On *prep* B), so as to remove the ambiguity of *on*, *upon*, after certain verbs, e g 'to jump on cloak', *On to* thus has the same relation to *on* that *into* has to *in* But while *in to, into*, was in use already by 900, the need for *on to, onto* appears not to have been felt before the 16th c, while its written recognition as a combination is still quite recent and limited Yet, in the sense in which it corresponds to, *into* is in speech a real compound, the *n* being shortened by its rapid passage into the allied mute *t*, while in *on to*, as two words, the *n* is long and does not glide into the *t* But by most writers *on to* is avoided, or used only when ambiguity cannot be otherwise avoided (cf quots 1777, 1837, 1863, 1870, 1873, 1881)

On to onto in this sense must be carefully distinguished first from a ME *onto* a frequent scribal variant of *unto* ; and secondly, from modern instances in which *on* as the extension of *upon*, is followed by *to* as a separate word, e g *to walk on* to the next station, *to floats on* to the sea, to *hang on* to a party to *lead on* to another point, a ship *lies broadside on* to the waves. Here the two words are no more connected than in *up to* and *down to* or *by back to home to* Some who write or print *onto* have care lessly misused it in such connexions

A term first of Italian, and then of French politics, which in English use has been extended to characterize any method or course of action by which a party or person adapts him self to and seeks to make profitable use of, the circumstances of the moment (The introduction of the word has often been erroneously ascribed to Gambetta.)

Optimism (*p* ptɪmɪz m) [n f *optimisme*, in mod L *optimismus*, f I *optim us* best see -ism]

1 A name given to the doctrine propounded by Leibnitz in his *Théodicée* (1710), that the actual world is the 'best of all possible worlds', being chosen by the Creator out of all the possible worlds which were present in his thoughts as that in which the most good could be obtained at the cost of the least evil Also applied to doctrines of earlier or later thinkers to a like effect.

Leibnitz in his *Théodicée* uses *optimum* as a technical term on the model of *maximum* and *minimum* Hence the Jesuits who conducted the *Mémoires de Trévoux* in the number for Feb 1737 gave to his doctrine the name *optimisme* It appears in the *Dict Trévoux* 1752 It was its general diffusion to the end of the century by Voltaire in *Candide ou l'Optimisme* 1759 and was admitted into the *Dict Acad.* in 1762

1737 *Mem de Trévoux* (Fev) 297 En termes de l'art il l'appelle *la raison du meilleur* ou plus savamment encore et Theologiquement tautant que cometriquement les systeme de *l'Optimisme* ou l'Optimisme

B. Signification

1 *generally* A particle co-ordinating two (or more) words, phrases, or clauses, between which there is an alternative

Things so co-ordinated may differ in nature or quality, or merely in quantity, in which case the one may include the other as in 'it will cost a pound or thirty shillings', 'two or three minutes 'a word or two The second member may also express a correction or modification of the first, which may be strengthened by negation or *or even*, *or rather*, *or at least*

b When singular subjects (sb or pron) are co ordinated by *or*, strict logic and the rules of modern grammarians require the vb and following pronouns to be singular, but at all times there has been a tendency to use the plural with two or more singular subjects when their mutual exclusion is not emphasized

When the subjects differ in number or person, the rule is that the vb and pronouns should agree with the last or nearest, e g For thou art to blame I or thou or he is the author of it (Lindley Murray); but such constructions are apt to seem stiff and pedantic, and consequently avoided. The question of gender causes further complication—esp the want of a 3rd pers. pron. of common gender To say either 'if he or she has his or her friends' or 'if he or she has her friends with her may be misleading while 'if he or she has his or her friends with him or her' is clumsy and pedantic which is avoided by saying 'have their friends with them 1 so Your brother or sister will lend their aid These difficulties appear to have been felt at all times and have been sometimes met by making the verb immediately precede or follow the first subject, and agree with it

2 The alternative expressed by *or* is emphasized by prefixing to the first member, or adding after the 1st, the associated adverb EITHER, formerly OTHER or OUTHER (the latter still in dialect use), e g 'you may have either an apple or a pear', 'I could eat an apple or a pear either'

The primary function of *either*, etc is to emphasize the perfect indifference of the two (or more) things or courses: e g you may take either of the two, as in the medial and its value are equally at your option, you may take either; but a secondary function is to emphasize the mutual exclusiveness, = either [a] but not both For full illustration, see EITHER OTHER, OUTHER the following are early examples of the various forms

This termination appears in the following suffixes

1 or (formerly often *our*), representing ultimately L *-ator, -orem*, in nouns of condition from intr vbs in *-ere* less usually from other vbs as *error, horror liquor, pallor, stupor, tenor, terror, torpor, tremor*, etc. Such of these as existed in ME were formerly spelt with *our*, e g *errour, horrour, lycour, tenour* In other words of the same class, as *ardour, favour, fervour, humour, labour, rigour, talour, vygour* as also in some words not directly connected with extant L verbs, as *colour, honour odour, our* is generally retained in British usage, but American usage spells these also with *-or ardor, favor, labor, color honor*, etc

2. or (formerly often *our*), repr I *-or -orem* of agent-nouns, formed on stems identical with the ppl or 'supine' stems of verbs Of these there are three varieties

a Those repr L agent nouns other than those in *-ator, -itor, -tor, -sor*, as *actor, assessor, author, captor censor confessor, doctor, elector, extensor, factor, flexor inventor lictor, oppressor pastor possessor, professor, rector, sculptor, sponsor, stu essor, transgressor tutor, victor* These are of different ages, going back to OF words in *-or, -ur*, AF in *-our* F *-eur*, or L in *-or* So far as they existed in ME, they were then spelt *-our*, e g *actour, assessour, authour, censour, confessour, dettour, doctour* etc, they are now all conformed to the I spelling in *-or*.

b Agent nouns in L *-ator, -itor, -tor, -sor*, in coming down in living use into OF., were regularly reduced from *-atōr-em*, etc, through *-eðor* to *-eor, -eur*, AF *-eour*, which became in ME. *-our*, and in F *-eur*, and thus fell together with those from simple *-ōr-em* in a. Such are *barrator, cessor*, (= *-cessatōr-em*), *conqueror, demor, emperor imperatōr-em*), *governor, juror, lesor, solicitor, vendor, visitor (visitātōr-em)* To this group also belongs *saviour* (AF *sauveour* —OF *salveor, salveour* L. *salvator em*, which has preserved the vowel before *our* In these may be added agent nouns formed in Fr or AF on the vb stem, in imitation of those in *-eor, -eur, -our*, repr L. *-ātorem, -etc*, as *purveyor, surveyor, tailor grantor, warrior* (AF *werreyour*, f *werreiur* to war) From want of evidence it is sometimes uncertain whether the agent noun was already formed in late I in *-ator, -itor*, or in Fr after these suffixes had been reduced to *-eur* and *-eur*, AF *-our*

c Agent nouns in *-ator, -itor, -tor, -sor, -sdor* adopted in later times in Fr, or in Engl, retain *t*, appearing in French as *-ateur, -teur*, etc, and have now in Eng the same written form as in I e g *administrator, agitator, creator, curator, dictator, equator, gladiator, innovator, legislator, navigator spectator, translator, vindicator orator, procurator, senator, auditor, creditor, editor, janitor, monitor, servitor executor* These are of different ages some from OF or AF (in which case they formerly had *our*, as *creatour, creditour, de latour, oratour, servitour*), some of later formation immediately from I, which have had the *or* form from the first The pronunciation varies greatly, the stress being sometimes as in the L. nominative (*crea tor, cre ditor* sometimes on the second syllable before the stressed vowel of the AF and L accusative (on which a secondary stress fell originally in ME.), as in *ad ministrator, ac cusatour*), as in *creatour*), *creditour*), *orātour* (*o ratour*), *servitour* (*ser vitour*), *executour* (*ex ecutour*), *executour* (*ex ecutour*), *executour* (*ex ecutour*), sometimes corresponding with that of the Eng vb, as *admi nistrator, a gitator, s nitator, pro secutor*, or otherwise shifted, as *pro cu ator* In some cases two forms exist, as *cura tor* after L nom, *cu rator* after *cu rātor-em, cu ratorem*

d or is sometimes an alteration of another suffix, as of I *-ārius*, F *-ier*, AF *-er*, in *ba heloz chancellor, herbor*, etc of Eng *-er* —OE *-ere* in *sailor bettor*

The freq e occurrence of ME. *-or* in mod use is legal terms is due to joining the prec suffix *-er* (*-ier*) to the prec active t upon its *-ee* (*-e*) e g *lessor lessee grantor grantee mortgagor mortgagee* has imparted a kind of technical or professional character to the ending, and explains the differentiation f *sailor* one who sails professionally from *sailer* In ME there was a tendency to confuse the endings *-er* and *-our* (helped prob by the OF declension nom *-eres* L. *-ātor* acc *-or -or*, L *-ātōrem*) thus *butcher ditcher fletcher sailer setter sleger porter* etc are found alle with the ending *-our* On the other hand in a large number of words, the original *-our -or* has since the 15th c been exchanged for the *-er* of agent nouns of English deriva tion such as *barber brasier chandler labourer pleader preacher ryber rimer* or *rhymer* in all which the earlier *-our -or* is the etymological form.

3 or (our) sometimes represents F *-oir*, from various sources, as *manoir* OF *manoir, manier*, I *manere, mirror*, F *miroir*, I **miratorium* so with *our, parlour*, F *parloir*, L **parlatōrium*

4 or, repr ME and AF *our*, F *cur*, I *-orem*, a variant of *-or*, suffix of the comparative degree of adjs, in *major, minor* See -or.

5 The name of certain religious societies in the Roman Catholic Church.

a. Originally and strictly applied to the Congregation of *St. Philip Neri* (or *congregatio oratorii de patribus Congregationis Oratorii*), a society of simple priests without vows for fulfilling certain and peculiar services, so instituted at Rome in 1564 and recognized by the Pope in 1575; so named from the small chapel or oratory built over the cells of the founder, St. Philip Neri, and those of St. Jerome in which the founder and his first followers, Fathers of the Oratory, used on their early services before 1574. In 1577 the congregation removed to the new church (*Chiesa Nuova*) of the Vallicella in which were constructed the usual accessories of a public Oratory, now also a local designation: see also the quotation as to the Oratory at Birmingham.

The word has not been found in ME except in a single instance in Chaucer's *Troylus* (perh. from Latin or French). Its modern historical use began c 1575, partly as an Englishing of med L. *ordālium* partly as an adaptation of the OE. word. The true repr of OE. *ordāl* would be *ordale*; the received spelling *ordeal* arose in 16th c. Verstegan, who associates the word with *deal* 'part' (OE. *dǽl*). *Or* is here understood for due or right *deal*, for parte, as yet we vse it so as *ordeal* is another, as to say a iudgement at this present it is a word generally vsed in Germanie & the Netherlands, in stede of dome or iudgement (*Dec Intell* iii. 63) Ignorance of the etymological relationship has led to the pronunciation *or-de-al*, as in *boreal, cereal, lineal*.]

1. An ancient mode of trial among the Teutonic peoples, retained in England till after the Norman Period, in which an accused or suspected person was subjected to some physical test fraught with danger, such as the plunging of the hand in boiling water, the carrying of hot iron, walking bare foot and blindfold between red-hot ploughshares, etc, the result being regarded as the immediate judgement of the Deity Hence applied to analogous modes of determining innocence or guilt, still practised in various parts of the East, and among the less civilized races generally

With the exception of wager of battle which is sometimes included in the class, the various forms of ordeal were abolished in England 1215-16.

The arrangement here followed is in many points merely provisional.

This has some affinities with sense 3 (see qu c 1507 from Hooker there) But the pl. form *holy orders* & *priest's orders* to take *priest's orders* have a different origin from the ministry rather than to the ministerial or clerical order as a class or body of men.

In the modern organ the pipes are distributed into sets or *stops* of various qualities of tone, the admission of wind to the several stops being controlled by handles or *draw-stops*, drawn in and out by hand or by mechanism worked by special pedals (*combination-pedals*); and the stops are arranged in groups, each separate group forming a *partial organ* (see d) and being controlled by a separate keyboard; these are usually from two to five in number, one of the keyboards consisting of *pedals* played with the feet, the rest being *manuals* played with the hands; these can be connected in various ways by *couplers* so as to sound together

From its power and dignity of tone the organ has been distinctively the church instrument from early Christian times, and in modern times is also used in concert halls and other buildings.

The instrument has of course undergone immense changes since the 4th c when it is first referred to in L writers, and

There is much Musicke, excellent Voice, in this little Organe 1611 BIBLE *Ps* cl with stringed instruments and organs. 1667 MILTON *P L* VII 596 The Harp the solemn Pipe, And Dulcimer, all Organs of sweet stop

2 *spec* A musical instrument (in its modern form the largest and most comprehensive of all), consisting of a number of pipes, supplied with *wind* or compressed air by means of bellows, and sounded by means of keys, which on being pressed down admit the wind to the pipes by opening valves or *pallets*

In the modern organ the pipes are distributed into sets or *stops* of various qualities of tone, the admission of wind to the several stops being controlled by handles or *draw-stops*, drawn in and out by hand or by mechanism worked by special pedals (*combination-pedals*); and the stops are arranged in groups, each separate group forming a *partial organ* (see d) and being controlled by a separate keyboard; these are usually from two to five in number, one of the keyboards consisting of *pedals* played with the feet, the rest being *manuals* played with the hands; these can be connected in various ways by *couplers* so as to sound together

From its power and dignity of tone the organ has been distinctively the church instrument from early Christian times, and in modern times is also used in concert halls and other buildings.

The instrument has of course undergone immense changes since the 4th c when it is first referred to in L writers, and

even since the date of the earliest Fug references According to Grove's *Dict Mus* II 576 'At the commencement of the 8th c the use of the organ was appreciated as the art of making it was known in England But although mentioned from that period in Latin documents no Englishman is specifically in this sense are known in OE or Early Mp

Of unknown origin for the conjecture that the F or med L might be altered from *l aureolum* 'golden' (idea, in sense 'gilded chamber', there is no historical foundation; the Fr forms in *eu*, *eau* point to an original *ō* not *au*]

Although much research has been expended upon the history of this word and esp. upon the development of the current use in *oriel window*, the sense history remains in many points obscure and perplexed. Mr W Hamper in an exhaustive article in *Archæologia* XXIII (1831) 114, asserts, and app. proves, for *oriel* the senses, penthouse, porch (attached to an edifice), (detached) gatehouse, loft, upper floor, gallery (for minstrels) It is also shown in Parker's *Domest Archit*, that the name was applied to a gallery or upper chamber in the west end of a domestic chapel, or to a small private apartment having a window looking into the chapel (see also *Bentley's Qu Rev* 1860 Jan 497) The earliest sense known is that of 'portico, passage, corridor, gallery, assured from OFr (Godef) and med L., and it is probable that 'oriel window' meant at first 'window in a gallery or balcony' Most of the earlier senses claimed by Mr Hamper are found only in L context, examples in Eng being scarce. The modern Cornish use of *oriel* is however an important link.

Oriel (*o*·rĭel) Also 5 **oryel**, **oriell**, 5–6 **oryall**, 6–8 **oriall**, 7 **orial**, **oryal**, 7–8 **oriol**, (9 **oriole**) [Mf. a. OF *oriol* (*eurieul*, *oeurieul* (in Godefroy) 'porch, passage, corridor gallery', med L. (? from Fr) *orīolum* (in Matt Paris, *a* 1259) 'porch, entrance hall, anteclamber']

Of unknown origin for the conjecture that the F or med L might be altered from *l aureolum* 'golden' (idea, in sense 'gilded chamber', there is no historical foundation; the Fr forms in *eu*, *eau* point to an original *ō* not *au*]

Although much research has been expended upon the history of this word and esp. upon the development of the current use in *oriel window*, the sense history remains in many points obscure and perplexed. Mr W Hamper in an exhaustive article in *Archæologia* XXIII (1831) 114, asserts, and app. proves, for *oriel* the senses, penthouse, porch (attached to an edifice), (detached) gatehouse, loft, upper floor, gallery (for minstrels) It is also shown in Parker's *Domest Archit*, that the name was applied to a gallery or upper chamber in the west end of a domestic chapel, or to a small private apartment having a window looking into the chapel (see also *Bentley's Qu Rev* 1860 Jan 497) The earliest sense known is that of 'portico, passage, corridor, gallery', assured from OFr (Godef) and med L., and it is probable that 'oriel window' meant at first 'window in a gallery or balcony' Most of the earlier senses claimed by Mr Hamper are found only in L context, examples in Eng being scarce. The modern Cornish use of *orrel* is however an important link.

Ose, obs. form of OOZE

-ose¹, a suffix representing Latin *ōsus*, forming adjs. from substantives, with the meaning 'full of', 'abounding in', e.g. *anim-ōsus* full of eyes, *clām-ōsus* screaming, *cōpi-ōsus* rich, *pecūni-ōsus* moneyed, *rēligi-ōsus* scrupulous. As a living suffix *-ōsus* came down to OF. as *-ous, -os*, later *-eus, -eux*, AF and Eng *-ous* (ME. also *-ose*), which survives with pronunciation (*-ōs*). But from the 15th c. onward there was a tendency to alter *-ous* words to *-ose* after L., as seen in such forms as *ambitiose, gloriose, malitiose, pompose, virtuose, wilde*. None of these displaced the earlier forms in *-ous*, but a few words formed directly from L. from the

15th c onward have taken their place in the lan guage, as *bilharzia*, *globose* (18th c.), *jovase*, *morosi*, *verbose* (17th c.), *otiose* (18th c.), *grandiose*, *pulose* (19th c.). In a few cases *-ous* and *-ose* forms are both in use, e g. *acerous*, *acerose*, *acinous*, *acinose*, those in *-ose* being more technical. Originally these words have the stress on the suffix, *joco se*, *morose*, but this is not always maintained in more recent usage, esp in words of more than two syllables Nouns of state from these adjs , as from those in *ous*, end in *-osity globosity*, *verbosity*.

-ose ², *Chem* , a suffix originating in the ending of the word *glucose*, and employed in forming the names of the related carbo-hydrates, *saccharose* and *cellulose*, with the isomers of these, as *dextrose*, *levulose*, *dulcose*, *galactose*, *mannitose*, *lactose*, *maltose*, *melezitose*, *melitose*, *mycose*, *synanthrose*, *trehalose*, *amylose*, etc.

These formations are due to the French chemists, and the earlier of them appeared first as Fr words *Glucose* was so named by the committee of the *Académie des Sciences* (Hénard, Gay Lussac Biot, Dumas) who reported 16 July 1838 upon the mémoire of Peligot il résulte que le sucre de raisin, celui d amidon, celui de dextrine, et celui de mie constituent un seul corps, que nous proposons d appeler *glucose* (*Mole* γλυκος [mspr χολ, molt, un doux *Comptes Rendus* VII 108 (1838) *Inulose* was thus merely a frenchified representation of the Gr word γλυκυς must, sweet wine, sweetness , with *u* for *ευ* and *ose* for *-οε* (Littre s assumption that the term was derived from γλυκυς sweet, in accordance with which he essayed to alter it to *glycose* was thus historically erroneous.) The name *cellulose* was given by Braconnant, Pelouze and Dumas in reporting upon the memoire of Payen 14 Jan 1839 En effet, il y a dans les bois le tissu primitif, nommé avec l amidon, que nous appellerons *cellulose* et le plus souvent mêlé qui en remplit les cellules, et qui constitue la matière ligneuse véritable' *C R.* VIII 51 (1839) *Cellulose* was thus formed *on cellule*, but there is no evidence that its inventors thought of a L adj **cellulosus*] and app the ending *ose* was given simply to match *glucose* It appears from other statements that the actual author of *glucose*, and presumably also of *cellulose*, was Dumas, the *rapporteur* of the c mmittees. The ending *ose* was soon extended ; contractions of *levo-glucose* (Berthelot) and *d.-levo-glucose* (Kekulé) gave *levulose* and *dextrose*, and the forms *lactose*, *melit se* etc. followed

Osse, oss (*ɒs*), *v.* Now *dial* [Found in w mid dialect in 14th c., and still common from the Welsh Border to Cumberland and Northampton, much affected by Ph Holland in his versions of Latin authors to render *omnari* and its synonyms, as in Osse *sb.* to render *omen* The latter has not been found in previous writers, though Holland (who, as Head Master of Coventry Free School, had oppor tunity of knowing the facts) refers to both sb and vb as old words well known in the North See Osse *sb* (not 1900) According to the known evidence the sb appears to be derived from the vb, but the origin of both is involved in obscurity

Holland was confirmed in his use of these words by be heving that they were derived from Gr *ὄσσα* ominous voice or sound, prophecy permutation the circumstance of which and its vb *ὀσσ-ομαι* to presage, foretoken forebode with *osse* sb and vb is certainly very remarkable yet it is impossible that an English vb in popular use in the 14th c could be derived from Greek without many intermediate links of which none are known The verb is also found in mod colloquial Welsh as *ysio* to give tokens of shore wishes, this is merely a recent adoption from the adjacent English form (Ray's conjecture of identity with F *oser* to dare (founded on a modern dialect use) is phonetically and historically futile)]

1 The formation of bone, the process of becoming or changing into bone, the condition of being ossified.

Centre of ossification, the initial point from which this process starts in the joints at which cartilage or connective tissue begins to ossify.

1697 in Baker (*title*) Curious Osteologicus. Being a Collection of Doctors of the Bones. Shewing their Nature manner of Ossification, Nourishment [etc.] 1733 Belcher in *Phil. Trans.* XXXVIII. 196 The gradual Increase of the Bones is described, even from the first Stages of Ossification, to that of an Adult. 1830 R. Knox *Béclard's Anat.* 203 Ossification of the arteries is most commonly the lot of old age. 1857 *Sargent's Anat.* 45 This bone presents three centres of ossification, one for its middle part, and two for the lateral regions. 1865 Holden *Hum. Osteol.* (1878) 24 The bone called the sacrum has as many as 33 centres before its ossification is complete.

2 *concr.* The result of the process, a bony formation or concretion, bone as a formation.

1705 W. Cowper in *Phil. Trans.* XXIV. 1790 The Trunks of the Arteries of the Leg were Obstructed by Petrifactions or Ossifications. 1807 M. Baillie *Morb. Ossifrage (ɒ·sifrēdʒ) [ad. I. *ossifrag us*, a, name of a bird of prey, the 'bone breaker', from *ossifragus* bone-breaking, f. *os*, *ossi* bone + *frag*, root of *frangĕre* to break. Cf. It *ossifrago*.]

The *ossifraga* of Pliny is identified by modern naturalists with the Lammergeyer, which has also been awkwardly taken and is said to let them fall from a great height upon rocks and stones so as to break them. But the name appears to have been early transferred in France and England to the Fish hawk, to which, in its assumed modern forms *osfraie*, *osprey*, it is now applied. *Ossifrage* has subsequently been taken directly from the L. form neither simply to render the L, or to name the bird held to be meant by Pliny, but has sometimes been used merely as a synonym of Osprey. (In modern Ornithology, *Ossifraga* has been awkwardly taken by Bonaparte as generic name of the Giant Fulmar, a bird of the petrel family. See also Osprey.)

1 As a rendering of *ossifraga*, or as a name for the Lammergeyer or Geir Eagle, or of some kindred species identified with the bird called by the Romans *ossifraga*.

Holme *Armoury* II. 266/1 The Ossifrage or Dispoued Eagle is of a dusky hue, yet of different colour, from the Eagle. 1871 White Melville *Sarchedon* III. xi. 150 Such kin they seemed to their conquerors as the dog to the wolf, the ossifrage to the eagle.

1847 in WEBSTER **1880** J. A. ALLEN *N. Amer. Pinnipeds* 225 The largest species of the Otaries are Hair Seals, while the smallest are Fur Seals.

This form was superseded c 1130 by *oðer* (first in O. 1 Chron, anno 1127, last example of *oððe* in a sentence in which *oðer* also occurs, 1131) The ME. of the 1 Orpl Text was *Peow* (1200–1225) has regularly *oððer* for OE *oððe*

Though the date of the first appearance of this conj is so narrowly defined, its actual source remains a debated question It has been held to be identical with the adj pron Other (see prec), and (more frequently) with the adj pron Other, OE. *ōðer, ōððer, ōðer* Both these pro nominal words were indeed in OE used alternatively to introduce the alternative *oððe* (see Other *adj pron* B 1 b, Other *adj pron* 1 b) but there is no trace in OE. of *oðer* (*ōðer*) or *ōððer* taking the place of the first member of the alternative *oððe oððe* — the much less of both members, and least of all of the simple conj *oððe* On the contrary the simple conj remained invariably *oððe*, and the alternative (so far as the evidence shows) *oððe oððe* shown to the abrupt substitution of *oðer* c 1130 It is true that in the 14th c., in northern, north midl and e midl Eng, *ayther, ayther*, began to take the place of *ayther* as the first member of the alternative *ayther ayther* ... or *ayther or* (the second remaining as *or*, less usually *ayther*), just as later still (in Wyclif and Chaucer) *either* became the midland form of the first member: but these were changes several centuries later than the substitution of *oþer* for *oððe* c 1130 with which they have no historical connexion It seems more probable that the *oðer* or *oþer* of 1130 was a modification of *oððe* itself due to some association with words in *-er* alone being a streaulcss word was probably reduced in pronunciation to *oðe* (cf *Oþ-nales* from *nalles ōðen* (1140) from *nōðem*, etc) Thus we are reminded of the parallelism of development between HG *ēdde, ede, oder, ete, oder*, and OE *ōðde, ōðer, ōðe*, (**ede, oðer* or *oþer*, and are led to suspect for the *r* of German

oder and of ME *ofer* the same *ea* a similar explanation The form *oððer* used by the early 13th c scribe of *Hept. Ðddefwne* may either be his accommodation of the *oðða* of his original to the *oðer* of his own day, or an actual *inter* mediate form. It does not seem possible to fix the quantity of the *o* in ME. *oðer*, even from Ormin's spelling, but if derived from *oðða*, **oða*, it was presumably short Ormin's reduced form *oþþr* and *orr* (see *Or conj.*) and the later *or*, had, of course, short *o*, from which the *ō* of most emphatic. *or* is regularly developed

III As auxiliary of predication

5 The general verb to express duty or obligation of any kind, strictly used of moral obligation, but also with various weaker shades of meaning, expressing what is befitting, proper, correct, advisable, or naturally expected. Only in pa t (indic or subj), which may be either past or present in meaning (The only current use in standard Eng)

The subject is properly the person (or thing) bound by the obligation which latter is expressed by a following infinitive (with, formerly also without, *to*) sometimes omitted by ellipsis. Followed by a passive infinitive, it expresses obligation on the part of some undefined or unexpressed agent the subject in this case being the person etc. to whom the obligation is due (e g *parents ought to be honoured* = it is a duty to honour parents)

α In past sense = Owed it to duty, was (were) bound or under obligation (*to do* some thing) Usually, now only, in dependent clause, corresponding to a preceding past tense in principal sense: *he said you ought* = he said it was your duty (Cf c below)

a c 1200 ORMIN 19108 Annd tohh swa þehh ne cnew himm nohht Þe wereldd alls itt ahhte. 1297 R GLOUC (Rolls) 4135 Yor he truste to hom mest as me hinch he wel ozte *c* 1300 *Havelok* 2787 Yif þat she aucte quen to be 1382 WYCLIF *Isa* V 4 *c* 1405 WYNTOUN *Cron* VIII ii 52 Robert þe Brwys, þe Kyngryk he ought to haue 1535 COVERDALE *Ps* CXVIII 165 Vnto the Lorde ought we to geue honoure *c* 1566 *Mirr Magist* 1787 Yif þat she aucte quen to be 1582 WYCLIF *Isa* V 4 *c* 1605 WYNTOUN *Cron* VIII ii 52 Robert þe Brwys, þe Kayrykryk he ought to haue

b In present sense = Am (is, are) bound or under obligation, *you ought to do it* = it is your duty to do it, *I ought to be there* = it is right that it should be done, it is a duty (or some one s duty) to do it (The most frequent use throughout Formerly expressed by the pres. t., OWE *v* 5.)

Thus appears to be orig the pa. subj (which in ME and mod Eng has the same form as the indic) used first in hypothetical or general cases e g Sir to one to tell the truth under all circumstances? If it should rain he ought not to go. If he cannot go to-day he ought to go to-morrow Hence, in later use, simply = he ought to what I ought to do now The use of the pa. subj softens the form of the expression of the parallel *you should* for *it s your duty, you ought to, you would you for you'll you, might I for may I; could you for can you*

1 A unit of weight, originally, as still in Troy weight, the twelfth of a pound, but in avoirdupos or ordinary goods weight the sixteenth of the pound.

The Troy ounce consists of 480 grains, and is divided into 20 pennyweights; the avoirdupois ounce contains 437 5 grains, and is divided into 16 drams. *Fluid ounce*, a measure of capacity, containing an avoird. ounce of distilled water at 60° Fahr (= 28 4 cubic centimetres). In the United States the fluid ounce is the quarter of a gill or 128th part of a gallon (= 29 57 cubic centimetres), containing 456·933 grains of distilled water at its maximum density It is thus an aliquot part of the pint, quart, and gallon, which the British fluid ounce is not.

-ous, *suffix*, repr L *ōs us* (*a, um*), forming adjs, with the sense of 'abounding in, full of, characterised by, of the nature of', e g *copi ous* as plentiful, copious, *dolōr-ous* as full of sorrow, dolorous, *fām ous* as famous, *gener ous* as distinguished by descent, generous, *glōri ous* as full of glory, glorious, *spin-ōs us* as full of thorns, thorny spinous *viri ous* as of the nature of bird lime, sticky, viscous, etc

Latin stressed long *ō* passed in OFr into a closer sound, intermediate between *ō* and *ū*, which was variously written *o* or *u* less commonly *ou* hence F adjs in *-dous* which either came down in popular use or were adopted at an early date, had in OF forms in *os, or us* (*ous*, e g *covetos us, doleros, us envios us glorios, us, religios us* In the 13th c the vowel sound had changed to (*ø*) written *eu* so that the suffix had now the form *eus* (*covoit eus dolereus, envieus glorieus* etc) and this still later was written in the masc *eux* (*convoiteux, envieux, glorieux* with fem however in *euse*) as still in modern F In Anglo Fr and early ME. the forms were the same as in early OF (*covetos us, envios, us glorios us*) but the vowel was soon identified with OE. long *u* and like it written after 1300 *ou* (*covetous envious, glorious*), the spelling ever since retained though the sound has passed through (*u us*, us) to *əs, əs* This *ous* having thus become the form of the suffix in all words from Norman Fr became the established type for all those of later introduction, whether adaptations of Fr adjs in *eus* or *ous* or L adjs in *ōsus* but see OUS I or new formations on the analogy of these, from Fr L, or Fr and L elements.

These new formations are numerous in the Romanic languages In French they have been formed freely, not only from F sbs. which had no such derivative in ancient F but also from French words themselves of L origin, and from mediæval and modern words from divers sources. Many of these new formations have the earliest attestations passed (with change of *eus* etc to *ous*) from French into English Such is the history, for example, of *advantageous adventurous courageous dangerous, gelatinous grie ous gummous, hazardous hideous joyous, lech rous mattmous monstrous orgullous pulpous ra enous, riotous slanderous* This process has been continued in Eng itself, where new adjs in *ous* have been formed not only on Latin Greek and Romanic bases but also on native Eng words and on some of obscure origin e g *blusterous boisterous lustrous ponderous severous murderous poisonous slumberous, thunderous timous troublous wondrous*

In some words in late or mod L the ending *ōsus* was added to an adj or vb last stage *-ōsus* is found beside the simple adjective e g *decor us, de or s us dubi us dubiōs us* in *It decoro, decoroso dubbio dubbioso* In the Romanic languages a few new forms of this kind appear e g L *pi us* Fr *pieux* (as if from **pi us*) But in English this addition of the suffix has been greatly developed and has become the ordinary mode of anglicizing L adjs of many kinds esp those in *-ent, -ans, -ans et ris ax ix x ior endus, ulus vorus cius cl, ajue ous igne ous extrane ous, herba e ous cons i ous ol i ous cirri ous ardu ous exigu ous adultes ous auersfes ous armiger ous, alacri ous hila i ous illustri-ous, capaci ous ferocious, stupefai ou gur ul ous omnivor ous sonor-ous*

This tendency to represent L *-ōsus* by *-ous* in Eng form in *-ous* may have been strengthened by the fact that the dictionary form of the L adj is the nom sing masc and that this in the majority of adjs ends in *us* the Eng pronunciation of which is the same as that of the Eng word in *-ous* so that the latter to the curs ry observer appears to be merely an Eng spelling of the L. It is evident however that *igne ous*, for example answers not only to L. *igne us*, but to *ignei gne us* etc and that the *ous* is an additional element And in comparing *alacri ous* with *alacri tas* with *hilari s capaci-ous* with *capaci*, the suffixal nature of the *ous* is manifest

b In some words *-ous* is a corruption of another suffix, e g in *right ous wri ous-ness courteous gri ous*, in others, as *bounteous* a contraction of an earlier suffix has taken place before *ous* see EOUS

c In *Chem* adjectives in *ous* formed on the names of elements, in binate acids and other compounds containing a larger proportion of the element in question than those expressed by an adj in *ic* e g *chlorous* acid *sulphurous* acid *cuprous* oxide *ferrous* salts etc see IC I b

d Nouns of quality from adjs in *ous* (however derived), are regularly formed in *-ousness*, as *courteousness conscientious ness righteousness*, those from L. *-us* have sometimes forms in *-osity*, as *curiosity generosity porosity viscosity* but this termination more frequently accompanies adjs in *-ose*]

Out, obs form of Ought, Aught

Out- in *comb* is used with substantives, with verbs and their derivatives, and with other adverbs

In OE. *ūt* adv was already prefixed (1) to ordinary sbs. in the sense of 'outward, out-lying' as in *ūt-land* 'a country that is out a land' a country that is a distant or foreign land *ūthere* an army belonging to or coming from without, a foreign army (*ofer-land*, *-here* and numerous other compounds derived from verbal roots, as *ūt-fer*, *ūt-faru*, *ūt-ferd*, *ūt-gang*, going out, exit departure *ūtdrif* expulsion *ūtdrifere* one who drives out *ūtlād* carriage out exportation, *ūtrec* running out, excursion, expiry, (2) to elements forming adjs, either related to the sbs. in 1 as *ūtgenge* *ūtgengle* outlandish, foreign, or derived from vbs. ppl adjs † *ūtor-weorde* out running, purguive. In these nominal compounds the stress was always on the prefix

With vbs. *ūt* like other adverbs formed separable collocations or semi-compounds, in which the position of the adv was shifted according to the construction of the sentence as in the separable compound verb of modern (or non-Old) English in OE the order was not yet so rigid). Thus, *ūt* followed the vb. in the imperative as *gā ūt! āc nū ne þonc þēnum* and in the pres. and pa. indicative in the principal sentence, as *he cymþ ūt he cōm ūt ba fōr, on ht ūt* But in the dependent sentence and in all other moods & parts of the vb. in finding the separable compound verb of modern (or non-Old) English, the adv stood immediately in front of the vb; thus *hē he ut cymþ* when he comes out, *gif he ut cyme* if he come out *nā utlīce ac gelōmlīce* not only he go out *ac gelōmlīce ūtgange* on the month going out In OE the adv was regularly written separate, but in translations from Latin compound verbs of the type *ūtgān* were formed on the compound vbs. in *ūt* in which the adv was not only joined but even retained before the vb in the principal sentence e g Ps. 54 5 *Min heorte ūtbrytt* my heart is broken 1 Kings 2 36 'in all *ūtfōran mīnefōt*. woon hyena The regular position of *ūt* before the vb in the inf gerund and pples naturally tended to make the collocation in passive and compound verb-forms, *ūtgewrecen* to *grome out outlook outlīkan* to look out It is only in later Engl that such collocations as a *going out* dress, a *cleaning out* of cupboards, the *bringers-out* of a new play, a well *thought-out* article, have become possible

As to the verbs themselves, in ME usage became more lax On the one hand the adv began to be placed after or away from the vb in the subordinate sentences, the infinitive, etc, or the other hand the older usage of the inf in *nī gān*, and the like, was often extended to the indicative, so that we find *he gōt ūt* as well as *he ūt gōt* Again, in ME partly due to a general levelling and loss of old syntactical distinctions, so that beside *he sprang out* and *then sprang he out*, it became allowable to say *he ut sprang*, and *ut sprange he*, in both of which the adv stands before the vb These novelties in word order were especially employed by metrical writers in the subordinate sentences of

23 a. In most of the groups 18 22, the compound vb in *out-* may be cognate with the object, being formed either on the simple verb belonging to the object, or directly on the object itself, usually unchanged, but sometimes with a verbal ending (e g *-ise*) The object may be a person or a thing, and the sense is 'to outdo the agent in his own sphere or work ', or 'to exceed or surpass the action, quality, or other thing'. Our earliest examples of this are from Shakspere, who has 'out-frowne Fortune's frowne', and 'out villaind villanie ', it is rare in the 17th c., but greatly used

in the 19th when also those formed on adj. appear Thus, formed on vbs , *to out-cook all cookery, out-leg a beggar, out blunder former blunders , out-compete competition or competitors out rival a rival or rivalry.* From adjs , *to out old the old, out-royal royalty* From sbs., *to out ambush ambushes, out balderdash balderdash, out blarney blarney, out calumnie calumnism, out famine famine, out fiction fiction, out horror all horrors , out bishop the bishop, out devil the devil, out jingo the jingo, out saint the saint out usure the usurer* A few examples are added in chronological order to show the development of this usage

b Hence esp with proper names of persons, nations, sects, etc , in the sense of 'to outdo the person, etc , in question in his special attribute' The classical example is Shaksp ere's OUT HEROD *Herod* , a few instances are found in the 17th c , esp in Fuller, and in the 18th c. in Swift, but the vast development of this, as of so many other Shakspearian usages, belongs to the 19th c , in which such expressions have been used almost without limit Examples are *out Achitophel, Alexander, Bentley, -Boniface, -Bonner, Brutus, -Darwin, Milton, -Mormon, Nero, -Ottoman, Quixote, Sternhold, -Timon, -Toby, -Trollope, Turk, Tola*, etc , and, with verbal ending *out-Calvinise, Germanise, -Gothamise, -Hobbesize, -Huntingtonise*, etc. A few examples follow in chronological order to illustrate the growth of the usage

Common in 13th c. in legal documents in the Latin forms *uthesium hutlessum hutlessum*, and later *hutesium*. These have been sometimes thought to be the source of the ME word, and to be themselves of OF origin derived from *huer huier*, to cry *hu, huée cry (hu à cri* hue and cry), which suits the sense perfectly But *hutesium* cannot be etymo logically accounted for from this source, nor is the word known in any form, Latin or vernacular outside England On the other hand, *uthesium* as a latinization of ME. *uthes* is quite in order It is very likely however, that *hutesium* and (still more) *hutlessum* are Norman Fr alterations, due to association with *huis hu huée Uthes uthesyn* are also most easily explained as Anglo Norman formations from *uthestiene* As to the sense, *uthes* would hardly mean 'outcry' but might well be the 'calling upon people to the pursuit of a thief or other offender, which is the sense in the oldest and other of the quots. † **On tfangthief.** *Old Eng Law Obs* In 2 **utfangene þeof**, **utfangenthief**, 3 **utefang**-, **utfangon**-, 3, 4 **outfangon**(e)-, **-fange-**, **-thef** [Answers to an OE type *útfangenne þéof* (accusative case) 'out-caught thief', but the expression appears to have come into use later, to match *in fangenne þéof*, Infangthief, q v] A franchise of a lord of a private jurisdiction, more extensive than that of Infangthief, originally, the lord's right to pursue a thief (at least when the latter was 'his own man') outside his own jurisdiction, bring him back to his own court for trial, and keep his forfeited chattels on conviction. But the right was variously defined or circumscribed in the 13th c, when its meaning seems to have already become conjectural

The term *infangenne þeof* occurs in several OF Charters, but of *útfangenne þéof* no trace has been found except in an alleged charter of Egbert dated 828 (Birch *Cartul Sax* No 398), which has the Latin phrase *quem foris cumpenem* stone intus et foris the apparent equivalent of an OE 'mid infangenum þeofe and útfangenum But this is extant only in the *Liber Roffensis*, which may be spurious, or the phrase may be a 12th c. interpolation The term is wanting from an Eng Fr Glossary of Law Terms compiled 1292-1300 (Wright *Rivio*, Rol 1277) 339 which contains *Infangenethef*—larum prin ens nostre tere On the other hand, *útfangene þeof* occurs in the forged Charter of Edgar to Glastonbury (Birch, No 1272), which was in existence before William of Malmesbury made the third version of his *Gesta Regum* 1130-40 (in which the charter is given); and it may thus go back to 1100, or even earlier

The etymological sense 'out caught thief', i e thief apprehended outside (the jurisdiction), is that assigned to it in the Ripon record of 1108, in which the grant 'in fangethef et outfangethef was explained as giving the grantee the right to try 'his own thef *ubicumque captum*, whether within or without his territorial jurisdiction. But Bracton and *Fleta* explain it as the right to try thieves coming *from without*, and apprehended within the lord's jurisdiction; they both expressly deny that it meant a thief *taken outside*, or that such a thief might be brought back into the jurisdiction to be tried *Fleta* how ever adds that, after his own thief had been condemned by the outside tribunal, the lord might bring him into his jurisdiction and hang him on his own gallows; and the right to do this appears to be all that Britton knows as 'the franchise of outfangenthef.
