	10	11	11	Meerschaum [3] .	0·6	0·2	0·4	0·2
Chrome .	103	156	286	433	Manganese ore .	2·3	5.8	8·3	25
Antimony .	0·16	0·27	1·32	1·17	Magnesite . .	0·1	0·9	3·6	6·4
Mercury .	—	0·1	0·03	—	Emery . .	8·4	11·8	7·9	8·9

[1] The figures given for coal refer to unwashed and unscreened coal.
[2] Thousand flasks. [3] Thousand cases.

Industry.—In 1934 there was inaugurated a 5-year plan for the industrialization of the country, with a view to making Turkey economically independent, and the following staple industries have been established: iron and steel, textile, mining, paper, glass, sugar and cement. In February, 1936, a second five-year plan was prepared, relating mainly to mines, mining industries and electrification. An additional impetus has been given to mining by the grant of a credit of £10,000,000 under the Anglo-Turkish Guarantee Agreement, as the interest and amortization of these credits are to be paid for by the revenue derived from the sale of base metals on free markets.

In 1936 there were 65.245 industrial establishments in Turkey employing 256,855 hands.

The first blast furnace at the Karabuk iron and steel plant (180 tons capacity) was lit on 9 Aug., 1939. Cost of construction approximates £3,000,000. Estimated annual output (in metric tons):—Pig-iron, 219,000; slag, 70,000; coke, 229,000; rolled steel products, 150,000, and steel ingots, 171,900.

The undeveloped hydro-electric power in Turkey is estimated at 2·2 million kw. In 1948, 48 power plants were operating with a peak load of 7,150 kw. and an output of 30 million kwh. The total electricity production was 676 million kwh. generated in 290 power stations with an installed capacity of 263,000 kw.

Labour.—On 8 June, 1945, a Ministry of Labour was set up. It functions are carried out in the provinces by 20 district organizations. Industrial disputes must be submitted to arbitration by arbitration boards; strikes and lock-outs are prohibited. Children under 12 must not be employed in industry; those under 18, not underground and on night shifts. A system of employment exchanges began to operate from 25 Jan., 1946. Employers and employees may form unions; these must not engage in political activities. A bill recognizing the right to strike is (June 1950) under consideration.

Commerce.

Imports and exports (in £T) for 5 years :—

	1946	1947	1948	1949	1950
Imports . .	223,931,229	685,003,317	770,148,535	812,616,000	799,859,127
Exports . .	132,094,468	625,243,952	551,038,451	693,910,000	737,586,635

In 1949, exports totalled 997,110 metric tons, and imports, 1,220,811 metric tons.

Turkish imports from the principal countries were as follows (in million £T):—

Country	1945	1946	1947	1948	1949	1950
U.K. . . .	29·4	48·3	86	187·3	140	83·3

Communications.

Shipping.—In 1949, the merchant marine had a gross tonnage of 434,329, of which 240,051 tons were operated by the state.

In 1949, 4,059 vessels of 5,342,597 tons entered and cleared the ports of Turkey under foreign flags, and 60,324 vessels of 19,134,376 tons under the Turkish flag.

Roads.—Turkey has (1949) 15,103 km. of good roads and 7,275 km. in need of repairs.

Rail.—The total length of railway lines in 1949 was, 7,736 km., of which 48 km. of narrow gauge (Mudanya–Bursa) is not operated and 61 km. has double track. Mileage operated by the Government consisted of 7,326 km. of standard, 287 km. of narrow and 124 km. of broad gauge track. In the fiscal year ending 31 Dec., 1948, total revenues for the railways amounted to £T146,532,052.

Post.—In 1948 there were 31,710 km. of telegraph lines, with 55,768 km. of wire. Number of post and telegraph offices, 1,679. Number of telephones, 1 Jan., 1949, 52,423.

Banking and Credit.

In Jan., 1927, the Turkish Government issued a charter for a new national bank, to be styled the Central Bank of the Turkish Republic (Merkez Bankasi). Its capital is £T15,000,000, which has been fully subscribed. The future status of this bank was determined by a law passed by the Grand National Assembly on 11 June, 1930. It began its activities on 3 Oct., 1931, following the approval of the statutes by the Government. The bank has a concession for 30 years, renewable during the last 5 years of this period, and is the sole bank of issue in the country. There are 7 other State controlled banks :—The Halk Bankasi (People's Bank), a popular savings bank; the Sümer Bank (industrial), capital £T150,000,000; the Ziraat Bankasi (agriculture); the Eti Bank (development of mines and marketing of minerals), capital £T100,000,000; the Emlâk Kredi Bankasi (real property and mortgages); the Iş Bankasi, capital, £T5,000,000, and the Provincial Bank, capital £T100,000,000. The principal foreign bank in Turkey is the Ottoman Bank, founded in 1863. It has a branch in every important town of Turkey. The concession of the Ottoman Bank, extended in Aug., 1925, by the Turkish Government, for a further period of 10 years, was prolonged (5 June, 1933) until March, 1952.

Notes in circulation reached a peak of £T998,418,000 on 12 April, 1947, thereafter declining. Note circulation on 24 June, 1950, was £T878,031,000; foreign exchange assets, £T105,573,000.

Money, Weights and Measures.

Since 8 April, 1916, a gold standard, with the *kuruş*, as the unit, is general all over Turkey. The Turkish pound is divided into 100 piastres (*kuruş*) and

contains 6,615 grammes of fine gold. The piastre is equal to 40 para. The piastre pieces are of nickel. Silver coins are 25 and 50 piastres, and gold coins ¼, ½, 1, 2½ and 5 £T. Silver is legal tender up to 20 Turkish liras and nickel up to 500 *kuruş*.

The only money in general circulation, apart from a 2·5 *kuruş* brass coin and for 1 piastre and coins for 5, 10, 25, 50 and 100 piastres, are notes of the Central Bank, which include the notes issued by the state during the 1914–18 war and taken on charge by the bank since 3 Oct., 1931, as well as those subsequently issued and covered by gold and foreign exchange. The Turkish gold *lira*, at 2 June, 1950, was worth 3,390 *kuruş*.

The rate of parity between the Turkish pound and the pound sterling was fixed on 18 Sept., 1949, at a buying rate of 7·84 to the £1 and a selling rate of £T7·91 to the £1.

The metric system of weights and measures came into force on 1 Jan., 1934.

For the old weights and measures, *see* THE STATESMAN'S YEAR-BOOK, 1933, p. 1349.

On 24 May, 1928, the Grand National Assembly passed a law making the employment of European numerals obligatory as from 1 June, 1929.

On 1 March, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar, while as from 1 January, 1926, it was decided finally to adopt the Gregorian calendar alone, the Turkish civil year 1342 becoming 1926.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN (69 Portland Place, W.1).

Ambassador.—Cevat Açikalin (appointed 17 Oct., 1945).
Counsellor.—Kadri Rızan.
First Secretary.—Reşat Zihni Akdur.
Naval Attaché.—Capt. Tefvik Sargut.
Military Attaché.—Col. Tahsın Berkman.
Air Attaché.—Lieut.-Col. Sadi Atıkkan.
Commercial Counsellor.—S. Turhan Hisım.
Press Attaché (86 Park Street, W.1).—Nejat Sonmez.
Cultural Attaché.—Nuretin Polvan.
Consul-General.—H. A. Ramazanoğlu.

There are Turkish consuls at Birmingham, Bristol, Cardiff, Glasgow, Liverpool and Newcastle.

2 OF GREAT BRITAIN IN TURKEY.

Ambassador.—Sir Noel H. H. Charles, Bt., K.C.M.G., M.C. (appointed 11 Feb., 1949).
Counsellor.—R. D. J. Scott-Fox.
First Secretaries.—G. E. Millard; R. O. Dennys, O.B.E.; N. Bicknell, D.S.O., D.F.C. (*Commercial*); J. A. Grant (*Information*); F. V. Michell; W. P. S. Lane.
Commercial Counsellor.—J. M. Walsh.
Naval Attaché.—Capt. A. G. Poe, D.S.C.
Military Attaché.—Brig. C. R. A. Swynnerton, C.B., D.S.O.
Air Attaché.—Air Commodore R. J. Legg.
Civil Air Attaché.—R. M. S. Rayner.
Consuls-General.—(Istanbul) A. N. Williamson-Napier; (Izmir) D. J. Balfour.

There are consuls at Trabzon (Trebizond), Iskenderun (Alexandretta), and Mersin.

UNION OF SOVIET SOCIALIST REPUBLICS.

(Soyuz Sovyetskikh Sotsialisticheskikh Respublik.)

Constitution and Government.

On 12 March, 1917, a revolution broke out in Russia, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvov was set up by the Duma, which held office until 16 May, 1917, when it was reorganized. On 6 August, 1917, a new Cabinet under Alexander Kerensky was formed. This, too, was reorganized on 8 October, and maintained itself until 7 November, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All-Russian Congress of Soviets.

The Union of Soviet Socialist Republics was formed by the Union of

the R.S.F.S.R., Ukrainian Soviet Socialist Republic, the Byelorussian Soviet Socialist Republic and Transcaucasian Soviet Socialist Republic, by agreement between the Soviet Governments of the four republics, and the Treaty of Union was adopted by the first Soviet Congress of the U.S.S.R. on 30 December, 1922. The treaty, including the constitution of the Union, gave practical as well as theoretical equality to all the nationalities within the Union; it was adopted by the Central Executive Committee of the U.S.S.R. on 6 July, 1923, and finally ratified on 31 January, 1924. In May, 1925, the Uzbek and Turkmen Autonomous Soviet Socialist Republics and in December, 1929, the Tadzhik Autonomous Soviet Socialist Republic, were declared Soviet Socialist Republics of the U.S.S.R. Later, the Transcaucasian Republic was split up into the Armenian Soviet Socialist Republic, the Azerbaijan Soviet Socialist Republic and the Georgian Soviet Socialist Republic, each of which became constituent republics of the Union.

At the 8th Congress of the Soviets, on 5 December, 1936, a new constitution of the U.S.S.R. was adopted, known widely as the Stalin Constitution. At the same time the Kazakh Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic were proclaimed constituent republics of the U.S.S.R., which then consisted of eleven republics.

In September, 1939, the Soviet Government incorporated the Western Ukraine and Western Byelorussia—inhabited mainly by Ukrainians and Byelorussians. This territory ethnographically and economically was part of the Soviet Republics of Ukraine and Byelorussia when it was seized by Poland in 1920. Western Ukraine and Byelorussia were subsequently incorporated into the Ukrainian Soviet Socialist Republic and into the Byelorussian Soviet Socialist Republic respectively.

On 31 March, 1940, the territory ceded by Finland was joined to that of the Autonomous Soviet Socialist Republic of Karelia to form the Karelo-Finnish Soviet Socialist Republic which was admitted into the Union as the 12th Soviet Republic.

On 2 August, 1940, the Moldavian Soviet Socialist Republic was constituted as the 13th Soviet Republic. It comprised the former Moldavian Autonomous Soviet Socialist Republic and Bessarabia (ceded by Rumania on 28 June, 1940), except for the districts of Khotin, Akerman and Ismail, which, together with Northern Bukovina, were incorporated into the Ukrainian Soviet Republic. On 29 June, 1945, Ruthenia (Sub-Carpathian Russia) was by treaty with Czechoslovakia likewise embodied in the Ukrainian Soviet Socialist Republic. The Soviet-Rumanian frontier thus constituted was confirmed by the peace treaty with Rumania, signed on 10 February, 1947.

On 3 Aug., 1940, Estonia, Latvia and Lithuania were incorporated in the Soviet Union as the 14th, 15th and 16th Soviet Republics.

After the defeat of Germany it was agreed by the Governments of the United Kingdom, the United States and the U.S.S.R. (by the Potsdam declaration) that the greater part of East Prussia should be embodied in the territory of the U.S.S.R. The area which includes the town [illegible] berg (renamed [illegible], 1946), Tilsit and Insterburg, was [illegible] Russian Soviet [illegible] Republic.

By the peace treaty with Finland, signed on 10 Feb., 1947, the province of Petsamo (Pechenga), previously ceded to Finland by the Soviet Union on 14 Oct., 1920, and 12 March, 1940, was returned to the Soviet Union.

In 1945, after the defeat of Japan, the southern half of Sakhalin and the Kurile Islands were, by agreement with the Allies, incorporated in the U.S.S.R.

The Soviet Union is a socialist state of workers and peasants, the political units of which are the Soviets or councils of workers by hand and brain. All central and local authority is vested in these Soviets.

The following is a brief outline of the principal provisions of the constitution of the U.S.S.R. :—The economic foundation of the U.S.S.R. is the socialist system of economy and the socialist ownership in the means of production and the abolition of the exploitation of man by man in accordance with the principle, ' He who does not work, neither shall he eat.' There are two forms of socialist property in the U.S.S.R. : (1) State property (property of the whole people); (2) Co-operative and collective farm (*Kolkhoz*) property (property of individual collective farms and property of co-operative associations). The land, mineral deposits, waters, forests, mills, factories, mines, railways, water and air transport, banks, means of communication, large state-organized agricultural enterprises such as state farms (*Sovkhozy*), machine and tractor stations and the like, as well as municipal enterprises and the principal dwelling-house properties in the cities and industrial localities, are state property, that is, the property of the whole people; but the land occupied by collective farmers is secured to them in perpetuity so long as they use it in accordance with the laws of the country. The members of the *Kolkhozy* also have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a *Kolkhoz* may retain their individual farms, but they are not allowed to exploit hired labour. The right of personal property of citizens in their income from work and in their savings, in their [illegible] and auxiliary household economy, their domestic furniture [illegible] d objects of personal use and comfort, as well as the right of inheritance of personal property of citizens, are protected by law. The constitution recognizes the right of all citizens to work, rest, leisure, education and maintenance in old age, sickness or incapacity, without distinction of sex, race or nationality, and lays down that any direct or indirect restriction of the rights of, or conversely, the establishment of direct or indirect privileges for citizens on account of their race or nationality, as well as the advocacy of racial or national exclusiveness or hatred and contempt, is punishable by law. Military service in the Soviet Army (formerly Red Army) is recognized as an honourable duty of the citizens of the U.S.S.R., and universal military service is the law of the land. The franchise is enjoyed by all citizens of the U.S.S.R. who have reached the age of 18, irrespective of sex, race or nationality, religion, standard of education, domicile, social origin, property status or past activities, with the exception of the insane, and persons convicted by court of law to sentences including deprivation of rights. Candidates for election must be 23 years of age. Citizens serving in the Soviet Army have the right to elect and be elected on equal terms with all other citizens. A member of any Soviet may be recalled by a decision of a majority of his or her electors if he or she fails to give satisfaction.

The highest organ of the state power of U.S.S.R. is the Supreme Council of the U.S.S.R., which exercises legislative power. It consists of 2 chambers with equal legislative rights, elected for a term of 4 years: the Council of the Union and the Council of Nationalities.

The Council of the Union is elected by the citizens of the U.S.S.R. on the basis of 1 deputy for every 300,000 of the population. In 1946 it consisted of 682 members.

The Council of Nationalities is elected by the citizens of the U.S.S.R. voting by Union and autonomous republics, autonomous regions and national areas on the basis of 25 deputies from each Union republic, 11 deputies from each autonomous republic, 5 deputies from each autonomous

region and 1 deputy from each national area. In 1946 it consisted of 657 members.

The highest executive and administrative organ of state power of the Union of Soviet Socialist Republics is the Council of Ministers (called People's Commissars before 16 March, 1946).

The Presidium of the Supreme Soviet of the U.S.S.R. is elected at a joint session of both chambers of the Supreme Soviet and consists of the chairman, 16 vice-chairmen (the chairmen of the 16 republics), 15 members and the secretary. It acts as the supreme state authority between sessions of the Supreme Soviet and is accountable to the latter for all its activities.

Deputies are elected by the voters on the basis of universal, equal and direct suffrage by secret ballot. The only legal political party is the Communist Party. All non-members of the Communist Party are classed as non-party citizens. The elections are held on a one-front basis, the candidates having received a more or less general preliminary approval in their constituency. At the election held on 12 March, 1950, 111,090,010 electors voted.

A modification of the 1936 constitution was adopted by the Supreme Soviet on 1 February, 1944, whereby each of the constituent republics of the Union is given the right to have separate Commissariats for Defence and for Foreign Affairs. On 25 Feb., 1946, a decree of the Presidium of the Supreme Soviet of the U.S.S.R. [illegible] People's Commissariat for Defence of the U.S.S.R. int[illegible] for the Armed Forces of the U.S.S.R., unifying in this Ministry all the armed forces of the U.S.S.R.—the land, air and naval forces. Each republic has the right to enter into relations with foreign states and to conclude treaties with them. In matters concerning foreign affairs, the Ministry for Foreign Affairs of the U.S.S.R. now deals with all questions concerning the interests of the Union as a whole. At the same time, it has a say in the general character of the foreign policy of the constituent republics. As in the 1923 constitution, so also in 1936, the right of the constituent republics to withdraw from the Union was expressly recognized.

National flag: red, with sickle and hammer in gold in the upper corner near the staff, and above them a 5-pointed star bordered in gold.

National anthem: Soyuz nerushimy respublik svobodnykh (words by S. Mikhalkov and El-Registan; tune by A. V. Alexandrov; 1944).

Legislation by decree and executive authority is vested in the Council of Ministers, or Cabinet. The Council of Ministers is responsible to the Supreme Soviet of the U.S.S.R. and in the intervals between sessions to the Presidium of the Supreme Soviet.

Chairman of the Presidium of the Supreme Soviet of the U.S.S.R.—Nikolai M. Shvernik (Deputy from the Sverdlovsk electoral area of the R.S.F.S.R.) (elected 19 March, 1946).

Chairman of the Council of Ministers of the U.S.S.R.—Generalissimo Joseph Vissarionovich Stalin.

Vice-Chairman of the Council of Ministers.—Vyacheslav Mikhailovich Molotov.

Minister of Foreign Affairs.—A. Y. Vyshinsky.

Each of the constituent republics of the Union retains its own Supreme Soviet and Council of Ministers, the function of which in relation to the

respective Union republics is the same as that of the Supreme Soviet and Council of Ministers of the U.S.S.R. respectively to the U.S.S.R. Certain ministries are the exclusive prerogative of the Union Government. Others exist both in the Union Government and in the individual republics, and a number exist only in the individual republics.

The divisions of the Communist Party correspond to the territorial divisions of the state. Local conferences of the Party members elect delegates to regional conferences and the regional conferences send delegates to the Soviet Union Party Conference or Congress. The Congress is the supreme authority of the Party. Ordinary congresses are to be convened not less than once in 3 years; but there has been only one since 1934. The Congress elects the Central Committee of the Party, the Commission of Party Control and the Central Inspections Commission. In addition, in 1939, at the 18th Congress of the Communist Party, it was decided to summon not less than once a year an All-Union Party Conference consisting of representatives of the local organizations, to discuss urgent problems of Party policy. This Conference has met once (in 1940). The Central Committee holds a plenary session at least once in 4 months, and elects for the general management of its affairs a Secretariat consisting of 5 members.

The Central Committee elects sub-committees (bureaux) which deal with the various aspects of Party work, *e.g.*, Political (Politbureau), the Organization Bureau (Orgbureau) and other bureaux. The most important of these sub-committees is the Politbureau. It consists of 9 members.

The local administration is carried on by the local Soviets, and in every locality there is also a Communist Group, which receives Party group instructions from the superior organs of the Party.

In every factory, in every *kolkhoz* (collective farm), there is a Communist cell which directs the technical administration of the factory or the *kolkhoz*, and which is in contact with the other organs of the Communist Party. In this way the members of the Party distributed over the whole mechanism of the state system represent the controlling power which leads the state machine in the direction required by the Central Committee of the Communist Party along the 'General Party Line.' The purity of the Party policy and strict discipline are maintained by means of thorough investigation of the political and social activities of each member.

Secretary of the Party.—Joseph Vissarionovich Stalin (appointed Field-Marshal, 7 March, 1943; Generalissimo, 28 June, 1945).

Politbureau.—J. V. Stalin, V. M. Molotov, L. P. Beria, G. M. Malenkov, K. E. Voroshilov, A. I. Mikoyan, A. A. Andreev, L. M. Kaganovitch, N. S. Khrushchev. Substitute members: N. M. Shvernik, N. A. Bulganin and A. N. Kosygin.

Soon after the adoption of the new constitution by the All-Union Soviet Congress on 5 Dec., 1936, all the constituent republics of the Union held their respective Soviet congresses, at which they adopted their own constitution based in all essentials on the constitution of the Union described above, but adapting it where necessary to their own national and local requirements.

The autonomous republics are governed by their own Supreme Council and Council of Ministers: the regions and areas are governed by executive committees elected by the local Congress of Soviets, which are elected by the citizens for a term of 2 years.

The Communist International (the Comintern), founded on the initiative

of the Russian Communist Party in 1919, was dissolved on 10 June, 1943. On 5 Oct., 1947, it was announced that a Communist Information Bureau (Cominform) had been set up in Belgrade to co-ordinate the activities of the Communist parties of Bulgaria, Czechoslovakia, France, Hungary, Italy, Poland, Rumania, U.S.S.R. and Yugoslavia. On 28 June, 1948, Yugoslavia was expelled from the Cominform for having 'followed an incorrect line in the basic questions of foreign and domestic policy,' and the Bureau was transferred to Bucharest. The Cominform publishes a weekly paper, *For a Lasting Peace, for a People's Democracy* (from Nov., 1947)

Area and Population.

PROGRESS AND PRESENT CONDITION.

The total area of the Soviet Union in 1946 was given as 8,708,070 square miles; total population, about 193,200,000. The areas and approximate population of the constituent republics of the U.S.S.R. are as follows (capitals in brackets):—

Constituent republics of the Union	Area in sq. km. (Oct., 1947)	Total population (17 Jan., 1939)
R.S.F.S.R. (Moscow)	16,922,000	109,279,000 [1]
Ukrainian S.S.R. (Kiev)	576,600	38,500,000 [2]
Byelorussian S.S.R. (Minsk)	207,600	10,400,000 [2]
Azerbaijan S.S.R. (Baku)	85,700	3,209,727
Georgian S.S.R. (Tbilisi)	76,200	3,542,289
Armenian S.S.R. (Erivan)	29,800	1,281,599
Turkmen S.S.R. (Ashkhabad)	484,800	1,253,985
Uzbek S.S.R. (Tashkent)	407,500	6,282,446
Tadzhik S.S.R. (Stalinabad)	142,600	1,485,091
Kazakh S.S.R. (Alma-Ata)	2,753,800	6,145,937
Kirghiz S.S.R. (Frunze)	196,900	1,459,301
Karelo-Finnish S.S.R. (Petrozavodsk)	178,500	900,000
Moldavia S.S.R. (Kishinev)	33,800	2,200,000 [2]
Estonia S.S.R. (Tallin)	45,100	1,120,000 [2]
Latvia S.S.R. (Riga)	64,500	1,950,000 [2]
Lithuania (Vilnius)	65,200	2,879,070 [2]
Total	22,270,600	191,888,445

[1] Not including territories incorporated in 1940 and 1945.
[2] Estimate 1940, not including Bessarabia and Transcarpathia.
[3] Estimates 1940.

On 17 Jan., 1939, the total population was 170,467,572, of whom 81,665,000 were males and 88,802,000 females; 31,412,232 were children under 8; 55,900,000 were urban and 114,600,000 rural population.

Estimated losses of population in World War II, 14 million, of which 7 million were military and 7 million civilian losses.

The following table shows the growth of the population in Russia:—

Year	Population	Year	Population
1897	106,432,300	1931	160,430,300
1914	139,312,700	1932	163,166,100
1918	142,579,900	1939 (census)	170,467,572
1928	150,426,800	1946 (estimate)	193,200,000

The census of 1939 showed that the following were 36 large towns in the U.S.S.R. :—

Moscow	4,137,018	[illegible]	445,476	Perm	255,196
Leningrad	3,191,687	[illegible]	425,544	Astrakhan	254,000
Kiev	846,293	Kazan	402,000	Ufa	245,863
Kharkov	833,432	Kuibyshev (Samara)	390,000	Irkutsk	243,000
Baku	809,347	Saratov	376,000	Minsk	239,000
Gorky (Nizhni Novgorod)	644,116	Voronezh	327,000	Mariupol	222,000
Odessa	604,223	Yaroslavl	298,000	Kalinin (Tver)	216,000
Tashkent	585,005	Zaporozhie	289,000	Voroshilovgrad (formerly Lugansk)	213,000
Tbilisi (Tiflis)	519,175	Ivanovo	285,000	Vladivostok	206,000
Rostov-on-Don	[illegible]	[illegible]	281,000	Erivan	200,000
Dnieperpetrovsk	506,662	Chelliabinsk	273,127	Magnitogorsk	145,900
Stalino (Yuzovka)	462,000	Tula	272,000		

Other large towns of the U.S.S.R. with census population of over 50,000 inhabitants on 17 Jan., 1939, were :—

Makeyevka	240,145	Orekhovo-Zuyevo	99,329	Voroshilov	70,628
Alma-Ata	230,528	Zlatoust	99,272	Losmoostrovsk	70,480
Krasnodar	203,916	Kirovabad	98,743	Michurinsk	70,202
Khabarovsk	199,364	Kherson	97,186	Petrozavodsk	69,728
Krivoi Rog	197,621	Ryazan	95,358	Sergo	68,360
Krasnoyarsk	189,999	Novorossiisk	95,280	Leninakhan	67,707
Taganrog	188,808	Vologda	95,194	Chernigov	67,356
Izhevsk	175,740	Zhitomir	95,090	Maikop	67,302
Chkalov	172,925	Konstantinovka	95,087	Kovrov	67,163
Grozny	172,468	Kramatorsk	93,350	Vladimir	66,761
Stalinsk	169,538	Vinnitsa	92,868	Lipetsk	66,625
Vitebsk	167,424	Frunze	92,659	Ossipevsk (formerly Berdichev)	66,306
Nikolayev	167,108	Petropavlovsk	91,678	Uralsk	66,201
Karaganda	165,937	Serpukhov	90,766	Cheremkhovo	65,907
Nizhni Tagil	159,864	Kremenchug	89,553	Orsk	65,799
Penza	157,145	[illegible]	89,484	Nadezhdinsk	64,719
Smolensk	156,677	[illegible] S.S.R.)	88,216	Lyublino	64,332
Shakhty	155,081	Bryansk	87,473	Sumy	63,883
Barnaul	148,129	Makhach-Kala	86,847	Vyshni Volochek	63,642
Dnieprodzerzhinsk	147,829	Voroshilovsk (Orjonikidze Territory)	85,100	Berezniki	63,575
Gomel	144,169	Kokand	84,665	Pyatigorsk	62,875
Kirov	143,181	Bobyruisk	84,107	Jambul	62,723
Simferopol	142,678	Andizhan	83,691	Kuntsevo	60,963
Tomsk	141,215	Armavir	83,677	Mytishchi	60,111
Rybinsk	139,011	Stalinabad	82,540	Pskov	59,898
Samarkand	134,346	Dzhaudzhikau	82,331	Blagoveshchensk	58,761
Kemerovo	132,978	Leninsk-Kuznetsky	81,980	Chapayevsk	57,995
Poltava	130,305	Kutaisi	81,479	Shuya	57,950
Ulan-Ude	129,417	Novocherkask	81,286	Nikopol	57,841
Orjonikidze (North Ossetian A.S.S.R.)	127,172	Noginsk	81,024	Yegoryevsk	56,340
Ashkhabad	126,580	Bisk	80,190	Artemovsk	55,165
Tambov	121,285	Perovo	77,727	Volsk	55,053
Kostroma	121,205	Syzran	77,679	Voroshilov (Ukrainian S.S.R.)	54,794
Kursk	119,972	Namangan	77,351	Charjov	54,739
Murmansk	117,054	Stalinogorsk	76,207	Rzhev	54,081
Sevastopol	111,946	Melitopol	75,735	Kurgan	53,224
Orel	110,567	Slavyansk	75,542	Borisoglebsk	52,055
Semipalatinsk	109,779	Tyumen	75,537	Cherkassy	51,693
Gorlovka	108,693	Kineshma	75,378	Berdyansk	51,664
Prokopyevsk	107,227	Kolomna	75,139	Kislovodsk	51,289
Kerch	104,471	Chimkent	74,185	Lysva	51,192
Dzerzhinsk	103,415	Engels	73,279	Kamensk Uralsky	50,897
Chita	102,555	Podolsk	72,422	Yelets	50,888
Ulyanovsk	102,106	Anzhero-Sujensk	71,079	Krasni Luch	50,829
Kirovograd (Ukrainian S.S.R.)	100,331	Batumi	70,807	Bokhara	50,382
Mogilev	99,440	Komsomolsk	70,746		

Between 1917 and 1948, 839 new towns were constructed, of which 475 have been built since 1939, chiefly in the Volga steppes, the Urals, Western

Siberia and Central Asia. These include (population in 1939) Magnitogorsk (145,870), Berezniki, Krasnouralsk (in the Urals), Novoye Zaporozhe (289,200) (in the Ukraine), Anjero-Sudjeansk, Stalingorsk, Prokopievsk, Kemerevo (133,000) (in West Siberia), Cheremkhovo (65,900), Igarka (in [illegible]. Karaganda, Kaunrad (in Kazakhstan), Kirovsk [illegible] (in [illegible], in the Kola peninsula), Kandalaksha (in Karelia) and [illegible] (in the Moscow region),

Religion.

By decree of 23 Jan., 1918, the Soviet Government disestablished the Church and appropriated certain categories of its property. The congregations themselves have to maintain their churches, which they are permitted to use free of charge. From the time of the revolution of March, 1917, all religions might be freely professed in the Union. This principle is safeguarded in the 1936 constitution of the U.S.S.R., in which Article 124 reads as follows: 'With the aim of ensuring freedom of conscience for the citizens, the Church in the U.S.S.R. is separated from the state and the school from the Church, and freedom of religious worship and anti-religious propaganda is permitted to all citizens.' Before the revolution the prevailing religion of the country was the Orthodox Faith. In 1940 there were over 30,000 independent religious communities of every kind, over 8,000 churches and about 60,000 priests and ministers of religion. The Orthodox Church has the largest number of followers and is divided into two chief sections, 'The New Church' and 'The Old Church,' each of which has its own headquarters in Moscow. 'The New Church' is headed by the Metropolitan Vitali. 'The Old Church' is headed by the Patriarch of the Orthodox Church, and the Holy Synod consists of the Patriarch, 3 metropolitans (*ex officio*) and 3 representatives of the bishops (monthly alternating according to seniority). The present Patriarch Alexis was elected by the General Council of the Orthodox Church on 2 Feb., 1945. On 11 Oct., 1943, a council on the affairs of the Russian Orthodox Church was set up to maintain contact between the Government and the Patriarch of Moscow and all Russia on questions of the Russian Orthodox Church that require settlement by the U.S.S.R. Government. A similar council was set up on the affairs of the religious cults, *i.e.* all religious communities other than the Russian Orthodox Church. These councils function under the Council of Ministers.

In 1945 there were 20,000 Orthodox congregations in the U.S.S.R., with 30,000 priests; 10 theological seminaries; a theological academy in Moscow, and another in Leningrad and 87 monasteries and nunneries.

The Moslems are the second largest religious community in the U.S.S.R.

Of the dissenters in Russia, Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic and Mohammedans in Eastern and Southern Russia, while the Jews were almost entirely settled in the towns and larger villages of the western and south-western provinces. The Soviet authorities have endeavoured to settle Jews on the land—particularly in the Crimea and in the Ukraine. For colonizing Jews in the Far East the Soviet Government in 1928 allotted an area of 36,490 sq. kilometres in the district of Biro-Bidjan (the Jewish Autonomous Region of the Far East). Population, 1935, 60,000.

Education.

Education is obligatory, and certain classes of private schools (under state control) are permitted. In December, 1943, it was decided that as from September, 1944, universal compulsory education was to start from 7 years of age instead of 8 as hitherto. Co-education was the rule in all schools until 1 Sept., 1943, when separate schools for girls and boys were established in the urban areas. Since Jan., 1934, three types of schools have been in existence—those with a 4-year, a 7-year and a 10-year curriculum respectively.

In 1950, there were 220,000 primary and secondary schools. Pupils in [illegible] condary, technical etc. schools numbered over 37 million and [illegible] 1,600,000.

On 1 Dec., 1943, Suvorov military schools for training officers for the Soviet Army were opened. In 1947, there were 3,000 trade schools.

In 1939, there were 23,123 kindergartens with 1,039,000 children of from 3 to 7 years of age.

In 1950 there were 880 higher educational institutions, with 1,247,000 students (including nearly 400,000 students in correspondence course colleges) and 65,000 professors and instructors; the number of students in technical institutes was 1,094,000. Over 21,000 scientific workers were taking post-graduate courses in higher educational establishments and scientific institutes. Among the towns which at present have universities are:—Moscow, Leningrad, Kharkov, Odessa, Dorpat, Kazan, Saratov, Tomsk, Kiev, Sverdlovsk, Tbilisi, Alma-Ata, Tashkent, Minsk, Gorky and Vladivostok. In 1947, there were 81 higher medical schools and 346 medical research institutes with 15,000 research scientists.

The Academy of Sciences of the U.S.S.R. has 61 institutes, 33 research stations, 3 observatories and 31 special laboratories. On 26 Aug., 1948, the Academy began a thorough purge of 'bourgeois' biologists and gave its official blessings to the theories on genetics promulgated by Michurin and Lysenko. The chief astro-physical observatory of the Academy of Sciences was being built in the Crimea in 1949; it is to supersede the Simeiz observatory.

In 1946 there were 530 elementary and 90 senior music schools, and 21 conservatoires to most of which special children's departments are attached; and 5 art and 4 theatrical schools of university status. In all these there were some 120,000 students.

In 1941 there were 10,000 secondary schools for adults with an attendance of 1,500,000. In 1949, 723,000 skilled workers completed their vocational training in railway, factory, etc. schools.

In 1940 there were 95,400 popular libraries. In 1950 over 7,700 newspapers, published in 119 different languages, appeared in the Soviet Union. There were 2,100 reviews published in 48 languages. The number of theatres in 1940 was 908 and museums 992. There were 17,620 cinemas in 1950.

Health.

All health services are free of charge; but private practice exists. Health is administered by the Ministry of Health of the U.S.S.R., which supervises the work of the Health Ministries of the Union Republics and the Autonomous Republics. It also has under its direct control a number of medical high schools and research institutes, certain health resorts, medical publishing houses, etc.

There are over 200 specialized medical research institutes and in these and the higher medical schools there are 20,000 research workers. In 1944, an Academy of Medical Science was formed; it has under its direct control 25 research institutes.

In 1947, the number of beds in urban and rural hospitals was 837,000; the number of [illegible] was 20,500. Children's nurseries accommodated 775,000 babies. [illegible] 12,000 physicians and over 10,000 dentists work at medical institutions. There were also 527 medical centres at the largest industrial works as well as at power stations.

In 1950, the Trade Unions had 1,100 sanatoria, rest homes and prophylactic centres for industrial diseases; during the year all these accommodated some 2,500,000 people. Total number of sanatoria in 1951 was 2,000.

Semashko (W. A.), Health Protection in the U.S.S.R. London, 1934.

Justice and Crime.

The basis of the judiciary system is the same throughout the whole of the Soviet Union, but the constituent republics have the right to introduce modifications and to make their own rules for the application of the code of laws. The Supreme Court of the U.S.S.R. is the chief court and supervising organ for all constituent republics and is elected by the Supreme Soviet of the U.S.S.R. for 5 years. Supreme Courts of the Union and autonomous republics are elected by the Supreme Soviets of these republics and Territorial, Regional and Area Courts, by the respective Soviets, each for a term of 5 years.

Courts [illegible] held in the local language with full interpreting facilities as required. In all courts cases are heard in public, unless otherwise provided for by law, and the accused is guaranteed the right of defence. Judges are independent, and, according to the 1936 constitution, subject only to the law.

In the main, there is very little difference between the code of laws and their application in the separate republics. The legal system of the R.S.F.S.R., therefore, can be taken as an example of that in force in all the other republics of the Union.

The Law Courts of the R.S.F.S.R. are divided into People's Courts and higher Courts. The People's Courts consist of the People's Judge and 2 Assessors, and their function is to examine as the first instance, most of the civil and criminal cases, except the more important ones, some of which are tried at the Regional Court, and those of the highest importance at the Supreme Court. The Regional Courts supervise the activities of the People's Courts and also act as Courts of Appeal from the decisions of the People's Court. Special chambers of the higher courts deal with offences

committed in the Army, the public transport services and the labour camps of the M.V.D.

There is a Supreme Court of the U.S.S.R., the plenary sessions of which supervise the uniform application of the law by the Supreme Courts of the individual Union Republics as well as by the Chambers of the Supreme Court itself.

People's Courts, the lowest judicial instance, are elected directly by the citizens of each district on the basis of general, direct and equal franchise with secret ballot for a term of 3 years. Should a judge be found not to perform his duties conscientiously and in accordance with the mandate of the people, he may be recalled.

The People's Assessors are called upon for duty for 10 days in a year from lists of persons elected by the citizens of the rural districts, industrial enterprises, collective farms, army corps, etc. The People's Assessors for the Regional Court must have had at least 2 years' experience in public or trade union work. The list of Assessors for the Supreme Court is drawn up by the Supreme Soviet of the republic.

Apart from the Courts of Law there are the following Special Courts :— (1) the Labour Section of the People's Court, whose duty it is to supervise the regulations relating to the working conditions and the protection of labour as well as to give decisions on conflicts arising between employers and employees, or the violation of regulations; (2) Rural Commissions, which settle disputes concerning agrarian matters, such as claims relating to the use of the land, etc.; (3) Arbitration Committees, which settle disputes arising between separate state organs concerning property rights, with certain, exceptions.

The State Chief Prosecutor, styled since March, 1946, Procurator-General of the U.S.S.R., is appointed for 7 years by the Supreme Soviet. All the prosecutors of the republics, autonomous republics and autonomous Regions are appointed by the Procurator-General of the U.S.S.R. for a term of 5 years. The duties of the Public Prosecutors are the supervision of the correct application of the law by all state organs. The prosecutors of the federated republics are subordinate to the Procurator-General of the U.S.S.R., whose duty it is to see that acts of all institutions of the U.S.S.R. are legal, that the law is correctly interpreted and uniformly applied, and who has to participate in important cases in the capacity of State Prosecutor.

Capital punishment was abolished on 26 May, 1947, but was restored by the Supreme Soviet on 12 Jan., 1950, for treason, espionage and sabotage.

Finance.

The revenue and expenditure are shown as follows (in millions of roubles) :—

	1946	1947	1948	1949 [1]	1950 [1]	1951 [2]
Revenue . .	325,437	386,189	410,489	436,961	422,094	458,717
Expenditure .	307,545	361,542	370,922	412,288	412,665	451,503

[1] Preliminary returns. [2] Estimates.

A 20-year state loan of 30,000 million roubles, bearing 4% interest, was announced on 3 May, 1951.

Defence.

On 26 Feb., 1946, the control of all the Soviet armed forces was unified under a single ministry. First Minister of the Armed Forces was Generalissimo Stalin, from whom General (now Marshal) N. A. Bulganin took over on 5 March, 1947, and Marshal A. M. Vassilevsky on 24 March, 1949.

On 25 Feb., 1950, the Defence Ministry was divided into the War Ministry (Marshal A. M. Vassilevsky) and the Navy Ministry (Admiral Ivan S. Yumashev).

The Chief of the General Staff, Army General Shtemenko, controls a special 'Bureau for the Study of Modern Warfare,' consisting of about 100 junior officers of exceptional brilliance.

The estimated expenditure on defence for 1947 was 67,000 million roubles; 1948, 66,000 million roubles; 1949, 79,200 million roubles; 1950, 82,867 million roubles (actual); 1951, 96,376 million roubles.

Army.

The Army was thought to consist of 175 combat divisions with 2,800,000 men under arms in 1951, and can be expanded to 300 divisions within 60 days and to 500 divisions within 120 days.

In 1948, 120 home-based divisions consisted of about 20 armoured, 40 infantry (more than half mechanized), 15 cavalry (9 horse, 6 motorized) and 15 artillery divisions (two-thirds self-propelled). Thirty more divisions were air force or air-borne divisions. In 1951 the number of tanks was estimated to be 23,000; most of them are medium T34s (with an 85-mm. gun) and heavy Stalin IIIs (with a 122-mm. gun).

These 120 divisions were divided among 6 armies. Each army is autonomous and [illegible] with its own industrial connexions. Each is capable of fighting a limited war without reference to Moscow. These armies are:—Army of the North, H.Q. Leningrad, Commander K. E. Voroshilov; Army of the West, H.Q. Minsk; Army of the South, H.Q. Odessa, Commander V. Chuykov; Army of the Caucasus, H.Q. Tbilisi, Commander I. Bagramian; Army of Turkestan, H.Q. Tashkent or Frunze, Commander S. K. Timoshenko; Army of the Far East, H.Q. Chita or Vladivostok, Commander R. V. Malinovsky.

There are also certain special corps used for particular work such as trying out secret weapons, special missions, and Kremlin guards. These number 30,000 to 40,000 men.

Under a decree of 17 Dec., 1941, which is still in force, all male Soviet citizens must do 110 hours' military training a year.

Navy.

The new programme of construction includes 3 battleships, 20 cruisers, 120 destroyers and 1,000 submarines.

In 1946 an ex-German cruiser and 7 destroyers were acquired. Under the terms of the Italian peace treaty, the Soviet Union was allotted the battleship *Giulio Cesare*, the cruiser *Emanuele Filiberto*, 3 destroyers, 3 torpedo boats, 2 submarines, 10 motor torpedo boats and 25 other vessels.

In Leningrad and the vicinity there are 5 state dockyards and Black Sea yards at Nikolaiev and Sevastopol. New shipyards have been developed at Molotovsk in the White Sea region and at Komsomolsk, on the Amur.

The former division into Baltic and Black Sea fleets may be considered to have lapsed, especially as the completion of a through canal system

between the Baltic and White Seas and the opening of regular traffic via the North-East Passage have enabled the Soviet Government to transfer tonnage freely between the Baltic and Far East.

The following table gives the principal ships in 1950 :—

Completed	Name	Standard displacement	Armour		Principal armament	Shaft horse-power	Speed
			Belt	Guns			
		Battleships.					
		Tons	In.	In.			Knots
1915	*Sevastopol*	23,256	9	12	12 12-in.; 10 4·7-in.; 8 3-in. A.A.	50,000	16
1914	*Gangut*	23,606					
1913	*Novorossiisk*	23,959	10	11	10 12·6-in.; 12 4·7-in.; 38·9-in. A.A.	75,000	23
		Cruisers.					
1946	*Poltava*	15,200	5	2	10 7·1-in.; 12 4-in.	135,000	33
1946	*Kalinin*	8,800	3	1	9 7·1-in.; 10 4-in. A.A.	113,000	35
1945	*Voroshilov*						
1945	*Kaganovich*						
1944	*Molotov*						
1940	*Petropavlovsk*	15,200	5	2	10 7·1-in.; 12 4-in.	135,000	33
1940	*Maxim Gorki*	8,500	3	4	9 7·1-in.; 10 4-in. A.A.	100,000	35
1938	*Kirov*						
1935	*Makarov*	7,100	4	2	6 7·1-in.; 8 3·5-in. A.A.	60,000	32
1935	*Stalingrad*	7,527	4	2	8 6-in.; 6 3·9-in.	110,000	36
1930	*Krasny Kavkaz*	8,030	3	3	4 7·1-in., 12 4-in. A.A.	55,000	25
1925	*Krasny Krim*	6,934	2	3	15 5·1-in., 8 4-in. A.A.	50,000	24

The construction of one to three battleships is persistently reported. Several cruisers are being built.

There are believed to be in service 360 submarines, 70 destroyers, 34 sea-going torpedo boats, 460 motor torpedo boats and large numbers of escort and patrol vessels, minesweepers and auxiliaries.

Air Defence.

The air forces are integral parts of the Army and Navy. The Red Air Fleet is in 2 divisions, one in the west, the other in the Far East. In addition, there is an Independent Striking Force at the disposal of the Supreme Command. The Air Force is organized in about 500 'regiments' of about 30–35 planes each. The Naval Air Force is under the various naval commands, *i.e.*, Baltic, Black Sea and Northern Pacific; it comprises less than 2,000 planes, nearly all fighters. There are no aircraft carriers.

The Soviet Air Force is believed to consist of about 800–1,000 long-range bombers, 1,000 jet interceptors, 12 tactical air armies of 1,000 planes (fighters and fighter-bombers) each, and 1,000 coastal defence planes.

A reasonable estimate of annual production of aircraft is as follows :— Heavy bombers, 1,500–1,800; light bombers, 3,000–4,000; fighters, 5,000–6,000 (50% jet propelled); transport aircraft, 1,200–1,400; training aircraft, 3,000–4,000.

Agriculture and Forestry.

The Soviet Union, not long since predominantly agricultural in character, has become an industrial–agricultural country. In 1913 industrial production was 42·1% of the total, and agricultural production 57·9%. In 1937 industrial production was 77·4% and agricultural production 22·6%.

Forest land occupies 950,000,000 hectares (44% of total territory); pasture, 241,084,000 hectares (11%); arable land, 197,611,000 hectares (9%); grassland, 46,415,000 hectares (2%) [illegible] 461,000 hectares (0·5%); non-agricultural land, [illegible]). All these figures relate to the 1939 territory.

The total area under cultivation (including single-owner peasant farms, state farms and collective farms) was 129,700,000 hectares in 1933 and 157,000,000 hectares in 1941.

In 1941 there were in the Union 243,000 collective farms, 1,300,000 individual peasant owners, 3,961 state farms; about 70% of the power used in agriculture was mechanical. In 1950, over 813,500 (in terms of 15-h.p. units) tractors, 229,000 combines and 342,000 lorries were in use; the collective farms were served by 8,400 tractor stations. 400 special machine stations have also been set up for the mechanization of afforestation in the steppes and for amelioration of meadows and pastures. During 1950 a movement developed for the merging of small collective farms with 150–300 hectares of arable land into larger units with 8,000–15,000 hectares.

About 90% of all ploughing and fallow ploughing for collective farms in 1950 was carried out by tractor haulage and half their grain crops was harvested by combines.

Rural electrical stations in 1940 had a capacity of 275,000 kw.; in 1950, over 1 million kw. At the end of 1948 collective farms had 26,000 electric power stations. A further 5,650 stations were being built and 3,500 stations began operation in 1949.

The extent of cultivated land in the U.S.S.R. (in million hectares) was in 1938:—Cereals, 102·4; industrial plants, 11·0; garden plants, 9·4; feeding stuffs, 14·1; total (including all items), 136·9. Vineyards covered 420,000 hectares in 1948.

The produce of the principal crops (in million double cwt.) was, in 1938:—Cereals, 949·9 (1949, 1,223·6); cotton, 26·9 (1950, 37·5); flax, 5·5; sugar beet, 166·8; oleaginous plants, 46·6.

In 1941, the total area under food grains was 111,000,000 hectares, and the area under technical plants, kitchens garden and orchards was 23,000,000 hectares. In 1950, special varieties of frost-resisting winter wheat giving a high yield were planted in new districts in the non-black soil area.

Grain crops (in million double cwts.):—1939, 1,050; 1950, 1,226. Collective and state farms in 1949 planted over 50,000 acres with fruit trees, berries and vine. Horticulture is extending further north. Frost-resistant varieties of vines are being cultivated in 40 regions of the central and northern belts of the U.S.S.R. New quick-ripening and frost-resistant strains are expected to yield up to 2,700 lb. of grapes per acre. Because of the increasing demand for perfumery and cosmetics, the acreage under geranium were to be doubled in 1950.

Tea production, 1940, 23,500 tons; sugar production, 4,160,000 tons (in 198 factories).

The number of animals (million heads) in 1950 was:—Horses, 13·7; cattle, 57·2; sheep and goats, 99·0; pigs, 24·1.

In 1941 there were 618,000 livestock-breeding sections of collective farms and about 1,500 wild-animal breeding farms.

In April, 1949, a 3-year plan (1949–51) was adopted for livestock-raising. In collective farms, the number of cattle was to be raised to 24,000,000 by the end of 1949, 28,000,000 by the end of 1950, and 34,000,000 by the end of 1951. By the end of 1951 the number of sheep is to be increased to 80,000,000, goats to 8,000,000, pigs to 18,000,000 and poultry to 200,000,000. In the state farms the head of cattle are to be brought up to 5,700,000 by the end of 1951; sheep, to 13,470,000; pigs, to 5,600,000.

Stud farms have been fully restored and new ones organized. New breeds of draught and saddle horses have been developed, among which the Budyenny and Terek horses of the North Caucasus are noted for endurance.

The U.S.S.R. contains a number of wild rubber-plants, the best known, the Kok-sagyz, discovered in 1931, is now cultivated fairly extensively in various parts of the Union.

The area under cotton in 1945 was 5,000,000 acres.

Silk is being more and more extensively cultivated, not only in Central Asia and Transcaucasia, but in a number of new areas—the Ukraine, Crimea, the Northern Caucasus and also in the Voronezh, Kursk and Stalingrad regions. The area under plantations for silk culture in 1940 was 51,000 hectares, and between 1941–47 it was planned to increase the area to 256,000.

Of the whole of the forest-land of the U.S.S.R., a large portion is administered and worked by the state, and the other, about 72,000,000 acres in extent, is granted for use to the peasantry free of charge.

A large proportion, estimated at 78% in 1947, of the forest-lands of the U.S.S.R. lies in Asiatic Russia, which, owing to the absence of roads, it is extremely difficult to exploit. The average annual increase of timber is about 700–800 million cubic metres, but only half of it is cut. The forests of the Caucasus, on the other hand, are capable of furnishing the world's market with an inexhaustable supply of many valuable varieties of timber. A total of 18,600,000 acres in the Caucasus is covered by forest lands.

Soil Conservation.—On 24 Oct., 1948, a government plan was published for planting [illegible] forest belts, introducing crop rotation with grasses and b[illegible] and water reservoirs in the steppe and forest-steppe areas of the European part of the U.S.S.R. The plan, which is to be carried out within 10–15 years, provides for the planting of a system of wooded belts (each 60–100 metres wide), totalling 5,320 kilometres (3,300 miles) in length, to act as a barrier against the hot, dry winds from Central Asia. Some 80,000 collective farms, covering 120 million hectares, are thus to be protected. Forty-four thousand ponds and reservoirs, as well as irrigation canals, are to be dug and collective farm hydro-electric stations built to irrigate the fields during dry spells. The biggest defence line against the destructive winds is to be planted from the Urals range to the Caspian Sea. By the end of 1950, some 1,350,000 hectares had been planted with shelter-belt trees.

Jasny (N.), The Socialized Agriculture of the U.S.S.R.: Plans and Performance. Stanford University, 1949.

Mining and Industry.

The organization of industry in Soviet Russia is based on state ownership and control, and is administered in accordance with the decree of 10 April, 1923, and subsequent modifications, by state chief departments acting under the direction of the ministry concerned. The trusts in the large-scale and middle-sized state industries number over 600, but there are 291 big trusts and these cover about 80% of the total state industries. A small number of trusts, called monopoly trusts, combine all the enterprises of a given branch of industry in the whole Union. Such are, for instance

the Rubber Trust, Silk Trust, Urals Asbestos Trust, etc. In some industries there are several trusts. Thus the oil, cement and a few other industries have four trusts each, but in the vast majority of industries there are a number of separate trusts in the various parts of the Union.

The Soviet Union is rich in minerals. Soviet scientists claim that the U.S.S.R. contains 20% of the world's coal deposits, 58·7% of its oil, 53% of its iron ore, 76·7% of its apatite and 25% of all timber-land in the world. The U.S.S.R. has sufficient deposits of all kinds of non-ferrous and rare metals and chemical ores to cover the requirements of all branches of her industry for many decades. The output of some ores was as follows:— Iron, 1936, 28,200,000 metric tons; manganese, 1936, 2,800,000 metric tons; copper pyrites, 1934, 2,081,000 metric tons; gold, 1936, 7,350,000 fine oz.

In 1940, the output of pig-iron was 15,000,000 tons; steel, 18,300,000 tons; rolled metal, 13,100,000 tons; coal, 166,000,000 tons. Coal production (in million metric tons) was 164·2 in 1946; 209·7 in 1948; 264 in 1950. Output in 1948 (in 1,000 metric tons) of bauxite, 500; magnesium, 5; copper, 180; nickel, 25; platinum, 125,000 troy oz. Output (preliminary) in 1950 was (in tons), pig-iron, 19,940,000; steel, 27,600,000; rolled metal, 20,430,000.

Output of crude petroleum in 1950 was 37,600,000 tons.

The total length of pipeline on 1 January, 1939, was 4,212 kilometres, divided as follows:—Baku–Batumi, 1,717 km.; Grozny–Makhach-Kala, 150 km.; Grozny–Armavir–Tuapse, 618 km.; Armavir–Trudovaya, 488 km.; Guriev–Orsk, 845 km., and other 394 km.

On 1 Jan., 1936, the U.S.S.R possessed 574,064 industrial enterprises, which included 61,428 large enterprises. During 1946–50, over 6,000 big enterprises have been built.

During 1938–40, some 807,000 spindles and 8,150 looms were added to the textile industry. Output during this period was 10,870 million metres of cotton, 335 million metres of woollen, 175 million metres of silk and 786 million metres of linen material. Since 1945, the cotton industry has expanded, especially in the Urals, Central Asia and Siberia.

Although the Soviet industries are not yet sufficiently mechanised, the process of their mechanization and the installation of automatic remote control is being pushed ahead rapidly. The coal pits and oil wells are largely mechanized.

The number of industrial and clerical workers engaged in the whole national economy of the Soviet Union was nearly 27,000,000 in 1937. In industry there were 10,111,700 manual workers, in the building industry 2,023,000, in state farms and machine-tractor stations 2,837,000, in transport, 2,783,700. The number of technicians and engineers engaged in large-scale industry was 584,500. In 1950 the total number of manual and non-manual workers was 39,200,000; 494,000 young workers passed out of vocational, railway, mining and factory schools. There is an unstated amount of convict labour, used on large-scale construction projects, such as the building of canals and roads. The Soviet authorities do not disclose the number of convicts, but deny that it is anything like the 5 million estimated; they also maintain that their work does not contravene international agreements on penal labour.

The total value of the output of industry in 1940 was 138,500 million roubles; the heavy industries accounted for 84,800 million roubles. In 1947 the estimated investments were 83,900 million roubles in industry and 16,800 million roubles in agriculture. The gross output of industry in 1950 was 23% above that in 1949.

Under the Lend-Lease agreements, the United States delivered to the

Soviet Union non-military supplies worth $10,774,000,000, including 2,800,000 tons of steel, 2,600,000 tons of petroleum products, 802,000 tons of non-ferrous metals, 350,000 tons of sugar, 280,000 tons of wheat flour and over 15 million pairs of boots.

Enterprises, launched during the second world war, include the Magnitogorsk blast furnace no. 5, the Chussovaya blast furnace, the Chelyabinsk iron and steel works, the largest in Europe, new steel-smelting and pipe-rolling works in the Urals, the open-hearth department in Zlatoust, the aluminium works in Siberia, the tractor-building works in the Altai Territory, tank-building factories in Siberia, numerous aircraft factories, new turbines in the Chelyabinsk steam power-station, new power stations in the Central Urals and Krasnogorsk, a pipe-rolling mill near Baku (Sumgait), the North Pechora railway and new railways on the right bank of the Volga.

Electricity.—Big hydro-electrical power stations are being constructed (1) on the river Don, near the town of Kakhovka, with an ultimate capacity of 250,000 kw. and including a dam, a navigable lock and a large water reservoir with a capacity of 14,000 million cubic metres; (2) on the river Volga at Kubyshev, and (3) at Stalingrad, with an ultimate annual generation of 10,000 million kwh.

Total installed capacity of electrical plants in 1938 was 8,692,000 kw.; electricity output in 1940 was 48,300 million kwh.; in 1950, 86,700 million kwh.

Trade Unions.—Trade unions are organized on an industrial basis, all workers, whether manual or brain, in every branch of a given industry being members of the same union.

Since 1933, the trade unions have carried out the functions of the former Labour Commissariat; they control and supervise the application of labour laws, introduce new labour laws for approval by the government and administer the social insurance funds. The All-Union Congress meets at irregular intervals; the 9th Congress met in 1932, the 10th in 1949.

In 1944, there were 176 unions. This number was reduced by amalgamation of unions to 67 in 1949, with a membership of about 28,500,000. Subscriptions are 1% of wages.

Planning.

Planning lies at the basis of the Soviet economy. The first plan drawn up by Gosplan (the State Planning Commission) was the 'Goelro' drawn up in 1920. This was to be the basis for the economic development of the country and for the construction of a system of electrical power plants with an aggregate capacity of 1,750,000 kw., in the course of 15 years. In 7 years,

by 1927–28, the capacity of the electrical stations in operation was already 1,792,000 kw. with an output of 5,160,000,000 kwh.

In 1925 Gosplan started to draw up annual plans (estimates) for the national economy, and in 1927–29 undertook to draw up the first Five-Year Plan for the national economy. This plan was to have run from 1 October, 1928, to 30 September, 1933. It was considered completed in December, 1932, when 93·7% of the planned industrial output for the 5 years had been carried out. Stress was laid on the development of the heavy industries, particularly in the outlying areas rich in natural resources and inhabited by the national minorities. In agriculture by the end of 1932, 61·5% of the total number (some 25,000,000 in 1928) of peasant farms had joined the collectives, forming over 211,000 collective farms (*Kolkhozy*) which cultivated 75·6% of the total land sown by the peasantry. In 1932 the *Sovkhozy* (large state-owned farms) and *Kolkhozy* combined raised 84·2% of the marketable grain and 83% of the cotton crop.

The second Five-Year Plan ran from 1933–37. It aimed at strengthening the defensive capacity of the Soviet Union and more stress was laid than in the first Five-Year Plan on improvements in quality of the goods produced and on increasing the output of consumers goods. About one-half of the total investments in new heavy industrial constructions were allocated to the Eastern areas. By the end of 1937, the plan for large-scale industry was overfulfilled by 4%, but the target for the light industries and consumers goods was not reached. There were 244,000 collective farms embracing over 18,500,000 former individual peasant households. In 1937 the *Sovkhozy* and *Kolkhozy* together cultivated 99·1% of the total area under crops. By 1937 there were 5,617 machine-tractor stations, serving 90% of the sown area.

The third Five-Year Plan, 1938–42, envisaged an average annual increase in output of 13·5%, but that of the means of production was to be 15·2% and the means of consumption 11%; stress was to be laid on the military industry. The value of industrial output in 1942 was estimated to reach 180,000 million roubles as against 95,500 million roubles in 1937 (in 1926–27 prices in each case). During the first 3½ years, industrial output was increasing annually by an average of 13%. In the Urals, the Volga area, Siberia and Central Asia, industrial output increased during 1938–40 by about 50%. The cereal crop in 1940 amounted to 119,000,000 tons. One of the richest grain-growing areas of the Soviet Union was created in the eastern part of the country. Capital construction amounted in value to a total of 130,000 million roubles; some 3,000 mills, factories, mines, power stations and other enterprises were put into operation. More than one-third of the capital construction work in this period fell to the eastern areas.

The plan was interrupted in June, 1941, when Hitler attacked the U.S.S.R. The whole of the national economy was switched to help the war effort and whole industries were shifted from the western areas to the east. In the early half of 1945 industrial output in the eastern areas of the U.S.S.R. was twice as great as in the first half of 1941, while the output of the war industries was 5·6 times as great.

In March, 1946, the Supreme Soviet adopted the fourth Five-Year Plan. The following shows the estimated output in 1950 of some of the most important goods:—

Iron (tons)	19,500,000	Electric power (kwh.)	82,000,000,000
Steel (tons)	25,400,000	Long-distance steam locomotives	2,200
Rolled goods (tons)	17,800,000	Long-distance diesel locomotives	300
Coal (tons)	250,000,000	Long-distance electric locomotives	220
Petroleum (tons)	35,400,000		
Coal and shale gas (cu. m.)	1,900,000,000		
Natural gas (cu. m.)	8,400,000,000		

Trucks	428,000	Tractor-drawn cultivators	82,300
Equipment for iron and steel mills (tons)	102,900	Tractor-drawn seed drills	83,300
Steam turbines (kw.)	2,906,000	Power-driven threshers	18,300
Water turbines, large (kw.)	372,000	Mineral fertilisers—superphosphates, nitrates and potash (tons)	5,100,000
Water turbines medium (kw.)	150,000	Synthetic dyes (tons)	43,000
Water turbines, small (kw.)	500,000	Felled timber (cu. m.)	280,000,000
Electric motors up to 100 kw.	624,000	Sawn lumber (cu. m.)	39,000,000
Electric motors over 100 kw.	9,000	Cotton fabrics (metres)	4,686,000,000
Metal-working machines	74,000	Woollen fabrics (metres)	159,400,000
Spinning frames (spindles)	1,400,000	Leather footwear (pairs)	240,000,000
Looms	25,000	Meat (tons)	1,300,000
Tractors	112,000	Butter (tons)	275,000
Tractor-drawn ploughs	110,000	Sugar (tons)	2,400,000

The total value of the output of the national economy in 1950 is estimated at 205,000 million roubles (1926–27 prices) as compared with 138,500 million roubles in 1940. Iron-ore extraction in 1950 is to be 40,000,000 tons and 45 blast furnaces, with a total output of 12,800,000 tons, 165 open-hearth furnaces, 15 convertors and 90 electric furnaces with a total output of 16,200,000 tons of steel, 104 rolling mills with a total output of 11,700,000 tons and 63 coke batteries with a total output of 19,100,000 tons are to be rehabilitated or newly built and put into operation. New iron-ore mines with an annual output of 35,400,000 tons are to be opened.

New coalfields and regions will be opened in Bureya in the Khabarovsk Territory, in Ekibastuz in the Kazakh S.S.R., in Kuyurgaz in the Bashkir A.S.S.R. and in Uzgen in the Kirghiz S.S.R.; coal-mines with a total capacity of 183,000,000 tons are to be put into operation. Work on the underground gasification of coal is to be continued so as to attain an output of gas produced by this method of 920,000,000 cubic metres a year by 1950. By 1950 the output of liquid fuel from coal and shale is to reach 900,000 tons. Four oil-refining plants and 16 oil-refining installations are to be built. Power stations with a total capacity of 2,300,000 kw. are to be put into operation

In the chemical industry factories for the production of calcined soda with a capacity of 813,000 tons, caustic soda with a capacity of 278,000 tons and superphosphates with a capacity of 2,720,000 tons are to be put into operation.

17,500 kilometers of timber transport roads for mechanical traction—6,500 kilometres of narrow-gauge railway, 2,500 kilometres of tractor roads and 8,500 kilometres of motor roads—are to be built in the lumber regions, mainly in the northern and north-west regions and the Urals (Kama Basin). The capacity of spinning-mills is to be increased by 2,860,000 spindles, of the artificial silk industry by 102,000 tons, of the boot and shoe industry by 100,000,000 pairs and of the stocking industry by 354,000,000 pairs of socks and stockings.

Granaries and elevators with an aggregate capacity of 6,400,000 tons are to be rehabilitated or newly built, the capacity of the flour-mills to be increased by the end of 1950 to handle an additional 20,000 tons of grain per day. At the end of the 5-year period the annual grain harvest is to be 127,000,000 tons, with an average yield of 12 centners per hectare. In 1950 the farms (state and collective) are to be supplied with 5,100,000 tons of nitrates, phosphates and potash and 400,000 tons of powdered phosphorite.

New railway lines are to be built to a total of 7,230 kilometres, including the Stalinsk–Magnitogorsk trunk line. Secondary tracks to a total length of 12,500 kilometres are to be built or restored. Lines totalling 5,325 kilometres are to be electrified, and automatic block signalling systems installed on 10,400 kilometres of track. On existing railways 50,000 kilo-

metres of new rails are to be laid, including 3,000 kilometres for reconstruction of tracks, and 29,000 kilometres for capital repairs.

The total length of navigable inland waterways is to be increased to 115,000 kilometres. The mercantile fleet is to be increased by 600,000 tons, including 400,000 tons of self-propelled craft and 90,000 tons of towed craft.

The civil airline network is to be enlarged to 175,000 kilometres. 7,800 kilometres of trunk telephone and telegraph cables are to be restored or newly laid; 50,000 kilometres of overhead non-ferrous metal wires are to be laid. Fifty-five radio-telegraph and telephone transmitters and 28 new [illegible] stations are to be erected.

The national income in 1950 is estimated at 177,000 million roubles (in 1926–27 prices). The number of workers by hand and brain in the national industries will be about 33,500,000 and the total pay-roll 252,300 million roubles. The average annual earnings per worker will be about 6,000 roubles. To attract workers to key industries, higher wages are to be offered to all classes of workers in the heavy industries—coal, iron and steel and oil.

By 1950 the number of primary, 7-year and secondary schools is to be raised to 193,000, and of their pupils to a total of 31,800,000. The number of students in higher educational establishments is to be raised to 674,000, and of students in specialized secondary schools to 1,280,000; the number of young specialists graduated from the higher educational establishments will amount in the 5-year period to 602,000, and of graduates from the technical colleges and other specialized secondary schools to 1,326,000. The number of children accommodated in kindergartens in 1950 will be increased to 2,260,000, or double the number in 1940.

Total investments in capital house construction in 1946–50 is fixed at a total of 42,300 million roubles, as against 15,500 million roubles in the period of the third Five-Year Plan (not counting individual building). The volume of the reconstruction and building of dwelling-houses in rural areas by collective farms and peasants at their own expense and with government loans is fixed at 3,400,000 houses, including 2,240,000 in the former occupied areas.

During 1946–48, over 1,600,000 publicly owned and 100,000 privately owned houses and flats were built.

According to the Central Statistical Administration of the U.S.S.R. Council of Ministers, the 1950 target of the gross output of industry was exceeded by 2%. Cost of production was 6% below 1949 and the productivity of labour 12% above that in 1949. The total area sown to all crops in 1950 increased, compared with 1949, by 6·6 million hectares, including: wheat by 1·7 million hectares and cotton by more than half a million hectares. There was a considerable increase in the area sown to fodder crops.

The national income in 1950 was 21% above that in 1949.

All the Statistical Administrations of the 16 Republics of the Union report the complete fulfilment, in the main, of their Five-Year Plans.

Results of the First Five Year Plan in the Development of the National Economy of the U.S.S.R. Moscow, 1933.

Commerce.

Retail home trade takes three forms—state, co-operative and the free market (*i.e.*, sales by individual farmers, collective farm members and by the

collective farms of their surplus products, after having fulfilled their statutory deliveries and made their regular allocations to their members).

In 1940, state retail home trade accounted for 61·3%; consumers' co-operatives, 19·6%; kolhoz market, 19·1%.

Between 1935 and 1946 the consumers' co-operatives traded almost exclusively in the rural areas, but on 9 Nov., 1946, the co-operatives were given the right to develop their retail trade, both in foods and industrial products, also in the towns and urban settlements.

In 1948, the co-operatives had a membership of 32,000,000 and accounted for a half of the total retail trade of the U.S.S.R. They were organized in 28,000 societies and had about 220,000 stores. In 1949, about 13,000 new village retail shops were opened.

The foreign trade of the U.S.S.R. is organized as a state monopoly. Importation and exportation of goods are effected by special licences issued by the Ministry for Foreign Trade and its respective departments in pursuance of a plan annually sanctioned by the Government. The right of purchasing goods for importation, and that of selling Soviet exports abroad, is vested in the Trade Delegations of the U.S.S.R. in foreign countries. By special decrees respective Government departments select those state and co-operative organizations which are authorized, under the control of the Trade Delegation, to engage in foreign trade.

There are 15 export organizations, 4 import organizations, and 1 export and import organization. The co-operative organizations which are granted the right of 'exit to the foreign markets' are Centrosoyus (Central Union of Co-operative Societies), Selskosoyus and several other organizations.

The following table gives the value of imports and exports for 5 years :—

Year	Imports		Exports	
	Quantity (thousands of metric tons)	Value (millions of roubles)	Quantity (thousands of metric tons)	Value (millions of roubles)
1934	1,025	1,018	17,340	1,832
1935	1,259	1,115	17,190	1,697
1936	1,155	1,425	14,204	1,433
1937	1,286	1,311	12,969	1,728
1938	1,127	1,423	9,682	1,332

Soviet foreign trade in 1938 was distributed by countries as follows (in thousands of roubles) :—

Country	Imports	Exports	Country	Imports	Exports
Afghanistan	13,716	14,763	Iran	63,772	57,984
Argentina	4,226	312	Italy	56	—
Australia	50,855	7	Japan	17,597	6,986
Belgium-Luxemburg	64,294	116,803	Latvia	8,440	8,797
Canada	30,649	1,547	Lithuania	12,695	11,646
China (excluding Mongolia)	68,461	44,148	Mongolia	38,510	69,838
Czechoslovakia	19,422	13,231	Netherlands	102,535	92,348
Denmark	5,143	27,432	Norway	9,883	21,626
Egypt	279	12,074	Poland	1,460	7,822
Estonia	7,080	7,099	Spain	26,307	52,450
Finland	3,441	10,815	Sweden	27,390	13,453
France	39,396	59,745	Switzerland	11,846	12,179
Germany	67,193	88,327	Tannu-Tuva	12,671	5,893
Great Britain	240,309	375,124	Turkey	22,740	22,746
Greece	1,474	17,344	Union of South Africa	559	7,587
India and Ceylon	—	3,626	United States	405,858	96,749

Total trade between the U.S.S.R. and the United Kingdom in £ sterling for 5 years (Board of Trade returns) :—

	1938	1947	1948	1949	1950
Imports into U.K. . .	19,498,618	7,536,490	27,126,010	16,051,483	34,223,926
Exports from U.K. .	6,462,268	12,272,396	5,337,173	8,613,237	11,558,401
Re-exports from U.K. .	10,944,749	2,154,521	1,741,822	1,720,286	2,649,582

Hubbard (L. E.), Soviet Trade and Distribution. London, 1938.

Communications.

Railways.—The length of railways in 1945 was 66,000 miles, of which 30% were double-track lines. A new railway 100 miles long was commissioned in 1947 between the towns of Sosva and Alapayevsk in the Urals. Work is proceeding on the construction of the South Siberian Railway, which will connect the Kuznetsk coalfield with the central regions of the U.S.S.R.; and on the Charjou–Kungrad trunk line, along the lower reaches of the Amu-Darya in Central Asia. In 1940, the length of the electrified railways in the U.S.S.R. was 1,900 kilometres. An extensive programme of electrification of railways is being carried out in the Urals, Siberia, Transcaucasia and the suburbs of Moscow, Leningrad and Tallinn. The Southern Urals electric railway line (1,470 miles) was being built in 1948, and in Nov., 1948, the first section between Chelyabinsk and Zlataust was put into operation. The goods traffic on the Soviet railways was, in 1940, 592,600,000 tons; passenger traffic, 1938, 1,230,000,000.

Shipping.—Merchant marine, 1 July, 1939, 716 vessels; tonnage, 1,315,766 gross tons. In 1937 marine transport accounted for 8·6% of the total goods transported. Goods carried in 1938 was 30,336,100 tons, mainly in ships of the Soviet marine merchant fleet. Marine goods transport in 1940 was 23,000 million tons–kilometres, about one-fifth of the total being to foreign countries, mainly via the Baltic ports. Over one-fourth is carried along the Black Sea, the chief items being timber, grain, oil, manganese and cement.

The North Sea route forms convenient communication between the European U.S.S.R. and the Far East along the Soviet coast, for the produce of the basins of the Obi, Enissei, Lena and Kolyma Rivers.

The length of navigable rivers amounts to 68,000 miles, in addition to which the length of floatable rivers was 44,000 miles. There are several thousand miles of canals and other artificial waterways. Some of the new canals are very long indeed; for example, the Baltic and White Sea Canal (141 miles), the Moscow–Volga Canal (79 miles). Goods transport on rivers in 1940 was 36,000 million tons–kilometres.

The construction of the Volga–Don Shipping Canal, which was interrupted by the war, was resumed in 1948 and is to be completed in 1951. The Volga–Don waterway from Stalingrad to Rostov is 540 km. long, of which the Volga–Don canal is to comprise 101 km. The river Don is at present unsuitable for shipping, but the Volga–Don waterway is to transform the section of the river from Kalach, where the Don is joined by the Volga–Don canal, to Rostov into a deep-water highway suitable for big Volga shipping. The canal will link the White, Baltic, Caspian, Azov and Black Seas into a single water transport system.

On 12 Sept., 1950, a plan was published for the construction of a Turkmenian Canal from the Amu Darya River to Krasnovodsk, some 700 miles

long. Its purpose is to supply water to industrial enterprises, to irrigate new lands, mainly for development of cotton growing, to assure water supply for pastures in the southern districts of the Caspian lowland in Western Turkmenia, by the lower reaches of the Amu Darya River, and in the western part of the Kara Kum Desert, as well as to produce hydro-electric power for industry and agriculture in those areas. This waterway will pass along the Stalin White Sea–Baltic Canal, enter the Volga with its vast reservoirs at Kubyshev and Stalingrad, cross the Caspian Sea and pass along the main Turkmenian Canal to the river Amu Darya. It is claimed that with the completion of the main Turkmenian Canal it will be possible to organize a direct Moscow–Amu Darya waterway. At present the main navigable route to the Republics of Central Asia is the river Amu Darya alone, which ends in the Aral Sea.

The building of a dam on the Amu Darya at Takhya-Tash will raise the level of the water in the river, and make it easily navigable. Navigation on the main Turkmenian Canal which will cut through the Kara Kum Desert, will bring the outlying districts of this desert, communication with which has so far been maintained only by plane, into the country's economic and cultural life.

On 21 Sept., 1950, a plan was announced for the removal of the drought threat from an area of Southern Ukraine and Northern Crimea, by diverting water from the river Dnieper. The plan includes the building of two canals with a total length of over 340 miles with a series of large reservoirs, dams and power stations, and an irrigation system which will water about 8 million acres. The South Ukrainian Canal will run along a line from Zaporozhye on the Dnieper to the river Molochnaya and will continue further in the direction of Askania-Nova up to Sivash. As its continuation, a North Crimean Canal will run along a line from Sivash to Dzhankoi across the steppe areas of the Crimea and up to Kerch. A dam is to be built with a water reservoir on the line of the canal on the river Molochnaya, north of Melitopol, with smaller reservoirs along the line of the canal to draw water from the Dnieper into the South Ukrainian Canal. Another canal about 40 miles long will be dug between Askania-Nova and Kakhovka, linking up the South Ukrainian Canal with the Kakhovka water reservoir.

In all the length of the irrigation canals will be about 200 miles and the Ukrainian regions of Kherson, Zaporozhye, Nikolayev and Dniepropetrovsk as well as the northern Crimea will be irrigated.

Roads.—On 1 Jan., 1935, there were 1,368,000 kilometres of constructed roads, of which 1,146,400 kilometres were natural gravel roads and 221,600 kilometres were built roads. The total length of highways and other roads of improved type is over 220,000 miles. The number of motor cars and lorries before the war was about 1,000,000.

Aviation.—Civil aviation started in 1922. In 1948 the total length of the airlines in the U.S.S.R. was approximately 137,000 miles. The principal airlines were Moscow–Vladivostok and Moscow–Tbilisi, the former, which is over 8,000 kilometres long, was the longest of all existing national land-lines in the world, and was of international as well as all-Union importance as it linked Europe with the Pacific coast. The Central Asiatic airways in some instances provide the only means of communication across the desert and mountainous regions of the local republics. An 8,500-kilometre passenger, goods and postal airline was opened in February, 1941, between Moscow and Anadyr (Eastern Siberia), running through Archangel, Igarka, Khatanga, Tixie Bay and Cape Schmidt, *i.e.*, along the entire course of the Northern Sea Route. This line is in operation practically the whole

year round. There are also other Arctic airlines, *e.g.*, Igarka–Gulf of Kozhevnikov; Igarka–Dickson Island; Yakutsk–Tiksi Bay; Yakutsk–Vilinsk; Yakutsk–Verkhoyansk.

In 1946 a regular passenger air-service was opened between Moscow and Vladivostok, Chukotsk, Tashkent, Stalinabad and Alma-Ata. The trans-Siberian airline, 5,500 kilometres long, was opened during the war. Many large cities have direct air connexion with the southern health resorts. In 1947, 12,000 kilometres of new airlines were added in the U.S.S.R. New direct airlines were opened on 1 May, 1950, between Moscow and South Sakhalin, Ufa, Uzhgorod, Guryev and Dniepropetrovsk.

Post.—In 1947, the number of post offices was over 51,000.

The number of telegraph offices was 31,500 in 1947; the total inter-town telegraph and telephone lines in 1940 was 1,578,000 kilometres. Number of telephones in 1949, 1,500,000.

The international radio-telecommunications services are operated by the Ministry of Communications of the U.S.S.R. The Great Northern Telegraph Co., Ltd., of Denmark, operate cables connecting Denmark with Leningrad, whence connexion is made by means of a trans-Siberian land-line with Vladivostok. From the latter place the Great Northern Telegraph Co. owns cables connecting with Japan, China and Hong Kong.

Money, Weights and Measures.

Banking.

The State Bank began operations on 16 Nov., 1921. Besides the State Bank (*Gosbank*) and the savings banks there is the Agricultural Bank (*Selkhosbank*), the Industrial Bank (*Prombank*), the Trade Bank (*Torgbank*), the Municipal Bank (*Tsekombank*) and others. Keeping accounts with these banks is compulsory for industrial, agricultural and municipal undertakings. The short-term financing of industry and agriculture is done through the State Bank. The specialized banks provide long-term capital investment. In 1939 the State Bank was partly reorganized, a number of territorial offices were newly established and at the Central Management new departments were organized. All these institutions are state organizations.

The savings bank deposits on 1 Jan., 1939, amounted to 6,400 million roubles. Number of depositors, 16,000,000. Number of savings banks, 26,362.

On 14 Dec., 1947, a currency reform was announced, with effect from 16 Dec. Notes in circulation were to be exchanged on the basis of one new rouble for ten old; bank deposits up to 3,000 roubles at par, the next 7,000 in the ratio of two new to three old and above 10,000 in the ratio of one for two. Investments in State loans were written down by two-thirds.

Money.

The currency in circulation is (1) Chervontsi notes in denominations of 1, 2, 3, 5, 10, 25 and 50, issued by the State Bank against gold cover but inconvertible at present; (2) Treasury notes in denominations of 1, 3 and 5 gold roubles; (3) silver coins: either bank silver (90% silver and 10% copper) in denominations of 50 kopecks and 1 rouble; or change silver (50% silver and 50% copper) in denominations of 10, 15 and 20 kopecks; (4) copper coins in denominations of 1, 2, 3 and 5 kopecks; (5) bronze

coins in denominations of 1, 2, 3 and 5 kopecks. Owing to the scarcity of silver, nickel pieces (the first ever to be used in Russia) of 10, 15 and 20 kopecks were introduced in 1932.

On 1 Jan., 1937, the value of gold was calculated at the rate of 5·6307 roubles for 1 gramme of pure metal. In Dec., 1949, the official rates of exchange were £1 sterling = 14·84 roubles; $1 (U.S.) = 5·30 roubles.

On 28 Feb., 1950, the rouble was placed on a gold basis (0·222168 gramme of gold) and, with effect from 1 March, revalued at 4 roubles = $1 and 11·20 roubles = £1 sterling.

Weights and Measures.

The metric system of weights and measures has been in use since 1 Jan., 1927. For the old Russian weights and measures *see* The Statesman's Year-Book, 1947, p. 1292.

The Soviet Government issued a decree adopting the Gregorian Calendar as from 14 Feb., 1918. A 7-day week (6 working days and one holiday for all) was adopted on 27 June, 1940.

Diplomatic Representatives.

1. Of the Soviet Union in Great Britain (13 Kensington Palace Gardens, W.8).

Ambassador.—Georgii Nikolaevich Zaroubin (accredited 23 January, 1947).

Counsellors.—N. B. Korovin; V. Y. Yerofeev; Alexei Voina.

First Secretaries.—V. N. Khramelashvili; V. Stefankin; G. Rodionov.

Attachés.—Y. I. Modin; A. Malikov; M. Borinskin; S. Voronin; V. Kuznetsov; A. M. Verevkin; P. Kuznetsov; I. Sychev.

Military Attaché.—Maj.-Gen. B. Razin.

Military Air Attaché.—Maj.-Gen. V. Chetverikov.

Naval Attaché.—Capt. Georgi P. Timchenko.

Trade Representative.—N. M. Andrienko.

2. Of Great Britain in the Soviet Union.

Ambassador.—Sir David Kelly, G.C.M.G., M.C. (appointed Feb. 1949).

Minister.—J. W. Nicholls, C.M.G., O.B.E.

Secretaries.—J. L. B. Titchener, O.B.E.; F. A. Warner; J. A. Dobbs; R. H. Bates.

Naval Attaché.—Capt. R. I. A. Sarell, D.S.O., R.N.

Military Attaché.—Maj. M. W. Brynne, O.B.E.

Air Attaché.—Air Commodore I. C. Bird, O.B.E.

RUSSIAN SOVIET FEDERAL SOCIALIST REPUBLIC (R.S.F.S.R.).

(ROSSISKAYA SOVIETSKAYA FEDERATIVNAYA SOTSIALISTICHESKAYA RESPUBLIKA.)

The greater part of the former Russian Empire now constitutes the Russian Soviet Federal Socialist Republic (R.S.F.S.R.). This contains:—

(1) *Territories*:—Altai, Khabarovsk, Krasnodar, Krasnoyarsk, Primorye, Stavropol.

(2) *Regions* :—Archangel, Astrakhan, Briansk, Chelyabinsk, Chita, Chkalov, Crimea, Gorki, Grosny, Irkutsk, Ivanovo, Kaluga, Kalinin, Kaliningrad, Kemerovo, Kirov, Kostroma, Kuibyshev, Kurgan, Kursk, Leningrad, Molotov, Moscow, Murmansk, Novgorod, Novosibirsk, Omsk, Orel, Penza, Pskov, Rostov, Ryazan, Sakhalin, Saratov, Smolensk, Stalingrad, Sverdlovsk, Tambov, Tomsk, Tula, Tyumen, Ulyanovsk, Velikie Luki, Vladimir, Vologda, Voronezh, Yaroslavl.

(3) *Autonomous Regions* :—Adygei, Cherkess, Jewish, Khakass, Gorno-Altai, Tuva.

(4) *Autonomous Soviet Socialist Republics* :—Bashkir, Buryat-Mongol, Chuvash, Daghestan, Kabardinian, Komi, Mari, Mordovian, North Ossetian, Tatar, Udmurt, Yakut.

The R.S.F.S.R. is the largest of the constituent republics of the Soviet Union. It was the first part of the Tsarist Empire over which the Soviets held sway. On 7 Nov,. 1917, a proclamation was issued in the name of the Military Revolutionary Committee, the organ of the Petrograd Soviet of Workers' and Soldiers' Deputies, establishing a revolutionary government. The same day the Second All-Russian Congress of Soviets of Workers' and Soldiers' Deputies announced that it had assumed state power, and on 8 November, 1917, the Congress promulgated a decree forming a Workers' and Peasants' Government.

At the Third All-Russian Soviet Congress in Jan., 1918, a Declaration of Rights of the Workers was adopted, which was subsequently incorporated in the First Constitution of the R.S.F.S.R. and adopted on 10 July, 1918. This constitution served as a model for the other Soviet Socialist Republics, which later joined with the R.S.F.S.R. to form the Soviet Union.

The principles of the 1918 Declaration of Rights have been and are still the foundation of the constitution of the U.S.S.R., as also of those of the constituent republics of the Union.

The R.S.F.S.R. adopted its present constitution at the 17th Extraordinary All-Russian Congress of Soviets in Jan., 1937. Since then slight alterations have been introduced in the constitution from time to time.

President of the R.S.F.S.R.—B. N. Chernousov.

The R.S.F.S.R. occupies over 76% of the total area of the U.S.S.R., stretching from the Far North to the Black Sea in the south and from the Far East to Leningrad in the west. Its population in 1939 was over 109,000,000 (72,600,000 live in rural areas and 36,700,000 in urban areas), of whom three-fourths are Russians, the rest being national minorities such as the Tatars, Jews, Moldavians, Chuvashis, Bashkirs, Poles, Germans, Chechens. It contains a greater variety of nationalities than any of the other republics. Calculated on the basis of the 763 electoral districts, each with population of 150,000, in Dec., 1950, the population in 1950 should be about 114,400,000. The two principal towns are Moscow, the capital, with a population (Jan., 1939) of 4,137,018, and Leningrad, the second capital (3,191,304). Amongst other important large towns are Gorki (644,116), Rostov-on-Don (510,253), Stalingrad (445,476), Sverdlovsk 425,544), Novosibirsk (405,600), Kazan (401,6[illegible]), and Kubyshev (390,267).

The R.S.F.S.R. has a variety of climates (ranging from arctic to sub-tropical) and of geographical conditions (tundra, forest lands, steppes and rich agricultural soil). It also contains great mineral resources: iron-ore in the Urals, the Kerch Peninsula and Siberia, coal in the Kuznetz Basin,

Eastern Siberia, Urals and the sub-Moscow Basin; oil in the Urals, Azov–Black Sea area and Bashkiria. It also has abundant deposits of gold, platinum, copper, zinc, lead, tin and rare metals. Its coastline is 43,000 kilometres (26,500 miles) long.

The R.S.F.S.R. produces about 70% of the total industrial and agricultural output of the Soviet Union. Nine-tenths of the forest area of the U.S.S.R. lie in the R.S.F.S.R.

The Black Earth Central Area, consisting of the Kursk, Orlov, Tambov, Voronezh regions, has a comparatively mild climate and fertile soil, and has made great economic progress since the Soviet revolution.

The Northern District covers about a third of the European part of the U.S.S.R. Among the most important industrial centres here are Archangel, at the mouth of the northern Dvina, noted for its timber, saw-mills and timber exports, and Kirovsk, a new socialist town, situated beyond the Polar Circle near the abundant apatite deposits. A large part of the south-western section of this area is, however, comparatively densely populated, and specializes in the cultivation of flax and stock-breeding, particularly for the dairy industry. The northern Pechora railway, built during the war, now links the northern Dvina with the Pechora and the Arctic end of the Ural mountain-range, while the Soroka–Plesetsk and the Konosha–Byelsk railways connect the Kola Peninsula with other parts of the European-north of the U.S.S.R. A new coal-mining centre which supplies the entire European-north of the U.S.S.R. has been created in distant Vorkuta (about 120 miles west of the mouth of the river Ob), from which the new railway runs south-west to Kotlas, Byelsk and Konosha.

The Western Area, embracing the Smolensk and Kalinin regions, with a temperate, moist climate, has extensive valuable forest-lands and large deposits of peat.

The Volga Area covers a huge part of the R.S.F.S.R., including both forest-land and vast steppes. It contains deposits of shale, peat, salt and oil, and produces valuable timber, wheat and other grain crops, hemp, potatoes and sunflower. Among the industries are machinery, machine tools, tractor and locomotive construction, ship-building, motor-cars and trucks, chemical, woodworking, food, building materials, fishing. There are also extensive orchards and stock-breeding farms.

The South Area has a warm climate; deposits of iron ore, oil and cement clay. It includes: (1) the agricultural Kuban, which yields fine crops of wheat, maize, sunflower, as wells as herds of livestock, and (2) the Black Sea coast and the Crimea, with their orchards, vineries, tobacco and their picturesque health resorts, as well as the Don and Salsk steppes, with their grain-fields and livestock-breeding farms. Silk industry is developing; the target is 36 million mulberry trees.

The Urals Area is extremely rich in minerals. Its oil deposits extend from the western and southern slopes of the Ural mountains and beyond the river Volga, covering over a million square kilometres, and it is known as the 'Second Baku.' In 1938 it was estimated that the oil reserves in this area amounted to about 2,700,000,000 tons. In addition, the Urals area has deposits of both ferrous and non-ferrous metals, huge industrial works, including the Magnitogorsk metallurgical plant, the Chelyabinsk tractor works, the Sverdlovsk machine-construction works, Novotagil railway-carriage and truck works. The Chelyabinsk ferrous-alloys plant, covering 125 acres, was one of the first Soviet plants for the production of

special steels. Recently a method was evolved for separating cobalt from the Urals deposits of copper pyrites, copper-nickel and silicate ores, all of which also contained cobalt, and in 1942–43 the construction of cobalt mines in the Urals was speeded up. A large hydro-electric power station is under construction on the river Kama near Molotov City.

The R.S.F.S.R. also includes the following areas in Asia :—

Region	Area in sq. miles	Population, Jan. 1939	Region	Area in sq. miles	Population, Jan. 1931
Far Eastern Region	900,731	1,593,400 [1]	Tuva Autonomous Region	64,000	65,000
Yakutsk Autonomous Republic	1,454,834	400,544	Western Siberia	503,650	8,767,200
Buriat - Mongol Auton. Republic	150,192	542,000	Eastern Siberia	1,227,248	2,568,400

[1] 1931.

The Far Eastern Region runs along the Pacific Ocean and stretches from Vladivostok to the Behring Straits. In the north it is bounded by the Arctic Ocean.

Khabarovsk (population, 1939, 199,364) is the principal city of the Far Eastern Region. Other important towns are Komsomolsk, Mogadan, Roichikhirsk and Birobidzhan (capital of the Jewish Autonomous Region). The Kamchatka region (the peninsula) occupies an area of 180,600 square kilometres (69,711 square miles). The population of Kamchatka, which is very sparse, derives its income mainly from fishing and hunting; agriculture and cattle-breeding are being developed. There are 3 big state farms, with over a thousand head of cattle, and an area of some hundreds of hectares; collective farms have been organized. The majority of the population in the Vladivostok area is engaged in agriculture, industry and transport. The Far Eastern Region is one of the biggest producers of soya. The forests constitute one of the most important of the natural resources. The total forested area of the Far Eastern Region is 900,000 square kilometres, of which at least one-half can be exploited. The country is rich in fur-bearing animals of many varieties, and is an important fish-producing centre, being practically the only one in Siberia. The other industries of importance are wood-working and flour-milling. In addition to the vast mineral, timber, fur and fish resources, there is a comparatively good transport system, with a fairly well-developed railway system, and navigable rivers flowing into ice-free waters. The airline Chukotka–Moscow was started at the end of 1947.

YAKUTSK AUTONOMOUS SOVIET SOCIALIST REPUBLIC.

Population, 1939, 400,544. The two principal industries are hunting and gold-mining. The Soviet Trust Soyus-Zoloto and a number of individual prospectors are working the fields. Silver- and lead-bearing ores and coal are worked. There is also some trade in salt. A severe climate and lack of railways are serious obstacles to the economic development of the republic. The Angara–Lena railway is nearing completion. There is an air service between Irkutsk and the town of Yakutsk, the capital of the republic.

In 1932 there were 442 schools, with 39,000 pupils. Number of schools in 1944, 540. There were also 50 higher schools, with about 9,000 pupils.

In 1949, the Chukchi, Eskimoes and Chuvans in the Chukotka, north-east of Yakutia, had 74 schools and 50 medical centres. There is an agricultural school at Anadyr.

BURIAT-MONGOL AUTONOMOUS SOVIET SOCIALIST REPUBLIC.

The Buriat-Mongol Republic, situated to the south of the Yakutsk Republic, adopted the Soviet system on 1 March, 1920. Cattle breeding is the principal occupation of the population. In 1940, 95% of the peasant farms had joined the kolkhozy and each of these had an average of nearly 3 livestock-breeding farms. There are also fox-breeding farms, poultry farms and apiaries. The number of workers employed in industry was 25,000 in 1940.

In 1950 there were 700 schools, 10 technical colleges and 3 higher educational institutions.

SIBERIAN REGIONS.

Eastern and Western Siberia are no longer administrative areas, but because of their size and importance they are always given in Soviet geographies as separate geographical areas within the R.S.F.S.R. Western Siberia includes the Kurgan, Tiumen, Omsk, Novosibirsk, Tomsk, Kemerovo regions and the Altai Territory (including the Gorno-Altai autonomous region). Eastern Siberia includes the Krasnoyarsk Territory, the Irkutsk and Chita regions, the Buriat-Mongol and Yakut Autonomous Soviet Socialist Republics and the Tuva autonomous region.

The capital of the former Western Siberian Region was Novo-Sibirsk (population, 1939, 405,589), and that of the former Eastern Siberian Region was Irkutsk (population, 1939, 243,380). Other large cities in this area are Omsk with a population (on 17 Jan., 1939) of 280,700; Krasnoyarsk, 190,000; Barnaul, 148,130; Tomsk, 141,200, and Biisk, 80,000. The Siberian regions include fertile agricultural districts and industrial sections in the south, while most of the northern territory is an unsettled forest and similar to the Yakutsk Republic.

Eastern Siberia, particularly the Irkutsk region, has great mineral resources; the surveyed coal reserves of this region are larger than those of the Donbas and it has sufficient iron deposits to warrant the establishment of iron, steel and engineering industries. It also contains large deposits of high-grade mica, gold bauxites, marble, non-ferrous metals and other minerals.

The Eastern Siberian branch of the Academy of Sciences of the U.S.S.R. (organized in 1949) has 2 institutes and 7 laboratories; the compilation of an economic-geographical atlas of the Yakut Region has begun.

The main products of Western Siberia are:—Coal, metals, grain, livestock and timber. The main products of Eastern Siberia are timber, furs and gold.

In 1943 a Western Siberian branch of the Academy of Science was organized, and in 1944 it established 4 institutes in Novosibirsk.

During the past 30 years the area of cultivated land in the Far North has increased by six times, covering 790,000 acres in 1944. Agriculture moves further north each year. Potatoes, and a fairly large number of vegetable varieties, are now grown on Kamchatka, in the Anadir Basin and on the northern shore of the Okhotsk Sea. Grain crops may be found on Kamchatka and in other areas. Flax and sugar beet have also been raised in the tundra of the Arctic and successful experiments have recently been carried out in growing the Kok-sagyz rubber plant in the Yemalo–Nenetz National Area north of the Arctic Circle.

The breeding of silver-black and blue fox is being organized in collective farms.

In the villages and district centres of the extreme North and the

Khabarovsk territory 12 new hospitals, each with from 25 to 30 beds and several dispensing stations and nurseries are being built. About 100 doctors were sent to the extreme North in 1950–51.

A large-scale reclamation programme is being carried out in the Baraba steppe, which occupies 51,110 square miles.

In 1946 some 7,500 acres of new orchards and berry gardens were laid out in Siberia, the Urals and the Soviet Far East; the total fruit-growing area amounting to 37,500 acres.

The output of electricity in 1940 was 31·0 milliard kwh. In million tons the output of coal was 72·5; oil, 7 0; peat, 24·0; pig-iron, 5·7; steel, 9·6.

In 1938 the length of railways in the R.S.F.S.R. was 56,000 kilometres and length of navigable rivers was 70,000 kilometres.

The **Tuva** region was incorporated with the R.S.F.S.R. in 1944. It is situated to the north-west of Mongolia, between 50° and 53° N. lat., and between 90° and 100° E. long. It is bounded to the east, west and north by Siberia, and to the south by Outer Mongolia. The area is about 64,000 square miles. The total population is about 65,000, of whom some 50,000 are Tuvinians, 12,000 Russians and the rest Chinese and Mongols. The Tuvinians are a Turki people, formerly ruled by hereditary or elective tribal chiefs. (For the earlier history of the former Tannu-Tuva Republic, *see* THE STATESMAN'S YEAR-BOOK, 1946, p. 798.)

Tuva is well-watered and has much good pastoral land. The Tuvinians are mainly herdsmen and cattle farmers and the Russians are merchants, farmers and gold prospectors. There are deposits of gold and asbestos. The main exports are hair, hides and wool, and the imports manufactured goods and iron. The capital city is Kysylchoto (in Russian Krasny), formerly known as Khem-Belder (Russian Bielotsarsk). It has some 10,000 inhabitants.

A Soviet steamer-service along the river Yenisei maintains communication with Minussinsk, in Central Siberia. There is a telegraph line connecting Kysylchoto with other parts of the U.S.S.R.

Education.—According to the Central Statistical Administration of the R.S.F.S.R. by the end of 1950 there were 20,600,000 pupils in primary, 7-year and secondary schools, technical schools and other secondary educational establishments. There were 687,000 students in 502 higher educational establishments of the R.S.F.S.R., including correspondence students. The number of schools in 1950 was 120,000. Over 1,000,000 children attend kindergartens and residential schools. Expenditure on education in 1950 was estimated at 21,696 million roubles.

Finance.—Estimates for revenue and expenditure for 5 years (in million roubles):—

	1947 (preliminary returns)	1948 (preliminary returns)	1949 (preliminary returns)	1950 (preliminary returns)	1951 (estimate)
Revenue . .	47,199	47,644	53,024	57 698	54,262
Expenditure . .	46,144	49,172	52,112	53,200	54,133

Deposits in savings banks total nearly 13,000 million roubles. Nine-tenths of budget resources were invested for social and cultural needs.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north lat. It has been (1945)

returned to the U.S.S.R. It has an area of about 13,935 square miles, and, in 1938, the population was 339,357, of whom 329,743 were Japanese, 7,628 Koreans and 338 Europeans. The most important industry of the island is the herring fishery (value of catch, 9,660,078 yen in 1937), but large areas are fit for agriculture and pasturage, and Japanese settlers had been provided with seed and domestic animals. There is a vast forest area of larch and fir trees, covering 8,207,500 acres. The minerals found are coal and alluvial gold; coal raised in 1938, 343,539 tons. Petroleum also abounds; output in 1939, 3,869,000 barrels. Total length of railways, 404 miles.

UKRAINE.

(RADYANSKA SOVIETSKA SOTSIALISTICHNA RESPUBLIKA.)

The Ukrainian Soviet Socialist Republic was proclaimed on 27 Dec., 1917, that is, soon after the Soviet Revolution of 7 November, 1917, and was finally established in December, 1919. In December, 1920, the Ukrainian Soviet Socialist Republic concluded a military and economic alliance with the Russian Soviet Federal Socialist Republic.

On 6 July, 1923, the Ukrainian Soviet Socialist Republic formed, together with the other Soviet Socialist Republics in Russia, the Union of Soviet Socialist Republics. On 1 November, 1939, Western Ukraine (about 88,000 square kilometres) was incorporated in the Ukrainian S.S.R. On 2 Aug., 1940, Northern Bukovina (about 6,000 square kilometres), ceded to the U.S.S.R. by Rumania 28 June, 1940, and the Khotin, Akkerman and Izmail provinces of Bessarabia were included in the Ukrainian S.S.R. and on 29 June, 1945, Ruthenia (sub-Carpathian Russia), about 7,000 square kilometres, was also incorporated. The fixing of the exact frontier was left to the joint decision of the Supreme Soviets of the Ukrainian and Moldavian Soviet Socialist Republics (subject to ratification by the Supreme Soviet of the U.S.S.R.) with the object of including areas in Moldavia with a mainly Ukrainian population in the Ukraine and vice versa. From the new territories two new regions (provinces) were formed, Chernovitz and Izmail.

The Ukrainian Soviet Socialist Republic consists of the following regions:—Chernigov, Chernovitzy, Dniepropetrovsk, Drogobych, Izmail, Kamenetz-Podolsk, Kharkov, Kherson, Kiev, Kirovogradsk, Lvov, Nikolaievsk, Odessa, Poltava, Rovno, Stalino, Stanislav, Sumy, Ternopol, Vinnitza, Volhynia, Voroshilovgrad, Zakarpatsk (Transcarpathia), Zaporozhe, Zhitomir.

Area and Population.—In 1938 the Ukrainian S.S.R. covered an area of 445,000 square kilometres (170,998 square miles). In 1946 it covered 576,600 square kilometres (225,000 square miles).

The population of the Ukraine in 1939 was 30,960,221, of whom 80%

were Ukrainians, 9·2% Russians, 5·4% Jews, and 5·4% of other origins. At the end of 1940 the population was about 38,500,000.

The principal towns (with their populations on 17 Jan., 1939) are the capital, Kiev (population 846,293), Kharkov (833,432), Odessa (604,223), Dniepropetrovsk (500,662), Stalino (462,000) and Nikolaiev (141,400). The chief town of Northern Bukovina, Chernovitzy, had a population of 109,821 in 1938. In 1930 it was decided to construct 14 new towns in the Donetz Basin, among them Gorlovka. The cost of construction amounted to a total of nearly 650 million roubles.

The population of the Ukraine belongs to a variety of Churches, the chief being the Orthodox Greek Church and the Catholic Church. The Western Ukraine Uniate Church, which in 1596 had been forced by the Poles to establish unity with the Roman Church, severed this connexion in March, 1946, and rejoined the Orthodox Church. There are also some Protestants, and adherents of other Christian sects, as well as Jews and others.

Education.—In 1950, there were 29,500 schools and 7,170,000 pupils in the primary, secondary and technical schools. In Northern Bukovina there were, in 1947, 791 schools with 112,863 pupils, 31 secondary schools, 14 technical schools, 4 music schools, a midwifery school and a state university in Uzhgorod. In Western Ukraine there were, in 1949, 7,680 primary and secondary schools with over 1,130,000 pupils, 3 universities and 20 other higher institutions with 20,000 students, 120 technical colleges; in 1950 there were 500 hospitals.

In 1946 there were 236 scientific research institutes with 5,800 research workers. The Ukrainian Academy of Science was established in 1920.

Finance.—Budget estimates for 1948, 15,183 million roubles; 1949, 16,503 million roubles; 1950, 17,194 million roubles; 1951, 17,247 million roubles.

Agriculture.—The Ukraine contains some of the richest land in the U.S.S.R. It raises wheat, buckwheat, beet, sunflower, cotton, flax, tobacco, soya, hops, the rubber plant *kok-sagyz*, fruit and vegetables, and before the war provided about a quarter of the grain production in the U.S.S.R. and two-thirds of the sugar beet. Nine-tenths of the grain exported from Russia came from the Ukraine. The area under cultivation in 1939, *i.e.*, before the new territories were added, about 27 million hectares, of which over 1 million hectares are under beet. Arable land extended to 70,408·8 thousand acres (64%); pastures to 4,712·4 thousand acres (4·3%); forests to 8,384·4 thousand acres (7·6%) and permanent meadows to 4,658 thousand acres (4·2%). In 1938 the cultivated area was 63,262,100 acres (wheat, 25,324,200 acres; rye, 7,705,800 acres; barley, 6,922,000 acres; oats, 3,994,800 acres; millet, 1,033,900 acres; sugar beet, 1,991,000 acres; flax (1940), 407,000 acres). The area sown in 1950 was 29,564,000 hectares (two-thirds of which was under grain).

In 1940 there were 872 sovkhozy and 1,225 machine-tractor stations, and 27,400 kolkhozy embracing almost all former individual peasant farms in the Ukraine. In Western Ukraine, in 1950, there were over 7,000 kolkhozy serviced by 205 machine-tractor stations covering about 90% of the total land under tillage. Some 19,000 livestock farms had been organized by the kolkhozy. Electricity was supplied (1949) to 711 collective farms and about 100 machine-tractor stations. During 1950, 110 hydro-electric power-stations and 204 telephone stations were constructed in the rural areas of the Ukraine.

The average harvest yield of grain in the Ukraine in double centners per hectare was :—

	1938	1939	1940
All grains crops	10·9	13·9	14·6
Maize	14·1	17·0	20·5
Millet	9·7	12·0	17·1
Sugar beet	164·1	144·7	179·9
Sunflower	10·2	11·6	14·5
Potatoes	76·2	71·9	108·0

In 1940 4,125 acres of rice was grown in the Ukraine with a yield of 52–60 bushels per acre.

A new variety of sunflower has been evolved in the Ukraine with a yield of 25–30 centners per hectare and 50% oil content in the seed, which is some 15% above that of the old varieties. Another variety is exceptionally quick ripening and suitable for raising in northern districts, such as beyond the Urals and in Siberia; it gives a good yield and the oil content of the seed is 33%.

The census in 1940 showed 3,256,900 horses, 7,741,400 large cattle, 4,735,700 sheep and goats and 7,335,700 pigs. In 1949, silver-fox breeding farms were started.

By the end of 1950, 717,000 acres were afforested.

Industry.—Some of the industries of the Ukraine are amongst the most important in the whole of the U.S.S.R. Coal in the Donetz field (area of Donetz basin, 10,000 square miles, stretching from Stalino to Rostov), estimated in 1938 to contain 60·8% of the bituminous and anthracite-coal reserves of the Union, yielded an output in 1940 of 84,000,000 metric tons—about 60% of the Union production. Cutting, screening and underground transport in the Donetz coalfields are now almost completely mechanized; automatic and remote control apparatus are being installed, radio installations are also being made. Peat production in 1940 was 3·1 million tons.

Combining coal from the Donetz field with the iron-ore from the mines in Krivoi Rog—which accounted in 1938 for 16,070,000 tons, 59% of the Soviet Union total—has made possible the development of a large ferrous metallurgical industry in the Ukraine. Output of iron ore in 1940 was 18·9 million tons.

Manganese is also available at Nikopol; the mines there produced 957,000 tons of ore in 1937, of a total of 2,752,000 tons for the whole U.S.S.R.

Ukrainian blast furnaces turned out 9,200,000 tons of pig-iron and 8,621,700 tons of steel in 1940. On 1 Jan., 1935, there were 55 blast furnaces in the Ukraine, representing 55% of the capacity of the country, and 117 open-hearth furnaces, representing 40%.

In 1940 the Ukraine produced 61·6% of the total output of pig-iron in the Soviet Union, 47·3% of the steel, 47·8% of the rolled metal and 63·3% of the iron-ore.

The Ukraine also contains oil, rich deposits of salt and various important chemicals. It has a highly developed chemical industry and machine-construction industry producing one-fifth of the total output of machinery and chemicals in the Soviet Union. In Northern Bukovina there are deposits of gypsum, oil, alabaster, brown coal and timber.

In 1932 the construction of a dam across the Dnieper River at Alexandrovsk (now called Zaporozhye) was completed. In connexion with the Dnieper hydro-electrical station, large industries were set up, including the largest aluminium plant in the U.S.S.R. The total power of the Ukraine electrical stations in 1940, was 2,500,000 kw., and their output was 11,938 million kwh.

Railways.—The total length of railways of the Ukrainian S.S.R. in 1940 was 14,800 kilometres (over 9,000 miles), and the navigable rivers 2,851 kilometres (1,782 miles). Length of motor roads, in 1941, was 13,700 kilometres.

WHITE RUSSIA.

(Byelorussian Soviet Socialist Republic.)

The Byelorussian Soviet Socialist Republic was set up on 1 Jan., 1919. It forms one of the constituent republics of the U.S.S.R. Its constitution is similar to that of the R.S.F.S.R.

Byelorussia is situated along the Western Dvina and Dneiper, it is hilly with a general slope towards the south. It contains large tracts of marshland, particularly to the south-west. By comparison with Central European Russia it has a higher rainfall and a more equitable climate, being cooler in summer and much less cold in winter. It contains valuable forest-land wooded with oak, elm, maple and white beech.

Area and Population.—In 1946 its territory covered 207,600 square kilometres (81,090 square miles). The capital is Minsk (population, Jan., 1939, 238,772). Other important towns are Vitebsk and Gomel. On 17 Jan., 1939, the population numbered 5,567,976, of whom the urban population numbered 1,372,522. On 2 November, 1939, western Byelorussia was incorporated with an area of over 108,000 square kilometres and a population of about 4,800,000. About 80% of the population are Byelorussians, 10% Jews living mainly in the urban areas, the rest being Russians, Ukrainians and Poles.

White Russia now comprises the following regions:—Baranovichi, Bobruisk, Brest, Gomel, Grodno, Mogiliev, Molodechno, Minsk, Pinsk, Polessye, Polotsk, Vitebsk.

Education.—In 1940 there were about 1,118,000 pupils in primary and secondary schools. There were 22 higher educational institutions, with

15,400 students; 130 technical high schools, with 32,200 pupils; 61 workers' faculties, with 15,760 pupils. There were also 39 scientific institutions and an Academy of Sciences. There were 3 institutions of university rank—the White Russian State University, the Communist University and the Agricultural Academy with 4,418 students. Nearly all these were destroyed during the war, but 27 higher educational institutions and the Academy of Science with 41 research institutes were functioning in 1948. In 1950, there were 13,100 primary and secondary schools with over 1,500,000 pupils.

Finance.—Estimates for 1948, 3,557 million roubles; 1949, 3,741 million roubles. 1950, revenue, 3,777 million roubles; expenditure, 3,730 million roubles. Estimates for 1951, 3,687 million roubles.

Agriculture.—The area under cultivation (in hectares) in 1937 was 4,000,000, of which 2,400,000 hectares were under grain, 255,000 hectares under hemp and flax and 640,000 hectares under potatoes. The total number of heads of livestock was 9,030,900 in peasant farms, including 1,091,800 horses, 2,096,200 cattle, 3,449,600 sheep and goats and 2,293,300 pigs.

Agriculturally, Byelorussia may be divided into three main sections :— North[illegible], fodder, grasses, and breeding cattle for meat and dairy [illegible]: potato growing and pig breeding; Southern : good natural pasture-land, hemp cultivation and cattle breeding for meat and dairy produce.

By 1940, 99·3% of the former individual peasants had formed kolkhozy serviced by 349 machine-tractor stations. In 1949, there were 4,000 kolkhozy covering some 200,000 farms. Livestock breeding is carried on in 25,000 farms. About 160,000 hectares of the marshland had been drained by 1940. This land has been found to be as rich as the soil of the Black Earth zone and yields rich harvests of grain, fodder, potatoes, Kok-sagyz and other crops.

Industry.—The industries of Byelorussia had been developed very considerably between 1919–40. The agricultural-machinery plant in Gomel turned out, amongst other things, fodder cutters, potato-washing machines, clover-sorting machines, hay cutters, spare parts for tractors.

The republic also contains timber works, a match factory in Borisov, cement, building materials, textiles, machine, automobile lorries and tractors and pre-fabricated house construction, glass-blowing and other factories. It also contains large-scale canneries, creameries and various other food industries, chemical works, artificial-silk works, flax-spinning works and leather works.

Particular attention had been paid to the development of the peat industry with a view to making Byelorussia as far as possible self supporting in fuel, and in 1939 local peat provided 67·5% of her total requirements of fuel. More than 200 modern peat works were in operation in 1950.

Among the work carried out in Western Byelorussia in 1940–41 was the reconstruction of the main waterways including in particular the digging of the Dnieper–Bug Canal.

There are also rich deposits of rock salt. In 1939 there were about 200,000 industrial workers.

By the end of the war the republic was thrown back to its state in 1913. But by the end of 1947 over 6,000 large- and small-scale enterprises had been restored, including cement, glass, machine-construction, tractor and other works, as well as peat works and power-plants.

Output of electricity in 1937 was 430 million kwh. Length of railways, 3,100 kilometres.

Vakar (N. P.), Byelorussia : the rise of a nation. Cambridge, Mass., 1950.

AZERBAIJAN.

(AZERBAIJAN SOVIET SOCIALIST REPUBLIC.)

The 'Mussavet' (Nationalist) party which dominated the National Council or Constituent Assembly of the Tartars, declared the independence of Azerbaijan on 28 May, 1918, with a capital, first at Ganja (Elizavetopol) and later at Baku. On 28 April, 1920, Azerbaijan was proclaimed a Soviet Socialist Republic. With Georgia and Armenia it formed the Transcaucasian Soviet Federal Socialist Republic. In 1936 it assumed the status of one of the republics of the Union of Soviet Socialist Republics and adopted a constitution in conformity with that of the Union.

Area and Population.—Azerbaijan covers an area of 85,700 square kilometres (33,460 square miles) and has a population (1939) of 3,209,700, including 2,049,000 rural and 1,160,700 urban. Its capital is Baku, population 809,347 (1939). Azerbaijan includes the Nakhichevan Autonomous Soviet Socialist Republic and the Nagorno Karabakh Autonomous Region.

About three-fifths of the population are Azerbaijan Turks. Other nationalities are Armenians, Georgians and Russians. Situated in the eastern area of Transcaucasia it is protected by mountains in the west and north and washed by the Caspian Sea in the south and east. Its climate is inclined to drought.

Education.—In 1947 there were 534,000 pupils in elementary and secondary schools. There were 91 technical colleges with 17,200 students, 20 higher educational institutes with 11,600 students. In the Baku University and the Medical Institute in 1940 there were 2,500 students. The Azerbaijan Academy of Science opened over 60 research institutes during the war.

Agriculture and Industry.—The chief agricultural products are grain, cotton, rice, vine, fruit, vegetables, tobacco and silk. The Mexican rubber plant *grayule* has been acclimatized. A new kind of high yielding winter wheat has been produced for use in mountainous parts of the Republic. Experimental sowing in collective farms gave a harvest of 30 to 35 and more centners in 1950.

Livestock in 1941 :—Cattle 1,357,000; pigs 119,500; sheep and goats 2,907,000. Azerbaijan has a valuable breed of saddle horses. Camels, mules, donkeys and buffalos are used as draft animals.

Azerbaijan is being converted into an important cotton-growing and sub-tropical base. On the irrigated land, of which there is now a considerable area, excellent crops of Egyptian and Sea-Island cotton are obtained. Here, too, rice and lucerne are cultivated, and in the mountain valleys there are also orchards, vineries and silk cultures. The Azerbaijan silkworm, a newly bred variety, is said to produce twice as much silk as the Baghdad silkworm.

In the south along the coast of the Caspian where the climate is more moist, there are tea plantations, and citrous fruits and other sub-tropical plants are grown. In 1944 tea plantations covered 10,000 hectares.

In 1941 a scientific research institute for sub-tropical research was opened to develop the culture of sub-tropical plants in Azerbaijan and other

parts of Transcaucasia. A forestry research institute was opened in 1949.

The republic is rich in natural resources:—Oil, iron, aluminium, copper, lead, zinc, precious metals, sulphur pyrites, limestone and salt.

The most important industry is the oil industry, especially in the Baku Region. The total output of oil was:—In 1938, 22,100,000 tons; in 1939, 23,000,000 tons; in 1940, 25,000,000 tons. The largest producing area lies along the western shore of the Caspian Sea, north and south of Baku, where the largest refineries are located. Other wells lie west of Baku, and some have been drilled in the Caspian itself, off the Apsheron Peninsula. The northernmost coastal field is at Makhach Kala. West of this is the large Grozny field, and still farther west is the Maikop field. Baku is connected by a double pipeline with Batum on the Black Sea. Makhach Kala, Grozny and Maikop pipe their product to Tuapse, on the Black Sea, or to Trudovaya in the Eastern Ukraine. All the oilfields have been electrified and are now connected with the town of Baku and, for the most part, with the new workers' settlements which have been constructed more or less on the American type. Azerbaijan has also copper, chemical, cement and building material, food, timber, salt, textiles and fishing industries.

In 1938, the total power of electrical stations was 62,000 kw. In 1945 the construction of the Minechaursk hydro-electrical station on the Kura River was started. Three powerful pumping stations are now being built on the Kura River, calculated to irrigate about 75,000 acres in the Kura Arak lowlands of South Azerbaijan, power for the pumps being supplied by special hydro-electric stations, one of which was in operation at the end of 1947. The Kura River is navigable for about 600 kilometres.

Finance.—The budget for 1948 was 1,761,654,000 roubles. Estimate, 1949, 1,830 million roubles; 1950, 1,921 million roubles; 1951, 1,908 million roubles.

GEORGIA.

(Sakartvelos Sabchota Sotsialisturi Respublica.)

The independence of the Georgian Social Democratic Republic was declared at Tiflis on 26 May, 1918, by the National Council, elected by the National Assembly of Georgia on 22 Nov., 1917. The Act of Independence of Georgia was confirmed on 12 March, 1919, by the Constituent Assembly. On 25 Feb., 1921, Georgia was proclaimed the Georgian Soviet Socialist Republic. At the first Transcaucasian Soviet Congress, 15 Dec., 1922, Georgia, together with Armenia and Azerbaijan, united to form the Transcaucasian Soviet Federal Socialist Republic, and a federal constitution was adopted and published 16 Jan., 1923. In 1936 the Georgian Soviet Socialist Republic became one of the constituent republics of the Union of Soviet Socialist Republics and, like other republics of the Union, adopted a new constitution in harmony with that of the U.S.S.R.

The Georgian Soviet Socialist Republic includes the Abkhazian A.S.S.R. (capital, Sukhumi), Adzharian A.S.S.R. (capital, Batoumi), South Osetian Autonomous Region (capital, Stalinir).

Area and Population.—Georgia occupies the whole of the western part of Transcaucasia and covers an area of 76,200 square kilometres (37,570 square miles). Its population on 17 Jan., 1939, was 3,542,300 (2,475,700 rural and 1,066,600 urban).

Protected from the north by the Caucasian Mountains and receiving in the west the warm moist winds from the Black Sea into which most of its rivers flow, Georgia is outstanding for its fine warm climate and its natural wealth, variety and beauty. It has the highest snow-capped peaks of the Caucasian mountains. Georgia contains valuable sulphur and other medicinal springs. Georgians, an ancient highly-cultured people, form about two-thirds of the population, Armenians 10%; others include Abkhazians, Adzharians. Ossetins, Russians, Ukrainians, Greeks and Jews.

Tbilisi (formerly Tiflis) (population 519,175 in 1939) is not only the capital of Georgia, it is also the capital of Transcaucasia.

Education.—In 1949 there were 745,000 children in 4,777 elementary and secondary schools, 21,560 in technical schools and over 25,000 students in 22 higher educational institutions. In Abastuman there is an astro-physical observatory. In 1936 a branch of the Academy of Sciences of the U.S.S.R. was formed in Tbilisi, and in February, 1941, a Georgian Academy of Sciences was opened, which in 1947 had 80 research institutes.

Agriculture and Industry.—There are three main agricultural areas:—(1) The moist sub-tropical area along the Black Sea coast, where are cultivated tea, citrous fruits (lemons, oranges, mandarins, etc.), the tung tree (which yields special industrial oils), eucalyptus, bamboo, high-quality tobacco (Abkhazia takes first place in the U.S.S.R. for the output of Turkish tobacco); (2) Imeretia (the Kutais region), where the chief cultures are grapes and silk, and (3) Kakhetia, along the Alazani (a tributary of the Kura River), famed for its orchards and wines. Over a million hectares are under cultivation; tea (1946), 51,800 hectares; vineries, over 60,000 hectares; tobacco, 16,000 hectares; citrus fruits, 19,000 hectares.

In 1946, 99·5% of sown area was worked by kolkhozy. There were 78 state farms and 60 machine tractor stations. In the Colchis area 45,000 acres of extremely rich land have been reclaimed.

Livestock in 1947:—Cattle, 1,500,000; pigs, 600,000; sheep and goats, 2,000,000.

In the East Georgia and Imerety districts, 77 rural power stations have been put into service after the war, supplying electricity to 277 collective farms.

Georgia is rich in forest lands where fine varieties of timber are grown. Area covered by forests, 2·4 million hectares.

The most important mining industry of G[illegible] exploitation of the manganese deposits, the richest of which li[illegible] region. Manganese deposits in Georgia are calculated at 250,000,000 tons, distributed over an area of 140 square kilometres. There are also coal seams, the most important of which are at Tkvarcheli (deposits estimated at 250,000,000 tons), and Tkibuli (deposits of 80,000,000 tons). Other important minerals are baryta, the best in the U.S.S.R., fire-resisting and other clays, diatomite, shale, oil, gold, agate, marble, cement, alabaster, iron and other ores, building stone, arsenic, molybdenum, tungsten and mercury. In 1941, a goldfield was also discovered. Output of coal, in 1946, was 837,000 tons.

The pre-war 5-year plans included the building of about 800 factories in Georgia. After the war the industrialization of the food industry has

been fostered, including the production of special machinery for use on the tea plantations, said to improve the quality of the tea leaves.

Among the enterprises in the course of construction in 1946 were the Transcaucasian Metallurgical Plant with an annual output capacity of 430,000 tons of pig-iron, 500,000 tons of steel and over 380,000 tons of rolled metal; the Kutais motor works with an annual capacity of 30,000 3½-ton motor lorries and other works.

Georgia's fast flowing rivers form an abundant source of energy. The most powerful electric station in Transcaucasia is in Georgia on the river Kura, the Zemo-Avchal hydro-electric station of 36,000 h.p. At the end of 1947, 3 rural hydro-electric stations in the Tiripon, Zhinval and Kistur districts of Georgia were in the course of construction. The Tiripon with projected capacity of 3,000 kw. will be the biggest rural power plant in the U.S.S.R. All three stations are scheduled to be set in operation in 1949. The construction of the first high-pressure hydro-electric power station was being completed in 1947, on the Khrami River. In 1946, the installed electricity power was 222,000 kw.

Transport.—Length of railways in 1945, was 765 miles. The trunk line leading from Batum through Tiflis to Baku on the Caspian Sea has several narrow-gauge branches on Georgian territory to the coal-mines of Tkibuli, to the port of Poti, to the manganese mines of Chiaturi, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal-mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, was completed in 1946.

Finance.—The budget (in million roubles) for 1948 balanced at 2,278; estimates, 1949, 2,500; 1950, 2,474; 1951, 2,580.

ARMENIA.

(Armenian Soviet Socialist Republic.)

On 29 Nov., 1920, Armenia was proclaimed a Soviet Socialist Republic. The Armenian Soviet Government, with the Russian Soviet Government, was a party to the Treaty of Kars (March, 1921), which confirmed the Turkish possession of the former Government of Kars and of the Surmali District of the Government of Erivan. From 1922 to 1936 it formed part of the Transcaucasian Soviet Federal Socialist Republic. In 1936 Armenia was proclaimed a constituent republic of the U.S.S.R.

Area and Population.—Armenia (capital Erivan) covers an area of 29,800 square kilometres (11,640 square miles). It is situated in the south

of Transcaucasia and is bounded in the north by Georgia, in the east by Azerbaijan and in the south and east by Turkey and Persia. It is a very mountainous country with but little forest-land, has many turbulent rivers and a highly fertile soil, but subject to drought. On 17 January, 1939, the population was 1,281,600 (915,200 rural and 366.400 urban). The population of Erivan on 17 January, 1939, was 200,000. About 85% of the population are Armenians, the rest are Turks, Georgians, Russians, Kurds, Azerbaijanians, Persians and Jews.

Education.—In 1947 there were 1,150 schools with 276,000 pupils, 265 schools with 21,000 pupils for young men and women who under war conditions had been unable to attend the ordinary school; 51 technical schools and colleges with 10,000 students; 13 higher educational institutions with 8,700 students. There were also schools of music, art and dramatic art. In 1950, there was a total of over 300,000 pupils and 14,000 teachers. Erivan houses the Armenian branch of the Academy of Sciences of the U.S.S.R., 43 scientific institutes and other technical colleges, and the state opera.

Agriculture and Industry.—The chief agricultural area is the valley of the Arax and the area around Erivan. Here there are considerable cotton plantations as well as orchards and vineries. Area under tobacco, 7,900 hectares; grape vine and fruit, 21,000 hectares; sugar beet, 3,000 hectares; cotton, 63,500 hectares. Subtropical plants, such as almonds, figs and pomegranates are grown in many varieties. In the mountainous areas the principal natural pursuit is [illegible]. In 1945 the total cultivated area of Armenia amounted to 400,700 hectares, of which 358,300 were under grain. A number of canals have been built, also irrigation systems, which utilize Lake Sevan and other mountain lakes. One of the earliest irrigation plants is the Shirak Lenin Canal, 22 kilometres (13 miles) long, commenced in 1922 and completed in 1925. Among the more important of the canals and irrigation works are the Mikoyan Canal, 47 kilometres long, in the Spitak region, irrigating 2,300 hectares, and the Kamarlin irrigation works, which has brought 2,079 hectares of land under tillage.

Area of irrigated land in Armenia in 1948 was 527,000 acres, and the total length of canals and irrigation systems is over 6,250 miles. A reservoir with a capacity of 100 million cubic metres and a land reclamation scheme in the marshlands of the Arax Dayan steppes were under construction in 1949.

Some 98% of the Armenian peasantry belong to the collective farms and these together with the state farms till 98·9% of the total cultivated area. Livestock in 1945 included 1,078,400 sheep and goats and 517,400 cattle. All sovkhozy and machine-tractor stations and about half of the kolkhozy had been electrified by 1950.

Armenia contains large deposits of copper, zinc, aluminium, molybdenum and other metals. It is also rich in marble, granite, cement and other building materials. The mining of these minerals is becoming more and more important. Among other industries are the chemical, producing chiefly synthetic rubber and fertilizers and the extraction and processing of building materials such as cement, pumice-stone, tuffs, marble, volcanic basalt and fireproof clay, a number of ginning and textile mills, carpet weaving, food, including wine-making, fruit, meat-canning and creameries. Machine construction, tailoring and bootmaking and other large-scale works have also been established. Among the industrial centres are Erivan, Leninakan, Alaverdi, Kafan, Kirovakan, Daval, Megri and

Oktemberyan. There are over 50 hydro-electrical stations. Installed hydro-electric power in 1944 was 133,100 kw.

Armenia has some very fine health resorts; the curative properties of the mineral waters of Arani, 4,100 feet above sea-level, are not inferior to those of Wiesbaden. The mineral springs of Djermuk are similar to those of Carlsbad.

Transport.—Length of railways in 1947, 461 kilometres; motor roads, 7,450 kilometres; air lines, 570 kilometres.

Finance.—Budget estimates (in million roubles), 1948, 1,050; 1949, 1,103; 1950, 1,115; 1951, 1,158.

KARELO-FINNISH SOVIET SOCIALIST REPUBLIC.

Before 1917, Karelia (then known as the Olonetz Province) was noted chiefly as a place of exile for political and other prisoners. Its industries at that time consisted of a few timber mills, one large smelting plant and a few very weak electric stations. Agricultural methods were extremely primitive.

After the November Revolution of 1917, Karelia formed part of the R.S.F.S.R. In June, 1920, a Karelian Labour Commune was formed and in July, 1923, this was transformed into the Karelian Autonomous Soviet Socialist Republic (one of the autonomous republics of the R.S.F.S.R.). On 31 March, 1940, after the Soviet–Finnish war, practically all the territory (with the exception of a small section in the neighbourhood of the Leningrad area) which had been ceded by Finland to the U.S.S.R., was added to Karelia and the Karelian Autonomous Republic was transformed into the Karelo–Finnish Soviet Socialist Republic as the 12th republic of the U.S.S.R. In 1946, however, the southern part of the republic, including its whole seaboard and the towns of Viipuri (Vyborg) and Koksholm, was attached to the R.S.F.S.R.

Karelia is chiefly noted for its wealth of timber, some 70% of its territory being forest-land. It is also rich in other natural resources, having large deposits of diabase, spar, quartz, marble, mica, granite, zinc, lead, silver, copper, molybdenum, tin, baryta, etc. New iron ore deposits were discovered in 1945–46. Karelia takes first place in the U.S.S.R. for the production of mica. It has 20,000 lakes, which, as well as its rivers, are rich in fish.

Area and Population.—The Karelo–Finnish Republic, capital Petrozavodsk, covers an area of 178,500 square kilometres (69,720 square miles). In Jan., 1939, Karelia itself had a population of 469,145, of whom 150,440 were urban and 318,705 rural. In June, 1941, the population of the newly-formed Republic was officially stated to be 606,333.

Education.—In 1941 there were 819 elementary and secondary schools with 100,000 pupils. The Karelo–Finnish University with 18 professorial chairs in Petrozavodsk had 400 students.

In the Finnish areas added to the republic in 1940, 270 new schools, 2 agricultural colleges, a forestry school and a teachers' training college were opened.

In 1946, the university in Petrozavodsk, 2 other higher institutes and a teachers' training college were again functioning. A branch of the Academy of Sciences was set up in 1949, with institutes of History, Languages, Literature, Biology, and departments of Economics, Timber and Mining.

Finance.—The budget for 1948 balanced at 684 million roubles. Estimates, 1949, 549 million roubles; 1950, revenue, 752 million roubles; expenditure, 750 million roubles. Estimates, 1951, 931 million roubles.

Agriculture.—The sown area in 1946 was 77,700 hectares. There were 21 Soviet state farms and 32 machine-tractor stations.

In the new areas added to Karelia in 1940, 15 new state farms, including 3 sugar-beet raising farms, 12 machine-tractor stations and 800 livestock-breeding farms were formed before June, 1941. In 1947, 35 small electric stations were built.

Industry.—During the first and second Five-Year Plans some 20 large-scale enterprises were constructed, such as timber mills, paper-cellulose works, mica, chemical plants, electrical stations and ski-producing factories; new mines have been opened. The most remarkable of the new plants set into operation in 1939 is the Segezh paper-cellulose and chemical plants, which works up all wood pulp into useful material without loss of any by-products. In 1941, there were 6 paper and cellulose factories.

The construction of the White Sea–Baltic Canal had a powerful influence on the economic development of Karelia. By July, 1946, the canal (227 kilometres long) was again being utilized.

Railways.—A railway between Petrozavodsk and Suoyarvi connects the capital and the Murmansk Railway with the main railway line Sortavala-Vyborg. A railway line was also laid between Kandalaksha and Kuolayarvi. Length of track, 1,600 kilometres; goods carried in 1940, 10,300,000 tons, mainly timber and building material. Length of motor goods roads, 1941, 14,056 kilometres.

Air Transport.—There is regular passenger, postal and goods air transport between Petrozavodsk and Leningrad, Vyborg, Sortavala and Kakisalmi.

MOLDAVIAN SOVIET SOCIALIST REPUBLIC.

The Moldavian Soviet Socialist Republic, capital Kishinev, was formed by the union of part of the former Moldavian Autonomous Soviet Socialist Republic (organized 12 October, 1924), formerly included in the Ukranian Soviet Socialist Republic, and the areas of Bessarabia (ceded by Rumania to the U.S.S.R., 28 June, 1940) with a mainly Moldavian population. As from 2 August, 1940, the M.S.S.R. includes the following districts of the former Moldavian Autonomous Soviet Socialist Republic: Grigoriopol, Dubossarsk, Kamensk, Rybnitz, Slobodzeisk and Tiraspol (including the town of Tiraspol), and the following districts of Bessarabia: Beltsk, Bendersk, Kagulsk, Kishinev (including the town of Kishinev), Orgeev and Sorok.

Area and Population.—The area is 33,800 square kilometres (13,200 square miles). In 1941, the population was 2,700,000, of whom about 70% are Moldavians. The rest are Ukrainians, Russians, Jews, Bulgarians and others.

Education and Health.—In January, 1949, there were 1,924 schools with about 400,000 pupils, 37 secondary schools and 8 higher educational institutions. In 1946 a state university and a number of institutes of the Academy of Sciences were opened; 14 research institutes were functioning in 1949. In 1947 Moldavia had 5,400 doctors, 800 medical centres, many district hospitals, a state medical institute and 9 medical schools with over 2,500 students.

Finance.—Budget estimates (in million roubles), 1948, 959; 1949, 1,055; 1950, 1,065; 1951, 1,163.

Agriculture.—In 1949, the kolkhozy embraced 80% of the peasant households. There were 98 machine-tractor stations and 68 state farms. About 70% of all farm work is mechanized.

After the cession of Bessarabia to the U.S.S.R., the landless Bessarabian peasants and those with very little land were granted over 250,000 hectares (about 625,000 acres) of land, mainly the former property of the big landed estate owners. In 1945, the area under cultivation was 1,900,000 hectares, 80% of which was under grain (wheat, maize and barley) and over 10% under industrial plants (sunflower, sugar beet, tobacco, soya and hemp).

Bessarabia has an equible climate and very fertile soil, raising wheat, maize, tobacco. It was famed in Tsarist times for its orchards and vineries, and in 1914 it occupied first place in Russia for its grape and wine production. The largest orchards and vineries were formed into Soviet state fruit- and vine-growing farms (sovkhozy). Bessarabia is also rich in fish in the south; sturgeon, mackerel, brill.

Industry.—By the end of 1940 the Moldavian Autonomous Republic had 253 big industrial enterprises, including 3 modern conserving as well as other food-production plants, 8 wine-making plants, woodworking, tailoring, leather and other industries. Work had been started in August, 1940, and resumed in 1946 for the utilization of 400 kilometres of waterways along the Dniester River and to utilize its energy to provide a cheap source of electricity.

There are lignite, phosphorites, gypsum and valuable building materials, possibly also oil.

By the end of 1947, about 600 industrial enterprises were again functioning; these included 10 canning plants, 36 wine-making plants and 4 woodworking factories. Thirty-five electrical supply-stations were in operation. In 1947, the Taraspol heat and power station and the

Karogosh irrigation plant began to work. Machinery, footwear and textile factories were set up in 1949.

Length of railways, over 1,100 kilometres (over 680 miles).

ESTONIA.

(ESTONIAN SOVIET SOCIALIST REPUBLIC.)

Estonia was an independent republic from 1918 to 1940. Under the Russo-German agreement of 23 Aug., 1939, the Russians occupied Estonia on 17–20 June, 1940. The newly installed regime applied for Estonia's admission to the Soviet Union, which was effected by decree of the Supreme Soviet on 6 Aug. This incorporation has been accorded *de facto* recognition by the British government, but not by the U.S. government, which continues to recognize the diplomatic and consular representatives of Estonia who are in the United States.

Area, 47,549 square kilometres (18,353 square miles); population, 1,117,300 (1 Sept., 1940). The capital is Tallinn (138,000 inhabitants in 1934).

Education.—In 1937–38, there were 1,224 elementary schools in Estonia. The number of middle schools for general education, gymnasiums, was 58, of which number 19 were private schools. In 1945, compulsory school attendance was extended to 7 years. The number of pupils in 1947 was 148,700. The Tartu (Dorpat) University (founded in 1632) had, in 1949, 2,700 students; the Lutheran theological faculty has been abolished. In 1949, only about 40 Lutheran pastors and 2 Roman Catholic priests were still ministering. The latest available religious statistics give about 888,000 Protestants (nearly all Lutherans), 213,000 Greek Orthodox and 2,000 Roman Catholics.

In 1946 the Estonian Academy of Sciences was founded with 22 scientific research institutes. In 1949 there were 8 higher educational institutions. In Jan., 1951, an Estonian Agricultural Academy was opened in Tartu.

Finance.—Budget estimates (in million roubles), 1948, 935; 1949, 967; 1950, 1,020; 1951, 1,095.

Production.—Agriculture and dairy farming are the chief occupations. The total area in 1938 was about 10,789,959 acres, divided as follows:—forest land, 2,314,141 acres (21·4%); fields, 2,683,259 acres (24·9%); meadows, 2,186,054 acres (20·3%); pastures, 1,774,697 acres (16·4%); untillable land, 1,502,368 acres (13·9%), including a peat bog of 329,440 acres. The chief crops are rye, oats and barley. In 1950, over 80% of all peasant farms had combined to form collective farms.

In 1939 Estonia had 706,000 head of cattle, 695,700 sheep, 442,000 pigs, 218,500 horses and 1,991,030 poultry.

In 1938 there were in Estonia 277 dairy factories, of which 88·4% were co-operative. Butter was the chief article of export. Butter production in 1937, 15,893 metric tons; in 1938, 17,500 metric tons.

After the formation of the Soviet Republic, 906 industrial enterprises and 412 big wholesale and retail establishments were nationalized. The number of Trade Unionists in June, 1940, was 15,200; in May, 1941, 175,000.

Some 22% of her territory is covered by forests which provide good material for its saw-mills, furniture, match and pulp industries, as well as wood fuel.

Estonia has rich high quality shale deposits (particularly in the N.E.)

which are estimated at 3,700 million tons. The construction of a factory for the production of gas from shale was started in 1947 and a pipeline (125 miles long) from Kotla Järvi to Leningrad was completed at the end of 1948. Estonia also contains valuable peat deposits, and some of her electrical stations work on peat.

In the neighbourhood of Tallinn, phosphorites have been found, and in 1947 a plant for refining and for the production of super-phosphates was started.

Transport.—Length of main railways 1,447 kilometres, of secondary lines 693 kilometres. Estonia has 20 ports, but Tallinn handles four-fifths of the total sea-going transport.

LATVIA.

(Latvian Soviet Socialist Republic.)

Latvia was an independent republic from 1918 to 1940 Under the Russo-German agreement of 23 Aug., 1939, the Russians occupied Latvia on 17–20 June, 1940. The newly installed regime applied for Latvia's admission to the Soviet Union on 22 July, which was effected by decree of the Supreme Soviet on 5 Aug. This incorporation has been accorded *de facto* recognition by the British government, but not by the U.S. government, which continues to recognize the diplomatic and consular representatives of Latvia who are in the United States.

The existing administrative districts and parish councils were abolished in 1949 and replaced by 58 rural districts directly subordinated to the government.

Area and Population.—Latvia has a total area of 64,500 square kilometres (25,200 square miles). The coastline is 307 statute miles. Population, 1940, 1,950,000.

The chief town is Riga (the capital), population (1939) 393,211; population of other principal towns according to 1935 census, Liepāja (Libau) 57,098; Daugavpils (Dvinsk), 45,160; Jelgava (Mitau), 34,099; Ventspils (Windau), 15,671; Rezekne (Rositten), 13,139; Cēsis (Wenden), 8,748; Valmiera (Wolmar), 8,482.

The latest available religious statistics enumerate 1,070,000 Protestants (nearly all Lutherans), 479,000 Roman Catholics and 212,000 Greek Orthodox.

Education.—During the year 1938–39 there were 1,895 elementary schools in Latvia, with 229,825 pupils and 9,394 teachers. In the 114 secondary schools, 2,503 teachers taught 25,225 pupils.

The Riga Polytechnic was in 1919 raised to be the Latvian University. In 1950 the number of children in elementary and secondary schools was 282,000. There were also 10 higher schools (universities, colleges, etc.), 25 trade schools, 70 technical colleges, 3 teachers' training colleges and an agricultural academy. In 1945, an Academy of Sciences was opened which in 1947 had 19 research institutes and a staff of 800. There are 11 theatres and 213 cinemas.

Finance.—Budget estimates (in million roubles), 1948, 1,046; 1949, 1,498; 1950, 1,500; 1951, revenue, 1,428; expenditure, 1,406.

Production and Industry.—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life. Yield of linseed, in 1939, 20,050 metric tons.

Latvian forest-lands, state and private (4,317,482 acres), produced in 1937–38, 3,439,256 cubic metres of timber (firewood, 2,188,076 cubic metres).

Cattle breeding and dairy farming are the chief agricultural occupations. Oats, barley, rye, potatoes and flax are the main crops. Butter and timber were the chief exports before the war.

After the establishment of the Soviet regime, about 960,000 hectares (approximately 2,300,000 acres, mostly belonging formerly to landed estate owners) were distributed among the landless peasants or those with very small holdings. In 1950 there were 26 Soviet state farms, 100 machine-tractor stations and 500 horse-hiring stations. In 1950 there were over 4,600 collective farms, 3,500 of which had ancillaries for breeding sheep, pigs and poultry, and 100 farms have studs for race horses. Some 95% of peasant farms have formed kolkhozy (collective farms).

Livestock (26 June, 1939):—Horses, 414,470; cattle, 1,271,730; sheep, 1,469,570; pigs, 891,470; poultry, 4,729,120; beehives, 222,460.

On 31 Dec., 1938, there were 5,977 industrial enterprises in Latvia, employing 98,497 hands. After the absorbtion of Latvia by the U.S.S.R., 649 enterprises were nationalized. In 1941 the total number of industrial workers was 280,000, and a further 43,000 were employed in agriculture in the Sovkhozy as tractor drivers and mechanics.

By 1949 over 1,500 industrial enterprises had been restored, including the three largest textile plants, the Kegum hydro-electric station, the Riga electrical heat and power plant and 53 smaller urban and rural electric stations. The gross output of Latvian industry in 1949 was nearly 2½ times that in 1940.

The peat deposits extend over 645,000 hectares or about 10% of the total area, and it is estimated that the total deposits of peat are 3–4 milliard tons. It is also probable that Latvia contains soft coal.

Transport.—In 1946, the length of railways was 3,000 kilometres, and in 1945 goods carried was over 6·8 million tons. Riga is the largest port in the Baltic after Leningrad. Liepāja has been converted into a naval base; commercial shipping is excluded from the port.

LITHUANIA.

(LIETUVOS TARYBINE SOCIALISTINE RESPUBLIKA.)

Lithuania was an independent republic from 1918 to 1940. Under the Russo-German agreement of 23 Aug., 1939, the Russians occupied Lithuania on 15–17 June, 1940. A 'people's diet,' elected on 14–15 July, applied for Lithuania's admission to the Soviet Union on 22 July, which was effected by decree of the Supreme Soviet on 3 Aug. This incorporation has been accorded *de facto* recognition by the British government, but not by the U.S. government, which continues to recognize the diplomatic and consular representatives of Lithuania who are in the United States.

Area and Population.—The total area of Lithuania is 65,200 square kilometres (25,500 square miles), and the population (1 January, 1940) 2,879,070. The capital is Vilnius (Vilna), with a population of 209,400 in 1940. Other large towns, with their population in 1940, are Káunas (Kovno), 154,100; Klaipéd (Memel), 38,900; Šaulai (Shavli), 31,600, and Panevéžys (Poneviej), 26,200. By a decree of 5 July, 1950, divisions of 'Uyezd' and 'Volost' (District and Rural District) have been abolished, and new divisions instituted: 'Oblast' (Region) and 'Raion' (District); 4 Regions (Vilnius, Kaunas, Klaiped and Shaulai), and 87 Districts have been formed.

The latest available religious statistics enumerate about 2,167,000 Roman Catholics, 117,000 Protestants (half of them Reformed and half Lutherans), and 51,000 Greek Orthodox.

Education.—In 1949 there were 3,648 elementary, 384 secondary, 41 technical, 9 teachers' training and 3 commercial schools, and 2 pedagogical, 2 music and 2 art institutes. The University of Vytautas the Great, at Kovno, was opened on 16 Feb., 1922. On 15 Jan., 1940, certain faculties were transferred to Vilnius as an independent institution under the name of the University of Vilnius. The number of university students was over 7,000 in 1947. Early in 1941 a Lithuanian Academy of Sciences was opened. In 1950, there were 11 higher educational institutions (universities, etc.).

Finance.—Budget estimates (in million roubles), 1948, 1,133; 1949, 1,307; 1950, 1,353; 1951, 1,530.

Production.—Lithuania used to be an agricultural country, but since 1940 has been considerably industrialized. Of the total population, 76·7% before 1940 was engaged in agriculture, 10% in commerce, industry and communications. The resources of the country consist of timber and agricultural produce. Of the total area, 49·1% is arable land, 22·2%

meadow and pasture land, 16·3% forests and 12·4% unproductive lands. In 1938 in the agricultural territory of Lithuania, 2,742,630 hectares (about 6,574,296 acres), there were produced (in metric tons) rye 623 729; wheat, 251,284; barley, 274,019; oats, 420,002; potatoes, 2,118,231; flax fibre, 25,784.

In 1946, 1,566,000 hectares were cultivated; chief crops are grain, of which the most important is rye, followed by oats, wheat and barley. Area under industrial crops, 93,000 hectares.

On 1 Jan., 1946, there were 344,900 horses, 617,700 cattle, 495,700 pigs, 361,600 sheep.

Forests cover 1,071,006 hectares (about 2,645,384 acres). 70% of the forests consist of needle-bearing trees, mostly pines, and the remainder of leaf-bearing trees.

Between 1940 and 1947, about 575,500 hectares (about 1,400,000 acres) were distributed among the landless and poor peasant farmers. In 1950, 113 machine-tractor stations and 295 machine- and horse-hiring stations served the farmers; there were over 6,500 kolkhozy and over 100 sovkhozy (state farms). By 1950, over 87% of all peasant farms had joined collective farms.

In 1946 there were 2,192 industrial establishments, with 60,000 workers. Industries are on a small scale. Output of industry in 1949 was 67% above that in 1940.

Length of railways (1948), 2,087 kilometres.

SOVIET CENTRAL ASIA.

Soviet Central Asia embraces the Kazakh Soviet Socialist Republic, the Uzbek Soviet Socialist Republic, the Turkmen Soviet Socialist Republic, the Tadzhik Soviet Socialist Republic and the Kirghiz Soviet Socialist Republic.

Turkestan (by which name part of this territory was then known) was conquered by the Russians in the 1860's. In 1866 Tashkent was occupied and in 1868 Samarkand, and subsequently further territory was conquered and united with Russian Turkestan. In the 1870's Bokhara was subjugated, the emir, by the agreement of 1873, recognizing the suzerainty of Russia. In the same year Khiva became a vassal state to Russia. Until 1917 Russian Central Asia was divided politically into the Khanate of Khiva, the Emirate of Bokhara and the Governor-Generalship of Turkestan.

In the summer of 1919 the authority of the Soviet Government became definitely established in these regions. The Khan of Khiva was deposed in February, 1920, and a People's Soviet Republic was set up, the medieval name of Khorezm being revived. In August, 1920, the Emir of Bokhara suffered the same fate, and a similar regime was set up in Bokhara. The former Governor-Generalship of Turkestan was formally constituted an Autonomous Soviet Socialist Republic within the R.S.F.S.R. on 11 April, 1921.

In the autumn, 1924, the Congresses of the Soviets of Turkestan, Bokhara and Khiva Republics decided to redistribute the territories of these republics on a national basis; at the same time Bokhara and Khiva became Socialist Republics. Later, as a result of the redistribution completed in May, 1925, the new states of Uzbekistan, Turkmenistan and Tadzhikistan and several autonomous regions were established. The remaining districts of Turkestan populated by Kazakhs were reunited to Kazakhstan.

KAZAKHSTAN.

(KAZAKH SOVIET SOCIALIST REPUBLIC.)

On 26 Aug., 1920, Uralsk, Turgai, Akmolinsk and Semipalatinsk, formed the Kazakh Soviet Socialist Republic within the R.S.F.S.R. It was made a constituent republic of the U.S.S.R. on 5 Dec., 1936. To this republic were added the parts of the former Governorship of Turkestan inhabited by a majority of Kazakhs. It consists of the following regions:—Akmolinsk, Aktyubinsk, Alma-Ata, Dzhambul, East Kazakhstan, Guryev, Karaganda, Kokchetav, Kustanai, Kzyl-Orda, North Kazakhstan, Pavlodar, Semipalatinsk, South Kazakhstan, Tubi-K[illegible], West Kazakhstan. Its constitution is similar to that of the other Union Soviet Socialist Republics. Its capital is Alma-Ata, formerly Verny; population (1939) 230,528.

It is bounded on the west by the Caspian Sea and the R.S.F.S.R., on the east by China, on the north by the R.S.F.S.R. and on the south by Uzbekistan and Kirghizia.

Area and Population.—The area of the republic is 2,754,000 square kilometres (1,072,797 square miles). It is next in size to the R.S.F.S.R., is far larger than all the other Central Asian Soviet Republics combined and stretches nearly 3,000 kilometres from west to east and over 1,500 kilometres from north to south. Population (1939) 6,145,937, of whom 1,706,150 live in urban areas. The Kazakhs form some 60% of the population and Russians and Ukrainians together about 35%. The two latter inhabit mainly the [illegible] areas along the northern border. Of the rest, most are Uzb[illegible] the extreme south. Up to 1917, large numbers of the Kazakhs were nomads occupied mainly in livestock-breeding.

Education.—Over 86% of the population is literate. In 1950 there were 1,200,000 children at 8,697 elementary and secondary schools. There are 89 technical colleges, medical institutes, schools for foreign languages, 23 higher educational institutions and 120 research institutes. In Nov., 1945, a Kazakh Academy of Sciences was founded. A meteorological station at Bepak-Dala (on the Hungry Steppe) was constructed in 1939–40.

Agriculture.—Some 35 to 40 million hectares of land in Kazakhstan, for the most part the central and western districts, form desert or semi-desert steppe-land; but in the north, south and east there is fertile agricultural land. As a result of extensive irrigation, however, part of the desert steppe has been brought under the plough.

By the end of 1940 the length of main and distributive irrigation canals was 1,321 kilometres, with 335 different hydrotechnical constructions. In 1940 a new Kirov irrigated agricultural district was organized in the Golodny (Hungry) Steppe, which gave a good yield of cotton. Subsequently many kolkhoz farms from other parts of the republic were resettled there.

An expedition of the Soviet Academy of Sciences after 2-years' study reported in Jan., 1944, that the soil of Kazakhstan was by no means

so sterile as had hitherto been assumed. In particular, the expedition explored the territory between the Sary-Su and Chu rivers. This area was formerly inhabited by nomads and stretches for over 1,000 kilometres from north to south, and is now famous for such centres of the coal and copper industries at Karaganda, Dzhezkazgan and Balkhash. The Agricultural Trust of Karaganda covers an area of nearly 5,000,000 acres in Central Kazakhstan. The irrigated area was, in 1945, 1,350,000 hectares (3,300,000 acres).

One of the largest dams in the U.S.S.R. and a hydro-electric station were being built in 1944 in the Syr Darya River in the Kzyl Orda region of Kazakhstan. The Kyzl Orda dam will store water for the irrigation of 100,000 acres of rice plantations. Subsequently the giant dam will make it possible to increase the irrigated area in the Kyzl Orda region to 375,000 acres. Work is proceeding on the Ust-Kamenogorsk hydro-electric station.

The total cultivated area in 1940 was 6,800,000 hectares, of which 5,512,000 hectares were under grain and 292,400 under industrial plants. The 'Ukrainka' winter wheat has been transformed into a spring wheat suitable for cultivation in Kazakhstan. This wheat gives excellent yields and withstands the dry steppe climate, the winds and many diseases. In 1939, the area under cotton was 105,000 hectares (about 260,000 acres). In 1940, 15,000 hectares were under sugar beet. In 1939, the produce of raw cotton was 1,123,000 double cwt.; of sugar beet, 4,200,000 double cwt.; of rice, 793,000 double cwt. Tobacco, rubber plants, and mustard are also cultivated. Kazakhstan has rich orchards and vineyards. On the collective farms of Central Asia large areas are being set aside for a crop new in the U.S.S.R.—kendyr (similar to hemp), which hitherto has only been found wild in Kazakhstan.

Kazakhstan is noted for its livestock, particularly its sheep, which account for about half the total, and from which excellent quality wool is obtained. The Akharomerino is a newly developed crossbreed of merino sheep and the wild Akhar mountain ram. Kazakhstan contains a great variety of medicinal plants and grasses.

Over 99% of all peasant farms have combined in over 6,700 kolkhozy and together with 254 sovkhozy they cultivate 6,400,000 hectares. Livestock, 15,372,000 heads (1942).

Industry.—Kazakhstan is extremely rich in mineral resources:—Coal and tungsten in Karaganda (in the centre), oil along the river Embe (in the west), copper, lead and zinc—Kazakhstan contains about one-half of the total deposits of these three metals contained in the U.S.S.R.—Iceland spar (in the south), nickel and chromium in the Kustenai and Semipalatinsk regions, molybdenum and other minerals. In 1943 big deposits of manganese were found in Eastern Kazakhstan; new coal seams were also discovered there. In South Kazakhstan new copper deposits and bauxite have been found. Some manganese-mines were set into operation in 1943. In 1946 a big iron-ore field was discovered in North-West Kazakhstan. Gold has also been found.

Industry has greatly developed. The annual coal output has now reached the 16·4 million tons planned for 1950. The Leninogorsk and Chimkent lead plants, the Balkhash, Irtysh and Karsakpai copper-smelting works and others supply the country with non-ferrous metals. A meat-packing plant has been built in Semipalatinsk, a fish cannery in Guryev, a chemical plant in Aktyubinsk and many other industrial enterprises elsewhere. The oil industry in Emba and Aktyubinsk yields high-quality aviation oil.

There are also a number of hydro-electrical stations; the regional

stations at Karaganda and Aktyubinsk were set into operation in 1944. In 1950, 87 rural power stations were set in operation. In all there are now 1,100 rural electric stations and others are under construction. In Jan., 1944, a tractor plant was established in Rubtsovsk (on the railway from Semipalatinsk to Barnaul) with machinery evacuated from the Kharkov tractor plant. A superphosphates factory was completed in 1944.

Railways and Roads.—A 430-kilometre railway line between the settlements of Mointi and Chu in Kazakhstan to complete the Transkazakh Trunk Line, connecting Petropavlovsk, Akmolinsk, Karaganda and Balkhash, was started in 1940. The new line links the Transkazakh Trunk Line with the Turkestan–Siberian Railway (906 miles long, completed in 1930) and shortens the run of trains carrying Karaganda coal to South Kazakhstan by more than 1,000 kilometres. Other lines in operation are Dzhambul–Chalaktan, Akmolinsk–Kartaly, Uralsk–Iletsk, Guriev–Kandagach. Total length (1942), 8,702 kilometres.

In 1940 a number of new roads were started with help of members of the kolkhozy. Among these is a road known as the eastern ring, 806 kilometres long, which passes across the most important agricultural and industrial areas of Semipalatinsk and the Eastern Kazakh regions and the Altai ore district, with its immense deposits of copper, lead and gold. The first section, 444 kilometres, was completed in 1940.

Finance.—The budget for 1949 balanced at 3,578 million roubles; 1950, 4,022 million roubles; 1951, revenue, 4,191, expenditure, 4,187 million roubles.

Graziosi (J.) and others, The Kazakhs under Changing Russian Regimes. Washington, 1951.

TURKMENISTAN.

(Turkmen Soviet Socialist Republic.)

The Turkmen Soviet Socialist Republic was formed on 27 October, 1924, and covers the territory of the former Trans-Caspian Region of Turkestan, the Charjui vilayet of Bokhara, and a part of Khiva situated on the right bank of the Oxus. In May, 1925, the Turkmen Republic entered the Soviet Union as one of its constituent republics. It is bounded on the north by the Autonomous Kara-Kalpak Republic, a constituent of Uzbekistan, by Persia and Afghanistan on the south, by the Uzbek Republic on the east and the Caspian Sea on the west.

Area and Population.—The principal Turkmen tribes are the Tekkés of Merv, and the Tekkés of the Attok, the Ersaris, Yomuds and Goklans. All speak closely related varieties of a Turkoman language (of the south-western group of Turkish), and they are Sunni Mohammedans. The country passed under Russian control in 1881, after the fall of the Turkoman stronghold of Gok-Tépé. About 75% of the population are Turkmenians, most of whom were nomads before the First World War. The rest are Russians and Armenians living mostly in urban areas, and Uzbeks, Tadzhiks and Kara-Kalpaks in the rural areas.

The area of Turkmenistan is 484,800 square kilometres (189,370 square miles), and its population on 17 Jan., 1939, was 1,252,000.

The country comprises the following regions:—Ashkhabad, Chardzhou, Marysk, Tashauz.

The capital is Ashkhabad (Poltoratsk), population 17 January, 1939, 126,580; other large towns are Merv, Leninsk, Kerki, Tashauz, Krasnovodsk.

Education.—In 1949, the public educational system comprised 1,230 primary and secondary schools with 200,000 pupils and 18,000 teachers. There are 7 higher educational institutions, 39 technical schools and 11 music and art schools. Some 40 research institutes employing over 500 scientists were administered by the Turkmenian branch of the Academy of Sciences of the U.S.S.R., which on 2 March, 1951, was raised to the status of a Turkmenian Academy of Sciences.

Agriculture.—The main occupation of the people is agriculture, based on irrigation. Turkmenistan produces cotton, wool, Astrakan fur, etc. It is also famous for its carpets, and produces a certain special breed of Turkoman horses and the famous Karakul sheep.

In 1940, 98·3% of the peasant farms had joined the collective farms. The sovkhozy and kolkhozy together tilled 99·8% of the cultivated area. There were 54 machine-tractor stations and 26 sovkhozy.

A considerable area is under Egyptian cotton and from it has been evolved an original Soviet long-fibred cotton.

In 1945, the total area under cultivation was 353,000 hectares, of which 110,000 hectares were under cotton. The main grain grown is wheat. Sericulture, fruit and vegetable growing are also important. There is also fishing in the Caspian.

In 1940 the building of a number of hydro-technical constructions was started to supply water to the Kara Kum desert which covers about 350,000 square kilometres of Turkmenistan, the waters from the Amu-Darya River being utilized. Geological researches have revealed extensive zones of subterranean waters in the Kara Kum desert, and wells and water reservoirs have been and are being constructed. Subterranean water is also used to supply the water-works of Krasnovodsk on the Caspian.

Livestock in 1942:—Cattle, 260,000; pigs, 24,000; sheep and goats, 2,810,000; camels, 75,000.

Industry.—Turkmenistan is rich in minerals, such as ozocerite, oil, coal, sulphur and salt. Turkmenistan is being industrialized, and there are now chemical, tailoring, textile, light, food, oil refineries, agricultural implements, cement and other undertakings, as well as ore-mining.

In the Kara Kum desert deposits of magnesium, minerals and coal were discovered, as well as some 50 new salt-mines. Here a new oil town, Nebit-Dag, has sprung up. On the Kara-Bogaz gulf a sulphate industry has been developed.

In 1945, there were 410 large scale and 2,287 small scale industrial enterprises. Of the industrial workers in 1941, heavy industry employed 34·5%; light, 46·9%, and food, 18·6%.

Transport.—Length of motor roads, 10,000 kilometres. Motor communication exists between Ashkhabad and Meshhed (Persia). An airline runs between Leninsk and Tashauz.

Length of railways, 1,740 kilometres. Passenger traffic was opened on the first section of the Chardzhou-Kungrad Railway in Nov., 1948. This line crosses the Chardzhou and Tashauz regions of Turkmenia and runs across Uzbekistan.

Finance.—Budget estimates (in million roubles), 1948, 788; 1949, 1,222; 1950, 1,085; 1951, 989.

UZBEKISTAN.

(Uzbek Soviet Socialist Republic.)

The Uzbek Soviet Socialist Republic was formed on 5 Dec., 1924, from lands formerly included in Turkestan, Bokhara and Khorezm. It includes a large part of the Samarkand region, the southern part of the Syr Darya, Western F[illegible] the Western Plains of Bokhara, the Kara-Kalpak A.S.S.R., an[illegible] regions of Khorezm. In May, 1925, Uzbekistan, by the decision of the Congress of Soviets of the U.S.S.R., was accepted as one of the constituent republics in the Soviet Union.

Uzbekistan is bordered on the north by the Kazakh Soviet Socialist Republic, on the east by the Kirghiz Soviet Socialist Republic and the Tadzhik Soviet Socialist Republic, on the south by Afghanistan and on the west by the Turkmen Soviet Socialist Republic.

Area and Population.—The Uzbeks, who form the majority of the population over the area of the old states of Khiva and Bokhara, and the provinces of Samarkand and Ferghana, were the ruling race in Central Asia, until the arrival of the Russians during the third quarter of the 19th century. The several native states over which Uzbek dynasties formerly ruled were founded in the 15th century upon the ruins of Tamerlane's empire. The Uzbeks speak Jagatai Turkish, which is clearly related to Osmanli and Azerbaijan Turkish, and are Sunni Mohammedans.

The area of Uzbekistan is 407,500 square kilometres (159,170 square miles). The population on 17 Jan., 1939, was 6,282,450, of whom 1,445,064 lived in towns. The country comprises the following regions :—Andizhan, Bokhara, Ferghana, Kashka Darya, Khorezm, Namangan, Samarkand, Surkhan-Darya, Tashkent and the Autonomous Soviet Socialist Republic of Kara-Kalpak. The capital of the republic is Tashkent (population 17 Jan., 1939, 585,005); other important cities are Bokhara, Khiva, Andijan, Kokand, Namangan, Samarkand.

Education.—In 1949 there were 4,500 elementary and secondary schools with 1,068,000 pupils, 34 higher educational establishments and 92 technical schools with a total of 45,000 students. Uzbekistan has an Academy of Sciences and 46 research institutes. There are universities and medical schools in Tashkent and Samarkand. In 1950, there were 4,348 medical institutions and 138 anti-malarial stations, 265 mother and infant welfare centres, 350 maternity homes, 21 children's hospitals and 29 children's sanatoria.

Agriculture.—Uzbekistan is a land of intensive farming, based on artificial irrigation. In 1937 Uzbekistan had more irrigated land than Turkmenistan, Tadzhikistan and Kirghizia combined. It is the chief [illegible] in the U.S.S.R. The irrigated area increased during [illegible] hectares (over 600,000 acres). In 1939 the Ferghan Canal (270 kilometres) was built.

During 1940, among the irrigation canals completed were : the Mikoyan North Ferghan Canal (165 kilometres), the Andreev South Ferghan Canal (108 kilometres) and the first section of the Molotov Tashkent Canal (63 kilometres). The [illegible] largest water reservoir in the U.S.S.R.—the Gissa[illegible] works were started. The Golodny Steppe is being brought into cultivation in both the Uzbekistan and Kazakhstan Republics.

Agriculture flourishes, particularly in the well watered, warm, rich oases areas, such as the Ferghana valley, Zeravshan, Tashkent and Khoresm,

where cotton, fruit, silk and rice are cultivated. In the higher lying plains grain is grown; the wide desert and semi-desert area of Western Uzbekistan is mainly given to pasture land and the breeding of the Karakal sheep. Orchards occupy some 35,000 hectares and grapes about 25,000 hectares. The Central Asian Branch of the Scientific Research Institute of Viticulture and Wine Production in Tashkent has produced new types of frost-resistant grapes by crossing the wild Amur grape with Central Asian and European types. More than 200 machine-tractor stations serve 93% of the total sown area of the collective farms.

Uzbekistan provides 60% of the total cotton, 50% of the total rice and 60% of the total lucerne grown in the U.S.S.R. One new sort of rice ripens within 80–90 days instead of 135–40 (the average time for Uzbekistan) and yields two crops annually.

The cotton harvests in Uzbekistan are rather uneven. The area under cotton was, in 1940, 875,000 hectares. In 1939 the output of raw cotton was 1,600,000 tons. A new variety of cotton plant was evolved in 1950 with an average weight of boll of 6·5–7 grammes; the cotton fibre content is 7% higher than in the more widespread varieties. The shape of this variety makes it possible to grow up to 200,000 plants per hectare instead of the usual 75,000–90,000. In 1941 the silk produced was 10,874 tons.

In 1948, scientists of the Central Asian Experimental Station of the US.S.R. Institute of Plant Industry produced five new varieties of jute, which are said to thrive on the salty and dry climate of Central Asia.

Afforestation over an area of 125,000 acres has been carried out to protect the Bokhara and Karakul oases from the advancing Kzyl-Kum sands and to stop the sand-drifts in a number of districts of Central Ferghana. In 1949, 44,500 acres of the Kzyl-Kum desert were afforested by means of sowing from aeroplanes.

Fish abound in the mouth of the Amu-Darya.

Industry.—Of its mineral resources, in addition to oil and coal, copper and building materials and ozocerite deposits are now also exploited. New coal deposits amounting to tens of millions of tons were discovered in 1944 and 1947 in the Central Asiatic Republics, especially near Tashkent.

Industry consists of cotton spinning, silk manufacture, oil and coal-mining. About 700 factories and mills have been constructed under the 5-year plans. They include a factory of agricultural machinery (in Tashkent), a cement factory, a sulphur-mine, an oxygen factory, a paper mill, a leather factory, textile mills, clothing factories, iron and steel works, the Chirchik electrochemical plant, a superphosphate plant in Kokand and oil refineries.

During the war the construction of 10 hydro-electrical stations was started on the river Chirchik, 6 of which were in full operation in 1947. The Farkhad power and irrigation plant on the Syr Darya River was begun in 1943 and put into operation in Feb., 1948. The collective farms constructed 28 rural hydro-electric stations in 1950.

Finance.—Budget estimates (in million roubles), 1948, 3,152; 1949, 3,190; 1950, 3,182; 1951, 3,362.

Railways and Roads.—The total length of railway in 1937 was 1,900 kilometres, of which 734 kilometres (455 miles) form that part of the line which connects Central Asia with Russia. From this main line branches lead to Karshe-Kitab, Kerki-Termez, Jalalabad, Namanchan, Andijan and other centres. In 1947, a new line was begun from Chardzhou to Kungard. The Great Uzbek Highway was completed in April, 1941. On the territory

of the republic there are 113 postal-telegraph institutions, an airline which serves all of Central Asia, and this airline is most developed in Uzbekistan.

TADZHIKISTAN.

(TADZHIK SOVIET SOCIALIST REPUBLIC.)

The Tadzhik Soviet Socialist Republic was formed from the former regions of Bokhara and Turkestan where the population consisted mainly of Tadzhiks. It was admitted as a constituent republic of the Soviet Union on 5 Dec., 1929.

Tadzhikistan is situated between 39° 40 and 36° 40 N. latitude and 67° 20 and 75° E. longitude, north of the Oxus. On the west and north it is bordered by Uzbekistan and by the Kirghiz Soviet Socialist Republic; on the east by Chinese Turkestan and on the south by Afghanistan. It consists of the following regions: Garm, Kulyab, Leninabad, Stalinabad, and includes the Gorno Badakshan Autonomous Region. Its highest mountains are Stalin Peak (7,495 metres) and Lenin Peak (7,127 metres). Even the lowest valleys in the Pamirs are not below 3,500 metres above sea level. The huge mountain glaciers are the source of many rapid rivers—the tributaries of the Amu-Darya which flows from east to west along the southern border of Tadzhikistan.

Area and Population.—About three-quarters of the population are Tadzhiks. They speak an Iranian dialect, little different from Persian, and they are considered to be the descendants of the original Aryan population of Turkestan. Unlike the Persians, the Tadzhiks are mostly Sunnis. Of the rest, most are Uzbeks living in the north-west of the republic. In the Western Pamirs there are small Iranian tribes closely related to the Tadzhiks and in the Eastern Pamirs there are nomadic Kirghizians.

The area of the territory is 142,600 square kilometres (55,700 square miles), and the population on 17 Jan., 1939, was 1,485,090. The capital is Stalinabad (formerly Dushambe), with a population in 1939 of 82,500.

Education.—In 1947, there were 312,000 pupils in about 3,000 primary and secondary schools. There were 7 higher educational institutions, 27 technical colleges, 6 scientific research institutes and a Tadzhik state university. In 1950, an Academy of Sciences was established. In 1940, a new alphabet based on Russian was introduced in the schools. Sixty-four newspapers have a total circulation of 270,000. There are 120 hospitals and clinics.

Agriculture.—The occupations of the population are mainly farming, horticulture and cattle-breeding. In 1939, 288,600 hectares (about 720,000 acres) of land were irrigated. Area under crops (1942), 1,000,000 hectares, of which 668,000 hectares were under grain and 110,000 under cotton. The Vakhsha valley is the chief cotton area.

The big Gissar irrigation canal irrigates about 38,000 hectares in Tadzhikistan and Uzbekistan. The northern part (80 kilometres) of the big Ferghan canal (270 kilometres) runs through Tadzhikistan, irrigating some 40,000 hectares. Total irrigated area in 1946, 320,000 hectares (about 770,000 acres).

Tadzhikistan also raises grain, a variety of fruit, including apricots, figs, olives, pomegranates, a local variety of lemons and oranges, and in the south, sugar cane has been grown. In the Tadzhik state farms, 200 tons of sugar cane per hectare have been obtained, giving a minimum of

2,000 litres of rum; this is claimed to be 2½ times that obtained on American plantations. Even on the highest mountain plateaux of the Pamirs, the roof of the world, the biological station of Tadzhikistan (3,860 metres above sea level) has succeeded in raising crops of 60 varieties of barley, 10 varieties of oats, 4 of wheat, as well as vegetables. Eucalyptus and geranium are grown for the perfumery industry.

Tadzhikistan contains rich pasture lands, and cattle breeding is a very important branch of its agriculture. In 1942, there were 560,000 cattle, 2,186,000 sheep and goats, 21,000 pigs.

The Gissar sheep is famous for its meat and fat, and the Karakul sheep is widely bred for its wool in the South. In 1945, there were 207,000 heads of Karakul.

Industry.—During the last 20 years the original small-scale handicraft industries have been replaced by big industrial enterprises, including mining, food, textile, silk, heavy, light and local industries and electrical stations.

In 1940, industrial output was 300 times that in 1914, 6 times that in 1933 and 66·5% above that in 1937. The mountainous regions contain ores, fuel and other minerals. There are rich deposits of brown coal, lead, zinc and oil (in the north of the republic), rare elements, such as uranium, radium, arsenic and bismuth. Asbestos, mica, corundum and emery, lapis lazuli, potassium salts, sulphur and other minerals have been found in other parts of the republic. Of 270 known deposits, 60 are being exploited.

There are 80 big electrical stations; after the war 2 new hydro-electric plants were built.

Communications.—At the end of 1933 Tadzhikistan had 12,000 kilometres of roads suitable for vehicular traffic, out of which 4,800 kilometres were automobile roads; a number of big motor roads have been built, such as the Osh–Khorog of 700 kilometres, Yausi–Bazar–Charm of 107 kilometres and others. A motor road, 557 metres long, was completed in 1940 between Stalinabad and Khorog in the Pamirs. A railway line between Termez and Stalinabad (about 200 kilometres—124 miles) connects the republic with the railway system of the U.S.S.R. The mountainous nature of the republic makes ordinary railway construction difficult; accordingly a number of narrow-gauge railways have been constructed (Kurgan–Tiube–Piandzh; Stalinabad–Kurgan–Tiube connecting Stalinabad with the Vakhsh valley).

A steamship line on the Oxus runs between Termez Saraya and Jilikulam on the river Vakhsh. Stalinabad is connected by an airline with Termez, Kagan, Khorog and Leninabad.

Finance.—Budget estimates (in million roubles), 1948, 906; 1949, 899; 1950, 1,048; 1951, revenue, 1,050; expenditure, 1,022.

KIRGHIZIA.

(KYRGHYZ SOVYETSKAYA SOTSIALISTICHESKAYA RESPUBLIK.)

After the establishment of the Soviet regime in Russia, Kirghizia was part of Soviet Turkestan which itself became an Autonomous Soviet Socialist Republic within the R.S.F.S.R., in April, 1921. In 1924, when Central Asia was reorganized territorially on a national basis, Kirghizia was separated from Turkestan and formed into an autonomous region within

the R.S.F.S.R. On 1 Feb., 1926, the Government of the R.S.F.S.R. transformed Kirghizia into an Autonomous Soviet Socialist Republic within the R.S.F.S.R., and finally at the Eighth All-Union Extraordinary Soviet Congress, Dec., 1936, which adopted the Stalin Constitution, Kirghizia was proclaimed one of the constituent Soviet Socialist Republics of the U.S.S.R.

Area and Population.—The territory of Kirghizia covers 196,900 square kilometres (76,900 square miles), and its population on 7 Jan., 1939, was 1,459,301, of whom 1,188,714 lived in rural areas. The republic comprises the following regions:—Dzhalal-Abad, Frunze, Issyk-Kul, Osh, Talas, Tian-Shan. Its capital is Frunze (formerly Pishpek); population, 1939, 92,659. Kirghizia is situated on the Tian-Shan mountains. It is bordered on the east by China, on the west by Kazakhstan and Uzbekistan, on the north by Kazakhstan and in the south by Tadzhikistan. The Kirghizians are of Tiurk origin and form two-thirds of the population of the republic, the rest are made up of Russians, Ukrainians, Uzbeks and others.

Education.—Kirghizia has 1,645 elementary and secondary schools, with 328,700 pupils. In Sept., 1940, a new alphabet based on Russian was introduced in the Kirghiz schools. In the towns school attendance is compulsory for 10 years and in the villages for 7 years. There are some 10,000 teachers. There are also 6 higher educational institutions, 34 technical and teachers' training colleges, as well as music and art schools. The Kirghizian section of the Academy of Sciences of the U.S.S.R. was opened in 1943. In 1946, it had 23 research institutes.

Agriculture.—Kirghizia is mainly famed for its livestock-breeding, of which it forms an important base in the Eastern U.S.S.R. There are excellent pasture lands on the mountains and in 1941 there were some 3,000,000 sheep, goats, horses and cattle. The Kirghizian horse is famed for its endurance, but it is of small stature. This has been rectified in recent years by crossing the original Kirghiz horse with Don, Arab and other breeds.

In 1945 there were 1,787 kolkhozy covering 181,000 farms, 66 machine-tractor stations and 42 sovkhozy. In 1941, 99·9% of all peasant farms in Kirghizia had joined kolkhozy. Area under crops (1942), 1,225,000 hectares.

Kirghizia raises wheat sufficient for its own use and other grains and fodder, particularly lucerne; also sugar beet, hemp, tobacco, medical plants and rice. Sericulture, orchards, vineries, vegetables and apiary are also important branches of Kirghiz agriculture. Agriculture is highly mechanized; over two-thirds of the area under crops is worked by tractors. In 1940, about 752,000 hectares were irrigated. The construction of a large new canal in the western Tien-Shan ranges of Central Asia was started in 1946.

Recently over an area of 172,000 hectares covered with wild fruit and nut trees, 10 different kinds of wild rose-bushes, rich in Vitamin 'C,' have been discovered.

Industry.—A geological survey has indicated some 1,200 localities in Kirghizia containing rare and non-ferrous metals, coal, oil, building materials and other mineral resources. Gold, silver, tungsten, lead, mercury, antimony and arsenic are already being produced. Kirghizia contains about 5,000 industrial enterprises, including sugar refineries, tanneries, cotton and wool-cleansing works, flour mills, a tobacco factory, food, timber,

textile, metal working, oil and mining enterprises. The output of coal in 1940 was 1,383,000 tons.

Industrial production now accounts for some 70% of the total production in the republic. A champagne factory was erected at Frunze in 1949, with a capacity of 250,000 litres monthly.

In 1944 the construction of 6 large power stations was started.

Railways and Roads.—The railways run only to the valleys; total length, 219 kilometres. The extension of the railway Frunze–Kant–Bystrovka to Rybachi on Lake Issyk-Kul is proceeding. The total length of good motor roads in 1939 was over 2,200 kilometres. Total length of motor roads in 1947, was 10,306 kilometres.

Finance.—Budget estimates (in million roubles), 1948, 889; 1949, 960; 1950, 1,048; 1951, 1,076.

URUGUAY.

(República Oriental del Uruguay.)

Constitution and Government.

The Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence 25 Aug., 1825, which was recognized by the treaty between Argentina, Brazil and Uruguay, signed at Rio de Janeiro 27 Aug., 1828. The first constitution was adopted 18 July, 1830.

Under a constitution adopted in 1934, the system of a dual executive was abolished, and the executive power was thereafter discharged by the President of the Republic, assisted for many years by a Council of Ministers composed of 9 members, 6 from the party polling the largest number of votes and 3 from the second largest party (frequently the Opposition party). This was found unworkable and was abolished by an amendment in 1942 which provided for direct election of the President and his appointment of his own cabinet. The President was elected for a term of 4 years.

The constitution of 1919 separated Church and State, and introduced universal and compulsory male suffrage for all over 18 years of age who are able to read and write. In 1934 the new constitution granted votes to women. Several women have been elected to Parliament. In 1946 a law was passed establishing full legal equality between men and women. Voting is secret, and the principle of proportional representation operates. Foreigners may become naturalized without losing their former citizenship.

Parliament now consists of two Houses, the Senate, whose 30 members are elected at large for 4 years, and the Chamber of Representatives of 99

members, elected from districts for 4 years. The 30 seats in the Senate are divided equally between the two political parties obtaining the highest number of votes, providing that the two together poll an absolute majority in presidential elections; failing this, proportional representation is granted. Electorate, 1950, numbered 1,177,000; women constitute 42%.

The following is a list of the presidents since 1903:—

José Batlle y Ordoñez, 1 March, 1903-07.
Dr. Claudio Williman, 1 March, 1907-11.
José Batlle y Ordoñez, 1 March, 1911-15.
Dr. Feliciano Viera, 1 March, 1915-19.
Dr. Baltasar Brum, 1 March, 1919-23.
José Serrato, 1 March, 1923-27.
Dr. Juan Campisteguy, 1 March, 1927-31.
Dr. Gabriel Terra, 1 March, 1931-38.
Gen. Alfredo Baldomir, 27 March, 1938-43.
Juan José de Amézaga, 1 March, 1943-47.
Dr. Tomas Berreta, 1 March-2 Aug., 1947.
Luis Batlle Berres, 2 Aug., 1947 March, 1951.

President of the Republic.—Dr. Andres Martinez Trueba, leader of the Colorado (Liberal) party, elected 26 Nov., 1950; election confirmed 11 Feb., 1951; assumed office 1 March for 4 years.

Vice-President.—Alfeo Brum (elected 26 Nov., 1950).

The Colorado party, which has been continuously in power for 85 years, now has a strong bias towards 'stateism' and social welfare legislation. Most banking and all forms of insurance are government monopolies, as are also the railways and all the public utilities except one company in Montevideo. The government controls cement, fuel, petroleum and alcohol, including the manufacture of caña, a cheap rum-like drink which is the national beverage. It manages the ballet and the symphony orchestra. Montevideo owns most of its big hotels.

National flag: four blue and five white horizontal bars; in the upper corner, nearest the flagstaff, a rising sun on a white ground

National anthem: Orientales, la patria ó la tumba (words and tune by Juan Coppetti).

Area and Population.

The area is 186,926 square kilometres, or 72,172 square miles. The following table shows the area and the estimated population of the 19 departments (capitals in brackets) on 1 July, 1947:—

Departments	Area, square km.	Population 1 July, 1947	Pop. per square km.
Artigas (Artigas)	11,378	57,854	5·08
Canelones (Canelones)	4,752	202,872	42·67
Cerro-Largo (Melo)	14,929	99,123	6·63
Colonia (Colonia)	5,682	132,554	23·32
Durazno (Durazno)	14,315	97,140	6·70
Flores (Trinidad)	4,519	36,766	8·13
Florida (Florida)	12,107	107,872	8·90
Lavalleja (Minas)	12,485	117,328	9·39
Maldonado (Maldonado)	4,111	68,070	16·55
[illegible]	664	551,240	830·18
[illegible]	13,252	86,390	6·51
Rio Negro (Fray Bentos)	8,471	48,814	5·76
Rivera (Rivera)	9,829	77,407	7·87
Rocha (Rocha)	11,089	84,206	7·59
Salto (Salto)	12,603	102,987	8·17
San José (San José)	6,963	98,627	14·16
Soriano (Mercedes)	3,223	95,527	10·35
Tacuarembó (Tacuarembó)	21,015	108,346	5·15
Treinta y Tres (Treinta y Tres)	9,539	70,343	7·37
Total	186,926	2,318,320	12·40

Estimated population, 30 June, 1949, 2,353,000. A census is planned for 1951 or 1952.

The last census was taken in 1908, when the total population numbered 1,042,686, divided into 861,464 native-born and 181,222 immigrants.

The population of Montevideo City (the capital) on 31 July, 1949, was estimated at 784,000. Other cities in 1937 had populations as follows:—Paysandu, 31,000; Salto, 30,000; Mercedes, 24,000.

Births, deaths and marriages for 3 years:—

Years	Live births	Still births	Marriages	Deaths	Surplus of living births over deaths
1940	42,893	1,298	14,344	20,695	22,198
1941	44,287	1,381	16,057	20,381	23,906
1942	42,670	1,365	15,287	20,646	22,024

Of the living births in 1942, 11,012 were illegitimate. Divorces in 1942, 803. Immigration 1942, 229,623; emigration, 234,337. Crude birth rate, 1944, 20·7 per 1,000 population; crude death rate, 8·9; crude marriage rate, 7·5; infant mortality rate, 65·7 per 1,000 live births (102·0 in 1935).

The language of the country is Spanish.

Religion and Education.

State and Church are separated, and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, 45,470 unspecified and 126,425 Liberals.

Primary education is obligatory; both primary and superior education are free. In 1948 there were 1,644 public schools with 194,072 enrolled pupils and 5,745 teachers. Rural schools had 52,815 pupils and 1,472 teachers. There are also 5,744 evening courses for adults. Private schools numbered 180 with 1,270 teachers and 32,448 students. Illiteracy is now confined largely to the older age groups in the rural areas.

The University of the Republic at Montevideo, inaugurated in 1849, had 1,197 students in 1937. There are 5 normal schools for males and females, and a college of arts and trades with about 10,000 students. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a school for the blind, 2 for the deaf and dumb and a school of domestic science.

Motion-picture theatres increased from 181 in 1940 to 194 in 1949, with seating capacity of 109,635; 92 are in Montevideo. In 1948 there were 31 daily newspapers with an aggregate daily circulation of 401,000.

Justice.

The Supreme Court of Justice consists of 5 judges elected by the two Chambers sitting as a National Assembly. The President is chosen annually by the members of the court from amongst themselves. This court has original jurisdiction in constitutional, international and admiralty cases, and hears appeals from the appellate courts, of which there are 3 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 7 for commercial cases, 2 for Government (*Juzgado de Hacienda*), as well as

criminal and correctional courts. Each departmental capital has a departmental court, and each of the 220 judicial sections into which the republic is divided has a justice of peace court; further, each section is divided into districts, in which deputy judges (*alcaldes*) try cases involving small amounts. In September, 1907, the death penalty was abolished, replaced by penal servitude for a period of 30 to 40 years.

Finance.

The receipts and expenditure are stated in gold pesos as follows (at the 1938 par, 7·60 gold pesos = £1, or 1 peso = 31§*d.*; 1 gold peso = $1·03 (U.S.):—

	Receipts	Expenditure		Receipts	Expenditure
1944	117,339,341	133,912,091	1947	192,561,458	190,106,719
1945	132,363,619	143,478,276	1948	232,475,619	231,546,924
1946	169,237,996	167,386,701	1949 [1]	204,500,000	205,000,000

[1] Budget estimate.

The 1949 budget was the first in 5 years. A press estimate puts the 1950 expenditures at 350 million pesos. There is no personal income tax.

Expenditures in 1948 included 2 blanket items, 'general services' which took 71,581,026 pesos and 'decentralised services,' [illegible] 32,983,599; national defence took 23,711,442; public health, 22,[illegible]; finance, 13,328,630; interior, 16,899,844; education, 10,319,292 pesos. Of revenue, direct taxation furnished 56,716,640 pesos; indirect taxation, 105,035,115, and state enterprises, 11,692,306 pesos.

Public debt outstanding on 31 Dec., 1950, was 873 million pesos (compared with 760 million pesos on 31 Dec., 1948), of which 756 million was internal and 117 million external. Government external bonds since 1930 have received a common interest rate of 3·5%. British capital invested in Uruguay amounted (nominally), on 31 Dec., 1949, to £26,624,198, a drop from the 1947 total of £43,567,620 due to the purchase of the Uruguayan railways; of the total outstanding only 2·5% was in default. The Bank of England's 1950 report puts the nominal capital of all British investments in Uruguay held by residents of the U.K. in 1948 as £22 million, almost unchanged from the £23 million in 1938; total income received in the U.K. was £400,000 in 1948, the same as in 1938. American holdings in Uruguayan dollar bonds, 1941, were $33,100,000, of which 5% were in default.

Defence.

The Uruguay Army is composed of the active Army and its reserves. The active Army is formed of volunteers, between the ages of 18 and 45, who contract for 1 year or 2 years service. There are 9 regiments of cavalry, 5 of artillery, 5 of infantry, 6 of pioneers, 1 of tank troops and the Air Force. The Army is equipped with modern material. There are about 200 aeroplanes.

The reserve is formed by elements who, for some reason or other, retire from the active Army, and by citizens who are trained every year in accordance with the law of compulsory military instruction. It is reckoned that about 120,000 men could be mobilized in case of war.

The fleet consists of the obsolete sloop *Uruguay*, 1,150 tons; the surveying

vessel *Miranda*, of 516 tons, built in Spain in 1930; the submarine chaser *Maldonado* of 280 tons; 3 patrol vessels of 180 tons, built in Italy in 1935; 2 training ships, and 4 tenders. Personnel, 171 officers and 1,300 ratings.

Production and Industry.

Uruguay is primarily a pastoral country, 60% (27,573,919 acres) of the total area being devoted to the stock-raising industry, 20% (10,002,126 acres) to mixed farms and ranches and only 7% (3,120,000 acres) to agriculture. The remaining 13% of the country's area is unproductive. Animals and animal products constitute 95% of the country's exports. Livestock census. 1946, showed 6,820,900 cattle, 19,559,000 sheep, 545,000 horses, 273,000 pigs and 17,000 goats.

The wool clip in 1942–45 averaged 65,306 metric tons and reached 79,480 metric tons in 1945–46, declining to 68,000 in 1949–50. Wool exports in the trade year ending 30 Sept., 1950, were 176,790 bales (153,237 bales in 1947–48), of which the United States took 119,000. Exports of sheepskins, 1949, were 15,601 metric tons; of cattle hides, 30,030 metric tons. Nutria skins are exported at the rate of 50,000 a year. Total meat exports, 1949, were 93,985 metric tons.

Agricultural products are raised chiefly in the departments of Canelones, Colonia, San José, Minas and Florida. The average farm is about 250 acres. In 1937, 17·6% of the farms were run by managers, 39·9% by tenant farmers and 42·5% by their proprietors. The principal crops and their yield (in metric tons) in the crop year 1950–51 (with figures for the preceding year in parentheses) were as follows:—Wheat, 381,554 (451,976); linseed, 99,349 (74,663); barley, 24,249 (26,995); oats, 67,725 (59,129). Uruguay is self-sufficient in rice with usually a small surplus for export; output 39,969 tons rough rice, 1950. Output of maize 1950–51, 89,270 metric tons.

Wine is produced chiefly in the departments of Montevideo Canelones, Salto, Colonia and Paysandú. Production, 1947–48, 65 million litres, about enough for domestic consumption. The country has some 6,000,000 fruit trees. Annual fruit crop, exclusive of grapes, about 153,000 tons, principally peaches, oranges and pears. Tobacco is cultivated (1,156,007 kilos in 1946) and beer manufactured (19,320,807 litres in 1944).

In the northern departments silver, copper, lead, manganese, gold, iron and lignite coal are found, but are not greatly worked. The supply of electricity for light, power and traction has been a state monopoly since 1897; in Jan., 1949, the state's first hydro-electric plant, at the site of the dam, Rincon del Bonete, on the Rio Negro, was completed, with an installed capacity of 128,000 kw. Power consumption in 1947 was 428,470,000 kwh.

In 1948 industries utilizing local raw materials (textile factories, tanneries, vegetable-oil refineries) employed a capital of 732 million pesos, 168,400 employees, and had a production valued at 913 million pesos. Textile equipment includes 115 mills with capital of 105 million pesos; there are 40,000 cotton spindles and 70,000 woollen spindles, 1,250 looms for woollen fabric and 1,000 looms for cotton and rayon goods.

A system of compulsory arbitration for industrial disputes in public services operating under concessions was established in July, 1947; strikes and lock-outs are declared illegal, strikers automatically forfeiting their jobs.

Trade unions number about 75,000 members; the largest organization is the Union General de Trabajadores whose secretary-general is a Communist deputy.

Commerce.

The foreign trade (officially stated in U.S. dollars, with the figure for imports based on the clearance permits granted and that for exports on export licences utilized) was as follows :—

	1944	1945	1946	1947	1948	1949
Imports .	72,446,471	114,759,000	166,992,000	231,324,000	201,458,000	181,718,000
Exports .	97,558,653	122,066,252	152,766,000	162,502,000	178,958,000	191,660,000

Of the imports in 1949, the United States furnished $39,517,000; Brazil, $19,686,000; Belgium, $13,550,000, and Great Britain, $42,605,000; of the exports, the United States took $50,305,000; Great Britain, $42,357,000; Germany, $20,544,000; Brazil, $13,741,000, and Belgium, $8,507,000.

Principal imports and exports (in $1,000, U.S.) :—

Imports	1948	1949	Exports	1948	1949
Raw materials . .	51,922	45,191	Meat and meat products	49,520	39,800
Fuel and lubricants .	16,362	18,861	Wool . . .	66,087	66,900
Foodstuffs . . .	13,553	20,312	Leather and hides .	21,975	28,000
Textiles . . .	10,328	13,955	Agricultural products .	38,483	44,530
Construction materials .	16,917	16,452	Extractive industries .	1,743	1,671
Machinery and accessories	29,109	28,216	Miscellaneous industries	5,562	9,874
Motor vehicles . .	22,385	14,648	Live animals . .	462	800
Total (including all other items) .	201,458	181,718	Total (including all other items) . .	178,958	191,660

Total trade between Uruguay and the U.K. for 5 years (Board of Trade returns) in £ sterling :—

	1938	1947	1948	1949	1950
Imports into U.K. . .	3,943,653	6,443,857	5,834,506	14,555,781	12,108,348
Exports from U.K. . .	2,187,202	4,064,784	5,738,168	10,453,665	13,739,741
Re-exports from U.K. . .	60,419	12,552	21,245	52,310	107,601

Shipping and Communications.

On 31 Dec., 1944, there were 307 vessels under the Uruguayan flag with a gross tonnage of 61,100.

The highways of Uruguay have a total length of 26,000 miles, of which about 3,[illegible] paved. Registered motor vehicles, 1 Jan., 1950, included 35,211 [illegible] cars, 19,650 trucks and 1,300 buses. River transport (about 7[illegible]) is also very extensive.

The 4 principal railway systems are the Central (Combined System, 984 miles), the Midland (320 miles), North-Western (113 miles), Northern (73 miles), all built by British capital amounting to £14,513,145, of which £12,943,341 was receiving no return in 1946. The Uruguayan Government agreed in 1947 to buy these railways for £7,150,000, assuming control as of 1 July, 1947. These have been nationalized. The East Coast Railway (78 miles) and 3 minor lines were already controlled by the state. The total railway system open for traffic is 1,800 miles of standard gauge.

The telegraph lines in operation have a total [illegible] miles; there were 176 offices in 1941. The telephone syste[illegible] (completely reorganized in 1934) is controlled by the state; small companies operate in the interior. Telephone instruments, 1950, numbered 84,100, of which 83.022 were state-owned; 73% were automatic. Wireless telephone communications are established with United States, Spain, France and Great Britain. Uruguay has 48 long-wave and 5 short-wave broadcasting stations. The state itself operates one of the most powerful stations in South America. Four cable companies connect Montevideo with the United States and Europe.

There are 1,277 post offices. Air-mail and passenger service connect Montevideo with all North and South America.

Carrasco is the most important airport in Uruguay. Four airlines—American, Argentinian, Brazilian and Uruguayan—ply to and from Uruguay. Pan American Airways links Montevideo with 19 other American capital cities.

Banking and Credit.

The Bank of the Republic (founded 1896), whose president and directors are appointed by the Government, has a paid-up capital of 60 million gold pesos. On 30 Sept., 1950, note circulation was 296,130,000 pesos; stock of gold [illegible]ly increased by the flight of Western capital into [illegible] 329,[illegible],000 pesos; silver, 11,518,000 pesos; deposits were [illegible] pesos. The gold stock, which stood at $68 million (U.S.) in Dec., 1939, had risen to $205 million in Aug., 1946, declined to $178 million in Nov., 1949, and risen to $217 million in Sept., 1950. Imports of gold, 1950, totalled $16·5 million. The note issue is normally more than covered by the gold stock alone, but the bank's 'reserve' includes, as well, the bank's capital, silver up to 13 million pesos and non-government rediscount paper.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of new insurance business of all kinds. The Bank re-insures much of its business in London. The post office savings bank reported 30 June, 1945, deposits of 52,893,998 pesos.

Of the 27 banks in Uruguay 2 are British: Bank of London and South American and Royal Bank of Canada.

Money, Weights and Measures.

Beginning 6 Oct. 1949, the peso has been kept at an average value of 1·90 pesos = $1 (U.S).

Save for a small issue of gold coins, weighing 8 grammes, 0·485 fine, issued in 1930 in commemoration of the centenary of the Uruguayan constitution, there is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, gold content of which was fixed, 12 Jan., 1938, at 0·585018 gramme, instead of, as previously, 0·70973 [illegible]. It is equal to 100 *centesimos*. Uruguay has joined the International Monetary Fund but has not yet (1951) been able to establish a defensible par value for the peso. The actual circulating medium consists of paper notes issued by the Bank of the Republic in denominations of 500, 100, 50, 10, 5, 1 pesos and 50 *centesimos*. Silver coins of 1 peso and 50 and 20 *centesimos* are in active circulation as are also copper coins of 10 *centesimos*; copper and copper–nickel coins of 5, 2 and 1 *centesimos* are also in circulation, but are less and less used.

Foreign exchange for imports and exports is controlled by the Bank

of the Republic, which since Feb., 1934, has maintained both official and free rates, but there is no control over the movement of capital.

Before the devaluation of sterling the Banco de la República bought sterling derived from 'staple exports' at 6·12 pesos; after devaluation it paid 4·25 pesos for comparable sterling. The rate in London in 1950 ranged between 5½ pesos and 6¾ pesos.

The metric system of weights and measures was adopted in 1862.

Diplomatic and Consular Representatives.

1. Of Uruguay in Great Britain (352–355 Abbey House, Victoria St., S.W.1).

Ambassador.—Dr. Enrique E. Buero (accredited 13 Sept., 1948).
Counsellor.—Gustavo A. Rey Alvarez.
First Secretary.—Julio Nestor Sosa.
Attaché.—Guy P. Nery.
Military and Air Attaché.—Col. Carmelo M. Bentancour.

There are consular representatives at London, Cardiff, Glasgow, Liverpool, Southampton and Swansea.

2. Of Great Britain in Uruguay.

Ambassador.—Douglas Frederick Howard, C.M.G., M.C. (appointed 4 Oct., 1949).
Secretaries.—D. H. T. Hildyard, D.F.C. (*Consular*); W. M. Wylie (*Labour*).
Commercial Secretary.—C. B. B. Heathcote-Smith.
Naval Attaché.—Capt. C. B. Alers-Hankey, D.S.C., R.N.
Military Attaché.—Brig. R. G. Fullerton.
Air Attaché.—Air Commodore W. E. Oulton, D.S.O., M.C.
Civil Air Attaché.—G. S. Hill.

There is a consul at Montevideo and a vice-consul at Maldonado.

VATICAN CITY.

(Stato della Città del Vaticano.)

For many centuries until Pius IX's reign, with some comparatively short breaks, the Popes bore temporal sway over a territory stretching across mid-Italy from sea to sea and [illegible] an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. In 1859–60 and 1870 the

Papal States were incorporated with the Italian Kingdom. Although, by an Italian law dated 13 May, 1871, there was guaranteed to His Holiness and his successors for ever, besides the use of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire, this allowance remained unclaimed and unpaid until 11 Feb., 1929, when a settlement of the 'Roman question' was arrived at by three treaties between the Italian Government and the Vatican. On that day there was signed (1) a Political Treaty, which [illegible] full and independent sovereignty of the Holy See in the city [illegible], (2) a Concordat, to regulate the condition of religion and of the Church in Italy; and (3) a Financial Convention, in accordance with which the Holy See received 750,000,000 lire in cash and 1,000,000,000 lire in Italian 5% state bonds. This sum was to be a definitive settlement of all the financial claims of the Holy See against Italy in consequence of the loss of its temporal power in 1870. The treaty and concordat were ratified on 7 June, 1929. The treaty has been embodied in the Constitution of the Italian Republic of 1947.

The Pope [illegible] sovereignty and has absolute legislative, executive and judicial powers. A Governor, directly and exclusively responsible to the Pope, exercises executive powers. The judicial power is delegated to a tribunal in first instance, to the *Sacra Romana Rota* in appeal and to the Supreme Tribunal of the *Segnatura*, which is the ultimate authority where there is an appeal.

In its diplomatic relations with foreign countries the Holy See is represented by the Secretariat of State. The Pope is, however, pledged to a perpetual neutrality in respect of political disputes between governments and to abstention from international congresses called to cope with them, unless his mediation is specifically requested by both parties to a dispute.

The principal method by which the Pope endeavours from time to time to exert influence on the course of political developments is the issue of 'encyclicals' or circular letters addressed to Catholic bishops throughout the world, laying down the principles by which Catholics should be guided with reference to the particular problem under discussion.

For the defence of the Church and its doctrines, and to further the practical application of these to the problems of the day, Pope Pius XI founded early in his reign the [illegible] known as 'Catholic Action': an organization of the Catholic [illegible] countries pledged to co-operate with the clergy in the furtherance of the above aims. Its control is under the local bishops.

The area of the Vatican City is 44 hectares (108·7 acres). It includes the Piazza di San Pietro (St. Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (opened Nov., 1932), postal facilities, coins and radio. The official journal is the *Acta Apostolicae Sedis*. Twelve buildings in and outside Rome enjoy extra-territorial rights. Among them are the Basilicas of St. John Lateran, St. Mary Major, St. Paul without the Walls, and the Pope's summer villa at Castel Gandolfo.

The latest census of the population of the Vatican City on 31 March, 1947, showed 940 inhabitants.

Supreme Pontiff.—**Pius XII (Eugenio Pacelli),** born at Rome, 2 March, 1876; Nuncio in Munich, 1917–25, and in Berlin, 1925–29; Cardinal, 1929; Papal Secretary of State, 1930–39; elected Supreme Pontiff, 2 March, 1939; coronation, 12 March, 1939.

Secretary of State.—Vacant.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds plus one of the votes in his favour he is declared elected.

From the accession of Benedict XIV, 249th in the usual list of Roman Pontiffs, to Pius XII, 262nd, the Popes (all Italian) have been as follows:—

Name and family of Pontiff	Year of election	Name and family of Pontiff	Year of election
Benedict XIV (*Lambertini*)	1740	Gregory XVI (*Cappellari*)	1831
Clement XIII (*Rezzonico*)	1758	Pius IX (*Mastai-Ferretti*)	1846
Clement XIV (*Ganganelli*)	1769	Leo XIII (*Pecci*)	1878
Pius VI (*Braschi*)	1775	Pius X (*Sarto*)	1903
Pius VII (*Chiaramonti*)	1800	Benedict XV (*della Chiesa*)	1914
Leo XII (*della Genga*)	1823	Pius XI (*Ratti*)	1922
Pius VIII (*Castiglioni*)	1829	Pius XII (*Pacelli*)	1939

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 [illegible] (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons.[1] In practice, however, while the total number of Cardinals is never allowed to exceed 70, the number of Cardinal-Priests frequently exceeds 50, while there are usually many vacancies among the Cardinal-Deacons.

Name	Office or dignity	Nationality	Year of birth	Year of creation
Cardinal-Bishops:—				
Eugène Tisserant	Secretary of the Congregation of the Oriental Church	French	1880	1936
Clemente Micara	Prefect of the Congregation of Sacred Rites, Vicar-General of Rome	Italian	1879	1946

Thomas Tien Ken-sin	Archbishop of Peking.	Chinese	1890	1946
Cardinal-Deacons :—				
Nicola Canali	Grand Penitentiary and President of the Commissions for the Property of the Holy See and for the Vatican City	Italian	1874	1935
Giovanni Mercati	Librarian and Archivist of the Holy Roman Church	Italian	1866	1936
Giuseppe Bruno	Prefect of the Congregation of the Council	Italian	1875	1946

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaconries. In 1586 their number was finally settled by Sixtus V at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor. They received the distinction of the red hat under Innocent IV, during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII, in 1630. The style of 'Excellency' as applied to Archbishops and Bishops in official correspondence is now universally adopted and approved by the Holy See.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now twelve Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities, the Basilica of St. Peter's, and for the Oriental Church. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc. The Pontifical Academy of Sciences was revived by Pius XI in 1936.

The states wherewith the Holy See maintains diplomatic relations are Austria, Belgium, Egypt, Finland, France, Germany, India, Indonesia, Irish Republic, Italy, Lebanon, Liberia, Monaco, Netherlands, Portugal, San Marino, Spain, Switzerland, the United Kingdom (1914) and Yugoslavia, together with most of the American republics, except Mexico; and the Sovereign Military Order of Malta. The President of the United States had a personal representative at the Holy See from 1934 to 1949, and Japan a special delegate from 1942 to 1945, both with ambassadorial status. The representatives of the former Chinese, Polish and Lithuanian governments remain accredited to the Holy See.

In Dec., 1930, the issue of Papal coinage was resumed, after a lapse of 60 years. In virtue of a special convention between the Vatican City and the Italian Government (to remain in force for 10 years), each state allows the currency of the other to circulate in its territory. The Vatican City has, however, given an undertaking that the total value of the bronze, nickel and silver coins issued by it in any year will not exceed 1,000,000 lire.

Within the British Empire the present number of Roman Catholic residential sees is 282, viz., 39 archbishoprics and 137 bishoprics, besides 75 apostolic vicariates (mostly held by bishops of titular sees) and 31 apostolic prefectures; in 1950, the Roman Catholic population subject to King George VI was estimated at 19,379,824, of whom 4,055,394 are in Europe; 4,410,167 in Asia; 4,041,213 in Africa; 5,124,356 in British America, and 1,658,699 in Australasia. In the United States (including possessions) there were in 1949, 26,718,343 Roman Catholics. Throughout the world the Roman Catholic population is estimated at 423 million souls.

Envoy and Minister to the Holy See.—Sir Walter Roberts, K.C.M.G., M.C. (appointed 21 March, 1951).
First Secretary.—J. S. Somers Cocks.

Apostolic Delegate [1] *for Great Britain, Malta and Gibraltar.*—Mgr. William Godfrey, Titular Archbishop of Cius (appointed 21 Nov., 1938).

VENEZUELA.

(Estados Unidos de Venezuela.)

Constitution and Government.

The Republic of Venezuela was formed in 1830 after amicable secession from the other members of the Republic of Colombia. The constitution in force is nominally that of 5 July, 1947, but see below; the first three were signed in 1811, 1908 and 1936.

The new constitution (1) recognized the 'rights' of private property

[1] An apostolic delegate is an ecclesiastical official sent by the Holy See to a particular country. He has no claim to diplomatic status or privileges. Papal representation in England was discontinued after the Reformation, the last Papal Legate being Cardinal Pole. There has not hitherto been an apostolic delegate in Great Britain, but for some time past such delegates have been appointed to Canada, Australia, South and East Africa and also in India.

but assigned to the State the role of planning and developing the national economy; (2) acknowledged the right of employers to form associations and to 'a fair return on capital,' but expressly forbade monopolies; (3) guaranteed protection to the individual's 'right' to education, employment and health services; (4) guaranteed to labour the right to paid holidays, pensions and a measure of profit-sharing; (5) empowered the President—subject to the approval of Congress—to order the arrest of suspected plotters against the regime; (6) subject to a plebiscite to be held 2 years later, the President was empowered to appoint the governors of the states.

Congress consists of two chambers, the Senate of 40 members, and the Chamber of Deputies of 160 members, elected for 4 years. Senators, 2 for each state, must be Venezuelans by birth and over 30 years of age. Deputies must be native Venezuelans over 21 years of age; there is 1 for every 40,000 inhabitants; a state with fewer than 35,000 of population has 1 deputy. By an amendment effective 5 May, 1945, deputies are elected by direct popular vote instead of by municipal councils as previously. The territories, on reaching the population fixed by law, also elect deputies. National suffrage is enjoyed by men and women 18 years of age or older. Illiterates (more than half the electorate) vote by means of coloured ballots.

The President is elected by direct universal suffrage, must be a Venezuelan by birth and over 30 years of age. He exercises executive power in conjunction with a Cabinet of Ministers. In 1945 he was granted power to veto legislation in whole or in part, a veto which can be overcome only by a two-thirds vote of both Houses. If he considers an Act to be unconstitutional, he can submit it directly to the Supreme Court for a decision within 10 days.

The following is a list of presidents since 1899 :—

	Took Office.
General Cipriano Castro	24 Oct., 1899 [1]
General Juan Vicente Gómez	19 Dec., 1908 [4]
Dr. Victorino Márquez Bustillos	3 May, 1915 [3]
General Juan Vicente Gómez	3 May, 1922
Dr. Juan Baustista Pérez	3 May, 1929
Dr. Pedro Irrago Chacín	24 June, 1931 [3]
General Juan Vicente Gómez	13 July, 1931 [5]
General Eleazar López Contreras	17 Dec., 1935
Dr. Arminio Borjas	19 April, 1936
General Eleazar López Contreras	25 April, 1936
General Isaías Medina Angarita	6 May, 1941 [1]
Rómulo Betancourt	20 Oct., 1945
Rómulo Gallegos	15 Feb., 1948 [1]
Lieut.-Col. Carlos Delgado Chalbaud	24 Nov., 1948 [6]
Dr Germán Suárez Flamerich	27 Nov., 1950

[1] Deposed. [2] Resigned. [3] Provisional.
[4] Re-elected for period 1915–22, but declined to take office, and as President-elect served as Commander-in-Chief, while his successor acted as Provisional President; he was dictator to the time of his death in Dec., 1935, naming nominal presidents but retaining complete power.
[5] Died 17 Dec., 1935.
[6] Assassinated 13 Nov., 1950.

Acting President.—Dr. G. Suárez Flamerich, lawyer and former Ambassador to Peru, was installed as Acting President by the Military Junta on 27 Nov., 1950, following the assassination on 13 Nov. of Lieut.-Col. Carlos Delgado Chalbaud, head of the Military Junta which had seized power on 24 Nov., 1948, overthrowing the Social-Democratic government headed by President Rómulo Gallegos. The Junta in Dec., 1950, adopted the style of 'the Government Junta.'

President Gallegos (born 1884, novelist, candidate of the 'moderately Socialist' Accion Democratica), was elected 14 Dec., 1947; assumed office on 15 Feb., 1948, to serve until 19 April, 1952. Polled 871,752 votes (73% of total 1,183,764); Conservative (Copei Party), 262,204; Communist, 36,514.

Accion Democratica carried both houses by large majorities, but was suppressed in Dec., 1948, following the *coup d'état* of 24 Nov.

The city of Caracas is the capital. The states are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective constitutions, and an elected governor. The states are divided into 151 districts and 629 municipalities. Each district has a municipal council, and each municipio a communal junta. The federal district and the territories are administered by the President of the Republic through governors.

National flag: yellow, blue, red (horizontal).
National anthem: Gloria al bravo pueblo (1811).

Area and Population.

Venezuela is officially considered to embrace 912,050 square kilometres, or 352,143 square miles; it has frontiers with Colombia, Brazil and British Guiana extending for 2,972 miles. Over half the population live in the valleys of Caracas and Valencia (the latter was once the capital). Bolívar, the largest state, has an area of 91,868 square miles; the other states are far smaller. The federal district embraces 745 square miles. The language of the country is Spanish.

A census of population, housing and agriculture was taken in Dec., 1950.

In April, 1941, Great Britain ceded to Venezuela the island of Patos, within 3 miles of the Venezuelan coast, and approximately 170 acres in area. The island has a military garrison.

The country is divided into a federal district, 20 states and 2 territories, with population according to the 1941 census as follows:—

State	Capital	Pop. census 1941	State	Capital	Pop. census 1941
Anzoátegui .	Barcelona	155,746	Portuguesa .	Guanare	87,151
Apure . .	San Fernando	70,560	Sucre . .	Cumaná	291,452
Aragua . .	Maracay	138,235	Táchira . .	San Cristóbal	245,722
Barinas . .	Barinas	62,959	Trujillo . .	Trujillo	264,270
Bolívar . .	Ciudad Bolívar	94,522	Yaracuy . .	San Felipe	127,030
Carabobo .	Valencia	191,442	Zulia . .	Maracaibo	345,667
Cojedes . .	San Carlos	49,769	Ter. Amazonas	Puerto Ayacucho	3,728
Falcón . .	Coro	232,644	Delta		
Guárico . .	San Juan	135,089	Ter. Amacuro	Tucupita	28,165
Lara . .	Barquisimeto	332,975	Federal Dist. .	Caracas	380,099
Mérida . .	Mérida	192,994	Federal Dependencies	—	852
Miranda . .	Los Teques	227,604			
Monagas .	Maturín	122,901			
Nueva Esparta	La Asunción	69,195		Total .	3,850,771

The 1941 census population of Caracas, the capital, was 269,030 (1949 estimate, 600,000), and of Maracaibo, 112,519. Important towns in Western Venezuela are Barquisimeto (sugar district) with 54,176 population and Maracay (centre of the civil service) with 32,992.

Estimated population in Dec., 1949, 4,643,715, excluding tribal Indians estimated in 1941 at 100,600.

Vital Statistics	Births	Marriages	Deaths
1945	154,489	17,671	64,183
1947	173,746	20,120	60,956
1948	183,590	21,700	59,934
1949	198,773	23,702	57,477

Crude birth rate, 1949, 43·3 per 1,000 population; crude death rate, 12·5; crude marriage rate, 5·2. Infantile mortality rate (1948), 97·8 per 1,000 live births. Death rate from malaria has fallen from 143 per 100,000 population in 1935 to 14·7 per 100,000 in 1949.

Religion and Education.

The Roman Catholic is the prevailing religion, but there is toleration of all others. There are 2 archbishops, 1 at Caracas, who is Primate of Venezuela, and 1 at Mérida. There are 8 suffragan bishops. In the primary schools religious instruction is given only to those children whose parents expressly request it.

Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1948–49, Venezuela had 5,805 public primary schools, with 12,286 teachers and a total enrolment of 485,668 pupils; there were 193 secondary or special schools, public and private, with 2,315 teachers and 28,176 pupils. For superior education there is the University of Los Andes at Mérida (866 students), the Central University in Caracas (300 years old) with 4,747 students, which was rebuilt and modernized in 1944, the University of Zulia at Marcaibo (840 students), and the Instituto Pedagogico (448 students). The 3 universities were granted autonomy on 28 Sept., 1946, and from 1% to 2% of the yearly national revenue has been assigned to them. A Workers' University in Caracas was set up by law of 9 Oct., 1947. The census of 1941 showed that 56·6% of those 10 years of age and older were unable to read and write; in 1950, 1,374 centres with 33,000 adult pupils were operating.

Motion-picture theatres increased from 174 in 1940 to 330 in 1949, with seating capacity of 230,000. In 1949, there were 29 daily newspapers with an estimated aggregate daily circulation of 300,000.

Justice.

The supreme tribunal is the 'Federal and Cassation Court,' whose 7 members are elected by Congress for 5 years, one for each of 7 groups of states into which the republic is divided for this purpose. They select their own President, Vice-President and Chancellor. The Federal Procurator-General is appointed for 5 years. There are lower federal courts.

The states have each a Supreme Court with 3 members called respectively President, Relator and Chancellor. Each state has also a superior court, or superior tribunal, courts of first instance, district courts and municipal courts. In the territories there are civil and military judges of first instance, and also judges in the municipios.

A provision in the constitution forbidding the entrance of communists and anarchists and authorizing their deportation, was deleted in 1945, but the Military Junta in May, 1950, outlawed the Communist party.

Finance.

The revenue and expenditure for 5 fiscal years ending 30 June, were as follows (at the official rate, 3·35 bolivars = $1, U.S., and 1 bolivar = 29·85 cents, U.S.) :—

	1946–47	1947–48	1948–49	1949–50	1950–51 [1]
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Revenue . .	1,099,520,000	1,562,050,000	1,963,271,000	1,889,100,000	1,632 000,000
Expenditure. .	1,065,292,000	1,437,810,000	1,945,991,000	1,981,600,000[2]	1,632,000,000

[1] Budget estimates. [2] Includes 123·9 million authorized in the previous fiscal year.

In the calendar year 1949, revenues were 1,979,622,800 bolivars, expenditures 1,955,074,000 bolivars.

Venezuelan practice is to treat proposed capital expenditures on such things as roads and other public works as ordinary expenditures, thus frequently leaving a nominal deficit when, in fact, there is a current surplus. In Dec., 1946, taxation of the oil and mining industries was stabilized at a flat rate of 2½% on profits plus a supplementary tax on a sliding scale up to 26% on profits exceeding 28 million bolivars, with minor reductions based on profits re-invested in Venezuela.

The following table shows (in thousands of bolivars) the principal items of the budget proposed for the fiscal year ending 30 June, 1948 :—

Revenue		Expenditure	
Import duties	141,000	Development	118,208
Petroleum and mines	400,200	Public Works	271,078
Cigarette tax	44,000	Agriculture	85,065
Liquor tax	52,000	Education	89,340
Stamp tax	31,426	Health and Social Welfare	86,403
Income tax	290,000	Defence	113,897
Total (incl. all others)	1,214,058	Total (all items)	1,214,058

On 30 June, 1930, as a token of homage to Simon Bolivar, the Liberator, the external debt of 23,757,634 bolivars was completely paid off. The internal debt was paid off in 1935, but re-established in 1943–44; it was 14·5 million on 30 June, 1950.

The income tax was established in 1942; it realized 139,360,000 bolivars in 1945–46. Under the constitution, 12% of the federal revenue is assigned to the states and territories from the appropriation of the Ministry of the Interior. A system of social insurance was authorized in 1940. British investments, 1949, had a par value of £11,882,017 (£26,372,176 in 1928), of which 90·9% were in default; the solvent portion (investments in oil), which in 1948 yielded 9·9%, has been paid off. American direct investments have risen from $232,538,000 in 1929 to $262,376,000 in 1940.

Defence.

In July, 1942, a law was passed whereby all Venezuelans, 18 years of age, must serve in the active forces, as follows:—Voluntary, 1 year; those chosen by drawing lots, 2 years, and those reluctant to enlist, 3 years, all then remaining in the reserve until the age of 45. The active Army, with an establishment of 10,000 men of all ranks, consists of 8 infantry brigades, corps of artillery, engineers, cavalry, aviation and other services.

Naval forces comprise 5 ex-Canadian corvettes (purchased 1945), 5 patrol launches, a new 1,400-ton tug, 2 auxiliaries, *Caribe* and *Estaban Rojas*, and a training ship. Service in the Navy is 2 years. There are 2 battalions of Marines. The following are under the Ministry of War and Marine :—Military school, naval school, school of military aviation, infantry school, school for non-commissioned officers and classes, school of classes and sailors of the Navy, school of military bands and school of civil aviation (Miguel Rodríguez).

The defence estimates for 1947–48 were 113,897,446 bolivars.

Production and Industry.

The surface of Venezuela is divided into 3 distinct zones—the agricultural, the pastoral and the forest zone. In the first are grown coffee,

cocoa, sugar cane, wheat (grown in the Andes), rice, tobacco, maize, cotton, beans, etc.; the second affords grazing for more than 4,000,000 cattle and numerous horses, and in the third, which covers a very large portion of the country, tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, divi-divi, copaiba, vanilla, growing wild, are worked by the inhabitants. Forest resources have been barely tapped; 600 species of wood have been identified. Gathering of wild rubber was resumed in 1942. The coffee plantations number 62,673, covering 543,400 acres with 135,000,000 bushes. Output, 1947, 44,448 metric tons (751,000 bags). Exports, 1947, 30,492 metric tons, of which 24,772 (83% of the total) went to the United States. Exports of cocoa (1949), 13,518 metric tons; 1948, 17,913 metric tons. The United States took 66% of the total. The Venezuelan cocoa is considered to be of high quality; it is grown at a height of 3,000 feet, chiefly in Trujillo and Merida and the coastal hills. Exports of coffee and cocoa are subsidized. There are 13,000 cocoa plantations and 18,000 sugar plantations. Production of sugar in 1948, 26,552 metric tons, and of cotton, 6,097 metric tons. A local fibre, *malva*, is being successfully used as a substitute for jute. Silkworm cultivation has begun on a small scale.

One-fifth of the population is engaged in [illegible]. The livestock in Venezuela is estimated as follows:—Oxen, [illegible], sheep, 107,803; goats, 1,364,678; horses, 194,033; mules, 43,042; asses, 191,134; pigs, 355,551. The Government has abolished the export monopoly which depressed the cattle industry for many years and is now improving the stock. Shipments of hides (1940) amounted to 2,714 metric tons.

Venezuela is the largest petroleum exporting country in the world and the second largest producer; production, which began in 1917 with 119,000 barrels, had risen by 1949 to 482,115,000 barrels and by 1950 (preliminary) to 546,000,000 barrels; exports of crude oil in 1949 amounted to 422,809,000 barrels (437,155,000 barrels in 1948); exports of derivatives, 36,664,870 barrels. In 1948 exports of petroleum furnished $675,162,000, U.S. in foreign exchange, 96·3% of the total received. In 1947 the profits of the oil companies, distributed abroad, were equal to $205,000,000, U.S., compared with $139,000,000 in 1946. The Central Bank estimated that the petroleum industry in 1949 obtained a profit equivalent to 27% of its investment, the same level as in 1948. Other industries secured an average profit of 13·52% in the Federal District and 19·62% in the rest of the country.

In 1946 the Netherlands West Indies took 230,822,345 barrels (for refining); the United States took 87,774,805 barrels of crude oil; other recipients (none taking more than 7 million barrels) were Britain, Canada, Argentina, Sweden and France. Powerful foreign oil groups own all the concessions; in the order in which they entered the field they are the Dutch-Shell group (1917), British Controlled Oilfields (1918), Standard Oil of Indiana (1922), Gulf Oil, Standard Oil of New Jersey (and several other American groups) and Anglo-Persian. A new petroleum law, approved in March, 1943, increased the country's revenue from the industry and provided for the eventual establishment of a refining industry with a minimum capacity of 237,000 barrels per day, compared with Mexico's 150,000 barrels. Venezuela will then be the second largest refiner among oil-exporting countries. In 1947, 3 large and 7 small refineries handled 36,804,595 barrels of crude oil. Chief oil regions are the Lake Maracaibo basin, covering 30,000 square miles (furnishing 70%), and eastern Venezuela. An official estimate of proved reserves, 1 Jan., 1947, put the total at 1,100 million tons.

There are important gold-mines in the region south-east of Cuidad Bolívar. Output 1949, amounted to 57,870 fine oz. compared with 49,730

fine oz. in 1948. Chief mine is Canadian-owned. Output of diamonds, 1948, was 75,513 carats; in 1949, 56,655 carats. Some copper ore has been produced. Phosphate rock deposits (yielding from 64 to 82% tricalcium phosphate) are found in the state of Falcón. Coal of poor quality is worked at Coro, in Falcón State, and at Naricual. Salt-mines are now worked by the Government; output, 1949, 71,000 tons. Iron, tin, magnesite (1,900 metric tons, 1948), asbestos (195 metric tons, 1949) and mica deposits are being exploited. The United States Steel Corporation has iron-ore reserves at Cerro Bolívar estimated at 500 million metric tons. The Bethlehem Steel Co. (U.S.) is exploiting some 60 million tons of iron-ore deposits (at El Pao in the state of Bolívar) with an average iron content of 63%; exports began early in 1951 on the completion of a 50-km. railway from the iron mines to the new port of Palua; target is annual exports of 2 million tons by 1953. A small plant utilizing scrap-iron is Venezuela's only steel plant, but plans for a modern steel mill are under way.

Round the island of Margarita and neighbouring islets off the north coast of Venezuela, pearl fishing is carried on; production, 1946, 1,784,857 carats.

Venezuela has few industries, most manufactured materials required being imported. [illegible] stry is the largest. There are cotton mills at Valencia, [illegible] and Cumaná, producing textiles in the cheaper qualities, 6 cement factories at Valencia, Barquisimeto, Caracas, Perlegalete, Maracaibo and San Cristobal (with aggregate output of 500,000 metric tons in 1950), and a glass factory at Maiquetia in the Federal District.

Electric power is inadequate (214,770 kw. in 1947), but is being expanded; by 1947 606 small towns had their own plants, using diesel engines temporarily while 7 large projects (1 hydro-electric) are, 1949, under construction.

The first trade unions were those of the workers in the oilfields (40,000 in all) formed after the death in 1935 of the 'Dictator,' General Gomez. Unions of agricultural workers were protected by the short-lived Social-Democratic government of 1948. A National Workers Confederation was formed in 1947, but suppressed in Feb., 1949.

Commerce.

The value of the imports into and exports from Venezuela for 5 years was (at the official rate, 1 bolivar = 29·85 cents, U.S.):—

	1939	1946	1947	1948	1949[1]
	Bolivars	Bolivars	Bolivars	Bolivars	Bolivars
Imports . .	326,393,499	987,155,774	1,872,184,958	2,300,000,000	2,241,000,000
Exports . .	953,337,086	1,449,110,671	2,168,330,070	3,740,000,000	3,251,000,000

[1] Provisional

Exports of oil and oil products in 1949 (as valued by the Petroleum Board) amounted to 3,259,010,199 bolivars; 3,340,351,870 bolivars in 1948. Exports of coffee declined from 71,213,718 bolivars to 52,254,144. Cocoa exports in 1949 amounted to 13,598,026 kilos as against 17,981,057 in 1948.

Of the 1947 exports, crude petroleum was valued at 1,888,361,130 bolivars; refined petrol, 110,654,748 bolivars, and the total, including all derivatives, was 2,053,649,000 bolivars (94%); coffee at 56,855,749 bolivars, cacao at 32,077,720 bolivars. Crude oil amounting to 91% of the total petroleum exports, now goes to the Netherlands islands of Aruba and

Curaçao for refining. Of the 1947 imports, 1,386,754,366 bolivars came from the U.S.A. and 107,086,227 bolivars from Great Britain.

Total trade between the United Kingdom and Venezuela (according to the Board of Trade returns) for 6 years (in £ sterling):—

	1938	1946	1947	1948	1949	1950
Imports from Venezuela .	1,359,399	4,592,001	4,861,257	2,978,654	6,303,186	16,150,939
Exports to Venezuela .	1,446,488	4,747,788	8,040,504	13,809,689	14,583,692	14,278,613
Re-exports to Venezuela .	14,114	4,124	25,969	40,021	88,450	129,292

Shipping and Communications.

Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government. In 1946, Venezuela joined with Colombia and Ecuador to form the 'Gran Colombia Merchant Navy'; of the capital of 35 million Colombian pesos, Venezuela and Colombia provided 45% each and Ecuador 10%. Sailings began in April, 1947. La Guaira, Maracaibo and Puerto Cabello are the chief ports. In 1949 the merchant fleet—1 steamer, several motor ships, 30 river launches, etc.—had an aggregate tonnage of 125,000. Vessels entering with cargo in 1946 had a net registered tonnage of 3,138,000, while those clearing with cargo had 35,151,000 tons.

There are 3,829 miles of road fit for traffic the year round. Motor vehicles, 1950, totalled 46,690 passenger cars and 49,350 commercial vehicles.

In Venezuela there are 11 main lines of railway (9 national and 2 British, with a total length (1946) of 634 miles. In addition, the oil companies have about 62 miles of railroads. The Great Railway of Venezuela, established by German capital, is 112 miles in extent, running between Caracas and Valencia; the Government took it over in 1943. The Bolívar Railway, 136 miles, the oldest line in the country, with a gauge of only 2 feet, runs from the port of Tucucas to Barquisimeto; it was purchased for £827,000 from its British owners in Oct., 1950. Similarly the La Guaira and Caracas railway was bought for £1,011,000. Completion in 1942 of the 35-mile El Palito–Palmasola line linked all the railwa[illegible] Railway passengers (1948), 605,274; omnibus passengers, 1[illegible]

In summer there are 51 rivers and 20 channels navigable for about 12,000 miles; about 4,460 miles are navigable for canoes and small launches. The Orinoco is navigable for ships of 12 feet draught for part of its length.

The telegraph system has a network (1948) of 8.530 miles with 462 telegraph offices. It is supplemented by wireless telegraphy, with 72 stations, and by wireless telephony. There are 11 telephone systems in the principal towns (all privately owned), but not all are interconnected. There were 59,300 instruments in 1950, of which 93·5% were in automatic systems.

There is a government-owned aviation concern, Linea Aeropostal Venezolano, which has a subsidiary, for its international traffic, in which private capital participates. In July, 1950, 73 planes were being operated by the scheduled airlines; in 1948, air services flying the Venezuelan flag covered 14,915,557 kilometres.

There are wireless stations at Caracas, Maracaibo, Maracay, Maiquetía, San Cristóbal, Porlamar, Puerto Cabello, Maturín, Puerto Ayacucho and other towns. There are 31 long-wave and short-wave broadcasting stations.

Banking and Currency.

The official monetary unit is the *bolivar*, with a value of 29·8507 cents (U.S.) as filed with the International Monetary Fund on 18 April, 1947; it is equal to 0·265275 gramme of gold; 3·350 bolivars = $1 (U.S.); 1 troy oz. of gold = 117·25 bolivars. Gold may be privately imported in unlimited amounts and retained indefinitely, but subsequent dealings and exports are subject to license. Although foreign exchange rates are pegged by the Central Bank, the commercial banks are free to buy or sell.

The bolivar is divided into 100 *centimos*. Gold coins, 100 (*pachanos*), 20 and 10 bolivars have been minted but are no longer in circulation; silver coins are 5, 2, 1, 0·50 (*real*) bolivars, and 0·25 (*medio*) bolivars; copper-nickel, 12½ centimos (*locha*), and 5 centimos.

The bank-notes in circulation are as follows:—500, 100, 50, 20 and 10 bolivars. The circulation of foreign bank-notes is forbidden

In Oct., 1939, a Central Bank was established, with a capital of 10 million bolivars (one-half by the Government and one-half by the public) to regulate the currency and to act as fiscal agent for the Government. This was opened on 1 Jan., 1941, with a gold stock equal to $29 million; on 31 Oct., 1950, its gold stock was equal to $373 million. On that date, against a gold stock of 1,041 million bolivars (and a foreign exchange net indebtedness of 3 million bolivars), the Central Bank had notes in circulation of 696 million bolivars; deposits were 256 million bolivars. Gold in the reserve is valued at the United States market price converted at the rate of 3·061 bolivars per $ (equivalent to 107·135 bolivars per troy oz.) compared with 117·25 bolivars per troy oz. as communicated to the I.M.F. One-half of the reserve must be represented by gold in vaults and not more than 10% by foreign exchange; the rest may be gold abroad. Reserve must be equal to at least 50% of notes and demand liabilities.

Before the Central Bank was established in 1939, the Bank of Venezuela, with (now) a capital of 52,500,000 bolivars, partially filled that role; it was the sole depository of government funds and had powers to control the circulation of the currency. The Bank of Caracas has a paid-up capital of 15,000,000 bolivars. There are 16 other banks, of which 12 are Venezuelan (including the Bank of Maracaibo, with a capital of 15,000,000 bolivars, and the Commercial Bank of Maracaibo, with a capital of 12,000,000 bolivars), and 4 are foreign, namely, 2 British, 1 American and 1 Dutch. Six national banks had the right to issue notes but this privilege was taken away in 1948, leaving the Central Bank the sole bank of issue. Two small mortgage banks under quasi-governmental auspices, started in 1929, were greatly expanded in 1939. The agricultural bank had, in 1948, a capital of 125,000,000 bolivars, and the industrial bank had 10,000,000 bolivars.

Decrees of 1875 and 1917 provided that the official system of weights and measures shall be the metric system.

Petroleum volume is stated in cubic metres; 1 c.m. = 6·2897 barrels.

Diplomatic and Consular Representatives.

1. Of Venezuela in Great Britain (3 Hans Crescent, S.W.1).

Ambassador.—Dr. Carlos Sosa-Rodríguez (accredited 9 May, 1950).
Minister Plenipotentiary, Counsellor.—Dr. Carlos de Pérez de la Cova.
First Secretary.—José Campbell-Santana.
Second Secretary.—Dr. Leopoldo Brice.
Air Attaché.—Maj. Miguel de la Rosa.

There are consular representatives at Cardiff and Glasgow.

2. Of Great Britain in Venezuela.

Ambassador.—Sir Robert William Urquhart, K.B.E., C.M.G. (appointed 5 Jan., 1951).

First Secretaries.—R. A. Beaumont, O.B.E. (*Consular*); A. C. Maby (*Commercial*); E. P. Leconis (*Information*); C. A. Bayer (*Labour*).

Naval and Air Attaché.—Wing-Cdr. A. F. Johnson, D.F.C.

Civil Air Attaché.—Wing-Cdr. C. J. Lewin.

There are vice-consuls at Maracaibo, La Guaira, Puerto Cabello, Carúpano, El Cardon, Ciudad Bolívar, Las Piedras, Caripito and Puerto La Cruz (Guanta).

YEMEN.

In the Treaty of San'a of 11 February, 1934, with the United Kingdom and India, of which the ratifications were exchanged on 4 September, 1934, the Zaidi Imam Yahya b. Muhammad b. Hamid ed Din is styled 'His Majesty the King of the Yemen, the Imam,' and his dominions, which lie to the north-west of Aden and the Aden Protectorate, contain some 75,000 square miles, with a population of 3,500,000. His territories include the area to the north-west of the Anglo-Turkish boundary drawn in 1902–4 (accepted by the Treaty of San'a, of 11 Feb., 1934, as the boundary between the Aden Protectorate and the kingdom of Yemen).

A fresh agreement between the Yemen and the United Kingdom came into force on 20 Jan., 1951; the establishment of diplomatic relations and economic co-operation are its principal points.

On 17 February, 1948, the Imam Yahya, together with two of his 9 sons, was assassinated, and Abdulla al Wazir declared himself king. The usurper was, however, defeated by the sons of Yahya, and Saif al Islam Ahmad, the heir apparent, succeeded to the throne on 14 March, 1948.

National flag: red, with a sword and 3 white stars.

In the north the boundary between the Yemen and Saudi Arabia has been defined by the Treaty of Taif concluded in June, 1934. This frontier starts from the sea at a point some five or ten miles north of Midi and runs due east inland until it reaches the hills some thirty miles from the coast, whence it runs northwards for approximately fifty miles so as to leave the Sa'da Basin within the Yemen. Thence it runs in an easterly and south-easterly direction until it reaches the desert area near Nejran.

The Treaty of Taif aimed at the elimination both of the original and of future causes of dispute between the two rulers. It provided *inter alia* for the delimitation of the frontier by a joint commission, for the extradition of fugitive criminals and for the representation of either party abroad by the representatives of the other party, in cases where this was desired. The two kings further bound themselves to submit to arbitration all disputes between them, to observe neutrality in the event of either being attacked by a third party, to prevent their territories being used as a basis for action against each other and to co-operate in Arabian and foreign affairs.

To the north of San'a are the Imamic large towns of Amran, Tawila, Al Khamr, Al Suda, Sada (lat. 16° 47′ N., long. 43° 43′ E.), Quflat Al Udhr, and also the region of Al Jauf, Upper, Middle and Lower, with their capitals respectively at Al Matamma, Al Hazm and Al Ghail, where live the 'Shawaf,' clansmen of the influential Bakil tribe, all of which tracts, watered by the River Kharid, recognize the Imam's suzerainty. To south of Al Jauf, and to east by north of San'a at a distance of six days' journey, lies the district of Marib, or Saba, whose ruler is subject to the King. Other large towns in the Yemen are Taizz (alt. 4,600 ft.), Ibb (6,275 ft.), Yerim (8,600 ft.), Dhamar (7,650 ft.). The altitude of San'a is 7,260 ft. The three principal ports are Mocha, Hodeida and Loheiya.

The population of San'a, a walled city with eight gates, is between 20,000 and 25,000. The old-time granaries of the Upper Yemen still exist, and lie chiefly between the towns of Ibb and Al Jibla, and in the Wadi Sahul below Ibb and to its north, though indeed the agricultural products are widely distributed throughout the country and comprise barley, wheat and millet, together with coffee—the finest berries coming from Menakha. Hides also are largely exported. Imports into United Kingdom, £100 in 1947; £1,222 in 1948; £210 in 1949; £801 in 1950; exports from United Kingdom, £807 in 1947; £47 in 1948; £1,750 in 1949; £4,657 in 1950.

Yemen was admitted to the United Nations in 1947.

Chargé d'Affaires in London.—Elkadi Mohamed el Zoheiry.

YUGOSLAVIA.

(FEDERATIVNA NARODNA REPUBLIKA JUGOSLAVIJA—THE FEDERAL PEOPLE'S REPUBLIC OF YUGOSLAVIA.)

YUGOSLAVIA was proclaimed a republic on 29 Nov., 1945. The Constituent Assembly declared that 'democratic federal Yugoslavia is proclaimed a people's republic under the name of the Federal People's Republic of Yugoslavia. The Federal People's Republic of Yugoslavia is a unified people's state with a republican form of government, a community of equal peoples who have freely expressed their will to remain united within Yugoslavia.'

On 23 Dec., 1945, Great Britain and the United States formally recognized the new republic.

For details of the displaced monarchy, *see* THE STATESMAN'S YEAR-BOOK, 1945, pp. 1355–56, and of war-time development, pp. 1356–57. On 8 March, 1947, King Peter II and the other members of the K[illegible] dynasty were deprived of their nationality and their property was confiscated.

The peace treaty with Italy, signed in Paris on 10 Feb., 1947, stipulated the cession to Yugoslavia of the greater part of the Italian province of Venezia Giulia, the commune of Zara and the island of Pelagosa and the adjacent islets.

National flag: blue, white, red (horizontal); with a red star in the middle.

Constitution and Government.

The present constitution was adopted by the National Assembly on 31 Jan., 1946. It provides for a Federal People's Republic, composed of the 6 republics of Serbia, Croatia, Slovenia, Montenegro, Macedonia and Bosnia-Hercegovina, the autonomous province of Vojvodina and the autonomous region of Kosovo-Metochia (within the republic of Serbia).

Parliament, which elects the 'Presidium' for a period of 4 years, is composed of 2 chambers, the Federal Assembly (405 members) and the Council of Nationalities (215 members), and is likewise elected for 4 years. The Presidium as a body is the head of the state. It is composed of a President, 6 Vice-Presidents, a Secretary and 30 members of the National Assembly. The constitution enfranchises women, separates church and state, and lays down certain economic principles, including the breaking up of large estates in favour of the small landowners, fixing the maximum individual holding at 35 hectares (90 acres), and placing foreign trade under state control.

On 26 March, 1950, elections took place, in which candidates of the National Front received 93% of the votes.

President.—Dr. Ivan Ribar (2 Dec., 1945; re-elected 26 April, 1950).

Vice-Presidents.—Moša Pijade, Filip Lakuš, Josip Rus, Djuro Pucar, Dmitar Vlahov and Marko Vujačić.

Secretary.—Mile Peruničić.

The Cabinet, in May, 1951, was composed as follows :—

President of the Council of Ministers and Minister of National Defence.—Josip Broz Tito.

Vice-President of the Council of Ministers and Minister for Foreign Affairs.—Edvard Kardelj.

Vice-President and Minister of Interior.—Aleksandar Ranković.

Vice-President.—Dr. Blagoje Nešković.

Ministers without Portfolio.—Milovan Djilas; Sava Kosanović; Stanoje Simić; Vlada Zečević.

Minister of Finance.—Dobrivoje Radosavljević.

Minister of Justice.—Frane Frol.

Chairman of the Council for Culture and Science.—Rodoljub Čolaković.

President of the Committee for the Protection of National Health.—Dr. Pavle Gregorić.

Chairman of the Economic Council.—Boris Kidrič.

Minister of Foreign Trade.—Milentije Popović.

Chairman of the Council for Power and Mines.—Svetozar Vukomanović

Chairman of the Council for Machine Production.—Franc Leskovšek.

Chairman of the Council for Processing Industries.—Rato Dugonjić.

Chairman of the Council for Building.—Ljupco Arsov.

Chairman of the Council for Agriculture and Forestry.—Mijalko Todorović.

Chairman of the Council for Commerce.—Osman Karabegović.

Chairman of the Council for Transport and Communications.—Todor Vujasinović.

Minister for the Merchant Marine.—Lieut.-Gen. Maks Bace.

Minister and Secretary-General to the Council of Ministers.—Ljubodrag Djurić.

Prime Ministers of Federal Units.—Serbia: Petar Stambolić; Croatia: Dr. Vladimir Bakarić; Slovenia: Miha Marinko; Bosnia and Hercegovina: Djuro Pucar-Stari; Macedonia: Lazar Koliševski; Montenegro: Blažo Jovanović.

Area and Population.

According to the census taken 15 March, 1948, the area and population of Yugoslavia are shown as follows (final results):—

Federal units	Area in square km.	Males	Females	Total	Pop. per sq. km.
Serbia with Vojvodina, Kosovo and Metohijan.	88,266	3,171,201	3,356,765	6,527,966 [1]	73·96
Croatia	56,269	1,758,927	1,997,880	3,756,807	66·77
Slovenia	20,450	659,872	739,001	1,391 873	68·06
Bosnia and Hercegovina .	51,564	1,237,381	1,327,896	2,565,277	49·75
Macedonia . . .	26,494	584,002	568,984	1,152,986	43·52
Montenegro . . .	13,837	178,078	199,111	377,189	27·26
Total . . .	256,880	7,582,461	8,189,637	15,772,098	61·40

[1] Serbia, 4,136,934; Vojvodina, 1,663,212; Kosovo and Metohijan, 727,820 inhabitants.

The principal towns (census, 15 March, 1948) are as follows (final results):—

Town	Population	Town	Population
Serbia		*Croatia* (continued)	
Beograd (capital) . .	389 114	Osijek	50,400
Niš	50,063	Split	49,964
Kragujevac . . .	32,878	Karlovac . . .	23,830
Leskovac . . .	21,773	Pula	22,740
Vojvodina		*Slovenia*	
Subotica. . . .	112,530	Ljubljana (capital) . .	121 050
Novi Sad (capital) .	77,713	Maribor . . .	66,793
Zrenjanin . . .	40,505	Celje	22,183
Sombor	34,376	*Bosnia and Hercegovina*	
Pancevo	30,933	Sarajevo (capital) . .	118,806
Kikinda	28,348	Banja Luka . . .	32,147
Senta	25 077	Tuzla	28,871
Vršac	24,615	Mostar	23,234
Bečej	22,928	*Macedonia*	
Kosovo-Metohijan		Skoplje (capital) . .	91,491
Priština (capital) . .	19,831	Bitolj	31,510
Croatia		Prilep	25,990
Zagreb (capital) . .	290,667	*Montenegro*	
Rijeka-Susak . . .	72,978	Titograd (Cetinje, capital)	12,272

Movement of population is shown as follows for 4 years :—

Years	Births	Marriages	Deaths	Surplus of births over deaths
1936	435,861	109,528	240,879	194,982
1937	424,448	117,717	242,337	182,111
1938	411,381	121,605	240,303	171,078
1939	403,938	123,877	233,196	170,742

Three closely allied languages are recognized in the Yugoslav state : Slovene, Macedonian and Serbo-Croat. Serbo-Croat serves as the *lingua franca* of the state, Serb being printed in Cyrillic, and Croat in Latin characters. Macedonian is printed in the same Cyrillic characters as Serb (the Cyrillic alphabets used for Bulgarian, Russian, Ukrainian and Byelo-Russian are each slightly different from this), while Slovene is written exclusively in Latin character.

Religion.

All religions recognized by law enjoy the same rights. The church is separated from the state. According to the census of 31 March, 1931, there were :—Serbian-Orthodox, 6,785,501 (48·70%); Roman Catholics, 5,217,847 (37·45%); Greek Catholics, 44,671 (0·32%); Protestants, 231,169 (1·66%); Moslem, 1,561,166 (11·20%); Jews, 68,405 (0·49%); others, 25,279 (0·18%).

The Serb Orthodox, or Serb Pravoslav, Church is ruled by a Patriarch and a Holy Synod. On 12 Sept., 1920, the Patriarchate of the Serbs, originally established by King Stephen VII Dushan on 9 April, 1346, and suppressed by Sultan Mustafa III on 13 Sept., 1766, was reconstituted. The Serb Orthodox (Pravoslav) Church is divided into 21 bishoprics. The bishops with sees at Cetinje, Skoplye, Sarajevo and Zagreb have the rank of Metropolitan. There are 3,021 parishes and 206 monasteries. According to the provisions of the constitution of the Serbian Church, published in Nov., 1931, the Church is governed on an autonomous basis and has the right to organize its own life according to its needs.

The Roman Catholic Church in Yugoslavia is governed in its relations with the state by the concordats of 1855 in the territories which used to form part of Austria or Hungary; of 1866 for Montenegro; of 1881 for Bosnia and Herzegovina, and of 1914 for Serbia. It is divided into 3 provinces : Belgrade with 2 suffragan sees, Sarajevo with 2 suffragan sees and Zagreb with 4 suffragan sees and jurisdiction over the Byzantine Uniat Bishop of Križevci. In addition to these there is 1 archbishopric at Bari and 7 bishoprics which depend immediately upon the Holy See in Rome. There is an Apostolic Administrator for those parts of the diocese of Zara which are in Yugoslavia. The Church is organized in 1,971 parishes, and there are 349 monasteries and convents.

There also exists the Old Catholic Church, with a bishop and a Synodal Council at Zagreb, who together exercise control and supervision over all religious and educational activities of that Church.

The Protestants are chiefly in the territories which used to form part of Hungary. From 1930, two independent Protestant Evangelical Churches of the Lutheran creed have been legally recognized : the German and the Slovak.

The Moslem Religious Union has one Reis-ul-Ulema, whose seat is in Sarajevo. The administration and supervision over all Moslem religious,

educational and cultural activities is exercised by the ulema-medjlissas: one at Sarajevo and one at Skoplye.

The Jewish religious organization has one Grand Rabbi, with his seat at Belgrade.

Education.

School statistics for 1949–50 (figures for 1938–39 in brackets) are as follows:—Elementary schools (4-year course) and complementary elementary schools (7-year course), 12,742 (8,956) with 24,256 (32,144) teachers and 1,640,954 (1,428,223) pupils; secondary schools (8-year course), 1,242 (439) with 9,892 (8,126) teachers and 434,202 (167,848) pupils; teachers' training colleges, 69 (34) with 787 (503) teachers and 21,917 (3,898) students; technical schools, 1,249 (854) with 14,866 (7,422) teachers and 176,631 (84,859) students; art schools (including musical and dramatic schools), 134 (21) with 1,585 (277) teachers and 17,481 (3,173) students; workers' educational colleges, established in 1947, 81 with 5,854 pupils.

For higher and specialized education there were 79 (29) faculties, academies and high schools with 4,354 (1,271) professors and instructors and 60,566 (17,734) students.

The national minorities have been provided with elementary, secondary and teachers' training schools of their own. In 1949–50, there were the following:—Albanian (727, 40, 3), Magyar (204, 49, 2), Bulgarian (95, 16, 1), Czechoslovak (55, 11, 1), Italian (30, 16, 1), Rumanian (37, 7, 1), Turkish (99, 9, 0), Ukrainian (13, 3, 0), German (4, 0, 0).

There were, in 1949, 852 cinemas with a seating capacity of 246,716.

Justice and Crime.

The whole legal system is being reformed. There are district courts, county courts, the supreme court of the autonomous province of Vojvodina, supreme courts of various republics and the supreme court of the Federal People's Republic of Yogoslavia. Magistrates and judges are dependent for election on the administrative committees.

Finance.

Revenue and expenditure (in 1,000 dinars) were as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1946	39,420,781	45,622,647	1949	172,400,489	163,561,096
1947	95,859,953	87,624,683	1950 [1]	173,746,000	173,746,000
1948	137,758,659	121,421,621	1951 [1]	172,662,000	172,662,000

[1] Estimates.

The revenue, 1949 (final account), was composed of 119,124 million dinars in the federal budget and 53,277 million dinars in the states budget. Main items of the federal budget were:—Turnover taxes, 56,446; social insurance, 21,001; surplus from 1948, 13,737 million dinars.

Of the expenditure, 1949, 113,566 million dinars were allotted to the federal budget and 49,995 million dinars to the states budget. Main items of the federal expenditure:—Capital investment, 52,439; defence, 23,723; social services, 12,597 million dinars.

In Sept., 1949, the U.S. Export-Import Bank authorized a credit of $20 million for the purchase in the United States of equipment and services;

$12 million of this credit is earmarked for the Yugoslav mining industry. An additional credit of $20 million was authorized in March, 1950. The loan bears interest of 3½% and is repayable in 14 half-yearly instalments beginning on 1 Jan., 1954.

Defence.

The Yugoslav Army comprises 8 army corps, of about 30 divisions.

The Yugoslav Navy comprises 7 torpedo boats, 9 submarines, 10 motor torpedo boats, a minelayer, a patrol vessel, 7 minesweepers, 3 submarine depot ships, and 24 other vessels.

On the disposal of excess units of the Italian fleet, Yugoslavia received 3 torpedo boats, 7 minesweepers, 2 landing craft, 1 water carrier and 4 tugs.

The Air Force, consisting of some 600 mainly obsolete machines, was destroyed. New units, equipped with modern aircraft, are in process of formation.

Production and Industry.

Yugoslavia, with a total area of 24,946,800 hectares (62,367,000 acres), had a cultivated area of 14,574,149 hectares (35,998,148 acres; 58·9%) in 1939.

In the year 1939, there were in Yugoslavia 1,273,359 horses, 19,475 mules, 123,071 asses, 4,224,595 head of cattle (1947, 2,493,000), 10,153,798 sheep, 3,503,454 pigs, 1,866,141 goats and 22,453,730 poultry.

The forest areas of Yugoslavia consist largely of beech, oak and fir, but are less profitable than, with proper management, they might be. The normal timber cut is about 530 million cubic feet per annum. The area under hemp cultivation, in 1939, was 144,903 acres and the fibre yield 53,509 metric tons. Sugar production, 1947–48, 85,000 metric tons.

The 1939 yield of fruit was as follows (in metric tons) :—Apples, 273,111; pears, 127,619; grapes, 777,754; plums, 1,223,104; walnuts, 52,467. In 1939, 4,737,903 hectolitres of wine were produced.

There were, in Oct., 1949, 5,246 peasant co-operatives embracing 255,733 households.

Yugoslavia has considerable mineral resources, including coal (chiefly brown coal), iron, copper ore, gold, lead, chrome, antimony and cement. The most important iron mines are at Varesh and Lyubiya in Bosnia and there are also considerable siderite and limonite iron ores between Priedor, Sanski Most and Topusko. Copper ore is exploited chiefly at Bor (Serbia). The principal lead mines are at Trepča and Mežica. Chrome mines are found in the southern part of Serbia and more especially in the neighbourhood of Skoplye. There are 2 antimony mines in western Serbia (Podrinje).

Mining output, in 1,000 metric tons, in 1949 :—Coal, 8,061; lignite, 4,061; bauxite, 368; mercury, 0·4; salt, 109; pyrites, 72·7. [illegible] ore, 14; iron ore, 835; copper ore (1947), 811·7; lead ore (1947, 75·1; zinc ore, 36·6; chrome ore (1947), 75·8; antimony ore (1948), 35·8; crude petroleum, 62·6.

Yugoslav industry is unevenly developed. The majority of industries are situated in the north-west part of the country. The southern and south-eastern provinces have preserved their agricultural character to a far higher degree than the north-western ones. The central portion of Yugoslavia (Bosnia) has a great mineral wealth, thus providing favourable conditions for industrial development. The north and north-east consist of a rich and fertile plain, where agriculture forms the chief occupation, but

where different industries are similarly operating, such as the sugar, hemp, milling and other industries.

Generation of electricity in 1949 was 2,186,000 kwh., of which 1,022,000 kwh. was hydro-electric.

Workmen employed in nationalized industries numbered 253,970 in 1948, compared with 179,359 employees in private industry in 1939.

On 28 April, 1947, the National Assembly passed a law on the five-year plan for the development of the national economy for the years 1947–51. The law, which includes detailed comparisons between the 1939 output and the 1951 target, is available in an English edition, published by the Belgrade Office of Information.

Commerce.

In 1947, the main countries importing into Yugoslavia were as follows (1935–39 average in brackets):—U.S.S.R., 21·1% (0·1); Czechoslovakia, 18·2% (9·9); Italy, 8·9% (8·4); Netherlands, 6·7% (1·5); U.K., 5·1% (8·3); Hungary, 5·1% (3·3); U.S.A., 4·1% (5·9); Germany, 4·0% (31·1). Main Yugoslav exports in 1947 went to:—Czechoslovakia, 18·0% (10·4); U.S.S.R., 16·6% (0·1); Italy, 11·4% (9·2); Hungary, 8·4% (4·3); Netherlands, 7·4% (1·6); Austria, 4·8% (12·1); Poland, 3·5% (1·1); Switzerland, 3·5% (2·2); Germany, 2·8% (26·4); U.K., 2·7% (7·7); U.S.A., 2·0% (5·0).

Distribution of trade in 1949. Imports to Yugoslavia from:—U.K., 12·8%; Italy, 11·7%; Austria, 8·8%; Netherlands, 8·7%; U.S.A., 8·5%; Germany, 6·9%; Switzerland, 6·7%; Czechoslovakia, 6·2%; Argentina, 4·7%; France, 2·9%; Hungary 2·9%; Poland, 2·3%; U.S.S.R., 1·6%. Exports from Yugoslavia to:—U.K., 19·4%; Austria, 11·0%; Italy, 10·2%; U.S.A., 8·0%; Netherlands, 7·0%; Germany, 6·0%; U.S.S.R., 5·0%; Czechoslovakia, 4·5%; France, 4·2%; Switzerland, 3·2%; Argentina, 3·0%; Hungary, 2·6%; Poland, 2·0%.

Total trade between Yugoslavia and the United Kingdom, in £ sterling (Board of Trade returns):—

	1938	1947	1948	1949	1950
Imports into U.K. . .	2,463,978	1,069,026	4,578,575	11,865,179	11,399,456
Exports from U.K. .	1,235,245	5,086,006	2,738,819	3,452,722	5,960,934
Re-exports from U.K. .	131,527	679,351	252,691	869,826	908,374

Communications.

Shipping.—On 31 Dec., 1950, Y[illegible] possessed a total of 159 (1940, 210) vessels of 224,555 gross to[illegible] (1940, 313,107 gross tons).

In 1949, 113,961 (1939, 97,755) vessels of 9,449,850 (18,416,514) net tons entered the ports of Y[illegible] of these, 109,292 (91,867) vessels of 7,751,030 (14,590,717) [illegible].

In 1950 Yugoslavia had 1,033 river craft. The length of the navigable rivers amounted to 2,106 km., that of canals to 191 km., and that of lakes to 90 km.

Rail and Roads.—In 1949 Yugoslavia had 11,624 (1939, 9,693) km. of railway.

In 1950 there were 46,256 km. of macadamized roads and 2,318 km. of metalled roads. The motor highway Belgrade–Zagreb (382 km.), which

was begun in 1947, was opened in July, 1950. On 31 Dec., 1949, there were 8,261 passenger motor cars and 16,797 trucks and buses.

Post.—There were in 1949, 234,970 km. of telephone line; 3,542 post offices, 74,994 telephone subscribers; (1950) 6 large and 9 small broadcasting stations.

Number of wireless licences at the end of 1949 was 299,055.

Aviation.—Home services (1949), 564,125 km. flown, 32,178 passengers carried; international services, 225,655 km., 1,820 passengers.

Banking and Credit.

All banking was nationalised immediately after the war, with the banks passing completely into the hands of the state.

The principal bank of the country is the National Bank. The Investment Bank is the chief regulator of the capital investment plans.

Money, Weights and Measures.

Since 20 Sept., 1949, the official rate of exchange in Belgrade has been 140·00 dinars = £1.

As a result of the invasion and occupation of Yugoslavia, the country has been flooded with eight debased currencies.

The metric weights and measures have been in practical use since the commencement of 1883. The *wagon* of 10 metric tons is frequently used as a unit of measure for coal, roots and corn.

Diplomatic and Consular Representatives.

1. Of Yugoslavia in Great Britain (25 Kensington Gore, S.W.7).

Ambassador Extraordinary and Minister Plenipotentiary.—Dr. Joze Brilej (accredited 26 June, 1950).

Minister Plenipotentiary, Counsellor.—Branko Zlatarić.

Counsellor.—Jokaš Brajović.

Press Counsellor.—Alexander Sokorac.

Military, Air and Naval Attaché.—Col. Alexandar Vukotić.

Secretaries.—Miroslav Milutinović; Dušan Gaspari; Franjo Micetić.

Commercial Attaché.—Branko Japundžić.

2. Of Great Britain in Yugoslavia.

Ambassador Extraordinary and Minister Plenipotentiary.—Sir Charles Peake, K.C.M.G., M.C. (appointed 13 May, 1946).

Commercial Minister.—Sir Francis Mudie, K.C.S.I., K.C.I.E.

First Secretaries.—D. Hoyd; N. K. Paterson, O.B.E.; H. T. Kennedy (*Commercial*); L. G. Durrell (*Information*); W. A. K. Ogilvy-Webb.

Naval Attaché.—Cdr. H. F. Robertson-Aikman, R.N.

Military Attaché.—Col. C. R. F. Bird.

Air Attaché.—Group Capt. D. A. Garner, D.S.O.

There are consular representatives at Zagreb (C.G.), Belgrade, Skoplje and Split.

Books of Reference.

STATISTICAL INFORMATION.—The Federal Statistical Office (Kraljic [illegible], Belgrade), was founded in Dec., 1944, and finally constituted in Jan., 1948; its Director-General, Stanoje Krašovec. It publishes a 'Statistička Revija' (from March, 1951, text in Yugoslav with English and French summaries). Among its other publications there is 'The [illegible] Results of the Population Census of March 15th, 1948' (1948).

Constitution of the Federative People's Republic of Yugoslavia. Beograd, Office of Information, 1947.

Five Year Plan for the Development of the National Economy of Yugoslavia. Beograd, Office of Information, 1947.
