PREFACE TO VOLUME VII

THIS volume contains the words beginning with the letters O and P. Including the Main words, to which separate articles are allotted, the special Combinations or compounds explained and illustrated under the Main words and the Subordinate entries of obsolete and variant forms entered in their alphabetical places, with a reference to the Main words under which they are treated and illustrated, the number of words amounts to 41,667. The Combinations of simple and obvious meaning, of which lists are given under the Main words without separate explanation but in most cases with illustrative quotations, number 7,203, raising the actual total of words and compounds recorded in the volume to 48,870.

These words are thus distributed among the letters:

	Main words	Subordinate words	Special Combinations	Combinations	Illustrative Words	Illustrative Quotations
O (386 pages)	118	1,198	632	13	11,181	38,625
P Pf (404)	7,208	1,811	1,281	140	11 0	41,880
Ph–Py (896)	1,974	3,584	3,001	360	5,000	94
Total	30,300	6,393	4,914	513	48,870	5,110

Considered as to their status in the language the Main words are distinguished approximately into those which are native or fully naturalized and still *current*, those now *obsolete* (marked †) and those considered to be *alien* or imperfectly naturalized (marked ‖) although in the case of both the latter it is often difficult to draw the line. The distribution of the 30,300 Main words is approximately as follows:

	Current	Obsolete	Alien	Doubtful
O	5,347	1,506	2	118
P Pf	5,411	1,201	36	7,208
Ph–Py	12,302	2,628	1,044	1,974
Total	23,120	5,335	84	9,300

Etymologically considered the O section and the P section of the English vocabulary differ greatly in the proportions of their elements. O is in this respect an ordinary letter containing a good proportion of words of Anglo Saxon derivation beside those of later adoption from Scandinavian Old French Latin and Greek, and more distant languages. Among the words that go back to Old English use are the prepositions *of* (to the lexicographer the longest and most difficult of English prepositions the treatment of which in this Dictionary occupies 18 columns), *off on over* the adverbs *off oft often out* the conjunction *or* the numeral and pronoun *one* with its derivatives *once only* etc. the pronominal words *other our ours* the verbs *ought owe own* all of great interest to the student of the historical grammar of the language. There are also numerous well known substantives as *ox oxlip oxygen ox-eye oak oath ooze ordeal nail* and important adjectives as *old* and *open*. To these must be added the words compounded with *out* (1,250 including 775 Main words) and *over* (2,173 including 1,413 Main words). The *out* and *over* compounds occupy more than a fourth of O. The words from Latin include the compounds in *ob* and its phonetic variants *oc-, of-, op-* and important words such as *order* and its family. Among the words from Greek are the numerous compounds in *ortho-*, and the chemical terms related to *oxygen*.

In P on the other hand, the words that go back to Old English are a very small company. Of the 23,000 Main words here dealt with, about 80 appear in the Anglo Saxon Dictionary of which however

[1] Adding these to the words in Volumes I–VI we have for the portion of the alphabet from A to P the following figures:

Main words	Cubs	Obs	Alien	Doubtful	Combs	Illus. Words	Illus. Quots
160,819	146,134	11,119	188	40,440	30,133	33,819	(4)

For the letters O and P the comparative scale of the work and of certain other Dictionaries is shown by the following figures:

	Johnson	Cassell's Latin Dictionary	Century Dictionary	Funk & Wagnalls Standard	Hereafter
Words recorded	4,455	1,883	25,875	7,009	48,870
Words illustrated by quotations	3,061	637	5,078	2,119	38,536
Number of illustrative quotations	12,111	9,642	20,340	3,243	175,130

The quotations in Richardson's Dictionary in O and P are 9,640.

o were borrowings from Latin leaving only about 30 really native most of them found in other Germanic langu ges Among the chief of these are *pin path penny pith play, plight, plough pock pool pretti prick puff pull put* Of these the two last scarcely appear in Old English but have since become verbs of great importance the article I U is after GO the longest as yet in the Dictionary and has proved one of the most difficult From causes stated in the article on the letter P, this was the rarest initial consonant in Old English occupying in Bosworth Toller's Anglo Saxon Dictionary only one-fifth of the space of O But its constant accessions from other languages, and apparently its aptitude to form onomatopoeic words have made it in the modern dictionary next in compass to S and C with which it forms a third of gigantic letters containing together considerably more than a fourth of all the words in the language The accessions began with the 50 words from Latin already mentioned some like *pil pit* and *print* of West Germ nic age but most of them only pre Conquest English either ecclesiastical, as *pall pope priest prime* or nam of foreign plants and animals as *parsley pear, pease pepper pea(cock)* The accessions continued with the words from Old French in origin mostly Latin and subsequently with words formed directly from Latin (sometimes ultimately from Greek) and also from the 16th century in the terminology of philosophy and science from Greek directly From the 16th century words began to crowd in from other European and more distant tongues until now there are to be found in the P division of this volume representatives of more than 50 languages To these have been added a considerable number of words of unknown origin many no doubt onomatopoeias of English or its dialects The compass of the letter has been greatly enlarged by the words formed with the Latin prefixes *per post-, pre pro* (with its Old form *por*) and with the Greek prefixes *pan- peri- pro-*, and the formatives *pan-, para- phil- phon- pseud- psy-* etc The words in PH are an alien group representing (with few exceptions) Greek words in which Roman spelling substituted PH and which thus come in between PE and PI at once to swell the vocabulary and to increase its Greek elements Of the 23 000 Main words in P nearly 7 000—more than one third of the whole—are of Greek derivation or are formed with a Greek prefix or first element PH is a proportion much larger than obtains in the language as a whole

The material collected up to 1888, for O to OM was arranged chronologically and in part sub edited by Miss Margaret Hutchins, of Hurhill Stirlingshire (now Mrs Alexander Stuart) The section OO to OPPRO BRIUM was skilfully sub edited by the late Rev W J Lowenberg of Starkies Bury 1887 96 who died in 1899 before seeing any part of O in type The section OPTICIAN to OW was sub edited 1899 6 by Mr James Bartlett of Cloverlea Bramley Guildford who after more than 20 years voluntary work at the Dictionary during which he sub edited also G parts of M R and S died on 15 August 1908 The very technical section from ON to OZ was arranged and sub edited by Mr H A Nesbitt B A in 1899 For PA the material collected by the Philological Society had in consequence of the death of the person who undertook its sub editing been nearly all lost or destroyed It had in consequence to be collected anew which was largely done by the late Mr L S Jackson M A Aldymouth as it accumulated, it was arranged, and finally sub edited 1888 by the late Miss J H A Brown of Chichester The slips for PI to PELY were sub edited in 1884 by Mr James Britton F L S those for PEM to PERI by Mr R M Lintock, of Liverpool in 1888, and 1893 6 and those for PERS to PIL by Mr W J Anderson then of Markinch who died in February 1900 The large section PIM to PLOP was laboriously sub edited by Miss J E A Brown one of the most devoted and enthusiastic of our volunteer helpers between 1900 and her sudden death on 19 February 1907 Her work was ably continued PROFIT to PRY by the late Mr C B Winchester in 1908 The earlier material for PR to PU had been put in order by the late Mr P W Jacob in 1885 The whole section IE to PHY was revised with much new material 1901–4 by our valued coadjutor the Rev C B Mount M A, who also sub edited with much original research, the last section IS to INNIS in 1904 7 The generous and in many cases long continued services of these voluntary collaborators, so few of whom alas survive call for the fullest and most grateful recognition

In the revision and improvement of the work in the proof stage continuous and indefatigable help has been rendered by Misses L P and Edith Thompson of Lansdown Bath, whose investigations of the sense history of difficult words have been most fruitful and valuable also by the Rev Canon Fowler D C L Durham, the Rev J B Johnston, B D Falkirk Mr A Caland of Wageningen Holland Monsieur J Amos Glasgow and in later parts by Professor J H Bumby Nottingham Assistance with the proofs has been only a small part of the gratuitous services rendered to the Dictionary by Mr R J Whitwell, B Litt Oxon who has contributed to the history of legal historical and other words by special investigations in the Bodleian and Codrington Libraries the British Museum and the Public Record Office Many of our earlier illustrations for such words are the fruit of his researches Five of our zealous helpers in this department have been removed by death during the preparation of this volume the Right Hon Lord Aldenham, who had sub edited parts of C and K for the Philological Society, and had read our proofs from the beginning died in September 1907, Dr W. Sykes, F S A who supplied

most of our quotations for recent medical terms died in September 1906 Mr E L Brandreth who had sub-edited portions of H K and N besides reading our proofs and verifying references in the British Museum Library, died in December 1907 Mr C B Winchester who as reader sub-editor and after the death of Mr Brandreth collator of quotations in the British Museum was the most valued of our later volunteer coadjutors died in December 1908 Mr Chichester Hart of Curraghbligh Portsalon Donegal, who added to the proofs many quotations from 16th and 17th century dramatists died in 1908

Pagan. *Etymol.* The explanation of L. *pāgānus* in the sense not Christian, heathen, as arising out of that of 'villager, rustic', given by Orosius (a Span. ard) 417 has been shown to be chronologically and historically untenable, for this use of the word goes back to Tertullian 202, when paganism was still the public and dominant religion, and even appears according to Lanciani in an epitaph of the 2nd cent. The explanation is now found in the L. use of *pāgānus* as = 'civilian, non-militant', opposed to *miles* 'soldier one of the army'. The Christians called themselves *milites* 'enrolled soldiers of Christ, members of his militant church, and applied to non-Christians the term applied by soldiers to all who were 'not enrolled in the army'. Cf. Tertullian *De Corona Militis* xi 'Apud hunc [Christum] tam miles est paganus fidelis quam paganus est miles infidelis.' See also GIBBON xxi. *note*.

O.

O (ō), the fifteenth letter of the alphabet in English and other modern languages, and the fourth vowel letter O was the fourteenth letter in the ancient Roman alphabet, corresponding in form and value to the ancient Greek Ο, derived from the sixteenth letter of the Phœnician and ancient Semitic alphabet, ⵔ, ⵔ, ⵔ (Heb. ע), called *ʿain*, i e 'eye' The latter represented a peculiar articulation or consonant, the 'glottal catch' (modern Arabic ع, ع), a sound unknown to Greek, in which the symbol was appropriated to the vowel *o* (which the sound of Semitic *ʿain* in conjunction with *a* may have somewhat resembled) In early Greek, O was used for both short and long *o*, subsequently a new symbol Ω, *ω* (*O mégn*, 'great O'), was added to the alphabet to distinguish long open *ō*, the original O *o* (now known as *O mikrón*, 'little O') being then restricted to short *o* From Greek times downward, this letter has regularly represented some variety or varieties of the 'mid back round' (or labial) vowel of Bell's Visible Speech scale On account of its intermediate position, this vowel is (like *e*) liable to considerable variations of quality, and many languages distinguish, as practically different vowels, 'close (or 'narrow') *o*, and 'open' (or 'wide') *ɔ*, the former tending to approach, and at length to pass into, the still closer sounds *u*, *ʉ*, the latter tending to fall into the still opener *ɒ*, ɑ

In OE, short *o* and long *ō* were etymologically and phonetically distinct Short *o* was originally both close and open. Short close *o* was normally derived from an original *u*, as in OE *oxa* ox, Skr *ukshán*, OE *dohtor*, Gr *θυγάτηρ*, Indo-European **dhughətḗr-* Short open *o* normally represented an earlier *a* before a nasal, as in OE *on*, Goth *ana*, Gr. *aná*. This OE. *o* from *a(n)* is often distinguished for etymological purposes as *ǫ*, OE long *ō* corresponded generally to Com Teut long *o*, in which were combined Indo-European *ō* and *ā*, as in OE *bōc* beech, OTeut **bōkā*, Der Gr *φᾶγος*, L *fāgus*, OE. *fāh*, Goth *fāhus*, Gr *πλωτός* swimming Long *ō* also arose out of a lengthening of short open *ǫ* from *a(n)*, with *n* absorbed, as in *tōð* tooth, OTeut **tanþ*, Indo Eur. **dont-*. *hōn* to hang OHG and Goth *hāhan* from OTeut **hanh*, *χαγχ-* Long *ō* was probably originally both close and open, but in late OE it must, from its subsequent history, have been close In unstressed syllables, *o* was the ordinary OE representative of the obscure vowel (ə), and in this capacity it often varied with *a*, *e*, *u*

In the Middle English period the distinction between open and close short *o* is no longer discernible; and the vowel was apparently always open *o* before a consonant in the accented syllable Of long *ō* ME. had two distinct sounds, open and close. Open *ō* was the normal representative (in midland and southern speech) of OE. long *ā* (or lengthened *a*), which passed through the sound of (ǭ) to that of (ō), being sometimes written in the 13th c. *oa*, but, eventually, simply *o*, or *oo* thus OE. *mōna*, *nāh*, *ald* (*aald*), ME. *moone*, *noon* (1287), *more*, *noo*, *old*. It often represented long *ō* derived from Fr or L or arose out of an earlier short *o* in an open syllable, as OE *hopa*, ME *hope* ME. close *o* represented OE *ō* This *ō* must have been a very close sound, for about the end of the ME or beginning of the mod Eng period it passed into the sound of (ū), usually with the spelling *oo*, though sometimes with the simple *o* spelling, as in the words *do*, *to*, *lose*. MF. open *ō* either continued into mod Eng as *o* (bone, ore, hope), or was, from 16th c, written *oa* (*oak*, *oar*, *coal*), but in sound it became at length close and quasi-diphthongal (ōu), except before *r*, where it remains open (ōɹ) In the 13th c, *o* began to be written in certain cases for *u*, esp before *m*, *n*, *v* (= *v*), as in *some*, *son*, *love* (= *luve*), OE *sum*, *sunu*, *lufu* This, which has largely survived into mod L., was merely a *graphic*, not a *phonetic* change The normal sound of short *o* is now (ǫ) low back round, varying with mid back round wide (o), and low back round wide (ɒ, but it frequently stands for (ɒ), as in *son cloth*, or (ɑ, as in *word*, and in unaccented syllables sinks to (ə, as in *nation* When original short *o* comes before *r* final, or *r* + consonant, as in *or*, *lor*, *corn sort*, it is now lengthened into the corresponding long sound *ǫ* *ǫɹ*, *ǫɹt*, *kǫɹn*, *sǫɹt*) A still more recent lengthening of *ǫ* often takes place in southern English before certain consonants, as in *cross*, *off*, *moth soft*, and, being as yet only partially recognized, is here represented by *ɔ*

The normal sound of long *ō*, as in *no*, *toe*, *bone*, is the quasi or imperfect diphthong (oʊ), but before *r*, as in *bore*, *choral*, *story*, the sound is that of the open quasi diphthong (oɐ) In London and the south of England, this *ō*, esp when *r* follows in the same syllable, as in *ore*, *worn*, *porter*, is usually identified with the (ǫ) mentioned above as arising from ML short *o* before *r* This is not the case, however, in the educated speech of the country as a whole, nor in America, and the sounds are still separated by most orthoepists (see Ellis, *E Pronunciation*, I 94 95), and in dictionaries generally, they are distinguished in this dictionary, as in *boarder*, *border* (bōə ɹdəɹ, bǫɹdəɹ), *mourn*, *morn* (mōəɹn, mɹn)

Hence, in modern English, the normal sounds of *o* are

1	ōu in *no*, *bone*	nōu, bōən
2	ōɐ ,, *ore*, *glory*	oɐɹ, glōɐ ɹi
3	ǭ ,, *or*, *north*	ǫɹ, nɹtɧ
3 a	ɒ̄ ,, *soft*, *moth*	ɒft, mɒθ
4	ɒ ,, *rob*, *got*	ɹɒb, gɹt.

Exceptional sounds, due to special causes, and normally spelt otherwise, are

5	ʉ (u) in *to do*	tu dʉ.
6	ɒ ,, *son*, *other*	sɒn, ɒ ðəɹ
7.	ə̄ ,, *word*, *worthy*	wə̄ɹd, wə̄ɹðɪ

No 1 is also represented by *oa*, *oe* (final), *ou*, *ow*, *oh*, rarely *oo*, as in *load*, *hoe*, *soul*, *low*, *oh*, *brooch*

No 2, by *oa*, *ou*, *ow*, rarely *oo*, as in *boar*, *pour*, *Gower*, *door*, *floor* In *broad*, *oa* has the sound (ǭ)

The combination *oo* now normally represents long (ū), long (ūe), short (u), as in *moon*, *moor*, *good*, exceptionally, it has the sound of 'short u' (ʉ) as in *blood*, *flood*, or of 'long o' = Nos. 1 and 2 above

Oi, *oy*, normally represent a true diphthong (oɪ), as *boil*, *boy*, or an imperfect triphthong, as in *Moir* (moɪəɹ)

Ou, *ow*, also normally represent a diphthong (au), as in *out*, *house*, *now*, or an imperfect triphthong, as in *hour* (auəɹ) But *ou* has also various other sounds, as in *soup*, *tour*, *through*, *you*, *soul*, *pour*, *brought*, *cough*, *enough*, in unstressed final syllables it is commonly (ə as in *favour*, *pious*

In unaccented syllables, all the sounds of *o* are liable to shortening and reduction, and tend to sink through ɒ or oʊ, o or o, to ə, ɔ, ɒ, and ɔ, as in *tobacco* (oʊ, o, ə), *anatomy* (o), *dilatory* (ɔ), *sailor* (-ɔɹ), *comfort* (ɔ, *cannot* ɹ ɔ), *parrot* (ɔ), *notion* (ə), *random* (ɔ)

The change of OE *ā* to *ō* in ME was a characteristic of the southern and midland dialects and thus of Standard English But the northern dialects retained *ā* the presence of which is stead of *o*, as in *stane hame mare stone*, *home*, *more*, is one of the most distinctive features of northern English and Scotch In later times this *ā* is often written *ai*, *or ae*, and narr wed to *ea*, *e ee* (ɛ ɹ, ɪə, ī) The change of OE *ā* to (ō, u), is also proper to Standard English and its related dialects, the sound having become in Scotch one akin to German *a* and *u* or Fr *ou* and *u* This, like the English (ō, u) sound, is often written *oo* but more distinctively *u* or *ui*, as in Eng good Sc. good gude, good The north ern dialects also retain the earlier (ā or English (au), this is often written in Scotch, as in ME., *ou*, *ow*, but in modern times sometimes *oo*, as in *coo*, *aboot* = *cow*, *about*

The fancy frequent in authors of the 16th and 17th c, that the shape of the letter O represented the rounded form of the mouth in forming the sound, is seen from the history of the letter to be without foundation in fact

-O, *suffix* of combining forms of words On the analogy of Greek combinations (in which the combining stem usually ended in *-o*, as thematic vowel or its representative, or as an addition to a consonant stem), and their adaptations and imitations in Latin, late and medieval, like *Agrippha*, *Mx*, *Gallogrecs*, *Gallohispani*, *Anglosaxonicus*, etc. *-o-* has come to be, in modern Latin and in English, the usual connecting vowel in combinations, not merely in ethnic names as *Anglo-Saxon*, *Anglo-Indian*, *Indo-European*, etc, but in scientific terms generally, it is affixed, not only to terms of Greek origin, but also to those derived from Latin compounds of which would have been formed with the L connecting or reduced thematic vowel, *-i*), especially when compounds are wanted with a sense that Latin composition, even if possible, would not warrant, but which would be authorized by the principles of Greek composition Such are *con-amo-*, *converso-*, *cyno-*, *dicho-*, *gyro-*, *ovato-*, *Rhoto-*, *tetro-*, *vitro-*, *cumulo-*, *acceptilo-*, *pneumo-*, *dramatico-*, *economico-*, *historico-*, *politico-*, *poco-*, *serio-*, etc

1. The primary and etymological function of a combining form in *-o* is to qualify adverbially the adj to which it is prefixed, as, in Gr, *Λευκό-χλωρος* 'whitely green', pale green, mod L *ovato-cordatus* 'ovately heart-shaped', cordate with ovate modification; *Anglo-Norman*, Norman as modified in England Such a comb is as it were, the adj with adverbial qualification, belonging to a sb with adj qualification, thus, as to the qualified sb *steady industry* (adj + sb) the corresponding qualified adj is *steadily industrious* (adj + adj), so to *political economy* the corresponding adj is *politico-economic* Lord Campbell have *literary* in the sense 'pertaining to legal literature

2. But the use of these forms has been extended, so as to express, as by a kind of abbreviation almost any manner of relation between the two components. *Anglo-French*, originally 'French of an English sort', 'French as established or spoken in England', has sometimes taken with the converse meaning of 'English settled in France', and commonly with that of 'English in alliance, conjunction, or partnership with French', so *Franco-German* may even mean 'French in conflict with German', *Greco-Latin* 'common to Greek and Latin'; *pneumo-gastric*, 'communicating with both lungs and stomach'; *occipito-frontal*, 'reaching from occiput to forehead', or connecting these parts, *occipito-temporo-parietal*, 'including the occipital, temporal, and parietal (lobes of the brain)', *gramino-carnivorous*, 'feeding on grass as well as flesh'

3. This *-o* is used also, on Greek analogies, in word formation From its regular appearance before certain suffixal elements as *-crasy*, *-graphy*, *-logy*, *-meter*, it tends to be treated practically as a part of these elements; hence, such expressions as 'the *bureau-ocracy*, *shop-ocracy*, *trade-ocracy*) and other *-ocracies*', 'a professor of all the *-ologies*,' 'the last new *-ology*,' 'galvanometers, lactometers, and other *-ometers* without number'.

†1 Variously applied by the early herbalists to the Common Polypody (which grows on the trunks of trees), and to several other ferns

These include *Nephrodium Thelypteris*, *Cystopteris fragilis*, *Asplenium Adiantum nigrum* identified by Fraas with the Greek δρυόπτερις, and *Polypodium quercinum*

Ob, abbrev of I *obiit*, died used before the date of a person's death

Ob-, *pref* The Lat prep *ob* 'in the direction of, towards, against, in the way of, in front of in view of, on account of' In combination with vbs and their derivatives, the *b* is assimilated to certain consonants becoming *o*, before *c*, before *f*, *op* before *p* and *opp* a before *m* (in *omittère*)

In combination it has the following senses **a** In the direction of, towards, facing, in front of, as *obvertère* to turn towards, *obs'ūre* to listen to **b** Against, in opposition, as *occurrère* to run against, *oppūgnare* to place against often merely implying the notion of the object, as *obtrectator* of an action **c** Upon or over, down upon, down, as *obtuchre* to draw upon or over *obscure* to bind down, *occūlere* to fall down **d** Completely, sometimes pleonastic, as *obsolūtus*, to sweeten (completely *oldurare* to harden greatly, often with a colouring of sense a

In English use, *ob* (or *of* *op*, *o*) occurs

1 In words already formed in Latin in the senses above mentioned, rarely in words formed in Eng itself on Latin elements e g a *obedience, obversion*, b *obje t, occur, opponent, opposite*, c *obduce, accident*, d *obdulcorate, obturate*

2 In mod scientific Latin, and hence in Eng , in Botany, etc , *ob* is prefixed to adjs in the sense 'inversely', or 'in the opposite direction', e g *obcordātus* (l lanceta), *obcordate*, 1 e cordate with the base or broad end presented , *obovate*, ovate or egg shaped with the wider end presented ; *ob triangular*, triangular with the apex downward. See below Obclavate to Obturbinate

This is not an ancient L. use, where *ob-* was rarely combined with an adj, the chief example being *obhngus* Oblong, which could hardly be in sense the model for these words Apparently the prefix represents the *ob-* of the adv *obversē* Onversely and is an abridged representation of that word

1. The vast body of water on the surface of the globe, which surrounds the land; the main or great sea. (Down to *c* 1650, commonly *ocean sea*, before 1400 also *sea ocean*, *sea of ocean*=L. *mare oceanum* (Cæsar *Bell. Gall.* iv. 20, Tacitus *Hist.* v. 6), OF *mer oceane*, *oceanne*, *occeanne mer*, where *oceane* was adj. fem. qualifying *mer*; and *ocean* may sometimes have been viewed as an adj. in Eng.)

In early times, when only the one great mass of land the Eastern hemisphere, with its islands, was known, the ocean was the Great Outer Sea of boundless extent, everywhere surrounding the land as opposed to the Mediterranean and other inland seas.

2 One of the main areas or regions into which this body of water is divided geographically

These divisions are partly natural, through the intervention of portions of land, partly arbitrary for geographical convenience. It is usual to reckon five of them, the *Atlantic*, *Indian*, *Arctic* and *Antarctic* or *Southern*, with the first three sometimes subdivided into Northern and Southern. But the Pacific, Indian, and Antarctic really form one great ocean-basin round the South Sea, of which the Atlantic and Arctic again form a smaller prolongation, divided from the larger basin only by an imaginary line drawn between the southern points of Africa and America. The name *ocean* was formerly given to smaller portions of some of these: the North sea has still the name in *German Ocean*; the Irish Sea (Keltic) is by Spenser called the *ocean of Ierne*; Atlantic brekke (Rolle) is by Barbour called the *ocean of Inglande*; the Mediterranean was called the *Sea ocean* by Trevisa, and the *Great Ocean* by Mandeville.

Odds (*p*dz), *sb* Also 6–7 **oddes, ods,** (6 *Sc* **oddis, odis, ? odd's,** *pl* **oddses**). [app pl of Odd *a* taken subst cf *news* In 16thc regularly, and in 17th and 18th c usually, construed as a singular, 'the odds is or *was*', an isolated instance of 'the odds *were*' appears in 1654, but this construction is unusual before the 19th c

It is somewhat difficult to c mprehend how the plural of *odd* came to be taken to express the sense difference, and also how a word originally plural should, while still retaining the plural form have been so constantly viewed and construed as singular The most likely explanation is that *oddes odds* first meant odd or unequal things (cf *news* = 'new things or matters') a relic of which appears to exist in the phrase to make odds even found in the earliest quotation But the notion of two odd or unequal things so essentially involves that of the relation between them as easily to pass into that of inequality or difference, as is perhaps already in the phrase in quot 1579 and as is fully developed in sense 2 After the sense difference' was once established the plural character of the word might be lost sight of, the more easily that in this sense no singular was in use, nor from the suggested origin possible We may compare the history of *news, means, trace*

Of (*ŏv*, *ŏv*, *əv*), *prep* Also (3 *Orm*) 5–7 **off** (6 **offe**), 3 6 *o*, 6– *o'* see O *prep*[2] [OE *of*, weak or unaccented form of the word whose rare strong form was *æf*, originally *af*, corresp to OFris *af*, *of*, *æf*, *ef*, OS *af*, MLG *af* prep and adv (MDu *af*, *of*, *æf*, Du *af* adv 'off'), OHG *abe*, *ab*, MHG *abe*, *ab* prep and adv, Ger *ab* adv 'off', 'away', ON *af*, Goth *af* prep and adv –OTeut *aba*, unaccented by form *ab*, corresp to Skr *apa* away from, down from, Gr ἀπο L *ab*

The form whence the OE was immediately derived was *af* (as in OS ON and Goth) Like other prepositional adverbs, this developed two forms, according as it was stressed or stressless in primitive OE *æf* and *af* In historic times the stressless form appeared only in a few minimal compounds (e g *a-fysnian* displeasure, *a-fearrod* absent while the originally unstressed *af* survived as in separable verbal particle and preposition In OE this *af* began to be used also as a separable particle or adv as in *Ic fǽdde, dat mē af to ȝȳme*, pa. pple *Ic fǽdde, imperative dd fyd* / *pa t he fyde of*, in subord cl *pa he hine fyde*) and as the adv in this position always received the stress this gave rise to a new stressed form But to the end of the ME period and often to 16cc in later both unstressed an I stressed forms were written *of* About 1400 the spelling *off* appears casually and usually (but not always) for the stressed form to which it gradually came in course of the 16th c to be appropriated (though *of* was sometimes used even in the 17th c) This emphatic form was restricted to the adv and the two emphatic senses of the prep which are akin to or derived from the adv (*he off's 4et off the table*' *hats off* *has he off the money?*) while the original spelling of (unstressed) prep M 1 4, 5, 7 is now accordingly usually colloq tally and in certain connexions to *o* (see O *prep*[2]) remains for the weak senses of the preposition Thus *of* and *off* are now rank as different words]

General Signification The primary sense was *away from*, a sense now obsolete, except in so far as it is retained under the spelling OFF All the existing uses of *of* are derivative, many so remote as to retain no trace of the original sense, and so weakened down as to be in themselves the expression of the vaguest and most intangible of relations The sense history is exceedingly complicated by reason of the introduction of senses or uses derived from other sources, the mingling of these with the main stream, and the subsequent weakening down, which often renders it difficult to assign a particular modern use to its actual source or sources From its original sense, *of* was naturally used in the expression of the notions of removal, separation, privation, derivation, origin or source, starting point, spring of action, cause, agent instrument, material, and other senses, which involve the notion of taking, coming, arising, or resulting *from* But even in OE, this native development was affected by the translational character of the literature, and the employment of *of* to render L *ab*, *dē*, or *ex*, in constructions where the native idiom would not have used it Of far greater moment was its employment from the 11th c as the equivalent of F *de*, itself of composite origin since it not merely represented L *dē* in its various prepositional uses, but had come to be the Common Romance, and so the French, substitute for the Latin genitive case Whether *of* might have come independently in Eng to be a substitute for the genitive is doubtful In the expression of racial or national origin, we find *of* and the genitive app. interchangeable already in the 9th c (tr Bæda's *Eccl Hist* III xix, Wes þes weer *of* þæm þeodestan cynne Scotta = *de nobilissima gente Scottorum*, Ibid III xxi, Se nyhsta wæs Scyttisces cynnes = *natione Scottus* se wæs eac Scotta cynnes = *de natione Scottorum*), and this might have extended in time to other uses, but the great intrusion of *of* upon the old domain of the genitive, which speedily extended to the supersession of the OE genitive after adjectives, verbs, and even substantives, was mainly due to the influence of F *de* Beside this —the most far reaching fact in the sense history of *of*—the same influence is also manifest in numerous phraseological uses, and esp in the use of *of* = F *de*, in the construction of many verbs and adjs Many of these can be clearly distinguished, but, in other cases, the uses derived from F *de* have so blended with those derived from OF *of*, giving rise again to later uses related to both, that it would be difficult, if not impossible, to separate the two streams, with their many ramifications All that can be done here is to exhibit the main uses of the preposition, and to show generally how

far back each of these is exemplified. It has not been attempted to classify or even mention all the vbs. and adjs. which *arc* or have been construed with *of*; examples occur under the chief senses and uses, but the construction of any individual vb. or adj must be looked for under that word itself, where also will be seen what other prepositions share or have shared the same function with *of*

a in the sense 'in the person of, in respect of being, to be, for' *arch*

The leading sb is the former of the qualification of which the phrase introduced by *of* constitutes a limitation thus 'he was the greatest traveller of a prince' = 'he was the greatest traveller in the person of a prince or so far as princes are concerned' The sense often merges on that of the partitive genitive 43.

b in the sense 'in the form of'

The leading sb is the latter to which the prec sb with *of* stands as a qualification = equivalent to an adj thus that fool of a man = that foolish man, that man who deserves to be called fool 'that beast of a place that beastly place.

IX Representing an original *genitive dependent on a verb or adjective*

Many vbs and adjs in OE were followed by a genitive case as an object or complement In Latin, also many adjs and some vbs were construed with a genitive regulated not by the form but by the meaning In early and Mod English by construction with *of* Such of these as now attach themselves closely in sense to one or other of the preceding branches of the genitive are mentioned But there remain many verbs and adjs after which *of* has hardly more than a construc nal force or in which it does not clearly fall under any of those branches Many of these come close in sense to branch VIII while others, esp the adjs often approach IV closely with the objective genitive in branch X It is convenient therefore to consider them here

29 In the construction of verbs.

a After intrans vbs Many of these in OE took the genitive, and are found with *of* in Middle and Early Modern English, but this is now rare, except where *of* fails in sense under one of the branches already treated instances are *to reek repent, rue, beware* (*ong le ware*) of Verls of sense, e g *feel, smell, taste, touch* (still with *of* in dial or vulgar use), verbs of asking as *ask / beseech demand, desire, entreat* and others e g *distinguish esteem, forget, like see* e, formerly construed with *of*, now take a simple object, some as *accept admit, allow approve, conceive, recollect, remember*, still have both constructions, with others, as *hope, look, thirst, wait*, etc *of* has been displaced by *for* or some other preposition

b After transitive vbs, the secondary or thing object is often introduced by *of* representing an original genitive Such are *balk, clear, deprive, disappoint, frustrate, acquit, absolve, blame, convict, suspect, possess, seize* (a person *of*), *avail, bethink* (oneself *of*), also with impersonal vbs, as *it repents me of*, and formerly with *ask, beseech, thank* (a person *of*, etc

30 In the construction of adjectives Besides those mentioned under the preceding divisions, many adjs are construed with *of* and an object, the following are representative of some of the chief groups *Joyful, prolific, ominous, redolent, liberal, lavish prodigal, scant, short, sparing capable, incapable, susceptible, worthy, unworthy, guilty, guiltless, innocent, certain, uncertain, confident, diffident, doubtful sure, aware, conscious, uncon scious ignorant, sensible, insensible careful, care less forgetful, heedful heedless, hopeful hopeless, mindful, unmindful, reckless, regardless, thought less, neglectful, negligent, observant, watchful ambitious, desirous eager, emulous, enamoured, envious, fond greedy, jealous studious, suspicious, skilful, indulgent patient impatient*, those in *ive*, as *apprehensive, communicative, descriptive, destructive, expressive, indicative, productive*, and some in *ic*, as *characteristic unattributed*.

Of-, *prefix*1, the prepositional adv OF, OFF, in comb , corresp to OS *af-*, ON *af* , Goth *af*, OHG *ab* , L. *ab*, Gr ἀπο , Skt *apa* , forming compounds of different ages

1. In vbs and their derivatives of Germanic or OE age, retained in ME , but now obs In these the original literal sense 'away, off' seldom survived even in OE the notion being supplied by the close union of particle and verb, having usually undergone a modification, extension, or transference of meaning, in which the original sense of the elements, esp of the particle, was obscured or lost Examples *ofhold* to hold from, withhold, *ofsake* to put away a charge, deny, *ofthink* to displease, grieve, *ofask* to ask for, get by asking, *ofclepe* to call for, *ofsend* to send for *Of-* frequently added to the verbal notion that of 'to do away with, finish off, destroy, kill', as in *ofslay, ofsting, ofstead*, of 'to injure, hurt', as in *ofsie, ofset, ofsit*, of 'to outdo or overcome', as in *ofride ofrun* Closely allied to this is the sense, in participial adjectives, of 'overcome or exhausted with the action expressed by the vb', as in *ofaken, ofsought, ofhungered, ofthirst* Words of this class which came down into Mᵉ will be found in their alphabetical places

In ME *of* before a cons was frequently reduced to *o, a* and thus identified in form with several other prefixes of different origin see A *prefix*6, and Do- *prefix*1 and cf AIDOWN, OF HUNGERED, A HUNGERED, OFTHIRST ATHIRST, etc

2 In later combinations of OF and ME. age, the sense of the two elements remains manifest, the particle being usually = F *de* in the sense it made loose, the particle being in vbs mostly separable, with its position depending on the syntax It was only in pples , verbal adjs , and sbs , that the com bination became more or less permanent. In the 16th c , *of-* in this connexion passed imperceptibly into *off-*, which is always the form in later combinations Hence these naturally attach themselves to Off- *prep*, under which the ME examples.

Of-, *prefix*2, in ME appears sometimes to represent an earlier *a* Of *of-* being often phonetically reduced to *a* , there arose a confusion between the prefixes, so that original *a-* was sometimes expanded to *of-* See OFFEAR, OFFRIGHT, OFGRAME, OFGRISEN OFKEN, OFSCUIE, OFWAKE (in some of which, however, *of-* may be original)

Of-, *prefix*3, in ME sometimes varies with *ofer*, OVER, from which it may be shortened Cf OFGO, OFHEAR, OFTAKE But this cannot always be distinguished from Of- *prep*1 in the sense 'outdo or overcome' as in *ofrade, ofrun*

Off-, *prefix* The adv *off* occurs in combination with verbs, ppl adjs, vbl sbs., and other sbs In earlier times, it was written *of* as explained under *Of-, pref* 2, but such of the N.E. compounds as survived into modern Eng were written *off*, which is the only form found in recent compounds. In verbs, generally the combination is very loose (see 1 below), in participles used as adjs the union is closer, and in vbl and other sbs it becomes permanent, though combinations of this kind can be formed at pleasure whenever the sense requires In a few cases, the combination is so specialized in sense, or otherwise important, as to require treatment as a main word In verbs, the stress is now usually upon the root, in the other classes (2 4) on *off-*.

1 With verbs, *off-* (ME. *of-*) enters into quasi combination, chiefly as a separable particle, like Ger *ab-* in *ab reisen, ab schreiben*, etc, in which the particle stands before the vb only in certain syntactical conditions In ME *of* was frequently put before the vb in the infinitive, as in *of glide, of hew*, and in this position (though usually written as a separate word in the MSS) is often hyphened by modern editors (*of-glide, of hew*) modern prose usage prefers the order *glide off, hew off*, but in the pples. the adv is still sometimes put first, and is then sometimes hyphened to the vb (as is regularly done in 2) Mf. examples are the obsolete *of cwell, of quell* (to kill off), *of-, off-drive, of glide, of hew, of hurl, of race* (to pluck or tear off), *of-rive, of shear, of-shred, of smite, of-swipe* (to cut off with a sweep of the sword),

of h.ar, of turn, of twitch of wrist (to twist off), *of wig* (to whip off). Later examples are *off chap, of- off shake, off-stand, off trench*, etc, but these are exemplified chiefly in the pa pple, where the hyphen may be regarded as simply syntactical as in 2. See also OFF-DRIVE, OFF-LOAD etc

Ohm ² (o m) *Electr* [From the name of the German physicist Georg Simon Ohm (1787–1854) who determined mathematically the law of the flow of electricity (*Ohm's law*)] The unit of electrical resistance see quots

1881 It was in this country that the term ohmad or ohm suggested by Sir Charles Bright and Mr Latimer Clark at the meeting of the British Association in Manchester in 1861 first came into use as the name of a decimal multiple of the absolute unit of resistance convenient for practical purposes. At the Congress of Electricians in Paris in 1881 the Ohm was unanimously adopted as an international standard. *Nature* 14 Feb. 352/2 568/1

1890 F. J. Pope *Electr. Tel.* iii (1892) 35 The Ohm is equivalent to about ⅘ of a mile of galvanized No. 9 iron wire. 1896 Preece & Sivewright *Telegraphy* 5 It is convenient to use a symbol to represent the ohm as we use ″ to represent degrees and minutes. The symbol used by us is the Greek letter Ω. Thus we say that the resistance of a wire between London and Birmingham is 150Ω. 1899 *Electr. Electr. Terms in Lightning* 3 Mar. Suppl. The Ohm is the resistance of a column of mercury of a constant section of one square millimetre and of a length of 1063 centimetres at the temperature of melting ice

Hence **Ohmad** = Ohm, **Ohm-a-meter**, an instrument for measuring electrical current and resistance, a combination of an ammeter and an ohmmeter; **Oh mic** *a*, pertaining to or measured by the ohm, **Oh mmeter**, an instrument for measuring electrical resistance in ohms

1866 R. M. Ferguson *Electr.* 151 This is called the B.A. Unit of resistance 1864, or an Ohmad. 1885 *Electr. -oid (oid), *suffix*, and mod. L. *-oides* Gr *-ειδης*, i.e. *-ος* of, element or connective + *εἶδος* having the form or likeness of, 'like', f. *εἶδος* form, cf. L. *-iformis* see -form (A parallel Gr formative was *-ωδης* see -ode.) Examples *αἰματοειδης* (*αἱματώδης*) 'like blood, of the appearance of blood, hæmatoid' *ἀνθρωποειδης* 'of human form, manlike, anthropoid.' In other mod. langs., as in Gr. and L., the *i* and *e* make distinct syllables (L. *anthrōpoides*, F. *anthropoïde*, Ger *anthropoid*); in Eng. also, some pronounce (ænθrɒ·pɔɪd), but the prevalent pronunciation of the suffix (and in many words, as *alkaloid*, *asteroid*, the only one) is with the diphthong (oi) as in *void*

Extensively used in scientific terms, taken from Greek prototypes, or formed on Gr (rarely L.) words. These are primarily adjs. with the sense 'having the form or nature of, resembling, allied to', but also (as sometimes in Gr.) sbs., in the sense of 'something having the form or appearance of, something related or allied in structure, but not identical.' The sbs. are esp. numerous in Mathematics, where, in imitation of *rhomboid* (Gr *ῥομβοειδὴς* approaching a lozenge (*ῥόμβος*) in shape, a rhomboid) and *trapezoid* (Gr *τραπεζοειδὴς* having somewhat of the form of a table (*τράπεζα*)), the suffix has been used to form the names of many geometrical figures

Examples —*adj.*) Anat. *adenoid, arachnoid, asyteno-coracoid, Axoid, hyoscoid, thyroid; Ecol. arboroid, anthropoid, ancroid, crinoid, echinoid, hydroid, ichthyoid, medusoid, spongoid, stoloid, wood-engraving*

The mod. L. *-oida, -oidea, -oidex, -oides, -oideus* (Eng. *-oidous*), are derivatives of *-oides, -oid*

-oidal. When the form in *-oid* is a sb., an adj. is formed in *-oidal* (see -al), as *conchoidal, cycloidal, rhomboidal, trapezoidal*, so *alkaloidal, asteroidal, fucoidal*, etc

The oils constitute a very large group of natural substances, of animal, vegetable or mineral origin. They are divided into three classes. (1) *Fatty oils* and *fats* (see Fatty 6 Fixed 4c) of animal or vegetable origin (in common with *fats*) are chemically triglycerides of fatty acids and produce a permanent greasy stain on paper, etc.; these are subdivided into *drying oils* which by exposure to air absorb oxygen and thicken into varnishes, and *non-drying oils*, which by exposure ferment and become rancid; they are used as lubricants as illuminants in making soap, and for various other purposes. (2) *Essential* or *volatile oils* (see Essential *a.* 5 b) chiefly f. vegetable sources, of animal origin which are acrid and limpid and form the chief or essential odoriferous principles of plants etc.; chemically they are hydrocarbons or oxygenated derivatives of hydrocarbons with resins etc.; they are extensively used in medicine and perfumery and in some cases in the arts. (3) *Mineral oils* which are chemically mixtures of hydrocarbons, and are used chiefly as illuminants.

Oleomargarine (*ō* lĕoɪma ɪgarɪn, -in) [f OLEO- b + MARGARINE. Often mispronounced mā ādzərĭn), as if spelt *margerine*]

A fatty substance obtained by extracting the liquid portion from clarified beef fat by pressure, and allowing it to solidify, with the addition of butyrin, or more or less admixture of butter, milk, etc. and sometimes of refined lard, in forms in substitute for natural butter. Formerly sold as *butterine*, but now legally called in Great Britain (also in France, Germany, Denmark, etc) *margarine*

In U S, *oleomargarine* popularly *oleo*, is the recognized name of the commercial product the expressed fat being designated as *oleo oil*

The name *oléo margarin*e was applied as early as 1854 by the French chemist Berthelot (*Ann. Chim. Phys.* XLII 21) to a fat obtained by solid substance obtained in 1838 by Poloure and Boudet (*Comptes Rendus* VII 663) from olive oil, which was regarded as a combination of the *oléine* and *margarine* of Chevreul and Berthelot (see MARGARIN.) According to the view then held, *oléine* margarine and *stearine* were regarded as the essential co stituents of animal fat, of butter or the fat of milk consisting chiefly or exclusively mainly of *oléine* and *margarine* with a small amount of butyrin a d lled principles M Mège Mouries in 1869–71 experimented on the artificial production by the extraction of the oleine and margarine from animal fat with subsequent processes for the addition of butyrin, etc. Hence the name *oléo margarine* for the supposed combination of oléine and' margarine thus extracted As further research has shown that neither the *margarine* of Chevreul, nor the *oléo margarine* of Berthelot are definite chemical substances, these names are no longer in chemical use, and oleo-margarine' has o by a manufacturing or commercial use for the fatty substance described above, or (as in U.S) for the artificial butter (MARGARINE) made from it.

1892 *Sci Amer* 26 Aug 129 Since 1869 M Mège has endeavored to utilize the oleine and margarine obtained on pressing animal fatty matters in the manufacture of stearine

General Sense — The preposition expressing primarily the relation of contact with or proximity to the surface of anything, and so that of being supported or upheld by it; also, from the earliest times expressing motion to or towards such a position, these two senses being as in the preposition IN) distinguished by the *case* of the word affected, the former taking, in OF , the *dative* (rarely the instrumental) for earlier locative, the latter the *accusative* or case of motion towards. But the OE point of view often differed from the modern, so that the accusative was not seldom used where we should expect the dative and *vice versa* (See Wulfing *Syntax Alfred's Orosius* II §§ 784, 801, 821 In ME the distinction of case dis appeared, but *on* continued in both uses, the sense being generally indicated by the accompanying verb (e g to *lie on* to *lay on*), though not infrequently with ambiguity, to remedy which the sense of motion began in the 16th c to be indicated in case of need by the collocation *on to* now some times written *onto*, after the analogy of *into*

From the earliest times in the Teutonic langs this prep has been used in reference not merely to the upper surface or top of a thing, but to the front or any surface, from which it is distinguished by the use of *an aan*, e g *an der thür* at the door *an die thür* to the door), this was also the use in OE. But here *on* received a notable extension of sense, by being used to include also the notion of 'in', almost to the elimination of the prep *in* from W Sax and the dialects influenced by it (cf IN *prep*²) So in Early north Eng *on* still included the sphere of both 'on and 'in' (sense 6 but *in* was gradually restored , not, however, without the survival of many traces of the former prevalence of *on* , thence also a difficulty, in some of the transferred senses, in determining whether the startling point was 'on' or 'in' Eventually, not only was this extension in the direction of 'in' given up, but the language has shown a growing tendency to restrict *on* to the upper or at least the supporting surface, = F *sur*, so as to correspond in use rather to *auf* than *an* in German, this comes out strongly also in the transf and fig senses in which *on* indicates the basis or foundation of action, feeling, etc. In OE when the upper surface was specially in view, *ofer* was sometimes used, but the notion was usually expressed by the combination *uppan uppon* (= *up* + *on* cf ON *uppá*) When in course of time, *on* itself came to be more associated with the upper surface, the distinction between *on* and *upon* gradually faded away and *upon* may now be used instead of *on*, in positions into which no notion of *up* enters (see *Upon*) These changes in the sense territory covered at different times by *on* make the historical and logical order of the senses difficult, and the following arrangement is in many respects provisional Even the primary division into senses implying position and those implying motion or direction is difficult to carry out in the figurative senses, in some of which the point of view has gradually changed since they first arose, so that what was originally felt to express a direction of the mind towards something is now felt as a static attitude or mental state

1. Old verbal compounds, as *onbidan* to Onbide, *oncnáwan* to recognize, Acknow Such of these as survived the OE period appear in their alphabetical place under On- or A-

OE. *an* became in regular course in south and mid dial *ān*, exemplified before 1200. By 15th c., *ān, oon*, in S. and west, had developed (through *on uon, wun, woon, wunn*) an initial w. The s w pronunciation of *one*, upon which only occasionally appears in the spelling (see A below), but is now the standard pronunciation The first orthoepist to refer to it was Jones 1701 earlier grammarians, down to Cooper 1685, give to *one* the sound that it has in *alone, atone*, and *only*. Dyche in 1710 has (*on*) beside (*wun*). In the north, *ān* became *ēn*, *ēn*, but through the narrowing of orig long *ā* to (*ǣ, ē, ẽ, e9, ie, ɪə*) *ān* has sunk in dialectal utterance through *ane*, to *eane, ean, yan, yen*, the development of (*yen*) in the north being the counterpart of that of (*wɒn*) in the south In OE, *ān* had the full adj inflexions, definite and indefinite, remains of which persisted in the south to *c* 1300, and in Kent still later (see A 6). but, in mid and mod. Eng., the uninflected *ān, on*, with the definite form *ane, one* (OE. *āna, ǣne*), is found in the accus. and dative, as well as the nom by 1200 Already also, *ān, ōn* were reduced before a cons to *ă, ŏ* (*oo*), which did not die out till the 16th c.

In the north the separation of *ān* and *ā* was more permanent: at the present day in Sc. the full form *ane, eane*, etc. is only used absolutely or in the predicate *ae ane*, in the attrib. form before cons. and vowel alike *ae dyr ae yer, ae hat ane*, so in north Eng dial. with *yi* and *yin*. From the early *an a* pronounced proclitically without stress, arose the indefinite article AN A, q.v. In northern dial the numeral and article were long written alike the stress emphasis alone distinguishing them in 16th c. So both were written *ane* (See *And*.) 3 And.
