The number of compounds so formed in Greek was very great, usually they were adjs., having derived sbs. and other words, and capable themselves also of being used as sbs , e g *φιλό σοφος* loving wisdom, a wise man, hence *φιλοσοφία*, *φιλοσοφὸς*, *φιλοσοφεῖν* to philosophize, etc.; *φίλορνις* fond of birds, *φιλορνιθία* fondness for birds, etc. Among these were some formed on national names, as *φιλέλλην* loving the Hellenes or Greeks, *φιλολακων* loving the Lacedæmonians Many of the Greek compounds have come down (frequently through Latin, usually with formative suffixes) into English; and, on the model of these, *philo-* (*phil*) has been employed to form new compounds, the second element of which is properly Greek, but often Latin, and even, esp in nonce-words, English or in Eng use *Philo-* has thus become a living element, esp. with national names, as *philo-German*, *philo-Russian*, *philo Turk*, and the like.

1775 Jones *Phil. Inquiries* on works attributed to Raymond Lully (1234 1315) and in those of Arnoldus de Villa Nova (1240–1314) Probably it was used earlier ; it appears in various medieval works of uncertain age or doubtful authenticity e.g. in the *Clavis Mayeris* 5 *splendia* attributed to Artefius or Artesius, whose date has been put by some at 1130. In some of these also we find *lapis philosophicus* & *philosophi ni s* But the earlier works (e g the mediæval Latin *De Investigatione Perfectis Magisterii*) passing as translated from Geber (Vii Mus. Ja fa ar Al) usually refer to it simply as *Lapis* the Stone or *noster lapis* our stone Albertus Magnus (1205 82) who doubted the transmutation of metals, refers to it as *lapis quem philosophi laudant ubiq ie* the stone which the philosophers everywhere laud and *lapis quem homoranat philosophi* It is thus possible that it is *philosophorum* originated later as an identifying adjunct to *lap s*, as if the Stone of which all the philosophers speak the Stone of the philosophers, and this full descriptive phrase grew at length into a specific name or title It will be seen that the correct form is not *Philosopher's* but *Philosophers stone*]

Gr φλογιστόν, neuter of φλογιστός burnt up, inflammable, vbl. adj. from φλογίζειν to set on fire, f φλόξ, φλογ- flame, ablaut deriv of φλέγ, root of φλέγειν to burn] A hypothetical substance or 'principle' formerly supposed to exist in combination in all combustible bodies, and to be disengaged in the process of combustion, the 'principle of inflammability', the matter of fire, conceived as fixed in inflammable substances

This use of the term and the theory connected with it were introduced by Stahl in 1700 in his ed of Becher's *Physica Subterranea* of 1669. The latter used φλογιστόν from φλόξ used by Sennert (in 1619) in the sense of the being in flammable' inflammability or combustibility as a *quality* of some substances, but not regarded as a substance or principle. The existence of phlogiston was denied by Lavoisier in 1775, and though stoutly maintained by Priestley, the belief in it was generally abandoned by 1800.

The application of the term has tended continually to be narrowed It originally (from Arist) included the study of the whole of nature (organic and inorganic) and even included spirits (God angels etc) among its objects. In the course of the 18th cent it became limited to inorganic nature, and then by excluding chemistry it acquired its present meaning see 2

In current usage, restricted to that science, or group of sciences, treating of the properties of matter and energy, or of the action of the different forms of energy on matter in general (excluding Chemistry, which deals specifically with the different forms of matter, and Biology, which deals with vital energy) See quots. 1900.

Physics is divided into *general physics*, dealing with the general phenomena of inorganic nature (dynamics molecular physics, physics of the ether, etc) and *applied physics* dealing with special phenomena (meteorology, terrestrial magnetism, etc). There is a tendency now to restrict the word to the former group.

manifestations of the same fundamental energy 1900 W Watson *Textbk Physics* 2 We are led to define Physics in its most general aspect as a discussion of the properties of matter and energy It is, however, usual to exclude the discussion of those properties of matter which depend simply on the nature of the different forms of matter (Chemistry) as also the properties of matter and energy as related to living things (Biology) The line of demarcation separating Physics and Chemistry has never been very clear, and of late years has practically vanished.

Pick (plk), *v*[1] Forms α. 17 pio(l)an, 4 pyken (§ -yn), piken, 4–9 *Sc.* and *north. dial* pike, pyke. β. (7 & 9 pik), 5–7 pioke, 6 pyoke, pioque, Sc. pyk, pik, 6– pick. [This vb. is found with long and short *i*, *piken*, *pik(e)*en, *pyke*, *pyck*, of which the former is app. the earlier, but the latter the surviving form in Standard Eng., though *pike* (paik) survives in the same senses in northern and some midland dialects. The earliest known trace of the word is in the vbl sb *pycunge* (? *i* or *i*), a gloss on L *stigmata*, in Corpus Gloss *c* 725, implying a vb *pycan* (? or *i*) or *pīcan* to puncture MS. F. of the OE Chronicle has, *anno* 796, a verb uncertainly read *pycan* or *pytan*, more prob. the latter. Otherwise no examples have yet been found before 1300. In sense 1 there is evident connexion with PICK *sb*[1] 1, PIKE *sb*[1] 1, and (esp. in 1 b) some agreement of sense with F *piquer* (which is similarly related to *pic*); but the sense-development in Eng is very different from that of F. *piquer* and the cognate Pr, Sp, Pg. *picar* and It *piccare*, which adhere always more or less closely to the sense 'puncture, pierce, prick, sting', a notion which in Eng. barely enters into sense 2, and is entirely absent from the other senses. On the other hand, verbs akin in form and meaning occur in the Middle and Modern stages of the Teutonic langs. cf. late ON. (13th c.) *pykkva*, *þykkva* 'to peck, prick' (Vigf.), Norw *pykka*, Sw. *pycka*, Da. *pykke* to pick, peck, pierce with pointed tool, also to beat, palpitate, throb; MLG, LG, E.Fris. *pokken* to pick, peck, MDu *pucken* to pick, peck as a bird, pierce or strike with beak, cut with sickle or scythe (Kilian); Du. *pikken* to pick, peck; mod.Ger (from LG) *picken* to peck as a bird, pick or puncture with a sharp tool (also *piken*, *pucken*) Compare also Welsh *pigo*, Corn. *piga* 'to prick, sting, pick, peck' (said e g of a pin, a thorn, a bird), which goes with *pig* sb fem. 'anything pointed, sharp point, beak, bill, neb'; with similar forms in Breton, and a large family of derivatives and connected words, from the root *pik-*. All these words in the various languages go back to earlier forms in *pik-*, *pik-*, *pikk-*; but the question of their ulterior history and relations is involved in obscurity and conflicting difficulties. The Romanic verbs point to an original form **picāre*, related to **picus*, Sp *pico*, It. *pic*, for conjectures as to the origin of which see PIKE *sb*[1], note. In OE., *pycunge* is supported by the sb. *pīc*, *pīc*, PIKE; but there are no cognate words in the other Teutonic languages in their early stage. In Welsh and Cornish, however, *pigo*, *pigo*, appear to be native words; going back, with the cognate sb. *pig*, to a Brythonic root *pik-*, corresponding perhaps to a proto-Celtic **pīk-* (see PIKE *sb*[1], note). The modern Irish and Gaelic *pic*, *pioc*, and their derivatives are, of course, from English.

The two forms *pīck* and *pike* might have been treated as separate words, as in the sb. PICK[1], PIKE[1] But in the inflected forms of the vb. in early quots., the length of the *i* is often doubtful, so that the separation would be difficult; and in modern times, *pike* exists only as a dialect form of *pick*. It is therefore most convenient to combine the two under the current literary form *pick*, separating the examples, where possible, under α and β, and stating in what senses *pike* continues in dialect use. Sometimes there is differentiation; in S. E. Scotch, *pike* is distinct from *pick*, and used only in senses 2, 2 b, 3, 3 b; 1 but in other Sc. and Eng. dialects, and in earlier Sc, *pike* is used in other senses also.]

[*Note.* The chronology of the word in French and English, with the fact that our earliest instances refer to the Continent, and are sometimes in the French form *pique nique*, show that the word came from French (although some French scholars, in ignorance of these facts, have, in view of the obscurity of its derivation, conjectured that the French word was from Eng.) Hatfield Darmesteter merely says "Origin unknown." The Eng. *picnic* appears to be borrowed from French. Scheler mentions several conjectures, amongst others that of Bonifacc (18) "repas où chacun *pique* au plat pour sa *mique* (*nique* taken in the sense of small coin)." Others think it merely a rhyming combination formed on one of its elements. In Foote's *Nabob* (1777) Act 1, one of the characters uses *nick nack* for *pick nick*: intended perhaps to show that *pick nick* was still a little known word, liable to be confounded or associated with better known native words or combinations, such as *knick-knack*. But cf. Pickmickery quot 1803, "pick nickery and nick nackery."]

[*Note*. The etymology of *pike*, sb 1 (PEAK *sb* 1, PEAK *sb* 2, and the vbs. PEAK 1, PICK 1, PICK, presents many difficulties. OE *pīc*, ME *pic*, seem to be the same word as OF and mod F *pic*, corresp to Prov. *pic*, Sp, Pg *pico*, all applied to something sharp-pointed, and having a cognate vb, F *piquer*, Pr, Sp, Pg *picar*, It *piccare*, to pierce, prick, sting, etc. The origin of this Romanic family is disputed. Diez referred it to L *pīc-us* the woodpecker, in reference to the action of the long and powerful beak with which that bird hammers, picks, and pierces the bark of trees. The phonetic difficulty that the c of L *pīc-us* and is derived **pīcc-re* would not remain in the mod langs, but be lost in F. (*pi*, *pier*), and elsewhere become *g*, has been met by the suggestion that the group, being of echoic origin, retained the *c* or *k* unchanged, or that late L had, beside *pīc-us*, the popular forms **pīcc-us* and **pīcc-āre* (perh due to echoic modification), which phonetically give the mod modern forms. Celtic origin or influence has also been suggested. Welsh *pig* anything pointed pointed end, point, pike, beak, bill, with its cognate vb *pigo*, Cornish *pigo* to prick, sting, pick, peck (said of a thorn, a bird etc.) and a large group of connected words in Welsh, Cornish and Breton, point to an original **pīk-*. The Brythonic cognate of OIr *cich* (Proto Celtic **qīk-*), found on the OIr gloss *cuch i ger* (i. e. 'sharp') from the *Book of Lecan*, printed by Stokes in *Archiv für Celtische Lexicographie* I 59 (1900) 73). In the Teutonic langs. OE *pīc* appears to stand alone in the early period ON had *pīk*, app as a personal nickname (*Hakon Pik*) in 1218 c, and as a common noun *pīk* a pikestaff c1330; in same sense MSw had *pīk*, and 13th c Norw had *pīkstaffr*; mod Sw and Norw *pik*, M.Da. *pyg*, Da *pig* point, prickle. The probability appears to be that these were adopted from the same source as Eng. *pike*. See also PICK *sb* 1]

Pike (paik), *sb* 1 *north Eng* Also 3, 7 **pik**, 6 **pyke**. [app. either a local application of PIKE *sb*.3, or of Norse origin: cf West Norw dial *pīk* a pointed mountain, *pīktind* a peaked summit.]

1. A northern English name for a pointed or peaked summit, or a mountain or hill with a pointed summit; entering extensively into the nomenclature of mountains and hills in and around the English Lake district.

**The names in *Pike* have their centre in Cumberland, Westmorland, and Lancashire-above-the-sands, where are Scawfell Pike, Langdale Pikes Pike o Stickle, Causey Pike, Grasedale Pike, Red Pike, White Pike, Wansfell Pike, etc., they gradually thin off in the surrounding counties, examples being Rivington Pike in mid Lancashire, Backden Pike, Pinnar Pike, Ree Pike, in Yorkshire; Pontop Pike in West Pike, in Durham; Glanton Pike, East Pike, West Pike, Three Pikes, in Northumberland; Hartshorn Pike, The Pike in Roxburghshire, Black Pike in Selkirkshire, etc. It is notable that the *pikes* are localised in the district of England characterized by Norse topographical names, the country of the *hacks*, *fells*, *dales*, *howes*, *riggs*, *cams*, *screes*, *thwaites*, and *tarns* that the name is ancient, as old as sense 2 of PIKE 3, and that *pik* is used in precisely the same way in West Norwegian dialect.

b. A cairn or pillar of stones erected on the highest point of a mountain or hill; also, a beacon, tower, or pile on an eminence.

Many of the natural pikes (e g Rivington Pike) were beacon hills; hence the name appears to have been some times associated with a beacon.

A contrivance for the punishment of offenders, consisting usually of a wooden framework erected on a post or pillar, and formed, like the stocks, of two movable boards which, when brought together at their edges, leave holes through which the head and hands of an offender were thrust, in which state he was exposed to public ridicule, insult, and molestation In other forms, the culprit was fastened to a stake by a ring round his neck and wrists. (In quot *a* 1380, the name is applied to the cross) The Chinese *cangue* is a species of portable pillory

In Great Britain the punishment of the pillory was abolished except for perjury in 1815 and totally in 1837 In Delaware U S, it was not abolished till 1905.
