Outlawry for debt was frequent down to the 18th c. Along with this extension of the process, its conditions and con sequence underwent continuous mitigation: in later times, in civil actions, it was reduced to the fact that the outlawed person was incapacitated from prosecuting an action for his own benefit though he might still defend himself
Clandestine Outlawries In civil proceedings outlawry has long been obsolete and was formally abolished by the Civil Procedure Acts Repeal Act of 1879 (42 & 43 Vict c. 59) While it was in use great injustice was often done in consequence of the insufficiency of the machinery for giving pul lic notice of the fact that a defendant in a personal action had as a result of civil process, been made an outlaw 1879 Act 31 Eliz c 3 was passed 'for the auoyding of secret Out lawries in Actions Personall against the Queenes Subiects This being subsequently considered inadequate remedying measures were introduced and one such bill has had the singular fortune to become the formal instrument of assert ing the right of Parliament to proceed to outlawry without reference to the immediate cause of summons by being in troduced and read a first time as the first business of every session before the reading of the King or Queen's Speech This precaution goes back to early times, being referred to as an established practice in 1603 Formerly some one bill was used for the purpose on each occasion; but since 1 Dec 1743 the means uniformly employed has been a Bill for the more effectual preventing Clandestine Outlawries in per sonal actions and this is still annually introduced without the outlawries against which it is directed have long disappeared

Out of (au tʃv) *prep phr* Also 1-4 ût of, 4 out o, (7- o) 4 7 out o, 4-6 oute, owt o of (long; and still in writing, two words, viz the adv Out followed by the prep Of (in its primary sense = from) In analysis *out of* is precisely on the same level with the obs. *down of*, *up of*, and the current *forth of*, *out from*, *out to*, *down from*, and other instances of an adv followed by a prep which defines its relation to an object. But in OE as in Ors and the Scandinavian langs *ût of* (Obs, ON *út af*, Sw *ut af*, Da *ud af*) became the regular equivalent of L *ex*, Gr ἐξ, *ex* (while Ger and Du used the adv itself as a prep), *out of* has thus acquired a unity of sense and also of pronunciation which entitle it to separate treatment, whereby also its own sense development can be more distinctly exhibited

The history of *out of* is partly parallel to that of *in to* with the differences that the latter is now written *into* as one word and that *out of* is the opposite not only of *in to* but also of the static *in*. One reason why *ût of* has not needed t be written as one w rd may be that the distinction now made between *into* and *in to* is in the case of *out* expressed by *out of* and *out from* thus tl ey came in to me into my house, he went out from me, out of my house

2 A contrivance used in the Indian and Pacific Oceans to steady the native canoe and prevent it from capsizing Formerly called OUTRIGGER, q v
A common form consists of a boat shaped block of wood or hull so built parallel to the length of the canoe and joined to it at each end by long bamboo poles Sometimes one sometimes two of these are used
1768 *Journ Voy round World* 311 The frame is intended to prevent the canoe from oversetting 1769 *Falconer Dict Mar* The most usual boom and outriggers are all made of bamboo 1777 MORTON in *Phil Trans* LXVIII 174 They are all mounted by a single hull with a sail and an outrigger on each side, to prevent their oversetting. 1836 J W FOX *Pyne Wks* 1864 IV 163 Sixty or seventy Rafts, Hulks etc with outriggers. 1865 [THOMAS] *Pechuel Loesche* xiii (1869) 427 They use canoes fitted with an outrigger
3 An iron bracket, hinged to the side of a rowing boat, bearing a rowlock at its outer edge, so as to increase the leverage of the oar while allowing the boat to be constructed very narrow **b** A light boat fitted with such appendages, an outrigged boat, colloq abbreviated to *rigger*
According to the Badminton book on Rowing, outriggers were introduced on the Tyne between 1830 and 1840; they were first seen in London and at Oxford and Cambridge, in 1844 5 an outrigger boat was built for the Cambridge crew for the University Boat race of 1845 but not used till the next year when both crews rowed in outriggers (April 3)
1845 *Illustr London News* 29 Mar 205/2 New Boat (for Cambridge crew). She is an outrigger, built on the same principle as the boat brought from Newcastle by the Claspers, and used at the Thames Regatta. 1848 *Vice Chancellor's Royal Boats Oxford* 3 Nov. 1794 T DAVIS *Agric Wilts* 69 The waggons seldom use any overlays or outriggers, either at the ends or sides.
5. *Building* and *Mech* Applied to various structures placed so as to project from the face of a wall, a frame, etc, e g a beam projecting from a wall to support hoisting tackle, the jib of a crane, a wheel or pulley outside the frame of a machine for the communication of motion, etc
1835 *Ure Philos Manuf* 51 The steam or impelling pulley frequently called the outrigger, which is placed out from the side of the machine like outrigger sails in a ship 1839 engineers 1863 *Q Jour Sci* CXIV 311 Another plan for this is inserted under the bottom and below the sur pl aform by a chain inside the tower and straps of iron out side and great shores from the outriggers of the lower platform completed the cradle in which the building was supported
6 An extension of the splinter bar of a carriage, to admit of a second horse being harnessed along side of that to which is in the shafts, hence, An extra horse running outside the shafts
Outriggers were also used with heavy gun carriages

7 *fig* An outsider, not a regular member, an onhanger
1852 H S SPENCER *Sports & Past Ime* (1878) 177 It generally drew the picked men from each to say nothing of outriggers and chance customers

Over- is used with adverbial, prepositional, and adjectival force, in combination with sbs., with adverbial and prepositional force in comb. with verbs, with adverbial force in combination with adjs., advbs., and prepositions. Its combinations are therefore exceedingly numerous, and, from the wide range of its meaning, very diverse in character The following are the chief classes, but many words have senses falling under two, three, or more of these, and there are individual words in which the original sense of the prefix is so modified that it is difficult to assign them to any class. In some of its uses, moreover, *over-* is a movable element, which can be prefixed at will to almost any verb or adjective of suitable sense, as freely as an adjective can be placed before a substantive or an adverb before an adjective. Although usually hyphened or even written as one word, such combinations are hardly dictionary facts they are really syntactic combinations which make the use and construction of *over* in the particular position more clear and obvious. In some of these combinations, however there is a closer unification of sense, and others have a long history which it is desirable to show. All important combinations of *over*, therefore, including such as occur in more than one sense, and all such as seem to require explanation, are treated as Main words in their alphabetical places of the unimportant or obvious ones, examples are here given under the classes to which they belong, with a few illustrations, but no attempt is made to enumerate all that have been used, much less all that are possible

Over- (like *ufar* in Gothic *ubar* and *ober-* in OHG. *ohar* in OS. *ubar* in Ger., *over* in Du. *ofer-* *ofr-* of in ON.) was already in OE. used in comb. with vbs. as *ofercuman, ofercuman, ofercuman, ofercuman, ofercuman*, with abs. as *ofereldorman ofercræft, ferngel ofersiȝ, ofersmirt ofersiȝfu, ofersmirtfulnes, ofersmirtlic, ofersmirtlice, ofersmirtlicnes, ofersmirtlice ofersfull fremicel* also in adjectives formed from adjs. and in derivatives of phrases as *ofersmirtlic ofersmirtnes* from *ofer se.* Many of the OE. compounds are still in use but the more part failed to live into ME. and the great majority of existing *over-* combinations are of later forma tion since the Conquest.

For the original stress of verbal and nominal compounds respectively, an I later modifications, see OUT. As *over* is of two syllables when it is necessarily a subordinate element, or even in verbal compoun ds, where the main stress is on the root syll.le. This rises in sense 29 to a distinct secondary stress, developing to ˌ *g over-hand* bend too much. From *overbe ard* bend over. In verse the unstressed *over* is often reduced to *ov'r* a single stressless syllable as *ov'r he ad ov'rhead ov'r hill ov'r sea* with main or secondary stress It is not properly reduced to *o'r-* unless the position allows the stress to be retained as in *o'r-rena mowred o'r-run c'r-sise o'r-run mption o'r-reple tion.* See senses 27, 30.

1. Local, temporal, and temporal-local senses, and in uses directly related to these

1. With verbs, or with abs. forming vbs., in the sense 'over in space on high, above the top or surface of,' as OVERBROOD, CANOPY, DROP, HANG, SOAR etc. Also (*b*) in sense of 'rising above, overtopping,' as OVER RISE TOP, TOWER, and (*c*) with the sense of position implying other notions of which it is a condition or element, as OVERLIE, OVERLOOK. Opposed to UNDERWENT which see.

The compour t verb is equivalent sometimes to the simple vb with a pr adv as in OVERLAY to lay (something) over or more freq ently to the simple vb. (usually INF.) with *over* prep as in OVERHANG to hang over (something) OVER LIE to lie over or above (something) but in many cases, as OVERLOOK it is difficu lt or impossible to distin guish clearly.

27-30 With the sense ‘to excess, too much, too’ Now a leading sense of *over-* in combination with verbs, adjectives, substantives, and adverbs.

In mod Eng very common with a negative (esp. in adjs. and their derivatives) as in *not over-ea sy not over-obliging* &c *was not over pleased with the result* in which *not over* is said by litotes for ‘not quite enough’, ‘somewhat deficient’) *not over-ea sy* — rather wanting in manners.

This sense was not approached in Gothic by such *ofer-full* ‘full to overflowing’ and the vb *ofarwahsnan* to grow exceedingly (repr Gr *περισσεύειν*) it was frequent in ON expressed by *ofr-* of, before adjs. nouns of quality and action, rarer with vbs. occasional in OHG. *ô bar-zaan, ubar-trunchan, trenkan ubar-fullî* of MHG. *ubervol* In OE. it occurs in many adjs a few vbs and numerous derivative or other sbs. In OF and the cognate lang. *over* was in true combination its generalized use in mod Eng renders it much more a distinct element, first merely in syntactical combination so that except in a few words of old standing it is usually hyphened to the w rd which it qualifies.

In verbs, there is a distinct secondary stress in *over* which may in case of ambiguity or emphasis become the main stress. Adjectives, participles, and adverbs have normally even stress *o ver-a pt over-ab le wi ss over wo rry over -often* either stress being liable to be subordinated according to the construction and emphasis. Thus *an o ver a pt scholar we think him over a pt we want culture, not o ver-cu lture* In this sense *over* is rarely contracted in verse to *o er* and properly only where the stress can be retained as in *o er-rena mmered*.

27 With verbs (or with sbs. or adjs. forming verbs) A few occur in OE. e g *ofercôm, -ðrencan,*

-draucan, -fyllan, -sueuan, -spreccan (some of which however only approach this sense, or can be otherwise explained). Overtake (*ō vəɪtā·k*), *v* [Early ME. f. OVER 14 + TAKE *v*, q. v. for Forms.

Overtake is the earliest exemplified of a small group of synonymous vbs , including *overcome*, *overhent*, *overget*, *over catch*, in all of which the second element means *take* or *catch* ; the original application being apparently to the running down and catching of a fugitive or beast of chase of the synonymous 'catch up' The sense of *over* is not so clear *A priori* we might explain it as 'to *take* by OVER running, or by getting *over* the intervening space and compare *ar ernach* = reach *over* or across a space But it is doubtful whether this was the original notion Beside these *tak.* verbs, a fig sense of *overtake* (viz. 4 below) was expressed before 1000 by *overgang* and *overgo* , but in these *over* can be explained in the sense 'down upon (OVER 7), so that their orig sense would be descend or fall upon The sense of 'overtake' was expressed later also by *overhie overrun*, *overhale*, *overhaul*, but these prob. imitated *overget* or *overtake* In Early ME. *overtrip* and *overget* had the parallel forms OFTAKE OFGO which seem to have been the strictly southern equivalents *ofTake* being actually exemplified earlier than *ar ertake* ; the relation between *of* and *over* here, as well as in OFTHINK, OVERTHINK, has not been clearly determined]

The OTeut *aig*, *aih-*, answers to a pre Teutonic *aik*, ablaut-grade of *ik*, the original stem of the present of Ner *ic* to possess, own This vb now survives only in Eng. and the Scandinavian langs (Sw *aga*, *ega*, Da. *eie* to own, have) In Eng it has undergone much change both of form and sense. The original preterntive inflexion of the present tense (*āh*, *āht āhz*, *āh*, *āgon*) began to be lost early and early M to be supplanted by the ordinary pres tense forms (e g 3rd sing, *āhß*, *owe*ß, *owe*ß, *awes*, *owes*, pl *āgaß*, *agē*, *agē*, *owe*th, etc), and in mod Eng the tense is entirely thus levelled, *owe owest*, *owes*, *-eth*, *owe*. The OE. pa t *āhte*, ME *āhte*, *āhte*, survives as *ought* , but before 1200 this began to be used (in the subjunctive) with an indefinite and hence present signification, a use of many langs, sense, and thus gradually came to be in use a distinct verb from *owe* (for which see Ought v) ; its function as pa t of *owe* being supplied in 15th c by *owed* The orig pa. pple. in all the Teut. langs became an adj, of which the mod Eng form is Own *a* , but as a pa pple Ob. *āgen* was still used in 16 17th c. as *owen*, *owne* A later pa pple. *auchē*, *aughē*, conformed to the orig. pa t, is found from the 14th c see Ought v 7 The current pa pple is *owed*, so that the whole verb has now the ordinary weak conjugation *owe*, *owed*, *owed* The change of signification from *habere* to *debere* can be best traced in the scheme of senses below, but the primitive sense 'have, possess' is not yet extinct in the dialects, which use *ow* or *owe* = *own*, and have not entirely lost the connexion of *owe* and *ought*

Ought, being now in Standard English practically a distinct word, has been fully treated in its alphabetical place, and is not dealt with here, but, for the historical development, the two articles Owe, Ought, should be read together]

II To have to pay

This branch and the next were expressed in Old Engish by the other Teutonic langs by the verb *sculan* (see Shall), which in Eng. (Goth *skal*, *skulda*) has undergone a modified Engl. sense. The first traces of the mod use appear in the Lindisf Gos. which renders I *debere* where the Rushw like the later Ags Gosp uses *sculan* ; by the phrase *a.n dēbitor* I owe to have to pay Examples are wanting during the following two centuries to show the stages by which this was shortened to the simple *I aw* which in E and by 1175 is full use both in the sense to owe money) and to have as a duty to be under a leg tion (to do something ; in both takes the place of *Ob sculan* here also Ought v 2) The result was that *shall* gradually ceased to have the sense owe, retained that of obligation with a weaker force, and became mainly an auxiliary of the future tense ; while *I owe* often *owe*, *owe* in taking *debere* in its main sense has in Standard Eng. lost that of *habere* or handed it over to the regular Ows which shares it with *Have* and such Romanic synonyms as *possess*

2. A botanical words, in which *oxy-* is taken as the combining form of Oxygen (cf. Hydro-d), denoting either simply the presence of oxygen, as in Oxacid, Oxisalt, †*oxybase*, or the addition of oxygen to the substance denoted by the simple word, and thus practically – *oxygenated* or *oxidized* For special uses, see Oxychloride, Oxysulphate, and other main words A looser use is seen in **oxyalcohol** (or **oxy-spirit**, **oxy** or **oxygas**, **oxy hosuse-gas, oxy-ether**, terms applied (after Oxyhydrogen, Oxycalcium the flame produced by mixing the vapour of a spirit lamp ordinary house-gas, or sulphuric ether, with oxygen, so *oxy alcohol blowpipe*, *lamp*, etc , **oxy paraffin** *a*, applied to a paraffin lamp with arrangement for complete oxygenation of the flame

But the most frequent use of *oxy-* is as a prefix to names of organic substances, to denote a derivative or related compound in which an atom of hydrogen is displaced by one of hydroxyl (HO), in which sense the more accurate *hydroxy-* is now often preferred see Oxyacid 2

In earlier use often spelt *oxi-*, before a vowel sometimes reduced to *ox-*

The more important of the *oxy* compounds are treated as main words; the *oxy-* or rather *hydroxy-* organic compounds are unlimited in number, including e g. *oxy-* or *hydroxy-acetal* ($CH_3CH(OH)CH(OC_2H_5)_2$) *-aldehyde* ($CH_3(OH)CHO$) *anthracene* (=anthranuinone) *-benzene-sc-benzol* (= phenol $C_6H_5(OH)$) *-benzoic -camphor* ($C_{10}H_{16}(OH)O$), *-coumarin* ($C_9H_5NO_2$), *-cuprosamine* (= leucine) *-choline* (= betaine) *-cinchonine* ($C_{19}H_{22}N_2O_2$) *-cymene* (= carvacrol $C_6H_3(OH)$ *-dimorphine* (*morphine* $C_{17}H_{19}NO_3$), *-geranine* (= *oxylol neroi* (= allantoric acid), *-lanthopine* (= *thyl* = *thyl* = *thyl* (= formic aldehyde), *-morphine* ($C_{17}H_{19}NO$) *-naphthyl lamine* (or *-naphthylamine* $C_{10}H_9NO$), *narcotine* ($C_{22}H_{23}NO_8$), *-nurrine* (= betaine), *-phenol* (= pyrocatechin) *-phenyl* (C_6H_5OH); *-quinine*, *-quinoline* (= carbostyril) *-strychnine* ($C_{21}H_{22}N_2O_2$); *-sulphobenzoic -thymoquinone* ($C_{10}H_{12}O_2$), *-toluene* (= cresol C_7H_8O), *-butyl* etc

Also in the names of oxy- or hydroxy acids, as *oxy acetic* (Glycolic) *amygdalic -benzoic* ($C_7H_6O_3$), *butyric* ($C_4H_8O_3$) *-capric* (= $C_{10}H_{20}O_3$) *-chelidonic* (= meconic) *-choleic -cinnamenic* ($NH_2C_7H_5O(OH)$) *-cuminic* ($C_{10}H_{12}O_3$) *-gummik* ($C_6H_{10}O_{11}$) *-hippuric* ($C_9H_9NO_3$) *-isocrotic* ($C_4H_6O_3$), *-lactic acid* (= paralactic) *mandelic* (= phenyl glycollic) *-oncotinic* ($C_6H_5NO_3$) *-naphthoic* ($C_{10}H_7O(OH)$) *-phenic acid* (= pyrocatechin) *-picric* (= styphnic, $C_6H_2N_3O_7$ *-propionic* (= lactic) *-salicylic* (= gentisinic $C_6H_3(OH)_2COOH$) *-stannic* (= *tersiphlinic* ($Sn(OH)_4$) *-toluic* (C_7H_6O) *-toluamic*, *-toluic* (= cresol), $C_6H_3(CH_3)(OH)_2$) *-tremitic*, *-uric*, etc

The sixteenth letter of the alphabet in English and other modern languages, was the fifteenth in the ancient Roman alphabet, corresponding in position and value to the Greek *Pi*, Π, Π, earlier Γ, Γ, originally written from right to left ⅂, and identical with the Phenician and general Semitic *Pe*, forms of which were ⅂, ⅂. During its whole known history the letter has represented the same consonantal sound, viz. the labial *tenuis*, or lip unvoiced stop, to which the corresponding sonant or voiced stop is B, and the nasal, M. In English, the simple *p* has always this sound; but it is sometimes silent, as initially in the combinations *pn* , *ps-*, *pt-* (representing Greek *πν-*, *ψ-*, *πτ-*), and medially between *m* and another consonant, as in *Hampstead*, *Hampton*, *Sampson*, *Thompson*, *Dampster*, *Tompkins*, where it is not etymological, but has the function of indicating for the preceding *m* the short and semi-sonant value which *m* naturally has before pronounced *p* cf. *Simpson*, *crimson* (si mpsən, kri mpz'n), with *wimple*, *wimble* In words from Latin, such as *exempt*, *tempt*, *peremptory*, *assumption*, *consumption*, *redemption*, and some others, as *Humpty-Dumpty*, where the *p* is (so far as English is concerned) etymological or consciously derivational, there is generally in careful utterance an intention to pronounce it, resulting in an incomplete *p*, which we indicate thus tempt, ride mpt, but, in rapid or careless utterance, the *p* disappears, just as in *Ham(p)ton*, *Thom(p)son*

The digraph PH, *ph*, is used, in continuation of Latin usage, to transliterate the Greek letter Φ, φ, the phonetic value of which is now identical with that of F The words beginning with PH have thus the same relation to the P words proper that those in CH have to the C words; that is, they constitute an alien group, which, only for alphabetical convenience, occupy a place in the midst of the P words proper, between Pe- and Pi-.

Original P in Germanic or Teutonic represents an Indo-European B. But, *mutually*, B was of rare occurrence in Indo-European, and it is not certain that any of the words in which it so occurred were retained in Teutonic, where initial P was consequently very rare Of the Ob. words in P, a few were apparently Common West Germanic, a very few, Common Teutonic; of many of the remainder the origin is quite obscure, but the majority were manifestly adoptions within the historical period from other languages, chiefly from Latin Notwithstanding these extraneous additions, P remained the smallest initial letter (the exotic K, Q, not being counted) in the Old English or Anglo Saxon vocabulary, occupying less than half the space of I, and little more than two thirds of that of Y. Its relation to the other mutes, C (= K) and T, and to its own sonant B, is seen by the pages which these occupy in Toller's edition of Bosworth's Anglo-Saxon Dictionary, which are C 50, T 64, B 78, P 84 pages P might be expected to comprise a correspondingly small part of the modern English vocabulary; on the contrary, it is actually the third largest initial, being surpassed only by S and C, with which it forms a triad of gigantic letters, which include nearly a third of all the words in the dictionary. This result is mainly owing to the vast accessions from Greek, Latin, and the modern Romanic languages (chiefly, of course, from French), and especially to the enormous number of words formed with the Latin prefixes *per-*, *post-*, *pre-*, *pro-*, and the Greek *para-*, *peri-*, *pro-*, along with the PH group already referred to But, besides these, P has received great additions, not only in later times from Oriental, African, American, and other remote languages, but, during the Middle English and Modern periods alike, of a multitude of common, familiar, or lower-class words from sources which cannot be traced, often apparently from fresh word-formation. P thus presents probably a greater number of unsolved etymological problems than any other letter

I 1. The letter (pī). Plural Ps, P's, p's (pīz), *attrib* as *p-language*, a language which preserves original *p*, or substitutes it for other sounds, as Greek which has *wored* against *L. quinque*, or Welsh which has *pedwar* against OIr *cethir*, from **petwer*, L *quatuor*.

1 A wheel used for propelling a boat or ship as originally tried, consisting of or having a series of paddles or paddle-like spokes inserted in an axle, drum, or wheel, whence the name, but, eventually, having floats or paddle-boards fitted more or less radially round the circumference so as to press backward like a succession of paddles against the water. These wheels rotate on a horizontal axis, so that only the lower paddle-boards are under water, they are generally arranged in pairs one on each side of the vessel, in river steamers, sometimes single and placed in the stern

Petty called his suggested wheel with actual paddles a paddle wheel; but the term was app ovided by the inventors and theorists of the 18th c who wrote simply of the wheel or water wheel; rowing wheels, revolving oars etc. And at the eventual employment of the wheel will fit boards instead of paddles the name paddle wheel was at first felt to be inappropriate, but it gradually came in after 1815.

(*Note* The word in the preceding senses is known only in English, and in the Anglo-Latin *pegina*. The two main early senses were 'scene' and 'stage' as in the 'stage on which a scene is exhibited or acted.' The relative order of these is not certain; but, so far as instances have been found, the scene' appears first. The Anglo-L *pegina* is in form identical with the known ancient L *pagina* leaf (of a book), Page *sb* 2, and it is noteworthy that from *pagina* French had, beside the popularly descended *page*, a literary form *pagine*, *pagene*, 'page of a book', which also came into Eng in the forms PAGINE, *pagyne*, *pagyn*, and even (in 15th c.) *pagent*, forms which are identical with some of those of *pageant* There is thus no difficulty so far as concerns *form* in identifying *pagina* 'pageant' with *pagina*, *pagine*, *pagyn*, *pagent*, 'leaf or 'page And it is easy to conceive how the sense 'page' or 'leaf' of a MS play, might have passed into that of 'scene' or 'act', but direct evidence connecting the two has not been found On the other hand, some, who take 'stage as the earlier sense, have suggested for *pagina* a possible passage of sense from 'tablet or slab (for inscription) to 'board', and so to 'stage'; or have seen in the 14–15th c Anglo Latin *pegina* a more

or less independent formation from the stem *page-* of I *pangere* to fix, cognate with L *compagес, compago, com pâgium* 'fixing together', 'joining', *compâgmâtio* 'fixed together (whence perh 'framework') or I ave thought it a representative, in some way, of L *pâgina*, Gr πηγνυ-ναι framework fastened or joined together', spec 'a movable stage or scaffold used in theatres This last exactly gives the sense of *pâgina*, 'pageant', and not only has Du Cange examples of med L *pâgina* as 'a wooden machine on which statues are placed but Cotgrave has ' *pagmente* a stage or frame whereon Pageants be set or carried Thus it is indisputable that 'pageant in the sense 'stage would exactly render L *pâgina*, and further that the stem *pag-* of *pâgina* is cognate with πηγν- of πηγνυ-ναι but of any actual historical relation between the forms of these words, or any passage of *pâgina* into *pâgina* in med L, there is no trace. It had been supposed that an earlier Anglo L example of *pâgina*, in a sense like boarding, existed in the final paragraph of the 11th or 12th c treatise of Alexander Neckham *De Utensilibus*, printed (very ma curately) in T Wright's *Lit of Vocabularies* 1857, pp 96–119, from MS Cott. Titus D 20, ff 48 b, where Wright has ut lingnum hujus pagine forti aderat tegminibus i but the actual reading of the MS is' ut lingnum *hic compingine* forti adh]ære-t tegminibus ; so that the supposed *pâgina* boarding has no existence.]

'The hot strife which raged till recently as to whether Pahlavi is Semitic or Persian has been closed by the discovery that it is merely a way of writing Persian in which the Persian words are purely represented—to the eye not to the ear—by their Semitic equivalents Thus for *bread* we write *lhm*, which is the Aramaic *lehem*, but they pronounced it *nan* which is the common Persian word for bread Similarly bsra the Aramaic *basrā* flesh was pronounced as the Persian *gōsht* The alphabet actually used was derived from the Old Aramaic.
