T.). In early ME, Ormin had still *pennenng*, but the usual ME form after 1200 was *peni*, *peny*, from OE. *penig* The forms with double *n* in OE. were chiefly Northumbrian, in ME. *pennie*, *penny*, with *nn*, was app not used till the 13th c. OE. and early ME had also, usually, like OFris., forms in *pasw* . In ME. the plural *penegas*, *peneyes*, preserved from *penes*, *pennus*, *pennis*, *penis*, to the 14th c. *pans*, *pens*, the latter only spelt in 16th c. *pence* But, beside this, the fuller *penys*, *pennys*, *pennies*, continued in restricted use see the forms in A 2 *B*, and signification in B 1 c.

The OE. and cognate forms point back to the types **panning, *pandling, *panning*, a series which does not conform to any phonetic law, but suggests that the word was foreign and of unsettled form. But it was evidently of WGer, or even (unless the ON was borrowed from OE.) of Common Germanic age. No foreign source however is known; and the suffix *-ing*, occurring in other names of coins, as *shilling, farthing*, OHG *chesuring* etc., bespeaks at least a Teutonic formation on a radical element *pand* or *pan(n)*. This has been sought in WGer **pand*, OHG *pfand*, Pawn, with reference to a possible use of the *pandling*; and in WGer. *panna*, Ger *pfanne* Pan, with possible reference to shape. Of these words themselves the Germanic origin is uncertain.]

A *sb* A verse or line consisting of five feet.

1 In Greek and Latin prosody A form of dactylic verse composed of two similar halves (penthemimmers), each consisting of two feet and a long syllable (thus equivalent to a dactylic hexameter with the second half of the third and of the sixth foot omitted), in the first penthemimer each of the two feet may be either dactyl or spondee, in the second they must both be dactyls. Most commonly used in alternation with hexameters, constituting *elegiac* verse see Elegiac A 1

The name arose from a supposed division of the verse as two dactyls (or spondees), a spondee, and two anapæsts.

1589 Puttenham *Eng. Poesie* I xxiv (Arb) 64 Elegie was in a plaintiue manner of verse deuised Penta meter, after a lusty Exameter, which made it go dolourously more then any other meeter 1795 Watts *Logic* III ii § 3 Certain Latin words should be in the form of hexa meters or pentameters and this may be done by those who know nothing of Latin or of verses. *c* 1805 Coleridge *Mis. Bedford *Temple Mus* vi 114 Odes and Hymns in several kinds of Verse some were Pentameters 1799 *Pocur Prov Numbers* 39 The Cæsura falling constantly on the fourth Syllable in the English Pentameters or Heroicks, creates a dull Uniformity in the Flow of the Verse. 1886 Briggs *Messianic Prophe* xi 340 The pentameters use quite frequently the divine name Adonay Jahveh.

Per-, *prefix*[1] The Latin preposition *per* (see prec) used in composition with verbs, adjectives and their derivatives A large number of these have come down through Fr and Eng others have been adopted directly from Lat or formed in Eng on Latin elements, or (as was frequent in 16–17th c) on words already in Eng use The following are the chief uses in Latin and English

I As an ety mological element In the senses

1 Through, in space or time; throughout with verbs (and their derivatives), as *perambulate* to walk through, Perabb late, *perf rd* e to bore through, Per forate, *perforce* to go through Per sist, *perservere* to watch through Perrigilate; formi g adjs. as *persist* having g a way through Perv us.

2 Through and through thoroughly completely to com pletion to the e d with verbs (and derivat ves) as *perfective* to do thoroughly complete Perfect *persuade* to change throughout or completely Perfect, *perfervere* to lis terrate, *perturbate* to Perturb so Perse, etc

3 Away entirely to destruction to the last with verbs (and derivatives) as *perdevor* to do away with destroy (Perdition) *pere e* to go to destruction Perish *perverti* to turn away evilly Per rant *per vibe* to take away entirely destroy an inlaid (Law) writ (v).

4 Thoroughly perfectly, extremely very with adjs. and advbs. as *perfect* a very sharp Peracute *perdiligent* very diligent, Perguilery, *per* Pure Perwhite, *perfervently* loo in Eng w th derived sbs. or their analogues) in sense very great extreme, as *perdility*, *etc peradventu ence*

II In *Chemical* nomenclature (From 4 above)

5 Forming sbs and adjs denoting the maximum (or supposed maximum) of some element in a chemical combination, esp

a With names of binary compounds in ide (formerly *uret*), designating that in which the element or radical combines in the largest pro portion with another element, e g Peroxide Per chloride († *perchloruret*) Per iodide, Persul phide († *persulphuret*) q v Also **peroxymide** (†**perbo muret**) a compound of boron with another element or radical, in which the bromine is present in larger proportion than in other com pounds so *percy anide* († *cya nuret*) *perphosphide* († *phosphuret*), etc Hence in derivative verbs, etc as Peroxidate, oxidize, *perphosphuretted* etc

This use of *per* was introduced in 1808 by Dr T Thomson in his *System of Chemistry* and is for combi nations of oxygen with a metal, *peroxide* being used to indicate that the metal is thoroughly oxidized as contrasted with a much oxygen as possible see Peroxide. It was subsequently extended to combinations of other ele ments, as Perchloride etc In strict chemical nomen clature names in *per* 1 are best restricted to the proper seded by those with more definite numerical prefixes (e g *peroxide of manganese* by *manganese dioxide*), by others in which the constitution of the substance is differently expressed (e g *perchloride* and *protoxide of iron* by *ferric chloride* and *ferrous oxide*). But the *per* compounds are retained in some ases especially in popular use.

b With adjs in ic, naming oxides, acids, etc., designating that compound which contains the greatest proportion of oxygen (and consequently the least of the element named, as **perboro·mic** *acid* hydrogen perbromate, $HBrO_4$, **perbro·mic** *acid*, H_2CrO_5, **perchlo·ric** *acid*, Iridium peroxide IrO_2, **perni·tric** *acid* HNO_4, **pero·mic** *acid* (= *oxide*), OsO_4, **perruthe·nic** *acid* (= *oxide*) RuO_4, etc See also Perchloric, -iodic, Manganic, etc. Also in names of the salts of these acids, and analogous bodies, as Perchlorate Iodate, Manganate, sulphate q v *perchro mate*, *perri date* *perni trate* *perphosphate* *per ti tanate* etc.

Many of these also are now abando ed for names other wise formed; e g *peruitrite of iron* of 1 *cyanog* no v *ferric* and *mercuric nitrate*

Formerly *per-* was also prefixed to adjs. in -*ous* where *hypo-* is now used, as *persulphurous* = Hyposulphurous so *pernitrous*, *perphosphorous*

3 Qualifying a statement so as to express possibility with uncertainty It may be that, maybe, haply = PERADVENTURE *adv.* 3, PERCASE 3, PERHAPS 1 Used with the subjunctive mood or its equivalent (perchance there may, might, would be), with the future indic (perchance there shall or will be), with the pres and past tenses indic. (perchance there is, was, has been, etc.)

In a clause dependent on a contingent and *perchance* may be taken as 1 1 and 2 in its literal sense of by chance, there may might would by chance be, but in the statement is made contingent by *perchance* and we can not there substitute by chance the meaning being it may chance to be the fact that there is was or has been This is also the case when the statement itself be a future and so subject to contingency the use of perchance is somewhat transitional between 3 and 2. The loss of the subjunctive influence in Eng. and the levelling of this mood in form under the indicative makes some early examples of the past tense doubtful between 2 and 3 thus the statement it might mean 'perchance they might have and it may have been in this way that a practise originally *Forte* has come to be used as 'perhaps' Of also the development in 2 it may be that he is here may be is here and (*dial.*) he is maybe here

c *Instrument of percussion* a musical instrument that is played by percussion or striking

A small number of technical Greek words in περι were adopted in ancient Latin more were added in late and mediæval Latin most of these are represented in the modern Roman languages and in English (see Pericardium Pericarp Period Peripatetic Periphery Periphrase Peripleus Peristyle Peritoneum) a l on the model of these adaptations of ancient Greek compounds in περι, and new compounds from Greek elements (frequently also from Latin elements) have been introduced in great numbers in modern scientific Latin (esp. in biological nomenclature) and in the scientific terminology of the modern languages generally, in which *peri-* has been found to be a convenient prefix for denominating the structure or region lying round a defined organ or part. Most of these terms are (with the appropriate modification of form) of internatio al currency and it is often difficult to ascertain in which of several languages a particular term was first used.

The more important words (including those of historical standing and those in recent less general use will be found in their alphabetical places; terms of less importance or none exclusively technical are follow by brief

(See note to PERIWINKLE[2])

The derivation of L. *pervinca* is not clear some connect it with L. *pervincire* to conquer completely with various sug gested explanations. Cf sense 2]

1. The common name of plants of the genus *Vinca* (N O. *Apocynaceæ*), esp of the two Euro pean species, *V minor* and *V major*, the Lesser and Greater Periwinkle, evergreen trailing sub shrubs with light blue starry flowers, varying in *V minor* with pure white

In early times a garland of this flower was placed on the heads of persons on their way to execution with which some have connected the lt name *fiore di morte* flower of death.

6 Const *to* (cf *real* & *a.*) originally, in *personal action* (or *plea*), an action wherein the claim was not the restitution of a specific thing (since the thing might be destroyed concealed, or transported beyond the reach of the law) but the recovery from the person concerned of compensation, i e of damages, distinguished from a *real action*, which claimed the restitution of the thing itself (being something indestructible and irremovable), and from a *mixed* action in which both restitution and damages were demanded. (This distinction is *Obs*, real actions having fallen out of use early in 17th c., and been formally abolished in 1833. See Sweet *Dict Eng Law* 24) Hence

b *personal property* (*estate*, or *goods*), things recoverable in the personalty or by a personal action, i e chattels and chattel interests in land, etc., as opposed to *real property* (*estate*, etc), i e things recoverable in the realty, or by a real action, viz land (in the legal sense see Land 4 c), and rights attached to the possession of land *Personal property* therefore includes generally all property except land and those rights attached to land which are on the owner's death to his heir, corresponding in general (though not entirely) to the *movables* of Scotch, Continental, and Anglo-Indian law

Personal and real action represent L. *actio in personam* and *actio in rem*, the former a term which distinguished by the nature of the right thereby asserted the terms were taken by Bracton into English Law but employed with various modifications and additions according to the process of execution obtained, that is, in reference not to the right asserted but to the relief afforded thereto The thing sued for in *personal action* was restitution of a specific thing which the law was always able to lay hold of and hand over, this limited it to land and rights recoverable in or in respect of land. But land and its rights were hereditary possessions, according to the original application of these words, but according to the rule which had been established as to the descent of these rights severally Thus leases, of whatever duration, as well as mortgages and securities for money affecting lands or heritable property, which in Scotland are themselves heritable and descend to the heir in England go to the personal representative, and are classed as personal estate. [*Note.* The phonological relation of *pause, pyne, pew*, to OF *pose, puie*, offers difficulties. For the sense, cf 16th c. IV 27, 8 July 1905.] These point to the series of senses base or raised structure to mount or stand on, raised place to stand on in making a public speech or proclamation, 'stump ; rostrum ; esp. in a church, a raised lectern, reading-desk, pulpit, or the like; whence, generally, place elevated above the floor for any purpose ; particularly, sitting place on a raised base. But it is not impossible that this last sense, which seems to be peculiar to Eng , may have originated in that of 'balcony, balustrade' (see the Etymology), esp if the name was first applied to a range of seats raised against the wall.]

PH, a consonantal digraph, having usually the phonetic value of F. It was the combination used by the Romans to represent the Greek letter Φ, φ or φ, named *Phi*, *Phī* This letter, cognate with Skr *bh* (and so with Germanic *b*) was in early Greek written ΠΗ, and was a real aspirated *p*, it was subsequently often written ΠΦ, *πφ*, and had then prob. nearly the same sound as German *pf* but by the second century B C it had sunk into a simple sound, prob. the *bilabial* spirant (the sound made in blowing through the lips) As the Roman F was dentilabial, like mod Eng *f*, the Romans in earlier times represented the Greek Φ not by F, but by PH, in the time of the Emperor Severus, however, the two began to be confused, and from *c* 400 were treated as identical Hence in late popular and mediæval Latin, and in the Romanic languages, *f* was often substituted, as it is now regularly in Italian and Spanish (e g *fantasma*, *filosofia*, *fotippo*, *fotografico*) This was also the case to a great extent in Old French, and in Old and early Middle English (see PHARISEE, PHILISTER, PHANTOM, PHEASANT), but there, under the influence of the Latin forms most words so written were subsequently altered back to *ph*, the preponderance of which is particularly notable in Gower Exceptionally the *f* remains in mod Eng, as in *fancy* (= *phantasy*) *fantastic* In all modern words of Greek derivation (e g in *phano*, *philo*, *photo*, *phono*-, *phreno*-), but alone found.

One co sequence of these conditions was that in the 15th 16th, and 17th *c* *ph* was frequently substituted for *f* in words not of Greek origin esp in words that were some what rare the scribes apparently taking *ph* as a more learned and thus presumably more correct spelling Many instances of this will be found under F and a long the cross references given below as in *phalucce phan phance phang pharman ph lasor philtorte, philimot* etc This spelling is often retained in *phlebe = flibe* and in certain interjections *phew! pha! pho!* where perhaps it may have been adopted to express the simple bilabial (lip-breath) consonant the sound made in blowing as distinct from the labio-dental Modern pl onunciats e g Mr A J Ellis in his Palæotype have used *ph* as the symbol of the bilabial sound Greek had the initial combination φ-, in Roman spelling *phth* This was difficult for the Romanic nations, and in the only early word of this character, *phthisicus*, was reduced to *th*, or simple *t* as in PHTHISIC, etc. In mod.E words it *phth* are now normally pronounced *ft* in Eng the *ph* is generally mute and the *th* pronounced; but in scientific words and by scholars pronounce *ph* a combination which is quite as easy as *sf* in *sphere*

Th (pronounced f) is also used to represent Hebrew ם (without dagesh), and even initial ם (according to the Masoretic pointing with dagesh) n proper names which have come to us through a Greek form with Φ see PHARAOH PHILISTINE, SERAPH In Roman spelling of Indian languages *ph* represents the true aspirated *p* (ष of Sanskrit) and this is occasionally the origin of *ph* in alien words cf. PHULKARI
